These weaknesses became apparent in 1997 when a failure of economic confidence spread from Japan across Asia. By May 1998 food prices had trebled and riots broke out in Jakarta. The risk of society fragmenting along ethnic and religious lines was emphasized by the sufferings of the Chinese community. President Suharto was forced to stand down on 21 May 1998 and was succeeded by his vice-president, Bacharuddin Jusuf Habibie, who promised political and economic reforms. Continuing protest centred on the Suharto family, which still exercised control over large parts of the economy. In Aug. 1999 Timor-Leste, the former Portuguese colony that Indonesia invaded in 1975, voted for independence, a move that was eventually approved by the Indonesian parliament after violent

clashes between independence supporters and pro-Indonesian militia groups. It gained independence on 20 May 2002.

Abdurrahman Wahid was elected president by the People's Consultative Assembly in Oct. 1999. He oversaw some reform and economic growth but was forced to step down amid allegations of corruption on 29 Jan. 2001. His vice-president, Megawati Sukarnoputri, took control and assumed the presidency on 23 July 2001. In Oct. 2002 around 200 people died in a car-bomb explosion outside a nightclub in Bali. Jemaah Islamiyah, an extremist group with alleged links to Al-Qaeda, was implicated.

Indonesia's first direct presidential election took place in Sept. 2004 when Susilo Bambang Yudhoyono beat Megawati in a runoff vote. On 26 Dec. 2004 northwest Sumatra was hit by a devastating tsunami. The death toll in Indonesia was put at 166,000, mostly in Aceh. However, the disaster revived the peace process, initiated in late 2002, between the government and the separatist Free Aceh Movement (GAM). Accords signed in Helsinki, Finland in Aug. 2005 created a framework for a military stand-down on both sides.

## TERRITORY AND POPULATION

Indonesia, with a land area of 1,910,931 sq. km (737,615 sq. miles), consists of 17,507 islands (6,000 of which are inhabited) extending about 3,200 miles east to west through three time-zones (East, Central and West Indonesian Standard time) and 1,250 miles north to south. The largest islands are Sumatra, Java, Kalimantan (Indonesian Borneo), Sulawesi (Celebes) and Papua, formerly West Papua (the western part of New Guinea). Most of the smaller islands except Madura and Bali are grouped together. The two largest groups of islands are Maluku (the Moluccas) and Nusa Tenggara (the Lesser Sundas). On the island of Timor, Indonesia is bounded in the east by Timor-Leste.

Population at the 2010 census was 237,641,326; density, 124.4 per sq. km. Indonesia has the fourth largest population in the world, after China, India and the USA. In 2005, 51.9% of the population were rural.

The UN gives a projected population for 2015 of 251.88m.

Area, population and chief towns of the provinces, autonomous regions and major islands:

	Area (in sq. km)	Population (2010 census)	Chief town	Population (2010 census)
Bali	5,780	3,890,757	Denpasar	788,589

<sup>1</sup>Province with special status.

The capital, Jakarta, had an estimated population of 9.61m. in 2010. Other major cities (2010 census population in 1m.): Surabaya, 2.77; Bandung, 2.39; Bekasi, 2.33; Medan, 2.10; Tangerang, 1.80; Depok, 1.74; Semarang, 1.56.

The principal ethnic groups are the Acehnese, Bataks and Minangkabaus in Sumatra, the Javanese and Sundanese in Java, the Madurese in Madura, the Balinese in Bali, the Sasaks in Lombok, the Menadonese, Minahasans, Torajas and Buginese in Sulawesi, the Dayaks in Kalimantan, the Irianese in Papua and the Ambonese in the Moluccas. There were an estimated 6.5m. Chinese resident in 2005.

Bahasa Indonesia (Indonesian) is the official language; Dutch is spoken as a colonial inheritance.

### SOCIAL STATISTICS

Estimated births, 2008, 4,222,000; deaths, 1,434,000. 2008 estimated birth rate, 18.6 per 1,000 population; death rate, 6.3. Life expectancy in 2007 was 68.5 years for men and 72.5 for women. Annual population growth rate, 2000–08, 1.3%. Infant mortality, 2005, 28 per 1,000 live births; fertility rate, 2008, 2.2 births per woman.

### CLIMATE

Conditions vary greatly over this spread of islands, but generally the climate is tropical monsoon, with a dry season from June to Sept. and a wet one from Oct. to April. Temperatures are high all the year and rainfall varies according to situation on lee or windward shores. Jakarta, Jan. 78°F (25.6°C), July 78°F (25.6°C). Annual rainfall 71" (1,775 mm). Padang, Jan. 79°F (26.1°C), July 79°F (26.1°C). Annual rainfall 177" (4,427 mm). Surabaya, Jan. 79°F (26.1°C), July 78°F (25.6°C). Annual rainfall 51" (1,285 mm).

On 26 Dec. 2004 an undersea earthquake centred off Sumatra caused a huge tsunami that flooded large areas along the coast of northwestern Indonesia resulting in 166,000 deaths. In total there were more than 225,000 deaths in 14 countries.

### CONSTITUTION AND GOVERNMENT

The constitution originally dates from Aug. 1945 and was in force until 1949; it was restored on 5 July 1959.

The political system is based on *pancasila*, in which deliberations lead to a consensus. There is a 560-member *Dewan Perwakilan Rakyat* (House of People's Representatives), with members elected for a five-year term by proportional representation in multi-member constituencies. The constitution was changed on 10 Aug. 2002 to allow for direct elections for the president and the vice-president.

There is no limit to the number of presidential terms. Although predominantly a Muslim country, the constitution protects the religious beliefs of non-Muslims.

### National Anthem

'Indonesia, tanah airku' ('Indonesia, our native land'); words and tune by W. R. Supratman.

### GOVERNMENT CHRONOLOGY

Presidents since 1949. (Golkar = Party of the Functional Groups; PD = Democratic Party; PDIP = Indonesian Democratic Party–Struggle; PKB = National Awakening Party; PNI = Indonesian National Party)

1949–67	PNI	(Ahmed) Sukarno
1967–98	Golkar	(Mohamed) Suharto
1998–99	Golkar	Bacharuddin Jusuf Habibie
1999–2001	PKB	Abdurrahman Wahid
2001–04	PDIP	Megawati Sukarnoputri
2004–	PD	Susilo Bambang Yudhoyono

### RECENT ELECTIONS

Elections to the House of People's Representatives were held on 9 April 2009. The Democrat Party (PD) won 20.9% of the vote (148 of 560 seats), the Party of the Functional Groups (Golkar) 14.5%

(108), the Indonesian Democratic Party–Struggle (PDIP) 14.0% (93), the Prosperous Justice Party 7.9% (59), the National Mandate Party 6.0% (42), the United Development Party 5.3% (39), the National Awakening Party 4.9% (26), the Great Indonesia Movement Party 4.5% (30) and the People's Conscience Party 3.8% (15).

In the presidential election of 8 July 2009 incumbent Susilo Bambang Yudhoyono (PD) won 60.8% of the vote, former president Megawati Sukarnoputri (PDIP) 26.8% and vice-president Jusuf Kalla (Golkar) 12.4%.

### CURRENT GOVERNMENT

*President:* Susilo Bambang Yudhoyono; b. 1949 (PD); sworn in 20 Oct. 2004).

*Vice-President:* Boediono.

In March 2012 the cabinet was composed as follows:

*Co-ordinating Ministers: (Political, Legal and Security Affairs)* Djoko Suyanto; *(Economic Affairs)* Hatta Radjasa; *(People's Welfare)* Agung Laksono.

*Minister of Agriculture:* Suswono. *Communication and Information:* Tifatul Sembiring. *Defence:* Purnomo Yusgiantoro. *Energy and Mineral Resources:* Jero Wacik. *Finance:* Agus Martowardojo. *Foreign Affairs:* Marty Natalegawa. *Forestry:* Zulkifli Hasan. *Health:* Endang Rahayu Setyaningsih. *Home Affairs:* Gamawan Fauzi. *Industry:* Mohamad Suleman Hidayat. *Justice and Human Rights:* Amir Syamsuddin. *Manpower and Transmigration:* Abdul Muhaimin Iskandar. *Maritime Affairs and Fisheries:* Sharif Cicip Sutardjo. *National Education:* Mohammad Nuh. *Public Works:* Joko Kirmanto. *Religious Affairs:* Suryadharma Ali. *Social Affairs:* Salim Segaf Al Jufrie. *Tourism and Creative Economy:* Marie Elka Pangestu. *Trade:* Gita Irawan Wirjawan. *Transportation:* Evert Ernest Mangindaan. *State Secretary:* Sudi Silalahi.

*Government Website:* <http://www.indonesia.go.id>

### CURRENT LEADERS

#### Susilo Bambang Yudhoyono

*Position*  
President

#### Introduction

Retired general Susilo Bambang Yudhoyono, known widely by his acronym SBY, succeeded Megawati Sukarnoputri as president of Indonesia on 20 Oct. 2004. In the country's first direct presidential election he polled 61% of an estimated 125m. votes and he became the first incumbent to be re-elected in July 2009.

#### Early Life

Susilo Bambang Yudhoyono was born on 9 Sept. 1949 in the small town of Pacitan, in the east of the Indonesian island of Java. His family were observant Muslims and he attended a traditional *pesantren* (Muslim boarding school). He graduated from Indonesia's military academy in 1973 and joined the army, which was then, with Gen. Suharto as president, the country's dominant authority. He served as a senior officer in Indonesia's 1975 invasion of Timor-Leste, then a Portuguese colony. Gen. Suharto's 'New Order' political system was characterized by a strongly anti-communist foreign policy and relatively good relations with the USA. Yudhoyono travelled to the USA in 1976 and 1982, attending military training programmes at Fort Benning, Georgia. He later took a masters degree in business management from Webster University in Missouri and has since described the USA as his 'second home'. Between 1984–87 Yudhoyono returned to Timor-Leste and commanded Battalion 744 in the city of Dili. By the mid-1990s he had risen through the ranks to become chief-of-staff in the Jakarta command. Questions have been asked about his knowledge of a raid by security forces on the Jakarta offices of the Indonesian Democratic Party (PDI) on 27 July 1996 (then chaired by Megawati Sukarnoputri), which left five dead and 23 missing.

In 1996 Yudhoyono served as chief military observer with the United Nations force in Bosnia. Two years later, with Indonesia in turmoil following the ousting of President Suharto in March 1998, he left the army and was appointed the minister for mining and energy in the administration of Abdurrahman Wahid. When the Muslim cleric was succeeded as president in 2001 by Mrs Megawati, daughter of former president Sukarno, Yudhoyono joined her cabinet as chief security minister. He was praised for the way he handled the aftermath of the Oct. 2002 Bali bombing that killed 202 people. He subsequently helped draft Indonesia's first counter-terrorist law and attempted to broker a peace agreement with separatist rebels in the historically troubled province of Aceh in Sumatra in 2003, which collapsed in May of that year. In March 2004 Yudhoyono resigned from Megawati's increasingly unpopular cabinet to establish the Democratic Party (PD). In the first round of elections in April (for choosing the members of parliament and three tiers of local officials) the PD had a strong showing. On 5 July, when Yudhoyono, along with his running mate Jusuf Kalla—a business tycoon with ties to many of the country's Islamic clerics—fought in the country's first direct presidential elections, no candidate won more than 50% of the vote. This forced a run-off election between Yudhoyono and Megawati on 20 Sept. which Yudhoyono won with 60.9% of the vote. He was officially sworn in as president on 20 Oct. 2004.

#### *Career in Office*

In interviews with the international media Yudhoyono vowed to fight terrorism and eradicate corruption in his five-year term. He also promised to restore Indonesian institutions and the rule of law and to rebuild the economy. The president set himself the goal of creating jobs for 50m. unemployed Indonesians. He also pledged to repair the often fractious relationship with Australia. In the aftermath of the Indian Ocean tsunami of 26 Dec. 2004, which is estimated to have killed some 166,000 people on the Indonesian island of Sumatra, Yudhoyono was quick to accept aid and expertise from the international community. Handling relief and reconstruction was an opportunity for him to be a more decisive and approachable leader than his predecessor. It was also an opportunity for him to improve relations between Jakarta and Aceh—the region worst-affected by the tsunami—and in Aug. 2005 his government signed a peace agreement with separatist leaders granting greater political autonomy to the province. Elections for a provincial governor and district officials in Aceh took place in Dec. 2006.

Yudhoyono's government was confronted by renewed terrorism, as suicide bombers again targeted the tourist resort of Bali in Oct. 2005 killing 19 people, and by further natural disasters. In Nov. 2008 three Islamic terrorists convicted for their part in the Bali bombing in 2002 were executed by firing squad. However, extremist activity continued, notably the launching of suicide bomb attacks in July 2009 on two luxury hotels in Jakarta which killed nine people and injured at least 50 more. In the first half of 2010 a number of suspected Islamist militants were arrested in a series of anti-terrorist raids by security forces. Meanwhile, an earthquake in May 2006 and another tsunami in July killed around 6,500 people on Java, floods in Jakarta in Feb. 2007 left an estimated 340,000 people homeless, another earthquake in Sumatra the following month killed more than 50 and, in Sept. 2009, an earthquake off the coast of Sumatra left more than 1,000 dead. Further extensive casualties followed another earthquake off the western coast of Sumatra and the volcanic eruption of Mount Merapi in Oct. 2010.

By 2008 Yudhoyono's political popularity was being undermined by continuing unemployment, rising prices and a cut in fuel subsidies, despite increased spending on anti-poverty programmes and significant progress in his anti-corruption drive. Nevertheless, in parliamentary elections in April 2009 his Democrat Party emerged as the largest party and in July he was returned to office with 60.8% of the vote in the presidential poll.

Following a final report in July 2008 by a joint investigative commission that blamed Indonesia for human rights violations in the run-up to Timor-Leste's independence in 2002, Yudhoyono expressed the Indonesian government's deep regret but did not apologize.

#### **DEFENCE**

There is selective conscription for two years. Defence expenditure in 2008 totalled US\$5,108m. (US\$22 per capita), representing 1.0% of GDP. Real-term military spending was cut by 7% in 2008.

#### **Army**

Army strength in 2007 was estimated at 233,000 with a strategic reserve (KOSTRAD) of 40,000 and further potential mobilizable reserves of 400,000.

There is a paramilitary police some 280,000 strong; and a part-time local auxiliary force, KAMRA (People's Security), which numbers around 40,000.

#### **Navy**

The Navy in 2007 numbered about 45,000, including some 20,000 marines and around 1,000 in Naval Aviation. Combatant strength in 2007 included two diesel submarines and 11 frigates.

The Navy's principal command is split between the Western Fleet, at Teluk Ratai (Jakarta), and the Eastern Fleet, at Surabaya.

#### **Air Force**

Personnel (2007) 24,000. There were 94 combat capable aircraft, including A-4s, F-16s, F-5s and British Aerospace *Hawks*.

#### **INTERNATIONAL RELATIONS**

Indonesia was in dispute with Malaysia over sovereignty of two islands in the Celebes Sea. Both countries agreed to accept the Judgment of the International Court of Justice which decided in favour of Malaysia in Dec. 2002.

#### **ECONOMY**

Agriculture accounted for 12.9% of GDP in 2006, industry 47.0% and services 40.1%.

#### **Overview**

In the 1970s the economy was based on agriculture, fishing and forestry. Its main exports consisted of a few primary products such as crude oil, natural rubber, coconut oil, copra and tin. Falling oil prices after 1983 encouraged industrialization. From the mid-1980s the strongest growth was in manufacturing, which averaged 13% real annual growth in the half decade from 1984–88, according to the Economist Intelligence Unit. In 1991 the manufacturing share of GDP moved ahead of agriculture for the first time. The mining sector also grew strongly during this period, exploiting the country's vast mineral resources. Led by a push to develop tourism, the service sector also expanded.

By the first half of the 2000s the growth rates of the various sectors converged, with the EIU estimating that mining and manufacturing output grew between 6% and 7%, and services and agriculture almost 4% in 2004. However, an estimated 42.1% of the labour force was still employed in agriculture in 2006. Main export commodities are oil and gas and electrical appliances.

Indonesia was the country worst hit by the Asian financial crisis that began in 1997. The dual banking and foreign exchange crisis caused real GDP to contract by over 13% in 1998 while inflation surged by close to 60% and the debt-to-GDP ratio jumped. In response the Indonesian Bank Restructuring Agency (IBRA) was established to recapitalize state banks. Interest rates were raised sharply to reduce inflation while regulatory, institutional and other reforms helped regain investor confidence. In 1999 the economy stabilized and in 2000 it resumed growth at a solid pace. Despite a strong recovery, growth performance did not match the 7.6% annual average in the half decade from 1992–96 or the 8.9% average in the half decade from 1987–91.

However, the economy witnessed above 5% growth in the period 2004–06 and over 6% in 2007 and 2008.

As a consequence of the global financial crisis, growth slowed in 2009 but was still an encouraging 4.6%, boosted by domestic consumption and sovereign ratings upgrades. The pace of growth accelerated in 2010 and Indonesia was the only G20 member besides China and India to continue growth during the crisis. The country's fiscal stimulus package equalled about 1.1% of GDP, half the average stimulus in the G20. Indonesia was also the only G20 member with declining debt in 2009, falling to approximately 29% of GDP.

Indonesia still faces problems related to poverty, corruption, the effects of climate change and inadequate infrastructure. The IMF has advised continued efforts to improve public infrastructure and bolster the business climate.

### Currency

The monetary unit is the *rupiah* (IDR) notionally of 100 *sen*. Inflation rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
11.5%	11.8%	6.8%	6.1%	10.5%	13.1%	6.0%	9.8%	4.8%	5.1%

In Aug. 2009 foreign exchange reserves were US\$55,440m., gold reserves were 2.35m. troy oz and total money supply was 490,111bn. rupiahs.

### Budget

The fiscal year used to start 1 April but since 2001 has been the calendar year. Revenue in 2005 was 495,444bn. rupiahs (tax revenue, 70.0%) and expenditure was 509,419bn. rupiahs (current expenditure, 58.5%).

The standard rate of VAT is 10%.

### Performance

Real GDP growth rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
3.6%	4.5%	4.8%	5.0%	5.7%	5.5%	6.3%	6.0%	4.6%	6.1%

The Asian economic crisis of 1997 affected Indonesia more than any other country, leading to a recession in 1998 when the economy shrank by 13.1%. In 2010 total GDP was US\$706.6bn.

### Banking and Finance

The Bank Indonesia, successor to De Javasche Bank established by the Dutch in 1828, was made the central bank of Indonesia on 1 July 1953. Its *Governor* is Darmin Nasution. It had an original capital of 25m. rupiahs, a reserve fund of 18m. rupiahs and a special reserve of 84m. rupiahs. In Jan. 2000 independent auditors declared that the bank was technically bankrupt. In response the IMF stated that future loans would probably depend on recapitalization and an internal reorganization.

In 2003 there were 138 commercial banks, 26 regional government banks, 76 private national banks and 31 foreign banks and joint banks. The leading banks are Bank Mandiri (with assets of US\$25.6bn. in June 2005), Bank Central Asia and Bank Rakyat Indonesia. All state banks are authorized to deal in foreign exchange.

The government owns one Savings Bank, Bank Tabungan Negara, and 1,000 Post Office Savings Banks. There are also over 3,500 rural and village savings banks and credit co-operatives. At least 16 banks closed in the wake of the 1997 financial crisis.

There is a stock exchange in Jakarta.

## ENERGY AND NATURAL RESOURCES

### Environment

Indonesia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.8 tonnes per capita.

### Electricity

Installed capacity in 2007 was 27.8m. kW and production in 2007 totalled 142.24bn. kWh (11.29bn. kWh hydro-electric). Consumption per capita was 630 kWh in 2007.

### Oil and Gas

The importance of oil in the economy is declining. The 2008 output of crude oil was 49.1m. tonnes, down from 76.5m. tonnes in 1995. Proven reserves in 2008 totalled 3.7bn. bbls. With domestic demand having surpassed production, Indonesia became a net importer of oil in 2005.

Natural gas production, 2008, was 69.7bn. cu. metres with 3,180bn. cu. metres of proven reserves. In 2001 a 640-km gas pipeline linking Indonesia's West Natuna field with Singapore came on stream. It is expected to provide Singapore with US\$8bn. worth of natural gas over a 20-year period.

### Minerals

The high cost of extraction means that little of the large mineral resources outside Java is exploited; however, there is copper mining in Papua, nickel mining and processing on Sulawesi, and aluminium smelting in northern Sumatra. Open-cast coal mining has been conducted since the 1890s, but since the 1970s coal production has been developed as an alternative to oil. Reserves are estimated at 28,000m. tonnes. Coal production (2007), 178.9m. tonnes. Other minerals: bauxite (2008), 1,152,000 tonnes; copper (2006), 818,000 tonnes (metal content); salt (2005 estimate), 680,000 tonnes; nickel (2006), 150,000 tonnes (metal content); tin (2006), 117,500 tonnes (metal content); silver (2005), 329 tonnes; gold (2005), 167 tonnes.

### Agriculture

There were approximately 22.0m. ha. of arable land in 2007 and 15.5m. ha. of permanent crops. 7.89m. ha. were irrigated in 2005. Production (2003, in 1,000 tonnes): rice, 52,079; sugarcane, 25,600; cassava, 18,474; coconuts, 15,630; maize, 10,910; bananas, 4,312; palm kernels, 2,187; sweet potatoes, 1,998; natural rubber, 1,792; cabbage, 1,450; groundnuts, 1,377; copra, 1,272; potatoes, 851; onions, 780; oranges, 733; mangoes, 731; coffee, 702; soybeans, 672; green beans, 620; chillies and green peppers, 553. Annual nutmeg production is 6,000 tonnes, more than two-thirds of the world total. Indonesia is the world's largest producer of coconuts.

Livestock (2003): goats, 13.28m.; cattle, 11.40m.; sheep, 8.13m.; pigs, 6.35m.; buffaloes, 2.46m.; chickens, 1.29bn.; ducks, 48m. Only China has more chickens.

### Forestry

In 2010 the area under forests was 94.43m. ha., or 52.1% of the total land area. The annual loss of 685,000 ha. between 2005 and 2010 was exceeded during the same period only in Brazil and Australia. In 2007, 103.42m. cu. metres of roundwood were cut.

### Fisheries

In 2005 total catch was 4,381,260 tonnes, of which 4,049,640 tonnes were sea fish. Indonesia's fish catch was the fourth highest in 2005, behind China, Peru and the USA.

## INDUSTRY

The largest companies in Indonesia by market capitalization in March 2011 were: Astra International, an automobile company (US\$26.5bn.); and Bank Central Asia (US\$19.5bn.).

There are shipyards at Jakarta Raya, Surabaya, Semarang and Ambon. There are textile factories, large paper factories, match factories, automobile and bicycle assembly works, large construction works, tyre factories, glass factories, a caustic soda and other chemical factories. Production (2007, in 1,000 tonnes): cement, 35,033; palm oil, 16,900; distillate fuel oil, 11,828; residual fuel oil, 9,538; petrol, 8,363; fertilizers, 7,923; paper and paperboard, 7,223; kerosene, 6,894; raw sugar, 2,814; plywood,

4.2m. cu. metres; 464,800 cars and commercial vehicles (2009); 220bn. cigarettes (2005). Indonesia is the world's largest palm oil producer.

### Labour

The labour force numbered 111,947,000 in 2008 (69,144,000 men and 42,803,000 women). In 2008, 40.3% of employed persons worked in agriculture, forestry, hunting and fisheries, 16.7% in wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods, 12.2% in manufacturing and 6.0% in transport, storage and communications. National monthly average wage, 2008, 976,923 rupiahs. Unemployment in 2008 was 8.4%.

### INTERNATIONAL TRADE

Since 1992 foreigners have been permitted to hold 100% of the equity of new companies in Indonesia with more than US\$50m. part capital, or situated in remote provinces. Foreign debt was US\$138,300m. in 2005.

Pressure on Indonesia's currency and stock market led to an appeal to the IMF and World Bank for long-term support funds in Oct. 1997. A bail-out package worth US\$38,000m. was eventually agreed on condition that Indonesia tightened financial controls and instituted reforms, including the establishment of an independent privatization board, liberalizing foreign investment, cutting import tariffs and phasing out export levies.

### Imports and Exports

Imports and exports in US\$1m.:

	2002	2003	2004	2005	2006
Imports f.o.b.	35,652	39,546	50,615	69,462	73,868
Exports f.o.b.	59,165	64,109	70,767	86,995	103,514

Principal import items: machinery and transport equipment, basic manufactures and chemicals. Principal export items: gas and oil, forestry products, manufactured goods, rubber, coffee, fishery products, coal, copper, tin, pepper, palm products and tea. Main import suppliers, 2004: Japan, 14.2%; Singapore, 11.2%; China, 9.5%. Main export markets, 2004: Japan, 15.9%; USA, 13.6%; Singapore, 9.3%.

### COMMUNICATIONS

#### Roads

In 2006 there were 324,150 km of classified roads (27,668 km of highways or main roads), of which 54% was surfaced. Motor vehicles, 2005: passenger cars, 5,494,034; buses and coaches, 1,184,918; trucks and vans, 2,920,828; motorcycles, 28,556,498. There were 11,451 fatalities in road accidents in 2005.

#### Rail

In 2005 the national railways totalled 6,482 km of 1,067 mm gauge, comprising 3,012 km on Java (of which 565 km electrified), 1,348 km on Sumatra and 2,122 km which was non-operational. Passenger-km travelled in 2008 came to 18.5bn. and freight tonne-km to 5.5bn.

#### Civil Aviation

Garuda Indonesia is the state-owned national flag carrier. Merpati Nusantara Airlines is their domestic subsidiary. There are international airports at Jakarta (Sukarno-Hatta), Denpasar (on Bali), Medan (Sumatra), Pekanbaru (Sumatra), Ujung Pandang (Sulawesi), Manado (Sulawesi), Solo (Java) and Surabaya Juanda (Java). Jakarta is the busiest airport, in 2001 handling 11,192,000 passengers (6,685,000 on domestic flights) and 280,900 tonnes of freight. Denpasar handled 4,431,000 passengers in 2001 and Surabaya Juanda 2,380,000. In 2003 scheduled airline traffic of Indonesia-based carriers flew 211m. km, carrying 20,358,000 passengers (1,984,000 on international flights).

### Shipping

There are 16 ports for ocean-going ships, the largest of which is Tanjung Priok, which serves the Jakarta area and has a container terminal. In 2007 cargo traffic at Tanjung Priok totalled 42.0m. tonnes. The national shipping company Pelajaran Nasional Indonesia (PELNI) maintains inter-island communications. In Jan. 2009 there were 1,856 ships of 300 GT or over registered, totalling 5.15m. GT. Of the 1,856 vessels registered, 1,095 were general cargo ships, 261 oil tankers, 246 passenger ships, 92 bulk carriers, 85 container ships, 67 chemical tankers and ten liquid gas tankers.

### Telecommunications

In 2008 there were 30,378,000 main (fixed) telephone lines; mobile phone subscribers numbered 140,578,000 in 2008 (618.3 per 1,000 persons). There were 4.5m. PCs in use in 2006. Indonesia had 18.0m. internet users in 2008, up from 400,000 in 2000.

### SOCIAL INSTITUTIONS

#### Justice

There are around 250 district courts of first instance, 20 high courts of appeal and a Supreme Court of Justice (Mahkamah Agung) for the whole of Indonesia in Jakarta. Religious sharia courts with limited jurisdiction are also in place to handle civil cases between Muslim spouses.

The current legal system is a mixture of 'adat' (customary) law, Dutch colonial law and the national law that was brought in following independence in 1945. As in Dutch civil law, the rule of precedence does not apply.

The present criminal law has been in force since 1915 and is codified and based on European penal law. The death penalty is still in use; there were ten executions in 2008 (although none since).

The population in penal institutions in Oct. 2008 was 136,017 (58 per 100,000 of national population).

#### Education

Adult literacy in 2008 was 92.2%. In 2007 there were 29,796,705 pupils and 1,583,589 teaching staff at primary schools, and 18,716,929 pupils and 1,434,874 teachers at secondary schools. There were 3,755,187 students in higher education in 2007 and 265,527 academic staff. The University of Indonesia in Jakarta, founded in 1849, is the leading institution in the tertiary sector. Other prominent institutions include the Gadjah Mada University (Universitas Gadjah Mada) in Yogyakarta, the Parahyangan Catholic University (Universitas Katolik Parahyangan) in Bandung, the Bandung Institute of Technology (Institut Teknologi Bandung) and the Bogor Agricultural Institute (Institut Pertanian Bogor).

In 2007 public expenditure on education came to 3.6% of GNI and 17.5% of total government spending.

#### Health

In 2000 there were 34,347 doctors, 92,371 nurses, 11,547 midwives and 2,406 dentists. There were 1,162 hospitals in 2002, with a provision of six beds per 10,000 population.

#### Welfare

There are currently no unemployment benefits or family allowance programmes. Establishments with at least ten employees (or a monthly payroll of 1m. rupiahs or more) are obliged to contribute towards old-age, sickness and maternity benefits for employees with contracts of more than three months.

### RELIGION

Religious liberty is granted to all denominations. In 2001 there were 185.1m. Muslims (making Indonesia the world's biggest Muslim country), 12.8m. Protestants and 7.6m. Roman Catholics. There were also significant numbers of Hindus and Buddhists. In Feb. 2012 there was one cardinal.

**CULTURE****World Heritage Sites**

There are seven UNESCO World Heritage sites in Indonesia (the first four inscribed in 1991): Borobudur Temple Compounds, Ujung Kulon National Park, Komodo National Park, Prambanan Temple Compounds, Sangiran Early Man Site (1996), Lorentz National Park (1999) and the Tropical Rainforest Heritage of Sumatra (2004).

**Press**

In 2008 there were 226 paid-for daily newspapers (total estimated circulation of 5,450,000).

**Tourism**

In 2005 there were 5,002,000 foreign tourists, spending US\$4.5bn. In 2004 the government introduced a US\$25 fee for a 30-day visa and a US\$10 fee for a three-day visa.

**Festivals**

Independence from the Dutch is celebrated on 17 Aug. with musical and theatrical performances, carnivals and sporting events. The military parades on Armed Forces Day (5 Oct.) and women are celebrated on Kartini Day (21 April) in memory of Raden Ajeng Kartini, a symbol of female emancipation. In Bali the Hindu new year is marked by a day of silence, Nyepi, followed by a day of feasting. Muslim, Hindu, Buddhist and Christian festivals are marked throughout the country.

**DIPLOMATIC REPRESENTATIVES**

Of Indonesia in the United Kingdom (38 Grosvenor Sq., London, W1K 2HW)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Herry Sudrajat.

Of the United Kingdom in Indonesia (Jalan M. H. Thamrin 75, Jakarta 10310)

*Ambassador:* Mark Canning, CMG.

Of Indonesia in the USA (2020 Massachusetts Ave., NW, Washington, D.C., 20036)

*Ambassador:* Dino Patti Djalal.

Of the USA in Indonesia (Medan Merdeka Selatan 5, Jakarta)

*Ambassador:* Scot Marciel.

Of Indonesia to the United Nations

*Ambassador:* Desra Percaya.

Of Indonesia to the European Union

*Ambassador:* Arif Havas Oegroseno.

# IRAN

Jomhuri-e-Eslami-e-Iran  
(Islamic Republic of Iran)

Capital: Tehran

Population projection, 2015: 77.91m.

GNI per capita, 2011: (PPPS) 10,164

HDI/world rank: 0.707/88

## KEY HISTORICAL EVENTS

Neolithic farmers established settlements in the Zagros mountains, in the west of modern Iran, from 6000 BC. From around 2700 BC the southwestern region of Khuzestan was inhabited by Elamite societies, a formative influence on the first Persian empire, established by Cyrus the Great in 550 BC. His Achaemenian dynasty lasted until around 320 BC and was ruled from Persepolis. Persia was subsequently controlled by the Parthian and Sassanian dynasties, during which the Zoroastrian religion took hold. Arabians arriving in the 7th century AD spread the Islamic faith. Their armies defeated the Sassanians at Nahavand in 641, ushering in a period of control by Arab caliphs and, from the 10th century, Seljuk Turks. Persia came under the control of Ghengis Khan's Mongol armies in the 1220s and was then ruled by Timur from 1370.

The Safavid dynasty (1502–1736) was founded by Shah Ismail, who restored internal order and established the Shia sect of Islam as the state religion. The dynasty reached its zenith in the reign of Shah Abbas I (1587–1628), during which Esfahan became the Persian capital. In 1779, following the death of Mohammad Karim Khan Zand, Agha Mohammad Khan, a leader of the Qajars (a Turkmen tribe from modern Azerbaijan), attempted to reunify Persia. He regained Persian control over much of the Caucasus and established his capital at Tehran.

The Qajars fought with an expansionist Russia during the early 1800s and in 1828 Fath Ali Shah was forced to sign the Treaty of

Turkmanchai, acknowledging Russian sovereignty over present-day Armenia and Azerbaijan. The reign of Naser o-Din Shah (1848–96) saw a period of modernization and the increasing influence of the Russian and British empires in Persia, which continued after the adoption of the first constitution and the establishment of a national assembly in Aug. 1906. The discovery of oil in Khuzestan province in 1908 led to further British and Russian jockeying for control in the region.

Following a bloodless coup in 1921, Reza Khan began his rise to power. He was crowned Reza Shah Pahlavi on 12 Dec. 1925 and set about a programme of reforms, encouraging the development of industry, education and a modern infrastructure. Responding to Iran's support for Germany in the Second World War, the Allies occupied the country and forced Reza Shah to abdicate in favour of his son, Muhammad Reza Shah, who was sworn in on 17 Sept. 1941.

The British-controlled oil industry was nationalized in March 1951 in line with the policy of the National Front Party, whose leader, Dr Muhammad Mussadeq, became prime minister in April 1951. He was opposed by the Shah, who fled the country until Aug. 1953, when Mussadeq was deposed in an Anglo-American sponsored monarchist coup. The Shah's policy, which included the redistribution of land to small farmers and the enfranchisement of women, was opposed by Shia religious scholars. Despite economic growth, unrest was caused by the Shah's repressive measures and his extensive use of the *Savak* (secret police). The opposition, led by Ayatollah Ruhollah Khomeini, the Shia Muslim spiritual leader who had been exiled in 1965, was increasingly successful. Following intense civil unrest in Tehran, the Shah left Iran with his family on 17 Jan. 1979 (and died in Egypt on 27 July 1980).

The Ayatollah Khomeini returned from exile on 1 Feb. 1979, the Shah's government resigned and parliament dissolved itself on 11 Feb. Following a referendum in March, an Islamic Republic was proclaimed. The Constitution gave supreme authority to a religious leader (*wali faqih*), a position held by Ayatollah Khomeini until his death in 1989. Ayatollah Ali Khamenei then became the nation's supreme leader. In Sept. 1980 border fighting with Iraq escalated into full-scale war. A UN-arranged ceasefire came into effect on 20 Aug. 1988, and in Aug. 1990, following Iraq's invasion of Kuwait, Iraq offered peace terms and began the withdrawal of troops from Iranian soil. 30,000 political opponents of the regime are believed to have been executed shortly after the end of the war.

In 1997 the election of Mohammad Khatami as president signalled a shift away from Islamic extremism. A clampdown on Islamic vigilantes who were waging a violent campaign against Western 'decadence' was evidence of a cautiously liberal integration of the constitution. However, the conservative faction led by Ayatollah Ali Khamenei retained considerable power, including the final say on defence and foreign policy.

In July 1999 riot police fought pitched battles with pro-democracy students in Tehran in the worst unrest since the 1979 revolution. Islamic leaders remain divided on the degree of overlap between politics and religion.

The election of Mahmoud Ahmadinejad as president in June 2005 was seen by some analysts as signalling a return to the extreme conservatism that preceded Khatami's tenure. Ahmadinejad's anti-Israeli rhetoric caused international concern. Under his leadership, Iran recommenced uranium conversion research. Despite Tehran's insistence that the research programme was for peaceful purposes only, increasing international disquiet culminated with the International Atomic Energy Agency reporting Iran to the UN Security Council in Feb. 2006. In April 2006 President Ahmadinejad announced that Iran had successfully enriched uranium.

The country witnessed an upsurge of civil unrest in June 2009 following a disputed presidential election in which incumbent

president Mahmoud Ahmadinejad was declared the victor by a large majority.

### TERRITORY AND POPULATION

Iran is bounded in the north by Armenia, Azerbaijan, the Caspian Sea and Turkmenistan, east by Afghanistan and Pakistan, south by the Gulf of Oman and the Persian Gulf, and west by Iraq and Turkey. It has an area of 1,648,195 sq. km (636,368 sq. miles) including 116,600 sq. km (45,020 sq. miles) of inland water, but a vast portion is desert. Population (2006 census): 70,472,846 (2005, 66.9% urban). Population density: 46 per sq. km.

The UN gives a projected population for 2015 of 77.91m.

In 2010 Iran had 1.07m. refugees, mainly from Afghanistan. Only Pakistan has more refugees.

The areas, populations and capitals of the provinces (*ostan*) are:

Province	Area (sq. km)	Census		Capital
		Oct. 1996	Oct. 2006	
Ardabil	17,881	1,168,011	1,225,348	Ardabil
Azarbajejan, East	45,481	3,325,540	3,603,456	Tabriz
Azarbajejan, West	37,463	2,496,320	2,873,459	Orumiyeh
Bushehr	23,168	743,675	886,267	Bushehr
Chahar Mahal and Bakhtyari	16,201	761,168	857,910	Shahr-e-Kord
Esfahan	107,027	3,923,255	4,559,256	Esfahan
Fars	121,825	3,817,036	4,336,878	Shiraz
Gilan	13,952	2,241,896	2,404,861	Rasht
Golestan	20,893	1,426,288	1,617,087	Gorgan
Hamadan	19,547	1,677,957	1,703,267	Hamadan
Hormozgan	71,193	1,062,155	1,403,674	Bandar-e-Abbas
Ilam	20,150	487,886	545,787	Ilam
Kerman	181,714	2,004,328	2,652,413	Kerman
Kermanshah	24,641	1,778,596	1,879,385	Kermanshah
Khuzestan	63,213	3,746,772	4,274,979	Ahvaz
Kohgiluyeh and Boyer Ahmad	15,563	544,356	634,299	Yasuj
Kordestan	28,817	1,346,383	1,438,543	Sanandaj
Lorestan	28,392	1,584,434	1,716,527	Khorramabad
Markazi	29,406	1,228,812	1,349,590	Arak
Mazandaran	23,833	2,602,008	2,920,657	Sari
North Khorasan <sup>1</sup>	28,434	—	811,572	Bojnurd
Qazvin	15,491	968,257	1,143,200	Qazvin
Qom	11,237	853,044	1,040,681	Qom
Razavi Khorasan <sup>1</sup>	144,681	—	5,593,079	Mashhad
Semnan	96,816	501,447	589,742	Semnan
Sistan and Baluchestan	178,431	1,722,579	2,405,742	Zahedan
South Khorasan <sup>1</sup>	69,555	—	636,420	Birjand
Tehran <sup>2</sup>	19,196	10,343,965	13,413,348	Tehran
Yazd	128,811	750,769	990,818	Yazd
Zanjan	21,841	900,890	964,601	Zanjan

<sup>1</sup>Created from the former province of Khorasan in Sept. 2004.

<sup>2</sup>Including Alborz province, which was created from Tehran province in June 2010.

At the 2006 census the populations of the principal cities were:

	Population		Population
Tehran	7,797,520	Hamadan	479,640
Mashhad	2,427,316	Arak	446,760
Esfahan	1,602,110	Yazd	432,194
Tabriz	1,398,060	Ardabil	418,262
Karaj	1,386,030	Bandar-e-Abbas	379,301
Shiraz	1,227,331	Eslamshahr	357,389
Ahvaz	985,614	Qazvin	355,338
Qom	959,116	Zanjan	349,713
Kermanshah	794,863	Khorramabad	333,945
Orumiyeh	583,255	Sanandaj	316,862
Zahedan	567,449	Gorgan	274,438
Rasht	557,366	Sari	261,293
Kerman	515,991	Kashan	253,509

The official language is Farsi or Persian, spoken by 45.6% of the population in 2003. 28.5% spoke related languages, including

Kurdish (9.1%) and Luri in the west, Gilaki and Mazandarami in the north, and Baluchi in the southeast; 22.3% speak Turkic languages (particularly Azeri), primarily in the northwest. Iranians, who are Persians, not Arabs, are less emotionally connected to the plight of the Arab Palestinians than people in other parts of the Middle East.

### SOCIAL STATISTICS

2007–08 births, 1,286,716; deaths, 412,735. Rates (2007–08, per 1,000 population): birth, 18.1; death, 5.8. Expectation of life at birth, 2007, 72.5 years for females and 69.9 years for males. Infant mortality, 2005, 31 per 1,000 live births. Annual population growth rate, 2000–05, 1.5%; fertility rate, 2008, 1.8 births per woman. Iran has had one of the largest reductions in its fertility rate of any country in the world over the past quarter of a century, having had a rate of 4.8 births per woman in 1990. The suicide rate is 25 for every 100,000 people—more than twice the world average.

### CLIMATE

Mainly a desert climate, but with more temperate conditions on the shores of the Caspian Sea. Seasonal range of temperature is considerable, as is rain (ranging from 2" in the southeast to 78" in the Caspian region). Winter is normally the rainy season for the whole country. Abadan, Jan. 54°F (12.2°C), July 97°F (36.1°C). Annual rainfall 8" (204 mm). Tehran, Jan. 36°F (2.2°C), July 85°F (29.4°C). Annual rainfall 10" (246 mm).

### CONSTITUTION AND GOVERNMENT

The Constitution of the Islamic Republic was approved by a national referendum in Dec. 1979. It was revised in 1989 to expand the powers of the presidency and eliminate the position of prime minister. It gives supreme authority to the *Spiritual Leader* (*wali faqih*), a position which was held by Ayatollah Khomeini until his death on 3 June 1989. Ayatollah Seyed Ali Khamenei was elected to succeed him on 4 June 1989. Following the death of the previous incumbent, Ayatollah Ali Khamenei was proclaimed the *Source of Knowledge* (*Marja e Taghliid*) at the head of all Shia Muslims in Dec. 1994.

The 86-member *Assembly of Experts* was established in 1982. It is popularly elected every eight years. Its mandate is to interpret the constitution and select the Spiritual Leader. Candidates for election are examined by the *Council of Guardians*.

The *Islamic Consultative Assembly* has 290 members, elected for a four-year term in single-seat constituencies. All candidates have to be approved by the 12-member *Council of Guardians*.

The *President* of the Republic is popularly elected for not more than two 4-year terms plus a third non-consecutive term and is head of the executive; he appoints Ministers subject to approval by the *Islamic Consultative Assembly* (*Majlis*). The president is Iran's second highest-ranking official.

Legislative power is held by the Islamic Consultative Assembly, directly elected on a non-party basis for a four-year term by all citizens aged 17 or over. A new law passed in Oct. 1999 raised the voting age from 16 to 17, thus depriving an estimated 1.5m. young people from voting. Two-thirds of the electorate is under 30. Voting is secret but ballot papers are not printed; electors must write the name of their preferred candidate themselves. Five seats are reserved for religious minorities. All legislation is subject to approval by the *Council of Guardians* who ensure it is in accordance with the Islamic code and with the Constitution. The Spiritual Leader appoints six members, as does the judiciary.

### National Anthem

'Sar zad az ofogh mehr-e khavaran' ('Rose from the horizon the affectionate sun of the East'); words by a group of poets, tune by Dr Riahi.

## GOVERNMENT CHRONOLOGY

Spiritual Leaders of the Islamic Republic since 1980.

1980–89 Ayatollah Seyed Ruhollah Mousavi Khomeini  
1989– Ayatollah Seyed Mohammad Ali Hoseyn Khamenei

Heads of State since 1941.

*Emperor (Shah)*  
1941–79 Mohammad Reza Pahlavi

*Leader of the Revolution (Rahbar-e Enqelab)*

1979–80 Ayatollah Seyed Ruhollah Mousavi Khomeini

*President of the Republic*

1980–81 Abolhasan Bani-Sadr

*Interim Presidential Commission*

1981

*President of the Republic*

1981 Mohammad Ali Rajai

*Interim Presidential Commission*

1981

*Presidents of the Republic*

1981–89 Ayatollah Seyed Mohammad Ali Hoseyn Khamenei

1989–97 Hojatoleslam Ali Akbar Hashemi Rafsanjani

1997–2005 Hojatoleslam Seyed Mohammad Khatami

2005– Mahmoud Ahmadinejad

## RECENT ELECTIONS

In presidential elections held on 12 June 2009 official results indicated that incumbent president Mahmoud Ahmadinejad took 62.6% of the vote ahead of Mir-Hossein Mousavi with 33.8%, Mohsen Rezaee with 1.7% and Mehdi Karroubi with 0.9%. However, there were widespread accusations against the government of vote rigging and international observers also expressed doubt about the legitimacy of the results. Mir-Hossein Mousavi called for the result to be annulled. There were mass protests and civil unrest in the capital, with several deaths. The official turnout was put at 85%.

Elections to the Islamic Consultative Assembly were held on 14 March and 25 April 2008. In the first round of elections conservatives won 132 seats, reformists 31 and ind. 40. In the second round conservatives won 38 of 82 seats, reformists 15 and ind. 29. Five seats are reserved for religious minorities.

Elections to the Assembly of Experts were held on 15 Dec. 2006. 68 of the 86 available seats went to representatives of the conservative Combatant Clergy Association.

## CURRENT GOVERNMENT

In March 2012 the cabinet was composed as follows:

*President:* Mahmoud Ahmadinejad; b. 1956 (sworn in 6 Aug. 2005 and re-elected 12 June 2009).

*First Vice-President:* Mohammad Reza Rahimi.

*Head of Presidential Office:* Efsandiar Rahim Mashaie. *Vice-President and Head of National Atomic Energy Organization:* Fereydoon Abbasi-Davani. *Vice-President and Head of Cultural Heritage and Tourism Organization:* Seyed Hassan Mousavi. *Vice-President and Head of Environmental Protection Organization:* Mohammad-Javad Mohammadzadeh. *Vice-President for Management, Development and Human Resources:* Lotfollah Forouzandeh. *Vice-President and Head of Foundation for Martyrs and Veterans' Affairs:* Masoud Zaribafan. *Vice-President for Executive Affairs:* Hamid Baghaie. *Vice-President for Parliamentary Affairs:* Mohammad Reza Mir Tajedini. *Vice-President for Planning and Strategic Supervision:* Dr Ebrahim Azizi. *Vice-President for Science and Technology:* Nasrin Soltankhah. *Vice-President for International Affairs:* Ali Saeedlou. *Vice-President for Legal Affairs:* Fatima Bodaghi.

*Minister of Oil:* Rostam Ghasemi. *Interior:* Mostafa Mohammad Najjar. *Economy and Finance:* Shamseddin Hosseini. *Foreign Affairs:* Ali Akbar Salehi. *Agriculture Jihad:* Sadeq Khalilian. *Energy:* Majid Namjou. *Roads and Urban Development:* Ali Nikzad. *Industry and Business:* Mahdi Ghazanfari. *Co-operatives, Labour and Social Affairs:* Abdolreza Sheikholeslami. *Health and Medical Education:* Marzieh Vahid Dastjerdi. *Education:* Hamid Reza Haji Babaie. *Science, Research and Technology:* Kamran Daneshjoo. *Justice:* Morteza Bakhtiari. *Defence and Logistics:* Ahmad Vahidi. *Culture and Islamic Guidance:* Mohammad Hosseini. *Intelligence and Security:* Heidar Moslehi. *Communications and Information Technology:* Reza Taqipour. *Sport and Youth Affairs:* Mohammad Abbasi. *Cabinet Secretary:* Ali Sadoughi.

*Speaker of the Islamic Consultative Assembly (Majlis):* Ali Larijani.

*Presidency Website:* <http://www.president.ir>

## CURRENT LEADERS

### Ayatollah Seyed Ali Khamenei

#### *Position*

Spiritual Leader (wali faqih)

#### *Introduction*

Seyed Ali Khamenei succeeded Ayatollah Khomeini as Iran's supreme spiritual leader on the latter's death in June 1989, having previously served from 1981 as the third president of the Islamic Republic.

#### *Early Life*

Khamenei was born in Mashhad on 15 July 1939. He attended theological colleges in Qom, where he was a pupil of Ayatollah Khomeini, and Mashhad. From 1963 he was involved with the Islamic opposition to the regime of the Shah, for which he spent three years in prison and a year in exile. Active in the Islamic revolution of 1979, Khamenei was appointed to the Revolutionary Council and became deputy minister of defence. He was also leader of the Friday congregational prayers in Tehran from mid-1980 and, from Aug. 1981, was appointed secretary-general of the Islamic Republican Party (IRP), dissolved in 1987. He was injured in a bomb blast in June 1986.

#### *Career in Office*

On 2 Oct. 1981, as the IRP candidate, Khamenei was the first cleric to be elected as president, with 95% of the popular vote. Ayatollah Khomeini had previously barred the clergy from the office. He succeeded Mohammad Ali Radjai who had been assassinated in Aug. In Aug. 1985 he was re-elected, again overwhelmingly, for a second four-year term. On the death of Khomeini, Khamenei was elected to succeed him on 4 June 1989 by an Assembly of Experts. Previously a middle-ranking cleric (Hojatolislam), he assumed the title of Ayatollah, a constitutional precondition of appointment to the Islamic republic's spiritual leadership. In Dec. 1994 he was proclaimed the Marja e Taghlid (Source of Knowledge) at the head of all Shia Muslims.

The standoff between President Khatami's reformist government and the hard-line conservative Council of Guardians reached a critical point in the run-up to the Feb. 2004 parliamentary elections. The Council's disqualification of over 2,000 reformist candidates provoked threats of resignations in government and boycott in the electorate. Khamenei intervened in Jan. 2004 on state television, calling for review of the Council's decisions and backing the 83 Majlis deputies whose candidacies had been rejected. However, over a third of the Majlis' deputies resigned in protest on 1 Feb. 2004 and in the subsequent election religious conservatives regained parliamentary control.

Khamenei has since presided over a deterioration in relations with the Western powers over Iran's uranium enrichment activities and its alleged ambitions to acquire nuclear weapons. He

has nevertheless maintained Iran's right to continue developing nuclear technology for peaceful purposes. Western concerns were further heightened by the election in June 2005 of the hard-line Islamic conservative Mahmoud Ahmadinejad as state president and his formal endorsement by Khamenei. Furthermore, Khamenei upheld Ahmadinejad's disputed re-election in June 2009, dismissed calls for the poll to be rerun and endorsed the ensuing violent security crackdown on opposition to the regime. There has, however, been some speculation about Khamenei's continuing commitment to the president. He reportedly criticized Ahmadinejad's economic stewardship and inflammatory foreign policy rhetoric in the latter's first term, and in April 2011 he overruled Ahmadinejad's acceptance of the resignation of the intelligence minister.

## Mahmoud Ahmadinejad

### *Position*

President

### *Introduction*

Mahmoud Ahmadinejad won the run-off in Iran's presidential election on 24 June 2005. The ultra-conservative former Revolutionary Guard and mayor of Tehran promised to tackle domestic poverty and corruption, and analysts expected an end to the fragile social reforms made under his predecessor, President Mohammad Khatami. In foreign policy he has hardened Iran's stance towards the West, particularly over its nuclear programme, and engaged in anti-Israeli rhetoric, which has heightened international tensions. Signs of internal dissension during his first term were reflected in his hotly disputed re-election in June 2009, which provoked waves of opposition protests and repressive government retaliation for the rest of the year and into 2010. He has meanwhile maintained his uncompromising position on Iran's nuclear development activities and his hostility to the USA, while strengthening Iran's ties with left-leaning governments in Latin America.

### *Early Life*

The son of a blacksmith, Mahmood Ahmadinejad was born in 1956 in the village of Aradan in northern Iran. The family moved to Tehran a year later. In 1976 he took up a place to study civil engineering at the Iran University of Science and Technology (IUST). As a conservative student, he was supportive of Ayatollah Khomeini's Islamic revolution in 1979. Some of the 52 Americans who were held hostage in the US embassy after the revolution allege that Ahmadinejad was among those who captured them, though he strongly denies the claim. He remained at the IUST until the late 1980s, taking a masters degree in civil engineering, followed by a PhD in traffic and transportation engineering and planning, and then winning a professorship.

Ahmadinejad was drawn into the long-running Iran-Iraq war in 1986, when he joined the Islamic Revolutionary Guards and fought on the Iraqi border near Kirkuk. When the war ended in 1988, he worked as an engineer in the local government offices of Maku and Khvoy in the province of West Azarbaijan. In 1993 he became governor of the northwestern province of Ardabil until he was ousted following the election of the reform-minded President Mohammad Khatami in 1997. Returning to Tehran, Ahmadinejad rejoined the IUST's civil engineering faculty, where he remained until May 2003.

Ahmadinejad was elected mayor of Tehran on 3 May 2003, and pursued conservative policies. He closed down some fast-food restaurants and banned an advertising campaign that featured a Western celebrity. His views were at odds with President Khatami, who barred him from attending cabinet meetings, a privilege normally accorded to mayors of the capital. With the backing of conservative groups, Ahmadinejad contested the June 2005 presidential elections. His campaign was aimed at the poor and disadvantaged, as well as religious hardliners. He emphasized his

working-class upbringing and promised to redistribute the country's income from oil. In a run-off against the former president, Ali Akbar Hashemi Rafsanjani, on 24 June 2005, Ahmadinejad emerged victorious, with 63.4% of the vote, although there were complaints of voting irregularities.

### *Career in Office*

On 3 Aug. Ahmadinejad received the formal approval of the Supreme Leader, Ayatollah Khamenei, and he became president on 6 Aug. 2005. In his inaugural address, he called for unity and the building of a model state based on principles of 'modern, advanced, and strong Islamic government'. However, he quickly caused consternation both at home and abroad.

Within Iran, Ahmadinejad instituted a purge of various branches of government, state economic agencies and the diplomatic service, drawing accusations that he was exceeding his constitutional powers. By the end of 2006 there were signs of domestic opposition to his policies. In Dec. his hard-line supporters fared badly in elections to local councils and to the powerful Assembly of Experts. Iran's economic malaise under his management incurred parliamentary rebuke in Jan. 2007, reportedly supported by Supreme Leader Khamenei, and in June 2007 his government introduced petrol rationing, provoking public protests. There was also increasing evidence in 2007 of an unpopular crackdown on civil liberties. However, in parliamentary elections in March-April 2008 (in which many pro-reform candidates were barred from standing) there was a strong showing by the president's conservative supporters.

The June 2009 presidential election saw Ahmadinejad win 62.6% of the vote, ahead of his nearest rival Mir-Hossein Mousavi with 33.8%. However, the opposition challenged the official results and accused the government of election rigging, resulting in violent clashes between police and demonstrators. Opposition unrest continued over the following months and was met with a repressive backlash by security forces, including many arrests and, in Feb. 2010, two executions. The government meanwhile claimed that outside interference was responsible for fomenting the upheaval. In Dec. 2010 Ahmadinejad dismissed his foreign minister, Manouchehr Mottaki, considered a political rival within the Iranian leadership, and replaced him with Ali Akbar Salehi. However, his reported pressure on the intelligence minister, Heidar Moslehi, to resign in April 2011 was overruled by Ayatollah Khamenei, fuelling speculation about a rift between them.

On the international stage, Iran's resumption of uranium enrichment from Aug. 2005 intensified Western concerns over nuclear weapon proliferation. Ahmadinejad nevertheless maintained a belligerent stance on Iran's refusal to suspend enrichment, resulting in a series of punitive sanctions by the United Nations Security Council and also unilateral sanctions by the USA. International suspicions were heightened in Sept. 2009 by the identification of a secret uranium enrichment plant near the city of Qom and by Iran's test-firing of missiles capable of reaching targets across the Middle East. In Feb. 2010 Ahmadinejad ordered Iran's atomic energy authority to begin enriching its uranium stockpile to a higher level, so edging towards the ability to make weapons-grade fuel. Further nuclear negotiations between Iran and the major Western powers in Dec. 2010 and Jan. 2011 came to nothing. In 2011 tensions with the West over the nuclear issue were exacerbated by US accusations in Oct. of Iranian complicity in an alleged plot to kill the Saudi ambassador to Washington and also by the ransacking of the British embassy in Tehran by an Iranian crowd in Dec., in response to which all Iranian diplomats were expelled from the UK. Faced with further punitive sanctions by the USA, UK and European Union, Ahmadinejad's government threatened to block the shipping of oil exports through the Strait of Hormuz and in Jan. 2012 warned its Arab Gulf neighbours not to back Western attempts to isolate Iran.

Meanwhile, anti-Israeli speeches by Ahmadinejad and his denunciation of the Holocaust as a myth have provoked international condemnation. In Sept. 2010, in his address to the UN General Assembly, he accused the US government of orchestrating the 11 Sept. suicide hijacking attacks to reverse its declining influence in the Middle East and to prop up Israel, prompting a walkout by Western diplomats. His remarks were labelled 'abhorrent and delusional'.

In Jan. 2012 Ahmadinejad toured Venezuela, Nicaragua, Cuba and Ecuador in his fifth visit to Latin America and the Caribbean since his election in 2005.

## DEFENCE

16 to 20 months' military service is compulsory. Military expenditure totalled US\$9,595m. in 2008 (equivalent to US\$146 per capita), representing 2.8% of GDP (compared to 7.7% in 1985).

Iran has on a number of occasions successfully tested Shahab-3 medium-range ballistic missiles, initially with a range of 1,300 km, and most recently in Sept. 2009 an upgraded version that reportedly has a range of 2,000 km. In Nov. 2008, and again in Dec. 2009, it tested a new missile, the Sajil, which also reportedly has a range of 2,000 km. Unlike the Shahab-3, the Sajil is a solid fuel missile.

### Nuclear Weapons

Although Iran is a member of the Non-Proliferation Treaty (NPT), United Nations inspectors have found enriched uranium in environmental samples, increasing US suspicion that Iran is developing nuclear weapons. In Aug. 2005 Iran rejected proposals from France, Germany and the UK for economic incentives in return for an indefinite suspension of uranium enrichment and resumed nuclear conversion activities at its plant in Esfahan.

According to *Deadly Arsenals*, published by the Carnegie Endowment for International Peace, Iran has a chemical and biological weapons programme.

### Army

Strength (2006), 350,000 (about 220,000 conscripts). Reserves are estimated to be around 350,000, made up of ex-service volunteers.

### Revolutionary Guard (*Pasdarán Inqilab*)

Numbering some 125,000, the Guard is divided between ground forces (100,000), naval forces (some 20,000) and marines (5,000). It controls the Basij, a volunteer 'popular mobilization army' of about 300,000, which can number 1m. strong in wartime.

### Navy

The fleet includes six submarines (including three ex-Soviet *Kilo* class) and three ex-UK frigates. Personnel numbered 18,000 in 2006 including 6,000 in Naval Aviation and 2,600 marines.

The Naval Aviation wing operated 21 aircraft and 30 helicopters in 2006.

The main naval bases are at Bandar-e-Abbas, Bushehr and Chah Bahar.

### Air Force

In 2006 there were 281 combat aircraft including US F-14 Tomcat, F-5E Tiger II and F-4D/E Phantom II fighter-bombers, and a number of MiG-29 interceptors and Su-24 strike aircraft. The serviceability of the aircraft varies with only 60–80% operational.

Strength (2006) estimated at 52,000 personnel (about 15,000 air defence).

## ECONOMY

Agriculture accounted for 10.4% of GDP in 2006, industry 44.6% and services 45.0%.

## Overview

Iran's macroeconomic performance was strong prior to the global financial crisis. Manufacturing and construction are key growth sectors, along with the wholesale and retail trade.

Structural reforms were implemented by the government of Mohammad Khatami in the early 2000s. Between 2000 and 2005 GDP grew by an average annual rate of 5.5% as a result of high oil prices and strong private sector growth. In 2009 falling oil prices prompted an economic slowdown but growth rebounded in 2010–11 thanks to a recovery in agriculture production as well as recovering oil prices. Inflation fell from 25.4% in 2008–09 to 12.4% in 2010–11.

The economy remains over-reliant on oil and the Ahmadinejad government's commitment to pushing through further structural reform is uncertain. The reform programme has focused on privatization, reducing the role of government, and introducing a stronger market mechanism for pricing of energy and agricultural goods. A programme of investment reforms was announced in 2008 and in Dec. 2010 US\$60bn. in annual product subsidies were removed.

Unemployment, which stood at 14.6% in 2010, is a long-term challenge for the government, with approximately 750,000 Iranians entering the job market each year. Iran must also contend with the increasing impact of international sanctions on oil exports.

For further developments see [www.statesmansyearbook.com](http://www.statesmansyearbook.com).

## Currency

The unit of currency is the *rial* (IRR) of which 10 = 1 *toman*. Total money supply in April 2008 was 440,095bn. rials. Inflation rates (based on IMF statistics) for fiscal years:

2002	2003	2004	2005	2006	2007	2008	2009	2010
15.7%	15.6%	15.3%	10.4%	11.9%	18.4%	25.4%	10.8%	12.4%

## Budget

The financial year runs from 21 March. Revenues in 2008–09 totalled 948,745bn. rials and expenditures 923,015bn. rials. Petroleum and natural gas revenues accounted for 73.5% of all revenues and taxes 19.0%. Current expenditure accounted for 65.8% of all expenditures.

## Performance

Real GDP growth rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
3.7%	7.5%	7.2%	5.1%	4.7%	5.8%	10.8%	0.6%	3.5%	3.2%

Total GDP in 2009 was US\$331.0bn.

## Banking and Finance

The Central Bank is the note issuing authority and government bank. Its *Governor* is Mahmud Bahmani. All other banks and insurance companies were nationalized in 1979, and reorganized into new state banking corporations. In April 2000 the government announced that it would permit the establishment of private banks for the first time since the revolution in 1979, ending the state monopoly on banking. The first private bank since the revolution came into existence in Aug. 2001 with the creation of Bank Eghtesad Novin (Modern Economic Bank). A further five private banks have opened in the meantime. In 2002 there were 11 commercial banks, two development banks, one housing bank and around 30 foreign banks.

A stock exchange reopened in Tehran in 1992.

## ENERGY AND NATURAL RESOURCES

### Environment

Iran's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 7.8 tonnes per capita in 2008.

### Electricity

Total installed capacity in 2007–08 was 50.8m. kW; production (2007–08), 211.78bn. kWh (including 193.65bn. kWh thermal and 17.99bn. kWh hydro-electric). Consumption per capita in 2007–08 was 2,932 kWh. Iran's first nuclear reactor has been built by Russia at Bushehr and reached 75% of its power generation capacity in Feb. 2012.

### Oil and Gas

Oil is Iran's chief source of revenue. The main oilfields are in the Zagros Mountains where oil was first discovered in 1908. Oil companies were nationalized in 1979 and operations of crude oil and natural gas exploitation are now run by the National Iranian Oil Company. Iran produced 209.8m. tonnes of oil in 2008 (5.3% of the world total oil output); in 2008 it had reserves amounting to 137.6bn. bbls. In 1999 the most important discovery in more than 30 years was made, with the Azadegan oilfield in the southwest of the country being found to have reserves of approximately 26bn. bbls. In 2009 revenue from oil exports amounted to US\$56bn. Iran depends on oil for some 86% of its exports, but domestic consumption has been increasing to such an extent that it is now as high as exports.

Iran has 16% of proven global gas reserves. Natural gas reserves in 2008 were 29,610bn. cu. metres, the second largest behind Russia. Natural gas production was 116.3bn. cu. metres in 2008, the fourth highest in the world. In Dec. 1997 the first natural gas pipeline linking Iran with the Caspian Sea via Turkmenistan was opened. The 200-km line links gas fields in western Turkmenistan to industrial markets in northern Iran.

### Minerals

Production (in 1,000 tonnes), 2004: iron ore, 18,205; gypsum, 12,594; decorative stone, 6,450; salt, 1,791; coal, 1,246; bauxite, 366; zinc, 244; aluminium, 213; copper, 190; chromite, 139; manganese, 129. It was announced in Feb. 2003 that uranium deposits had been discovered in central Iran. In Nov. 2003 the International Atomic Energy Agency announced that Iran had admitted to enriching uranium at an electric plant outside Tehran.

### Agriculture

There were an estimated 15.02m. ha. of arable land in 2002 and 2.07m. ha. of permanent crops. Around 7.5m. ha. were irrigated in 2002. Crop production (2002, in 1,000 tonnes): wheat, 12,450; sugar beets, 6,098; tomatoes, 4,109; potatoes, 3,756; sugarcane, 3,712; melons and watermelons, 3,388; barley, 3,085; rice (paddy), 2,888; grapes, 2,704. Livestock (2002): 53.9m. sheep; 25.8m. goats; 8.7m. cattle; 1.6m. asses; 270m. chickens.

### Forestry

Approximately 6.8% of Iran was forested (11.08m. ha.) in 2005, much of it in the Caspian region. Timber production in 2007 was 865,000 cu. metres.

### Fisheries

In 2005 the total catch was 410,558 tonnes (343,492 tonnes from sea fishing).

## INDUSTRY

Major industries: petrochemical, automotive, food, beverages and tobacco, textiles, clothing and leather, wood and fibre, paper and cardboard, chemical products, non-metal mining products, basic materials, machinery and equipment, copper, steel and aluminium. The textile industry uses local cotton and silk; carpet manufacture is an important industry. The country's steel industry is the largest in the Middle East.

Production includes: cement (2008 estimate), 44.4m. tonnes; residual fuel oil (2007–08), 25.2m. tonnes; distillate fuel oil (2007–08), 25.1m. tonnes; petrol (2007–08), 12.1m. tonnes; crude steel (2009), 10.9m. tonnes; kerosene (2007–08), 6.6m. tonnes; naphthas (2001–02), 2.6m. tonnes; cottonseed oil (1998), 994,000

tonnes; jet fuel (2007–08), 992,000 tonnes; sugar (2001), 911,000 tonnes; stockings (2000), 18.5m. pairs; building bricks (2000), 10,077m. units.

### Labour

The economically active population numbered 20m. in 2002, of which 17.6m. were employed. Approximately 12.2% of the workforce are unemployed and 800,000 Iranians enter the workforce every year.

## INTERNATIONAL TRADE

There had been a limit on foreign investment, but legislation of 1995 permits foreign nationals to hold more than 50% of the equity of joint ventures with the consent of the Foreign Investment Board. Foreign debt was US\$21,260m. in 2005.

### Imports and Exports

In 2005–06 imports totalled US\$40,969m. and exports US\$60,013m. Main imports: machinery and motor vehicles, iron and steel, chemicals, pharmaceuticals, food. Main exports: oil, carpets, pistachios, leather and caviar. Crude oil exports (2003): 2,396,300 bbls a day. Oil exports account for more than 80% of hard currency earnings. Carpet exports are the second largest hard currency earner. Main import suppliers, 1998–99: Germany, 11.6%; Italy, 8.3%; Japan, 7.0%; Belgium, 6.3%; United Arab Emirates, 5.3%; Argentina, 4.4%. Main export markets in 1998–99: UK, 16.8%; Japan, 15.7%; Italy, 8.6%; United Arab Emirates, 6.7%; Greece, 5.0%; South Korea, 5.0%.

## COMMUNICATIONS

### Roads

In 2006 the total length of roads was 174,301 km, of which 1,429 km were motorways, 27,256 km main roads, 41,129 km secondary regional roads and 104,487 km other local roads. In 2007 there were 920,100 passenger cars; 862,600 motorcycles and mopeds; 179,700 vans and lorries; 4,900 buses and coaches. In 2006 there were 165,130 road accidents resulting in 6,380 deaths.

### Rail

The State Railways totalled 7,172 km in 2005, of which 148 km were electrified. The railways carried 26.2m. passengers in 2008 and 28.7m. tonnes of freight in 2005. An isolated 1,676 mm gauge line (94 km) in the southeast provides a link with Pakistan Railways. A rail link to Turkmenistan was opened in May 1996. A link between Sangan in the east of the country and Herat in Afghanistan is currently under construction. A metro system was opened in Tehran in 1999.

### Civil Aviation

There are international airports at Tehran (Mehrabad), Shiraz and Bandar-e-Abbas. Tehran is the busiest airport, in 2000 handling 8,474,000 passengers (6,473,000 on domestic flights). The Imam Khomeini International Airport, construction of which began in 1977 before being halted in 1979, was inaugurated in Feb. 2004. The first flight arrived at the airport in May 2004 but it was then shut down by Iran's Revolutionary Guard, citing breaches of security by the foreign operators. The state-owned IranAir is the flag-carrying airline. In 2003 scheduled airline traffic of Iranian-based carriers flew 89m. km, carrying 11,664,000 passengers (2,282,000 on international flights).

### Shipping

In Jan. 2009 there were 202 ships of 300 GT or over registered, totalling 959,000 GT. Of the 202 vessels registered, 148 were general cargo ships, 18 bulk carriers, 12 oil tankers, 12 passenger ships, seven container ships, four chemical tankers and there was one liquid gas tanker. The Iranian-controlled fleet comprised 191 vessels of 1,000 GT or over in Jan. 2009, of which 126 were under foreign flags and 65 under the Iranian flag. The principal port is Bandar-e-Abbas, which handled 52,373,000 tonnes of

cargo in 2008 (17,185,000 tonnes loaded and 35,161,000 tonnes discharged).

### Telecommunications

In 2008 there were 24.8m. main (fixed) telephone lines. In the same year mobile phone subscribers numbered 43.0m. (586.5 per 1,000 persons). There were 7.4m. PCs in use in 2006 and 23.0m. internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

A legal system based on Islamic law (*Sharia*) was introduced by the 1979 constitution. A new criminal code on similar principles was introduced in Nov. 1995. The President of the Supreme Court and the public Prosecutor-General are appointed by the Spiritual Leader. The Supreme Court has 16 branches and 109 offences carry the death penalty. To these were added economic crimes in 1990. The population in penal institutions in Aug. 2007 was 158,351 (222 per 100,000 of national population). Amnesty International reported that there were at least 360 executions in 2011. Executions are frequently held in public.

### Police

Women rejoined the police force in 2003 for the first time since the 1979 revolution.

### Education

Adult literacy in 2006 was 82%. Most primary and secondary schools are state schools. Elementary education in state schools and university education is free; small fees are charged for state-run secondary schools. In 2007 there were 7,152,492 pupils and 372,859 teaching staff at primary schools; and in 2005, 9,942,201 pupils and 530,190 teaching staff at secondary schools.

In 2007 there were 2,828,528 pupils and 133,484 academic staff at institutions of higher education. The University of Tehran, established in 1851 and with university status since 1934, is the largest and oldest institute of tertiary education in Iran. Other leading universities include Sharif University of Technology, in Tehran, and Esfahan University of Technology.

In 2007 public expenditure on education came to 5.6% of GNI and represented 19.5% of total government expenditure.

### Health

There were 717 hospitals in 2001, with 109,152 beds. In 2005 there were 61,870 physicians, 13,210 dentists, 13,900 pharmacists and 111,107 nurses and midwives.

### Welfare

The official retirement ages are 60 years (men) or 55 (women) with at least 16 years of contributions; age 50 (men) or 45 (women) with at least 30 years of contributions; and at any age with at least 35 years of contributions or between 20 and 25 years of work in an unhealthy or physically demanding natural environment. The pension is equal to 1/30th of the insured's average earnings during the last 24 months multiplied by the number of years of contributions. The minimum old-age pension is 2,196,000 rials a month (the minimum wage of an unskilled labourer).

## RELIGION

The official religion is the Shia branch of Islam. Adherents numbered approximately 85% of the population in 2001; 5% were Sunni Muslims. However, less than 2% of the population now attend Friday prayers.

## CULTURE

### World Heritage Sites

There are 13 UNESCO World Heritage sites in Iran: Tchoghza Zanbil (inscribed on the list in 1979), the ruins of the holy city of the kingdom of Elam founded around 1250 BC; Persepolis (1979),

the palace complex founded by Darius I in 518 BC and capital of the Achaemenid empire (the first Persian empire); Meidan Imam (1979), the square built in Esfahan by Abbas I in the early 17th century, which is bordered on all sides by monumental buildings linked by a series of arcades; Takht-e Soleyman (2003), a Sasanian royal residence with important Zoroastrian religious architecture and decoration; Bam and its Cultural Landscape (2004 and 2007), a fortified medieval town where 26,000 people lost their lives in the earthquake of 2003; Pasargadae (2004), the first dynastic capital of the great multicultural Achaemenid Empire in Western Asia; Soltaniyeh (2005), the capital of the Ilkhamid dynasty that stands as a monument to Persian and Islamic architecture; Bisotun (2006), an ancient town on the trade route that linked the Iranian high plateau with Mesopotamia; the Armenian Monastic Ensembles (2008), three monastic buildings dating back to the 7th century; Shushtar Historical Hydraulic System (2009), a homogeneous hydraulic system, designed globally and completed in the 3rd century AD; Sheikh Safi al-din Khanegah and Shrine Ensemble in Ardabil (2010), a spiritual retreat built in the Sufi tradition between the 16th and 18th centuries; Tabriz Historic Bazaar Complex (2010), one of the most complete examples of the traditional commercial and cultural system of Iran; and the Persian Garden (2011), a collection of nine gardens selected from various regions of Iran.

### Press

In 2005 there were 177 daily newspapers and more than 2,500 non-dailies. Approximately 80% of the Iranian press is printed in Farsi; much of the remaining 20% is in English or Arabic. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Iran ranked 175th out of 178 countries.

### Tourism

There were 2,735,000 non-resident tourists in 2006, spending US\$1,760m.

### Calendar

The Iranian year is a solar year starting on varying dates between 19 and 22 March. The current solar year is 1391 (20 March 2012 to 20 March 2013). The Islamic *hegira* (AD 622, when Mohammed left Makkah for Madinah) year 1433 corresponds to 26 Nov. 2011–14 Nov. 2012, and is the current lunar year.

### Festivals

Iran celebrates Revolution Day on 11 Feb. to mark the anniversary of the overthrow of the Shah in 1979. Nowruz (New Year's Day) falls on 21 March while Constitution Day is on 5 Aug. The feast of Shab-e Yalda, held to mark the longest night of the year, is in Dec.

## DIPLOMATIC REPRESENTATIVES

Of Iran in the United Kingdom (embassy in London closed in Nov. 2011)

Of the United Kingdom in Iran (embassy in Tehran closed in Nov. 2011)

The USA does not have diplomatic relations with Iran, but Iran has an Interests Section in the Pakistani Embassy in Washington, D.C., and the USA has an Interests Section in the Swiss Embassy in Tehran.

Of Iran to the United Nations

*Ambassador:* Mohammad Khazaei.

Of Iran to the European Union

*Ambassador:* Aliasghar Khaji.

## KEY HISTORICAL EVENTS

Around 3000 BC the Sumerian culture flourished in Mesopotamia—the part of the Fertile Crescent between and around the Tigris and Euphrates rivers. Incursions from Semitic peoples of the Arabian Peninsula led to Akkadian supremacy after the victory of Sargon the Great (c. 2340 BC). The Sumerian cities, such as Ur, reasserted their independence until 1700 BC, when King Hammurabi established the first dynasty of Babylon. Hammurabi and his son, Samsu-iluna, presided over the political and cultural apogee of Babylon; it was a time of great prosperity and relative peace. Babylonia was challenged by the Anatolian Hittites, who sacked Babylon in 1595 BC. A weakened Babylonia fell to the Kassites from the Zagros mountains, who held sway for over 400 years. The power-vacuum in northern Babylonia was filled by the Hurrian kingdom of Mitanni until Assyria's dominance in the 13th century BC. The Semitic Assyrians built an empire that stretched from Tarsus on the Mediterranean to Babylon, which they sacked in 1240 BC.

Elamite invasions in the 12th century BC allowed the establishment of a second Babylonian dynasty—Isin, or Pash— but the assertiveness of its king, Nebuchadnezzar I, provoked Assyrian retaliation. Assyrian control of Babylonia was regained but tempered by massive immigration of Aramaeans from Upper Mesopotamia and Syria. Nevertheless, the Assyrians achieved considerable imperial expansion under Ashurnasirpal II in the early ninth century BC. Assyrian decline and revival was repeated in the eighth century. Babylon was recaptured in 729 BC and

most of the Fertile Crescent, from the Nile Delta to the Persian Gulf, was subjugated. However, the empire soon crumbled after the death of the great King Ashurbanipal in 627 BC. Revolts in Babylonia were led by the Chaldeans, who had settled in the south from the ninth century. An alliance of old enemies—the Medes and the Scythians—ravaged the Assyrian Empire and in 612 BC, the capital, Nineveh, fell to the Medes.

Babylonia, known at this time as Chaldea, assumed control of much of the Fertile Crescent. In 586 BC, Nebuchadnezzar II conquered Phoenicia and Judah, destroying Jerusalem and deporting 15,000 Judaeans as labourers for Babylon. This Babylonian revival withered under his successors, who were defeated by Achaemenid Persia. Cyrus the Great captured Babylon in 539 BC. His rule was strengthened by his self-association with the Babylonian throne and by his religious tolerance; the Babylonian deity Bel-Marduk was restored and the Temple of Jerusalem rebuilt. Xerxes I (485–465 BC) styled himself the Persian Emperor and seized the Bel-Marduk statue, provoking several Babylonian rebellions.

## Alexander

The last of the Achaemenids, Darius III, was defeated at the Battle of Gaugamela (near Mosul) in 331 BC by Alexander the Great of Macedon, who established the Hellenistic Age of the Near East. Having assumed the Persian throne, he died at Babylon in 323 BC. His empire was split in four; Seleucus took control of Mesopotamia and Persia and declared himself king in 305 BC. Babylon was soon eclipsed by a new capital at Seleucia on the Tigris and was abandoned during the third century. Parthia, Bactria and Anatolia were lost by Seleucus' successors until Antiochus III (223–187 BC) reasserted his lordship over the lost provinces. However, his foray into Greece was repulsed by Rome, which forced a heavy indemnity on the Seleucid Empire. Rapid territorial losses to Rome, Ptolemaic Egypt and local rebellions led to a Parthian invasion of Babylonia in 129 BC.

The Parthian Empire, with its winter capital at Ctesiphon on the Tigris, reached its territorial zenith under Mithridates II (123–88 BC), who defeated Armenia and repelled the Scythians. Though a looser political unit than the Seleucid state, Mithridates' empire was a conscious inheritor of the great traditions—Persian, Babylonian and Hellenistic—in culture, language and symbolism. Intrigue over its nominal vassal, Armenia, brought Parthia into conflict with Rome. At Carrhae the Parthians inflicted a crushing defeat on a Roman army under Crassus in 53 BC. Several wars followed until Vologases I achieved a settlement with Emperor Nero over the Armenian buffer-state in AD 63. Dynastic disputes bedevilled Parthia and its vassal kingdoms. The invasion of Armenia by Osroes I (AD 109–129) sparked a Roman invasion in AD 113 under Trajan, who annexed Armenia and occupied most of Mesopotamia. Roman control ended after Trajan's death but Vologases IV was forced to cede western Mesopotamia to Rome. However, Mesopotamia remained a battleground, with Emperor Severus invading in AD 195 and looting Ctesiphon, further weakening the Parthian state. In AD 224 Artabanus IV, the last of the Parthian kings, was defeated by Artaxerxes, ruler of Persia and founder of the Sassanid Dynasty.

The Sassanian Persians emulated the Achaemenids and attempted to regain their empire, leading to inevitable conflict with Rome. Artashir's son, Shapur I, continued his father's expansion in the east and attacked Rome's Levantine provinces. Syria and Armenia were overrun and the Roman Emperor Valerian captured at Edessa in 259. Shapur II (309–379) consolidated Sassanid power, defeating threats from Arabia and Central Asia and wresting control of the Tigris and Armenia from

the Romans. The religious policies of the Zoroastrian Sassanids fluctuated from tolerance to persecution. Khosrau I (531–579) revived imperial expansion; his grandson, Khosrau II, was restored to the throne by the Byzantine Emperor Maurice, who was rewarded with Armenia and northeastern Mesopotamia. However, Khosrau retook Mesopotamia after Maurice's murder, beginning a Persian rampage through the Byzantine East. The sack and pillage of Jerusalem provoked Emperor Heraclius, who struck the Persian heartland. In 627 Heraclius entered Ctesiphon and destroyed the palace of Khosrau, who was murdered. Sassanid Persia, exhausted by conflict with Rome, quickly fell to the Arab invasion.

Led by Sa'd ibn Abi Waqqas, the Arab forces of Islam defeated the Sassanians at the Battle of Al-Qadisiyyah (c. 636) on the Euphrates and at Nahavand, western Iran, in 642. By 639 most of Iraq (*Erak*, 'lower Iran'), comprising the centre and south of modern republic, had been conquered; as had Al-Jazirah ('The Island'), the area north of Tikrit. Mass Arab immigration saw the establishment of garrison towns at Kufa (near Babylon) and Al-Basrah and later at Mosul. After the first four caliphs, the Caliphate effectively became hereditary under the Umayyads, based at Damascus. However, their rule was disputed, especially in Iraq. The death of Ali's second son, Husayn, at Karbala in 680 left a body of opposition, the Shias, or 'partisans' of Ali. Iraq was controlled by a governor and, from the 690s, Arabic became the language of administration.

#### *Rise of Baghdad*

In 743 civil war came to the Caliphate. Having failed to resolve the tensions between rival Arab military groups, the Umayyads succumbed to the rebellion of the Abbasids, who called for a return to strong Islamic leadership. In 750 the last Umayyad caliph, Marwan II, was deposed by Abu al-'Abbas (As-Saffah), supported by Iranian and Iraqi Shias. However, As-Saffah installed himself as caliph, rejecting a Shia imam. In 754 he was succeeded by his brother Al-Mansur, who moved the capital to Baghdad on the Tigris. This move symbolized the end of the hegemony of Syrian and Yemeni Arabs over the Caliphate. Nevertheless, an overburdened Iraq provided numerous threats to Abbasid authority; Al-Mansur had to quell Shia revolts in Iraq in 763. Caliph Al-Mu'tasim moved his capital to Samarra in 836 to remove his Turkic Mamluk soldiers from Baghdad. The suppression of the Zanj Revolt (869–879) of African slaves around Al-Basrah prompted the return to Baghdad.

Rapid political fragmentation in the 930s broke the Caliphate. The Shia Buyids took Iraq in 946, depriving the Abbasid caliphs of temporal power. From the 970s, Egypt was ruled by a rival caliphate, the Ismaili Fatimids. Baghdad was taken by the Seljuk Turks under Toghrül, the Sultan of Iran, in 1055. Despite the Seljuk territories fragmenting after Malik Shah I died in 1092, Iraq remained under Seljuk authority until the Mongol invasion. In 1258 Baghdad was sacked by the Mongol Hulagu Khan; the city was ravaged, its people slaughtered and its Grand Library destroyed. The sack ended the Abbasid Caliphate and Baghdad's role as a major cultural centre. Hulagu established the Il-Khanid Dynasty of Iran. Buddhism and Nestorian Christianity flourished under the patronage of Hulagu's successors until the conversion of Khan Ghazan to Sunni Islam in 1292. The Il-Khanate fragmented in the 1330s and Iraq was ruled by the Mongol Jalayirids.

#### *Ottoman Rule*

In 1401 Baghdad was sacked by Timur (also known as Tamburlaine), the greatest Central Asian warrior of the period. His death in 1405 allowed the Black Sheep Turkmen (Kara Koyunlu) to overthrow their Jalayirid masters. However, their rapid expansion ended in defeat in 1466 at the hands of the White Sheep Turkmen (Ak Koyunlu). Rivalry with the Ottoman Turks in Anatolia weakened the White Sheep Turkmen, who were

forced to withdraw from Iraq by the Turkic Safavid rulers of Iran. Shah Ismail I took Baghdad in 1509 and made Shi'ism the state religion; all other creeds were banned. However, Iraq soon fell to the Sunni Ottomans, with Sultan Suleyman the Magnificent taking Baghdad in 1534. Shah Abbas reclaimed Iraq for Iran in 1603, brutally suppressing a major Kurdish rebellion in 1610. Ottoman authority was reimposed by Sultan Murad IV, who led his army into Baghdad in 1638.

Centuries of neglect and war had devastated the irrigation systems and agricultural wealth of Iraq. The Ottomans treated Iraq as a buffer state against Iran and allowed Kurdish and Bedouin tribes to dominate. Mamluks asserted their power in Iraq until 1831, when Baghdad was devastated by flooding. Serious administrative reform (*tanzimat*) came in 1869 with the appointment of Midhat Pasha as governor of Baghdad, with great improvements in the army, the law and education. The Young Turks revolution of 1908 gave Iraq limited political representation.

#### *British Mandate*

Anglo-German rivalry led to a British invasion of southern Iraq in Nov. 1914. Although Al-Basrah fell in 1915, the British suffered a major defeat at Al-Kut in 1916. Nevertheless, Baghdad was taken in March 1917. After the First World War the Allies entrusted Iraq to Britain under the Sykes-Picot Agreement, which protected British oil interests in the region. The State of Iraq became a League of Nations mandate under British Control in Nov. 1920. Rebellions in Kurdish and southern areas were suppressed with bombing campaigns. A Hashemite monarchy was installed, under Amir Faysal ibn Husayn from Mecca, a wartime ally, and an indigenous army created. The monarchy was supported by a plebiscite in 1921. Kurdish-dominated Mosul province—vital for its massive oil reserves—was granted to Iraq by the League of Nations in 1925. Britain's mandate ended in 1932. Rebellions followed in Kurdish areas, led by Mustafa Barzani until he fled to the USSR in 1945. Rejecting the partition of Palestine, Iraq went to war with Israel in 1948, leading to the emigration of 120,000 Iraqi Jews.

The monarchy was overthrown in a military coup on 14 July 1958. King Faisal II and Nuri al Said, the prime minister, were killed. A republic was established, controlled by a military-led Council of Sovereignty under Gen. Abdul Karim Qassim. In 1963 Qassim was overthrown and Gen. Abdul Salam Aref was made president, with a partial return to a civilian government. But on 17 July 1968 a successful coup was mounted by the Pan-Arabist Ba'ath Party. Gen. Ahmed Al Bakr became president, prime minister, and chairman of a newly established nine-member Revolutionary Command Council. In July 1979 Saddam Hussein, the vice-president and a Sunni Muslim, assumed the presidency, having persuaded the ailing Al Bakr to resign. Saddam promptly carried out a purge of the party, resulting in 22 executions.

The 1979 Iranian Revolution was perceived as a threat to the delicate Sunni-Shia balance in Iraq. In Sept. 1980 Iraq invaded Iran, ostensibly over territorial rights in the Shatt-al-Arab waterway. The war claimed over a million lives and saw the use of chemical weapons by the Iraqi army. The al-Anfal campaign (1986–89) countered Kurdish rebellions, killing 182,000 Kurds. Chemical weapons were prominent, most notably at Halabja, where 5,000 died in one day. A UN-arranged ceasefire took place on 20 Aug. 1988 and UN-sponsored peace talks continued in 1989. On 15 Aug. 1990 Iraq accepted the pre-war border and withdrew troops from Iranian soil.

#### *1991 War*

On 2 Aug. 1990 Iraqi forces invaded and rapidly overran Kuwait, on the pretext of alleged Kuwaiti 'slant-drilling' across the Iraqi border. The UN Security Council voted to impose economic sanctions on Iraq until it withdrew from Kuwait and the USA sent a large military force to Saudi Arabia. Further Security Council resolutions included authorization for the use of military force if

Iraq did not withdraw by 15 Jan. 1991. On the night of 16–17 Jan. coalition forces (US and over 30 allies) began an air attack on strategic targets in Iraq. A land offensive followed on 24 Feb. The Iraqi army was routed and Kuwait City was liberated on 28 Feb. Iraq agreed to the conditions of a provisional ceasefire, including withdrawal from Kuwait. Subsequent Kurdish and Shia rebellions were brutally suppressed.

In June 1991 UNSCOM, the United Nations Special Commission, conducted its first chemical weapons inspection in Iraq in accordance with UN Resolution 687. In Sept. a UN Security Council resolution permitted Iraq to sell oil worth US\$1,600m. to pay for food and medical supplies. In Oct. the Security Council voted unanimously to prohibit Iraq from all nuclear activities. Imports of materials used in the manufacture of nuclear, biological or chemical weapons were banned, and UN weapons inspectors received wide powers to examine and retain data throughout Iraq.

In Aug. 1992 the USA, UK and France began to enforce air exclusion zones over southern and northern Iraq in response to the government's persecution of Shias and Kurds. Following Iraqi violations of this zone and incursions over the Kuwaiti border, US, British and French forces made air and missile attacks on Iraqi military targets in Jan. 1993. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait. In the first half of 1995 UN weapons inspectors secured information on an extensive biological weapons programme. At the beginning of Sept. 1996 Iraqi troops occupied the town of Irbil in a Kurdish haven in support of the Kurdish Democratic Party faction which was at odds with another Kurdish faction, the Patriotic Union of Kurdistan. On 3 Sept. 1996 US forces fired missiles at targets in southern Iraq and extended the no-fly area northwards to the southern suburbs of Baghdad.

#### *Weapons Inspection*

Relations with the USA deteriorated still further in 1997 when Iraq refused co-operation with UN weapons inspectors. The USA and the UK threatened retaliatory action and a renewal of hostilities looked probable until late Feb. 1998 when Kofi Annan, the UN Secretary General, forged an agreement in Baghdad allowing for 'immediate, unconditional and unrestricted access' to all suspected weapons sites. In Aug. 1998 Saddam Hussein engineered another stand-off with the UN arms inspectors, demanding a declaration that Iraq had rid itself of all weapons of mass destruction. This was refused by the UN chief inspector. In Nov. all UN personnel left Iraq as the USA threatened air strikes unless Iraq complied with UN resolutions. Russia and France urged further diplomatic efforts, but on 16 Dec. the USA and Britain launched air and missile attacks aimed at destroying Saddam Hussein's suspected arsenal of nuclear, chemical and biological weapons.

In Feb. 2000 the UN Security Council nominated Sweden's Hans Blix to head the new arms inspectorate to Iraq but he was refused entry into the country. In Feb. 2001 the USA and Britain launched a further series of air attacks on military targets in and around Baghdad. A new UN Security Council resolution was passed in May 2002. Constituting the biggest change since the introduction in 1966 of a UN-administered Oil-for-Food scheme to alleviate the suffering among the civilian population, the new resolution limited import restrictions to a number of specific sensitive goods. In Nov. 2002 the UN Security Council adopted Resolution 1441, holding Iraq in 'material breach' of disarmament obligations. Weapons inspectors, under the leadership of Hans Blix, returned to Iraq four years after their last inspections, but US and British suspicion that the Iraq regime was failing to comply led to increasing tension, resulting in the USA, the UK and Spain reserving the right to disarm Iraq without the need for a further Security Council resolution. Other Security Council members, notably China, France, Germany and Russia, opposed the proposed action.

#### *Fall of Saddam*

On 20 March 2003 US forces, supported by the UK, began a war aimed at 'liberating Iraq'. UK troops entered Iraq's second city, Al-Basrah, on 6 April. On 9 April 2003 American forces took control of central Baghdad, effectively ending Saddam Hussein's rule. Widespread looting and disorder followed the capital's fall. The bloodless capture of Tikrit, Saddam Hussein's hometown, on 14 April marked the end of formal Iraqi resistance. An interim government was planned until democratic elections could be held. On 22 May the UN Security Council voted to lift economic sanctions against Iraq and to support the US and UK occupation 'until an internationally recognized, representative government is established by the people of Iraq'. Only Syria opposed the resolution by boycotting the session. A 25-man Iraqi-led governing council (IGC) met in Baghdad for the first time in July 2003.

Resistance to the occupying forces increased from late summer. Bomb attacks in Aug. targeted the UN's Baghdad office, killing the UN special representative. Ayatollah Mohammed Baqr al-Hakim, the most senior Shia cleric in Iraq, was assassinated with 100 others in Najaf. Saddam Hussein was captured by American forces at Al-Dawr, near Tikrit, on 13 Dec. 2003. His trial for crimes against humanity, war crimes and genocide began in July 2004. In Feb. 2004 over 100 Kurds were killed in attacks in Irbil and the Shia community suffered 270 deaths in Baghdad and Karbala. In May 2004 accusations surfaced of abuse of Iraqi prisoners by American and British soldiers.

On 30 Jan. 2005 the first democratic elections to a Transitional National Assembly were won by the Shia-dominated United Iraqi Alliance. Jalal Talabani became the country's new president on 6 April 2005, and on 3 May 2005 Iraq's first democratically elected government under Prime Minister Ibrahim al-Jaafari was sworn in. In Oct. 2005 a new federal constitution was approved in a nationwide referendum (although without the support of the Sunni community) and the trial of former dictator Saddam Hussein for mass murder opened in Baghdad. Despite the political advances, insurgent violence has continued against foreign troops, domestic security forces and civilians. In Dec. 2005 a general election for a new parliament was won by the United Iraqi Alliance. In April 2006 after months of deadlock Nouri al-Maliki was appointed the new prime minister. Insurgent violence continues against foreign troops, domestic security forces and civilians. Nobody can be certain how many Iraqis have been killed since the start of the US-led invasion in March 2003. Estimates vary from 106,000 (to April 2012) by Iraq Body Count and the Oxford Research Group on the basis of media reports through to about 600,000 in a John Hopkins University study of 2006 funded by the Massachusetts Institute of Technology based on interviews of households. In Nov. 2006 Saddam Hussein was sentenced to death. His execution on 30 Dec. 2006 drew mixed reaction both in Iraq and abroad.

In Jan. 2007 President Bush announced a 'troop surge' in Iraq, with 21,500 extra troops to be deployed to assist the Iraqi army in fighting insurgents and al-Qaeda forces. 4,000 US troops were stationed in Al-Anbar province, with the remainder sent to Baghdad. Iraqi forces gradually took control of internal security, with responsibility for Al-Basrah (Basra) province from Dec. 2007 and Al-Anbar from Sept. 2008. UK combat operations ended in April 2009 and in June US troops withdrew from Iraqi towns and cities. The last US troop convoys left Iraq in Dec. 2011, in accordance with the US–Iraq Status of Forces Agreement of 2008.

#### **TERRITORY AND POPULATION**

Iraq is bounded in the north by Turkey, east by Iran, southeast by the Persian Gulf, south by Kuwait and Saudi Arabia, and west by Jordan and Syria. In April 1992 the UN Boundary Commission redefined Iraq's border with Kuwait, moving it slightly northwards in line with an agreement of 1932. Area, 434,128 sq. km. Population, 1997 census, 22,046,244; density, 50.8 per sq. km.

United Nations estimate, 2011, 32,665,000. In 2000, 67.9% of the population lived in urban areas. More than 1.3m. Iraqis protected and assisted by the Office of the United Nations High Commissioner for Refugees are displaced within the country. In 2010 there were 1.7m. Iraqi refugees living abroad, mainly in Syria and to a lesser extent Jordan.

The UN gives a projected population for 2015 of 36.98m.

The areas, populations and capitals of the governorates:

<i>Governorate</i>	<i>Population Area (sq. km)</i>	<i>Population 1997 census</i>	<i>Capital</i>
Al-Anbar	138,501	1,023,776	Ar-Ramadi
Babil (Babylon)	6,468	1,181,751	Al-Hillah
Baghdad	734	5,423,964	Baghdad
Al-Basrah (Basra)	19,070	1,556,445	Al-Basrah
Dahuk	6,553	402,970	Dahuk
Dhi Qar	12,900	1,184,796	An-Nasiriyah
Diyala	19,076	1,135,223	Ba'qubah
Irbil	14,471	1,095,992	Irbil
Karbala	5,034	594,235	Karbala
Kirkuk <sup>1</sup>	10,282	753,171	Kirkuk
Maysan	16,072	637,126	Al-Amarah
Al-Muthanna	51,740	436,825	As-Samawah
An-Najaf	28,824	775,042	An-Najaf
Ninawa (Nineveh)	37,323	2,042,852	Mosul
Al-Qadisiyah	8,153	751,331	Ad-Diwaniyah
Salah ad-Din	24,751	904,432	Tikrit
As-Sulaymaniyah	17,023	1,362,739	As-Sulaymaniyah
Wasit	17,153	783,614	Al-Kut

<sup>1</sup>Also known as At-Ta'mim.

The most populous cities are Baghdad (the capital), population of 4,689,000 in 1999, Irbil and Mosul. Other large cities included Kirkuk, Al-Basrah, As-Sulaymaniyah and An-Najaf.

The population is approximately 80% Arab, 17% Kurdish (mainly in the north of the country) and 3% Turkmen, Assyrian, Chaldean or other. Shia Arabs (predominantly in the south of the country) constitute approximately 60% of the total population and Sunni Arabs (principally in the centre) 20%.

The official language is Arabic. Other languages spoken are Kurdish (official in Kurdish regions), Assyrian and Armenian.

## SOCIAL STATISTICS

2008 estimates: births, 940,000; deaths, 177,000; marriages, 171,000. Birth and death rates, 2008 estimates (per 1,000 population): births, 31.2; deaths, 5.9. Life expectancy at birth, 2007, was 64.2 years for men and 71.8 years for women. Annual population growth rate, 2000–08, 2.5%. Infant mortality, 2008: 36 per 1,000 live births. Fertility rate, 2008: 4.1 births per woman. Estimated maternal mortality rate per 10,000 live births, 2005: 30.

## CLIMATE

The climate is mainly arid, with limited and unreliable rainfall and a large annual range of temperature. Summers are very hot and winters are cold. Al-Basrah, Jan. 55°F (12.8°C), July 92°F (33.3°C). Annual rainfall 7" (175 mm). Baghdad, Jan. 50°F (10°C), July 95°F (35°C). Annual rainfall 6" (140 mm). Mosul, Jan. 44°F (6.7°C), July 90°F (32.2°C). Annual rainfall 15" (384 mm).

## CONSTITUTION AND GOVERNMENT

Until the fall of Saddam Hussein, the highest state authority was the Revolutionary Command Council (RCC) but some legislative power was given to the 220-member *National Assembly*. The only legal political grouping was the National Progressive Front (founded 1973) comprising the Arab Socialist Renaissance (Ba'ath) Party and various Kurdish groups, but a law of Aug. 1991 legalized political parties provided they were not based on religion, racism or ethnicity.

In July 2003 a 25-man Iraqi-led governing council met in Baghdad for the first time since the US-led war in an important staging post towards full self-government. The temporary

Coalition Provisional Authority was dissolved on 28 June 2004. Power was handed over to the interim Iraqi government which assumed full sovereign powers for governing Iraq. It became a transitional government after elections in Jan. 2005. The 275-member Transitional National Assembly approved a draft new constitution on 29 Aug. 2005, 14 days after the original deadline. It was approved in a nationwide referendum held on 15 Oct., with 78.6% of votes cast in favour. Shias and Kurds generally supported the constitution. Most Sunnis opposed it because of its reference to federalism and the risk that Iraq could ultimately break up, as Iraq's oil resources are in the Shia and Kurdish areas. The constitution states that Iraq is a democratic, federal, representative republic and a multi-ethnic, multi-religious and multi-sect country. Islam is the official religion of the state and a basic source of legislation. Elections were held in Dec. 2005 for the new 275-member *Council of Representatives*. In Dec. 2009 the number of seats was increased from 275 to 325 ahead of the March 2010 elections.

## National Anthem

'Mawtini' ('My Homeland'); words by I. Touqan, tune by M. Fuliefil.

## RECENT ELECTIONS

In parliamentary elections to the permanent Iraqi National Assembly held on 7 March 2010 the Iraqi National Movement coalition won 25.9% of the vote, taking 91 of 325 seats, ahead of the State of Law coalition with 25.8% and 89 seats, the National Iraqi Alliance (19.4% and 70), the Kurdistan List (15.3% and 43) and the Movement for Change (4.4% and 8). Four parties took 16 seats with less than 3% of the vote each and eight seats were taken by minority parties.

## CURRENT GOVERNMENT

*President:* Jalal Talabani; b. 1933 (sworn in 7 April 2005 and re-elected 11 Nov. 2010).

*Vice Presidents:* Tariq al-Hashemi; Khudair al-Khuzai.

In March 2012 the cabinet consisted of:

*Prime Minister, and Minister of Interior (acting):* Nouri al-Maliki; b. 1950 (sworn in 20 May 2006).

*Deputy Prime Minister for Energy:* Hussain al-Shahristani. *Deputy Prime Ministers:* Saleh al-Mutlaq; Dr Rozh Shaways.

*Minister of Agriculture:* Izz al-Din al-Dawla. *Communications:* Mohammed Tawfiq Allawi. *Culture, and Defence (acting):* Saadun al-Dulaimi. *Displacement and Migration:* Dindar Najman. *Education:* Mohammed Tamim. *Electricity:* Abdulkarim Aftan. *Environment:* Sargon Lazon Sliwah. *Finance:* Rafi Hiyad al-Issawi. *Foreign Affairs:* Hoshyar Zebari. *Health:* Majid Mohammed Amin. *Higher Education and Scientific Research:* Ali al-Adeeb. *Housing and Development:* Muhammad al-Darraji. *Human Rights:* Muhammad Shiya al-Sudani. *Industry and Minerals:* Ahmad Nassar Dali al-Karbouli. *Justice:* Hasan al-Shammari. *Labour and Social Affairs:* Nassar al-Rubayie. *Municipalities and Public Works:* Adel Mohoder. *Oil:* Abd al-Karim Luaybi. *Planning:* Ali Youssif al-Shukri. *Science and Technology:* Abd al-Karim al-Samarrai. *Tourism and Antiquities:* Liwaa Semeism. *Trade:* Khayrullah Babakir. *Transportation:* Hadi Al-Amiri. *Water Resources:* Mohaned al-Saadi. *Youth and Sport:* Jassem Jaafar.

*Government Website (limited English):* <http://www.cabinet.iq>

## CURRENT LEADERS

### Jalal Talabani

*Position*  
President

### Introduction

Jalal Talabani, an experienced Iraqi Kurdish politician, was named state president of Iraq on 6 April 2005 by the Iraqi National

Assembly. He was elected by parliament to a second term in April 2006 and re-elected in Nov. 2010. He was previously the founder and secretary general of the Patriotic Union of Kurdistan (PUK), and later a prominent member of the Iraqi Governing Council which was established following the US-led invasion of Iraq in 2003.

#### *Early Life*

Jalal Talabani was born in Kelkan, Irbil province in Iraqi Kurdistan in 1933. He attended the Law College in Baghdad from 1952–55 before being forced to leave because of his political activities as a young member of the Kurdistan Democratic Party (KDP). Following the Iraqi revolution in 1958 and the overthrow of the monarchy, Talabani rejoined the college, and graduated in 1959. He subsequently served in the Iraqi army before working as a journalist.

When the Kurdish north launched an armed uprising against the Iraqi government in Sept. 1961, Talabani joined the forces led by Mulla Mustafa al-Barzani (the *pehmerga*) and fought in the Kirkuk and As-Sulaymaniyah areas. He also led Kurdish diplomatic delegations to Europe and the Middle East and negotiated with the secular Ba'ath party, whose members dominated Iraq's governing council following a coup led by Abdul Salam Aref in Feb. 1963.

By 1964, when profound disagreements were emerging within the KDP, Talabani established a more secular, urban and left-leaning faction, criticizing al-Barzani for 'conservative and tribal' politics. Factional divisions throughout the late 1960s and early 1970s occasionally erupted into armed confrontations. Although deals that secured some autonomy for the Kurds were struck between the KDP and the ruling Ba'ath party, arguments broke out over access to the region's oil supplies and whether Kurds could maintain an army. When the Kurdish revolt collapsed in 1975 (partly as a result of Iran withdrawing its support), Talabani formed a new party, the Patriotic Union of Kurdistan (PUK).

The PUK opposed the Ba'ath party's enforced resettlement of Kurds to Arab areas of Iraq in the late 1970s, and there were also numerous armed confrontations with the KDP. In the aftermath of Iraqi leader Saddam Hussein's chemical weapons attack that killed around 5,000 Kurds at Halabja in 1988 and the subsequent military action that led to more than 100,000 Kurds fleeing to Turkey, Talabani made efforts to bring unity to Kurdish politics. He improved relations between the PUK and the KDP (then led by Mas'ud al-Barzani) and later formed the Iraqi Kurdistan Front, seeking international support for Kurdish autonomy.

Following elections in the haven created for Kurds by the Western alliance after the first Gulf War, a PUK-KDP joint administration was formed in 1992. However, tensions resurfaced and led to serious confrontations between the two groups in 1994. Both parties signed a peace deal in Washington, D.C. in 1998 and the accord was cemented in Oct. 2002 when the regional parliament reconvened in a session attended by both parties' MPs.

Following the US-led invasion of Iraq and the fall of Saddam in April 2003, Talabani joined the US-appointed Iraqi Governing Council (IGC), distancing himself from the movement for Kurdish independence and pledging to support Iraqi federalism. In the Iraqi elections on 30 Jan. 2005, a Shia alliance won a slim majority in parliament and the Kurdish coalition came second in the polls. For over two months, with the country under sustained attacks from insurgents, both groups argued about the formation of the new government before electing Talabani as the president (a largely ceremonial role) on 6 April 2005.

#### *Career in Office*

A presidential council of Talabani and two vice-presidents appointed Ibrahim al-Jaafari, a conservative from the majority Shia community, as prime minister on 7 April 2005. Talabani promised as president to represent all the country's ethnic and

religious groups and to reach out to Iraq's Arab and Islamic neighbours.

Against a backdrop of continuing violence in Iraq, many analysts questioned the strength of the Shia-Kurdish alliance, given that the two groups had little previous common ground beyond resistance against Saddam Hussein. In Oct. 2005 a new Iraqi constitution was approved narrowly in a national referendum, heralding fresh parliamentary elections on 15 Dec. 2005. After months of political deadlock, Iraq's parliament convened on 22 April 2006 to fill the top leadership posts and Talabani was elected by parliament to a second presidential term. On the same day he appointed the Shia politician Nouri al-Maliki as prime minister designate after the latter was nominated by his Shia coalition, the United Iraqi Alliance (UIA).

Following the restoration of Iraqi-Syrian diplomatic ties in Nov. 2006, Talabani became the first Iraqi head of state to visit Damascus for 30 years in Jan. 2007.

In Nov. 2010 Talabani was again re-elected as president by the National Assembly on the second ballot. He then tasked Prime Minister Nouri al-Maliki with forming a new coalition government and bringing to an end the political stalemate prevailing since inconclusive parliamentary elections the previous March.

#### **Nouri al-Maliki**

##### *Position*

Prime Minister

##### *Introduction*

Nouri al-Maliki was appointed Iraq's prime minister designate by the president, Jalal Talabani, in April 2006. He succeeded his ally and fellow member of the conservative Shia Muslim al-Dawa group, Ibrahim al-Jaafari, who had been unable to curb the violent insurgency or create alliances with Sunni and Kurdish factions since elections in Dec. 2005. Al-Maliki, who once commanded Shia forces against Saddam Hussein's regime from exile in Syria, promised an inclusive government. Although his first administration struggled to achieve the basis for a lasting political consensus, levels of violence did subside and in Nov. 2008 parliament approved an agreement with the USA that all US troops leave the country by the end of 2011. Al-Maliki's State of Law coalition came second at elections in March 2010, but he remained in office and sought to construct a workable coalition that was eventually established and approved by parliament at the end of the year.

##### *Early Life*

Nouri Kamel al-Maliki was born in Hindiyah, southern Iraq in 1950. While studying Arabic at Baghdad University in the early 1970s he joined al-Dawa, which was opposed to the secularism of the ruling Ba'ath party. In 1980 he was forced into exile, initially in Iran and from 1990 in Syria.

Following the US-led invasion of Iraq in March 2003, al-Maliki returned home. In July 2003 he was selected as a member of the US-backed Interim Governing Council, serving on a committee formed to purge Saddam's Ba'athist allies from political life. The committee was widely criticized for heavy-handedness and many Sunni Muslims resented what they saw as a Shia plot to deny them a role in post-Saddam Iraq. As a senior member of al-Dawa, al-Maliki worked closely with party leader al-Jaafari to forge a coalition of Shia parties, called the United Iraqi Alliance (UIA), which won a parliamentary majority in the elections in Jan. 2005.

Elected to the transitional National Assembly, al-Maliki was the senior Shia member charged with drafting the new constitution. In protracted negotiations, he resisted efforts by Sunnis to reduce the autonomy given to Kurds in the north and Shias in the south. Attempts by Prime Minister al-Jaafari to form a broad-based coalition government to reflect the results of the elections on 15 Dec. 2005 became deadlocked and he stepped down on 21 April

2006. Al-Maliki emerged as the UIA's premiership candidate and was named prime minister-designate on 22 April 2006.

#### **Career in Office**

Calling for an end to sectarian divisions, al-Maliki announced a national reconciliation plan in June 2006, including a conditional amnesty for insurgents and intra-communal dialogue between political leaders, clerics, armed militias and civil society representatives. However, sectarian violence continued and Sunni opinion was further inflamed by the widely criticized conduct of Saddam Hussein's execution for crimes against humanity at the end of Dec. 2006. In Jan. 2007 President Bush announced that he would send 21,000 extra US troops to Iraq to reassert the authority of al-Maliki's government. Meanwhile, al-Maliki remained under pressure to find a political consensus on divisive ethnic and sectarian issues, an impasse aggravated by the withdrawal from the national unity government of radical Shia members, secular-leaning Iraqis and the main Sunni coalition group (who rejoined in July 2008).

In Dec. 2007 the UK military contingent in Iraq handed control of Basra province to Iraqi forces, which in March 2008 launched a crackdown on radical Shia Mahdi Army militia. Also in March, Iranian President Mahmoud Ahmadinejad made an unprecedented two-day visit to Iraq for talks with al-Maliki, who returned the visit in June. The following month he first raised the prospect of a timetable for a US withdrawal, leading in Nov. to the approval by Iraq's parliament of a security pact under which all troops would leave the country by the end of 2011.

On 1 Jan. 2009 the Iraqi government took control of Baghdad's fortified Green Zone from US forces and assumed authority over foreign troops in the country. In the same month al-Maliki's allies did well in provincial elections. British troops formally ended their combat mission in Iraq in April 2009 and in June the Iraqi government declared a holiday to mark National Sovereign Day as US combat troops completed their withdrawal from towns and cities. In Oct. 2011 the US government confirmed that all remaining US troops would be out of Iraq by the end of the year.

In Oct. 2009 al-Maliki announced the formation of a multiconfessional nationalist State of Law grouping to contest the forthcoming general election after a split in the broad Shia coalition that won the 2005 polls. Unexpectedly, his alliance was narrowly defeated at elections in March 2010 by the Iraqi National Movement of former prime minister Iyad Allawi, although al-Maliki challenged the result. He remained in office during the drawn-out process of negotiating a coalition, which was eventually concluded in Dec. when, having been reappointed in Nov. as premier, he named a new cabinet which was approved by parliament. Sectarian violence nevertheless continued through 2011 and Iraq was not immune from the wave of popular disaffection with governments that swept across much of the Arab world from the early part of the year. There were also increasing tensions between the central government and the administration of autonomous Iraqi Kurdistan, in part over oil contracts with foreign companies.

#### **DEFENCE**

Following the downfall of Saddam Hussein, recruitment began in July 2003 for a new professional army run by the US military. Saddam Hussein's forces numbered 400,000 at their peak. In Nov. 2008 Iraq's parliament approved a plan that saw the last American troops leave the country in Dec. 2011.

#### **Army**

A New Iraqi Army is being developed to replace Saddam's army with a professional force. In Nov. 2007 personnel numbered an estimated 163,500. In July 2004 the Civil Defense Corps (23,100 personnel in April 2004) was disbanded and converted into a National Guard. It was in turn merged into the Army in Jan. 2005.

#### **Navy**

A 1,100-strong (2007) Iraqi Navy (initially called the Coastal Defense Force) has been re-established since the 2003 war. It began operations in Oct. 2004.

#### **Air Force**

An Iraqi Air Force (initially called the Army Air Corps) has been reconstructed since 2003. There were a total of 1,200 personnel in Nov. 2007, with 22 aircraft and 37 helicopters.

#### **ECONOMY**

The oil sector accounted for 76.1% of GDP in 2001; agriculture accounted for 7.8%, manufacturing 1.6% and services 13.8%.

Iraq featured among the ten most corrupt countries in the world in a 2011 survey of 183 countries carried out by the anti-corruption organization *Transparency International*.

#### **Overview**

The military victory of the US-led coalition in 2003 led to the shutdown of much of Iraq's administrative structure. World Bank estimates indicate that GDP declined by 41% in 2003.

However, substantial progress has been made since then. Inflation has fallen to single digits, steps have been taken to modernize the financial sector, while the government has committed to public financial management reform and increased spending in social sectors. In Nov. 2004 the Paris Club of official creditors agreed to write off 80% of Iraq's external debt. GDP growth peaked in 2008 at 9.5%, aided by record oil revenues, but volatile oil prices have since led to a fall in growth. Improving security, reducing dependence on oil revenues and restoring the rule of law remain challenges and are key to long-term development.

#### **Currency**

From 15 Oct. 2003 a new national currency, the new *Iraqi dinar* (NID), was introduced to replace the existing currencies in circulation in the south and north of the country. Inflation was 2.7% in 2008 but there was deflation of 2.8% in 2009.

#### **Budget**

Estimated revenue, 2006, ID61,650bn. (ID49,505bn. in 2005); expenditure, 2006, ID53,480bn. (ID44,497bn. in 2005). Petroleum revenues accounted for 76.4% of all revenues in 2006; current expenditure accounted for 79.8% of all expenditures.

#### **Performance**

Real GDP growth was 4.2% in 2009 and 0.8% in 2010. Total GDP in 2010 was US\$82.2bn.

#### **Banking and Finance**

All banks were nationalized in 1964. Following the Gulf War in 1991 the formation of private banks was approved, although they were prohibited from conducting international transactions. A new post-Saddam banking law in Oct. 2003 authorized private banks to process international payments, remittances and foreign currency letters of credit. The Trade Bank of Iraq has been established as an export credit agency to facilitate trade financing. The independent Central Bank of Iraq is the sole bank of issue; its *Governor* is Dr Sinan Mohammed Rida Al-Shabibi. All domestic interest rates were liberalized on 1 March 2004.

The Iraq Stock Exchange opened in Baghdad in June 2004 as the successor to the former Baghdad Stock Exchange.

#### **ENERGY AND NATURAL RESOURCES**

##### **Environment**

Iraq's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 3.6 tonnes per capita in 2008.

##### **Electricity**

Installed capacity was 7.3m. kW in 2007. Production in 2007 was 33.18bn. kWh, with consumption per capita 1,164 kWh.

### Oil and Gas

Proven oil reserves in 2008 totalled 115.0bn. bbls. Oil production in 2008 totalled 119.3m. tonnes, the highest total since 2001. The sector provides 95% of government revenue.

In 2008 Iraq had natural gas reserves of 3,170bn. cu. metres.

### Minerals

The principal minerals extracted are sulphur (30,000 tonnes in 2006) and salt (an estimated 25,000 tonnes in 2006).

### Agriculture

There were around 5.75m. ha. of arable land in 2002 and 0.34m. ha. of permanent crops. An estimated 3.53m. ha. were irrigated in 2002. Production (2003 estimates, in 1,000 tonnes): wheat, 2,553; barley, 1,316; tomatoes, 1,000; dates, 910; potatoes, 625; melons and watermelons, 575; cucumbers and gherkins, 350.

Livestock (2003 estimates): sheep, 6.2m.; goats, 1.6m.; cattle, 1.5m.; asses, 380,000; chickens, 23m.

### Forestry

In 2005 forests covered 822,000 ha., representing 1.9% of the land area. Timber production in 2007 was 117,000 cu. metres.

### Fisheries

Catches in 2005 totalled 20,100 tonnes, of which about 98% from inland waters.

## INDUSTRY

Iraq remains under-developed industrially. Production figures (2007, in 1,000 tonnes): residual fuel oil, 5,595; distillate fuel oil, 4,995; cement (estimate), 4,500; petrol, 2,212; kerosene, 739; jet fuel, 409.

### Labour

In 1996 the labour force was 5,573,000 (75% males). Unemployment was 33% in Aug. 2005, down from 55% in Aug. 2003.

## INTERNATIONAL TRADE

### Imports and Exports

In 2007 imports amounted to US\$18,289m. and exports to US\$39,590m. Manufactures and food are the main import commodities. Crude oil is the main export commodity. Imports and exports have both increased significantly since the Saddam era. In May 2011 oil exports totalled 69.0m. bbls, their highest level since before the US-led invasion of 2003.

## COMMUNICATIONS

### Roads

In 2002 there were an estimated 44,900 km of roads, of which 84.3% were paved. Vehicles in use in 2006 included 785,000 passenger cars and 1,345,000 lorries and vans. In 2005 there were 1,789 road accident deaths. Considerable post-war road reconstruction since 2003 reflects heavy military use and lack of maintenance.

### Rail

In 2005 railways comprised 2,032 km of 1,435 mm gauge route. Passenger-km travelled in 2004 came to 24m. and freight tonne-km to 90m.

### Civil Aviation

In 2000 there were international flights for the first time since the 1991 Gulf War, with air links being established between Iraq and Egypt, Jordan and Syria. Since 2003 the two international airports at Baghdad and Al-Basrah have undergone post-war reconstruction. Major domestic airports are at Mosul, Kirkuk and Irbil. In May 2010 the government dissolved the state airline, Iraqi Airways, owing to a legal dispute with Kuwait dating back to the Iraqi invasion in 1990.

### Shipping

In Jan. 2009 there were 18 ships of 300 GT or over registered, totalling 86,000 GT. A 565-km canal was opened in 1992 between Baghdad and the Persian Gulf for shipping, irrigation, the drainage of saline water and the reclamation of marsh land. Iraq has three oil tanker terminals at Al-Basrah, Khor Al-Amaya and Khor Al-Zubair. Its single deep-water port is at Umm Qasr.

### Telecommunications

There were 1.11m. fixed telephone lines in 2009 (36.1 per 1,000 inhabitants). Mobile phone subscribers numbered 19.72m. in 2009. Mobile phones were banned during the Saddam Hussein era. There were 56.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 3,072 in 2008 (0.1 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The Iraqi Constitution of 2005 provided for a judiciary comprised of a Higher Judicial Council (to oversee federal judicial affairs), a Supreme Court, a Court of Cassation and other federal courts including the Central Criminal Court. There is also a Judiciary Oversight Commission. The judicial system remains in a period of transition.

The death penalty was introduced for serious theft in 1992; amputation of a hand for theft in 1994. It is believed that during the Saddam era there were hundreds of executions annually. The death penalty was suspended in April 2003 after the fall of Saddam, but reinstated in Aug. 2004. There were at least 68 confirmed executions in 2011, up from 17 in 2010.

The population in penal institutions in June 2008 was 27,366 (93 per 100,000 of national population).

### Police

A new post-war national police force has been established and numbered about 135,000 in Nov. 2007. The personnel includes both former officers who are being retrained and new recruits.

### Education

Primary education became compulsory in 1976. Primary school age is 6–11. Secondary education is for six years, of which the first three are termed intermediate. The medium of instruction is Arabic; Kurdish is used in primary schools in northern districts.

In 2005 there were 92,769 pre-primary school children with 5,981 teaching staff; 4.43m. primary school children with 215,795 teaching staff; and 1.75m. secondary school pupils with 93,219 teaching staff. Adult literacy rate was an estimated 78.1% in 2009 (male, 86.3%; female, 69.9%). Most schools were closed in March–April 2003 when UNICEF estimates that 200 were destroyed and a further 2,750 looted. By Oct. 2003 all 22 universities and 43 technical institutes and colleges were open, as were nearly all primary and secondary schools. There were 424,908 students and 19,231 academic staff in tertiary education in 2005. Expenditure on education in 2003 was an estimated US\$384.5m.

### Health

According to the World Health Organization, in 2005 there were 19,010 physicians, 3,460 dentists, 3,170 pharmacists and 38,001 nurses and midwifery personnel. There are approximately 240 hospitals and 1,200 primary health care clinics operating in post-war Iraq.

## RELIGION

The constitution proclaims Islam the state religion, but also stipulates freedom of religious belief and expression. In 2001 the population was 97% Muslim; there were also 750,000 Christians, although their numbers have declined since then to 500,000.

In Feb. 2012 there was one Roman Catholic cardinal. *See also* TERRITORY AND POPULATION *above*.

## CULTURE

### World Heritage Sites

Iraq has three UNESCO World Heritage sites: Hatra (inscribed in 1985), a large fortified city of the Parthian (Persian) Empire; Ashur (Qal'at Sherqat) (2003), the first capital and the religious centre of the Assyrians from the 14th to the 9th centuries BC; and Samarra Archaeological City (2007), the site of the capital of the former Abbasid Empire.

### Press

In 2005 there were more than 200 newspapers regularly published, the most popular of which, *Al-Sabah* ('The Morning'), had an average circulation of 50,000.

### Tourism

In 2010 there were 1,518,000 foreign tourists, up from 864,000 in 2008.

## DIPLOMATIC REPRESENTATIVES

Of Iraq in the United Kingdom (3 Elvaston Pl., London, SW7 5QH)  
*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Moheiddin Hussein Abdullah.

Of the United Kingdom in Iraq (International Zone, Baghdad)  
*Ambassador:* Michael Aron.

Of Iraq in the USA (1801 P St., NW, Washington., D.C., 20036)  
*Ambassador:* Jabir Habib Jabir.

Of the USA in Iraq (APO AE 09316, Baghdad)  
*Ambassador:* James F. Jeffrey.

Of Iraq to the United Nations  
*Ambassador:* Hamid Al-Bayati.

Of Iraq to the European Union  
*Ambassador:* Mohammed Abdullah Al-Humaimidi.

## Kurdistan

The Kurdistan Region of Iraq ('Iraqi Kurdistan') is the only area of Kurdistan to be recognized officially as an autonomous federal entity. After decades of insurgency Iraq granted limited independence in 1970. *De facto* independence was established following the Kurdish uprising at the end of the Gulf War in 1991. This led to the creation of the Kurdistan Regional Government by the Iraqi Kurdistan Front a year later. Self-governance was disrupted in 1994 by civil war between the Kurdistan Democratic Party (KDP) and the Patriotic Union of Kurdistan (PUK). Rival administrations were set up in Irbil and As-Sulaymaniyah. Peace was restored in Sept. 1998 with the signing of the US-mediated Washington Agreement. The region was acknowledged officially in the 2005 Iraqi constitution and power-sharing began in 2006.

Area, 40,643 sq. km (15,692 sq. miles); population (2002 estimate), 3,757,058. The region comprises three governorates, Irbil, As-Sulaymaniyah and Dahuk, and claims territory in other Kurdish areas although borders remain a contentious issue with Iraq. The unified government has been based at the capital, Irbil, since 2006.

In presidential elections held on 25 July 2009 Massoud Barzani was re-elected with 69.6% of the vote against 25.3% for Kamal Mirawdily. In parliamentary elections held on the same day the Kurdistan List won 57.3% of the vote and 59 of 111 seats, the Change List 23.8% (25 seats) and the Service and Reform List 12.8% (13 seats).

*President:* Massoud Barzani.

*Prime Minister:* Nechervan Idris Barzani.

Oil and gas are set to become a major source of revenue although exploitation has been hindered over rights' disputes with the Baghdad government. Oil exports began in June 2009 with Baghdad receiving 88% of revenues under current agreements. There are airports at As-Sulaymaniyah and Irbil.

## KEY HISTORICAL EVENTS

Ireland was first inhabited around 7500 BC by Mesolithic hunter-gatherers who travelled across the land bridge that connected southwest Scotland with the northern part of Ireland (it was submerged around 6700 BC). The earliest settlement, at Mount Sandel near Coleraine, has been dated to 5935 BC. Farmers from the Middle-East arrived in Ireland around 3500 BC. Their elaborate graves are also a feature of Neolithic communities in Brittany and the Iberian peninsula. From the sixth century BC, the island was invaded by waves of Celtic tribes from central Europe, including the Gaels, who established pastoral communities within massive stone forts. By AD 200 the Gaels dominated the island, though there was no central control: society was based on a complex structure of hundreds of small kingdoms. The Romans, who dominated much of northern Europe, never reached Ireland. The Gaels traded with other Celtic peoples and sent raiding parties to form settlements in Scotland (Dál Riata) and west Wales.

Christian missionaries reached Ireland during the 3rd century AD. St Patrick, born on the west coast of Britain, was consecrated as a bishop in Gaul and lived and preached in Ireland from c. 432 until his death c. 465. Monasteries were founded and, in an overwhelmingly agrarian society, they became important centres of learning and the dissemination of the written word. In contrast to much of northern Europe, ravaged by fragmentary forces following the collapse of the Roman Empire, Christianity found a haven in Ireland. Later, Irish missionaries took Celtic Christianity to Britain and continental Europe. By the 5th century AD there

were five leading Gaelic kingdoms, which roughly correspond to the latter-day provinces of Ulster, Leinster, Munster and Connacht (the fifth kingdom occupied land in the modern counties of Meath and Westmeath). Each kingdom was dominated by one or two families—the Uí Néill clan was especially powerful in the north and east. The south (Munster) was dominated by the Eóganachta family.

## Nordic Invasion

Viking longboats first appeared off the Irish coast in the late seventh century. 795 saw a full-scale Viking invasion, which heralded more than two hundred years of Scandinavian influence. The Vikings were great traders and established the first towns along the east and south coasts—the towns of Wexford, Waterford, Cork and Limerick became prosperous centres of manufacturing and commerce. Dublin, said to be founded in 841 by the Norse king Thurgesius, became a key outpost in a Viking diaspora stretching as far as Sicily and Russia. Gaelic kings made military alliances with the Viking settlers to support their struggles with neighbouring dynasties. In 976 the warrior Brian Boru (Bóruma) became king of Munster following a series of victories against the powerful Eóganachta. Following Boru's defeat of the Leinster groups and their Norse allies at Clontarf in 1014 he seemed destined to be the first high king of all Ireland, but was murdered shortly after his famous victory.

In the mid-12th century the Pope gave his blessing to an expedition of Anglo-Normans to Ireland. They were sent by the English King Henry II, who had been approached for military support by the deposed king of Leinster, Dermot MacMurrough (Diarmait Mac Murchada). Returning to Ireland in 1169 with Norman barons and Welsh mercenaries, MacMurrough recovered part of his former territories and captured Dublin. Richard de Clare (Strongbow), a powerful Norman invader, became MacMurrough's heir after marrying his daughter. During the 13th century various Anglo-Norman adventurers began to establish themselves in Ireland. Dublin Castle was built in 1204 on the site of a Norse fort and the first parliament sat there in 1264. After his decisive defeat of English forces at the Battle of Bannockburn in 1314, Edward Bruce, the brother of Robert Bruce, king of Scotland, dreamed of establishing a Celtic kingdom. In 1315 he landed in Ulster and attempted to overthrow the English. Within a year he controlled most of Ireland north of Dublin, but his troops left a trail of destruction and soon lost support. Bruce was defeated and killed at Dundalk in 1317 by a Norman-Irish army reinforced from England under orders from King Edward II.

The descendants of the Anglo-Norman settlers were gradually identified with the native Irish, whose language, habits, and laws they adopted. To counteract this, the Anglo-Irish Parliament passed the Statute of Kilkenny in 1366, decreeing heavy penalties against all who allied themselves with the Irish. This statute, however, remained inoperative; although Richard II went to Ireland in 1394 and 1399 to reassert royal authority, he failed to achieve any practical result. During the subsequent Wars of the Roses in England the authority of the English crown became limited to the Pale, a coastal district around Dublin.

King Edward IV, of the House of York, came to the English throne in 1461 and appointed Gerald (Gearóid Mór) FitzGerald, 8th earl of Kildare as viceroy of Ireland. The FitzGerald family were wealthy Yorkists, well-connected to a network of Anglo-Norman and Gaelic families. Gearóid Mór wielded considerable power, and managed to hold onto it even after the return of the Lancastrians in 1485. He was eventually replaced in 1494 by Sir Edward Poynings, who, representing English interests, brought in legislation providing for the reduction of the power of the Anglo-Irish lords.

The Poynings Laws removed the legal rights of the Irish parliament to legislate independently.

Henry VII reappointed Gearóid Mór as viceroy in 1496. For the next 38 years the FitzGerald (Geraldine) ruled Ireland from Maynooth Castle, paying deference to the English crown. Henry VIII was determined to centralize power and reduce the influence of provincial magnates. He introduced the Reformation to Ireland in 1537 and began to dissolve the monasteries with little resistance.

### *Ulster Rebellion*

Elizabeth I, through her deputy in Ireland, Sir Henry Sidley, removed the Irish chieftoms from their positions of power. An uprising in Munster in the early 1570s was quickly suppressed and only Ulster now provided a stumbling block to Tudor domination. It was from Ulster that Hugh O'Neill and Red Hugh O'Donnell launched an open rebellion. In 1598 O'Neill ambushed and defeated a government force of over 4,000 at the Battle of Yellow Ford near Armagh. Spoken of as 'Prince of Ireland', his ambitions were thwarted by the arrival of 20,000 troops under Lord Mountjoy in 1600. Reinforcements of Spanish soldiers in 1601 were insufficient and O'Neill left for the Continent with his followers in the 1607 'Flight of the Earls'.

The Earls' lands were seized by the English crown and in 1609 Ulster-Scottish and English settlers were invited to colonize. Swaths of land were cleared of farms and woodland, and 23 walled new towns were created, including Belfast. By the early 1620s the Anglo-Scottish population of Ulster was more than 20,000. English politics in the 1630s was dominated by struggles between the crown and parliament (the Puritans) and the Irish in Ulster took advantage, rebelling against the planters in late 1641 in a series of attacks in which thousands of Protestants were killed. The following year Owen Roe O'Neill, who had fled to Spain with his uncle Hugh in 1607, returned to Ireland and led the Confederate forces. A provisional government was established at Kilkenny and by the end of 1642 O'Neill controlled the whole island apart from Dublin and parts of Ulster.

Victory for the English parliamentarians under Oliver Cromwell and the execution of Charles I in 1649 had a profound impact on Ireland. Cromwell was determined to avenge the 1641 massacre of the Ulster planters. With his New Model Army, he stormed Drogheda and murdered its garrison of 2,000. Wexford fell, and by 1652 all of Ireland was in Cromwellian hands. Hundreds of thousands of acres of land were confiscated and given to a new wave of Protestant settlers.

Following the restoration of the English monarchy in 1660, Catholics in Ireland hoped to be rewarded for their former loyalty, but Charles II restored only a small number of Catholic estates. King James II, however, was a declared Catholic and under his viceroy in Ireland, Richard Talbot, earl of Tyrconnel, Catholics were advanced to positions of state and placed in control of the military. Protestant power was on the wane in England and the Protestant aristocracy invited William of Orange (the Dutch husband of James II's daughter Mary) to claim the English crown. James II fled to France, then travelled to Ireland with French soldiers. They moved north, aiming to subjugate Protestant Ulster. In the spring of 1689 only the walled towns of Derry/Londonderry and Enniskillen remained in Protestant hands. Derry/Londonderry was besieged, but it held out for 15 weeks until the arrival of William's forces, which defeated James at the Battle of the Boyne. The Jacobites retreated to Limerick, where they negotiated the Treaty of Limerick of 1691. Catholics were permitted some religious freedom, and the restoration of their lands. However, the treaty was not honoured by the English parliament and 11,000 Irish Jacobites set sail to join the French army.

### *Religious Divide*

The defeat of the Catholic cause was followed by more confiscation of land and the introduction of the Penal Laws which prevented Catholics from buying freehold land, holding public office or bearing arms. During the American revolution, fear of a French invasion led Irish Protestants to form the Protestant Volunteer army. Led by Henry Grattan, they used their military strength to extract concessions from Britain. Trade concessions were granted in 1779 and the Poynings Laws repealed three years later. However, Catholics continued to be denied the right to hold political office.

The principles of the French Revolution found their most powerful expression in Ireland in the Society of United Irishmen, which, led by the protestant lawyer Theobald Wolfe Tone, mounted a rebellion in 1798. Without the expected French assistance, the rebellion was crushed by crown troops led by Gen. Lake. The British prime minister, William Pitt, was convinced that the 'Irish problem' could be solved by the abolition of the Irish parliament, legislative union with Britain and Catholic emancipation. The first two goals were achieved in 1801, but the opposition of George III and British Protestants prevented the enactment of the Catholic Emancipation act until 1829, when it was accomplished largely through the efforts of Daniel O'Connell.

After 1829 the Irish representatives in the British Parliament, led by O'Connell, sought a repeal of the Act of Union. Calls for land reforms were drowned out by a disastrous potato famine. Between 1845–49 a blight wiped out the potato crop, the staple food of the Irish population and resulted in mass starvation. Of a population of 8.5m. almost 1m. died and over 1m. emigrated, mostly to the United States. Irish Catholics in the United States formed the secret Fenian movement, dedicated to achieving full Irish independence.

### *Home Rule Campaign*

Charles Parnell, a Home Rule League MP, came to the fore of the nationalist movement in 1877 as president of the Home Rule Confederation of Great Britain. Parnell led parliamentary obstruction in response to the House of Lords' rejection of limited land reform in Ireland. Parnell's Irish Land League saw limited gains in Gladstone's 1881 Land Act but Parnell, voicing continuing discontent, was imprisoned in Dublin. His release in 1882 and the subsequent Kilmainham Treaty, granting more concessions to tenants, was seen by London as the quickest solution to an increasingly anarchic Ireland.

The Home Rule Party, led by Parnell, brought down the Conservative government at Westminster by voting with the Liberals, allowing William Gladstone to form a government in 1886. Gladstone attempted to resolve the 'Irish problem' by introducing a Home Rule Bill—seen as Parnell's greatest achievement—which would give the Irish Parliament the right to appoint the executive of Ireland. However, Home Rule was greatly opposed in Ulster and England and failed at Westminster in 1886 and 1893. Parnell's domination of Irish politics came to end with the disclosure of his affair with Kitty O'Shea—an English woman of aristocratic background—in 1890. After Gladstone rejected him, he lost control of the Irish parliamentarians and was condemned by the Catholic clergy.

During the 1880s a new pride in traditional Irish culture took root, symbolized by the establishment of the Gaelic Athletic Association in 1884 and the Gaelic League in 1893, which successfully campaigned for the return of the Irish language to the school curriculum. Though not political organizations, they provided a link between the conservative Catholic church and the Fenians (nationalists). In 1905 the Irish political leader and journalist Arthur Griffith founded Sinn Féin ('we ourselves') to promote Irish economic welfare and achieve complete political independence. However, at the time the dominant nationalist group remained the Home Rule party of John Redmond.

A Home Rule Bill was finally passed in 1914 but the act was suspended for the duration of the First World War. Redmond

pledged the support of Ireland to the British war effort, which angered some nationalists. The Irish Republican Brotherhood (IRB) plotted a rebellion while Britain was at war, soliciting German support. On Easter Monday 1916 the IRB seized the General Post Office in Dublin and Patrick Pearse read out the proclamation of the Republic of Ireland. Though the Easter Rising was over in under a week, the emotional impact was heightened when the British executed 16 of the rebel leaders. Sinn Féin, linked in the Irish public's mind with the rising, scored a dramatic victory in the parliamentary elections of 1918. Its members refused to take their seats in Westminster, declared the *Dáil Éireann* ('Diet of Ireland') and proclaimed the Irish republic. The British outlawed Sinn Féin and the *Dáil*, which went underground and associated military groups including the Irish Republican Army (IRA) engaged in guerrilla warfare against the local authorities representing the Union. The British sent police reinforcements (the Black and Tans) who further inflamed the situation.

#### Civil War

A new Home Rule Bill was passed in 1920, establishing two parliaments, one in Belfast and the other in Dublin. The Unionists of the six counties accepted this scheme, and a Northern Parliament was duly elected in May 1921. Sinn Féin rejected the plan, but in autumn 1921 British Prime Minister Lloyd George negotiated with Griffith and Michael Collins of the *Dáil* a treaty granting Catholic Ireland dominion status within the British Empire. Collins managed to gain approval in the *Dáil* by a slim majority. The Republicans in the *Dáil*, led by Éamon de Valera, rejected the treaty, which had divided Ireland and fell short of full independence. A brutal civil war ensued; Collins, who had assumed command of the army, was assassinated in Aug. 1922 by anti-treaty rebels. The treaty supporters emerged as victors and the Irish Free State was established in Jan. 1922. William Cosgrave became the first prime minister and his Fine Gael party led for ten years. In 1932 de Valera, leader of the Fianna Fáil party, became prime minister (*taoiseach*). Five years later he brought in a new constitution establishing the sovereign nation of Ireland and abolishing the oath of allegiance sworn by Irish parliamentarians to the British crown.

#### Independence

Ireland remained neutral in the Second World War, though in the harsh economic conditions of the time tens of thousands of people emigrated to Britain for work and many thousands joined the war effort. In 1948 Prime Minister John Costello demanded total independence from Britain and reunification with the six counties of Northern Ireland. Independence came the following year and in 1955 the Republic of Ireland was admitted to the United Nations, but nothing came of the claim to the six Ulster counties under British rule. Economic relations between the Republic and Northern Ireland improved in the 1950s and '60s, though both decades were marked by large-scale emigration from the Republic, chiefly to the United States. Trouble in the North flared up in the late '60s over Catholic demands for civil rights and equality in the allocation of housing. Confrontation between the two religious communities intensified and in 1969 British troops were deployed to keep the peace. The British military soon lost the confidence of the Catholic community, the IRA increased its activity and more violence ensued. In 1972 the Unionist government in Belfast resigned and direct rule from London was imposed.

On 1 Jan. 1973 the Republic of Ireland became a member state of the European Economic Community. Jack Lynch led Fianna Fáil into power in 1977, though over the next decade there were party splits while general elections were held against a backdrop of soaring unemployment. Emigration increased, especially among young people, reaching a peak of 44,000 in 1989 under Charles Haughey's premiership. The 1990s were marked by an economic

upturn, buoyed by EU subsidies and foreign investment. The legalization of divorce in 1995 symbolized the Irish Republic's embrace of modern European values. In the north, a ceasefire between the IRA and Protestant militias in 1994 formed the basis for the signing of the Good Friday Agreement in April 1998. On 2 Dec. 1999 the Irish constitution was amended to remove the articles laying claim to Northern Ireland. Prime Minister Bertie Ahern, who came to power in the 1997 general election, took Ireland into the single European currency in Jan. 2002. In Oct. 2002 the Northern Irish Assembly was suspended for the fourth time in its history over allegations of IRA spying at the Northern Ireland Office. Direct rule from London was subsequently reimposed. In May 2007 a devolved Northern Ireland government replaced direct rule from London.

#### TERRITORY AND POPULATION

The Republic of Ireland lies in the Atlantic Ocean, separated from Great Britain by the Irish Sea to the east, and bounded in the northeast by Northern Ireland (UK). In 2005, 60.5% of the population lived in urban areas. The population at the 2006 census was 4,239,848 (2,118,677 females), giving a density of 60.3 persons per sq. km. The census population in 2006 was the highest figure since 1861 when the census recorded a population of 4.40m.

The UN gives a projected population for 2015 of 4.73m.

The capital is Dublin (Baile Átha Cliath). Town populations, 2006: Greater Dublin, 1,045,769; Cork, 190,384; Limerick, 90,757; Galway, 72,729; Waterford, 49,213.

<sup>1</sup>Cities were previously known as County Boroughs.  
<sup>2</sup>Area details provided by Ordnance Survey.

The official languages are Irish (the national language) and English; according to the 2006 census, Irish is spoken by 1.66m. persons in the Republic of Ireland (41.9% of the population, down from 42.8% in 2002). It is a compulsory subject at school.

## SOCIAL STATISTICS

Statistics for five calendar years:

	Births	Marriages	Deaths
2003	61,529	20,302	29,074
2004	61,972	20,619	28,665
2005	61,372	21,355	28,260
2006	64,237	21,841	27,479
2007	70,620	22,544	28,050

2007 rates (per 1,000 population): birth, 16.3; death, 6.5; marriage, 5.2. Annual population growth rate, 2000–05, 1.7%. Expectation of life at birth, 2006, 76.8 years for males and 81.6 years for females.

In 2005 the suicide rate per 100,000 population was 11.6 (men, 18.5; women, 4.8). Infant mortality in 2005, 4 per 1,000 live births; fertility rate (2008), 2.0 births per woman.

At a referendum on 24 Nov. 1995 on the legalization of civil divorce the electorate was 1,628,580; 818,852 votes were in favour, 809,728 against.

The number of immigrants in the year to April 2006 was 107,800 while emigrants numbered 36,000 in the same period. Immigration peaked at 109,500 in 2006–07 but by 2009–10 had fallen to a provisional 30,800 (the lowest figure since 1993–94). Provisional figures for 2009–10 suggest that the number of emigrants, at 65,300 (including 27,700 Irish citizens), was the highest total since 1988–89. In 2009 Ireland received 2,689 asylum applications, down from 11,634 in 2002.

A UNICEF report published in 2005 showed that 15.7% of children in Ireland live in poverty (in households with income below 50% of the national median), compared to 2.4% in Denmark.

## CLIMATE

Influenced by the Gulf Stream, there is an equable climate with mild southwest winds, making temperatures almost uniform over the whole country. The coldest months are Jan. and Feb. (39–45°F, 4–7°C) and the warmest July and Aug. (57–61°F, 14–16°C). May and June are the sunniest months, averaging 5.5 to 6.5 hours each day, but over 7 hours in the extreme southeast. Rainfall is lowest along the eastern coastal strip. The central parts vary between 30–44" (750–1,125 mm), and up to 60" (1,500 mm) may be experienced in low-lying areas in the west. Dublin, Jan. 40°F (4°C), July 59°F (15°C). Annual rainfall 30" (750 mm). Cork, Jan. 42°F (5°C), July 61°F (16°C). Annual rainfall 41" (1,025 mm).

## CONSTITUTION AND GOVERNMENT

Ireland is a sovereign independent, democratic republic. Its parliament exercises jurisdiction in 26 of the 32 counties of the island of Ireland. The first Constitution of the Irish Free State

came into operation on 6 Dec. 1922. Certain provisions which were regarded as contrary to the national sentiments were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from the original document. On 14 June 1937 a new constitution was approved by Parliament and enacted by a plebiscite on 1 July 1937. This constitution came into operation on 29 Dec. 1937. Under it the name Ireland (Éire) was restored. In its original form the Irish Constitution provided that the territory of Ireland comprised the whole island, and thus included that of Northern Ireland. This position was modified by referendum in 1998 following the Good Friday Agreement of that year. The former territorial claim has now been replaced with a statement that, while it is the aspiration of the Irish nation to unite the peoples of the island and the current territory of Ireland is not final, unification shall not take place without the consent of majorities in both jurisdictions.

The head of state is the *President*, whose role is largely ceremonial, but who has the power to refer proposed legislation which might infringe the Constitution to the Supreme Court.

The *Oireachtas* or National Parliament consists of the President, a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). The *Dáil*, consisting of 166 members, is elected by adult suffrage on the Single Transferable Vote system in constituencies of three, four or five members. Of the 60 members of the Senate, 11 are nominated by the *Taoiseach* (Prime Minister), six are elected by the universities and the remaining 43 are elected from five panels of candidates established on a vocational basis, representing the following public services and interests: (1) national language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) agricultural and allied interests, and fisheries; (3) labour, whether organized or unorganized; (4) industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) public administration and social services, including voluntary social activities. The electing body comprises members of the *Dáil*, Senate, county boroughs and county councils.

A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

No amendment of the Constitution can be effected except with the approval of the people given at a referendum.

## National Anthem

'Amhrán na bhFiann' ('The Soldier's Song'); words by P. Kearney, tune by P. Heeney and P. Kearney.

## GOVERNMENT CHRONOLOGY

(FF = Fianna Fáil; FG = Fine Gael; L = Labour; n/p = non-partisan)

Presidents since 1938.

1938–45	FF	Douglas Hyde
1945–59	FF	Séan Thomas O'Kelly
1959–73	FF	Éamon de Valera
1973–74	FF	Erskine Hamilton Childers
1974–76	FF	Cearbhall O'Dálaigh
1976–90	FF	Patrick John Hillery
1990–97	n/p	Mary Terese Robinson
1997–2011	FF	Mary Patricia McAleese
2011–	L	Michael Daniel Higgins

Prime Ministers.

1932–48	FF	Éamon de Valera
1948–51	FG	John Aloysius Costello
1951–54	FF	Éamon de Valera
1954–57	FG	John Aloysius Costello
1957–59	FF	Éamon de Valera
1959–66	FF	Séan Francis Lemass
1966–73	FF	John (Jack) Mary Lynch

1973–77	FG	Liam Thomas Cosgrave
1977–79	FF	John (Jack) Mary Lynch
1979–81	FF	Charles James Haughey
1981–82	FG	Garret Michael FitzGerald
1982	FF	Charles James Haughey
1982–87	FG	Garret Michael FitzGerald
1987–92	FF	Charles James Haughey
1992–94	FF	Albert Reynolds
1994–97	FG	John Gerard Bruton
1997–2008	FF	Bartholomew (Bertie) P. Ahern
2008–11	FF	Brian Cowen
2011–	FG	Enda Kenny

## RECENT ELECTIONS

A general election was held on 25 Feb. 2011: Fine Gael (FG) gained 76 seats with 36.1% of first preference votes (in 2007, 51 seats); Labour Party (L), 37 with 19.4% (20); Fianna Fáil (FF) 20 with 17.4% (78), Sinn Féin 14 with 9.9% (4); United Left Alliance, 5; New Vision, 1; ind., 13. Turnout was 70.1%.

Following elections to the Senate in April 2011, FG held 19 of the 60 seats, FF had 14, L had 12, Sinn Féin had 3 and independents held 12 seats.

Presidential elections took place on 27 Oct. 2011. Michael D. Higgins (L) won 39.6% of the first preference votes, Seán Gallagher (ind.) 28.5%, Martin McGuinness (Sinn Féin) 13.7%, Gay Mitchell (FG) 6.4%, David Norris (ind.) 6.2%, Dana Rosemary Scallon (ind.) 2.9% and Mary Davis (ind.) 2.7%. Higgins won in the final count, with 61.6% of votes against 38.4% for Gallagher. Turnout was 56.1%.

## European Parliament

Ireland has 12 (13 in 2004) representatives. At the June 2009 elections turnout was 58.6% (58.6% in 2004). Fine Gael won 4 seats with 29.1% of votes cast (political affiliation in European Parliament: European People's Party); Fianna Fáil, 3 with 24.1% (Alliance of Liberals and Democrats for Europe); Labour Party, 3 with 13.9% (Progressive Alliance of Socialists and Democrats); Socialist Party, 1 with 2.8% (European United Left/Nordic Green Left). One independent was elected, with 4.6% (Alliance of Liberals and Democrats for Europe).

## CURRENT GOVERNMENT

*President:* Michael D. Higgins (b. 1941; L), elected out of seven candidates on 27 Oct. 2011 and inaugurated 11 Nov. 2011.

In March 2012 the Fine Gael–Labour coalition government was composed as follows:

*Taoiseach (Prime Minister):* Enda Kenny; b. 1951 (FG; in office since 9 March 2011).

*Tánaiste (Deputy Prime Minister) and Minister for Foreign Affairs and Trade:* Eamon Gilmore (b. 1955; L). *Finance:* Michael Noonan (b. 1943; FG). *Health:* James Reilly (b. 1955; FG). *Justice, Equality and Defence:* Alan Shatter (b. 1951; FG). *Environment, Community and Local Government:* Phil Hogan (b. 1960; FG). *Enterprise, Jobs and Innovation:* Richard Bruton (b. 1953; FG). *Agriculture, Marine and Food:* Simon Coveney (b. 1972; FG). *Education and Skills:* Ruairí Quinn (b. 1946; L). *Transport, Tourism and Sport:* Leo Varadkar (b. 1979; FG). *Children:* Frances Fitzgerald (b. 1950; FG). *Social Protection:* Joan Burton (b. 1949; L). *Public Expenditure and Reform:* Brendan Howlin (b. 1956; L). *Arts, Heritage and Gaeltacht Affairs:* Jimmy Deenihan (b. 1952; FG). *Communications, Energy and Natural Resources:* Pat Rabbitte (b. 1949; L).

There are 15 Ministers of State.

*Attorney General:* Máire Whelan.

*Chairman of Dáil Éireann:* Seán Barrett.

*Government Website:* <http://www.gov.ie>

## CURRENT LEADERS

### Michael D. Higgins

#### *Position*

President

#### *Introduction*

Michael D. Higgins took office as president on 11 Nov. 2011. Prior to his appointment as president he was the head of the Labour Party. He has published several volumes of poetry.

#### *Early Life*

Michael Daniel Higgins, known popularly as Michael D., was born on 18 April 1941 in Limerick and raised in County Clare, in the west of Ireland. After working as a clerk he enrolled as a mature student at Galway University in 1962, where he would later lecture in sociology and politics. He undertook further studies at Manchester University in the UK and at the University of Indiana, USA.

Having twice stood unsuccessfully for election to the Dáil as a Labour Party candidate, Higgins was appointed to the Senate by Taoiseach Liam Cosgrave in 1973. He was elected to the Dáil in 1981 but lost his seat in Nov. 1982 following the collapse of the governing coalition. Known as a radical, he served as mayor of Galway from 1982–83, a position he again held from 1991–92. Re-elected to parliament in 1987, he retained his Galway West seat until opting not to stand at the 2011 election.

Having previously opposed Labour's entry into the ruling coalition, Higgins accepted the post of minister of the arts and culture in 1993. During his four years in the job he repealed the controversial Section 31, which allowed censorship over media coverage of the Troubles. He also oversaw the establishment of the Irish-language broadcaster, TG4.

Higgins was a vocal opponent of the 2003 Iraq War and has campaigned for human rights in Somalia, Chile, Nicaragua, Gaza and Cambodia. At the 2011 presidential election he defeated Seán Gallagher, a well-known entrepreneur, and Martin McGuinness, a former commander of the IRA and later deputy leader of the Northern Irish power-sharing assembly.

#### *Career in Office*

During campaigning for the largely ceremonial post, Higgins pledged to promote justice and equality as the country emerges from economic crisis.

### Enda Kenny

#### *Position*

Prime Minister

#### *Introduction*

Enda Kenny became prime minister (Taoiseach) on 9 March 2011. He has been leader of the centrist Fine Gael since 2002 and is currently Ireland's longest-serving member of parliament. He is a former minister of state for tourism and trade.

#### *Early Life*

Kenny was born in 1951 in Castlebar, County Mayo. He was schooled locally before studying at the University of Galway and St Patrick's College of Education in Dublin. After graduating he worked as a primary school teacher for a year.

Kenny's father, Henry, was the Fine Gael member of parliament for Mayo West and a parliamentary secretary. Enda regularly assisted him with constituency matters and when Kenny Snr died in 1975, his son took over the Mayo West seat after winning a by-election. Over the next decade Kenny served as a backbencher but in 1986 was appointed junior minister for education and labour in the government of Garret FitzGerald.

After Fine Gael lost the 1987 election, Kenny served on the opposition front bench. He became party chief whip in 1993 and a

year later, after the collapse of Albert Reynolds' Fianna Fáil government, helped negotiate a 'rainbow coalition' with the Labour Party and the Democratic Left. He served in that government as minister for tourism and trade and chaired the European Union Council of Trade Ministers during Ireland's six-month presidency of the EU in 1996.

Fine Gael left government after the 1997 general election and Kenny ran unsuccessfully for party leader in 2001. In 2002, following the party's worst ever election performance, he was elected its new leader. In 2004 Fine Gael made significant gains at the European elections and out-pollled Fianna Fáil, the first time Fianna Fáil had come second in elections across the country since 1927. In 2006 Kenny became vice-president of the European People's Party (EPP), the centre-right grouping in the European Parliament.

Kenny led Fine Gael to a strong showing at the 2007 general election despite coming second to Fianna Fáil. In 2010 he held off a leadership challenge before reshuffling his front bench and overseeing victory at the 2011 general election on the back of strong anti-Fianna Fáil sentiment in light of the country's economic collapse. With 76 of a possible 166 seats, Fine Gael was the largest single party for the first time in its history and Kenny formed a coalition government with the Labour Party.

#### *Career in Office*

Kenny's primary challenge has been to spur a recovery in the financial system. Prior to the election he pledged to renegotiate the conditions of the €85bn. IMF-EU bail-out package agreed by the previous government, and in July 2011 EU leaders agreed to cut the interest rate on the rescue deal and to extend the repayment period. However, at the same time Moody's international credit ratings agency downgraded Ireland's debt rating to junk status. By the end of the year, Ireland's fiscal position was improving under an austerity regime of tax rises and spending cuts, but the economy remained vulnerable to debt levels and external pressures.

Meanwhile, Kenny courted diplomatic controversy in July 2011 with an attack on the Vatican, which he accused of having tried to cloud the extent of sexual abuse of children by Catholic clergy in Ireland. In response, the Vatican recalled its envoy from Dublin.

#### **DEFENCE**

Supreme command of the Defence Forces is vested in the President. Exercise of the supreme command is regulated by law (Defence Act 1954). Military Command is exercised by the government through the Minister for Defence, who is the overall commander of the Defence Forces.

The Defence Forces comprise the Permanent Defence Force (the regular Army, the Air Corps and the Naval Service) and the Defence Reserve (comprising a First Line Reserve of members who have served in the Permanent Defence Force, a second-line Territorial Army Reserve and a second-line Naval Reserve).

The total strength of the Permanent Defence Force in Oct. 2005 was 10,541 (including 524 women). The total strength of the Reserve in Aug. 2005 was 11,218. In Dec. 2005, 768 Defence Forces personnel were involved in 19 peace-support missions throughout the world.

Defence expenditure in 2008 totalled US\$1,588m. (US\$382 per capita), representing 0.6% of GDP.

#### **Army**

The Army strength in Oct. 2005 was 8,623 personnel with 10,810 reservists. There is a Training Centre at the Curragh, Co. Kildare and a Logistics Base, with elements located at the Curragh and Dublin for force level logistical support.

#### **Navy**

The Naval Service is based at Haulbowline in Co. Cork. The strength in Oct. 2005 was 1,061 with 408 reservists. It operates eight patrol vessels.

#### **Air Corps**

The Air Corps has its headquarters at Casement Aerodrome, Baldonnel, Co. Dublin. The Air Corps is a stand-alone Corps which does not form an intrinsic part of the new Army Brigade structure. The Air Corps strength in Oct. 2005 was 857 personnel. The Corps operates 18 fixed-wing aircraft and 12 helicopters.

#### **INTERNATIONAL RELATIONS**

On 12 June 2008 Ireland became the first European Union member to reject the Treaty of Lisbon when it held a national referendum in which 53.4% of votes cast were against the reform treaty and only 46.6% in favour. Turnout was 53.1%. However, at a second referendum on 2 Oct. 2009, the treaty was approved by 67.1% to 32.9% (turnout, 59.0%). Parliamentary ratification followed on 23 Oct. 2009.

#### **ECONOMY**

Agriculture accounted for 2% of GDP in 2005, industry 36% and services 62%.

According to the anti-corruption organization *Transparency International*, Ireland ranked equal 19th in the world in a 2011 survey of the countries with the least corruption in business and government. It received 7.5 out of 10 in the annual index.

#### **Overview**

Historically one of Western Europe's least developed economies, Ireland entered the new millennium as the region's second richest per capita after Luxembourg. The chief engine of growth was the high-tech export sector (chiefly chemicals and computer hardware and software). US investors were attracted by Ireland's favourable corporate tax environment for manufacturers and its skilled, English-speaking labour force. Net inflows of foreign direct investment (FDI) accelerated significantly in 1998, reaching a record high of US\$29.3bn. in 2002.

Following a decade of strong growth propelled by a housing bubble and credit expansion, the economy faced a severe crisis in 2008 in the midst of global economic turmoil. Ireland became the first eurozone economy to fall into recession in 2008 as housing construction fell dramatically. In Sept. 2008 the government moved to stabilize the domestic financial system with a €400bn. plan to protect all deposits, bonds and debts in six banks and building societies for two years. By Feb. 2009 the state had nationalized Anglo Irish Bank and provided emergency funding to Allied Irish Banks and the Bank of Ireland. The economy contracted by 7.0% in 2009.

In Nov. 2010, following widespread concerns in Europe over the Irish government's ability to service its banking sector's debts, the country accepted an €85bn. bail-out from the EU, with the IMF providing €22.5bn. In Dec. 2010 the government unveiled an austerity budget including €6bn. of cuts to reduce the budget deficit to 3% of GDP by 2015 (which in 2009 was the second highest in the EU at 14.2% of GDP). Growth rebounded in the first half of 2011 driven by net exports, although domestic demand continued to drag. Continuing eurozone crises, a renewed global slowdown and Ireland's reliance on exports remain major hurdles to growth in the short term, while unemployment is high (at above 14%) and continues to rise.

#### **Currency**

On 1 Jan. 1999 the euro (EUR) became the legal currency in Ireland at the irrevocable conversion rate of 0.787564 Irish pounds to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the Irish pound ceased

to be legal tender on 9 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €6.8bn.

Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.9%	4.6%	3.5%	2.2%	2.4%	3.9%	4.9%	4.1%	-4.5%	-0.9%

The Central Bank has the sole right of issuing legal tender notes; token coinage is issued by the Minister for Finance through the Bank. Gold reserves were 176,000 troy oz in Sept. 2009 and foreign exchange reserves US\$574m. Total money supply was €83,181m. in Aug. 2009.

### Budget

Current revenue and expenditure (in €1m.):

	2007	2008
<i>Current Revenue</i>		
Customs duties	266	248
Excise duties	5,838	5,443
Capital taxes	3,498	1,762
Stamp duties	3,186	1,651
Income tax	13,572	13,177
Corporation tax	6,391	5,066
Value-added tax	14,497	13,430
Levies	3	1
Non-tax revenue	638	847
<b>Total</b>	<b>47,887</b>	<b>41,624</b>
<i>Current expenditure</i>		
Industry and labour	1,499	1,547
Agriculture	1,363	1,446
Fisheries, Forestry, Tourism	214	267
Health	14,281	15,356
Education	7,891	8,465
Social Welfare	15,498	17,807
Security	3,475	3,746
Other	4,386	4,749
Gross current	48,607	53,384
Less: Receipts, e.g. social security	11,647	12,626
<b>Net total (including non-voted central fund)</b>	<b>36,960</b>	<b>40,758</b>

VAT is 23.0% (reduced rates of 13.5%, 9.0% and 4.8%).

Ireland's budget deficit in 2010 was 31.3% of GDP (2009, 14.2%; 2008, 7.3%). The required target set by the EU is a budget deficit of no more than 3%.

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.8%	5.9%	4.2%	4.5%	5.3%	5.3%	5.2%	-3.0%	-7.0%	-0.4%

During the late 1990s Ireland had the fastest-growing economy in the European Union, with real GDP growth of 10.9% in 1997 and growth averaging 9.0% between 1995 and 1999. From a GDP per head of only 69% of the EU average in 1987, it was estimated to have risen to 148% of the EU average by 2007. Total GDP in 2010 was US\$203.9bn.

### Banking and Finance

In Oct. 2010 a new Central Bank of Ireland was created with a single fully-integrated structure and a unitary board—the Central Bank Commission. This replaced the boards of the Central Bank and Financial Services Authority of Ireland and the Irish Financial Services Regulatory Authority.

The Board of Directors of the Central Bank of Ireland consists of a Governor, appointed for a seven-year term by the President on the advice of the government, three *ex officio* directors (Director-General of Central Bank, Head of Financial Regulation and Secretary-General of Department of Finance) and between six and eight other directors, all appointed by the Minister for

Finance. The *Governor* is Patrick Honohan. In 2009 the Bank's profit was €933.81m.; €745.47m. was paid to the Exchequer.

As at Nov. 2010, 420 credit institutions (including branches) were registered with the Central Bank.

At Sept. 2010 total assets of within-the-State offices of all credit institutions amounted to €1,312bn.

Anglo Irish Bank, the country's third largest bank, was nationalized in Jan. 2009, as was Ireland's second largest bank, Allied Irish Banks, in Sept. 2010.

There is a stock exchange in Dublin.

### ENERGY AND NATURAL RESOURCES

In 2008, 3.8% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 16% has been set by the EU for 2020.

### Environment

Ireland's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 10.7 tonnes per capita.

### Electricity

The total generating capacity in 2004 was 5,592 MW, as averaged on a daily basis. This included wind generation, small renewable and small Combined Heat and Power (CHP). In 2003 there were approximately 1,804,680 customers connected to the network consuming 22,286 GWh.

### Oil and Gas

Oil accounts for 56% of primary energy demand in Ireland while gas makes up 25% of demand. Over 0.6m. sq. km of the Irish continental shelf has been designated an exploration area for oil and gas; at the furthest point the limit of jurisdiction is 520 nautical miles from the coast. In the offshore there is a vast Continental Shelf in which a number of major basins and troughs have been identified. In March 2012 Providence Resources announced the discovery of a large oil field located 50 km off the Cork coast. Providing a flow in excess of 3,500 bbls per day, it is the first commercially viable oil field in Irish waters.

Natural gas reserves in 2007 totalled 10bn. cu. metres. Output in 2006 was 510m. cu. metres and consumption 4.6bn. cu. metres. 91% of natural gas supplies for the Irish Market are imported through the two sub-sea interconnectors connecting Ireland with Scotland and the remaining 9% is supplied from the Kinsale Head gas field, about 50 km off the south coast of Ireland. Deliveries from the Corrib gas field, about 80 km off the west coast, are scheduled to start in 2013.

Natural gas transmission and distribution is currently carried out by Bord Gáis Éireann (Irish Gas Board). The gradual liberalization of the Irish gas market, which started in July 2004, was completed in July 2007 when domestic as well as business users became free to select any licensed natural gas supplier.

### Peat

The country has very little indigenous coal, but possesses large reserves of peat, the development of which is handled largely by Bord na Móna (Peat Board). To date, the Board has acquired and developed 85,000 ha. of bog and has 27 locations around the country. In 2006–07 the Board sold 2.4m. tonnes of milled peat for use in three milled peat electricity generating stations. 231,000 tonnes of briquettes were produced for sale to the domestic heating market. Bord na Móna also sold 1.8m. cu. metres of horticultural peat, mainly for export.

### Minerals

Ireland has three zinc-lead mines, which in 2009 produced a combined total of 357,000 tonnes of zinc in concentrate and 43,000 tonnes of lead in concentrate, together with some silver (in

lead). Ireland is Europe's leading zinc mine producer (36% of European output in 2009) and ranks tenth in the world for total zinc production. Gross value of metal production (lead and zinc) in Ireland in 2009 was €314m. Production of gypsum is significant (400,000 tonnes in 2009). Aggregate production in 2009 was an estimated 65m. tonnes. In June 2010, 37 companies held 514 prospecting licences; a total of €20.2m. was spent on exploration in 2009. The main target is base metals but there is also interest in gold.

### Agriculture

The Central Statistics Office's *Quarterly National Household Survey* showed in the quarter of March–May 2003 that there were 113,200 people whose primary source of income was from agriculture. A total of 240,100 people worked on farms on a regular basis, working the equivalent of 158,100 full-time jobs. There were 136,500 farm holdings in Ireland, almost all of which were family farms. Average farm size was 32.0 ha. 43% of farms were under 20 ha. In 2005 there were 1.15m. ha. of arable land in Ireland and 1,810 ha. of permanent crops.

Agriculture, fisheries and forestry represented 3.5% of GDP in 2002 (provisional). 90% of the agricultural area was devoted to grass in 2002. In 2003 beef and milk production accounted for 57% of goods output at producer prices.

In 2005: barley accounted (in ha.) for 164,500; wheat, 94,700; sugar beets, 31,000; oats, 16,500; potatoes, 12,200. Production figures (in 1,000 tonnes): sugar beets, 1,395; barley, 1,025; wheat, 798; potatoes, 422; oats, 111.

Goods output at producer prices including changes in stock for 2003 was estimated at €4.7bn.; operating surplus (aggregate income) was €2.5bn. Direct income payments, financed or co-financed by the EU, amounted to €1.6bn. It is estimated that net subsidies (subsidies on products plus subsidies on production less taxes on products and taxes on production) represented 63% of aggregate income. Livestock: (2006) 6,916,000 cattle; 5,973,000 sheep; 1,643,000 pigs; (2005) 11,817,000 poultry.

### Forestry

Total forest area in 2005 was 669,000 ha. (9.7% of total land area). Timber production in 2007 was 2.71m. cu. metres.

### Fisheries

In 2004 approximately 14,800 people were engaged full- or part-time in the sea fishing industry; in 2004 the fishing fleet consisted of 1,425 vessels. The quantities and values of fish landed in 2004 were: wetfish, 256,170 tonnes, value €106.2m.; shellfish, 62,331 tonnes, value €80.1m. Total quantity (2004): 318,501 tonnes; total value, €186.4m. The main types of fish caught in 2004 were mackerel (63,000 tonnes), blue whiting (49,000 tonnes), horse mackerel (37,000 tonnes) and herring (29,000 tonnes). More than 98% of fish caught is from sea fishing.

### INDUSTRY

The leading companies by market capitalization in Ireland in March 2011 were: CRH plc, a building materials company (US\$16.3bn.); Ryanair Holdings (US\$7.1bn.); and Kerry Group, a chilled food manufacturer (US\$6.5bn.).

The census of industrial production for 2005 gives the following details of the values (in €1m.) of gross and net output for the principal manufacturing industries.

	Gross output	Net output
Mining and quarrying	1,436	742
Manufacture of food products, beverages and tobacco	18,226	10,187
Manufacture of wood and wood products	1,061	417
Manufacture of pulp, paper and paper products; publishing and printing	13,661	12,219
Manufacture of chemicals, chemical products and man-made fibres	28,943	23,914

	Gross output	Net output
Manufacture of rubber and plastic products	1,356	634
Manufacture of other non-metallic mineral products	2,027	1,004
Manufacture of basic metals and fabricated metal products	2,050	881
Manufacture of machinery and equipment n.e.c.	1,784	871
Manufacture of electrical and optical equipment	29,371	12,910
Manufacture of transport equipment	1,128	553
Manufacturing n.e.c.	2,573	665
Electricity, gas and water supply	5,425	2,873
Total (all industries)	109,576	68,160

In 2004 gross output was €103,751m. and net output €66,289m.

### Labour

The total labour force in 2008 was 2,239,600, of which 126,700 were out of work. The unemployment rate in 2008 was 6.0%, down from nearly 16% in 1993. However, in 2011 it was 14.4% as a consequence of the global economic crisis; it peaked at 14.6% in July and Aug. Of those at work in 2008, 1,246,400 were employed in the services sector, 492,000 in the industrial sector and 113,800 in the agricultural sector. Employment rose by approximately 40% between 1998 and 2008. In 2001 there were only 69,400 unemployed people, down from 226,000 in 1987, although this figure has risen steadily back up since then and in 2009 exceeded the 1987 total, with 264,600 unemployed. Ireland, along with the UK and Sweden, decided to open its labour market to nationals of the new EU member states in May 2004. Poles in particular went to Ireland following the EU expansion and by 2006 had become the second largest ethnic minority after the British; there were 63,276 Polish citizens in Ireland at the time of the 2006 census. On 1 Feb. 2011 the minimum hourly wage was lowered to €7.65 from €8.65. The normal retirement age is 65 years.

### INTERNATIONAL TRADE

#### Imports and Exports

Value of imports and exports of merchandise for calendar years (in €1m.):

	2004	2005	2006	2007	2008
Imports	51,105	57,465	60,857	63,486	57,585
Exports	84,410	86,732	86,772	89,226	86,394

The values of the chief imports and total exports are shown in the following table (in €1m.):

	Imports		Exports	
	2005	2006	2005	2006
Animal and vegetable oils and waxes	130	163	18	20
Beverages and tobacco	776	805	1,103	1,359
Chemicals	7,419	7,964	40,421	39,696
Live animals and food	3,681	4,086	6,380	7,034
Machinery and transport equipment	25,002	25,571	22,710	23,186
Manufactured articles	7,086	7,360	9,066	8,651
Manufactured goods	4,947	5,569	1,755	1,714
Mineral fuels and lubricants	4,020	4,719	616	562
Raw materials	935	1,069	1,077	1,493

Ireland is one of the most trade-dependent countries in the world. However, export levels have fallen slightly since the peak in 2002, when merchandise exports amounted to €93.7bn., generating a trade surplus of €38.0bn. In 2006 merchandise imports from other European Union countries accounted for 60.4% of total imports while merchandise exports to other EU countries accounted for 63.5% of total exports. Information technology has become increasingly important, and by 1999 Ireland had become the largest exporter of software products in the world.

Import and export totals for Ireland's top ten export markets in 2005 and 2006 (€1m.):

	Imports		Exports	
	2005	2006	2005	2006
Belgium	1,061	1,212	13,540	12,217
China	5,164	5,746	1,766	1,794
France	1,980	2,219	5,713	5,079
Germany	4,512	5,012	6,625	6,970
Italy	1,254	1,563	3,713	3,613
Japan	2,105	1,731	2,233	1,980
Netherlands	2,287	2,445	3,610	3,402
Spain	845	990	2,980	3,261
United Kingdom	18,271	19,425	15,352	15,566
United States of America	8,000	6,808	15,475	16,182

In 2008 exports accounted for 81% of GDP.

## COMMUNICATIONS

### Roads

At 31 Dec. 2003 there were 95,811 km of public roads, consisting of 2,746 km of National Primary Roads (including 176 km of motorway), 2,685 km of National Secondary Roads, 11,607 km of Regional Roads and 78,773 km of Local Roads.

Number of licensed motor vehicles at 31 Dec. 2007: private cars, 1,882,901; public-service vehicles, 35,105; goods vehicles, 345,874; agricultural and industrial vehicles, 80,239; motorcycles, 37,178; other vehicles, 60,267. In 2007 a total of 338 people were killed in road accidents.

### Rail

The total length of railway open for traffic in 2009 was 1,919 km (52 km electrified), all 1,600 mm gauge. A massive investment in public transport infrastructure is taking place in Ireland. The second National Development Plan running from Jan. 2007 to Dec. 2013 allows for €12.9bn. to be invested in public transport, particularly in the Greater Dublin area.

<i>Railway statistics for years ending 31 Dec.</i>	2005	2006
Passengers (journeys)	37,700,000	43,300,000
Receipts (€1)	181,860,000	227,696,000
Expenditure (€1)	446,785,000	439,113,000

A light railway system was launched in Dublin in 2004.

### Civil Aviation

Aer Lingus and Ryanair are the two major airlines operating in Ireland.

Aer Lingus was founded in 1936 as a State-owned enterprise. Its principal business is the provision of passenger and cargo services to the UK, Europe and the USA. It was privatized in 2006, with Ryanair now holding a 29.8% stake in the company and the government a 25.1% stake. Ryanair began operations in 1985 and now operates to a range of destinations in the UK and Europe. In 2005 Ryanair carried 33.4m. passengers (all on international flights); passenger-km totalled 31.2bn. The total number of passengers carried by Ryanair on international flights in 2005 was the second highest of any airline, behind Lufthansa. However, it has in the meantime overtaken Lufthansa to become the airline carrying the highest number of international passengers.

In addition to Aer Lingus and Ryanair, there are 16 other independent air transport operators. The main operators in this group are Aer Arann Express and Cityjet.

The principal airports (Dublin, Shannon and Cork) are operated by the Dublin Airport Authority plc. In 2006 Dublin handled 21.2m. passengers (an increase of 14.9% on 2005) and 150,000 tonnes of freight. Shannon handled 3.6m. passengers (increase of 10.2%) and 45,015 tonnes of freight. Cork was the third busiest, with 3.0m. passengers (increase of 10.3%) and 8,300 tonnes of freight.

There are six privately owned regional airports. The government part funds the scheduled services from Dublin to five of these airports and to the City of Derry airport in Northern Ireland to ensure efficient and speedy access to the more isolated regions of the state for both business and tourist travellers.

### Shipping

In Jan. 2009 there were 32 ships of 300 GT or over registered, totalling 122,000 GT. Total cargo traffic passing through the country's ports amounted to 41,880,000 tonnes in 2009 (down from 51,081,000 in 2008). Dublin handled 18.6m. tonnes of cargo in 2009 and Cork 8.0m. tonnes.

### Inland Waterways

The principal inland waterways open to navigation are the Shannon Navigation (270 km), which includes the Shannon-Erne Waterway (Ballinamore/Ballyconnell Canal), and the Grand Canal and Barrow Navigation (249 km). Merchandise traffic has now ceased and navigation is confined to pleasure craft operated either privately or commercially. The Royal Canal (146 km) from Dublin to Mullingar (53 km) was reopened for navigation in 1995.

### Telecommunications

The Minister for Communications, Energy and Natural Resources, a member of the government, has overall policy responsibility for the development of the sector. The core policy objective is to contribute to sustained macro-economic growth and competitiveness, and ensure that Ireland is best placed to avail of the emerging opportunities provided by the information and knowledge society.

The communications sector within the department is divided into five divisions: the business and technology division, the communications development and electronic commerce division, communications policy division, knowledge society division and postal division.

Ireland's telecommunications sector has been fully liberalized with effect from 1 Dec. 1998 when the last remaining elements of Telecom Éireann's (now called eircom) exclusive privilege were removed. All elements of the market are now open to competition from other licensed operators. The largest mobile telephone operators in terms of subscribers are Vodafone Ireland and O2 Ireland.

The Government has also sold the state's entire remaining stake of 50.1% in eircom by way of an initial public offering of shares in the company. The sale took place in July 1999.

### *eircom plc—Operational Information*

The dominant operator in the telecommunications sector is eircom plc (previously Telecom Éireann). Telecom Éireann was a statutory body set up under the Postal and Telecommunications Services Act, 1983. In 1996, 20% of the State's holding was sold to KPN/Telia, a Dutch-Swedish consortium, who had an option of a further 15%, which was taken up in July 1999. In 1998 the government concluded an Employee Share Ownership Scheme under which 14.9% of the company was to be made available to employees and also held an Initial Public Offer (IPO) of shares in the company in July 1999. In Oct. 1999 the newly-privatized Telecom Éireann became eircom plc.

The level of network digitalization is 100%. In 2008 there were 2,204,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 5,357,000 (1,207.4 per 1,000 persons). In 2008, 25m. text messages were sent every day. There were 2.48m. PCs in use in 2006. Ireland had 2.78m. internet users in 2008. The fixed broadband penetration rate stood at 21.1 subscribers per 100 inhabitants in Dec. 2010.

## SOCIAL INSTITUTIONS

### Justice

The Constitution provides that justice shall be administered in public in Courts established by law by Judges appointed by the President on the advice of the government. The jurisdiction

and organization of the Courts are dealt with in the Courts (Establishment and Constitution) Act, 1961, the Courts (Supplemental Provisions) Acts, 1961–91, and the Courts and Court Officers Acts, 1995–2002. These Courts consist of Courts of First Instance and a Court of Final Appeal, called the Supreme Court. The Courts of First Instance are the High Court with full original jurisdiction and the Circuit and the District Courts with local and limited jurisdictions. A judge may not be removed from office except for stated misbehaviour or incapacity and then only on resolutions passed by both Houses of the Oireachtas. Judges of the Supreme Court and High Court are appointed from among practising barristers or solicitors of not less than 12 years standing or by the elevation of an existing member of the judiciary. Judges of the Circuit Court are appointed from among practising barristers or solicitors of not less than ten years standing or a County Registrar who has practised as a barrister or solicitor for not less than ten years before being appointed to that post or by the elevation of a District Court Judge. Judges of the District Court are appointed from among practising barristers or solicitors of not less than ten years standing.

The Supreme Court, which consists of the Chief Justice (who is *ex officio* an additional judge of the High Court) and seven ordinary judges, may sit in two Divisions and has appellate jurisdiction from all decisions of the High Court. The President may, after consultation with the Council of State, refer a Bill, which has been passed by both Houses of the Oireachtas (other than a money bill and certain other bills), to the Supreme Court for a decision on the question as to whether such Bill or any provision thereof is repugnant to the Constitution.

The High Court, which consists of a President (who is *ex officio* an additional Judge of the Supreme Court) and 31 ordinary judges (or 32 when a High Court Judge is appointed as a Commissioner of the Law Reform Commission, as is currently the case), has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise concerning the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The High Court on Circuit acts as an appeal court from the Circuit Court.

The Court of Criminal Appeal consists of the Chief Justice or an ordinary Judge of the Supreme Court, together with either two ordinary judges of the High Court or the President and one ordinary judge of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave to appeal. The decision of the Court of Criminal Appeal is final, unless that court, the Attorney-General or the Director of Public Prosecutions certifies that the decision involves a point of law of exceptional public importance, in which case an appeal is taken to the Supreme Court.

The Offences against the State Act, 1939 provides in Part V for the establishment of Special Criminal Courts. A Special Criminal Court sits without a jury. The rules of evidence that apply in proceedings before a Special Criminal Court are the same as those applicable in trials in the Central Criminal Court. A Special Criminal Court is authorized by the 1939 Act to make rules governing its own practice and procedure. An appeal against conviction or sentence by a Special Criminal Court may be taken to the Court of Criminal Appeal. On 30 May 1972 Orders were made establishing a Special Criminal Court and declaring that offences of a particular class or kind (as set out) were to be scheduled offences for the purposes of Part V of the Act, the effect of which was to give the Special Criminal Court jurisdiction to try persons charged with those offences.

The High Court exercising criminal jurisdiction is known as the Central Criminal Court. It consists of a judge or judges of the High Court, nominated by the President of the High Court. The

Court tries criminal cases which are outside the jurisdiction of the Circuit Court.

The Circuit Court consists of a President (who is *ex officio* an additional judge of the High Court) and 33 ordinary judges. The country is divided into eight circuits. The jurisdiction of the court in civil proceedings is subject to a financial ceiling, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters it has jurisdiction in all cases except murder, treason, piracy, rape, serious and aggravated sexual assault and allied offences. The Circuit Court acts as an appeal court from the District Court. The Circuit Court also has jurisdiction in the Family Law area such as divorce.

The District Court, which consists of a President and 54 ordinary judges, has summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the Court has jurisdiction in contract and tort (except slander, libel, seduction, slander of title and false imprisonment) where the claim does not exceed €6,348.69; in proceedings founded on hire-purchase and credit-sale agreements, the jurisdiction is also €6,348.69. The District Court also has jurisdiction in Family Law matters such as maintenance, custody, access and the issuing of barring orders. The District Court also has jurisdiction in a large number of licensing (intoxicating liquor) matters.

All criminal cases, except those of a minor nature, and those tried in the Special Criminal Court, are tried by a judge and a jury of 12. Generally, a verdict need not be unanimous in a case where there are not fewer than 11 jurors if ten of them agree on the verdict.

The Courts Service Act, 1998, provided for the transfer of responsibility for the day to day management of the Courts from the Minister for Justice, Equality and Law Reform to a new body known as the Courts Service. The Board of the Courts Service consists of 17 members including members of the judiciary, the legal profession, staff and trade union representatives, a representative of court users, a person with commercial/financial experience and a Chief Executive Officer. The Courts Service was formally established on 9 Nov. 1999. While the Minister retains political responsibility to the Oireachtas, the courts are now administered independently by the Board and CEO.

In 2009 the police force, the Garda Síochána, had a total staff of 14,547. There were 284,485 crimes recorded in 2009, of which 87 homicide offences. The National Juvenile Office received 23,952 referrals relating to 18,519 individual children during 2009. The population in penal institutions in Oct. 2007 was 3,325 (76 per 100,000 of national population).

### Education

Education is compulsory from six to 16 years of age. In 2005 public expenditure on education came to 4.8% of GDP and 13.9% of total government spending. The adult literacy rate is at least 99%.

**Elementary.** Elementary education is free and was given in about 3,303 national schools (including 128 special schools) in 2008–09. The total number of pupils on rolls in 2008–09 was 498,914, including pupils in special schools and classes; the number of teachers of all classes was about 31,349 in 2008–09, including remedial teachers and teachers of special classes. The total expenditure for first level education during the financial year ended 31 Dec. 2009 was €3,133m. The total salaries for teachers for 2009, including superannuation etc., was €2,520m.

**Special.** Special provision is made for children with disabilities in special schools which are recognized on the same basis as primary schools, in special classes attached to ordinary schools and in certain voluntary centres where educational services appropriate to the needs of the children are provided. Integration of children with disabilities in ordinary schools and classes is encouraged wherever possible, if necessary with special additional support.

There are also part-time teaching facilities in hospitals, child guidance clinics, rehabilitation workshops, special 'Saturday-morning' centres and home teaching schemes. Special schools (2008–09) numbered 128 with approximately 6,653 pupils. There were also some 9,668 pupils enrolled in about 1,131 special classes within ordinary schools. There is a National Education Officer for travelling children.

**Secondary.** Voluntary secondary schools are under private ownership and are conducted in most cases by religious orders. These schools receive grants from the State and are open to inspection by the Department of Education. The number of recognized secondary schools during the school year 2008–09 was 388, and the number of pupils in attendance was 184,329. There were 13,448 teachers in 2007–08.

**Vocational Education Committee** schools provide courses of general and technical education. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of vocational schools during the school year 2008–09 was 253, the number of full-time students in attendance was 103,732 and the number of teachers (2007–08) 8,106. These schools are controlled by the local Vocational Education Committees; they are financed mainly by State grants and also by contributions from local rating authorities and Vocational Education Committee receipts. These schools also provide adult education facilities for their own areas.

**Comprehensive and Community Schools.** Comprehensive schools which are financed by the State combine academic and technical subjects in one broad curriculum so that pupils may be offered educational options suited to their needs, abilities and interests. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of comprehensive and community schools during the school year 2008–09 was 91 and the number of students in attendance was 53,251. These schools also provide adult education facilities for their own areas and make facilities available to voluntary organizations and to the adult community generally.

The total current expenditure from public funds for second level and further education for 2003 was €2,304.8m.

**Third-Level Education.** The third-level education system funded by the State comprises the university sector, the technological sector and colleges of education—these are autonomous and self-governing. In addition there are a number of independent private colleges offering third-level qualifications.

Ireland has a binary system of higher education, designed to ensure maximum flexibility and responsiveness to the needs of students and to the wide variety of social and economic requirements. However, within each sector, a diversity of institutions offer differing types and levels of programmes. The Universities are essentially concerned with undergraduate and postgraduate programmes, together with basic and applied research. The main work of the Institutes of Technology is in undergraduate programmes, with a smaller number of postgraduate programmes and a growing involvement in research. Numbers in third-level education have expanded dramatically since the mid-1960s, from 21,000 full-time students in 1965 to 148,197 in 2008–09.

The total current expenditure from public funds on third-level education during the financial year ended 31 Dec. 2009 was €1.8bn.

There are seven universities in the Republic of Ireland. These are: NUI, Galway; NUI, Maynooth; University College Cork; University College Dublin; Trinity College, Dublin; University of Limerick; and Dublin City University. Four of the universities (NUI Galway, NUI Maynooth, UCC and UCD) are constituent universities of the National University of Ireland. The National University of Ireland also has a number of recognized colleges, including the Royal College of Surgeons in Ireland, National

College of Art and Design and Shannon College of Hotel Management.

The Irish higher education university system offers degree programmes—at bachelor, masters and doctorate level—in the humanities, social sciences, scientific, technological and social sciences, and in the medical area. Typically teaching at undergraduate level is by way of a programme of lectures supplemented by tutorials and, where appropriate, practical demonstration and laboratory work. Master's degrees are usually taken by course work, research work or some combination of both. Doctoral degrees are awarded on the basis of research. Institutions award their own degrees using external examiners to ensure consistency of standards. The institutions also have continuing and some distance education programmes and also engage in research work.

There are 14 Institutes of Technology. They are Dublin Institute of Technology, Athlone IT, IT Blanchardstown, Cork IT, IT Carlow, Dundalk IT, Dun Laoghaire Institute of Art, Design and Technology, Letterkenny IT, Galway-Mayo IT, Limerick IT, IT Sligo, IT Tallaght, IT Tralee and Waterford IT.

HETAC (the Higher Education and Training Awards Council) was established on 11 June 2001, under the Qualifications (Education and Training) Act 1999. It is the successor to the National Council for Educational Awards (NCEA) and is the qualifications awarding body for third-level education and training institutions outside the university sector. The Qualifications (Education and Training) Act 1999 extended autonomy to allow Institutes of Technology to apply to HETAC for delegation of authority to make their own awards. Delegation of authority also allows institutes to validate their own programmes subject to the policies and criteria determined by HETAC and within the parameters of the National Framework of Qualifications.

Initial teacher education is provided by the Colleges of Education (primary teacher education) and the Universities (post-primary teacher education).

## Health

Health boards are responsible for administering health services in Ireland. There are currently ten health boards established: three area health boards located in the eastern region under the guidance of the Eastern Regional Health Authority (ERHA) and seven regional health boards covering the rest of the country. Each health board is responsible for the provision of health and social services in its area. The boards provide many of the services directly and they arrange for the provision of other services by health professionals, private health service providers, voluntary hospitals and voluntary/community organizations.

A health service reform programme is currently being implemented which will result in the most significant structural changes in the Irish health services in recent decades. The existing health boards will be replaced by a single Health Service Executive (HSE) with four regional administrative areas. A Health Information and Quality Authority (HIQA) will also be established.

Everybody ordinarily resident in Ireland has either full or limited eligibility for the public health services.

A person who satisfies the criteria of a means test receives a medical card, which confers Category 1 or full eligibility on them and their dependants. This entitles the holder to the full range of public health and hospital services, free of charge, i.e. family doctor, drugs and medicines, hospital and specialist services as well as dental, aural and optical services. Maternity care and infant welfare services are also provided.

The remainder of the population has Category 2 or limited eligibility. Category 2 patients receive public consultant and public hospital services subject to certain charges. Persons in Category 2 are liable for a hospital in-patient charge of €75 per night up to a maximum of €750 in any 12 consecutive months. Persons in Category 2 are liable for a charge of €100 if they attend the

Accident and Emergency Department of a hospital or receive outpatient services without a letter from a General Practitioner.

*The Long Term Illness Scheme* entitles persons to free drugs and medicines, which are prescribed in respect of 15 specific illnesses. The needs of individuals with significant or ongoing medical expenses are met by a range of other schemes, which provide assistance towards the cost of prescribed drugs and medicines. The *Drug Payment Scheme* was introduced on 1 July 1999 and replaced the Drug Cost Subsidisation Scheme (DCSS) and the Drug Refund Scheme (DRS). Under this scheme no individual or family will have to pay more than €132 in any calendar month for approved prescribed drugs, medicines and appliances for use by the person or his/her family in that month.

*Services for People with Disabilities:* The Department of Health and Children provides, through the health boards and the Eastern Regional Health Authority, a wide range of services for people with disabilities. These include day care, home support (including personal assistance services), therapy services, training, employment, sheltered work and residential respite care. The following allowances and grants for eligible people with disabilities come under the aegis of the Department of Health and Children and are administered by the health boards and the Eastern Regional Health Authority:

*Disability Allowance*—payable to persons who have an injury, disease, illness or disability that substantially restricts their capacity to work. The full rate of €188.00 per week has, since Jan. 2007, also been made available to long-term residents in institutions.

*Blind Welfare Allowance*—provides supplementary financial support to unemployed blind persons who are not maintained in an institution and who are in receipt of a Department of Social, Community and Family Affairs payment, such as Disability Allowance, Blind Pension or Old Age Pension.

*Rehabilitative Training Bonus*—payable to persons who are attending approved rehabilitative training programmes. The payment of €31.80 replaced the Disabled Persons Rehabilitation Allowance (DPRA) from 1 Aug. 2001.

*Domiciliary Care Allowance (DCA)*—provides home care for severely disabled or mentally handicapped children up to the age of 16. The maximum rate of DCA in Jan. 2012 was €309.50 per month.

*Mobility Allowance*—provides assistance to severely disabled persons who are unable to walk or use public transport in order to finance the occasional use of taxis. At May 2011 the monthly higher rate, payable only to those who do not benefit from the 'Disabled Drivers and Disabled Passengers Scheme', was €208.50. The lower rate was €104.25.

*Motorized Transport Grant*—provides financial assistance to disabled persons who require a car to obtain or retain employment or who have transport needs because they live in very isolated areas. The maximum grant in Jan. 2012 was €5,020.50.

*Respite Care Grant (RCG)*—an annual payment of €1,700 (per person cared for) to help carers obtain respite care.

*Health Contributions*—A health contribution of 2% of income is payable by those with Category 2 eligibility. Employers meet the levy in respect of those employees who have a medical card.

In 2003 there were 59 publicly funded acute hospitals in operation with an 85% occupancy rate. The average number of inpatient beds available for use over the year was 12,300. There were 96,499 whole-time equivalent numbers employed in health board/regional authority and voluntary/joint board hospitals and homes for the mentally handicapped at 31 Dec. 2003. Of these 6,792 were medical/dental staff, 12,690 were health and social care professionals and 33,766 were nursing staff. In 2008 Ireland spent 8.7% of its GDP on health.

## Welfare

The Department of Social Protection is responsible for the day-to-day administration and delivery of social welfare schemes and services through a network of local, regional and decentralized offices. The Department's local delivery of services is structured on a regional basis. There are a total of seven regions, with offices in Waterford, Cork, Galway, Longford, Sligo and two in the Dublin area.

There are, in addition, three statutory agencies under the aegis of the Department:

—*the Pensions Board*, which has the function of promoting the security of occupational pensions, their development and the general issue of pensions coverage.

—*the Citizens Information Board*, which has the function of ensuring that all citizens have easy access to the highest quality of information, advice and advocacy on social services.

—*Office of the Pensions Ombudsman*, which investigates and decides complaints and disputes involving occupational pension schemes and Personal Retirement Savings Accounts (PRSAs). The Ombudsman is independent of the Minister and the Department in the performance of his functions.

A programme of significant reform has taken place in the Department including developments such as: the transfer of the General Register Office to the Department of Social Protection in Jan. 2008; the transfer of the Community Welfare Service from the Health Service Executive to the Department in Oct. 2011; and the integration of FÁS Employment and Community Employment Services into the operations of the Department of Social Protection in Jan. 2012.

The following schemes and services have also transferred to the Department of Social Protection: the Rural Social Scheme; the Community Services Programme; Domiciliary Care Allowance; and the Redundancy and Insolvency Scheme.

In 2010 social welfare expenditure accounted for 13.5% of GDP.

**Social Welfare Schemes.** The social welfare supports can be divided into three categories:

—*Social Insurance (Contributory)* payments made on the basis of a Pay Related Social Insurance (PRSI) record. Such payments are funded by employers, employees and the self-employed. Any deficit in the fund is met by Exchequer subvention.

—*Social Assistance (Non Contributory)* payments made on the basis of satisfying a means test. These payments are financed entirely by the Exchequer.

—*Universal payments* such as Child Benefit or Free Travel, which do not depend on PRSI or a means test.

**State Pension (Contributory).** The State Pension (Contributory) is available to those aged 66 who have social insurance coverage beginning before 56 years of age.

People who reached pension age before 6 April 2002 must have 156 qualifying paid contributions (a total of three years although they do not have to be consecutive). This means that to be eligible people must have actually paid full-rate contributions.

People who reached pension age on or after 6 April 2002 but before 6 April 2012 need to have 260 paid contributions (effectively five years contributions although they need not be consecutive). However, anyone who paid voluntary contributions on or before 6 April 1997 only needs to have 156 paid contributions providing they have a yearly average of at least 20 contributions.

People who reach pension age on or after 6 April 2012 will need to have 520 paid contributions (ten years paid contributions). In this case, not more than 260 of the 520 contributions may be voluntary contributions. However, anyone who paid voluntary contributions on or before 6 April 1997 and has a yearly average of ten contributions may also meet the requirements. They will need to have a total of 520 contributions, but only 156 need to be compulsory paid contributions.

There is also a means-tested non-contributory pension available to citizens aged 66 or older with limited means.

The Social Welfare and Pensions Act 2011 made a number of changes to the qualifying age for state pensions. The qualifying age will rise to 66 in 2014, 67 in 2021 and 68 in 2028. For recipients born on or after 1 Jan. 1948 the minimum qualifying state pension age will be 66; for recipients born on or after 1 Jan. 1955 the minimum qualifying state pension age will be 67; for recipients born on or after 1 Jan. 1961 the minimum qualifying state pension age will be 68.

The *Social Welfare Appeals Office* (SWAO) is an independent office responsible for determining appeals against decisions on social welfare entitlements.

## RELIGION

According to the census of population taken in 2006 the principal religious professions were as follows:

	Leinster	Munster	Connacht	Ulster (part of)	Total
Roman Catholics	1,949,269	1,047,502	453,086	231,589	3,681,446
Church of Ireland (including Protestants)	73,312	28,788	11,200	12,285	125,585
Other Christian religion n.e.c.	19,117	6,320	2,600	1,169	29,206
Presbyterians	10,310	2,704	1,401	9,131	23,546
Muslims (Islamic)	22,176	6,423	3,109	831	32,539
Methodists	7,008	3,069	1,128	955	12,160
Orthodox	15,208	3,612	1,415	563	20,798
Other stated religions	37,557	13,078	5,080	2,213	57,928
Not stated or no religion	161,166	61,844	25,102	8,528	256,640

Seán Brady (b. 1939) is the Roman Catholic Cardinal of Armagh and Primate of All Ireland. In Feb. 2012 there were two cardinals.

In May 1990 the General Synod of the Church of Ireland voted to ordain women.

## CULTURE

### World Heritage Sites

There are two UNESCO sites in Ireland: Archaeological Ensemble of the Bend of the Boyne (inscribed in 1993), the three principal sites of the Brúna Bóinne Complex, a major centre of prehistoric megalithic art; Skellig Michael (1996), a monastic complex on a craggy island from the 7th century.

### Press

In 2008 there were 11 dailies and nine paid-for Sunday newspapers (all in English) with a combined circulation of 2,129,000. In 2008 a record 1,902 book titles were published in Ireland (1,807 in 2007).

### Tourism

Total number of overseas tourists in 2008 was 7,839,000 (a 2.2% fall from 2007). In 2008 earnings from all visits to Ireland, including cross-border visits, amounted to €4,781m. 49% of visits in 2008 were from Great Britain. Irish residents made 7,877,000 visits abroad in 2008 (a 2.1% increase on 2007).

### Festivals

Ireland's national holiday, St Patrick's Day (17 March), is celebrated annually. Among the most popular festivals are

Clonmel Junction arts festival (July), Galway Arts Festival (July), Ballyshannon Folk and Traditional Festival in Co. Donegal (July–Aug.), Fleadh Cheoil na hEireann (national festival of music) in Co. Cavan (Aug.), Dublin Theatre Festival and Dublin Fringe Festival (Sept.–Oct.), Wexford Opera Festival (Oct.) and Cork Jazz Festival (Oct.).

## DIPLOMATIC REPRESENTATIVES

Of Ireland in the United Kingdom (17 Grosvenor Pl., London, SW1X 7HR)

*Ambassador:* Bobby McDonagh.

Of the United Kingdom in Ireland (29 Merrion Rd, Ballsbridge, Dublin 4)

*Ambassador:* Julian King, CMG.

Of Ireland in the USA (2234 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Michael Collins.

Of the USA in Ireland (42 Elgin Rd, Ballsbridge, Dublin 4)

*Ambassador:* Daniel M. Rooney.

Of Ireland to the United Nations

*Ambassador:* Anne Anderson.

Of Ireland to the European Union

*Permanent Representative:* Rory Montgomery.

## KEY HISTORICAL EVENTS

A settled agricultural community by 6000 BC, the oasis of Jericho is possibly the world's oldest continuously inhabited settlement. Canaan—probably derived from 'Land of Purple', from the purple sea snail dye—described the Eastern Mediterranean coast and hinterland from the 3rd millennium BC. As part of the Fertile Crescent, it became an important caravan route between Egypt and Mesopotamia. 'Canaanite' has come to be associated with the Semitic group of languages and peoples of the pre-Classical Levant.

In the reign of Pharaoh Pepi I (c. 2313–2279 BC), Canaan was invaded five times by Egyptian forces. Egyptian authority collapsed in the 17th century, marking the end of the Middle Kingdom. Egyptian control was re-established with the

reunification of Egypt in the 16th century. Thutmose III (1479–1425 BC), campaigning against the Mitanni Kingdom in Syria, defeated a Canaanite coalition at the Battle of Megiddo, subjugating Canaan and deporting thousands to Egypt. Egyptian power was challenged by the Hittites of Anatolia until Ramesses II concluded a peace treaty (the first recorded in the world) with the Hittite King Hattusilis III in 1258 BC, setting the border in northern Canaan.

The Israelite (or Hebrew) group occupied the hills of southern Canaan by the late 13th century. Around 1200 BC the Eastern Mediterranean littoral was attacked by the 'Sea Peoples' (probably including the Philistines), who destroyed coastal cities and settled on the coastal plain. The Israelite kingdom was formed from tribes supposedly returned from captivity in Egypt. In the late 11th century, Saul became king but it was his successor, David, who greatly expanded the Israelite state over most of southern Canaan. With Hittite and Egyptian power at low ebb, David conquered the trans-Jordanian states of Ammon, Edom and Moab, subjected Aram (lower Syria) to vassalage and made Jerusalem his capital. After the reign of Solomon (mid-10th century), who built the Temple of Jerusalem, the kingdom split into two: Judah in the south and the more populous Israel, centred on Samaria, in the north.

Having refused to pay tribute, Israel was conquered by Assyria's Sargon II in 722 BC and many of its people were deported; subsequent inhabitants of the Assyrian province of 'Samerina' became known as Samaritans, a mixed race of Israelites and immigrants from Mesopotamia and Persia. Sargon also besieged Jerusalem but was distracted by a Babylonian uprising. The resurgent Babylonians conquered Judah in 586 BC, having destroyed Philistia in 605 to clear access to Egypt. Nebuchadnezzar II had taken Jerusalem the previous year, deporting much of the Judean (Jewish) nobility to Babylon. Having conquered Babylon in 539 BC, Cyrus II of Persia allowed the return of the Jews to Jerusalem, as Persian vassals, and the rebuilding of the Temple. Persia's defeat by Alexander the Great of Macedon brought the region, by then known as Palestine (derived from Philistia), under Hellenistic control. The Hellenistic period saw an influx of Arab groups, including the Nabataeans, who replaced the Edomites south of the Dead Sea.

## Roman Rule

A revolt against the religious intolerance of the Seleucid King Antiochus IV began in 167 BC, led by Judas Maccabaeus, who established the Hasmonean Dynasty in Judaea. Relations with the Samaritans, who also followed the Torah (the first five books of the Hebrew bible), deteriorated when the Hasmonean King John Hyrcanus destroyed the Samaritan Temple at Mount Gerizim in 128 BC. The entire region was conquered for Rome by Pompey in 67 BC; Judaea, including Samaria, was administered as a client kingdom. After the Parthian invasion of Judaea in 40 BC, an Idumaean, Herod, was installed by Rome as king of Judaea. On Herod's death in 4 BC, the kingdom was split amongst three of his sons, who ruled as tetrarchs. Herod's grandson, Herod Agrippa, was granted a reunited Judaea by Emperor Claudius in AD 41, as a reward for supporting Claudius' claim to the imperial throne. However, Herod Agrippa was assassinated in AD 44 and Judaea placed under a Roman procurator. Jewish resentment against loss of autonomy grew until the Great Jewish Revolt (AD 66–73), which was brutally suppressed. Jerusalem was destroyed and hundreds of thousands were massacred or sold into slavery. Jewish rebellions across the East in 115 (the Kitos War) were quickly suppressed. Emperor Hadrian's attempts to enforce cultural uniformity across the Empire included rebuilding

Jerusalem as Aelia Capitolina and forbidding Jewish custom. Simon Bar Kokhba, supported by the Sanhedrin (Jewish sages), led a major revolt in AD 132 and established a Jewish government in Jerusalem. However, Roman armies prevailed in 135, with the death of around half a million Jews. Hadrian reacted to the rebellion by suppressing Judaism, banning Jews from Aelia Capitolina, deporting large numbers as slaves and renaming the province Syria Palaestina; the province was split in three around 390.

### Christianity

Under the Christian Byzantine Empire, Palestine became a centre of Christianity (Jerusalem was recognized as a patriarchate in 451), bringing pilgrims and prosperity. It also received lavish imperial patronage, such as Constantine's Church of the Holy Sepulchre (c. 326). The Samaritans made a bid for independence in 529 but were crushed by Justinian I and the Ghassanid Arabs. Persecuted by Christians, Jews and later by Muslims, Samaritan numbers dwindled over the following centuries. Byzantine administration of Palestine ended temporarily during the Persian occupation of 614–28; Jerusalem was sacked, its churches burned and the city turned over to the Jews. A spectacular campaign in 628, led by Emperor Heraclius, forced the Persians to cede Palestine and Syria. However, Byzantine rule ended permanently after the Arabs conquered the region; Jerusalem was taken in 638.

The Arabs retained the existing system of administration in the provinces of Jund Filastine (the south) and Jund Urdunn (the north). Taxes and restrictions on religious practice and office-holding imposed on non-Muslims caused large-scale conversions. The Umayyad caliphs moved the capital to Damascus and built the Dome of the Rock on the site of the Jewish Temple in Jerusalem in the 690s. The Christian and Jewish communities of Palestine were partly administered by their own religious leaders. Under the Umayyads' successors, the Abbasids, the capital moved to Baghdad in 762, drawing Asian trade away from Palestine. Fragmentation of the Caliphate in the 9th century saw Egyptian independence under the Tulunids, who seized Palestine and Syria in 878. Although Palestine was retaken in 906 for the Caliphate, in 935 it again fell to Egypt, this time under the Ikshidid Dynasty and, in 970, to its successors, the Fatimids.

### Crusades

1070 saw the arrival of the Seljuk Turks, who rapidly overran the Byzantine East. Seljuk restrictions on Christian pilgrimage led to the European Crusader invasions of Palestine and Syria in the 12th century. Having been wrested from the Seljuks by the Fatimids in 1098, Jerusalem was taken the following year by a Crusader army, which massacred the population. Baldwin, count of Edessa, became king of Jerusalem in 1100. Responding to Crusader threats to Mecca (Makkah), Saladin (Salah ad-Din), the Kurdish sultan of Egypt, recaptured Jerusalem in 1187, bringing Palestine under the Ayyubid Dynasty. A treaty in 1192 with Richard I of England allowed Christian pilgrimage to Jerusalem and secured the rump Crusader states along the coast. A treaty of 1229 gave much of Palestine (the Kingdom of Jerusalem) to the Holy Roman Emperor, Frederick II, though Jerusalem was destroyed by Central Asian Khwarezmians in 1244, on behalf of the Ayyubids. The fall of Acre (Akko) to the Mamluks, rulers of Egypt, in 1291 ended Crusader rule in the Holy Land.

Under Mamluk suzerainty, Palestine was administered by Muslim emirates. Economic decline was exacerbated by the arrival of the Black Death in 1351. Although the Mamluk sultanate successfully held off Mongol invasions, Palestine fell to the Ottomans in 1516, bringing it (as part of the Damascus-Syria province) and most of the Islamic world under the rule of Turkish Istanbul. Suleyman the Magnificent rebuilt Jerusalem's walls in 1537.

### Zionism

Palestine was briefly invaded in 1799 by Napoleon Bonaparte of France, who had occupied Egypt. Muhammad Ali, the renegade Ottoman viceroy of Egypt, invaded Palestine and Syria in 1831, defeating the Ottoman army. However, British intervention at Beirut, on behalf of the sultan, forced the viceroy's withdrawal to Egypt. Jews from central and eastern Europe arrived in Palestine from the 1880s as part of a nascent Zionist movement. In 1897 the first Zionist Congress met in Basle, Switzerland. Attempts were made in vain to gain the approval of Sultan Abdul Hamid II for Jewish settlement. However, by 1914, about 85,000 Jews were living in Palestine, many on agricultural collectives (*kibbutz*), in part funded by Western Europe's Jewry. Tel Aviv (originally called Ahuzat Bayit 'homestead') was founded by Jews in 1909 as a dormitory settlement for workers in Jaffa.

Britain, France and Russia declared war on the Ottoman Empire in Nov. 1914, in retaliation for its co-operation with Germany. Having repelled Ottoman attacks on the Suez Canal, British forces invaded Ottoman Palestine, seizing Rafah in Jan. 1917. Two abortive attacks on Gaza were followed by British-led success at Beersheba in Oct. 1917, leading to the fall of Gaza in Nov. and Jerusalem in Dec. The British won a major victory at Megiddo in Sept. 1918, effectively ending Ottoman rule in Palestine. The British were granted Palestine and Transjordan as mandates under the League of Nations, established in 1919 at the Versailles Peace Conference.

Britain supported a 'national home' for the Jews in Palestine, as laid out in the Balfour Declaration of 1917. Jewish immigration, though limited by the British authorities, increased in the 1920s. Land ownership disputes aggravated Jewish-Arab relations, leading to paramilitary communal attacks. While Transjordan was granted independence in 1928, proposals for an Arab-Jewish partition in Palestine were rejected. In 1936 an Arab strike degenerated into insurrection—the 'Great Uprising' or 'Great Revolt'—under the leadership of Amin al-Husayni, the Grand Mufti of Jerusalem. The revolt was suppressed by the British by 1939, aided informally by the Jewish paramilitary *Haganah*. Al-Husayni fled to Germany, where he declared *jihad* on the Allies during the Second World War. The Italian air force bombed Haifa and Tel Aviv in 1940. Some Jewish groups, such as the Lehi, fought the British during the war on account of the British ban on Jewish immigration to Palestine.

### Arab Israeli Wars

In 1947 the United Nations intervened, recommending partition of Palestine and an international administration for Jerusalem. The plan was accepted by the Jewish Agency (not representative of all Jewish groups) but rejected by the Palestinian Arab leadership; inter-communal war followed. On 14 May 1948 the British Government terminated its mandate and the Jewish leaders proclaimed the State of Israel. No independent Arab state was established in Palestine. Instead the neighbouring Arab states invaded Israel on 15 May 1948. The Jewish state defended itself successfully, and the ceasefire in Jan. 1949 left Israel with one-third more land than had been originally assigned by the UN.

In 1956 Israel was subject to international criticism for its involvement in the Suez Crisis. When Egypt nationalized the Suez Canal, France and the UK resorted to military action. Under the premiership of David Ben-Gurion, Israel joined forces with the European powers and agreed to lead an initial attack on the Egyptian-controlled Gaza Strip and the Sinai Peninsula. The plan was that the UK and France would offer to intervene in the conflict and reoccupy the areas. Nasser's expected refusal of the offer would be the pretext for an invasion that would reclaim the Canal. The Israeli incursions began in late Oct. 1956 but amid widespread international condemnation, most damagingly from the USA, the three nations were forced into a humiliating withdrawal by Dec. Nasser promoted the affair as a victory for pan-Arabism.

In 1967, following some years of uneasy peace, local clashes on the Israeli–Syrian border were followed by Egyptian mass concentration of forces on the borders of Israel. Israel struck out at Egypt on land and in the air on 5–9 June 1967. Jordan joined in the conflict which spread to the Syrian borders. By 11 June the Israelis had occupied the Gaza Strip and the Sinai peninsula as far as the Suez Canal in Egypt, West Jordan as far as the Jordan valley and the heights east of the Sea of Galilee, including the Syrian city of Quneitra, which was destroyed during the conflict.

A further war broke out on 6 Oct. 1973 when Egyptian and Syrian offensives were launched. Following UN Security Council resolutions a ceasefire came into force on 24 Oct. In Sept. 1978 Egypt and Israel agreed on frameworks for peace in the Middle East. A treaty was signed in Washington on 26 March 1979 whereby Israel withdrew from the Sinai Desert in two phases; part was achieved on 26 Jan. 1980 and the final withdrawal by 26 April 1982.

In June 1982 Israeli forces invaded the Lebanon. On 16 Feb. 1985 the Israeli forces started a withdrawal, leaving behind an Israeli trained and equipped Christian Lebanese force to act as a buffer against Muslim Shia or Palestinian guerrilla attacks.

#### Peace Process

In 1993, following declarations by Prime Minister Yitzhak Rabin recognizing the Palestine Liberation Organization (PLO) as representative of the Palestinian people, and by Yasser Arafat, leader of the PLO, renouncing terrorism and recognizing the State of Israel, an agreement was signed in Washington providing for limited Palestinian self-rule in the Gaza Strip and Jericho. The treaty marked the end of six years of violent opposition to the Israeli occupation in what is known as the first *intifada*, during which over 2,000 Palestinians and 150 Israelis were killed. Negotiations on the permanent status of the West Bank and Gaza began in 1996. On 4 Nov. 1995 Yitzhak Rabin was assassinated by a Jewish religious extremist. In the subsequent election, a right-wing coalition led by Binyamin Netanyahu took office. Peace talks with the Palestinians then stalled. In Oct. 1998 Israel accepted partial withdrawal from the West Bank on condition that the Palestinians cracked down on terrorism. The following month, 2% of the West Bank was handed over to Palestinian control. Further moves were put on hold after the collapse of the Netanyahu coalition and the announcement of early elections.

In Sept. 1999 Ehud Barak provided the first evidence that the Middle East peace process was back on track by releasing nearly 200 Palestinian prisoners and by handing over 430 sq. km of land on the West Bank. In May 2000 Israel completed its withdrawal from south Lebanon, 22 years after the first invasion. By Oct. 2000 violence had broken out again between Israelis and Palestinians, fuelled by the conflict over control of Jerusalem, with terrorist acts a daily occurrence, leading to heavy casualties on both sides. This second *intifada* ended in 2005. With peace talks stalled once again, Barak called for a nationwide vote of confidence by putting himself up for re-election as prime minister. Defeated by the right-wing Ariel Sharon in Feb. 2001, he retired from politics. As violence escalated, in Dec. 2001 Israel ended all contact with Yasser Arafat, besieging his compound at Ramallah and putting him under virtual house arrest. Israeli incursions into Palestinian-controlled areas of the West Bank and the Gaza Strip, and suicide attacks by Palestinians, continued unabated in early 2002 with heavy loss of life. In June 2002 Israel began constructing a barrier to cut off the West Bank, with the aim of shielding the country from suicide bombers. Arafat died on 11 Nov. 2004 and was succeeded by Mahmoud Abbas in Jan. 2005. In Feb. 2005 Israeli prime minister Ariel Sharon and Mahmoud Abbas agreed to a 'cessation of hostilities' between the two peoples, a move which encouraged hopes of a resumption of the peace process. In Aug. 2005 Israeli troops and police evicted the 8,500 Jewish settlers from the Gaza Strip in accordance with an agreement between Israel and the Palestinians. This was the

first time Israel had withdrawn from Palestinian land captured in the 1967 war.

In July 2006, after Hizbollah forces in Lebanon had captured two Israeli soldiers, Israel launched a large-scale military campaign against Lebanon with a series of bombing raids, destroying large parts of the civilian infrastructure.

In Dec. 2008 Israel began a military assault on Gaza aimed at destroying Hamas strongholds responsible for rocket and mortar attacks on Israeli targets. Three weeks of air and ground operations resulted in many Palestinian civilian deaths and the destruction of much of Gaza's civilian infrastructure. Israel's action was widely criticized, particularly after the bombardment of the UN's relief and works headquarters. The UN Security Council called for an immediate ceasefire, with all members voting in favour of the motion bar the USA.

#### TERRITORY AND POPULATION

The area of Israel, including the Golan Heights (1,154 sq. km) and East Jerusalem, is 22,072 sq. km (8,522 sq. miles), of which 21,643 sq. km (8,357 sq. miles) are land. The population in 2009 was 7.55m. (5.70m. Jews, 1.54m. Arabs and 0.31m. others), including East Jerusalem, the Golan Heights and Israeli settlers in the West Bank. Population density, 349 per sq. km.

The UN gives a projected population for 2015 of 8.06m.

In 2005, 91.6% of the population lived in urban areas.

Population by place of origin as of 2005: former USSR, 938,000; Morocco, 156,500; Romania, 108,700; North America and Oceania, 80,000; Ethiopia, 71,100; Iraq, 69,100; Poland, 62,500; Iran, 49,100.

The Jewish Agency, which, in accordance with Article IV of the Palestine Mandate, played a leading role in establishing the State of Israel, continues to organize immigration.

Israel is administratively divided into six districts:

District	Area (sq. km)	Population, 2009	Chief town
Northern	4,473	1,257,200	Nazareth
Haifa	866	898,400	Haifa
Central	1,294	1,814,300	Ramia
Tel Aviv	172	1,277,100	Tel Aviv
Jerusalem <sup>1</sup>	653	924,100	Jerusalem
Southern	14,185	1,084,200	Beersheba

<sup>1</sup>Includes East Jerusalem.

A further 296,700 people lived in Judaea and Samara (roughly corresponding to the West Bank) in 2009.

On 23 Jan. 1950 the Knesset proclaimed Jerusalem the capital of the State and on 14 Dec. 1981 extended Israeli law into the Golan Heights. Population of the main towns (2009): Jerusalem, 773,000; Tel Aviv/Jaffa, 403,700; Haifa, 265,600; Rishon le-Ziyyon, 228,200; Petach Tikva, 209,600; Ashdod, 206,400; Beersheba, 194,300; Holon, 184,700; Netanya, 183,200; Bene Berak, 154,400; Ramat Gan, 145,000; Bat Yam, 130,000.

The official languages are Hebrew and Arabic.

#### SOCIAL STATISTICS

2008 births, 156,923; deaths, 39,484; marriages, 50,038; divorces, 13,488. 2008 crude birth rate per 1,000 population of Jewish population, 20.4; Non-Jewish: Muslims, 28.5; Christians, 16.5; Druzes, 21.0. Crude death rate per 1,000 (2008), Jewish, 6.2; Muslims, 2.5; Christians, 4.7; Druzes, 3.0. Infant mortality rate per 1,000 live births (2005–09), 4.0 (Jewish, 2.9; Muslims, 7.5; Christians, 2.3; Druzes, 5.2). Life expectancy, 2007, 78.5 years for males and 82.7 for females. Average annual population growth rate, 2000–05, 1.9%. Fertility rate, 2008, 2.8 births per woman.

#### Immigration

The following table shows the numbers of immigrants entering Palestine/Israel.

2002	2003	2004	2005	2006	2007
33,567	23,268	20,898	21,180	19,269	18,131

There were 199,516 immigrants in 1990 and 176,100 in 1991 following the fall of communism in eastern Europe and the break-up of the former Soviet Union.

### CLIMATE

From April to Oct., the summers are long and hot, and almost rainless. From Nov. to March, the weather is generally mild, though colder in hilly areas, and this is the wet season. Jerusalem, Jan. 12.8°C, July 28.9°C. Annual rainfall, 657 mm. Tel Aviv, Jan. 17.2°C, July 30.2°C. Annual rainfall, 803 mm.

### CONSTITUTION AND GOVERNMENT

Israel is an independent sovereign republic, established by proclamation on 14 May 1948.

In 1950 the Knesset (*Parliament*), which in 1949 had passed the Transition Law dealing in general terms with the powers of the Knesset, President and Cabinet, resolved to enact from time to time fundamental laws, which eventually, taken together, would form the Constitution. The eleven fundamental laws that have been passed are: the Knesset (1958), Israel Lands (1960), the President (1964), the State Economy (1975), the Army (1976), Jerusalem, capital of Israel (1980), the Judicature (1984), the State Comptroller (1988), Human Dignity and Liberty (1992), Freedom of Occupation (1994) and the Government (2001).

The *President* (head of state) is elected by the Knesset by secret ballot by a simple majority; his term of office is seven years. He may only serve for one term.

The Knesset, a one-chamber Parliament, consists of 120 members. It is elected for a four-year term by secret ballot and universal direct suffrage. Under the system of election introduced in 1996, electors vote once for a party and once for a candidate for Prime Minister. To be elected Prime Minister, a candidate must gain more than half the votes cast, and be elected to the Knesset. If there are more than two candidates and none gain half the vote, a second round is held 15 days later. The Prime Minister forms a cabinet (no fewer than eight members and no more than 18) with the approval of the Knesset.

### National Anthem

'Hatikvah' ('The Hope'); words by N. H. Imber; folk-tune.

### GOVERNMENT CHRONOLOGY

Prime Ministers since 1948. (Avoda = Labour Party; Herut = Freedom Movement; Kadima = 'Forward'; Likud = 'Consolidation'; Mapai = Israeli Workers' Party)

1948–53	Mapai	David Ben-Gurion
1953–55	Mapai	Moshe Sharett
1955–63	Mapai	David Ben-Gurion
1963–69	Mapai	Levi Eshkol
1969–74	Avoda	Golda Meir
1974–77	Avoda	Yitzhak Rabin
1977–83	Herut/Likud	Menahem Begin
1983–84	Herut/Likud	Yitzhak Shamir
1984–86	Avoda	Shimon Peres
1986–92	Likud	Yitzhak Shamir
1992–95	Avoda	Yitzhak Rabin
1995–96	Avoda	Shimon Peres
1996–99	Likud	Binyamin Netanyahu
1999–2001	Avoda	Ehud Barak
2001–06	Likud, Kadima	Ariel Sharon
2006–09	Kadima	Ehud Olmert
2009–	Likud	Binyamin Netanyahu

### RECENT ELECTIONS

In the parliamentary (Knesset) elections on 10 Feb. 2009, Kadima won 28 of 120 seats with 22.5% of votes cast, Likud 27 (21.6%), Yisrael Beytenu 15 (11.7%), Labour 13 (9.9%), Shas 11 (8.5%), United Torah Judaism 5 (4.4%), the United Arab List 4 (3.4%), the National Union 4 (3.3%), Hadash 4 (3.3%), New Movement-

Meretz 3 (3.0%), the Jewish Home 3 (2.9%) and Balad 3 (2.5%). Turnout was 64.7%.

In a parliamentary vote for the presidency on 13 June 2007, Shimon Peres was elected in the second round with 86 votes in favour and 23 against after his two opponents from the first round had withdrawn.

### CURRENT GOVERNMENT

*President*: Shimon Peres; b. 1923 (since 15 July 2007).

The government is formed by a coalition of Likud, Independence, Jewish Home, Shas and Yisrael Beytenu. In March 2012 the cabinet was composed as follows:

*Prime Minister and Minister for Economic Strategy, Health, and Pensioner Affairs*: Binyamin Netanyahu; b. 1949 (Likud; since 31 March 2009, having previously held office from June 1996–July 1999).

*Vice-Prime Minister and Minister for Strategic Affairs*: Moshe Ya'alon (Likud). *Vice-Prime Minister and Minister for Regional Development and the Development of the Negev and Galilee*: Silvan Shalom (Likud).

*Deputy Prime Minister and Minister of Defence*: Ehud Barak (Independence). *Deputy Prime Minister and Minister of Foreign Affairs*: Avigdor Lieberman (Yisrael Beytenu). *Deputy Prime Minister and Minister of Intelligence and Atomic Energy*: Dan Meridor (Likud). *Deputy Prime Minister and Minister of Interior*: Eliyahu Yishai (Shas).

*Minister of Agriculture and Rural Development*: Orit Noked (Independence). *Communications, and Welfare and Social Services*: Moshe Kahlon (Likud). *Culture and Sport*: Limor Livnat (Likud). *Education*: Gideon Sa'ar (Likud). *Environmental Protection*: Gilad Erdan (Likud). *Finance*: Yuval Steinitz (Likud). *Home Front Defence*: Matan Vilnai (Independence). *Housing and Construction*: Ariel Atias (Shas). *Immigrant Absorption*: Sofa Landver (Yisrael Beytenu). *Improvement of Government Services*: Michael Eitan (Likud). *Industry, Trade and Labour, and Minority Affairs*: Shalom Simhom (Independence). *Information and Diaspora*: Yuli-Yoel Edelstein (Likud). *Internal Security*: Yitzhak Aharonovitch (Yisrael Beytenu). *Justice*: Yaakov Neeman (ind.). *National Infrastructure*: Uzi Landau (Yisrael Beytenu). *Religious Affairs*: Yakov Margi (Shas). *Science and Technology*: Daniel Hershkowitz (Jewish Home). *Tourism*: Stas Misezhnikov (Yisrael Beytenu). *Transportation and Road Safety*: Yisrael Katz (Likud). *Ministers without Portfolio*: Ze'ev Binyamin Begin (Likud), Meshulam Nahari (Shas), Yossi Peled (Likud).

*Office of the Prime Minister*: <http://www.pmo.gov.il>

### CURRENT LEADERS

#### Binyamin Netanyahu

#### Position

Prime Minister

#### Introduction

Following the general election of 10 Feb. 2009, Likud party leader Binyamin Netanyahu, who had previously been premier from 1996–99, formed a broad, but politically volatile, coalition government consisting of centre-right, centre-left and far-right parties.

#### Early Life

Binyamin Netanyahu was born on 21 Oct. 1949 in Tel Aviv. After military service, he studied in the USA at the Massachusetts Institute of Technology and Harvard. Having worked in business consultancy, he then joined the Israeli diplomatic service in Washington, D.C. in 1982 and served as Israel's ambassador to the UN from 1984–88.

In 1988 Netanyahu was elected to the Knesset for Likud and named deputy foreign minister. From 1991–92 he served as deputy minister in the Prime Minister's Office before succeeding

Yitzhak Shamir in 1993 as Likud chairman and leader of the opposition. Sceptical of the Sept. 1993 Oslo Accords, Netanyahu played on Israeli fears over security at a time of escalating Palestinian violence and oversaw a slim victory at the elections of May 1996. However, he was defeated in the 1999 general election by Labour's Ehud Barak and subsequently lost the Likud leadership to Ariel Sharon.

Netanyahu returned to politics in 2002 as foreign minister and in 2003 took the finance portfolio in Sharon's cabinet. In Aug. 2005 he resigned over the Gaza disengagement plan, but in Dec. he regained the Likud leadership and became opposition leader following the Kadima party's victory in the 2006 parliamentary elections.

At the Feb. 2009 elections Netanyahu claimed victory, despite winning 27 seats to Kadima's 28, on the basis that his right-wing coalition partners had won the majority of the vote.

#### *Career in Office*

Netanyahu's primary challenges on taking office were the economic downturn, the continuing crisis with the Palestinians and concerns over Iran's nuclear ambitions.

In June 2009 he expressed for the first time his acceptance of a two-state solution for Israel and Palestine, provided that the Palestinian state was demilitarized and that the Palestinians recognized Israel as the state of the Jewish people. There appeared to be a broad Israeli consensus in favour of this policy, but substantive progress in the peace process has remained elusive, particularly over the divisive issue of Jewish settlements in the West Bank and East Jerusalem. Having resisted early diplomatic pressure from US President Obama to stop all settlement building on Palestinian land, Netanyahu announced in Nov. 2009 a plan for a ten-month freeze in the West Bank (but not East Jerusalem) in a bid to restart peace negotiations. However, the move was deemed inadequate by the Palestinians and, following its expiry without renewal in Sept. 2010, the opportunity for further meaningful dialogue was effectively abandoned in Dec.

Tensions were heightened in 2011 as Palestinian President Abbas confirmed in Sept. that he was applying for formal United Nations recognition of Palestinian independent statehood in defiance of Israel and the USA. Nevertheless, in Oct. Netanyahu presided over a major prisoner exchange with the Palestinian Hamas faction to secure the release of an Israeli soldier captured in 2006, and in Jan. 2012 Israeli and Palestinian officials met in Jordan for their first, if inconclusive, direct contacts for well over a year.

Addressing the UN General Assembly in Sept. 2009, Netanyahu had stated that Iran posed a threat to world peace and that it must be prevented from acquiring nuclear weapons. He also condemned the Iranian president's denial of the Holocaust. Such antagonism has fuelled ongoing speculation about possible pre-emptive Israeli military action against Iran. In Feb. 2012 Netanyahu was quick to pin responsibility for bomb attacks aimed at Israeli envoys in the capitals of India and Georgia on Iran.

Israel's international reputation was meanwhile damaged in 2010 by its alleged involvement in the killing of a Palestinian militant in Dubai in Feb. by assassins using forged passports, and also by its military assault in May on a convoy of ships bringing aid to the Gaza Strip in defiance of the Israeli blockade. Nine Turkish nationals were killed in the latter incident, which severely undermined Israeli-Turkish diplomatic relations and led in Sept. 2011 to the suspension of all defence links and the expulsion of the Israeli ambassador.

In Feb. 2011, in response to mounting concern over political turmoil in Egypt, Netanyahu said that Israel would review its security arrangements if Egypt reneged on the 1979 bilateral peace treaty. In Sept. bilateral relations came under further strain as a violent Egyptian crowd stormed the Israeli embassy in Cairo, prompting an airlift of diplomats and their dependants out of the country.

Netanyahu's government was also confronted by widespread domestic unrest from mid-2011 in protest at rising living costs and other economic grievances.

#### **DEFENCE**

Conscription (for Jews and Druze only) is three years (usually four years for officers; 21 months for women). Israel is one of the few countries with female conscription. The Israel Defence Force is a unified force, in which army, navy and air force are subordinate to a single chief-of-staff. The Minister of Defence is *de facto* C.-in-C.

Defence expenditure in 2008 totalled US\$14,772m., representing 7.4% of GDP. Expenditure per capita in 2008 was US\$2,077, a figure exceeded only by the United Arab Emirates, Kuwait, the USA and Qatar.

#### *Nuclear Weapons*

Israel has an undeclared nuclear weapons capability. Although known to have a nuclear bomb, it pledges not to introduce nuclear testing to the Middle East. According to the Stockholm International Peace Research Institute, the nuclear arsenal was estimated to have about 80 warheads in Jan. 2011. Israel is one of three countries not to have signed the Nuclear Non-Proliferation Treaty (the others being India and Pakistan). Israel has never admitted possessing biological or chemical weapons, but according to *Deadly Arsenals*, published by the Carnegie Endowment for International Peace, it does have a chemical and biological weapons programme.

#### **Army**

Strength (2006) 125,000 (conscripts 105,000). There are also 380,000 reservists available on mobilization. In addition there is a paramilitary border police of about 8,000.

#### **Navy**

The Navy, tasked primarily for coastal protection and based at Haifa, Ashdod and Eilat, includes three small diesel submarines and three corvettes.

Naval personnel in 2006 totalled about 8,000 (including a Naval Commando of 300) of whom 2,500 are conscripts. There are also 11,500 naval reservists available on mobilization.

#### **Air Force**

The Air Force (including air defence) has a personnel strength (2006) of 35,000, with 402 combat aircraft, all jets, of Israeli and US manufacture including F-15s and F-16s, and 95 armed helicopters. There are 24,500 Air Force reservists.

#### **ECONOMY**

Services account for about 82% of GDP, industry 16% and agriculture 2%.

Israel is the largest recipient of foreign aid in absolute terms, in 2002 receiving US\$2.8bn., representing around US\$435 per person.

#### **Overview**

Israel's economy is diversified relative to its neighbours. Over the past two decades electronics manufacturing has replaced traditional industries such as footwear and clothing. Until the 1990s traditional industries benefited from protectionist policies but have since undergone structural changes, including outsourcing to regional neighbours with lower wages. As a result manufacturers have focused on product design and on trade agreements with the USA and the EU.

In 2000 the government opened the telecommunications sector to foreign competition. High-tech industries have benefited from Israel's high standard of education and its investment in military research and development. The 1990s saw strong growth and in 2000 the economy grew by 9.2%. However, in 2001 and 2002 Israel experienced its worst recession in 50 years, a result of high security costs arising from the second *intifada*, a sharp decline in tourism and difficulties in the high-tech sector.

The economy rebounded and GDP grew by an annual average of over 5% from 2004–07 thanks to improved internal security, strong external demand, sound financial conditions and prudent macroeconomic policies. In the same period, public debt was reduced from 99% of GDP to less than 80%. In 2008 the global financial crisis led to a reduction in exports and GDP growth, but the economy began to revive in the second quarter of 2009. Nonetheless, key challenges remain, notably the high public debt ratio. Investor flight from risk and geopolitical uncertainties threaten long term growth.

### Currency

The unit of currency is the *shekel* (ILS) of 100 *agorot*. Foreign exchange reserves were US\$58,426m. in Sept. 2009. Gold reserves have been negligible since 1998. Total money supply in Nov. 2008 was 83,131m. shekels.

Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
1.1%	5.7%	0.7%	-0.4%	1.3%	2.1%	0.5%	4.6%	3.3%	2.7%

### Budget

In 2008 revenues were 310.9bn. shekels and expenditures 320.9bn. shekels. Tax revenue accounted for 57.9% of revenues in 2008; debt repayment accounted for 21.7% of expenditures, defence 17.4% and education 11.2%.

VAT is 16%.

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
-0.3%	-0.6%	1.5%	4.8%	4.9%	5.6%	5.5%	4.0%	0.8%	4.8%

Total GDP was US\$217.3bn. in 2010.

### Banking and Finance

The Bank of Israel was established by law in 1954 as Israel's central bank. Its Governor is appointed by the President on the recommendation of the Cabinet for a five-year term. The *Governor* is Prof. Stanley Fischer. Central bank reserves in Dec. 2002 were US\$24.1bn. As part of a government scheme several banks were privatized in the years 1993–2006.

In 2001 there were 23 commercial banks headed by Bank Leumi le-Israel, Bank Hapoalim and Israel Discount Bank, two merchant banks, three foreign banks, eight mortgage banks and nine lending institutions specifically set up to aid industry and agriculture.

There is a stock exchange in Tel Aviv.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 9.9 tonnes per capita.

### Electricity

Installed capacity in 2007 was 11.6m. kW. Electric power production amounted to 55.09bn. kWh in 2007; consumption per capita was 7,383 kWh in 2007.

### Oil and Gas

In 2009 large quantities of natural gas were discovered off the coast of Israel that are expected to meet the country's needs for 35 years. In 2010 the reserves totalled 238bn. cu. metres. Crude petroleum reserves in 2007 were 2m. bbls.

### Minerals

The most valuable natural resources are the potash, bromine and other salt deposits of the Dead Sea. Production figures in 1,000 tonnes: phosphate rock (2004), 2,947; potash (2004), 2,060; lignite (2004), 439; salt (2004 estimate), 398.

### Agriculture

In the coastal plain mixed farming, poultry raising, citriculture and vineyards are the main agricultural activities. The Emek (the Valley of Jezreel) is the main agricultural centre of Israel. Mixed farming is to be found throughout the valleys; the sub-tropical Beisan and Jordan plainlands are also centres of banana plantations and fish breeding. In Galilee mixed farming, olive and tobacco plantations prevail. The Hills of Ephraim are a vineyard centre; many parts of the hill country are under afforestation.

There were about 338,000 ha. of arable land in 2002 and 86,000 ha. of permanent crops. Production, 2002 (in 1,000 tonnes): melons and watermelons, 405; potatoes, 394; tomatoes, 383; grapefruit and pomelos, 256; wheat, 179; oranges, 159; cucumbers and gherkins, 144; apples, 126.

Livestock (2003 estimates): 395,000 sheep; 390,000 cattle; 190,000 pigs; 63,000 goats; 35m. poultry.

Types of rural settlement: (1) the *Kibbutz* and *Kvutza* (communal collective settlement), where all property and earnings are collectively owned and work is collectively organized (117,700 people lived in 267 *Kibbutzim* in 2005). (2) The *Moshav* (workers' co-operative smallholders' settlement) which is founded on the principles of mutual aid and equality of opportunity between the members, all farms being equal in size (213,600 in 402 *Moshavim* in 2005). (3) The *Moshav Shitufi* (co-operative settlement), which is based on collective ownership and economy as in the *Kibbutz*, but with each family having its own house and being responsible for its own domestic services (17,000 in 40 *Moshavim Shitufi'im* in 2005). (4) Other rural settlements in which land and property are privately owned and every resident is responsible for his own well-being. In 2005 there were a total of 240 non-cooperative villages with a population of 159,400.

### Forestry

In 2005 forests covered 171,000 ha. or 8.3% of the total land area. Timber production was 27,000 cu. metres in 2007.

### Fisheries

Catches in 2005 totalled 4,151 tonnes, of which 2,755 tonnes were from marine waters.

## INDUSTRY

The leading companies by market capitalization in Israel in March 2011 were: Teva Pharmaceutical Industries Ltd (US\$47.2bn.); and Israel Chemicals Ltd (US\$20.9bn.).

Products include chemicals, metal products, textiles, tyres, diamonds, paper, plastics, leather goods, glass and ceramics, building materials, precision instruments, tobacco, foodstuffs, electrical and electronic equipment.

### Labour

The economically active workforce was 2,270,500 in 2001 (1,236,200 males). The principal areas of activity were: manufacturing, mining and quarrying, 394,200; wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 299,800; education, 283,700; and real estate, renting and business activities, 277,200. Unemployment was 6.7% in 2010.

## INTERNATIONAL TRADE

### Imports and Exports

External trade, in US\$1m., for calendar years:

	2003	2004	2005	2006	2007
Imports c.i.f.	34,211	40,970	45,032	47,834	56,619
Exports f.o.b.	31,783	38,620	42,771	46,792	54,091

Main imports in 2007 were: manufactured goods, 28.6% (including diamonds); machinery and transport equipment, 28.5%; mineral fuels, lubricants and related materials (including petroleum and petroleum products), 15.8%; chemicals and

chemical products, 10.7%. Diamonds constituted 17.7% of Israel's imports in 2007. Leading import suppliers in 2007: USA, 13.9%; Belgium, 7.9%; Germany, 6.2%; China, 6.1%.

Main exports in 2007 were: manufactured goods, 39.5% (including diamonds); chemicals and related products, 15.1%; machinery and transport equipment, 14.4%; miscellaneous manufactured articles, 7.3%. Diamonds constituted 34.0% of exports in 2007. The leading export markets in 2007 were: USA, 35.0%; Belgium, 7.5%; Hong Kong, 5.8%; UK, 3.6%.

## COMMUNICATIONS

### Roads

There were 17,870 km of paved roads in 2007, including 344 km of motorway. Motor vehicles in use in 2007 totalled 1,805,400 passenger cars, 362,200 lorries and vans, 94,800 motorcycles and mopeds, and 21,300 buses and coaches. There were 398 fatalities as a result of road accidents in 2007.

### Rail

There were 909 km of standard gauge line in 2005. 26.8m. passengers and 7.5m. tonnes of freight were carried in 2005. One of the smallest metro systems in the world (1,800 metres) was opened in Haifa in 1959. A tram system in Jerusalem opened in Aug. 2011.

### Civil Aviation

There are international airports at Tel Aviv (Ben Gurion), Eilat (J. Hozman), Haifa and Ovda. Tel Aviv is the busiest airport, in 2001 handling 8,305,950 passengers (7,864,200 on international flights) and 296,054 tonnes of freight. El Al is the flag carrier. In 2005 scheduled airline traffic of Israeli-based carriers flew 97.9m. km and carried 4,382,200 passengers. In 2003 services (mainly domestic) were also provided by another Israeli airline, Arkia, and by over 40 international carriers.

### Shipping

Israel has three commercial ports—Haifa, Ashdod and Eilat. In Jan. 2009 there were 15 ships of 300 GT or over registered, totalling 428,000 GT.

### Telecommunications

In 2008 there were 3,224,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 8,982,000 (1,273.8 per 1,000 persons). There were 3.3m. internet users in 2007.

## SOCIAL INSTITUTIONS

### Justice

*Law.* Under the Law and Administration Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was obtaining in Palestine on 14 May 1948 in so far as it is not in conflict with that Ordinance or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities.

Capital punishment was abolished in 1954, except for support given to the Nazis and for high treason.

The law of Palestine was derived from Ottoman law, English law (Common Law and Equity) and the law enacted by the Palestine legislature, which to a great extent was modelled on English law.

*Civil Courts.* Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bylaws and certain specified offences committed within a municipal area. Magistrates courts, established in each district and sub-district, have limited jurisdiction in both civil and criminal matters. District courts, sitting at Jerusalem, Tel Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates courts, and in all criminal matters, and as appellate courts from magistrates courts and municipal courts. The 14-member Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of

Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil or of Criminal Appeal).

In addition, there are various tribunals for special classes of cases. Settlement Officers deal with disputes with regard to the ownership or possession of land in settlement areas constituted under the Land (Settlement of Title) Ordinance.

*Religious Courts.* The rabbinical courts of the Jewish community have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of members of their community and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community with the consent of all parties to the action.

The courts of the several recognized Christian communities have a similar jurisdiction over members of their respective communities.

The Muslim religious courts have exclusive jurisdiction in all matters of personal status over Muslims who are not foreigners, and over Muslims who are foreigners, if under the law of their nationality they are subject in such matters to the jurisdiction of Muslim religious courts.

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of two judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

In 2001 government expenditure on public security and justice totalled 7,238m. shekels. The population in penal institutions in March 2008 was 22,788 (326 per 100,000 of national population).

### Education

The adult literacy rate in 2003 was 96.9% (male, 98.3%; female, 95.6%). There is free and compulsory education from five to 18 years. There is a unified state-controlled elementary school system with a provision for special religious schools. The standard curriculum for all elementary schools is issued by the Ministry of Education with a possibility of adding supplementary subjects comprising not more than 25% of the total syllabus.

In 2004–05 there were 1,614,000 Hebrew pupils and 436,000 Arab pupils in the education system. In primary schools and kindergartens in 2004–05 there were 888,000 Hebrew children and 302,000 Arab children. There were 57,000 Hebrew teachers and 16,000 Arab teachers in primary education in 2004–05. In post-primary education there were 472,000 Hebrew pupils and 132,000 Arab pupils in 2004–05, with 64,000 Hebrew teachers and 11,000 Arab teachers. In special education there were 11,180 pupils in 2004–05. In post-secondary education, such as colleges, universities and vocational institutions, there were 255,000 pupils, of which 253,000 were Hebrew.

The Hebrew University of Jerusalem, founded in 1925, comprises faculties of the humanities, social sciences, law, science, medicine and agriculture. In 2004–05 it had 21,985 students. The Technion–Israel Institute of Technology in Haifa had 12,810 students. The Weizmann Institute of Science in Rehovoth, founded in 1949, had 960 students in 2004–05.

Tel Aviv University had 28,740 students in 2004–05. The religious Bar-Ilan University at Ramat Gan, opened in 1965, had 25,025 students, the Haifa University had 16,270 students and the Ben Gurion University had 18,640 students.

In 2008 public expenditure on education came to 5.9% of GDP and accounted for 13.7% of total government spending.

### Health

In 2010 there were 121 hospitals. There were 60 hospital beds per 10,000 inhabitants in 2007. There were 25,138 physicians, 7,726

dentists, 4,958 pharmacists and 42,609 nurses and midwives in 2006. In 2009 health spending represented 7.5% of GDP.

### Welfare

The National Insurance Law of 1954 provides for old-age pensions, survivors' insurance, work-injury insurance, maternity insurance, family allowances and unemployment benefits. In 2001 recipients of allocations from the National Insurance Institute included (monthly averages): child allowances, 2,154,735; old age pensions, 571,200; general disability allowances, 142,440; income support benefits, 142,011; maternity grants, 129,089; survivors' pensions, 105,818; unemployment benefits, 104,707.

### RELIGION

Religious affairs are under the supervision of a special ministry, with departments for the Christian and Muslim communities. The religious affairs of each community remain under the full control of the ecclesiastical authorities concerned: in the case of the Jews, the Ashkenazi and Sephardi Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Muslims, the Qadis. The Druze were officially recognized in 1957 as an autonomous religious community.

In 2001 there were: Jews, 4,960,000; Muslims, 930,000; others (mainly Christians and Druze), 360,000.

The Chief Rabbis are Yona Metzger (Ashkenazi) and Shlomo Amar (Sephardi).

### CULTURE

#### World Heritage Sites

There are six UNESCO sites in Israel. Masada and the old city of Acre were both inscribed in 2001. Masada was built as a palace complex and fortress by Herod the Great. It was the site of the mass suicide of about 1,000 Jewish patriots in the face of a Roman army in the 1st century AD and is a symbol of the ancient kingdom of Israel. The port city of Acre preserves remains of its medieval Crusader buildings beneath the existing Muslim fortified town dating from the 18th and 19th centuries. The White City of Tel Aviv—the Modern Movement (2003) is an example of early 20th century town planning, based on the plan of Sir Patrick Geddes. The Biblical Tels, a series of prehistoric settlement mounds with biblical connections, and the Incense Route, four Nabatean towns along the spice and incense trail, were added to the list in 2005. The Bahá'í Holy Places in Haifa and the Western Galilee (2008) is a complex of buildings including the Shrine of Bahá'u'lláh in Acre and the Shrine of the Báb in Haifa that are visited as part of the Bahá'í pilgrimage.

#### Press

In 2006 there were 13 daily newspapers. Combined circulation was 930,000. The newspaper with the highest circulation is *Yedioth Ahronoth* (Latest News), which sold a daily average of 300,000 copies.

#### Tourism

In 2005 there were 1,903,000 foreign tourists, spending US\$3.41bn.

#### Calendar

The Jewish year 5772 corresponds to 29 Sept. 2011–16 Sept. 2012; 5773 corresponds to 17 Sept. 2012–4 Sept. 2013.

### DIPLOMATIC REPRESENTATIVES

Of Israel in the United Kingdom (2 Palace Green, Kensington, London, W8 4QB)

*Ambassador:* Daniel Taub.

Of the United Kingdom in Israel (192 Hayarkon St., Tel Aviv 63405)

*Ambassador:* Matthew Gould, MBE.

Of Israel in the USA (3514 International Dr., NW, Washington, D.C., 20008)

*Ambassador:* Michael Oren.

Of the USA in Israel (71 Hayarkon St., Tel Aviv)

*Ambassador:* Daniel B. Shapiro.

Of Israel to the United Nations

*Ambassador:* Ron Prosor.

Of Israel to the European Union

*Ambassador:* Yacov Hadas-Handelsman.

## Palestinian-Administered Territories

### KEY HISTORICAL EVENTS

After Israel declared independence on 14 May 1948, Arab League troops invaded the former British Mandate for Palestine. The first Arab-Israeli War (known in Israel as the War of Independence) ended with an armistice in July 1949. Under its terms 77% of Palestine came under Israeli control (56% had been allocated by the UN Partition Plan of 1947). Around 700,000 Palestinians were displaced to the West Bank, the Gaza Strip or to neighbouring countries. Up to 150,000 Palestinians remained in Israel. Gaza came under Egyptian control and in April 1950 the West Bank and East Jerusalem were annexed into Jordan.

Border clashes were frequent in the early 1950s. When Egypt nationalized the Suez Canal in July 1956 Israeli troops occupied Gaza and the Sinai Peninsula until the arrival of UN Emergency Forces. Fatah (the Palestine National Liberation Movement) emerged in Gaza in the late 1950s, led by Yasser Arafat and Khalil al-Wazir. It became the leading faction in the Palestine Liberation Organization (PLO), launched by the Arab League in 1964.

Guerrilla attacks by Fatah on Israel began in Jan. 1965. Tensions between Egypt and Israel rose in 1967 when UN forces withdrew. Israel's pre-emptive strike on Egyptian air bases ignited the Six Day War on 5 June, culminating in Israeli control of the West Bank, Gaza Strip and Golan Heights. In Nov. 1967 the UN stated that Israel should withdraw its forces from the territories occupied during the war in return for peace with its Arab neighbours. However, the PLO refused to accept Israel's right to exist. Following the Yom Kippur war in 1973, the possibility of a

settlement was lost when radical factions broke from the PLO. In Oct. 1974 the Arab League recognized the PLO as the 'sole, legitimate representative of the Palestinian people'.

When Israel and Egypt signed the Camp David Accords in Sept. 1978, Israel withdrew from Sinai. Plans for Palestinian autonomy in Gaza and the West Bank excluded the PLO and were rejected by Palestinians, while Israel made clear its intention to maintain a military presence in the Occupied Territories and expand Jewish settlements in the West Bank.

Israel's invasion of southern Lebanon in June 1982 ended the PLO's presence there. The 88-day siege of Beirut forced 10,000 militia into Yemen, Sudan and other Arab countries. Arafat established new headquarters in Tunisia. In Nov. 1988, almost a year after the first Palestinian *intifada* (uprising) against Israel began, the PLO declared a Palestinian state. Arafat also recognized Israel's right to exist and renounced terrorism, paving the way for the 1993 Oslo Accords.

After the Israeli prime minister, Yitzhak Rabin, recognized the PLO an agreement was signed in Washington providing for limited Palestinian self-rule (through the Palestinian National Authority) in the Gaza Strip and part of the West Bank. The six-year *intifada* ended, during which over 2,000 Palestinians and 150 Israelis were killed.

In Nov. 1995 Rabin was assassinated by a Jewish extremist. Under an agreement of 1995 the Israeli army withdrew from six of the seven largest Palestinian towns in the West Bank and from 460 smaller towns and villages. The rest of the West Bank stayed under Israeli control with further withdrawals at six-month intervals. Negotiations on the permanent status of the West Bank and Gaza began in May 1996.

After elections in 1996, a right-wing coalition under Binyamin Netanyahu approved plans for an expansion of Jewish settlement in the West Bank. In Oct. 1998 Israel accepted partial withdrawal from the West Bank on condition that the Palestinians cracked down on terrorism. The following month, 2% of the West Bank was handed over.

Netanyahu's defeat by Ehud Barak in elections in 1999 improved relations with the PLO. In March 2000 Arafat accepted plans for expanded self-rule in the West Bank, involving the transfer of another 6% of the area to the Palestinian Authority. However, by Oct. 2000 a second *intifada* had begun, fuelled by conflict over control of Jerusalem. When talks stalled, Barak went to the polls in Feb. 2001 but was defeated by Ariel Sharon. Amid escalating violence, in Dec. 2001 Israel broke off contact with Arafat, putting him under virtual house arrest.

Violence on both sides continued in 2002 with heavy loss of life. In March 2002 the UN endorsed a Palestinian state for the first time. In June 2002 Israel began constructing a barrier cutting off the West Bank to shield against suicide bombers. Arafat died in Nov. 2004 and was succeeded by Mahmoud Abbas. In Feb. 2005 Sharon and Abbas agreed to cease hostilities. In Aug. 2005 Israel evicted 8,500 Jewish settlers from Gaza.

In Jan. 2006 Palestinian legislative elections were won by Change and Reform (Hamas), which does not recognize Israel and has called for its destruction. Western aid was thus suspended. In Dec. 2006, after deadlock between Fatah and Hamas over forming a national unity government, Abbas called new elections. Tensions between Fatah and Hamas peaked in June 2007, with Hamas seizing control of the Gaza Strip while the West Bank remained under Fatah. Abbas established a new government, recognized by Fatah and Israel but not by Hamas, under the premiership of Salam Fayyad.

In Dec. 2008 Israel began an assault in Gaza aimed at destroying Hamas strongholds responsible for attacks on Israeli targets. The international community called for a ceasefire amid concerns over the high civilian death toll and infrastructural damage. On 13 Jan. 2009 the UN headquarters in Gaza was bombed by Israeli forces. Israel apologized, claiming its forces were attacked by militants taking refuge there. On 18 Jan. Israel

and Hamas announced unilateral ceasefires. An estimated 1,300 Palestinians and 13 Israelis were killed during the three-week offensive, and 50,000 displaced.

In May 2011 Mahmoud Abbas and Khaled Meshaal, leaders of Fatah and Hamas respectively, agreed that a joint caretaker administration should hold power until Palestinian elections—initially scheduled for May 2012 but subsequently postponed.

## TERRITORY AND POPULATION

The 2007 census population of the Palestinian territory was 3,767,126 (2,895,683 in 1997). In 2005, 71.6% of the population was urban. Life expectancy at birth, 2007, was 74.9 years for females and 71.7 years for males. The UN gives a projected population for 2015 of 4.65m.

The West Bank (preferred Palestinian term, Northern District) has an area of 5,655 sq. km; the 2007 census population was 2,350,583, in addition to 275,000 Jewish settlers and 10,000 troops deployed there. 99.8% of the population in 1997 were Palestinians. In 2001 there were 1,860,000 Muslims, 230,000 Jews and 200,000 Christians and others. By 2009 the number of Jewish settlers had risen above 300,000. In 2006 there was a Palestinian diaspora of 5.0m. The birth rate in 2004 was estimated at 39.6 per 1,000 population and the death rate 4.8 per 1,000. In 1995–99 the infant mortality rate was 24.4 per 1,000 live births. The fertility rate in 1999 was 5.5 births per woman. In 2003 there were 31,646 private cars and 14,521 commercial vehicles and trucks registered. There were (2003–04) 542,520 pupils in basic stage education and 59,909 in secondary stage. In 1998–99 there were 36,224 students in institutions of higher education. In 2003 there were 54 hospitals.

The Gaza Strip (preferred Palestinian term, Gaza District) has an area of 365 sq. km; the 2007 census population was 1,416,543. The population doubled between 1975 and 1995. Crude birth rate in 2004 was 43.7 per 1,000 population. The death rate was estimated at 3.9 per 1,000 population. The fertility rate in 1999 was 6.8 births per woman. Infant mortality, 1995–99, 27.3 per 1,000 live births. Agricultural production, 2002 estimates, in 1,000 tonnes: oranges, 105; tomatoes, 48; potatoes, 35; cucumbers and gherkins, 18; grapefruit and pomelos, 10. Total fish catch in 2005 for the Palestinian-Administered Territories was 1,805 tonnes. In 2003–04 there were 374,713 students in basic stage education, 41,185 in secondary stage and 30,058 students in higher education (1998–99). In 2003 there were 17 hospitals.

The chief town is Gaza itself. Over 98% of the population are Arabic-speaking Muslims. In 1995 an estimated 94.2% of the population lived in urban areas. In 2003 there were 38,677 private cars and 9,392 commercial vehicles and trucks registered. Gaza International Airport, at the southern edge of the Gaza Strip, opened in Nov. 1998. Telecommunications development has been rapid, the number of fixed line telephone subscribers more than trebling between 1997 and 2000. In 2003 there were 243,494 subscribers. In 2003 life expectancy at birth was 71.7 years.

## CONSTITUTION AND GOVERNMENT

In April 1996 the Palestinian Council removed from its Charter all clauses contrary to its recognition by Israel, including references to armed struggle as the only means of liberating Palestine, and the elimination of Zionism from Palestine. The *President* is directly elected and heads the executive organ, the Palestinian National Authority, one fifth of whose members he appoints, while four fifths are elected by the *Legislative Council*. The latter comprises 132 members (88 until 2005), of which 66 members are chosen by district voting and the other 66 by proportional representation. The 2007 Election Law passed by President Mahmoud Abbas during a period of emergency rule introduced proportional representation for all seats. Hamas claimed the reforms were illegal as they were not ratified by the Legislative Council. The Palestinian Authority was created by agreement of the PLO and Israel as an interim instrument of

self-rule for Palestinians living on the West Bank and Gaza Strip. The failure of the PLO and Israel to strike a permanent status agreement has resulted in the Authority retaining its powers. It is entitled to establish ministries and subordinate bodies, as required to fulfil its obligations and responsibilities. It possesses legislative and executive powers within the functional areas transferred to it in the 1995 Interim Agreement. Its territorial jurisdiction is restricted to Areas A and B in the West Bank and approximately two-thirds of the Gaza Strip.

Following an Israeli-Palestinian agreement on customs duties and VAT in Aug. 1994 the Palestinians set up their own customs and immigration points into Gaza and Jericho. Israel collects customs dues on Palestinian imports through Israeli entry points and transfers these to the Palestinian treasury.

A special committee is working on drafting a new Palestinian constitution. In March 2003 parliament approved the creation of the position of prime minister. Yasser Arafat nominated Mahmoud Abbas, the PLO Secretary General, to be the first premier. The president may dismiss the prime minister but parliament has to approve any new government.

There is a Palestinian *Council for Reconstruction and Development*.

### RECENT ELECTIONS

Legislative Council elections were held on 25 Jan. 2006. Change and Reform (Hamas) won 74 seats; Fatah Movement, 45; Popular Front for the Liberation of Palestine, 3; the Alternative, 2; Independent Palestine, 2; Third Way, 2; ind. and others, 4. Turnout was 74.6%.

Presidential elections were held on 9 Jan. 2005. Mahmoud Abbas was elected president by 67.4% of votes cast, ahead of Mustafa Barghouti with 21.0%. There were five other candidates.

### CURRENT GOVERNMENT

*President of the Palestinian Authority and Head of Interim Unity Government:* Mahmoud Abbas (Fatah); b. 1935.

### ECONOMY

#### Overview

Following the outbreak of the second *intifada* in Sept. 2000, conditions in the Palestinian-Administered Territories deteriorated, with real GDP in 2007 estimated to be around 18% lower than its peak in 1999.

However, revival followed the appointment of a new caretaker government in the West Bank in 2007, with growth estimated to have reached 5% in 2008 and accelerating further in 2009. This expansion has been driven by donor assistance, alongside increased 'tunnel activity' (underground economic activity with neighbouring Egypt) and a relaxation of the blockade in Gaza. However, growth reflects recovery from the very low base reached during the second *intifada* and the economic situation remains poor.

Unemployment has been amongst the highest in the world during the past decade. In 2009 just over one-fifth of the population lived in poverty, a 4% decline compared to 2004.

#### Currency

Israeli currency is in use.

### Performance

The total GDP of the West Bank and the Gaza Strip was US\$4.0bn. in 2007.

### Banking and Finance

Banking is regulated by the Palestinian Monetary Authority. Palestine's leading bank is Arab Bank. A securities exchange, the Palestine Securities Exchange, opened in Nablus in Feb. 1997.

### ENERGY AND NATURAL RESOURCES

#### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita.

### COMMUNICATIONS

#### Telecommunications

In 2005 there were 1,443,600 telephone subscribers (equivalent to 390.0 per 1,000 inhabitants), including 1,094,600 mobile phone subscribers. There were 243,000 internet users in 2005.

### SOCIAL INSTITUTIONS

#### Justice

The Palestinian police consists of some 15,000; they are not empowered to arrest Israelis, but may detain them and hand them over to the Israeli authorities. There were three executions in 2011 (five in 2010). All of the executions in 2010 and 2011 were in the Hamas-controlled Gaza Strip.

#### Education

Adult literacy was 94.6% in 2009 (97.4% among males and 91.7% among females).

### CULTURE

#### Tourism

In 2007 there were 264,000 non-resident tourists staying at hotels and similar establishments; receipts from tourism totalled US\$121m. in 2005 (excluding passenger transport).

## KEY HISTORICAL EVENTS

Excavations at Isernia have uncovered remains of Palaeolithic Neanderthal man that date back 70,000 years. New Stone Age settlements have been found across the Italian peninsula and at the beginning of the Bronze Age there were several Italic tribes, including the Ligurians, Veneti, Apulians, Siculi and the Sardi. The Etruscans were established in Italy by around 1200 BC. Their highly civilized society flourished between the Arno and Tiber valleys, with other important settlements in Campania, Lazio and the Po valley. The Etruscans were primarily navigators and travellers competing for the valuable trading routes and markets with the Phoenicians and Greeks. During the 8th century BC the Greeks had begun to settle in southern Italy and presented a challenge to Etruscan domination of sea trade routes. Greek settlements were established along the southern coast, on the island of Ischia in the Bay of Naples and in Sicily where the Corinthians founded the city of Syracuse. These colonies were known as *Magna Graecia* and flourished for six centuries. *Magna Graecia* eventually succumbed to the growing power of Rome where the impact of the Hellenic culture had already been felt.

According to legend, Rome was founded on 21 April 753 BC by Romulus (a descendant of Aeneas, a Trojan) who, after killing his twin brother, Remus, declared himself the first king of Rome. The Etruscan dynasty of Tarquins gained control in 616 BC and

expanded Roman agriculture and trade to rival the Greeks. The Romans overthrew the Tarquins in 510 BC and the first Roman Republic was born.

With the Republic came the establishment of the 'Roman Code', a collection of principles of political philosophy that enshrined the sovereign rights of Roman citizens. The early Roman Senate was dominated by a few patrician families, who held a monopoly on public office with the *equites* (the highest class of non-noble rich).

With the exception of the Greek city-states, Italy was unified by the Romans, who then set their sights on the Mediterranean, controlled by Carthage. Between 264–146 BC Carthage and Rome fought three wars (the Punic Wars) for supremacy of the Mediterranean trade routes. At the start Carthage was the more powerful, with a colonial empire that stretched as far as Morocco and included Sicily, Corsica, Sardinia and parts of Spain. Rome was also inexperienced in maritime war. In 218 BC the second Punic War started when Hannibal crossed the Alps and marched south, defeating the Romans in a series of battles in Italy. Without taking Rome itself, he crossed over to Zama in North Africa where he was finally defeated by Scipio in 202 BC. But by the end of the third Punic War in 146 BC the destruction of Carthage was total and Macedonian Greece was added to Rome's provinces. Rome incorporated Spain into her colonies and became the dominant power in the Mediterranean.

This dominance of trade routes led to great riches for Rome and the ensuing corruption among the upper ruling classes gave rise to social unrest. Sulla, a patrician general, marched on Rome in 82 BC, took the city in a bloody coup and instituted a new constitution. Nine years later Spartacus, an escaped slave, led 70,000 of his fellow slaves in a rampage throughout the peninsula. Out of the ensuing chaos, Julius Caesar emerged as leader. He had already conquered Gaul and declared southern Britain a part of Rome in 54 BC. His disregard for the Senate led to his legions being disbanded but he remained popular and returned to Rome a hero. His strength and charisma led to his assassination by members of the Senate on the Ides of March 44 BC. After his death, various rival successors fought to gain control, including Mark Anthony (Marcus Antonius), Marcus Junius Brutus and Gaius Cassius. But it was Caesar's nephew Octavian, having defeated Mark Anthony in 31 BC, who was crowned the first emperor of Rome in 27 BC, assuming the title Augustus.

## Roman Domination

Augustus reigned for 45 years. With the aid of a professional army and an imperial bureaucracy he established the *Pax Romana* while extending the empire and disseminating its laws and civic culture. The arts thrived with writers, dramatists and philosophers such as Cicero, Plautus, Terence, Virgil, Horace and Ovid developing Latin into an expressive and poetic language. In 100 BC Rome itself had more than 1.5m. inhabitants and the Roman Empire was a unified diversity of many races and creeds. It had more than 100,000 km of paved roads, a complex of sophisticated aqueducts, and an efficient army and administrative system.

In AD 14 Augustus was succeeded by his stepson, Tiberius, who ruled in an era that saw the rise of Christianity. Successive emperors tried to suppress the new religion which spread quickly throughout the empire. The deranged Emperor Nero, who came to power in AD 54, intensified persecution of the Christians and was accused of setting Rome on fire. His death in AD 68 brought the Julio-Claudian dynasty to a close and, after a period of instability, Vespasian, the son of a provincial civil servant, took the throne and began some of the most ambitious building

projects the Empire had seen. He started the Colosseum (completed by his son Titus) and the Arco di Tito (where the Via Sacra joins the Forum).

In AD 98 the Senate elected Trajan as emperor. Beginning a century of successful rule by the Antonine dynasty, he expanded the empire with the conquests of Dacia (Romania), Mesopotamia, Persia, Syria and Armenia. By the end of his reign the Roman Empire stretched from the Persian Gulf to Britain, from the Caspian Sea to Morocco and from the Sahara to the Danube. Trajan was responsible for several great architectural projects. A huge column depicting his Dacian campaigns served as his tomb in Rome. Trajan's successor, Hadrian, continued this programme of huge constructions, including Hadrian's Wall in Britain. After his death in 138, his tomb was converted into the fortress of Castel Sant'Angelo on the banks of the Tiber.

Under pressure from Teutonic tribes along the Danube and as a result of the increasingly strong influence of the Eastern religions, Rome began to lose control of its empire at the start of the 3rd century. In 306 Constantine became emperor. After he converted to Christianity in 313 his Edict of Milan established Rome as the headquarters of the Christian religion. A new building programme of Christian cathedrals and churches began throughout Italy. At the same time, Constantine cultivated the wealthy eastern regions of the Empire and, in 324, he moved his capital to Constantinople (now Istanbul). The decline of the Roman Empire continued when, after the death of Constantine, two brothers, Valens and Valentinian, divided the Empire. The west and east gradually became alienated, separated by invaders, language and religious interpretation. 'Rome' endured in the east as the Byzantine Empire, the most powerful medieval state in the Mediterranean.

#### *Fall of Rome*

The western half of the Roman Empire, having embraced Christianity as the state religion, came under repeated attacks from Central European ('Barbarian') tribes. The Germanic Vandals had cut off Rome's corn supplies from North Africa, and the Visigoths, a Teutonic tribe, controlled the northern Mediterranean coast and northern Italy. In 452 Attila the Hun, from the steppes of Central Asia, invaded and forced the people of northeastern Italy onto a lagoon haven that became Venice. Rome was captured and sacked in 455 by the Vandals and in 476 a Germanic mercenary captain, Odovacar, deposed Romulus Augustus, the last of the Western Roman Emperors. This date is generally accepted as the end of the Roman Empire in the West.

In 493 Odovacar was succeeded by Theodoric, an Ostrogoth who had acquired a taste for Roman culture. Theodoric ruled from Ravenna and by the time he died in 527 he had managed to restore peace to Italy. On his death, Italy was reconquered by an emperor of the Eastern Roman Empire, Justinian, who together with his wife Theodora laid the foundations of the Byzantine period. Although the Lombards drove back the Justinian conquest, Byzantine emperors managed to retain control of parts of southern Italy until the 11th century.

In the mid-5th century Attila the Hun had been persuaded not to attack Rome by Pope Leo I ('The Great'). This and a document known as the 'Donation of Constantine' secured the Western Roman Empire for the Catholic Church. In 590 Gregory I became pope and set about an extensive programme of reforms, including improved conditions for slaves and the distribution of free bread in Rome. He oversaw the Christianization of Britain, repaired Italy's network of aqueducts and created the foundations for Catholic services and rituals and church administration.

The invasion of Italy by the Lombards began before Gregory became pope and, although they eventually penetrated as far south as Spoleto and Benevento, they were unable to take Rome. They settled around Milan, Pavia and Brescia and abandoned their own language and customs in favour of the local culture. However, they were sufficiently threatening to cause the pope to

invite the Franks under King Pepin to invade. In 756 the Franks overthrew the Lombards and established the Papal States (which survived until 1870). Pepin issued his 'Donation of Pepin', which gave the land still controlled by the Byzantine Empire to Pope Stephen II, proclaiming him and future popes the heirs of the Roman emperors. Pepin's son, Charlemagne, succeeded him and was crowned emperor on Christmas Day 800 by Pope Leo III in St Peter's Basilica in Rome. The installation of a 'Roman' emperor in the West—what was to become the Holy Roman Empire—endorsed the separation between Rome and Byzantium and moved the seat of European political power north of the Alps.

After Charlemagne's death it proved impossible to keep the enormous Carolingian Empire intact. In the period of anarchy that followed, many small independent rival states were established while in Rome the aristocratic families fought over the Papacy. Meanwhile, southern Italy was prospering under Muslim rule. By 831 Muslim Arabs had invaded Sicily and made Palermo their capital. Syracuse fell to them in 878. They created a Greek style civilization with Muslim philosophers, physicians, astronomers, mathematicians and geographers. Cotton, sugarcane and citrus fruits appeared for the first time in Italy and taxes were lowered. Hundreds of mosques were built and all over the region centres of academic and medical learning sprang up. Southern Italy lived harmoniously under Arab influence for more than 200 years while the north remained unsettled. After the collapse of the Carolingian Empire, warfare broke out between local rulers, forcing many people to take refuge in fortified hill towns. In 962 Otto I, a Saxon, was crowned Holy Roman Emperor, the first of a succession of Germanic emperors that was to continue until 1806.

At the beginning of the 11th century the Normans began to enter southern Italy in great numbers, where they had originally been recruited to fight the Arabs. Establishing themselves in Apulia and Calabria, they assimilated much of the eastern culture, co-existing peacefully with the Arabs. The architecture of churches and cathedrals built during this period shows the merging of the two cultural and religious influences. Roger II of Sicily (reigned 1112–54), nephew of the adventurer Robert Guiscard, extended Norman Hauteville power over southern Italy and his navy was dominant in the Mediterranean. He presided over a famous court of scholars and artists, many from the Muslim world, making Palermo a model of tolerance and learning.

#### *North South Divide*

Meanwhile, the delicate relationship between the Holy Roman Empire based in the north of Europe and the Papacy in the south was maintained by a common desire to recapture the Holy Land from the Muslims. Crusades were launched, mostly from the northern states, but achieved little. Germanic claims to the southern territories grew and after Frederick I (known as Barbarossa) was crowned Holy Roman Emperor in 1155, he married off his son Henry to the heir to the Norman throne in Sicily. Frederick II, Barbarossa's grandson, came to the throne of Sicily as a child in 1197 and was crowned Holy Roman Emperor in 1220. An enlightened and tolerant ruler, he was known as '*Stupor Mundi*' ('Wonder of the World'). An accomplished warrior, he valued scholarship and the Arab culture and allowed Muslims and Jews freedom to follow their own religions. He founded the University of Naples in 1224 with the intention of producing a generation of administrators for his kingdom and moved the court of the Holy Roman Empire to the newly built octagonal masterpiece, Castel del Monte, in Apulia.

During this period a new middle class emerged; with the seat of government so far south, some of the northern cities began to free themselves from feudal control and set themselves up as autonomous states under the protection of either the pope or the emperor. Milan, Cremona, Bologna, Florence, Pavia, Modena, Parma and Lodi were the most important of these new states, each dominated by a powerful family, exercising governmental power in the form of *signorie*. These states functioned

autonomously within larger regional areas: Veneto, Lombardy, Tuscany, the Papal States and the Southern Kingdom. In 1265 Charles of Anjou (a Frenchman who had beheaded Frederick II's grandson) was crowned king of Sicily. Greatly increased taxes, especially on rich landowners, made him unpopular despite his programme of road building, reform of the monetary system, improvement of the ports and the opening of silver mines. In 1282 an uprising known as the Sicilian Vespers was sparked off by a French soldier assaulting a Sicilian woman. As a consequence of the opposition to the French in southern Italy, Palermo declared itself an independent republic while supporting the Spaniard Peter of Aragon as king. By 1302 the Anjou dynasty had established itself in Naples.

### Plague

The Black Death (La Peste), the deadly plague that swept throughout Europe towards the end of the 13th century, ravaged the populations of the major cities, which were already struggling with famine after years of war. Despite this, the strength of the northern and central Italian city-states was increasing. The rival maritime republics of Venice and Genoa had their own fleets. Venice had added the ports of Dalmatia, the Peloponnese and Cyprus to its possessions and Genoa's influence stretched as far as the Black Sea. Meanwhile, the pope and the Church turned their crusading zeal from the East towards European heretics. Pope Boniface, elected in 1294, came from Italian nobility and was determined to safeguard the interests of his own family. He claimed papal supremacy in worldly and spiritual affairs with his Papal Bull (*Unam Sanctam*) in 1302.

Meanwhile, a rival Papacy had appeared in Avignon, where John XXII was based. Rome had lost most of her former glory and had become little more than a battleground for the power struggles between the Orsini and Colonna families. The Papal claim to be temporal rulers of Rome was under threat and the Papal States began to fall apart. The period 1305–77, when seven successive popes ruled in Avignon, became known as the 'Babylonian Captivity'. In 1377 Pope Gregory XI returned to Rome after Cardinal Egidio d'Albornoz managed to restore the Papal States with his Egidian Constitutions. Rome was in such a ruined state that Gregory was obliged to set up his court in the Vatican, which was fortified and protected by the proximity of the Castel Sant'Angelo. Gregory died a year later and the Roman cardinals elected one of their own, Urban VI, as his successor. Urban's unpopularity was such that the French cardinals rebelled, electing their own pope, Clement VII, who set up his rival claim in Avignon. Yet another rival pope set himself in Pisa and thus began the Great Schism that would separate the papacy from Rome for nearly half a century.

### Renaissance

In 1418 the Great Schism was brought to an end by the Council of Constance and Rome began to recapture her previous glory. Italy was at the forefront of the Renaissance, a flowering of artistic and intellectual humanist expression in the city-states. After the Peace of Lodi in 1454, the powerful ruling families—among others the Medici in Florence, the Gonzaga in Mantua and the d'Este in Ferrara—were at leisure to sponsor the Renaissance and Rome became again the centre of Italian political, cultural and intellectual life. In Florence the Signoria was taken over by a wealthy merchant, Cosimo de Medici. His nephew, Lorenzo II Magnifico, became one of the great patrons of the arts. Feudal lords like Lorenzo de Medici frequently switched allegiance between the popes and the emperors, becoming wealthy bankers and captains of adventure in the process. Having defeated its arch-rival, Genoa, in 1381, Venice grew enormously, transforming its commercial maritime empire into a territorial empire that stretched almost to Milan.

The peace was shattered in 1494 by the invasion of Charles VIII, king of France. Encouraged to pursue his claim to the crown

of Naples by Ludovico Sforza, duke of Milan, Charles shocked the Italian cities into an alliance to expel his army. As cities competed to become the richest and most cultured, a Dominican monk, Girolamo Savonarola, preached against humanism in Florence. He persuaded Charles VIII to overthrow the Medici family and declare a Florentine republic. Although he was eventually excommunicated, hanged and burned at the stake, Savonarola exerted a lasting influence on Florentine politics. The Venetian expansion, through diplomatic and military guile, had alienated Venice's neighbours, who formed in 1508 the League of Cambrai, which came close to eradicating the Venetian Republic.

The appearance of Spanish power in Naples began the Habsburg-Valois wars that used Italy as a battlefield until the Peace of Cateau-Cambrésis in 1559. These Italian Wars radically altered the political landscape of the peninsula, leaving Spain dominant in Italy. Florence's time as a republic was brief. The Emperor Charles V, who had sacked Rome in 1527, reinstated the Medici, who went on to rule Florence for the next 210 years.

By the second half of the 16th century, the Church of Rome was obliged to respond to the rise of the Protestant movement (the Reformation), inspired in Germany by Martin Luther. During the Counter-Reformation, the Inquisition, backed by Catholic Spain, was used to suppress heresy. Spain succeeded in dominating Italy during the second half of the 16th century but when Charles II (the last of the Spanish Habsburgs) died in 1700, the War of the Spanish Succession saw Italy become a prize for the dominant European powers. Italy was divided amongst the Austrian Habsburgs, the Spanish Bourbons, Savoy and the independent states. The papacy became less influential, the Jesuits were expelled from Portugal, France and Spain and, thanks to intermarriage between many of the ruling houses of Europe and new trading laws, many national barriers were broken down. The 18th century Age of Enlightenment gave Italy some of its greatest thinkers and writers as well as liberal legal reforms.

### Unification

In 1796 Napoleon Bonaparte invaded Italy and declared an Italian Republic under his personal rule. In creating a single political entity, he laid the basis for modern Italy. The Congress of Vienna, which met after the defeat of Napoleon in 1815, reinstated Italy's former rulers. Secret societies, made up of disillusioned middle class intellectuals, fought for a new constitution to reunify the country. One such was founded in 1830 by a Genoan, Giuseppe Mazzini. His 'Young Italy' was committed to liberating the country from foreign dominance and to establishing a unified state under a republican government, a campaign that came to be known as *Il Risorgimento*. During the 1830s and 1840s Mazzini instigated a series of unsuccessful uprisings until he was exiled. By 1848 revolutionary uprisings were taking place all over Europe and the Italian Nationalist movement was gaining ground. Two supporters of the Nationalist cause, Cesare Balbo and Count Camillo Benso di Cavour, advocated an Italian constitution and a bicameral legislature.

As nationalist feeling increased, Giuseppe Garibaldi, whose terrorist activities for Young Italy had obliged him to flee to South America, returned to Italy and allied himself with the Italian National Society. Cavour, the prime minister of Sardinia-Piedmont, attempted to remove Austria from Italy with French help but it was not until Garibaldi and 1,000 volunteers (the Red Shirts) took Sicily and Naples from the Bourbons in 1860 that unification became a real possibility. Garibaldi handed over these kingdoms to Victor Emmanuel II, king of Sardinia-Piedmont. This was to the relief of Cavour, who had feared that Garibaldi might institute a rival republican government in the south. Although Italy was declared a kingdom in 1861 under Victor Emmanuel II, the country was still not unified. Venice was in the hands of the Austrians while France held Rome. In 1866 the Italians took the Veneto from the Prussians and in 1870 Rome was recaptured from the French. Only the Papal troops resisted

the advance of the Italian army in 1870 and Pope Pius IX refused to recognize the Kingdom of Italy. In retaliation, the government stripped the pope of his temporal powers. Thus Italy was fully unified.

### *Twentieth Century*

The turn of the 20th century saw popular support fluctuate between left-wing socialist and right-wing imperialist political parties. When the First World War broke out in 1914, Italy remained neutral although the State was associated with the British, French and Russian allies while the Papacy declared for Catholic Austria. In 1919 Benito Mussolini founded the Italian Fascist Party, whose black shirts and Roman salutes were to become the symbols of aggressive nationalism in Italy for the next two decades. In the elections of 1921 the Fascist Party won 35 of the 135 seats in the Italian parliament. A year later, Mussolini raised a militia of 40,000 'Black Shirts' and marched on Rome to 'liberate' it from the socialists. In 1922 the king asked Mussolini to form a government. His Fascist party won the elections of 1924 and Mussolini assumed the title *Il Duce*. By the end of 1925 Mussolini had expelled all opposition parties from parliament and gained control of the trade unions. Four years later, he signed a pact with Pope Pius XI declaring Catholicism the sole religion of Italy and recognizing the Vatican as an independent state. In return, the pope finally recognized the United Kingdom of Italy.

Mussolini's aggressive foreign policy resulted in disputes with Greece over Corfu and military campaigns in the Italian colony of Libya. In 1935 Italy invaded Abyssinia (now Ethiopia) and captured Addis Ababa. The newly formed League of Nations condemned this action and imposed sanctions. In the face of international isolation, Mussolini formed an alliance with the German dictator, Adolf Hitler, and in 1936 the Rome-Berlin Axis was formed. Having annexed Albania in April 1939, Italy entered the Second World War in June 1940. Mussolini's armies invaded Greece from Albania in Oct. 1940 but were repelled, forcing Hitler to invade Yugoslavia and Greece in April 1941. This diversion of German troops has been seen as a critical factor in the ultimate failure of the invasion of the USSR, delayed from May to June 1941. The Italian colonies of East Africa were lost in 1941 and Italian forces in North Africa surrendered in May 1943. The Allied armies landed in Sicily in July 1943 and, in the face of diminishing popular support for fascism and Hitler's refusal to assign more troops to the defence of Italy, the king led a coup against Mussolini and had him arrested. In the 45 days that followed, Italy exploded in a series of uprisings against the war. The king signed an armistice with the Allies and declared war on Germany but Nazi troops had already overrun northern Italy. The Germans rescued Mussolini from prison and installed him as a puppet ruler. In 1945 after trying to flee the country, Mussolini was recaptured by Italian partisans and shot. After the Italian Resistance suffered huge losses against the Germans, the allies liberated northern Italy in May 1945.

### *Post-War Period*

In the years following the end of the Second World War, Italy's political forces attempted to regroup. The Marshall Plan, America's post-war aid programme, exerted considerable political and economic influence. The constitutional monarchy was abolished in 1946 by referendum and a republic was formed with a president (elected for a seven-year term by an electoral college), a two-chamber parliament and a separate judiciary. Initially the newly formed Christian Democrats under Alcide De Gasperi were in power with both the Communist Party and the Socialist Party, participating in a series of coalition governments until they were both excluded by De Gasperi in 1947. More than 300 separate political factions have struggled for power throughout the post-war era and no government has lasted longer than four years. Despite this instability, the war-damaged Italian economy began to pick up in the early 1950s. The industrialized northern regions

thrived while the less industrialized south remained underdeveloped. The Cassa per il Mezzogiorno (a state fund for the South) was founded to try to redress the balance but with limited success.

In 1957 Italy became a founder member of the European Economic Community (EEC). The rapid growth of the motor industry, most notably Fiat in Turin, saw huge migrations of peasants from the south to work in the factories. By the mid-1960s the Communist Party, which had been gradually increasing its share of the poll at each election, had more card carrying members than the Christian Democrats but without participating in government. Social unrest was commonplace and in 1969 a series of strikes, demonstrations and riots followed on the heels of unrest elsewhere in Europe. Various terrorist groups were active including the extreme left-wing socialist group, the Red Brigade, founded in 1970. Right-wing neo-fascist terrorists were also in action, and in the less developed south, the Mafia, a loose coalition of crime 'families', flourished. Most of Italy's social, economic and political structures were manipulated by these unofficial organizations.

In 1963 Aldo Moro, a Christian Democrat, was appointed prime minister (a post he held until 1968) and invited the Socialists into his government. By the 1970s he was working towards a compromise to allow the Communists to enter government when he was captured, held hostage and finally murdered by the Red Brigade. This national outrage prompted the government to appoint Carabinieri Gen. Carlo Alberto dalla Chiesa to wipe out the terrorist groups. He instituted a system of *pentiti* (informants) who, in return for collaboration, would receive greatly reduced prison sentences. In 1980 he was asked to expand his area of operations to include the Mafia but was assassinated in Palermo a few months later. Throughout the 1970s Italy experienced radical social and political change. The country was divided into regional administrative areas with their own elected governments. Divorce became legal, women's rights were expanded (Italian women only achieved full suffrage after the Second World War) and abortion was legalized. In 1983 the minority Christian Democratic government handed the premiership to the Socialists under Bettino Craxi.

Italy was well on its way to becoming one of the world's leading economic powers but the 1990s brought fresh crises in the economic and political arenas. Unemployment and inflation rose sharply which, combined with a huge national debt and unstable lira, led to instability. On the political front, the Communist Party split with the hard-liners forming the Rifondazione Comunista, led by Fausto Bernotti, while the more moderate members set up the Democratic Party of the Left. In early 1992 the arrest of a Socialist Party worker on charges of accepting bribes in exchange for public works contracts sparked off Italy's largest ever political corruption scandal. Investigations into '*Tangentopoli*' ('kick-back city') implicated thousands of politicians, public officials and businessmen. Former Prime Minister Bettino Craxi was forced to resign as party secretary after he came under investigation for bribery. Allied to Italy's humiliating exit from Europe's Exchange Rate Mechanism (ERM), the old political establishment was driven out of office. In the April 1992 elections, the Christian Democrat share of the vote dropped by 5% while the Lega Nord (the Northern League), under Umberto Bossi, took 9% of the vote on an anti-corruption, federalist platform. Oscar Luigi Scalfaro was elected president on a promise to set about reforming electoral laws and clearing up the Tangentopoli scandal. Investigations into corruption continued, despite reprisals from the Mafia. Craxi was convicted *in absentia* while Giulio Andreotti, who was prime minister three times between 1972 and 1992, was brought to trial in 1995 on charges of dealing with the Sicilian Mafia.

In the 1994 elections a right-wing coalition was elected. The Freedom Alliance, including the neo-fascist National Alliance and the federalist Northern League, was led by Silvio Berlusconi, a

multi-millionaire media tycoon. Berlusconi lost his majority when the Northern League withdrew after nine months. Under mounting criticism for his failure to disassociate himself from his business interests and after receiving a vote of no confidence, Berlusconi resigned. After leaving the Freedom Alliance, the Northern League became more fanatical, advocating a 'Northern Republic of Padania', a separation of the rich northern regions from the poorer southern ones. The 1996 elections brought to power the centre-left 'Olive Tree' alliance with Romano Prodi as prime minister. Prodi aimed to balance the budget and create a stable political environment. He gained his first objective with a succession of economic measures that prepared the way for Italy's entry into EMU.

Prodi was succeeded by Massimo D'Alema in 1998 who, in turn, was replaced by Giuliano Amato in 2000. By the time of the 2001 elections Berlusconi's popularity had revived and he formed a new centre-right coalition. He introduced the first major constitutional reforms in 55 years, allowing the nation's 20 regions increased responsibility for their own tax, education and environmental programmes.

Berlusconi's tenure was dogged by questions over his private business interests. In Oct. 2002 parliament passed new criminal reform legislation that critics claimed was partly designed to allow Berlusconi to escape charges of corruption. He nonetheless stood trial in May 2003 on corruption charges related to his business dealings in the 1980s but the trial was halted the following month when the new law granted the prime minister immunity from prosecution. The legislation was declared void by the constitutional court in Jan. 2004 and his trial resumed three months later, culminating in his acquittal in Dec. 2004.

The proposed EU constitution was approved by parliament in April 2005, shortly before Berlusconi's government collapsed after a poor showing in regional elections. He was then asked by the president to form a new government but was beaten by Prodi in the general election of April 2006. The following month Giorgio Napolitano was elected president. Prodi resigned in Feb. 2007 when his foreign policy failed to gain Senate backing but resumed his premiership after winning confidence votes in both the upper and lower houses.

In early 2008 Prodi's coalition split when a minor partner withdrew its support. Despite surviving a vote of no confidence in the lower house, Prodi lost a similar vote in the Senate. Parliament was dissolved in Feb. 2008 and Prodi was asked to remain as caretaker prime minister ahead of a general election in April 2008, in which Silvio Berlusconi was returned to power.

The economy was in a parlous state as the global financial crisis deepened. Berlusconi responded by imposing austerity measures but faced several votes of confidence as the economy continued to falter and revelations emerged about the prime minister's private life. With the IMF warning that the country needed to reduce its public debt, Berlusconi resigned the premiership in Nov. 2011 following an impasse in parliament over a new austerity package. He was replaced by Mario Monti, a technocrat charged with restoring economic stability.

## TERRITORY AND POPULATION

Italy is bounded in the north by Switzerland and Austria, east by Slovenia and the Adriatic Sea, southeast by the Ionian Sea, south by the Mediterranean Sea, southwest by the Tyrrhenian Sea and Ligurian Sea and west by France.

The area is 301,338 sq. km. Populations at successive censuses (in 1,000) were as follows:

10 Feb. 1901	33,778	15 Oct. 1961	50,624
10 June 1911	36,921	24 Oct. 1971	54,137
1 Dec. 1921	37,856	25 Oct. 1981	56,557
21 April 1931	41,043	20 Oct. 1991	56,778
21 April 1936	42,399	21 Oct. 2001	56,996
4 Nov. 1951	47,516		

Population estimate, 31 Dec. 2009, 60,340,328 (31,052,925 females). Density: 200 per sq. km.

The UN gives a projected population for 2015 of 61.24m.

In 2005, 67.6% of the population lived in urban areas.

The following table gives area and population of the Autonomous Regions (censuses 1991 and 2001):

Regions	Area in sq. km	Resident pop. census, 1991	Resident pop. census, 2001	Density per sq. km, 2001
Piedmont (Piemonte)	25,399	4,302,565	4,214,677	166
Valle d'Aosta <sup>1</sup>	3,263	115,938	119,548	37
Lombardy (Lombardia)	23,861	8,856,074	9,032,554	379
Trentino-Alto Adige <sup>1</sup>	13,607	890,360	940,016	69
Bolzano-Bozen	7,400	440,508	462,999	63
Trento	6,207	449,852	477,017	77
Veneto	18,392	4,380,797	4,527,694	246
Friuli-Venezia Giulia <sup>1</sup>	7,855	1,197,666	1,183,764	151
Liguria	5,421	1,676,282	1,571,783	290
Emilia Romagna	22,124	3,909,512	3,983,346	180
Tuscany (Toscana)	22,997	3,529,946	3,497,806	152
Umbria	8,456	811,831	825,826	98
Marche	9,694	1,429,205	1,470,581	152
Lazio	17,207	5,140,371	5,112,413	297
Abruzzi	10,798	1,249,054	1,262,392	117
Molise	4,438	330,900	320,601	72
Campania	13,595	5,630,280	5,701,931	419
Puglia	19,362	4,031,885	4,020,707	208
Basilicata	9,992	610,528	597,768	60
Calabria	15,080	2,070,203	2,011,466	133
Sicily (Sicilia) <sup>1</sup>	25,708	4,966,386	4,968,991	193
Sardinia (Sardegna) <sup>1</sup>	24,090	1,648,248	1,631,880	68

<sup>1</sup>With special statute.

Communes of more than 100,000 inhabitants, with population resident at the census of 21 Oct. 2001:

Rome (Roma)	2,546,804	Parma	163,457
Milan (Milano)	1,256,211	Livorno	156,274
Naples (Napoli)	1,004,500	Foggia	155,203
Turin (Torino)	865,263	Perugia	149,125
Palermo	686,722	Reggio nell'Emilia	141,877
Genoa (Genova)	610,307	Salerno	138,188
Bologna	371,217	Ravenna	134,631
Florence (Firenze)	356,118	Ferrara	130,992
Bari	316,532	Rimini	128,656
Catania	313,110	Syracuse (Siracusa)	123,657
Venice (Venezia)	271,073	Sassari	120,729
Verona	253,208	Monza	120,204
Messina	252,026	Pescara	116,286
Trieste	211,184	Bergamo	113,143
Padua (Padova)	204,870	Forli	108,335
Taranto	202,033	Latina	107,898
Brescia	187,567	Vicenza	107,223
Reggio di Calabria	180,353	Terni	105,018
Modena	175,502	Trento	104,946
Prato	172,499	Novara	100,910
Cagliari	164,249	Ancona	100,507

The official language is Italian, spoken by 92.8% of the population in 2003. Romanians, numbering 997,000 in Dec. 2010, make up the largest ethnic minority group. In Jan. 2010, 7.0% of the population was foreign-born.

In addition to Sicily and Sardinia, there are a number of other Italian islands, the largest being Elba (363 sq. km), and the most distant Lampedusa, which is 205 km from Sicily but only 113 km from Tunisia.

## SOCIAL STATISTICS

Vital statistics (and rates per 1,000 population), 2008: births, 576,659 (9.6); deaths, 585,126 (9.8). Marriages in 2007, 250,360 (4.2); divorces in 2006, 49,534 (0.8). Infant mortality rate, 2005 (up to one year of age): 4 per 1,000 live births. Expectation of life, 2007: females, 84.0 years; males, 78.1. In 2005, 19.7% of the population was over 65—one of the highest percentages in the world.

Annual population growth rate, 2000–05, 0.6%; fertility rate, 2008, 1.4 births per woman. With only 17.7% of births being to unmarried mothers in 2007 (albeit up from 8.1% in 1995), Italy has one of the lowest rates of births out of marriage in Europe.

In 2006 there were 3,701 suicides; 76.8% were men.

At 1 Jan. 2007 there were 2,938,922 foreigners living in Italy, up from 2,670,514 a year earlier. In 2005, 53,931 people emigrated from Italy and there were 304,960 immigrants into the country (compared to 440,301 immigrants in 2003). Since 1992 Italy has experienced net immigration every year, peaking in 2003, although for most of the 20th century up until the mid-1960s it saw mass emigration. Italy received 30,324 asylum applications in 2008, up from 14,053 in 2007. New legislation was introduced in 2002 to tighten up immigration rules.

### CLIMATE

The climate varies considerably with latitude. In the south, it is warm temperate, with little rain in the summer months, but the north is cool temperate with rainfall more evenly distributed over the year. Florence, Jan. 47.7°F (8.7°C), July 79.5°F (26.4°C). Annual rainfall 33" (842 mm). Milan, Jan. 38.7°F (3.7°C), July 73.4°F (23.0°C). Annual rainfall 38" (984 mm). Naples, Jan. 50.2°F (10.1°C), July 77.4°F (25.2°C). Annual rainfall 36" (935 mm). Palermo, Jan. 52.5°F (11.4°C), July 78.4°F (25.8°C). Annual rainfall 35" (897 mm). Rome, Jan. 53.4°F (11.9°C), July 76.3°F (24.6°C). Annual rainfall 31" (793 mm). Venice, Jan. 43.3°F (6.3°C), July 70.9°F (21.6°C). Annual rainfall 32" (830 mm).

### CONSTITUTION AND GOVERNMENT

The Constitution dates from 1948. Italy is 'a democratic republic founded on work'. Parliament consists of the *Chamber of Deputies* and the *Senate*. The Chamber is elected for five years by universal and direct suffrage and consists of 630 deputies. The Senate is elected for five years on a regional basis by electors over the age of 25, each Region having at least seven senators. The total number of senators is 322, of which 315 are directly elected. The Valle d'Aosta is represented by one senator only, the Molise by two. The President of the Republic can nominate 11 senators for life from eminent persons in the social, scientific, artistic and literary spheres. The President may become a senator for life. The *President* is elected in a joint session of Chamber and Senate, to which are added three delegates from each Regional Council (one from the Valle d'Aosta). A two-thirds majority is required for the election, but after a third indecisive scrutiny the absolute majority of votes is sufficient. The President must be 50 years or over; term of office, seven years. The Speaker of the Senate acts as the deputy President. The President can dissolve the chambers of parliament, except during the last six months of the presidential term. An attempt to create a new constitution, which had been under consideration for 18 months, collapsed in June 1998.

There is a *Constitutional Court* that consists of 15 appointed judges, five each by the President, Parliament (in joint session) and the highest law and administrative courts. The Court can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President and Ministers.

The revival of the Fascist Party is forbidden. Direct male descendants of King Victor Emmanuel are excluded from all public offices and have no right to vote or to be elected; their estates are forfeit to the State. For 56 years they were also banned from Italian territory until the constitution was changed in 2002 to allow them to return from exile. Titles of nobility are no longer recognized, but those existing before 28 Oct. 1922 are retained as part of the name.

A referendum was held in June 1991 to decide whether the system of preferential voting by indicating four candidates by their listed number should be changed to a simpler system, less open to abuse, of indicating a single candidate by name. The

electorate was 46m. Turnout was 62.5% (there was a 50% quorum). 95.6% of votes cast were in favour of the change. As a result, an electoral reform of 1993 provides for the replacement of proportional representation by a system in which 475 seats in the Chamber of Deputies are elected by a first-past-the-post single-round vote and 155 seats by proportional representation in a separate single-round vote on the same day. There are 27 electoral regions. There is a 4% threshold for entry to the Chamber of Deputies.

At a further referendum in April 1993, turnout was 77%. Voters favoured the eight reforms proposed, including a new system of election to the Senate and the abolition of some ministries. 75% of the Senate is now elected by a first-past-the-post system, the remainder by proportional representation; no party may present more than one candidate in each constituency. Subsequent proposed constitutional reforms included a directly elected president with responsibility for defence and foreign policy, a reduction in the number of seats in the Senate and in the lower house and the creation of a third chamber to speak on behalf of the regions. Greater powers over tourism, transport and welfare policy have been devolved to the regions.

### National Anthem

'Fratelli d'Italia' ('Brothers of Italy'); words by G. Mameli, tune by M. Novaro, 1847.

### GOVERNMENT CHRONOLOGY

Presidents of the Council of Ministers (Prime Ministers) since 1944. (DC = Christian Democrats; DS = Democrats of the Left-Party of the European Socialism; FI = Forza Italia; PA = Action Party; PdL = People of Freedom; PRI = Italian Republican Party; PSI = Italian Socialist Party; Ulivo = Olive Tree; n/p = non-partisan)

1944–45	n/p	Ivanoe Bonomi
1945	PA	Ferruccio Parri
1945–53	DC	Alcide De Gasperi
1953–54	DC	Giuseppe Pella
1954	DC	Amintore Fanfani
1954–55	DC	Mario Scelba
1955–57	DC	Antonio Segni
1957–58	DC	Adone Zoli
1958–59	DC	Amintore Fanfani
1959–60	DC	Antonio Segni
1960	DC	Fernando Tambroni
1960–63	DC	Amintore Fanfani
1963	DC	Giovanni Leone
1963–68	DC	Aldo Moro
1968	DC	Giovanni Leone
1968–70	DC	Mariano Rumor
1970–72	DC	Emilio Colombo
1972–73	DC	Giulio Andreotti
1973–74	DC	Mariano Rumor
1974–76	DC	Aldo Moro
1976–79	DC	Giulio Andreotti
1979–80	DC	Francesco Cossiga
1980–81	DC	Arnaldo Forlani
1981–82	PRI	Giovanni Spadolini
1982–83	DC	Amintore Fanfani
1983–87	PSI	Benedettino Craxi
1987	DC	Amintore Fanfani
1987–88	DC	Giovanni Giuseppe Gorla
1988–89	DC	Ciriaco De Mita

2011–	n/p	Mario Monti

## RECENT ELECTIONS

Parliamentary elections were held on 13–14 April 2008 following the dissolution of Romano Prodi's government. The centre-right coalition led by Silvio Berlusconi (comprised of the newly created People of Freedom party, the Northern League and the Movement for Autonomy) won 344 seats in the Chamber of Deputies and 174 in the Senate, against Walter Veltroni's centre-left alliance (comprised of the Democratic Party and the Italy of Values Party) with 246 and 132 seats respectively. Turnout was 80.5%.

Giorgio Napolitano was elected president on 10 May 2006 by 1,009 legislators and regional representatives. He received 543 votes in the fourth round of voting after three rounds on 8 and 9 May had failed to produce a clear result.

### European Parliament

Italy has 72 (78 in 2004) representatives. At the June 2009 elections turnout was 65.1% (71.7% in 2004). People of Freedom won 29 seats with 35.3% of votes cast (political affiliation in European Parliament: European People's Party); Democratic Party, 21 with 26.1% (Progressive Alliance of Socialists and Democrats); the Northern League, 9 with 10.2% (Europe of Freedom and Democracy); Italy of Values, 7 with 8.0% (Alliance of Liberals and Democrats for Europe); the Union of Christian and Centre Democrats, 5 with 6.5% (European People's Party); South Tyrolean People's Party, 1 with 0.5% (European People's Party).

## CURRENT GOVERNMENT

*President:* Giorgio Napolitano; b. 1925 (sworn in 15 May 2006).

In March 2012 the government comprised:

*President of the Council of Ministers (Prime Minister) and Minister of Economy and Finance:* Mario Monti; b. 1943 (ind.; sworn in 16 Nov. 2011).

*Undersecretary to the Presidency of the Council:* Antonio Catricalà.

*Minister of the Interior:* Anna Maria Cancellieri. *Foreign Affairs:* Giulio Terzi Sant'Agata. *Defence:* Giampaolo Di Paola. *Justice:* Paola Severino. *Economic Development, Infrastructure and Transport:* Corrado Passera. *Agriculture, Food and Forestry:* Mario Catania. *Education, University and Research:* Francesco Profumo. *Labour and Equal Opportunities:* Esla Fornero. *Environment:* Corrado Clini. *Cultural Heritage and Activities:* Lorenzo Ornaghi. *Health:* Renato Balduzzi. *Ministers without Portfolio:* Enzo Moavero Milanesi; Piero Giarda; Fabrizio Barca; Andrea Riccardi; Piero Gnudi.

*Government Website (Italian only):* <http://www.governo.it>

## CURRENT LEADERS

### Mario Monti

#### Position

Prime Minister

#### Introduction

Mario Monti became prime minister on 12 Nov. 2011 when he was invited by President Giorgio Napolitano to form a government following Silvio Berlusconi's resignation. Monti, an economist, aims to reduce public debt and restore economic growth before elections scheduled for 2013.

#### Early Life

Mario Monti was born in Varese, Lombardy on 19 March 1943. He graduated in economics from Bocconi University, Milan in 1965 before undertaking post-graduate studies at Yale University

in the USA. He took up a teaching post at the University of Turin in 1970 and returned to Bocconi University in 1985, serving as rector from 1989–94. In 1994 he was appointed university president, a post he has held ever since.

That same year Monti was appointed to the Jacques Santer-led European Commission by the first Silvio Berlusconi cabinet. He worked in the office for the internal market and services and was nominated for a second term by Massimo D'Alema in 1999, with Monti becoming commissioner for competition. In this role he blocked a proposed merger between General Electric and Honeywell, battled Germany's powerful regional banks and launched an anti-trust case against Microsoft. He also oversaw reforms to the EU's anti-trust regulations and worked with the US authorities to create the International Competition Network. However, in 2004 the new Berlusconi administration refused to support Monti's seat on the Commission for a third term.

In 2005, shortly after leaving the Commission, Monti co-founded Bruegel, a Brussels-based think tank focusing on economic issues. He became a member of the Bilderberg Group and an international adviser to Goldman Sachs and Coca-Cola. From 2007–08 he was appointed by President Nicolas Sarkozy to the French government's Attali Commission, set up to stimulate economic growth.

Monti was key to brokering an electricity-sharing agreement between France and Spain in 2008 and in 2010 he was asked by the president of the EU Commission, Manuel Barroso, to draft proposals for the future of the EU's single market. The completed report made 12 recommendations intended to bring new stimulus to the European economy and was adopted by the EU on 13 April 2011.

On 9 Nov. 2011 Monti was made 'senator for life' by Napolitano against the backdrop of uncertainty over the future of the Berlusconi government. The appointment raised speculation that Napolitano was grooming Monti to succeed Berlusconi. Monti was formally asked to form a new government on 12 Nov. 2011 and was sworn into office four days later. His initial cabinet consisted mainly of former bankers and technocrats, with Monti himself heading the ministry of economy and finance.

### Career in Office

On 4 Dec. 2011 Monti introduced a €30bn. austerity package aimed at cutting spending, raising taxes and reforming pensions. Although challenged by the unions and the opposition, the package was approved by the lower house of parliament on 16 Dec. 2011 by 495 to 88 votes and by the upper house on 22 Dec. 2011 by 257 to 41 votes. The reforms were welcomed by the EU.

On 20 Jan. 2012 Monti's government introduced a second wave of measures to boost growth, including legislation to end restrictive practices and open up competition in various sectors of the economy. Within four months of taking office, Monti had overseen a fall in Italy's 10-year borrowing rate from 7% to 6%.

## DEFENCE

Head of the armed forces is the Defence Chief of Staff. Conscription was abolished at the end of 2004 with the military becoming all-professional from 2005. In Aug. 1998 the government voted to allow women into the armed forces.

In 2008 defence expenditure totalled US\$40.6bn. (US\$689 per capita). In 2007 defence spending represented 1.8% of GDP.

### Army

Strength (2006) 110,000 (about 2,000 conscripts). Equipment includes 120 *Leopard*, 300 *Centaurio* and 200 *Ariete* tanks. There are 35,500 Army reserves.

The paramilitary Carabinieri (police force with military status) number 111,400.

### Navy

The principal ships of the Navy are the aircraft carriers *Giuseppe Garibaldi* and *Cavour*, commissioned in 1985 and 2008

respectively. The combatant forces also include six diesel submarines, five destroyers and 12 frigates. The Naval Air Arm, 2,000 strong, operates 15 combat aircraft and 63 armed helicopters.

Main naval bases are at La Spezia, Brindisi, Taranto and Augusta. The personnel of the Navy numbered 33,100 in 2006. There were 21,000 naval reservists.

#### Air Force

Control is exercised through two regional headquarters near Taranto and Milan.

Air Force strength in 2006 was about 44,000 (1,200 conscripts). There were 234 combat aircraft in operation in 2006 including Typhoons and Tornados.

#### ECONOMY

Agriculture accounted for 2% of GDP, industry 28% and services 70% in 2007.

Italy's 'shadow' (black market) economy is estimated to constitute approximately 27% of the country's official GDP.

In 2009 Italy gave US\$3.3bn. in international aid. In terms of a percentage of GNI, however, Italy was one of the least generous major industrialized countries, giving just 0.16%.

According to the anti-corruption organization *Transparency International*, Italy ranked equal 69th in the world in a 2011 survey of the countries with the least corruption in business and government, down from 29th in 2001. It received 3.9 out of 10 in the annual index in the 2011 survey, down from 5.5 in 2001.

#### Overview

Italy has a diversified industrial base with average income levels on a par with those of other leading economies. The economic structure is in line with the OECD average, with a small and diminishing primary sector and a large gross value added contribution from the service sector. Manufacturing is also a key sector. However, since 1988 economic performance has trailed that of other developed countries. Growth averaged only 1.5% per year in the decade leading up to the 2008 financial crisis, with Italy losing significant market share in world trade since the mid-1990s. This has resulted from specialization in slow-growing sectors of world demand, comparatively weak FDI and low investment in research and development.

Small and medium-sized family-owned companies are the strongest component of the economy, producing high-quality consumer goods such as clothing, furniture and white goods. These companies have resisted public funding but face pressure from global economic integration and competition and are vulnerable to acquisition by foreign firms. A few large companies play an important role in the economy, including Fiat, Pirelli, Telecom Italia and Mediaset. The northeast is Italy's most dynamic region and where most value added production is concentrated. Despite progress in the Mezzogiorno (the south and Sicily and Sardinia), the economic gap between north and south remains.

Economic growth was 2.2% in 2006 following years of stagnant performance. But with the global financial crisis there was negative growth in both 2008 and 2009, leading to the worst recession in Italy since the Second World War. The economy contracted by 5.1% in 2009, with particularly weak levels of fixed investment, net exports and private consumption. In 2009 exports declined for the first time since 2000, falling by 25%. The financial sector, however, proved resilient. Growth returned in the third quarter of 2009.

Prior to the economic crisis that began in 2008 there had been a fall in unemployment. However, in Jan. 2012 unemployment levels reached an eight-year high of 9.2% (though still below the eurozone average of 10.7%). Public debt fell from over 120% in the mid-1990s to just over 115% prior to the financial crisis but in 2011 once again broke through 120%, its highest level since 1996.

The fiscal deficit exceeded the 3% eurozone limit in 2006 but was reduced to 1.6% of GDP in 2007 although, against the backdrop of the financial crisis, cyclically weak revenues resulted in the deficit exceeding 5% of GDP in 2009, before improving to 3.9% in 2011.

In July 2011 the government announced a €40bn. austerity package with the aim of balancing the budget by the end of 2013. However, the measures failed to reassure the financial markets and resulted in the price of Italian bond yields soaring. This prompted the European Central Bank to intervene, purchasing Italian bonds to prevent spiralling borrowing costs. A second emergency budget was passed in Sept. 2011, worth €45.5bn. Measures included a 1% VAT rise to 21% and an increase in the retirement age for women in the private sector from 2014.

The economy fell back into recession in the third quarter of 2011. In Nov. 2011 unsustainable levels of borrowing prompted fears of an Italian default. A new government under Mario Monti initiated an austerity plan in Dec. 2011 with fiscal adjustments of US\$40bn. over three years, including tax increases and pension reforms. The plan saw Italy's ten-year borrowing rate reduce from 7%, where it had stood for most of 2011, to close to 6% in early 2012. Nonetheless, Standard & Poor's downgraded Italy's credit rating in Jan. 2012 to BBB+ and downgraded 34 Italian banks the following month, predicting weak profitability for Italian banks over the coming years.

With low birth rates and a high and rising ratio of people over 65, Italy faces one of the greatest challenges from population ageing of any OECD country. Pension spending rose by 3% in 2009, with almost a quarter of citizens receiving either retirement or disability support. The IMF predicts that population ageing will increase annual pension spending by approximately 2% of GDP over the coming years and annual health spending by 3% per year.

For further developments see [www.statesmansyearbook.com](http://www.statesmansyearbook.com).

#### Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Italy at the irrevocable conversion rate of 1,936.27 lire to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the lira ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €97.4bn.

Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.8%	2.5%	2.7%	2.2%	2.0%	2.1%	1.8%	3.3%	0.8%	1.5%

In Sept. 2009 gold reserves were 78.83m. troy oz and foreign exchange reserves US\$35,474m. Total money supply in Aug. 2009 was €711,993m.

#### Budget

In 2009 central government revenues totalled €594.01bn. (€591.10bn. in 2008) and expenditures €668.64bn. (€630.36bn. in 2008). Principal sources of revenue in 2009: social security contributions, €210.79bn.; taxes on income, profits and capital gains, €191.44bn.; taxes on goods and services, €118.29bn. Main items of expenditure by economic type in 2009: social benefits, €289.25bn.; grants, €139.05bn.; compensation of employees, €99.86bn.

Italy's budget deficit in 2010 was 4.6% of GDP (2009, 5.4%; 2008, 2.7%). The required target set by the EU is a budget deficit of no more than 3%.

VAT was increased from 20% to 21% in Sept. 2011. The reduced rates were kept at 10% and 4%.

The public debt at 31 Dec. 2006 totalled €1,256,946m.

## Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
1.9%	0.5%	0.0%	1.7%	0.9%	2.2%	1.7%	-1.2%	-5.1%	1.5%

According to the National Institute of Statistics, the real GDP growth rate was 0.4% in 2011. Italy's average economic growth rate since 1998 has been the slowest in the EU. Total GDP was US\$2,051.4bn. in 2010.

## Banking and Finance

The bank of issue is the Bank of Italy (founded 1893). It is owned by public-sector banks. Its *Governor* (Ignazio Visco) is nominated by the government for a six-year term, renewable once. In 1991 it received increased responsibility for the supervision of banking and stock exchange affairs, and in 1993 greater independence from the government.

The number of banks has gradually been declining in recent years, from 1,176 in 1990 to 807 (32,818 branches) in 2007. Of these, 439 were mutual banks and 39 were co-operative banks. Italy's largest bank in terms of assets is UniCredit (until May 2008 known as UniCredito Italiano). In June 2005 UniCredito Italiano finalized an agreement to acquire Germany's HypoVereinsbank in Europe's biggest cross-border banking takeover. In 2006 it had Italian assets of €282bn. (€752bn. including assets from its German and eastern European operations). In Aug. 2006 Italy's second and third largest banks, Banca Intesa and Sanpaolo IMI, agreed to merge. The merger was approved in Dec. 2006, creating the largest Italian bank, Intesa Sanpaolo, with assets of €541bn.

The 'Amato' law of July 1990 gave public sector banks the right to become joint stock companies and permitted the placing of up to 49% of their equity with private shareholders. In 1999 the last state-controlled bank was sold off.

On 31 Dec. 2005 banks had total deposits of €690,746m.

Italy attracted US\$9.5bn. worth of foreign direct investment in 2010, down from US\$20.1bn. in 2009 and the record US\$40.2bn. of 2007.

Legislation reforming stock markets came into effect in Dec. 1990. In 1996 local stock exchanges, relics of pre-unification Italy, were closed, and stock exchange activities concentrated in Milan.

## ENERGY AND NATURAL RESOURCES

In 2008, 6.8% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 17% has been set by the EU for 2020.

## Environment

Italy's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 7.8 tonnes per capita.

## Electricity

In 2005 installed capacity was 88,345 MW and the total power generated was 309.0bn. kWh (13.9% hydro-electric). Consumption in 2005 was 309.8bn. kWh, of which: industry, 153.7bn. kWh; services, 83.8bn. kWh; domestic use, 66.9bn. kWh; agriculture, 5.4bn. kWh. Consumption per capita was 5,273 kWh in 2005. Italy has four nuclear reactors in permanent shutdown, the last having closed in 1990.

## Oil and Gas

Oil production, 2008, 5.2m. tonnes. Proven oil reserves in 2008 were 0.8bn. bbls. In 2008 natural gas production was 8.4bn. cu. metres with proven reserves of 120bn. cu. metres.

## Minerals

Fuel and mineral resources fail to meet needs. Only sulphur and mercury yield a substantial surplus for exports.

Production of metals and minerals (in tonnes) was as follows:

	1998	1999	2000	2001	2002
Sulphur	3,413,522	3,338,162	3,339,761	—	—
Feldspar	2,503,541	2,493,846	2,851,289	3,240,457	3,159,569
Bentonite	580,209	562,674	636,589	579,029	463,231
Lead	10,102	9,734	5,961	4,016	4,709
Zinc	5,242	—	—	—	—

## Agriculture

In 2000, 1,120,000 persons were employed in agriculture, of whom 451,000 were dependent (148,000 female); independently employed were 669,000 (203,000 female). At the fifth agricultural census, held on 22 Oct. 2000, there were 13,212,652 sq. km of agricultural and forest lands, distributed as follows (in 1,000 ha.): woods, 4,711; cereals, 4,052; forage and pasture, 3,414; olive trees, 1,081; vines, 676; leguminous plants, 66. In 2002 there were 8.29m. ha. of arable land and 2.78m. ha. of permanent crops. In 2003 organic crops were grown in an area covering 1.17m. ha. (the third largest area after Australia and Argentina), representing 8.0% of all farmland.

At the 2000 census agricultural holdings numbered 2,593,090 and covered 19,607,094 ha. 2,457,960 owners (95.7%) farmed directly 13,868,478 ha. (70.3%); 132,935 owners (3.9%) worked with hired labour on 5,706,993 ha. (29.1%); the remaining 2,195 holdings (0.4%) of 31,623 ha. (0.6%) were operated in other ways. 97,307 share-croppers tilled 1,445,826 ha. Only 13,212,652 sq. km was in active agricultural use.

Agriculture and fishing accounted for 1.5% of exports and 3.4% of imports in 2001.

In 2005, 3,069,599 tractors were in use and 27,445 harvester-threshers.

Output of principal crops (in 1,000 tonnes) in 2005: sugar beets, 14,156; maize, 10,428; wheat, 7,717; grapes, 6,892; tomatoes, 6,640; olives, 3,775; oranges, 2,261; apples, 2,192; potatoes, 1,756; peaches and nectarines, 1,693; rice, 1,445; barley, 1,214.

Wine production in 2008 totalled 51,500,000 hectolitres (18.1% of the world total) making Italy the world's largest wine producer. Wine consumption has declined considerably in recent times, from more than 110 litres per person in 1966 to 50.1 litres per person in 2008.

Livestock, 2005: cattle, 6,251,925; sheep and goats, 8,900,062; pigs, 9,200,270; horses, 278,471; buffaloes, 205,093; chickens, 90,387,988. Livestock products, 2003 (in 1,000 tonnes): cow's milk, 11,000; sheep's milk, 790; buffalo's milk, 140; goat's milk, 112; pork, bacon and ham, 1,587; poultry meat, 1,156; beef and veal, 1,125; cheese, 1,099; butter, 130; eggs, 672. Italy is the second largest producer of sheep's milk, after China.

## Forestry

In 2005 forests covered 9.98m. ha. or 33.9% of the total land area. Timber production was 8.12m. cu. metres in 2007.

## Fisheries

In 2008 the fishing fleet comprised 13,683 vessels of 196,313 GT. The catch in 2005 was 298,373 tonnes, of which more than 98% were from marine waters. Imports of fishery commodities were valued at US\$5,453m. in 2008 and exports at US\$793m.

## INDUSTRY

The leading companies by market capitalization in Italy in March 2011 were: Eni, an integrated oil company (US\$98.5bn.); Enel, an electricity and gas company (US\$59.4bn.); and UniCredit, a banking organization (US\$47.8bn.).

In 2007 industry accounted for 28% of GDP, with manufacturing contributing 18%.

Industrial products (in tonnes): cement (2008), 43.0m.; distillate fuel oil (including San Marino; 2007), 41.1m.; crude steel (2007), 32.0m.; petrol (including San Marino; 2007), 21.4m.; residual fuel oil (including San Marino; 2007), 17.4m.; pig iron (2006), 11.5m.; lime (2005), 5.9m.; polyethylene (2004), 1.4m.

Motor vehicle production in 2009 totalled 843,239 units (661,100 cars). In 2007, 1.34m. fridge-freezers and 9.83m. washing and drying machines were produced. Italy was the leading mineral water producer in 2004, with 13,117.4m. litres. In 2004, 3,766.3m. litres of soft drinks and 1,369.2m. litres of beer were produced.

### Labour

In 2003 the workforce was 24,150,000 (69.3% males and 42.7% females) of whom 21,829,000 were employed. 2,096,000 were unemployed and looking for work. Until the summer of 2007 the unemployment rate had been declining steadily for some years; it was 7.7% in 2005, 6.8% in 2006 and 6.1% in 2007 as a whole, down from 10.8% in 2000. However, it rose to 6.8% in 2008 and climbed steadily throughout 2009 to reach 8.5% in Dec. Unemployment stood at 8.9% in Dec. 2011. In 2002, 63.2% of the workforce were in services, 31.8% in industry and 5.0% in agriculture. There are strong indications of labour markets having become less rigid, especially in the north. In the northeast unemployment was 3.3% in 2003, in the northwest 4.4% and in the centre 6.6%; in the south it was 18.3%. In 2006 the difference in the unemployment rates in the north and in the south was more than 8%, compared to a difference of just 2% in the 1960s. Long-term unemployment is particularly high, with 48.5% of the labour force in 2010 having been out of work for more than a year. Pensionable retirement age rose from 57 to 58 in 2008, and is set to rise to 66 by 2018 and 67 in 2022.

In 1997 parliament approved the so-called 'Treu Package', which involves a large number of institutional changes regarding working hours and apprenticeships, mainly for young people from the south, and the introduction of employment agencies. As a consequence, the share of temporary workers over total employees had grown from 6.2% in 1993 to 9.9% in 2002.

### INTERNATIONAL TRADE

#### Imports and Exports

The following table shows the value of Italy's foreign trade (in US\$1bn.):

	2006	2007	2008	2009	2010
Imports c.i.f.	442.6	511.8	561.0	414.8	486.6
Exports f.o.b.	417.2	500.2	541.8	406.5	447.5

Percentage of trade with other EU countries in 2006: imports, 55.2%; exports, 58.0%. Principal import suppliers, 2007 (% of total trade): Germany, 16.7%; France, 9.0%; China, 5.9%; Netherlands, 5.2%. Principal export markets: Germany, 12.8%; France, 11.4%; Spain, 7.3%; USA, 6.8%.

Imports/exports by category, 2007 (in US\$1bn.):

	Imports	Exports
Animal and vegetable oils and fats	3.2	2.0
Beverages and tobacco	4.7	6.7
Chemicals and related products	63.4	49.7
Food and live animals	32.2	22.1
Inedible crude materials, excluding fuels	21.3	5.4
Machinery and transport equipment	143.1	186.1
Manufactured goods and articles	139.5	188.0
Mineral fuels and lubricants	60.4	18.8
Other products	36.9	13.3

### COMMUNICATIONS

#### Roads

Roads totalled 175,430 km in 2005, of which 6,542 km were motorways, 21,524 km were highways and main roads, and

147,364 km were regional and provincial roads. In 2005 there were 47,104,048 motor vehicles, including: passenger cars, 34,882,476 (594 per 1,000 inhabitants); buses and coaches, 96,477; vans and trucks, 3,982,001. There were 5,426 fatalities in road accidents in 2005.

#### Rail

The length of state-run railway (*Ferrovie dello Stato*) in 2005 was 16,225 km (11,364 km electrified). Italy's first section of high-speed railway opened in 1981; by 2009 the total length had reached 923 km. In 2005 the railways carried 759.9m. passengers and 89.8m. tonnes of freight. There are metros in Milan (76.0 km), Rome (38.0 km), Naples (29.8 km), Turin (9.6 km), Genoa (5.3 km) and Catania (3.8 km), and tram/light rail networks in Bergamo, Cagliari, Genoa, Messina, Milan, Naples, Padua, Perugia, Rome, Sassari, Trieste and Turin.

#### Civil Aviation

There are major international airports at Bologna (G. Marconi), Genoa (Cristoforo Colombo), Milan (Linate and Malpensa), Naples (Capodichino), Pisa (Galileo Galilei), Rome (Leonardo da Vinci/Fiumicino), Turin (Caselle) and Venice (Marco Polo). A number of other airports have a small selection of international flights. Alitalia commenced operations in Jan. 2009 as a privately-owned company (25%-owned by Air France-KLM), having taken over the name, landing rights and significant assets of the former national carrier (also Alitalia, which went bankrupt in 2008) and having merged with rival airline Air One. There are a number of other Italian airlines, notably Meridiana. In 2003 scheduled airline traffic of Italian-based carriers flew 398m. km, carrying 36,077,000 passengers (13,613,000 on international flights). The busiest airport for passenger traffic is Rome (Fiumicino), which in 2001 handled 24,331,558 passengers (12,244,136 on international flights), plus 381,956 passengers in transit and 169,648 tonnes of freight. Milan Malpensa was the second busiest for passengers, handling 18,457,037 (14,169,573 on international flights), plus 109,652 passengers in transit, but the busiest for freight, with 289,382 tonnes. Linate, which handled 7,131,604 passengers in 2001 (4,995,000 on domestic flights), plus 738 passengers in transit, had been the principal Milan airport and for many years Italy's second busiest for passenger traffic, but in 1998 a new terminal was opened at Malpensa with many foreign operators subsequently using it instead of Linate.

#### Shipping

In Jan. 2009 there were 779 ships of 300 GT or over registered, totalling 13.32m. GT. Of the 779 vessels registered, 280 were passenger ships, 212 oil tankers, 131 general cargo ships, 62 bulk carriers, 45 chemical tankers, 26 liquid gas tankers and 23 container ships. The Italian-controlled fleet comprised 745 vessels of 1,000 GT or over in Jan. 2009, of which 527 were under the Italian flag and 218 under foreign flags. The chief ports are Genoa (which handled 54,218,000 tonnes of cargo in 2008), Trieste (48,279,000 tonnes in 2008) and Taranto (43,271,000 tonnes in 2008). Gioia Tauro, the busiest container port, handled 3.5m. 20-ft equivalent units (TEUs) in 2008.

#### Telecommunications

In 2008 there were 21,246,000 main (fixed) telephone lines. In May 1999 Olivetti bought a controlling stake in the telephone operator Telecom Italia, and in July 2001 Pirelli, backed by the Benetton clothing empire, in turn paid €7bn. (US\$6.1bn.) to take over control of Telecom Italia. In 2008 mobile phone subscribers numbered 90,341,000, equivalent to 1,515.7 per 1,000 persons (among the highest penetration rates in the world). TIM (Telecom Italia Mobile) is the largest operator, with a 34% share of the market, just ahead of Vodafone Italia, which has a 33% share. There were 21.5m. PCs in use in 2005 and 25.0m. internet users in 2008. There were 22.1 fixed broadband subscribers per 100 inhabitants in Dec. 2010.

## SOCIAL INSTITUTIONS

### Justice

Italy has one court of cassation, in Rome, and is divided for the administration of justice into 29 appeal court districts, subdivided into 164 tribunali *circondari* (districts). There are also 93 first degree assize courts and 29 assize courts of appeal. For civil business, besides the magistracy above mentioned, *Giudici di pace* have jurisdiction in petty plaints.

2,709,888 crimes were reported in 2008. In June 2008 there were 55,057 persons in prison (including persons imprisoned by San Marino and the Vatican City). In 1947 the re-established democracy rewrote the Legislative Order; the constitution of the Italian Republic abolished the death penalty sanctioned in 1930 by Codice Penale, commonly known as Codice Rocco. Although the death penalty was abolished for ordinary crimes in 1947, it was not until 1994 that it was abolished for all crimes.

### Education

Five years of primary and five years of secondary education are compulsory from the age of six. In 2005–06 there were 24,845 pre-school institutions with 1,662,139 children and 140,687 teachers (state and non-state schools); 18,218 primary schools with 2,790,254 pupils and 293,091 teachers (state and non-state schools); 7,886 compulsory secondary schools (*scuole secondarie primo grado*) with 1,764,230 pupils and 211,093 teachers (state and non-state schools); and 6,565 higher secondary schools with 2,691,713 pupils and 305,383 teachers (state and non-state schools).

Higher secondary education is subdivided into classical (*ginnasio* and classical *liceo*), scientific (scientific *liceo*), language lyceum, professional institutes and technical education: agricultural, industrial, commercial, technical, nautical institutes, institutes for surveyors, institutes for girls (five-year course) and teacher-training institutes (five-year course).

In 2005–06 there were 98 universities (79 state and 19 non-state), of which two are universities of Italian studies for foreigners, three specialized universities (commerce; education; Roman Catholic), three polytechnical university institutes; seven specialized university institutes (architecture; bio-medicine; modern languages; naval studies; oriental studies; social studies; teacher training). In 2005–06 there were 1,823,886 university students and 61,097 academic staff.

Estimated adult literacy rate, 2009, 98.9% (male 99.2%; female 98.6%).

In 2008 public expenditure on education came to 4.6% of GDP and 9.4% of total government spending.

### Health

In 2003 the National Health Service included 1,367 hospitals of which 746 were public with 184,796 beds and 621 private hospitals with 55,059 beds. There were 246,834 physicians, 28,566 dentists and 59,580 pharmacists in 2008; and 379,213 nursing and midwifery personnel in 2009. A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked Italy in second place, behind France. In 2009 Italy spent 9.5% of its GDP on health.

### Welfare

Social expenditure is made up of transfers which the central public departments, local departments and social security departments make to families. Payment is principally for pensions, family allowances and health services. Expenditure on subsidies, public assistance to various classes of people and people injured by political events or national disasters are also included.

In Jan. 2008 the minimum retirement age was raised from 57 to 58 (or after 36 years of work, whichever comes first). It is rising gradually and is set to be 66 by 2018. The age restriction will not apply in the case of workers who have made 40 years of pension

contributions. Those in 'arduous' professions, which encompasses 6% of the population, will be able to retire at 57. The average age for Italian men to stop work is 60 years 8 months, among the youngest in the EU. Pensions account for around 15% of GDP.

Citizens who have entered the workforce since 1996 will not qualify for this seniority pension, but will receive an old-age pension instead. There are three categories of pension. The first is for people who have joined the workforce since 1996, and is available to claimants aged 57 or above with at least five years of contributions. The second category is for men aged at least 65 or women aged at least 60, with under 18 years of contributions as of 1995. The third category is for men aged at least 65 or women aged at least 60, with at least 18 years of contributions as of 1995. It is paid at a rate of 0.9%–2% of earnings multiplied by number of years of contributions, up to a maximum of 40.

Public pensions are indexed to prices; 23,257,480 pensions were paid in 2005, with payments totalling €214,881.3m. (including 16,875,341 private sector, with payments totalling €152,483.5m.). The average annual pension in 2005 was €9,239. Social contributions in 2005 totalled €184,642m.

## RELIGION

The treaty between the Holy See and Italy of 11 Feb. 1929, confirmed by article 7 of the Constitution of the republic, lays down that the Catholic Apostolic Roman Religion is the only religion of the State. Other creeds are permitted, provided they do not profess principles, or follow rites, contrary to public order or moral behaviour.

The appointment of archbishops and of bishops is made by the Holy See; but the Holy See submits to the Italian government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature. In Feb. 2012 there were 52 cardinals.

Catholic religious teaching is given in elementary and intermediate schools. Marriages celebrated before a Catholic priest are automatically transferred to the civil register. Marriages celebrated by clergy of other denominations must be made valid before a registrar.

There were 46,260,000 Roman Catholics in 2001, 680,000 Muslims, 1,350,000 adherents of other religions and 9,600,000 non-religious and atheists.

## CULTURE

Milan is scheduled to host Expo 2015 under the theme 'Feeding the Planet, Energy for Life'.

### World Heritage Sites

There are 47 UNESCO sites in Italy (the most of any country): the Rock Drawings in Valcamonica near Brescia (inscribed in 1979); Santa Maria delle Grazie with 'The Last Supper' by Leonardo da Vinci (1980); San Paolo Fuori le Mura Historic Centre of Florence (1982); Venice and its Lagoon (1987); Piazza del Duomo, Pisa (1987 and 2007); Historic Centre of San Gimignano (1990); I Sassi di Matera (1993); Vicenza, the City of Palladio and the Villas of the Veneto (1994 and 1996); Historic Centre of Siena (1995); Historic Centre of Naples (1995); Ferrara and its Po Delta (1995 and 1999); Crespi d'Adda (1995); Castel del Monte (1996); Trulli of Alberobello (1996); Early Christian Monuments and Mosaics of Ravenna (1996); Historic Centre of the City of Pienza (1996); The 18th-Century Royal Palace at Caserta with the Park, the Aqueduct of Vanvitelli and the San Leucio Complex (1997); Residences of the Royal House of Savoy (1997); Botanical Garden (Orto Botanico), Padua (1997); Cathedral, Torre Civica and Piazza Grande, Modena (1997); Archaeological Areas of Pompeii, Ercolano and Torre Annunziata (1997); Villa Romana del Casale (1997); Su Nuraxi di Barumini (1997); Portovenere, Cinque Terre and the Islands (Palmaria, Tino and Tinetto) (1997); The Costiera Amalfitana (1997); Archaeological Area of Agrigento (1997); Cilento and Vallo di Diano National Park (1998); Historic Centre

of Urbino (1998); Archaeological Area and the Patriarchal Basilica of Aquileia (1998); Villa Adriana (1999); Aeolian Islands (2000); Assisi (2000); the City of Verona (2000); Villa d'Este, Tivoli (2001); the Late Baroque Towns of the Val di Noto (2002); Monte San Giorgio (2003); Sacri Monti of Piedmont and Lombardy (2003); Val d'Orcia (2004), part of the agricultural hinterland of Siena; the Etruscan Necropolises of Cerveteri and Tarquinia (2004); Syracuse and the Rocky Necropolis of Pantalica (2005); Genoa (2006), featuring the Strade Nuove and the system of the Palazzi dei Rolli; Mantua and Sabbioneta (2008); the Dolomites (2009); and the Longobards in Italy, Places of Power, 568–774 AD, comprising seven groups of important buildings throughout the country (2011).

The Historic Centre of Rome, the properties of the Holy See in that city enjoying extraterritorial rights (1980 and 1990), is shared with Vatican City State. The Rhaetian Railway in the Albula/Bernina Landscapes (2008) is shared with Switzerland and the Prehistoric Pile dwellings around the Alps (2011) are shared with Austria, France, Germany, Slovenia and Switzerland.

#### Press

There were, in 2006, 91 paid-for dailies with a combined circulation of 5.6m. copies and ten free dailies with a combined circulation of 4.7m. copies. Several of the papers are owned or supported by political parties. The church and various economic groups exert strong right of centre influence on editorial opinion. Most newspapers are regional but *Corriere della Sera* (which has the highest circulation of any Italian newspaper), *La Repubblica*, *Il Sole 24 Ore* and *La Stampa* are the most important of those papers that are nationally circulated. In 2008 a total of 58,829 book titles were published in 213m. copies.

#### Tourism

In 2005, 36,513,000 foreigners visited Italy; receipts from tourism in 2005 were US\$38.26bn. Only France, Spain, the USA and China receive more foreign tourists.

#### Festivals

One of the most traditional festivals in Italy is the Carnival di Ivrea which lasts for a week in late Feb. or early March. Among the famous arts festivals is the Venice Film Festival in Sept. Venice also plays host, in the ten days before Ash Wednesday, to a large carnival. Major music festivals are the Maggio Musicale Fiorentino in Florence (May–June), the Ravenna Festival (June–July), the Spoleto Festival (June–July), the Rossini Opera Festival at Pesaro (Aug.) and the Verona Arena Opera Festival (June–Aug.). The biggest rock festival is the Italia Wave Love Festival in Livorno (known as the Arezzo Wave Festival until 2007), which is held in July, while the largest jazz festival is the Umbria Jazz Festival, also in July. Until 2010 Europe's largest reggae festival, Rototom Sunsplash, was held at Osoppo, in Tuscany. However, it was forced to relocate to Spain after the Italian authorities accused the festival and its organizers of facilitating the use of drugs.

#### DIPLOMATIC REPRESENTATIVES

Of Italy in the United Kingdom (14 Three Kings Yard, Davies St., London, W1K 4EH)

*Ambassador:* Alain Economides.

Of the United Kingdom in Italy (Via XX Settembre 80A, 00187, Rome)

*Ambassador:* Christopher Prentice, CMG.

Of Italy in the USA (3000 Whitehaven St., NW, Washington, D.C., 20008)

*Ambassador:* Claudio Bisogniero.

Of the USA in Italy (Via Vittorio Veneto 119/A, Rome)

*Ambassador:* David H. Thorne.

Of Italy to the United Nations

*Ambassador:* Cesare Maria Ragaglini.

Of Italy to the European Union

*Permanent Representative:* Ferdinando Nelli Feroci.

## KEY HISTORICAL EVENTS

Jamaica was discovered by Columbus in 1494 and was occupied by the Spaniards from 1509 until 1655 when the island was captured by the English. In 1661 a representative constitution was established consisting of a governor, privy council, legislative council and legislative assembly. The slavery introduced by the Spanish was augmented as sugar production increased in value and extent in the 18th century. The plantation economy collapsed with the abolition of the slave trade in the late 1830s. The 1866 Crown Colony government was introduced with a legislative council. In 1884 a partially elective legislative council was instituted. Women were enfranchised in 1919. By the late 1930s, demands for self-government increased. The constitution of Nov. 1944 introduced a freely-elected house of representatives of 32 members, a legislative council (the upper house) of 15 members, and an executive council. In 1958 Jamaica joined with Trinidad, Barbados, the Leeward Islands and the Windward Islands to create the West Indies Federation. In 1959 internal self-government was achieved. Jamaica withdrew from the West Indies Federation in 1961 and became an independent state within the British Commonwealth in 1962.

Power alternated between the Jamaica Labour Party and the People's National Party. The latter held power from 1989 until 2007, with Portia Simpson-Miller becoming the country's first female premier in 2006. In May 2010 a state of emergency was declared after the death of dozens of people in an operation to arrest one of the country's leading drug lords, Christopher 'Dudus' Coke. He was subsequently captured and extradited to the USA.

## TERRITORY AND POPULATION

Jamaica is an island in the Caribbean Sea about 150 km south of Cuba. The area is 10,991 sq. km (4,244 sq. miles). The population at the census of Sept. 2001 was 2,607,632, distributed on the basis of the 13 parishes of the island as follows: Kingston and St Andrew, 651,880; St Catherine, 482,308; Clarendon, 237,024; Manchester, 185,801; St James, 175,127; St Ann, 166,762; St Elizabeth, 146,404; Westmoreland, 138,947; St Mary, 111,466; St Thomas, 91,604; Portland, 80,205; Trelawny, 73,066; Hanover, 67,037. 2001 density: 237 per sq. km. There is a worldwide Jamaican diaspora of more than 2m.

The UN gives a projected population for 2015 of 2.79m.

Chief towns (in 1,000), 2001: Kingston (metropolitan area), 579; Portmore, 156; Spanish Town, 132; Montego Bay, 96; May Pen, 57.

In 2005, 53.1% of the population were urban. The population is about 92% of African ethnic origin. The official language is English. Patois, a combination of English and African languages, is widely spoken.

## SOCIAL STATISTICS

Vital statistics (2006): births, 46,277 (17.4 per 1,000 population); deaths, 16,317 (6.1); marriages, 23,181 (8.7); divorces, 1,768 (0.7). There were 17,100 emigrants in 2006, mainly to the USA. Expectation of life at birth, 2007, 68.3 years for males and 75.1 years for females. Annual population growth rate, 2000–05, 0.5%; infant mortality, 2005, 17 per 1,000 live births; fertility rate, 2008, 2.4 births per woman.

## CLIMATE

A tropical climate but with considerable variation. High temperatures on the coast are usually mitigated by sea breezes, while upland areas enjoy cooler and less humid conditions. Rainfall is plentiful over most of Jamaica, being heaviest in May and from Aug. to Nov. The island lies in the hurricane zone. Kingston, Jan. 76°F (24.4°C), July 81°F (27.2°C). Annual rainfall 32" (800 mm).

## CONSTITUTION AND GOVERNMENT

Under the constitution of Aug. 1962 the Crown is represented by a Governor-General appointed by the Crown on the advice of the Prime Minister. The Governor-General is assisted by a Privy Council of six appointed members. The Legislature comprises the *House of Representatives* and the *Senate*. The Senate consists of 21 senators appointed by the Governor-General, 13 on the advice of the Prime Minister, eight on the advice of the Leader of the Opposition. The House of Representatives (increased from 60 to 63 members for the 2011 election) is elected by universal adult suffrage for a period not exceeding five years. Electors and elected must be Jamaican or Commonwealth citizens resident in Jamaica for at least 12 months before registration.

## National Anthem

'Eternal Father, bless our land'; words by H. Sherlock, tune by R. Lightbourne.

## RECENT ELECTIONS

In parliamentary elections held on 29 Dec. 2011 the opposition People's National Party (PNP) took 42 of the 63 seats with 53.3% of votes cast (up from 28 in 2007) and the Jamaica Labour Party (JLP) 21 with 46.6% (down from 32 in 2007).

## CURRENT GOVERNMENT

*Governor-General:* Patrick Allen.

In March 2012 the cabinet comprised:

*Prime Minister and Minister of Defence, Development, Information and Sports:* Portia Simpson-Miller, b. 1945 (PNP; sworn in 5 Jan. 2012, having previously been in office from March 2006–Sept. 2007).

*Minister of Agriculture and Fisheries:* Roger Clarke. *Education:* Ronald Thwaites. *Finance, Planning and the Public Service:* Peter Phillips. *Foreign Affairs and Foreign Trade:* Arnold Nicholson. *Health:* Dr Fenton Ferguson. *Industry, Investment and Commerce:* Anthony Hylton. *Justice:* Mark Golding. *Labour and Social Security:* Derrick Kellier. *Local Government and Community Development:* Noel Arscott. *Mining, Energy and ICT:* Phillip Paulwell. *National*

*Security:* Peter Bunting. *Tourism and Entertainment:* Wykeham McNeil. *Transport, Works and Housing:* Omar Davies. *Water, Land, Environment and Climate Change:* Robert Pickersgill. *Youth and Culture:* Lisa Hanna. *Ministers without Portfolio:* Horace Dalley; Sandra Falconer; Morais Guy; Natalie Neita-Headley.

*Cabinet Website:* <http://www.cabinet.gov.jm>

## CURRENT LEADERS

### Portia Simpson-Miller

#### Position

Prime Minister

#### Introduction

Portia Simpson-Miller was sworn in as prime minister for a second time on 5 Jan. 2012 after the People's National Party defeated the Jamaica Labour Party in elections held on 29 Dec. 2011. She previously served as prime minister from 30 March 2006 to 11 Sept. 2007. A member of the Council of Women World Leaders, Simpson-Miller was her country's first democratically elected female leader on taking office in 2006.

#### Early Life

Portia Simpson-Miller was born on 12 Dec. 1945 in Wood Hall, St Catherine's Parish, Jamaica. She was educated at St Martin's High School and the Union Institute, Miami, USA, where she graduated with a degree in public administration. She entered politics as a councillor for the left-leaning PNP in 1974, winning the inner-city seat of Trench Town West in the Kingston & St Andrew Corporation.

In 1977 she was appointed parliamentary secretary in the ministry of local government and the following year was elected vice-president of the PNP, a post she held for the next 27 years. Despite the PNP's crushing defeat in the 1980 general election, she retained her councillor's seat and from 1983–89 served as the party spokesperson on women's affairs and pensions, social security and consumer affairs.

In the 1989 general election, when Michael Manley returned the PNP to power, Simpson-Miller was elected MP for South West St Andrew and was appointed minister of labour, social security and sport. Following Manley's resignation in 1992 she unsuccessfully challenged P. J. Patterson for the premiership. Promoted to minister for tourism and sport in 2000, Simpson-Miller won plaudits for her work to rebuild the tourism sector in the wake of the 11 Sept. 2001 attacks on the USA.

Following the general election of Oct. 2002 she regained the local government portfolio in an expanded ministry of local government, community development and sport. On 25 Feb. 2006 she narrowly defeated Peter Phillips to succeed Patterson as head of the PNP and become prime minister-elect. She was sworn in office on 30 March 2006. During her 18 months as premier Simpson-Miller prioritized tackling poverty and crime.

With unemployment running at 9% and crime endemic, Simpson-Miller's PNP was narrowly defeated by the Labour Party in the parliamentary elections of Sept. 2007, ending 18 years of PNP rule. The following year, Simpson-Miller's leadership of the PNP was challenged by Peter Phillips. She defeated her rival and continued to lead the party in opposition.

Simpson-Miller performed strongly on the 2011 election campaign trail, with her charismatic populism widely credited with swinging public opinion in favour of the PNP. In what had been predicted to be a tight election, she led her party to a landslide win, taking 42 of 63 available seats and ensuring the two-thirds majority necessary to alter the constitution.

#### Career in Office

Simpson-Miller's priorities are to slash the 13% rate of unemployment and tackle the massive debt-to-GDP ratio. In a televised election debate, she said that she would

consider reviewing Jamaica's controversial criminalization of homosexuality. An avowed republican, she has stated her intention to move towards the severance of ties with the UK, though any such decision must be ratified by popular referendum. Simpson-Miller assumed the defence portfolio upon taking office as prime minister.

## DEFENCE

In 2008 defence expenditure totalled US\$96m. (US\$34 per capita), representing 0.7% of GDP.

### Army

The Jamaica Defence Force consists of a Regular and a Reserve Force. Total strength (Army, 2005): 3,377, including 877 reservists.

### Navy

The Coast Guard, numbering 250 in 2005 including 60 reservists, operates nine patrol craft based at Port Royal and Pedro Cays.

### Air Force

The Air Wing of the Jamaica Defence Force was formed in July 1963 and has since been expanded and trained successively by the British Army Air Corps and Canadian Air Force personnel. There are no combat aircraft. Personnel (2005), 156 (including 16 reservists).

## ECONOMY

Agriculture accounted for 5.7% of GDP in 2005, industry 33.1% and services 61.2%.

### Overview

Jamaica has a small, open economy dominated by the service sector. Tourism is the biggest source of domestic employment and foreign exchange. Worker remittances attract revenue roughly equal to that of the tourist sector. The 2008–09 global economic crisis had a severe impact, with remittances declining sharply. Tourism, however, proved more resilient, with arrivals increasing in 2009.

Leading exports are alumina, bauxite, bananas and sugar. After experiencing spiky but strong growth in the early part of the 1990s the economy fell into recession in 1997. Growth from 2001–08 averaged 1.5–2.0%, but there were three years of negative growth in 2008, 2009 and 2010. The poverty rate declined from 30.5% to 9.9% between 1989 and 2007.

Unemployment remains high, especially among the young. The national debt burden is over 130% of GDP.

### Currency

The unit of currency is the *Jamaican dollar* (JMD) of 100 cents. The Jamaican dollar was floated in Sept. 1990. Inflation was 22.0% in 2008, falling to 9.6% in 2009. Foreign exchange reserves were US\$2,423m. in July 2005 and total money supply was J\$68,141m.

### Budget

Budgetary central government revenue and expenditure for fiscal years ending 31 March (in J\$1m.):

	2008	2009	2010 <sup>1</sup>
Revenue	249,512	272,460	241,766
Expenditure	275,223	325,731	412,992
	<sup>1</sup> Provisional.		

The chief items of current revenue are income taxes, consumption taxes and customs duties. The chief items of current expenditure are public debt, education and health.

VAT is 17.5% (reduced rate, 10%).

### Performance

After suffering major economic difficulties with negative growth in 1996, 1997 and 1998, Jamaica's economy recovered slightly,

with growth of 3.0% in 2006 and 1.4% in 2007. However, there was again negative growth in 2008, of -0.9%, in 2009, of -3.0%, and in 2010, of -1.2%. Total GDP in 2010 was US\$14.0bn.

### Banking and Finance

The central bank and bank of issue is the Bank of Jamaica. The Governor is Brian Wynter.

In 2002 there were five commercial banks, three development banks and two other banks (National Export-Import Bank of Jamaica and the National Investment Bank of Jamaica). Total assets of commercial banks at March 2006 were J\$385,759.5m.; deposits were J\$255,315.4m.

There is a stock exchange in Kingston, which participates in the regional Caribbean exchange.

## ENERGY AND NATURAL RESOURCES

### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 4.7 tonnes per capita.

### Electricity

The Jamaica Public Service Co. is the public supplier. Total installed capacity was 1.2m. kW in 2007. Production in 2007 totalled 7.78bn. kWh; consumption per capita in 2007 was 2,886 kWh.

### Oil and Gas

There is an oil refinery in Kingston.

### Minerals

Jamaica is ranks among the world's largest producers of bauxite. Ceramic clays, marble, silica sand and gypsum are also commercially viable. Production in 2005 (in tonnes): bauxite ore, 14.1m.; limestone, 2.6m.; sand and gravel, 2.4m.; gypsum, 302,066.

### Agriculture

In 2007 there were an estimated 174,000 ha. of arable land and 110,000 ha. of permanent crops.

2003 production (in 1,000 tonnes): sugarcane, 2,400; coconuts, 170; yams, 151; oranges, 140; bananas, 130; grapefruit and pomelos, 42; pumpkins and squash, 36; cabbage, 29; plantains, 29.

Livestock (2003 estimates): goats, 440,000; cattle, 430,000; pigs, 180,000; chickens, 11m. Livestock products, 2003 estimates (in 1,000 tonnes): beef and veal, 14; pork, bacon and ham, 5; poultry meat, 81.

### Forestry

Forests covered 339,000 ha. in 2005, or 31.3% of the total land area. Timber production was 834,000 cu. metres in 2007.

### Fisheries

Catches in 2005 totalled 13,096 tonnes, of which 97% were sea fish.

## INDUSTRY

Alumina production, 2005, 4.1m. tonnes. Output of other products (2007 unless otherwise indicated, in tonnes): cement (2005), 844,840; residual fuel oil, 473,000; sugar (2002), 174,949; distillate fuel oil, 190,000; petrol, 104,000; molasses (2003), 72,631; wheat flour (2002), 32,000; fertilizer (2002), 22,400; cigarettes (2003), 889m. units; rum (2003), 25.5m. litres. In 2005 industry accounted for 33.1% of GDP, with manufacturing contributing 13.6%.

### Labour

Total labour force (2003), 1.10m., of whom 957,300 were employed. In 2003, 257,000 were employed in community, social and personal services; 210,000 in wholesale and retail trade, restaurants and hotels; 188,000 in agriculture, hunting, forestry and fishing; and 90,000 in construction. In 2005 the unemployment rate was 10.0%.

## INTERNATIONAL TRADE

Foreign debt was US\$6,511m. in 2005.

### Imports and Exports

Value of imports and domestic exports for calendar years (in US\$1m.):

	2002	2003	2004	2005	2006
Imports f.o.b.	3,179.6	3,328.2	3,546.1	4,245.5	5,077.1
Exports f.o.b.	1,309.1	1,385.6	1,601.6	1,664.3	2,133.6

Principal imports in 2006 (% of total): petroleum and petroleum products 23.6%, machinery and transport equipment 22.6%, manufactured goods 13.9%, food and live animals 12.5% and chemicals and related products 11.3%.

Principal domestic exports in 2006 (% of total): crude materials (excluding fuels) 63.3%, petroleum oils 13.5%, cane sugar 4.5%, alcoholic beverages 4.2% and chemicals 3.7%.

Main import suppliers, 2006: USA, 36.8%; Trinidad and Tobago, 11.5%; Venezuela, 10.7%; Japan, 4.2%; China, 4.1%. Main export markets, 2006: USA, 30.4%; Canada, 15.6%; China, 15.1%; UK, 10.3%; Netherlands, 7.0%.

## COMMUNICATIONS

### Roads

In 2007 the island had 22,121 km of roads, including 44 km of motorway and 4,922 km of main roads. In 2006 there were 373,700 passenger cars in use and 29,100 motorcycles and mopeds. There were 350 fatalities in traffic accidents in 2007.

### Rail

Passenger traffic ceased in 1992 but there are plans to revive passenger services. Freight transport continues on a limited basis, mainly for carrying bauxite to docks.

### Civil Aviation

International airlines operate through the Norman Manley and Sangster airports at Palisadoes and Montego Bay. Sangster International is the busiest for passenger traffic, handling 3,378,000 passengers in 2006-07. Norman Manley airport is busier for freight, handling 16,136 tonnes of freight in 2006 but only 1,715,078 passengers. Air Jamaica, originally set up in conjunction with BOAC and BWIA in 1966, became a new company, Air Jamaica (1968) Ltd. In 1969 it began operations as Jamaica's national airline. It was acquired in May 2010 by Caribbean Airlines, the national airline of Trinidad and Tobago, but the name Air Jamaica has been retained. In 2006 scheduled airline traffic of Jamaica-based carriers flew 52m. km and carried 1,527,000 passengers.

### Shipping

In Jan. 2009 there were 21 ships of 300 GT or over registered, totalling 229,000 GT. Kingston handled 16.3m. tonnes of cargo in 2008 (down from 17.7m. tonnes in 2007).

### Telecommunications

In 2005 there were 3,042,000 telephone subscribers (1,147.5 per 1,000 population), of which 2,700,000 were mobile phone subscribers. There were 261.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 114,600 in 2009 (42.0 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The Judicature comprises a Supreme Court, a court of appeal, resident magistrates' courts, petty sessional courts, coroners' courts, a traffic court and a family court which was instituted in 1975. The Chief Justice is head of the judiciary. Jamaica was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice to replace the British Privy Council as

the highest civil and criminal court. In the meantime the number of signatories has risen to twelve. The court was inaugurated at Port-of-Spain, Trinidad on 16 April 2005 but Jamaica has yet to accept it as its final court of appeal.

In 2010 there were 1,428 murders, down from the record high of 1,682 in 2009. The rate of 52 per 100,000 persons (61 per 100,000 in 2009) is more than ten times that of the USA and ranks among the highest in the world. The death penalty is permitted but has not been used since 1988.

The population in penal institutions in Oct. 2007 was 4,709 (174 per 100,000 of national population).

#### Police

The Constabulary Force in 2005 stood at approximately 8,011 officers, sub-officers and constables (men and women).

#### Education

Adult literacy was an estimated 86.4% in 2009 (91.1% among females but only 81.2% among males).

Education is free in government-operated schools. Enrolment in 2007 in primary institutions was 310,000; in secondary institutions, 257,000; and in tertiary institutions (2008), 61,000. Numbers of teaching staff: primary (2005), 11,793; secondary (2007), 13,006; tertiary (2003), 2,006.

The University of the West Indies, which was founded in 1948 and has its main campus at Kingston, is the oldest, fully regional institution of higher learning in the Commonwealth Caribbean. In 2006 there were two public universities and two private universities as well as six teacher training colleges, five community colleges, and several technical/vocational training institutes and specialist colleges. Large numbers of educated Jamaicans have left the island over the past 30 years, but in the early part of the 21st century there are signs that young professionals are increasingly returning to Jamaica. However, 72% of Jamaican graduates live in OECD member countries.

In 2005 public expenditure on education came to 5.6% of GNI and 8.8% of total government spending.

#### Health

In 2001 there were 27 hospitals with 4,606 beds. There were 2,253 physicians, 4,374 nurses and midwives, and 212 dentists in 2003.

#### Welfare

The official retirement age is 65 years (men) or 60 years (women). The old-age pension is made up of a basic benefit of J\$900 a week (reduced to J\$675 a week with annual average contributions of between 26 and 38 weeks; J\$450 with 13 weeks to 25 weeks), plus an earnings-related benefit of J\$0.06 a week for every J\$13 of employer-employee contributions paid during the working lifetime.

Jamaica's social welfare projects also cover disability and survivor benefits, sickness and maternity, and work injury. Jamaica has no unemployment programmes.

#### RELIGION

Freedom of worship is guaranteed under the Constitution. The main Christian denominations are Anglican, Baptist, Roman Catholic, Methodist, Church of God, United Church of Jamaica and Grand Cayman (Presbyterian-Congregational-Disciples of Christ), Moravian, Seventh-Day Adventist, Pentecostal, Salvation Army and Quaker. Pocomania is a mixture of Christianity and African survivals. Non-Christians include Hindus, Jews, Muslims, Bahai followers and Rastafarians.

#### CULTURE

##### Press

In 2006 there were three daily newspapers with a combined circulation of 115,000.

##### Tourism

In 2008 there were a record 1,767,271 non-resident overnight tourists and 1,088,901 cruise passenger arrivals. Tourism receipts in 2005 totalled US\$1,783m.

#### DIPLOMATIC REPRESENTATIVES

Of Jamaica in the United Kingdom (1–2 Prince Consort Rd, London, SW7 2BZ)

*High Commissioner:* Anthony Johnson.

Of the United Kingdom in Jamaica (28 Trafalgar Rd, Kingston 10)

*High Commissioner:* Howard Drake, OBE.

Of Jamaica in the USA (1520 New Hampshire Ave., NW, Washington, D.C., 20036)

*Ambassador:* Audrey Marks.

Of the USA in Jamaica (142 Old Hope Rd, Kingston 6)

*Ambassador:* Pamela Bridgewater.

Of Jamaica to the United Nations

*Ambassador:* Raymond Wolfe.

Of Jamaica to the European Union

*Ambassador:* Marcia Yvette Gilbert-Roberts.

## KEY HISTORICAL EVENTS

When the last ice sheets covered much of Asia, the sea level fell low enough for a land bridge to appear between Japan and the Asian mainland. This route was taken by hunter-gatherers from Asia who crossed into previously uninhabited Japan. By 10,000 BC the first pottery was produced in Japan and there was some cultivation. Rice was introduced, probably from Korea, by about 400 BC, and the use of metals around a century later, but agriculture and fixed settlements were confined to the south for a long period. During this time waves of migrants came from mainland Asia, bringing with them skills and technologies, including the Chinese characters for writing.

Religion, too, came from China: both Buddhism and Confucianism entered Japan, the former gaining a large following. In time traditional beliefs consolidated into Shintoism, which became the national religion. But, until the first millennium AD, there was no Japanese nation, although the legends of Japan tell us otherwise. According to myth, the first Japanese emperor was Jimmu around 600 BC, said to be a descendant of the sun goddess, Amaterasu.

In the first century BC, another wave of migrants entered Japan from Korea. The first Japanese state appeared in the central region of Honshu in the 7th century. This state soon controlled most of the west and centre of the island. In 710 the first permanent

Japanese capital was established in Nara by Empress Genmei. In 794 the seat of power moved to Heian-kyo (present-day Kyoto).

Following the court and government tradition of China, Japan cut itself off from the outside world. As the imperial office became increasingly religious the day-to-day power passed into the hands of powerful nobles, such as the Fujiwara clan. Fujiwara Yoshifusa (804–872) was a powerful regent of Japan from 857 until his death, and by the 11th century the Fujiwaras were unchallenged rulers of the country. In the 12th century, however, Japan entered into a period of anarchy. The country passed under the control of barons, the *daimyo*, who exercised power through the warrior class known as the *samurai*.

## Shogun

The anarchy ended when Taira Kiyamori seized power and made himself dictator. A civil war, the Gempei War, followed (1180–85). When Taira was defeated, power passed to Minamoto Yoritomo (1147–99), a distant descendant of the imperial family. Yoritomo established a new office, the *shogun*. For the next 700 years Japan was ruled by a military dictator, the shogun, while the emperor lived reclusively as a religious and national symbol.

At first the shogunate was seated in Kamakura, near modern Tokyo. Nine shoguns ruled during the Kamakura epoch (1185–1333) although latterly the Kamakura shogun was a puppet of the Hojo clan. In 1274 and 1281 Mongol attempts to invade Japan were unsuccessful: in 1281 the invasion was thwarted by a sudden typhoon that became known as the 'divine wind' (*kami-kaze*).

In 1334 a brief restoration of power to the emperor was ended by Ashikaga Takauji (1305–58), who established a strong military government. Subsequent members of the Ashikaga family ruled as shoguns based in Kyoto. Eventually this system, too, collapsed into anarchy, the victim of the ambitions of rival warlords. From 1467 to 1603 Japan suffered the Fighting Principalities (*Sengokujidai*). It was when the country was at its weakest that another powerful outside influence began to exert itself.

From 1543 Portuguese traders and missionaries arrived on the southern and western coasts. At first, trade was welcomed. Christianity, too, made converts after the Spanish Jesuit missionary St Francis Xavier landed in Japan in 1549. Along with western ideas and religion, the Portuguese, and later the Dutch, brought firearms. Three warlords in turn used western weapons to seize power and reunite the country. The last of this trio was Tokugawa Ieyasu (1542–1616), who held power from 1600. Ieyasu ordered the nobles to destroy their fortifications, except their principal residences, and encouraged the arts and learning as a preferred alternative to warfare.

## Isolation

As the true rulers of Japan until 1869, the Tokugawa shogunate established itself at Edo (present-day Tokyo). They ruled harshly, subduing the warring lords by holding members of their families hostages. The Tokugawa perceived foreign influences as unsettling and a danger to their supremacy. For this reason, they decreed that Japan should become a closed society. In 1636 Japanese were forbidden to emigrate. Europeans were expelled, except for a single Dutch trading post in Nagasaki, which after 1639 became Japan's only contact with the outside world. Christianity was suppressed and the ownership of firearms, except by the central authorities, was made illegal. Japan entered 220 years of self-imposed isolation.

Cut off from outside influences, Japan gained stability and a strong sense of national identity. Yet this isolation came at a price. In 1853 a US fleet led by Commodore Matthew C. Perry appeared

<sup>1</sup>Both forms are valid, and derive from different pronunciations of a Chinese character.

off the Japanese coast. Japan was forced to open up to international trade through the threat of invasion. Other western nations followed the American example. Japan was thrust into a modern world for which it was ill suited. The voices for reform grew and the Tokugawa shogunate, humiliated by Perry's mission, collapsed. Reformers seized Kyoto and parts of the west, but they needed a national symbol to legitimize their rule. In 1869 the shadowy figure of the emperor was called out of his cloistered life. His city, Edo, had by then been renamed Tokyo, meaning 'eastern capital'. The emperor surprised the country by his zeal for modernization which led to a period of rapid reform and transformed Japan into a modern nation.

But while a constitution was introduced, the resemblance to a western democracy was skin deep. Though the peasants were freed from serfdom, power remained in the hands of the nobility. Priority was given to developing industry and modern technology. Japan's rise as an industrial state began.

### *Rise of the Military*

Much emphasis was given to modernizing the armed forces. A revitalized Japan defeated China in the First Sino-Japanese War in 1894–95 and gained Taiwan. In 1900 Japan intervened alongside the western powers against the Boxer Rebellion in China. An even greater shock was Japan's victory against Russia in 1903–04 in a war over Korea and Manchuria. Having contained Russian land forces in Manchuria, the Japanese decisively defeated the Russian Baltic Fleet in the Tsushima Strait. Russia's influence in the region faded and Japan received half of Sakhalin and the Kurile Islands. Later, with Russia removed from the scene, Japan annexed Korea (1910) and took control of parts of Manchuria.

In 1902 Japan made an alliance with Britain. To emphasize Japan's western credentials, Tokyo entered the First World War against Germany in 1914. Japanese forces took the German island colonies in the north and central Pacific and received these archipelagoes as a League of Nations Trust Territory in 1919. But greater rewards for their efforts in the war had been expected and Tokyo's disillusion with the west began. The collapse of world trade at the end of the 1920s brought hardship and helped the rise of political extremism and nationalism.

Japan began a phase of aggressive expansionism. In 1931 Japan invaded Manchuria and, two years later, installed the deposed last emperor of China as puppet emperor of Manchukuo. From 1932 Japanese forces entered various coastal and border areas of China, and in 1937 there was a full-scale war with China. Japanese forces took Shanghai in 1937, Guangzhou in 1938 and Nanjing in 1940. By the end of 1940 Japan had occupied French Indochina and formed a triple alliance (or Axis) with Nazi Germany and Fascist Italy.

### *Pearl Harbor*

Under premier Gen. Tojo Hideki (1884–1948), Japan attacked the US fleet in Pearl Harbor, Hawaii in Dec. 1941. This action brought the United States into the Second World War (1939–45) and ranged Japan against forces that were superior in size and technology. Nevertheless, the war was initially in Japan's favour. Japanese forces swept through the Pacific and into Malaya and the Dutch East Indies (now Indonesia). The speed of Japan's ruthless advance overwhelmed the Allied powers as British and American positions were surrendered. The tide turned with the American victory at Midway in late 1942, but by the time Germany surrendered in May 1945 Japanese forces were still in control of large areas of the Pacific and Southeast Asia. In Aug. 1945 US planes dropped atomic bombs on the Japanese cities of Hiroshima and Nagasaki, devastating the two cities and causing more than 200,000 deaths. The emperor Hirohito (1926–89) surrendered.

The war had cost Japan dearly. Not only had two cities suffered the horror of atomic warfare, but many more Japanese had died in combat. Nearly 2m. Japanese were abandoned in China, most

of whom were shipped to Siberia as prisoners. Japan was to be reformed by the occupying US forces under Gen. MacArthur. In 1945 Shintoism, which had become associated with aggressive nationalism, ceased to be the state religion. In the following year, the emperor renounced his divinity.

A new liberal constitution was introduced in 1946. Japan signed a peace treaty in 1951 at San Francisco and the American occupation of Japan ended in April 1952 when the country regained its independence. A separate peace treaty was concluded later between Japan and China. There was, however, no agreement with the Soviet Union, which, at American behest, had declared war against Japan in the closing days of the Second World War. Soviet forces occupied Sakhalin and the Kurile islands to which Japan still lays claim.

The new Japan remained a monarchy, albeit one in which the emperor was a figurehead. Japan renounced war and the threat or use of force, but retained 'Self Defence Forces'. Japanese cities and industry were rebuilt. An astonishing economic recovery was led by an aggressive export policy. Huge investment in new technology gave the country a dominant position in many industries including motor vehicles, shipbuilding, electrical goods, electronics and computers. Japan grew to be the world's second biggest economy. This success is owed, in part, to the protection of domestic markets.

The power of Japanese industry was reflected in the political power of a small number of major corporations. From 1955 until 1993 the political scene was dominated by the centre-right pro-business Liberal Democrats (LDP). However, a series of major financial scandals broke the party's monopoly and coalition governments followed. By 2000 the LDP had resumed its dominant role.

In recent years, Japan has shown more confidence in international relations. The country is a major aid donor to developing countries. In 1992 the Diet (parliament) approved the involvement of Japanese military personnel and equipment in UN peacekeeping missions and in 2002 Japan contributed naval support vessels to the US-led intervention in Afghanistan. However, the country faces severe economic problems. A heavy international debt and domestic deflation left the Japanese economy in the doldrums at the turn of the century.

In March 2011 a huge offshore earthquake and a resulting tsunami devastated large areas of the northeast of Japan, causing between US\$120bn. and US\$235bn. of damage and killing over 10,000. The disaster also caused extensive damage to the Fukushima nuclear plant.

## **TERRITORY AND POPULATION**

Japan consists of four major islands, Honshu, Hokkaido, Kyushu and Shikoku, and many small islands, with an area of 377,950 sq. km. Census population of 1 Oct. 2010 (2005 census in brackets), 128,057,352 (127,767,994); of which males, 62,327,737 (62,348,977), females, 65,729,615 (65,419,017); population density (land area only), 351 per sq. km (351 per sq. km).

The UN gives a projected population for 2015 of 126.07m. The population started to decline in 2009; the UN projects that by 2050 it will only be 109m.

In 2005, 65.8% of the population lived in urban areas. Foreigners registered on 31 Dec. 2007 were 2,152,973: including 606,889 Chinese, 593,489 Koreans, 316,967 Brazilians, 202,592 Filipinos, 59,696 Peruvians, 51,851 Americans, 41,384 Thais, 36,860 Vietnamese, 25,620 Indonesians, 20,589 Indians, 17,328 British, 11,459 Canadians, 11,255 Bangladeshis, 11,033 Australians, 9,332 Pakistanis and 1,573 stateless persons. In 2008 Japan accepted 57 asylum seekers (54 of whom were from Myanmar).

Japanese overseas, Oct. 2007, 1,085,671; of these 374,732 lived in the USA, 127,905 in China, 63,526 in the UK, 63,459 in Australia, 61,527 in Brazil, 47,376 in Canada, 42,736 in Thailand, 32,755 in Germany, 29,279 in France and 25,969 in Singapore.

The official language is Japanese.

A law of May 1997 'on the promotion of Ainu culture' marked the first official recognition of the existence of an ethnic minority in Japan. The Ainu were recognized as a people in their own right through a resolution passed by parliament in June 2008.

Japan is divided into 43 prefectures, one metropolis (Tokyo), one territory (Hokkaido) and two urban prefectures (Kyoto and Osaka). The populations and chief cities are:

Prefecture	Census pop. 2010	Chief city
Aichi	7,410,719	Nagoya
Akita	1,085,997	Akita
Aomori	1,373,339	Aomori
Chiba	6,216,289	Chiba
Ehime	1,431,493	Matsuyama
Fukui	806,314	Fukui
Fukuoka	5,071,968	Fukuoka
Fukushima	2,029,064	Fukushima
Gifu	2,080,773	Gifu
Gumma	2,008,068	Maebashi
Hiroshima	2,860,750	Hiroshima
Hokkaido	5,506,419	Sapporo
Hyogo	5,588,133	Kobe
Ibaraki	2,969,770	Mito
Ishikawa	1,169,788	Kanazawa
Iwate	1,330,147	Morioka
Kagawa	995,842	Takamatsu
Kagoshima	1,706,242	Kagoshima
Kanagawa	9,048,331	Yokohama
Kochi	764,456	Kochi
Kumamoto	1,817,426	Kumamoto
Kyoto	2,636,092	Kyoto
Mie	1,854,724	Tsu
Miyagi	2,348,165	Sendai
Miyazaki	1,135,233	Miyazaki
Nagano	2,152,449	Nagano
Nagasaki	1,426,779	Nagasaki
Nara	1,400,728	Nara
Niigata	2,374,450	Niigata
Oita	1,196,529	Oita

Osaka	2,665	Yokosuka	418

The Tokyo conurbation, with a population in 2005 of 35.2m., is the largest in the world, having overtaken New York around 1970.

## SOCIAL STATISTICS

Statistics (in 1,000) for calendar years:

	2001	2002	2003	2004	2005	2006	2007
Births	1,171	1,154	1,124	1,111	1,063	1,093	1,090
Deaths	970	982	1,015	1,029	1,084	1,084	1,108

Birth rate of Japanese nationals in present area in 2007, 8.6 per 1,000 population (1947: 34.3); death rate, 8.8. Marriage rate in 2007 (per 1,000 persons), 5.7; divorce rate, 2.0. In 2007 the mean age at first marriage was 30.1 for males and 28.3 for females. The infant mortality rate per 1,000 live births, 2.6 (2007), is one of the lowest in the world. In 2007 only 2.0% of births were outside marriage. Life expectancy at birth was 86.0 years for women and 79.0 years for men in 2007. Japan's life expectancy is the highest of any sovereign country. The World Health Organization's *World Health Statistics 2009* put the Japanese in first place in a 'healthy life expectancy' list, with an expected 76 years of healthy life for babies born in 2007. Japan has a very quickly ageing population, stemming from a sharply declined fertility rate and one of the highest life expectancies in the world. In 2007 the total fertility rate was 1.34 births per woman (compared to 1.36 in 2000, 1.91 in 1975 and 3.65 in 1950). The percentage of the population over 65 rose from 10% in 1985 to more than 21% in 2007. Japan had an estimated 40,400 centenarians (35,000 women) in Sept. 2009—an increase of over 4,000 from Sept. 2008, and the 39th consecutive year the number has risen. In 2008 the population fell by 0.1%.

There was a total of 33,093 suicides in 2007, a rate of 35.8 males per 100,000 and 13.7 females per 100,000. The rate among women is one of the highest in the world.

A UNICEF report published in 2005 showed that 14.3% of children in Japan live in poverty (in households with income below 50% of the national median), compared to just 2.4% in Denmark.

## CLIMATE

The islands of Japan lie in the temperate zone, northeast of the main monsoon region of southeast Asia. The climate is temperate with warm, humid summers and relatively mild winters except in the island of Hokkaido and northern parts of Honshu facing the

Sea of Japan. There is a month's rainy season in June–July, but the best seasons are spring and autumn, although Sept. may bring typhoons. Tokyo, Jan. 5–8°C, July 25–4°C. Annual rainfall 1,467 mm. Hiroshima, Jan. 5–3°C, July 26–9°C. Annual rainfall 1,541 mm. Nagasaki, Jan. 6–8°C, July 26–6°C. Annual rainfall 1,960 mm. Osaka, Jan. 5–8°C, July 27–2°C. Annual rainfall 1,306 mm. Sapporo, Jan. –4–1°C, July 20–5°C. Annual rainfall 1,128 mm.

### CONSTITUTION AND GOVERNMENT

The Emperor is Akihito (b. 23 Dec. 1933), who succeeded his father, Hirohito on 7 Jan. 1989 (enthroned, 12 Nov. 1990); married 10 April 1959, to Michiko Shoda (b. 20 Oct. 1934). *Offspring*: Crown Prince Naruhito (Hironomiya; b. 23 Feb. 1960); Prince Akishino (Akishinomiya; b. 30 Nov. 1965); Princess Sayako (Norinomiya; b. 18 April 1969). Prince Naruhito married Masako Owada (b. 9 Dec. 1963) 9 June 1993. *Offspring*: Princess Aiko (b. 1 Dec. 2001). Prince Fumihito (henceforth to adopt his new title Prince Akishino) married Kawashima Kiko (b. 11 Sept. 1966) 29 June 1990. *Offspring*: Princess Mako (23 Oct. 1991); Princess Kako (29 Dec. 1994); Prince Hisahito (6 Sept. 2006). Princess Sayako married Yoshiaki Kuroda (b. 17 April 1965) 15 Nov. 2005 and gave up her imperial title in doing so as required by law. The succession to the throne is fixed upon the male descendants. Prince Hisahito was the first male born into the imperial family since 1965. The 1947 constitution supersedes the Meiji constitution of 1889. In it the Japanese people pledge themselves to uphold the ideas of democracy and peace. The Emperor is the symbol of the unity of the people. Sovereign power rests with the people. The Emperor has no powers related to government. Fundamental human rights are guaranteed.

Legislative power rests with the *Diet*, which consists of the *House of Deputies* (Shugi-in), elected by men and women over 20 years of age for a four-year term, and an upper house, the *House of Councillors* (Sangi-in) of 242 members (96 elected by party list system with proportional representation according to the d'Hondt method and 146 from prefectural districts), one-half of its members being elected every three years. The number of members has been reduced in recent years. There had been 252 members until 2001 and 247 members from 2001 until elections of July 2004.

The number of members in the House of Deputies was reduced from 500 to 480 for the election of June 2000, of whom 300 were to be elected from single-seat constituencies, and 180 by proportional representation on a base of 11 regions. There is a 2% threshold to gain one of the latter seats. Donations to individual politicians are to be supplanted over five years by state subsidies to parties.

A new electoral law passed in Oct. 2000 gives voters a choice between individual candidates and parties when casting ballots for the proportional representation seats in the *House of Councillors*.

On becoming prime minister in April 2001 Junichiro Koizumi established a panel to consider introducing the direct election of prime ministers by popular vote.

### National Anthem

'Kimigayo' ('The Reign of Our Emperor'); words 9th century, tune by Hayashi Hiromori. On 9 Aug. 1999 a law on the national flag and the national anthem was enacted. The law designates the Hinomaru and 'Kimigayo' as the national flag and national anthem of Japan. The 'Kimi' in 'Kimigayo' indicates the Emperor who is the symbol of the State and of the unity of the people, deriving his position from the will of the people with whom resides sovereign power; 'Kimigayo' depicts the state of being of the country as a whole.

### GOVERNMENT CHRONOLOGY

Prime ministers since 1945. (DPJ = Democratic Party of Japan; JNP = Japan New Party; JSP = Japan Socialist Party; Jt = Liberal Party; LDP = Liberal Democratic Party; Mt = Democratic Party; SDP = Social Democratic Party; SSt = Renewal Party; n/p = non party)

2011–	DPJ	Yoshihiko Noda

### RECENT ELECTIONS

Elections to the House of Deputies were held on 30 Aug. 2009. Turnout was 69.3%. The opposition Democratic Party of Japan (DPJ; Minshuto), won 308 seats (with 42.4% of the vote); the ruling Liberal Democratic Party (LDP; Jiyu Minshuto), 119 (26.7%); New Clean Government Party (New Komeito), 21 (11.5%); Communist Party of Japan (Nihon Kyosanto), 9 (7.0%); Social Democratic Party (SDP; Shakai Minshuto), 7 (4.3%); Your Party (Minna no To), 5 (4.3%); People's New Party (Kokumin Shinto), 3 (1.7%). Non-partisans took 8 seats. Only 54 (a record high) of the 480 elected MPs were women. The DPJ's victory brought to an end 13 years of LDP rule. Apart from a short period of time in 1993 and 1994 the LDP had been in power continuously since 1954.

Elections to 121 seats of the House of Councillors were held on 11 July 2010. The LDP gained 51 seats, DPJ 44, Your Party 10, New Komeito 9, Communist Party of Japan 3, Social Democratic Party 2, New Renaissance Party 1 and Sunrise Party of Japan 1. As a result the DPJ held 106 seats, LDP 84, New Komeito 19, Your Party 11, Communist Party of Japan 6, Social Democratic Party 4, People's New Party 3, Sunrise Party of Japan 3, New Renaissance Party 2, New Nippon Party 1, Happiness Realization Party 1 and ind. 2. The DPJ–New Nippon Party coalition held 110 of the 242 seats and the LDP–New Komeito–New Renaissance Party coalition 105.

### CURRENT GOVERNMENT

*Prime Minister*: Yoshihiko Noda; b. 1957 (DPJ); sworn in 2 Sept. 2011).

Following the withdrawal of the Social Democratic Party from the coalition in May 2010, in March 2012 the government

consisting of the Democratic Party of Japan and the People's New Party comprised:

*Deputy Prime Minister:* Katsuya Okada (also *Minister for Administrative Reform, Total Reform of Social Security and Tax, and Civil Service Reform, and Minister of State for Government Revitalization, New Public Commons, and Measures for Declining Birth Rate and Gender Equality*).

*Minister of Finance:* Jun Azumi. *Foreign Affairs:* Koichiro Gemba. *Economy, Trade and Industry, and Minister of State for the Corporation in Support of Compensation for Nuclear Damage, and Nuclear Incident Economic Countermeasures:* Yukio Edano. *Defence:* Naoki Tanaka. *Environment and Nuclear Disaster:* Goshi Hosono. *Justice:* Toshio Ogawa. *Internal Affairs and Communication, and Minister of State for Okinawa and Northern Territories Affairs:* Tatsuo Kawabata. *Health, Labour and Welfare:* Yoko Komiyama. *Education, Culture, Sports, Science and Technology:* Hirofumi Hirano. *Agriculture, Forestry and Fisheries:* Michihiko Kano. *Land, Infrastructure, Transport and Tourism:* Takeshi Maeda.

*Chief Cabinet Secretary:* Osamu Fujimura. *Minister of State for Economic and Fiscal Policy, and Science and Technology Policy:* Motohisa Furukawa. *Minister of State for Postal Reform and Financial Affairs:* Shozaburo Jimi. *Minister of State for Consumer Affairs and Food Safety, and the North Korean Abduction Issue:* Jin Matsubara. *Minister of State for Post-disaster Reconstruction:* Tatsuo Hirano.

*Office of the Prime Minister:* <http://www.kantei.go.jp>

## CURRENT LEADERS

### Yoshihiko Noda

#### *Position*

Prime Minister

#### *Introduction*

Yoshihiko Noda became prime minister in Sept. 2011, following the resignation of Naoto Kan. Regarded as a fiscal conservative and a reformer, he favours raising taxes and reining in public spending. As well as addressing Japan's deficit, he faces the challenges of reconstruction after the devastation caused by the March 2011 earthquake and tsunami.

#### *Early Life*

Yoshihiko Noda was born on 20 May 1957 in Funabashi, Chiba Prefecture. The son of a paratrooper, he graduated from the school of political science and economics at Waseda University in 1980. After postgraduate studies at the Matsushita School of Government and Management, he entered local politics and in 1987 was elected to the assembly of the Chiba Prefecture.

He was a founder member of the centre-left Japan New Party (JNP) in 1992 and the following year he was elected to the Diet. In 1999 he joined the newly formed Democratic Party of Japan (DPJ), serving as shadow minister for administrative and regulatory reform in 2001 and as shadow finance minister in 2004. Following the DPJ's victory in the Sept. 2009 general election, Noda became senior vice finance minister until June 2010, when he succeeded newly elected prime minister Naoto Kan as finance minister.

He argued for fiscal discipline to control Japan's mounting public debt and called for ministries to cut their budgets by 10% in 2011–12. Although the government budget was passed, its implementation was impeded by opposition control of the upper house. Sovereign debt crises overseas caused the yen to rise, threatening Japan's ability to export, and in Jan. 2011 Noda made the first of several interventions in international finance markets in a bid to stabilize the currency.

In March 2011 an earthquake and tsunami struck eastern Japan, causing the Fukushima nuclear plant disaster and confronting the government with an estimated 20–25trn. yen of

reconstruction costs, as well as producing a humanitarian crisis and energy shortages. Noda backed Kan's proposals to continue cutting the deficit while rebuilding but when concerted opposition forced Kan's resignation, Noda successfully contested the DPJ leadership, winning in the second round by 215 votes to 177. He took office on 2 Sept. 2011.

#### *Career in Office*

Noda has argued for sustained fiscal tightening and proposed an increase in consumption tax to pay for social security and reconstruction. This provoked opposition within the DPJ and in Jan. 2012 nine MPs left to form the Kizuna Party. In response, Noda reshuffled his cabinet and called for cross-party discussions on implementing reforms. Besides having to win opposition support in the upper house, he continues to be hampered by divisions within the DPJ and a financial scandal involving a veteran former minister.

Internationally, Noda has emphasized the importance of Japan's relationship with the USA, while maintaining co-operation with China. Relations with China remain sensitive, especially over issues of national identity. In Nov. 2011 Noda committed Japan to negotiations on joining the Trans-Pacific Partnership, a regional free trade agreement. This has popular support but is opposed by most opposition parties and by some within the DPJ because of its potential impact on Japan's rice farmers.

## DEFENCE

Japan has renounced war as a sovereign right and the threat or the use of force as a means of settling disputes with other nations. Its troops had not previously been able to serve abroad, but in 1992 the House of Representatives voted to allow up to 2,000 troops to take part in UN peacekeeping missions. A law of Nov. 1994 authorizes the Self-Defence Force to send aircraft abroad in rescue operations where Japanese citizens are involved. Following the attacks on New York and Washington of 11 Sept. 2001, legislation was passed allowing Japan's armed forces to take part in operations in the form of logistical support assisting the US-led war on terror. The legislation permits troops to take part in limited overseas operations but not to engage in combat. In May 2003 parliament passed a series of measures in response to North Korea's nuclear programme. Central government won increased control over the military which now has greater freedom to requisition civilian property in the event of attack.

In Jan. 1991 Japan and the USA signed a renewal agreement under which Japan pays 40% of the costs of stationing US forces and 100% of the associated labour costs. US forces in Japan totalled 38,660 in 2006.

Total armed forces in 2006 numbered 260,250.

Defence expenditure in 2008 totalled US\$46,296m. (US\$361 per capita). In 2007 defence spending represented 0.9% of GDP.

#### **Army**

The 'Ground Self-Defence Force' is organized in five regional commands and in 2006 had a strength of 148,200. Equipment includes 980 main battle tanks.

#### **Navy**

The 'Maritime Self-Defence Force' is tasked with coastal protection and defence of the sea lanes to 1,000 nautical miles range from Japan. The main elements of the fleet are organized into four escort flotillas based at Yokosuka, Kure, Sasebo, Maizuru and Ominato. The submarines are based at Yokosuka and Kure.

Personnel in 2006 numbered 44,400. The combatant fleet, all home-built, includes 18 diesel submarines, 45 destroyers and nine frigates. The Air Arm operated 80 combat aircraft in 2006. Air Arm personnel was estimated at 9,800 in 2006.

### Air Force

An 'Air Self-Defence Force' was inaugurated on 1 July 1954. Its equipment includes (2006) F-15 *Eagles*, F-4E *Phantoms* and Mitsubishi F-1 fighters.

Strength (2006) 45,600 operating 300 combat aircraft.

### ECONOMY

In 2007 services accounted for 68.4% of GDP, industry 30.2% and agriculture, forestry and fisheries 1.4%.

According to the anti-corruption organization *Transparency International*, Japan ranked equal 14th in the world in a 2011 survey of the countries with the least corruption in business and government. It received 8.0 out of 10 in the annual index.

In terms of total aid given, Japan was the fifth most generous country in the world in 2009 after the USA, France, Germany and the UK, donating US\$9.5bn. in international aid in the course of the year. However, this represented only 0.18% of its GNI (compared to the UN target of 0.7%).

### Overview

Following China's recent growth, Japan is now the world's third largest economy at market exchange rates, having been the second largest up to 2010. It is a major donor of global aid, capital and credit. Japan enjoyed its longest economic recovery since the Second World War from 2002–08. Export demand drove expansion, with its share of GDP rising from 10.6% to 16.5%. However, in 2008 the economy fell into recession amid global financial turmoil. On 11 March 2011 a magnitude 9.0 earthquake and subsequent tsunami struck the country, causing massive humanitarian and financial damage. Reconstruction efforts are expected to add fiscal costs of around 3% of GDP over the next few years, according to the IMF.

From 1973 until the asset market bubble burst in 1991, Japan's economy grew at an average of more than 4% a year. Lax monetary policies, however, had caused the bubble economy and in its aftermath there was deflation, static wages and declining investment. In the decade 1991–2001 growth slowed to a yearly rate of 1.1%. Prior to the global financial crisis, this improved to 1.8% over the period 2002–07. Exports were the initial driving force before momentum shifted to strong domestic demand and private investment.

The IMF attributed the strengthening of the economy to reforms in labour and product markets, success in bank balance sheet restructuring and corporate efforts to eliminate excess capacity and debt. The traditional system of lifetime employment, limiting labour market flexibility, is slowly being replaced by more flexible contracts. Japan's labour productivity in 2009 was 22nd among 33 OECD countries, a decline from 21st in 2008. In the OECD area Japan has the highest proportion of working age population with at least a secondary school education.

The system of *keiretsu* (closely knit production chains linking manufacturers, suppliers and distributors) is gradually eroding. Foreign direct investment nearly tripled between 1998 and 2002, reaching record levels in 2008 despite negative inflows in 2006. Japan ranks second among major industrialized countries for expenditure on science and technology, with R&D spending equalling 3.6% of GDP in 2010.

The Long-Term Trade Agreement (LTTA) led to Japan becoming China's most important trading partner in the late 1970s, with Japan particularly interested in close ties with a regional oil supplier. Since the adoption of market policies in China, domestic demand for energy has increased rapidly, constraining the export market and causing friction between the two countries. Expanding international ties has been a priority of the Chinese government, leading to Japan's relative decline as a major trading partner.

Japanese households retain a high level of net wealth relative to other OECD countries. 85% of the population has savings with Japan Post. With assets of over US\$3trn., it is one of the largest

financial institutions in the world and the largest life insurer in Japan. Privatization of the postal service in 2007 split it into four separate units for savings, insurance, postal services, and personnel and property management.

The banking system has been strengthened by tighter regulation introduced in the Program for Financial Revival (PFR). Despite sectoral improvements, bank profitability remains low by OECD standards, with small profit margins and greater vulnerability to shocks and losses. Nonetheless, the banking system has remained relatively well insulated from the global financial crisis as a result of its low exposure to toxic securities and bad debts. Commercial banks have increased lending to firms as credit has dried up, helped by government guarantees for small and medium-sized businesses.

The economy experienced four consecutive quarters of contraction during 2008 and 2009 owing to a collapse in overseas demand compounded by a strong yen. Difficulties were accentuated by a reliance on manufactured exports, notably cars and consumer technology, for which demand fell particularly quickly. The economy emerged from recession in the second quarter of 2009 on a rebound in exports and fiscal stimulus measures. Unemployment fell by half a percentage point in 2011 compared to 2010. The government's focus in 2011 was on reconstruction spending and reducing public debt.

In 2010 public debt stood at an estimated 225.8% of GDP, the second highest level in the world after Zimbabwe. Government revenue stood at 26.9% of GDP in 2009 and is among the lowest in the OECD. Japan's fiscal position worsened as a result of the global financial crisis. A Sustainability Report by the IMF in 2011 noted that Japan is experiencing 'moderate' to 'large' fiscal and private saving imbalances, which have grown to unsustainable levels over the last two decades.

Japan has the world's most aged and fastest ageing population, with the elderly share of the population increasing by 14% between 1980 and 2010. It is one of the few OECD countries where the working-age population started declining in the early 2000s. Between 1990 and 2010 spending on social security increased by 60%, putting further pressure on public finances.

### Currency

The unit of currency is the *yen* (JPY). Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
-0.8%	-0.9%	-0.2%	0.0%	-0.3%	0.2%	0.1%	1.4%	-1.3%	-0.7%

Japan's foreign exchange reserves totalled US\$996,552bn. in Dec. 2009 (US\$203.2bn. in 1998)—second only to those of China. Gold reserves in Sept. 2009 were 24.60m. troy oz. In Dec. 2009 the currency in circulation consisted of 80,954,000m. yen Bank of Japan notes and 4,556,000m. yen subsidiary coins.

### Budget

Ordinary revenue and expenditure for fiscal year ending 31 March 2009 balanced at 88,548,000m. yen.

Of the proposed revenue (in yen) in 2009, 46,103,000m. was to come from taxes and stamps, 33,294,000m. from public bonds. Main items of expenditure (in yen): social security, 24,834,000m.; local government, 16,111,000m.; public works, 7,070,000m.; education, 5,310,000m.; defence, 4,774,000m.

The outstanding national debt incurred by public bonds was 680,448,000m. yen in March 2008.

The estimated 2009 budgets of the prefectures and other local authorities forecast a total revenue of 82,556,000m. yen, to be made up partly by local taxes and partly by government grants and local loans.

VAT is 5%.

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
0.2%	0.3%	1.4%	2.7%	1.9%	2.0%	2.4%	-1.2%	-6.3%	4.1%

Provisional figures suggest that the economy shrank by 0.9% in 2011 according to the Cabinet Office. In 2010 Japan's total GDP was US\$5,497.8bn., the third highest in the world after the USA and China, which replaced Japan as the second largest economy in 2010.

### Banking and Finance

The Nippon Ginko (Bank of Japan), founded 1882, finances the government and the banks, its function being similar to that of a central bank in other countries. The Bank undertakes the management of Treasury funds and foreign exchange control. Its *Governor* is Masaaki Shirakawa (appointed April 2008 for a five-year term). Its gold bullion and cash holdings at 31 Dec. 2002 stood at 638,000m. yen.

There were in Feb. 2004, six city banks, 64 regional banks, 27 trust banks, two long-term credit banks, 50 member banks of the second association of regional banks, 309 Shinkin banks (credit associations), 185 credit co-operatives, 72 foreign banks and six others. There is also a public corporation Japan Post handling postal savings which amounted to 229,938,100m. yen in Sept. 2003. Total savings by individuals, including insurance and securities, stood at 1,209,453,100m. yen on 30 Sept. 2003, and about 61% of these savings were deposited in banks and the post office. In 1999 a number of important mergers were announced in the banking sector, most notably the proposed merger of the Industrial Bank of Japan, Dai-Ichi Kangyo and Fuji Bank, which in Sept. 2000 created Mizuho Financial Group, at the time the world's biggest bank in terms of assets, at over 135,000bn. yen (US\$1.3trn.). The second and fourth biggest banks, the Mitsubishi Tokyo Financial Group and UFJ Holdings, announced in Aug. 2004 that they had reached a basic agreement to merge to create Japan's largest bank. The new bank, named Bank of Tokyo-Mitsubishi UFJ, came into existence in Jan. 2006 with assets of 190,000bn. yen (US\$1.6trn.). In Oct. 2007 the newly-created Japan Post Bank became the world's largest bank by assets, at US\$3.1trn. (although in Dec. 2011 it was only the fifth largest, with assets of US\$2.5trn.).

Japan's banks are in a situation where many of them would be insolvent if they admitted the market value of the loans, shares and property they hold. At 31 March 2003 it was estimated that the banking system's bad loans amounted to 21,441bn. yen.

Foreign direct investment was US\$11.9bn. in 2009, down from a record US\$24.4bn. in 2008.

There are five stock exchanges, the largest being in Tokyo.

## ENERGY AND NATURAL RESOURCES

### Environment

Japan's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 accounted for 4.0% of the world total and were equivalent to 9.5 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Japan 21st in the world, with 86.3%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

Japan is poor in energy resources, and nuclear power generation is important in reducing dependence on foreign supplies. However, following the March 2011 earthquake and Fukushima disaster only 11 of 54 reactors in operation before the earthquake—with a capacity of 9,864 MW, down from 48,960 MW—were still in use in Sept. 2011. In 2009 nuclear reactors produced approximately 29% of electricity. Total installed generating capacity was 274.5m. kW in 2006. Electricity produced in 2005–06 was 1,157,911m.

kWh. In 2006–07, ten regional publicly-held supply companies produced 70.7% of output. Consumption per capita in 2007 was an estimated 8,990 kWh.

### Oil and Gas

Output of crude petroleum, 2008, was 985,680 kilolitres, almost entirely from oilfields on the island of Honshu, but 234.4m. kilolitres of crude oil had to be imported. Output of natural gas, 2008, 3,735m. cu. metres; with reserves (2005) of 40bn. cu. metres.

### Minerals

Production in tonnes: zinc (2006), 7,169; copper (2002), 1,519; lead (2006), 777; iron (2005), 736; silver (2006), 11,463 kg; gold (2008), 6,868 kg. Output of other minerals (2008 unless otherwise indicated, in 1,000 tonnes): limestone, 156,813; quartzite, 10,682; gypsum (2004), 5,865; silica sand, 3,664; dolomite, 3,370; coal (2004), 1,339; salt (2004), 1,225.

### Agriculture

The agricultural population was 4.08m. in 2004 (of whom 2.17m. were economically active), compared to 12.98m. in 1980. Land under cultivation in 2009 was 4.6m. ha., down from 6.1m. ha. in 1961. In 2002 Japan had 0.34m. ha. of permanent crops. Average farm size was 1.6 ha. in 2002. In 2002 there were 2,028,000 tractors and 1,042,000 harvester-threshers.

Rice is the staple food, but its consumption is declining. Rice cultivation accounted for 1,627,000 ha. in 2008. Output of rice (in 1,000 tonnes) was 10,748 in 1995, 9,490 in 2000 and 8,823 in 2008.

Production in 2008 (in 1,000 tonnes) of sugar beets was 4,248; potatoes, 2,743; sugarcane, 1,598; cabbage, 1,389; onions, 1,271; wheat, 881; tomatoes, 733; carrots, 657; cucumbers, 627; lettuce, 544; aubergines, 366; spinach, 293; soybeans, 262; pumpkins and squash, 243; barley, 217; yams, 181. Sweet potatoes, which in the past mitigated the effects of rice famines, have, in view of rice over-production, decreased from 4,955,000 tonnes in 1965 to 1,011,000 tonnes in 2008. Domestic sugar production accounted for only 36.7% of consumption in 2006. 1.31m. tonnes were imported, of which 42.0% from Australia, 39.9% from Thailand and 13.8% from South Africa.

Fruit production, 2008 (in 1,000 tonnes): apples, 911; oranges (2006), 910; melons and watermelons, 611; pears, 362; persimmons, 267; grapes, 201.

Livestock (2008): 9.75m. pigs, 4.42m. cattle (including about 1.53m. milch cows), 285m. chickens; and (2003) 34,000 goats, 20,000 horses and 11,000 sheep. Livestock products, 2008 (in 1,000 tonnes): milk, 7,982; meat (2003), 2,991; eggs, 2,554.

### Forestry

Forests covered 24.87m. ha. in 2005, or 68.2% of the land area. Timber production was 17.75m. cu. metres in 2007.

### Fisheries

The catch in 2008 was 5,592,000 tonnes, excluding whaling. More than 98% of fish caught are from marine waters. Japan is the leading importer of fishery commodities, with imports in 2005 totalling US\$14.44bn.

## INDUSTRY

The leading companies by market capitalization in Japan in March 2011 were: Toyota Motor Corporation (US\$139.4bn.); NTT DoCoMo, a mobile telecommunications company (US\$77.0bn.); and Honda Motor Corporation (US\$68.3bn.).

The industrial structure is dominated by corporate groups (*keiretsu*) either linking companies in different branches or linking individual companies with their suppliers and distributors.

Japan's industrial capacity, 2004, numbered 246,603 plants of all sizes, employing 8.11m. production workers.

Output in 2003 included: watches, 523.5m.; personal computers (2007), 8.35m.; television sets (2005), 11.07m.; refrigerators, 2.86m.; radio sets (2005), 1.77m. The chemical industry ranks

fourth in shipment value after machinery, metals and food products. Production, 2008, included (in tonnes): sulphuric acid, 7.23m.; caustic soda (2005), 3.89m.; ammonium sulphate, 1.41m.; compound fertilizers, 1.23m. A total of 11,564,000 motor vehicles were manufactured in Japan in 2008, making it the world's largest vehicle producer. It is also the largest producer of passenger cars (9,916,000 in 2008).

Output, in 1,000 tonnes, 2009: crude steel, 87,534; pig iron, 66,943; cement (2008), 62,810; ordinary rolled steel, 62,024.

2007 production (in 1,000 tonnes): distillate fuel oil, 55,300; petrol, 42,801; residual fuel oil, 29,545; kerosene, 18,783.

In 2008 paper production was 18.83m. tonnes; paperboard, 11.80m. tonnes.

Output of woven fabrics, 2008, 1,554m. sq. metres. Output of cotton yarn, 2007, 71,669 tonnes; and of cotton woven fabrics (2008), 327m. sq. metres. Output, 2007, 3,870 tonnes of woollen yarns and (2008) 61m. sq. metres of wool fabrics. Output, 2008, of synthetic woven fabrics, 1,008m. sq. metres; rayon woven fabrics, 36m. sq. metres; silk fabrics, 14m. sq. metres.

3,213m. litres of beer were produced in 2008–09; 13,649m. litres of soft drinks and mineral water in 2003; 878,000 tonnes of sugar in 2008–09.

Shipbuilding orders in 2005 totalled 8,698,000 GRT. In 2007, 17,240,220 GRT were launched of which 5,284,893 GRT were tankers.

### Labour

Total labour force, 2009, was 66.17m., of which 10.73m. were in manufacturing, 10.55m. in wholesale and retail trade, 6.21m. in health and welfare, 5.17m. in construction, 4.63m. in services, 3.80m. in hotels and restaurants, 3.48m. in transport and postal activities, 2.87m. in education and 2.42m. in agriculture and forestry. The declining population means that the United Nations expects the working-age population in 2050 to be lower than it was in the 1950s. Retirement age is being raised progressively from 60 years to reach 65 by 2013. However, in 2007 the average actual retirement age was 69 for men and 66 for women, one of the highest in the OECD.

In July 2009 unemployment stood at 5.7%, the highest rate on record (up from 3.9% in 2007 and 4.0% in 2008 as a whole). The rate has since fallen, and was 4.6% in Dec. 2011. In 2005, 5,629 working days were lost in industrial stoppages (down from 9,755 in 2004). Between 1996 and 2005 strikes cost Japan an average of just one day per 1,000 employees a year—one of the lowest rates in the industrialized world. In 2006 the average working week was 38.38 hours.

## INTERNATIONAL TRADE

### Imports and Exports

Trade (in US\$1m.):

	2007	2008	2009	2010
Imports	622,243	762,534	551,985	694,059
Exports	714,327	781,412	580,719	769,774

Provisional estimates suggest that in 2011 merchandise imports exceeded exports for the first time in nearly half a century. In 2008 Japanese imports accounted for 4.6% of the world total imports, and exports 4.9% of the world total exports.

Distribution of trade by countries (customs clearance basis) (US\$1m.):

	Imports		Exports	
	2005	2006	2005	2006
Australia	22,963	27,291	11,626	12,209
China	101,621	115,818	74,991	90,695
Germany	16,701	18,032	17,464	19,964
Hong Kong	1,468	1,487	33,681	35,618
Korea, Republic of	22,870	26,703	43,669	49,146
Saudi Arabia	26,909	36,340	3,912	4,537

	Imports		Exports	
	2005	2006	2005	2006
Taiwan	16,921	19,872	40,809	43,113
Thailand	14,579	16,502	21,028	22,392
UAE	23,719	30,854	4,540	5,915
USA	60,030	66,471	125,636	142,286

China has in the meantime overtaken the USA as Japan's leading trading partner. In 2005 machinery and transport equipment accounted for 26.6% of Japan's imports and 65.6% of exports; chemicals, manufactured goods classified chiefly by material and miscellaneous manufactured articles 32.0% of imports and 32.1% of exports; mineral fuels, lubricants and related materials 25.5% of imports and 0.7% of exports; food, live animals, beverages and tobacco 9.8% of imports and 0.5% of exports; inedible crude materials (except fuels), and animal and vegetable oil and fats 6.1% of imports and 1.1% of exports.

The importation of rice was prohibited until the emergency importation of 1m. tonnes from Australia, China, Thailand and the USA in 1993–94 to offset a poor domestic harvest. The prohibition was lifted in line with WTO agreements. Until 2000 rice imports had limited access; the market is now fully open.

## COMMUNICATIONS

### Roads

The total length of roads (including urban and other local roads) was 1,196,217 km at 1 April 2008. There were 54,736 km of national roads of which 49,756 km were paved. In 2006, 79.2% of all roads were paved. Motor vehicles, at 31 March 2010, numbered 78,693,000, including 40,419,000 passenger cars and 6,362,000 trucks. In 2007 there were 5,353,648 new vehicle registrations. In 2009 there were 4,914 road deaths (10,679 in 1995).

The world's longest undersea road tunnel, spanning Tokyo Bay, was opened in Dec. 1997. The Tokyo Bay Aqualine, built at a cost of 1.44trn. yen (US\$11.3bn.), consists of a 4.4 km (2.7 mile) bridge and a 9.4 km tunnel that allows commuters to cross the bay in about 15 minutes.

### Rail

The first railway was completed in 1872, between Tokyo and Yokohama (29 km). Most railways are of 1,067 mm gauge, but the high-speed 'Shinkansen' lines are standard 1,435 mm gauge. In April 1987 the Japanese National Railways was reorganized into seven private companies, the Japanese Railways (JR) Group—six passenger companies and one freight company. Total length of railways in 2008–09 was 27,343 km, of which the JR had 19,987 km and other private railways 7,356 km. In 2008–09 the JR carried 8,984m. passengers (other private, 13,992m.) and 33m. tonnes of freight (other private, 13m.). An undersea tunnel linking Honshu with Hokkaido was opened to rail services in 1988.

There are metros in Tokyo (two metro systems, total 304.1 km in 2008), Fukuoka (29.8 km), Hiroshima (18.4 km), Kobe (30.6 km), Kyoto (28.8 km), Nagoya (89.1 km), Osaka (137.8 km), Sapporo (48.0 km), Sendai (14.8 km) and Yokohama (40.4 km). There are over 40 electric light railways and tram networks in 14 cities.

Japan was ranked second only to Switzerland for quality of rail infrastructure in the World Economic Forum's *Global Competitiveness Report 2009–2010*.

### Civil Aviation

The main international airports are at Fukuoka, Hiroshima, Kagoshima, Nagoya, Naha, Niigata, Osaka (Kansai International), Sapporo, Sendai and two serving Tokyo—at Narita (New Tokyo International) and Haneda (Tokyo International). The principal airlines are Japan Airlines International (JAL), formed when Japan Airlines and Japan Air System merged in 2001, and All Nippon Airways. In Jan. 2010 JAL filed for bankruptcy protection after making a single-quarter loss of nearly 100bn. yen. The move

prompted a restructuring of the company and the expected loss of 15,600 jobs. In the financial year 2008 Japanese companies carried 92.89m. passengers on domestic services and 16.43m. passengers on international services. JAL flew 361.8m. km in 2002 and carried 33,525,752 passengers, All Nippon Airways flew 259.1m. km and carried 43,680,438 passengers, and Japan Air System flew 106.9m. km and carried 21,426,817 passengers.

In 2007 Narita handled 35,478,146 passengers (mainly on international flights) and 2,254,421 tonnes of freight (making it the 7th busiest airport in the world for freight). Although Tokyo Haneda is mainly used for domestic flights, the opening of a dedicated international terminal in 2010 in conjunction with the completion of a fourth runway has allowed the number of international flights serving the airport to increase considerably; it handled 66,823,414 passengers in 2007 (making it the 4th busiest airport in the world for overall traffic volume).

### Shipping

In Jan. 2009 there were 2,524 ships of 300 GT or over registered, totalling 12.29m. GT. Of the 2,524 vessels registered, 966 were general cargo ships, 499 oil tankers, 370 bulk carriers, 306 passenger ships, 249 chemical tankers, 162 liquid gas tankers and 22 container ships. The Japanese-controlled fleet is the largest in the world, comprising 3,674 vessels of 1,000 GT or over in Jan. 2009. Only 646 of the 3,474 vessels in Jan. 2009 were flying the Japanese flag. The busiest ports are Nagoya (218,130,000 freight tons handled in 2008), Chiba, Yokohama, Kitakyushu and Osaka.

### Coastguard

The 'Japan Coast Guard' consists of one main headquarters, 11 regional headquarters, 66 offices, one maritime guard and rescue office, 53 stations, six info-communication management centres, seven traffic advisory service centres, 14 air stations, one transnational organized crime strike force station, one special security station, one special rescue station, one national strike team station, five district communications centres, four hydrographic observatories, one Loran navigation system centre and 39 aids-to-navigation offices (with 5,604 aids-to-navigation facilities); and controlled 52 large patrol vessels, 44 medium patrol vessels, 23 small patrol vessels, 233 patrol craft, 13 hydrographic service vessels, five large firefighting boats, four medium firefighting boats, 87 special guard and rescue boats, one aids-to-navigation evaluation vessel, four buoy tenders and 50 aids-to-navigation tenders in the financial year 2003. Personnel numbered 12,258. The 'Japan Coast Guard' aviation service includes 29 fixed-wing aircraft and 46 helicopters.

### Telecommunications

Telephone services have been operated by private companies (NTT and others) since 1985. In 2008 there were 48,427,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 110,395,000 (867.3 per 1,000 persons). In 2008 there were an estimated 96.0m. internet users—a figure exceeded only in China and the USA. Approximately 70% of internet users are men. Internet commerce, or e-commerce, amounted to 1.97trn. yen (US\$17.07bn.) in 2007. The fixed broadband penetration rate in Dec. 2010 was 26.7 subscribers per 100 inhabitants.

## SOCIAL INSTITUTIONS

### Justice

The Supreme Court is composed of the Chief Justice and 14 other judges. The Chief Justice is appointed by the Emperor, the other judges by the Cabinet. Every ten years a justice must submit himself to the electorate. All justices and judges of the lower courts serve until they are 70 years of age.

Below the Supreme Court are eight regional higher courts, district courts in each prefecture (four in Hokkaido) and the local courts.

The Supreme Court is authorized to declare unconstitutional any act of the Legislature or the Executive which violates the Constitution.

Jury trials were reintroduced in Aug. 2009 for the first time since the Second World War.

In 2008, 2,533,351 penal code offences were reported, including 1,297 homicides. The death penalty is authorized; there were two executions in 2010 but none in 2011. The average daily population in penal institutions in 2008 was 76,881 (60 per 100,000 population).

### Education

Education is compulsory and free between the ages of six and 15. Almost all national and municipal institutions are co-educational. In May 2009 there were 13,516 kindergartens with 110,692 teachers and 1,630,000 pupils; 21,970 elementary schools with 419,518 teachers and 7,064,000 pupils; 10,785 lower secondary schools with 250,771 teachers and 3,600,000 pupils; 5,074 upper secondary schools with 307,914 teachers and 3,347,000 pupils; 406 junior colleges with 33,040 teachers and 161,000 pupils; and 64 technical colleges with 6,525 teachers and 59,386 pupils. There were also 935 special schools for children with physical disabilities (74,141 teachers, 117,035 pupils).

Japan has seven main state universities: Tokyo University (1877); Kyoto University (1897); Tohoku University, Sendai (1907); Kyushu University, Fukuoka (1910); Hokkaido University, Sapporo (1918); Osaka University (1931); and Nagoya University (1939). In addition, there are various other state and municipal as well as private universities. There are 773 colleges and universities altogether with (May 2009) 2,846,000 students and 352,514 teaching staff (172,039 full-time).

In 2007 expenditure on education came to 3.5% of GDP and 9.4% of total government spending.

The adult literacy rate is at least 99%.

### Health

Hospitals on 1 Oct. 2008 numbered 8,794 with 1,609,403 beds. The hospital bed provision of 126 per 10,000 population was one of the highest in the world. Physicians in 2008 numbered 286,699; dentists, 99,426. In 2007 Japan spent 8.1% of its GDP on health, with public spending accounting for 81.9% of total expenditure on health and private spending 18.1%.

### Welfare

There are various types of social security schemes in force, such as health insurance, unemployment insurance and age pensions. The old age pension system in Japan is made up of a two-tiered public benefit. The first tier of the public pension is the basic pension which is payable from age 65 with 25 years' contributions. To receive the full benefit amount, 40 years' contributions to the system are necessary. There is an earnings floor for contributions at approximately 28% of average earnings. The monthly premium of the National Pension is uniformly fixed (13,300 yen in fiscal year 2004). The full basic pension was a flat amount of 804,200 yen per annum in fiscal year 2002, paid in two-monthly instalments. A reduced early pension is available between the ages 60–64, while pensions may also be deferred up to age 69.

14 weeks maternity leave is statutory.

Social security expenditure in 2006–07 was 89,109.8bn. yen, including 47,325.3bn. yen on pensions and 28,102.7bn. on medical care. In 2006, 18,166,704 persons and 12,909,835 households received some form of regular public assistance. A proposed reform of the pension system involves the public making higher payments for lower benefits.

### RELIGION

State subsidies have ceased for all religions, and all religious teachings are forbidden in public schools. In Dec. 2007 Shintoism claimed 105.83m. adherents, Buddhism 89.54m.; these figures overlap. Christians numbered 2.14m.

## CULTURE

### World Heritage Sites

Japan has 16 sites on the UNESCO World Heritage List (date of inscription on the list in brackets): the Buddhist Monuments in the Horyu-ji Area (1993); Himeji-jo (1993); Yakushima (1993); Shirakami-Sanchi (1993); the Historic Monuments of Ancient Kyoto (Kyoto, Uji and Otsu Cities) (1994), including 13 of Kyoto's Buddhist temples, three Shinto shrines and one castle—temples include Byōdo-in, Daigo-ji, Enryaku-ji, Ginkaku-ji, Kinkaku-ji, Kiyomizu-dera, Kōzan-ji, Ninna-ji, Nishi Hongan-ji, Ryōan-ji, Saihō-ji, Tenryū-ji and Tō-ji; the Historic Villages of Shirakawa-go and Gokayama (1995); Hiroshima Peace Memorial (Genbaku Dome) (1996); Itsukushima Shinto Shrine (1996); the Historic Monuments of Ancient Nara (1998), including five Buddhist temples—Tōdai-ji, Kōfuku-ji, Gango-ji, Yakushi-ji and Tōshōdai-ji—and three listed shrines—Kasuga Taisha, Kasuga Yama Primeval Forest and the remains of Heijō-kyō Palace; Shrines and Temples of Nikko (1999); Gusuku Sites and Related Properties of the Kingdom of Ryukyu (2000); Sacred sites and pilgrimage routes in the Kii mountain range (2004); marine and land ecosystems at Shiretoko (2005); the Iwami Ginzan Silver Mine and its cultural landscape (2007); Hiraizumi—temples, gardens and archaeological sites representing the Buddhist Pure Land (2011); and Ogasawara Islands (2011).

### Press

In 2009 daily newspapers numbered 121 with aggregate circulation of 65.08m. including four major English-language newspapers. The newspapers with the highest circulation are *Yomiuri Shimbun* (daily average of 10.0m. copies in 2005) and *Asahi Shimbun* (daily average of 8.1m. copies in 2005). They are also the two most widely read newspapers in the world. Japan has one of the highest circulation rates of daily newspapers in the world, at 633 per 1,000 adult inhabitants in 2005.

In 2008, 78,013 book titles were published.

### Tourism

In 2007, 9,152,186 foreigners visited Japan, 2,845,556 of whom came from South Korea, 1,428,873 from Taiwan and 1,140,419 from mainland China. Japanese travelling abroad totalled 17,294,935. Tourism receipts in 2007 totalled US\$12.4bn.

### Festivals

Japan has a huge number of annual festivals, among the largest of which are the Sapporo Snow Festival (Feb.); Hakata Dontaku, Fukuoka City (May); the Sanja Festival of Asakusa Shrine, Tokyo (May); the Tanabata Festival in Hiratsuka City (July) and Sendai City (Aug.); the Nebuta Festival in Aomori City (Aug.); and Jidai Maturi, Kyoto (Oct.).

## DIPLOMATIC REPRESENTATIVES

Of Japan in the United Kingdom (101–104 Piccadilly, London, W1J 7JT)

*Ambassador:* Keiichi Hayashi.

Of the United Kingdom in Japan (1 Ichiban-cho, Chiyoda-ku, Tokyo 102-8381)

*Ambassador:* David Warren.

Of Japan in the USA (2520 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Ichiro Fujisaki.

Of the USA in Japan (10–5, Akasaka 1-chome, Minato-ku, Tokyo)

*Ambassador:* John V. Roos.

Of Japan to the United Nations

*Ambassador:* Tsuneo Nishida.

Of Japan to the European Union

*Ambassador:* Kojiro Shiojiri.

# JORDAN

Al-Mamlaka Al-Urduniya Al-Hashemiyah  
(Hashemite<sup>1</sup> Kingdom of Jordan)

Capital: Amman

Population projection, 2015: 6·80m.

GNI per capita, 2011: (PPP\$) 5,300

HDI/world rank: 0·698/95

## KEY HISTORICAL EVENTS

Egyptian control was established over Semitic Amorite tribes in the Jordan valley in the 16th century BC. However, Egypt's conflict with the Hittite Empire allowed the development of autonomous kingdoms such as Edom, Moab, Gilead and Ammon (centred on modern Amman). The Israelites settled on the east bank of the Jordan in the 13th century and crossed into Canaan. David subjugated Moab, Edom and Ammon in the 10th century but the Assyrians wrested control in the 9th century, remaining until 612 BC. Nabataea expanded in the south during the Babylonian and Persian periods until conquered for Rome by Pompey in the 1st century BC. After Trajan's campaign of AD 106, the Jordan area was absorbed as Arabia Petraea.

Rome (later Byzantium) and Sassanid Persia clashed over the area but a Muslim army under Khalid ibn al-Walid defeated Byzantium in 636 at the Yarmuk River. After the fall of the Umayyad Caliphate in 750, the centre of power moved from Damascus to Baghdad. The principality of Oultre Jourdain, established by the Christian crusader kingdom of Jerusalem in the early 12th century, was destroyed by Saladin in 1187. The Mamluk Empire held power until the advent of the Turkish Ottoman Empire in the 16th century.

The Arabs of the Ottoman Damascus province rebelled with British support in 1916. The Hashemite Prince Faisal ibn Husayn took Aqaba in 1917 and the British took Amman and Damascus in 1918. The First World War victors decreed two mandates—British Palestine and French Syria. Britain created the Transjordan Emirate in 1922, ruled semi-autonomously by Faisal's brother, Abdullah. Full independence was achieved on 25 May 1946 as the Hashemite Kingdom of Transjordan (Jordan from 1949).

Transjordan declared war on the Israeli state in May 1948, taking the West Bank and East Jerusalem, an occupation supported only by Britain. Palestinian resistance to the annexation culminated in King Abdullah's assassination in 1951. Talal, his son and successor, was deemed mentally unfit in 1952 and Hussein Bin Talal was installed in 1953. After an attempted coup in 1957, instigated by West Bank Palestinians, King Hussein banned political parties and ended Palestinian representation. A brief union with Iraq, ruled by his cousin, ended after an Iraqi republican coup in 1958. Hussein turned to Britain and the USA for military and financial support.

Fatah and the Palestine Liberation Organization (PLO) maintained terrorist attacks on Israel from Jordan, provoking Israeli retaliation in the West Bank. Despite secret co-operation with Israel over containing the Palestinians, Hussein allied with Syria and Egypt in the war of June 1967. Israel repelled Jordanian forces from the West Bank, moving the *de facto* border to the River Jordan. This devastated the Jordanian economy but removed Palestinian opposition to the Hashemite regime. However, Jordan's relations with the Palestinians deteriorated; in Sept. 1970 four airliners were destroyed by Palestinian extremists in the Jordanian desert. Jordan, with US and British assistance, repelled a Syrian invasion and evicted the PLO. Relations with Israel also worsened from 1977 with the Jewish settlement programme in the West Bank.

On 31 July 1988 Hussein dissolved Jordan's legal and administrative ties with the West Bank in reaction to the *intifada*, which he saw as a threat to his regime. Elections in 1989 led the way to the suspension of martial law—in place from 1967–91. Hussein, constrained by Jordan's economic and political ties with Iraq, refused to abandon Saddam Hussein in the 1991 Gulf War, creating a rift with Jordan's Western partners. Multi-party elections were held in 1993, giving Hussein parliamentary support. He signed a peace treaty with Israel in 1994. In Jan. 1999 Hussein replaced as crown prince his brother, Hassan, with his son, Abdullah, who succeeded on his father's death a month later.

## TERRITORY AND POPULATION

Jordan is bounded in the north by Syria, east by Iraq, southeast and south by Saudi Arabia and west by Israel. It has an outlet to an arm of the Red Sea at Aqaba. Its area is 89,342 sq. km (including 540 sq. km inland water). The 2004 census population was 5,103,639; Dec. 2010 estimate, 6,113,000, giving a density of 68·8 per sq. km. The United Nations population estimate for 2004 was 5,400,000.

The UN gives a projected population for 2015 of 6·80m.

In 2005, 82·3% of the population lived in urban areas. Populations of the 12 governorates:

Governorate	Census 2004	Governorate	Census 2004
Ajloun	118,725	Karak	204,185
Amman	1,942,066	Ma'an	94,253
Aqaba	102,097	Madaba	129,960
Balqa	346,354	Mafraq	244,188
Irbid	928,292	Tafilah	75,267
Jerash	153,602	Zarqa	764,650

<sup>1</sup>Hashemite<sup>1</sup> denotes a descendant of the prophet Mohammed.

The largest towns, with 2004 census population, are: Amman, the capital, 1,036,330; Zarqa, 395,227; Irbid, 250,645.

Jordan's population includes an estimated 2-0m. Palestinian refugees. About 750,000 Iraqi refugees have entered Jordan since the start of the war in 2003.

The official language is Arabic.

### SOCIAL STATISTICS

Births (est.), 2008, 180,000; deaths, 20,000. Rates, 2008 per 1,000 population: birth (est.), 31; death (est.), 4. Annual population growth rate, 2000–05, 2.4%. Life expectancy at birth in 2007; 70.7 years for men, 74.3 for women. Infant mortality, 2005, 22 per 1,000 live births; fertility rate, 2008, 3.1 births per woman.

### CLIMATE

Predominantly a Mediterranean climate, with hot dry summers and cool wet winters, but in hilly parts summers are cooler and winters colder. Those areas below sea-level are very hot in summer and warm in winter. Eastern parts have a desert climate. Amman, Jan. 46°F (7.5°C), July 77°F (24.9°C). Annual rainfall 13.4" (340.6 mm). Aqaba, Jan. 61°F (16°C), July 89°F (31.5°C). Annual rainfall 1.4" (36.7 mm).

### CONSTITUTION AND GOVERNMENT

The Kingdom is a constitutional monarchy headed by H. M. King **Abdullah Bin Al Hussein II**, born 30 Jan. 1962, married H. M. Queen Rania (Rania Al-Yassin, b. 31 Aug. 1970) on 10 June 1993. He succeeded on the death of his father, H. M. King Hussein, on 7 Feb. 1999. *Sons*: Hussein, b. 28 June 1994; Hashem, b. 30 Jan. 2005; *daughters*: Iman, b. 27 Sept. 1996; Salma, b. 26 Sept. 2000.

The Constitution ratified on 8 Dec. 1952 provides that the Cabinet is responsible to Parliament. It was amended in 1954, 1958, 1960, 1973, 1974, 1976, 1984 and 2011. The legislature consists of a *Senate* of 60 members appointed by the King and a *Chamber of Deputies* of 120 members (12 are reserved for women) elected by universal suffrage. Nine seats are reserved for Christians, and three for Circassians or Chechens. A law of 1993 restricts each elector to a single vote.

The lower house was dissolved in 1976 and elections postponed because no elections could be held in the West Bank under Israeli occupation. Parliament was reconvened on 9 Jan. 1984. By-elections were held in March 1984 and six members were nominated for the West Bank, bringing Parliament to 60 members. Women voted for the first time in 1984. On 9 June 1991 the King and the main political movements endorsed a national charter which legalized political parties in return for the acceptance of the constitution and monarchy. Movements linked to, or financed by, non-Jordanian bodies are not allowed.

### National Anthem

'Asha al Malik' ('Long Live the King'); words by A. Al Rifai, tune by A. Al Tanir.

### GOVERNMENT CHRONOLOGY

Kings since 1946.

1946–51	Abdullah Bin Al Hussein Al Hashimi I
1951–52	Talal Bin Abdullah Al Hashimi
1953–99	Hussein Bin Talal Al Hashimi
1999–	Abdullah Bin Al Hussein Al Hashimi II

### RECENT ELECTIONS

Elections to the Chamber of Deputies were held on 9 Nov. 2010. 103 of the 120 seats were won by independents loyal to the king. The Islamic Action Front boycotted the vote in protest at changes to the electoral districts. Turnout was 52.9%.

### CURRENT GOVERNMENT

In March 2012 the government consisted of:

*Prime Minister and Minister of Defence*: Awn Khasawneh; b. 1950 (took office on 24 Oct. 2011).

*Minister of Agriculture*: Ahmad Al Khattab. *Awqaf and Islamic Affairs*: Abdul Salam Abbadi. *Culture*: Salah Jarrar. *Education*: Eid Dhiyat. *Energy and Mineral Resources*: Qutaybe Abu Qoura. *Environment*: Yassi Al Khayyat. *Finance*: Umayya Touqan. *Foreign Affairs*: Nasser Judeh. *Health*: Abdullatif Wreikat. *Higher Education and Scientific Research*: Ruwaida Maayteh. *Industry and Trade*: Sami Qammo. *Information and Communications Technology*: Bassem Rousan. *Interior*: Mohammad Al Raoud. *Justice*: Salim Zu'bi. *Labour*: Mahir Al Wakid. *Municipal Affairs*: Mahir Abul Samin. *Planning and International Co-operation*: Jaafar Hassan. *Political Development and Parliamentary Affairs*: Haya Al Qaralleh. *Public Sector Development*: Khleif Al Khawaldeh. *Public Works and Housing*: Yehya Kasbi. *Social Development*: Nisreen Barakat. *Tourism and Antiquities*: Nayef Hmeidi. *Transport*: Alaa Aref Batayneh. *Water and Irrigation*: Musa Al Jamaani. *Youth and Sports*: Mohammad Al Qudah. *Minister of State for Legal Affairs*: Ibrahim Al Jazi. *Minister of State for Media Affairs and Communications*: Rakan Majali. *Minister of State for Prime Ministerial Affairs and Legislation*: Ayman Odeh.

*Government Website*:

### CURRENT LEADERS

#### Abdullah Bin Al Hussein II

#### Position

King

#### Introduction

Abdullah came to the throne of the Hashemite Kingdom in Feb. 1999 on the death of his father, Hussein Bin Talal. He had been declared Crown Prince and heir by his father the previous month, replacing his uncle, Prince Hassan, who had served in that capacity since 1965. Abdullah has maintained the moderate policies of his late father. He has aimed to reconcile the domestically unpopular 1994 peace agreement with Israel and friendly relations with the USA with the need to appease Jordan's more militant Arab neighbours and its own large Palestinian population.

#### Early Life

Born in Amman on 30 Jan. 1962, Abdullah was educated at St Edmund's School in Surrey, England, then Eaglebrook School in Massachusetts and Deerfield Academy in the USA. With his uncle holding office as Crown Prince, Abdullah focused on the military, enrolling in the Royal Military Academy Sandhurst, England in 1980. Having then attended Oxford University and Georgetown University in Washington, D.C., for studies in international relations, he moved up through the ranks of Jordan's armed forces to become Major-Gen. in May 1998.

#### Career in Office

Abdullah became Crown Prince on 25 Jan. 1999 after King Hussein had rescinded the 1965 constitutional amendment in favour of his younger brother Hassan. Two weeks later, on 7 Feb. 1999, Hussein died and Abdullah assumed the throne. Consistent with the policy of his father, Abdullah has deterred Islamic militancy (particularly the activities of the radical Palestinian Hamas group), while extending economic liberalization. He revived the privatization programme, oversaw Jordan's admission to the World Trade Organization and concluded a free trade accord with the USA.

Abdullah has supported the wider Arab-Israeli peace process and maintains a close affinity with the USA. He also backs Palestinian statehood in the West Bank, a policy that takes account of Jordan's large Palestinian population. He made early overtures towards Jordan's moderate Arab neighbours, visiting Egypt, Saudi Arabia, Oman and the United Arab Emirates in the first few months of his reign, and also tried to forge closer

relations with Syria, a traditional antagonist. Relations with Iran have wavered since Abdullah's accession. In 2003 Abdullah backed the US intervention in Iraq, a decision not wholly popular with Jordanian citizens. The subsequent insurgency in Iraq spilled over into Jordan in Nov. 2005 when nearly 70 people were killed in the capital, Amman, in co-ordinated suicide bomb attacks apparently perpetrated by an Iraqi wing of the al-Qaeda terrorist network. Nevertheless, in Aug. 2008 Abdullah became the first leader of an Arab state to visit Iraq since the 2003 US invasion in a move signifying a rapprochement across the confessional Sunni-Shia divide and also growing international confidence in the Iraqi government.

Although Abdullah retains the power to rule by decree, there is an elected Chamber of Deputies to which a large majority of non-partisan candidates loyal to the King were returned in polling in Nov. 2007. Abdullah subsequently appointed Nader Dahabi as the new prime minister, replacing Marouf al-Bakhit who had been in office since Nov. 2005. In Nov. 2009 the King unexpectedly dissolved the Chamber only halfway through its four-year term and called for early elections. No official reason was given, but the assembly had reportedly been accused of inaction and inept handling of legislation. Abdullah appointed Samir Zaid al-Rifai as the new prime minister in Dec. and a new electoral law was introduced in May 2010. Fresh parliamentary elections were held in Nov. 2010, despite a boycott by the opposition Islamic Action Front, and the poll returned mainly pro-government candidates to the 120-member Chamber, provoking street protests.

Anti-government disaffection across much of the Arab world from early 2011 spread to Jordan. Although on a lesser scale than in some neighbouring countries, the protests prompted Abdullah to appoint a new prime minister in Feb. and again in Oct. with the task of carrying out political reform.

## DEFENCE

Defence expenditure in 2008 totalled US\$2,127m. (US\$347 per capita), representing 10.6% of GDP (the highest percentage of any country).

### Army

Total strength (2007) 88,000. In addition there were 60,000 army reservists, a paramilitary Public Security Directorate of approximately 10,000 and a civil militia 'People's Army' of approximately 35,000.

### Navy

The Royal Naval Force numbered an estimated 500 in 2007 and operates 13 patrol and coastal combatants, all based at Aqaba.

### Air Force

Strength (2007) 12,000 personnel, 100 combat capable aircraft (including F-5Es, F-16As and Mirage F1s) and some 20 attack helicopters.

## INTERNATIONAL RELATIONS

A 46-year-old formal state of hostilities with Israel was brought to an end by a peace agreement on 26 Oct. 1994.

## ECONOMY

Services accounted for 67.4% of GDP in 2006, industry 29.5% and agriculture 3.1%.

### Overview

Classified by the World Bank as a small, lower middle-income country, Jordan has a shortage of water and, unlike many of its neighbours, limited energy supplies. Jordan imported most of its oil from Iraq prior to 2003 but in recent years has depended on other Gulf states. Aside from potash and phosphate there are few natural resources. Development relies on human capital, as well as remittances from abroad and one of the world's highest levels of unilateral financial transfers (accounting for about 20–25% of

GDP). Services account for more than 75% of jobs. The country is highly urbanized, with about 78% of the population living in cities, and has one of the youngest populations among middle-income countries, with 35% under the age of 14.

The country compares favourably to other middle-income economies in human development indicators, with more than 25% of GDP spent on human development initiatives. There is also a strong record of recent reform. Authorities have focused on opening up the economy to the private sector and foreign trade and much work has been done to build modern regulatory institutions. As a result of reforms, Jordan's investment climate ranking improved between 2009 and 2010.

Since 2000 the economy has grown 7% per year on average, per capita GDP has more than doubled, the sizeable foreign debt has been reduced and the current account balance narrowed. Growth has been led by manufacturing, construction, real estate and services. Exports have grown significantly since the signing of a free trade accord with the USA in 2000 and the development of Jordanian Qualifying Industrial Zones, where exports are allowed duty free to the USA.

Growth slowed with the global economic crisis, particularly in the financial services, community and personal services, retail trade and manufacturing sectors. Jordan remains vulnerable to fluctuation in world oil and food prices. High unemployment, dependency on remittances and increasing pressure on scarce natural resources, particularly water, need to be addressed.

### Currency

The unit of currency is the *Jordan dinar* (JOD), usually written as JD, of 1,000 *fiils*, pegged to the US dollar since 1995 at a rate of one dinar = US\$1.41. Inflation was 13.9% in 2008 but there was deflation of 0.7% in 2009. Foreign exchange controls were abolished in July 1997. Foreign exchange reserves were US\$5,601m. and gold reserves 411,000 troy oz in July 2005. Total money supply in May 2005 was JD 3,487m.

### Budget

In 2007 revenues totalled JD 3,971.5m. and expenditures JD 4,540.1m. Tax revenue constituted 75.4% of revenues in 2007; social protection accounted for 28.0% of expenditures, defence 16.7% and education 13.9%.

There is a sales tax of 16% (reduced rates, 8% and 4%).

### Performance

Total GDP was US\$27.6bn. in 2010. Real GDP growth in 2010 was 2.3% (5.5% in 2009).

### Banking and Finance

The Central Bank of Jordan was established in 1964 (*Governor*, Ziad Fariz). In 2002 there were nine national banks, seven foreign banks and 11 specialized credit institutions. Assets and liabilities of the banking system (including the Central Bank, commercial banks, the Housing Bank and investment banks) totalled JD 8,430.4m. in 1995.

There is a stock exchange in Amman (Amman Financial Market).

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions in 2008 were the equivalent of 3.6 tonnes per capita.

### Electricity

Installed capacity was 2.2m. kW in 2007. Production (2007) 12.84bn. kWh; consumption per capita was 2,249 kWh. There are plans to build a nuclear power plant to meet the country's growing energy needs.

### Oil and Gas

Natural gas reserves in 2007 totalled 6bn. cu. metres, with production (2007) 180m. cu. metres. Jordan relies heavily on oil

from other Arab countries, importing around 96% of its energy needs.

#### Water

99% of the total population and 100% of the urban population has access to safe drinking water.

#### Minerals

Phosphate ore production in 2009 was 5.28m. tonnes; potash, 1.20m. tonnes.

#### Agriculture

The country east of the Hejaz Railway line is largely desert; northwestern Jordan is potentially of agricultural value and an integrated Jordan Valley project began in 1973. In 2007 there were 81,090 ha. of irrigated land. The agricultural cropping pattern for irrigated vegetable cultivation was introduced in 1984 to regulate production and diversify the crops being cultivated. In 1986 the government began to lease state-owned land in the semi-arid southern regions for agricultural development by private investors, mostly for wheat and barley. In 2007 there were 142,958 ha. of arable land and 99,484 ha. of permanent crops. There were 5,357 tractors in 2007 and 76 harvester-threshers.

Production in 2007 (in 1,000 tonnes): tomatoes, 617; cucumbers and gherkins, 154; olives, 125; watermelons, 116; potatoes, 97; pumpkins and squash, 55; cauliflowers, 44; cabbage, 36; bananas, 34; apples, 32; lemons and limes, 22.

Livestock (2007): 2.5m. sheep; 559,600 goats; 88,200 cattle; 9,600 asses; 8,000 camels; 36m. chickens. Total meat production was 154,300 tonnes in 2007; milk, 344,980 tonnes.

#### Forestry

Forests covered 83,000 ha. in 2005, or 0.9% of the land area. In 2007, 281,000 cu. metres of roundwood were cut.

#### Fisheries

Fish landings in 2005 totalled 510 tonnes, mainly from inland waters.

### INDUSTRY

The largest company by market capitalization in Jordan in April 2011 was Arab Bank (US\$7.1bn.).

The number of industrial establishments in 2006 was 20,214, employing 174,368 persons. The principal industrial concerns are the production or processing of phosphates, potash, fertilizers, cement and oil.

Production, 2007 (in 1,000 tonnes) includes: cement, 4,051; distillate fuel oil, 1,292; residual fuel oil, 1,215; fertilizers, 831; phosphoric acid, 480.

#### Labour

The workforce in 2004 was 2,000,900. In 2002, 692,070 persons worked in social and public administration, 150,922 in commerce, 122,741 in mining and manufacturing, and 31,095 in transport and communications. In 2003 approximately 10% of the total labour force worked in agriculture. Unemployment was officially 12% in Oct. 2000 but was estimated by economists to be more than 20%. In 2000 Jordan had more than 600,000 foreign workers, many of them Iraqis.

### INTERNATIONAL TRADE

Foreign debt was US\$7,696m. in 2005. Legislation of 1995 eases restrictions on foreign investment and makes some reductions in taxes and customs duties.

#### Imports and Exports

Imports (c.i.f.) in 2008 totalled US\$16,764m. and exports (f.o.b.) US\$7,788m. Major exports are phosphate, potash, fertilizers, foodstuffs, pharmaceuticals, clothes, cement, fruit and vegetables, textiles and plastics.

Principal imports in 2004 were from: Saudi Arabia, 19.9%; China, 8.4%; Germany, 6.8%; and USA, 6.7%. Main exports in 2004 were to: USA, 26.2%; Iraq, 18.8%; Free zones, 7.6%; and India, 6.5%. In 2000 Jordan became the first Arab country to sign a free trade agreement with the USA.

### COMMUNICATIONS

#### Roads

Total length of roads, 2007, 7,768 km, of which 3,206 km were main roads. In 2007 there were 536,700 passenger cars (94 per 1,000 inhabitants), 2,800 motorcycles and mopeds, 17,200 coaches and buses, and 230,800 lorries and vans. There were 992 deaths in road accidents in 2007 (388 in 1992).

#### Rail

The 1,050 mm gauge Hedjaz Jordan Railway (HJR) runs from the Syrian border to Amman. HJR controls 496 km of track but much of it is out of use. The Aqaba Railway Corporation (ARC) leases a section of track (169 km) south of Menzil from HJR for freight traffic and owns a 115 km stretch from Batn el Ghul to the port town of Aqaba. Passenger-km travelled in 2008 came to 0.4m. Freight tonne-km travelled amounted to 353m. on ARC in 2009 and 0.4m. on HJR in 2008.

#### Civil Aviation

The Queen Alia International airport is at Zizya, 30 km south of Amman. There are also international flights from Amman's second airport. Queen Alia International handled 2,231,806 passengers in 2001 (2,209,168 on international flights) and 87,679 tonnes of freight. The national carrier, Royal Jordanian, sold 71% of its shares in Dec. 2007; shares sold to non-Jordanian investors are not to exceed 49%. In 2003 scheduled airline traffic of Jordanian-based carriers flew 36m. km, carrying 1,353,000 passengers (all on international flights).

#### Shipping

In Jan. 2009 there were 21 ships of 300 GT or over registered, totalling 315,000 GT. The main port is Aqaba, which handled 17.3m. tonnes of foreign cargo in 2008.

#### Telecommunications

There were 2,211,900 telephone subscribers in 2004, or 394.1 per 1,000 persons, of which 1,624,100 were mobile phone subscribers. In 2000 the government sold a 40% stake in Jordan Telecommunications Company (Jordan Telecom) to France Télécom. In 2006 France Télécom became the majority shareholder when it purchased a further 11% of Jordan Telecom from the government. Jordan Telecom's monopoly on fixed-line services ended on 1 Jan. 2005. There were 300,000 PCs (53.4 for every 1,000 persons) in 2004 and 629,500 internet users.

### SOCIAL INSTITUTIONS

#### Justice

The legal system is based on Islamic law (Sharia) and civil law, and administers justice in cases of civil, criminal or administrative disputes. The constitution guarantees the independence of the judiciary. Courts are divided into three tiers: regular courts (courts of first instance, magistrate courts, courts of appeal, Court of Cassation/High Court of Justice); religious courts (Sharia courts and Council of Religious Communities); special courts (e.g. police court, military councils, customs court, state security court).

The death penalty is authorized, and was last used in 2006. The murder rate in 2007 stood at 1.7 per 100,000 population. The population in penal institutions in April 2008 was approximately 7,500 (123 per 100,000 of national population).

#### Education

Adult literacy in 2007 was 91.1% (male, 95.7%; female, 88.4%). Basic primary and secondary education is free and compulsory. In 2006-07 there were 1,267 kindergartens (1,259 private) with 4,834

teachers and 93,236 pupils; 2,996 basic schools (706 private) with 66,075 teachers and 1,294,075 pupils; 1,268 secondary schools (160 private) with 17,771 teachers and 184,663 pupils; and 27 vocational schools with 3,581 teachers and 31,432 pupils. In 2006–07 there were ten state and 15 private universities. 16,753 Jordanians were studying abroad in 2007.

In 1999–2000 total expenditure on education came to 5.0% of GNP and 20.6% of total government spending.

#### Health

There were 13,460 physicians, 18,439 nurses and midwives, 4,330 dentists and 7,360 pharmacists in 2005. In 2007 there were a total of 11,029 hospital beds in 103 hospitals.

#### Welfare

There are numerous government organizations involved in social welfare projects. The General Union of Voluntary Societies finances and supports the Governorate Unions, voluntary societies, and needy individuals through financial and in-kind aid. There are also 240 day care centres run by non-governmental organizations.

#### RELIGION

About 94% of the population are Sunni Muslims.

#### CULTURE

##### World Heritage Sites

There are four sites on the World Heritage List: the rose-red rock-carved city of Petra and Quseir Amra (both entered on the list in 1985); Um er-Rasas (2004); and the Wadi Rum protected area (2011). Petra is over 2,000 years old and contains more than 800 monuments, some built but most carved out of the natural rock. Quseir Amra is the best preserved of Jordan's 'desert castles' and is noted for its frescoes. Um er-Rasas (Kastron Mefa'a) is an archaeological site largely unexcavated, containing remains from the Roman, Byzantine and Early Muslim periods. The Wadi Rum protected area features a varied desert landscape with rock carvings and inscriptions that trace the evolution of human thought and the early development of the alphabet.

#### Press

In 2006 there were seven daily newspapers with a combined circulation of 120,000. Newspapers were denationalized in 1990, although government institutions still hold majority ownership.

#### Tourism

Tourism accounts for 8.5% of GDP. In 2005 there were 2,987,000 non-resident tourists; spending by tourists totalled US\$1,759m.

#### DIPLOMATIC REPRESENTATIVES

Of Jordan in the United Kingdom (6 Upper Phillimore Gdns, Kensington, London, W8 7HA)

*Ambassador:* Mazen Kemal Homoud.

Of the United Kingdom in Jordan (PO Box 87, Abdoun, Amman 11118)

*Ambassador:* Peter Millett.

Of Jordan in the USA (3504 International Dr., NW, Washington, D.C., 20008)

*Ambassador:* Alia Hatough Bouran.

Of the USA in Jordan (Al-Omawyeen, Abdoun, Amman 11118)

*Ambassador:* Stuart Jones.

Of Jordan to the United Nations

*Ambassador:* Zeid Ra'ad Zeid Al-Hussein.

Of Jordan to the European Union

*Ambassador:* Montaser Oklah Al-Zou'bi.

# KAZAKHSTAN

Qazaqstan Respublikasy  
(Republic of Kazakhstan)

Capital: Astana

Population projection, 2015: 16.89m.

GNI per capita, 2011: (PPP\$) 10,585

HDI/world rank: 0.745/68

## KEY HISTORICAL EVENTS

Turkestan (part of the territory now known as Kazakhstan) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied, followed in 1868 by Samarkand. Subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, with the amir, by an agreement of 1873, recognizing Russian suzerainty. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan. In the summer of 1919 the authority of the Soviet Government extended to these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Amir of Bokhara suffered the same fate and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute their territories on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tajikistan were accepted into the USSR as Union Republics. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan which was established as an Autonomous Soviet Republic in 1925 and became a constituent republic in 1936. Independence was declared on 16 Dec. 1991 when Kazakhstan joined the CIS. Nursultan Nazarbayev became president, and legislation has been introduced to award him privileges for life. Over a million of the country's ethnic Russians and Germans have returned to their homelands in the last ten years. Kazakhstan has been focusing on border disputes with China and Uzbekistan and fighting fundamentalism along with other Central Asian governments.

## TERRITORY AND POPULATION

Kazakhstan is bounded in the west by the Caspian Sea and Russia, in the north by Russia, in the east by China and in the south by Uzbekistan, Kyrgyzstan and Turkmenistan. The area is 2,724,900 sq. km (1,052,090 sq. miles). The population at the census of Feb. 2009 was 16,009,597 (density of 5.9 per sq. km), of whom Kazakhs accounted for 63.1% and Russians 23.7%. There are also Uzbeks, Ukrainians, Uigurs, Tatars, Germans and smaller minorities. In 2009 the population was 51.7% female; it was 57.3% urban in 2005. During the 1990s some 1.5m. people left Kazakhstan—mostly Russians and Germans returning to their homelands. In 2008 around 4m. ethnic Kazakhs were living abroad.

The UN gives a projected population for 2015 of 16.89m.

Kazakhstan's administrative divisions consist of 14 provinces and three cities as follows, with area and population:

	Area (sq. km)	Population (2009 census)
Almaty <sup>1</sup>	224,000	1,807,894
Almaty City	300	1,365,632
Aqmola <sup>2</sup>	146,200	737,495
Aqtöbe	300,600	757,768
Astana City	700	613,006
Atyrau <sup>3</sup>	118,600	510,377
Batys Qazaqstan	151,300	598,880
Bayqonyr (city)	(6,700)	— <sup>4</sup>
Mangghystau	165,600	485,392
Ongtüstik Qazaqstan	117,300	2,469,357
Pavlodar	124,800	742,475
Qaraghandy	428,000	1,341,700
Qostanay	196,000	885,570
Qyzylorda	226,000	678,794
Shyghys Qazaqstan	283,200	1,396,593
Soltüstik Qazaqstan	98,000	596,535
Zhambyl <sup>5</sup>	144,300	1,022,129

<sup>1</sup>Formerly Alma-Ata. <sup>2</sup>Formerly Tselinograd and then Akmola. <sup>3</sup>Formerly Gurev. <sup>4</sup>As the space base of Bayqonyr is under Russian administration, its 6,700 sq. km and estimated 70,000 inhabitants are excluded from overall Kazakhstan figures. The lease was extended until 2050 in 2004. <sup>5</sup>Formerly Dzhambul.

In Dec. 1997 the capital was moved from Almaty to Aqmola, which was renamed Astana in May 1998 (the name of the province remained as Aqmola). Astana has a population of 613,006 (Feb. 2009 census). Other major cities, with Feb. 2009 populations: Almaty (1,365,632); Shymkent (603,499); Qaraghandy (459,778).

The official languages are Kazakh and Russian; Russian is more widely spoken.

## SOCIAL STATISTICS

2007: births, 321,963; deaths, 158,297; marriages, 146,379; divorces, 36,107. Rates, 2007 (per 1,000 population): birth, 20.8; death, 10.2; marriage, 9.5; divorce, 2.3. Suicides in 2007 numbered 4,168 (rate of 26.9 per 100,000 population). Annual population growth rate, 2000–05, 0.4%. Expectation of life at birth, 2007, 59.1 years for males and 71.2 years for females. Infant mortality, 2005, 27 per 1,000 live births; fertility rate, 2008, 2.3 births per woman.

## CLIMATE

The climate is generally fairly dry. Winters are cold but spring comes earlier in the south than in the far north. Almaty, Jan. -4°C, July 24°C. Annual rainfall 598 mm.

## CONSTITUTION AND GOVERNMENT

Relying on a judgement of the Constitutional Court that the 1994 parliamentary elections were invalid, President Nazarbayev dissolved parliament on 11 March 1995 and began to rule by

decree. A referendum on the adoption of a new constitution was held on 30 Aug. 1995. The electorate was 8.8m.; turnout was 80%. 89% of votes cast were in favour. The Constitution thus adopted allowed the President to rule by decree and to dissolve parliament if it holds a no-confidence vote or twice rejects his nominee for Prime Minister. It established a parliament consisting of a 39-member Senate (two selected by each of the elected assemblies of Kazakhstan's 16 principal administrative divisions plus seven appointed by the president); and a lower house (*Majlis*) of 77 (67 popularly elected by single mandate districts, with ten members elected by party-list vote). The constitution was amended in Oct. 1998 to provide for a seven-year presidential term. It was amended again in May 2007 to lift the term-limit clause on the president, reduce the presidential term to five years with effect from 2012, oblige the president to consult with parliament when choosing a prime minister and adopt proportional representation for the lower house. The amendment also raised from seven to 15 the number of senators appointed by the president (increasing the total number of senators to 47) and from 77 to 107 the number of lower house deputies (with 98 elected by proportional representation from party lists and nine elected by the Assembly of the People of Kazakhstan—a body comprising the various ethnic groups in the country, which itself is appointed by the president). In June 2010 parliament approved an amendment to the constitution giving President Nazarbayev the title 'Leader of the Nation' and with it a wide range of privileges after the end of his presidential term.

A Constitutional Court was set up in Dec. 1991 and a new constitution adopted on 28 Jan. 1993, but President Nazarbayev abolished the Constitutional Court in 1995. In June 2000 a bill to provide President Nazarbayev with life-long powers and privileges was passed into law.

#### National Anthem

'Mening Qazaqstan' ('My Kazakhstan'); words by Z. Nazhimedenov and N. Nazarbayev, tune by S. Kaldayakov.

#### GOVERNMENT CHRONOLOGY

Presidents since 1991.

1991– Nursultan Abishuly Nazarbayev

#### RECENT ELECTIONS

At the presidential elections of 3 April 2011 Nursultan Nazarbayev was re-elected with 95.6% of votes cast against three other candidates. Turnout was 90.0%.

National Assembly elections were held on 15 Jan. 2012. President Nursultan Nazarbayev's Nur Otan (Light of the Fatherland) Party took 83 of the 98 seats with 81.0% of votes cast, the Democratic Party of Kazakhstan Ak Zhol (Bright Path) 8 with 7.5% and the Communist People's Party of Kazakhstan 7 with 7.2%. Turnout was 75.4%. There were widespread allegations that the elections were fraudulent and failed to meet international standards.

#### CURRENT GOVERNMENT

*President:* Nursultan Nazarbayev; b. 1940 (elected in 1991 and re-elected in 1999, 2005 and 2011).

In March 2012 the government comprised:

*Prime Minister:* Karim Massimov; b. 1965 (sworn in 10 Jan. 2007).

*First Deputy Prime Minister:* Serik Akhmetov. *Deputy Prime Ministers:* Kairat Kelimbetov; Yerbol Orynbayev.

*Minister of Agriculture:* Assylzhan Mamytbekov. *Culture and Information:* Darkhan Mynbay. *Defence:* Adilbek Dzhakysbekov. *Economic Development and Trade:* Zhanar Aitzhanova. *Education and Science:* Bahytzhan Zhumagulov. *Emergency Situations:* Vladimir Bozhko. *Environmental Protection:* Nurlan Kapparov. *Finance:* Bolat Zhamishev. *Foreign Affairs:* Yerzhan Kazykhanov.

*Health:* Salidat Kairbekova. *Industry and New Technologies:* Asset Isekeshiev. *Internal Affairs:* Kalmukhanbet Kassymov. *Justice:* Berik Imashev. *Labour and Social Security:* Gulshara Abdykalikova. *Oil and Gas:* Sauat Mynbayev. *Tourism and Sport:* Talgat Yermeguiyayev. *Transport and Communications:* Askar Zhumagaliyev.

*Chairman, Senate (Upper House):* Kairat Mami.

*Chairman, Majlis (Lower House):* Ural Mukhamedzhanov.

*Government Website:* <http://www.government.kz>

#### CURRENT LEADERS

##### Nursultan Abishuly Nazarbayev

###### *Position*

President

###### *Introduction*

Nursultan Nazarbayev, leader of the Nur Otan (Light of the Fatherland) Party, was first elected president of Kazakhstan in 1991, leading the country to independence after the collapse of the USSR. He has sought to exploit the nation's rich mineral resources although much of the population remains poor. He has also sought close ties with southern regional neighbours as well as Russia, China and the West. His regime, however, has been widely accused of corruption and human rights abuses.

###### *Early Life*

Nursultan Nazarbayev was born on 6 July 1940 in Chemolgan in the Almaty region. He was employed by the Karagandy metallurgical works in 1960 and graduated in engineering from a higher technical college in 1967. Having joined the Soviet Communist Party in 1962, he became secretary of the party's regional committee in 1977 and rose through the ranks to the central committee. In 1984 he was appointed chairman of the Republic's council of ministers and became a full member of the Politburo five years later. In the same year Nazarbayev was named first secretary of the Kazakh Communist party. In April 1990 he was chosen by the Supreme Soviet as president of the Republic of Kazakhstan.

###### *Career in Office*

Nazarbayev spoke out in support of Soviet leader Mikhail Gorbachev during a coup attempt in Moscow in Aug. 1991. Nevertheless, Kazakhstan seceded from the USSR in Dec. 1991 to join the Commonwealth of Independent States (CIS). In the same month Nazarbayev's position as head of state was consolidated in presidential elections. Earlier in the year he had closed the country's most important nuclear test ground at Semipalatinsk.

In 1992 Nazarbayev secured Kazakhstan's membership of the UN and of the Conference on Security and Co-operation in Europe (the precursor of the OSCE). Despite parliamentary opposition, he implemented a series of economic reforms, including a programme of privatization. He sought close co-operation with his CIS partners and signed up Kazakhstan to the strategic arms reduction treaty and the treaty on the non-proliferation of nuclear weapons. Two years later he signed an agreement on economic and military co-operation with Russia. In the same year his term of office was extended by referendum to 2000 amid accusations that he was becoming increasingly autocratic.

In 1997 Nazarbayev announced the transfer of the national capital from Almaty to Aqmola (renamed Astana in 1998) to take advantage of Aqmola's central location and its seismically less sensitive position. He won presidential elections brought forward to Jan. 1999 with 79.8% of the vote, but earned international criticism for the disqualification of the leading opposition figure, Akezhan Kazhegeldin, from the polls. Kazhegeldin was accused of corruption, went into exile and was sentenced *in absentia* to ten

years imprisonment. Parliamentary elections held later in the year were criticized by the OSCE.

Nazarbayev implemented heightened security measures against Islamist militants following increased activity in the region in 2000. In June 2001 Kazakhstan joined the Shanghai Co-operation Organization (along with China, Russia, Kyrgyzstan, Uzbekistan and Tajikistan) to bolster regional co-operation in economics and against ethnic and religious activism. In the aftermath of the 11 Sept. attacks on Washington and New York in 2001, Nazarbayev met US President George W. Bush to consolidate relations between the two countries.

Nazarbayev's autocratic style of governance has regularly been the focus of international attention. In 2000 the government passed constitutional amendments granting him wide-ranging influence once he has retired from office. In Nov. 2001 he purged his government of founding members of Democratic Choice, a group seeking to reduce presidential powers. Leading Democratic Choice figures were subsequently imprisoned on a variety of disputed charges, as were journalists critical of his regime. In 2002 Nazarbayev was accused of siphoning state monies into a personal bank account, but he denied any wrongdoing.

In Feb. 2003 the government announced plans to work with Russia to develop a national nuclear energy programme. In June 2003 the prime minister, Imangali Tasmagambetov, resigned in protest at land reforms allowing private ownership for the first time in the nation's history. Nazarbayev's Otan Party (the predecessor of the Nur Otan Party) won a majority of National Assembly seats in parliamentary elections in 2004, and on 4 Dec. 2005 he was re-elected overwhelmingly as president with 91% of the votes cast. There was some movement towards further democratization, including the establishment in March 2006 of a new state commission chaired by the president to oversee a widening of the powers of legislative bodies, strengthening of the judiciary and law enforcement agencies, and constitutional development. Kazakhstan also ratified two international covenants on civil, political, economic and cultural rights. However, the political opposition has remained sceptical about these moves in the light of parliament's vote in May 2007 to allow Nazarbayev to stay in office for an unlimited number of terms and the legislative elections later in the year which returned all the seats to his Nur Otan Party. Moreover, in mid-2010 parliament approved legislation giving Nazarbayev the title of 'Leader of the Nation' and granting him additional powers including immunity from prosecution. Earlier, in Jan. 2010, Kazakhstan became the first former Soviet state to chair the OSCE, despite widespread reservations about Nazarbayev's commitment to democracy.

After almost a decade of average annual growth of around 10%, Kazakhstan's economy started to slow markedly in 2008 in the wake of the global credit crisis. This prompted Nazarbayev in Oct. to announce a US\$10bn. injection of reserves from the National Fund (established in 2000 to accumulate revenues from the expanding oil and gas sector) into the economy, with a further US\$5bn. in support for struggling local banks.

In April 2009, responding to an earlier initiative by the International Atomic Energy Agency, Nazarbayev announced his country's readiness to host an international nuclear fuel bank to ensure other countries do not need to develop their own sources and to curtail nuclear proliferation.

In July 2010 a customs union established between Kazakhstan, Belarus and Russia came into force.

Nazarbayev secured a further term in the presidential elections of April 2011, taking 96% of the vote. In Nov. he brought forward the date of parliamentary elections to Jan. 2012, at which his Nur Otan Party was again dominant.

## DEFENCE

Defence expenditure in 2008 totalled US\$1,608m. (US\$105 per capita), representing 1.2% of GDP.

## Nuclear Weapons

When Kazakhstan gained independence from the USSR in 1991 it became the world's fourth largest nuclear power. However, all the weapons systems were returned to Russia unilaterally and Kazakhstan's nuclear infrastructure was dismantled.

## Army

Personnel, 2007, 30,000. Paramilitary units: Presidential Guard (2,000), Government Guard (500), Internal Security Troops (approximately 20,000), State Border Protection Forces (approximately 9,000).

## Navy

A 3,000-strong Maritime Border Guard operates on the Caspian Sea. Kazakhstan hopes to have a fully-fledged navy by 2013.

## Air Force

In 2007 there were 12,000 personnel (including Air Defence) with 163 combat capable aircraft, including MiG-29, MiG-31 and Su-27 interceptors and Su-24 and Su-25 strike aircraft.

## INTERNATIONAL RELATIONS

In Jan. 1995 agreements were reached for closer integration with Russia, including the combining of military forces, currency convertibility and a customs union.

In 1998 President Nazarbayev signed major treaties with Russia and China, Kazakhstan's neighbours to the north, west and east, in the hope of improving relations with both countries.

## ECONOMY

Agriculture accounted for 5.9% of GDP in 2006, industry 42.1% and services 52.0%.

## Overview

Kazakhstan's economy shrunk dramatically after the break-up of the Soviet Union until economic reform and privatization schemes implemented during the late 1990s prompted a strong recovery in the 2000s. From 2002-07 real GDP growth averaged nearly 10% per year, driven by expansion in construction and financial services. Youth unemployment fell dramatically.

Kazakhstan was hit by the global economic crisis that began in 2008 but a rebound in commodity prices helped spur recovery. However, rising global food and fuel prices raised inflation above 7%.

The country is a net energy exporter and industry is heavily geared towards the exploitation of its vast natural resources. The reliance on extractive industries has encouraged the government to diversify the economic base. Efforts to create a more business-friendly environment earned Kazakhstan top reformer status in the *Doing Business* 2011 report, improving its overall ranking from 74th in 2010 to 59th in 2011.

## Currency

The unit of currency is the *tenge* (KZT) of 100 *tiyn*, which was introduced on 15 Nov. 1993 at 1 tenge = 500 roubles. It became the sole legal tender on 25 Nov. 1993. Inflation was running at nearly 1,880% in 1994, but dropped dramatically and remained relatively stable for several years before it rose again to 10.8% in 2007 and further still to 17.2% in 2008. However, inflation fell to 7.3% in 2009. In July 2005 foreign exchange reserves were US\$6,953m. and gold reserves amounted to 1.88m. troy oz. Total money supply was 876,981m. tenge in June 2005.

## Budget

In 2007 revenues were 2,896bn. tenge and expenditures 2,678bn. tenge. Tax revenue accounted for 81.4% of revenues in 2007; social security accounted for 18.8% of expenditures, education 17.0% and health 11.2%.

## Performance

The break-up of the Soviet Union triggered an economic collapse as orders from Russian factories for Kazakhstan's metals and phosphates, two mainstays of the economy, dried up. Real GDP growth was -1.9% in 1998 but there was a slight recovery in 1999, with growth of 2.7%. Growth was an impressive 9.8% in 2000 and an even more spectacular 13.5% in 2001. Driven by increased oil production, the economy continued to expand, with growth of 8.9% in 2007 and 3.2% in 2008. Even in 2009 Kazakhstan managed to avoid a recession, achieving real GDP growth of 1.2%. The economy then grew by 7.3% in 2010. Total GDP in 2010 was US\$143.0bn.

## Banking and Finance

The central bank and bank of issue is the National Bank (*Governor*, Grigori Marchenko). In 2001 there were 44 domestic banks, with assets totalling US\$5.3bn. The largest bank is Kazkommertsbank (KKB), with assets of US\$1.8bn. in Dec. 2002. The other major banks are Bank TuranAlem and Halyk Bank. In 2001 there were also 12 branches or representative offices of foreign banks. Foreign direct investment amounted to US\$10.0bn. in 2010, down from US\$13.8bn. in 2009.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 13.0 tonnes per capita.

### Electricity

Installed capacity was an estimated 18.7m. kW in 2007. Output in 2007 was 76.6bn. kWh. Consumption per capita was 4,926 kWh in 2007.

### Oil and Gas

Proven oil reserves in 2008 were 39.8bn. bbls. The onshore Tengiz field has estimated oil reserves between 6bn. and 9bn. bbls; the onshore Karachaganak field has oil reserves of 2bn. bbls, and gas reserves of 600bn. cu. metres. Output in 2008 of oil, 72.0m. tonnes; natural gas, 30.2bn. cu. metres with proven reserves of 1,820bn. cu. metres. The first major pipeline for the export of oil from the Tengiz field was opened in March 2001, linking the Caspian port of Atyraū with the Russian Black Sea port of Novorossiisk. In Sept. 1997 Kazakhstan signed oil agreements with China worth US\$9.5bn.; although only a small portion of that investment ever materialized. However, a 962-km oil pipeline linking Atasu in Kazakhstan and Alashankou in China opened in Dec. 2005. Oil and gas investment by foreign companies is now driving the economy. In 1997 oil production sharing deals were concluded with two international consortia to explore the North Caspian basin and to develop the Karachaganak gas field. A huge new offshore oilfield in the far north of the Caspian Sea, known as East Kashagan, was discovered in early 2000. The field could prove to be the largest find in the last 30 years, and estimates suggest that it may contain 50bn. bbls of oil. Commercial production is expected to begin before the end of 2012. Oil production is expected to triple in the next ten years.

It is believed that there may be as much as 14bn. tonnes of oil and gas reserves under Kazakhstan's portion of the Caspian Sea.

A state-owned national company, KazMunaiGaz, was created in 2002 to manage the oil and natural gas industries.

### Minerals

Kazakhstan is extremely rich in mineral resources, including coal, bauxite, cobalt, vanadium, iron ores, chromium, phosphates, borates and other salts, copper, lead, manganese, molybdenum, nickel, tin, gold, silver, tungsten and zinc. Production figures (2003 unless otherwise indicated), in tonnes: coal (2004), 86.00m.; iron ore, 19.28m.; bauxite, 4.74m.; lignite (2004), 3.95m.; copper, 485,000; zinc, 394,000; uranium (2010), 17,803; silver, 827.4; gold, 19.3. Kazakhstan overtook Canada as the world's largest producer of uranium in 2009.

## Agriculture

Kazakh agriculture has changed from primarily nomad cattle breeding to production of grain, cotton and other industrial crops. In 2006 agriculture accounted for 6% of GDP. There were 21.54m. ha. of arable land and 0.14m. ha. of permanent crops in 2001. 2.35m. ha. were irrigated in 2001. In 1993, 181.3m. ha. were under cultivation, of which private subsidiary agriculture accounted for 0.3m. ha. and commercial farming 6.3m. ha. in 16,300 farms. Around 60,000 private farms have emerged since independence.

Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards. Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. Livestock (2003): 4.56m. cattle (down from 9.57m. in 1993), 9.79m. sheep (down from 33.63m. in 1993), 1.49m. goats, 1.23m. pigs, 1.02m. horses and 23.79m. chickens.

Output of main agricultural products (in 1,000 tonnes) in 2003: wheat, 11,537; potatoes, 2,308; barley, 2,154; watermelons, 604; tomatoes, 448; maize, 438; sugar beets, 424; cabbage, 328; onions, 320; sunflower seeds, 293; rice, 273. Livestock products, 2002 (in 1,000 tonnes): cow's milk, 4,110; meat, 676; eggs, 117. Kazakhstan is a major exporter of grain to Russia, but in recent years there has been a significant reduction in the quantity exported as a result of low crop yields coupled with the need to meet domestic demand.

### Forestry

Forests covered 3.34m. ha. in 2005, or 1.2% of the land area. In 2007, 852,000 cu. metres of timber were cut.

### Fisheries

Catches in 2008 totalled 55,581 tonnes, exclusively freshwater fish.

## INDUSTRY

Kazakhstan was heavily industrialized in the Soviet period, with non-ferrous metallurgy, heavy engineering and the chemical industries prominent. Output was valued at 2,000bn. tenge in current prices in 2001, up from 1,798bn. tenge in 2000. Production, 2007 unless otherwise indicated (in 1,000 tonnes) includes: cement (2008), 5,837; crude steel, 4,784; distillate fuel oil, 4,295; pig iron, 3,240; petrol, 2,633; residual fuel oil, 2,584; wheat flour (2003), 2,123; ferroalloys, 1,713; cotton woven fabrics (2002), 14m. sq. metres; leather footwear (2002), 250,000 pairs; TV sets (2001), 347,000 units.

### Labour

In 2002 the economically active labour force numbered 6,708,900, with the main areas of activity as follows: agriculture, hunting and forestry, 2,366,700; trade, restaurants and hotels, 1,007,200; industry, 824,000; education, 589,000; transport, storage and communications, 503,700. In 2003 the unemployment rate was 8.8% (down from 13.5% in 1999).

## INTERNATIONAL TRADE

In Jan. 1994 an agreement to create a single economic zone was signed with Kyrgyzstan and Uzbekistan. Since Jan. 1992 individuals and enterprises have been able to engage in foreign trade without needing government permission, except for goods 'of national interest' (fuel, minerals, mineral fertilizers, grain, cotton, wool, caviar and pharmaceutical products) which may be exported only by state organizations. Foreign debt was US\$43,354m. in 2005.

In Jan. 2010 Kazakhstan joined the newly established Customs Union, together with Russia and Belarus.

### Imports and Exports

In 2007 imports (c.i.f.) were valued at US\$32,756.4m. (compared to US\$8,408.3m. in 2003) and exports (f.o.b.) at US\$47,755.3m. (US\$12,926.6m. in 2003). In 2007, 35.5% of imports came from Russia, 10.7% from China, 7.9% from Germany and 5.0% from the USA. Main export markets in 2007 were Italy, 16.3%; Switzerland, 15.7%; China, 11.8%; Russia, 9.8%. Main imports:

machinery and transport equipment; manufactured goods (including oil and steel); mineral fuels, lubricants and related materials (including petroleum and petroleum products); and chemicals and related products. Main exports: mineral fuels, lubricants and related materials (including petroleum and petroleum products); manufactured goods (including iron and steel, and copper); and inedible crude material (except fuels). Oil and gas account for 65% of exports.

## COMMUNICATIONS

### Roads

In 2007 there were 93,123 km of roads, of which 23,507 were highways, main or national roads. Passenger cars in use in 2007 numbered 2,183,100, and there were also 359,200 lorries and vans, 83,400 buses and coaches, and 45,200 motorcycles and mopeds. There were 4,365 fatalities as a result of road accidents in 2007. With 28.2 deaths per 100,000 population in 2007, Kazakhstan has among the highest death rates in road accidents of any country.

### Rail

In 2005 there were 14,195 km of 1,520 mm gauge railways. Passenger-km travelled in 2008 came to 14.5bn. and freight tonne-km to 214.9bn. A metro is under construction in Almaty.

### Civil Aviation

The national carrier is Air Astana. There is an international airport at Almaty. In 2005 scheduled airline traffic of Kazakhstan-based carriers flew 93.3m. km, carrying 583,600 passengers.

### Shipping

There is one large port, Aktau. In Jan. 2009 there were nine ships of 300 GT or over registered, totalling 33,000 GT.

### Telecommunications

There were 4.01m. fixed telephone lines in 2010 (250.3 per 1,000 inhabitants). Mobile phone subscribers numbered 19.77m. in 2010. There were 182.0 internet users per 1,000 inhabitants in 2009. Fixed internet subscriptions totalled 846,900 in 2010 (52.8 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

Jury trials for serious offences were introduced in Jan. 2007. In 2009, 121,667 crimes were reported, of which 1,638 homicides or attempted homicides. The population in penal institutions in Jan. 2008 was 56,012 (378 per 100,000 of national population).

### Education

In 2007, 330,897 children were attending pre-school institutions, there were 947,807 pupils at primary schools, 1,874,213 pupils at secondary schools and 772,600 students in tertiary education. Adult literacy rate is more than 99%.

In 2007 public government expenditure on education came to 3.2% of GNI.

### Health

In 2002 there were 894 hospitals with a provision of 81 beds per 10,000 inhabitants (2007). There were 57,514 physicians, 5,612 dentists, 113,098 nurses and midwives and 14,048 pharmacists in 2006.

### Welfare

In Jan. 1994 there were 2.1m. age and 0.9m. other pensioners. Pension contributions are 20% of salary and are payable to the State Pension Fund.

## RELIGION

There were some 4,000 mosques in 1996 (63 in 1990). An Islamic Institute opened in 1991 to train imams. A Roman Catholic diocese was established in 1991. In 2001 there were 6,988,000 Muslims, 1,216,000 Russian Orthodox and 318,000 Protestants. The remainder of the population followed other religions or were non-religious.

## CULTURE

### World Heritage Sites

Kazakhstan has three sites on the UNESCO World Heritage List: the Mausoleum of Khoja Ahmed Yasawi (inscribed on the list in 2003), an excellent and well preserved example of late 14th century Timurid architecture; Petroglyphs within the Archaeological Landscape of Tamgaly (2004), a concentration of some 5,000 rock carvings; and Saryarka-Steppe and the Lakes of Northern Kazakhstan (2008), 450,344 ha. of wetlands that contain the Naurzum State Nature Reserve and the Korgalzhyn State Nature Reserve and are of outstanding importance for migratory water birds.

### Press

There were 1,202 newspapers in 2005. The leading newspapers are the Kazakh-language *Egemen Kazakhstan* and *Zhas Alash*, and the Russian-language *Kazakhstanskaya Pravda*. There is frequent harassment of independent journalists.

### Tourism

In 2005 there were 3,143,000 non-resident tourists; spending by tourists totalled US\$809m.

## DIPLOMATIC REPRESENTATIVES

Of Kazakhstan in the United Kingdom (33 Thurloe Sq., London, SW7 2DS)

*Ambassador:* Kairat Abusseitov.

Of the United Kingdom in Kazakhstan (62 Kosmonavtov St., Renco Building, 6th Floor, Astana 010000)

*Ambassador:* David Moran.

Of Kazakhstan in the USA (1401 16th St., NW, Washington, D.C., 20036)

*Ambassador:* Erlan Idrissov.

Of the USA in Kazakhstan (22–23 Str., No. 3, Ak Bulak 4, Astana)

*Ambassador:* Kenneth Fairfax.

Of Kazakhstan to the United Nations

*Ambassador:* Byrganym Aitimova.

Of Kazakhstan to the European Union

*Ambassador:* Yerik Utembayev.

*HDI/world rank:* 0-509/143

## KEY HISTORICAL EVENTS

Prior to colonialism, the area comprised African farming communities, notably the Kikuyu and the Masai. From the 16th century through to the 19th, they were loosely controlled by the Arabic rulers of Oman. In 1895 the British declared part of the region the East Africa Protectorate, which from 1920 was known as the Colony of Kenya. The influx of European settlers was resented by Africans not only for the whites' land holdings but also for their exclusive political representation in the colonial Legislative Council. A state of emergency existed between Oct. 1952 and Jan. 1960 during the period of the Mau Mau uprising. Over 13,000 Africans and 100 Europeans were killed. The Kenya African Union was banned and its president, Jomo Kenyatta, imprisoned. The state of emergency ended in 1960. Full internal self-government was achieved in 1962 and in Dec. 1963 Kenya became an independent member of the Commonwealth. In 1982 Kenya became a one-party state and in 1986 party preliminary elections were instituted to reduce the number of parliamentary candidates at general elections. Only those candidates obtaining over 30% of the preliminary vote were eligible to stand. On the death of Kenyatta in Aug. 1978 Daniel T. arap Moi, the vice-president, became acting president and was elected in 1979, and

then re-elected in 1983, 1988, 1992 and 1997. An attempted coup in 1982 was unsuccessful. A multi-party election was permitted in 1992 and again in 1997, the first genuinely competitive elections since 1963. In the 2002 elections the opposition united behind Mwai Kibaki, who won a landslide victory against Moi's successor Uhuru Kenyatta. Kibaki became the first non-Kenya African National Union president of independent Kenya. In Nov. 2005 a new draft constitution was rejected amid criticism that it gave too much power to the president. In Dec. 2007 Kibaki claimed victory in the presidential election, although the opposition and international observers alleged irregularities, prompting a wave of civil unrest that claimed around 1,500 lives. In Feb. 2008 Kibaki and the opposition leader, Raila Odinga, agreed to a power-sharing deal.

## TERRITORY AND POPULATION

Kenya is bounded by South Sudan and Ethiopia in the north, Uganda in the west, Tanzania in the south and Somalia and the Indian Ocean in the east. The total area is 581,313 sq. km. The 2009 census gave a population of 38,610,097 (19,417,639 females); density, 66 per sq. km. In 2009, 70-2% of the population were rural. In 2006 more than 30,000 Somali refugees entered Kenya to escape the fighting that escalated in Somalia the course of the year.

The UN gives a projected population for 2015 of 46-33m.

Kenya is divided into seven provinces and one national capital area (Nairobi). The land areas, populations and capitals are:

Province	Sq. km	Census 2009	Capital	Census 2009
Rift Valley	173,868	10,006,805	Nakuru	286,411
Eastern	159,891	5,668,123	Embu	35,736
Nyanza	16,162	5,442,711	Kisumu	259,258
Central	13,176	4,383,743	Nyeri	63,626
Western	8,360	4,334,282	Kakamega	69,502
Coast	83,603	3,325,307	Mombasa	915,101
Nairobi	684	3,138,369		
North-Eastern	126,902	2,310,757	Garissa	110,383

Other large towns (2009): Eldoret (252,061), Ruiru (236,961), Kikuyu (190,208), Thika (136,576).

Most of Kenya's 38-61m. people belong to 13 tribes, the main ones including Kikuyu (about 22% of the population), Luhya (14%), Luo (13%), Kalenjin (12%), Kamba (11%), Gusii (6%), Meru (5%) and Mijikenda (5%). There is a large Somali minority.

Swahili and English are both official languages, but people belonging to the different tribes have their own language as their mother tongue.

## SOCIAL STATISTICS

2008 births (estimates), 1,503,000; deaths, 451,000. Estimated birth rate in 2008 was 38-8 per 1,000 population; estimated death rate, 11-6. Annual population growth rate, 2000-08, 2-6%. Expectation of life at birth in 2007 was 53-2 years for males and 54-0 years for females. Infant mortality, 2005, 78 per 1,000 live births. Fertility rate, 2008, 4-9 births per woman. In 2005, 46% of Kenyans lived below the poverty line (down from 52% in 1997).

## CLIMATE

The climate is tropical, with wet and dry seasons, but considerable differences in altitude make for varied conditions between the hot, coastal lowlands and the plateau, where temperatures are very much cooler. Heaviest rains occur in April and May, but in some parts there is a second wet season in Nov. and Dec. Nairobi, Jan. 65°F (18-3°C), July 60°F (15-6°C). Annual rainfall 39" (958 mm). Mombasa, Jan. 81°F (27-2°C), July 76°F (24-4°C). Annual rainfall 47" (1,201 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was approved in a referendum on 4 Aug. 2010 with 66.9% of votes cast in favour. Under its terms, the *President* and *Parliament* will have five-year fixed terms. The president may not serve more than two terms. To be elected president, a candidate must secure at least 50% of votes cast, with at least a quarter coming from more than half of the county constituencies. The old 46 local government districts were restructured into 47 counties, with each county having a governor and a senator. Senators will sit in a newly-created 68-member upper house, providing the country with a bicameral legislature, potentially after planned elections in early 2013. The *National Assembly*, the lower house, will be made up of 350 members following the election with 290 directly elected, 47 women, 12 nominated plus the Speaker (up from the present 224, with 210 directly elected, 12 appointed plus the Speaker and the Attorney General). Each county assembly must return at least one female MP. Parliament has the power to vet key appointments previously appointed by order of the president. The constitution also provides for a supreme court (the highest court in the land) backed by a court of appeals. Judges are subject to review by a judicial appointments panel. In addition, there are provisions for government-directed land reallocations and citizens may take dual citizenship.

### National Anthem

'Ee Mungu nguvu yetu' ('Oh God of all creation'); words by a collective, tune traditional.

## GOVERNMENT CHRONOLOGY

President since 1964. (DP = Democratic Party; KANU = Kenya African National Union; NARC = National Rainbow Coalition; PNU = Party of National Unity)

1964–78	KANU	Jomo Kenyatta
1978–2002	KANU	Daniel arap Moi
2002–	NARC/DP, PNU	Mwai Kibaki

## RECENT ELECTIONS

In presidential elections held on 27 Dec. 2007 incumbent Mwai Kibaki of the Party of National Unity (PNU) won 46.4% of the vote, Raila Odinga of the Orange Democratic Movement (ODM) 44.1% and Kalonzo Musyoka of the Orange Democratic Movement-Kenya (ODM-Kenya) 8.9%. There were six other candidates.

In parliamentary elections also held on 27 Dec. 2007 ODM won 99 of 207 seats, the Party of National Unity (PNU) 43, ODM-Kenya 16 and KANU 14. The remaining 35 seats were shared amongst 19 parties. The ODM and its allies received a total of 102 seats and the PNU and its allies 78.

## CURRENT GOVERNMENT

*President:* Mwai Kibaki; b. 1931 (PNU; sworn in 30 Dec. 2002 and re-elected in Dec. 2007).

Following the elections of Dec. 2007 and a subsequent power-sharing agreement in Feb. 2008 a new coalition cabinet was formed, composed in March 2012 as follows:

*Prime Minister:* Raila Amollo Odinga; b. 1945 (ODM; since 17 April 2008).

*Vice President and Minister for Home Affairs:* Stephen Kalonzo Musyoka; b. 1953 (ODM-Kenya; sworn in 9 Jan. 2008).

*Deputy Prime Minister and Minister for Local Government:* Wycliffe Musalia Mudavadi.

*Minister of State for Defence:* Yusuf Haji. *Development of Northern Kenya and Other Arid Lands:* Ibrahim Elmi Mohamed. *Immigration and Registration of Persons:* Gerald Otieno Kajwang'. *National Heritage and Culture:* William ole Ntimama. *Planning, National Development and Vision 2030:* Wycliffe Ambetsa Oparanya. *Provincial Administration and National Security:*

George Saitoti. *Public Service:* Dalmas Anyango Otieno. *Special Programmes:* Esther Murugi Mathenge.

*Minister of Agriculture:* Sally Jepngetch Kosgey. *Co-operative Development:* Joseph Nyagah. *East African Community:* Musa Sirma. *Education:* Mutula Kilonzo. *Energy:* Kiraitu Murungi. *Environment:* Chirau Ali Mwakwere. *Finance:* Njeru Githae. *Fisheries Development:* Amason Kingi Jeffah. *Foreign Affairs:* Sam Onger. *Forestry and Wildlife:* Noah Wekesa. *Gender and Children's Affairs:* Naomi Namsi Shabani. *Higher Education, Science and Technology:* Margaret Kamar. *Housing:* Peter Soita Shitanda. *Information and Communication:* Samuel Poghiso. *Justice, National Cohesion and Constitutional Affairs:* Eugene Wamalwa. *Labour:* John Kiyonga Munyes. *Lands:* Aggrey James Orenge. *Livestock Development:* Mohamed Abdi Kuti. *Medical Services:* Peter Anyang' Nyong'o. *Nairobi Metropolitan Development:* Jamleck Kamau. *Public Health and Sanitation:* Beth Wambui Mugo. *Public Works:* Chris Obure. *Regional Development Authorities:* Fredrick Omulo Gumo. *Roads:* Franklin Bett. *Tourism:* Danson Mwazo. *Trade:* Moses Wetangula. *Transport:* Amos Kimunya. *Water and Irrigation:* Charity Kaluki Ngilu. *Youth and Sports:* Paul Nyongesa Otuoma.

*Cabinet Office:* <http://www.cabinetoffice.go.ke>

## CURRENT LEADERS

### Mwai Kibaki

#### Position

President

#### Introduction

Economist and former vice president Mwai Kibaki was first elected president in Dec. 2002. Representing the National Rainbow Coalition (NARC) of opposition parties in a bid to oust the KANU party, in power since independence in 1963, he campaigned on an anti-corruption ticket to end Daniel arap Moi's 24 year-presidency. However, Kibaki's government itself became widely tainted by corruption scandals. His controversial re-election in Dec. 2007 was violently disputed by supporters of Raila Odinga, the leader of the opposition ODM, before a power-sharing agreement was negotiated in Feb. 2008.

#### Early Life

Kibaki was born on 15 Nov. 1931 in Othaya, Nyeri District. In 1950 he joined the youth section of the pro-independence Kenyan African Union. In 1954 he graduated in economics, history and political science at Makerere University, Uganda, before further studies at the London School of Economics in the UK (1956–59).

Along with the subsequent presidents Jomo Kenyatta and Daniel arap Moi, Kibaki campaigned for independence from British colonial rule, which was finally achieved in 1963. He contributed to a new constitution and was among the original members of the KANU party (Kenyan African National Union). He served as the party's chief executive officer from 1961–63 before being elected representative of Bahati, Nairobi in 1963. From 1963–66 he worked for the finance ministry, after which he was appointed commerce and industry minister. From 1970–81 he served as finance minister. Vice president under Kenyatta and then his successor Moi, he also served as home affairs minister (1982–88) and health minister (1988–91).

A one-party state from 1964, the ban on opposition parties was finally lifted in 1991. In 1992 Kibaki and other party members left KANU to form the Democratic Party, criticizing government corruption. In the country's first multi-party presidential elections that year, Kibaki took third place as Moi retained the presidency despite alleged irregularities. In 1997 he again stood against Moi, coming second with 30.9% of votes.

In 2002 he was chosen to head the opposition NARC. The ruling party was split when Moi announced his chosen successor to be Uhuru Kenyatta (son of Jomo Kenyatta), and several KANU

members joined NARC. Kibaki's campaign focused on growing discontent with Moi's presidency. In the Dec. 2002 elections Kibaki won a landslide victory with 62.2% to Kenyatta's 31.3%, ending nearly forty years of KANU rule.

#### *Career in Office*

On election, Kibaki prioritized the fight against corruption, which had deterred international aid donors and investors since 1997. All public figures were obliged to declare their wealth confidentially to the anti-corruption police. Kibaki also outlined plans for a new constitution and vowed to provide free primary school education and improve health care. In July 2003 the World Bank announced a resumption of loans to the government.

In Oct. 2003 Kibaki suspended over 20 judges and 80 magistrates and appointed tribunals to investigate them over allegations of unethical conduct, and he also accused forestry officers of complicity in illegal logging. Nevertheless, corruption remained an endemic problem throughout his first term.

Standing for re-election in Dec. 2007 as leader of the newly-created Party of National Unity (PNU), Kibaki claimed a narrow victory in the presidential poll. However, the opposition ODM rejected the result, alleging fraud that sparked widespread political and ethnic violence. The turmoil, which claimed about 1,500 lives, continued until Kibaki and Odinga agreed a UN-brokered power-sharing deal in Feb. 2008 (with the latter becoming prime minister). A new national unity cabinet took office in April 2008 but power-sharing has since been unstable, with Odinga accusing Kibaki of attempting to sideline ODM ministers.

In Oct. 2008 an independent report into the post-election clashes called for an international tribunal to try those implicated in the violence. In July 2009 the cabinet announced that it would use local courts instead but no subsequent action was taken, prompting a decision in March 2010 by the International Criminal Court at The Hague to intervene.

In Nov. 2009 the government published a draft constitution that would reduce presidential power and make the prime minister responsible for routine government business. The constitution, which was endorsed by a two-to-one majority in a referendum in Aug. 2010 (although voting split on largely ethnic lines), imposed stronger political checks and balances and also introduced a measure of devolution. In Oct. 2010, in an unusual move for a high-profile politician, foreign minister Moses Wetangula resigned in response to allegations of corruption in a foreign land sale deal. He was, however, reinstated in Aug. 2011.

Against a background of drought and famine affecting much of East Africa from mid-2011, Kenya launched a military offensive across its border with Somalia in Oct. in response to abductions and incursions by Somali pirates and by Shabab Islamist militants controlling southern and central swathes of its lawless neighbour.

#### **DEFENCE**

In 2008 defence expenditure totalled US\$735m. (US\$19 per capita), representing 2.1% of GDP.

#### **Army**

Total strength (2007) 20,000. In addition there is a paramilitary Police General Service Unit of 5,000.

#### **Navy**

The Navy, based in Mombasa, consisted in 2007 of 1,620 personnel (including 120 marines).

#### **Air Force**

An air force, formed on 1 June 1964, was built up with RAF assistance. Personnel (2007) 2,500, with 29 combat capable aircraft and 11 attack helicopters although their serviceability is in doubt.

#### **INTERNATIONAL RELATIONS**

In Nov. 1999 a treaty was signed between Kenya, Tanzania and Uganda to create a new East African Community as a means of developing East African trade, tourism and industry and laying the foundations for a future common market and political federation.

#### **ECONOMY**

Agriculture contributed 27.1% of GDP in 2006, industry 18.8% and services 54.1%.

#### **Overview**

Following independence in 1963 Kenya was among the leading East African economies, with average annual GDP growth of 6.5%. However, from 1974 economic performance declined. The effect of years of mismanagement and corruption was made worse in 2000 by one of the longest droughts in living memory. Up to US\$1bn. in international aid was frozen during the tenure of Daniel arap Moi (1978–2002) because Kenya failed to pass anti-corruption legislation. From 2003, under the presidency of Mwai Kibaki, GDP increased, driven by the agriculture and service sectors. Flowers, fruits and vegetables lead Kenya's exports to Europe (its largest export market) along with coffee, tea and petroleum goods. In the service sectors, telecommunications and tourism have taken off while economic growth also stimulated the domestic construction industry.

However, mass unrest following the contentious re-election of President Kibaki in Dec. 2007 resulted in the displacement of over 200,000 people. A subsequent spike in international commodity prices, poor rainfall from Oct.–Nov. 2008 and spillover effects from the global financial crisis brought growth down to 1.3% in 2008 from 7.0% the previous year. As a result Kenya sought IMF assistance under the Rapid Access Component of the Exogenous Shocks Facility in May 2009. Fiscal stimulus aimed at infrastructure and agriculture, along with favourable weather conditions, helped the economy bounce back in 2009, with growth broad-based. However, inflationary pressures driven by global oil and food prices, along with further weather disturbances, have severely tested the recovery.

#### **Currency**

The monetary unit is the *Kenya shilling* (KES) of 100 cents. The currency became convertible in May 1994. The shilling was devalued by 23% in April 1993. The annual rate of inflation was 16.2% in 2008, falling to 9.3% in 2009. Foreign exchange reserves were US\$1,653m. in July 2005, total money supply was K Sh 222,558m. and gold reserves were 1,000 Troy oz.

#### **Budget**

In 2008–09 revenues totalled K Sh 511,355m. and expenditures K Sh 621,909m. Tax revenue accounted for 85.5% of revenues; current expenditure accounted for 74.3% of expenditures. The fiscal year ends on 30 June.

#### **Performance**

Real GDP growth was 2.6% in 2009 and 5.6% in 2010. Total GDP in 2010 was US\$31.4bn.

#### **Banking and Finance**

The central bank and bank of issue is the Central Bank of Kenya (*Governor*, Njuguna Ndung'u). There are 43 banks, two non-banking financial institutions and a couple of building societies. In Dec. 2003 their combined assets totalled K Sh 567,600m. In 1998 the government offloaded 25% of its stake in the Kenya Commercial Bank, which lowered its shareholding to 35%. In 2004 it further lowered its shareholding, to 26.2%. It was lowered again to 23.1% in 2008 and a third rights issue exercise in 2010 further reduced its shareholding to 17.7%.

There is a stock exchange in Nairobi.

## ENERGY AND NATURAL RESOURCES

### Environment

Kenya's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.3 tonnes per capita.

### Electricity

Installed generating capacity was 1.22m. kW in 2007, mostly provided by hydropower from power stations on the Tana river with some from oil-fired power stations and by geothermal power. Production in 2007 was 6.77bn. kWh, with consumption per capita 181 kWh. In 1999 it was decided to encourage the private sector to take part in electricity generation alongside the state-owned Kenya Electricity Generating Company as a means of bringing to an end the shortage of power and the frequent blackouts. In June 2000 a rationing scheme was introduced in much of the country restricting the power supply to 12 hours a day, and sometimes less.

### Oil and Gas

Oil was discovered in the northwest of the country in March 2012, although the commercial viability of the find is still to be established.

### Minerals

Production, 2005 (in 1,000 tonnes): lime and limestone (estimate), 1,085; soda ash, 360; fluorite, 97. Other minerals include gold (616 kg exported in 2005), raw soda, diatomite, garnets, salt and vermiculite.

### Agriculture

As agriculture is possible from sea-level to altitudes of over 2,500 metres, tropical, sub-tropical and temperate crops can be grown and mixed farming is pursued. In 2006 there were around 5.31m. ha. of arable land and 444,000 ha. of permanent crop land. 14,000 ha. were irrigated in 2006. There were 26 tractors and two harvester-threshers per 10,000 ha. of arable land in 2006. Four-fifths of the country is range-land which produces mainly livestock products and the wild game which is a major tourist attraction.

Tea, coffee and horticultural products, particularly flowers, are all major foreign exchange earners.

Kenya has about 131,450 ha. under tea production, and is the world's fourth largest producer and largest exporter of tea. The production is high quality tea, raised in near-perfect agronomic conditions. In 2003 production was 294,000 tonnes; exports were worth US\$434m.

Coffee output in 2003 was 55,000 tonnes; 170,000 ha. is under coffee production. However, the annual crop is now a quarter of that at the time of independence in 1963. Some 75% of the total hectareage under coffee is cultivated by smallholders, although their production has been in decline in recent years. Other major agricultural products (2003 estimates, in 1,000 tonnes): sugarcane, 4,500; maize, 2,300; potatoes, 900; plantains, 830; cassava, 600; pineapples, 600; sweet potatoes, 520; cabbage, 270; tomatoes, 260; dry beans, 255.

Livestock (2003): cattle, 12.8m.; goats, 11.5m.; sheep, 9.5m.; camels, 863,000; pigs, 337,000; chickens, 28.6m.

More than half the agricultural labour force is employed in the livestock sector, accounting for 10% of GDP.

### Forestry

Forests covered 3.52m. ha. in 2005 (6.2% of the land area). There are coniferous, broad-leaved, hardwood and bamboo forests. Timber production was 27.65m. cu. metres in 2007.

### Fisheries

Catches in 2005 totalled 148,124 tonnes, of which 141,020 tonnes were freshwater fish (mostly from Lake Victoria). Marine fishing has not reached its full potential, despite a coastline of 680 km.

Fish landed from the sea totals less than 8,000 tonnes annually, but there is an estimated potential of 200,000 tonnes in tuna and similar species.

### INDUSTRY

In 2006 industry accounted for 18.8% of GDP, with manufacturing contributing 11.5%. In 2003 there were 579 manufacturing firms employing more than 50 persons. The main products are textiles, chemicals, vehicle assembly and transport equipment, leather and footwear, printing and publishing, food and tobacco processing and oil refining. Production (2003 unless otherwise indicated) included (in tonnes): cement (2008), 2,829,000; residual fuel oil (2005), 549,000; sugar, 448,489; distillate fuel oil (2005), 374,000; petrol (2007), 207,000; wheat flour, 179,866; maize meal, 120,942; cattle feed, 99,616; kerosene (2007), 116,000.

### Labour

The labour force in 1998-99 was 12,326,000. In 1998-99 the unemployment level was estimated to be 1.8m.

### INTERNATIONAL TRADE

Foreign debt was US\$6,169m. in 2005.

### Imports and Exports

Imports (c.i.f.) in 2009 totalled US\$10,202.0m. and exports (f.o.b.) US\$4,463.4m. The gap between imports and exports has widened considerably since 2005, when imports (c.i.f.) totalled only US\$5,846.2m. but exports (f.o.b.) were US\$3,419.9m. Principal imports in 2007: machinery and transport equipment, 30.5%; mineral fuels, lubricants and related materials (including petroleum and petroleum products), 21.3%; manufactured goods, 15.9%; chemicals and related products, 12.8%. Exports: food and live animals (including tea), 37.2%; inedible crude materials (except fuels), 13.9%; manufactured goods, 13.1%; miscellaneous manufactured articles, 11.5%. Tea constituted 17.1% of Kenya's exports in 2007. Main import suppliers, 2007: United Arab Emirates, 14.8%; India, 9.4%; China, 7.6%; USA, 7.4%. Main export markets, 2007: Uganda, 12.2%; UK, 10.5%; Tanzania, 8.1%; Netherlands, 8.0%.

### COMMUNICATIONS

#### Roads

In 2004 there were 63,265 km of roads (6,527 km of highways, national and main roads). There were, in 2007, 562,400 passenger cars in use, 210,900 vans and lorries, 180,800 motorcycles and mopeds, and 20,100 buses and coaches. There were 2,893 fatalities as a result of road accidents in 2007.

#### Rail

In 2006 there were 2,064 km of railways (metre gauge). Most of the network (1,918 km, including non-operational sections) is managed by Rift Valley Railways (Kenya) Ltd. In 2008-09, 4.4m. passengers and 1.6m. tonnes of freight were carried. The Magadi Railway Co. Ltd manages a 146 km stretch of line from Manzi to Konza to carry soda ash for export through Mombasa.

#### Civil Aviation

There are international airports at Nairobi (Jomo Kenyatta International) and Mombasa (Moi International). The national carrier is the now privatized Kenya Airways. KLM has a 26% share of Kenya Airways. In 2006 scheduled airline traffic of Kenyan-based carriers flew 51m. km and carried 2,548,000 passengers. In 2010 Jomo Kenyatta International handled 5,484,771 passengers and Moi International 1,271,078.

#### Shipping

The main port is Mombasa, which handled 16.4m. tonnes of cargo in 2008; container traffic totalled 616,000 TEUs (twenty-foot

equivalent units) in 2008. In Jan. 2009 there were six ships of 300 GT or over registered, totalling 6,000 GT.

#### Telecommunications

Kenya had 4,893,700 telephone subscribers in 2005, or 142.9 per 1,000 persons. The government aims to improve telephone availability in rural areas from 0.2 lines per 100 persons in 1997 to one line per 100 by 2015, and in urban areas from four lines to 20 lines per 100 persons. In 2005 mobile phone subscribers numbered 4,612,000. The main mobile providers are Safaricom and Airtel Kenya. There were 209.8 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 8,300 in 2009 (0.2 per 1,000 inhabitants).

#### SOCIAL INSTITUTIONS

##### Justice

The courts of Justice comprise the Supreme Court, Court of Appeal and the High Court, beneath which are specialized courts, magistrates courts and Kadhis (Islamic) courts. The Chief Justice is the president of the Supreme Court, which also comprises the Deputy Chief Justice and five other judges. Only the Supreme Court can hear and determine any case challenging the election of the president. The Court of Appeal, comprising at least 12 judges, is based in Nairobi and in the course of its Appellate duties visits Mombasa, Kisumu, Nakuru, Nyeri and Eldoret. The High Court, with full jurisdiction in both civil and criminal matters, comprises the Chief Justice and not fewer than 11 but not more than 50 puisne judges. There are 15 High Court stations in the country. Kadhis courts are established in areas of concentrated Muslim populations: Mombasa, Nairobi, Malindi, Lamu, Garissa, Kisumu and Marsabit.

There were 63,476 recorded crimes in 2008; the prison population was 47,036 in Sept. 2006 (130 per 100,000 of national population).

##### Education

The adult literacy rate in 2008 was 87%. Free primary education was introduced in 2003. In 2007 there were 1,691,093 children in pre-primary schools with 76,323 teaching staff, 6,687,510 pupils were in primary schools with 146,796 teaching staff and 2,729,040 pupils in secondary schools with 102,449 teaching staff. There were 139,524 students in higher education in 2007.

In 2005 public expenditure on education came to 7.3% of GNI and 17.9% of total government spending.

##### Health

In 2003 there were 4,813 physicians, 772 dentists, 40,081 nurses and 1,881 pharmacists. There were 526 hospitals (with 63,407 beds), 649 health centres and 3,382 sub-centres and dispensaries in 2003. Free medical service for all children and adult out-patients was launched in 1965.

#### RELIGION

In 2001 there were 6.78m. Roman Catholics, 6.40m. African Christians, 6.17m. Protestants, 2.90m. Anglicans and 2.24m. Muslims. Traditional beliefs persist. In Feb. 2012 there was one Roman Catholic cardinal.

#### CULTURE

##### World Heritage Sites

Kenya has six sites on the UNESCO World Heritage List: Mount Kenya National Park/Natural Forest (1997), including the second highest peak in Africa; Lake Turkana National Parks (1997 and 2001), a breeding ground for Nile crocodiles and hippopotami; Lamu Old Town (2001), the oldest and best-preserved Swahili settlement in East Africa; the Sacred Mijikenda Kaya Forests (2008), 11 separate forest sites containing the remains of numerous fortified villages; Fort Jesus, Mombasa (2011), a 16th century Portuguese fort; and the Kenya Lake System in the Great Rift Valley (2011), consisting of three lakes that are home to numerous threatened bird species.

##### Press

In 2006 there were five daily papers with a total circulation of 215,000. In May 2002 the Kenyan parliament passed a law making it illegal to sell books, newspapers or magazines that had not been submitted to the government for review.

##### Tourism

In 2005 there were 1,536,000 foreign visitors (1,199,000 in 2004). In 2005 receipts from tourism amounted to US\$579m., up from US\$486m. in 2004. Tourism is the country's leading source of hard currency.

#### DIPLOMATIC REPRESENTATIVES

Of Kenya in the United Kingdom (45 Portland Pl., London, W1B 1AS)

*High Commissioner:* Ephraim Waweru Ngare.

Of the United Kingdom in Kenya (Upper Hill Rd, Nairobi)

*High Commissioner:* Dr Peter Tibber.

Of Kenya in the USA (2249 R. St., NW, Washington, D.C., 20008)

*Ambassador:* Elkanah Odembo Absalom.

Of the USA in Kenya (United Nations Ave., Gigiri, Nairobi)

*Ambassador:* Scott Gratton.

Of Kenya to the United Nations

*Ambassador:* Macharia Kamau.

Of Kenya to the European Union

*Ambassador:* James Kembi-Gitura.

# KIRIBATI

Ribaberikin Kiribati  
(Republic of Kiribati)

*Capital:* Bairiki (Tarawa)

*Population, 2005:* 93,000

*GNI per capita, 2011:* (PPP\$) 3,140

*HDI/world rank:* 0.624/122

## KEY HISTORICAL EVENTS

The islands that now constitute Kiribati were first settled by early Austronesian-speaking peoples long before the 1st century AD. Fijians and Tongans arrived about the 14th century and subsequently merged with the older groups to form the traditional I-Kiribati Micronesian society and culture. The Gilbert and Ellice Islands were proclaimed a British protectorate in 1892 and annexed at the request of the native governments as the Gilbert and Ellice Islands Colony on 10 Nov. 1915. On 1 Oct. 1975 the Ellice Islands severed constitutional links with the Gilbert Islands and took on a new name, Tuvalu. The Gilberts achieved full independence as Kiribati in 1979. Internal self-government was obtained on 1 Nov. 1976 and independence on 12 July 1979 as the Republic of Kiribati.

## TERRITORY AND POPULATION

Kiribati (pronounced Kiribahss) consists of three groups of coral atolls and one isolated volcanic island, spread over a large expanse of the Central Pacific with a total land area of 811 sq. km (313 sq. miles). It comprises **Banaba** or Ocean Island (6 sq. km), the 16 **Gilbert Islands** (280 sq. km), the eight **Phoenix Islands** (29 sq. km), and eight of the 11 **Line Islands** (496 sq. km), the other three Line Islands (Jarvis, Palmyra Atoll and Kingman Reef) being uninhabited dependencies of the USA. The capital is the island of Bairiki in Tarawa. The gradual rise in sea levels in recent years is slowly reducing the area of the islands. Most of the land is less than 3 metres above sea level.

Population, 2005 census, 92,533 (46,921 females); density, 114 per sq. km.

In 2005 an estimated 56.4% of the population lived in rural areas.

The population distribution at the 2005 census was 46.9% in the Outer Islands, 43.6% in South Tarawa (urban area) and 9.6% in the Line and Phoenix Islands. Banaba, all 16 Gilbert Islands, Kanton (or Abariringa) in the Phoenix Islands and three atolls in the Line Islands (Teraina, Tabuaeran and Kiritimati—formerly Washington, Fanning and Christmas Islands respectively) are inhabited; their populations in 2005 (census) were as follows:

Banaba (Ocean Is.)	301	Tabiteuea	4,898
Makin	2,385	North Tabiteuea	3,600
Butaritari	3,280	South Tabiteuea	1,298
Marakei	2,741	Beru	2,169
Abaiang	5,502	Nikunau	1,912
Tarawa	45,989	Onotoa	1,644
North Tarawa	5,678	Tamana	875
South Tarawa	40,311	Arorae	1,256
Maiana	1,908	Kanton	41
Abemama	3,404	Teraina	1,155
Kuria	1,082	Tabuaeran	2,539
Aranuka	1,158	Kiritimati	5,115
Nonouti	3,179		

The remaining 12 atolls have no permanent population; the seven Phoenix Islands comprise Birnie, Rawaki (formerly Phoenix), Enderbury, Manra (formerly Sydney), Orona (formerly Hull), McKean and Nikumaroro (formerly Gardner), while the others are Malden and Starbuck in the Central Line Islands, and Millennium Island (formerly Caroline), Flint and Vostok in the Southern Line Islands. The population is almost entirely Micronesian.

English is the official language; I-Kiribati (Gilbertese) is also spoken.

## SOCIAL STATISTICS

2005 estimates: births, 2,460; deaths, 810. Rates, 2005 estimates (per 1,000 population): births, 26.6; deaths, 8.7. Infant mortality rate (2005), 48 per 1,000 live births; life expectancy (2005), 61.0 years. Annual population growth rate, 2000–05, 1.8%; fertility rate, 2008, 3.1 births per woman.

## CLIMATE

The Line Islands, Phoenix Islands and Banaba have a maritime equatorial climate, but the islands further north and south are tropical. Annual and daily ranges of temperature are small; mean annual rainfall ranges from 50" (1,250 mm) near the equator to 120" (3,000 mm) in the north. Typhoons are prevalent (Nov.–March) and there are occasional tornadoes. Tarawa, Jan. 83°F (28.3°C), July 82°F (27.8°C). Annual rainfall 79" (1,977 mm).

## CONSTITUTION AND GOVERNMENT

Under the constitution founded on 12 July 1979 the republic has a unicameral legislature, the *House of Assembly* (Maneaba ni Maungatabu), comprising 46 members, 44 of whom are elected by popular vote, and two (the Attorney-General *ex officio* and a representative from the Banaban community) appointed for a four-year term. The *President* is both Head of State and government. Presidential candidates are initially selected by members of parliament before facing a popular vote.

## National Anthem

'Teirake kain Kiribati' ('Stand up, Kiribatians'); words and tune by U. Ioteba.

## RECENT ELECTIONS

The last House of Assembly elections were held on 21 and 28 Oct. 2011. Boutokaan Te Koaua (BK; 'Pillars of Truth') won 15 seats, Karikirakean Tei-Kiribati (KTK; 'United Coalition Party') 10 seats and the Maurin Kiribati party (MKP) 3, with remaining seats going to independents.

On 12 Jan. 2012 Anote Tong (BK) was re-elected president with 42.2% of the vote, defeating Tetaua Taitai who took 35.0% and Rimeta Beniamina with 22.8%.

## CURRENT GOVERNMENT

*President and Minister of Foreign Affairs and Immigration:* Anote Tong (elected 4 July 2003; re-elected in Oct. 2007 and Jan. 2012).

In March 2012 the government comprised:

*Vice President and Minister of Internal Affairs:* Teima Onorio.

*Minister of Commerce and Co-operatives:* Pinto Katia.  
*Communications, Transport and Tourism Development:* Taberannang Timeon. *Education:* Maere Tekanene. *Environment and Agriculture:* Tiarite Kwong. *Finance:* Tom Murdoch. *Fisheries and Natural Resources:* Tinian Reiher. *Health and Medical Services:* Dr Kautu Tenaua. *Labour and Human Resources Development:* Boutu Bateriki. *Line and Phoenix Islands:* Tawita Temoku. *Works and Energy:* Kirabuke Teiaua. *Attorney General:* Tiitabu Taabane.

*Parliament Website:* <http://www.parliament.gov.ki>

## CURRENT LEADERS

### Anote Tong

#### *Position*

President

#### *Introduction*

Anote Tong became president of the Pacific Ocean republic in July 2003 and was re-elected in Oct. 2007. The president is chief of state and head of government.

#### *Early Life*

Anote Tong was born in the British Gilbert and Ellice Islands colony in 1952, the son of a Chinese father and a Gilbertian mother. He was an undergraduate at the University of Canterbury, Christchurch, New Zealand and graduated in 1988 with an MSc from the London School of Economics.

He entered politics in 1976 as an assistant secretary in the ministry of education, then served in the ministry of communications and works during the 1980s. Between 1994–96 he was minister of environment and natural resources in the government of President Teburoro Tito, after which he represented Maiana Island in parliament. When Tito lost a parliamentary confidence motion shortly after being elected to serve for a third term, the speaker, Taomati Iuta, led an interim government until presidential elections in July 2003. Anote Tong stood for the opposition Boutokanto Koaava party (Pillars of Truth) against his older brother, the government candidate Dr Harry Tong. Anote won by 13,500 to 12,500 votes.

#### *Career in Office*

Following Tong's election his brother mounted a court challenge alleging electoral fraud but in Oct. 2003 an Australian judge ruled in President Tong's favour. During his campaign the president had promised to review the lease on a satellite-tracking base used by China. Within six months of taking office the president established relations with Taiwan, which had paid a large sum for fishing rights in Kiribati's territorial waters. China severed relations with Kiribati and abandoned the satellite-tracking base.

During 2004 the political scene was dominated by a dispute between the president and his brother over the extent of Taiwanese influence in Kiribati affairs. The government was also faced by high unemployment and rising sea levels caused by climate change, a pressing threat to the 33-island archipelago, whose land rises only a few metres above sea level. In March 2006 the government created a large marine reserve, banning fishing around the Phoenix Islands.

Following parliamentary elections in Aug. 2007, Tong was returned in Oct. for another presidential term. He has continued to publicize the threat posed to Kiribati by rising sea levels and the prospect that the population may eventually need to be resettled elsewhere. He won a third term in elections held in Jan. 2012.

## ECONOMY

Agriculture accounted for 7.1% of GDP in 2006, industry 6.6% and services 86.4%.

### Overview

Following independence in 1979, the economy experienced moderate growth from the mid-1980s until 2003. Growth has been driven by fishing licence fees from its Exclusive Economic Zone, drawings from the Revenue Equalization Reserve Fund (which constitutes pre-1979 revenues accrued from phosphate mining), passport fees and foreign aid (including remittances from Kiribati seamen). The economy has a narrow production base with exports limited to copra, seaweed and fish from which around 80% of households make a living. The public sector dominates the economy, accounting for nearly 80% of employment.

Limited resources and geographic isolation make transport and communications costly. The country is also one of the most vulnerable to climate change and sea-level rise. However, public finances remain sound, with the fiscal deficit declining to 13.3% of GDP in 2008 from 16% the previous year, while improvements have been made in revenue administration. Financial stability will support the capitalization of Kiribati's marine and natural resources, with growth opportunities in fishing and tourism.

### Currency

The currency in use is the Australian *dollar*. Inflation was 11.0% in 2008 and 8.8% in 2009.

### Budget

Foreign financial aid, mainly from the UK and Japan, has amounted to 25–50% of GDP in recent years. Revenues in 2005 totalled \$A182.4m. and expenditures \$A78.6m.

### Performance

The economy contracted by 0.7% in 2009 but grew by 1.8% in 2010. Total GDP in 2010 was US\$151m.

### Banking and Finance

The Bank of Kiribati is 25% government-owned and 75% owned by ANZ Bank. In 1999 it had total assets of \$A46.3m. There is also a Development Bank of Kiribati and a network of village lending banks and credit institutions.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.4 tonnes per capita in 2008.

### Electricity

Installed capacity (2007 estimate), 6,000 kW; production (2007), 24m. kWh.

### Agriculture

In 2007 there were about 2,000 ha. of arable land and 35,000 ha. of permanent crops. Copra and fish represent the bulk of production and exports. The principal tree is the coconut; other food-bearing trees are the pandanus palm and the breadfruit. The only vegetable which grows in any quantity is a coarse calladium (alocasia) with the local name 'bwabwai', which is cultivated in pits; taro and sweet potatoes are also grown. Coconut production (2003), 99,000 tonnes; copra, 7,000 tonnes; bananas, 5,000 tonnes; taro, 2,000 tonnes. Principal livestock: pigs (12,000 in 2003).

### Fisheries

Tuna fishing is an important industry; licenses are held by the USA, Japan and the Republic of Korea. Catches in 2005 totalled an estimated 34,000 tonnes, exclusively from sea fishing.

## INDUSTRY

Industry is concentrated on fishing and handicrafts.

### Labour

The economically active population classified as cash workers (not including village workers engaged in subsistence activities) totalled 13,133 in 2005. In 2005, 52.9% of cash workers were employed in public administration, 11.2% in transport and communication, 9.0% in retail trade, and 7.1% in agriculture and fishing. 6.1% of the labour force were unemployed in 2005; the unemployment rate in 2005 including village workers was 64.5%.

### INTERNATIONAL TRADE

#### Imports and Exports

Total imports (2005), US\$74.0m.; exports, US\$3.6m. Main import sources in 2005: Australia, 35.5%; Fiji Islands, 20.9%; Japan, 17.0%; New Zealand, 5.4%. Main export markets in 2005: Free zones, 33.3%; Australia, 22.2%; Fiji Islands, 16.7%; Hong Kong, 8.3%. Principal exports: copra, seaweed, fish; imports: foodstuffs, machinery and equipment, manufactured goods and fuel.

### COMMUNICATIONS

#### Roads

In 2002 there were 670 km of roads. There were 9,600 cars, 4,320 trucks and vans and 2,080 motorcycles in 2008.

#### Civil Aviation

There were 20 airports in 2002. In 2003 there were scheduled services from Tarawa (Bonriki) to the Marshall Islands, Nauru and the Fiji Islands.

#### Shipping

The main port is at Betio (Tarawa). Other ports of entry are Banaba, English Harbor and Kanton. There is also a small network of canals in the Line Islands. In Jan. 2009 there were 58 ships of 300 GT or over registered, totalling 245,000 GT.

#### Telecommunications

In 2008 there were 4,000 main (fixed) telephone lines. There were 90 internet users per 1,000 inhabitants in 2010.

### SOCIAL INSTITUTIONS

#### Justice

Kiribati's police force is under the command of a Commissioner of Police who is also responsible for prisons, immigration, fire service (both domestic and airport) and firearms licensing. There is a Court of Appeal and High Court, with judges at all levels appointed by the President.

The population in penal institutions in May 2007 was 88 (equivalent to 82 per 100,000 of national population).

#### Education

In 2005 there were 16,133 pupils and 654 teachers at primary schools and 7,487 pupils in general secondary education with 665

teachers. 51.6% of males and 49.5% of females had received secondary or higher education in 2005 compared to 27.1% of males and 20.6% of females in 1995. There is a regional campus of the University of the South Pacific on Tarawa. Other post-secondary institutions include a teacher training college, a marine training centre, a fisheries training centre, a school of nursing and a technical institute.

#### Health

The government maintains free medical and other services. In 2004 there were 20 physicians, three dentistry personnel and 260 nursing and midwifery personnel. There is a national referral hospital in South Tarawa and three other hospitals. In 2005 there were 15 hospital beds per 10,000 inhabitants.

### RELIGION

In 2005, 55% of the population were Roman Catholic and 36% Kiribati Protestant; there are also small numbers of Seventh-Day Adventists, Latter-day Saints (Mormons), Bahais and Church of God.

### CULTURE

#### World Heritage Sites

Kiribati has one site on the UNESCO World Heritage List: Phoenix Islands Protected Area (inscribed on the list in 2010).

#### Press

In 2008 there were three newspapers with a combined circulation of 4,000.

#### Tourism

There were 5,687 visitors to Kiribati in 2007.

### DIPLOMATIC REPRESENTATIVES

Of Kiribati in the United Kingdom

*Acting High Commissioner:* Makurita Baaro (resides in Kiribati).

*Honorary Consul:* Michael Walsh (The Great House, Llanddewi Rhydderch, Monmouthshire, NP7 9UY).

Of the United Kingdom in Kiribati

*High Commissioner:* Vacant (resides in Suva, Fiji Islands).

*Chargé d'Affaires a.i.:* Timothy Smart.

Of the USA in Kiribati

*Ambassador:* Frankie A. Reed (resides in Suva, Fiji Islands).

# KOREA, NORTH

Chosun Minchu-chui Inmin Konghwa-guk  
(Democratic People's Republic of Korea)

Capital: Pyongyang

Population projection, 2015: 24.85m.

GNI per capita, 2010: US\$503

## KEY HISTORICAL EVENTS

The Korean peninsula was first settled by tribal peoples from Manchuria and Siberia who provided the basis for the modern Korean language. By 3000 BC agriculture-based communities had emerged. The earliest known colony in the region was established at Pyongyang in the 12th century BC. Among the most prominent agricultural communities was Old Choson, which by 194 BC had evolved into a league of tribes ruled by Wiman or 'Wei Man', a leader widely held to have defected from China, although he may have been a native of the Choson region. His realm was taken over by the Han empire of China in 108 BC and replaced by four Chinese colonies.

The rest of the peninsula developed into tribal states; Puyo in the north and Chin south of the Han River. Chin was itself split into three tribal states (Mahan, Chinhan and Pyonhan); these states then evolved into three rival kingdoms (Koguryo, Paekche and Silla). Three powerful figures, King T'aejo (AD 53–146) of Koguryo, King Koi (AD 234–86) of Paekche and King Naemul (AD 356–402) of Silla, established hereditary monarchies while powerful aristocracies developed from tribal chiefdoms.

With China's support Silla conquered the other two kingdoms; Paekche in 660 and Koguryo in 668. In 676 Silla drove out the Chinese and gained complete control of the peninsula. Survivors from Koguryo established Parhae, under the leadership of Tae Cho-yong, in the northern region. After a period of conflict with Silla, Parhae grew into a prosperous state in its own right before being taken over by northern nomadic peoples. In Silla an absolute monarchy replaced the council of nobles (its former

decision making body) with a central administrative body called the chancellery (*Chipsabu*), thus undermining aristocratic power. Meanwhile, the capital Kumsong (now Kyongju in South Korea) was developed. The state was divided into administrative units by province (*chu*), prefecture (*kun*), and county (*hyon*), and five provincial capitals prospered as cultural centres. Avatamsaka Buddhism was the dominant religion.

Divisions within the aristocracy in the 8th century led to the restoration of the Council of Nobles and the overthrow of the monarchy. Forced to pay taxes to powerful provincial families and central government, the peasants rebelled. Two provincial leaders, Kyonhwon and Kungye, established the Later Paekche (892) and Later Koguryo (901) as rivals to Silla.

## National Unity

The powerful leader Wang Kon founded Koryo (now Kaesong, North Korea) in 918, and established a unified kingdom in the Korean peninsula in 936. Three chancelleries and the royal secretariat formed the supreme council of state and governed the kingdom. Koryo's leaders were then largely aristocratic, and the political system greatly favoured those in the top five tiers of the nine hierarchical levels. That the military was not eligible for any hierarchical position above the second level and received little land, led to a military coup in 1170. Gen. Ch'oe Ch'ung-hon established a military regime which held power for the next sixty years. Zen Buddhism and the allied ideology of Confucianism had grown popular but were suppressed under the Ch'oe regime. Many monks fled to the mountains, where they formed what became Korean Buddhism, the *Chogye*.

In 1231 the Mongols invaded Koryo but were resisted by the Ch'oe leaders for nearly three decades, until a peasant uprising saw the Ch'oe overthrown. A power-sharing agreement between the rebels and the Mongols came into force in 1258. Despite some interference from the Mongols, Koryo retained its identity as a unified state. The aristocracy established seats of power throughout the country, encouraging peasants to seek protection as serfs. This, however, led to reduced tax revenues and when the government did not have sufficient resources to reward its bureaucratic class, a rebellion ensued. Led by General Yi Song-gye, and with the help of the Ming dynasty in China, government officials seized power in 1392 and established a new system of land distribution, thus ending the Koryo dynasty.

Gen. Yi named the state Choson, designating Hanyang (now Seoul, South Korea) as the capital. Buddhism was dropped in favour of a new Chinese-influenced Confucian ethical system and the state was governed by a hereditary aristocracy (the *yangban*), who controlled all aspects of Korean society. In 1420 the Hall of Worthies (*Chiphyonjon*) was established for scholars, and after 1443 the Korean phonetic alphabet (*hangul*) developed. Later in the period, a centralized yangban government was formed and the country divided into eight administrative regions, with standardized laws and a central decision-making and judicial body.

In 1592 Japan, newly unified under the command of Toyotomi Hideyoshi, sent an army to Korea supposedly as part of an invasion of China. Korea's naval forces, under Admiral Yi Sun-shin, were able to repel the invaders. Swelling anti-Japanese sentiment prompted Koreans from all hierarchical divisions to fight in the war alongside troops dispatched from Ming China. However, Japanese forces did not withdraw completely until Toyotomi's death in 1598, leaving Korea in ruins.

Despite joint efforts by China and Korea to stem the advances of the nomadic Manchu in the early 17th century, Seoul was captured in 1636. The Manchu established the Ch'ing dynasty several years later and demanded tribute from Korea.

During the 17th and 18th centuries, Korea's agriculture developed as irrigation improved and rice, tobacco and ginseng became increasingly important crops. By the late 18th century many Korean scholars had turned to Roman Catholicism, leading to government suppression of Christianity in a bid to preserve the dominance of Confucianism. However, European priests maintained strong links in the country.

#### *Japanese Influence*

In the 19th century, a succession of monarchs yet to attain the age of majority undermined national stability. In 1864 Taewon'gun, the father of the child-king Kojong, took power and pursued a programme of controversial political reform that increasingly isolated Korea from the outside world. When Taewon'gun was eventually forced to step down, Korea came under pressure from Japan to open up its ports. Nervous of growing Japanese influence, China placed troops in Korea following a failed coup attempt by pro-Taewon'gun forces. There followed a trade agreement which greatly benefited Chinese commercial interests. Further treaties with France, Germany, Russia, the UK and the USA followed in the 1880s. As foreign influence increased, Korea's ruling elite divided between moderates and radicals. The radicals carried out a coup in 1884 but were quickly defeated by Chinese troops. An agreement to maintain a balance of power in the region was signed by Japan and China the following year.

As modernization gathered pace, government spending increased, adding to the burden of reparations payments to Japan. The peasants turned to *Tonghak* ('Eastern Learning'), a new religion established by an old yangban scholar and based on traditional beliefs. A *Tonghak* rebellion in 1894 caused China to send in troops. Japan responded by sending its own forces and war broke out. By the following year Japan had secured control of the peninsula.

Korea declared neutrality at the outbreak of war between Japan and Russia in 1904 but was pressured by Japan into allowing use of Korean territory. Japan achieved victory in 1905 and made Korea a protectorate. An unsuccessful appeal to the international peace conference at The Hague further undermined relations between Japan and Korea. Anti-Japanese guerrilla fighters in the southern provinces were active during 1908–09 but were crushed the following year when Korea was annexed by Japan.

Japan established a government in Korea and implemented a programme designed to supplant the Korean identity. There were restrictions on freedom of speech, press and assembly and the language and history of Japan was taught in schools at the expense of those of Korea. Many Koreans were dispossessed of their land as Japan built new transport and communications infrastructures. When the Japanese brutally suppressed a 2m.-strong demonstration in 1919, independence leaders established a provisional government in Shanghai and named Syngman Rhee as president. Hoping to calm dissent, Japan lifted certain press restrictions and replaced the gendarmerie with an ordinary police force, but uncompromising colonial rule remained in place.

Korea became a market for Japanese goods and attracted much capital investment but at the expense of agriculture, leading to a long-term shortage of rice. Tokyo reimposed military rule in 1931 when war broke out between Japan and China and attempted to quash all manifestations of a separate Korean identity over the following decade. Magazines, newspapers and academic organisations operating in the Korean language were banned and hundred of thousands of Koreans were made to fight in the Japanese army or work in Japanese mines and factories in order to support Japan's military efforts during the Second World War. The provisional government, having moved from Shanghai to Chungking in southwest China, declared war on Japan in Dec. 1941. An army of Korean resistance fighters joined the Allied forces in China and fought with them until the Japanese surrender in 1945.

#### *Korea Divided*

Korea was promised independence by China, Britain and the USA at the Cairo conference of 1943 but at the end of the war, after Japan's collapse, Korea was divided in two along the 38° Parallel. Initially the USA and the USSR had agreed informally to a four-way power share in Korea, involving Britain and the Republic of China. However, in order to hasten a Japanese surrender, US troops controlled the south of the country while the USSR took command of the north. The Soviet forces helped to establish a Communist-led provisional government under Kim Il-sung. As relations between the USA and the Soviet Union worsened, trade ceased between the two zones, causing economic hardship because industry was concentrated in the north and agriculture in the south.

In Sept. 1947 the United Nations reviewed the question of Korean reunification and general elections in Korea were proposed. However, a commission to oversee voting was denied entry by Soviet troops. Rhee was elected in the South while the North appointed Kim Il-sung as leader. In 1948 the southern Republic of Korea (with Seoul as the capital) and the northern Democratic People's Republic of Korea (with Pyongyang as capital) formally came into being.

Soviet and US troops left the peninsula in 1949 and war broke out between the North and South in June 1950. A US-led UN force under Gen. Douglas MacArthur entered South Korea and pushed back the North Korean forces. The UN pressed on into North Korea and established a commission for the reunification and rehabilitation of Korea. China, which at that point had no representation in the United Nations, entered the war and contributed 1.2m. troops to the North Korean side. Peace negotiations began in 1951 and a new international boundary and demilitarized zone were declared in 1953. The USA offered South Korea financial support and signed a mutual security pact with Rhee, who had been reluctant to accept the division of the country. The issue of prisoner returns, particularly of North Koreans unwilling to return to the communist state, remained a point of contention. The war left 4m. people dead or injured.

In the aftermath, Kim set about tightening his grip on his country by purging potential rivals. He established a dictatorship based on a personality cult and introduced his philosophy of *Juche*, by which the country was to develop without any help from outside. Industrialization and military spending gathered pace in the later 1950s and the 1960s despite North Korea's international isolation. However, by the late 1970s North Korea had fallen far behind its southern neighbour and a period of stagnation began.

Kim maintained close relations with China and the Soviet Union, although his allegiance wavered between the two as Sino-Soviet relations deteriorated from the 1960s onwards. When the Soviet Union collapsed in 1990–91, North Korea went into an economic crisis that included widespread famine. Attempts to improve relations with South Korea in the early 1990s faltered over the North's alleged nuclear capacity although in 1994 North Korea agreed to shut down controversial reactors in return for aid and oil. Kim died in 1994 and power passed to his son, Kim Jong-il, who, like his father, has received international condemnation for civil rights abuses.

Under the younger Kim the economy has collapsed to subsistence level although spending on the military remains high. In 1997 the UN World Food Programme estimated that 2m. North Koreans faced starvation. More than 5% of the population starved to death during the 1990s. In 2000 Kim received South Korean President Kim Dae-jung as relations between the North and South appeared to be thawing. The two leaders agreed that reunification was the eventual aim of both Koreas but relations had again deteriorated by 2002 after a naval battle in the Yellow Sea between North and South forces killed four South Korean and around 30 North Korean sailors. Kim Jong-il blamed the USA and South Korea for the attack.

South Korean president Kim Dae-jung suspended rice shipments to the north and demanded an apology.

Relations with the USA worsened during 2002 and 2003 after the USA claimed that North Korea had a secret nuclear programme. US president George W. Bush accused North Korea of forming part of what he called the 'Axis of Evil' along with Iraq and Iran. North Korea subsequently reactivated a nuclear plant and demanded the withdrawal of inspectors from the UN International Atomic Energy Agency. Pyongyang claimed it had been forced to reopen the reactor in response to US plans for a pre-emptive nuclear strike. North Korea then announced its withdrawal from the nuclear non-proliferation treaty, although it denied any intention to produce nuclear weapons. Many observers suggested Kim carried out these manoeuvres to pressurize the USA into direct talks with a view to signing a mutual non-aggression pact. North Korea's nuclear programme has in turn unsettled relations with regional neighbours including South Korea and Japan. In Feb. 2005 North Korea publicly admitted for the first time that it possessed nuclear weapons. On 9 Oct. 2006 it conducted its first nuclear test, carrying out an underground explosion. In Feb. 2007 at talks between North Korea, South Korea, Japan, Russia, China and the USA, Pyongyang agreed to close its chief nuclear reactor in return for fuel aid. In Oct. 2007 it agreed to close a further three installations and was scheduled to surrender its nuclear stockpile in 2008. However, Pyongyang missed a Dec. 2007 deadline to disclose full details of all of its nuclear facilities.

In Oct. 2007 North and South Korea issued a joint declaration calling for a permanent peace on the peninsula to replace the armistice in place since the end of the Korean War. However, relations soon deteriorated and at the end of 2008 Pyongyang accused Seoul of fostering hostility. The South accused the North of testing long-range missile technology in April 2009 and a month later North Korea walked out of international talks aimed at ending its nuclear programme. In May 2010 an international report concluded that the sinking of a South Korean ship two months earlier had been the responsibility of North Korea, prompting a collapse in trading and diplomatic relations between the two countries.

In Dec. 2011 it was announced that Kim Jong-il had died of a heart attack. State-run television called on the public to support his son, Kim Jong-un, as 'the great successor'.

## TERRITORY AND POPULATION

North Korea is bounded in the north by China, east by the Sea of Japan (East Sea of Korea), west by the Yellow Sea and south by South Korea, from which it is separated by a demilitarized zone of 1,262 sq. km. Its area is 122,762 sq. km.

The census population in 2008 was 24,052,231; density 195.9 per sq. km.

The UN gives a projected population for 2015 of 24.85m.

The area, 2008 census population (in 1,000) of the provinces and Pyongyang (directly governed city):

	Area in sq. km	Population	Chief Town
Chagang	16,968	1,300	Kanggye
North Hamgyong <sup>1</sup>	17,570	2,327	Chongjin
South Hamgyong	18,970	3,066	Hamhung
North Hwanghae <sup>2</sup>	9,262	2,114	Sariwon
South Hwanghae	8,002	2,310	Haeju
Kangwon <sup>3</sup>	11,152	1,478	Wonsan
North Pyongan <sup>4</sup>	12,191	2,729	Sinuiju
South Pyongan	12,330	4,052	Pyongsong
Pyongyang (directly governed city)	2,000	3,255	
Yanggang	14,317	719	Hyesan

<sup>1</sup>Area and population include Rason directly governed city.

<sup>2</sup>Area and population include Kaesong industrial region.

<sup>3</sup>Area and population include Kumgangsantourist region.

<sup>4</sup>Area and population include Sinuiju special administrative region.

Pyongyang, the capital, had a 2008 census population of 2,581,076. Other large towns (census, 2008): Hamhung (703,610); Chongjin (614,892); Sinuiju (334,031).

The official language is Korean.

## SOCIAL STATISTICS

2008 estimated births, 327,000; deaths, 238,000. 2008 estimated birth rate, 13.7 per 1,000 population; death rate, 10.0. Annual population growth rate, 2000–08, 0.5%. Marriage is discouraged before the age of 32 for men and 29 for women. Life expectancy at birth, 2007, was 64.9 years for men and 69.1 years for women. Infant mortality, 2005, 42 per 1,000 live births; fertility rate, 2008, 1.9 births per woman.

## CLIMATE

There is a warm temperate climate, though winters can be very cold in the north. Rainfall is concentrated in the summer months. Pyongyang, Jan. 18°F (−7.8°C), July 75°F (23.9°C). Annual rainfall 37" (916 mm).

## CONSTITUTION AND GOVERNMENT

North Korea adopted a new constitution in April 2009 that formalized *songun* or 'military first' politics as a guiding principle of state but dropped the word 'communism'. The Constitution provides for a 687-seat *Supreme People's Assembly* elected every five years by universal suffrage. Citizens of 17 years and over can vote and be elected. The government consists of the *Administration Council* directed by the Central People's Committee.

In 1998, four years after the death of Kim Il-sung, the title of president was abolished. On the death of Kim Jong-il on 19 Dec. 2011 his son and designated successor, Kim Jong-un (b. 1983), assumed the role of 'Supreme Leader'.

Party membership was 2m. in 1995. There are also the puppet religious Chongu and Korean Social Democratic Parties and various organizations combined in a Fatherland Front.

## National Anthem

'A chi mun bin na ra i gang san' ('Shine bright, o dawn, on this land so fair'); words by Pak Se Yong, tune by Kim Won Gyun.

## RECENT ELECTIONS

Elections to the Supreme People's Assembly were held on 8 March 2009. Only the list of the Democratic Front for the Reunification of the Fatherland (led by the Korean Workers' Party) was allowed to participate. 687 deputies were elected unopposed.

## CURRENT GOVERNMENT

*Supreme Leader, Commander of the Korean People's Army, First Secretary of the Workers' Party of Korea and First Chairman of the National Defence Commission:* Kim Jong-un.

In April 2012 the government comprised:

*Prime Minister:* Choe Yong-rim; b. 1930 (appointed 7 June 2010).

*Vice Prime Ministers:* Han Kwang-bok (also *Minister of Electronic Industry*), Pak Su-gil (also *Minister of Finance*), Jo Pyong-ju (also *Minister of Machine-Building Industry*), Jon Ha-chol, Kang Nung-su, Kang Sok-ju, Kim Rak-hui, Ri Mu-yong, Ro Tu-chol.

*Minister of Agriculture:* Kim Chang-sik. *Capital City Construction:* Kim Ung-gwan. *Chemical Industry:* Yi Mu-yong. *Coal Industry:* Kim Hyong-sik. *Commerce:* Kim Pong-chol. *Construction and Building Materials Industry:* Tong Chong-ho. *Culture:* An Tong-chun. *Education:* Kim Yong-chin. *Extractive Industries:* Kang Min-chol. *Fisheries:* Pak Thae-won. *Food Procurement and Administration:* Mun Ung-jo. *Foodstuffs and Daily Necessities Industry:* Jo Yong-chol. *Foreign Affairs:* Pak Ui-chun. *Foreign Trade:* Ri Ryong-nam. *Forestry:* Kim Kwang-yong. *Labour:* Jong Yong-su. *Land and Environment Protection:* Kim Chang-ryong. *Land and Marine Transport:* Ra Tong-hui. *Light Industry:* An Jong-su. *Metal Industry:* Kim Tae-bong. *Oil:* Kim Hui-yong. *People's Security:* Ri

Myong-su. *Physical Culture and Sports*: Pak Myong-chol. *Post and Telecommunications*: Ryu Yong-sop. *Power Industry*: Ho Taek. *Public Health*: Choe Chang-sik. *Railways*: Chon Kil-su. *State Construction Control*: Pae Tal-chun. *State Inspection*: Kim Ui-sun. *Urban Management*: Hwang Hak-won.

*President, Supreme People's Assembly Praesidium*: Kim Yong-nam. *Vice Presidents*: Yang Hyong-sop, Kim Yong-dae.

In addition there is one minister who is not in the cabinet. *Minister of the People's Armed Forces*: Kim Jong-Gak.

In practice the country is ruled by the Korean Workers' (i.e. Communist) Party which elects a Central Committee that in turn appoints a Politburo.

*Government Website*: <http://www.korea-dpr.com>

## CURRENT LEADERS

### Kim Jong-un

#### Position

Supreme Leader

#### Introduction

Kim Jong-un was named Supreme Commander of North Korea's military in Dec. 2011 after the death of his father, Kim Jong-il. Officially, Kim is a member of a triumvirate—with Premier Choe Yong-rim and President of the Supreme People's Assembly Praesidium Kim Yong-nam—that heads the executive branch of government. However, it is widely understood that Kim, like his late father, yields absolute power over the state, party and army.

#### Early Life

Kim Jong-un was born on 8 Jan. 1983 or 1984, the youngest son of Kim Jong-il and Ko Young Ha. Educated in Berne, Switzerland, Kim graduated in the 1990s from Kim Il-sung Military University, Mangyongdae-guyok.

As the youngest son, Kim was not in line to succeed to the leadership until his elder brother, Kim Jong-nam, reportedly fell out of favour with their father in 2001. In 2009 the first signs of succession appeared when Kim was given a mid-level position within the National Defence Commission. Kim became clear favourite to take over from his father when he was appointed a four-star *Daejang* (General) of the People's Army on 27 Sept. 2010, despite having no previous military experience. A day later he was given the post of vice-chairman of the Central Military Commission of the Workers' Party. In the months before Kim Jong-il's death, Kim accompanied him to public events apparently confirming reports that he was being groomed for the leadership.

Following Kim Jong-il's sudden death, Kim was proclaimed as 'the great successor' by the North Korean media before his appointment as Supreme Commander of the Army on 30 Dec. 2011.

#### Career in Office

It is likely that Kim will continue to be groomed for the leadership over several years, with interim power lying with his 'regent', Chang Song-taek (his uncle and vice chairman of the National Defence Commission). Despite the government's insistence that the change in leadership will not signal major policy shifts, especially in its 'songun' (military first) policy, there is optimism within the international community that the new administration may be open to reform. In Feb. 2012 Pyongyang pledged to suspend its uranium enrichment programme and nuclear and long-range missile tests in exchange for US aid. In April 2012 Kim was named First Secretary of the ruling Workers' Party and First Chairman of the National Defence Commission. In the same month North Korea unsuccessfully tested a three-stage rocket.

## DEFENCE

The Supreme Commander of the Armed Forces is Kim Jong-un. Military service is compulsory at the age of 16 for periods of 5–12 years in the Army, 5–10 years in the Navy and 3–4 years in the

Air Force, followed by obligatory part-time service in the Pacification Corps to age 40. Total armed forces troops were estimated to number 1,106,000 in 2007, up from 840,000 in 1986 although down from 1,160,000 in 1997. Around 70% of the troops are located along or near the Demilitarized Zone between North and South Korea.

Defence expenditure in 2003 totalled US\$5,500m. (US\$243 per capita), and represented 25.0% of GDP.

In 1998 North Korea tested a medium-range nuclear-capable Taepo Dong-1 missile. It has also developed a shorter-range No-Dong ballistic missile in addition to Scud B and Scud C missiles, and is developing a longer-range inter-continental ballistic missile, the two- or three-stage Taepo Dong-2, which experts believe could reach Alaska and the westernmost Hawaiian islands. A first unsuccessful test was carried out in July 2006. A second unsuccessful test, of the three-stage Taepo Dong-2, followed in April 2009 and a third unsuccessful launch came in April 2012.

#### Nuclear Weapons

North Korea was for many years suspected of having a secret nuclear-weapons programme, and perhaps enough material to build two warheads. In Oct. 2002 it revealed that it had developed a nuclear bomb in violation of an arms control pact agreed with the USA in 1994. North Korea has not signed the Comprehensive Nuclear-Test-Ban-Treaty, which is intended to bring about a ban on any nuclear explosions. It ratified the Nuclear Non-Proliferation Treaty in 1985 but withdrew in 2003. In Feb. 2005 it declared that it had manufactured nuclear weapons and stated that it would not re-enter multilateral negotiations on its disarmament. It carried out its first test of a nuclear weapon in Oct. 2006. In July 2007 Pyongyang closed the Yongbyon nuclear complex in return for international aid and in Oct. pledged to disable a further three facilities, ahead of surrendering its nuclear stockpile in 2008. However, Pyongyang missed a Dec. 2007 deadline to give a full account of all of its nuclear facilities although it eventually did so in June 2008. The following day North Korea destroyed Yongbyon's cooling tower. Further dismantling of its nuclear facilities was postponed after the USA refused to remove North Korea from its list of state sponsors of terrorism until Pyongyang produced verification of its nuclear downgrading. North Korea was removed from the list in Oct. 2008 and pledged to resume dismantling the Yongbyon reactor.

In April 2009 North Korea was accused by South Korea and the UN of testing long-range nuclear missile technology. North Korea responded by walking out of international talks to wind up its nuclear programme. The following month Pyongyang claimed it had successfully completed underground nuclear tests. In June the UN imposed new sanctions, with Pyongyang stating its intent to weaponize plutonium supplies.

#### Army

One of the world's biggest, the Army was estimated at 950,000 personnel in 2007 with 600,000 reserves. There is also a paramilitary worker-peasant Red Guard of some 3.5m. and a ministry of public security force of 189,000 including border guards.

Equipment includes some 3,500 T-34, T-54/55, T-62 and Type-59 main battle tanks.

#### Navy

The Navy, principally tasked to coastal patrol and defence, comprises 63 diesel submarines, three small frigates and five corvettes. Personnel in 2007 totalled about 46,000 with 65,000 reserves.

#### Air Force

The Air Force had a total of 590 combat capable aircraft and 110,000 personnel in 2007. Combat capable aircraft include J-5/6/7s (Chinese built versions of MiG-17/19/23s), MiG-23s, MiG-29s, Su-7s and Su-25s.

## ECONOMY

Agriculture is estimated to account for approximately 25% of GDP, industry 60% and services 15%.

In 2005 North Korea received US\$81m. in foreign aid.

North Korea was rated the joint most corrupt country in the world in a 2011 survey of 183 countries carried out by the anti-corruption organization *Transparency International*.

### Overview

Noted for its rigid state-controlled system, progress in North Korea has been impeded by an all-powerful bureaucracy and a reluctance to depart from the Marxist-Stalinist line. Aid agencies estimate that up to 2m. people have died since the mid-1990s through food shortages caused by natural disasters and economic mismanagement. The economy is dependent on international aid. Food shortages became critical in 2003 but resumption of US food assistance began in June 2008 amid concerns over a major shortfall.

International sanctions over North Korea's nuclear programme have led to greater reliance on China, which now accounts for four-fifths of its trade. In June 2011 it was announced that two new 'special economic zones', at Rason and Hwanggumpyong, would be developed in co-operation with China, an idea long promoted by Pyongyang.

### Currency

The monetary unit is the *won* (KPW) of 100 *chon*. Banknotes were replaced by a new issue in July 1992. Exchanges of new for old notes were limited to 500 won. In Nov. 2009 the government readjusted the value of the won, with 100 old won worth one new won. Officially the won trades at 135 per US dollar but unofficially it can sometimes trade at up to 3,000 per dollar. Inflation was an estimated 5% in 1998.

### Budget

Estimated revenue, 1999, 19,801m. won; expenditure, 20,018m. won.

### Performance

The real GDP growth rate was 6.2% in 1999 following a decade of negative growth. This was followed in 2000 by growth of 1.3%, rising in 2001 to 3.7%. In both 2002 and 2003 there was growth of 0.8%. GDP per head was put at US\$494 in 2003, or less than a twentieth of that of South Korea.

### Banking and Finance

The bank of issue is the Central Bank of Korea (*President*, Ri Kwang Gon). In 2002 there were seven state banks, seven joint venture banks and two foreign investment banks.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 3.1 tonnes per capita.

### Electricity

Installed capacity was an estimated 9.5m. kW in 2007 (approximately 53% hydro-electric). Production in 2007 was 21.52bn. kWh. Consumption per capita was 905 kWh in 2007. In Feb. 2003 North Korea reactivated its nuclear reactor at Yongbyon that had been dormant since 1994. It was again shut down in July 2007 in exchange for economic aid and political concessions following negotiations with China, Japan, Russia, South Korea and the USA. In April 2009 it was reactivated again following United Nations condemnation of a controversial long-range rocket launch.

### Oil and Gas

Oil wells went into production in 1957. An oil pipeline from China came on stream in 1976. China's supplies account for 70% of North Korea's oil consumption. Refinery distillation output amounted to 2.5m. tonnes in 1998.

### Minerals

North Korea is rich in minerals. Estimated reserves in tonnes: coal, 11,990m.; manganese, 6,500m.; iron ore, 3,300m.; uranium, 26m.; zinc, 12m.; lead, 6m.; copper, 2.15m. 23.9m. tonnes of coal were mined in 2007, 6.5m. tonnes of lignite in 2007, 5m. tonnes of iron ore in 2006, 500,000 tonnes of salt in 2006 and 12,000 tonnes of copper in 2006. 2006 production of silver was 20 tonnes; gold, 2,000 kg.

### Agriculture

In 2007 there were approximately 2.8m. ha. of arable land and 200,000 ha. of permanent crop land. An estimated 3.12m. persons were economically active in agriculture in 2007.

Collectivization took place between 1954 and 1958. 90% of the cultivated land is farmed by co-operatives. Land belongs either to the State or to co-operatives, and it is intended gradually to transform the latter into the former, but small individually-tended plots producing for 'farmers' markets' are tolerated as a 'transition measure'.

There is a large-scale tideland reclamation project. In 2002 around 1.46m. ha. were under irrigation, making possible two rice harvests a year. There were an estimated 64,000 tractors in 2002. The technical revolution in agriculture (nearly 95% of ploughing, etc., is mechanized) has considerably increased the yield of wheat (sown on 58,000 ha.). Areas harvested of other major crops, 2003: rice, 593,000 ha.; maize, 495,000 ha.; potatoes, 188,000 ha. Production (2003, in 1,000 tonnes): rice, 2,284; potatoes, 2,023; maize, 1,725; cabbage, 680; apples, 660; soybeans, 360; sweet potatoes, 350; dry beans, 300; melons and watermelons, 224.

Livestock, 2003: pigs, 3.18m.; goats, 2.72m.; cattle, 576,000; sheep, 171,000; 20m. chickens.

A chronic food shortage has led to repeated efforts by UN agencies to stave off famine. In Jan. 1998 the UN launched an appeal for US\$378m. for food for North Korea, the largest ever relief effort mounted by its World Food Programme.

### Forestry

Forest area in 2005 was 6.19m. ha. (51.4% of the land area). Timber production was 7.37m. cu. metres in 2007.

### Fisheries

In 2005 total catch was approximately 205,000 tonnes, of which 98% were sea fish.

## INDUSTRY

Industries were intensively developed by the Japanese occupiers, notably cotton spinning, hydro-electric power, cotton, silk and rayon weaving, and chemical fertilizers. Production: cement (2007), 6.1m. tonnes; crude steel (2007), 1.23m. tonnes; pig iron (2007), 900,000 tonnes; textile fabrics (1994), 350m. metres; TV sets (1995), 240,000 units; cars (2000), 6,600 units; ships (1995), 50,000 GRT. Industrial production is estimated to have halved between 1990 and 2000.

### Labour

The labour force totalled 11,881,000 (55% males) in 1996. Nearly 29% of the economically active population in 2002 were engaged in agriculture.

## INTERNATIONAL TRADE

Joint ventures with foreign firms have been permitted since 1984. A law of Oct. 1992 revised the 1984 rules: foreign investors may now set up wholly-owned facilities in special economic zones, repatriate part of profits and enjoy tax concessions. In 1996 foreign debt was estimated at US\$11,830m. The USA imposed sanctions in Jan. 1988 for alleged terrorist activities. Since June 1995 South Korean businesses and individuals have been permitted to make investments and set up branch offices in North Korea.

### Imports and Exports

Imports in 2001 were US\$1,847m.; exports, US\$826m. In 2001 China was the biggest import supplier (31%), followed by Japan

(13%) and South Korea (12%); Japan was the main export destination (27%), ahead of South Korea (21%) and China (20%). The chief imports are machinery and petroleum products, the chief exports metal ores and products.

## COMMUNICATIONS

### Roads

There were 25,554 km of road in 2006. There were 262,000 passenger cars in 2000. The first of two planned cross-border roads between the two Koreas opened in Feb. 2003.

### Rail

The railway network totalled 8,533 km in 1990, of which 3,250 km were electrified. In 1990, 38.5m. tonnes of freight and 35m. passengers were carried. In June 2000 it was agreed to start consultations to restore the railway from Sinuiju, on the North Korean/Chinese border, to Seoul by rebuilding an 8 km long stretch from Pongdong-ni to Changdan, on the North Korean/South Korean border, and a 12 km long stretch in South Korea. Two passenger trains crossed the border between North and South Korea on 17 May 2007 (one northbound and one southbound), completing the first cross-border journey in more than 50 years. Regular freight services between the two Koreas were resumed in Dec. 2007 but usage is very limited.

There is a metro and two tramways in Pyongyang.

### Civil Aviation

There is an international airport at Pyongyang (Sunan). There were flights in 2003 to Bangkok, Beijing, Khabarovsk, Macao, Shenyang and Vladivostok. The national carrier is Air Koryo.

### Shipping

The leading ports are Chongjin, Wonsan and Hungnam. Pyongyang is connected to the port of Nampo by railway and river. In Jan. 2009 there were 223 ships of 300 GT or over registered, totalling 884,000 GT.

The biggest navigable river is the Yalu, 698 km up to the Hyesan district.

### Telecommunications

There were 1,180,000 main (fixed) telephone lines in 2008. A mobile phone service was introduced in Dec. 2008 four years after a previous service had been shut down without explanation. In March 2009 there were 20,000 subscribers.

## SOCIAL INSTITUTIONS

### Justice

The judiciary consists of the Supreme Court, whose judges are elected by the Assembly for three years; provincial courts; and city or county people's courts. The procurator-general, appointed by the Assembly, has supervisory powers over the judiciary and the administration; the Supreme Court controls the judicial administration.

In May 2011 approximately 200,000 political prisoners were being held at a number of detention camps in the country. North Korea does not divulge figures on its use of the death penalty; however, Amnesty International reported that there were at least 30 executions in 2011.

### Education

Free compulsory universal technical education lasts 11 years: one pre-school year, four years primary education starting at the age of six, followed by six years secondary. In 1994–95 there were 37 universities, 31 specialized universities and 108 specialized colleges.

The adult literacy rate in 2008 was 100%.

### Health

Medical treatment is free. In 2003 there were 74,597 doctors (one per 312.5 population), 87,330 nurses and 6,084 midwives. In 2002

there were 214,647 hospital beds (92 per 10,000 population). 6.3% of GDP was spent on health care in 2004.

North Korea has been one of the least successful countries in the battle against undernourishment in the past 20 years. The proportion of undernourished people rose from 18% of the population in the period 1990–92 to 35% in 2001–03.

## RELIGION

The Constitution provides for 'freedom of religion as well as the freedom of anti-religious propaganda'. In 2001 there were 3.0m. Chondoists. Another 3.4m. followed traditional beliefs. There were also significant numbers of Christians and Buddhists.

## CULTURE

### World Heritage Sites

There is one UNESCO site in North Korea: the Complex of Koguryo Tombs (2004).

### Press

There were three national daily newspapers and 12 regional dailies in 2008 with a combined circulation of 4.5m. The party newspaper is *Nodong* (or *Rodong Sinmun* (Workers' Daily News). In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, North Korea ranked 177th out of 178 countries.

### Tourism

A 40-year ban on non-Communist tourists was lifted in 1986. In 2002 there were 400,000 foreign tourists. On 19 Nov. 1998 North Korea received its first tourists from South Korea, on a cruise and tour organized by the South Korean firm Hyundai.

### Calendar

A new yearly calendar was announced on 9 July 1997 based on Kim Il-sung's birthday on 15 April 1912. Thus 1912 became *Juche* year 1; 2012 is *Juche* 101.

## DIPLOMATIC REPRESENTATIVES

Of North Korea in the United Kingdom (73 Gunnersbury Ave., London, W5 4LP)

*Ambassador:* Ja Song Nam.

Of the United Kingdom in North Korea (Munsu Dong Diplomatic Compound, Pyongyang)

*Ambassador:* Peter Hughes.

Of North Korea to the United Nations

*Ambassador:* Sin Son Ho.

Of North Korea to the European Union

*Ambassador:* Vacant.

## KEY HISTORICAL EVENTS

The Korean peninsula was first settled by tribal peoples from Manchuria and Siberia who provided the basis for the modern Korean language. By 3000 BC agriculture-based communities had emerged. The earliest known colony in the region was established at Pyongyang in the 12th century BC. Among the most prominent agricultural communities was Old Choson, which by 194 BC had evolved into a league of tribes ruled by Wiman or 'Wei Man', a leader widely held to have defected from China, although he may have been a native of the Choson region. His realm was taken over by the Han empire of China in 108 BC and replaced by four Chinese colonies.

The rest of the peninsula developed into tribal states; Puyo in the north and Chin south of the Han River. Chin was itself split into three tribal states (Mahan, Chinha and Pyonhan); these states then evolved into three rival kingdoms, Koguryo, Paekche, and Silla. Three powerful figures, King T'aejo (AD 53–146) of Koguryo, King Koi (AD 234–86) of Paekche and King Naemul (AD 356–402) of Silla, established hereditary monarchies while powerful aristocracies developed from tribal chiefdoms.

With China's support Silla conquered the other two kingdoms; Paekche in 660 and Koguryo in 668. In 676 Silla drove out the

Chinese and gained complete control of the peninsula. Survivors from Koguryo established Parhae, under the leadership of Tae Cho-yeong, in the northern region. After a period of conflict with Silla, Parhae grew into a prosperous state in its own right before being taken over by northern nomadic peoples. In Silla an absolute monarchy replaced the council of nobles (its former decision making body) with a central administrative body called the chancellery (*Chipsabu*), thus undermining aristocratic power. Meanwhile, the capital Kumsong (now Kyongju in South Korea) was developed. The state was divided into administrative units by province (*chu*), prefecture (*kun*), and county (*hyon*), and five provincial capitals prospered as cultural centres. Avatamsaka Buddhism was the dominant religion.

Divisions within the aristocracy in the 8th century led to the restoration of the Council of Nobles and the overthrow of the monarchy. Forced to pay taxes to powerful provincial families and central government, the peasants rebelled. Two provincial leaders, Kyonhwon and Kungye, established the Later Paekche (892) and Later Koguryo (901) as rivals to Silla.

## National Unity

The powerful leader Wang Kon founded Koryo (now Kaesong, North Korea) in 918, and established a unified kingdom in the Korean peninsula in 936. Three chancelleries and the royal secretariat formed the supreme council of state and governed the kingdom. Koryo's leaders were then largely aristocratic, and the political system greatly favoured those in the top five tiers of the nine hierarchical levels. That the military was not eligible for any hierarchical position above the second level and received little land, led to a military coup in 1170. Gen. Ch'oe Ch'ung-hon established a military regime which held power for the next sixty years. Zen Buddhism and the allied ideology of Confucianism had grown popular but were suppressed under the Ch'oe regime. Many monks fled to the mountains, where they formed what became Korean Buddhism, the *Chogye*.

In 1231 the Mongols invaded Koryo but were resisted by the Ch'oe leaders for nearly three decades, until a peasant uprising saw the Ch'oe overthrown. A power-sharing agreement between the rebels and the Mongols came into force in 1258. Despite some interference from the Mongols, Koryo retained its identity as a unified state. The aristocracy established seats of power throughout the country, encouraging peasants to seek protection as serfs. This, however, led to reduced tax revenues and when the government did not have sufficient resources to reward its bureaucratic class, a rebellion ensued. Led by General Yi Song-gye, and with the help of the Ming dynasty in China, government officials seized power in 1392 and established a new system of land distribution, thus ending the Koryo dynasty.

Gen. Yi named the state Choson, designating Hanyang (now Seoul, South Korea) as the capital. Buddhism was dropped in favour of a new Chinese-influenced Confucian ethical system and the state was governed by a hereditary aristocracy (the *yangban*), who controlled all aspects of Korean society. In 1420 the Hall of Worthies (*Chiphyonjon*) was established for scholars, and after 1443 the Korean phonetic alphabet (*hangul*) developed. Later in the period, a centralized yangban government was formed and the country divided into eight administrative regions, with standardized laws and a central decision-making and judicial body.

In 1592 Japan, newly unified under the command of Toyotomi Hideyoshi, sent an army to Korea supposedly as part of an invasion of China. Korea's naval forces, under Admiral Yi Sun-shin, were able to repel the invaders. Swelling anti-Japanese sentiment prompted Koreans from all hierarchical divisions to

fight in the war alongside troops dispatched from Ming China. However, Japanese forces did not withdraw completely until Toyotomi's death in 1598, leaving Korea in ruins.

Despite joint efforts by China and Korea to stem the advances of the nomadic Manchu in the early 17th century, Seoul was captured in 1636. The Manchu established the Ch'ing dynasty several years later and demanded tribute from Korea.

During the 17th and 18th centuries, Korea's agriculture developed as irrigation improved and rice, tobacco and ginseng became increasingly important crops. By the late 18th century many Korean scholars had turned to Roman Catholicism, leading to government suppression of Christianity in a bid to preserve the dominance of Confucianism. However, European priests maintained strong links in the country.

#### *Japanese Influence*

In the 19th century, a succession of monarchs yet to attain the age of majority undermined national stability. In 1864 Taewon'gun, the father of the child-king Kojong, took power and pursued a programme of controversial political reform that increasingly isolated Korea from the outside world. When Taewon'gun was eventually forced to step down, Korea came under pressure from Japan to open up its ports. Nervous of growing Japanese influence, China placed troops in Korea following a failed coup attempt by pro-Taewon'gun forces. There followed a trade agreement which greatly benefited Chinese commercial interests. Further treaties with France, Germany, Russia, the UK and the USA followed in the 1880s. As foreign influence increased, Korea's ruling elite divided between moderates and radicals. The radicals carried out a coup in 1884 but were quickly defeated by Chinese troops. An agreement to maintain a balance of power in the region was signed by Japan and China the following year.

As modernization gathered pace, government spending increased, adding to the burden of reparations payments to Japan. The peasants turned to *Tonghak* ('Eastern Learning'), a new religion established by an old yangban scholar and based on traditional beliefs. A *Tonghak* rebellion in 1894 caused China to send in troops. Japan responded by sending its own forces and war broke out. By the following year Japan had secured control of the peninsula.

Korea declared neutrality at the outbreak of war between Japan and Russia in 1904 but was pressured by Japan into allowing use of Korean territory. Japan achieved victory in 1905 and made Korea a protectorate. An unsuccessful appeal to the international peace conference at The Hague further undermined relations between Japan and Korea. Anti-Japanese guerrilla fighters in the southern provinces were active during 1908–09 but were crushed the following year when Korea was annexed by Japan.

Japan established a government in Korea and implemented a programme designed to supplant the Korean identity. There were restrictions on freedom of speech, press and assembly and the language and history of Japan was taught in schools at the expense of those of Korea. Many Koreans were dispossessed of their land as Japan built new transport and communications infrastructures. When the Japanese brutally suppressed a 2m.-strong demonstration in 1919, independence leaders established a provisional government in Shanghai and named Syngman Rhee as president. Hoping to calm dissent, Japan lifted certain press restrictions and replaced the gendarmerie with an ordinary police force, but uncompromising colonial rule remained in place.

Korea became a market for Japanese goods and attracted much capital investment but at the expense of agriculture, leading to a long-term shortage of rice. Tokyo reimposed military rule in 1931 when war broke out between Japan and China and attempted to quash all manifestations of a separate Korean identity over the following decade. Magazines, newspapers and academic organisations operating in the Korean language were banned. Hundreds of thousands of Koreans were made to fight in the Japanese army, or work in Japanese mines and factories in order

to support Japan's military efforts during the Second World War. The provisional government, having moved from Shanghai to Chungking in southwest China, declared war on Japan in Dec. 1941. An army of Korean resistance fighters joined the Allied forces in China and fought with them until the Japanese surrender in 1945.

#### *Korea Divided*

Korea was promised independence by China, Britain and the USA at the Cairo conference of 1943 but at the end of the war, after Japan's collapse, Korea was divided in two along the 38° Parallel. Initially the USA and the USSR had agreed informally to a four-way power share in Korea, involving Britain and the Republic of China. However, in order to hasten a Japanese surrender, US troops controlled the south of the country while the USSR took command of the north. The Soviet forces helped to establish a Communist-led provisional government under Kim Il Sung. As relations between the USA and the Soviet Union worsened, trade ceased between the two zones, causing economic hardship because industry was concentrated in the north and agriculture in the south.

In Sept. 1947 the United Nations urged elections in both sectors. However, a commission to oversee voting in the North was denied entry by Soviet troops. Rhee was elected in the South while the North appointed Kim Il Sung as leader. In 1948 the southern Republic of Korea (with Seoul as the capital) and the northern Democratic People's Republic of Korea (with Pyongyang as capital) came into being.

Soviet and US troops left the peninsula in 1949 and war broke out between the North and South in June 1950. A US-led UN force under Gen. Douglas MacArthur entered South Korea and pushed back the North Korean forces. The UN pressed on into North Korea and established a commission for the reunification and rehabilitation of Korea. China, which at that point had no representation in the United Nations, entered the war and contributed 1.2m. troops to the North Korean side. Peace negotiations began in 1951 and a new international boundary and demilitarized zone were declared in 1953. The USA offered South Korea financial support and signed a mutual security pact with Rhee, who had been reluctant to accept the division of the country. The issue of prisoner returns, particularly of North Koreans unwilling to return to the communist state, remained a point of contention. The war left 4m. people dead or injured.

Traditionally an agricultural region, South Korea faced severe economic problems after partition. Limited resources, war damage and a flood of refugees from North Korea all pointed towards economic disaster, and the country became dependent on foreign aid, particularly from the USA.

The authoritarian rule of President Rhee, marred by corruption, received widespread condemnation. The elections of 1960 were blighted by violence and fraud and when the police shot 125 students during a demonstration, the government was forced to step down. Rhee was exiled. Subsequent leaders failed to solve the country's problems and in May 1961 Gen. Park Chung-hee led a military coup. As leader of the Democratic Republican Party, he was elected president in 1963, 1967 and, following a constitutional amendment to allow a third term in office, 1971.

Park's government was powerful and efficient, reviving the economy through the development of manufacturing for export and attracting increased foreign investment, especially from America. In 1972 Park proclaimed martial law and abolished the national assembly. In 1979 he was assassinated and the country collapsed into chaos. Chun Doo-hwan became leader in 1980 in another military coup and, as leader of the Democratic Justice Party (DJP), revived the national assembly. Dissatisfaction with the government grew, however, and a new constitution in 1987 stipulated that the president be elected by popular vote and his term of office reduced to five years.

Roh Tae-woo was elected president in 1988 as leader of the DJP and later of the Democratic Liberal Party. Fighting rising inflation, he established diplomatic relations with China and the Soviet Union and developed a better relationship with opposition parties in his own country. North and South Korea met several times during the 1980s in a bid to improve relations. In 1991 the two countries signed a treaty of non-aggression, with each country promising not to interfere in the internal affairs of the other.

In 1992 Kim Young-sam, the former opposition leader who had merged his party with Roh's, became the first civilian to be elected president since the Korean War. He launched an anti-corruption campaign and continued to pursue closer relations with North Korea. During the financial crisis that affected East Asia in 1997 South Korea was forced to ask the International Monetary Fund for help, though it largely avoided long-term economic damage and remains one of Asia's most affluent countries.

In Dec. 1997 Kim Dae-jung, a pro-democracy dissident during the years of military dictatorship, was elected president. Kim forged a 'sunshine policy' aimed at closer ties with the North and received the Nobel peace prize for his efforts. The two Koreas subsequently undertook a series of joint commercial and infrastructural projects. Constitutionally disqualified from standing for the presidency again in 2002, Kim was replaced by Roh Moo-hyun who continued the 'sunshine policy', despite North Korea's deteriorating relationship with the USA.

In Oct. 2007 South and North Korea jointly called for a permanent peace on the peninsula to replace the armistice in place since the end of the Korean War. However, relations soon deteriorated and at the end of 2008 Pyongyang accused Seoul of fostering hostility. The South accused the North of testing long-range missile technology in April 2009 and a month later North Korea walked out of international talks aimed at ending its nuclear programme. In May 2010 an international report concluded that the sinking of a South Korean ship two months earlier had been the responsibility of North Korea, prompting a collapse in trading and diplomatic relations between the two countries.

## TERRITORY AND POPULATION

South Korea is bounded in the north by the demilitarized zone (separating it from North Korea), east by the Sea of Japan (East Sea), south by the Korea Strait (separating it from Japan) and west by the Yellow Sea. The area is 99,461 sq. km. The population at the census of 1 Nov. 2010 was 48,580,293; density, 488.4 per sq. km (one of the highest in the world). In 2005 the urban population was 80.8%.

The UN gives a projected population for 2015 of 49.12m.

The official language is Korean. In July 2000 the Korean government introduced a new Romanization System for the Korean Language to romanize Korean words into English.

There are nine provinces (*do*) and seven metropolitan cities with provincial status. Area and population in 2010:

Province	Area (in sq. km)	Population (in 1,000)
Gyeonggi	10,135	11,379
Gyeongsangnam	10,516	3,160
Gyeongsangbuk	19,024	2,600
Chungcheongnam	8,586	2,082
Jeollabuk	8,050	1,777
Jeollanam	11,987	1,741
Chungcheongbuk	7,432	1,512
Gangwon	16,572	1,472
Jeju	1,846	532
Seoul (city)	606	9,794
Busan (city)	760	3,415
Incheon (city)	965	2,663
Daegu (city)	886	2,446
Daejeon (city)	540	1,502
Gwangju (city)	501	1,476
Ulsan (city)	1,056	1,083

Cities with over 500,000 inhabitants (census 2010):

Seoul	9,794,304	Suwon	1,071,913	Cheongju	666,924
Busan	3,414,950	Changwon	1,058,021	Jeonju	649,728
Incheon	2,662,509	Seongnam	949,964	Anyang	602,122
Daegu	2,446,418	Goyang	905,076	Cheonan	574,623
Daejeon	1,501,859	Yongin	856,765	Namyangju	529,898
Gwangju	1,475,745	Bucheon	853,039	Pohang	511,390
Ulsan	1,082,567	Ansan	728,775		

## SOCIAL STATISTICS

2008: births, 465,900; deaths, 246,100; marriages, 327,700; divorces, 116,500. Rates per 1,000 population in 2008: birth, 9.7; death, 5.1; marriage, 6.8; divorce, 2.4. In 2006 only 1.5% of births were outside marriage, one of the lowest rates in the world. Suicides numbered 10,688 in 2006 (21.9 per 100,000 people). Expectation of life at birth, 2007, 82.4 years for females and 75.8 for males. Life expectancy had been 47 in 1955 and 62 in 1971. Infant mortality, 2005, six per 1,000 live births; fertility rate, 2008, 1.2 births per woman (the joint lowest rate in the world). Annual population growth rate, 2000-05, 0.5%. In 2009 the average age of first marriage was 31.6 for men and 28.7 for women.

South Korea has one of the most rapidly ageing populations in the world, partly owing to an ever-decreasing birth rate. In 2009, 10.7% of the population were over 65, up from 2.9% in 1960. There were 16.92m. households in 2009, with on average 2.8 members per household. According to the UN Human Development Report 2009, South Korea has an emigration rate of 3.1%; North America is the main destination, with 50.3% of South Korean migrants living there. Within South Korea, there are 551,200 foreign migrants, representing 1.2% of the total population.

## CLIMATE

The country experiences continental temperate conditions. Rainfall is concentrated in the period April to Sept. and ranges from 40" (1,020 mm) to 60" (1,520 mm). Busan, Jan. 36°F (2.2°C), July 76°F (24.4°C). Annual rainfall 56" (1,407 mm). Seoul, Jan. 23°F (-5°C), July 77°F (25°C). Annual rainfall 50" (1,250 mm).

## CONSTITUTION AND GOVERNMENT

The 1988 constitution provides for a *President*, directly elected for a single five-year term, who appoints the members of the *State Council* and heads it, and for a *National Assembly (Gukhoe)*, currently of 299 members, directly elected for four years (243 from constituencies and 56 from party lists in proportion to the overall vote). The current constitution created the Sixth Republic. The minimum voting age is 20.

### National Anthem

'Aegukga' ('A Song of Love for the Country'); words anonymous, tune by Ahn Eak-tay.

## GOVERNMENT CHRONOLOGY

Heads of State of South Korea since 1948. (DJP = Democratic Justice Party; DLP = Democratic Liberal Party; DP = Democratic Party; DRP = Democratic Republican Party; GNP = Grand National Party; LP = Liberal Party; MDP = Millennium Democratic Party; NCNP = National Congress for New Politics; NDP = New Democratic Party; NFP = Saenuri Party; NKP = New Korea Party; UD = Uri Party)

### Presidents

1948-60	LP	Syngman Rhee
1960-62	DP, NDP	Yun Po-sun

*Chairman of the Supreme Council for National Reconstruction*  
1962-63 military Park Chung-hee

### Presidents

1963-79	DRP	Park Chung-hee
1979-80	DRP	Choi Kyu-hah

1980-88	military, DJP	Chun Doo-hwan
1988-93	DJP, DLP	Roh Tae-woo
1993-98	DLP, NKP	Kim Young-sam
1998-2003	NCNP, MDP	Kim Dae-jung
2003-08	MDP, UD	Roh Moo-hyun
2008-	GNP, NFP	Lee Myung-bak

## RECENT ELECTIONS

Presidential elections were held on 19 Dec. 2007. Lee Myung-bak of the Grand National Party (GNP) won with 48.7% of votes cast, ahead of Chung Dong-young of the United New Democratic Party with 26.1%, Lee Hoi-chang (ind.) with 15.1% and seven other candidates. Turnout was 63.0%.

Elections to the National Assembly were held on 11 April 2012. Turnout was 54.3%. The Saenuri Party (New Frontier Party/NFP), formerly the Grand National Party, won 152 out of 300 seats with 42.8% of votes cast; the Democratic United Party (DUP) 127 with 36.5%; the Unified Progressive Party (UPP) 13 with 10.3%; and the Liberty Forward Party (LFP) 5 with 3.2%. Three seats went to independents.

Presidential elections are scheduled to take place on 19 Dec. 2012.

## CURRENT GOVERNMENT

*President:* Lee Myung-bak; b. 1946 (Saenuri Party; sworn in 25 Feb. 2008).

In March 2012 the cabinet comprised:

*Prime Minister:* Kim Hwang-sik; b. 1948 (Saenuri Party; since 1 Oct. 2010).

*Minister of Culture, Sport and Tourism:* Choe Kwang-shik. *Education, Science and Technology:* Lee Joo-ho. *Employment and Labour:* Lee Chae-pil. *Environment:* Yoo Young-sook. *Food, Agriculture, Forestry and Fisheries:* Suh Kyu-yong. *Foreign Affairs and Trade:* Kim Sung-hwan. *Gender Equality and Family:* Kim Kum-lae. *Health and Welfare:* Rim Che-min. *Justice:* Kwon Jae-jin. *Knowledge Economy:* Hong Suk-woo. *Land, Transport and Maritime Affairs:* Kwon Do-young. *National Defence:* Kim Kwan-jin. *Public Administration and Security:* Maeng Hyung-kyu. *Special Affairs:* Lee Jae-oh. *Strategy and Finance:* Bahk Jae-wan. *Unification:* Yu Woo-ik.

*National Assembly Speaker:* Park Hee-tae.

*Government Website:* <http://www.korea.net>

## CURRENT LEADERS

### Lee Myung-bak

*Position*  
President

#### Introduction

Lee Myung-bak made his name by playing a key role in establishing Hyundai among the world's leading industrial firms. He was elected president in Dec. 2007, promising to revitalize the economy and resurrect close ties with the USA. However, his term in office to date has proved difficult amid financial and currency turmoil and turbulent relations with North Korea.

#### Early Life

Lee Myung-bak was born on 19 Dec. 1941 near Osaka, Japan, where his Korean parents worked as farm labourers. The family moved to Pohang in the newly liberated southern Korea in 1946, with Lee attending Dongji Commercial High School. He studied business administration at Korea University in Seoul, financed in part by his work as a street cleaner.

A politically active student, Lee served a short prison term for demonstrating against the normalization of South Korea's diplomatic links with Japan. As a result, he struggled to find employment but was taken on by a then small manufacturing company, Hyundai Engineering. He became its youngest chief

executive officer at the age of 35 and was chairman at 46. Known as 'the Bulldozer', Lee pushed through a range of large-scale construction projects that underpinned the country's transformation from a poor agricultural economy to a major industrial power. Hyundai became one of the region's most powerful conglomerates, with around 160,000 staff by the time Lee left in 1992. During the boom years of the 1970s and 1980s, Lee became a wealthy property owner.

Lee entered political life at the 1992 parliamentary elections with the then ruling conservative New Korea Party, the predecessor of the Grand National Party (GNP, formed in 1997). He contested the mayorship of Seoul in 1995 but lost to the former prime minister, Chung Wong-sik. Lee subsequently spent a year as a visiting professor at George Washington University in the USA.

On his return to South Korea, Lee established several companies specializing in internet-based financial services. In 2002 he returned to public life when he was elected mayor of Seoul. Over the next five years he earned plaudits for his campaigns to regenerate the city by investing in parks and open spaces and public transport. The restoration of the Cheonggye stream, which had been submerged by concrete in the 1970s, provoked protest but has become one of Seoul's most popular attractions. In 2007 he was named a 'hero of the environment' by *Time* magazine.

In May 2007 Lee declared his intention to run for the presidency for the right-leaning opposition GNP. Three months later he defeated Park Guen-hye in the party's primary. His campaign centred on economic issues, including the ambitious '747' plan aiming to achieve 7% annual GDP growth and to double average GDP per head to US\$40,000 to advance South Korea from the world's eleventh to seventh largest economy over the next decade.

Lee's fondness for large-scale infrastructure projects was underlined by plans to build a canal between Seoul and the port of Busan, which he has claimed would create 300,000 jobs, improve and diversify the transport system and revitalize the country's interior. He also floated a plan to create a Korean high-tech version of Silicon Valley in the central region of Chungcheongnam. Much of his campaign was dogged by allegations of involvement in stock market price manipulation in 2001. He denied the charges and was formally cleared of fraud in Feb. 2008 after an investigation by an independent counsel. Lee won a landslide victory in the presidential election of 19 Dec. 2007, defeating Chung Dong-young of the United New Democratic Party.

#### Career in Office

Lee was sworn in as president on 25 Feb. 2008. He promised to slash economic regulations, initiate tax reforms, streamline government and attract foreign investment. He also pledged to strengthen ties with the USA and hinted at a tougher line than his predecessor, Roh Moo-hyun, in relations with North Korea. In April 2008 Lee's GNP won an overall parliamentary majority in elections to the National Assembly. However, his poll ratings then fell markedly in the wake of his unpopular agreement to resume US beef imports (suspended since 2003 on health grounds) and also the impact of the global credit crisis which led the government to announce a US\$130bn. intervention package in Oct. 2008 to support the banking system and stabilize financial markets. In Feb. 2009 the central bank reduced interest rates to a record low as the economy faced its first contraction in over a decade, and in April the GNP suffered a crushing defeat in parliamentary by-elections. In Sept. 2009 Lee replaced his prime minister in a cabinet reshuffle and also removed the defence minister, with whom he had clashed over military spending. In June 2010 the GNP suffered a major defeat in local elections, heralding further senior cabinet changes including the prime minister in Aug.-Sept.

Meanwhile, relations with North Korea remained unpredictable and volatile. In Jan. 2009 the North announced that it was abandoning all military and political agreements signed with South Korea because of the latter's 'hostile intent'. Then in May the North conducted its second nuclear weapon test and declared that it was no longer bound by the armistice that ended the Korean War, heightening tensions further. However, later in the year Pyongyang made some conciliatory gestures towards Lee's government, including agreeing to resume a programme of family reunions suspended since 2008 and indicating a willingness to return to multilateral talks on its nuclear programme. But in 2010 hostilities again reignited as forces from both sides exchanged artillery fire near their disputed maritime border in Jan., a South Korean naval vessel was sunk allegedly by the North in March and the North launched an artillery attack on a small South Korean island close to the two countries' maritime border in Nov. North-South contacts eventually resumed in July 2011 as envoys from each side held their first nuclear talks since the collapse of negotiations in 2009.

## DEFENCE

Peacetime operational control, which had been transferred to the United Nations Command (UNC) under a US general in July 1950 after the outbreak of the Korean War, was restored to South Korea on 1 Dec. 1994. In the event of a new crisis, operational control over the Korean armed forces will revert to the Combined Forces Command (CFC). However, in June 2010 it was agreed that in 2015 South Korea would resume wartime command of its military. Conscription is 21 months in the Army, 23 months in the Navy and 24 months in the Air Force. In Sept. 2007 it was announced that the length of conscription will be gradually reduced and that conscientious objectors will be allowed to choose community service in place of military service. In 2004 the USA and South Korea agreed to the redeployment of 12,500 US personnel in three phases that would continue until 2008. In April 2008 the number of troops had been reduced to 28,000 from 37,000 in 2002.

Defence expenditure in 2008 totalled US\$24,172m. (US\$501 per capita). In 2007 defence spending represented 2.7% of GDP. In the period 2006-10 South Korea's spending on major conventional weapons, at US\$7.4bn., was the third highest behind India and China (although in 2008 South Korea's spending was the highest of any country).

### Army

Strength (2007) 560,000 (140,000 conscripts). Paramilitary Civilian Defence Corps, 3.5m. The armed forces reserves numbered 4.5m.

### Navy

In 2007 the Navy had a substantial force of 63,000 (around 19,000 conscripts), including 28,000 marine corps troops. In 2007 the fleet included 12 submarines, seven destroyers, nine frigates, 28 corvettes and around 75 patrol and coastal combatants. Naval Aviation operated eight combat capable aircraft. The fleet headquarters is at Jinhae.

### Air Force

In 2007 the Air Force had a strength of 64,000 men and 555 combat capable aircraft (F-4s, F-5s, F-15s and F-16s).

## INTERNATIONAL RELATIONS

Defections to South Korea from North Korea totalled a record 2,927 in 2009 (1,387 in 2005, 312 in 2000 and 9 in 1990).

The aim of Korea's foreign policy is to secure international support for peace and stability in Northeast Asia, including a means to reunify the Korean Peninsula without confrontation.

## ECONOMY

Agriculture accounted for 3% of GDP in 2008, industry 37% and services 60%.

In 2009 South Korea gave US\$816m. in international aid. In terms of a percentage of GNI, however, it was one of the least generous major industrialized countries, giving just 0-10%.

### Overview

South Korea has seen rapid economic development since the 1950s, when it was ranked amongst the poorest nations. It is now among the top 15 richest. Economic convergence with the developed world came only in the late 1980s. With few natural resources, imports were focused on raw materials and technology at the expense of consumer goods. Furthermore, domestic savings and investment were encouraged over consumption, resulting in an extremely high fixed-investment expenditure share of GDP.

Korea's development model was based on export-oriented industrialization. Export production was dominated by *chaebol* (conglomerates such as Samsung, Hyundai and LG), controlled by founding families with close government ties. Subsidized businesses (and the careers of the associated bureaucrats) were contingent on export success. Textile manufacturing was the first internationally competitive sector but the country is now competitive in electronics, automobiles, shipbuilding, chemicals and steel. According to the World Bank, Korea ranked eighth out of 183 economies for the ease of doing business in 2012, up from 15th in 2011.

The 1997 Asian financial crisis exposed weaknesses in the development model. High debt-to-equity ratios, heavy foreign borrowing and an undisciplined financial sector with a significant amount of non-performing loans weighed heavily on the economy. Eleven of the 30 largest *chaebol* that existed in June 1997 collapsed between July 1997 and June 1999. Daewoo, a once-major *chaebol*, was dismantled by the government in 1999 following a massive bankruptcy. Since 1997 government reforms and large-scale bankruptcies have changed the role of the *chaebol*. IMF-designed reforms to strengthen competition and the financial sector helped growth rebound in 1999. Strong domestic demand, spurred by a credit card boom, helped weather the global slowdown in 2001-02 but a credit card crisis hit in 2003, with 3.7m. people defaulting by the end of the year. Although household consumption accelerated in 2005, many households remained heavily indebted.

Reliance on oil makes the economy vulnerable to fluctuations in the oil price. China, a major export and FDI destination, poses an increasingly competitive threat to many of Korea's leading industries. Nonetheless, real GDP performance was positive before the global financial crisis that started in 2007, with growth in 2006 (at over 5%) at its highest level for four years as a result of robust exports and strong domestic demand.

In 2008 exports slumped and capital left the country at a higher rate than during the Asian crisis. GDP growth declined to 2.3% that year and 0.3% in 2009 (the slowest rate since 1998), before recovering strongly in 2010—one of the earliest bounce-backs in the OECD. The economy expanded by more than 6% in 2010 and the unemployment rate reverted to pre-crisis levels in 2011. Korea was the world's seventh largest holder of international reserves in 2011 and its banks are well-capitalized, with low levels of non-performing loans. However, household debt remains high, at 125% of household disposable income in 2011. With its dependence on exports, slowdowns in the economies of trade partners may have knock-on effects. The United States-Korea Free Trade Agreement (KORUS FTA) was signed in 2007 and approved by the US Congress in Oct. 2011 and the Korean National Assembly the following month. It came into force in March 2012.

The OECD has highlighted service sector reform as essential for further growth, especially since the country will soon face a shrinking labour force. Population ageing poses risks to future

growth as the old age dependency ratio is expected to increase to 65% by 2050, potentially a major strain on fiscal resources.

### Currency

The unit of currency is the *won* (KRW). Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.1%	2.8%	3.5%	3.6%	2.8%	2.2%	2.5%	4.7%	2.8%	2.9%

Foreign exchange reserves were US\$240,915m. in Aug. 2009 (US\$51,963m. in 1998) and gold reserves 463,000 troy oz. Total money supply in June 2009 was 103,242bn. won.

### Budget

In 2007 central government revenue was 236,006bn. won and expenditure 196,369bn. won. Principal sources of revenue in 2007: taxes on income, profits and capital gains, 74,273bn. won; taxes on goods and services, 59,835bn. won. Main items of expenditure by economic type in 2007: grants, 89,203bn. won; social benefits, 30,801bn. won.

VAT is 10%.

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.0%	7.2%	2.8%	4.6%	4.0%	5.2%	5.1%	2.3%	0.3%	6.2%

Total GDP in 2010 was US\$1,014.5bn.

### Banking and Finance

The central bank and bank of issue is the Bank of Korea (*Governor*, Kim Choong-soo). There are four major financial groups—Woori Finance Holdings (assets in April 2010 of US\$230.52bn.), KB Financial Group (US\$212.40bn.), Shinhan Financial Group (US\$208.99bn.) and Hana Financial Group (US\$125.57bn.). Specialized banks include the National Agricultural Co-operative Federation (NACF), Korea Development Bank and Industrial Bank of Korea. Foreign-owned banks operating in South Korea include ABN AMRO, Bank of America, Bank of Tokyo-Mitsubishi UFJ, Deutsche Bank and Hongkong and Shanghai Banking Corporation. The use of real names in financial dealings has been required since 1994.

South Korea has started to open up once protected industries to foreign ownership, and in 2010 attracted US\$6.9bn. in foreign direct investment.

There is a stock exchange in Seoul.

## ENERGY AND NATURAL RESOURCES

### Environment

South Korea's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 11.2 tonnes per capita.

### Electricity

Installed capacity in 2007 was 73.4m. kW. Electricity generated (2007) was 427,317m. kWh (thermal, 278,891m. kWh; nuclear, 142,937m. kWh; hydro-electric, 5,042m. kWh; geothermal, 447m. kWh). There were 20 nuclear reactors in use in 2008. Consumption per capita in 2007 was 8,776 kWh.

### Oil and Gas

South Korea is the world's fifth largest importer of crude oil and second largest importer of liquefied natural gas (LNG). Domestic oil and gas production is negligible. In 2009 total gross petroleum imports amounted to 3.1m. bbls per day; daily consumption was 2.2m. bbls. Three of the world's ten largest oil refineries are in South Korea. In 2009 consumption of natural gas totalled 34.09bn. cu. metres. South Korea has no international gas pipeline connections and all imports are delivered by LNG tankers.

### Minerals

Output, 2008, included (in tonnes): limestone, 82.25m.; anthracite coal, 2.77m.; salt, 0.38m.; iron ore, 0.37m.; silver, 1,462; gold, 38.

### Agriculture

Cultivated land was 1.74m. ha. in 2009, of which 1.01m. ha. were rice paddies; the area of dry field was 727,000 ha. As at Dec. 2009 the farming population was 3.12m. and there were 1.20m. farm households. 1.76m. people were employed in agriculture, forestry and fishing in Sept. 2010. There were 243,662 tractors in 2007.

Production (2008, in 1,000 tonnes): rice, 6,919; cabbage, 2,902; onions, 1,540; watermelons, 857; tangerines, mandarins and clementines, 636; potatoes, 605; apples, 471; pears, 471; persimmons, 431; tomatoes, 408; chillies and green peppers, 386; cucumbers and gherkins, 384; garlic, 375; grapes, 334.

Livestock in 2008 (in 1,000): pigs, 9,153; cattle, 2,894; goats, 266; chickens, 120,000.

Livestock products in 2008 (in 1,000 tonnes): pork 1,056; beef, 246; poultry meat, 542; milk, 2,204; eggs, 595.

### Forestry

Forest area was 6.40m. ha. in 2005 (64% of the land area). Total stock was 489.0m. cu. metres. In 2004, 62% of the total forest area was privately owned. Timber production was 5.15m. cu. metres in 2007.

### Fisheries

The fish catch totalled 3.18m. tonnes in 2009 (coastal aquaculture, 1.31m. tonnes; inshore-offshore fisheries, 1.23m. tonnes; deep sea, 604,880 tonnes; inland waters, 30,060 tonnes), worth 6,910.6bn. won. Imports of fishery commodities were valued at US\$2,928m. in 2008 and exports at US\$1,287m.

## INDUSTRY

The leading companies by market capitalization in South Korea in March 2011 were: Samsung Electronics Company Ltd (US\$138.2bn.); Hyundai Motor (US\$40.8bn.); and Pohang Iron and Steel Company (POSCO), US\$40.1bn.

Manufacturing industry is concentrated primarily on oil, petrochemicals, chemical fibres, construction, iron and steel, mobile phones, cement, machinery, chips, shipbuilding, automobiles and electronics. Tobacco manufacture is a semi-government monopoly. Industry is dominated by giant conglomerates (*chaebol*). There were 3.19m. businesses in 2004, of which 263,128 were incorporated. 878,294 businesses were in wholesale and retail trades, 643,773 in hotels and restaurants, 331,458 in transport and communications and 328,338 in manufacturing. The leading *chaebol* are Samsung (with assets of US\$252.5bn. and revenue of US\$173.4bn. in 2008), LG, Hyundai and SK Group.

Production in 2005: petroleum products, 922.9m. bbls; mobile phones, 201.2m. units; refrigerators, 6.92m. units; TV sets, 5.85m. units; cars, 3.70m. units; cigarettes, 107.2bn. units. Production (2005) in 1,000 tonnes: cement, 51,391; crude steel, 47,770; distillate fuel oil (2007), 34,314; residual fuel oil (2007), 27,363; pig iron (2009), 27,475; beer (2004), 2,016m. litres.

Shipbuilding orders totalled 21.96m. GT in 2005.

### Labour

In Sept. 2010 the population of working age was 40.68m.; the economically active population was 24.91m. (14.51m. males and 10.40m. females) including 16.44m. persons employed in services, 5.85m. in construction, manufacturing and mining, and 1.76m. in agriculture, fisheries and forestry. 5.61m. persons were self-employed in Sept. 2010. Unemployment was 3.1% in Dec. 2011—one of the lowest rates in the industrialized world. Long-term unemployment is particularly low, with only 0.3% of the labour force in 2010 having been out of work for more than a year. An annual legal minimum wage is set by the *Minimum Wage Act* (enforced from 1988), which applies to all industries. In Jan. 2009

it was increased to 4,000 won per hour and 32,000 won per eight-hour day.

In 2008 the average monthly wage was 2.72m. won and the working week averaged 39.4 hours. In July 2004 the working week in the civil service, for financial and insurance firms, and for employers with 1,000 or more staff was reduced from 44 to 40 hours. A five-day working week for smaller companies has been gradually phased in; small businesses with between five and 20 employees did not have to introduce the shorter working week until July 2011. Workers in South Korea put in among the longest hours in the industrialized world. In 2008 full- and part-time workers put in an average of 2,256 hours (although this has been declining every year since 2000 when the average was 2,520 hours).

## INTERNATIONAL TRADE

Total external foreign debt was US\$381,100m. in 2008. In May 1998 the government removed restrictions on foreign investment in the Korean stock market. It also began to allow foreign businesses to engage in mergers and acquisitions. From July 1998 foreigners were allowed to buy plots of land for both business and non-business purposes. Since Aug. 1990 South Korean businesses and individuals have been permitted to make investments and set up branch offices in North Korea, on an approval basis.

### Imports and Exports

Imports (c.i.f.) and exports (f.o.b.) for calendar years in US\$1m.:

	2003	2004	2005	2006	2007
Imports	178,825.9	224,460.9	261,235.6	309,379.5	356,841.0
Exports	193,817.3	253,844.6	284,418.2	325,457.2	371,477.1

Both imports and exports almost doubled between 2003 and 2007.

Leading import sources in 2007 were: China, 17.7%; Japan, 15.8%; USA, 10.5%; Saudi Arabia, 5.9%. The principal export markets in 2007 were: China, 22.1%; USA, 12.4%; Japan, 7.1%; Hong Kong, 5.0%.

In 2004 machinery and transport equipment accounted for 33.6% of imports and 63.0% of exports; chemicals, manufactured goods classified chiefly by material and miscellaneous manufactured articles 33.4% of imports and 30.7% of exports; mineral fuels, lubricants and related materials 22.4% of imports and 4.1% of exports; inedible crude materials (except fuels), and animal and vegetable oil and fats 6.3% of imports and 1.0% of exports; and food, live animals, beverages and tobacco 4.4% of imports and 1.2% of exports.

Rice imports were prohibited until 1994, but following the GATT Uruguay Round the rice market opened to foreign imports in 1995.

## COMMUNICATIONS

### Roads

In 2007 there were 102,061 km of roads, comprising 3,103 km of motorways, 14,225 km of highways and main roads and 84,733 km of secondary roads; 77.6% of roads (79,189 km) were paved. In 2006, 97,854m. passenger-km were travelled by road and 12,545m. tonne-km of freight were moved.

In 2007 motor vehicles in use included 12,020,700 passenger cars, 4,189,000 vans and lorries, 182,100 buses and coaches, and 1,821,300 motorcycles and mopeds. In 2007 there were 6,166 fatalities as a result of road accidents (9,353 in 2000).

The first of two planned cross-border roads between the two Koreas opened in Feb. 2003.

### Rail

In 2009 Korail's system totalled 3,380 km of 1,435 mm gauge (including 240 km of high speed railways). In 2009 passenger-km travelled came to 31.3bn. and freight tonne-km to 9.3bn. In June 2000 it was agreed to start consultations to restore the railway

from Seoul to Sinuiju, on the North Korean/Chinese border, by rebuilding a 12 km long stretch from Munsan, in South Korea, to Jangdan, on the South Korean/North Korean border, and an 8 km long stretch in North Korea.

Two passenger trains crossed the border between North and South Korea on 17 May 2007 (one northbound and one southbound), completing the first cross-border journey in more than 50 years. Freight services between the two Koreas were resumed in Dec. 2007 but usage is very limited.

There are metros in Seoul (287 km), and smaller ones in Busan (95 km), Daegu (54 km), Daejeon (23 km), Gwangju (12 km) and Incheon (25 km).

### Civil Aviation

There are six international airports in South Korea: at Seoul (Incheon), Busan (Gimhae), Daegu, Jeju, Yangyang and Cheongju. Incheon airport, 50 km to the west of Seoul and built on reclaimed land made up of four small islands, opened in March 2001 and is the largest airport in Asia. It replaced Gimpo Airport as Seoul's International Airport; Gimpo remains open for domestic flights and is the second busiest airport with 14.3m. passengers in 2008. Incheon handled 30.0m. passengers in 2008, while Jeju handled 12.4m. and Busan 7.2m.

The national carrier is Korean Air, which in June 2009 operated flights to 101 cities in 39 countries. In 2005 Korean Air carried 22.0m. passengers (11.0m. on international flights); passenger-km totalled 50.3bn. The other main Korean carrier is Asiana Airlines, which was established in 1988.

### Shipping

In 2005 there were 52 ports (28 for international trade), including Busan, Incheon, Gunsan, Mokpo, Yeosu, Pohang, Donghae, Jeju, Masan, Ulsan, Daesan and Kwangyang. In Jan. 2009 there were 1,128 ships of 300 GT or over registered, totalling 13.41m. GT. Of the 1,128 vessels registered, 350 were general cargo ships, 260 oil tankers, 242 bulk carriers, 81 container ships, 80 passenger ships, 67 chemical tankers and 48 liquid gas tankers. The busiest port is Busan, which was visited by 48,343 vessels of 354,350,000 GRT in 2005. Cargo handled in 2005 totalled 217,217,000 tonnes (112,103,000 tonnes loaded and 105,114,000 tonnes discharged).

In 2005, 11,099,554 domestic passengers and 2,104,939 international passengers took ferries and other ocean-going vessels. There were 7,119 registered vessels accounting for a tonnage of 10,068,379.

### Telecommunications

In 2008 there were 21,325,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 45,607,000 (947.1 per 1,000 persons). The largest operator, SK Telecom, has 46% of the market share, ahead of KT, with 29%.

There were 26.1m. PCs in use in 2006 and 36.8m. internet users in 2008. In Dec. 2010 there were 89.8 wireless broadband subscribers per 100 inhabitants and 34.0 fixed broadband subscribers per 100.

## SOCIAL INSTITUTIONS

### Justice

Judicial power is vested in the Supreme Court, High Courts, District Courts and Family Court, as well as the Administrative Court and Patent Court. The single six-year term Chief Justice is appointed by the President with the consent of the National Assembly. The other 13 Justices of the Supreme Court are appointed by the President with the consent of the National Assembly, upon the recommendation of the Chief Justice, for renewable six-year terms; the Chief Justice appoints other judges. There has been an unofficial moratorium on executions since 1998—the death penalty was last used in Dec. 1997. In Dec. 2009 there were 2,468 judges, 1,699 prosecutors and 11,016 registered private attorneys.

In 2008 there were 2.19m. recorded offences; the most serious offences (including murder, rape, theft and assault) numbered 439,000. The population in the 50 penal institutions in Jan. 2010 was 47,514 (98 per 100,000 of national population); 5.4% were females and 3.2% foreigners.

### Education

The Korean education system consists of a six-year elementary school, a three-year middle school, a three-year high school and college and university (two to four years). Elementary education for 6–11 year olds and middle school education are compulsory. Mandatory middle school education began in 2002.

The total number of schools has increased sixfold from 3,000 in 1945 to 19,586 in 2005, with 11,934,863 enrolled students. In 2005 there were 8,275 kindergartens with 541,603 pupils and 31,033 teachers; 5,646 elementary schools with 4,023,806 pupils and 160,143 teachers; 2,010,704 pupils and 103,835 teachers at 2,935 middle schools; and 2,095 high schools with 1,762,896 pupils and 116,411 teachers. In 2005 there were 158 colleges and universities with 1,859,639 students and 49,200 teachers; 11 universities of education with 25,141 students and 798 teachers; 1,051 graduate schools with 282,225 students; and 18 industrial universities with 188,753 students and 2,658 teachers. In 2005, 5.6% of the population was enrolled in tertiary education, up from just 0.6% in 1970. Around 214,000 South Koreans were studying abroad in 2005.

In 2005 public expenditure on education came to 4.3% of GDP and 15.3% of total government spending. Total expenditure on tertiary education in 2005 was among the highest in the world at 2.4% of GDP. Private spending on education in 2005 came to 2.9% of GDP, the highest share of any industrialized country. The adult literacy rate is at least 99%.

According to the OECD's 2009 PISA (Programme for International Student Assessment) study, 15-year-olds in Korea rank first among OECD countries in reading and mathematics. The three-yearly study compares educational achievement of pupils in the major industrialized countries.

### Health

In 2004 there were 282 general hospitals (with 117,323 beds), 25,346 other hospitals and clinics (189,044 beds), 9,303 oriental medical hospitals and clinics (9,585 beds) and 15,406 dental hospitals and clinics. In 2004 there were 81,998 physicians (587 people per doctor), 15,406 oriental medical doctors, 21,344 dentists, 8,626 midwives, 202,012 nurses and 53,492 pharmacists.

In 2008 South Korea spent 6.5% of its GDP on health, with public spending accounting for 55.3% of total expenditure on health and private spending 44.7%. According to a 2006 survey, 55.4% of men aged 25–64 smoked (down from 69.9% in 1999) but only 3.2% of women.

### Welfare

In 2006, 12.8m. persons were covered by the National Pension System introduced in 1988. Employers and employees should make contributions amounting to 4.5% of the standard monthly income respectively, based on the employees' earned income. The Scheme covers old age pensions, disability pensions and survivors' pensions.

Under a system of unemployment insurance introduced in July 1995, workers laid off after working at least six months for a member employer are entitled to benefits averaging 50% of their previous wage for a period of 90 up to 240 days.

### RELIGION

Traditionally, Koreans have lived under the influence of shamanism, Buddhism (introduced AD 372) and Confucianism, which was the official faith from 1392 to 1910. Catholic converts from China introduced Christianity in the 18th century, but a ban on Roman Catholicism was not lifted until 1882. The Anglican Church was introduced in 1890 and became an independent jurisdiction in 1993 under the Archbishop of Korea. Religious

affiliations of the population at the census in 2005: Buddhism, 22.8%; Protestantism, 18.3%; Roman Catholicism, 10.9%; Confucianism, 0.2%; others, 1.3%; no religion, 46.5%. In Feb. 2012 there was one Roman Catholic cardinal.

### CULTURE

#### World Heritage Sites

There are ten sites in South Korea that appear on the UNESCO World Heritage List. They are (with year entered on list): the Sokkuram Grotto and Pulguksa Temple (1995), the Temple of Haeinsa (1995), Chongmyo Shrine (1995), Changdeokgung Palace, Seoul (1997), Hwasong Fortress, Suwon (1997), the dolmens of Gochang, Hwasun and Ganghwa (2000), Gyeongju historic area (2000), Jeju volcanic island and lava tubes (2007), the Royal Tombs of the Joseon Dynasty (2009) and the Historic Villages of Hahoe and Yangdong (2010).

#### Press

There were 288 daily newspapers in 2008. With 13m. paid daily newspaper subscriptions in 2008, South Korea has the fifth highest newspaper circulation among developed countries. 37% of the population read a newspaper regularly in 2008. The most widely read dailies are *Chosun Ilbo* (average daily circulation of 2.3m. per issue in 2008), *JoongAng Ilbo* (2.2m. copies) and *Dong-A Ilbo* (2.1m. copies). In the 2010 *World Press Freedom Index*, compiled by Reporters Without Borders, South Korea was ranked 42nd equal out of 178 countries.

#### Tourism

6,155,000 foreign nationals visited South Korea in 2006 (6,023,000 in 2005). In 2006 tourist revenues from foreign visitors totalled US\$5.8bn.; overseas travel expenditure by Koreans going abroad totalled US\$18.9bn. On 18 Nov. 1998 the first South Korean tourists to visit North Korea went on a cruise and tour organized by the South Korean firm Hyundai.

#### Festivals

Korean New Year or Seollal is celebrated on the first day of the lunar calendar and generally falls on the same date as the Chinese New Year. Other traditional festivals include the festival for the first full moon of the year known as Daeboreum; Dano or Suritnal (spring festival) which is held on the fifth day of the fifth month of the lunar calendar; and Chuseok (harvest festival) on the 15th day of the eighth month. The biggest music festivals are the Tongyeong International Music Festival (March), specializing in Western and Asian classical music, and the Pentaport Rock Festival in Incheon (July).

### DIPLOMATIC REPRESENTATIVES

Of the Republic of Korea in the United Kingdom (60 Buckingham Gate, London, SW1E 6AJ)

*Ambassador:* Choo Kyu-ho.

Of the United Kingdom in the Republic of Korea (Taepyeongno 40, 4 Jeong-dong, Jung-gu 100-120, Seoul)

*Ambassador:* Scott Wightman, CMG.

Of the Republic of Korea in the USA (2450 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Han Duck-soo.

Of the USA in the Republic of Korea (32 Sejongno, Jongno-gu 110-710, Seoul)

*Ambassador:* Sung Y. Kim.

Of the Republic of Korea to the United Nations

*Ambassador:* Kim Sook.

Of the Republic of Korea to the European Union

*Ambassador:* Ahn Ho-young.

*HDI/world rank:* 0.760/63

## KEY HISTORICAL EVENTS

The ruling dynasty was founded by Sheikh Sabah al-Awwal, who ruled from 1756 to 1772. In 1899 Sheikh Mubarak concluded a treaty with Great Britain wherein, in return for the assurance of British protection, he undertook to support British interests. In 1914 the British Government recognized Kuwait as an independent government under British protection. On 19 June 1961 an agreement reaffirmed the independence and sovereignty of Kuwait and recognized the Government of Kuwait's responsibility for the conduct of internal and external affairs. On 2 Aug. 1990 Iraqi forces invaded the country. Following the expiry of the date set by the UN for the withdrawal of Iraqi forces, an air offensive was launched by coalition forces, followed by a land attack on 24 Feb. 1991. Iraqi forces were routed and Kuwait City was liberated on 26 Feb. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait. In 2006 Sheikh Jaber, who had been Amir since 1977, died and was replaced by Sheikh Sabah.

## TERRITORY AND POPULATION

Kuwait is bounded in the east by the Persian Gulf, north and west by Iraq and south and southwest by Saudi Arabia, with an area of 17,818 sq. km. In 1992–93 the UN Boundary Commission redefined Kuwait's border with Iraq, moving it slightly northwards in conformity with an agreement of 1932. The population at the 2005 census was 2,193,651; density, 123 per sq. km. At the 2005

census 60.8% were non-Kuwaitis. In 2005, 98.3% of the population were urban.

The UN gives a projected population for 2015 of 3.09m.

The country is divided into six governorates: the capital (comprising Kuwait City, Kuwait's nine islands and territorial and shared territorial waters) (2005 census population, 254,503); Farwaniya (620,935); Hawalli (482,127); Ahmadi (390,927); Jahra (269,915); Mubarak al-Kabir (175,244). The capital city is Kuwait, with a population in 2005 of 31,574. Other major cities are (2005 populations): Qalib ash-Shuyukh (179,425), as-Salimiya (145,314), Hawalli (104,901), Hitan-al-Janubiyah (92,475).

The Neutral Zone (Kuwait's share, 2,590 sq. km), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two countries in May 1966, but the exploitation of the oil and other natural resources continues to be shared.

Over 78% speak Arabic, the official language. English is also used as a second language.

## SOCIAL STATISTICS

Births, 2008, 54,571; deaths, 5,701. The birth rate in 2009 was 21.9 per 1,000 population and death rate 2.3 per 1,000 population (one of the lowest in the world). Expectation of life at birth, 2007, was 76.0 years for males and 79.8 years for females. Infant mortality, 2005, ten per 1,000 live births. Annual population growth rate, 2000–05, 2.8%.

Fertility rate, 2008, 2.2 births per woman. Kuwait has had one of the largest reductions in its fertility rate of any country in the world over the past 30 years, having had a rate of 7.2 births per woman in 1975.

## CLIMATE

Kuwait has a dry, desert climate which is cool in winter but very hot and humid in summer. Rainfall is extremely light. Kuwait, Jan. 56°F (13.5°C), July 99°F (36.6°C). Annual rainfall 5" (125 mm).

## CONSTITUTION AND GOVERNMENT

The ruler is HH Sheikh Sabah al-Ahmed al-Jaber al-Sabah, the 15th Amir of Kuwait, who succeeded on 29 Jan. 2006. *Crown Prince:* Sheikh Nawwaf al-Ahmed al-Sabah (b. 1937). The present constitution was approved and promulgated on 11 Nov. 1962.

In 1990 the *National Council* was established, consisting of 50 elected members and 25 appointed by the Amir. It was replaced by a *National Assembly* or *Majlis al-Umma* in 1992, consisting of 50 elected members. The franchise extends to Kuwaiti citizens who are 21 or older, with the exception of those who are serving in the armed forces and citizens who have been naturalized for fewer than 30 years. In May 1999 the cabinet approved a draft law giving women the right to vote and run for parliament. However, in Dec. 1999 parliament rejected the bill allowing women to vote by a margin of 32 to 20. Women were granted the right to vote and run for office in May 2005 when parliament voted in favour of amending the election law by a margin of 35 votes to 23. Women were eligible to stand for election and to vote in a council by-election held in April 2006 and in the full parliamentary election held in June 2006.

Executive authority is vested in the *Council of Ministers*.

## National Anthem

'Watanil Kuwait salemta lilmajdi, wa ala jabeenoka tali ossaadi,' ('Kuwait, my fatherland! May you be safe and glorious! May you always enjoy good fortune!'); words by Moshari al-Adwani, tune by Ibrahim Nassar al-Soula.

## GOVERNMENT CHRONOLOGY

Amirs since 1950.

1950–65	Sheikh Abdullah al-Salem al-Sabah
1965–77	Sheikh Sabah al-Salem al-Sabah
1977–2006	Sheikh Jaber al-Ahmed al-Jaber al-Sabah
2006–	Sheikh Sabah al-Ahmed al-Jaber al-Sabah

## RECENT ELECTIONS

National Assembly elections were held on 2 Feb 2012. 34 of the 50 available seats were won by opposition parties. The Sunni Islamic Bloc gained 13 seats, the Popular Action Bloc 13, Shias 7, Pro-government Sunnis 5, Islamic Salafi Alliance 4, Hadas 4, Liberals 2 and ind. 2. On 16 May 2005 the National Assembly passed legislation granting women the right to vote, as a result of which women participated for the first time in a National Assembly poll in the June 2006 election. In May 2009, four women became the first female candidates to be elected to parliament but they all lost their seats in the 2012 election.

## CURRENT GOVERNMENT

In March 2012 the government comprised:

*Prime Minister:* Sheikh Jaber Mubarak al-Hamad al-Sabah; b. 1942 (sworn in 4 Dec. 2011).

*Deputy Prime Ministers:* Sheikh Ahmad al-Humoud al-Sabah (also *Minister of Interior*); Sheikh Sabah Khaled al-Sabah (also *Minister of Foreign Affairs*); Sheikh Ahmad Khaled al-Sabah (also *Minister of Defence*); Mustapha al-Shamali (also *Minister of Finance*).

*Minister of Commerce and Industry:* Anas al-Saleh. *Communications:* Salem al-Othaina. *Education and Higher Education:* Nayef al-Hajraf. *Electricity and Water, and Municipalities:* Abdulaziz al-Ibraheem. *Health:* Ali al-Obaidi. *Information:* Sheikh Mohammad Mubarak al-Sabah. *Islamic Affairs and Justice:* Jamal Shehab. *Oil:* Hani Hussein. *Public Works and Development:* Fadhel Safar. *Social Affairs and Labour:* Ahmad al-Rujaib. *Minister of State for Housing and Parliament:* Shuaib al-Muwaizri.

*Government Website:* <http://www.da.gov.kw>

## CURRENT LEADERS

### Sheikh Sabah al-Ahmed al-Jaber al-Sabah

#### Position

Amir

#### Introduction

Sheikh Sabah became Amir of Kuwait in Jan. 2006, ending a brief constitutional crisis in the wake of the death of Sheikh Jaber. As foreign minister for over 40 years, Sheikh Sabah oversaw the positioning of Kuwait as a key Western ally in the Gulf, allowing the USA to use the country as a launch pad for its invasion of Iraq in 2003.

#### Early Life

Sabah IV al-Ahmed al-Jaber al-Sabah was born in 1929 in Kuwait, then a British protectorate. He is the fourth son of Sheikh Ahmed al-Jaber al-Sabah, the founder of modern Kuwait and its leader from 1921–50. Educated at al Mubarakya School and by tutors, Sheikh Sabah became a member of the central committee municipality council in 1954. He also served as a member of the building and construction council at a time when the Amir, Sheikh Abdullah al-Salem al-Sabah, was pumping much of the state's new oil wealth into an ambitious public works programme.

From 1956–62 Sheikh Sabah chaired the printing and publishing authority and was then appointed minister of information in the first post-independence cabinet. He was promoted to foreign minister in 1963 and headed Kuwait's inaugural delegation to the UN later that year. He presided over a generally low-profile, neutralist foreign policy. Palestinian rights received strong support; Fatah was founded in Kuwait.

On 16 Feb. 1978 Sheikh Sabah was appointed deputy prime minister while keeping the foreign affairs portfolio. A broadly pro-Iraqi orientation was adopted during the early stages of the Iran–Iraq War and Kuwait became a member of the Gulf Co-operation Council. After Iraq's invasion of Kuwait in 1990, Sheikh Sabah joined other government members in exile in Saudi Arabia. The al-Sabahs' flight caused resentment among those left behind in Kuwait but post-liberation elections and the creation of a National Assembly in 1992 were well received. In 1996 Sheikh Sabah joined the Supreme Council of Planning.

The increasingly frail Sheikh Jaber issued a decree separating the posts of crown prince and prime minister on 13 July 2003 and appointed Sheikh Sabah as premier. Endowed with considerable executive powers, he continued the reforms begun by the Amir, appointing the first woman minister and promoting religious tolerance in schools. After the death of Sheikh Jaber in Jan. 2006, the 76-year old crown prince, Sheikh Saad al-Abdullah al-Salim al-Sabah, was deemed too ill to take the Amir's oath of office. He was voted out of office by parliament on 24 Jan. 2006 and the cabinet nominated Sheikh Sabah to take over. He was sworn in on 29 Jan. 2006.

#### Career in Office

Sheikh Sabah promised to speed up reforms promoting greater economic transparency, full political rights for women and democratic elections. Women had their first opportunity to vote in April 2006 in a municipal election, and were also allowed to stand as candidates in the parliamentary elections in June although none were successful. However, two women ministers were included in a new cabinet appointed in March 2007. In March 2008 Sheikh Sabah dissolved parliament and called fresh elections in May, in which Islamists won 30 of the 50 National Assembly seats. Women candidates were again unsuccessful. A year later he dissolved parliament again when the cabinet resigned on 16 March 2009 to prevent questioning of the Amir's nephew, Prime Minister Sheikh Nasser Muhammad al-Ahmad al-Sabah, on charges of misuse of public funds. Sheikh Nasser was reappointed prime minister following elections held on 16 May 2009 in which four women candidates were returned as parliamentary members for the first time.

Reflecting the political disaffection that spread across much of the Arab world from early 2011, there were demonstrations calling for reforms in Kuwait in March. The cabinet again resigned, but Sheikh Nasser was reinstated once more and in May formed a new administration with no changes to key personnel. However, after a crowd stormed parliament in Nov. in protest at alleged high-level corruption, Sheikh Nasser stood down again. The Amir accepted his resignation and appointed Sheikh Jaber Mubarak al-Hamad al-Sabah as the new prime minister. In Feb. 2012 Sheikh Jaber also resigned, but his administration was promptly reinstated with no changes to key ministries other than defence.

## DEFENCE

In Sept. 1991 the USA signed a ten-year agreement with Kuwait to store equipment, use ports and carry out joint training exercises. US troops are deployed in Kuwait as part of Operation *New Dawn* (formerly *Iraqi Freedom*).

Defence expenditure in 2008 totalled US\$6,812m. (US\$2,623 per capita), representing 4.4% of GDP. The expenditure per capita in 2008 was second highest in the world after that of the United Arab Emirates.

#### Army

Strength (2007) 11,000. In addition there is a National Guard of around 6,600.

#### Navy

Personnel in 2007 numbered an estimated 2,000, including 500 Coast Guard personnel.

### Air Force

From a small initial combat force the Air Force has grown rapidly, although it suffered heavy losses after the Iraqi invasion of 1990–91. Equipment includes F/A-18 *Hornet* strike aircraft and BAe *Hawks*. Personnel strength was estimated (2007) at 2,500, with 50 combat capable aircraft and 16 attack helicopters.

### ECONOMY

Industry accounted for 59.7% of GDP in 2003 and services 40.3%.

#### Overview

After the liberation that followed invasion by Iraq in 1991, the economy achieved relative stability. The economy is dominated by oil, which accounts for 80% of government revenue. Kuwaiti nationals make up only a third of the population, with the private sector dependent on expatriate labour.

High oil prices from 2003 produced large trade surpluses. Growth was strong up to 2008, until the economy felt the impact of the global financial crisis. Real GDP contracted by 5.2% in 2009 following a drop in domestic and global oil demand and prices. Activity recovered in 2010, driven primarily by the government's expansionary fiscal stance. In early 2010 the government launched a four-year development plan, emphasizing investment in health, education and infrastructure to transform the economy into a regional trade and financial centre, as well as expanding the role of the private sector.

#### Currency

The unit of currency is the *Kuwaiti dinar* (KWD), usually written as KD, of 1,000 *fil*s. Inflation was 10.6% in 2008 and 4.0% in 2009. Foreign exchange reserves were US\$7,544m. in July 2005, monetary gold reserves were 2.54m. troy oz and total money supply was KD 3,581m.

In 2001 the six Gulf Arab states—Kuwait, along with Bahrain, Oman, Qatar, Saudi Arabia and the United Arab Emirates—signed an agreement to establish a single currency by 2010. In June 2009 it was agreed to postpone the implementation of the new currency, the *khaleeji*, until 2013. It is now likely to be even later. Both Oman and the United Arab Emirates have now withdrawn from the scheme, in 2007 and 2009 respectively.

#### Budget

The fiscal year begins on 1 April. Budgetary central government revenue in 2006–07 totalled KD 15,304m. and expenditure KD 11,192m. Oil accounts for 94% of government revenues. Expenditure by function in 2006–07 (in KD 1m.): social protection, 2,964; economic affairs, 1,405; defence, 1,060; general public services, 1,030.

#### Performance

The economy contracted by 5.2% in 2009 but grew by 3.4% in 2010. Total GDP in 2009 was US\$109.5bn.

#### Banking and Finance

The *Governor* of the Central Bank is Sheikh Salem Abdulaziz al-Sabah. There is also the Kuwait Finance House. In 2002 there were eleven national banks and one Islamic banking firm. The combined assets of banks operating in Kuwait totalled KD 18,818m. in Dec. 2003. Foreign banks were not permitted until 2005.

There is a stock exchange, linked with those of Bahrain and Oman.

### ENERGY AND NATURAL RESOURCES

#### Environment

Kuwait's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 31.6 tonnes per capita in 2008.

#### Electricity

Installed capacity was 10.9m. kW in 2007. Production in 2007 was 48.8bn. kWh; consumption per capita was 20,223 kWh.

#### Oil and Gas

Oil production in 2008, 137.3m. tonnes. Kuwait had reserves in 2008 amounting to 101.5bn. bbls. Most of the oil is in the Great Burgan area (reserves of approximately 70bn. bbls), comprising the Burgan, Maqwa and Ahmadi fields located south of Kuwait City. Natural gas production was 12.8bn. cu. metres in 2008, with 1,780bn. cu metres of proven reserves.

#### Water

The country depends upon desalination plants. In 1993 there were four plants with a daily total capacity of 216m. gallons. Fresh mineral water is pumped and bottled at Rawdhatain. Underground brackish water is used for irrigation, street cleaning and livestock. Production, 2003, 127,185m. gallons (95,174m. gallons fresh, 32,011m. gallons brackish). Consumption, 2003, 119,521m. gallons (94,987m. gallons fresh, 24,534m. gallons brackish).

#### Agriculture

There were 10,400 ha. of arable land in 2003 and 2,100 ha. of permanent crops. Production of main crops, 2003 (in 1,000 tonnes): tomatoes, 64; cucumbers and gherkins, 35; potatoes, 21; dates, 16; aubergines, 15; chillies and green peppers, 8; pumpkins and squash, 8; cauliflowers, 7.

Livestock (2003): sheep, 481,000; goats, 194,000; cattle, 27,000; poultry, 30m. Milk production (2003), 43,000 tonnes.

#### Forestry

Forests covered 6,000 ha. in 2005, or 0.3% of the land area.

#### Fisheries

The total catch in 2005 was 4,895 tonnes, exclusively from sea fishing. In the space of a month in 2001 more than 2,000 tonnes of dead fish were washed ashore. Some experts claimed the cause was the alleged pumping of raw sewage into the Gulf while others attributed it to waste from the oil industry. Shrimp fishing was important, but has declined since the 1990–91 war through oil pollution of coastal waters. Before the discovery of oil, pearls were at the centre of Kuwait's economy, but today pearl fishing is only on a small scale.

### INDUSTRY

The leading company by market capitalization in Kuwait in March 2011 was Zain Group, a mobile telecommunications company (US\$20.5bn.).

Industries, apart from oil, include boat building, fishing, food production, petrochemicals, gases and construction. Production figures in 2007 (in 1,000 tonnes): residual fuel oil, 11,559; distillate fuel oil, 11,475; kerosene, 6,081; liquefied petroleum gas, 3,447; petrol, 2,852; jet fuel, 2,827; cement (2005), 2,145.

#### Labour

In June 2004 the labour force totalled 1,551,342 (81.3% non-Kuwaitis). Of the total labour force, 52.1% worked in social, community and personal services, 15.2% in trade, hotels and restaurants, 7.2% in construction and 5.8% in manufacturing. Registered unemployment in June 2004 was 1.7%. Approximately 95% of nationals work for the government, with around 95% of private jobs being filled by expatriates.

### INTERNATIONAL TRADE

Kuwait, along with Bahrain, Oman, Qatar, Saudi Arabia and the United Arab Emirates entered into a customs union in Jan. 2003.

#### Imports and Exports

Imports (c.i.f.) were valued at US\$24,840m. in 2008 and exports (f.o.b.) at US\$87,457m. Oil accounts for 92% of revenue from exports. In 2008 the leading import suppliers were China, the

USA and Japan; the main export markets were Japan, South Korea and India.

## COMMUNICATIONS

### Roads

There were 5,749 km of roads in 2004, 85% of which were paved. There were 750,600 passenger cars in use in 2007 (282 per 1,000 inhabitants), 573,200 lorries and vans, and 27,300 buses and coaches. There were 45,376 road accidents in 2003 involving injury with 1,704 fatalities.

### Civil Aviation

There is an international airport (Kuwait International). The national carrier is the state-owned Kuwait Airways. Kuwait's first low-cost airline, Jazeera Airways, began operations in Oct. 2005. In 2005 scheduled airline traffic of Kuwait-based carriers flew 50.7m. km and carried 1,944,200 passengers. Kuwait International airport handled 4,260,136 passengers in 2003 and 144,727 tonnes of freight.

### Shipping

The port of Kuwait formerly served mainly as an entrepôt, but this function is declining in importance with the development of the oil industry. The largest oil terminal is at Mina Ahmadi. Three small oil ports lie to the south of Mina Ahmadi: Mina Shuaiba, Mina Abdullah and Mina al-Zor. In Jan. 2009 there were 52 ships of 300 GT or over registered (including 22 oil tankers), totalling 2.33m. GT.

### Telecommunications

Kuwait had 2,890,100 telephone subscribers in 2005, or 1,075.6 per 1,000 population, of which 2,379,800 were mobile phone subscribers. There were 600,000 PCs in use (223.3 for every 1,000 persons) in 2005 and 700,000 internet users.

## SOCIAL INSTITUTIONS

### Justice

In 1960 Kuwait adopted a unified judicial system covering all levels of courts. These are: Courts of Summary Justice, Courts of the First Instance, Supreme Court of Appeal, Court of Cassation and a Constitutional Court. Islamic Sharia is a major source of legislation. The death penalty is still in use. There was one confirmed execution in 2007 but none since.

The population in penal institutions in 2005 was approximately 3,500 (130 per 100,000 of national population).

### Education

Education is free and compulsory from six to 14 years. In 2007 there were 211,576 pupils in primary schools with 22,016 teaching staff, and 247,233 pupils in secondary schools with 26,050 teaching staff. In 2006 there were 37,521 students in tertiary education and 1,986 academic staff. There are two state-supported higher education institutions, Kuwait University and the Public Authority for Applied Education and Training. There were approximately 28,000 students at Kuwait University in 2009. There are also a number of private universities and colleges, a teacher training college, a music academy and several Quranic schools. The Arab Open University which opened in Nov. 2002 is

based in Kuwait and has branches in several other Middle Eastern countries. There were around 17,000 enrolments in 2003–04. Adult literacy rate in 2007 was 94%. In 2005 public expenditure on education came to 4.7% of GDP and accounted for 12.7% of total government spending.

### Health

Medical services are free to all residents. In 2003 there were 15 hospitals and sanatoria, with a provision of 4,712 beds (19 per 10,000 population). There were 4,840 doctors (18 per 10,000 population), 810 dentists, 9,940 nurses and midwives and 1,340 pharmacists in 2005. There were 74 clinics and other health centres and 1,569,549 people were admitted to public hospitals in 2003.

## RELIGION

In 2001, 1,020,000 people were Sunni Muslims, 680,000 Shia Muslims, 230,000 other Muslims and 340,000 other (mostly Christian and Hindu).

## CULTURE

### Press

In 2006 there were eight daily newspapers, with a combined circulation of 430,000. Formal press censorship was lifted in Jan. 1992.

### Tourism

There were 4,482,000 non-resident visitors in 2007 (up from 2,072,000 in 2001), bringing revenue of US\$512m.

## DIPLOMATIC REPRESENTATIVES

Of Kuwait in the United Kingdom (2 Albert Gate, London, SW1X 7JU)

*Ambassador:* Khaled al-Duwaisan, GCVO.

Kyrgyz Respublikasy  
(Kyrgyz Republic)

Capital: Bishkek

Population projection, 2015: 5-63m.

GNI per capita, 2011: (PPP\$) 2,036

HDI/world rank: 0-615/126

## KEY HISTORICAL EVENTS

Kyrgyzstan became part of Soviet Turkestan, which itself became a Soviet Socialist Republic within the Russian Soviet Federal Socialist Republic (RSFSR) in April 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kyrgyzstan was separated from Turkestan. In Dec. 1936 Kyrgyzstan was proclaimed one of the constituent Soviet Socialist Republics of the USSR. With the collapse of the Soviet Empire, the republic asserted its claim to sovereignty in 1990 and declared independence in Sept. 1991. Askar Akayev became president in 1990 and subsequently expanded presidential powers. Kyrgyzstan became a member of the CIS in Dec. 1991.

Incursions into Kyrgyz territory by Islamic rebels and border skirmishes in the Fergana Valley are a cause for concern for all Central Asian governments. Kyrgyzstan tripled its defence budget for 2001 to combat terrorism. Allegations of widespread government corruption and disputed parliamentary elections in Feb. 2005 led to widespread popular protests. The Supreme Court declared the elections void and Kurmanbek Bakiyev was appointed prime minister and acting president. Akayev, in exile in Russia, resigned as president in April 2005. Bakiyev was confirmed as president by winning the elections held in July 2005. His tenure was marked by elections that fell below accepted international standards, concerns over civil liberties and growing popular resentment at his failure to address corruption. The doubling of household utility costs in Jan. 2010 sparked a wave of protests that resulted in Bakiyev stepping down in April 2010 with Roza Otunbayeva, previously foreign minister, heading an interim government.

## TERRITORY AND POPULATION

Kyrgyzstan is situated on the Tien-Shan mountains and bordered in the east by China, west by Kazakhstan and Uzbekistan, north by Kazakhstan and south by Tajikistan. Area, 199,945 sq. km (77,199 sq. miles). Population (census 2009), 5,362,800 (51.3% females); density, 27 per sq. km. In 2009, 65.9% of the population lived in rural areas.

The UN gives a projected population for 2015 of 5-63m.

The republic comprises seven provinces (Batken, Djalal-Abad, Issyk-Kul, Naryn, Osh, Talas and Chu) plus the city of Bishkek, the capital (formerly Frunze; 2009 census population, 822,000). Other large towns are Osh (233,800 in 2009), Djalal-Abad (89,000), Karakol (formerly Przhhevsk, 63,400), Tokmak (53,200), Uzgen (49,400), Balykchy (42,400) and Karabalta (37,800).

The Kyrgyz are of Turkic origin and formed 69.2% of the population in 2008; the rest included Uzbeks (14.5%), Russians (8.7%) and Dungans (1.2%).

The official languages are Kyrgyz and Russian. After the break-up of the Soviet Union, Russian was only the official language in provinces where Russians are in a majority. However, in May 2000 parliament voted to make it an official language nationwide, mainly in an attempt to stem the ever-increasing exodus of skilled ethnic Russians. The Cyrillic alphabet is still used although the reintroduction of the Roman alphabet (in use 1928–40) remains a source of political debate.

## SOCIAL STATISTICS

2009 births, 135,494; deaths, 35,898; marriages (2006), 43,760. Rates, 2009 (per 1,000 population): birth, 26.4; death, 7.0; infant mortality (per 1,000 live births, 2005), 58. Life expectancy, 2007, 63.9 years for males and 71.4 for females. In 2003 the most popular age for marrying was 20–24 for females and 25–29 for males. Annual population growth rate, 2000–05, 0.9%; fertility rate, 2008, 2.5 births per woman.

## CLIMATE

The climate varies from dry continental to polar in the high Tien-Shan, to sub-tropical in the southwest (Fergana Valley) and temperate in the northern foothills. Bishkek, Jan. 9°F (–13°C), July 70°F (21°C). Annual rainfall 14.8" (375 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was adopted in June 2010 after it won overwhelming support in a referendum following the ousting of the incumbent president, Kurmanbek Bakiyev, in April 2010. The referendum was held two weeks after ethnic violence between Kyrgyz and Uzbek groups killed up to 2,000 and left 400,000 displaced. Nonetheless, international observers deemed the vote fair. Turnout was put at 72.2%, with 90.5% of votes cast in favour.

Under the terms of the constitution, greater power is invested in parliament at the expense of the presidency. The president is allowed to serve a maximum of one six-year term and cannot seek re-election, although the office does retain its power of veto and has the authority to appoint heads of various state institutions. The unicameral parliament (*Jogorku Kenesh*) is comprised of 120 seats, with no single party allowed to hold more than 65. Political parties cannot be constituted on religious or ethnic grounds and members of the armed forces, the judiciary and the police are banned from party membership.

## National Anthem

'Ak möngülüü aska yoolor, talaalar' ('High mountains, valleys and fields'); words by D. Sadykov and E. Kuluev, tune by N. Davlyesov and K. Moldovasanov.

## RECENT ELECTIONS

Presidential elections were held on 30 Oct. 2011. Former prime minister Almazbek Atambayev won with 63.2% of the vote, ahead of Adakhan Madumarov with 14.7% and Kamchybek Tashiyev with 14.3%. There were 13 other candidates. Reported turnout was over 57%. Madumarov and Tashiyev warned in advance of

potential attempts to rig the voting and concerns were raised over the transparency of the elections.

Parliamentary elections were held on 10 Oct. 2010 in which 28 of 120 seats were won by Ata-Zhurt (Fatherland), 26 by the Social Democratic Party of Kyrgyzstan, 25 by Ar-Namys, 23 by Respublika and 18 by Ata-Meken. Turnout was 55.9%.

## CURRENT GOVERNMENT

In March 2012 the government comprised:

*President:* Almazbek Atambayev; b. 1956 (Social Democratic Party of Kyrgyzstan; since 1 Dec. 2011).

*Prime Minister:* Omurbek Babanov; b. 1970 (Respublika; since 1 Dec. 2011—acting until 23 Dec. 2011).

*First Deputy Prime Minister:* Aaly Karashev. *Deputy Prime Ministers:* Gulnara Asymbekova; Dzhoomart Otorbayev.

*Minister of Agriculture and Land Reclamation:* Saparbek Tynayev. *Culture and Tourism:* Ibrahim Zhunusov. *Defence:* Taalabek Omuraliev. *Economy and Anti-Monopoly Policy:* Temir Sariyev. *Education and Science:* Kanat Sadykov. *Emergency Situations:* Kubatbek Boronov. *Energy and Industry:* Askarbek Shadiyev. *Finance:* Akylbek Japarov. *Foreign Affairs:* Ruslan Kazakbayev. *Health:* Dinara Sagimbayeva. *Interior:* Zarylbek Rysaliev. *Justice:* Almambet Shykmamatov. *Social Development:* Ravshan Sabirov. *Transport and Communications:* Kalykbek Sultanov. *Youth, Labour and Employment:* Aliasbek Alymkulov.

## CURRENT LEADERS

### Almazbek Atambayev

#### Position

President

#### Introduction

Almazbek Atambayev was sworn in as president on 1 Dec. 2011. His election represented the first peaceful handover of power since the country gained independence during the dissolution of the Soviet Union. He succeeded Roza Otunbayeva, who assumed the post on a temporary basis after the previous incumbent, Kurmanbek Bakiyev, was ousted in a violent uprising in April 2010. A successful entrepreneur, Atambayev favours closer ties with Russia.

#### Early Life

Atambayev was born on 17 Sept. 1956 in Chui, a northern region of what is now Kyrgyzstan. He studied at the Moscow Institute of Management, from where he graduated with a degree in economics. From 1983 until 1987, when the Kyrgyz Republic was still a constituent part of the Soviet Union, he served on the Supreme Council of the Republic.

In 1993, two years after the country had declared independence, Atambayev was one of the founders of the Social Democratic Party of Kyrgyzstan. Having established himself as a prosperous businessman in the post-Soviet era, he became chairman of the party in 1999. In 2000 he won 6% of the vote in a presidential election. In Dec. 2005 he was appointed minister of industry, trade and tourism, but resigned five months later. In Nov. 2006 he was among the leaders of anti-government protests in the capital, Bishkek. He served as prime minister from March to Nov. 2007, and ran again for president in April 2009 but withdrew on the day of the ballot, citing electoral fraud.

Kurmanbek Bakiyev was overthrown in April 2010, prompting a wave of ethnic violence between Kyrgyz and Uzbek communities in the south of the country. A national referendum approved a new constitution that weakened the authority of the president and shifted power towards the legislature. Parliamentary elections followed and a coalition government was established for the first time in the country's history. Atambayev was appointed prime minister once more, a position he held until the presidential election in Oct. 2011.

Atambayev gained a comfortable victory at that election which, though criticized by some observers, was regarded as a significant democratic achievement.

#### Career in Office

Atambayev came to power in a country riven by ethnic division. He has pledged to foster national unity and has described Russia as the country's 'main strategic partner'. Soon after coming to power he said that he would look to close a US military base in the country when its lease expires in 2014.

## DEFENCE

Conscription is for two years. Defence expenditure in 2008 totalled US\$47m. (US\$9 per capita), representing 0.9% of GDP. The USA opened a military base in Kyrgyzstan in 2001 to aid the war in Afghanistan against the Taliban. The base was scheduled to close by the end of Aug. 2009 after an eviction notice was served on 20 Feb. 2009 giving the US military 180 days to vacate the site. However, on 23 June 2009 the Kyrgyz and US governments agreed a new deal that allowed a one-year extension of the lease. The current lease expires in mid-2014 but President Atambayev, who took office in Dec. 2011, has stated that the base must close then. In Sept. 2003 Kyrgyzstan agreed to allow Russia to open an air force base in the country. For the time being Kyrgyzstan is the only country in the world to host both a US and a Russian military base.

#### Army

Personnel, 2007, 8,500. In addition there are 5,000 border guards, 3,500 interior troops and a National Guard of 1,000.

#### Air Force

Personnel, 2007, 2,400, with 52 combat capable aircraft (mainly MiG-21 fighters) and nine attack helicopters.

## ECONOMY

Agriculture accounted for 33.0% of GDP in 2006, industry 20.1% and services 46.9%.

#### Overview

Following independence from the Soviet Union in 1991, the loss of trade preferences and Soviet subsidies caused a major downturn in the economy, characterized by declining GDP, hyperinflation and widespread poverty. However, economic performance and macroeconomic stability improved after the 1998 Russian financial crisis, with GDP growth averaging 5% per year. Traditionally, agriculture and mining are the leading sectors and international development aid has focused on the agricultural sector since the early 1990s. In recent years, however, growth has been driven by the construction, power, transportation, trade and communications sectors.

Despite a decline in the poverty rate (particularly for those in extreme poverty), 22% of the population lives below the international poverty line of US\$1.25 (PPP) per day according to the 2010 Human Development Report. Inflation threatens to become entrenched. Following a period in which it remained in the 3–5% range, a global rise in food and energy prices led to an inflation surge in late 2007.

When the political crisis in 2010 forced the resignation and exile of President Kurmanbek Bakiyev, there were knock-on impacts for the economy. Thousands of people were displaced and around 3,500 houses, 700 commercial establishments and 79 public buildings damaged or destroyed. The total damage was put at US\$490m. or the equivalent of 13% of GDP. At a meeting of high level donors in July 2010, US\$1.1bn. was pledged for 30 months. Finance for the recovery and reconstruction programme over the same period was estimated at US\$1.0bn. Reduced private sector confidence is expected to affect investment, including foreign direct investment.

The political situation remains fragile and rising inflation is a concern. The IMF points to the need to reduce vulnerabilities in the banking sector and to improve the business environment.

### Currency

On 10 May 1993 Kyrgyzstan introduced its own currency unit, the *som* (KGS), of 100 *tyiyn*, at a rate of 1 som = 200 roubles. Inflation was 24.5% in 2008, falling to 6.8% in 2009. Gold reserves totalled 83,000 troy oz in July 2005, foreign exchange reserves US\$509m. and total money supply 13,884m. soms.

### Budget

Budgetary central government revenue totalled 32,670.1m. soms in 2007 and expenditure 25,666.4m. soms. Tax revenues in 2007 were 23,266.0m. soms. Main items of expenditure by economic type in 2007 were: compensation of employees (6,845.1m. soms) and use of goods and services (6,370.6m. soms).

VAT is 20%.

### Performance

After growth of 3.1% in 2006, 8.5% in 2007, 7.6% in 2008 and 2.9% in 2009, the economy contracted by 1.4% in 2010. Total GDP in 2010 was US\$4.6bn.

### Banking and Finance

The central bank and bank of issue is the National Bank (*Chair, Zina Asankojoeva*). There were 22 commercial banks, including three foreign banks, in 2002. There is a stock exchange in Bishkek.

## ENERGY AND NATURAL RESOURCES

### Environment

Kyrgyzstan's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 1.1 tonnes per capita in 2008.

### Electricity

Installed capacity was an estimated 3.7m. kW in 2007. Production in 2007 was 16.24bn. kWh, of which 85.9% hydro-electric; consumption per capita was 2,624 kWh.

### Oil and Gas

Output of oil, 2007, 69,000 tonnes; natural gas, 2007, 15m. cu. metres.

### Minerals

In 2007 lignite production totalled 358,000 tonnes and hard coal production 37,000 tonnes. Some gold is mined.

### Agriculture

Kyrgyzstan is famed for its livestock breeding, in particular the small Kyrgyz horse. In 2004 there were 2,882,000 sheep, 1,003,000 cattle, 795,000 goats, 340,000 horses and 2m. chickens. Yaks are bred as meat and dairy cattle, and graze on high altitudes unsuitable for other cattle. Crossed with domestic cattle, hybrids give twice the yield of milk.

There were 1.34m. ha. of arable land in 2003 and 67,000 ha. of permanent crops. Number of peasant farms (2003), 255,822.

Principal crops include wheat, barley, corn and vegetables. Fodder crops for livestock are grown, particularly lucerne; also sugar beets, cotton, tobacco and medicinal herbs. Sericulture, fruit, grapes and vegetables are major branches.

Output of main agricultural products (in 1,000 tonnes) in 2003: potatoes, 1,308; wheat, 1,014; sugar beets, 812; corn for grain, 399; barley, 198; tomatoes, 144; carrots, 126; raw cotton, 106; cabbage, 104; onions, 104; cucumbers, 50. Livestock products, 2003, in 1,000 tonnes: beef and veal, 94; mutton and goat meat, 44; milk, 1,192; eggs, 268m. units.

### Forestry

In 2010 forests covered 954,000 ha., or 5% of the land area. Timber production in 2007 was 27,000 cu. metres.

### Fisheries

The catch in 2008 was eight tonnes, entirely from freshwater fishing.

## INDUSTRY

Industrial enterprises include food, timber, textile, engineering, metallurgical, oil and mining. There are also sugar refineries, tanneries, cotton and wool-cleansing works, flour-mills and a tobacco factory. In 2006 industry accounted for 20.1% of GDP, with manufacturing contributing 12.9%. In 2003 output was valued at 48,940.1m. soms at current prices.

Production, 2003: cement, 757,300 tonnes; carpets, 13.4m. sq. metres; cotton woven fabrics, 1m. sq. metres; footwear, 238,000 pairs.

### Labour

Out of 1,837,000 people in employment in 2003, 951,200 were engaged in agriculture, hunting and forestry; 205,800 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods; 151,900 in education; and 113,700 in manufacturing. In 2004 the unemployment rate was 2.9%.

## INTERNATIONAL TRADE

In Jan. 1994 an agreement to create a single economic zone was signed with Kazakhstan and Uzbekistan. In March 1996 Kyrgyzstan joined a customs union with Russia, Kazakhstan and Belarus. Total external debt was US\$2,032m. in 2005.

### Imports and Exports

Imports (c.i.f.) were valued at US\$4,072m. in 2008 and exports (f.o.b.) at US\$1,618m. Principal imports in 2004: machinery and transport equipment, 19.9%; petroleum and petroleum products, 17.6%; chemicals and related products, 14.4%; food and livestock, 7.9%. Principal exports in 2004: gold, 44.7%; petroleum and petroleum products, 8.2%; textile fibres, 7.9%; machinery and transport equipment, 7.5%.

Main import suppliers in 2003: Russia, 24.6%; Kazakhstan, 23.8%; China, 10.8%; USA, 6.7%; Uzbekistan, 5.5%; Germany, 5.3%. Main export markets, 2003: United Arab Emirates, 24.8%; Switzerland, 20.3%; Russia, 16.7%; Kazakhstan, 9.8%; Canada, 5.3%; China, 4.0%.

## COMMUNICATIONS

### Roads

There were 34,000 km of roads in 2007. Passenger cars in use in 2007 numbered 229,700 (44 per 1,000 inhabitants). There were 1,252 road accident fatalities in 2007.

### Rail

In the north a railway runs from Lugovaya through Bishkek to Rybachi on Lake Issyk-Kul. Towns in the southern valleys are linked by short lines with the Ursatyevskaya-Andizhan railway in Uzbekistan. Total length of railway, 2005, 424 km. Passenger-km travelled in 2008 came to 90m. and freight tonne-km to 946m.

### Civil Aviation

There is an international airport at Bishkek (Manas). The national carrier, Kyrgyzstan Airlines, ceased operations in 2005. In 2003 Bishkek handled 217,576 passengers (112,487 on international flights) and 1,978 tonnes of freight. In 2003 scheduled airline traffic of Kyrgyzstan-based carriers flew 6m. km, carrying 206,000 passengers (103,000 on international flights).

### Telecommunications

There were 979,800 telephone subscribers in 2005, equivalent to 186.2 for every 1,000 persons, including 541,700 mobile phone subscribers. There were 100,000 PCs in use (19.0 per 1,000 inhabitants) in 2005 and internet users numbered 280,000.

## SOCIAL INSTITUTIONS

### Justice

In 2004, 32,616 crimes were reported, including 419 murders and attempted murders. The population in penal institutions in March 2008 was 8,427 (156 per 100,000 of national population). The new constitution that came into force in Jan. 2007 abolished the death penalty.

### Education

In 2008–09 there were 72,000 children in pre-primary education (3,000 teaching staff), 392,000 pupils in primary education (16,000 teaching staff), an estimated 679,000 pupils in secondary education (51,000 teaching staff) and 17,000 university level lecturers for 294,000 students. There were 49 higher educational institutions and 75 secondary professional education establishments in 2004–05. Kyrgyz University had 20,855 students in 2004–05. Adult literacy was 99.2% in 2009.

In 2005 public expenditure on education came to 4.9% of GDP.

### Health

In 2006 there were 12,710 physicians, 1,017 dentists and 30,824 nurses and midwives. In 2003 there were 151 hospitals.

### Welfare

In Dec. 2007 there were 529,000 pensioners.

## RELIGION

In 2001, 75% of the population was Sunni Muslim. There were 1,784 mosques, 359 Christian congregations, one synagogue and one Buddhist temple in 2008.

## CULTURE

### World Heritage Sites

Sulaiman-Too Sacred Mountain in the Fergana Valley was inscribed on the UNESCO World Heritage List in 2009. Situated at the crossroads of important routes on the Central Asian Silk

Roads system, Sulaiman-Too is the site of numerous ancient places of worship and caves with petroglyphs.

### Press

There were three national daily newspapers in 2006, with a combined circulation of 35,000.

### Tourism

In 2005 there were 315,000 non-resident tourists; spending by tourists totalled US\$94m.

## DIPLOMATIC REPRESENTATIVES

Of Kyrgyzstan in the United Kingdom (Ascot House, 119 Crawford St., London, W1U 6BJ)

*Ambassador:* Dr Baktygul Kalambekova.

Of the United Kingdom in Kyrgyzstan (215 Manaschy Sagynbaya St., Bishkek 720010)

Sathalanalath Pasathipatai Pasasonlao  
(Lao People's Democratic Republic)

Capital: Vientiane

Population projection, 2015: 6.63m.

GNI per capita, 2011: (PPP\$) 2,242

HDI/world rank: 0.524/138

## KEY HISTORICAL EVENTS

The Kingdom of Laos, once called Lanxang (the Land of a Million Elephants), was founded in the 14th century. In 1893 Laos became a French protectorate and in 1907 acquired its present frontiers. In 1945, after French authority had been suppressed by the Japanese, an independence movement known as Lao Issara (Free Laos) set up a government which collapsed with the return of the French in 1946. Under a new constitution of 1947 Laos became a constitutional monarchy under the Luang Prabang dynasty and in 1949 became an independent sovereign state within the French Union. An almost continuous state of war began in 1953 between the Royal Lao Government, supported by American bombing and Thai mercenaries, and the Patriotic Front Pathet Lao, supported by North Vietnamese troops. Peace talks resulted in an agreement on 21 Feb. 1973 providing for the formation of a provisional government of national union and the withdrawal of foreign troops. A provisional coalition government was duly formed in 1974. However, after the Communist victories in neighbouring Vietnam and Cambodia in April 1975, the Pathet Lao took over the running of the whole country, maintaining only a façade of a coalition. On 29 Nov. 1975 HM King Savang Vatthana abdicated and the People's Congress proclaimed a People's Democratic Republic of Laos on 2 Dec. 1975. Since then the country has been

run by a regime with zero tolerance for dissent and a fierce distrust of foreigners.

## TERRITORY AND POPULATION

Laos is a landlocked country of 236,800 sq. km (91,428 sq. miles) bordered on the north by China, the east by Vietnam, the south by Cambodia and the west by Thailand and Myanmar. Apart from the Mekong River plains along the border of Thailand, the country is mountainous, particularly in the north, and in places densely forested.

The population (2005 census) was 5,621,982 (2,821,431 females); density, 24 per sq. km. 2009 estimate: 6,128,000. In 2005, 79.4% of the population lived in rural areas.

The UN gives a projected population for 2015 of 6.63m.

There are 16 provinces and one prefecture divided into 141 districts and one special region (*khethphiset*). Area, population and administrative centres in 2005:

Province	Sq. km	Population (in 1,000)	Administrative centre
Attopeu	10,320	112.1	Samakhi Xai
Bokeo	6,196	145.3	Ban Houei Xai
Bolikhamxai	14,863	225.3	Paksan
Champassak	15,415	607.4	Pakse
Houa Phan	16,500	280.9	Xam Neua
Khammouane	16,315	337.4	Thakhek
Luang Namtha	9,325	145.3	Luang Namtha
Luang Prabang	16,875	407.0	Luang Prabang
Oudomxai	15,370	265.2	Muang Xai
Phongsali	16,270	165.9	Phongsali
Salavan	10,691	324.3	Salavan
Savannakhet	21,774	825.9	Shanthabouli
Sayabouri	16,389	338.7	Sayabouri
Sekong	7,665	85.0	Sekong
Vientiane	18,526	388.9	Phonghong
Vientiane <sup>1</sup>	3,920	698.3	Vientiane
Xaisomboun	4,506	39.4	Ban Muang Cha
Xiang Khouang	15,880	229.6	Phonsavanh

<sup>1</sup>Prefecture.

The capital and largest town is Vientiane, with a population of (2005 estimate) 570,000. Other important towns are Savannakhet, Pakse, Xam Neua and Luang Prabang.

The population is divided into three groups: about 67% Lao-Lum (Valley-Lao); 17% Lao-Theung (Lao of the mountain sides); and 7.4% Lao-Sung (Lao of the mountain tops), who comprise the Hmong and Yao (or Mien). Lao is the official language. French and English are spoken.

## SOCIAL STATISTICS

2009 estimates: births, 141,000; deaths, 37,000. Rates, 2009 estimates (per 1,000 population): birth, 23; death, 6. Life expectancy, 2007: 63.2 years for men and 65.9 for women. Annual population growth rate, 2000-05, 1.7%. Fertility rate, 2008, 3.5 births per woman.

## CLIMATE

A tropical monsoon climate, with high temperatures throughout the year and very heavy rains from May to Oct. Vientiane, Jan. 70°F (21.1°C), July 81°F (27.2°C). Annual rainfall 69" (1,715 mm).

## CONSTITUTION AND GOVERNMENT

In Aug. 1991 the National Assembly adopted a new constitution. The head of state is the President, elected by the National Assembly, which consists of 132 members (115 prior to the elections of April 2011).

Under the constitution the People's Revolutionary Party of Laos (PPPL) remains the 'central nucleus' of the 'people's democracy';

other parties are not permitted. The PPPL's Politburo comprises 11 members, including Choummaly Sayasone (PPPL, *President*).

### National Anthem

'Xatlaotangtae dayma lao thookthuana xeutxoo sootchay' ('For the whole of time the Lao people have glorified their Fatherland'); words by Sisana Sisane, tune by Thongdy Sounthonevichit.

### RECENT ELECTIONS

The Sixth Legislature of the National Assembly elected Choummaly Sayasone as president on 8 June 2006. Bouasone Bouphavanh was elected prime minister on the same day. Sayasone and incumbent prime minister Thongsing Thammavong were re-elected by the Seventh Legislature on 15 June 2011.

There were parliamentary elections on 30 April 2011 in which the People's Revolutionary Party of Laos (PPPL) won 128 of 132 seats. Only four (approved) non-partisan candidates won seats. Turnout was 99.6%.

### CURRENT GOVERNMENT

*President:* Lieut.-Gen. Choummaly Sayasone; b. 1936 (PPPL; elected on 8 June 2006 and re-elected 15 June 2011).

*Vice President:* Boungnang Volachit.

In March 2012 the government consisted of:

*Prime Minister:* Thongsing Thammavong; b. 1944 (PPPL; elected on 23 Dec. 2010).

*Deputy Prime Ministers:* Maj. Gen. Asang Laoli (also *Chairman of State Control Commission*); Thongloun Sisoulit (also *Minister of Foreign Affairs*); Lieut.-Gen. Douangchai Phichit (also *Minister of Defence*); Somsavat Lengsavad.

*Minister of Agriculture and Forestry:* Vilayvanh Phomkhe. *Education and Sports:* Phankham Viphavanh. *Energy and Mining:* Soulivong Dalavong. *Finance:* Phouphet Khamphounvong. *Industry and Commerce:* Nam Viyaket. *Information, Culture and Tourism:* Bosengkham Vongdara. *Interior:* Khampane Philavong. *Justice:* Chaleun Yiabaohar. *Labour and Social Welfare:* Onchanh Thammavong. *Natural Resources and Environment:* Noulin Sinhbandith. *Planning and Investment:* Somdy Duangdy. *Post, Telecommunication and Communication:* Hiem Phommachanh. *Public Health:* Eksavang Vongvichit. *Public Security:* Thongbanh Sengaphone. *Public Works and Transport:* Sommad Pholsena. *Science and Technology:* Boviengkham Vongdara. *Ministers in the Prime Minister's Office:* Bounheuang Duangphachanh; Sinlavong Khouthaythoune; Bounpheng Mouphosay; Bountiem Phitsamay; Khempheg Pholsena; Duangsavad Souphanouvong.

*National Assembly Website:* <http://www.na.gov.la>

### CURRENT LEADERS

#### Choummaly Sayasone

*Position*  
President

#### Introduction

Choummaly Sayasone was elected president in June 2006, succeeding his long-time mentor, Khamtay Siphandone. Part of the Lao ruling elite for decades, Sayasone had previously served as vice president and minister of national defence. He was re-elected by the National Assembly in June 2011.

#### Early Life

Born on 6 March 1936 into a farming family in Vat Neua village, Attopeu province, Sayasone took up arms with the revolutionary Pathet Lao guerrilla forces in 1954. While fighting in Houaphan province in 1955, he joined the People's Revolutionary Party. A successful soldier, Sayasone became deputy head of a regiment of Pathet Lao forces in 1959. He also held a variety of posts within the party hierarchy and was appointed head of the military department in 1972.

When the Pathet Lao took over government in 1975, he worked as a close ally of Khamtay Siphandone, minister of national defence and deputy prime minister. Sayasone became Siphandone's deputy at the defence ministry in 1982 and was promoted to minister of national defence in 1991. Sayasone became vice president in 2001 and on 21 March 2006 he was elected secretary general of the People's Revolutionary Party of Laos. On Siphandone's retirement as president, the National Assembly chose Sayasone as his successor in June 2006.

#### Career in Office

Sayasone has continued his predecessor's policies, including the banning of rival political parties and tight control of the media. Some economic liberalization has nevertheless been under way since Laos joined ASEAN in 1997, including the opening of a stock market in Vientiane in Jan. 2011. Sayasone was re-elected for a further five-year term in June 2011.

### DEFENCE

Military service is compulsory for a minimum of 18 months. Defence expenditure in 2008 totalled US\$17m. (US\$3 per capita), representing 0.3% of GDP.

#### Army

There are four military regions. Strength (2007) about 25,000. In addition there are local defence forces totalling over 100,000.

#### Navy

There is an Army Marine Section of about 600 personnel (2007).

#### Air Force

The Air Force has 22 combat capable aircraft, including MiG-21 fighters, although serviceability is in doubt. Personnel strength, 3,500 in 2007.

### ECONOMY

In 2006 agriculture accounted for 42.0% of GDP, industry 32.5% and services 25.5%.

#### Overview

The economy has achieved impressive growth in recent years, owing in large part to the enhanced role of export-oriented mining and hydropower projects. Growth in the natural resources sector stems particularly from the Nam Theun hydropower project (NT2), which began operation in 2010. With the majority of its electricity exported to Thailand, it is estimated it will earn Laos US\$80m. a year in its first 25 years of operation.

Previously high levels of FDI for the production of gold, copper and export-oriented hydropower declined during the global financial crisis but rebounded in 2010. The number of households categorized as poor fell from 45% in 1992-93 to 31% in 2005. The National Socio-Economic Development Plan (NSED), which has received World Bank backing, aims to sustain economic growth and reduce poverty while promoting modernization and safeguarding environmental resources. The sixth five-year plan (2006-10) aimed to remove Laos from the UN list of least developed countries by 2020.

#### Currency

The unit of currency is the *kip* (LAK). Inflation was 128.4% in 1999 but has since fallen steeply. It was 7.6% in 2008 and 0.0% in 2009. Foreign exchange reserves were US\$199m. in March 2005 and gold reserves were 117,000 troy oz. Total money supply was 1,364.1bn. kip in Feb. 2005.

#### Budget

The fiscal year begins on 1 Oct. Revenues in 2005-06 were 4,962bn. kip (tax revenue, 73.4%) and expenditures 6,205bn. kip (current expenditure, 50.3%).

VAT is 10%.

### Performance

Real GDP growth was 7.6% in 2009 and 7.9% in 2010. Total GDP in 2010 was US\$7.5bn.

### Banking and Finance

The central bank and bank of issue is the State Bank (*Governor*, Sompao Phaysith). There were 17 commercial banks in 2002 (seven foreign; branches only permitted). Total savings and time deposits in 1991 amounted to 4,075m. kip.

A stock exchange opened in Vientiane in Jan. 2011.

## ENERGY AND NATURAL RESOURCES

### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.2 tonnes per capita.

### Electricity

Total installed capacity in 2007 was an estimated 742,000 kW, of which around 516,000 kW was hydro-electric. In 2007 production was about 3,667m. kWh, almost exclusively hydro-electric. Consumption per capita was an estimated 153 kWh; approximately 2,970 kWh were exported.

### Minerals

Estimated production in 2009 (in tonnes): gypsum, 775,000; lignite (2007), 682,000; coal (2007), 305,000; refined copper, 68,000; salt, 35,000.

### Agriculture

In 2002, 76.1% of the economically active population were engaged in agriculture. There were an estimated 920,000 ha. of arable land in 2002 and 81,000 ha. of permanent crop land. The chief products (2002 estimates in 1,000 tonnes) are: rice, 2,416; sugarcane, 222; sweet potatoes, 194; maize, 124; melons and watermelons, 116; cassava, 83; bananas, 53; pineapples, 36; potatoes, 35; coffee, 32; oranges, 29; tobacco, 27.

Livestock (2003 estimates): pigs, 1.65m.; cattle, 1.20m.; buffaloes, 1.08m.; chickens, 20m.

Livestock products (2003 estimates, in 1,000 tonnes): pork, bacon and ham, 36; beef and veal, 22; poultry, 18; milk, 6; eggs, 13.

### Forestry

Forests covered 15.75m. ha. in 2010, or 68% of the land area. They produce valuable woods such as teak. Timber production, 2007, 6.14m. cu. metres.

### Fisheries

The catch in 2005 was approximately 29,800 tonnes, entirely from inland waters.

## INDUSTRY

Production in 2002: cement, 201,000 tonnes; iron bars, 13,000 tonnes; detergent, 650 tonnes; nails, 650 tonnes; corrugated iron, 2.8m. sheets; plywood, 2.1m. sheets; mineral water, 235m. litres; beer, 60.49m. litres; soft drinks, 13.15m. litres; oxygen, 21,500 cylinders; cigarettes, 38.3m. packets; lumber, 155,000 cu. metres.

### Labour

The working age is 16–55 for females and 16–60 for males. In 2003 the labour force totalled 2,672,900. 82.2% of the employed population were engaged in agriculture in 2003.

## INTERNATIONAL TRADE

Since 1988 foreign companies have been permitted to participate in Lao enterprises. Total foreign debt was US\$2,690m. in 2005.

### Imports and Exports

Imports were estimated at US\$534.60m. in 2002 (US\$528.27m. in 2001) and exports at US\$319.60m. (US\$324.89m. in 2001). The main imports in 2000 were: consumption goods, 50.6%; mineral fuels, 13.9%; materials for garment assembly, 10.6%. Main

exports: electricity, 32.0%; garments, 26.1%; wood products, 24.8%. Main import suppliers, 2001: Thailand, 52.0%; Vietnam, 26.5%; China, 5.7%; Singapore, 3.3%. Main export markets, 2001: Vietnam, 41.5%; Thailand, 14.8%; France, 6.1%; Germany, 4.6%.

## COMMUNICATIONS

### Roads

In 2006 there were 29,811 km of roads, of which 13.5% were paved. In 2007 there were 12,800 passenger cars (two per 1,000 inhabitants), 109,000 lorries and vans, 6,400 buses and coaches, and 506,500 motorcycles and mopeds. There were 5,198 traffic accidents with 608 fatalities in 2006. A bridge over the River Mekong, providing an important north-south link, was opened in 1994.

### Rail

A 3.5-km stretch of railway from Nongkhai, on the Thai bank of the Mekong River, across the Thai-Lao Friendship Bridge to Thanaleng in Laos was opened in 2009.

### Civil Aviation

There are three international airports at Vientiane (Wattay), Pakse and Luang Prabang. The national carrier is Lao Airlines, which in 2005 operated domestic services and international flights to Bangkok, Chiang Mai, Hanoi, Ho Chi Minh City, Kunming, Phnom Penh and Siem Reap (Cambodia). In 2006 scheduled airline traffic of Laos-based carriers flew 4m. km, carrying 327,000 passengers (81,000 on international flights).

### Shipping

The River Mekong and its tributaries are an important means of transport. In Jan. 2008 there were two ships of 300 GT or over registered, totalling 3,000 GT.

### Telecommunications

In 2005 there were 713,500 telephone subscribers (120.4 per 1,000 persons), with 638,200 mobile phone subscribers. Laos had 25,000 internet users in 2005 and 100,000 PCs in use (16.9 for every 1,000 persons).

## SOCIAL INSTITUTIONS

### Justice

Criminal legislation of 1990 established a system of courts and a prosecutor's office. Polygamy became an offence.

### Education

In 2007 there were 891,807 pupils in primary schools with 29,604 teaching staff, and 403,833 pupils and 17,110 teaching staff at secondary level.

There are eight teacher training institutes (four teacher training colleges and four teacher training schools) and one college of Pali. In June 1995 the National University of Laos (NUOL) was established by merging nine existing higher education institutes and a centre of agriculture. NUOL comprises faculties in agriculture, pedagogy, political science, economics and management, forestry, engineering and architecture, medical science, humanities and social science, science, and literature. In 2007 there were 75,003 students in higher education and 3,030 academic staff.

Adult literacy in 2005 was 73%. Laos has only a small educated elite.

In 2007 public expenditure on education came to 3.6% of GNI and 15.8% of total government spending.

### Health

In 2003 there were 24 hospitals (with 2,711 beds), 125 district-level hospitals and 662 primary health care centres. In 2003 there were 1,283 physicians, 83 dentists and 5,291 nurses. Only 37% of the population had access to safe drinking water in 2000.

**RELIGION**

In 2001 some 2.75m. were Buddhists (Hinayana), but about 40% of the population follow tribal religions.

**CULTURE****World Heritage Sites**

Laos has two sites on the UNESCO World Heritage List: the Town of Luang Prabang (inscribed on the list in 1995), a unique blend of Lao and European colonial architecture; and Vat Phou and Associated Ancient Settlements within the Champasak Cultural Landscape (2001), including a Khmer era Hindu temple complex.

**Press**

In 2005 there were five national dailies (two in English) with a combined circulation of 21,000. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Laos ranked 168th out of 178 countries.

**Tourism**

There were 1,624,000 non-resident visitors in 2007 (including 1,404,000 from elsewhere in Asia and Oceania, 152,000 from Europe and 61,000 from the Americas); revenue from tourism (excluding passenger transport) amounted to US\$233m.

**Festivals**

The national day is celebrated on 2 Dec. The Boun Bang Fai (Rocket Festival) takes place at the beginning of the rainy season in May and is thought to have originated in the pre-Buddhist fertility rites and ceremonies to induce the coming of the rains.

It is celebrated with parades, songs and dances and homemade bottle rockets and also coincides with the Visakha Puja festival that commemorates the life of Buddha.

**DIPLOMATIC REPRESENTATIVES**

Of Laos in the United Kingdom

*Ambassador:* Khouanta Phalivong (resides in Paris).

Of the United Kingdom in Laos

*Ambassador:* Asif Ahmad (resides in Bangkok).

Of Laos in the USA (2222 S. St., NW, Washington, D.C., 20008)

*Ambassador:* Seng Soukhathivong.

Of the USA in Laos (Rue Bartholonie, Vientiane)

*Ambassador:* Karen B. Stewart.

Of Laos to the United Nations

*Ambassador:* Kanika Phommachanh.

Of Laos to the European Union

*Ambassador:* Southam Sakonhnhinhom.

# LATVIA

Latvijas Republika  
(Republic of Latvia)

Capital: Riga

Population projection, 2015: 2.21m.

GNI per capita, 2011: (PPP\$) 14,293

HDI/world rank: 0.805/43

## KEY HISTORICAL EVENTS

The name Latvia derives from *latvis*, a 'forest clearer'. Human inhabitation dates from around 9000 BC and the Balts (or proto-Balts) probably arrived around 2000 BC. In addition to the Finnic predecessors of the Estonians and Livs, four Baltic tribal groups emerged during the Iron Age: the Couronians (Kurši), Selonians (Sēļi), Semigallians (Zemgaļi) and Latgallians (Latgaļi). Linguistic evidence points to the habitation of central Latvia by Latgallians and Lithuanians while coastal areas were populated by Couronians, Semigallians, Selonians and Prussians. The north of the country, occupied mainly by Finnic Livs, was separated by sparsely inhabited areas, which accounts for the lack of cultural mixing between the ethnic groupings.

Scandinavian settlements were established after AD 650, disappearing abruptly around 850. In the 10th century the Baltic tribes came under attack from Varangians (Swedish Vikings), attracted in part by amber which was traded up the Daugava River to Russia and south to Byzantium. Slavic incursions from the east were hampered by primeval forest and marshes.

The region was transformed by German colonization in the 13th century. The Archbishop of Bremen ordered the Christian conquest of the Eastern Baltic sending his nephew Albert, who founded Riga in 1201 and became its bishop. He also created the Sword Brothers (or Livonian Order), a small military order that carved out a feudal state ruled mainly by German aristocracy. It subdued Livonia (southern Estonia and northeastern Latvia), Courland and Zemgale, forming the Livonian Confederation. In 1237 the weakened Sword Brothers were incorporated as an autonomous order into the Order of the Teutonic Knights, which completed the conquest of modern-day Latvia. Riga joined the Hanseatic League in 1282.

The Teutonic Knights were defeated in 1410 at the Battle of Grünwald (Tannenberg) by a Polish–Lithuanian army. Russian Tsar Ivan IV invaded in 1558 in an attempt to gain access to the Baltic Sea. The Livonian War ended with the disbandment of the Livonian Order and the partition of Livonia in 1561. The north went to Lithuania, while Courland became a Lithuanian fief. During the early 17th century Latvia was a theatre of war between Sweden and the Commonwealth of Lithuania–Poland. In 1605 the small hussar army of Jan Karol Chodkiewicz destroyed a much larger Swedish force at the Battle of Kirchholm (Salaspils), near Riga. However, Sweden had taken control of Livonia by 1621 and its empire in the Baltic did not end until the signing of the Treaty of Nystad in 1721. The Livonian territory of Vidzeme passed to Russia which acquired Latgale (Latgallia) in 1772 from Poland, and Courland in 1795.

The German landowners remained within the Russian Empire, bolstered by unification with other Germans in the Baltic. The abolition of serfdom in 1817 created new tensions between the Latvian and German communities, though there were German elements who supported land reform which duly arrived in 1847. Nascent Latvian nationalism in the 1860s prompted the Russian authorities to centralize power away from the German aristocracy. Tensions between the communities erupted during the 1905 Russian Revolution when attacks on hundreds of German settlements precipitated a wave of German emigration.

After the German occupation of 1915 demands for the creation of a Latvian state grew until the 1917 Russian Revolution. Soviet rule was proclaimed in Dec. 1917 but was overthrown when the Germans reinvaded in Feb. 1918, with Russia ceding its claims on Latvia by the Treaty of Brest-Litovsk. After the armistice, Latvia declared independence but the Soviets reasserted power following the German withdrawal in Dec. 1918. The Soviets were again overthrown between May–Dec. 1919 by combined British naval and German military forces and a democratic government was established.

In the wake of economic depression, the democratic regime fell in a May 1934 coup when Prime Minister Kārlis Ulmanis dissolved parliament and, in 1936, merged his office with that of the president. When the secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest, most of the ancient Baltic German community emigrated. Formal annexation came in 1940 and over 15,000 Latvians were deported to Siberia. The German occupation of 1941–45 caused the deaths of over 90,000 Latvians, mostly Jews. Violent resistance to Soviet reoccupation led to the deportation of another 43,000 Latvians to Siberia and substantial Soviet immigration followed.

The Latvian Supreme Soviet declared sovereignty in July 1989 and on 4 May 1990, having declared the 1940 Soviet occupation illegal, re-established the 1922 constitution. This was annulled by Soviet President Mikhail Gorbachev, sparking violent protest and police crackdowns. Following a referendum, independence was declared on 21 Aug. 1991 and recognized in Sept. by the USSR. With independence, issues of ethnic identity came to the fore, with the large Russian minority initially disadvantaged by new citizenship and language laws (later repealed). President Vaira Vīķe-Freiberga was elected as the former Communist bloc's first female president in 1999. Latvia became a member of NATO and the European Union in 2004.

## TERRITORY AND POPULATION

Latvia is situated in northeastern Europe. It is bordered by Estonia on the north and by Lithuania on the southwest, while on the east there is a frontier with the Russian Federation and to the southeast with Belarus. Territory, 64,559 sq. km (larger than

Denmark, the Netherlands, Belgium and Switzerland), including 2,402 sq. km of inland waters. Population (2011 census, provisional), 2,067,887; density, 33.3 per sq. km.

The UN gives a projected population for 2015 of 2.21m.

In 2006, 68.0% of the population were urban. Major ethnic groups in 2006: Latvians 59.0%, Russians 28.5%, Belarusians 3.8%, Ukrainians 2.5%, Poles 2.4%, Lithuanians 1.4%, Jews 0.4%, Roma 0.4%, Germans 0.2%, Estonians 0.1%.

There are 26 districts (*apriņķis*) and seven municipalities (*lielpilsētas*) with separate status. The capital is Riga (700,107, or nearly a third of the country's total population, at Jan. 2011); other principal towns, with Jan. 2011 populations, are Daugavpils (102,870), Liepāja (83,061), Jelgava (64,279), Jūrmala (55,767) and Ventspils (42,371).

The official language is Latvian. Latgalian is also spoken.

### SOCIAL STATISTICS

2010: births, 19,219 (rate of 8.6 per 1,000 population); deaths, 30,040 (13.4 per 1,000 population); marriages, 9,290 (4.1 per 1,000 population); divorces, 4,930 (2.2 per 1,000 population); infant mortality, 5.7 per 1,000 live births (2010). In 2007 life expectancy was 67.1 years for males but 77.1 years for females. In 2005 the most popular age range for marrying was 25–29 for males and 20–24 for females. The annual population growth rate in the period 2000–05 was –0.6%. Fertility rate, 2008, 1.4 births per woman. The suicide rate was 22.9 per 100,000 population in 2009 (rate among males, 40.0). In 2005 there were 1,886 immigrants and 2,450 emigrants.

### CLIMATE

Owing to the influence of maritime factors, the climate is relatively temperate but changeable. Average temperatures in Jan. range from –2.8°C in the western coastal town of Liepāja to –6.6°C in the inland town of Daugavpils. The average summer temperature is 20°C.

### CONSTITUTION AND GOVERNMENT

The Declaration of the Renewal of the Independence of the Republic of Latvia dated 4 May 1990, and the 21 Aug. 1991 declaration re-establishing *de facto* independence, proclaimed the authority of the Constitution (*Satversme*). The Constitution was fully re-instituted as of 6 July 1993, when the fifth Parliament (*Saeima*) was elected.

The head of state in Latvia is the *President*, elected by parliament for a period of four years and for a maximum of two terms.

The highest legislative body is the one-chamber parliament comprised of 100 deputies and elected in direct, proportional elections by citizens 18 years of age and over. Deputies serve for four years and parties must receive at least 5% of the national vote to gain seats in parliament.

In a referendum on 3 Oct. 1998, 53% of votes cast were in favour of liberalizing laws on citizenship, which would simplify the naturalization of the Russian-speakers who make up nearly a third of the total population and who were not granted automatic citizenship when Latvia regained its independence from the former Soviet Union in 1991. Around half of the 650,000 ethnic Russians in Latvia have not taken out Latvian citizenship. Ethnic Russians who are not Latvian citizens do not have the right to vote. A seven-member *Constitutional Court* was established in 1996 with powers to invalidate legislation not in conformity with the constitution. Its members are appointed by parliament for ten-year terms.

Executive power is held by the *Cabinet of Ministers*.

### National Anthem

'Dievs, svēti Latviju' ('God bless Latvia'); words and tune by Kārlis Baumanis.

### GOVERNMENT CHRONOLOGY

(JL = New Era; LC = Latvian Way; LTF = Latvian Popular Front; LZP = Latvian Green Party; LZS = Latvian Farmers' Union; TB/LNNK = For Fatherland and Freedom/LNNK; TP = People's Party; Vienotība = Unity, ZZS = Union of Greens and Farmers; n/p = non-partisan)

Heads of State since 1990.

*Chairman of the Supreme Council/Head of State*  
1990–93 n/p, LC Anatolijs Gorbunovs

*Presidents*  
1993–99 LZS Guntis Ulmanis  
1999–2007 n/p Vaira Vīķe-Freiberga  
2007–11 n/p Valdis Zatlers  
2011– ZZS Andris Bērziņš

Prime Ministers since 1990.

1990–93	LTF	Ivars Godmanis
1993–94	LC	Valdis Birkavs
1994–95	LC	Māris Gailis
1995–97	n/p	Andris Šķēle
1997–98	TB/LNNK	Guntars Krasts
1998–99	LC	Vilis Kristopāns
1999–2000	TP	Andris Šķēle
2000–02	LC	Andris Bērziņš
2002–04	JL	Einars Repše
2004	ZZS (LZP)	Indulis Emsis
2004–07	TP	Aigars Kalvītis
2007–09	LC	Ivars Godmanis
2009–	JL, Vienotība	Valdis Dombrovskis

### RECENT ELECTIONS

In presidential elections held on 2 June 2011 the first round of voting proved inconclusive with Andris Bērziņš receiving 50 votes and incumbent Valdis Zatlers 43. In a second round held later on the same day Bērziņš was elected with 53 votes against 41 for Zatlers.

Parliamentary elections were held on 17 Sept. 2011. Harmony Centre (Saskaņas Centrs/SC; comprises Social Democratic Party 'Harmony' and Socialist Party of Latvia) won 31 seats with 28.4% of the votes cast; Zatlers' Reform Party 22 with 20.8%; Unity (Vienotība) 20 seats with 18.8%; National Alliance (Nacionālā Apvienība) 14 seats with 13.9%; and Union of Greens and Farmers (Zaļo un Zemnieku savienība/ZZS; comprises Latvian Farmers' Union and Latvian Green Party), 13 with 12.2%. Turnout was 59.5%.

### European Parliament

Latvia has 8 (9 in 2004) representatives. At the June 2009 elections turnout was 53.7% (41.3% in 2004). The Civic Union (Pilsoniskā savienība) won 2 seats with 24.3% of votes cast (political affiliation in European Parliament: European People's Party); SC, 2 with 19.6% (one with Progressive Alliance of Socialists and Democrats and one with European United Left/Nordic Green Left); For Human Rights in a United Latvia (Par cilvēka tiesībām vienotā Latvijā), 1 with 9.7% (Greens/European Free Alliance); Latvia's First Party/Latvian Way Party (Latvijas Pirmā Partija/Savienība 'Latvijas ceļš'), 1 with 7.5% (Alliance of Liberals and Democrats for Europe); For Fatherland and Freedom/LNNK ('Tēvzemei un Brīvībai'/LNNK), 1 with 7.5% (European Conservatives and Reformists); New Era (Jaunais laiks), 1 with 6.7% (European People's Party).

### CURRENT GOVERNMENT

*President:* Andris Bērziņš; b. 1944 (ZZS; sworn in 8 July 2011).

*Prime Minister and Minister for Regional Development and Local Government:* Valdis Dombrovskis; b. 1971 (Unity; took

office on 12 March 2009). In March 2012 the coalition of Unity, Zatlers' Reform Party (ZRP) and the National Alliance comprised:

*Minister for Defence:* Artis Pabriks (Unity). *Foreign Affairs:* Edgars Rinkēvičs (ZRP). *Economics:* Daniels Pavļuts (ZRP). *Finance:* Andris Vilks (Unity). *Education and Science:* Robert Kīlis (ZRP). *Culture:* Žaneta Jaunzeme-Grende (National Alliance). *Welfare:* Ilze Vinķele (Unity). *Environmental Protection and Regional Development:* Edmunds Sprūdžs (ZRP). *Transport:* Aivis Ronis (ind.). *Justice:* Gaidis Bērziņš (National Alliance). *Interior:* Rihards Kozlovskis (ZRP). *Health:* Ingrida Circene (Unity). *Agriculture:* Laimdota Straujuma (Unity).

*Office of the President:* <http://www.president.lv>

## CURRENT LEADERS

### Andris Bērziņš

#### *Position*

President

#### *Introduction*

Andris Bērziņš became president in June 2011 after an election dominated by rows over parliamentary links to business. A former banker, Bērziņš leads the Union of Greens and Farmers and advocates economic reforms and the consolidation of ties with the EU.

#### *Early Life*

Andris Bērziņš was born on 10 Dec. 1944 in Nītaure. After schooling in Nītaure and Sigulda, he studied radio engineering at the Riga Polytechnic Institute from 1966–71. He worked for R/A Elektrons from 1971–88, eventually as managing director. From 1987–88 he studied industrial planning at the University of Latvia, and from 1988–89 served as deputy minister of municipal services of the Latvian SSR. He was elected to the district council of the city of Valmiera in 1989, serving as its chairman until 1993. From 1990–93 he represented Valmiera on the Supreme Council of the Republic of Latvia, where he joined the Popular Front grouping. On 4 May 1990 he voted for Latvian independence from the USSR.

Between 1990 and 1992 Bērziņš served on the supervisory council of the Bank of Latvia, as Latvia began its conversion to a market economy. In 1993 he was appointed president of the newly founded commercial bank, Latvijas Unibanka, overseeing its rapid growth until leaving the post in 2004. During this period he extended his own business interests into property.

In 2005 Bērziņš unsuccessfully stood for mayor of Riga, representing the Union of Greens and Farmers. He was president of the Latvian Chamber of Commerce and Industry from 2006 until 2010, and from 2007–09 was chairman of the supervisory council of the state-owned Latvenergo electricity company. In 2010 he entered parliament as a member of the Union of Greens and Farmers, which formed a coalition government with the Unity party.

From 2010 he served a year as chairman of the economic, agricultural, environmental and regional policy committee. In June 2011 he was elected president by parliament, beating the incumbent Valdis Zatlers in a second round of voting after Zatlers had accused MPs of being lax on corruption.

#### *Career in Office*

Bērziņš took office on 8 July 2011, promising to work independently of Latvia's oligarchs. After an inconclusive general election in Sept. 2011, he reappointed the incumbent, Valdis Dombrovskis, as prime minister, and saw his own party left out of the coalition government. Bērziņš has prioritized economic growth, consolidating Latvia's position in the EU and restoring trust in the nation's democratic institutions.

### Valdis Dombrovskis

#### *Position*

Prime Minister

#### *Introduction*

Valdis Dombrovskis became prime minister in March 2009 following the resignation of Ivars Godmanis. The former finance minister's tenure has been mainly focused on reversing the country's economic crisis.

#### *Early Life*

Dombrovskis was born on 5 Aug. 1971 in Riga, while Latvia was part of the USSR. He studied physics and economics at the University of Latvia in Riga and the Riga Technological University. He was employed at Germany's University of Mainz and at the University of Latvia's Institute of Solid-State Physics, and in 1998 became a research assistant at Maryland University in the USA.

Later that year he began working for the Bank of Latvia, leaving in 2002 after a year as chief economist. A member of the centre-right New Era party, he joined its governing board in 2002 and was also elected to parliament, serving until 2004 as finance minister in Einaris Repše's government. From 2003–04 he was Latvia's observer at the Council of the European Union and became a member of the European Parliament (MEP) in 2004.

Against the backdrop of global economic turmoil, Latvia's economy crashed in 2008. The economy shrank by over 4%. Worse was to follow, with a contraction of 18% in 2009. In Dec. 2008, having nationalized the country's second biggest bank, Prime Minister Ivars Godmanis turned to the IMF, World Bank and European Union for a US\$9.5bn. bail-out package. In return he was forced to accept public spending cuts and tax increases. After an anti-government riot in Riga in Jan. 2009, his coalition fell the following month. President Valdis Zatlers nominated Dombrovskis to form a new administration.

#### *Career in Office*

Having resigned as an MEP, Dombrovskis formed a six-party coalition and won parliamentary approval on 12 March 2009. In Aug. 2009 his government reached agreement with unions and employers on deep spending cuts and tax rises aimed at staving off bankruptcy and persuading the IMF and EU to release further tranches of loans. Subsequently, as a condition for these disbursements, the government committed to further cuts in fiscal expenditures to contain the budget deficit. Having lost his parliamentary majority in March 2010, Dombrovskis called an election in Oct. at which he was returned to power heading a Unity and Union of Greens and Farmers coalition. In further legislative elections in Sept. 2011, following a controversial dissolution of the *Saeima*, the pro-Russian Harmony Centre emerged as the largest party, but Dombrovskis retained the premiership at the head of a new coalition comprising Unity, Zatlers' Reform Party and the National Alliance, which together controlled 56 of the 100 parliamentary seats.

## DEFENCE

The National Armed Forces (NAF) were created in 1994 and comprise the Land Forces, which are based on an infantry brigade and the National Guard, the Naval Forces, the Air Forces, the Logistic Command, the Training Doctrine Command and the National Defence Academy. Compulsory military service was abolished in Jan. 2007.

In 2008 military expenditure totalled US\$542m. (US\$241 per capita), representing 1.6% of GDP.

#### *Army*

The Land Forces were 1,526 strong in 2007. There is a National Guard reserve numbering 10,483 in 2007.

### Navy

The Naval Forces, based at Riga and Liepāja, numbered 603 in 2007. Latvia, Estonia and Lithuania have established a joint naval unit 'BALTRON' (Baltic Naval Squadron), with bases at Liepāja, Riga and Ventspils in Latvia, Tallinn in Estonia and Klaipėda in Lithuania.

### Air Force

Personnel numbered 480 in 2007. There are no combat capable aircraft.

### INTERNATIONAL RELATIONS

Latvia held a referendum on EU membership on 20 Sept. 2003, in which 67.4% of votes cast were in favour of accession, with 32.6% against. It became a member of NATO on 29 March 2004 and the EU on 1 May 2004.

### ECONOMY

Services accounted for 77% of GDP in 2009, industry 20% and agriculture 3%.

### Overview

With Latvia's transition from communism in the early 1990s, the economy suffered from raw material and energy shortages, the loss of Soviet export markets and weak international competitiveness. After independence, market reforms were introduced including privatization, price liberalization, land reforms and the establishment of a local currency and an independent central bank. In 2003 the private sector constituted 70% of GDP and 76% of employment.

After joining the EU in May 2004, growth accelerated to double-digit figures driven by private sector capital inflows and EU funds. However, by mid-2006 the economy showed signs of overheating as credit and domestic demand grew excessively, inflation accelerated and the current account deficit peaked at over 20% of GDP. In 2008 the global financial crisis led to a slowdown in lending driven by the withdrawal of funds from foreign banks. In Dec. 2008 Latvia accepted a US\$9.5bn. IMF-led bail-out, causing widespread social turmoil and the resignation of the ruling coalition in Feb. 2009.

In July 2009 the new coalition government agreed a series of spending cuts, including reductions of up to 40% in public sector pay and 10% in pensions in order to meet IMF targets to reduce the budget deficit. The economy contracted by 18% in 2009 and unemployment was the highest in the EU at nearly 21%. However, the current account moved into surplus and the Latvian economy emerged from a recession in the first quarter of 2010.

### Currency

The unit of currency is the *lats* (LVL) of 100 *santims*. The lats is pegged to the euro at a rate of one euro to 0.7028 lats. Inflation, which reached a high of 109.1% in 1993, was 15.3% in 2008, falling to 3.3% in 2009. Gold reserves were 249,000 troy oz in July 2005, foreign exchange reserves US\$2,076m. and total money supply 1,736m. lats.

### Budget

The financial year is the calendar year. Central government revenue in 2006 totalled 3,306.9m. lats (2,632.5m. lats in 2005) and expenditure was 3,235.4m. lats (2,628.7m. lats in 2005). Tax revenue constituted 53.6% of revenues in 2006; social benefits accounted for 27.7% of expenditures and compensation of employees 12.8%.

Latvia's budget deficit in 2010 was 8.3% of GDP (2009, 9.7%; 2008, 4.2%). The required target set by the EU is a budget deficit of no more than 3%.

The standard rate of VAT is 22.0% (reduced rate, 12.0%).

### Performance

In 2007 real GDP growth was 10.0% (the second highest rate in the European Union). However, having contracted by 4.2% in 2008 the economy shrank by 18.0% in 2009 (the lowest rate in the world) and a further 0.3% in 2010. Latvia has the lowest GDP per capita of any of the ten countries that joined the EU in May 2004. Total GDP was US\$24.0bn. in 2010.

### Banking and Finance

The Bank of Latvia both legally and practically is a completely independent institution. Governor of the Bank and Council members are appointed by Parliament for office for six years (present *Governor*, Ilmars Rimševičs). In 2010 there were 29 banks in Latvia, including nine foreign banks' branches. Latvia's banks have 11 branches abroad. Latvian banks' assets to GDP exceeded 170% at the end of 2010. The banking sector assets constitute almost 90% of Latvia's financial sector assets. Foreign direct investment net inflows in 2010 totalled US\$369m. The accumulated FDI at the end of 2010 reached US\$10.75bn.

NASDAQ OMX Riga (formerly Riga Stock Exchange) is the only regulated secondary securities market in Latvia.

### ENERGY AND NATURAL RESOURCES

In 2008, 29.9% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 40% has been set by the EU for 2020.

### Environment

Latvia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.4 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Latvia eighth in the world, with 88.8%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources. Latvia's greenhouse gas emissions fell by 55.6% between 1990 and 2008, mainly owing to the decline of polluting industries from the Soviet era.

### Electricity

Electricity production in 2007 totalled 4.77bn. kWh. Consumption per capita in 2007 was 3,414 kWh. 57% of electrical power produced in Latvia is generated in hydro-electric power stations. Installed capacity was about 2.1m. kW in 2007.

### Oil and Gas

Latvia produces virtually no oil and is dependent on imports, although the Latvian Development Agency estimates that there are 733m. bbls of offshore reserves in the Latvian areas of the Baltic Sea. Consumption of oil products was 1,488,000 tonnes in 2010. All Latvia's natural gas supplies are imported from Russia. Consumption in 2010 totalled 620m. cu. metres.

### Minerals

Peat deposits extend over 645,000 ha. or about 10% of the total area, and it is estimated that total deposits are 3bn.–4bn. tonnes. Peat output in 2005 totalled 829,865 tonnes.

Production of other minerals (2005, in 1,000 tonnes): silica and construction sand, 3,242; gravel, pebbles, shingle and flint, 2,817; crude dolomite, 1,676; crushed stone for concrete aggregate, 587. Clays, gypsum and limestone are also produced.

### Agriculture

In 2010 there were 1.17m. ha. of arable land and 6,800 ha. of permanent crops (excluding strawberries). Field crops and dairy farming are the chief agricultural occupations. In 2010 there were 83,300 economically active agricultural holdings. 34% of holdings have fewer than 5 ha of utilized agricultural land. There were 50,000 tractors, 6,500 grain combine harvesters and 1,500 potato combine harvesters in 2010. In 2010, 8.8% of the economically

active population were employed in agriculture, forestry and fishing.

Output of crops (in 1,000 tonnes), 2010: wheat, 989; potatoes, 484; barley, 229; rapeseeds, 226; oats, 101; rye, 70; cabbage, 61; carrots, 34; apples, 10. Livestock, 2010: pigs, 390,000; cattle, 380,000; sheep, 77,000; poultry, 4.9m. Livestock products (2010, in 1,000 tonnes): meat, 80; milk, 835; eggs, 45.

#### Forestry

In 2005 Latvia's total forest area was 2.94m. ha., or 47.4% of the land area. The overall resources of wood amount to 502m. cu. metres (an increase of 118m. cu. metres since 1984), including 304m. cu. metres of softwood. Private forests account for 44.2% or 1.3m. ha. and comprise about 153,000 holdings. Timber production in 2007 was 12.17m. cu. metres.

The share of the forest sector in gross industrial output is between 13 and 15%. Timber and timber products exports account for 37–38% of Latvia's total exports.

To provide the protection of forests there are three forest categories: commercial forests, 70.4%; restricted management forests, 18.6%; protected forests, 11.0%.

#### Fisheries

In 2005 the total catch was 150,618 tonnes, of which marine fish 150,262 tonnes. The main types of fish caught are sprat, Baltic herring, cod and salmon. The Latvian fishing fleet consists of almost 400 vessels.

#### INDUSTRY

Industry accounted for 22.6% of GDP in 2004, with manufacturing contributing 13.4%.

Industrial output in 1,000 tonnes: crude steel (2009 estimate), 550; steel products (2000), 549; cement (2009 estimate), 300; sawnwood (2009), 2.23m. cu. metres; wood-based panels (2009), 492,323 cu. metres; plywood (2009), 212,612 cu. metres; beer (2009), 129.2m. litres.

#### Labour

The total labour force in 2005 numbered 1,134,700. In 2005 there were 1,033,700 persons in employment in Latvia (excluding those in compulsory military service). The leading areas of activity were: wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 157,700; manufacturing, 154,100; agriculture, hunting, forestry and fishing, 122,300. In 2005 women constituted 48% of the workforce. In 2006 there was a monthly minimum wage of 90 lats. Average gross monthly salary was 246 lats in 2005. The unemployment rate in the period July–Sept. 2010 was 18.3%, one of the highest rates in the EU. The average gross monthly salary in the public sector in 2005 was 285 lats.

#### INTERNATIONAL TRADE

State debt, as a proportion of GDP, has increased from 14.7% in 2000 to 15.4% in 2001, 16.6% in 2002 and 19.5% in 2003. Total external debt was US\$14,283m. in 2005.

#### Imports and Exports

Imports (f.o.b.) were valued at US\$11,271m. in 2006 and exports (f.o.b.) at US\$6,140m. The leading imports are machinery and mechanical appliances (21.2%), products of chemical and allied industries (10.5%), mineral products (9.7%), metals and products thereof (8.4%). The main exports are wood and wood products (33.6%), base metals and articles of base metals (13.2%), textiles and textile articles (12.8%). Main import suppliers (2006): Germany, 15.5%; Lithuania, 13.0%; Russia, 7.8%; Estonia, 7.7%; Poland, 7.2%. Main export markets (2006): Lithuania, 14.7%; Estonia, 12.7%; Germany, 10.1%; Russia, 8.9%; UK, 7.8%.

#### COMMUNICATIONS

##### Roads

In 2005 there were 66,319 km of roads, including 20,182 km of national roads. Public road transport totalled 2,869m. passenger-km in 2005 and freight 8,547m. tonne-km. There were 442 fatalities in traffic accidents in 2005. With 19.2 deaths per 100,000 population in 2005 Latvia has one of the highest death rates in road accidents of any industrialized country. Passenger cars in 2005 numbered 742,447 (324 per 1,000 inhabitants), in addition to which there were 113,113 trucks and vans, 25,193 motorcycles, 7,284 mopeds and 10,644 buses and coaches.

##### Rail

In 2005 there were 2,270 km of 1,520 mm gauge route (257 km electrified). In 2008, 56.1m. tonnes of cargo and 20.4m. passengers were carried by rail. The main groups of freight transported are oil and oil products, mineral fertilizers, ferrous metals and ferrous alloys.

##### Civil Aviation

There is an international airport at Riga. A new national carrier, airBaltic, assumed control of Latavio and Baltic International Airlines in Aug. 1995 and began flying in Oct. 1995. It went on to become eastern Europe's first low-cost airline; in 2006 it carried 1.42m. passengers. In 2003 it operated scheduled services to Berlin, Copenhagen, Hamburg, Helsinki, Kyiv, Moscow, Prague, Stockholm, Tallinn, Vilnius and Warsaw. It is 99.8% state-owned, with Transaero owning the remaining 0.2%. In 2005 Riga handled 1,877,461 passengers and 15,963 tonnes of freight.

##### Shipping

There are two major ports. Riga handled 28.6m. tonnes of cargo in 2008 and Ventspils 27.4m. tonnes. There is a smaller port at Liepāja. A total of 54.1m. tonnes were loaded at the three ports in 2008 and 6.0m. tonnes unloaded. In Jan. 2009 there were 28 ships of 300 GT or over registered, totalling 240,000 GT.

##### Telecommunications

Telecommunications are conducted by companies in which the government has a 51% stake, under the aegis of the state-controlled Lattelecom. In 2005 telephone subscribers numbered 2,511,700 (1,088.7 per 1,000 inhabitants), of which 1,871,600 were mobile phone subscribers. There were 684.2 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 320,700 in 2007 (140.5 per 1,000 inhabitants).

#### SOCIAL INSTITUTIONS

##### Justice

A new criminal code came into force in 1998. Judges are appointed for life. There is a Supreme Court, regional and district courts and administrative courts. The death penalty is retained but has been subject to a moratorium since Oct. 1996; it was abolished for peacetime offences in 1999. In 2009, 56,748 crimes were reported; 10,855 people were convicted for offences (79 for intentional homicide). In Jan. 2008 there were 6,548 people in penal institutions, giving a prison population rate of 288 per 100,000 population.

##### Education

Adult literacy rate in 2009 was estimated at 99.8% (99.8% among both males and females). The Soviet education system has been restructured on the UNESCO model. Education begins with two years of compulsory attendance at pre-primary schools. From the age of six or seven education is compulsory for nine years in comprehensive schools. This may be followed by three years in special secondary school or one to six years in art, technical or vocational schools. In 2003–04 there were 1,044 schools with 327,358 pupils.

State-financed education is available in Latvian and eight national minority languages (Russian, Polish, Hebrew, Ukrainian,

Estonian, Lithuanian, Roma and Belarusian), although the use of Latvian in the classroom is being increased. A bilingual curriculum had to be implemented by all minority primary schools from the start of the 2002–03 school year. Secondary schools started to implement minority education curricula with an increased Latvian-language component (60% of all teaching) from Sept. 2004. In 2003–04, 230,212 pupils were taught solely in Latvian, 95,841 received instruction in Russian and 1,305 in other minority languages.

In 2008–09 there were 33 state-recognized higher education institutions. Courses at state-financed universities are conducted in Latvian. A number of private educational institutions have languages of instruction other than Latvian.

Public expenditure on education in 2008 came to 5.7% of GDP and accounted for 14.7% of total government expenditure.

### Health

At the end of 2010 there were 7,951 physicians and dentists, 10,024 nurses and 408 midwives. There were 67 hospitals in 2010 with a provision of 53 beds per 10,000 persons.

### Welfare

The official retirement age is age 62 years for men and women. In 2008 the minimum pension was just over the state social security allowance of 45 lats a month at 49–50 lats. The minimum pension is increased by 1.1% for an insurance period of at least 20 years, by 1.3% for an insurance period of 20 to 30 years and by 1.5% and for an insurance period of more than 30 years. In Dec. 2007 there were 567,400 pension recipients.

The government runs an unemployment benefit scheme in which the amount awarded is determined by the number of insurance contributions and the length of previous employment.

### RELIGION

In order to practise in public, religious organizations must be licensed by the Department of Religious Affairs attached to the Ministry of Justice. New sects are required to demonstrate loyalty to the state and its traditional religions over a three-year period. Traditionally Catholics and Lutherans constitute the largest churches, with about 500,000 and 400,000 members respectively in 2002. Congregations in Feb. 2003: Lutherans, 307; Roman Catholics, 252; Russian Orthodox, 117; Baptists, 90; Old Believers, 67; Adventists, 47; Jews, 13; others, 47. In Feb. 2012 the Roman Catholic church had one cardinal.

### CULTURE

#### World Heritage Sites

Latvia has two sites on the UNESCO World Heritage List: the Historic Centre of Riga (inscribed on the list in 1997), a late-medieval Hanseatic centre; and the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

### Press

Latvia had 26 daily newspapers in 2005 with a combined circulation of 429,200 (187 per 1,000 inhabitants). The leading newspapers in terms of readership are *Diena* and *Latvijas Avīze*.

### Tourism

In 2005 there were 1,116,000 non-resident tourists; tourist spending totalled US\$446m. In 2006 there were 393 hotels and other accommodation facilities.

### Festivals

There is an annual Riga Opera Festival in June and the city also hosts the Lielais Kristaps National Film Festival in Sept.–Oct. The biggest music festival is Positivus Festival which takes place in July at Salacgrīva. The National Song Festival (held every five years) will next be held in 2013.

### DIPLOMATIC REPRESENTATIVES

Of Latvia in the United Kingdom (45 Nottingham Place, London, W1U 5LY)

*Ambassador:* Eduards Stiprais.

Of the United Kingdom in Latvia (5 Alunana ielā, Rīga, LV 1010)

*Ambassador:* Andrew Soper.

Of Latvia in the USA (2306 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Andrejs Pildegovičs.

Of the USA in Latvia (7 Raina Blvd, Rīga, LV 1510)

*Ambassador:* Judith G. Garber.

Of Latvia to the United Nations

*Ambassador:* Normans Penke.

Of Latvia to the European Union

*Permanent Representative:* Ilze Juhansone.

## KEY HISTORICAL EVENTS

The Ottomans invaded Lebanon, then part of Syria, in 1516–17 and held nominal control until 1918. After 20 years' of French mandatory regime, Lebanon was proclaimed independent on 26 Nov. 1941. In early May 1958 the Muslim opposition to President Chamoun rose in insurrection and for five months the Muslim quarters of Beirut, Tripoli, Sidon and the northern Bekaa were in insurgent hands. On 15 July the US Government landed army and marines who re-established Government authority. Internal problems were exacerbated by the Palestinian problem. An attempt to regulate the activities of Palestinian fighters through the secret Cairo agreement of 1969 was frustrated both by the inability of the Government to enforce its provisions and by an influx of battle-hardened fighters expelled from Jordan in Sept. 1970. From March 1975 Lebanon was beset by civil disorder bringing the economy to a virtual standstill.

By Nov. 1976 large-scale fighting had been brought to an end by the intervention of the Syrian-dominated Arab Deterrent Force. Large areas of the country, however, remained outside governmental control, including West Beirut, which was the scene of frequent conflict between opposing militia groups. In March 1978 there was an Israeli invasion following a Palestinian attack inside Israel. Israeli troops eventually withdrew in June, but

instead of handing over all their positions to UN Peacekeeping Forces, they installed Israeli-controlled Christian Lebanese militia forces in border areas. In June 1982 Israeli forces once again invaded, this time in massive strength, and swept through the country, eventually laying siege to and bombing Beirut. In Sept. Palestinian forces, together with the PLO leadership, evacuated Beirut. Israeli forces started a withdrawal on 16 Feb. 1985 but it was not until the end of 1990 that the various militias which had held sway in Beirut withdrew. A new Government of National Reconciliation was announced on 24 Dec. 1990. The dissolution of all militias was decreed by the National Assembly in April 1991, but the Shia Muslim militia Hizbollah was allowed to remain active. Following a 17-day Israeli bombardment of Hizbollah positions in April 1996, a US-brokered unsigned 'understanding' of 26 April 1996 guaranteed that Hizbollah guerrillas and Palestinian radical groups would cease attacks on civilians in northern Israel and granted Israel the right to self-defence. Hizbollah maintained the right to resist Israel's occupation of Lebanese soil. In May 2000 Israel completed its withdrawal from south Lebanon, 22 years after the first invasion.

On 14 Feb. 2005 former Prime Minister Rafiq al-Hariri was assassinated in a bomb attack, sparking international condemnation of the murder and mass public protests at the continued presence of Syrian soldiers in the country. Soon afterwards Syria began withdrawing and redeploying its 14,000 troops and intelligence agents from Beirut. By the end of April 2005 all Syrian troops had been withdrawn from Lebanon. In July 2006, after Hizbollah forces in Lebanon had captured two Israeli soldiers, Israel launched a large-scale military campaign against Lebanon with a series of bombing raids, destroying large parts of the civilian infrastructure. More than 1,200 Lebanese, the majority of them civilians, were killed during the conflict. Following the resignation of five Shia Muslim cabinet ministers and the assassination of industry minister Pierre Gemayel in Nov. 2006 there were anti-government demonstrations in Beirut in which over 800,000 protesters—nearly a quarter of the population of Lebanon—demanded the resignation of Prime Minister Fouad Siniora.

In Nov. 2007 Siniora's cabinet assumed presidential powers in the wake of Emile Lahoud's resignation until parliament chose Michel Suleiman to fill the office in May 2008. Suleiman reappointed Siniora as premier. Diplomatic relations were established with Syria in Oct. 2008, the first time since both countries became independent. Following a general election in June 2009, Saad al-Hariri of the pro-Western 14 March Alliance formed a coalition government in Nov. In Jan. 2011 the coalition collapsed, although he agreed to stay on as premier in a caretaker capacity until a new administration could be formed.

## TERRITORY AND POPULATION

Lebanon is mountainous, bounded on the north and east by Syria, on the west by the Mediterranean and on the south by Israel. The area is 10,201 sq. km (3,939 sq. miles). Population (2007 estimate), 3.76m.; density, 369 per sq. km. The last census was in 1932. In 2005, 86.6% of the population were urban.

The UN gives a projected population for 2015 of 4.39m.

The principal towns, with estimated population (1998), are: Beirut (the capital), 1.5m.; Tripoli, 160,000; Zahlé, 45,000; Saïda (Sidon), 38,000.

The official language is Arabic. French and, increasingly, English are widely spoken in official and commercial circles. Armenian is spoken by a minority group.

## SOCIAL STATISTICS

2008 estimates: births, 66,000; deaths, 29,000. Estimated rates, 2008 (per 1,000 population): births, 15.7; deaths, 7.0. Infant mortality was 27 per 1,000 live births in 2005; expectation of life (2007), 69.8 years for males and 74.1 for females. Annual population growth rate, 2000–08, 1.3%; fertility rate, 2008, 1.8 births per woman.

## CLIMATE

A Mediterranean climate with short, warm winters and long, hot and rainless summers, with high humidity in coastal areas. Rainfall is largely confined to the winter months and can be torrential, with snow on high ground. Beirut, Jan. 55°F (13°C), July 81°F (27°C). Annual rainfall 35.7" (893 mm).

## CONSTITUTION AND GOVERNMENT

The first Constitution was established under the French Mandate on 23 May 1926. It has since been amended in 1927, 1929, 1943 (twice), 1947 and 1990. It is based on a separation of powers, with a President, a single-chamber *National Assembly* elected by universal suffrage at age 21 in 12 electoral constituencies, and an independent judiciary. The President serves a six-year term, although in both 1995 and 2004 the terms of office of the then Presidents were extended from six to nine years through 'exceptional' constitutional amendments. The executive consists of the President and a Prime Minister and Cabinet appointed after consultation between the President and the National Assembly. The system is adapted to the communal balance on which Lebanese political life depends by an electoral law which allocates deputies according to the religious distribution of the population, and by a series of constitutional conventions whereby, e.g. the President is always a Maronite Christian, the Prime Minister a Sunni Muslim and the Speaker of the Assembly a Shia Muslim. There is no party system. In Aug. 1990, and again in July 1992, the National Assembly voted to increase its membership, and now has 128 deputies with equal numbers of Christians and Muslims (although Muslims make up a clear majority of the population).

On 21 Sept. 1990 President Haraoui established the Second Republic by signing constitutional amendments which had been negotiated at Taif (Saudi Arabia) in Oct. 1989. These institute an executive collegium between the President, Prime Minister and Speaker, and remove from the President the right to recall the Prime Minister, dissolve the Assembly and vote in the Council of Ministers.

### National Anthem

'Kulluna lil watan lil 'ula lil 'alam' ('All of us for our country, flag and glory'); words by Rashid Nakhlé, tune by W. Sabra.

## GOVERNMENT CHRONOLOGY

Presidents since 1943.

1943–52	Béchara Khalil El-Khoury
1952–58	Camille Nemr Chamoun
1958–64	Fouad Abdallah Chehab
1964–70	Charles Alexandre Hélou
1970–76	Soleiman Kabalan Franjeh
1976–82	Elias Sarkis
1982–88	Amine Pierre Gemayel
1989	René Anis Moawad
1989–98	Elias Khalil Haraoui
1998–2007	Emile Geamil Lahoud
2007–08	Fouad Siniora (acting)
2008–	Gen. Michel Suleiman

Prime Ministers since 1943.

1943–45	Riyad as-Solh
1945	Abdulhamid Karame
1945–46	Abd' Rashin Sami as-Solh
1946	Saadi al-Munla
1946–51	Riyad as-Solh

1951	Hussein al-Oweini
1951–52	Abdullah Aref al-Yafi
1952	Abd Rashin Sami as-Solh
1952	Nazim al-Akkari
1952	Saeb Sallam
1952	Abdullah Aref al-Yafi
1952–53	Amir Khalid Chehab
1953	Saeb Sallam
1953–54	Abdullah Aref al-Yafi
1954–55	Abd Rashin Sami as-Solh
1955–56	Rashid Karame
1956	Abdullah Aref al-Yafi
1956–58	Abd Rashin Sami as-Solh
1958	Khalil al-Hibri
1958–60	Rashid Karame
1960	Ahmed Daouk
1960–61	Saeb Sallam
1961–64	Rashid Karame
1964–65	Hussein al-Oweini
1965–66	Rashid Karame
1966	Abdullah Aref al-Yafi
1966–68	Rashid Karame
1968–69	Abdullah Aref al-Yafi
1969–70	Rashid Karame
1970–73	Saeb Sallam
1973	Amin al-Hafez
1973–74	Takieddin as-Solh
1974–75	Rashid as-Solh
1975	Nureddin Rifai
1975–76	Rashid Karame
1976–80	Sélim Ahmed Hoss
1980	Takieddin as-Solh
1980–84	Shafiq al-Wazzan
1984–87	Rashid Karame
1987–90	Sélim Ahmed Hoss
1990–92	Omar Karame
1992	Rashid as-Solh
1992–98	Rafiq al-Hariri
1998–2000	Sélim Ahmed Hoss
2000–04	Rafiq al-Hariri
2004–05	Omar Karame
2005	Najib Mikati
2005–09	Fouad Siniora
2009–11	Saad al-Hariri
2011–	Najib Mikati

## RECENT ELECTIONS

Elections were held on 7 June 2009. The ruling anti-Syrian 14 March Alliance—including the Movement of the Future, the Progressive Socialist Party, the Lebanese Forces, the Kataeb Party and their allies—won 71 of 128 seats; Hizbollah, Amal and their allies, 29 seats; and the Free Patriotic Movement and its allies, 28.

The presidential election, originally scheduled for 25 Sept. 2007, was put back repeatedly amid continued deadlock between rival political leaders. At the 20th attempt on 25 May 2008 Gen. Michel Suleiman was elected president, receiving 118 of 127 votes in parliament.

## CURRENT GOVERNMENT

*President:* Gen. Michel Suleiman; b. 1948 (took office 25 May 2008).

In March 2012 the government comprised:

*Prime Minister:* Najib Mikati; b. 1955 (took office 13 June 2011, having previously been in office from April–July 2005).

*Deputy Prime Minister:* Samir Mouqbel.

*Minister of Agriculture:* Hussein Hajj Hassan. *Culture:* Gaby Layyoun. *Defence:* Fayez Ghosn. *Displaced Persons:* Alaaeddine Terro. *Economy and Trade:* Nicholas Nahhas. *Education:* Hassan

Diab. *Energy and Water*: Gebran Bassil. *Environment*: Nazim Khoury. *Finance*: Mohammed Safadi. *Foreign Affairs*: Adnan Mansour. *Health*: Ali Hassan Khalil. *Industry*: Vrej Sabounjian. *Information*: Walid Daouk. *Interior and Municipalities*: Marwan Charbel. *Justice*: Shakib Qortbawi. *Labour*: Salim Jreissati. *Public Works and Transport*: Ghazi Aridi. *Social Affairs*: Wael Abou Faour. *Sports and Youth*: Faisal Karami. *Telecommunications*: Nicolas Sehnawi. *Tourism*: Fadi Abboud.

*President's Website*: <http://www.presidency.gov.lb>

## CURRENT LEADERS

### Michel Suleiman

#### *Position*

President

#### *Introduction*

Gen. Michel Suleiman was sworn into office on 25 May 2008, filling a vacuum created when Emile Lahoud's term ended in Nov. 2007. Suleiman was appointed as a 'compromise candidate' after negotiations between the Siniora Western-backed government at that time and the Hizbollah-led opposition.

#### *Early Life*

Michel Suleiman was born in Amsheet on 21 Nov. 1948 to a prominent Maronite Christian family. He joined the armed forces in 1967 and graduated from Lebanon's Military Academy in 1970. He went on to complete a degree in political and administrative sciences at the Lebanese University.

Suleiman rose rapidly through the ranks of the armed forces at a time when Syria played a dominant role in Lebanon's military. On 21 Dec. 1998 he was appointed commander of the armed forces when Emile Lahoud left the post to take over the presidency. During his tenure Suleiman managed to maintain the military's non-partisan status and built good relationships with all sides. Following the Feb. 2005 assassination of Rafiq al-Hariri, Suleiman refused to crack down on anti-Syrian demonstrations or sanction military intervention. His stance is credited with paving the way to Syria's withdrawal from Lebanon. Suleiman also ensured that the military stood back when Hizbollah and Israel fought a 34-day war in 2006 and oversaw a successful operation against Fatah al-Islam militants at the Nahr el-Bared refugee camp in 2007.

On 25 May 2008 Suleiman won the presidency with 118 of 127 parliamentary votes after Qatari-brokered talks on Lebanon's political future. His appointment ended six months of political deadlock, with the government and opposition agreeing to a power-sharing deal.

#### *Career in Office*

Suleiman reappointed pro-Western Fouad Siniora as prime minister on 28 May 2008 and invited him to form a national unity cabinet. In Oct. 2008 Lebanon and Syria established diplomatic ties. However, Suleiman still faced formidable challenges, including the implementation of the UN Security Council resolution calling for all militias in Lebanon to be disarmed. Following general elections in June 2009 in which the pro-Western 14 March Alliance won a majority of seats in the National Assembly, Suleiman designated as the new prime minister Alliance leader Saad al-Hariri, who eventually succeeded in forming a national unity government in Nov. that year. Al-Hariri's government then collapsed in Jan. 2011 after Hizbollah withdrew support and Najib Mikati was appointed prime minister-designate by Suleiman. However, only after five months was Mikati able to successfully negotiate the composition of a new administration, with Hizbollah's backing, which Suleiman swore into office in June.

### Najib Mikati

#### *Position*

Prime Minister

#### *Introduction*

Najib Mikati was sworn into office on 13 June 2011 having formed a government at the invitation of President Michel Suleiman following the collapse of Saad al-Hariri's government on 12 Jan. 2011. Mikati's centrist politics have appealed to the country's major political groups, although some critics labelled him pro-Syrian after he secured Hizbollah backing.

#### *Early Life*

Najib Azmi Mikati was born in Tripoli, Lebanon, on 24 Nov. 1955 to a Sunni family. He was educated at the American University of Beirut, earning a bachelor's degree and then an MBA. He also studied at the INSEAD business school in France and at Harvard University in the USA. While still in education, Mikati co-founded a construction company, M1 Group, with his brother. In 1982, at the height of the civil war, the brothers saw the potential of the emerging telecommunications market and set up Investcom.

In 1998 Mikati was made minister of public works and transport, both of which portfolios he retained through three consecutive governments until 2004. He was elected to the National Assembly in 2000 as one of five representatives for Tripoli but decided not to run against Rafiq al-Hariri for the premiership. Following al-Hariri's death in Feb. 2005, Mikati was invited to form a government. His assurances that he would remove the country's security commanders and oversee the smooth passage of new elections won him the support of the anti-Syrian opposition. Staying true to a promise not to prolong his stay in office, he stood down as prime minister after the June polls.

In June 2006 Investcom was sold to South Africa's MTN Group for US\$5.5bn. M1 Group remains in the ownership of the Mikati brothers and is the second largest shareholder of the MTN Group. Mikati was re-elected to parliament in June 2009 but did not join the government of Saad al-Hariri. After al-Hariri's coalition collapsed in Jan. 2011, Mikati was appointed prime minister designate after 68 parliamentarians approved his Hizbollah-backed nomination.

#### *Career in Office*

Mikati was sworn into office in June 2011, having spent several months negotiating the composition of his government (with a pro-Hizbollah majority), which received a parliamentary vote of confidence in July. A major challenge has been to forge a workable government policy towards the disputed Special Tribunal for Lebanon (STL) investigating the 2005 assassination of Rafiq al-Hariri. The cabinet is prepared to support the STL as long as it does not threaten Lebanon's stability, although Hizbollah has campaigned against official co-operation with the body.

## DEFENCE

There were 14,000 Syrian troops in the country in early 2005, but in March 2005 Lebanon and Syria agreed that the troops would be redeployed to the Bekaa Valley in the east of the country. They were subsequently all withdrawn from Lebanon. The United Nations Interim Force in Lebanon (UNIFIL), created in 1978, had a strength of 1,990 in June 2006. Following the conflict between Israel and Lebanon of July-Aug. 2006 the Security Council established UNIFIL II, a more powerful peacekeeping force deployed to maintain the ceasefire, support the Lebanese armed forces and aid humanitarian efforts. In Jan. 2012 UNIFIL II comprised 12,138 military personnel.

Conscription was reduced from 12 months to six in 2005, and was finally abolished in Feb. 2007.

Defence expenditure in 2008 totalled US\$751m. (US\$189 per capita), representing 2.7% of GDP.

#### Army

The strength of the Army was 53,900 in 2007 and includes a Presidential Guard and five special forces regiments. There is an internal security force, run by the Ministry of the Interior, some 20,000 strong.

#### Navy

A force of 1,100 personnel (2007) operate 21 patrol and coastal combatants. An additional seven inshore patrol craft are operated by customs.

#### Air Force

The Air Force had (2007) 1,000 personnel. There are no combat capable aircraft although eight attack helicopters were in operation in 2007.

### INTERNATIONAL RELATIONS

A Treaty of Brotherhood, Co-operation and Co-ordination with Syria of May 1991 provides for close relations in the fields of foreign policy, the economy, military affairs and security. The treaty stipulates that Lebanese government decisions are subject to review by six joint Syrian–Lebanese bodies.

### ECONOMY

Agriculture accounted for 6.7% of GDP in 2006, industry 23.7% and services 69.6%.

#### Overview

Prior to civil war the country was a model for economic development in the Middle East, displaying impressive growth, strong investment and high social indicators. After the civil war Lebanon found itself with heavy reconstruction costs and little foreign aid, leaving the country with US\$35bn. of debt and the second highest debt-to-GDP ratio in the world in 1991. However, the economy recovered and growth rates were strong until the country fell back into recession in 1999. Austerity measures helped the economy recover strongly from 2001–04.

In 2005 the economy again stalled after the assassination of former prime minister Rafiq al-Hariri. From July–Aug. 2006 Israeli bombing damaged the economy, with the government putting the cost at US\$6.5bn. Political troubles hampered economic activity until an agreement was reached in May 2008 and a national unity government was formed in 2009. This relative stability boosted investment and tourism and growth slowed only very slightly in 2009 in the wake of the global financial crisis. The government debt-to-GDP ratio declined from 157% of GDP in 2008 to 148% in 2009. However, government debt remains among the highest in the world, and debt reduction is the priority in the medium term. The national unity government's collapse in early 2011 coupled with regional turmoil led to declines in growth, FDI, tourism and remittances.

#### Currency

The unit of currency is the *Lebanese pound* (LBP) of 100 *piastres*. Inflation was 10.8% in 2008, falling to 1.2% in 2009. In July 2005 foreign exchange reserves totalled US\$10,627m., gold reserves were 9.22m. troy oz and total money supply was £Leb.3,005.7bn. The Lebanese pound has been pegged to the US dollar since Sept. 1999 at £Leb.1,507.5 = 1 US\$.

#### Budget

The fiscal year is the calendar year.

In 2007 budgetary central government revenue totalled £Leb.8,390bn. and expenditure £Leb.11,816bn. Tax revenues in 2007 were £Leb.5,593bn. Main items of expenditure by economic type in 2007 were interest (£Leb.4,695bn.) and compensation of employees (£Leb.3,198bn.).

VAT of 10% was introduced in 2002.

#### Performance

Total GDP was US\$39.2bn. in 2010. Real GDP growth was 8.5% in 2009 and 7.5% in 2010.

#### Banking and Finance

The Bank of Lebanon (*Governor*, Riad Salameh) is the bank of issue. In 1994 there were 52 domestic banks, 14 subsidiaries and 12 foreign banks, with 590 branches in all. Commercial bank deposits in June 1998 totalled £Leb.41,836,800m. There is a stock exchange in Beirut (closed 1983–95).

### ENERGY AND NATURAL RESOURCES

#### Environment

Lebanon's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 3.6 tonnes per capita.

#### Electricity

Installed capacity in 2007 was approximately 2.3m. kW. Production in 2007 was 11.35bn. kWh and consumption per capita 3,277 kWh.

#### Minerals

There are no commercially viable deposits.

#### Agriculture

In 2002 there were around 170,000 ha. of arable land and 143,000 ha. of permanent crop land. Crop production (in 1,000 tonnes), 2002: potatoes, 397; tomatoes, 270; olives, 184; oranges, 155; apples, 150; cucumbers and gherkins, 132; wheat, 119; grapes, 102; melons and watermelons, 100.

Livestock (2002): goats, 409,000; sheep, 298,000; cattle, 88,000; pigs, 21,000; chickens, 33m.

#### Forestry

The forests of the past have been denuded by exploitation and in 2005 covered 136,000 ha., or 13.3% of the total land area. Timber production was 87,000 cu. metres in 2007.

#### Fisheries

The catch in 2005 was 3,798 tonnes, of which 3,523 tonnes were sea fish.

### INDUSTRY

In 2001 industry accounted for 21.9% of GDP, with manufacturing contributing 10.3%. Industrial production, 2001 (in 1,000 tonnes): cement, 2,890; flour, 420; sulphuric acid, 357; mineral water, 276.8m. litres.

#### Labour

The economically active population in 2007 was 1,228,800 (921,600 males and 307,100 females), of whom 1,118,400 (842,400 males and 276,000 females) were in employment.

### INTERNATIONAL TRADE

Foreign and domestic trade is the principal source of income. Foreign debt was US\$22,373m. in 2005.

#### Imports and Exports

Imports, 2008: US\$16,142m.; exports, US\$3,479m. Major imports in 2004 were: mineral products, 22.0%; electrical equipment, 11.8%; food and live animals, 10.4%; transportation equipment, 9.0%. Major exports in 2004 were: precious metal jewellery and stones, 16.4%; electrical equipment, 15.7%; base metals, 13.0%; chemicals and chemical products, 8.5%.

In 2004 the main export markets were: Iraq, 14.6%; Switzerland, 10.7%; Syria, 8.3%; UAE, 7.7%. Main import suppliers: Italy, 9.9%; France, 7.8%; Germany, 7.8%; China, 7.6%.

## COMMUNICATIONS

### Roads

There were 6,970 km of roads in 2005, including 170 km of motorway. Passenger cars in 2002 numbered 1,253,700, and there were also 97,200 trucks and vans; in 1997 there were 61,470 motorcycles and mopeds and 6,830 buses and coaches. In 2007 there were 4,281 road accidents resulting in 487 deaths.

### Rail

Railways are state-owned. There is 222 km of standard gauge track.

### Civil Aviation

Beirut International Airport was served in 2003 by nearly 30 airlines. It handled 2,373,056 passengers (all on international flights) in 2001 and 62,789 tonnes of freight. The national airline is the state-owned Middle East Airlines. In 2003 scheduled airline traffic of Lebanese-based carriers flew 20m. km, carrying 935,000 passengers (all on international flights).

### Shipping

Beirut is the largest port, followed by Tripoli, Jounieh and Saida (Sidon). In Jan. 2009 there were 46 ships of 300 GT or over registered, totalling 140,000 GT.

### Telecommunications

Lebanon had 1,980,000 telephone subscribers in 2005, or 553.5 per 1,000 persons, of which 990,000 were mobile phone subscribers. There were 409,000 PCs in use (114.5 for every 1,000 persons) in 2005 and 700,000 internet users.

## SOCIAL INSTITUTIONS

### Justice

The population in penal institutions in 2007 was 5,870 (159 per 100,000 of national population). The death penalty is still in force. It was last used in 2004 when three people were executed.

### Education

There are state and private primary and secondary schools. In 2007 there were 450,566 pupils with 32,412 teaching staff at primary schools; and 368,359 pupils with 40,919 teaching staff in secondary education. The Lebanese University, founded in 1951, is the only public university. Private universities include the American University of Beirut, founded in 1866 as the Syrian Protestant College; the Lebanese American University, established in 1924; and the Lebanese International University, established in 2001. In 2007 there were 187,055 students in tertiary education and 21,778 academic staff. Adult literacy was 90% in 2007. In 2007 public expenditure on education came to 2.7% of GNI and 9.6% of total government spending.

There is a Lebanese Academy of Fine Arts, which is part of the University of Balamand.

### Health

There were 162 hospitals in 2008. The provision of hospital beds was 36 per 10,000 inhabitants in 2005. There were 9,876 doctors in 2007, and 4,316 dentists, 4,990 pharmacists and 1,699 nurses in 2008.

## RELIGION

In 2001 it was estimated that the population was 56.6% Muslim (34.8% Shia and 21.8% Sunni), 36.0% Christian (mainly Maronite) and 7.4% Druze. In 1996 there were 119 Roman Catholic bishops. In Feb. 2012 there was one cardinal.

## CULTURE

### World Heritage Sites

There are five UNESCO sites in Lebanon. Four were entered on the list in 1984: the ruins of Anjar, a city founded by the Muslim Arab caliph Walid I at the beginning of the 8th century; Baalbek, the most impressive ancient site in Lebanon and one of the most important Roman ruins in the Middle East; Byblos, the site of multi-layered ruins of one of the most ancient cities of Lebanon, dating back to Neolithic times; and Tyre, which has important archaeological remains, principally from Roman times. The Qadisha Valley and Bcharre district, inscribed in 1998, has been the site of monastic communities since the earliest years of Christianity. Its cedar trees, among the most highly prized building materials of the ancient world, are survivors of a sacred forest.

### Press

In 2006 there were 14 paid-for daily newspapers with a combined circulation of 240,000 and two free dailies. The newspapers with the highest circulation are *An-Nahar* and *Assafir*.

### Tourism

In 2005 there were 1,140,000 non-resident tourists (excluding Syrian nationals), spending US\$5,869m.

### Festivals

Major annual cultural events are the Al Bustan Festival of music, dance and theatre in Feb.–March; Hamra Festival in June; Baalbek International Festival, which reopened in 1997 after an absence of 23 years, in June–Aug.; Beiteddine Festival in July–Aug.; Tyre Festival; Byblos Festival; and the Beirut Film Festival.

## KEY HISTORICAL EVENTS

The Basotho nation was constituted in the 19th century under the leadership of Moshoeshoe I, bringing together refugees from disparate tribes scattered by Zulu expansionism in southern Africa. After war with land-hungry Boer settlers in 1856 (and again in 1886), Moshoeshoe appealed for British protection. This was granted in 1868, and in 1871 the territory was annexed to the Cape Colony (now Republic of South Africa), but in 1883 it was restored to the direct control of the British government through the High Commissioner for South Africa. In 1965 full internal self-government was achieved under King Moshoeshoe II. On 4 Oct. 1966 Basutoland became an independent and sovereign member of the British Commonwealth as the Kingdom of Lesotho. Chief Leabua Jonathan, leader of the Basotho National Party and prime minister from 1965, suspended the constitution when the elections of 1970 were declared invalid. On 20 Jan. 1986, after a border blockade by the Republic of South Africa, Chief Jonathan was deposed in a bloodless military coup led by Maj.-Gen. Justin Lekhanya who granted significant powers to the king. King Moshoeshoe II was deposed in Nov. 1990 and replaced by King Letsie III. Lekhanya was deposed in May 1991. A democratic constitution was promulgated in April 1993. The elections in May 1998 were won by the ruling Lesotho Congress for Democracy. In Sept. 1998 an army mutiny prompted intervention from South Africa to support the government.

## TERRITORY AND POPULATION

Lesotho is an enclave within South Africa. The area is 30,355 sq. km (11,720 sq. miles).

The census in 2006 showed a total population of 1,876,633 (963,835 females); density, 61.8 per sq. km. In 2006 the population was 77.2% rural.

The UN gives a projected population for 2015 of 2.29m.

There are ten districts, all named after their chief towns, except Berea (chief town, Teyateyaneng). Area and population:

Region	Area (in sq. km.)	2006 census population
Berea	2,222	250,006
Butha-Buthe	1,767	110,320
Leribe	2,828	293,369
Mafeteng	2,119	192,621
Maseru	4,279	431,998
Mohale's Hoek	3,530	176,928
Mokhotlong	4,075	97,713
Qacha's Nek	2,349	69,749
Quthing	2,916	124,048
Thaba-Tseka	4,270	129,881

In 2006 the capital, Maseru, had a population of 197,907. Other major towns (with 2006 census population) are: Teyateyaneng, 61,475; Mafeteng, 32,148; Maputsoe, 30,800 (estimate); Mohale's Hoek, 28,310.

The official languages are Sesotho and English.

The population is more than 98% Basotho. The rest is made up of Xhosas, approximately 3,000 expatriate Europeans and several hundred Asians.

## SOCIAL STATISTICS

2008 estimated births, 59,000; deaths, 35,000. Rates, 2008 estimates: birth (per 1,000 population), 28.9; death, 16.9. Annual population growth rate, 2000–08, 1.0%. Life expectancy at birth in 2007 was 43.9 years for males and 45.5 years for females. Life expectancy has declined dramatically over the last 15 years, largely owing to the huge number of people in the country with HIV. In 2007, 23.2% of all adults between 15 and 49 were infected with HIV. Infant mortality, 2005, 102 per 1,000 live births; fertility rate, 2008, 3.3 births per woman.

## CLIMATE

A healthy and pleasant climate, with variable rainfall, but averaging 29" (725 mm) a year over most of the country. The rain falls mainly in the summer months of Oct. to April, while the winters are dry and may produce heavy frosts in lowland areas and frequent snow in the highlands. Temperatures in the lowlands range from a maximum of 90°F (32.2°C) in summer to a minimum of 20°F (–6.7°C) in winter.

## CONSTITUTION AND GOVERNMENT

Lesotho is a constitutional monarchy with the King as Head of State. Following the death of his father, Moshoeshoe II, **Letsie III** succeeded to the throne in Jan. 1996.

The 1993 constitution provided for a *National Assembly* comprising an elected 80-member lower house and a *Senate* of 22 principal chiefs and 11 members nominated by the King. For the elections of May 2002 a new voting system was introduced, increasing the number of seats in the National Assembly to 120, elected for a five-year term as before, but with 80 members in single-seat constituencies and 40 elected by proportional representation.

## National Anthem

'Lesotho fatsela bontat'a rona' ('Lesotho, land of our fathers'); words by F. Coillard, tune by L. Laur.

## RECENT ELECTIONS

Following the elections of May 1998 the King swore allegiance to a new constitution and the Military Council was dissolved.

Parliamentary elections were held on 17 Feb. 2007. The ruling Lesotho Congress for Democracy (LCD) won 61 seats (all in single-seat constituencies), National Independent Party 21 (all through proportional representation), All Basotho Convention 17, Lesotho Workers' Party 10, Alliance of Congress Parties 4, Basotho National Party 3, Basotho Democratic National Party 1, Basotho Batho Democratic Party 1, Popular Front for Democracy 1.

## CURRENT GOVERNMENT

In March 2012 the Council of Ministers comprised:

*Prime Minister, Minister of Defence and National Security:* Pakalitha Bethuel Mosisili; b. 1945 (LCD; sworn in 29 May 1998).

*Deputy Prime Minister and Minister of Home Affairs, Public Safety and Parliamentary Affairs:* Archibald Lesao Lehola. *Minister of Justice and Human Rights, and Law and Constitutional Affairs:* Mpeo Mahase. *Education and Training:* Mamphono Khaketla. *Foreign Affairs:* Mohlabi Tsekoa. *Finance and Development Planning:* Timothy Thahane. *Employment and Labour:* Maphoka Motoboli. *Local Government:* Dr Pontso Suzan Matumelo Sekatle. *Gender, Youth and Sports:* Mathabiso Lepono. *Trade and Industry, and Co-operatives and Marketing:* Leketeketse Ketso. *Health and Social Welfare:* Dr Mphu Ramatlapeng. *Tourism, Environment and Culture:* Mannete Ramaili. *Communications, Science and Technology:* Vacant. *Natural Resources:* Monyane Moleleki. *Public Service:* Mokone Lehata. *Public Works and Transport:* Semano Sekatle. *Agriculture and Food Security:* Lincoln Ralechete Mokose. *Forestry and Land Reclamation:* Kabelo Mafura. *Minister in the Prime Minister's Office:* Vacant.

The *College of Chiefs* settles the recognition and succession of Chiefs and adjudicates cases of inefficiency, criminality and absenteeism among them.

*Government Website:* <http://www.gov.ls>

## CURRENT LEADERS

### Pakalitha Bethuel Mosisili

#### *Position*

Prime Minister

#### *Introduction*

Pakalitha Bethuel Mosisili became prime minister in May 1998 after leading the Lesotho Congress for Democracy (LCD) to electoral victory. The win was contested by the opposition, resulting in widespread protests and rioting. At the elections of May 2002 Mosisili was confirmed as prime minister despite a parliamentary split led by former deputy Kelebhone Maope. The LCD also won the election of Feb. 2007.

#### *Early Life*

Pakalitha Bethuel Mosisili was born on 14 March 1945 in the Qacha's Nek District in Lesotho. He attended the University of Botswana, Lesotho and Swaziland (UBLS) from 1966–70, gaining a BA and a teaching qualification. He studied for an MA at the University of Wisconsin from 1975–76, before claiming a further BA from the University of South Africa (1977–78). In 1982 he gained a masters in education from the Simon Fraser University in Canada.

In 1967, whilst at UBLS, Mosisili joined the Basutoland Congress Party (BCP) and was an active member of its youth league. In 1970 he was detained under emergency regulations and sent to a maximum-security prison for 16 months.

Mosisili's political career began in 1993 when he was elected to parliament representing Qacha's Nek. He was appointed minister of education and training, sports, culture and youth affairs. In Feb. 1995 he became deputy prime minister following the death of

Selometsi Baholo the previous year. He took responsibility for the home affairs and local government portfolios, a role he retained until the 1998 elections. In Feb. 1998 he succeeded Prime Minister Dr Ntsu Mokhele as leader of the LCD.

#### *Career in Office*

The victory of the LCD at the elections of May 1998 led to opposition accusations of vote rigging. Mass rioting culminated in protesters seizing the palace grounds. Mosisili called on the Southern African Development Community (SADC) for military assistance to prevent a coup and troops remained in Lesotho until May 1999. In 2001 the government charged 33 protest leaders with treason. The SADC continued to provide military support and was again called in when, following the LCD's re-election in 2002, the Basotho National Party (BNP) contested the government's legitimacy and stability. In April 2004 the first local elections since independence were held but were boycotted by the opposition in protest at Mosisili's rule.

Mosisili pledged to tackle Lesotho's severe food shortages, high unemployment rates and rapidly escalating HIV/AIDS problem. However, poverty remained far-reaching and food output was affected by deaths of farmers from AIDS and by long periods of severe weather. In Feb. 2004 Mosisili declared a state of emergency and requested international food aid, announcing that hundreds of thousands faced shortages following three years of drought. In March 2004 the first phase of the Lesotho Highlands Water Project was opened, with the long-term aim of supplying water to large areas of southern Africa. During its building, Mosisili called for charges of corruption to be brought against several Western construction companies accused of bribery.

Mosisili has aimed to tackle unemployment by encouraging foreign investment, emphasizing Lesotho's low corporate tax rates and eager work-force. However, thousands were left unemployed when the textile industry collapsed after the WTO scrapped the global textile quota system in Jan. 2005. He has also sought to diversify the economy, focusing on mining and electronics and industrial equipment manufactures.

In 2003, Lesotho hosted an SADC conference on the problem of AIDS in southern Africa. Mosisili campaigned for nationwide testing (taking a public test himself in 2004), the establishment of regional anti-retroviral clinics and a national AIDS commission. In Sept. 2005 he called on the UN to give the same attention to southern Africa's HIV/AIDS plight as to global security.

In April 2005 the government, unable to finance home connections to the national electricity network, decided to privatize the electricity system. The decision followed the government's privatization of its telecommunications system in 2000.

In Nov. 2006 Mosisili dissolved parliament following a split in the ruling LCD in which some 18 parliamentary deputies left the party to form an opposition All Basotho Convention (ABC). The LCD won the election of Feb. 2007, although with a smaller majority than in 2002.

In April 2009 Mosisili survived an apparent assassination attempt by gunmen in the capital, Maseru, for which seven suspected mercenaries were charged in April 2010.

## DEFENCE

South African and Botswanan troops intervened after a mutiny by Lesotho's armed forces in Sept. 1998. The foreign forces were withdrawn in May 1999.

The Royal Lesotho Defence Force has about 2,000 personnel. Defence expenditure totalled US\$36m. in 2008 (US\$17 per capita), representing 2.1% of GDP.

## ECONOMY

In 2006 agriculture accounted for 16.3% of GDP, industry 43.2% and services 40.5%.

## Overview

Lesotho's economy is heavily integrated with that of South Africa. Its only significant natural resource is water, exported to South Africa via the Lesotho Highlands Water Project. Subsistence agriculture dominates the economy and the garment sector also has a significant role in generating employment and exports. Imports account for roughly 90% of GDP, with the economy heavily dependent on Southern African Customs Union (SACU) receipts and workers' remittances. Lesotho is a member of the Common Monetary Area together with South Africa, Namibia and Swaziland.

Following several sluggish years, economic growth averaged 3.4% a year from 2004–08, before slowing slightly to 3.1% in 2009 as a result of the global economic slowdown. The crisis resulted in a loss of textile and diamond exports and a drop in SACU revenues and remittances. Growth rose to 3.6% in 2010 but the continuing decline in SACU revenues raises medium-term uncertainties. The economy needs sustained and broad-based growth and the acceleration of structural reforms to help reduce poverty. According to the 2010 Human Development Report, 43% of the population lives below the international poverty line of US\$1.25 (PPP) per day.

## Currency

The unit of currency is the *loti* (plural *maloti*) (LSL) of 100 *lisente*, at par with the South African rand, which is legal tender. Total money supply in July 2005 was 1,659m. maloti and foreign exchange reserves were US\$539m. Inflation was 10.7% in 2008 and 7.2% in 2009.

## Budget

The fiscal year is 1 April–31 March. Revenues in 2008–09 were 8,818m. maloti and expenditures 6,462m. maloti. Tax revenue accounted for 88.0% of revenues in 2008–09; wages and salaries accounted for 36.0% of expenditures and grants 11.9%.

The standard rate of VAT is 14%.

## Performance

Real GDP growth was 3.1% in 2009 and 3.6% in 2010. Total GDP in 2010 was US\$2.1bn. Lesotho ranks among the countries most reliant on remittances from abroad, which accounted for 29% of total GDP in 2010.

## Banking and Finance

The Central Bank of Lesotho (*Governor*, Rets'elisitsoe Adelaide Matlanyane) is the bank of issue, founded in 1982 to succeed the Lesotho Monetary Authority. There are three commercial banks (Lesotho Bank, Nedbank Lesotho, Standard Bank Lesotho) and one development bank (Lesotho Building Finance Corp.). Savings deposits totalled 342.8m. maloti in 1993.

## ENERGY AND NATURAL RESOURCES

### Environment

Lesotho's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

### Electricity

Capacity (2007) 76,00 kW. Production in 2007 was 200m. kWh (all hydro-electric). Consumption in 2007 was 223m. kWh.

### Minerals

Diamonds are the main product; 2007 output was 454,014 carats (up from 721 carats in 2002). The huge increase was owing to the start of commercial operations at Letseng Diamonds mine in 2004. Gravel and crushed rock production (2007), 300,000 cu. metres.

### Agriculture

Agriculture employs two-thirds of the workforce. The chief crops were (2002 production in 1,000 tonnes): maize, 108; potatoes, 90;

wheat, 45; sorghum, 38; dry beans, 7. Soil conservation and the improvement of crops and pasture are matters of vital importance. In 2002 there were an estimated 330,000 ha. of arable land and 4,000 ha. of permanent crop land. There were 2,000 tractors in 2002.

Livestock (2003 estimates): sheep, 850,000; cattle, 540,000; goats, 650,000; asses, 154,000; horses, 100,000; chickens, 2m.

### Forestry

In 2005 Lesotho's total forest area was 8,000 ha., or 0.3% of the land area. Timber production was 2.07m. cu. metres in 2007.

### Fisheries

The catch in 2005 was 45 tonnes, exclusively from inland waters.

## INDUSTRY

Important industries are food products, beverages, textiles and chemical products.

### Labour

The labour force in 1996 was 847,000 (63% males). In 1998, 76,100 were working in mines in South Africa.

## INTERNATIONAL TRADE

Lesotho is a member of the Southern African Customs Union (SACU) with Botswana, Namibia, South Africa and Swaziland. Foreign debt was US\$690m. in 2005.

### Imports and Exports

In 2006 imports (f.o.b.) were valued at US\$1,360.8m. and exports (f.o.b.) at US\$693.6m.

Principal exports in 1993 (in 1,000 maloti): machinery and transport equipment, 25,540; wool, 16,853; manufactures, 13,426; cattle, 8,409; mohair, 5,131; canned vegetables, 2,275; wheat flour, 1,717.

The bulk of international trade is with South Africa. In 2001 SACU member countries accounted for 82.8% of imports and 37.0% of exports.

## COMMUNICATIONS

### Roads

The road network in 2002 totalled 7,091 km, of which 19.8% were paved. In 2002 there were 4,800 passenger cars (2.1 per 1,000 inhabitants) plus 13,000 trucks and vans. There were 402 deaths in 2007 as a result of road accidents.

### Rail

A branch line built by the South African Railways, one mile long, connects Maseru with the Bloemfontein–Natal line at Marseille for transport of cargo.

### Civil Aviation

There are direct flights from Maseru to Johannesburg. In 2000 Maseru handled 28,613 passengers (28,503 on international flights).

### Telecommunications

Lesotho had 293,000 telephone subscribers in 2005, or 163.2 for every 1,000 persons. Mobile phones have been available since 1996 and in 2005 there were 245,100 subscribers. There were 38.6 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 2,600 in 2005 (1.2 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The legal system is based on Roman-Dutch law. The Lesotho High Court and the Court of Appeal are situated in Maseru, and there are Magistrates' Courts in the districts. A total of 47,971 crimes were recorded in 2005, of which 15,847 were classed as 'serious' (including 734 homicides).

The population in penal institutions in July 2007 was 2,701 (144 per 100,000 of national population).

#### Education

Education levels: pre-school, 3 to 5 years; first level (elementary), 6 to 12; second level (secondary or teacher training or technical training), 7 to 13; third level (university or teacher training college). Free primary education was introduced in 2000. Lesotho has the highest proportion of female pupils at secondary schools in Africa, with 56% in 2007. In 2006 there were 424,855 pupils in primary schools with 10,513 teaching staff, 93,996 pupils in secondary schools with 3,725 teaching staff and 8,500 students in higher education with 638 academic staff. The National University of Lesotho was established in 1975 at Roma; enrolment in 2006–07, 8,566 students. There are eight government-supported technical and vocational training institutions as well as a teacher training college, the Lesotho College of Education. The adult literacy rate in 2008 was 90%.

In 2005 public expenditure on education came to 13.8% of GDP and 29.8% of total government spending (one of the highest percentages of any country).

#### Health

In 2003 there were 89 physicians, 16 dentistry personnel and 1,123 nursing and midwifery personnel. There were 13 hospital beds per 10,000 inhabitants in 2006.

#### RELIGION

In 2001 there were 0.82m. Roman Catholics, 0.28m. Protestants, 0.26m. African Christians and the remainder followed other religions.

#### CULTURE

##### Press

There were 15 non-daily newspapers and periodicals in 2005. There are no daily newspapers.

#### Tourism

In 2005 there were 304,000 non-resident visitors; spending by tourists totalled US\$30m. (excluding passenger transport).

#### Festivals

The Morija Arts & Cultural Festival is held annually at Morija, where missionaries first arrived in Lesotho in 1833.

#### DIPLOMATIC REPRESENTATIVES

*HDI/world rank:* 0.329/182

### KEY HISTORICAL EVENTS

The Republic of Liberia was created on the Grain Coast for freed American slaves. In 1822 a settlement was formed near the spot where Monrovia now stands. On 26 July 1847 the state was constituted as the Free and Independent Republic of Liberia.

On 12 April 1980 President Tolbert was assassinated and his government overthrown in a coup led by Master-Sergeant Samuel Doe. At the beginning of 1990 rebel forces entered Liberia from the north and fought their way successfully southwards to confront President Doe's forces in Monrovia. The rebels comprised the National Patriotic Front of Liberia (NPFL) led by Charles Taylor, and the hostile breakaway Independent National Patriotic Front led by Prince Johnson. A peacekeeping force dispatched by the Economic Community of West African States (ECOWAS) disembarked at Monrovia on 25 Aug. 1990. On 9 Sept. President Doe was assassinated by Johnson's rebels. ECOWAS installed a provisional government led by Amos Sawyer. Charles Taylor declared himself president, as did the former vice-president, Harry Moniba. A succession of ceasefires was negotiated and broken. An ECOWAS-sponsored peace agreement was signed on 17 Aug. 1996 in Abuja, providing for the disarmament of all factions by the end of Jan. 1997 and the election of a president on 31 May 1997. By the end of Jan. 1997 some 20,000 out of approximately 60,000 insurgents had surrendered their arms. It is estimated that up to 200,000 people died in the civil war and up to 1m. were made homeless. Charles Taylor was elected president in July 1997. In Feb. 2002 Taylor declared a state of emergency after an attack by a group of rebels on the town of Kley, where thousands of refugees from Sierra Leone were encamped.

In Aug. 2003 the UN called for the immediate deployment of an ECOWAS peacekeeping force, to be replaced by a full UN force on 1 Oct. Nigerian peacekeepers arrived on 4 Aug. 2003. Taylor relinquished power to his vice-president, Moses Blah, and to a transitional government on 11 Aug. In Nov. 2005 Ellen Johnson-Sirleaf won presidential elections to become Africa's first elected female head of state.

### TERRITORY AND POPULATION

Liberia is bounded in the northwest by Sierra Leone, north by Guinea, east by Côte d'Ivoire and southwest by the Atlantic ocean. The total area is 97,036 sq. km. At the last census, in 2008, the population was 3,476,608; density, 36 per sq. km.

The UN gives a projected population for 2015 of 4.56m. Liberia's population has doubled since the mid-1990s.

In 2007, 59.5% of the population lived in urban areas. English is the official language spoken by 20% of the population. The rest belong in the main to three linguistic groups: Mande, West Atlantic and the Kwa. These are in turn subdivided into 16 ethnic groups: Bassa, Bella, Gbandi, Mende, Gio, Dey, Mano, Gola, Kpelle, Kissi, Krahn, Kru, Lorma, Mandingo, Vai and Grebo.

The population of Monrovia the capital was 970,824 in 2008 including its suburbs.

There are 15 counties, whose areas, populations and capitals are as follows:

County	Sq. km	2008	
		population	Chief town
Bomi	1,942	84,119	Tubmanburg
Bong	8,769	333,481	Gbarnga
Gbarpolu	9,685	83,388	Bepolu
Grand Bassa	7,932	221,693	Buchanan
Grand Cape Mount	5,160	127,076	Robertson
Grand Gedeh	10,480	125,258	Zwedru
Grand Kru	3,894	57,913	Barclayville
Lofa	9,978	276,863	Voinjama
Margibi	2,615	209,923	Kakata
Maryland	2,296	135,938	Harper
Montserrado	1,908	1,118,241	Bensonville
Nimba	11,546	462,026	Saniquillie
River Cess	5,592	71,509	Cestos City
River Gee	5,110	66,789	Fish Town
Sinoe	10,133	102,391	Greenville

### SOCIAL STATISTICS

2008 births, estimate, 145,000; deaths, 40,000. 2008 rates (per 1,000 population), estimate: birth, 38.3; death, 10.5. Annual population growth rate, 2000-08, 3.7%. Life expectancy at birth (2007): 56.5 years for men and 59.3 years for women. Infant mortality in 2005 was among the highest in the world, at 157 per 1,000 live births. Fertility rate, 2008, 5.9 births per woman.

### CLIMATE

An equatorial climate, with constant high temperatures and plentiful rainfall, although Jan. to May is drier than the rest of the year. Monrovia, Jan. 79°F (26.1°C), July 76°F (24.4°C). Annual rainfall 206" (5,138 mm).

### CONSTITUTION AND GOVERNMENT

A constitution was approved by referendum in July 1984 and came into force on 6 Jan. 1986. Under it the *National Assembly* consisted of a 26-member *Senate* and a 64-member *House of Representatives*. For the elections of 2005 the number of seats in the Senate was increased to 30 and in 2010 a further nine seats were added to the House of Representatives, bringing the total to

73. The executive power of the state is vested in the *President*, who may serve up to two six-year terms.

#### National Anthem

'All hail, Liberia, hail!'; words by President Daniel Warner, tune by O. Luca.

#### RECENT ELECTIONS

In the first round of presidential elections held on 11 Oct. 2011 Ellen Johnson-Sirleaf of the Unity Party (UP) received 43.9% of the vote, followed by Winston Tubman of the Congress for Democratic Change with 32.7% and Prince Yormie Johnson of the National Union for Democratic Progress with 11.6%. There were 13 other candidates. Turnout was 71.6%. With no candidate receiving an absolute majority a run-off was held on 8 Nov. 2011. Tubman claimed that the first round had been rigged and called on his supporters to boycott the run-off, in which turnout was consequently only 38.6%. Sirleaf gained 90.7% of the vote.

In the elections to the House of Representatives also on 11 Oct. 2011 the UP won 24 seats; the Congress for Democratic Change, 11; the Liberal Party, 7; the National Union for Democratic Progress, 6; the National Democratic Coalition, 5; the Alliance for Peace and Democracy, 3; the National Patriotic Party, 3; and the Movement for Progressive Change, 2. Three parties won one seat each and independents nine. Elections for half of the seats in the Senate were also held on 11 Oct. 2011. As a result the UP held 10 of the 30 seats; the National Patriotic Party, 6; the Congress for Democratic Change, 3; the Alliance for Peace and Democracy, 2; and the National Union for Democratic Progress, 2. Four parties held one seat each and independents three.

#### CURRENT GOVERNMENT

*President:* Ellen Johnson-Sirleaf; b. 1938 (Unity Party; sworn in 16 Jan. 2006 and re-elected in Nov. 2011).

In March 2012 the government comprised:

*Vice President:* Joseph Boakai.

*Minister of Agriculture:* Florence Chenoweth. *Commerce and Industry:* Miatta Beysolow. *Defence:* Brownie J. Samukai. *Education:* Othello Gongar. *Finance:* Augustine K. Ngafuan. *Foreign Affairs:* Toga McIntosh. *Gender and Development:* Varbah Gayflor. *Health and Social Welfare:* Dr Walter Gwenigale. *Information, Culture and Tourism:* Cletus W. Sieh. *Internal Affairs:* Harrison Kanwea. *Justice and Attorney General:* Christiana Tah. *Labour:* Jeremiah Sulunteh. *Land, Mines and Energy:* Roosevelt Jayjay. *Planning and Economic Affairs:* Amara Konneh. *Posts and Telecommunications:* Frederick Norkeh. *Public Works:* Samuel Kofi Woods. *Transport:* Willard Russell. *Youth and Sports:* Edmonia Tarpeh. *Minister of State for Presidential Affairs:* Edward McClain, Jr.

*Government Website:* <http://www.emansion.gov.lr>

#### CURRENT LEADERS

##### Ellen Johnson-Sirleaf

###### Position

President

###### Introduction

Ellen Johnson-Sirleaf became Africa's first elected female president in Jan. 2006, having defeated the former footballer, George Weah, in a run-off. A US-educated economist, she returned from exile to attempt to resurrect Liberia's shattered economy after 14 years of civil war. She was re-elected in presidential polling held in Oct.–Nov. 2011, pledging to continue her reform and anti-corruption agenda.

###### Early Life

Ellen Johnson-Sirleaf was born in Monrovia, Liberia on 29 Oct. 1938. She was educated at the College of West Africa in Monrovia

from 1948–55, before graduating in accountancy in 1964 from the University of Wisconsin in the USA. From 1967 she served as special assistant to the secretary of the treasury in Liberia before undertaking an MA in public administration at America's Harvard University from 1969–71. Returning to Liberia, Sirleaf became assistant minister of finance in the administration of William R. Tolbert, Jr. Following public criticisms of Tolbert's presidency she resigned and left the country, taking up a post as a loan officer for several Latin American countries at the World Bank. In 1977 she was invited to return home to become deputy minister of finance for fiscal and banking affairs. In Aug. 1979 she replaced James T. Philips as minister of finance.

Shortly after a coup d'état and Tolbert's assassination on 12 April 1980, the new military leader, Sgt Samuel Doe, appointed Sirleaf president of the Liberia Bank for Development and Investment. However, she resigned in Dec. 1980 and returned to the World Bank, before becoming vice president of Citibank in Nairobi, Kenya in mid-1981. She stood in Liberia's general elections in Oct. 1985, at which Doe was controversially elected president. Sirleaf was elected senator but was sentenced to ten years in jail as part of Doe's crackdown on 'opponents' following a failed coup in Nov. 1985. Pardoned and released in June 1986, she again left Liberia for the USA, where she worked for the Equator Bank in Washington, D.C., followed by the UN Development Programme (UNDP) in New York.

While in the USA, Sirleaf joined other Liberian exiles in criticizing Doe and helped raise funds for a fellow exile, Charles Taylor, to lead the National Patriotic Front of Liberia (NPFL) into Liberia from the Côte d'Ivoire in 1989. It triggered a devastating civil war that led to the deaths of over 200,000 people by the time a ceasefire was declared in Aug. 1996. Disillusioned with Taylor, Sirleaf resigned as director of the UNDP's Bureau for Africa (a post she held from July 1992) and stood against him on behalf of the Unity Party in presidential elections in 1997. She received only 10% of the vote (against 75% for Taylor) and was later charged with treason by him. Forced into exile again, she became active in various humanitarian projects, including investigations into the 1994 Rwandan genocide for the Organization for African Unity and serving on the board of the International Crisis Group and the Nelson Mandela Foundation. Liberia again descended into civil war but Sirleaf returned after Taylor was forced into exile in Aug. 2003. She headed the governance reform commission until resigning in March 2005 to enter the presidential race.

During her campaign, Sirleaf criticized the transitional government's inability to fight corruption. She went through to a run-off against George Weah, a former World Footballer of the Year who was representing the Congress for Democratic Change, and on 11 Nov. the national elections commission declared Sirleaf the winner. Although Weah accused her of fraud, her victory was confirmed on 23 Nov. Independent observers declared the vote to be free, fair and transparent and her inauguration took place on 16 Jan. 2006.

###### Career in Office

In her inaugural speech, Sirleaf vowed to wage a war on corruption, promising that leading civil servants and ministers would have to declare their assets. She also pledged to work towards reconciliation by bringing former opponents into a government of national unity, and spoke of establishing peaceful relations with neighbouring West African states. She appointed a number of women to ministerial positions and controversially nominated a Nigerian soldier to head Liberia's army. While rebuilding the country's shattered economy—with a road network in ruins, no national telephone network, no national electricity grid and no piped water—has remained a major challenge, the World Bank and other international bodies have praised her government's efforts in office. A Truth and Reconciliation Commission was inaugurated with a mandate to investigate

human rights abuses during the long civil war, and she has made progress in confronting poor governance and corrupt officialdom.

In Nov. 2010 Sirleaf appointed a 22-member acting cabinet after placing their predecessors on 'mass administrative leave'. Several ministers were subsequently reappointed to their posts. She retained the presidency in Nov. 2011 when she was re-elected in a second round of voting, but there was a low turnout after rival candidate William Tubman boycotted the process because of alleged electoral fraud.

In Oct. 2011 Sirleaf was jointly awarded the Nobel Peace Prize.

## DEFENCE

In June 2003 UN Secretary-General Kofi Annan called for an international peacekeeping force to restore peace after fighting broke out between government forces and Liberians United for Reconciliation and Democracy (LURD). An ECOWAS peacekeeping force of over 3,000 troops was deployed initially, but this has been replaced by the UN Peacekeeping Mission in Liberia (UNMIL), totalling 9,233 uniformed personnel in Jan. 2012.

The Armed Forces of Liberia were created in 2007 to replace the Liberian Army, which was demobilized in 1999. In 2009 there were approximately 2,100 troops although they were not expected to be fully operational until mid-2012.

Defence expenditure totalled US\$7m. in 2009, representing 0.8% of GDP.

## ECONOMY

Agriculture accounted for 54% of GDP in 2007 (one of the highest proportions of any country), industry 19% and services 27%.

### Overview

After years of civil war when much of the economy's human and physical capital was destroyed, post-war reconstruction has accelerated. On the basis of its Poverty Reduction Strategy Paper, the government has made progress in repaying long-standing arrears to the World Bank and African Development Bank, strengthening public revenues and public finance management and improving institutional governance. The international community has provided financial support, estimated by the IMF at US\$85–100 per capita.

Real GDP growth rose to 9.5% in 2007 from a level of 8% in 2006, supported by continued recovery in agriculture as well as mining and other services. However, the country remains one of the world's poorest (per capita GDP was estimated at US\$195 per capita in 2007) with growth still below pre-war levels. Short-term prospects are favourable but with downside risks arising from a fall in global commodity prices. Inflation remains high and the external current account deficit large.

### Currency

US currency is legal tender. There is a *Liberian dollar* (LRD), in theory at parity with the US dollar. Between 1993 and March 2000 different notes were in use in government-held Monrovia and the rebel-held country areas, but on 27 March 2000 a set of new notes went into circulation to end the years of trading in dual banknotes. Inflation was 17.5% in 2008, falling to 7.4% in 2009. Total money supply was L\$4,316m. in July 2005 and foreign exchange reserves were US\$21m.

### Budget

Revenue in 2007 was L\$10,222m.; expenditure was L\$9,498m. Customs and excise duties accounted for 44.3% of revenues in 2007; general administration accounted for 41.5% of expenditures.

### Performance

Real GDP growth was 4.6% in 2009 and 5.6% in 2010. Total GDP was US\$1.0bn. in 2010.

## Banking and Finance

The National Bank of Liberia opened on 22 July 1974 to act as a central bank. The *Governor* of the bank is Joseph Mills Jones. There were only three banks in operation in Jan. 2004.

## ENERGY AND NATURAL RESOURCES

### Environment

Liberia's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.2 tonnes per capita in 2008.

### Electricity

Installed capacity in 2007 was estimated at 198,000 kW. Production in 2007 was approximately 353m. kWh. Consumption per capita in 2007 was about 93 kWh.

### Minerals

2005 estimates: gold production 16 kg and diamond production 30,000 carats.

### Agriculture

In 2007 the agricultural population was approximately 2.31m., of which about 853,000 were economically active. There were an estimated 385,000 ha. of arable land in 2007 and 215,000 ha. of permanent crops. Principal crops (2003 estimates) in 1,000 tonnes: cassava, 480; sugarcane, 255; bananas, 110; rice, 110; rubber, 108; palm oil, 42; plantains, 40; taro, 26; yams, 20. Coffee, cocoa and palm kernels are produced mainly by the traditional agricultural sector.

Livestock (2003 estimates): cattle, 36,000; pigs, 130,000; sheep, 210,000; goats, 220,000; chickens, 6m.

Livestock products (2003 estimates) in tonnes: meat, 23,000; milk, 1,000; eggs, 4,000.

### Forestry

Forest area was 3.15m. ha. (32.7% of the land area) in 2005. In 2007, 6.62m. cu. metres of roundwood were cut. There are rubber plantations.

### Fisheries

Fish landings in 2008 were 7,890 tonnes, of which approximately 90% from sea fishing.

## INDUSTRY

There are a number of small factories. Production of cement, cigarettes, soft drinks, palm oil and beer are the main industries.

### Labour

In 1996 the labour force was 977,000 (61% males).

## INTERNATIONAL TRADE

Foreign debt was US\$2,581m. in 2005.

### Imports and Exports

Imports in 2008 were US\$865m. and exports US\$262m. Main import sources in 2004 were South Korea, 38.1%; Japan, 21.9%; Singapore, 12.6%. Major export destinations in 2004 were the USA, 61.4%; Belgium, 29.5%; China, 5.3%.

Main imports are food and live animals, petroleum and petroleum products, and machinery and transport equipment. Main exports are rubber, and logs and timber.

## COMMUNICATIONS

### Roads

There were about 10,600 km of roads in 2002 (only 6.2% of which were paved). In 2007 there were 7,400 passenger cars in use and 2,800 lorries and vans.

### Rail

There is a total of 490 km single track. A 148-km freight line connects iron mines to Monrovia. There is a line from Bong to

Monrovia (78 km). The railways were out of use for many years because of the civil wars but there is now some traffic, both freight and passenger. However, large sections of track have been dismantled.

#### Civil Aviation

There are two international airports (Roberts International and Sprigg Payne), both near Monrovia. In 2003 there were services to Abidjan, Accra, Brussels, Freetown and Lagos.

#### Shipping

There are ports at Buchanan, Greenville, Harper and Monrovia. Over 2,000 vessels enter Monrovia each year. The Liberian government requires only a modest registration fee and an almost nominal annual charge and maintains no control over the operation of ships flying the Liberian flag. In Jan. 2009 there were 2,203 ships of 300 GT or over registered, totalling 80·15m. GT (a figure only exceeded by Panama's fleet). Of the 2,203 vessels registered, 741 were container ships, 669 oil tankers, 404 bulk carriers, 262 general cargo ships, 83 liquid gas tankers, 40 chemical tankers and four passenger ships.

#### Telecommunications

In 2009 Liberia had just 2,200 main (fixed) telephone lines, but there were 1,058,000 mobile phone subscribers. No other country had such a high ratio of mobile phone subscriptions to fixed telephone lines in 2009. There were 20,000 internet users in 2007.

#### SOCIAL INSTITUTIONS

##### Justice

Liberia is governed by a dual system of statutory law. The modern sector is regulated by Anglo-American common law with the indigenous sector following customary law based on unwritten tribal practices. Following a 2003 proposal by UNMIL (United Nations Mission in Liberia), a scheme to rebuild the post civil war justice system was introduced. However, reforms are progressing at a slow rate and the judiciary remains severely dysfunctional.

##### Education

Schools are classified as: (1) Public schools, maintained and run by the government; (2) Mission schools, supported by foreign Missions and subsidized by the government, and operated by qualified Missionaries and Liberian teachers; (3) Private schools, maintained by endowments and sometimes subsidized by the government.

Adult literacy in 2009 was estimated at 59·1%.

#### Health

In 2004 there were 103 physicians (approximately one for every 33,300 inhabitants), 13 dentists, 613 nurses, 422 midwives and 35 pharmacists. The John F. Kennedy Memorial Hospital in Monrovia is the country's leading health care institution.

#### RELIGION

There were (2001) about 1·27m. Christians and 520,000 Sunni Muslims, plus 1·39m. followers of traditional beliefs.

#### CULTURE

##### Press

There were six paid-for daily newspapers in 2006 with a combined circulation of 50,000.

#### DIPLOMATIC REPRESENTATIVES

Of Liberia in the United Kingdom (23 Fitzroy Sq., London, W1T 6EW)

*Ambassador:* Wesley Momo Johnson.

Of the United Kingdom in Liberia

*Ambassador:* Ian Hughes (resides in Freetown, Sierra Leone).

Of Liberia in the USA (5201 16th St., NW, Washington, D.C., 20011)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* William V. Bull.

Of the USA in Liberia (PO Box 98, 502 Benson St., Monrovia)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Karl Albrecht.

Of Liberia to the United Nations

*Ambassador:* Marjon V. Kamara.

Of Liberia to the European Union

*Ambassador:* Youngor Telewoda.

## KEY HISTORICAL EVENTS

Libya's earliest inhabitants were the semi-nomadic Berbers, whose descendants still live throughout North Africa's Atlas Mountains. Phoenician merchants from the Levant began to settle in what is today Libya from around 1000 BC and founded Carthage in what is now Tunisia in 814 BC. Carthage became the leading port in the western Mediterranean, extending its influence over Libya and most of coastal North Africa for the next five centuries. The port of Oea (now Tripoli) was founded by Phoenicians around 500 BC. Greek traders settled in the Cyrenaica region (eastern Libya) in the seventh century BC, founding Cyrene in 630 BC. Roman settlements appeared in Libya in the third century BC, growing in importance following Rome's sacking of Carthage in 146 BC. The port of Leptis Magna was founded in Tripolitania in the first century AD, becoming a major centre of commerce until it fell to the Vandals early in the fifth century.

The first of several waves of Arab conquerors arrived in 630, spreading the Islamic faith, initially along the coastal fringes. Libya became part of the powerful Umayyad and Abbasid Caliphates, the latter centred on Baghdad where it reached its apotheosis under Harun al Rashid (786–809). From 971 until 1045 Libya, along with present-day Algeria and Tunisia, were ruled by the Zirid amirs who were loyal to the Fatimid Caliphs of the Nile Valley. Bedouin Arabs from the Nile Valley, known as the Banu Hilal, entered the region in around 1000 spreading Islam and the Arabic language throughout Libya over the next three centuries.

By the beginning of the 15th century the Libyan, or Barbary, coast had become infamous as a haven for pirates. Habsburg Spain occupied Tripoli in 1510 but it fell to Ottoman corsairs in 1551. Direct control from Istanbul was superseded by rule through local Turkish governors (known as beys). In 1711 Ahmed Karamanli, an Ottoman cavalry officer, seized power and declared Libyan independence. Direct Ottoman rule was re-established in 1835 when Sultan Mahmud II made Libya a province of the Sublime Ports.

On 29 Sept. 1911 Italy declared war on the ailing Ottoman Empire and occupied Tripoli four days later. Italian control was confirmed following the signing of the Treaty of Ouchy in 1912 but local resistance, particularly by the Sanusi Order in Cyrenaica, confined Italian power to the coastal cities of Tripoli, Benghazi, Tobruk and Derna.

During the Second World War the British army expelled the Italians and their German allies, placing Tripolitania and Cyrenaica under British military administration and Fezzan under French control. This continued under a UN directive until 1951 when Libya gained independence. The former Amir of Cyrenaica, Muhammad Idris al Senussi, was crowned king.

The discovery of oil in 1959 brought rapid economic growth but resentment grew as wealth remained in the hands of the elite. Idris was deposed in Sept. 1969 by a group of army officers, 12 of whom formed the Revolutionary Command Council which, chaired by Col. Muammar Gaddafi, proclaimed the Libyan Arab Republic. In 1977 the Revolutionary Command Council was superseded by a more democratic People's Congress, though Gaddafi remained head of state. Throughout the 1980s Libya found itself at odds with its neighbours while deteriorating relations with the USA and other Western countries culminated in the US bombing of Tripoli in April 1986, a punishment for Gaddafi's alleged support of international terrorism. A US trade embargo was also enforced that year.

In 1992 the UN imposed sanctions after Libya refused to surrender suspects in the 1988 bombing of a Pan Am flight over Lockerbie in Scotland. In April 1999 Libya handed over two suspects to face trial under Scottish law in the Netherlands. In Jan. 2001 Abdelbaset Ali Mohamed Al-Megrahi was found guilty of murder and sentenced to life imprisonment. The UN suspended sanctions in 1999 but they were not lifted formally until Sept. 2003. The USA lifted its remaining sanctions in Sept. 2004 after Col. Gaddafi pledged to end his weapons of mass destruction programme. Libya's auction of oil and gas exploration licences in Jan. 2005 led to the return of US energy companies and full diplomatic ties between the two countries were resumed in May 2006.

In Aug. 2009 Al-Megrahi was released from prison on compassionate grounds following a ruling by the Scottish courts. He was said to be suffering terminal cancer. His subsequent enthusiastic reception in Libya raised tensions with the USA.

In Feb. 2011 Gaddafi faced popular demands, originating in Benghazi and spreading to other cities, for him to step down. In March he began a military campaign to seize back the east of the country from insurgents. In response, the UN, with the backing of the Arab League, authorized a no-fly zone over the country and air strikes as required in an attempt to protect civilians. In May the International Criminal Court issued an arrest warrant for Gaddafi, citing his 'widespread and systematic attacks' on civilians. In Aug. rebel forces seized control of Tripoli and a National Transitional Council (NTC) became the de facto government as Gaddafi went into hiding. The following month, rebels launched a fresh assault on Gaddafi's home town of Sirte, one of the last remaining pockets of loyalist support. On 20 Oct.

2011 Gaddafi was found hiding in the city by National Transitional Council troops and killed. One of the Gaddafi's sons, Mutassim Gaddafi, a senior army officer and security adviser, was also killed. The death of the Muammar Gaddafi brought an end to 42 years of violent rule and on 23 Oct. 2011 in Benghazi the NTC formally announced the liberation of the country.

### TERRITORY AND POPULATION

Libya is bounded in the north by the Mediterranean Sea, east by Egypt and Sudan, south by Chad and Niger and west by Algeria and Tunisia. The area is 1,759,540 sq. km. The population at the 2006 census was 5,657,692; density, 3.2 per sq. km. In 2005, 84.8% of the population lived in urban areas. Ethnic composition, 2000: Libyan Arab and Berber, 64%; other (mainly Egyptians, Sudanese and Chadians), 36%.

The UN gives a projected population for 2015 of 6.61m.

Libya is divided into 22 districts (*sha'biyat*). Capitals and populations (2006 census) were as follows:

	Capital	Population
Al Butnan	Tubruq	157,747
Al Jabal al Akhdar	Al Bayda	206,180
Al Jabal al Gharbi	Gharyan	302,705
Al Jifarah	Al' Aziziyah	451,175
Al Jufrah	Hun	52,092
Al Kufrah	Al Jawf	48,328
Al Marj	Al Marj	184,531
Al Marqab	Al Hums	427,886
Al Wahah	Ajdabiya	179,155
An Nuqat al Khams	Zuwarah	287,359
Ash Shati'	Birat	78,563
Az Zawiyah	Az Zawiyah	290,637
Benghazi	Benghazi	674,951
Darnah	Darnah	162,857
Ghat	Ghat	23,199
Misratah	Misratah	543,129
Murzuq	Murzuq	78,772
Nalut	Nalut	93,896
Sabha	Sabha	133,206
Surt	Surt	141,495
Tarabulus (Tripoli)	Tarabulus (Tripoli)	1,063,571
Wadi al Hayat	Awbari	76,258

The two largest cities are Tripoli, the capital (population of 1,063,571 in 2006), and Benghazi (912,000 in 2000).

The official language is Arabic.

### SOCIAL STATISTICS

Estimates, 2008: births, 147,000; deaths, 26,000. Estimated rates, 2008 (per 1,000 population): births, 23.3; deaths, 4.1. Life expectancy (2007), 71.6 years for men and 76.8 for women. Annual population growth rate, 2000–08, 2.0%; infant mortality, 2005, 18 per 1,000 live births; fertility rate, 2008, 2.7 births per woman.

### CLIMATE

The coastal region has a warm temperate climate, with mild wet winters and hot dry summers, although most of the country suffers from aridity. Tripoli, Jan. 52°F (11.1°C), July 81°F (27.2°C). Annual rainfall 16" (400 mm). Benghazi, Jan. 56°F (13.3°C), July 77°F (25°C). Annual rainfall 11" (267 mm).

### CONSTITUTION AND GOVERNMENT

Following the uprising in 2011 that culminated in the capture and killing of Libya's incumbent leader, Col. Gaddafi, the National Transitional Council (NTC)—formed in Feb. 2011—formally announced the country's 'liberation' in Oct. and appointed an executive committee to serve as the *de facto* interim government.

In accordance with its own guidelines set out in Aug. 2011, the NTC scheduled elections for a 200-seat Public National Conference (PNC) for June 2012. The PNC was then expected to appoint an interim prime minister and cabinet as well as draft a

new constitution. Once the constitution has won approval by referendum, parliamentary elections are required to be held within six months.

### National Anthem

'Libya, Libya, Libya'; words by Al Bashir Al Arebi, tune by Mohammed Abdel Wahab. Originally the Kingdom of Libya's national anthem from 1951–69, 'Libya, Libya, Libya' became the country's new national anthem following the death of Muammar Gaddafi in 2011.

### GOVERNMENT CHRONOLOGY

Leaders since 1951.

1951–69	(King) Muhammad Idris I al Senussi
1969–2011	Col. Muammar Abu Minyar Gaddafi (Chairman of the Revolutionary Command Council until 1977; General Secretary of the General People's Congress until 1979; <i>de facto</i> leader 1979–2011)

*Chairman of the National Transitional Council*

2011– Mustafa Abdul Jalil

*Heads of Government since 2011.*

*Prime Ministers*

2011	Mahmoud Jibril (interim)
2011	Ali Tarhouni (interim)
2011–	Abdurrahim al-Keib (interim)

### CURRENT GOVERNMENT

*Chairman of the National Transitional Council:* Mustafa Abdul Jalil; b. 1952 (since 5 March 2011).

In March 2012 the cabinet comprised:

*Chairman of the Executive Board of the National Transitional Council, Interim Prime Minister and Minister of Foreign Affairs:* Abdurrahim al-Keib; b. 1950 (since 31 Oct. 2011).

*Deputy Prime Ministers:* Mustafa Abu Shagur; Omar Abdullah Abdelkarim.

*Minister of Defence:* Osama Juili. *Interior:* Fawzi Abdelali. *Foreign Affairs and International Co-operation:* Ashur bin Khayyal. *Finance:* Hassan Zoglem. *Planning:* Issa al-Touijer. *Economy:* Ahmad al-Kushali. *Oil and Gas:* Abdelrahman bin Yazza. *Grants and Religious Affairs:* Hamza Bufares. *Martyrs, Wounded and Missing People:* Abdennasser Jibril Hamed. *Social Affairs:* Mabruka al-Sherif Jibril. *Education:* Suleyman Ali al-Saheli. *Labour:* Mustafa al-Rojbani. *Justice:* Ali H'mida Ashur. *Health:* Fatma al-Hamrushi. *Local Government:* Mohammed al-Hrari. *Housing and Public Services:* Ibrahim al-Sgutri. *Transport:* Yussef al-Whishi. *Communication and Information Technology:* Anwar al-Fituri. *Agriculture:* Suleyman Abdelhamid Bukharruba. *Industry:* Mohammed Mahmoud al-Ftissi. *Higher Education and Scientific Research:* Naim al-Gharyani. *Youth and Sport:* Fethi Tarbel. *Culture and Civil Society:* Abdelrahman Habil. *Electricity and Renewable Energy:* Awad al-Barasi.

### CURRENT LEADERS

**Mustafa Abdul Jalil**

*Position*

Chairman of the National Transitional Council

*Introduction*

Mustafa Abdul Jalil heads the National Transitional Council (NTC), which took power after the overthrow of Col. Muammar Gaddafi in the Libyan uprising of 2011. Resigning as justice minister in Feb. 2011 as civil unrest started, Jalil was the first senior figure in Gaddafi's government to defect to the rebel camp. Although criticized for his association with the former regime, he was a key member in the establishment of the NTC.

**Early Life**

Mustafa Abdul Jalil was born in 1952 in Al Bayda, eastern Libya. In 1975 he graduated in Sharia and law from the Arabic language and Islamic studies faculty of the University of Libya. He then joined the public prosecutor's office in Al Bayda and in 1978 was appointed to the judiciary. In 2002 he became head of the Court of Appeal and four years later was appointed president of the Courts in Al Bayda. Over his judicial career, Jalil earned a reputation for his independence from the Gaddafi regime.

In 2007 Jalil was appointed justice minister as Gaddafi sought to sway international opinion on Libya's poor human rights record. In Aug. 2010 Jalil had his resignation rejected after he had criticized the security forces for the continued detention of political prisoners despite court decisions clearing many of them of wrong-doing.

In Feb. 2011 he went to Benghazi to negotiate the release of hostages taken by rebel fighters but resigned from the cabinet on 21 Feb. in protest at violence against anti-government demonstrators. In response, the government announced a US\$400,000 reward for his capture. On 27 Feb. 2011 the NTC was established with Jalil as chairman.

**Career in Office**

Jalil was key to the NTC gaining foreign support and recognition. On 22 Oct. 2011 he announced the 'liberation' of the country and outlined plans for a democratic state based on Islamic values. He promised to build a tolerant society under the rule of law and to establish a new constitution, with elections to be held within 18 months.

Despite his popularity, Jalil has been accused of lacking leadership skills and being indecisive in setting out a political middle-ground between Islamists and secularists. He has, furthermore, admitted that the NTC is unable to control the various militias who have refused to lay down their arms.

**Abdurrahim al-Keib**

Interim Prime Minister

**Introduction**

Abdurrahim al-Keib was elected prime minister of Libya's interim government by members of the National Transitional Council (NTC) on 31 Oct. 2011. A professor of electrical engineering who lived in the USA for 30 years, he was a long-term opponent of the Muammar Gaddafi regime but has little front-line political experience.

**Early Life**

Abdurrahim al-Keib was born in Tripoli in 1960 to a prosperous family from the coastal city of Sabratha. He graduated in electrical engineering from the University of Libya in 1973. Two years later he left for the University of Southern California in the USA, against the backdrop of Gaddafi's increasingly autocratic regime. Al-Keib joined the Libyan opposition movement in 1976 and helped finance it for many years. He received his doctorate from North Carolina State University in 1984 and joined the University of Alabama in Tuscaloosa as assistant professor of electrical engineering the following year.

As a specialist in electrical power engineering, he worked as a consultant for US power-supply companies and developed links with international organizations including the Arab Science and Technology Foundation and the Islamic Development Bank. While on leave between 1999 and 2001 he set up a department of electronics and computer engineering at the American University of Sharjah, UAE. From 2007 he worked as director of electrical engineering at the UAE's Petroleum Institute. Returning to Libya in early 2011, he reportedly played an important role financing and organizing the underground movement in Tripoli.

Three days after the capture and death of Gaddafi on 20 Oct. 2011 the NTC declared that Libya had been liberated and pledged

to hold national elections within 18 months. To widespread surprise, in the poll for the premiership of the interim government on 31 Oct., the little-known al-Keib emerged victorious, winning the votes of 26 of the 51 eligible NTC members. He was viewed as a 'consensus' candidate, untainted by any links to the former regime.

**Career in Office**

The interim government faced multiple challenges preparing for elections while rebuilding institutions and the country's infrastructure after eight months of civil war and four decades of dictatorship. Protests erupted in Benghazi in early 2012. On 22 Jan. the deputy head of the NTC, Abdel Hafiz Ghoga, resigned amid rising anger over the interim administration's lack of transparency and the ongoing role of Gaddafi-era officials.

**DEFENCE**

There is selective conscription for one–two years. Defence expenditure in 2008 totalled US\$800m. (US\$129 per capita), representing 1.2% of GDP.

**Nuclear Weapons**

In Dec. 2003 then leader Col. Muammar Gaddafi agreed to dismantle his weapons of mass destruction programmes. He also agreed unconditionally to allow inspectors from international organizations to enter Libya.

**Army**

Strength (2007) 50,000 (including an estimated 25,000 conscripts). In addition there is a People's Militia of some 40,000 that acts as a reserve force.

**Navy**

The fleet, a mixture of Soviet and West European-built ships, includes two diesel submarines, two frigates and one corvette although serviceability is in doubt. There is a small Naval Aviation wing operating seven helicopters.

Personnel in 2007 totalled 8,000, including coastguard. The main naval bases are at Tripoli, Benghazi, Tubruq and Al Hums.

**Air Force**

The Air Force has 374 combat capable aircraft, including MiG-21s, MiG-23s, MiG-25s and Mirage F1s, but many are in storage. Personnel total (2007) 18,000.

**ECONOMY**

Petroleum and natural gas accounted for 71.6% of GDP in 2007; public administration, defence and services 6.9%; finance, insurance and real estate 6.2%; and construction 4.3%.

**Overview**

Libya enjoyed solid growth performance in the first decade of the century. In 2003 UN sanctions were lifted after Libya admitted complicity in the 1988 Lockerbie aircraft bombing. In 2004 the USA lifted almost all of its unilateral sanctions after Libya agreed to give up its nuclear weapons programmes.

The production of hydrocarbons is responsible for the majority of the government's revenues and the country's export earnings. Oil accounts for 98% of GDP and the country is the fourth largest oil producer in Africa. Construction and services dominate the non-oil economy.

Libya suffered a recession in 2009 following the global economic downturn. As a result, there was a greater contribution from non-oil industries following increased government spending and liberalization of the trade, tourism and service sectors (including the abolition of most of its import monopolies).

In the wake of the political revolution that overthrew the government, GDP is estimated to have fallen by 56% in 2011. The Energy Investment Authority put the decline in production of light and sweet crude oil at 80%.

Libya is dependent on imports for domestic food production and medical supplies, and civil unrest has resulted in a humanitarian crisis. Social development indicators are high relative to regional standards but educational standards are low while unemployment is at 30%.

#### Currency

The unit of currency is the *Libyan dinar* (LYD) of 1,000 *millemes*. The dinar was devalued 15% in Nov. 1994, and alongside the official exchange rate a new rate was applied to private sector imports. Foreign exchange reserves were US\$29,315m. in June 2005. Total money supply in May 2005 was 11,552m. dinars. There was inflation of 10.4% in 2008 and 2.8% in 2009.

#### Budget

In 2008 revenues totalled 72,741m. dinars and expenditures 44,115m. dinars. Oil accounts for 88.6% of government revenues.

#### Performance

The economy contracted by 2.3% in 2009 but grew by 4.2% in 2010. Total GDP in 2009 was US\$62.4bn.

#### Banking and Finance

A National Bank of Libya was established in 1955; it was renamed the Central Bank of Libya in 1972. The current *Governor* is Saddek Omar Elkaber. All foreign banks were nationalized by Dec. 1970. In 1972 the government set up the Libyan Arab Foreign Bank. The Agricultural Bank was set up to give loans and subsidies to farmers and to assist them in marketing their crops. Following the popular uprising against Col. Gaddafi in 2011, international sanctions were imposed on the central bank and its subsidiaries. In March 2011 rebels assumed control of the Central Bank of Libya, setting up a temporary headquarters in Benghazi. Following the overthrow of Gaddafi in Aug. 2011, authority passed to the National Transitional Council.

A stock exchange was opened in Tripoli in March 2007.

### ENERGY AND NATURAL RESOURCES

#### Environment

Libya's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 9.3 tonnes per capita.

#### Electricity

Installed capacity in 2007 was an estimated 5.5m. kW. Production was 25.69bn. kWh in 2007 and consumption per capita 4,161 kWh.

#### Oil and Gas

Oil accounts for 30% of Libya's GDP. Oil production in 2008 totalled 86.2m. tonnes. Proven reserves (2008) 43.7bn. bbls. Some analysts believe total reserves may be as high as 100bn. bbls. The National Oil Corporation (NOC) is the state's organization for the exploitation of oil resources. Libya's first oilfields were discovered in 1959, but the offshore sector remains relatively unexplored although the decision to abandon programmes for developing weapons of mass destruction in 2003 led to greatly increased interest among foreign oil companies. Oil export revenues more than doubled between 1998 and 2003. Production increased by a third between 2002 and 2008.

Proven natural gas reserves totalled 1,540bn. cu. metres in 2008. Production (2008), 15.9bn. cu. metres.

#### Water

Since 1984 a US\$20bn. project has been under way to bring water from aquifers underlying the Sahara to the inhabited coastal areas of Libya. This scheme, called the 'Great Man-Made River', is intended, on completion, to bring 6,000 cu. metres of water a day along some 4,000 km of pipes. Phase I was completed in Aug. 1991; Phase II of the project (covering the west of Libya) was completed in Sept. 1996. Work on Phase III began in Feb. 2008. The river is providing Libya's main centres of population with

clean water as well as making possible the improvement and expansion of agriculture. The whole project is more than three-quarters complete.

#### Minerals

Iron ore deposits have been found in the south.

#### Agriculture

Only the coastal zone, which covers an area of about 17,000 sq. miles, is really suitable for agriculture. Of some 25m. acres of productive land, nearly 20m. are used for grazing and about 1m. for static farming. Agriculture employs around 17% of the workforce. The sub-desert zone produces the alfalfa plant. The desert zone and the Fezzan contain some fertile oases. In 2002 there were around 1.82m. ha. of arable land and 0.34m. ha. of permanent crops. 470,000 ha. were irrigated in 2002. There were about 40,000 tractors in 2002 and 3,400 harvester-threshers.

Cyrenaica has about 10m. acres of potentially productive land and is suitable for grazing. Certain areas are suitable for dry farming; in addition, grapes, olives and dates are grown. About 143,000 acres are used for settled farming; about 272,000 acres are covered by natural forests. The Agricultural Development Authority plans to reclaim 6,000 ha. each year for agriculture. In the Fezzan there are about 6,700 acres of irrigated gardens and about 297,000 acres are planted with date palms.

Production (2003 estimates, in 1,000 tonnes): watermelons, 218; potatoes, 195; onions, 180; tomatoes, 160; olives, 150; dates, 140; wheat, 125; barley, 80; oranges, 42.

Livestock (2003 estimates): 4.1m. sheep, 1.3m. goats, 130,000 cattle, 47,000 camels, 25m. chickens.

#### Forestry

Forest area in 2005 was 217,000 ha. (0.1% of the land area). In 2007, 1.03m. cu. metres of roundwood were cut.

#### Fisheries

The catch in 2005 was approximately 46,073 tonnes, entirely from marine waters.

### INDUSTRY

Industry employs nearly 30% of the workforce. Small-scale private sector industrialization in the form of partnerships is permitted. Output (in 1,000 tonnes): cement (2006 estimate), 5,300; distillate fuel oil (2007), 4,542; residual fuel oil (2007), 4,310; petrol (2007), 1,295.

#### Labour

The labour force in 1996 was 1,601,000 (79% males).

### INTERNATIONAL TRADE

In 1986 the USA applied a trade embargo on the grounds of Libya's alleged complicity in terrorism. Many of the economic sanctions were suspended in April 2004, and in June 2006 Libya was removed from Washington's list of state sponsors of terror. In 1992 UN sanctions were imposed for Libya's refusal to deliver suspected terrorists for trial in the UK or USA, but these were formally lifted in 2003.

In Feb. 1989 Libya signed a treaty of economic co-operation with the four other Maghreb countries: Algeria, Mauritania, Morocco and Tunisia.

Libya applied for WTO membership in Dec. 2001 and accession negotiations commenced in 2004.

#### Imports and Exports

In 2006 imports were valued at US\$13.2bn. and exports at US\$37.5bn. Some 80% of GDP derives from trade. Oil accounts for over 95% of exports. Main import suppliers in 2000 were Italy (24%), Germany (12%), Tunisia (9%) and the UK (7%); main export markets were Italy (33%), Germany (24%), Spain (10%) and France (5%).

## COMMUNICATIONS

### Roads

There were 100,024 km of roads in 2002 (57.2% paved). In 2007 there were 1,388,200 passenger cars in use (225 per 1,000 inhabitants), plus 310,500 lorries and vans. There were 1,080 deaths as a result of road accidents in 1996.

### Rail

A 4,800 km trans-African rail line has been proposed, scheduled to run through Libya from Tunisia to Egypt.

### Civil Aviation

The UN ban on air traffic to and from Libya enforced since April 1992 was lifted in April 1999 following the handing over for trial of two suspected Lockerbie bombers. The national flag carrier, Libyan Airlines, has been grounded since March 2011 as a result of the Libyan revolution. In 2006 scheduled airline traffic of Libya-based carriers flew 17m. km, carrying 1,152,000 passengers.

### Shipping

In Jan. 2009 there were 28 ships of 300 GT or over registered, totalling 239,000 GT.

### Telecommunications

There were 1.23m. fixed telephone lines in 2010 (193.3 per 1,000 inhabitants). Mobile phone subscribers numbered 9.53m. in 2009. There were 108.0 internet users per 1,000 inhabitants in 2009. Fixed internet subscriptions totalled 772,500 in 2009 (123.3 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The Civil, Commercial and Criminal codes are based mainly on the Egyptian model. Matters of personal status of family or succession matters affecting Muslims are dealt with in special courts according to the Muslim law. All other matters, civil, commercial and criminal, are tried in the ordinary courts, which have jurisdiction over everyone.

There are civil and penal courts in Tripoli and Benghazi, with subsidiary courts at Misratah and Darnah; courts of assize in Tripoli and Benghazi, and courts of appeal also in Tripoli and Benghazi.

The population in penal institutions in June 2007 was 12,748 (209 per 100,000 of national population). The death penalty is in force; there were at least four executions in 2009 and 18 in 2010.

### Education

In 2006 there were 755,338 primary school pupils and 732,614 secondary level pupils. In 2009 the government launched a five-year US\$9bn. plan to reform higher education and scientific research through strengthening international ties and improving the information technology network as well as creating a National Authority for Scientific Research. There are 12 state universities in Libya (of which Al Fateh University in Tripoli and Garyounis University in Benghazi are the largest), eight other higher education institutions and eight oil/bank training centres/petroleum training and qualifying institutes. In 2003 there were

375,028 tertiary level students and 15,711 academic staff. Adult literacy in 2009 was estimated at 88.9%.

### Health

There were 7,070 physicians, 850 dentistry personnel and 27,160 nursing and midwifery personnel in 2004. Provision of hospital beds in 2006 was 37 per 10,000 population.

## RELIGION

Islam is declared the State religion, but the right of others to practise their religion is provided for. In 2001, 92% were Sunni Muslims.

## CULTURE

### World Heritage Sites

Libya has five sites on the UNESCO World Heritage List: the Archaeological Site of Leptis Magna (inscribed on the list in 1982); the Archaeological Site of Sabratha (1982); the Archaeological Site of Cyrene (1982); the Rock-art Sites of Tadrart Acacus (1985); and the Old Town of Ghadamès (1986).

### Press

In 2006 there were four daily newspapers with a combined circulation of 70,000.

### Tourism

In 2004 there were 149,000 foreign tourists (excluding day-visitors); spending by tourists totalled US\$244m. in 2006.

## DIPLOMATIC REPRESENTATIVES

Of Libya in the United Kingdom (15 Knightsbridge, London, SW1X 7LY)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Mahmud Nacua.

Of the United Kingdom in Libya (24th Floor, Tripoli Towers, Tripoli)

*Ambassador:* Sir Dominic Asquith, KCMG.

Of Libya in the USA (2600 Virginia Ave., NW, Suite 705, Washington, D.C., 20037)

*Ambassador:* Ali Aujali.

Of Libya to the United Nations

*Ambassador:* Abdul Rahman Mohammad Shalgam.

Of Libya to the European Union

*Ambassador:* Alhadi Ahmed Hadeiba.

The US embassy in Libya closed on 25 Feb. 2011 but the embassy of Hungary in Tripoli is acting as the protecting power for US interests.

*Population, 2008:* 36,000

*GNI per capita, 2010:* US\$144,207

*HDI/world rank:* 0.905/8

## KEY HISTORICAL EVENTS

Liechtenstein is a sovereign state with a history dating back to 1342 when Count Hartmann III became ruler of the county of Vaduz. Additions were later made to the count's domains and by 1434 the territory reached its present boundaries. On 23 Jan. 1719 Emperor Charles VI constituted the two counties as the Principality of Liechtenstein. In 1862 the constitution established an elected diet. After the First World War, Liechtenstein was represented abroad by Switzerland. Swiss currency was adopted in 1921. On 5 Oct. 1921 a new constitution based on that of Switzerland extended democratic rights, but in March 2003 the people of Liechtenstein voted in a referendum to give their prince the power to govern without reference to elected representatives.

## TERRITORY AND POPULATION

Liechtenstein is bounded on the east by Austria and the west by Switzerland. Total area 160 sq. km (61.8 sq. miles). The population (Dec. 2008) was 35,589 (17,998 females), including 11,770 resident foreigners, giving a density of 222 per sq. km.

The population of Liechtenstein is predominantly rural. Population of Schaan (2008), 5,758; Vaduz (2008), 5,111.

The official language is German.

## SOCIAL STATISTICS

In 2008 there were 350 births and 205 deaths (rates of 9.9 per 1,000 population and 5.8 respectively). The annual population growth rate was 1.2% over the period 2000–05.

## CLIMATE

There is a distinct difference in climate between the higher mountains and the valleys. In summer the peaks can often be foggy while the valleys remain sunny and warm, while in winter the valleys can often be foggy and cold whilst the peaks remain sunny and comparatively warm. Vaduz, Jan. 0°C, July 20°C. Annual rainfall 1,090 mm.

## CONSTITUTION AND GOVERNMENT

Liechtenstein is a constitutional monarchy ruled by the princes of the House of Liechtenstein.

The reigning Prince is **Hans-Adam II**, b. 14 Feb. 1945; he succeeded his father Prince Francis Joseph, 13 Nov. 1989 (he exercised the prerogatives to which the Sovereign is entitled from 26 Aug. 1984); married on 30 July 1967 to Countess Marie Kinsky von Wchinitz und Tettau. *Offspring:* Hereditary Prince Alois (b. 11 June 1968), married Duchess Sophie of Bavaria on 3 July 1993 (*offspring:* Prince Joseph Wenzel, b. 24 May 1995; Marie Caroline, b. 17 Oct. 1996; Georg Antonius, b. 20 April 1999; Nikolaus Sebastian, b. 6 Dec. 2000); Prince Maximilian (b. 16 May 1969), married Angela Brown on 29 Jan. 2000 (*offspring:* Alfons, b. 18 May 2001); Prince Constantin (b. 15 March 1972), married Countess Marie Kálnoky de Köröspatak on 17 July 1999 (*offspring:* Moritz, b. 27 May 2003; Georgina, b. 23 July 2005; Benedikt, b. 18 May 2008); Princess Tatjana (b. 10 April 1973), married Philipp von Latorff on 5 June 1999 (*offspring:* Lukas, b. 13 May 2000; Elisabeth, b. 25 Jan. 2002; Marie, b. 18 Jan. 2004; Camilla, b. 4 Nov. 2005; Anna, b. 3 Aug. 2007; Sophie, b. 30 Oct. 2009; Maximilian, b. 17 Dec. 2011). The monarchy is hereditary in the male line.

The present constitution of 5 Oct. 1921 provided for a unicameral parliament (*Landtag*) of 15 members elected for four years, but this was amended to 25 members in 1988. Election is on the basis of proportional representation. The prince can call and dismiss the parliament, and following a referendum held on 16 March 2003, dismiss the government and veto bills. On parliamentary recommendation, he appoints the ministers. According to the constitution, the Government is a collegial body consisting of five ministers including the prime minister. Each minister has an Alternate who takes part in the meetings of the collegial Government if the minister is unavailable. Any group of 1,000 persons or any three communes may propose legislation (initiative). Bills passed by the parliament may be submitted to popular referendum. A law is valid when it receives a majority approval by the parliament and the prince's signed concurrence. The capital is Vaduz.

## National Anthem

'Oben am jungen Rhein' ('Up above the young Rhine'); words by H. H. Jauch; tune, 'God save the Queen'.

## RECENT ELECTIONS

At the elections on 7 and 8 Feb. 2009 the opposition Patriotic Union (VU) gained 13 seats (47.6% of votes cast); the Progressive Citizens' Party (FBP), 11 (43.5% of votes); the Free List (FL), 1 (8.9% of votes). Turnout was 84.6%.

## CURRENT GOVERNMENT

*Head of Government, and Minister for Family and Equal Opportunity, Finance and General Government Affairs:* Klaus Tschütscher; b. 1967 (VU; sworn in 25 March 2009).

In March 2012 the cabinet comprised:

*Deputy Head of Government, and Minister for Construction, Economic Affairs and Transport:* Martin Meyer. *Environmental Affairs, Land-Use Planning, Agriculture and Forestry, Public*

*Health and Social Affairs:* Renate Müssner. *Education, Home Affairs and Sport:* Hugo Quaderer. *Cultural Affairs, Foreign Affairs and Justice:* Aurelia Frick.

*Princely House Website:* <http://www.fuerstenhaus.li>

Prince

#### *Introduction*

Hans-Adam II succeeded his father, Francis Joseph II, as Prince of Liechtenstein in 1989. A successful banker with a large personal fortune, in March 2003 he was granted extensive legal rights which effectively made him Europe's only absolute monarch. He handed day-to-day responsibility for running the country to his son, Crown Prince Alois, in 2004.

#### *Early Life*

Hans-Adam, whose full name is Johannes Adam Pius Ferdinand Alois Josef Maria Marko d'Aviano von und zu Liechtenstein, was born on 14 Feb. 1945. The eldest son of the ruling Prince Francis Joseph II, he was brought up with his three brothers and one sister in Vaduz castle. He was schooled in Austria and Vienna, worked for a short while at a London bank and studied at the St Gallen School of Economics and Social Sciences, graduating with a masters degree in 1969.

In 1970 he was named head of the Prince of Liechtenstein Foundation, a position he retained until 1984. In 1972 his father put him in charge of running the royal estate, during which time he won a reputation for sound management and an interest in the wider economic sphere. In Aug. 1984 Franz Joseph transferred much of his executive power to Hans-Adam, who formally acceded to the throne on his father's death in Nov. 1989.

#### *Career in Office*

Hans-Adam has striven to maintain Liechtenstein's strong economy, consolidating its position as a major tax haven. In 1990 he successfully concluded membership talks with the United Nations. A year later, despite having previously declared his support for European unity, he ruled out a bid for membership of the European Union.

In March 2003 Hans-Adam called a national referendum on constitutional amendments which would award him the right to dissolve the government, appoint judges and unilaterally veto legislation. In return he proposed that his right to rule by emergency decree would be reduced to six months, his entitlement to nominate government officials be terminated and that the future of the monarchy be subject to referendum. He threatened to leave for Vienna if the proposals were rejected, a move many Liechtensteiners feared would severely diminish the country's economic standing. Despite the presence of a strong pro-democracy group within Liechtenstein and the threat that the nation might lose its membership of the Council of Europe if the motion was passed, the reforms won 64.3% backing.

In Aug. 2004 Hans-Adam formally transferred responsibility for day to day affairs to his son, Alois. However, he reiterated he had no intention of abdicating the throne.

## ECONOMY

Liechtenstein is one of the world's richest countries with a well diversified economy. Low taxes and bank secrecy laws have made Liechtenstein a successful financial centre.

### **Overview**

Liechtenstein is a diversified and highly industrialized economy. Industry and manufacturing comprises the largest sector, producing mainly capital- and research-intensive products and generating 40% of GDP. Much of the economy's wealth

has been derived from its status as a low tax haven, with many international businesses establishing 'letter-box' offices in the state to take advantage of favourable tax conditions. The economy had been blacklisted by the OECD as an 'uncooperative tax haven' and has received international criticism for lax financial controls. In May 2009 the OECD removed Liechtenstein from its blacklist as a result of the country's stronger commitment towards tackling money laundering.

Liechtenstein has limited natural resources and imports around 90% of its energy requirements. It has shared a common economic area with Switzerland since the conclusion of a customs treaty in 1923, after which it adopted the Swiss franc as the official currency. With its small domestic base, the economy has sought to capture foreign markets through global integration. Liechtenstein became a member of the European Free Trade Association in 1991 and the European Economic Area in 1995.

### **Currency**

Swiss currency has been in use since 1920 and became legal tender in 1924.

### **Budget**

Budget (in 1,000 Swiss francs), 2008: revenue, 1,103,000; expenditure, 1,229,600. There is no public debt.

### **Performance**

Real GDP growth was -5.0% in 2009. Total GDP was 5,220m. Swiss francs in 2009.

### **Banking and Finance**

There were 16 banks in 2010. Combined total assets were 52,466.4m. Swiss francs in 2010.

## ENERGY AND NATURAL RESOURCES

### **Electricity**

In 2008 the consumption of electricity was 386,290 MWh (imported 314,897 MWh; produced in Liechtenstein 71,393 MWh).

### **Agriculture**

In 2007 there were 3,743 ha. of agricultural land. In 2009, 1,005 ha. (26.9% of all agricultural land—the highest proportion of any sovereign country) was set aside for organic farming. The rearing of cattle on the Alpine pastures is highly developed. In 2009 there were 6,078 cattle (including 2,993 milch cows), 3,963 sheep, 1,811 pigs, 495 horses and 452 goats. Total production of dairy produce in 2009 was 13,308 tonnes.

### **Forestry**

In 2010 there were 7,000 ha. of forest (43% of the land area). Timber production in 2007 was 22,000 cu. metres.

## INDUSTRY

Liechtenstein has a broadly diversified economic structure with a significant emphasis on industrial production. The most important branches of the heavily export-oriented industry are mechanical engineering, plant construction, manufacturing of precision instruments, dental technology and the food-processing industry.

### **Labour**

The workforce was 32,435 in 2007, including employees commuting from abroad (16,242 in 2007). The farming population went down from 70% in 1930 to 1.1% in 2007. The rapid change-over has led to the immigration of foreign workers (Austrians, Germans, Italians, Swiss).

## INTERNATIONAL TRADE

Liechtenstein has been in a customs union with Switzerland since 1923.

### Imports and Exports

Value of the imports and exports of goods, excluding trade with and through Switzerland: imports, 2008, 2,461m. Swiss francs; exports, 2008; 4,245m. Swiss francs. Machinery, electronic goods and fabricated metals are both the leading imports and leading exports. Most trade is with other European countries.

### COMMUNICATIONS

#### Roads

There are 400 km of roads. Postal buses are the chief means of public transportation within the country and to Austria and Switzerland. There were 24,293 cars in 2006. There were 420 road accidents in 2007 (none fatal).

#### Rail

The 10 km of main railway passing through the country is operated by Austrian Federal Railways.

#### Telecommunications

In 2007 there were 19,518 main telephone lines. There were 32,013 mobile phone subscribers in 2007 and 23,500 internet users in 2008.

### SOCIAL INSTITUTIONS

#### Justice

The principality has its own civil and penal codes. The lowest court is the county court, *Landgericht*, presided over by one judge, which decides minor civil cases and summary criminal offences. The criminal court, *Kriminalgericht*, with a bench of five judges is for major crimes. Another court of mixed jurisdiction is the court of assizes (with three judges) for misdemeanours. Juvenile cases are treated in the Juvenile Court (with a bench of three judges). The superior court, *Obergericht*, and Supreme Court, *Oberster Gerichtshof*, are courts of appeal for civil and criminal cases (both with benches of five judges). An administrative court of appeal from government actions and the State Court determines the constitutionality of laws.

The death penalty was abolished in 1989. Some persons convicted by Liechtenstein are held in Austrian prisons.

#### Police

The principality has no army. In 2009 there were 88 police officers (excluding civilian staff, auxiliary police officers, village policemen and Swiss customs officers).

#### Education

In 2009 there were 16 primary, three upper, seven secondary and two grammar schools, with approximately 5,000 pupils and 640 teachers. There is a university, a music school and an art school.

#### Health

There is an obligatory sickness insurance scheme. In 2008 there was one hospital, but Liechtenstein has an agreement with the

Swiss cantons of St Gallen and Graubünden and the Austrian Federal State of Vorarlberg that her citizens may use certain hospitals. In 2008 there were 87 physicians, 27 dentists and two pharmacies.

### RELIGION

In 2003, 80.4% of the population was Roman Catholic and 7.1% Protestant; 12.5% belonged to other religions.

### CULTURE

#### Press

In 2008 there were two daily newspapers (*Liechtensteiner Vaterland* and *Liechtensteiner Volksblatt*) with an estimated total circulation of 20,000.

#### Tourism

In 2008, 77,957 overnight tourists visited Liechtenstein.

### DIPLOMATIC REPRESENTATIVES

In 1919 Switzerland agreed to represent the interests of Liechtenstein in countries where it has diplomatic missions and where Liechtenstein is not represented in its own right. In so doing Switzerland always acts only on the basis of mandates of a general or specific nature, which it may either accept or refuse, while Liechtenstein is free to enter into direct relations with foreign states or to set up its own additional diplomatic missions.

## KEY HISTORICAL EVENTS

Lithuania has been inhabited since the 10th millennium BC, with agriculture developing in the 3rd millennium BC. Baltic tribes settled in the area around 2000 BC. In the 13th century AD their lands came under threat from two German religious orders, the Teutonic Knights and the Livonian Brothers of the Sword, prompting several of the tribes to establish a defensive union. The union defeated the Livonians in 1236 and in 1250 its leader, Mindaugas, signed a peace treaty with the Teutonic Order.

In 1253 Lithuania was proclaimed a state, with Mindaugas its crowned head. In the second half of the 13th century the Grand Duchy of Lithuania suffered internal unrest and was repeatedly raided by the Turks and Mongols of the Golden Horde. In the 14th century, led by Grand Duke Gediminas, Lithuania repulsed the threat from the Golden Horde and expanded eastwards. Gediminas established relations with the Christian church while retaining pagan beliefs.

In 1386 Lithuania's ruler Jogaila married Jadwiga, queen of Poland, and became king of Poland. During the 14th century Lithuania was Christianized. Lithuania continued its expansion and by 1430 extended from the Baltic to the Black Sea. Lithuania and Poland were allied from 1447 and from 1501 they shared the same leader. In 1569 the Lublin Union legislated for a Lithuanian-Polish commonwealth. Polish culture was increasingly influential and Polish became the official state language in 1696. The constitution promulgated on 3 May 1791 is generally regarded as Europe's first national constitution (and the world's second after the USA). However, its democratic and egalitarian tone provoked Prussia and Russia.

During partitions of the Polish-Lithuanian Commonwealth by Russia, Prussia and Austria in 1772, 1793 and 1795, Lithuania was divided between Russia and Prussia. From 1795 Russia ruled most of Lithuania, including its capital, Vilnius. Uprisings were quelled in 1831 and 1863. In the second half of the 19th century, a

cultural awakening interacted with an independence movement. On 5 Dec. 1905 at the Great Seimas (Congress) of Vilnius, Lithuanian representatives demanded political autonomy within the Russian Empire. The demand failed but in its aftermath pro-independence political parties were formed.

During the First World War Lithuania was occupied by Germany. Following the Russian revolution, heavy fighting occurred between Soviet Russian, German, Polish and Lithuanian forces in Feb. 1918. In Nov. 1918, after Germany's surrender, Lithuania declared full independence. In April 1919 the Soviets withdrew and the reformed Lithuanian government established a democratic republic. Lithuanian independence was recognized by the Treaty of Versailles later that year. Territorial disputes led to Lithuania supporting an uprising in the Memelland (under French jurisdiction from 1920) in Jan. 1923. In May 1924 Memelland became an autonomous part of Lithuania. There was also continued conflict with Poland over ownership of Vilnius. Following the establishment of a Polish-controlled mini-state around the city in 1922, Lithuania maintained a formal state of war with Poland.

In Dec. 1926 an internal coup deposed Lithuania's elected government and a non-democratic regime was installed. In 1938, under Polish pressure, diplomatic relations with Poland were restored. The secret protocol of the Soviet-German non-aggression pact of 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. Soviet troops occupied Lithuania in June 1940 and it became part of the USSR on 3 Aug. 1940. Following the German invasion of the USSR in 1941, Lithuania was occupied by Germany. Lithuanian armed groups fought against or with German troops, according to regional and ideological loyalties. Pogroms took place against the Jewish population, which had risen to 250,000 following influxes of refugees from Poland. In 1944 the USSR reclaimed Lithuania as a Soviet Republic, with the agreement of the USA and Britain. An estimated 350,000 Lithuanians were deported to Siberia. In 1949 the Soviets closed most Lithuanian churches. More deportations occurred in 1956, when Poles and Russians were encouraged to move to Vilnius.

In 1988 the Lithuanian Movement for Reconstruction (Sajudis) drew up a programme of democratic and national rights. In the same year the ruling communists relaxed anti-nationalist measures and legalized a multi-party system. On 11 March 1990 the newly-elected Lithuanian Supreme Soviet declared independence, a move rejected by the USSR. Initially despatched to Vilnius to enforce conscription, Soviet army units occupied key buildings in the face of mounting popular unrest. On 13 Jan. 1991 the army fired on demonstrators. A referendum held in Feb. 1991 produced a 90.5% vote in favour of independence. The USSR recognized Lithuania's independence on 6 Sept. 1991, with all Russian troops withdrawn by Aug. 1993. The 1992 Lithuanian constitution provided for a presidency and Algirdas Brazauskas won the first presidential elections the following year. Lithuanian became the official language in Jan. 1995, prompting protests from some Polish and Russian speakers. Lithuania joined NATO on 29 March 2004 and became a member of the EU on 1 May 2004.

## TERRITORY AND POPULATION

Lithuania is bounded in the north by Latvia, east and south by Belarus, and west by Poland, the Russian enclave of Kaliningrad and the Baltic Sea. The total area is 65,300 sq. km (25,212 sq. miles), including 2,265 sq. km (875 sq. miles) of inland waters, and the population (2011 census, provisional) 3,053,804 (1,654,849

females); density, 48.7 per sq. km. The United Nations population estimate for 2011 was 3,307,000.

The UN gives a projected population for 2015 of 3.25m.

In 2005, 66.6% of the population lived in urban areas. Of the 2001 census population, Lithuanians accounted for 83.5%, Poles 6.7%, Russians 6.3% (9.4% in 1989), Belarusians 1.2%, Ukrainians 0.7% and Jews 0.1%.

There are ten counties (with capitals of the same name): Alytus; Kaunas; Klaipėda; Marijampolė; Panevėžys; Šiauliai; Tauragė; Telšiai; Utena; Vilnius.

The capital is Vilnius (2011 provisional census population, 538,968). Other large towns are Kaunas (321,201 in 2011), Klaipėda (161,264), Šiauliai (113,143) and Panevėžys (103,531).

The official language is Lithuanian, but ethnic minorities have the right to official use of their language where they form a substantial part of the population. All residents who applied by 3 Nov. 1991 received Lithuanian citizenship, requirements for which are ten years' residence and competence in Lithuanian.

### SOCIAL STATISTICS

2009: births, 36,682; deaths, 42,032; marriages, 20,542; divorces, 9,270; infant deaths, 181. Rates (per 1,000 population): birth, 11.0; death, 12.6; marriage, 6.2; divorce, 2.8. The population started to decline in 1993, a trend which is set to continue. Annual population growth rate, 2000–05, –0.5%. In 2002, 8,386 births were registered to unmarried mothers and there were 18,907 legally induced abortions. Life expectancy at birth in 2007 was 65.9 years for males and 77.7 years for females. In 2006 the most popular age range for marrying was 25–29 for males and 20–24 for females. Infant mortality, 2005, seven per 1,000 live births; fertility rate, 2008, 1.3 births per woman (one of the lowest rates in the world). In 2002 there were 7,086 emigrants and 5,110 immigrants.

Lithuania has one of the world's highest suicide rates, at 30.4 per 100,000 inhabitants in 2007 (a rate of 53.9 among males but only 9.8 among women).

### CLIMATE

Vilnius, Jan. –2.8°C, July 20.5°C. Annual rainfall 520 mm. Klaipėda, Jan. –0.6°C, July 19.4°C. Annual rainfall 770 mm.

### CONSTITUTION AND GOVERNMENT

A referendum to approve a new constitution was held on 25 Oct. 1992. Parliament is the 141-member *Seimas*. Under a new electoral law passed in July 2000, 71 of the parliament's 141 members will defeat rivals for their seats if they receive the most votes in a single round of balloting. Previously they had to win 50% of the votes or face a run-off against the nearest competitor. The parliament's 70 other seats are distributed according to the proportional popularity of the political parties at the ballot box.

The *Constitutional Court* is empowered to rule on whether proposed laws conflict with the constitution or existing legislation. It comprises nine judges who serve nine-year terms, one third rotating every three years.

### National Anthem

'Lietuva, tėvyne mūsų' ('Lithuania, our fatherland'); words and tune by V. Kurdirka.

### RECENT ELECTIONS

Presidential elections were held on 17 May 2009. Dalia Grybauskaitė, Lithuania's European Union commissioner, won 69.1% of the vote, ahead of Algirdas Butkevičius with 11.8%, Valentinas Mazuronis 6.2%, Valdemar Tomaševski 4.7%, former prime minister Kazimiera Prunskienė 3.9%, Loretta Graužinienė 3.6% and Česlovas Ježerskas 0.6%. Turnout was 51.7%.

Parliamentary elections were held in two rounds on 12 and 26 Oct. 2008. The opposition Homeland Union-Lithuanian Christian Democrats won 44 of the 141 seats (with 19.7% of the votes cast), of which 26 were in single-member constituencies and 18 through proportional representation; Social Democratic Party of Lithuania 26 (with 11.7%), of which 16 were in single-member constituencies and 10 through proportional representation; National Resurrection Party 16 (15.1%); former president Rolandas Paksas' coalition 'Order and Justice' 15 (12.7%); Liberals' Movement of the Republic of Lithuania 11 (5.7%); Labour Party and Youth 10 (9.0%); Liberal and Centre Union 8 (5.3%); Lithuanian Poles' Electoral Action 3 (4.8%); Union of Lithuanian Peasants and Peoples 3 (3.7%); New Union 1 (3.6%). Four seats went to independents. Turnout for the first round was 48.6% and for the second round 32.3%.

Parliamentary elections are scheduled to take place on 14 Oct. 2012.

### *European Parliament*

Lithuania has 12 (13 in 2004) representatives. At the June 2009 elections turnout was 21.0% (48.4% in 2004). The Homeland Union-Lithuanian Christian Democrats won 4 seats with 26.9% of votes cast (political affiliation in European Parliament: European People's Party); Social Democratic Party of Lithuania, 3 with 18.6% (Progressive Alliance of Socialists and Democrats); 'Order and Justice' coalition, 2 with 12.2% (Europe of Freedom and Democracy); Labour Party, 1 with 8.8% (Alliance of Liberals and Democrats for Europe); Lithuanian Poles' Electoral Action, 1 with 8.4% (European Conservatives and Reformists); Liberals' Movement of the Republic of Lithuania, 1 with 7.4% (Alliance of Liberals and Democrats for Europe).

### CURRENT GOVERNMENT

*President:* Dalia Grybauskaitė; b. 1956 (took office on 12 July 2009).

*Prime Minister:* Andrius Kubilius; b. 1956 (TS-LKD; in office since 9 Dec. 2008, having previously been prime minister from Nov. 1999 to Oct. 2000).

In April 2012 the coalition government comprised:

*Minister of Foreign Affairs:* Audronius Ažubalis. *National Defence:* Rasa Juknevičienė. *Finance:* Ingrida Šimonytė. *Economy:* Rimantas Žylius. *Energy:* Arvydas Sekmokas. *Social Security and Labour:* Donatas Jankauskas. *Health:* Raimondas Šukys. *Interior:* Artūras Melianas. *Justice:* Remigijus Šimašius. *Agriculture:* Kazys Starkevičius. *Environment:* Gediminas Kazlauskas. *Transport and Communications:* Eligijus Masiulis. *Culture:* Arūnas Gelūnas. *Education and Science:* Gintaras Steponavičius.

*Seimas Speaker:* Irena Degutienė.

*Government of the Republic of Lithuania:* <http://www.lrvk.lt>

## CURRENT LEADERS

### Dalia Grybauskaitė

#### *Position*

President

#### *Introduction*

Dalia Grybauskaitė was sworn in as the first female president of Lithuania on 12 July 2009 after a landslide election victory. Grybauskaitė left her job as EU commissioner for financial programming and budget to stand as an independent candidate, backed by the incumbent centre-right government. Renowned as a tough negotiator and skilled economist, she took office during the worst economic crisis since the dissolution of the Soviet Union.

#### *Early Life*

Grybauskaitė was born on 1 March 1956 in Vilnius, the then capital of the Lithuanian Soviet Socialist Republic, and went on to study political and economic science at Zhdanov University (now St Petersburg State University).

After graduating, Grybauskaitė returned to Lithuania and embarked on a career as a lecturer at the department of political economy at Vilnius Higher Party School, in which role she worked for seven years. She received her doctorate in economic sciences from the Moscow Academy of Social Sciences in 1988.

Following the dissolution of the USSR and Lithuanian independence, Grybauskaitė completed a special course for leaders at Georgetown University in Washington in 1991. She subsequently entered government, going on to head departments in the ministries of international economic relations and foreign affairs between 1991 and 1994. She was Lithuania's representative when it entered into the European Union Free Trade Agreement in 1993.

She continued her involvement with the EU in 1994, when she was appointed envoy extraordinary and minister plenipotentiary at the Lithuanian mission to the EU. She continued her diplomatic work when she moved to the Lithuanian embassy in the USA.

In 1999 Grybauskaitė was appointed vice-minister of finance and foreign affairs in the cabinet of Prime Minister Andrius Kubilius. In this role she was responsible for conducting negotiations with international institutions including the World Bank and the IMF. In 2001 she was made minister of finance in the government of Algirdas Brazauskas.

Lithuania acceded to the EU on 1 May 2004, with Grybauskaitė appointed EU commissioner responsible for managing the EU budget and embarking on an ambitious programme of reform. In 2005 she criticized the UK's presidency of the EU, stating that the 'main obstacle' to reaching agreement on budgetary reform was Britain's insistence that it retain its rebate.

On 26 Feb. 2009 Grybauskaitė ended months of speculation by announcing her intention to stand in the forthcoming presidential elections. A popular figure across party lines, her entry into the race rendered the election a foregone conclusion, with opposition

candidates either withdrawing or remaining in the race only to develop support ahead of elections to the European parliament. In the event, Grybauskaitė gained 69.1% of the vote, against 11.8% for her nearest challenger, Algirdas Butkevičius.

#### *Career in Office*

Grybauskaitė's victory was broadly popular, with several media commentators comparing the optimism that her election inspired with that seen in the United States on the inauguration of President Obama. In her inaugural address she promised to invest in local government and to narrow the gap between rich and poor in Lithuanian society, although she supported austerity measures to reduce the long-term impact of the prevailing economic crisis.

Despite her close association with the EU, Grybauskaitė promised that greater integration into Europe would not come at the price of deteriorating bilateral relations with Russia. She promised a more considered, less confrontational approach to issues of international relations. She sparked a parliamentary inquiry in Nov. 2009 after conceding that she harboured 'indirect suspicions' that the CIA had used a Lithuanian riding school as a secret jail for the detention of suspected Al-Qaeda militants captured in Afghanistan.

She has described the reinforcement of Lithuania's energy security as among her top priorities and met with Herman Van Rompuy in Dec. 2009, before he began his spell as president of the European Council, to secure the provision of extra funds from the EU to develop energy links with the West, thus reducing dependence on Russia.

### Andrius Kubilius

#### *Position*

Prime Minister

#### *Introduction*

Andrius Kubilius became prime minister for the second time after his nomination by President Valdas Adamkus was approved by parliament on 27 Nov. 2008. He had previously served as premier from 1999–2000. His centre-right coalition government has had to confront an economic crisis.

#### *Early Life*

Andrius Kubilius was born on 8 Dec. 1956 in Vilnius. In 1979 he graduated in physics from Vilnius University, where he remained for a further 11 years to pursue an academic career. In 1988 he became involved in the pro-independence movement and joined Sąjūdis ('Unity'/Reform Movement of Lithuania). He was appointed executive secretary of its council in 1990, serving for two years until he was elected to the Seimas (parliament).

In 1993 Kubilius joined the newly-established conservative Homeland Union party and was re-elected to the Seimas in 1996, becoming its vice chairman. In Oct. 1999 he was named prime minister by President Valdas Adamkus following the resignation of Rolandas Paksas. Kubilius' appointment was approved by the Seimas by a vote of 82 to 20. His term lasted from Nov. 1999–Oct. 2000. Policy priorities included reform of the Soviet-era bureaucracy and economic liberalization.

In the Oct. 2000 general election Kubilius won re-election to the Seimas despite the Homeland Union suffering a heavy defeat. He served as the party's first deputy chairman from 2000 until 2003, when he became party leader. In Oct. 2006 he was appointed deputy speaker of the Seimas and chair of the parliamentary committee on European affairs.

After gaining a lead in the first round of voting at the Oct. 2008 general election, the Homeland Union-Lithuanian Christian Democrats (TS-LKD), which had formed in May 2008 following a merger between the two parties, won 44 of a possible 141 seats, providing a mandate to form a coalition government. The Homeland Union joined with three smaller centre-right parties, jointly controlling 79 seats.

### Career in Office

Kubilius' principal challenge has been to tackle the country's worsening economic crisis. Hours after being sworn into office he won parliamentary approval for tax reforms, cuts to public spending and measures to support businesses. However, there was widespread public discontent at tax increases following election promises that they would be cut. He proposed adoption of the EU's single currency (euro) by 2011, but that target was missed in light of the economic downturn. Over the medium term, a return to growth depends on banks' ability to restart lending and on a recovery of external demand.

Kubilius' government oversaw the decommissioning of the Ignalina power plant at the end of 2009 as part of Lithuania's EU accession agreement. However, the closure of the plant has raised the spectre of dependency on Russian gas, a situation Kubilius is keen to avoid. An electricity bridge between Sweden and Lithuania that could solve the country's energy problem has yet to be built.

### DEFENCE

Conscription ended on 1 July 2009. In 2008 military expenditure totalled US\$547m. (US\$153 per capita), representing 1.2% of GDP.

### Army

The Land Forces numbered 7,800 in 2007 and included one motorized infantry brigade ('Iron Wolf'). Reserves numbered 6,700 in 2007 and there were also 4,700 active reservists in the National Defence Voluntary Forces. There was a paramilitary riflemen union numbering 9,600 and a state border guard service of 5,000 operates under the ministry of internal affairs.

A joint Polish/Lithuanian battalion (LITPOLBAT), which was a component of the EU's rapid reaction forces, was disbanded in 2007. However, plans are under way to replace it with a Lithuanian/Polish/Ukrainian Brigade (LITPOLUKRBRIG), which is expected to become operational in 2013.

### Navy

In 2007 the Navy numbered 450 personnel (150 conscripts). It operates several vessels including one frigate. Lithuania, Estonia and Latvia have established a joint naval unit 'BALTRON' (Baltic Naval Squadron), with bases at Klaipėda in Lithuania, Tallinn in Estonia, and Liepāja, Riga and Ventspils in Latvia.

In addition there is a 540-strong Coast Guard.

### Air Force

The Air Force consisted of 900 personnel (100 conscripts) in 2007. There are no combat capable aircraft.

The joint Baltic Regional Air Surveillance Network (BALTNET), established in co-operation between the air forces of Estonia, Latvia and Lithuania, has its co-ordination centre in Karmėlava in Lithuania.

### INTERNATIONAL RELATIONS

Lithuania held a referendum on EU membership on 10–11 May 2003, in which 91.0% of votes cast were in favour of accession, with 9.0% against. It became a member of NATO on 29 March 2004 and the EU on 1 May 2004.

### ECONOMY

Agriculture accounted for 5.1% of GDP in 2006, industry 33.7% and services 61.2%.

### Overview

Lithuania's recession in the early years of its transition from a command economy to a market economy was more pronounced than that of its Baltic neighbours, partly because the country's export sector had closer ties to the Russian market. From 1995 to 1998 the economy grew at a strong and stable rate but the country fell back into recession in 1999 following the 1998 Russian

financial crisis. In 2000 Lithuania rebounded and enjoyed one of the highest annual growth rates of any transition economy.

The country has privatized most enterprises, maintaining a stable macroeconomic policy and encouraging economic relations with foreign countries. Whilst not as successful as fellow Baltic State Estonia, Lithuania has been able to attract foreign investment from EU members, particularly the Nordic countries. Russia's share of Lithuanian exports fell from roughly 30% in 1997 to under 8% in 2000. Lithuania is a member of the World Trade Organization and joined the EU in May 2004. According to the World Bank, Lithuania ranks 23rd out of 183 economies for the ease of doing business.

Core exports are mineral products (27.5% of total exports in 2005), machinery and equipment (12.4%), textiles (9.2%) and transportation equipment (8.3%). Unemployment fell from 17.4% in 2001 to 4.3% in 2007. Thriving exports and domestic consumer demand ensured average growth of 8% per year in the four years before the 2008 financial crisis. Between 1998 and 2008 real per capita incomes rose from about two-fifths to two-thirds of the EU average, principally driven by strong exports.

The downturn following the global financial crisis has been the worst since independence and among the most severe in the region. A large contraction in domestic demand was compounded by Lithuania's main export partners also being in recession. The economy shrank by 14.7% in 2009, but there was a slight recovery in 2010 as Lithuania emerged from the recession.

During the boom years a large structural deficit was accumulated, putting current government finances under considerable strain. Debt threatened to amount to over 90% of GDP by the end of 2014. With its currency fixed against the euro and lending from the international bond markets unforthcoming, the government implemented a package of austerity measures in Dec. 2009. Public spending was cut by 30%, public sector wages fell by between 20–30%, pensions were cut by up to 11%, VAT rose from 18% to 21%, corporate tax went from 15% to 20% and there were significant tax rises on alcohol and pharmaceuticals. The measures resulted in savings equivalent to 9% of GDP without calling on the assistance of the IMF.

### Currency

The unit of currency is the *litas* (plural *litai*) (LTL) of 100 *cents*, which was introduced on 25 June 1993 and became the sole legal tender on 1 Aug. The litas was pegged to the US dollar on 1 April 1994 at US\$1 = four litai, but since 2 Feb. 2002 it has been pegged to the euro at 3.4528 litai = one euro. Inflation, which reached a high of 1,161% in the early 1990s, was 11.1% in 2008 and 4.2% in 2009.

Total money supply was 13,884m. litai in July 2005, foreign exchange reserves were US\$3,411m. and gold reserves 186,000 troy oz.

### Budget

Budgetary central government revenue and expenditure (in 1m. litai):

	2007	2008	2009 <sup>1</sup>
Revenue	19,543	21,497	17,485
Expenditure	17,825	21,808	21,698

<sup>1</sup>Provisional.

Principal sources of revenue in 2008: taxes on goods and services, 12,322m. litai; taxes on income, profits and capital gains, 4,780m. litai; grants, 2,680m. litai. Main items of expenditure by economic type in 2008: compensation of employees, 5,902m. litai; grants, 4,936m. litai; use of goods and services, 4,164m. litai.

Lithuania's budget deficit in 2010 was 7.0% of GDP (2009, 9.5%; 2008, 3.3%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 21%.

### Performance

Between 2000 and 2006 growth averaged 7.2%. In 2007 and 2008 the economy continued to grow, by 9.8% and 2.9% respectively, although Lithuania was then one of the countries most affected by the economic crisis in 2009, with real GDP growth of -14.7%. There was a slight recovery in 2010 when the economy grew by 1.3%. Total GDP in 2010 was US\$36.3bn.

### Banking and Finance

The central bank and bank of issue is the Bank of Lithuania (*Governor*, Vitas Vasiliauskas). A programme to restructure and privatize the state banks was started in 1996. In 2007 there were 11 commercial banks and foreign bank branches, the central credit union of Lithuania and 66 credit unions in operation. The largest private bank in Lithuania is SEB Vilniaus bankas, which controls approximately 36% of the total banking assets in the country. In 2006 it was estimated that total assets of domestic commercial banks amounted to 59bn. litai.

A stock exchange opened in Vilnius in 1993. In Nov. 2007 its capitalization was €6.8bn. The trading turnover in 2006 was €1.6bn.

### ENERGY AND NATURAL RESOURCES

In 2008, 15.3% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 23% has been set by the EU for 2020.

### Environment

According to Lithuania's Ministry of Environment, carbon dioxide emissions were the equivalent of 5.1 tonnes per capita in 2008. Lithuania's greenhouse gas emissions fell by 51.1% between 1990 and 2008, mainly owing to the decline of polluting industries from the Soviet era.

### Electricity

Installed capacity was 4.60m. kW in 2007; production was 14.01bn. kWh in 2007. A nuclear power station (with two reactors) in Ignalina was responsible for 70.2% of total output in 2007, and there are also two large hydro-electric, five public and five autoproducer thermal plants. At the time no other country had such a high percentage of its electricity generated through nuclear power. However, as a condition of entry into the European Union the government agreed to close down Ignalina. The process to close the first reactor began on 31 Dec. 2004. The whole facility was shut down on 31 Dec. 2009, but there are now plans to build a successor near the old site with construction set to begin in 2014. Prior to the closure of Ignalina, Lithuania was one of the countries most reliant on nuclear energy. Electricity consumption per capita in 2007 was 3,743 kWh.

### Oil and Gas

Oil production started from a small field at Kretinga in 1990. Reserves were 12m. bbls in 2007. Oil production in 2007 was 154,000 tonnes. Lithuania relies on Russia for almost all of its oil and gas.

### Minerals

Output of minerals in 2006 (1,000 cu. metres): dolomite, 1,600; limestone, 900; peat, 400. Quarrying of gravel, clay and sand totalled 8.7m. cu. metres in 2006.

### Agriculture

In 2002 agriculture employed about 17.2% of the workforce. As of 1 Jan. 2003 the average farm size was 15.2 ha., one of the lowest in eastern Europe; the agricultural land area was 3,956,200 ha. In 2002 there were 2.93m. ha. of arable land and 59,000 ha. of permanent crops. In 2002, 242,000 persons were employed in agriculture and forestry.

Output of main agricultural products (in 1,000 tonnes) in 2002: potatoes, 1,531; wheat, 1,218; sugar beets, 1,052; barley, 871; rye,

170; rapeseed, 105; cabbage, 98; oats, 97. Value of agricultural production, 2002 (in 1m. litai), was 4,303.3, of which from individual farm holdings, 3,396.2; and from agricultural partnerships and enterprises, 907.1.

Livestock, Jan. 2003 (in 1,000): cattle, 779.1 (of which milch cows, 443.3); pigs, 1,061.0; sheep and goats, 35.6; horses, 60.7; poultry, 6,848.1. There were 103,000 tractors in use in 2002. Animal products, 2002 (in 1,000 tonnes): meat, 173.6; milk, 770.9; eggs, 779m. units.

### Forestry

In 2010 forests covered 2.2m. ha., or 34% of the land area, and consist of conifers, mostly pine. Timber production in 2007, 5.86m. cu. metres.

### Fisheries

In Sept. 2011 the fishing fleet comprised 149 vessels. Total catch in 2005 amounted to 139,785 tonnes (mainly from sea fishing), compared to 57,477 tonnes in 1995. Imports of fishery commodities were valued at US\$283m. in 2008 and exports at US\$288m.

### INDUSTRY

Industrial output in 2006 included (in 1,000 tonnes): petrol, 2,303; cement, 1,100; sulphuric acid, 730; sugar, 97; woollen fabrics, 22.5m. sq. metres; cotton fabrics, 20.4m. cu. metres; linen, 12.8m. sq. metres; television picture tubes, 1,240,000 units; TV sets, 711,300 units; bicycles, 330,000 units.

### Labour

In 2002 the workforce was 1.6m. (69.9% in private enterprises and 30.1% in the public sector). Employed population by activity (as a percentage): manufacturing, 18.6; wholesale and retail trade, 15.0; education, 9.9; health and social work, 6.7; construction, 6.6; transport and communications, 6.2; real estate, 3.9. Employment skills, 33.2% with tertiary education, 52.5% with upper secondary education, 11.8% with lower secondary. There were a total of 31,601 working days lost to strike action in 2008 (9,559 in 2007). In 2002 the average monthly wage was 1,013.9 litai; legal minimum wage was 450 litai in 2003.

In 2002 the old age pension for men started at 62 years and for women at 58. The average number of persons entitled to pensions in 2001 was 636,900. The unemployment rate in the period Oct.-Dec. 2010 was 17.4%, one of the highest rates in the EU.

### INTERNATIONAL TRADE

Foreign investors may purchase up to 100% of the equity companies in Lithuania. By mid-2003, €4.06bn. of foreign capital had been invested. Leading source nations of foreign investment were Denmark, Sweden, Estonia, Germany and the USA.

Total foreign debt was US\$11,201m. in 2005.

Individual laws on three free economic zones (namely the laws on Šiauliai, Klaipėda and Kaunas) have been cleared by Lithuania's Parliament, the Seimas.

### Imports and Exports

Imports and exports for calendar years in US\$1m.:

	2002	2003	2004	2005	2006
Imports f.o.b.	7,343.3	9,362.0	11,688.9	14,690.4	18,291.0
Exports f.o.b.	6,028.4	7,657.8	9,306.3	11,774.4	14,122.3

Leading import suppliers, 2006: Russia, 24.2%; Germany, 14.9%; Poland, 9.5%; Latvia, 4.8%. Principal export markets, 2006: Russia, 12.8%; Latvia, 11.1%; Germany, 8.6%; Estonia, 6.5%.

Main imports are machinery and apparatus, crude petroleum, road vehicles, and chemicals and chemical products. Main exports are mineral products, electrical equipment, textiles and textile articles, transport equipment, TV sets, chemical products and prepared foodstuffs.

## COMMUNICATIONS

### Roads

In 2007 there were 80,715 km of roads (including 309 km of motorways), of which 28.6% were paved. There were 1,587,900 passenger cars in use in 2007 (470 per 1,000 inhabitants), plus 14,000 buses and coaches, 14,500 lorries and vans, and 35,300 motorcycles and mopeds. There were 6,448 traffic accidents in 2007, with 740 fatalities.

### Rail

In 2005 there were 1,817 km of railway track in operation in Lithuania. The majority of rail traffic was diesel propelled, although 122 km of track was electrified. In 2008, 5.1m. passengers and 55.0m. tonnes of freight were carried.

### Civil Aviation

The main international airport is based in the capital, Vilnius. Other international airports are at Kaunas, Palanga and Šiauliai. FlyLAL–Lithuanian Airlines, formerly Lithuania's largest airline, ceased operations in Jan. 2009. In 2008 a number of international airlines ran regular scheduled flights to Lithuania. Vilnius was the busiest airport for passenger traffic in 2003, handling 719,850 passengers, but Kaunas (which handles approximately 6,700 tonnes per annum) was the busiest for freight.

### Shipping

The ice-free port of Klaipėda plays a dominant role in the national economy and Baltic maritime traffic. It handled 29,880,000 tonnes of cargo in 2008 (22,218,000 tonnes loaded and 7,662,000 tonnes discharged); container traffic totalled 373,000 TEUs (twenty-foot equivalent units) in 2008. A 412 ha. site at the port is dedicated a Free Economic Zone, which offers attractive conditions to foreign investors.

In Jan. 2009 there were 52 ships of 300 GT or over registered, totalling 348,000 GT. In Jan. 2009 the Lithuanian-controlled fleet comprised 64 vessels of 1,000 GT or over, of which 37 were under the Lithuanian flag and 27 under foreign flags.

### Telecommunications

A majority stake in Lithuanian Telecom (the only fixed telephone service provider) was sold to the Finnish and Swedish consortium SONERA in 1998 and by Jan. 2003 the telecommunications market was fully liberalized. There were 5,154,600 telephone subscribers in 2005 (1,504.8 per 1,000 population), including 4,353,400 mobile phone subscribers (1,271.0 per 1,000 population). There were 621.2 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 636,000 in 2009 (190.3 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The general jurisdiction court system consists of the Supreme Court, the Court of Appeal, five county courts and 54 district courts. Specialized administrative courts were established in 1999. In 2006 there were 732 judges: 469 in district courts, 144 in county courts, 27 in the Court of Appeal, 34 in the Supreme Court, 43 in the administrative county courts and 15 in the High Administrative Court.

75,474 crimes were reported in 2006, of which 43% were solved. In 2006 there were 294 murders. 14,717 persons were convicted of offences in 2006. There were 8,079 prisoners in 2006, 7,082 of whom had been convicted. The death penalty was abolished for all crimes in 1998.

### Education

Education is compulsory from seven to 16. In 2002–03 there were 686 pre-school establishments with 90,860 pupils and 2,172 general schools with 49,286 teachers and 594,313 pupils, in the following categories:

Type of School	No. of Schools	No. of Pupils
Nursery	148	12,219
Primary	683	35,819
Junior	25	2,326
Basic	645	118,415
Special	67	7,212
Secondary	574	400,566
Adult	27	17,318

119,548 students (70,777 females) attended 19 institutions of higher education and 22,367 (13,735 females) attended vocational colleges in 2002–03. The adult literacy rate in 2009 was estimated at 99.7% (99.7% for both males and females).

In 2006 public expenditure on education represented 5.0% of GNI and 14.4% of total government expenditure.

### Health

In 2006 there were 13,510 physicians, 2,249 dentists, 26,140 nurses and midwives and 2,184 pharmacists. There were 196 hospitals with 31,031 beds in 2002.

### Welfare

The social security system is financed by the State Social Insurance Fund. In 2002, 625,000 persons were eligible for retirement pensions, 188,000 for disability provisions and 219,000 for widow's/widower's pensions. In 2002 the average state social insurance old age pension was 323 litai (monthly).

## RELIGION

Under the Constitution, the state recognizes traditional Lutheran churches and religious organizations, as well as other churches and religious organizations if their teaching and rituals do not contradict the law. In 2001, 79% of the population was Roman Catholic. As of 2006 there were 677 Roman Catholic churches with 710 priests, and 50 Orthodox parishes with 47 priests. In 2007 the Lutheran Church had 54 parishes and 20 pastors headed by a bishop. In Feb. 2012 there was one cardinal.

## CULTURE

### World Heritage Sites

Lithuania has four sites (two shared) on the UNESCO World Heritage List: Vilnius Historic Centre (inscribed on the list in 1994) and Kernavė Archaeological Site (2004).

Lithuania shares the Curonian Spit (2000) with the Russian Federation as a UNESCO site. A sand-dune spit between Zelenogradsk, Kaliningrad Region, and Klaipėda, Lithuania, the Spit was subject to massive protective engineering in the 19th century. Lithuania also shares the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

### Press

In 2008 there were 327 newspapers (24 paid-for dailies, one free daily and 302 paid-for non-dailies). The papers with the highest circulation are the free *15 minučių* and the paid-for *Vakaro žinios* and *Lietuvos rytas*. In the 2010 *World Press Freedom Index*, compiled by Reporters Without Borders, Lithuania was ranked 11th equal out of 178 countries.

### Tourism

There were 4,458,700 foreign visitors in 2008; tourism receipts in 2005 amounted to US\$975m.

### Festivals

The Lithuanian Song and Dance Celebration is held every four years, focusing international attention on the country's culture. There is also a Kaunas Jazz Festival and the Pažaislis Classical Music Festival (also in Kaunas). The main rock festivals are the summer festivals, Be2gether at Norviliškės near the Belarusian border and Rock Nights at Zarasai. Major film festivals include

Cinema Spring in Vilnius and the Kaunas International Film Festival. The annual Klaipėda Sea Festival attracts nearly half a million visitors each year.

#### DIPLOMATIC REPRESENTATIVES

Of Lithuania in the United Kingdom (Lithuania House, 2 Bessborough Gdns, London SW1V 2JE)  
*Ambassador:* Oskaras Jusys.

Of the United Kingdom in Lithuania (Antakalnio str. 2, 10308 Vilnius)  
*Ambassador:* David Hunt.

Of Lithuania in the USA (2622 16th St., NW, Washington, D.C., 20009)

## KEY HISTORICAL EVENTS

Celtic tribes, with origins in the Danube basin, settled in the Ardennes hills and surrounding plains from at least 1000 BC. The Romans advanced north into the region (then part of Gaul) from around 50 BC and controlled much of it over the next five centuries from garrisons such as that at Trier. Frankish clans from the middle Rhine valley spread across present-day Luxembourg from around the 5th century AD and intermarried with the Gallo-Romans. Anglo-Saxon missionaries were active in the region during the 7th century, and a Benedictine monastery was founded at Echternach in 698. From the early 9th century the region was controlled by Charlemagne, the Roman Emperor in the West, who ruled from Hungary to the Atlantic Ocean. The empire's division, following the signing of the Treaty of Verdun in 843, enabled the rise of several feudal states, one of which became Luxembourg; the castle of Lutzilinburhurch was founded by Count Sigefroi in 963 on an outcrop overlooking the river Alzette.

Subsequent Counts of Luxembourg were influential in the wider European arena. From 1353, under Wenzel I, Luxembourg expanded to its greatest extent, covering four times the area of the present state. The House of Luxembourg subsequently went into

decline and from 1443 was ruled by the Burgundians from their capital, Brussels. In 1477 Luxembourg became one of the 17 provinces of the Netherlands to come under Habsburg rule, initially under Maximilian of Austria and later under Charles of Ghent, who became the King of Spain in 1516 and Holy Roman Emperor in 1520. Luxembourg was ruled as part of the Spanish Netherlands for much of the next 200 years, although there were brief periods of French dominance under Louis XIV in the 1680s and 1690s. The transfer of the Spanish Netherlands to Austrian rule in 1715 heralded a period of relative tranquility for Luxembourg, which lasted until the territory was occupied by French revolutionary forces in the 1790s.

The 1815 Congress of Vienna made Luxembourg a grand duchy, which subsequently came under the jurisdiction of the house of Orange-Nassau, the ruling house of the Netherlands. At the same time it became part of the German Confederation. In 1839 the Walloon-speaking area was joined to Belgium, which had achieved independence in 1831, giving the Lëtzebuergesch-speaking provinces autonomy. At the London Conference of 1867 the European powers declared Luxembourg a neutral territory and in 1890 the union with the Netherlands was ended. Full independence was confirmed in the same year when Adolf of Nassau-Weilburg became grand duke, founding the present line of rulers.

Luxembourg was invaded and occupied by Germany in both the First and Second World Wars. In June 1942 the Grand Duchy staged a general strike against occupation. In 1948 a Benelux customs union formed by Belgium, the Netherlands and Luxembourg allowed for standardization of prices, taxes and wages and the free movement of labour among the three countries. Luxembourg joined NATO in 1949 and was one of six founding countries of the European Economic Community in 1957. On 24 Dec. 1999 Prime Minister Jean-Claude Juncker announced Grand Duke Jean's decision to abdicate the throne on 7 Oct. 2000. He was succeeded by Prince Henri who assumed the title of Grand Duke.

## TERRITORY AND POPULATION

Luxembourg has an area of 2,586 sq. km (999 sq. miles) and is bounded on the west by Belgium, south by France, east by Germany. A census took place on 15 Feb. 2001; the population was 439,539 (including 162,285 foreigners). At 1 Jan. 2010 the population was an estimated 502,066; density, 194 per sq. km. The percentage of foreigners living in Luxembourg has increased dramatically in recent years, from 26% in 1986 to 43% in 2008 (the highest percentage in the EU). The main countries of origin of foreigners living in Luxembourg are Portugal (76,600 in Jan. 2008), France (26,600) and Italy (19,100).

In 2005, 82.8% of the population were urban. The capital, Luxembourg, has (Jan. 2010 estimate) 90,848 inhabitants; Esch-sur-Alzette, the centre of the mining district, 30,147; Differdange, 21,530; Dudelange, 18,507; Pétange, 15,582; Sanem, 14,421; and Hesperange, 13,163.

The UN gives a projected population for 2015 of 543,000.

Lëtzebuergesch is spoken by most of the population, and since 1984 has been an official language with French and German.

## SOCIAL STATISTICS

Statistics (figures in parentheses indicate births and deaths of resident foreigners):

	<i>Births</i>	<i>Deaths</i>	<i>Marriages</i>	<i>Divorces</i>
2007	5,477 (2,959)	3,886 (721)	1,969	1,106
2008	5,596 (3,126)	3,595 (612)	1,917	977
2009	5,638 (2,952)	3,655 (659)	1,739	1,052
2010	5,874 (2,845)	3,760 (711)	1,749	1,083

2010 rates per 1,000 population; birth, 11.6; death, 7.4; marriage, 3.5; divorce, 2.1. Nearly half of annual births are to foreigners. In 2008 the most popular age range for marrying was 30–34 for males and 25–29 for females. Life expectancy at birth in 2007 was 76.5 years for males and 82.0 years for females. Annual population growth rate, 2000–05, 0.9%. Infant mortality, 2005, four per 1,000 live births; fertility rate, 2008, 1.7 births per woman. In 2009 Luxembourg received 477 asylum applications.

## CLIMATE

In general the country resembles Belgium in its climate, with rain evenly distributed throughout the year. Average temperatures are Jan. 0.8°C, July 17.5°C. Annual rainfall 30.8" (782.2 mm).

## CONSTITUTION AND GOVERNMENT

The Grand Duchy of Luxembourg is a constitutional monarchy.

The reigning Grand Duke is **Henri**, b. 16 April 1955, son of the former Grand Duke Jean and Princess Joséphine-Charlotte of Belgium; succeeded 7 Oct. 2000 on the abdication of his father; married Maria Teresa Mestre 14 Feb. 1981. *Offspring*: Prince Guillaume, b. 11 Nov. 1981; Prince Félix, b. 3 June 1984; Prince Louis, b. 3 Aug. 1986 (married Tessy Antony, b. 28 Oct. 1985, on 29 Sept. 2006; *offspring*, Gabriel, b. 12 March 2006; Noah, b. 21 Sept. 2007); Princess Alexandra, b. 16 Feb. 1991; Prince Sébastien, b. 16 April 1992.

The constitution of 17 Oct. 1868 was revised in 1919, 1948, 1956, 1972, 1979, 1983, 1988 and more than 20 occasions since then.

The separation of powers between the legislature and the executive is not very strong, resulting in much interaction between the two bodies. Only the judiciary is completely independent.

The 12 cantons are divided into four electoral districts: the South, the East, the Centre and the North. Voters choose between party lists of candidates in multi-member constituencies. The parliament is the *Chamber of Deputies*, which consists of a maximum of 60 members elected for five years. Voting is compulsory and there is universal suffrage. Seats are allocated according to the rules of proportional representation and the principle of the smallest electoral quote. There is a *Council of State* of 21 members appointed by the Sovereign. Membership is for a maximum period of 15 years, with retirement compulsory at the age of 72. It advises on proposed laws and any other question referred to it.

The head of state takes part in the legislative power, exercises executive power and has a part in the judicial power. The constitution leaves to the sovereign the right to organize the government, which consists of a Minister of State, who is Prime Minister, and of at least three Ministers. Direct consultation by referendum is provided for in the Constitution.

## National Anthem

'Ons Hemecht' ('Our Homeland'); words by M. Lentz, tune by J. A. Zinnen.

## GOVERNMENT CHRONOLOGY

Prime Ministers since 1937. (CSV = Christian Social Party; DP = Democratic Party)

1937–53	CSV	Pierre Dupong
1953–58	CSV	Joseph Bech
1958–59	CSV	Pierre Frieden
1959–74	CSV	Pierre Werner
1974–79	DP	Gaston Thorn
1979–84	CSV	Pierre Werner
1984–95	CSV	Jacques Santer
1995–	CSV	Jean-Claude Juncker

## RECENT ELECTIONS

Elections took place on 7 June 2009. The Christian Social Party (CSV) won 26 seats (with 38.0% of the vote), the Socialist Workers' Party (LSAP) 13 (21.6%), the Democratic Party (DP) 9

(15.0%), the Greens (Déi Gréng) 7 (11.7%), the Alternative Democratic Reform Party (ADR) 4 (8.1%) and the Left 1 (3.3%). Turnout was 85.2%.

## European Parliament

Luxembourg has six representatives. At the June 2009 elections turnout was 90.8% (91.4% in 2004). CSV won 3 seats with 31.3% of votes cast (political affiliation in European Parliament: European People's Party); LSAP, 1 with 19.4% (Progressive Alliance of Socialists and Democrats); DP, 1 with 18.7% (Alliance of Liberals and Democrats for Europe); the Greens, 1 with 16.8% (Greens/European Free Alliance).

## CURRENT GOVERNMENT

In March 2012 the Christian Social Party–Socialist Workers' Party coalition comprised:

*Prime Minister, Minister of State, and of the Treasury*: Jean-Claude Juncker; b. 1954 (CSV; sworn in 20 Jan. 1995). He is currently Europe's longest-serving prime minister.

*Deputy Prime Minister, Minister of Foreign Affairs*: Jean Asselborn (LSAP). *The Family and Integration, and Co-operation and Humanitarian Affairs*: Marie-Josée Jacobs (CSV). *National Education and Professional Training*: Mady Delvaux-Stehres (LSAP). *Finance*: Luc Frieden (CSV). *Justice, Civil Service and Administrative Reform, Higher Education and Research, Communications and Media, and Religious Affairs*: François Biltgen (CSV). *Economy and External Commerce*: Etienne Schneider (LSAP). *Health and Social Security*: Mars Di Bartolomeo (LSAP). *Interior and Defence*: Jean-Marie Halsdorf (CSV). *Sustainable Development and Infrastructure*: Claude Wiseler (CSV). *Labour, Employment and Immigration*: Nicholas Schmit (LSAP). *Culture, Parliamentary Relations, and Administrative Simplification*: Octavie Modert (CSV). *Housing*: Marco Schank (CSV). *Middle Classes and Tourism, and Equal Opportunities*: Françoise Hettog-Gaasch (CSV). *Agriculture, Viticulture and Rural Development, and Sport*: Romain Schneider (LSAP).

The *Speaker* is Laurent Mosar.

*Government Website (French only)*: <http://www.gouvernement.lu>

## CURRENT LEADERS

### Jean-Claude Juncker

#### Position

Prime Minister

#### Introduction

Jean-Claude Juncker was appointed prime minister in Jan. 1995, replacing Jacques Santer who became president of the European Commission. He is the leader of the Christian Social Party (CSV). Having been re-elected as prime minister in 1999, 2004 and 2009, he is currently Europe's longest-serving head of government. He is committed to European integration, and played an important role in the decisions leading up to the creation of the European Union's single currency (euro).

#### Early Life

Juncker was born in Redange-sur-Attert on 9 Dec. 1954. He obtained his primary and secondary education in Luxembourg and Belgium. Having studied law at the University of Strasbourg, he was admitted to the Bar of Luxembourg in Feb. 1980. He was an active member of the CSV and chaired its youth organization from 1979–84. Juncker was appointed state secretary for employment and social affairs in 1982. In 1984 he was elected to Parliament for the first time as minister of labour, minister of social security and minister in charge of the budget. When Luxembourg held the presidency of the European Community in 1985, Juncker chaired the council of ministers for social affairs and the budget. In 1990 he was elected party leader of the CSV. As president of the EC Economic and Finance Council in 1991, Juncker was among the core co-authors of the Treaty of

Maastricht. He was a governor of the World Bank from 1989–95, and since 1995 has been the country's governor of the European Investment Bank and the International Monetary Fund.

#### Career in Office

Juncker concurrently holds the position of prime minister, minister of state and of the Treasury. In Oct. 2000 his government oversaw the abdication of the King, Grand Duke Jean, in favour of his son Prince Henri. In Feb. 2002 Juncker was awarded the Légion d'Honneur by French President Jacques Chirac. Following his re-election in mid-2004, he formed a new CSV coalition government with the Socialist Workers' Party. From Jan.–June 2005 he led Luxembourg's six-month presidency of the European Union. In Dec. 2008 Luxembourg's parliament voted to amend the constitution so that bills no longer need the approval of Grand Duke Henri before passing into law following a controversy over proposed euthanasia legislation. In the June 2009 elections the CSV increased its vote share and its representation in the Chamber of Deputies and Juncker began his fourth term as prime minister at the head of the CSV–LSAP coalition.

#### DEFENCE

There is a volunteer light infantry battalion of (2009) 900, of which only the career officers are professionals. In recent years Luxembourg soldiers and officers have been actively participating in peacekeeping missions, mainly in the former Yugoslavia. There is also a Gendarmerie of 600. In 2000 the Gendarmerie and the police force merged to form the Police grand-ducale. NATO maintains a squadron of E-3A *Sentries*.

In 2008 military expenditure totalled US\$232m. (US\$478 per capita), representing 0.4% of GDP.

#### ECONOMY

Services accounted for 85% of GDP in 2007 and industry 14%.

According to the anti-corruption organization *Transparency International*, Luxembourg ranked 11th in the world in a 2011 survey of the countries with the least corruption in business and government. It received 8.5 out of 10 in the annual index.

Luxembourg gave US\$415m. in international aid in 2009, which at 1.04% of GNI made it the third most generous developed country as a percentage of its gross national income, behind Sweden and Norway. Luxembourg was one of only five countries to exceed the UN target of 0.7% in 2007.

#### Overview

Luxembourg's post-Second World War economic growth was based primarily on its steel industry. The small industrial sector has since diversified to include chemical, rubber and other manufactured products. The main engine of recent growth has been the financial services sector, which contributed 26% of GDP in 2009. Luxembourg hosts Europe's largest investment fund industry and second largest money market industry. Other dynamic sectors of the economy include telecommunications, audio-visual and multimedia, industrial plastics and air transport.

Given the large financial sector, Luxembourg was badly damaged by the global financial crisis. Gross investment decreased by 23% in 2009, two major banks were bailed out, three smaller banks failed and unemployment increased. This led to the economy's worst performance for 30 years. A fiscal stimulus package was put in place and exports, particularly of financial services and metal products, started to bounce back during the second quarter of 2010. Authorities target a balanced budget by 2014.

Addressing vulnerabilities in the financial sector, increasing employment, an ageing population and volatility within the eurozone are key challenges.

#### Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Luxembourg at the irrevocable conversion rate of 40.3399 Luxembourg francs to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the

introduction of the euro there was a 'dual circulation' period before the Luxembourg franc ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €5.6bn.

Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.7%	2.1%	2.0%	2.2%	2.5%	2.7%	2.3%	3.4%	0.4%	2.3%

Foreign exchange reserves were US\$285m. in Sept. 2009 (none in 2002) and gold reserves 73,000 troy oz. Total money supply was €84,140m. in March 2009.

#### Budget

Revenue and expenditure for calendar years in €1m.:

	2005	2006	2007
Revenue	8,499	9,213	10,015
Expenditure	8,883	9,455	9,727

Public debt in 2007 was €532.0m.

Luxembourg's budget deficit in 2010 was 1.1% of GDP (2009, 0.9%). In 2008 it had a surplus of 3.0%. The required target set by the EU is a budget deficit of no more than 3%.

VAT is 15%, with reduced rates of 12%, 6% and 3%. Income taxes and business taxes have been reduced to preserve competitiveness in the international environment. The normal tax rate for companies at 1 Jan. 2006 was 29.63%, compared with 40.3% in 1996.

#### Performance

In terms of GDP per head, Luxembourg ranks among the richest countries in the world with a purchasing power parity (PPP) per capita GDP of 79,258 current international dollars in 2009.

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.5%	4.1%	1.5%	4.4%	5.4%	5.0%	6.6%	0.8%	-5.3%	2.7%

Total GDP in 2010 was US\$55.1bn.

#### Banking and Finance

Luxembourg's Central Bank (formerly the Monetary Institute) was established in July 1998 (*Director-General*, Yves Mersch). In Dec. 2004 there were 162 banks. German banks make up nearly a third of all the banks. Total deposits in 2004 were €560.7bn.; net assets in unit trusts, €504.0bn.; net assets in investment companies, €600.3bn. There is a stock exchange.

In 2004 the financial sector accounted for 18.1% of gross added value at basic prices and the banks showed a net profit of €2.9bn. The total number of approved insurance companies in 2004 was 95, with reinsurance companies numbering 271; the amount of premiums due was €8,737.5m.

#### ENERGY AND NATURAL RESOURCES

In 2008, 2.1% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 11% has been set by the EU for 2020.

#### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 23.9 tonnes per capita (compared to the European average of 7.8 tonnes per capita).

#### Electricity

Apart from hydro-electricity and electricity generated from fossil fuels, Luxembourg has no national energy resources. Installed capacity in 2007 was 1.7m. kW. Production was 4,002m. kWh in 2007 and consumption per capita 16,588 kWh.

## Agriculture

The contribution of agriculture, viticulture and forestry to the economy has been gradually declining over the years, accounting for only 0.5% of gross added value at basic prices in 2004. However, the actual output of this sector has nearly tripled during the past 30 years, a trend common to many EU countries. There were 4,975 workers engaged in agricultural work (including wine-growing and forestry) in 2004. In 2007 there were 2,303 farms with an average area of 63.4 ha.; 130,884 ha. were under cultivation in 2007.

Production, 2007 (in tonnes) of main crops: grassland and pasturage, 749,101; maize, 197,508; forage crops, 129,096; bread crops, 77,435; potatoes, 19,968; colza (rape), 18,302. Production, 2007 (in 1,000 tonnes) of meat, 26.8; milk, 274.2. In 2007-08, 142,000 hectolitres of wine were produced. Total tractors and other agriculture vehicles, 2008: 15,238.

Livestock (15 May 2007): 4,334 horses, 191,928 cattle, 83,255 pigs, 9,339 sheep.

## Forestry

In 2010 there were 87,000 ha. of forests (33% of the total land area), which in 2004 produced 128,500 cu. metres of broadleaved and 124,200 cu. metres of coniferous wood.

## INDUSTRY

In 2004 there were 3,038 industrial enterprises, of which 1,972 were in the building industry. Production, 2007 (in tonnes): rolled steel products, 2,933,000; steel, 2,858,000. The world's largest steel producer, ArcelorMittal, has its headquarters in Luxembourg. Created in June 2006 through the merger of Arcelor and Mittal Steel, it produces in excess of 100m. tonnes of steel annually and accounts for approximately 10% of world steel output. The steel industry mainly relies on imported ore.

## Labour

In 2004 the estimated total workforce was 301,000. The government fixes a legal minimum wage. Retirement is at 65. Employment creation was 3.2% in 2004-05. In Dec. 2011 the unemployment rate was 5.2%. The minimum wage in Jan. 2005 was €8.48 an hour.

Between 1996 and 2005 strikes cost Luxembourg an average of just one day per 1,000 employees a year.

There was a 2.6% increase in employment in 2004. Of the new jobs created, around two-thirds went to so-called *frontaliers*, workers living in surrounding countries who commute into Luxembourg to work. More than 100,000 people cross into Luxembourg every day from neighbouring France, Germany and Belgium to work, principally in the financial services industry.

## INTERNATIONAL TRADE

Luxembourg is in the process of turning itself into a centre for electronic commerce, the world's fastest-growing industry.

### Imports and Exports

Imports in 2007 (provisional figures) totalled €16,262.2m. and exports €11,823.0m. In 2005 exports reached 158% of GDP. In 2007, 90.5% of imports were from other EU member countries and 85.9% of exports went to other EU member countries.

Principal imports and exports by standard international trade classification (provisional figures) in €1m.:

	Imports 2007	Exports 2007
Food and live animals	1,120.7	539.2
Beverages and tobacco	425.3	195.0
Crude materials, oils, fats and waxes	1,297.9	251.3
Mineral fuels and lubricants	2,076.4	91.9
Chemicals and related products	1,568.2	798.7
Manufactured goods in metals	1,250.8	1,821.1
Other manufactured goods classified chiefly by material	1,789.4	3,928.5

	Imports 2007	Exports 2007
Machinery	2,547.1	2,136.0
Transport equipment	2,602.4	885.7
Other manufactured goods	1,583.9	1,175.6
Total	16,262.2	11,823.0

Trade with selected countries (provisional figures) in €1m.:

	Imports 2007	Exports 2007
Austria	137.8	243.1
Belgium	5,496.3	1,481.2
France	1,899.8	1,993.0
Germany	4,800.0	3,124.1
Italy	356.6	641.7
Netherlands	1,002.6	644.9
Poland	109.0	196.1
Spain	168.9	413.5
Sweden	112.9	172.7
UK	282.1	553.7
(Total EU)	14,722.7	10,154.4
China	95.1	194.4
Switzerland	152.2	144.7
USA	623.2	298.7
Total (including others)	16,262.2	11,823.0

## Trade Fairs

The *Foires Internationales de Luxembourg* occur twice a year, and there are a growing number of specialized fairs.

## COMMUNICATIONS

### Roads

On 1 Jan. 2008 there were 2,894 km of roads of which 147 km were motorways. Motor vehicles registered at 1 Jan. 2008 numbered 394,917 including 321,520 passenger cars, 27,043 trucks, 1,455 coaches and 14,946 motorcycles. In 2009 there were 47 fatalities in road accidents.

### Rail

In 2009 there were 275 km of railway (standard gauge) of which 262 km were electrified; passenger-km totalled 333m. in 2008.

### Civil Aviation

Findel is the airport for Luxembourg. 1,643,000 passengers and 856,450 tonnes of freight were handled in 2007. The national carrier is Luxair, 49.96% state-owned. Cargolux has developed into one of the major international freight carriers. In 2006 scheduled airline traffic of Luxembourg-based carriers flew 93m. km, carrying 928,000 passengers (all on international flights).

### Shipping

A shipping register was set up in 1990; 143 vessels were registered in Dec. 2006.

### Telecommunications

In 2006 there were 362,722 main (fixed) telephone lines. In 2008 active mobile phone subscribers numbered 707,000 (1,471.1 per 1,000 persons). There were 318,000 PCs in use in 2006 and an estimated 387,000 internet users in 2008. The fixed broadband penetration rate in Dec. 2010 was 33.5 subscribers per 100 inhabitants.

## SOCIAL INSTITUTIONS

### Justice

The Constitution makes the Courts of Law independent in performing their functions, restricting their sphere of activity, defining their limit of jurisdiction and providing a number of procedural guarantees. The Constitution has additionally laid down a number of provisions designed to ensure judges remain independent of persons under their jurisdiction, and to ensure no

interference from the executive and legislative organs. All judges are appointed by Grand-Ducal order and are irremovable.

The judicial organization comprises three Justices of the Peace (conciliation and police courts). The country is, in addition, divided into two judicial districts—Luxembourg and Diekirch. District courts deal with matters such as civic and commercial cases. Offences which are punishable under the Penal Code or by specific laws with imprisonment or hard labour fall within the jurisdiction of the criminal chambers of District Courts, as the Assize Court was repealed by law in 1987. The High Court of Justice consists of a Supreme Court of Appeal and a Court of Appeal.

The judicial organization of the Grand-Duchy does not include the jury system. A division of votes between the judges on the issue of guilt/innocence may lead to acquittal. Society before the Courts of Law is represented by the Public Prosecutor Department, composed of members of the judiciary directly answerable to the government.

In 1999 a new Administrative Tribunal, Administrative Court and Constitutional Court were established.

The population in penal institutions in Sept. 2007 was 745.

### Education

The adult literacy rate in 2004 was 100%. Education is compulsory for all children between the ages of four and 15 (including two years of pre-primary school attendance). In 2006–07 there were 13,672 children in pre-primary school (pre-nursery education, 3,671; nursery education, 10,001) with 1,227 teachers; 33,136 pupils in primary schools; 34,970 pupils in secondary schools. In higher education (2003–04) the Higher Institute of Technology (IST) had 358 students and there were 401 students in teacher training. In 2006–07 the University Centre of Luxembourg had 3,180 students. Many students go abroad, predominantly to France, Germany and Belgium. In 2006–07, 7,222 students pursued university studies abroad.

In 2005 public expenditure on education came to 3-8% of GDP.

### Health

In 2004 there were 1,591 doctors (411 GPs and 840 specialists) and 340 dentists. There were 17 hospitals and 3,045 hospital beds in 2004. In 2007 Luxembourg spent 7-1% of its GDP on health.

### Welfare

The official retirement age is 65 years for both men and women. To be eligible, a pensioner must have paid 120 months contributions. The maximum old-age pension is €5,130-08 per month. The minimum pension is €1,108-10 per month if insured for 40 years, reduced by 1/40 for each year less than 40. A minimum pension is not payable if the person has been insured for less than 20 years.

Unemployment benefit is 80% (85% if the insured has a dependant child) of the basis salary during the previous three months, up to 2.5 times the social minimum wage. Recent graduates receive 70% of the social minimum wage whereas self-employed persons receive 80% of the social minimum wage.

### RELIGION

The population was 91% Roman Catholic in 2001. There are small Protestant, Jewish, Greek Orthodox, Russian Orthodox and Muslim communities as well.

## CULTURE

### World Heritage Sites

Luxembourg has one site on the UNESCO World Heritage List: the City of Luxembourg—its Old Quarters and Fortifications (inscribed on the list in 1994).

### Press

There were six paid-for daily newspapers in 2006 with an average circulation of 114,000 and nine paid-for non-dailies with an average circulation of 87,000. There were also six free non-dailies in 2006. The German-language *Luxemburger Wort* has the highest circulation, with an average of 74,000 copies in 2005.

### Tourism

In 2010 there were 907,000 overnight tourists and 2,256,000 overnight stays; there were 7,751 hotel rooms in 2010. Tourists spent US\$3,620m. in 2006 (excluding passenger transport). Camping is widespread; there were 739,000 overnight stays at campsites in 2010.

### Festivals

The Festival International Echternach (May–June) and the Festival of Wiltz (June–July) are annual events. Both feature a variety of classical music, jazz, theatre and recitals.

## DIPLOMATIC REPRESENTATIVES

Of Luxembourg in the United Kingdom (27 Wilton Cres., London, SW1X 8SD)

*Ambassador:* Alphonse Berns.

Of the United Kingdom in Luxembourg (5 Boulevard Joseph II, L-1840 Luxembourg)

*Ambassador:* Hon. Alice Walpole.

Of Luxembourg in the USA (2200 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Jean-Paul Senninger.

Of the USA in Luxembourg (22 Blvd. Emmanuel Servais, L-2535 Luxembourg)

*Ambassador:* Robert A. Mandell.

Of Luxembourg to the United Nations

*Ambassador:* Sylvie Lucas.

Of Luxembourg to the European Union

*Permanent Representative:* Christian Braun.

## KEY HISTORICAL EVENTS

The history of Macedonia can be traced to the reign of King Karan (808–778 BC), but the country was at its most powerful at the time of Philip II (359–336 BC) and Alexander the Great (336–323 BC). At the end of the 6th century AD Slavs began to settle in Macedonia. There followed a long period of internal fighting but the spread of Christianity led to consolidation and the creation of the first Macedonian Slav state, the Kingdom of Samuel, 976–1018. In the 14th century it fell to Serbia, and in 1355 to the Turks. After the Balkan wars of 1912–13 Turkey was ousted and Serbia received part of the territory, the rest going to Bulgaria and Greece. In 1918 Yugoslav Macedonia was incorporated into Serbia as South Serbia, becoming a republic in the Socialist Federal Republic of Yugoslavia. Claims to the historical Macedonian territory have long been a source of contention with Bulgaria and Greece. Macedonia declared its independence on 18 Sept. 1991. In April 1999 the Kosovo crisis which led to NATO air attacks on Yugoslavian military targets set off a flood of refugees into Macedonia, though subsequently most returned home.

In March 2001 there were a series of clashes between government forces and ethnic Albanian separatists near the border between Macedonia and Kosovo. As violence escalated Macedonia found itself on the brink of civil war. In May 2001 the new national unity government gave ethnic Albanian rebels a 'final warning' to end their uprising. As the crisis worsened, a stand-off within the government between the Macedonian and the ethnic Albanian parties was only resolved after the intervention of Javier Solana, the EU's foreign and security policy chief. A number of Macedonian soldiers were killed in clashes with the rebels, and following reverses in the military campaign the

commander of the Macedonian army, Jovan Andrevski, resigned in June 2001. In Aug. 2001 a peace accord was negotiated.

## TERRITORY AND POPULATION

Macedonia (often referred to as the Former Yugoslav Republic of Macedonia) is bounded in the north by Serbia, in the east by Bulgaria, in the south by Greece and in the west by Albania. Its area is 25,710 sq. km, including 490 sq. km of inland water. According to the 2002 census final results, the population on 1 Nov. 2002 was 2,022,547. The main ethnic groups in 2002 were Macedonians (1,297,981), Albanians (509,083), Turks (77,959), Romas (53,879), Serbs (35,939) and Vlachs (9,695). Estimate, 31 Dec. 2010, 2,057,284; density, 82 per sq. km. Ethnic Albanians predominate on the western side of Macedonia. Minorities are represented in the Council for Inter-Ethnic Relations. In 2005, 68.9% of the population lived in urban areas.

The UN gives a projected population for 2015 of 2.07m.

Macedonia is divided into 84 municipalities. The major cities (with 2002 census population) are: Skopje, the capital, 506,926; Kumanovo, 76,275; Bitola, 74,550; Prilep, 69,704; Tetovo, 52,915.

The official language is Macedonian, which uses the Cyrillic alphabet. Around 25% of the population speak Albanian.

## SOCIAL STATISTICS

In 2004: births, 23,361; deaths, 17,944; marriages, 14,073; divorces, 1,645; infant deaths, 308. Rates (per 1,000 population): birth, 11.5; death, 8.8; marriage, 6.9; divorce, 0.8. Infant mortality, 2005 (per 1,000 live births), 15. Expectation of life at birth in 2007 was 71.7 years for males and 76.5 years for females. Annual population growth rate, 2000–05, 0.1%. In 2004 the most popular age range for marrying was 25–29 for males and 20–24 for females. Fertility rate, 2008, 1.4 births per woman.

Migration within the Republic of Macedonia, 2004: 9,326. International (external) migration: emigrated persons, 669; immigrated persons 1,381. Net migration in 2004 was 712.

## CLIMATE

Macedonia has a mixed Mediterranean-continental type climate, with cold moist winters and hot dry summers. Skopje, Jan. –0.4°C, July 23.1°C.

## CONSTITUTION AND GOVERNMENT

At a referendum held on 8 Sept. 1991 turnout was 74%; 99% of votes cast were in favour of a sovereign Macedonia. On 17 Nov. 1991 parliament promulgated a new constitution which officially proclaimed Macedonia's independence. This was replaced by a constitution adopted on 16 Nov. 2001 which for the first time included the recognition of Albanian as an official language. It also increased access for ethnic Albanians to public-sector jobs.

The *President* is directly elected for five-year terms. Candidates must be citizens aged at least 40 years. The parliament is a 123-member single-chamber *Assembly (Sobranie)*, elected by universal suffrage for four-year terms. There is a *Constitutional Court* whose members are elected by the assembly for non-renewable eight-year terms, and a *National Security Council* chaired by the President. Laws passed by the Assembly must be countersigned by the President, who may return them for reconsideration, but cannot veto them if they gain a two-thirds majority.

### *Political Parties*

The Law on Political Parties makes a distinction between a political party and an association of citizens. The signatures of 500 citizens with the right to vote must be produced for a party to be legally registered. As of 2002 the country had 89 legally registered parties.

### National Anthem

'Denes nad Makedonija se radja novo sonce na slobodata'  
(‘Today a new sun of liberty appears over Macedonia’); words by  
V. Maleski, tune by T. Skalovski.

### RECENT ELECTIONS

Parliamentary elections were held on 5 June 2011. The ruling Internal Macedonian Revolutionary Organization-Democratic Party for Macedonian National Unity (VMRO-DPMNE) won 56 seats with 39.2% of votes cast. The Social Democratic Union of Macedonia (SDSM) took 42 seats with 32.8% of the vote, the Democratic Union for Integration (DUI) 15 with 10.3%, the Democratic Party of Albanians (DPA) 8 with 5.9% and the National Democratic Revival (NDP) 2 with 2.7%. Turnout was 63.5%.

Presidential elections were held on 22 March 2009. Gjorgje Ivanov (VMRO-DPMNE), took 35.1% of the vote, Ljubomir Frčkoski (SDSM) 20.5%, Imer Selmani (New Democracy) 15.0%, Ljube Boškoski (ind.) 14.9%, Agron Buxhaku (DUI) 7.5%, Nano Ružin (Liberal Democratic Party) 4.1%, and Mirushe Hoxha (DPA) 3.1%. In the run-off on 5 April Ivanov won with 63.1% against Frčkoski with 36.9%. Turnout was an estimated 56.4% in the first round and 42.6% in the second.

### CURRENT GOVERNMENT

*President:* Gjorgje Ivanov; b. 1960 (VMRO-DPMNE; sworn in 12 May 2009).

*Prime Minister:* Nikola Gruevski; b. 1970 (VMRO-DPMNE; in office since 27 Aug. 2006).

In March 2012 the multi-party coalition government was composed as follows:

*Deputy Prime Minister and Minister of Finance:* Zoran Stavrevski. *Deputy Prime Minister in Charge of Economic Affairs:* Vladimir Pesevski. *Deputy Prime Minister in Charge of European Affairs:* Teuta Arifi. *Deputy Prime Minister in Charge of Implementing the Ohrid Agreement:* Musa Xhaferri.

*Minister of Agriculture, Forestry and Water Supply:* Ljupcho Dimovski. *Culture:* Elizabeta Kanceska Milevska. *Defence:* Fatmir Besimi. *Economy:* Valon Saracini. *Education and Science:* Pance Krlev. *Environment:* Abdulakim Ademi. *Foreign Affairs:* Nikola Poposki. *Health:* Nikola Todorov. *Information Society:* Ivo Ivanovski. *Interior:* Gordana Jankulovska. *Justice:* Blerim Bexheti. *Labour and Social Policy:* Spiro Ristovski. *Local Self-Government:* Nevzat Bejta. *Transport and Communications:* Mile Janakieski. *Ministers without Portfolio:* Nezdeta Mustafa; Hadi Neziri; Bill Pavleski; Vele Samak.

*Government Website:* <http://www.vlada.mk>

### CURRENT LEADERS

#### Gjorgje Ivanov

##### Position

President

##### Introduction

Gjorgje Ivanov was sworn into office on 12 May 2009 after winning the second round of the presidential election on 5 April. Although his duties during his five-year term will be largely ceremonial, Ivanov is supreme commander of the army and has decision-making powers on foreign policy and the judiciary.

##### Early Life

Gjorgje Ivanov was born on 2 May 1960 in Valandovo. He graduated in law from Ss. Cyril and Methodius University of Skopje in 1982 and was appointed assistant law professor in 1995. In 1998 he became an associate professor in political theory and political philosophy at the same time as completing his doctorate.

In 1999 Ivanov was made a professor of post-graduate studies at the University of Athens before joining the political science

departments of the University of Bologna and the University of Sarajevo the following year. He returned to his alma mater in 2001 to take up the post of director of political studies. In 2008 Ivanov received his political science professorship and was appointed as chair of the Macedonian Higher Education Accreditation Council.

On 25 Jan. 2009 the ruling conservative VMRO-DPMNE announced Ivanov as its presidential candidate for the 2009 election. In the first round of voting on 22 March 2009 he took 35% of the vote and then won with 63% in a second round.

##### Career in Office

With critics attacking his lack of political experience, Ivanov pledged to continue Macedonia's campaign for membership of the European Union and NATO. He also promised to seek a resolution of the dispute with Greece over the country's name (see GREECE: Key Historical Events on page 551) and to diffuse ongoing tensions with Macedonia's ethnic Albanian minority. In elections in June 2011 Ivanov's VMRO-DPMNE was returned to power but without a parliamentary majority.

### DEFENCE

The President is the C.-in-C. of the armed forces. Compulsory national military service was abolished in 2006.

Defence expenditure in 2008 totalled US\$192m. (US\$93 per capita), representing 2.1% of GDP.

The European Union's first ever peacekeeping force (EUFOR) officially started work in Macedonia on 1 April 2003, replacing the NATO-led force that had been in the country since 2001. EUFOR left the country in Dec. 2003.

### Army

Army strength was 9,760 in 2007. There is a paramilitary police force of 7,600.

### Navy

In 2007 the Marine Wing operated four river patrol craft.

### Air Force

The Army Air Force numbered 1,130 in 2007, and had four combat capable aircraft (in storage) and ten attack helicopters.

### INTERNATIONAL RELATIONS

On 13 Sept. 1995 under the auspices of the UN, Macedonia and Greece agreed to normalize their relations.

### ECONOMY

Agriculture accounted for 12.7% of GDP in 2006, industry 29.5% and services 57.8%.

#### Overview

Following fighting between the government and ethnic Albanian rebels in 2001, the economy has recovered its pre-conflict levels, aided by structural reforms, prudent macroeconomic policies and improvements in the business environment. Foreign trade accounts for 130% of GDP, leaving the economy prone to external shocks. Candidacy for accession to the EU has been a major influence on policy since 2005.

As a result of the global economic crisis, external demand collapsed and foreign direct investment was in decline by the end of 2008, although the situation had improved by mid-2009. Supporting growth while reducing external imbalances (including a large current account deficit) remains a key challenge.

#### Currency

The national currency of Macedonia is the *denar* (MKD), of 100 *deni*. Foreign exchange reserves were US\$910m. in July 2005, gold reserves 197,000 troy oz and total money supply was 29,745m. denars. Inflation was 8.3% in 2008 but there was deflation of 0.8% in 2009.

### Budget

In 2009 revenues totalled 128,498m. denars and expenditures 139,393m. denars. Tax revenue accounted for 85.5% of revenues in 2009; current expenditure accounted for 90.4% of expenditures.

### Performance

In 2001 the political turmoil in the country resulted in the economy contracting by 4.5%. There was then a slight recovery in 2002, with a growth rate of 0.9%. The economy contracted by 0.9% in 2009 but there was growth of 1.8% in 2010. Total GDP in 2010 was US\$9.1bn.

### Banking and Finance

The central bank and bank of issue is the National Bank of Macedonia. Its *Governor* is Dimitar Bogov (since May 2011). Privatization of the banking sector was completed in 2000. In 2001 there were 20 commercial banks, six of which were majority foreign-owned. As of 31 Dec. 1998 commercial banks' total non-government deposits were 23,136m. denars, and non-government savings deposits were 15,095m. denars. The largest banks are Stopanska Banka, followed by Komercijalna Banka; between them they control more than half the total assets of all banks in Macedonia.

A stock exchange opened in Skopje in 1996.

## ENERGY AND NATURAL RESOURCES

### Environment

Macedonia's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 3.6 tonnes per capita in 2008.

### Electricity

Installed capacity in 2007 was 1.6m. kW. Output in 2007: 6.73bn. kWh, of which 1.01bn. kWh were from hydro-electric plants. Consumption per capita was 4,512 kWh in 2007.

### Oil and Gas

A 230-km long pipeline bringing crude oil to Macedonia from Thessaloniki in Greece opened in July 2002. Built at a cost of over US\$130m., it has the capacity to provide Macedonia with 2.5m. tonnes of crude oil annually.

### Minerals

Macedonia is relatively rich in minerals, including lead, zinc, copper, iron, chromium, nickel, antimony, manganese, silver and gold. Output in 2009, unless otherwise indicated (in tonnes): lignite, 7,454,000; copper ore, 3,767,000; gypsum, 155,000; lead concentrate, 52,000; copper concentrate, 35,430; zinc concentrate, 32,000.

### Agriculture

In 2002 the agricultural population numbered 833,000 persons, of whom 109,000 were economically active. In 2004 there were 560,264 ha. of arable land, 703,830 ha. of pasture and 44,000 ha. of permanent crops. In 2004, 101,004 ha. of arable land were owned by agricultural organizations and 459,260 ha. by individual farmers. There were 65,338 tractors in use in 2004.

Crop production, 2004 (in 1,000 tonnes): wheat, 356; grapes, 194; potatoes (2003), 175; barley, 149; wine, 142; maize (2003), 141; watermelons, 115; chillies and green peppers (2003), 111; tomatoes (2002), 109; lucerne, 98; apples, 82; cabbage (2002), 71; sugar beets, 47; onions (2003), 31; cucumbers and gherkins, 27; plums, 26. In 2004, 119,000 tonnes of wine were produced.

Livestock, 2004 (in 1,000): sheep, 1,432; cattle, 255; pigs, 158; horses, 40; chickens, 2,725. Livestock products, 2004 (in 1,000 tonnes): beef, 9; pork, bacon and ham, 9; mutton, 7; poultry, 3; cow's milk, 213m. litres; sheep's milk, 49m. litres; eggs (total), 340m.

### Forestry

Forests covered 947,653 ha. in 2004, chiefly oak and beech. 752,000 cu. metres of timber were cut in 2007.

### Fisheries

Total catch in 2008 was 122 tonnes, entirely from inland waters.

## INDUSTRY

In 1999 there were 94,404 enterprises (90,426 private, 1,112 public, 1,257 co-operative, 1,577 mixed and 32 state-owned). Production, 2004 (in tonnes): cement, 585,000; distillate fuel oil, 359,000; residual fuel oil, 282,000; petrol, 146,377; sulphuric acid (2001), 101,058; ferroalloys, 72,082; detergents, 14,507.

### Labour

In April 2004 there were 522,995 employed persons, including: 116,300 in manufacturing; 87,608 in agriculture, hunting and forestry; 74,218 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods; and 33,635 in education. The number of unemployed persons in 2004 was 309,286, giving an unemployment rate of 37.2%.

## INTERNATIONAL TRADE

The foreign debt of Macedonia, including debt taken over from the former Yugoslavia, was US\$2,243m. in 2005.

### Imports and Exports

In 2008 imports (c.i.f.) were valued at US\$6,844m. (US\$5,177m. in 2007) and exports (f.o.b.) at US\$3,920m. (US\$3,302m. in 2007).

Main import suppliers, 2003: Germany (12.6%), Greece (9.7%), Russia (8.7%), Serbia and Montenegro (8.4%) and Bulgaria (7.2%). Main export markets, 2003: Serbia and Montenegro (20.8%), Germany (18.9%), Greece (13.7%), Italy (8.0%) and the USA (4.3%).

## COMMUNICATIONS

### Roads

In 2007 there were 221 km of motorways, 690 km of other main roads, 3,774 km of regional roads and 9,155 km of local roads. In 2007 there were 248,800 passenger cars in use, 2,300 buses and coaches, and 26,600 lorries and vans. In 2007 there were 4,037 road accidents with 173 fatalities.

### Rail

In 2009 there were 699 km of railways (234 km electrified). 1.5m. passengers and 2.9m. tonnes of freight were transported in 2009. The former Macedonian Railways was reorganized in 2007 with two new entities being created—Macedonian Railways Infrastructure (PE Makedonski Železnici Infrastructure, or MŽ-I), which is responsible for the maintenance and operation of the infrastructure, and Macedonian Railways Transport (MŽ Transport AD, or MŽ-T), which is responsible for the operation of passenger and freight services.

### Civil Aviation

There are international airports at Skopje and Ohrid. A new Macedonia-based carrier, Aeromak, has been established to replace MAT Macedonian Airlines, the former flag carrier which ceased operations in 2009. In 2004 Skopje handled 489,942 passengers (all on international flights) and 1,749 tonnes of freight. Ohrid handled 32,497 passengers (all on international flights) and 21 tonnes of freight.

### Telecommunications

In 2004 there were 1,522,600 telephone subscribers (749.9 per 1,000 inhabitants), including 985,600 mobile phone subscribers. There were 159,900 internet users in 2005 and 451,000 PCs in use (221.7 per 1,000 inhabitants). In 2002 the Hungarian firm Matav acquired a 51% stake in MakTel, the state monopoly telecommunications provider, in the most significant economic

development in the country's history. The deal was worth €618.2m. (US\$568.4m.) over two years.

## SOCIAL INSTITUTIONS

### Justice

Courts are autonomous and independent. Judges are tenured and elected for life on the proposal of the *Judicial Council*, whose members are themselves elected for renewable six-year terms. The highest court is the Supreme Court. There are 27 courts of first instance and three higher courts.

The population in penal institutions in March 2008 was 2,200 (107 per 100,000 of national population).

### Education

The literacy rate was 96.1% in 2003 (98.2% among males and 94.1% among females). Education is free and compulsory for nine years. In 2004, 36,392 children attended 51 pre-school institutions and 486 infant schools of elementary education. In 2004–05 there were 227,254 pupils enrolled in 1,012 primary schools, 95,268 in 96 secondary schools and (2001–02) 343,587 students in higher education. There are universities at Skopje (Cyril and Methodius, founded in 1949; 36,509 students and 1,314 academic staff in 2004–05) and Bitola (founded 1979; 10,043 students and 233 academic staff in 2004–05). There are two private universities at Skopje (1,075 students and 41 academic staff in 2004–05) and Tetovo (1,737 students and 86 academic staff in 2004–05).

In 2002 public expenditure on education came to 3.5% of GDP.

### Health

In 2004 there were 4,490 doctors, 1,134 dentists, 322 pharmacologists and 63 hospitals with 9,699 beds.

### Welfare

In 2004 social assistance was paid to 67,260 households. Child care and special supplements went to 46,203 children, and 16,970 underage and 95,053 adults received social benefits. There were 260,075 pensioners in 2004.

## RELIGION

Macedonia is traditionally Orthodox but the church is not established and there is freedom of religion. In 2001 there were 1.21m. Serbian (Macedonian) Orthodox and 580,000 Sunni Muslims. In 1967 an autocephalous Orthodox church split off from the Serbian. Its head is the Archbishop of Ohrid and Macedonia whose seat is at Skopje. It has five bishoprics in Macedonia and representatives in USA, Canada and Australia. It has some 300 priests.

The Muslim Religious Union has a superiorate at Skopje. The Roman Catholic Church has a seat at Skopje.

## CULTURE

### World Heritage Sites

The Former Yugoslav Republic of Macedonia has one site on the UNESCO World Heritage List: Ohrid Region with its Cultural

and Historic Aspect and its Natural Environment (inscribed on the list in 1979 and 1980), a rich repository of Byzantine art and architecture.

### Press

There were 12 daily newspapers in 2008 with a circulation of 295,000 copies. *Dnevnik* is the most popular with a daily circulation of 50,000 copies in 2008.

There are four news agencies in Macedonia: the Macedonian Information Agency (national); and Macedonian Information Centre, Makfax and Net Press (privately owned). Net Press is exclusively an internet news agency.

### Tourism

In 2004 tourists numbered 465,015 spending 1.86m. nights in Macedonia. Total tourist expenditure was US\$92m. in 2005.

### Festivals

The main festivals are Days of Macedonian Music in Skopje (March), the Balkan Festival of Folk Songs and Dances in Ohrid (July), the Ohrid Summer Festival focusing on music and drama (July–Aug.) and the Skopje Jazz Festival (Oct.).

## DIPLOMATIC REPRESENTATIVES

Of Macedonia in the United Kingdom (Suites 2-1 and 2-2, Buckingham Court, 75–83 Buckingham Gate, London, SW1E 6PE)

## KEY HISTORICAL EVENTS

The island was settled by people of African and Indonesian origin when it was visited by the Portuguese explorer, Diego Diaz, in 1500. The island was unified under the Imérina monarchy between 1797 and 1861. A French protectorate was established in 1895. Madagascar became a French colony on 6 Aug. 1896 and achieved independence on 26 June 1960.

In Feb. 1975 Col. Richard Ratsimandrava, head of state, was assassinated. The 1975 constitution instituted a 'Democratic Republic' allowing for only one political party. After six months of anti-government unrest an 18-month transitional administration was agreed. A new constitution instituted the Third Republic in Sept. 1992.

Following the presidential election of Dec. 2001 the opposition candidate Marc Ravalomanana claimed victory, although the High Constitutional Court called for a run-off. On 22 Feb. 2002

Ravalomanana declared himself president and imposed a state of emergency. However, incumbent Didier Ratsiraka and his government set up a rival capital in Toamasina. In April 2002 both men agreed to a recount of votes to solve the dispute. Ravalomanana was declared president.

Re-elected in 2006, the suppression of political opponents led to an army mutiny against Ravalomanana in early 2009. As civil unrest increased, he resigned the presidency and handed power to the military which installed Andry Rajoelina, Ravalomanana's chief political rival, as president.

## TERRITORY AND POPULATION

Madagascar is situated 400 km (250 miles) off the southeast coast of Africa, from which it is separated by the Mozambique channel. Its area is 587,040 sq. km (226,660 sq. miles), including 5,500 sq. km (2,120 sq. miles) of inland water. At the 1993 census the population was 12,092,157 (50-45% female); density, 20.6 per sq. km. Estimate, 2010, 20-71m.; density, 36 per sq. km. 73-2% of the population lived in rural areas in 2005.

The UN gives a projected population for 2015 of 23-85m.

Province	Area in sq. km	Population (1993 census)	Chief town	Population (1993 census)
Antananarivo	58,283	3,483,236	Antananarivo	1,432,000 <sup>1</sup>
Antsiranana	43,046	942,410	Antsiranana	54,418 <sup>2</sup>
Fianarantsoa	102,373	2,671,150	Fianarantsoa	99,005
Mahajanga	150,023	1,330,612	Mahajanga	100,807
Toamasina	71,911	1,935,330	Toamasina	127,441
Toliary	161,405	1,729,419	Toliary	61,460 <sup>2</sup>

<sup>1</sup>1999 figure. <sup>2</sup>1990 estimate.

Following a referendum held in April 2007 the six provinces were to be dissolved and replaced as the main administrative sub-division by 22 existing regions. The divisional changes were scheduled to take effect by 4 Oct. 2009 but have been delayed owing to political unrest.

The indigenous population is of Malayo-Polynesian stock, divided into 18 ethnic groups of which the principal are Merina (24%) of the central plateau, the Betsimisaraka (13%) of the east coast and the Betsileo (11%) of the southern plateau. Foreign communities include Europeans (mainly French), Indians, Chinese, Comorians and Arabs.

Malagasy, French and (since 2007) English are all official languages.

## SOCIAL STATISTICS

2008 estimates: births, 686,000; deaths, 176,000. Rates, 2008 estimates (per 1,000 population): births, 35.9; deaths, 9.2. Infant mortality, 2005 (per 1,000 live births), 74. Expectation of life in 2007 was 58.3 years for males and 61.5 for females. Annual population growth rate, 2000-08, 2.8%. Fertility rate, 2008, 4.7 births per woman.

## CLIMATE

A tropical climate, but the mountains cause big variations in rainfall, which is very heavy in the east and very light in the west. Antananarivo, Jan. 70°F (21.1°C), July 59°F (15°C). Annual rainfall 54" (1,350 mm). Toamasina, Jan. 80°F (26.7°C), July 70°F (21.1°C). Annual rainfall 128" (3,256 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was promulgated on 10 Dec. 2010, having won 74.2% support at a referendum held in Nov. 2010 following a coup in March 2009. However, the referendum was boycotted by

the three main opposition parties and turnout was 52.6%, with registered voters accounting for only about a third of the population. On the day of the vote there was an unsuccessful army mutiny against the rule of President Rajoelina, who had come to power during the 2009 coup.

The new constitution reduces the minimum age requirement for the presidency from 40 years to 35, qualifying the 36-year old Rajoelina to stand in the next presidential election. It also demands that presidential candidates should be resident in the country in the six months leading up to an election, effectively ruling out Rajoelina's exiled predecessor, Marc Ravalomanana, from standing against him. Rajoelina's critics argued the constitution was designed to bolster the interim president's personal standing.

### National Anthem

'Ry tanindrazanay malala ô!' ('O our beloved Fatherland'); words by Pastor Rahajason, tune by N. Raharisoa.

### RECENT ELECTIONS

Presidential elections were held on 3 Dec. 2006. Incumbent president Marc Ravalomanana won with 54.8% of the vote, ahead of Jean Lahiniriko with 11.7%, former president Roland Ratsiraka with 10.1% and Herizo Razafimahaleo with 9.0%. There were ten other candidates who each took less than 5% of the vote. Turnout was 61.5%.

In parliamentary elections held on 23 Sept. 2007 President Marc Ravalomanana's I Love Madagascar party won 105 of the 127 seats, independents 11 and Fanjava Velogno 2 with nine smaller parties each winning one seat.

### CURRENT GOVERNMENT

*Interim President:* Andry Rajoelina; b. 1974 (Young Malagasies Determined/TGV, assumed office 17 March 2009 and sworn in 21 March 2009).

In April 2012 the transitional government was composed as follows:

*Prime Minister, and Minister of Environment and Forests (acting):* Omer Beriziky; b. 1950 (LEADER-Fanilo; sworn in 2 Nov. 2011).

*Deputy Prime Minister and Minister of Development and Land Management:* Andrianiainarivelo Hajo Herivelona. *Deputy Prime Minister and Minister of Economy and Industry:* Pierrot Botozaza.

*Minister of Agriculture:* Rolland Ravatomanga. *Armed Forces:* Gen. André-Lucien Rakotoarimasy. *Commerce:* Olga Ramalason. *Communications and Government Spokesman:* Harry-Laurent Rahajason. *Culture and Heritage:* Elia Ravelomanantsoa. *Decentralization:* Vacant. *Energy:* Nestor Razafindroariaka. *Finance and Budget:* Hery Rajaonarimampianina. *Fisheries and Fishing Resources:* Sylvain Manoriky. *Foreign Affairs:* Pierrot Rajaonarivelo. *Higher Education:* Étienne-Hilaire Razafindehibe. *Hydrocarbons:* Marcel Bernard. *Interior:* Florent Rakotoarisoa. *Internal Security:* Arsène Rakotondrazaka. *Justice:* Christine Harijaona Razanamahasoa. *Livestock:* Ihanta Randriamandranto. *Mines:* Daniella Randrianfeno Tolotrandry Rajo. *National Education:* Régis Manoro. *Population:* Olga Vaomalala. *Posts, Telecommunications and New Technologies:* Ny Hasina Andriamanjato. *Promotion of Handicrafts:* Elisa Zafitombo Alibena. *Public Health:* Johanita Ndahimananjara. *Public Service:* Tabera Randriamanantsoa. *Public Works and Meteorology:* Col. Botomanovatsara. *Relations with Institutions:* Victor Manantsoa. *Sports:* Gérard Botralahy. *Technical Education and Vocational Training:* Jean-André Ndremanjary. *Tourism:* Jean-Max Rakotomamonjy. *Transport:* Benjamina Ramanantsoa. *Water:* Julien Reboza. *Youth and Leisure:* Jacques-Ulrich Randriantiana.

### CURRENT LEADERS

#### Andry Rajoelina

##### *Position*

President

##### *Introduction*

Andry Rajoelina was sworn in as president on 21 March 2009. He was installed by the military after the former president, Marc Ravalomanana, ceded power following three months of political turmoil. On assuming office Rajoelina suspended parliament and set up a transitional authority to run the country. His mandate is not universally recognized by the international community.

##### *Early Life*

Rajoelina was born on 30 May 1974 into the wealthy family of a colonel in the Malagasy army. He rose to prominence as a disc jockey in Antananarivo, before setting up a TV and radio station and running an advertising company. Rajoelina's brash personality earned him the nickname TGV, after the French high-speed train. The initials went on to serve as the acronym for his political movement, Tanora malaGasy Vonona (Young Malagasies Determined). He harnessed his public profile to win the Antananarivo mayoral election in Dec. 2007.

In Dec. 2008 and Jan. 2009 Rajoelina's radio and TV networks were shut down by the government, which accused them of 'inciting civil disobedience'. Rajoelina called a general strike, resulting in widespread disorder. On 17 March Ravalomanana stepped down under pressure from military chiefs who immediately installed Rajoelina as his successor. The African Union (AU) denounced the change of government as a coup and suspended Madagascar's membership. Rajoelina's ascent to power was also condemned by the European Union and the USA.

##### *Career in Office*

Aged 34, Rajoelina was the youngest president in Madagascar's history, although the prevailing constitution stipulated that presidential candidates must be at least 40 years of age. He promised a new constitution and elections within two years.

On 17 April 2009 Rajoelina issued a warrant for the arrest of Ravalomanana, who was then tried in absentia (having fled to South Africa) and sentenced in June to four years in prison for abuse of office. In Aug. 2009 a power-sharing agreement, sponsored by international mediators, was signed between the rival Rajoelina and Ravalomanana political camps with the aim of establishing a transitional unity government. However, continued disputes prevented its effective implementation and in Dec. 2009 Rajoelina announced that he was abandoning the agreement. This prompted the AU to impose targeted sanctions against his administration in March 2010. Then, in Aug., a court sentenced Ravalomanana in absentia to life imprisonment for conspiracy to commit murder.

A referendum on a new constitution took place in Nov. 2010. The referendum was boycotted by the main opposition parties, which regarded the revision as an illegal attempt to consolidate Rajoelina's hold on power by lowering the age requirement for the presidency from 40 to 35. 74% of participants voted in favour. At the same time, an attempted coup against Rajoelina failed as loyal troops arrested a group of dissident army officers.

In Nov. 2011 a transitional cross-party administration took office pending fresh elections possibly before the end of 2012.

### DEFENCE

There is conscription (including civilian labour service) for 18 months. Defence expenditure totalled US\$103m. in 2008 (US\$5 per capita), representing 1.1% of GDP.

### Army

Strength (2007) approximately 12,500 and gendarmerie 8,100.

**Navy**

In 2007 the Navy had a strength of 500 (including some 100 marines).

**Air Force**

Personnel (2007) 500. There are no combat capable aircraft.

**ECONOMY**

In 2006 agriculture contributed 27.5% of GDP, industry 15.3% and services 57.2%.

**Overview**

Economic decline over several decades saw Madagascar's per capita income fall from US\$473 in 1970 to US\$410 in 2008. More than two-thirds of the population lived in poverty in 2005. Key commodities such as vanilla and oil are highly susceptible to price- and weather-related shocks. Nonetheless, the economy grew at an average of 5% per year from 2002–08 and poverty declined from its 2002 peak, driven by strong growth in the tourism and mining sectors, public investment and improved rice productivity.

In Feb. 2009 Madagascar descended into political crisis that resulted in the suspension of parliament, prompting a decline in economic growth and the postponement of international aid. The economy's problems were exacerbated by the global financial crisis, with exports declining by 50% between 2008 and 2010. However, some sectors experienced growth in 2009, notably agriculture and mining.

**Currency**

In July 2003 President Marc Ravalomanana announced that the *Ariary* (MGA) would become the official currency, replacing the *Malagasy franc* (MGFr). The Ariary became legal tender on 1 Aug. 2003 at a rate of 1 *Ariary* = 5 *Malagasy francs*. The Ariary is subdivided into five *Iraimbilanja*.

In July 2005 foreign exchange reserves were US\$435m. and total money supply was 1,324.0bn. ariarys. Inflation was 9.2% in 2008 and 9.0% in 2009.

**Budget**

Revenues totalled 2,685.4bn. ariarys in 2008 and expenditures 2,998.7bn. ariarys. Tax revenue accounted for 77.7% of revenues in 2008; current expenditure accounted for 58.5% of expenditures.

VAT is 20%.

**Performance**

Total GDP in 2010 was US\$8.7bn. There was a recession in 2002 with the economy contracting by 12.4% as a result of the six-month long political crisis, but a recovery followed in 2003 and 2004 with real GDP growth of 9.8% and 5.3% respectively. The recovery continued until 2009 when the economy contracted by 3.7%. However, there was growth of 0.6% in 2010.

**Banking and Finance**

A Central Bank, the Banque Centrale de Madagascar, was formed in 1973, replacing the former Institut d'Émission Malgache as the central bank of issue. The *Governor* is Frédéric Rasamoely. All commercial banking and insurance was nationalized in 1975 and privatized in 1988. Of the six other banks, the largest are the Bankin'ny Tantsaha Mpamokatra and the BNI—Crédit Lyonnais de Madagascar.

**ENERGY AND NATURAL RESOURCES****Environment**

Madagascar's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

**Electricity**

Installed capacity was around 0.2m. kW in 2007. Production in 2007 was 935m. kWh, with consumption per capita 50 kWh.

**Oil and Gas**

Several oil blocks both on land and offshore were discovered in 2005.

**Minerals**

Mining production in 2005 included: chromite, 141,000 tonnes; salt (estimate), 65,000 tonnes; graphite (2008 estimate), 5,000 tonnes. There have also been discoveries of precious and semi-precious stones in various parts of the country, in particular sapphires, topaz and garnets. Madagascar is believed to have the world's largest reserves of sapphires.

**Agriculture**

75–80% of the workforce is employed in agriculture. There were an estimated 2.95m. ha. of arable land in 2007 and 0.6m. ha. of permanent crops. 890,000 ha. were irrigated in 2007. The principal agricultural products in 2003 were (in 1,000 tonnes): rice, 2,800; cassava, 2,367; sugarcane, 2,236; sweet potatoes, 509; potatoes, 298; bananas, 290; mangoes, 210; tomatoes, 210; taro, 200; maize, 181; coconuts, 84; oranges, 83; dry beans, 70. Rice is produced on some 40% of cultivated land. Madagascar is the world's largest producer of vanilla.

Cattle breeding and agriculture are the chief occupations. There were, in 2003, 10.5m. cattle, 1.6m. pigs, 1.2m. goats, 650,000 sheep and 24m. chickens.

**Forestry**

In 2005 the area under forests was 12.84m. ha., or 22.1% of the total land area. The forests contain many valuable woods, while gum, resins and plants for tanning, dyeing and medicinal purposes abound. Timber production was 13.35m. cu. metres in 2007.

**Fisheries**

The catch of fish in 2005 was 136,400 tonnes (78% from marine waters).

**INDUSTRY**

Industry, hitherto confined mainly to the processing of agricultural products, is now extending to cover other fields.

**Labour**

In 2003 the economically active population totalled 7,573,900 (50.5% males). In 2002 approximately 82.2% of the economically active population were engaged in agriculture, hunting and forestry.

**INTERNATIONAL TRADE**

Foreign debt was US\$3,465m. in 2005.

**Imports and Exports**

In 2008 imports (c.i.f.) were valued at US\$4,040m. and exports (f.o.b.) at US\$1,345m. The principal imports in 2004 were machinery and transport equipment (30.7%), petroleum and petroleum products (22.9%), food and livestock (9.8%) and chemicals and related products (8.6%). Principal exports in 2004 were vanilla (27.8%), shellfish (13.9%), printed matter (10.0%) and cloves (6.3%). Main import suppliers, 2004: France, 15.3%; China, 10.3%; Bahrain, 8.9%; South Africa, 7.3%. Main export markets, 2004: France, 35.8%; USA, 20.6%; Mauritius, 5.7%; Singapore, 5.6%.

**COMMUNICATIONS****Roads**

In 2002 there were about 65,663 km of roads, 11.6% of which were paved. There were 146,300 passenger cars, 280,800 buses and coaches and 83,800 lorries and vans in 2008. 550 people died in road accidents in 2006.

**Rail**

In 2005 there were 854 km of railways, all metre gauge. In 2005, 100,000 passengers and 300,000 tonnes of freight were transported.

**Civil Aviation**

There are international airports at Antananarivo (Ivato) and Mahajanga (Amborovy). The national carrier is Air Madagascar, which is 90-6% state-owned. In 2003 scheduled airline traffic of Madagascar-based carriers flew 9m. km, carrying 452,000 passengers (140,000 on international flights). In 2001 Antananarivo handled 699,074 passengers (348,238 on domestic flights) and 15,499 tonnes of freight.

**Shipping**

The main ports are Toamasina, Mahajanga, Antsiranana and Toliary. In Jan. 2009 there were 19 ships of 300 GT or over registered, totalling 18,000 GT.

**Telecommunications**

Madagascar had 571,600 telephone subscribers in 2005, equivalent to 30.7 per 1,000 persons, of which 504,700 were mobile phone subscribers. There were 17.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 8,300 in 2009 (0.4 per 1,000 inhabitants).

**SOCIAL INSTITUTIONS****Justice**

The Supreme Court and the Court of Appeal are in Antananarivo. In most towns there are Courts of First Instance for civil and commercial cases. For criminal cases there are ordinary criminal courts in most towns.

The population in penal institutions in Dec. 2006 was 17,495 (91 per 100,000 of national population).

**Education**

Education is compulsory from six to 14 years of age. In 2007 there were 78,743 teaching staff for 3,837,343 pupils in primary schools, 835,539 pupils at secondary level with 34,320 teaching staff and 58,313 students at tertiary level with 3,032 academic staff. Adult literacy rate in 2008 was 71%. In 2007 public expenditure on education came to 3.4% of GNI and 16.4% of total government spending.

**Health**

There were three hospital beds per 10,000 population in 2005. In 2004 there were 5,201 physicians, 410 dentistry personnel and 5,661 nursing and midwifery personnel. In 2005 government expenditure on health came to 9.6% of total government spending.

**Welfare**

In 1996 government expenditure on social security and welfare totalled MGFr26,000m.

**RELIGION**

About 48% of the population practise the traditional religion, 43% are Christians (of whom approximately half are Roman Catholic and half are Protestant, mainly belonging to the Fiangonan'i Jesosy Kristy eto Madagasikara) and 9% are followers of other religions (predominantly Islam).

**CULTURE****World Heritage Sites**

Tsingy de Bemaraha Strict Nature Reserve joined the UNESCO World Heritage List in 1990. The undisturbed forests, lakes and mangrove swamps are the habitat for rare and endangered lemurs and birds. The Royal Hill of Ambohimanga was added in 2001, a royal city and burial site and a symbol of Malagasy identity. The rainforests of Atsinanana, comprising six national parks in the eastern part of the island, were inscribed on the list in 2007.

**Press**

In 2006 there were 14 daily newspapers with a total circulation of 110,000.

**Tourism**

There were 277,000 tourists in 2005. Receipts totalled US\$62m.

**DIPLOMATIC REPRESENTATIVES**

Of Madagascar in the United Kingdom (embassy in London closed in 2011)

*Ambassador:* Vacant (resides in Paris).

Of the United Kingdom in Madagascar (embassy in Antananarivo closed in 2005)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Nick Leake (resides in Port Louis, Mauritius).

Of Madagascar in the USA (2374 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Velotiana Rakotoanosy Raobelina.

Of the USA in Madagascar (Lot 207A, Point Liberty, Andranoro, Antehiroka, 105 Antananarivo)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Eric M. Wong.

Of Madagascar to the United Nations

*Ambassador:* Zina Andrianarivelo.

Of Madagascar to the European Union

*Ambassador:* Jeannot Rakotomalala.

## KEY HISTORICAL EVENTS

The area was dominated by the Twa and Fulani tribes until the 1st century AD when Bantu-speaking tribes made inroads. The explorer David Livingstone reached Lake Nyasa, now Lake Malawi, in 1859 and it was the land along the lake's western shore that became, in 1891, the British Protectorate of Nyasaland. In 1884 the British South Africa Company applied for a charter to trade. Pressure on land, the colour bar and other grievances generated Malawian resistance. In 1893 it was renamed the British Central African Protectorate. This became Nyasaland in 1907. By the mid-1940s a nationalist movement had emerged, spearheaded by the Nyasaland African Congress. In 1953 Nyasaland was joined with Southern Rhodesia (Zimbabwe) and Northern Rhodesia (Zambia) to form the Federation of Rhodesia and Nyasaland, under British control. This union was dissolved in 1963. Nyasaland was self-governing until on 6 July 1964 it became

independent, adopting the name Malaŵi. In 1966 Malawi was declared a republic and Dr Hastings Banda became the first president, establishing a one party dictatorship which lasted for 30 years. In 1994 Malawi returned to multi-party democracy.

## TERRITORY AND POPULATION

Malawi lies along the southern and western shores of Lake Malawi (the third largest lake in Africa), and is otherwise bounded in the north by Tanzania, south by Mozambique and west by Zambia. Area (including the inland water areas of Lake Malombe, Chilwa, Chiuta and the Malawi portion of Lake Malawi, which total 24,208 sq. km), 118,484 sq. km (45,747 sq. miles).

Census population (2008), 13,077,160 (6,718,227 females); density, 138.7 per sq. km. The United Nations population estimate for 2008 was 14,005,000. In 2005, 82.8% of the population was rural.

The UN gives a projected population for 2015 of 17.52m.

Population of main towns (2008): Lilongwe, 674,448; Blantyre, 661,256; Mzuzu, 133,968; Zomba, 88,314. Population of the regions (2008): Northern, 1,708,930; Central, 5,510,195; Southern, 5,858,035.

The official languages are Chichewa, spoken by over 58% of the population, and English.

## SOCIAL STATISTICS

2008 estimates: births, 597,000; deaths, 182,000. Estimated rates, 2008 (per 1,000 population): births, 40.2; deaths, 12.3. Annual population growth rate, 2000–08, 2.8%. Expectation of life at birth in 2007 was 51.3 years for males and 53.4 for females. Infant mortality, 2005, 78 per 1,000 live births; fertility rate, 2008, 5.5 births per woman.

## CLIMATE

The tropical climate is marked by a dry season from May to Oct. and a wet season for the remaining months. Rainfall amounts are variable, within the range of 29–100" (725–2,500 mm), and maximum temperatures average 75–89°F (24–32°C), and minimum temperatures 58–67°F (14.4–19.4°C). Lilongwe, Jan. 73°F (22.8°C), July 60°F (15.6°C). Annual rainfall 36" (900 mm). Blantyre, Jan. 75°F (23.9°C), July 63°F (17.2°C). Annual rainfall 45" (1,125 mm). Zomba, Jan. 73°F (22.8°C), July 63°F (17.2°C). Annual rainfall 54" (1,344 mm).

## CONSTITUTION AND GOVERNMENT

The *President* is also head of government. Malawi was a one-party state, but following a referendum on 14 June 1993, in which 63% of votes cast were in favour of reform, a new constitution was adopted on 17 May 1994 which ended Hastings Banda's life presidency and provided for the holding of multi-party elections. At these Bakili Muluzi was elected president with 47.16% of votes cast, beating President Banda and two other opponents. There is a *National Assembly* of 193 members, elected for five-year terms in single-seat constituencies.

## National Anthem

'O God Bless our Land of Malaŵi'; words and tune by M.-F. Suka.

## RECENT ELECTIONS

At parliamentary elections of 19 May 2009 the Democratic Progressive Party (DPP) won 114 seats, the Malawi Congress Party (MCP—formerly the only legal party) 27 and the United Democratic Front (UDF) 17. Independents took 32 seats and others three.

At the concurrent presidential elections incumbent Bingu wa Mutharika (DPP) won with 66.0% of the vote, ahead of John Tembo (MCP) with 30.7%. There were five other candidates who all received less than 1% of the vote.

## CURRENT GOVERNMENT

*President, C.-in.-C. of the Armed Forces and Minister for Public Service, Statutory Corporations, Civil Service Administration, National Relief and Disaster Management, and Nutrition and HIV/AIDS:* Joyce Banda; b. 1950 (People's Party; sworn in 7 April 2012).

*Vice President and Minister of Health:* Khumbo Hastings Kachali.

The government consisted of the following in April 2012:

*Minister of Agriculture and Food Security:* Peter Mwanza. *Defence:* Ken Kandodo. *Disabilities:* Reen Kachere. *Economic Planning and Development:* Atupele Austin Muluzi. *Education, Science and Technology:* Eunice Kazembe. *Energy and Mining:* Cassim Chilumpha. *Environment and Climate Change:* Catherine Gotani Hara. *Finance:* Ken Lipenga. *Foreign Affairs and International Co-operation:* Ephraim Mganda Chiume. *Gender, Children and Social Welfare:* Anita Kalinde. *Home Affairs:* Uladi Mussa. *Industry and Trade:* John Bande. *Information:* Moses Kunkuyu. *Justice and Attorney General:* Ralph Kasambara. *Labour:* Eunice Makangala. *Lands and Housing:* Henry Dama Phoya. *Local Government and Rural Development:* Grace Zinenani Maseko. *Tourism and Culture:* Daniel Liwimbi. *Transport and Public Infrastructure:* Sidik Mia. *Water Development and Irrigation:* Richie Bizwick Muheya. *Youth and Sports:* Enoch Chihana.

*Government Website:* <http://www.malawi.gov.mw>

## CURRENT LEADERS

### Joyce Banda

*Position*  
President

#### Introduction

Joyce Banda was sworn in as president in April 2012 following the death of President Bingu wa Mutharika. A lifelong campaigner for women's rights, Banda is the first female president (and vice-president) of Malawi and only the second female president of any African state. She is the leader of the People's Party, which she formed in 2011 after a falling-out with Mutharika that saw her expelled from the Democratic Progressive Party (DPP).

#### Early Life

Joyce Banda was born in Malawi's Zomba District on 12 April 1950. Her father was the brass band leader of the Malawi police force. In 1975 she (along with her three children) left her abusive husband, who worked at the Malawi embassy in Nairobi, Kenya. Her decision, she said later, was inspired by a Kenyan women's movement.

Banda secured her financial independence by establishing a clothing manufacturing business, the first of several enterprises she set up. In 1990 she founded the National Association of Business Women, a non-governmental group aimed at improving the prospects of small, female-led businesses. In 1997 she set up the Joyce Banda Foundation, which focuses on education.

She entered politics in 1999 as the member of parliament for the Zomba-Malosa constituency, serving under President Bakili Muluzi as minister of gender and community services. She was re-elected to parliament in 2004 but left the defeated United Democratic Front to join the DPP, the party of the new president, Bingu wa Mutharika. Banda was named foreign minister on 1 June 2006. During her time in the role she severed ties with

Taiwan in favour of closer relations with Beijing, paving the way for Chinese investment in Malawi's infrastructure.

In 2009 Mutharika selected Banda as his running mate in his bid for re-election, seeking to take advantage of her popularity in rural areas. However, once elected, Mutharika moved to isolate Banda, who had refused to support the planned succession to the presidency of Mutharika's brother. Having been ousted from the DPP, Banda established her own People's Party in 2011. She refused to relinquish the vice-presidency, and Mutharika lacked the constitutional powers to remove her.

Mutharika's sudden death from a heart attack on 5 April 2012 threatened a prolonged power struggle but after two days of political jockeying, constitutional procedure prevailed and Banda was sworn into office on 7 April.

#### Career in Office

Within days of becoming president Banda dismissed the chief of police, Peter Mukhito, who had been accused of mishandling anti-government riots in 2011 in which at least 19 people were killed. She replaced him with Lot Dzonzi, a human rights supporter. She also acted quickly to remove the minister of information, Patricia Kaliati, who had attempted to block Banda's accession after the death of Mutharika.

## DEFENCE

All services form part of the Army. Defence expenditure totalled US\$43m. in 2008 (US\$3 per capita), representing 1.5% of GDP.

### Army

Personnel (2007) 5,300. In addition there is a paramilitary mobile police force totalling 1,500.

### Navy

The Maritime Wing, based at Monkey Bay on Lake Malawi, numbered 220 personnel in 2007.

### Air Wing

The Air Wing acts as infantry support and numbered 200 in 2007 with no combat capable aircraft.

## ECONOMY

Agriculture accounted for 34.2% of GDP in 2006, industry 19.7% and services 46.1%.

### Overview

Malawi has enjoyed solid growth since the mid- to late 2000s. Having qualified for the Heavily Indebted Poor Countries (HIPC) initiative in Aug. 2006, government finances improved and growth peaked at 9.7% in 2008, compared to around 2% before 2005. Growth was supported by good weather, strong tobacco harvests and a government programme of fertilizer subsidies.

Heavy dependence on agriculture (which accounts for 80% of export earnings and supports 85% of the population) makes the economy vulnerable to weather shocks and natural disasters including droughts and heavy rainfall. Tobacco, tea, cotton, coffee and sugar are the primary exports, with tobacco accounting for more than half the total. Social indicators are poor. According to the 2010 *Human Development Report*, 74% of the population lives below the international poverty line of US\$1.25 (PPP) per day. Malawi relies on assistance from the World Bank, IMF and other international donors. However, gains have seen HIV/AIDS prevalence down from 14% to 12%, while health care, education and environmental conditions are showing improvements.

Challenges are numerous—persistent energy constraints mean only 7% of the population have access to electricity services, a weak balance-of-payments threatens exchange rate and price stability, and prospects are uncertain for future international

tobacco consumption. Medium-term growth is expected to be supported by expansion at the Kayelekera uranium mine.

### Currency

The unit of currency is the *kwacha* (MWK) of 100 *tambala*. Foreign exchange reserves were US\$119m. in June 2005, gold reserves 13,000 troy oz and total money supply was K.29,579m. Foreign exchange controls were abolished in Feb. 1994. Inflation was 8.7% in 2008 and 8.4% in 2009, having been as high as 83.1% in 1995.

### Budget

The fiscal year runs from 1 July–30 June. In 2008–09 revenues were K.187.40bn. and expenditures K.223.50bn. Tax revenue accounted for 62.4% of revenues in 2008–09; current expenditure accounted for 82.0% of expenditures.

VAT is 16.5%.

### Performance

Since shrinking by 4.1% during a recession in 2001 the economy has recovered, with real GDP growth rates of 9.0% in 2009 and 6.5% in 2010. Total GDP was US\$5.1bn. in 2010.

### Banking and Finance

The central bank and bank of issue is the Reserve Bank of Malawi (founded 1964). The *Governor* is Perks Ligoya. In 2002 there were four commercial banks, one development bank, three merchant banks and a savings bank.

There is a stock exchange in Blantyre.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

### Electricity

The Electricity Supply Commission of Malawi is the sole supplier. Installed capacity was 0.5m. kW in 2007. Production was 1,637m. kWh in 2007; consumption per capita was 123 kWh. Only 6% of the population has access to electricity.

### Oil and Gas

Malawi does not produce any oil or natural gas and imports all its fuel products. There are plans for an oil pipeline to be constructed linking Nsanje in the south of the country with the port of Beira in neighbouring Mozambique.

### Minerals

Mining operations have been limited to small-scale production of coal, limestone, rubies and sapphires, but companies are now moving in to start exploration programmes. Bauxite reserves are estimated at 29m. tonnes and there are proven reserves of clays, diamonds, glass and silica sands, graphite, limestone, mercurate, phosphates, tanzanite, titanium and uranium. Output in 2007: crushed stone, 226,351 tonnes; coal, 58,550 tonnes; limestone, 42,088 tonnes; gemstones, 3,710 kg.

### Agriculture

Malawi is predominantly an agricultural country. Agricultural produce contributes 90% of export earnings. There were an estimated 3.0m. ha. of arable land in 2007 and 120,000 ha. of permanent crops. Maize is the main subsistence crop and is grown by over 95% of all smallholders. Tobacco is the chief cash crop, employing 12% of the workforce and generating a quarter of tax earnings. Also important are groundnuts, cassava, millet and rice. There are large plantations which produce sugar, tea and coffee. Production (2003 estimates, in 1,000 tonnes): maize, 1,901; sugarcane, 1,900; cassava, 1,774; potatoes, 1,100; plantains, 200; groundnuts, 158; dry beans, 94; bananas, 93; rice, 87; tobacco, 70; sorghum, 45; tea, 45.

Livestock in 2003: goats, 1.7m.; cattle, 750,000; pigs, 456,000; sheep, 115,000; chickens, 15m.

### Forestry

In 2005 the area under forests was 3.40m. ha., or 36.2% of the total land area. Timber production in 2007 was 5.76m. cu. metres.

### Fisheries

Landings in 2005 were 58,783 tonnes, entirely from inland waters.

## INDUSTRY

Index of industrial production in 2001 (1984 = 100): total general industrial production, 101.9; of this goods for the domestic market were at 73.2 and export goods were at 101.5. Electricity and water were at 231.7.

### Labour

The labour force in 1996 was 4,807,000 (51% males). Approximately 85% of the economically active population in 1995 were engaged in agriculture, fisheries and forestry.

## INTERNATIONAL TRADE

External debt was US\$3,155m. in 2005.

### Imports and Exports

In 2010 imports (c.i.f.) amounted to US\$2,173.0m. and exports (f.o.b.) US\$1,066.2m. Major imports, 2004 (in US\$1m.): road vehicles, 49.1; textile yarn, fabrics and finished articles, 31.7. Major exports, 2004 (in US\$1m.): tobacco and tobacco products, 221.4 (46% of the total); sugar, sugar preparations and honey, 75.6.

Main sources of imports in 2004 were South Africa (35.6%), UK (6.7%), India (6.6%) and Zimbabwe (5.9%). Principal destinations in 2004 for exports were South Africa (14.6%), USA (11.3%), UK (9.9%) and Germany (7.6%).

### Trade Fairs

The annual Malawi International Trade Fair takes place in Blantyre, the commercial capital.

## COMMUNICATIONS

### Roads

The road network consisted of 15,451 km in 2003, of which 45.0% were paved. There were 53,300 passenger cars and 59,800 vans and trucks in 2007.

### Rail

In 2005 Malawi Railways operated 797 km on 1,067 mm gauge, providing links to the Mozambican ports of Beira and Nacala. In 2009 passenger-km travelled came to 44m. and freight tonne-km to 47m.

### Civil Aviation

The national carrier is Air Malawi. It flies to a number of regional centres in Ethiopia, Kenya, South Africa, Zambia and Zimbabwe. In 2003 scheduled airline traffic of Malawi-based carriers flew 4m. km, carrying 109,000 passengers (68,000 on international flights). There are international airports at Lilongwe (Lilongwe International Airport) and Blantyre (Chileka). In 2000 Lilongwe handled 175,915 passengers (120,575 on international flights) and 4,182 tonnes of freight, and Blantyre had 101,809 passengers (53,426 on international flights) and 680 tonnes of freight.

### Telecommunications

Malawi had 532,000 telephone subscribers in 2005, or 41.3 for every 1,000 population, including 429,300 mobile phone subscribers. Internet users numbered 52,500 in 2005 and 25,000 PCs were in use (1.9 per 1,000 persons).

## SOCIAL INSTITUTIONS

### Justice

Justice is administered in the High Court and in the magistrates' courts. Traditional courts were abolished in 1994. Appeals from magistrates' courts lie to the High Court, and appeals from the High Court to Malawi's Supreme Court of Appeal.

The population in penal institutions in Dec. 2007 was 10,830 (78 per 100,000 of national population).

### Education

The adult literacy rate in 2009 was estimated at 73.7% (80.6% among males and 67.0% among females). Fees for primary education were abolished in 1994. In 2007 the number of pupils in primary schools was 2,943,248 (44,048 teaching staff). The primary school course is of eight years' duration, followed by a four-year secondary course. In 2007 there were 574,003 pupils in secondary schools. English is taught from the 1st year and becomes the general medium of instruction from the 4th year.

The University of Malawi had 6,257 students and 676 academic staff in 2007. A university at Mzuzu opened in 1998 and provides courses for secondary school teachers. In 2007 there were 6,458 students in higher education and 861 academic staff.

In 2009 public expenditure on education came to 2.8% of GDP.

### Health

In 2004 there were 266 physicians and 7,264 nursing and midwifery personnel. In 2007 there were 11 hospital beds per 10,000 inhabitants.

## RELIGION

2001 estimates: 2,600,000 Roman Catholic; 2,070,000 Protestant (mostly Presbyterian); 1,770,000 African Christian; 1,560,000 Muslim; 820,000 traditional beliefs. The remainder follow other religions.

## CULTURE

### World Heritage Sites

Malawi has two sites on the UNESCO World Heritage List: Lake Malawi National Park (inscribed on the list in 1984); and the Chongoni Rock-Art area (2006).

### Press

There were two paid-for dailies and nine paid-for non-dailies in 2008. The two dailies are *The Nation* (average circulation of 15,000 copies daily in 2008); and *The Daily Times* (7,000 copies daily in 2008).

### Tourism

There were 438,000 non-resident tourists in 2005, spending US\$36m.

## DIPLOMATIC REPRESENTATIVES

Of Malawi in the United Kingdom (36 John St., London, WC1N 2AT)

*High Commissioner:* Vacant.

*Chargé d'Affaires a.i.:* James Ali.

Of the United Kingdom in Malawi (PO Box 30042, Lilongwe 3)

*High Commissioner:* Vacant.

*Chargé d'Affaires a.i.:* Kirk Hollingsworth.

Of Malawi in the USA (1156 15th St., NW, Suite 320, Washington, D.C., 20005)

*Ambassador:* Steve Matenje.

Of the USA in Malawi (Area 40, Plot 24, Kenyatta Rd, Lilongwe 3)

*Ambassador:* Jeanine Jackson.

Of Malawi to the United Nations

*Ambassador:* Brian G. Bowler.

Of Malawi to the European Union

*Ambassador:* Brave Rona Ndisale.

## KEY HISTORICAL EVENTS

Excavations at Niah in Sarawak, East Malaysia have uncovered evidence of human settlement from 38,000 BC (the oldest relic of *homo sapiens* in southeast Asia). There are numerous sites in the north of Peninsular Malaysia where evidence of hunter-gatherers has been dated to around 10,000 BC. These Hoabinhians were spread across the region from present-day Myanmar to southern China between 12,000 and 3,000 BC. After 3,000 BC Mon-Khmer speaking immigrants moved south into Peninsular Malaysia and introduced a more advanced Neolithic culture, engaging in simple farming. The indigenous people known as Orang Asli, who still live in the remoter, mountainous areas of the northern Malay Peninsula, are considered to be descendents of the Neolithic farmers. Indian traders first visited the Malay Peninsula in the 1st century BC and introduced political ideas, art forms and the Sanskrit language. Hinduism and Buddhism gained a foothold and were practised alongside traditional animist beliefs.

Various Hinduized city-states were established, one of which was located in Kedah. In the 7th century AD Kedah came under the control of the Hinduized Srivijaya empire, centred on Palembang in Sumatra. Srivijaya rule ended in the late 13th century when Sumatra fell to a Javan invasion, after which the king of Sukothai sent forces south into the Malay Peninsula. The Sumatran kingdom of Melayu next ruled over the southern part of the Peninsula, followed by the Madjapahit, the last Hindu empire of Java. In the mid-15th century Melaka emerged as the key trading port in the region—it was host to indigenous Malays, Sumatrans, Javans, Gujaratis, Arabs, Persians, Filipinos and Chinese—and grew rapidly in prosperity. A pattern of government was established in Melaka that became the basis of Malay identity and it was emulated by subsequent Malay kingdoms. Gujarati sailors introduced Islam to the region through

Melaka in the 15th century. In 1511 the port was captured by the Portuguese navigator Alfonso de Albuquerque (who had seized Goa in western India the previous year), and who sought to dominate the route by which precious spices were shipped to Europe.

The sultan of Melaka fled to Johor and some of the Muslim mercantile elite relocated to Brunei in northwest Borneo. Sultanates also emerged in Pahang and Perak, which subsequently received large numbers of immigrants from Indonesian islands, notably Acehnese, Bugis and Minangkabau settlers, who displaced the Orang Asli from their coastal communities and drove them to the Malay Peninsula's interior. Conflict arose between the sultanates of Johor and Aceh and the Portuguese as they vied for control over the Straits of Melaka. In the late 16th century the northern Peninsular states of Kedah, Kelantan and Terengganu came under the control of the Thai state of Phetburi. The early 17th century saw the arrival of Dutch traders in the strait of Melaka. As part of the United Netherlands East India Company (Vereenigde Oostindische Compagnie, VOC) they made an alliance with Johor to besiege Melaka, capturing it in 1641. The Dutch brokered a peace deal between Aceh and Johor in the same year, ushering in an era of relative peace and prosperity for Johor under Laksamana Tun Abdul Jamil.

In the late 17th century the Malay Peninsula came under the influence of Bugis merchants from the Indonesian island of Sulawesi, who began settling in Selangor to trade in tin. The Bugis were formidable warriors, renowned for their navigational and commercial skills. By the 1740s they controlled many of the key shipping routes across the Indonesian archipelago and influenced all areas of government in Johor and the Riau archipelago, although Sultan Suliaman was permitted to remain as a figurehead.

## British Influence

In the mid-18th century Johor and Melaka became entrepôts for the trade in tea between China and Europe. Ships owned by the British East India Company (EIC) began plying the Melaka straits in greater numbers. The British foothold in India allowed them to expand eastwards, and their control of India's poppy fields enabled them to dominate the lucrative opium trade. In 1786 Francis Light of the EIC leased the island of Penang from the Sultan Abdullah of Kedah who hoped the British would provide protection against attacks from Siam or Burma. Penang grew swiftly, luring trade away from Melaka (which remained in Dutch control) and Johor-Riau. The British sought to increase their control over the maritime route to China and Sir Thomas Stamford Raffles was ordered to establish an entrepôt in the southern reaches of the Melaka Straits. In 1819 he signed a treaty with Sultan Husein Syah of Johor and founded Singapore. Five years later the British formally acquired Melaka from the Dutch. From 1826 Penang, Singapore and Melaka were ruled by the British authorities in India under a joint administration known as the Straits Settlements. By 1831 the population of Singapore had reached 18,000 (a large proportion were Chinese immigrants) and the following year the port replaced Penang as the capital of the Straits Settlements. Meanwhile, the northern provinces of Kedah and Perak came under the influence of the Siamese Chakri dynasty.

The discovery of tin deposits at Larut (western Malay Peninsula) in the 1850s led to large-scale immigration by Chinese miners and labourers. They organized themselves into *hui* (brotherhoods), which eventually became powerful political and economic organizations. Vast profits could be made from tin and there were clashes between rival developers. At the same time,

piracy was on the increase in the Melaka straits, and merchants asked the British to intervene and restore order. A series of agreements in 1874 introduced the British Residential system to Perak, Selangor and Sungei Ujung. In each region, a British Resident functioned as an adviser to the Malay Sultan on all aspects of administration apart from matters relating to the Islamic faith and Malay tradition.

#### Colonial Rule

In 1896 the three states and Pahang were grouped together as the Federated Malay States, presided over by a British Resident-General at Kuala Lumpur in the heart of the tin-mining district. By the end of the century, a British colonial infrastructure was taking shape in the form of public buildings, municipal services, rubber plantations and road and rail construction, which required a stream of cheap workers. Tamils from south India and Sri Lanka arrived as indentured (and later as licensed) labourers. Negotiations between the British and Siamese in the early years of the 20th century led to British control over the northern states of Kedah, Perlis, Kelantan and Terengganu. A rubber boom followed the expansion of the motor car industry in Europe and North America. Rubber plants, originally from the forests of Brazil and introduced to Malaysia in the 1880s, were planted in every state in Malaysia by 1908 and by 1913 rubber had eclipsed tin as the country's chief export.

Sabah, Sarawak and Brunei, which had come under the control of the North Borneo Chartered Company and was granted protectorate status in 1888, experienced slower economic development than British Malaya but gold, antimony and coal were mined and oil was discovered at Miri in 1910. The colony was hit hard by the global depression of 1929–31 and widespread unemployment in the mines and plantations caused the repatriation of Chinese and Indian workers. Rubber, tin and oil made Malaya a focus for Imperial Japan from early in the Second World War. When Pearl Harbor and Hong Kong came under attack from Japanese forces in Dec. 1941, other Japanese divisions came ashore at Kota Bharu and Miri. British forces retreated south to Singapore, but the 'impregnable' island capitulated within a few weeks, on 15 Feb. 1942. Japanese troops quickly took over from British colonial officers and controlled Malaya from Singapore (Shonan), meting out harsh treatment to the Chinese population. Thailand allied itself with Japan and was granted control of the northern Malay states in 1943.

#### Post-War Period

Returning in 1946, the British reorganized the colony into the Malayan Union. The Malay elite, fearing an end to their privileges as a consequence of equal rights for Chinese and Indian subjects, campaigned via the United Malays National Organization (UMNO, led by Datuk Onn) to demand the continuation of the sultanates. The British were forced to compromise and established the Federation of Malaya in Feb. 1948, consisting of the nine Malay states, Melaka and Penang and administered by a High Commissioner in Kuala Lumpur. Within months the Federation was under attack by the Chinese-dominated Malayan Communist Party (MCP) which had grown during the Japanese occupation, when it controlled various anti-Japanese National Salvation Organizations. In 1950 the High Commissioner, Sir Henry Gurney, responded to guerrilla attacks by the MCP by putting Malaya on a war-footing, including tightening security, recruiting soldiers from other colonies and dispersing the Chinese squatter settlements that harboured the MCP. More than 500,000 Chinese were resettled by the mid-1950s. The Communist insurrection, known by the British as 'the Emergency', hastened the transition to Malayan independence and local elections were held in Penang in late 1951. Four years later the first federal-level election was won convincingly by the Alliance Party, a loose coalition of Malay,

Chinese and Indian parties, led by Tuanku (Prince) Abdul Rahman. On 31 Aug. 1957 the Federation of Malaya became an independent state with Tuanku Abdul Rahman as the first prime minister.

The concept of Malaysia as a broader federation including Sabah, Sarawak, Singapore and the British protectorate of Brunei, was first suggested by Abdul Rahman in 1961. It was opposed by neighbouring Indonesia and the Philippines, but public support in Sabah and Sarawak led to Malaysia's formation in Sept. 1963, although Brunei declined to join. The new nation faced continuing hostility from Indonesia, led by Ahmed Sukarno, over the sovereignty of Borneo. Disagreements with Singapore's Prime Minister Lee Kuan Yew ended with Singapore declaring independence in 1965. Tension arose between the Chinese and Malay communities over the use of the Malay language and Malay fears about Chinese economic dominance. The 1969 elections were fought on the highly emotional issues of education and language. When the Alliance party failed to obtain a majority, rioting and serious inter-ethnic violence followed and an emergency government was set up, led by Deputy Prime Minister Abdul Razak. Parliamentary rule was restored in 1971 when Razak launched the New Economic Policy—a series of five-year plans to eradicate poverty and restructure society to improve ethnic relations, specifically by encouraging ethnic Malays, the *bumiputera*, to shift from subsistence agriculture into the mainstream economy.

Mahathir Mohamad was the first non-royal or non-aristocrat to become prime minister of Malaysia, winning the 1981 elections for the UMNO and leading the National Front coalition to further victories in 1986, 1990, 1995 and 1999. Mahathir shifted the economy away from dependence on commodities and towards manufacturing, services and tourism, aided by substantial Japanese and east Asian investment in manufacturing. The prolonged spell of economic growth and stability was broken by the 1997–98 recession but Mahathir refused to accept financial aid from the International Monetary Fund. In Sept. 1998 Mahathir dismissed Anwar Ibrahim, his finance minister, deputy prime minister and heir apparent. Anwar was found guilty of corruption charges in 1999 and sentenced to prison for six years. In 2002 Mahathir announced that he would resign from the presidency of UMNO and he stepped down as prime minister on 31 Oct. 2003, to be succeeded by Abdullah Ahmad Badawi. Badawi won a landslide victory in the March 2004 general elections for the National Front. In Sept. 2004 Anwar was unexpectedly released after being acquitted by the Federal Court.

#### TERRITORY AND POPULATION

The federal state of Malaysia comprises the 13 states and three federal territories of Peninsular Malaysia, bounded in the north by Thailand, and with the island of Singapore as an enclave on its southern tip; and, on the island of Borneo to the east, the state of Sabah (which includes the federal territory of the island of Labuan), and the state of Sarawak, with Brunei as an enclave, both bounded in the south by Indonesia and in the northwest and northeast by the South China and Sulu Seas.

The area of Malaysia is 330,803 sq. km (127,724 sq. miles), and the 2010 census population 28,334,135; density, 85.7 per sq. km. Malaysia's national waters cover 515,256 sq. km. In 2005, 67.3% of the population lived in urban areas.

The UN gives a projected population for 2015 of 30.71m.

The growth of the population has been:

Year	Peninsular			Total Malaysia
	Malaysia	Sarawak	Sabah/Labuan	
1980	10,944,844	1,235,553	955,712	13,136,109
1991	14,131,723	1,642,771	1,788,926	17,563,420
2000	17,649,266	2,009,893	2,539,117	22,198,276
2010	22,569,345	2,471,140	3,293,650	28,334,135

The areas, populations and chief towns of the states and federal territories are:

Peninsular states	Area (in sq. km)	Population (2010 census)	Chief town	Population (2000 census)
Johor	19,210	3,348,283	Johor Bharu	642,944
Kedah	9,500	1,947,651	Alor Star	186,433
Kelantan	15,099	1,539,601	Kota Bharu	251,801
Kuala Lumpur <sup>1</sup>	243	1,674,621	Kuala Lumpur	1,305,792 <sup>1</sup>
Melaka	1,664	821,110	Melaka	151,082
Negeri Sembilan	6,686	1,021,064	Seremban	290,709
Pahang	36,137	1,500,817	Kuantan	288,727
Perak	21,035	2,352,743	Ipoh	536,832
Perlis	821	231,541	Kangar	54,282
Pulau Pinang (Penang)	1,048	1,561,383	Penang (Georgetown)	181,380
Putrajaya <sup>1</sup>	46	72,413	Putrajaya	—
Selangor	8,108	5,462,141	Shah Alam	314,440
Terengganu	13,035	1,035,977	Kuala Terengganu	255,518
<i>Other states</i>				
Labuan <sup>1</sup>	91	86,908	Victoria	—
Sabah	73,631	3,206,742	Kota Kinabalu	306,920
Sarawak	124,450	2,471,140	Kuching	422,240

<sup>1</sup>Federal territory.

Other large cities (2000 census population): Klang (626,699), Ampang Jaya (478,613), Subang Jaya (437,121), Petaling Jaya (432,619), Sandakan (276,791) and Tawau (213,745).

Putrajaya, a planned new city described as an 'intelligent garden city', became the administrative capital of Malaysia in 1999 and was created a federal territory on 1 Feb. 2001.

Bahasa Malaysia (Malay) is the official language of the country—50% of the population are Malays. The government promotes the use of the national language to foster national unity. However, the people are free to use their mother tongue and other languages. English as the second language is widely used in business. In Peninsular Malaysia Chinese dialects and Tamil are also spoken. In Sabah there are numerous tribal dialects and Chinese (Mandarin and Hakka dialects predominate). In Sarawak Mandarin and numerous tribal languages are spoken. In addition to Malays, 22% of the population are Chinese, 12% other indigenous ethnic groups, 7% Indians and 9% others.

## SOCIAL STATISTICS

2007 estimated births, 481,000; deaths, 120,000. 2007 rates (per 1,000 population): birth, 18.1; death, 4.5. Life expectancy, 2007: males, 71.9 years; females, 76.6 years. Annual population growth rate, 2000–08, 1.9%. Infant mortality, 2005, ten per 1,000 live births; fertility rate, 2007, 2.3 births per woman. Today only 6% of Malaysians live below the poverty line, compared to 50% in the early 1970s.

## CLIMATE

Malaysia lies near the equator between latitudes 1° and 7° North and longitudes 100° and 119° East. Malaysia is subject to maritime influence and the interplay of wind systems which originate in the Indian Ocean and the South China Sea. The year is generally divided into the South-East and the North-East Monsoon seasons. The average daily temperature throughout Malaysia varies from 21°C to 32°C. Humidity is high.

## CONSTITUTION AND GOVERNMENT

The Constitution of Malaysia is based on the Constitution of the former Federation of Malaya, but includes safeguards for the special interests of Sabah and Sarawak. It was amended in 1983. The Constitution provides for one of the Rulers of the Malay States to be elected from among themselves to be the *Yang di-Pertuan Agong* (Supreme Head of the Federation). He holds office for a period of five years. The Rulers also elect from among

themselves a Deputy Supreme Head of State, also for a period of five years. In Feb. 1993 the Rulers accepted constitutional amendments abolishing their legal immunity.

*Supreme Head of State (Yang di-Pertuan Agong)*. Tuanku Abdul Halim Muadzam Shah ibni Al-Marhum Sultan Badlishah, b. 1927, acceded 13 Dec. 2011.

*Sultan of Johor*. Tuanku Ibrahim Ismail ibni Al-Marhum Sultan Iskandar, b. 1958, acceded 23 Jan. 2010.

*Sultan of Kedah*. Tuanku Abdul Halim Muadzam Shah ibni Al-Marhum Sultan Badlishah, b. 1927, acceded 15 July 1958.

*Sultan of Kelantan*. Sultan Muhammad V (Tuanku Muhammad Faris Petra ibni Sultan Ismail Petra), b. 1979, acceded 13 Sept. 2010 (but disputed by Tuanku Ismail Petra Sultan Yahya Petra—the previous sultan and his ailing father).

*Yang Di-Pertuan Besar Negeri Sembilan*. Tuanku Muhriz ibni Al-Marhum Tuanku Munawir, b. 1948, acceded 29 Dec. 2008.

*Sultan of Pahang*. Sultan Haji Ahmad Shah Al-Musta'in Billah ibni Al-Marhum Sultan Abu Bakar Ri'ayatuddin Al-Mu'adzam Shah, b. 1930, acceded 7 May 1974.

*Sultan of Perak*. Sultan Azlan Muhibuddin Shah ibni Al-Marhum Sultan Yusuff Izzuddin Shah Ghafarullah, b. 1928, acceded 3 Feb. 1984.

*Raja of Perlis*. Tuanku Syed Sirajuddin ibni Al-Marhum Syed Putra Jamalullail, b. 1943, acceded 17 April 2000.

*Sultan of Selangor*. Sultan Sharafuddin Idris Shah Alhaj ibni Al-Marhum Sultan Salahuddin Abdul Aziz Shah Alhaj, b. 1945, acceded 22 Nov. 2001.

*Sultan of Terengganu*. Tuanku Mizan Zainal Abidin ibni al-Mahrum Sultan Mahmud Al-Muktafi Billah Shah, b. 1962, acceded 15 May 1998.

*Yang di-Pertua Negeri Melaka*. Tun Mohd Khalil bin Yaakob, b. 1937, appointed 4 June 2004.

*Yang di-Pertua Negeri Pulau Pinang (Penang)*. Tun Haji Abdul Rahman bin Haji Abbas, b. 1938, appointed 1 May 2001.

*Yang di-Pertua Negeri Sabah*. Tun Haji Juhar bin Haji Mahiruddin, b. 1953, appointed 1 Jan. 2011.

*Yang di-Pertua Negeri Sarawak*. Tun Datuk Patinggi Abang Haji Muhammad Salahuddin, b. 1921, appointed 4 Dec. 2000.

The federal parliament consists of the *Yang di-Pertuan Agong* and two *Majlis* (Houses of Parliament) known as the *Dewan Negara* (Senate) of 70 members (26 elected, two by each state legislature; and 44 appointed by the *Yang di-Pertuan Agong*) and the *Dewan Rakyat* (House of Representatives) of 222 members. Appointment to the Senate is for three years. The maximum life of the House of Representatives is five years, subject to its dissolution at any time by the *Yang di-Pertuan Agong* on the advice of his Ministers.

## National Anthem

'Negaraku' ('My Country'); words collective, tune by Pierre de Béranger.

## GOVERNMENT CHRONOLOGY

Supreme Heads of State since 1957.

1957–60	Tuanku Abdul Rahman ibni al-Marhum
1960	Tuanku Hisamuddin Alam Shah ibni al-Marhum
1960–65	Syed Harun Petra ibni al-Marhum
1965–70	Tuanku Ismail Nasiruddin Shah ibni al-Marhum
1970–75	Tuanku Abdul Halim Muadzam Shah ibni al-Marhum
1975–79	Tuanku Yahaya Petra ibni al-Marhum
1979–84	Tuanku Ahmad Shah al-Mustain Billah ibni al-Marhum
1984–89	Tuanku Mahmud Iskandar ibni al-Marhum
1989–94	Tuanku Azlan Muhibuddin Shah ibni al-Marhum
1994–99	Tuanku Jaafar ibni al-Marhum

1999–2001	Tuanku Salehuddin Abdul Aziz Shah ibni al-Marhum
2001–06	Tuanku Syed Sirajuddin ibni al-Marhum
2006–11	Tuanku Mizan Zainal Abidin ibni al-Marhum Sultan Mahmud
2011–	Tuanku Abdul Halim Muadzam Shah ibni Al-Marhum Sultan Badlishah

Prime Ministers since 1957. (UMNO = United Malays National Organization)

1957–59	UMNO	Tunku Abdul Rahman Putra
1959	UMNO	Tun Abdul Razak bin Hussein (acting)
1959–70	UMNO	Tunku Abdul Rahman Putra
1970–76	UMNO	Tun Abdul Razak bin Hussein
1976–81	UMNO	Hussein bin Onn
1981–2003	UMNO	Mahathir bin Mohamad
2003–09	UMNO	Abdullah bin Haji Ahmad Badawi
2009–	UMNO	Najib Tun Razak

### RECENT ELECTIONS

Elections to the *Dewan Rakyat* and 13 state assemblies were held on 8 March 2008. The 14-party National Front Coalition (BN; Barisan Nasional) gained 140 seats, obtaining 50.3% of the votes cast (the predominant partner, the United Malays National Organization (UMNO), won 79 seats). Opposition parties won 82 seats of which the People's Justice Party (Parti Keadilan Rakyat) won 31 (18.6%), the Democratic Action Party (Parti Tindakan Demokratik) won 28 (13.8%) and the Islamic Party of Malaysia (PAS) won 23 (14.1%). The National Front Coalition gained a majority in eight of the 13 state assemblies. Previously it had held every state except Kelantan.

### CURRENT GOVERNMENT

In March 2012 the government comprised:

*Prime Minister and Minister of Finance:* Dato' Sri Haji Mohd Najib bin Tun Haji Abdul Razak; b. 1953 (UMNO; took office on 3 April 2009).

*Deputy Prime Minister and Minister of Education:* Tan Sri Dato' Haji Muhiyiddin bin Mohamed Yassin. *Minister of Transport:* Datuk Seri Kong Cho Ha. *Plantation Industries and Commodities:* Tan Sri Bernard Giluk Dompok. *Home Affairs:* Dato' Seri Hishammuddin bin Tun Hussein. *Information, Communications, Arts and Culture:* Dato' Seri Utama Dr Rais Yatim. *Energy, Green Technology and Water:* Datuk Peter Chin Fah Kui. *Rural and Regional Development:* Dato' Seri Haji Mohd Shafie bin Haji Apdal. *Higher Education:* Dato' Seri Mohamed Khaled bin Nordin. *International Trade and Industry:* Dato' Mustapa bin Mohamed. *Science, Technology and Innovation:* Datuk Dr Maximus Johnity Ongkili. *Natural Resources and the Environment:* Datuk Douglas Uggah Embas. *Tourism:* Dato' Sri Dr Ng Yen Yen. *Agriculture and Agro-Based Industry:* Dato' Haji Noh bin Omar. *Defence:* Dato' Seri Dr Ahmad Zahid bin Hamidi. *Works:* Dato' Shaziman bin Abu Mansor. *Health:* Dato' Sri Liow Tiong Lai. *Youth and Sports:* Dato' Ahmad Shabery Cheek. *Human Resources:* Datuk Dr S. Subramaniam. *Domestic Trade and Consumer Affairs:* Dato' Sri Ismail Sabri bin Yaakob. *Women, Family and Community Development:* Dato' Seri Shahrizat Abdul Jalil. *Foreign Affairs:* Datuk Anifah bin Haji Aman. *Federal Territories:* Dato' Raja Nong Chik bin Dato' Raja Zainal Abidin. *Housing and Local Government:* Datuk Wira Chor Chee Heung. *Second Minister of Finance:* Dato' Haji Ahmad Husni bin Mohamad Hanadzlah. *Ministers in Prime Minister's Department:* Tan Sri Dr Koh Tsu Koon; Dato' Seri Mohamad Nazri bin Abdul Aziz; Tan Sri Nor Mohamed bin Yakcop; Dato' Maj.-Gen. Jamil Khir bin Baharom; Dato' Sri Idris Jala; Datuk G. Palanivel.

*Office of the Prime Minister:* <http://www.pmo.gov.my>

### CURRENT LEADERS

**Dato' Sri Haji Mohd Najib bin Tun Haji Abdul Razak**

#### *Position*

Prime Minister

#### *Introduction*

Dato' Sri Haji Mohd Najib bin Tun Haji Abdul Razak became prime minister on 3 April 2009, replacing Abdullah bin Haji Ahmad Badawi, who left office following the poor showing of the Barisan Nasional (National Front Coalition) at the general election of March 2008. Najib had replaced Badawi as head of the United Malays National Organization (UMNO), the senior party in the coalition, in March 2009.

#### *Early Life*

Najib was born on 23 July 1953 in Kuala Lipis, Pahang, into a political family. His father was independent Malaysia's second prime minister and his uncle was its third. Najib was educated at St John's Institution, Kuala Lumpur, and at Malvern College in England before graduating from the University of Nottingham in 1974 with a bachelor's degree in industrial economics.

In 1976 he became Malaysia's youngest member of parliament when he stood uncontested for his late father's seat of Pekan. In his first year as an MP, Najib was appointed deputy minister of energy, telecommunications and posts. He was later appointed deputy minister of education and deputy minister of finance. In 1981 he joined UMNO's Supreme Council and the following year became the Menteri Besar (Chief Executive) of Pahang state.

Najib became vice president of UMNO Youth in 1982, a post he also held from 1987–93. Having lost his Pekan parliamentary seat, he regained it at the elections of 1986 and was appointed minister of culture, youth and sports. He went on to hold several other cabinet portfolios including defence and education. On 7 Jan. 2004 Najib was selected as Badawi's deputy and given the defence portfolio. In July 2004 he stood unopposed for the vice presidency of UMNO.

Although Barisan Nasional won the election of 2008, it was with a much reduced majority. Badawi named Najib as his likely successor and on 17 Sept. 2008 Najib was handed the finance portfolio as part of a gradual power transfer. On 26 March 2009 he stood unopposed for the UMNO presidency, ensuring him the post of prime minister when Badawi resigned on 2 April 2009.

#### *Career in Office*

Najib took office promising reform and change but faced the immediate challenges of a severe economic downturn, a divided UMNO and the increasing unpopularity of the ruling coalition that opponents accused of corruption and complacency. He slimmed the cabinet from 32 ministers to 28, but a financial stimulus of RM60bn. was met with a lukewarm response. He has since faced controversies relating to allegations of an ongoing political conspiracy against former deputy prime minister Anwar Ibrahim, the murder of a Mongolian woman in which several associates (including his wife) were implicated, and problems with the national service programme that he devised and in which several conscripts have died.

In March 2010 Najib unveiled details of a New Economic Model, intended to more than double per capita income by 2020. The plan aims to promote greater private-sector investment and to revise a controversial ethnically-based affirmative action policy as the nation strives to become a high-income economy.

In response to anti-government demonstrations in Kuala Lumpur in July 2011, which met with a heavy police response, Najib announced in Aug. the establishment of a parliamentary committee to consider the protesters' demands for electoral reform. The following month he promised to repeal longstanding internal security legislation and to relax press censorship.

## Tuanku Abdul Halim Muadzam Shah ibni Sultan Badlishah

### Position

King (Yang di-Pertuan Agong)

### Introduction

Tuanku (His Majesty) Abdul Halim was installed as the 14th Yang di-Pertuan Agong on 13 Dec. 2011 following his election to the five-year post by the Conference of Rulers in Oct. 2011. He had previously held the largely ceremonial role from 1970–75.

### Early Life

Tuanku Abdul Halim Muadzam Shah was born on 28 Nov. 1927 in Anak Bukit, Kedah. He received his early education at Alor Merah and Titi Gajah Malay schools and from 1946–48 studied at the Sultan Abdul Hamid College, Alor Star. On 6 Aug. 1949 he was appointed Raja Muda (heir apparent) to his father, the Sultan of Kedah.

In 1952 Tuanku Abdul Halim attended Wadham College, Oxford, where he obtained a diploma in social science and public administration. On his return to Malaya, he joined the Kedah Administrative Service, serving with the Alor Star district office and the state treasury.

On his father's death on 15 July 1958, Tuanku Abdul Halim became the 28th Sultan of Kedah. He was crowned on 20 Feb. 1959. On 21 Sept. 1965 he was selected as deputy Yang di-Pertuan Agong by the Conference of Rulers and on 21 Sept. 1970 was appointed to the throne as the fifth Yang di-Pertuan Agong. He completed his term on 20 Sept. 1975. During his tenure he presided over the first transition of civilian governments when the prime minister, Tunku Abdul Rahman, resigned in favour of his deputy, Tun Abdul Razak.

On 2 Nov. 2006 Tuanku Abdul Halim was elected deputy Yang di-Pertuan Agong for the second time. At a special meeting of the Conference of Rulers on 14 Oct. 2011 he was selected to serve a second term as the Yang di-Pertuan Agong. He became the first of the nine hereditary state rulers of the Conference of Rulers to serve two terms.

### Career in Office

The role of Yang di-Pertuan Agong is mainly ceremonial although royal assent is necessary for all laws passed in parliament and the appointment of members of the cabinet and the judiciary. Tuanku Abdul Halim will also serve as the nominal commander-in-chief and as the Islamic head of a large population of Malay Muslims. He took on the role at a time when race and religious relations in Malaysia were fragile.

## DEFENCE

The Constitution provides for the Head of State to be the Supreme Commander of the Armed Forces who exercises his powers in accordance with the advice of the Cabinet. Under their authority, the Armed Forces Council is responsible for all matters relating to the Armed Forces other than those relating to their operational use. The Ministry of Defence has established bilateral defence relations with countries within as well as outside the region. Malaysia is a member of the Five Powers Defence Arrangement with Australia, New Zealand, Singapore and the UK.

The Malaysian Armed Forces has participated in 24 UN peacekeeping missions in Africa, the Middle East, Indo-China and Europe. Five of the operations are military contingents, the remainder are Observer Groups.

Since 2004 a lottery system has been in place to choose conscripts to serve three months of national service. In 2008 defence expenditure totalled US\$4,370m. (US\$173 per capita), representing 2.0% of GDP.

## Army

Strength (2007) about 80,000. There is a paramilitary Police General Operations Force of 18,000 and a People's Volunteer Corps of 240,000 of which some 17,500 are armed.

## Navy

The Royal Malaysian Navy is commanded by the Chief of the Navy from the integrated Ministry of Defence in Kuala Lumpur. The main base is at Lumut, with other bases at Kuantan, Labuan, Sandakan, Semporna, Sepanggar and Tanjung Pengelih. Further bases are under construction at Langkawi and Sejingkat. The peacetime tasks include fishery protection and anti-piracy patrols. The fleet includes two submarines, three frigates and eight corvettes. The two Scorpene-class submarines were jointly built by French and Spanish firms and were delivered in Sept. 2009 and July 2010 respectively. A Naval aviation squadron operates six helicopters although serviceability is in doubt.

Navy personnel in 2007 totalled 14,000 including 160 Naval Air personnel. There were 1,000 naval reserves.

In addition, there is a maritime enforcement agency some 4,500 strong and 2,100 marine police.

## Air Force

Formed on 1 June 1958, the Royal Malaysian Air Force is equipped primarily to provide air defence and air support for the Army, Navy and Police. Its secondary role is to render assistance to government departments and civilian organizations.

Personnel (2007) totalled 15,000, with 68 combat capable aircraft including F-5Es, MiG-29s and British Aerospace *Hawks*. There were 600 Air Force reserves.

## INTERNATIONAL RELATIONS

Malaysia was in dispute with Indonesia over sovereignty of two islands in the Celebes Sea. Both countries agreed to accept the Judgment of the International Court of Justice which decided in favour of Malaysia in Dec. 2002.

## ECONOMY

In 2006 agriculture accounted for 8.7% of GDP, industry 49.9% and services 41.3%.

### Overview

Malaysia has transformed itself from an economy dependent on mineral production and agriculture into one based on industrialization and manufacturing. The Economist Intelligence Unit (EIU) estimated that in 2004 electronic manufacturing accounted for 37.9% of the country's total exports, making Malaysia vulnerable to fluctuations in global electronics demand. It also exports oil and gas and has benefited from high energy prices. The state oil company, Petronas, supplies 40% of government revenue, although efforts are being made to reduce this dependency.

In the decade up to the 1997 Asian financial crisis, the economy grew at an annual rate of 7–10%. In 1998 it was hit hard by twin currency and banking crises, shrinking by 7.4%. In response, the government sought to boost growth via spending on large infrastructure projects.

When global recession cut export demand in 2001, the country managed to avoid recession by introducing a US\$1.9bn. fiscal stimulus package. Despite continued weak global demand and the outbreak of SARS, the economy recovered in 2002 with growth of 5.4%. A rebound in the global economy and electronics demand buoyed the economy in 2004–05. The depegging of the ringgit from the dollar in July 2005 is seen as an important step toward broad-based growth.

The economy was hit hard by the global financial crisis in 2008 and experienced a sharp downturn in 2009. However, a fiscal stimulus package and revivals in external demand, private consumption and investment helped drive a strong recovery. FDI inflows returned to pre-crisis levels in 2010.

### Currency

The unit of currency is the Malaysian *ringgit* (RM) of 100 *sen*. For seven years it was pegged to the US dollar at 3.8 ringgit = 1 US\$, but since the revaluation of the Chinese yuan on 21 July 2005 it has been allowed to operate in a managed float. Foreign exchange reserves were US\$92,217m. and gold reserves 1.17m. troy oz in Sept. 2009. Inflation rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
1.4%	1.8%	1.1%	1.4%	2.9%	3.6%	2.0%	5.4%	0.6%	1.7%

Total money supply in April 2009 was RM179,274m.

### Budget

In 2007 revenues were RM139,885m. and expenditures RM163,648m. Tax revenue accounted for 68.0% of revenues in 2007; current expenditure accounted for 75.2% of expenditures.

There is a sales tax of 6–10%.

### Performance

Malaysia was badly affected by the Asian financial crisis, with the economy contracting by 7.4% in 1998. The country narrowly avoided a recession in 2001 but failed to do so in the global financial crisis of 2009. Real GDP growth rates (based on IMF statistics):

2002	2003	2004	2005	2006	2007	2008	2009	2010
5.4%	5.8%	6.8%	5.3%	5.8%	6.5%	4.8%	-1.6%	7.2%

Total GDP in 2010 was US\$237.8bn.

### Banking and Finance

The central bank and bank of issue is the Bank Negara Malaysia (*Governor*, Dr Zeti Akhtar Aziz). In 2002 there were 47 domestic commercial banks, merchant banks and finance companies. Total deposits of commercial banks, finance companies and merchant banks at 31 Dec. 2005 were RM140.6bn. The largest commercial bank is Malayan Banking Berhad (Maybank), with assets in 2009 of RM238.3bn. The Islamic Bank of Malaysia began operations in July 1983. In Jan. 2006 there were 54 banks licensed by the Labuan Offshore Financial Services Authority (LOFSA).

There is a stock exchange at Kuala Lumpur, known as Bursa Malaysia.

## ENERGY AND NATURAL RESOURCES

### Environment

Malaysia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 6.4 tonnes per capita.

### Electricity

Installed capacity in 2007, 23.0m. kW. In 2007, 101,325m. kWh were generated (94,840m. kWh thermal and 6,485m. kWh hydro-electric). Consumption per capita in 2007 was 3,574 kWh.

### Oil and Gas

Oil reserves, 2008, 5.5bn. bbls. Oil production, 2008, was 34.3m. tonnes. In 2007 exports of oil stood at 16.4m. tonnes. Natural gas reserves, 2008, 2,390bn. cu. metres. Production of natural gas in the same year was 62.5bn. cu. metres. In April 1998 Malaysia and Thailand agreed to share equally the natural gas jointly produced in an offshore area (the Malaysian-Thailand Joint Development Area) which both countries claim as their own territory.

### Minerals

In 2004 mining contributed 7.0% of GDP. Production in 2004 (in tonnes): aggregate, 51,236,000; limestone, 19,968,000; sand and gravel, 18,371,000; iron ore, 663,732; silica sand, 631,402; coal, 389,176; kaolin, 326,928; ilmenite concentrate, 61,471; gold, 4,221 kg.

### Agriculture

In 2002 agriculture contributed 9.2% of GDP. There were an estimated 1.80m. ha. of arable land in 2002 and 5.79m. ha. of permanent crops. In 2002 approximately 365,000 ha. were irrigated. Production in 2003 (in 1,000 tonnes): palm kernels, 3,550; rice, 2,145; sugarcane, 1,600; coconuts, 740; rubber, 589; bananas, 500; cassava, 370; pineapples, 255. Livestock (2002): pigs, 1.82m.; cattle, 748,000; goats, 248,000; sheep, 118,000; buffaloes, 154,000; chickens, 161m. Oil palms account for 75% of Malaysia's agricultural area. Malaysia's output of palm kernels is the highest of any country.

### Forestry

In 2005 there were 20.89m. ha. of forests, or 63.6% of the total land area. Timber production in 2007 was 25.15m. cu. metres.

### Fisheries

Total catch in 2005 amounted to 1,214,183 tonnes, almost entirely from sea fishing. Imports of fishery commodities were valued at US\$582m. in 2008 and exports at US\$777m.

## INDUSTRY

The leading companies by market capitalization in Malaysia in March 2011 were: Malayan Banking (US\$21.7bn.); and CIMB Group Holdings, a financial services provider (US\$20.1bn.).

In 2001 industry accounted for 48.3% of GDP, with manufacturing contributing 30.5%. Production figures for 2001 (in 1,000 tonnes): cement, 13,820; palm oil (2002), 11,909; distillate fuel oil (2007), 8,891; petrol (2007), 5,029; residual fuel oil (2007), 2,006; refined sugar, 1,210; wheat flour, 664; plywood (2002), 4,341,000 cu. metres; cigarettes, 25.6bn. units; radio sets, 28.8m. units; pneumatic tyres, 13.1m. units; TV sets, 9.5m. units.

### Labour

In 2001 the workforce was 9,892,000 (46.7% female in 2000), of whom 9,535,000 were employed (22.6% in manufacturing, 14.2% in agriculture, forestry and fishing, 10.5% in government services and 8.9% in construction). Unemployment was 3.8% in 2002. It is estimated that Malaysia has some 500,000 illegal workers.

## INTERNATIONAL TRADE

Privatization policy permits foreign investment of 25–30% generally; total foreign ownership is permitted of export-oriented projects. External debt was US\$50,981m. in 2005.

### Imports and Exports

In 2006 imports totalled US\$124,144m. and exports US\$160,842m. The trade surplus in 2006 was US\$36.7bn., up from US\$18.1bn. in 2002.

Main imports, 2006: electrical machinery, apparatus and appliances, 31.9%; manufactured goods, 11.6%; petroleum and petroleum products, 8.3%; chemicals and related products, 7.8%. Chief exports, 2006: electrical machinery, apparatus and appliances, 21.3%; office machines and computers, etc., 17.4%; telecommunications, sound recording and reproducing equipment, 9.0%; petroleum and petroleum products, 8.9%.

The principal import sources in 2006 were: Japan (13.2%), USA (12.5%), China (12.1%), Singapore (11.7%). The leading export markets were: USA (18.8%), Singapore (15.4%), Japan (8.9%), China (7.2%).

## COMMUNICATIONS

### Roads

Total road length in 2004 was 109,333 km, of which 82.8% were paved. In 2006 there were 7,024,000 passenger cars in use, 60,000 buses and coaches, 836,600 lorries and vans, and 7,458,100 motorcycles and mopeds. There were 6,287 deaths as a result of road accidents in 2006, which at 24.1 per 100,000 people ranks among the highest rates in the world.

## Rail

Length of route in 2004, 1,667 km, of which 150 km were electrified. The Malayan Railway carried 34.6m. passengers and 4.1m. tonnes of freight in 2005; the Sabah State Railway carried 347,000 passengers and 500,000 tonnes of freight. A railway from Kuala Lumpur to the international airport opened in 2002 and carried 10m. passengers in 2003. There are two metro systems in Kuala Lumpur with a combined length of 56 km.

## Civil Aviation

There are a total of 19 airports of which five are international airports and 14 are domestic airports at which regular public air transport is operated. *International airports:* Kuala Lumpur, Penang, Kota Kinabalu, Kuching and Langkawi. *Domestic airports:* Johor Bharu, Alor Star, Ipoh, Kota Bharu, Kuala Terengganu, Kuantan, Melaka, Sandakan, Lahad Datu, Tawau, Labuan, Bintulu, Sibul and Miri. There are 39 Malaysian airstrips of which ten are in Sabah, 15 in Sarawak and 14 in peninsular Malaysia.

In 2003, 40 international airlines operated through Kuala Lumpur (KLIA-Sepang). Malaysia Airlines, the national airline, is 52% state-owned, and operates domestic flights within Malaysia and international flights to nearly 40 different countries. A low-cost airline, AirAsia, began operations in Nov. 1996; its budget sister long-haul carrier, Air Asia X, started flying in Nov. 2007. In 2005 scheduled airline traffic of Malaysian-based carriers flew 282.7m. km, carrying 23,026,000 passengers. In 2001 Kuala Lumpur handled 14,208,055 passengers (10,044,013 on international flights) and 423,712 tonnes of freight. Kota Kinabalu handled 2,912,802 passengers in 2001 and Kuching 2,544,502.

## Shipping

The major ports are Port Kelang, Pulau Pinang, Johor Pasir Gudang, Tanjung Beruas, Miri, Rajang, Pelabuhan Sabah, Port Dickson, Kemaman, Teluk Ewa, Kuantan, Kuching and Bintulu. Port Kelang, the busiest port, handled 152,348,000 freight tons of cargo in 2008; container throughput in 2008 was 7,974,000 TEUs (twenty-foot equivalent units), making it Malaysia's busiest container port. In Jan. 2009 there were 457 ships of 300 GT or over registered, totalling 6.43m. GT. Of the 457 vessels registered, 189 were general cargo ships, 130 oil tankers, 45 container ships, 34 liquid gas tankers, 26 passenger ships, 20 chemical tankers and 13 bulk carriers. The Malaysian-controlled fleet comprised 307 vessels of 1,000 GT or over in Jan. 2009, of which 242 were under the Malaysian flag and 65 under foreign flags.

## Telecommunications

In 2008 there were 4,292,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 27,713,000 (1,025.9 per 1,000 persons). There were 6,040,000 PCs in use in 2006 and 15,074,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The highest judicial authority and final court of appeal is the Federal Court. There are also two High Courts, one for Peninsular Malaysia and one for the States of Sabah and Sarawak, as well as a system of subordinate courts (comprising Magistrate Courts and Sessions Courts).

The Federal Court comprises the Chief Justice—the head of the Malaysian judiciary—the President of the Court of Appeal, the Chief Judges of the two High Courts and four other judges. It has jurisdiction to determine the validity of any law made by Parliament or by a State legislature and disputes between States or between the Federation and any State. It also has jurisdiction to hear and determine appeals from the High Courts.

The death penalty is authorized, and was reportedly used in 2010. The population in penal institutions in 2007 was 50,305 (192 per 100,000 of national population).

## Education

School education is free; tertiary education is provided at a nominal fee. There are six years of primary schooling starting at age seven, three years of universal lower secondary, two years of selective upper secondary and two years of pre-university education. During the Seventh Plan period (1996–2000), a number of major changes were introduced to the education and training system with a view to strengthening and improving the system. These efforts were aimed at improving the quality of output to meet the manpower needs of the nation, particularly in the fields of science and technology. In addition, continued emphasis will be given to expand educational opportunities for those in the rural and remote areas. Under the Seventh Plan, the Education Ministry allocated RM8,437,200 on this education programme and RM1,661,600 for training purposes.

In 2005 there were 3,133,399 pupils at primary schools with 194,872 teaching staff, 2,489,117 pupils with 146,503 teaching staff at secondary schools and (2006) 749,165 students and 39,809 academic staff at higher education institutions.

Adult literacy was 92% in 2008.

In 2006 public expenditure on education came to 4.7% of GNI.

## Health

In 2001 there were 15,619 doctors, 2,144 dentists, 31,129 nurses and 2,333 pharmacists. In 2001 the Ministry of Health ran a total of 855 health clinics and 1,744 dental clinics. In 2002 there were 323 hospitals (provision of 16 beds per 10,000 inhabitants).

## Welfare

The Employment Injury Insurance Scheme (SOCISO) provides medical and cash benefits and the Invalidity Pension Scheme provides protection to employees against invalidity as a result of disease or injury from any cause. Other supplementary measures are the Employees' Provident Fund, the pension scheme for all government employees, free medical benefits for all who are unable to pay and the provision of medical benefits particularly for workers under the Labour Code. In 1998 there were 49 welfare service institutions with capacity for 7,170.

## RELIGION

Malaysia has a multi-racial population divided between Islam, Buddhism, Taoism, Hinduism and Christianity. Under the Federal constitution, Islam is the official religion of Malaysia but there is freedom of worship. In 2001 there were an estimated 10.77m. Muslims, 5.45m. adherents of Chinese traditional religions, 1.88m. Christians, 1.66m. Hindus and 1.50m. Buddhists.

## CULTURE

### World Heritage Sites

There are three sites in Malaysia that appear on the UNESCO World Heritage List: the Gunung Mulu National Park (inscribed on the list in 2000) with its limestone caves; Kinabalu Park/Mount Kinabalu (2000); and the historic cities of Melaka and Georgetown (2008) in the Straits of Malacca.

### Press

The Malaysian Media Agencies are comprised of the press, magazine and press agencies/local media, which are further divided into home and foreign news. In 2008 there were 50 daily newspapers with a combined circulation of 4,750,000. The dailies with the highest circulation are the Malay-language *Mingguan Malaysia* and the Chinese-language *Sin Chew Daily*.

### Tourism

In 2005 there were 16,431,000 non-resident tourists, spending US\$10,389m.

### Festivals

National Day (31 Aug.) is celebrated in Kuala Lumpur at the Dataran Merdeka and marks Malaysia's independence. The

Rainforest World Music Festival has been held annually in July in Kuching, Borneo since 1998.

# MALDIVES

Divehi Raajjeyge Jumhooriyyaa  
(Republic of the Maldives)

Capital: Malé

Population projection, 2015: 337,000

GNI per capita, 2011: (PPP\$) 5,276

HDI/world rank: 0.661/109

## KEY HISTORICAL EVENTS

Divehi-speaking people (a language related to Sinhalese) have lived on the Maldives since at least AD 400. Visited by Middle Eastern merchants from around AD 1000, the archipelago became an Islamic sultanate in 1153. Portuguese explorers occupied the island of Malé (the modern capital) from 1558 until they were expelled by Muhammad Thakurufaanu Al-Azam in 1573. The Dutch, who replaced the Portuguese as the dominant power in Ceylon in the mid-1600s, controlled Maldivian affairs until 1796, although the sultanate held sway over local administration. Thereafter the Maldives came under British protection (formalized in an agreement in 1887) until complete independence was achieved on 26 July 1965. A republic was declared on 11 Nov. 1968.

## TERRITORY AND POPULATION

The republic, some 650 km to the southwest of Sri Lanka, consists of 1,192 low-lying (the highest point is 2.4 metres above sea-level) coral islands, grouped into 19 atolls and two cities. 199 are

inhabited. Area 298 sq. km (115 sq. miles). At the 2006 census the population was 298,968; density, 1,003.2 per sq. km.

The UN gives a projected population for 2015 of 337,000.

In 2005, 70.4% of the population lived in rural areas. Capital, Malé (2006 population, 92,555).

The official and spoken language is Divehi.

## SOCIAL STATISTICS

2006 births, 5,827; deaths, 1,084. Birth rate, 2006, per 1,000 population, 19.5; death rate, 3.6. Annual population growth rate, 2000–05, 1.6%. Life expectancy at birth in 2007 was 69.7 years for males and 72.7 years for females. Infant mortality, 2005, 33 per 1,000 live births; fertility rate, 2008, 2.0 births per woman. The Maldives has had the largest reduction in its fertility rate of any country in the world over the past quarter of a century, having had a rate of 6.1 births per woman in 1990.

## CLIMATE

The islands are hot and humid, and affected by monsoons. Malé: average temperature 81°F (27°C), annual rainfall 59" (1,500 mm).

## CONSTITUTION AND GOVERNMENT

The present constitution came into effect on 1 Jan. 1998. There is a Citizens' *Majlis* (Parliament) which consists of 77 members all of whom are directly elected for a term of five years. Political parties were not permitted until the introduction of a multiparty system in June 2005. In a referendum held on 18 Aug. 2007 voters supported the retention of a presidential system, with 62.0% of votes cast in favour and 38.0% for a switch to a parliamentary system. The President of the Republic is elected by the Citizens' *Majlis*.

## National Anthem

'Gavmii mi ekuverikan matii tibegen kuriime salaam' ('In national unity we salute our nation'); words by M. J. Didi, tune by W. Amaradeva.

## RECENT ELECTIONS

The Maldives' first multi-party presidential elections were held on 8 and 29 Oct. 2008. Turnout in the first round was 85.4%. Incumbent president Maumoon Abdul Gayoom (Dhivehi Rayyithunge Party; DRP) won 40.3% of the vote, Mohamed Nasheed ('Anni') (Maldivian Democratic Party; MDP) 24.9%, Hassan Saeed (ind.) 16.7%, Qasim Ibrahim (Jumhooree Party) 15.2%, Umar Naseer (Islamic Democratic Party) 1.4% and Ibrahim Ismail (Social Liberal Party) 0.8%. A second round runoff was held on 29 Oct. 2008 which Mohamed Nasheed won with 54.2% of the vote against 45.8% for Maumoon Abdul Gayoom. Turnout was 86.6%.

Legislation passed in 2005 allowed political parties to stand for the first time in elections to the *Majlis* held on 9 May 2009. The DRP won 28 seats, the MDP 26, the People's Alliance 7, the Dhivehi Qaumeey Party 2 and the Justice Party 1. 13 seats went to independents.

## CURRENT GOVERNMENT

In March 2012 the government consisted of:

*President:* Dr Mohamed Waheed Hassan Manik; b. 1953 (National Unity Party; in office since 7 Feb. 2012).

*Vice President:* Mohamed Waheed Deen.

*Minister of Defence and National Security:* Mohamed Nazim.  
*Economic Development:* Ahmed Mohamed. *Education:* Asim Ahmed. *Finance:* Abdulla Jihad. *Fisheries and Agriculture:* Ahmed Shafeeu. *Foreign Affairs:* Abdul Samad Abdulla. *Health and*

*Family:* Dr Ahmed Jamsheed Mohamed. *Home Affairs:* Mohamed Jameel Ahmed. *Housing and Environment:* Mohamed Muizzu. *Human Resources, Youth and Sport:* Mohamed Hussain Shareef. *Islamic Affairs:* Sheikh Mohamed Shaheem Ali Saeed. *Tourism, Arts and Culture:* Ahmed Adheeb Abdul Ghafoor. *Transport and Communications:* Ahmed Shamheed. *Attorney General:* Uza Aishath Azima Shakooru.

*Speaker of Citizens' Majlis:* Abdulla Shahid.

*Office of the President:* <http://www.presidencymaldives.gov.mv>

## CURRENT LEADERS

### Mohammed Waheed Hassan

#### Position

President

#### Introduction

Mohammed Waheed Hassan took office as president on 7 Feb. 2012 after incumbent Mohamed Nasheed's resignation following public protests over the arrest of a senior judge. Waheed, formerly Nasheed's deputy, has pledged to uphold the rule of law and is expected to remain in office until presidential elections scheduled for 2013.

#### Early Life

Mohammed Waheed Hassan was born on 3 Jan. 1953 in the capital, Malé. He graduated in English Language and gained a diploma in teaching from the American University of Beirut in 1976, before returning to Malé to teach. In 1978 he became the first anchor on Maldivian television with TVM (Television Maldives).

Waheed won a scholarship to Stanford University, California, where he completed a masters degree in education planning in 1979. He joined the Maldivian ministry of education and in 1980 was appointed by President Gayoom as an adviser to a special session of the *Majlis* (parliament) tasked with reviewing the constitution.

In 1982 Waheed returned to Stanford to study political science. In 1987 he was awarded his PhD in international development education. In 1988 he was appointed director of educational services at the ministry of education and in 1989 won the seat of Malé in the general election. Having resigned over the poor human rights record of Gayoom's government, he left the Maldives in 1991 to work as a freelance consultant with the UN on educational development programmes.

In 2008 he set up the Gaumei Itthihaad party, which formed the 'MDP Itthihaad' with the Maldivian Democratic Party (MDP) to contest the 2008 elections. The coalition emerged victorious and on 11 Nov. 2008 Nasheed—a co-founder of the MDP in 2003—and Waheed were sworn into office as president and vice-president respectively. On 7 Feb. 2012 Nasheed resigned amid growing public unrest following the arrest of a senior judge, Abdullah Mohamed. Waheed was sworn in as president later that day, leading an administration consisting largely of technocrats and Gayoom appointees.

#### Career in Office

Waheed's first task was to rebut Nasheed's claim that his successor helped organize his removal from office. Waheed denied the charge but Nasheed's supporters nonetheless took to the streets to demand early elections. Waheed has appealed to the international community for support.

## DEFENCE

In 2008 military expenditure totalled US\$43m. (US\$111 per capita), representing 3.4% of GDP.

## ECONOMY

Fisheries accounts for approximately 7% of GDP, industry 15% and services 78%.

### Overview

Tourism accounts for approximately 28% of total GDP. Fisheries is the next biggest sector, with fish the largest export commodity.

The Maldives was badly affected by the tsunami of Dec. 2004 that left many dead and thousands displaced. GDP growth has been variable in recent years. In 2005 it stood at -4.6% (the result of the tsunami) but jumped to nearly 20% in 2006 prompted by a revival in tourism and the construction of new resorts. Government expenditure nearly doubled as a share of GDP from 2004-08, reaching 63% of GDP in 2008.

The global financial crisis had a severe impact on the nation, with sharp declines in tourism, construction, exports and investment. The banking sector was battered by an increase in non-performing loans. This combined with the high public spending of previous years led to a balance of payments crisis. A stand-by arrangement was approved by the IMF in Dec. 2009 and economic results since then have been better than anticipated, with tourism enjoying a particularly strong rebound. In Jan. 2011 the Maldives became only the third country to graduate from the UN's list of Least Developed Countries (LDCs) to 'developing country' status.

### Currency

The unit of currency is the *rufiyaa* (MVR) of 100 *laari*. There was inflation in 2008 of 12.3% and 4.0% in 2009. Gold reserves were 2,000 troy oz in July 2005, foreign exchange reserves were US\$218m. and total money supply was 3,163m. *rufiyaa*.

### Budget

In 2008 budgetary central government revenue totalled 7,414.2m. *rufiyaa* (including taxes, 3,366.8m. *rufiyaa*); expenditure totalled 7,463.2m. *rufiyaa*.

### Performance

After shrinking by 4.6% in 2005 as a consequence of the devastation wreaked by the tsunami, the economy rebounded spectacularly in 2006 with a real GDP growth rate of 19.6%, driven by the return of tourists, reconstruction efforts and new development. Although the economy contracted by 7.5% in 2009 there was growth of 7.1% in 2010. Total GDP in 2010 was US\$1.5bn.

### Banking and Finance

The Maldives Monetary Authority (*Governor*, Fazeel Najeeb), established in 1981, is endowed with the regular powers of a central bank and bank of issue. There is one domestic commercial bank (Bank of Maldives) and branches of four foreign banks.

There is a stock exchange in Malé.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 2.3 tonnes per capita in 2008.

### Electricity

Installed capacity was 61,000 kW in 2007. Production in 2007 was 245m. kWh; consumption per capita in 2007 was 804 kWh.

### Minerals

Inshore coral mining has been banned as a measure against the encroachment of the sea.

### Agriculture

There were approximately 4,000 ha. of arable land in 2007 and 8,000 ha. of permanent crops. Principal crops in 2003 (estimates, in 1,000 tonnes): coconuts, 36; copra, 6; bananas, 3; tree nuts, 2.

### Fisheries

The total catch in 2005 was 185,980 tonnes. The Maldives has the highest per capita consumption of fish and fishery products of any country in the world. In the period 2005–07 the average person consumed 142 kg (313 lb) a year, or more than eight times the average for the world as a whole.

### INDUSTRY

The main industries are fishing, tourism, shipping, lacquerwork and garment manufacturing.

### Labour

In 2005 the economically active workforce totalled 99,000 of whom 96,000 were employed. More than two-thirds of the working population are engaged in tourism.

### INTERNATIONAL TRADE

Total foreign debt amounted to US\$562m. in 2007.

### Imports and Exports

In 2008 imports (c.i.f.) were valued at US\$1,387.5m and exports (f.o.b.) at US\$126.4m. Tuna is the main export commodity. It is exported principally to Thailand, Sri Lanka and some European markets. Main import suppliers in 2008 were Singapore (21.3%), UAE (18.0%), India (10.4%), Malaysia (7.7%), Sri Lanka (5.9%). Leading export destinations were Thailand (49.0%), Sri Lanka (9.5%), France (8.8%), Italy (8.3%), UK (7.6%).

### COMMUNICATIONS

#### Roads

In 2007 there were 3,060 passenger cars in use (10 per 1,000 inhabitants), 26,780 motorcycles and mopeds, 2,870 lorries and vans, and 74 buses and coaches.

#### Civil Aviation

The former national carrier Air Maldives collapsed in April 2000 with final losses in excess of US\$50m. In 2003 there were 1,833,620 passenger arrivals, 21m. pieces of cargo and 100,352 pieces of mail handled at Malé's international airport. There are four domestic airports. In 2001 scheduled airline traffic of Maldives-based carriers flew 7m. km, carrying 367,000 passengers (226,000 on international flights).

#### Shipping

In Jan. 2009 there were 58 ships of 300 GT or over registered, totalling 130,000 GT.

#### Telecommunications

There were 48,000 fixed telephone lines in 2010 (152.0 per 1,000 inhabitants). Mobile phone subscribers numbered 494,400 in 2010. There were 283.0 internet users per 1,000 inhabitants in 2010. Fixed internet subscriptions totalled 20,100 in 2009 (64.4 per 1,000 inhabitants).

### SOCIAL INSTITUTIONS

#### Justice

Justice is based on the Islamic Sharia.

#### Education

Adult literacy in 2006 was 98%. Education is not compulsory. In 2004 there were 81 government schools (57,139 pupils), 176 community schools (38,043 pupils) and 337 private schools (104,214 pupils) with a total of 5,239 teachers. In 2005 public expenditure on education came to 7.8% of GDP and 15.0% of total government spending.

#### Health

In 2003 there were 236 beds at the Indira Gandhi Memorial Hospital in Malé, six regional hospitals (226 beds) and 27 health centres. In 2003 there were 315 doctors and 785 nurses, 251 pharmacists and 409 midwives.

### RELIGION

The State religion is Islam.

### CULTURE

#### Press

In 2005 there were 18 newspapers and 77 magazines.

#### Tourism

Tourism is the major foreign currency earner. There were a record 791,917 tourist arrivals in 2010, spending US\$714m.

# MALI

République du Mali  
(Republic of Mali)

*Capital:* Bamako

*Population projection, 2015:* 17.82m.

*GNI per capita, 2011:* (PPP\$) 1,123

*HDI/world rank:* 0.359/175

## KEY HISTORICAL EVENTS

Mali's power reached its peak between the 11th and 13th centuries when its gold-based empire controlled much of the surrounding area. The country was annexed by France in 1904. As French Sudan it was part of French West Africa. The country became an autonomous state within the French Community on 24 Nov. 1958, and on 4 April 1959 joined with Senegal to form the Federation of Mali. The Federation achieved independence on 20 June 1960, but Senegal seceded on 22 Aug. and Mali proclaimed itself an independent republic on 22 Sept. There was an army coup on 19 Nov. 1968, which brought Moussa Traoré to power. Ruling the country for over 22 years, he wrecked the economy. A further coup followed in March 1991.

In Jan. 1991 a ceasefire was signed with Tuareg insurgents in the north and in April 1992 a national pact was concluded providing for a special administration for the Tuareg north.

Under President Alpha Oumar Konaré, two elections for the National Assembly were held. The first (April 1997) was cancelled by the constitutional court and the second, in July 1997, was boycotted by opposition parties. Amadou Toumani Touré, a former military ruler, won presidential elections held in April and May 2002. In July 2005 severe food shortages led to more than 1m. people facing starvation. In March 2012 Touré was ousted in a military coup, with Capt. Amadou Haya Sanogo proclaiming himself chairman of the National Committee for the Restoration of Democracy and State.

## TERRITORY AND POPULATION

Mali is bounded in the west by Senegal, northwest by Mauritania, northeast by Algeria, east by Niger and south by Burkina Faso, Côte d'Ivoire and Guinea. Its area is 1,248,574 sq. km (482,077 sq.

miles) and it had a population of 14,528,662 at the 2009 census; density, 11.6 per sq. km. In 2005, 69.5% of the population were rural.

The UN gives a projected population for 2015 of 17.82m.

The areas, populations and chief towns of the regions are:

Region	Sq. km	2009 census population (provisional)	Chief town
Gao	170,572	544,120	Gao
Kayes	119,743	1,996,812	Kayes
Kidal	151,430	67,638	Kidal
Koulikoro	95,848	2,418,305	Koulikoro
Mopti	79,017	2,037,330	Mopti
Ségou	64,821	2,336,255	Ségou
Sikasso	70,280	2,625,919	Sikasso
Tombouctou	496,611	681,691	Tombouctou
Capital District	252	1,809,106	Bamako

In 1999 the capital, Bamako, had an estimated population of 1,083,000.

In 2000 the principal ethnic groups were: Bambara, 30.6%; Senufo, 10.5%; Fulani, 9.6%; Soninke, 7.4%; Tuareg, 7.0%; Maninka, 6.6%; Songhai, 6.3%; Dogon, 4.3%. The official language is French; Bambara is spoken by about 68% of the population.

## SOCIAL STATISTICS

2008 estimates: births, 541,000; deaths, 200,000. Rates, 2008 estimates (per 1,000 population): births, 42.6; deaths, 15.7. Infant mortality, 2005 (per 1,000 live births), 120. Expectation of life in 2007 was 47.4 years for males and 48.8 for females. Annual population growth rate, 2000–08, 2.4%; fertility rate, 2008, 6.5 children per woman.

## CLIMATE

A tropical climate, with adequate rain in the south and west, but conditions become increasingly arid towards the north and east. Bamako, Jan. 76°F (24.4°C), July 80°F (26.7°C). Annual rainfall 45" (1,120 mm). Kayes, Jan. 76°F (24.4°C), July 93°F (33.9°C). Annual rainfall 29" (725 mm). Tombouctou, Jan. 71°F (21.7°C), July 90°F (32.2°C). Annual rainfall 9" (231 mm).

## CONSTITUTION AND GOVERNMENT

A constitution was approved by a national referendum in 1974; it was amended by the National Assembly on 2 Sept. 1981. The sole legal party was the *Union démocratique du peuple malien* (UDPM).

A national conference of 1,800 delegates agreed a draft constitution enshrining multi-party democracy in Aug. 1991, and this was approved by 99.76% of votes cast at a referendum in Jan. 1992. Turnout was 43%.

The *President* is elected for not more than two terms of five years.

There is a *National Assembly*, consisting of 147 deputies (formerly 116) plus 13 Malinese living abroad.

A *Constitutional Court* was established in 1994.

## National Anthem

'A ton appel, Mali' ('At your call, Mali'); words by S. Kouyate, tune by B. Sissoko.

## RECENT ELECTIONS

Presidential elections were held on 29 April 2007. Amadou Toumani Touré was re-elected with 71.2% of votes cast, against Ibrahim Boubacar Keita (19.2%) and five other candidates. Turnout was 36.2%. The Front for Democracy and the Republic,

the coalition backing Keita, refused to accept the result, alleging widespread fraud. However, foreign observers declared it mostly fair.

Parliamentary elections were held in two rounds on 1 and 22 July 2007. The Alliance for Democracy in Mali (ADEMA) won 51 seats (67 in 2002), Union for the Republic and Democracy 34, Rally for Mali 11, Patriotic Movement for Renewal 8, National Congress for Democratic Initiative 7, Party for National Rebirth 4, African Solidarity for Democracy and Independence 4, Union of Democrats for Citizenship and Development 3, Movement for the Independence, Renaissance and Integration of Africa 2, Popular Party for Progress 2 and Alternation Bloc for Renewal, Integration and African Co-operation 2. Four other parties won a single seat each and 15 seats went to independents. The Alliance for Democracy and Progress, a coalition that supports President Touré and includes the Alliance for Democracy in Mali and the Union for the Republic and Democracy, won 113 of the 147 seats. The opposition coalition, the Front for Democracy and the Republic (which includes Rally for Mali), won 15 seats. Turnout was about 33% in the first round and about 11% in the second.

### CURRENT GOVERNMENT

*President:* Dioncounda Traoré; b. 1942 (in office since 12 April 2012).

*Acting Prime Minister:* Cheick Modibo Diarra; b. 1952 (in office since 17 April 2012).

In April 2012 the transitional government comprised:

*Minister of State of Foreign Affairs and International Co-operation:* Sadio Lamine Sow.

*Minister of Economy, Finance and Budget:* Tiéna Coulibaly. *Defense and Veterans Affairs:* Col. Yamoussa Camara. *Internal Security and Civil Protection:* Gen. Tiéfing Konaté. *Public Service, Governance, and Administrative and Political Reform, in Charge of Relations with Institutions:* Mamadou Namory Traoré. *Territorial Administration, Decentralization and Regional Development:* Col. Moussa Sinko Coulibaly. *Commerce, Mines and Industry:* Ahmadou Touré. *Agriculture, Livestock and Fisheries:* Moussa Léo Sidibé. *Youth, Labour, Employment and Vocational Training:* Mamadou Diakité. *Education, Literacy and the Promotion of National Languages:* Adama Ouané. *Justice and Attorney General:* Malick Coulibaly. *Maliens Abroad and African Integration:* Traoré Rokia Guikine. *Humanitarian Action, Solidarity and Seniors:* Mamadou Sidibé. *Family and the Promotion of Women and Children:* Alwata Ichata Sahi. *Energy, Water and Environment:* Alfa Bocar Nafo. *Crafts, Culture and Tourism:* Diallo Fadima Touré. *Communications, Posts and New Technologies, and Government Spokesperson:* Hamadoun Touré. *Infrastructure, Transport, Housing and Urban Development:* Mamadou Coulibaly. *Higher Education and Scientific Research:* Harouna Kanté. *Sports:* Hameye Founé Mahalmadane.

### CURRENT LEADERS

#### Dioncounda Traoré

##### *Position*

President

##### *Introduction*

Dioncounda Traoré was sworn in as interim president on 8 April 2012, ending a brief period of military rule after the removal of the former president, Amadou Toumani Touré, in a coup on 21 March. As parliamentary speaker, Traoré was next in the constitutional succession after Touré's enforced resignation.

##### *Early Life*

Dioncounda Traoré was born in Kati on 23 Feb. 1942, the son of army colonel Sékou Traoré. He read mathematics in Moscow from 1963 to 1965 before continuing his studies at the University of Algiers. He was later awarded a doctorate from the University

of Nice. He started work as a teacher at the Ecole Normale Supérieure in Bamako in 1977 but was jailed in 1980 for his trade union activities.

A militant trade unionist and pro-democracy activist throughout the 1980s, Traoré was a founding member of the Alliance for Democracy in Mali (ADEMA), a coalition of opponents to the dictatorship of Moussa Traoré. After Moussa Traoré was overthrown in 1991, ADEMA evolved into ADEMA-PASJ (African Party for Solidarity and Justice), with Dioncounda Traoré elected the party's second vice-president.

After Mali's first democratic elections, Traoré was appointed to the council of ministers by President Alpha Oumar Konaré in June 1992. He variously held the portfolios for public works, defence and foreign affairs before resigning from the council in 1997 to take his place in the national assembly as the representative for Nara.

In 2000 Ibrahim Boubacar Kéïta resigned as prime minister and leader of ADEMA-PASJ, with Traoré elected to succeed him in the party post. In 2007 Traoré became president of the national assembly but fled Mali during the 2012 coup. He returned when the junta, led by Capt. Amadou Haya Sanogo, stepped down after a handover agreed with the Economic Community of West African States (ECOWAS).

##### *Career in Office*

In the period between the military coup and Traoré's installation as interim president, Tuareg insurgents made significant gains in the country's north, culminating in a declaration of independence on 6 April 2012. While the claim went unrecognized internationally, Traoré entered office under pressure to prevent the spread of insurgency to neighbouring regions. He was also committed to new elections within 40 days of his appointment.

### DEFENCE

In 2008 military expenditure totalled US\$157m. (US\$12 per capita), representing 2.1% of GDP.

#### **Army**

Strength (2007) 7,350. There are also paramilitary forces of 4,800.

#### **Navy**

There is a Navy of around 50 operating three patrol craft although their serviceability is in doubt.

#### **Air Force**

Personnel (2007) total 400. There were around 16 combat capable aircraft.

### ECONOMY

Agriculture accounted for 36.9% of GDP in 2006, industry 24.0% and services 39.1%.

#### **Overview**

Mali is ranked 175th of 187 nations on the UN Human Development Index. The economy is heavily dependent on agriculture, which accounts for 35% of GDP and provides income to 80% of the population.

Real GDP growth has averaged over 5% per year since 1994 and macroeconomic stability was maintained during the global crisis in 2008. Per capita income rose from US\$240 in 1994 to US\$500 in 2007. However, over 70% of the population lives below the poverty line. Exports are concentrated in gold, cotton and livestock, although reliance on the latter two makes the economy vulnerable to drought. As a landlocked country, Mali is dependent on ports in neighbouring countries. It is seeking to establish itself as a tourism destination and surpassed the 250,000 visitor mark in 2007.

#### **Currency**

The unit of currency is the *franc CFA* (XOF), which replaced the Mali franc in 1984. It has a parity rate of 655-957 francs CFA to

one euro. Total money supply in June 2005 was 573,692m. francs CFA and foreign exchange reserves were US\$827m. Inflation was 9.1% in 2008 and 2.2% in 2009.

### Budget

Budgetary central government revenue and expenditure in 1bn. francs CFA:

	2007	2008	2009
Revenue	778.6	752.4	909.5
Expenditure	509.4	525.7	620.7

Principal sources of revenue in 2009 were: taxes on goods and services, 265.7bn. francs CFA; grants, 184.6bn. francs CFA. Main items of expenditure by economic type in 2009 were: compensation of employees, 213.5bn. francs CFA; use of goods and services, 190.2bn. francs CFA.

VAT is 18%.

### Performance

Real GDP growth was 4.5% in 2009 and 5.8% in 2010. Total GDP in 2010 was US\$9.3bn.

### Banking and Finance

The bank of issue and the central bank is the regional Central Bank of West African States (BCEAO). The *Governor* is Tiémoko Meyliet Koné. In 2002 there were eight commercial and two development banks.

There is a stock exchange in Bamako.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.1 tonnes per capita in 2008. An *Environmental Performance Index* compiled in 2008 ranked Mali 145th in the world out of 149 countries analysed, with 44.3%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

Installed capacity in 2007 was 0.2m. kW. Production in 2007 totalled about 495m. kWh, approximately 55% of it hydro-electric. Consumption per capita was an estimated 40 kWh in 2007.

### Minerals

Gold (51,957 kg in 2006) is the principal mineral produced. There are also deposits of iron ore, uranium, diamonds, bauxite, manganese, copper, salt, limestone, phosphate, gypsum and lithium.

### Agriculture

About 80% of the population depends on agriculture, mainly carried on by small peasant holdings. Mali is second only to Egypt among African cotton producers. In 2002 there were an estimated 4.66m. ha. of arable land and 40,000 ha. of permanent cropland. There were around 2,600 tractors in 2002 and 650 harvester-threshers. Production in 2003 included (estimates, in 1,000 tonnes): millet, 815; rice, 693; sorghum, 650; seed cotton, 464; maize, 365; sugarcane, 300; cotton lint, 250; cottonseed, 185; groundnuts, 170; sweet potatoes, 74, tomatoes, 50.

Livestock, 2003 estimates: goats, 11.46m.; sheep, 7.97m.; cattle, 7.31m.; asses, 700,000; camels, 470,000; horses, 170,000; chickens, 29m.

Livestock products, 2003 estimates (in 1,000 tonnes): beef and veal, 113; goat meat, 46; lamb and mutton, 36; poultry meat, 34; goat's milk, 227; cow's milk, 179; sheep's milk, 117; eggs, 10.

Approximately 138,000 ha. were irrigated in 2002.

### Forestry

In 2005 forests covered 12.57m. ha., or 10.3% of the total land area. Timber production in 2007 was 5.56m. cu. metres.

### Fisheries

In 2005 approximately 100,000 tonnes of fish were caught, exclusively from inland waters.

## INDUSTRY

The main industries are food processing, followed by cotton processing, textiles and clothes. Cement and pharmaceuticals are also produced.

### Labour

There were 2,491,800 employed persons (58.4% males) in 2004. In 2003 approximately 79.0% of the total labour force were engaged in agriculture. Large numbers of Malians emigrate temporarily to work abroad, principally in Côte d'Ivoire.

## INTERNATIONAL TRADE

Foreign debt was US\$2,969m. in 2005.

### Imports and Exports

The following table shows the value of Mali's foreign trade (in US\$1m.):

	2006	2007	2008
Imports c.i.f.	1,819.8	2,184.8	3,338.9
Exports f.o.b.	1,526.1	1,440.6	1,918.3

Principal import commodities are machinery and equipment, foodstuffs, construction materials, petroleum and textiles. Principal export commodities are cotton and livestock (between them accounting for three-quarters of Mali's annual exports) and gold.

The main import suppliers are France and its former colonies (in particular Côte d'Ivoire), western Europe and China. Main export markets are also France and its former colonies, western Europe and China.

## COMMUNICATIONS

### Roads

There were 18,912 km of roads in 2005, of which 19.0% were paved. In 2007 there were 87,000 passenger cars (seven per 1,000 inhabitants), 26,800 lorries and vans, and 10,000 motorcycles and mopeds.

### Rail

Mali has a railway from Kayes to Koulikoro by way of Bamako, a continuation of the currently non-operational Dakar-Kayes line in Senegal; total length, 2005, 643 km (metre-gauge). In 2005, 179,000 passengers and 1.7m. tonnes of freight were transported.

### Civil Aviation

There is an international airport at Bamako (Senou), which handled 312,000 passengers (305,000 on international flights) and 4,400 tonnes of freight in 2001. In 2003 Trans African Airlines operated services to Abidjan, Brazzaville, Cotonou, Dakar, Lomé and Pointe-Noire. There were also international flights to Accra, Addis Ababa, Banjul, Bobo-Dioulasso, Casablanca, Conakry, Douala, Kano, Lagos, Libreville, N'Djaména, Niamey, Nouakchott, Ouagadougou, Paris and Tripoli. In 2001 scheduled airline traffic of Mali-based carriers flew 1m. km, carrying 46,000 passengers (all on international flights).

### Shipping

For about seven months in the year small steamboats operate a service from Koulikoro to Tombouctou and Gao, and from Bamako to Kouroussa.

### Telecommunications

In 2008 there were 81,100 main (fixed) telephone lines; mobile phone subscribers numbered 3,439,000 in 2008 (27.1 per 100 persons). There were 45,000 PCs in use in 2005 and an 200,000 internet users in 2008.

### SOCIAL INSTITUTIONS

#### Justice

The Supreme Court was established at Bamako in 1969 with both judicial and administrative powers. The Court of Appeal is also at Bamako, at the apex of a system of regional tribunals and local *juges de paix*.

The population in penal institutions in 2004 was 4,407 (33 per 100,000 of national population).

#### Education

The adult literacy rate in 2006 was 26%. In 2007 there were 1,510 teaching staff for 54,591 children in pre-primary schools, 33,230 teaching staff for 1,716,956 pupils in primary schools, 15,013 teaching staff for 533,849 secondary school pupils and 50,787 students in tertiary education with 976 academic staff. During the period 1990–95 only 19% of females of primary school age were enrolled in school but by 2007 this had risen to 56%.

In 2005 public expenditure on education came to 4.1% of GDP.

#### Health

In 2001 there were 17 hospitals. In 2000 there were 529 physicians, 1,501 nurses and 284 midwives.

### RELIGION

The state is secular, but predominantly Sunni Muslim. About 15% of the population follow traditional animist beliefs and there is a small Christian minority.

### CULTURE

#### World Heritage Sites

Mali has four sites on the UNESCO World Heritage List: Old Towns of Djenné (inscribed on the list in 1988), a market centre established in 250 BC and an important Islamic centre in the 16th century—its buildings are all mudbrick, plastered annually with

adobe; Tombouctou (1988), an important Islamic centre containing the Koranic Sankore University and the famous Djingareyber Mosque; the Cliff of Bandiagara (Land of the Dogons) (1989), for its natural and architectural wonders; and the Tomb of Askia (2004).

#### Press

In 2008 there were 12 daily newspapers with an estimated combined circulation of 40,000.

#### Tourism

There were 164,000 non-resident tourists staying at hotels and similar establishments in 2007 (including 104,000 from Europe and 29,000 from other African countries); tourist revenue totalled US\$175m. in 2006.

### DIPLOMATIC REPRESENTATIVES

Of Mali in the United Kingdom

*Ambassador:* Ibrahim Bocar Ba (resides in Brussels).

Of the United Kingdom in Mali (Immeuble Semega, Koulikoro Road, Hippodrome, PO Box 2069, Bamako)

*Ambassador:* Nicholas Griffiths.

Of Mali in the USA (2130 R. St., NW, Washington, D.C., 20008)

*Ambassador:* Al-Maamoun Baba Lamine Keita.

Of the USA in Mali (ACI 2000, Rue 243, Porte 297, Bamako)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Peter H. Barlerin.

Of Mali to the United Nations

*Ambassador:* Oumar Daou.

Of Mali to the European Union

*Ambassador:* Ibrahim Bocar Ba.

*HDI/world rank:* 0.832/36

## KEY HISTORICAL EVENTS

Malta was held in turn by Phoenicians, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 it was subject to the same rulers as Sicily until 1530, when it was handed over to the Knights of St John, who ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the island was blockaded by the British, aided by the Maltese from 1798 to 1800. The Maltese people freely requested the protection of the British Crown in 1802 on condition that their rights and privileges be preserved. The island was finally annexed to the British Crown by the Treaty of Paris in 1814. Malta became independent on 21 Sept. 1964 and a republic within the Commonwealth on 13 Dec. 1974. On 1 May 2004 Malta joined the European Union.

## TERRITORY AND POPULATION

The three Maltese islands and minor islets lie in the Mediterranean 93 km (at the nearest point) south of Sicily and 288 km east of Tunisia. The area of Malta is 246 sq. km (94.9 sq. miles); Gozo, 67 sq. km (25.9 sq. miles) and the virtually uninhabited Comino, 3 sq. km (1.1 sq. miles); total area, 316 sq. km (121.9 sq. miles). The census population in 2005 was 404,962 (Malta island, 373,955; Gozo and Comino, 31,007); Dec. 2009 estimate, 413,290, giving a density of 1,308 per sq. km.

The UN gives a projected population for 2015 of 423,000.

In 2005, 95.3% of the population were urban. Chief town and port, Valletta, population 6,300 (2005) but the southern harbour district, 81,047. Other towns: Birkirkara, 21,858; Mosta, 18,735; Qormi, 16,559; Zabbar, 14,671; St Paul's Bay, 13,412.

The constitution provides that the national language and language of the courts is Maltese, but both Maltese and English are official languages. Italian is also spoken.

## SOCIAL STATISTICS

2009: births, 3,713; deaths, 3,221; marriages, 2,353; emigrants, 9,708 (1,771 Maltese); immigrants, 8,147 (1,190 returning Maltese). 2009 rates per 1,000 population: birth, 9.4; death, 7.8; marriage, 5.7.

Abortion is illegal. So too was divorce until Oct. 2011, after parliament had voted in July 2011 to legalize divorce following a vote in favour of the reform by 52.7% to 47.3% in a referendum held in May. Until then Malta had been one of only three countries still to outlaw divorce (the others being the Philippines and the Vatican). In 2008 the most popular age range for marrying was 25–29 for both males and females. Life expectancy at birth in 2007: 77.7 years for males and 81.3 years for females. Annual population growth rate, 2000–05, 1.1%. Infant mortality in 2005: 5 per 1,000 live births; fertility rate, 2008, 1.3 births per woman.

## CLIMATE

The climate is Mediterranean, with hot, dry and sunny conditions in summer and very little rain from May to Aug. Rainfall is not excessive and falls mainly between Oct. and March. Average daily sunshine in winter is six hours and in summer over ten hours. Valletta, Jan. 12.8°C (55°F), July 25.6°C (78°F). Annual rainfall 578 mm (23").

## CONSTITUTION AND GOVERNMENT

Malta is a parliamentary democracy. The constitution of 1964 provides for a *President*, a *House of Representatives* of members elected by universal suffrage and a Cabinet consisting of the Prime Minister and such number of Ministers as may be appointed. The Constitution makes provision for the protection of fundamental rights and freedom of the individual, and for freedom of conscience and religious worship, and guarantees the separation of executive, judicial and legislative powers. The House of Representatives currently has 65 members directly elected on a plurality basis.

## National Anthem

'Lil din l'art helwa, l'omm li tatna isimha' ('Guard her, O Lord, as ever Thou hast guarded'); words by Dun Karm Psaila, tune by Dr Robert Samut.

## RECENT ELECTIONS

At the elections of 8 March 2008 the electorate was 315,357; turnout was 93.3%. The Nationalist Party (NP) gained 31 seats with 49.3% of votes cast; the Labour Party (MLP), 34 with 48.8%. However, constitutional law dictates that in a two-party parliament the winner of the popular vote must hold a parliamentary majority, so the Nationalist Party was awarded a further four seats, giving them a total of 35 out of 69.

## European Parliament

Malta has five representatives. At the June 2009 elections turnout was 78.8% (82.4% in 2004). The MLP won 3 seats with 54.8% of votes cast (political affiliation in European Parliament: Progressive Alliance of Socialists and Democrats); and the NP 2 with 40.5% (European People's Party).

## CURRENT GOVERNMENT

*President:* George Abela; b. 1948 (MLP; sworn in 4 April 2009).

In March 2012 the government comprised:

*Prime Minister:* Dr Lawrence Gonzi; b. 1953 (NP; sworn in 23 March 2004 and re-elected in March 2008).

*Deputy Prime Minister and Minister for Foreign Affairs:* Dr Tonio Borg. *Education, Employment and Family:* Dolores Cristina. *Finance, Economy and Investment:* Tonio Fenech. *Gozo:* Giovanna Debono. *Health, the Elderly and Community Care:* Dr Joe Cassar. *Infrastructure, Transport and Communications:* Dr Austin Gatt. *Justice and Home Affairs:* Dr Carmelo Mifsud Bonnici. *Resources and Rural Affairs:* George Pullicino. *Social Policy:* John Dalli.

*Speaker:* Michael Frendo.

*Government Website:* <http://www.gov.mt>

## CURRENT LEADERS

### George Abela

#### *Position*

President

#### *Introduction*

George Abela was sworn in as president on 4 April 2009. He was nominated by Prime Minister Lawrence Gonzi, the first time a president has been appointed from the opposition (having been a member of the MLP before renouncing political affiliation to take up the office). He was also the first president to be elected with the unanimous approval of parliament.

#### *Early Life*

Abela was born in Qormi, a small town in central Malta, in April 1948. The son of a postal worker, he was educated at the University of Malta, gaining a degree in English, Maltese and History before graduating as a lawyer in 1975. He subsequently took up private legal practice specializing in civil, commercial and industrial law. For 25 years he was the legal consultant for Malta's General Workers' Union, representing its membership in negotiations including the 2002 Air Malta rescue plan.

In 1982, having previously served as treasurer and president of his hometown football team, Abela was appointed president of the Maltese Football Association, a position he held for ten years. He also sat as an arbitrator at the Court of Arbitration for Sport in Lausanne. In 1992 he was elected deputy leader of the MLP, resigning in 1998 in protest at then leader Alfred Sant's call for an early election. Abela served as the Labour Party representative on the Malta–EU Steering and Action Committee (MEUSAC), having been involved in pre-accession talks regarding Malta's bid for European Union membership. He has also served as director of the Central Bank of Malta. In June 2008 he was defeated in a bid for the MLP leadership by Joseph Muscat.

#### *Career in Office*

Abela has aimed to harness the political unity evidenced by his unanimous election to the presidency, a largely ceremonial role. A devout Catholic, he has emphasized the importance of family values. Nevertheless, in July 2011 parliament passed legislation legalizing divorce after the proposal won support in a referendum the previous May.

### Dr Lawrence Gonzi

#### *Position*

Prime Minister

#### *Introduction*

Appointed Malta's prime minister on 23 March 2004, Lawrence Gonzi oversaw the nation's accession to the EU six weeks later. Leading the right-of-centre Nationalist Party (NP), he advocated seizing the opportunities for trade and investment afforded by Malta's EU membership, including adoption of the single European currency.

#### *Early Life*

Lawrence Gonzi was born on 1 July 1953 in Valletta, Malta. He attended St Joseph's school, St Aloysius College and The Archbishop's Seminary, and went on to study law at the University of Malta, graduating in 1975, the year after Malta became a fully independent republic (having achieved independence from Great Britain in 1964). Gonzi took up employment as a junior solicitor in a private firm and later worked as a company lawyer with the Mizzi Organization. From 1976 he was engaged in the voluntary sector, working with people with disabilities and mental health problems. He was also the general president of the Malta Catholic Action Movement between 1976 and 1986.

Gonzi entered politics in 1986, contesting the 1987 general election as a candidate for the Nationalist Party. Duly elected, he served in the government of the new Nationalist prime minister, Edward Fenech Adami. Gonzi was elected speaker of the House of Representatives on 10 Oct. 1988. The NP took up a pro-Western stance and argued for integration into the European Community. It also embarked on a programme to stimulate business, increase tourism and reduce the role of the government in the economy. The party held on to power in the 1992 general election, but lost the Oct. 1996 poll to a rejuvenated MLP, led by Alfred Sant.

Gonzi retained his parliamentary seat in the 1996 election and, a month later, was appointed opposition party whip, secretary to the parliamentary group and shadow minister for social policy. The following year he was elected secretary general of the Nationalist Party, subsequently playing a central role in achieving an NP electoral victory after just 22 months of the Labour administration. Gonzi was appointed minister for social policy and leader of the House of Representatives. The appointment of Prof. Guido de Marco as president of the republic on 2 May 1999 prompted Gonzi to contest the election for the deputy leadership of the NP. He was successful, and shortly afterwards was made deputy to Prime Minister Adami.

During his years at the social policy ministry, Gonzi is remembered for reforms to the industrial relations legislation, his zero-tolerance policy towards benefit fraud and for overseeing the restructuring of Malta's shipyards. In March 2003 Malta's population voted in favour of EU membership in a referendum, and the following month the NP was returned to power in a general election. Adami stepped down as NP leader in March 2004, and in the subsequent leadership contest, Gonzi emerged victorious. On 23 March 2004 he took office as prime minister (and minister of finance) of Malta.

#### *Career in Office*

In his first media briefing in April 2004, Prime Minister Gonzi announced his government's intention to adopt the euro 'when it is advantageous to Malta'. He also proposed to boost tourism (the nation's most important source of income), create favourable conditions for investment, restructure the public finances and improve Malta's competitiveness in the international market. In Nov. 2005 Gonzi hosted the Commonwealth Heads of Government Meeting (CHOGM). In Dec. 2007 his government signed the Lisbon treaty on streamlining the operation of the European Union and from 1 Jan. 2008 Malta adopted the single currency.

The NP won a third successive term by narrowly winning the popular vote in parliamentary elections in March 2008, with Gonzi being sworn in for a second prime ministerial term (but relinquishing the finance portfolio) on 11 March. In an address to the nation he said that his government would concentrate particularly on sustainable development, with an emphasis on the environment.

In April 2009 the Maltese government refused to accept 140 illegal African migrants aboard a cargo ship that had rescued them in rough waters near the island of Lampedusa, claiming that they were Italy's responsibility.

## DEFENCE

The Armed Forces of Malta (AFM) are made up of a Headquarters and three Regiments. In 2007 they had a strength of 1,609 personnel. An Emergency Volunteer Reserve Force was introduced in 1998 on a small scale (40 in 2007). There were also 50 individuals reserves in 2007. In addition to infantry and light air defence artillery weapons, the AFM are equipped with helicopters, light fixed wing and trainer aircraft. There is no conscription.

Apart from normal military duties, AFM are also responsible for Search and Rescue, airport security, surveillance of Malta's

territorial and fishing zones, harbour traffic control and anti-pollution duties.

In 2008 military expenditure totalled US\$49m. (US\$122 per capita), representing 0.6% of GDP.

#### **Navy**

There is a maritime squadron that operated nine patrol and coastal combatants in 2007.

#### **Air Force**

The Air Wing had four combat capable aircraft in 2007 although they were in storage.

### **INTERNATIONAL RELATIONS**

Malta held a referendum on EU membership on 9 March 2003, in which 53.6% of votes cast were in favour of accession, with 46.4% against. It became a member of the EU on 1 May 2004.

### **ECONOMY**

Services accounted for 65% of GDP in 2009, industry 32% and agriculture 3%.

#### **Overview**

GDP per capita is above the EU average but few natural resources have left the economy heavily reliant on foreign trade, manufacturing and tourism as sources of growth. The Malta Freeport is one of the Mediterranean's leading ports for container transshipments.

Since joining the EU in 2004 Malta has restructured the public-enterprise sector and liberalized trade. GDP growth has been ignited by a public investment boom largely financed by EU grants. Fiscal policy is directed towards reducing the budget deficit which had expanded to 56% of GDP by the late 1990s. By 2006 the government had brought the general deficit down to 2.5% of GDP, below the 3% threshold required for eurozone membership. Malta joined the European Monetary Union on 1 Jan. 2008.

After continued expansion following entry into the EU, Malta experienced the effects of the global crisis from late 2008, with manufacturing and tourism the worst hit sectors. With real GDP contracting by 3.3% in 2009, a limited stimulus package was put in place with the focus on infrastructure.

#### **Currency**

On 1 Jan. 2008 the euro (EUR) replaced the Maltese lira (MTL) as the legal currency of Malta at the irrevocable conversion rate of Lm0.4293 to one euro. Inflation was 4.7% in 2008 and 1.8% in 2009. Foreign exchange reserves stood at US\$2,390m. in March 2005, gold reserves were 4,000 troy oz in May 2005 and total money supply was Lm1,413m. in July 2005.

#### **Budget**

In 2008 revenues were €2,132.2m. and expenditures €2,365.3m. Income tax accounted for 34.5% of revenues in 2008 and VAT 21.4%; recurrent expenditure accounted for 90.1% of expenditures.

Malta's budget deficit in 2010 was 3.6% of GDP (2009, 3.7%; 2008, 4.6%). The required target set by the EU is a budget deficit of no more than 3%.

The standard rate of VAT is 18.0% (reduced rates, 7% and 5%).

#### **Performance**

The economy contracted by 3.3% in 2009 but grew by 3.1% in 2010. Total GDP in 2010 was US\$8.3bn.

#### **Banking and Finance**

The Central Bank of Malta (*Governor*, Josef Bonnici) was founded in 1968. In Jan. 2004 there were 16 licensed credit institutions carrying out domestic and international banking activities. In addition 13 local financial institutions licensed in terms of the

Financial Institutions Act 1994 also provide services that range from exchange bureau related business to merchant banking.

There is a stock exchange in Valletta.

### **ENERGY AND NATURAL RESOURCES**

In 2008, 0.2% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 10% has been set by the EU for 2020.

#### **Environment**

Malta's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 7.9 tonnes per capita.

#### **Electricity**

Electricity is generated at two interconnected thermal power stations located at Marsa (267 MW) and Delimara (304 MW). Marsa is scheduled to close in 2013. The primary transmission voltages are 132,000, 33,000 and 11,000 volts while the low-voltage system is 400/230V, 50Hz with neutral point earthed. Installed capacity was 571,000 kW in 2006. Production in 2007 was 2.3bn. kWh; consumption per capita was 5,630 kWh.

#### **Oil and Gas**

Malta's large offshore area, made up of geological extensions of southeast Sicily, east Tunisia and northwest Libya, contains significant hydrocarbon reserves. Active exploration is at present being carried out by TGS-NOPEC, Pancontinental Oil & Gas and TM Services Ltd in offshore areas. Discussions are also under way with oil companies with a view to awarding new licences. The policy of Malta in the oil and gas sector is to intensify exploration by offering oil companies competitive terms and returns that are commensurate with the risk undertaken.

#### **Water**

The demand for water in 2003 was 34m. cu. metres. Seawater desalination (Reverse Osmosis Plants) provides 54% of the total potable water requirements.

#### **Agriculture**

Malta is self-sufficient in fresh vegetables, pig meat, poultry, eggs and fresh milk. The main crops are potatoes (the spring crop being the country's primary agricultural export), vegetables and fruits, with some items such as tomatoes serving as the main input in the local canning industry. In 2001 there were about 1,524 full-time farmers and 12,589 part-time. There were around 11,959 agricultural holdings and 943 intensive livestock farm units. In 2001 there were 9,000 ha. of arable land and 1,000 ha. of permanent crops.

Agriculture contributes around 2.6% of GDP annually. 2001 production figures (in 1,000 tonnes): potatoes, 25; tomatoes, 18; melons, 12; wheat, 10; onions, 7; cauliflowers, 6.

Livestock in 2001: cattle, 18,417; pigs, 80,481; sheep, 10,376; chickens, 1.9m.

Livestock produce accounted for 60.7% of the total value of agricultural production during 2001.

#### **Fisheries**

In 2008 the fishing fleet comprised 1,152 vessels of 10,961 GT. Total catch in 2008 was 1,279 tonnes.

### **INDUSTRY**

Besides manufacturing (food, clothing, chemicals, electrical machinery parts and electronic components and products), the mainstays of the economy are ship repair and shipbuilding, agriculture, small crafts units, tourism and the provision of other services such as the freeport facilities. The majority of state-aided manufacturing enterprises operating in Malta are foreign-owned or with foreign interests. The Malta Development Corporation is

the government agency responsible for promoting investment, while the Malta Export Trade Corporation serves as a catalyst to the export of local products.

### Labour

The labour supply in Dec. 2002 was 144,016 (females, 40,185), including 35,571 in private direct production (agriculture and fisheries, 2,203; manufacturing, 28,970; oil drilling, construction and quarrying, 6,398), 50,059 in private market services, 47,992 in the public sector (including government departments, armed forces, revenue security corps, independent statutory bodies and companies with government majority shareholding) and 1,206 in temporary employment. There were 7,188 registered unemployed (5.0% of labour supply).

### INTERNATIONAL TRADE

Imports are being liberalized. Marsaxlokk is an all-weather freeport zone for transshipment activities. The Malta Export Trade Corporation promotes local exports. External debt was US\$1,531m. in 2001.

### Imports and Exports

In 2002 imports (f.o.b.) were valued at Lm1,222.3m. (Lm1,225.1m. in 2001) and exports (f.o.b.) at Lm905.4m. (Lm880.6m. in 2001). In 2002 the principal items of imports were: machinery and transport equipment, Lm596.3m.; semi-manufactures, Lm151.0m.; manufactures, Lm116.8m.; foodstuffs, Lm109.8m.; fuels, Lm103.0m.; chemicals, Lm96.4m. Of domestic exports: machinery and transport equipment, Lm517.7m.; manufactures, Lm166.8m.; semi-manufactures, Lm50.9m.; foodstuffs, Lm21.4m.; chemicals, Lm13.4m.

In 2000 imports valued at Lm281.9m. came from France; Lm249.7m. from Italy; Lm158.5m. from the USA; Lm122.1m. from Germany; Lm119.7m. from the UK. Main export markets: USA, Lm286.5m.; Singapore, Lm164.7m.; Germany, Lm96.7m.; France, Lm84.1m.; UK, Lm70.0m.; Italy, Lm33.1m.

### Trade Fairs

The Malta Trade Fairs Corporation organizes the International Fair of Malta (early July).

### COMMUNICATIONS

#### Roads

In 2004 there were 3,096 km of roads, including 185 km of highways. 87.5% of roads are paved. Malta has one of the densest road networks in the world. Motor vehicles in use in 2007 included 203,900 passenger cars, 23,600 vans and lorries, 10,600 motorcycles and mopeds, and 690 buses and coaches. There were 1,209 casualties in traffic accidents in 2007, including 14 fatalities (equivalent to 3.4 fatalities per 100,000 population, giving Malta the lowest death rate in road accidents of any industrialized country).

#### Civil Aviation

The national carrier is Air Malta, which is 98% state-owned. There were scheduled services in 2003 to around 30 different countries. In 2001 there were 32,652 commercial aircraft movements at Malta International Airport. 2,806,013 passengers and 12,925 tonnes of freight/mail were handled. In 2003 scheduled airline traffic of Maltese-based carriers flew 22m. km and carried 1,309,000 passengers (all on international flights).

#### Shipping

There is a car ferry between Malta and Gozo. In Jan. 2009 there were 1,487 ships of 300 GT or over registered, totalling 31.65m. GT; Malta's fleet was the sixth largest in terms of the number of ships and the eighth largest on the basis of gross tonnage. Of the 1,487 vessels registered, 498 were general cargo ships, 464 bulk carriers, 346 oil tankers, 78 container ships, 56 passenger ships, 24 liquid gas tankers and 21 chemical tankers.

The Malta Freeport plays an important role in the economy as it is effectively positioned to act as a distribution centre in the Mediterranean.

### Telecommunications

The Maltacom plc group is Malta's leading telecommunications and ancillary services provider. Malta's national network consist of 12 AXE10 Ericsson Digital Exchanges and one Siemens EWSD Exchange. Maltacom provides various data services including packet switching, frame relay and high-speed leased lines. The company has an optical fibre-based SDH backbone and large companies are connected to the Network. Maltacom's International Network includes two fully digital gateways, two satellite Standard B Earth Stations (one transmitting to the Atlantic Ocean Region and the other to the Indian Ocean Region) and an optic fibre submarine cable linking Malta to Sicily (Italy) and terrestrially extending to Palermo which is the hub of international submarine cables passing through the Mediterranean.

In 2008 there were 241,100 main (fixed) telephone lines; mobile phone subscribers numbered 385,600 in 2008 (94.6 per 100 persons). There were 198,800 internet users in the same year.

### SOCIAL INSTITUTIONS

#### Justice

The number of persons arrested between 1 Jan. 2001 and 31 Oct. 2001 was 5,451; those found guilty numbered 2,180. 184 persons were committed to prison.

In Jan. 2003 total police strength was 1,841 including 107 officers (92 males and 15 females) and 1,734 other ranks (250 females).

Malta abolished the death penalty for all crimes in 2000.

#### Education

Adult literacy rate, 2005, 92.4% (male, 91.2%; female, 93.5%).

Education is compulsory between the ages of 5 and 16 and free in government schools from kindergarten to university. Kindergarten education is provided for three- and four-year old children. The primary school course lasts six years. In 2003 there were 19,300 children enrolled in 77 state primary schools. There are education centres for children with special needs, but they are taught in ordinary schools if possible.

Secondary schools, trade schools and junior lyceums provide secondary education in the state sector. At the end of their primary education, pupils sit the 11+ examination to start a secondary education course. Pupils who qualify are admitted in the junior lyceum, while the others attend secondary schools. In 2003-04, 11 junior lyceums had a total of 9,700 students (5,600 girls and 4,100 boys). About 8,200 pupils attend secondary schools. Five centres providing secondary education for under-performing students have a registered student population of about 900, of which 500 are boys. Secondary schools and junior lyceums offer a five-year course leading to the Secondary Education Certificate and the General Certificate of Education, Ordinary Level.

At the end of the five-year secondary course, students may opt to follow a higher academic or technical or vocational course of one to four years. The academic courses generally lead to Intermediate and Advanced Level examinations set by the British universities. The Matriculation Certificate, which qualifies students for admission to university, is a broad-based holistic qualification covering—among others—the humanities and the sciences, together with systems of knowledge.

About 35% of the student population attend non-state schools, from kindergarten to higher secondary level. In Oct. 2003 there were about 25,700 pupils attending non-state schools, 800 of whom were at post-compulsory secondary level, 17,100 were in schools run by the Roman Catholic Church, while 8,500 students were attending private schools. Under an agreement between the government and the Church, the government subsidizes Church

schools and students attending these schools do not pay any fees. During 2001 the government introduced tax rebates for parents whose children attended independent schools.

More than 9,800 students (including 750 from overseas) were following courses at the University in 2003. University students receive a stipend.

A post-compulsory vocational college, the Malta College of Arts, Science and Technology, provides vocational and technical courses up to degree level. In Oct. 2003 about 9,000 students (47% of which were females) were following post-compulsory education in state colleges and institutes.

In 2008 public expenditure on education came to 5.9% of GDP.

### Health

In 2006 there were 1,564 doctors, 190 dentists, 790 pharmacists and 2,411 nurses and midwives. There were eight hospitals (three private) with 2,122 beds in 2003. There are also nine health centres.

### Welfare

Legislation provides a national contributory insurance scheme and also for the payment of non-contributory allowances, assistances and pensions. It covers the payment of marriage grants, maternity benefits, child allowances, parental allowances, disabled child allowance, family bonus, sickness benefit, injury benefits, disablement benefits, unemployment benefit, contributory pensions in respect of retirement, invalidity and widowhood, and non-contributory medical assistance, free medical aids, social assistance, a carers' pension and pensions for the visually impaired, disabled or severely disabled persons and the aged.

From Jan. 2007 the statutory retirement age has been gradually increased from 61 years for men and 60 years for women to reach 65 for both sexes by 2015.

### RELIGION

98% of the population belong to the Roman Catholic Church, which is established by law as the religion of the country, although full liberty of conscience and freedom of worship are guaranteed. In Feb. 2012 there was one cardinal.

### CULTURE

#### World Heritage Sites

Malta has three sites on the UNESCO World Heritage List (all inscribed on the list in 1980): Hal Saffieni Hypogeum, a prehistoric underground necropolis; the City of Valletta, a highly concentrated centre marked by the influences of Romans, Byzantines and Arabs and the Knights of St John; and the Megalithic Temples of Malta (reinscribed in 1992), seven temples on Malta and Gozo containing Bronze Age structures.

#### Press

In 2008 there were two English paid-for dailies (*The Times* and *The Malta Independent*) and two Maltese dailies (*In-Nazzjon* and *L-Orizzont*). There were seven paid-for non-dailies and six Sunday newspapers (three in English and three in Maltese).

### Tourism

Tourism is the major foreign currency earner, and accounts for more 35% of Malta's GDP.

In 2005, 1.17m. non-resident tourists visited Malta, spending US\$923m. Cruise passenger visits totalled 320,104 in 2005. Over 40% of tourists are from the UK.

### Festivals

Major festivals include the Malta Song Festival; Carnival Festivals at Valletta (Feb.); History and Elegance Festival at Valletta (April); National Folk Singing; Malta International Arts Festival; Malta Jazz Festival; International Food and Beer Festival (June/July); Festa Season (June–Sept.); Malta International Choir Festival (Nov.).

### DIPLOMATIC REPRESENTATIVES

Of Malta in the United Kingdom (36–38 Piccadilly, London, W1J 0LE)

*High Commissioner:* Joseph Zammit Tabona.

Of the United Kingdom in Malta (Whitehall Mansions, Ta'Xbiex Seafront, Ta'Xbiex XBX 1026)

*High Commissioner:* Louise Stanton.

# MARSHALL ISLANDS

Republic of the Marshall Islands

*Capital:* Dalap-Uliga-Darrit

*Population, 2006:* 52,000

*GNI per capita, 2010:* US\$3,756

## KEY HISTORICAL EVENTS

The Pacific archipelago was populated by emigrants from southeast Asia from around 2000 BC and first documented by Portuguese mariners in 1528. The islands owe their name to the English seafarer, John Marshall, who visited in 1788. They became part of the protectorate of German New Guinea in 1886 and administrative affairs were managed by private German and Australian interests. Japan seized control in 1914 and received a League of Nations mandate over the islands in 1919. The Marshall Islands were occupied by Allied forces in 1944 and became part of the UN Trust Territory of the Pacific Islands on 18 July 1947 (administered by the USA). On 21 Oct. 1986 the islands gained independence. A Compact of Free Association with the USA that came into force at the time was extended by 20 years in May 2004.

## TERRITORY AND POPULATION

The Marshall Islands lie in the North Pacific Ocean north of Kiribati and east of Micronesia, and consist of an archipelago of 31 coral atolls, five single islands and 1,152 islets strung out in two chains, eastern and western. Of these, 25 atolls and islands are inhabited. The land area is 181 sq. km (70 sq. miles). At the 1999 census the population was 50,840 (26,026 males); density, 281 per sq. km. 2006 estimate: 52,000. The capital is Dalap-Uliga-Darrit (1999 population, 15,486) on Majuro Atoll in the eastern chain. The largest atoll in the western chain is Kwajalein, containing the only other town, Ebeye (1999 population, 9,345). The two archipelagic island chains of Bikini and Enewetak are former US nuclear test sites; Kwajalein is now used as a US missile test range. The islands lay claim to the US territory of Wake Island. In 2000 the population was 65.8% urban. About 88% of the population are Marshallese, a Micronesian people.

English is universally spoken and is the official language. Two major Marshallese dialects from the Malayo-Polynesian family and Japanese are also spoken.

## SOCIAL STATISTICS

2006 births, estimate, 1,576; deaths, 318. 2006 rates per 1,000 population, estimates: birth, 30.3; death, 6.1. Infant mortality rate, 2005, 51 per 1,000 live births. Life expectancy, 2008: male, 68.9 years; female, 73.0. Annual population growth rate, 1998–2008, 1.6%; fertility rate, 2008, 3.7 births per woman.

## CLIMATE

Hot and humid, with wet season from May to Nov. The islands border the typhoon belt. Jaluit, Jan. 81°F (27.2°C), July 82°F (27.8°C). Annual rainfall 161" (4,034 mm).

## CONSTITUTION AND GOVERNMENT

Under the constitution which came into force on 1 May 1979, the Marshall Islands form a republic with a *President* as head of state and government, who is elected for four-year terms by the parliament. The parliament consists of a 33-member *House of Assembly* (Nitijela), directly elected by popular vote for four-year terms. There is also a 12-member appointed *Council of Chiefs* (Iroij) which has a consultative and advisory capacity on matters affecting customary law and practice.

## National Anthem

'Forever Marshall Islands'; words and tune by Amata Kabua.

## RECENT ELECTIONS

At the House of Assembly elections on 21 Nov. 2011, 33 members were elected. The Aelon Kein Ad party (AKA), joined by independent candidates, won a majority of seats. An indirect presidential election was held on 3 Jan. 2012. Christopher Loeak won with 21 votes against 11 for incumbent Jurelang Zedkaia.

## CURRENT GOVERNMENT

*President:* Christopher Loeak; b. 1952 (AKA; took office on 10 Jan. 2012).

In March 2012 the government comprised:

*Minister in Assistance to the President:* Tony de Brum. *Education:* Hilda Heine. *Finance:* Dennis Momotaro. *Foreign Affairs:* Philip Muller. *Health:* David Kabua. *Internal Affairs:* Wilbur Heine. *Justice:* Thomas Heine. *Natural Resources and Development:* Michael Konelios. *Public Works:* Hiroshi Yamamura. *Transportation and Communications:* Rien Morris.

*Office of the President:* <http://www.rmigovernment.org/index.jsp>

## CURRENT LEADERS

### Christopher Loeak

*Position*  
President

### Introduction

Christopher Loeak was sworn into office on 10 Jan. 2012 following his appointment by the 33-member *Nitijela* (parliament) on 3 Jan. 2012. He is scheduled to serve a four-year term.

### Early Life

Christopher Loeak was born on 11 Nov. 1952 on Ailinglaplap Atoll to a family of tribal leaders. He was educated at Marshall Island High School before attending the Hawaii Pacific College. He completed his legal training at Gonzaga University, Washington in 1982.

Loeak then joined the Kwajalein Atoll Corporation as a lobbyist based in Hawaii. In 1983, whilst still in Hawaii, he unsuccessfully stood for the Ailinglaplap parliamentary seat. Two years later he

contested it again and won, serving in the cabinet of Amata Kabua as minister of justice from 1988–92. In 1992 he became minister of social services and in 1996 took on the education portfolio in Kunio Lemari's government, a post he retained after Imata Kabua (the younger cousin of Amata Kabua) took over as president.

Loeak was appointed minister for the Ralik Chain of islands in 1998 and a year later was also named minister in assistance to the president. Loeak was re-elected to the *Nitijela* in 2007 and in 2008 was reappointed as minister in assistance to President Litokwa Tomeing. He successfully defended his seat in the Nov. 2011 elections and on 2 Jan. 2012 was elected president when he won parliamentary backing by 21 votes to 11 against the incumbent president, Jurelang Zedkaia. Loeak and his cabinet were sworn into office on 10 Jan. 2012.

#### *Career in Office*

Loeak's main challenge is to raise levels of education and to gain a measure of financial independence from the USA, on which the Marshall Islands are heavily reliant for financial aid.

#### **DEFENCE**

The Compact of Free Association gives the USA responsibility for defence in return for US assistance. In 2003 the US lease of Kwajalein Atoll, a missile testing site, was extended by 50 years.

#### **ECONOMY**

Agriculture accounts for approximately 15% of GDP, industry 13% and services 72%.

#### **Overview**

The 1986 Compact of Free Association with the USA was renegotiated from 1999–2003 to allow for an increase in aid. This led to seven years of continuous growth. However, growth has slowed since 2005–06, while inflation has been volatile and rising, reflecting higher electricity costs and the rising price of food and fuel. Unemployment, particularly among young people, remains high, contributing to increased emigration to the USA, made easier under the Compact agreement.

The economy is highly vulnerable to external shocks owing to its geographical isolation, narrow production base and reliance on foreign aid. The planned steady decline in Compact grants means fiscal consolidation and structural reforms will be needed to ensure long-term fiscal sustainability. The IMF suggests expenditure cuts and revenue-raising policies. Structural reforms should aim to stimulate the private sector so that it may replace the government as the primary engine of growth.

#### **Currency**

US currency is used. Inflation was 17.5% in 2008 although it dropped to 9.6% in 2009.

#### **Budget**

Revenue in 2007 was US\$98.9m.; expenditure was US\$99.9m. Under the terms of the Compact of Free Association, the USA provides approximately US\$65m. a year in aid. The fiscal year begins on 1 Oct.

#### **Performance**

Total GDP in 2010 was US\$156m.; GDP per capita in 2006 was US\$2,770. Real GDP growth was 1.0% in 2005–06.

#### **Banking and Finance**

There are three banks: the Bank of Marshall Islands, the Marshall Islands Development Bank and the Bank of Guam.

#### **ENERGY AND NATURAL RESOURCES**

##### **Electricity**

Total installed capacity (2007 estimate), 17,200 kW. Production (2007 estimate), 108m. kWh.

##### **Minerals**

High-grade phosphate deposits are mined on Ailinglaplap Atoll. Deep-seabed minerals are an important natural resource.

##### **Agriculture**

A small amount of agricultural produce is exported: coconuts, tomatoes, melons and breadfruit. Other important crops include copra, taro, cassava and sweet potatoes. Pigs and chickens constitute the main livestock. In 2007 there were approximately 2,000 ha. of arable land and 8,000 ha. of permanent crop land.

##### **Fisheries**

Total catch in 2005 amounted to 56,664 tonnes. There is a commercial tuna-fishing industry with a canning factory on Majuro. Seaweed is cultivated. Fisheries offer some of the best opportunities for economic growth.

#### **INDUSTRY**

The main industries are copra, fish, tourism, handicrafts (items made from shell, wood and pearl), mining, manufacturing, construction and power.

##### **Labour**

In 2004 the labour force was estimated at 17,342. Approximately 34% were unemployed in 2004. In 2007, 37% of employed people worked in the private sector. In the same year 35% of workers were employed in public administration, 18% in wholesale and retail trade, 12% in extra-territorial organizations and bodies and 8% in construction. Agriculture, hunting, forestry and fishing accounted for just 3%.

#### **INTERNATIONAL TRADE**

The Compact of Free Association with the USA is the major source of income for the Marshall Islands, and accounts for about 70% of total GDP.

##### **Imports and Exports**

Imports (mainly oil) were US\$54.7m. in 2000; exports, US\$9.1m. Main import suppliers in 2000: USA, 56.7%; Australia, 10.0%; Japan, 9.3%; Hong Kong, 5.9%. The USA accounted for approximately 71.0% of exports in 2000. Main exports: coconut oil, copra cake, chilled and frozen fish, pet fish, shells and handicrafts.

#### **COMMUNICATIONS**

##### **Roads**

There are paved roads on major islands (Majuro, Kwajalein); roads are otherwise stone-, coral- or laterite-surfaced. In 2004 there were 1,555 passenger cars and 159 trucks and buses.

##### **Civil Aviation**

There were two international airports and 30 airfields on 24 atolls and islands in 2004. The main airport is Majuro International. In 2003 there were flights to Guam, Honolulu, Johnston Island, Kiribati and Micronesia as well as domestic services. The national carrier is Air Marshall Islands.

##### **Shipping**

Majuro is the main port. In Jan. 2009 there were 1,125 ships of 300 GT or over registered, totalling 41.58m. GT (a figure exceeded only by the fleets of Panama, Liberia and the Bahamas). Of the 1,125 vessels registered, 434 were oil tankers, 311 bulk carriers, 192 container ships, 110 general cargo ships, 56 liquid gas tankers, 15 chemical tankers and seven passenger ships. The ship's register of the Marshall Islands is a flag of convenience register.

##### **Telecommunications**

In 2008 there were 4,400 main (fixed) telephone lines. There is a US satellite communications system on Kwajalein and two Intelsat satellite earth stations (Pacific Ocean). The National Telecommunications Authority provides domestic and

international services. Mobile phone subscribers numbered 1,000 in 2008 (1.7 per 100 persons) and there were 2,200 internet users (3.6 per 100 persons).

### **SOCIAL INSTITUTIONS**

#### **Justice**

The Supreme Court is situated on Majuro. There is also a High Court, a District Court and 23 Community Courts. A Traditional Court deals with disputes involving land properties and customs.

#### **Education**

In 2008–09 there were 8,000 pupils enrolled in primary schools and 5,000 pupils in secondary schools. There is a College of the Marshall Islands and a subsidiary of the University of the South Pacific on Majuro. In 2004 public expenditure on education came to 11.8% of GDP.

#### **Health**

There were two hospitals in 2003, with a total of 140 beds. There were 31 doctors, 189 nurses and four dentists in 2003; and two pharmacists in 2000.

### **RELIGION**

The population is mainly Protestant, with Roman Catholics next. Other Churches and denominations include Latter-day Saints (Mormons), Jehovah's Witnesses, Baptists, Bahais, Seventh Day Adventists and Assembly of God.

### **CULTURE**

#### **World Heritage Sites**

The Marshall Islands has one site on the UNESCO World Heritage List: Bikini Atoll (inscribed on the list in 2010), the site used by the US military to carry out 67 nuclear tests between 1946 and 1958.

#### **Press**

There is a publication called *Micronitor* (The Marshall Islands Journal).

#### **Tourism**

In 2007 there were 6,959 foreign tourists. Tourism offers one of the best opportunities for economic growth.

#### **Festivals**

Custom Day and the Annual Canoe Race are the main festivals.

### **DIPLOMATIC REPRESENTATIVES**

Of the United Kingdom in the Marshall Islands

*Ambassador:* Stephen Lillie (resides in Manila, Philippines).

Of the Marshall Islands in the USA (2433 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Charles Paul.

Of the USA in the Marshall Islands (PO Box 1379, Majuro, MH 96960)

*Ambassador:* Martha Campbell.

Of the Marshall Islands to the United Nations

*Ambassador:* Vacant.

*Charge d'Affaires a.i.:* Rina M. Tareo.

Of the Marshall Islands to the European Union

*Ambassador:* Vacant.

# MAURITANIA

Al-Jumhuriyah al-Islamiyah al-Muritaniyah  
(Islamic Republic of Mauritania)

*Capital:* Nouakchott

*Population projection, 2015:* 3·87m.

*GNI per capita, 2011:* (PPP\$) 1,859

*HDI/world rank:* 0·453/159

## KEY HISTORICAL EVENTS

Mauritania became a French protectorate in 1903 and a colony in 1920. It achieved full independence on 28 Nov. 1960. Mauritania was made a one-party state in 1964.

The 1980s were marked by territorial disputes with Morocco and Senegal. Seizing power in 1984, Lieut.-Col. Maaouya Ould Sid'Ahmed Taya prepared the way for a new constitution allowing for a multi-party political system, which also gave extensive powers to the president. A coup attempt against Ould Taya failed in June 2003. But in Aug. 2005, while out of the country, he was overthrown in a bloodless coup by a group of army officers who set up a Military Council for Justice and Democracy. Under the leadership of Col. Ely Ould Mohammed Vall, the Council pledged to hold democratic elections within two years. In June 2006 a new constitution was approved, limiting the president to two 5-year terms. Sidi Mohamed Ould Cheikh Abdallahi won presidential elections in March 2007 but was ousted in a coup in Aug. 2008.

## TERRITORY AND POPULATION

Mauritania is bounded west by the Atlantic Ocean, north by Western Sahara, northeast by Algeria, east and southeast by Mali, and south by Senegal. The total area is 1,030,700 sq. km (398,000 sq. miles) of which 47% is desert, and the population at the census of 2000 was 2,508,159; density, 2·4 per sq. km. In 2005, 59·6% of the population lived in rural areas.

The UN gives a projected population for 2015 of 3·87m.

Area (in sq. km), population (at the 2000 census) and chief towns of the Nouakchott Capital District and 12 regions:

Region	Area	Population	Chief town
Açâba	36,600	242,265	Kiffa
Adrar	215,300	69,542	Atâr
Brakna	33,800	247,006	Aleg
Dakhlet Nouâdhibou	22,300	79,516	Nouâdhibou
Gorgol	13,600	242,711	Kaédi
Guidimaka	10,300	177,707	Sélibaby
Hodh ech-Chargui	182,700	281,600	Néma
Hodh el-Gharbi	53,400	212,156	Aïoun el Atrouss
Inchiri	46,800	11,500	Akjoujt
Nouakchott District	1,000	558,195	Nouakchott
Tagant	95,200	76,620	Tidjikdja
Tiris Zemmour	252,900	41,121	Zouérate
Trarza	67,800	268,220	Rosso

Principal town (2000 census population): 664,759 including the suburbs of Nouâdhibou and Kaédi.

In 2000 there were also 0·23m. nomads.

The major ethnic groups are (with numbers in 1993): Moors (of mixed Arab, Berber and African origin), 1,513,400; Wolof, 147,000; Tukolor, 114,600; Soninke, 60,000.

Arabic is the official language. French no longer has official status. Pulaar, Soninke and Wolof are national languages.

## SOCIAL STATISTICS

2008 estimates: births, 108,000; deaths, 33,000. 2008 rates, estimate (per 1,000 population): births, 33·6; deaths, 10·3. Expectation of life at birth in 2007 was 54·7 years for males and 58·5 for females. Annual population growth rate, 2000–08, 2·6%. Infant mortality, 2005, 78 per 1,000 live births; fertility rate, 2008, 4·5 births per woman.

## CLIMATE

A tropical climate, but conditions are generally arid, even near the coast, where the only appreciable rains come in July to Sept. Nouakchott, Jan. 71°F (21·7°C), July 82°F (27·8°C). Annual rainfall 6" (158 mm).

## CONSTITUTION AND GOVERNMENT

A referendum was held on 25 June 2006 to approve a new constitution. Turnout was 76·5%; 96·99% of votes cast were in favour.

The constitution imposes a limit of two five-year terms for a president, to be elected by popular vote. It also sets a maximum age of 75 for a president. There is a 56-member *Senate* (53 elected and three appointed) and a 95-member *National Assembly*.

Following the coup d'état in Aug. 2008 a transitional government took power, headed by an 11-member High Council of State (all of whom came from the military). Nonetheless, the junta has retained the constitution and vowed to protect the country's democratic institutions. In April 2009 Gen. Mohamed Ould Abdel Aziz stood down as head of government to run in the presidential elections of July 2009.

## National Anthem

'Kun lil-ilahi nasiran' ('Be a helper for God'); words by Baba Ould Cheikh, tune by Tolia Nikiprowetzky.

## RECENT ELECTIONS

Presidential elections originally scheduled for 6 June 2009 were held on 18 July 2009. Mohamed Ould Abdel Aziz, the leader of the 2008 coup, received 52·6% of votes cast, Messaoud Ould Boulkheir 16·3%, Ahmed Ould Daddah 13·7%, Mohamed Jemil Ould Mansour 4·8%, Ibrahima Moctar Sarr 4·6% and Ely Ould Mohamed Vall 3·8%. There were four other candidates. Turnout

was 65-1%. The opposition contested the results but the appeal was rejected in the Constitutional Court.

Elections for the National Assembly—the first since the coup in Aug. 2005 that ended 20 years of authoritarian rule—were held on 19 Nov. and 3 Dec. 2006. An 11-member Coalition of Forces for Democratic Change, comprising groups opposed to former President Taya, won 41 of the 95 seats; the parties supporting the former president, 13 (comprising the Republican Party for Renewal and Democracy 7, the Rally for Democracy and Unity 3 and the Union for Democracy and Progress 3); Alternative (Mauritania), 1; the Union of the Democratic Centre, 1; the National Rally for Liberty, Democracy and Equality, 1; ind., 38. In the Senate elections of 21 Jan. and 4 Feb. 2007 Coalition of Forces for Democratic Change won 15 seats; Republican Party for Democracy and Renewal, 3; Union for Democracy and Progress, 1; ind., 34.

### CURRENT GOVERNMENT

*President:* Gen. Mohamed Ould Abdel Aziz; b. 1956 (since 5 Aug. 2009).

*Prime Minister:* Moulaye Ould Mohamed Laghdaf; b. 1957 (ind.; in office since 14 Aug. 2008).

In March 2012 the government comprised:

*Minister of State for National Education, Higher Education and Scientific Research:* Ahmed Ould Bahia.

*Minister of Justice:* Abidine Ould El Khaire. *Foreign Affairs and Co-operation:* Hamadi Ould Hamadi. *National Defence:* Ahmedou Ould Dey Ould Mohamed Radhi. *Interior and Decentralization:* Mohamed Ould Boilil. *Economic Affairs and Development:* Sidi Ould Tah. *Finance:* Thiam Dioumbar. *Islamic Affairs and Basic Education:* Ahmed Ould Neini. *Civil Service and Administrative Modernization:* Maty Mint Hamadi. *Health:* Ba Husseinou Hamadi. *Oil, Energy and Mines:* Taleb Ould Abdi Vall. *Fisheries and Maritime Economy:* Ghdafna Ould Eyih. *Trade, Handicrafts, Tourism and Industry:* Bomba Ould Daramane. *Housing, Town Planning and Land Management:* Ismail Ould Bedde Ould Cheikh Sidiya. *Rural Development:* Brahim Ould M'Bareck Ould Mohamed El Moctar. *Equipment and Transport:* Yahya Ould Hademine. *Water Supply and Sanitation:* Mohamed Lemine Ould Aboye. *Culture, Youth and Sports:* Cissé Mint Cheikh Ould Boyde. *Communications and Relations with Parliament:* Hamdy Ould Mahjoub. *Social Affairs, Children and Family:* Moulaty Mint El Moctar.

### CURRENT LEADERS

#### Gen. Mohamed Ould Abdel Aziz

*Position*  
President

#### Introduction

Gen. Mohamed Ould Abdel Aziz was elected president of Mauritania in July 2009, having called elections after seizing power in a coup against his predecessor Sidi Mohamed Ould Cheikh Abdallahi in Aug. 2008. Aziz led the country at the head of a governing council until April 2009.

#### Early Life

Ould Abdel Aziz was born on 20 Dec. 1956 in Akjoujt, Mauritania, half way between the coastal capital and the Sahara desert. He was born into the Oulad Bou Sbaa Berber-Arab tribe, from which a number of powerful Mauritanian figures have emerged. In 1977 he attended officer training at the Royal Military Academy in Meknès, Morocco. After a stint in the army, he returned to the Military Academy in 1980 to receive training in logistics.

From 1978 Mauritania had a string of *de facto* governments following the overthrow of the civilian president Ould Daddah. Aziz became a staff officer in 1982 and in 1984 was appointed aide-de-camp to Col. Maaouya Ould Sid'Ahmed Taya, the nation's *de facto* military leader. After further training at the École Militaire Inter-Arme (EMIA), Aziz attained the rank of captain and, at Ould Taya's request, established an elite presidential guard (BASEP).

In 1992 Aziz became the army chief of staff, continuing to serve Ould Taya. In 1998, now a lieutenant colonel, he once again took charge of BASEP. After defeating coups in 2003 and 2004, for which he received the country's highest military award, Aziz was a leading figure in the 2005 coup that overthrew Ould Taya. Aziz emerged as a driving force for the restoration of civilian government and in March 2007 Ould Abdallahi was elected president in open elections.

Abdallahi named Aziz (still head of BASEP) commander of the armed forces, and even sent Aziz to meet King Mohammed of Morocco in an official state visit. In 2008 Aziz became a general. However, relations between the military and the civilian government grew strained as the economic situation deteriorated and Islamic political forces gained strength. The government began a curb of military power and in Aug. 2008 announced a restructuring of the military. In response, the army ousted Abdallahi. As head of a military-dominated interim council, Aziz announced new elections to be held in June 2009. In March 2009 Aziz announced his intention to run for president in the elections, rescheduled for July.

#### Career in Office

His assumption of office in Aug. 2009 was attacked by France (the former colonial power), the African Union (AU), the USA and Algeria. However, he was received warmly in neighbouring Morocco and Libya.

The AU continued to impose sanctions in 2010, including a travel ban in AU countries for military personnel who had supported the coup and a seizure of their assets in AU banks. Aziz's electoral pledges included re-establishing civilian governance, improving national unity and consolidating republican institutions. In July 2010 his government adopted new anti-terrorism legislation to give security forces greater powers.

### DEFENCE

Conscription is authorized for two years. Defence expenditure in 2008 totalled US\$20m. (US\$7 per capita), representing 0.7% of GDP.

#### Army

There are six military regions. Army strength was 15,000 in 2007. In addition there was a Gendarmerie of about 3,000 and a National Guard of 2,000.

#### Navy

The Navy, some 620 strong in 2007, has bases at Nouâdhibou and Nouakchott.

#### Air Force

Personnel (2007), 250 with 18 aircraft (none combat capable).

### ECONOMY

In 2006 agriculture accounted for 13.1% of GDP, industry 47.8% and services 39.1%.

#### Overview

Mauritania is a developing economy with limited agrarian resources but extensive mineral deposits and rich fishing grounds. Mauritania has a long history of mining and the sector represents nearly 75% of exports but less than 3% of employment. Substantial gold and copper deposits have been exploited since

2006. However, over-dependence on mining and fisheries for export earnings leaves the economy vulnerable to external shocks.

Oil was discovered in 2001. Production in the main oil field started in 2006 but quickly ran into technical difficulties, with output falling from 75,000 bbls per day in early 2006 to 23,000 by the end of that year. Production has steadily declined ever since, with levels at 5,900 bbls per day in 2010. Deposits are expected to be depleted around 2015.

Mauritania's economy was hit hard in 2008 by a military coup, which led to political crisis and the suspension of donor assistance, coupled with the global recession and a fuel and food crisis. Economic growth, however, has rebounded in recent years. Nonetheless, Mauritania faces key challenges, including diversifying its economy and strengthening the business climate (it currently sits 165th out of 183 countries in the World Bank's 2010 *Doing Business* report). Poverty levels remain high. According to the 2010 Human Development Report, 21% of the population live below the international poverty line of US\$1.25 (PPP) per day.

#### Currency

The monetary unit is the *ouguiya* (MRO) which is divided into five *khoums*. The *ouguiya* was devalued in Oct. 1992 by 28% and again in July 1998 by 18%. Inflation was 7.3% in 2008 and 2.2% in 2009. Total money supply in March 2004 was 34,318m. *ouguiya*, foreign exchange reserves were US\$390m. and gold reserves 12,000 troy oz.

#### Budget

Revenues were 188.5bn. *ouguiya* in 2009 and expenditures 242.9bn. *ouguiya*.

VAT is 18%.

#### Performance

The economy contracted by 1.2% in 2009 but grew by 5.2% in 2010. Mauritania's total GDP in 2010 was US\$3.6bn.

#### Banking and Finance

The Central Bank (created 1973) is the bank of issue (*Governor*, Sid'Ahmed Ould Raiss). In 2010 there were ten commercial banks. Bank deposits totalled 35.2bn. *ouguiya* in 2009.

### ENERGY AND NATURAL RESOURCES

#### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.9 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Mauritania 146th in the world out of 149 countries analysed, with 44.2%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

#### Electricity

Installed capacity was 156,000 kW in 2007. Production in 2007 was 587m. kWh; consumption per capita was 227 kWh.

#### Oil and Gas

Oil was discovered off the coast of Mauritania in 2001. Production began in Feb. 2006, initially with 75,000 bbls a day.

#### Minerals

There are reserves of copper, gold, phosphate, gypsum, platinum and diamonds. Iron ore, 11.2m. tonnes of which were mined in 2006, accounts for about 69% of exports. Prospecting licences have also been issued for diamonds.

#### Agriculture

Only 1% of the country receives enough rain to grow crops, so agriculture is mainly confined to the south, in the Senegal river valley. In 2007 the agricultural population numbered 1,598,000 of whom 674,000 were economically active. There were an estimated

450,000 ha. of arable land in 2007 and 12,000 ha. of permanent crops. Production (2006, in 1,000 tonnes): sorghum, 84; rice, 70; dates, 20; maize, 17; dry beans, 10 (estimate); dry peas, 10 (estimate); yams, 3 (estimate); millet, 2; potatoes, 2 (estimate).

Herding is the main occupation of the rural population and accounted for 11% of GDP in 2005. In 2006–07 there were 17.15m. sheep and goats; 1.37m. cattle; 1.35m. camels; 4.3m. chickens (estimate).

#### Forestry

There were 267,000 ha. of forests in 2005 covering 0.3% of the land area, chiefly in the southern regions, where wild acacias yield the main product, gum arabic. In 2007, 1.71m. cu. metres of roundwood were cut.

#### Fisheries

Total catch in 2005 was 247,577 tonnes, of which 98% came from marine waters. Mauritania's coastal waters are among the world's most abundant fishing areas, earning it significant amounts of hard currency through licensing agreements. Fishing-related fees account for an estimated 15% of Mauritania's national budget.

### INDUSTRY

Output, 2002 (in tonnes): residual fuel oil, 364,000; petrol, 235,000; distillate fuel oil, 155,000; frozen and chilled fish (2001), 27,000; hides and skins (2001), 5,400.

#### Labour

In 2008 the economically active population was estimated at 1,353,000 (58% males). Of those in employment, 24.6% worked in commerce, 15.2% in administration, 14.9% in services and 10.5% in agriculture. The unemployment rate in 2008 was 31.2%.

### INTERNATIONAL TRADE

Total foreign debt was US\$2,281m. in 2005. In Feb. 1989 Mauritania signed a treaty of economic co-operation with the four other Maghreb countries—Algeria, Libya, Morocco and Tunisia.

#### Imports and Exports

In 2007 imports were valued at US\$1,376.6m. and exports at US\$1,302.4m. Main imports in 2007 were petroleum products (30.6% of total imports), foodstuffs and capital goods. Main exports in 2007 were iron ore (41.3% of total exports), oil and fish products. Main import suppliers in 2007 were France (15.9%), Brazil (6.0%), China (5.8%) and Belgium (4.5%). Principal export markets in 2006 were China (26.3%), Italy (11.8%), France (10.2%) and Belgium (6.8%).

### COMMUNICATIONS

#### Roads

There were about 11,066 km of roads in 2006, of which 26.8% were paved. In 2002 there were 7,100 passenger cars and 5,700 commercial vehicles.

#### Rail

A 704-km railway links Zouérate with the port of Point-Central, 10 km south of Nouâdhibou, and is used primarily for iron ore exports. In 2005 it carried 10.8m. tonnes of freight.

#### Civil Aviation

There are international airports at Nouakchott, Nouâdhibou and Néma. In 2003 scheduled airline traffic of Mauritania-based carriers flew 1m. km, carrying 116,000 passengers (14,000 on international flights).

#### Shipping

The major ports are at Point-Central (for mineral exports), Nouakchott and Nouâdhibou.

**Telecommunications**

In 2008 there were 76,400 main (fixed) telephone lines; mobile phone subscribers numbered 2,092,000 in 2008 (65.1 per 100 persons). There were 79,000 PCs in use in 2005 and 60,000 internet users in 2008.

**SOCIAL INSTITUTIONS****Justice**

There are courts of first instance at Nouakchott, Atâr, Kaédi, Aioun el Atrouss and Kiffa. The Appeal Court and Supreme Court are situated in Nouakchott. Islamic jurisprudence was adopted in 1980.

The population in penal institutions in Dec. 2005 was 815 (26 per 100,000 of national population).

**Education**

Basic education is compulsory for all children between the ages of six and 14. In 2007 there were 483,776 pupils and 11,379 teaching staff in primary schools, 102,130 secondary level pupils with 3,843 teaching staff and 11,794 tertiary level students with (2006) 353 academic staff. The University of Nouakchott, founded in 1981, is the leading tertiary education institution. Adult literacy rate in 2008 was 57%.

Public expenditure on education came to 2.8% of GNI in 2006.

**Health**

In 2006 there were four hospital beds per 10,000 persons. There were 477 physicians, 73 dentists, 1,636 nurses and 328 midwives in 2005.

In 2006, 60% of the population had access to improved drinking water sources.

**RELIGION**

Over 99% of Mauritians are Sunni Muslim, mainly of the Qadiriyyah sect.

**CULTURE****World Heritage Sites**

Mauritania has two sites on the UNESCO World Heritage List: Banc d'Arguin National Park (inscribed on the list in 1989), a coastal park of dunes and swamps; and the Ancient Ksour of Oualata, Chinguetti, Tichitt and Oualata (1996), Islamic trading and religious centres in the Sahara.

**Press**

In 2006 there were four daily newspapers with a circulation of 9,000.

**Tourism**

There were 30,000 foreign tourists in 2000; spending by tourists totalled US\$25m.

**DIPLOMATIC REPRESENTATIVES**

The Mauritanian Embassy in London closed in Sept. 2007.

Of the United Kingdom in Mauritania

*Ambassador:* Timothy Morris (resides in Rabat, Morocco).

Of Mauritania in the USA (2129 Leroy Pl., NW, Washington, D.C., 20008)

*Ambassador:* Mohamed Lemine El Haycen.

Of the USA in Mauritania (Rue Abdallaye, Nouakchott)

*Ambassador:* Jo Ellen Powell.

Of Mauritania to the United Nations

*Ambassador:* Ahmed Ould Teguedi.

Of Mauritania to the European Union

*Ambassador:* Mohamed Mahmoud Ould Brahim Khilil.

# MAURITIUS

## Republic of Mauritius

*Capital:* Port Louis

*Population projection, 2015:* 1.33m.

*GNI per capita, 2011:* (PPP\$) 12,918

*HDI/world rank:* 0.728/77

### KEY HISTORICAL EVENTS

Mauritius was visited by Middle Eastern and Malay merchants from around AD 1000 and documented by Portuguese seafarers between 1507 and 1512. In 1598 the Dutch admiral, Van Warwyck, established a settlement and named the island after Prince Maurice of Nassau, the stadtholder of Holland and Zeeland. French forces settled the island in 1722, renamed it *Isle de France* and brought African slaves to cultivate sugarcane. The British occupied the island in 1810 and it was formally ceded to Great Britain by the Treaty of Paris in 1814. Following the abolition of slavery in 1835, indentured labourers were transported from India. Independence was attained within the Commonwealth on 12 March 1968. Mauritius became a republic on 12 March 1992.

### TERRITORY AND POPULATION

Mauritius, the main island, lies 800 km (500 miles) east of Madagascar. Rodrigues is 560 km (350 miles) east. The outer islands are Agalega and the St Brandon Group. Area and population:

Island	Area in sq. km	2011 mid-year population
Mauritius	1,865	1,248,129
Rodrigues	104	37,922
Outer Islands	71	289
<b>Total</b>	<b>2,040</b>	<b>1,286,340</b>

Port Louis is the capital (128,851 inhabitants in 2010). Other towns: Beau Bassin-Rose Hill, 110,687; Vacoas-Phoenix, 106,404; Curepipe, 84,487; Quatre Bornes, 77,495. In 2010, 58.3% of the population were rural.

The UN gives a projected population for 2015 of 1.33m.

Ethnic composition, 2000: Indo-Mauritian, 66.0%; General Population (Creole and Franco-Mauritian), 32.0%; Sino-Mauritian, 2.0%. Mauritius has no indigenous population.

The official language is English, although French is widely used. Creole and Bhojpuri are vernacular languages.

### SOCIAL STATISTICS

2007: births, 17,034 (rate of 13.5 per 1,000 population); deaths, 8,498 (6.7 per 1,000); marriages, 11,547 (9.2 per 1,000); divorces, 1,302 (1.0 per 1,000). In 2007 the suicide rate was 15.7 per 100,000 population among men and 4.7 per 100,000 among women. Population growth rate in 2007 was 0.65%. In 2007 the most popular age range for marrying was 25–29 for males and 20–24 for females. Life expectancy at birth in 2007 was 69.1 years for males and 75.8 for females. Infant mortality, 2007, 15 per 1,000 live births; fertility rate, 2007, 2.0 births per woman.

### CLIMATE

The sub-tropical climate is humid. Most rain falls in the summer. Rainfall varies between 40" (1,000 mm) on the coast to 200" (5,000 mm) on the central plateau, though the west coast only has 35" (875 mm). Mauritius lies in the cyclone belt, whose season runs from Nov. to April, but is seldom affected by intense storms. Port Louis, Jan. 73°F (22.8°C), July 81°F (27.2°C). Annual rainfall 40" (1,000 mm).

### CONSTITUTION AND GOVERNMENT

The present constitution came into effect on 12 March 1968 and was amended on 12 March 1992. The head of state is the *President*, elected by a simple majority of members of the National Assembly. The role of *President* is largely a ceremonial one.

The 69-seat *National Assembly* consists of 62 elected members (three each for the 20 constituencies of Mauritius and two for Rodrigues) and seven additional seats in order to ensure a fair and adequate representation of each community within the Assembly. The government is headed by the *Prime Minister* and a Council of Ministers. Elections are held every five years on the basis of universal adult suffrage.

### National Anthem

'Glory to thee, Motherland'; words by J. G. Prosper, tune by P. Gentile.

### RECENT ELECTIONS

Parliamentary elections were held on 5 May 2010. The Alliance of the Future (consisting of the Mauritius Labour Party, Mauritian Social Democrat Party and Militant Socialist Movement) won 45 seats with 49.7% of votes cast, followed by the Alliance of the Heart (Mauritian Militant Movement, National Union and Mauritian Socialist Democrat Movement) with 20 seats (42.0% of votes cast). The Rodrigues Movement won two seats and the Mauritian Solidarity Front and the Organization of the People of Rodrigues won one seat each. Turnout was 77.8%.

### CURRENT GOVERNMENT

*Acting President:* Monquie Ohsan-Bellepeau (Mauritius Labour Party); b. 1942 (since 31 March 2012).

In March 2012 the cabinet was composed as follows:

*Prime Minister, Minister of Defence, Home Affairs, External Communications, Civil Service and Administrative Reform:* Navin Ramgoolam (Social Alliance); b. 1947 (took office 5 July 2005, having previously been prime minister from Dec. 1995 to Sept. 2000).

*First Deputy Prime Minister and Minister of Energy and Public Utilities:* Ahmed Rashid Beebeejaun. *Deputy Prime Minister and Minister of Finance and Economic Development:* Xavier-Luc Duval. *Deputy Prime Minister and Minister of Public Infrastructure, Land Transport and Shipping:* Anil Kumar Bachoo.

*Minister of Agro-Industry and Food Security:* Satya Veyash Faugoo. *Arts and Culture:* Mookhesswur Choonee. *Business, Enterprise and Co-operatives:* Jangbahadoorsing Iswurdeo Mola Ropchand Seetaram. *Education and Human Resources:* Vasant Kumer Bunwaree. *Environment and Sustainable Development:* Devanand Virahsawmy. *Fisheries and Rodrigues:* Louis Joseph Von-Mally. *Foreign Affairs, Regional Integration and International Trade:* Arvin Boolell. *Health and Quality of Life:* Lormus Bundhoo. *Housing and Lands:* Abu Kasenally. *Industry, Trade and Consumer Protection:* Sayyad Abd-Al-Cader Sayed-Hossen. *Information and Communication Technology:* Tassarajen Pillay Chedumbrum. *Labour, Industrial Relations and Employment:* Shakeel Ahmed Yousuf Abdul Razack Mohamed. *Local Government and Outer Islands:* Hervé Aimée. *Social Integration and Economic Development:* Surendra Dayal. *Social Security, National Solidarity, Institutional Reform, Gender Equality, Child Development and Family Welfare:* Sheilabai Bappoo. *Tertiary Education, Science, Research and Technology:* Rajeshwar Jeetah. *Tourism and Leisure:* John Michael Tzoun Sao Yeung Sik Yuen. *Youth and Sports:* Satyaprakash Ritoo. *Attorney General:* Yatindra Nath Varma.

*Government Website:* <http://www.gov.mu>

## CURRENT LEADERS

### Navin Ramgoolam

#### *Position*

Prime Minister

#### *Introduction*

Navin Ramgoolam was returned as prime minister at the elections of July 2005, defeating Paul Bérenger, leader of the Mauritian Militant Movement. Ramgoolam had previously held the post from Dec. 1995 to Sept. 2000, when he lost to former Mauritian president Sir Anerood Jugnauth.

#### *Early Life*

Navin Ramgoolam was born in Mauritius on 14 July 1947, the son of Seewoosagur Ramgoolam, the country's first president following independence in 1968. The younger Ramgoolam studied sciences at the Royal College at Curepipe in Mauritius before moving to Dublin, Ireland to train as a doctor at the Royal College of Surgeons in 1968. He gained full registration with the UK General Medical Council in 1977. Over the next ten years he worked as a senior medical officer and as a general practitioner in Mauritius, also holding the post of resident medical officer at the Yorkshire Clinic in the UK.

In 1987 Ramgoolam abandoned medicine to study for a masters degree in law at the London School of Economics. However, he subsequently abandoned a legal career in favour of politics, becoming leader of the Mauritius Labour Party in 1991. He went on to succeed Sir Anerood Jugnauth as prime minister in 1995.

#### *Career in Office*

In 2000, towards the end of Ramgoolam's first period in office, Mauritius secured a temporary seat on the United Nations Security Council. Having lost the premiership to his predecessor, Jugnauth, at elections later that year, he then formed the Social Alliance, a coalition led by the Mauritian Labour Party and including the Mauritian Party of Xavier-Luc Duval, the Mauritian Social Democrat Party, the Greens, the Republican Movement and the Mauritian Militant Socialist Movement (MMSM).

At the election of July 2005 the Social Alliance won 42 of a possible 70 seats, giving Ramgoolam a further term as prime minister. On coming to power he announced plans to tackle rising inflation and high levels of unemployment, and sought trade agreements to protect Mauritian exports, particularly sugar and textiles. By 2008 he had overseen a reduction in both unemployment and the budget deficit and the attraction of increasing levels of foreign investment. However, as Mauritius imports most of its food and energy, rising world prices for these commodities then pushed up inflation while recession in the developed world has posed a threat to the country's tourism industry and export potential. Nevertheless, Ramgoolam's ruling coalition won the May 2010 parliamentary election with a secure majority.

## DEFENCE

The Police Department is responsible for defence. Its strength was (2008) 8,000. In addition there is a special mobile paramilitary force of approximately 1,400, a Coast Guard of about 700 and a helicopter unit of about 100.

Defence expenditure totalled US\$36m. in 2008 (US\$28 per capita), representing 0.4% of GDP.

## ECONOMY

Agriculture accounted for 5.6% of GDP in 2006, industry 26.9% and services 67.6%.

### Overview

At independence in 1968 Mauritius had a low-income, agro-based economy reliant on sugar. It has subsequently developed into an upper middle income economy with the second highest GDP per capita in Africa and is considered a development success story by the World Bank. In the World Bank's 'Doing Business 2010' report, Mauritius ranked 20th of 183 countries and first in Africa.

The pillars of the economy are sugar, tourism, textiles and financial services. Early growth was largely derived from preferential trade status for textiles and sugar with the USA and the EU. However, the phasing out of such agreements for sugar exports to the EU, the expiration of textile quotas at the end of 2004 and rising oil prices in 2006 prompted the government to embark on structural reforms.

Attempts to diversify the economy into new sectors including seafood and technology have shown early signs of success. GDP growth averaged 4.8% annually between 2006 and 2008, against an average of 3.3% between 2002 and 2005. Foreign direct investment increased, the unemployment rate dropped and public debt declined from almost 70% of GDP in 2006 to 53% in 2008.

### Currency

The unit of currency is the *Mauritius rupee* (MUR) of 100 cents. There are Bank of Mauritius notes, cupro-nickel coins, nickel-plated steel coins and copper-plated steel coins. Inflation was 9.7% in 2008 and 2.5% in 2009. In July 2005 foreign exchange reserves were US\$1,365m. and gold reserves totalled 62,000 troy oz. Total money supply was Rs 22,646m. in June 2005.

### Budget

Central government revenue in 2007–08 was Rs 58,125m. (Rs 46,222m. in 2006–07); expenditure was Rs 51,265m. (Rs 46,726m. in 2006–07). Principal sources of revenue, 2007–08: taxes on goods and services, Rs 26,604m.; taxes on income, profits and capital gains, Rs 10,558m.; taxes on international trade and transactions, Rs 6,646m.; taxes on property Rs 4,003m. Main items of expenditure in 2007–08 were: compensation of employees, Rs 17,341m.; social benefits, Rs 12,584m.; interest, Rs 7,971m.; use of goods and services, Rs 5,749m. Since 1 Jan. 2010 the fiscal year has been the calendar year.

VAT is 15%.

### Performance

Real GDP growth was 3.0% in 2009 and 4.2% in 2010. Total GDP in 2010 was US\$9.7bn. Thanks to tourism, financial services and the traditional industries of sugar and textiles, Mauritius is now one of Africa's richest and most developed countries.

### Banking and Finance

The Bank of Mauritius (founded 1967) is the central bank. The *Governor* is Rundheersing Bheenick. In 2007 there were 19 commercial banks and one development bank. Since 2005 there has been no distinction between onshore and offshore banks. Non-bank financial intermediaries are the Post Office Savings Bank, the State Investment Corporation Ltd, the Mauritius Leasing Company, the National Mutual Fund, the National Investment Trust and the National Pension Fund. Other financial institutions are the Mauritius Housing Company and the Development Bank of Mauritius. There is also a stock exchange in Port Louis.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions were the equivalent of 3.6 tonnes per capita in 2008.

### Electricity

Installed capacity was 0.75m. kW in 2007. Production (2007) was 2.46bn. kWh. Consumption per capita in 2007 was 1,956 kWh.

### Agriculture

68,523 ha. were planted with sugarcane in 2007; yield in 2007 was 4,235,849 tonnes. Main secondary crops (2007, in 1,000 tonnes): potatoes, 15; tomatoes, 11; bananas, 9; tea, 8; pumpkins and squash, 7; cucumbers, 6; onions, 6; pineapples, 6. In 2003 there were 100,000 ha. of arable land and 6,000 ha. of permanent cropland; 21,619 ha. were irrigated.

Livestock, 2007: cattle, 7,000; goats and sheep, 26,000; pigs, 17,000.

Livestock products (2003) in tonnes: beef and veal, 2,580; pork, bacon and ham, 1,040; milk, 4,000; eggs, 12,500.

### Forestry

The total forest area was 37,000 ha. in 2005 (18.2% of the land area). In 2007 timber production totalled 15,000 cu. metres.

### Fisheries

The catch in 2005 totalled 10,048 tonnes, exclusively sea fish.

## INDUSTRY

Manufacturing includes: sugar, textile products, footwear and other leather products, diamond cutting, jewellery, furniture, watches and watchstraps, sunglasses, plastic ware, chemical products, electronic products, pharmaceutical products, electrical appliances, ship models and canned food. There were six sugar mills in 2010 producing 452,473 tonnes of sugar. Production figures for other leading commodities in 2010: beer and stout, 36.8m. litres; animal feeds, 175,250 tonnes; molasses, 145,752 tonnes.

### Labour

In 2007 the labour force was estimated at 548,900. Manufacturing employed the largest proportion, with 30.8% of total employment; agriculture, forestry and fishing, 7.2%; wholesale and retail trade, 6.3%. In 2007 the unemployment rate was 8.5%.

## INTERNATIONAL TRADE

External debt was US\$857m. at June 2007.

### Imports and Exports

Imports in 2010 were valued at Rs 135,394m. and exports at Rs 69,556m. In 2010 imports valued at Rs 30,239m. came from India, Rs 18,027m. from China, Rs 11,393m. from South Africa and Rs 10,992m. from France. Exports valued at Rs 13,542m. went to the UK in 2010, Rs 10,376m. to France, Rs 6,229m. to the USA and Rs 4,052m. to Spain.

Major imports in 2010 included machinery and transport equipment, Rs 27,451m.; mineral fuels, lubricants and related products, Rs 25,929m.; manufactured goods (paper, textiles, iron and steel), Rs 25,901m.; food and live animals, Rs 24,006m. Major exports (2010) included articles of apparel and clothing, Rs 23,004m.; fish and fish preparations, Rs 7,782m.; sugar, Rs 7,740m.; textile yarns, fabrics and finished articles, Rs 1,899m.

## COMMUNICATIONS

### Roads

In 2007 there were 75 km of motorway, 962 km of main roads and 991 km of secondary and other roads. In 2007 there were 144,400 passenger cars, 142,600 motorcycles and mopeds, 40,900 lorries and vans, and 4,000 buses and coaches. In 2007 there were 140 deaths as a result of road accidents.

### Civil Aviation

In 2007, 2,412,200 passengers were handled at Sir Seewoosagar Ramgoolam International Airport. The national carrier is Air Mauritius, which is partly state-owned. In 2006 scheduled airline traffic of Mauritius-based carriers flew 47m. km, carrying 1,150,000 passengers (1,067,000 on international flights).

### Shipping

A free port was established at Port Louis in Sept. 1991. In 2008–09 Port Louis handled 6,295,000 tonnes of cargo. In Jan. 2009 there were three ships of 300 GT or over registered, totalling 13,000 GT.

### Telecommunications

In 2008 there were 364,500 main (fixed) telephone lines; mobile phone subscribers numbered 1,033,300 in 2008 (80.7 per 100 persons). Communication with other parts of the world is by satellite and microwave links. There were 220,000 PCs in use in 2006 and 282,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

There is an Ombudsman. The death penalty was abolished for all crimes in 1995.

The population in penal institutions in May 2008 was 2,223 (171 per 100,000 of national population).

### Education

The adult literacy rate in 2009 was estimated at 87.9% (90.6% among males and 85.3% among females). Primary and secondary education is free, primary education being compulsory. Almost all children aged 5–11 years attend schools. In 2008 there were 114,007 pupils in 286 primary schools and 112,995 pupils in 175 secondary schools in the island of Mauritius, and 5,015 pupils in 13 primary schools and 3,508 in six secondary schools in Rodrigues. In 2007, 3,945 teachers were enrolled for training at the Mauritius Institute of Education.

In 2007–08 there were 7,794 students and 487 academic staff at the University of Mauritius.

In 2007–08 total expenditure on education came to 3.2% of GDP and 12.7% of total government spending.

### Health

In 2007 there were 1,444 physicians, 228 dentists, 3,300 nurses and midwives, and 327 pharmacists. There were 12 hospitals in 2006 with a provision of 28 beds per 10,000 inhabitants.

## RELIGION

In 2001 there were 610,000 Hindus, 330,000 Roman Catholics and 190,000 Muslims.

## CULTURE

### World Heritage Sites

Mauritius has two sites on the UNESCO World Heritage List: Aapravasi Ghat (inscribed on the list in 2006), the site where the

modern indentured labour diaspora began; and Le Morne cultural landscape (2008), a rugged mountain jutting into the Pacific Ocean that was used by runaway slaves (maroons) as a shelter in the 18th and 19th centuries.

#### Press

In 2006 there were four daily papers with a combined circulation of 110,000. There were also 12 weeklies (two in Chinese, one in English and the rest in French).

#### Tourism

In 2010 there were 934,827 visitors (including 605,401 from Europe and 226,207 from other African countries), bringing in US\$1,227m. in tourist revenue.

#### Festivals

Independence Day is marked by an official celebration at the Champ de Mars racecourse on 12 March. The Hindu festival of Cavadee is celebrated by the Tamil community at the beginning of the year; the major three-day Hindu festival of Maha Shivarati takes place around Feb./March. Other Hindu festivals include Diwali and Ganesh Chaturhi, which is celebrated around Aug./Sept. The Spring Festival is celebrated on the eve of the Chinese New Year; Ougadi, the Telegu new year, is celebrated in March; the Tamil new year, Varusha Pirappu, takes place in April. Muslim festivals include Eid al-Fitr and Eid al-Adha. On 9 Sept. pilgrims visit the grave of the 19th century missionary Père Laval who is regarded as a national saint.

#### DIPLOMATIC REPRESENTATIVES

Of Mauritius in the United Kingdom (32–33 Elvaston Pl, London, SW7 5NW)

*High Commissioner:* Abhimanu Mahendra Kundasamy.

Of the United Kingdom in Mauritius (Les Cascades Bldg, Edith Cavell St., Port Louis)

*High Commissioner:* Nick Leake.

Of Mauritius in the USA (1709 N. St., NW, Washington, D.C., 20036)

*Ambassador:* Somduth Soburun.

Of the USA in Mauritius (Rogers House, John Kennedy St., Port Louis)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Troy Fitrell.

Of Mauritius to the United Nations

*Ambassador:* Milan Jaya Nyamrajsingh Meetarbhan.

Of Mauritius to the European Union

*Ambassador:* Jagdish Dharamchand Koonjul.

# MEXICO

Estados Unidos Mexicanos  
(United States of Mexico)

Capital: Mexico City

Population projection, 2015: 120.06m.

GNI per capita, 2011: (PPP\$) 13,245

HDI/world rank: 0.770/57

## KEY HISTORICAL EVENTS

The first settlers of the New World arrived in Alaska from Asia about 15,000 years ago. From about 2000 BC the people of Ancient Mexico began to settle in villages and to cultivate maize and other crops. From about 1000 BC the chief tribes were the Olmec on the Gulf Coast, the Maya in the Yucatán peninsula and modern day Chiapas, the Zapotecs and Mixtecs in Oaxaca, the Tarascans in Michoacán and the Toltecs in central Mexico. One of the largest and most powerful cities in ancient Mexico was Teotihuacán, which in the 6th century AD was one of the six largest cities in the world. By the time the Spanish *conquistadores* arrived in 1519, the dominant people were the Mexica, more commonly known as the Aztecs, whose capital Tenochtitlán became Mexico City after the conquest.

Hernán Cortés landed on the Gulf Coast in 1519 and by 1521 his small band of Spaniards, assisted by an army of indigenous peoples, had destroyed the Aztec state. The land conquered by Cortés was named New Spain, and was ruled by the Spanish Crown for three centuries. The new colony was the personal property of the King, whose representative, the Viceroy, was charged with extracting the maximum income for the Crown. The mainstays of the colonial economy were silver and land. Rich silver mines were discovered and large estates (*haciendas*) were formed. Spain controlled trade with the colonies and discouraged manufacturing to maximize profits for the King. Acapulco became Spain's sole port for trade with Asia.

One early result of the Conquest was a collapse of the indigenous population caused by social dislocation and European diseases. In 1520 the native population was probably 20m. By 1540 it had fallen to 6.5m. and by 1650 the figure was just over 1m.

The beginning of the end of Spanish rule came on 16 Sept. 1810 when the parish priest of Dolores, Miguel Hidalgo y Costilla, called for independence (the 'grito de Dolores') and led a popular army against the Spaniards. Hidalgo's revolution failed as did that of the insurrectionary José María Morelos y Pavón. Independence from Spain was declared in the Plan of Iguala on 24 Feb. 1821

when Agustín de Iturbide proclaimed himself Emperor of Mexico. He ruled for two years.

There followed half a century of coups and counter coups. Spain invaded Tampico in 1829. Texas declared secession in 1836. The Mexican dictator Antonio de Santa Anna marched north but was defeated by the Texans. France invaded Veracruz in 1838 (the 'Pastry War'). In 1846 the USA declared war on Mexico. The war was ended in 1848 by the Treaty of Guadalupe which forced Mexico to cede a huge swathe of its territory to the USA. Liberals and conservatives fought the War of the Reform from 1858–61. The liberal government of Benito Juárez abolished the *fueros* (clerical and military privileges) and hereditary titles, confiscated the church's lands and attempted far-reaching land reform. This was followed by the French Intervention (1862–67), which installed the Habsburg Archduke Maximilian of Austria as Emperor of Mexico. The French were resisted stubbornly by President Juárez but the republicans were forced into the resource-poor and sparsely populated north. Napoleon III withdrew his troops from Mexico in 1867 despite a pledge to support Maximilian, allowing the republicans to take back the country virtually unopposed. Asserting Mexico's independence, Juárez ordered the execution of Maximilian.

From 1876–1910, a period known as the *porfiriato*, Mexico was ruled (with one interlude from 1880–84) by Gen. Porfirio Díaz. Díaz imposed a degree of stability and order. He encouraged foreign investment, which funded a rapid expansion of the railways and an export-led economic boom. The economy faltered in the first decade of the 20th century. Díaz was deposed in 1911 by Francisco Madero, whose Plan of San Luís Potosí launched the Mexican Revolution.

Madero was deposed and assassinated in 1913. There followed a civil war fought by the armies of Venustiano Carranza, Pancho Villa and Emiliano Zapata. A new constitution was written in 1917. Zapata was ambushed and killed in 1919 and Carranza was assassinated in 1920. Villa retired the same year but was assassinated in 1923.

In the 1920s Mexico was ruled by Alvaro Obregón and Plutarco Elías Calles. Obregón's assassination in 1928 led to the formation of the National Revolutionary Party (PRN), later the Institutional Revolutionary Party (PRI), which ruled Mexico for the rest of the century. Lázaro Cárdenas was president from 1934–40. He nationalized the oil industry and accelerated the distribution of land to the peasantry. The election of Miguel Alemán in 1946 was opposed unsuccessfully by the last military rebellion in Mexico's history. Alemán's pro-business administration began a long period of relative economic prosperity, the 'Mexican Miracle'.

However, by the late 1960s the Mexican economic and political system was under increasing strain. An uprising led by students ended in a bloody massacre in the Tlatelolco district of Mexico City in 1968. Successive PRI presidents made gestures towards democratization and effective opposition gradually developed. Financial and economic problems in the 1980s increased the pressure on the political system. The crisis came in 1988 when the PRI candidate, Carlos Salinas de Gortari, defeated Cuauhtémoc Cárdenas, son of the former president and candidate of the Democratic Revolutionary Party (PRD), in a rigged election. Salinas took Mexico into the North American Free Trade Agreement (NAFTA) with the USA and Canada in 1992. Salinas' choice as the PRI's presidential candidate, Luís Donaldo Colosio, was assassinated in Tijuana on 23 March 1994. He was replaced by Ernesto Zedillo. In the same year the Zapatista National Liberation Army (EZLN) led an uprising in Chiapas, which is ongoing.

In 2000 Vicente Fox Quesada of the National Action Party (PAN) was elected to the presidency. Fox attempted to address

two key issues: Mexico's economic and financial weakness and illegal migration to the USA. However, the PRI majority in Congress blocked Fox's fiscal reforms and the Bush administration was unwilling to support Fox's proposal to liberalize immigration. In the 2006 presidential elections the conservative Felipe Calderón and the socialist Andrés Manuel López Obrador both claimed victory. Calderón was finally declared the winner more than two months after the election, but in Nov. López Obrador proclaimed himself the 'legitimate' president. Nevertheless, Calderón was sworn in as scheduled in Dec. 2006.

### TERRITORY AND POPULATION

Mexico is bounded in the north by the USA, west and south by the Pacific Ocean, southeast by Guatemala, Belize and the Caribbean Sea, and northeast by the Gulf of Mexico. It comprises 1,964,375 sq. km (758,464 sq. miles), including uninhabited islands (5,127 sq. km) offshore.

Population at recent censuses: 1970, 48,225,238; 1980, 66,846,833; 1990, 81,249,645; 2000, 97,483,412; 2005, 103,263,388; 2010, 112,336,538 (57,481,307 females). Population density, 57.2 per sq. km (2010). 76.0% of the population were urban in 2005.

The UN gives a projected population for 2015 of 120.06m.

Area, population and capitals of the Federal District and 31 states:

	Area (Sq. km)	Population (2010 census)	Capital
Federal District	1,499	8,851,080	Mexico City
Aguascalientes	5,589	1,184,996	Aguascalientes
Baja California	70,113	3,155,070	Mexicali
Baja California Sur	73,677	637,026	La Paz
Campeche	51,833	822,441	Campeche
Chiapas	73,887	4,796,580	Tuxtla Gutiérrez
Chihuahua	247,087	3,406,465	Chihuahua
Coahuila de Zaragoza	151,571	2,748,391	Saltillo
Colima	5,455	650,555	Colima
Durango	119,648	1,632,934	Victoria de Durango
Guanajuato	30,589	5,486,372	Guanajuato
Guerrero	63,794	3,388,768	Chilpancingo de los Bravo
Hidalgo	20,987	2,665,018	Pachuca de Soto
Jalisco	80,137	7,350,682	Guadalajara
México	21,461	15,175,862	Toluca de Lerdo
Michoacán de Ocampo	59,864	4,351,037	Morelia
Morelos	4,941	1,777,227	Cuernavaca
Nayarit	27,621	1,084,979	Tepic
Nuevo León	64,555	4,653,458	Monterrey
Oaxaca	95,364	3,801,962	Oaxaca de Juárez
Puebla	33,919	5,779,829	Heroica Puebla de Zaragoza
Querétaro Arteaga	11,769	1,827,937	Santiago de Querétaro
Quintana Roo	50,350	1,325,578	Chetumal
San Luis Potosí	62,848	2,585,518	San Luis Potosí
Sinaloa	58,092	2,767,761	Culiacán Rosales
Sonora	184,934	2,662,480	Hermosillo
Tabasco	24,661	2,238,603	Villahermosa
Tamaulipas	79,829	3,268,554	Ciudad Victoria
Tlaxcala	3,914	1,169,936	Tlaxcala de Xicohtécatl
Veracruz-Llave	72,815	7,643,194	Xalapa-Enríquez
Yucatán	39,340	1,955,577	Mérida
Zacatecas	75,040	1,490,668	Zacatecas
<b>Total</b>	<b>1,967,183</b>	<b>112,336,538</b>	

The *de facto* official language is Spanish, the mother tongue of over 93% of the population (2005), but there are some indigenous language groups (of which Náhuatl, Maya, Zapotec, Otomi and Mixtec are the most important) spoken by 6,011,202 persons over five years of age (census 2005).

The populations (2010 census) of the largest cities (250,000 and more) were:

Mexico City	8,555,272	Ciudad López Mateos	489,160
Ecatepec de Morelos	1,655,015	Cuautitlán Izcalli	484,573
Guadalajara	1,495,182	Apodaca	467,157
Heroica Puebla de Zaragoza	1,434,062	Heroica Matamoros	449,815
Juárez	1,321,004	San Nicolás de los Garza	443,273
Tijuana	1,300,983	Veracruz	428,323
León de los Aldama	1,238,962	Xalapa-Enríquez	424,755
Zapopan	1,142,483	Tonala	408,759
Monterrey	1,135,512	Mazatlán	381,583
Ciudad Nezahualcoyotl	1,104,585	Irapuato	380,941
Chihuahua	809,232	Nuevo Laredo	373,725
Naucalpan de Juárez	792,211	Xico	356,352
Mérida	777,615	Villahermosa	353,577
San Luis Potosí	722,772	Escobedo	352,444
Aguascalientes	722,250	Celaya	340,387
Hermosillo	715,061	Cuernavaca	338,650
Saltillo	709,671	Tepic	332,863
Mexicali	689,775	Ixtapaluca	322,271
Culiacán Rosales	675,773	Ciudad Victoria	305,155
Guadalupe	673,616	Ciudad Obregón	298,625
Acapulco de Juárez	673,479	Tampico	297,284
Tlalnequanta	653,410	Villa Nicolás Romero	281,799
Cancún	628,306	Ensenada	279,765

Toluca de Lerdo	489,333		

### SOCIAL STATISTICS

Statistics for calendar years:

	Births	Deaths	Marriages	Divorces
2005	2,567,906	495,240	595,713	70,184
2006	2,505,939	494,471	586,978	72,396
2007	2,655,083	514,420	595,209	77,255
2008	2,636,110	539,530	589,352	81,851
2009	2,577,214	564,673	558,913	84,302

Rates per 1,000 population, 2009: births, 18.0 deaths, 4.9. In 2006 the most popular age range for marrying was 20–24 for both males and females. Infant mortality was 14.7 per 1,000 live births in 2009. Life expectancy at birth in 2007 was 73.6 years for males and 78.5 years for females. Annual population growth rate, 2005–10, 1.8%. Fertility rate, 2008, 2.2 births per woman. Much of the population still lives in poverty, with the gap between the modern north and the backward south constantly growing.

### CLIMATE

Latitude and relief produce a variety of climates. Arid and semi-arid conditions are found in the north, with extreme temperatures, whereas in the south there is a humid tropical climate, with temperatures varying with altitude. Conditions on the shores of the Gulf of Mexico are very warm and humid. In general, the rainy season lasts from May to Nov. Mexico City, Jan. 55°F (12.9°C), July 61°F (16.2°C). Annual rainfall 31" (787.6 mm). Guadalajara, Jan. 63°F (17.0°C), July 72°F (22.1°C). Annual rainfall 39" (987.6 mm). La Paz, Jan. 62°F (16.8°C), July 86°F (29.9°C). Annual rainfall 7" (178.3 mm). Mazatlán, Jan. 68°F (20.0°C), July 84°F (29.0°C). Annual rainfall 32" (822.1 mm). Mérida, Jan. 73°F (23.0°C), July 81°F (27.4°C). Annual rainfall 39" (990.0 mm). Monterrey, Jan. 58°F (14.3°C), July 83°F (28.1°C). Annual rainfall 23" (585.4 mm). Puebla de Zaragoza, Jan. 52°F (11.4°C), July 62°F (16.9°C). Annual rainfall 36" (900.8 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was promulgated on 5 Feb. 1917 and has occasionally been amended. Mexico is a representative, democratic and federal republic, comprising 31 states and a federal district, each state being free and sovereign in all internal affairs, but united in a federation established according to the principles of the Fundamental Law. The head of state and supreme executive authority is the *President*, directly elected for a non-renewable six-year term. The constitution was amended in April 2001, granting autonomy to 10m. indigenous peoples. The amendment was opposed both by the National Congress of Indigenous Peoples and Zapatista rebels who claimed it would leave many indigenous people worse off.

There is complete separation of legislative, executive and judicial powers (Art. 49). Legislative power is vested in a General Congress of two chambers, a *Chamber of Deputies* and a *Senate*. The Chamber of Deputies consists of 500 members directly elected for three years, 300 of them from single-member constituencies and 200 chosen under a system of proportional representation. In 1990 Congress voted a new Electoral Code. This established a body to organize elections (IFE), an electoral court (TFE) to resolve disputes, new electoral rolls and introduce a voter's registration card. Priests were enfranchised in 1991.

The Senate comprises 128 members. In each of the 31 states and the Federal District the party coming first wins two seats and the party coming second wins one seat, making 96 in total. An additional 32 seats are filled through proportional representation from national party lists. Members of both chambers are not immediately re-eligible for election. Congress sits from 1 Sept. to 31 Dec. each year; during the recess there is a permanent committee of 15 deputies and 14 senators appointed by the respective chambers.

### National Anthem

'Mexicanos, al grito de guerra' ('Mexicans, at the war-cry'); words by F. González Bocanegra, tune by Jaime Nunó.

## GOVERNMENT CHRONOLOGY

Presidents since 1940. (PRI = Institutional Revolutionary Party; PAN = National Action Party)

1940-46	PRI	Manuel Ávila Camacho
1946-52	PRI	Miguel Alemán Valdés
1952-58	PRI	Adolfo Ruiz Cortines
1958-64	PRI	Adolfo López Mateos
1964-70	PRI	Gustavo Díaz Ordaz Bolaños
1970-76	PRI	Luis Echeverría Álvarez
1976-82	PRI	José López Portillo y Pacheco
1982-88	PRI	Miguel de la Madrid Hurtado
1988-94	PRI	Carlos Salinas de Gortari
1994-2000	PRI	Ernesto Zedillo Ponce de León
2000-06	PAN	Vicente Fox Quesada
2006-	PAN	Felipe de Jesús Calderón Hinojosa

## RECENT ELECTIONS

In the presidential elections of 2 July 2006 Felipe Calderón of the Partido Acción Nacional (National Action Party/PAN) won 35.9% of the vote, Andrés Manuel López Obrador of the Partido de la Revolución Democrática (Party of the Democratic Revolution/PRD) 35.3%, Roberto Madrazo of the Partido Revolucionario Institucional (Institutional Revolutionary Party/PRI) 22.3%, Patricia Mercado Castro of the Partido Alternativa Socialdemócrata y Campesina (Social Democratic and Peasant Alternative Party/ASC) 2.7% and Roberto Campa Cifrián of the Partido Nueva Alianza (New Alliance Party/PNA) 1.0%. Turnout was 58.6%. López Obrador claimed electoral irregularities and refused to concede defeat. After mass protests in support of the leftist López Obrador and nearly two months of deadlock, the Federal Electoral Tribunal rejected the allegations of systematic fraud and on 5 Sept. 2006 declared Calderón the winner.

In elections to the Chamber of Deputies held on 5 July 2009 the Institutional Revolutionary Party (PRI) won 241 seats (36.7% of the vote), the National Action Party (PAN) 147 (28.0%), the Party of the Democratic Revolution (PRD) 72 (12.2%), the Ecologist Green Party of Mexico (PVEM) 17 (6.7%), the Labour Party (PT) 9 (3.7%), the New Alliance Party (PNA) 8 (3.4%) and Convergence 6 (2.5%).

Presidential and parliamentary elections were scheduled to take place on 1 July 2012.

## CURRENT GOVERNMENT

*President:* Felipe Calderón; b. 1962 (National Action Party; sworn in 1 Dec. 2006).

In March 2012 the government comprised:

*Head of the Presidential Office:* Patricia Flores Elizondo. *Minister of Interior:* Alejandro Poiré. *Foreign Affairs:* Patricia Espinosa Cantellano. *Defence:* Gen. Guillermo Galván Galván. *Naval Affairs:* Adm. Mariano Francisco Saynez Mendoza. *Finance and Public Credit:* José Antonio Meade. *Social Development:* Heriberto Félix Guerra. *Energy:* Jordy Herrera. *Economy:* Bruno Ferrari García de Alba. *Agriculture, Livestock, Rural Development, Fisheries and Food:* Francisco Javier Mayorga Castañeda. *Communication and Transport:* Dionisio Pérez-Jácome Friscione. *Public Education:* José Ángel Córdova Villalobos. *Health:* Salomón Chertorivski. *Public Security:* Genaro García Luna. *Labour and Social Welfare:* Rosalinda Vélez Juárez. *Agrarian Reform:* Abelardo Escobar Prieto. *Tourism:* Gloria Guevara Manzo. *Environment and Natural Resources:* Juan Rafael Elvira Quesada. *Civil Service:* Rafael Morgan Ríos. *Attorney General:* Marisela Morales Ibañez.

*Presidency Website:* <http://www.presidencia.gob.mx>

## CURRENT LEADERS

### Felipe Calderón

#### Position

President

#### Introduction

Felipe Calderón of the centre-right National Action Party (PAN) became president after winning the election of July 2006 by a margin of less than 1 percent. When his closest rival, López Obrador, disputed the result there were mass protests. Calderón pledged to reduce rising crime and to tackle poverty by creating incentives for foreign investment, but his anti-drugs strategy has failed to stem a rising tide of related violence.

#### Early Life

Felipe de Jesús Calderón Hinojosa was born on 18 Aug. 1962 in Morelia, Michoacán. He studied law at the Escuela Libre de Derecho in Mexico City and economics at the Instituto Tecnológico Autónomo de México, before gaining a masters in public administration from Harvard University in the USA.

From a young age Calderón was a member of PAN, which his father had helped to found in 1939. Calderón became the organization's national youth leader in 1986 and served in the federal chamber of deputies from 1991-94. In 1993 he was elected the party's secretary-general when his mentor, Carlos Castillo Peraza, assumed the party presidency. Calderón succeeded Peraza in 1996 and during three years as leader maintained control of 14 state capitals.

However, Vicente Fox was selected to succeed him as party president in late 1999 and went on to contest the 2000 national elections. Fox forged a centre-right alliance (the Alliance for Change) with the Ecologist Green Party of Mexico and won elections to end 71 years of continuous rule by the Institutional Revolutionary Party (PRI).

Calderón was appointed parliamentary co-ordinator of PAN and president of the council of political co-ordination. He also

served as a director of the state-owned development bank, Banco Nacional de Obras y Servicios Públicos (BANOBRAS), and in 2002 joined the cabinet as energy secretary. He resigned in 2004 in protest at Fox's support for Santiago Creel as PAN's presidential candidate. In a series of party primaries in late 2005, Calderón decisively defeated Creel and another contender, Alberto Cardenas.

During the election campaign he initially trailed Andrés Manuel López Obrador of the left-wing Party of the Democratic Revolution but closed the gap with promises of job creation and a clampdown on crime and corruption. In the election of 2 July 2006 both Calderón and López Obrador claimed victory before Calderón was declared victor by 0.56% four days later. López Obrador's claims of voting irregularities and electoral fraud resulted in large-scale public protests. A partial recount saw the result upheld but López Obrador continued to protest and formed a 'parallel administration'. Calderón was sworn in on 1 Dec. 2006 inside a barricaded parliament building.

#### **Career in Office**

During his first year in office Calderón introduced significant reforms of public sector pensions and the tax system, and launched an employment programme giving cash incentives to companies taking on new employees. He also agreed to an electoral reform law put forward by the opposition.

The economy was hit hard by the global downturn in 2008, forcing the government to respond with a package of emergency measures in Jan. 2009. Approval ratings for the president and the PAN slumped, and in mid-term congressional elections in July 2009 the opposition PRI made large gains to become the main force in the Chamber of Deputies.

Calderón's high-profile campaign against illegal drugs cartels has proved largely ineffective, despite the establishment of a new federal police force and the deployment of troops in an anti-trafficking drive. A US Justice Department report in Dec. 2008 stated that Mexican drug traffickers posed the largest organized crime threat to the USA. It was reported in Jan. 2011 that 34,600 people had died in drug-related killings since the presidential election, including 15,273 in 2010 (up from 9,616 the previous year). Thousands of people joined protests against drug crime during the summer of 2011 but acts of violence continued, including an attack in Aug. by armed gangsters on a casino in Monterrey. Fifty-two people died in the incident, which Calderón described as an abhorrent act.

#### **DEFENCE**

Conscription is for 12 months. In 2008 defence expenditure totalled US\$4,346m. (US\$40 per capita), representing 0.4% of GDP.

#### **Army**

Enlistment into the regular army is voluntary, but there is also one year of conscription (four hours per week) by lottery. Strength of the regular army (2007) 178,000. There are reserve forces numbering 39,899 in 2007. In addition there is a rural defence militia of 18,000.

#### **Navy**

The Navy is primarily equipped and organized for offshore and coastal patrol duties. It includes one destroyer and six frigates. Naval Aviation, 1,250 strong, operates eight combat capable aircraft.

Naval personnel in 2007 totalled 46,400, including Naval Aviation. In addition there were 12,600 marines.

#### **Air Force**

The Air Force had (2007) a strength of 11,700 with 78 combat capable aircraft, including PC-7s and F-5Es.

#### **ECONOMY**

Agriculture accounted for 3.9% of GDP in 2006, industry 26.7% and services 69.4%.

#### **Overview**

Mexico ranks among the world's dozen largest economies and is the second largest in Latin America. Average income levels are the highest in Latin America but remain well below the OECD average. There is a high degree of income inequality, with the World Bank estimating that the richest 10% of the population earns over 40% of total income while the poorest 10% accounts for only 1.1%. The economy suffered from poor macroeconomic management in the 1980s while in 1994–95 a currency crisis threw millions into poverty. Yet economic performance during the 1990s compared favourably with that of the previous decade, with inflation significantly reduced and public debt brought down from 115% in 1986 to 22% in 1999.

Since 1995 macroeconomic management has been on a sound footing. The labour market and banking system have been reformed and privatization has reduced the state's direct involvement in the economy. Increased stability, low inflation and low interest rates have prevailed since late 2005. External debt has been reduced and there has been a steady rise in foreign direct investment. Capital inflows from the energy sector have made possible increased spending on infrastructure. Growth in the domestic property and construction sectors as well as remittances from Mexicans working in the USA have also helped. Nonetheless, recent growth is considered to be well below the country's potential and insufficient to reduce poverty significantly.

Until 1985 oil was the principal export and Mexico was still the world's fifth largest producer in 2004. Manufactured goods now make up over 80% of total exports while oil accounts for 15%. The transfer to manufactured exports started with the economic liberalization of the 1980s and was accelerated by membership of the North American Free-Trade Agreement in 1994. Nearly half of the country's total exports are produced in *maquiladoras* (in-bond assembly plants for re-export). The mining sector was estimated to account for only 1.4% of GDP in 2003 but this understates the importance of oil production, although output fell in 2009.

The USA is Mexico's main trading partner, accounting for over 80% of exports. Mexico has benefited from a shift in industrial production in the USA to south of the border. Nonetheless, industrial production has slowed, as evidenced by a 0.2% year-on-year fall in mid-2008. The global economic turmoil of 2008 led to a deep recession in 2009, reflecting falling demand from the USA as well as a significant decline in the amount of remittances sent from Mexican workers in the USA.

Mexico rebounded strongly in 2010 and registered growth of 5.4%, driven by higher external demand for its manufacturing exports and a recovery in domestic demand. Strong fiscal and monetary policy response and three successive Flexible Credit Line arrangements (offering access to US\$73bn.) have underpinned the government's macroeconomic strategy and supported the recovery.

Ongoing priorities include educational reform (Mexico's human capital is the lowest in the OECD) and public finance reform. Meanwhile, Mexico must meet the challenge of increasingly efficient competitors, including China. The 2011 budget introduced a programme of fiscal consolidation through tax increases and lower public expenditure, with the aim of returning to a balanced budget in 2012.

#### **Currency**

The unit of currency is the *Mexican peso* (MXN) of 100 *centavos*. A new peso was introduced on 1 Jan. 1993: 1 new peso = 1,000 old pesos. The peso was devalued by 13.94% in Dec. 1994. Foreign exchange reserves were US\$82,023m. and gold reserves

288,000 troy oz in Sept. 2009. Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
6.4%	5.0%	4.5%	4.7%	4.0%	3.6%	4.0%	5.1%	5.3%	4.2%

Total money supply in Aug. 2009 was 1,391.5bn. new pesos.

### Budget

In 2008 revenues were 2,857.1bn. new pesos and expenditures 2,865.3bn. new pesos.

VAT is 16% (11% in the frontier region).

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
-0.9%	0.1%	1.4%	4.0%	3.2%	5.2%	3.2%	1.2%	-6.2%	5.4%

In 2010 total GDP was US\$1,039.7bn.

### Banking and Finance

The Bank of Mexico, established 1 Sept. 1925, is the central bank of issue (*Governor*, Agustín Carstens Carstens). It gained autonomy over monetary policy in 1993. Exchange rate policy is determined jointly by the bank and the Finance Ministry. Banks were nationalized in 1982, but in May 1990 the government approved their reprivatization. The state continues to have a majority holding in foreign trade and rural development banks. In 1999 Congress approved the removal of regulations limiting foreign holdings to 49%.

In 2007 there were 38 commercial banks (including seven development banks) and 81 representative offices of foreign banks. In 2001 the American financial services company Citigroup bought Mexico's largest financial group, Banacci, and its second largest bank, Banamex, for US\$12.5bn., but retained the name Banamex. The new Banamex is now Mexico's largest bank. Most of Mexico's leading banks are now foreign-owned.

Mexico received US\$18.7bn. worth of foreign direct investment in 2010, up from US\$15.3bn. in 2009.

There is a stock exchange in Mexico City.

## ENERGY AND NATURAL RESOURCES

### Environment

Mexico's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.0 tonnes per capita.

### Electricity

Installed capacity, 2007, 50.8m. kW. Output in 2007 was 257.45bn. kWh and consumption per capita 2,384 kWh. In 2010 there were two nuclear reactors in operation.

### Oil and Gas

Oil production was 157.4m. tonnes in 2008. Mexico produced 4.0% of the world total oil output in 2008, and had reserves amounting to 11.9bn. bbls. Revenues from oil exports provide about a third of all government revenues. Natural gas production was 54.9bn. cu. metres in 2008 with 500bn. cu. metres in proven reserves.

### Minerals

Output (in 1,000 tonnes): iron ore (2006), 14,568; lignite (2007), 10,456; salt (2005), 9,508; gypsum and anhydrite (2006), 6,076; silica (2005), 2,121; coal (2007), 2,058; sulphur (2005), 1,590; fluorite (2005), 876; aluminium (2005), 574; zinc (2005), 476; copper (2005), 429; feldspar (2005), 373; barite (2005), 269; lead (2005), 134; manganese (2005), 133; silver (2005), 2.9; gold (2005), 30,356 kg. Mexico is the biggest producer of silver in the world.

### Agriculture

In 2007 Mexico had an estimated 24.5m. ha. of arable land and around 2.4m. ha. of permanent cropland. There were 5.4m. ha. of irrigated land in 2006. There were 238,830 tractors and some 22,500 harvester-threshers in 2007. In 2007 agriculture, fishing and forestry contributed 3.6% of GDP. In 1992 the Mexican constitution was amended to permit the voluntary privatization of *ejidos*, communal land in which each member farms an independent plot, to combat the low productivity resulting from the fragmentation of farming units, some 58% of which were less than 5 ha. in 1991.

Sown areas, 2003 (in 1,000 ha.) included: maize, 7,781; beans, 1,948; sorghum, 1,879; coffee beans, 744; wheat, 627; sugarcane, 639; barley, 384; chick-peas, 150; chillies and green peppers, 141; safflower seeds, 85; rice, 50. Production in 2003 (in 1,000 tonnes): sugarcane, 45,126; maize, 19,652; sorghum, 6,462; oranges, 3,970; wheat, 3,000; tomatoes, 2,148; bananas, 2,027; chillies and green peppers, 1,854; lemons and limes, 1,825; potatoes, 1,735; mangoes, 1,503; beans, 1,400; barley, 1,109; avocados, 1,040.

Livestock (2003): cattle, 30.80m.; sheep, 6.56m.; pigs, 18.10m.; goats, 9.50m.; horses, 6.26m.; mules, 3.28m.; asses, 3.26m.; chickens, 540m. Production, 2003 (in 1,000 tonnes): beef and veal, 1,496; pork, bacon and ham, 1,043; horse, 79; goat meat, 42; lamb and mutton, 40; poultry meat, 2,204; cow's milk, 9,842; goat's milk, 148; eggs, 1,882; cheese, 130; honey, 56.

### Forestry

Forests extended over 64.24m. ha. in 2005, representing 33.7% of the land area, containing pine, spruce, cedar, mahogany, logwood and rosewood. There are 14 forest reserves (nearly 0.8m. ha.) and 47 national park forests of 0.75m. ha. Timber production was 44.91m. cu. metres in 2007.

### Fisheries

The total catch in 2005 was 1,304,830 tonnes, of which 1,204,949 tonnes came from sea fishing.

## INDUSTRY

The leading companies by market capitalization in Mexico in March 2011 were: América Móvil, S.A.B. de C.V. (a mobile phone company), US\$81.6bn.; Wal-Mart de México, S.A.B. de C.V. (general retailers, formerly Cifra), US\$53.4bn.; and Grupo Mexico (a mining corporation), US\$29.1bn.

In 2001 the manufacturing industry provided 19.6% of GDP. Output (in 1,000 tonnes): cement (2008), 37,139; petrol (2007), 21,563; distillate fuel oil (2007), 18,011; residual fuel oil (2007), 17,252; crude steel (2009), 13,957; sugar (2002), 5,073; pig iron (2009), 3,925; wheat flour (2001), 2,611; cigarettes (2001), 56.1bn. units; soft drinks (2001), 13,005.0m. litres; beer (2007), 8,051.0m. litres. Car production has increased from 857,000 in 1994 to 1,098,000 in 2006.

### Labour

In the period March–June 2001 the employed population totalled 39,004,300. The principal areas of activity were (in 1,000): wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 8,839.2; manufacturing, 7,373.0; agriculture, hunting and forestry, 6,920.7; construction, 2,396.9; hotels and restaurants, 1,982.2; education, 1,971.6. Unemployment rate, Dec. 2009, 5.4%. The daily minimum wage at Jan. 2009 ranged from 51.95 new pesos to 54.80 new pesos.

## INTERNATIONAL TRADE

In Sept. 1991 Mexico signed the free trade Treaty of Santiago with Chile, envisaging an annual 10% tariffs reduction from Jan. 1992. The North American Free Trade Agreement (NAFTA), between Canada, Mexico and the USA, was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. A free trade agreement was signed with Costa Rica in March 1994. Some 8,300 products were free from tariffs, with others to follow over ten years. The Group of

Three (G3) free trade pact with Colombia and Venezuela came into effect on 1 Jan. 1995. A free trade agreement was signed with the European Union in 1999.

Total foreign debt was US\$167,228m. in 2005.

### Imports and Exports

Trade for calendar years in US\$1m.:

	2003	2004	2005	2006	2007
Imports c.i.f.	170,546	196,809	221,819	256,086	281,927
Exports f.o.b.	164,907	187,980	214,207	249,961	271,821

Of imports in 2007, 49.6% came from the USA, 10.6% from China, 5.8% from Japan, 4.5% from South Korea and 3.8% from Germany. Of exports in 2007, 82.2% went to the USA, 2.4% to Canada, 1.5% to Germany, 1.4% to Spain and 1.1% to Colombia. In 2004 exports to the USA accounted for 24% of GDP.

The in-bond (*maquiladora*) assembly plants generate the largest flow of foreign exchange. Although originally located along the US border when the programme was introduced in the 1960s, they are now to be found in almost every state. In 2009 there were over 5,200 'foreign to Mexico' manufacturing companies, employing more than 1.6m. people. Manufactured goods account for 90% of trade revenues.

### COMMUNICATIONS

#### Roads

The total road length in 2007 was 360,075 km, of which 6,565 km were motorways, 40,631 km other main roads, 73,874 km secondary roads and 239,005 km other roads. In 2005 there were 14,074,669 passenger cars, 7,111,172 trucks and vans and 264,726 buses and coaches. There were 5,398 fatalities as a result of road accidents in 2007.

#### Rail

The National Railway, *Ferrocarriles Nacionales de México*, was split into four companies in 1995 as a preliminary to privatization. It ceased operations in 1999. The rail network comprises 26,677 km of 1,435 mm gauge. In 2007, 99.9m. tonnes of freight were transported. Passenger traffic declined dramatically between 1997 and 2008, when a suburban rail network was opened between Mexico City and Cuautitlán in the state of México. There is a 202 km metro in Mexico City with 11 lines. There are light rail lines in Guadalajara (24 km) and Monterrey (32 km).

#### Civil Aviation

There is an international airport at Mexico City (Benito Juárez) and 55 other international and 29 national airports. Each of the larger states has a local airline which links it with main airports. The national carrier is Aeroméxico, which was privatized in 1988. Two former flag carriers, Aviaca and Mexicana, both ceased operations in 2010 (in April and Aug. respectively). In 2005 scheduled airline traffic of Mexican-based carriers flew 366.7m. km and carried 20,218,800 passengers. In 2001 Mexico City handled 20,599,064 passengers (13,711,141 on domestic flights). Cancún was the second busiest airport for passengers in 2001, with 7,640,007 (5,905,813 on international flights). Guadalajara handled 5,020,631 passengers (3,337,339 on domestic flights).

#### Shipping

Mexico had 114 ports and terminals in 2007 (66 ocean navigation), of which the most important are Altamira, Progreso, Tampico, Tuxpan and Veracruz on the Gulf coast and Manzanillo on the Pacific coast. Mexico's busiest port is Manzanillo, which handled 21.21m. tonnes of cargo in 2007 (7.53m. tonnes loaded and 13.68m. tonnes discharged). A law to privatize port operations was passed in 1993.

In 2007 the merchant marine numbered 2,387 vessels with a total tonnage of 1,727,000 GRT. In 2005 vessels totalling

60,527,000 NRT entered ports and vessels totalling 144,652,000 NRT cleared.

### Telecommunications

Telmex (Teléfonos de México), a former state-run company privatized in 1991, is the leading provider of fixed line telephone services and broadband, with around 80% of the market. In 2008 there were 20,668,000 fixed telephone lines and 75,305,000 mobile phone subscribers (693.7 per 1,000 persons). The leading mobile phone operator is Telcel (part of América Móvil), which has about 70% of the market. There were 15.0m. PCs in use in 2006 and 23.6m. internet users in 2008. There were 10.4 fixed broadband subscribers per 100 inhabitants in Dec. 2010.

### SOCIAL INSTITUTIONS

#### Justice

Magistrates of the Supreme Court are appointed for six years by the President and confirmed by the Senate; they can be removed only on impeachment. The courts include the Supreme Court with 21 magistrates, 12 collegiate circuit courts with three judges each and nine unitary circuit courts with one judge each, and 68 district courts with one judge each.

The penal code of 1 Jan. 1930 abolished the death penalty, except for the armed forces. Mexico abolished the death penalty for all crimes in Dec. 2005—the last execution had been in 1961.

There were 24,374 murders in 2010 (a rate of 22 per 100,000 population), up from 8,867 in 2007, 14,006 in 2008 and 19,803 in 2009. The population in penal institutions in Aug. 2006 was 214,450 (196 per 100,000 of national population). Following the collapse of the main Colombian drug cartels in the 1990s, Mexican cartels are estimated to control 70% of illicit foreign drugs entering the US market. Since 2006 President Calderón has spearheaded a 'war' on the cartels, engaging 45,000 military and police personnel in often bloody battles. In 2009, 9,616 people died in drug-related killings in Mexico.

#### Education

Adult literacy was 93.4% in 2009 (male, 94.9%; female, 92.1%). Primary and secondary education is free and compulsory, and secular, although religious instruction is permitted in private schools.

In 2002–03 there were:

	Establishments	Teachers	Students (in 1,000)
Pre-school	74,758	163,282	3,636
Primary	99,463	557,278	14,857
Secondary	29,749	325,233	5,660
Baccalaureate	9,668	202,161	2,936
Vocational training	1,659	31,683	359
Medium/Professional	664	17,280	167
Higher education	2,539	192,593	1,932
Postgraduate education	1,283	21,685	138

In 2006 public expenditure on education came to 4.8% of GDP and 22.0% of total government spending (the highest share in the OECD).

#### Health

There were 3,039 hospitals in 2003, with a total provision of 73,446 beds. In 2001 there were 172,266 physicians, 9,669 dentists and 222,389 nurses. In 2008 Mexico spent 5.9% of its GDP on health. In 2006, 70% of Mexicans were considered overweight (one of the highest rates in the world) and 30% obese (having a body mass index over 30).

#### Welfare

As of 1 July 1997 all workers had to join the private insurance system, while the social insurance system was being phased out. At retirement, employees covered by the social insurance system before 1997 can choose to receive benefits from either the social

insurance system or the private insurance system. The official retirement age is 65 years but to be eligible, a pensioner must have paid 1,250 weeks of contributions. The guaranteed minimum pension is equal to the minimum salary in July 1997 indexed to prices. On social insurance, the minimum monthly pension is 100% of the minimum monthly salary in Mexico City (1,357-20 new pesos in 2004).

Unemployment benefit exists under a labour law which requires employers to pay a dismissed employee a lump sum equal to three months' pay plus 20 days' pay for each year of service. Social security pays an unemployment benefit of between 75% and 95% of the old-age pension for unemployed persons aged 60 to 64.

## RELIGION

In 2005 an estimated 90% of the population was Roman Catholic, down from 98% in 1950. In Feb. 2012 there were four cardinals. The Church is separated from the State, and the constitution of 1917 provided strict regulation of this and all other religions. In Nov. 1991 Congress approved an amendment to the 1917 constitution permitting the recognition of churches by the state, the possession of property by churches and the enfranchisement of priests. Church buildings remain state property. In 2001 there were estimated to be 3-82m. Protestants, plus followers of various other religions. There were 1,044,000 Latter-day Saints (Mormons) in 2006.

## CULTURE

### World Heritage Sites

Mexico has 31 UNESCO World Heritage sites. They are (with year entered on list): the Sian Ka'an nature reserve; the historic centre of Mexico City and the canal and island network of Xochimilco; Puebla's historic centre; the pre-Hispanic city of Teotihuacán, now a major archaeological site; the Historic Centre of Oaxaca and archaeological site of Monte Alban; and Palenque—lying in the foothills of the Altos de Chiapas, the Maya ruins of Palenque are surrounded by waterfalls, rainforest and fauna (all 1987); the historic town of Guanajuato and adjacent disused silver mines; and the pre-Hispanic city of Chichen-Itza, Yucatan (both 1988); the historic centre of Morelia, on the southern Pacific coast (1991); the pre-Hispanic city of El Tajin, Veracruz (1992); the El Vizcaino whale sanctuary; the historic centre of Zacatecas, once a major silver mining centre; and the Sierra de San Francisco rock paintings (all 1993); the 14 early 16th-century monasteries on Popocatepetl, to the southeast of Mexico City (1994); the Maya town of Uxmal, Yucatán, with its preserved pyramids and sculptures; and the historic monuments zone of Querétaro (both 1996); the Hospicio (Hospice) Cabañas, Guadalajara (1997); the historic monuments zone of Tlacotalpan; and the archaeological zone of Paquimé, Casas Grandes in Chihuahua (both 1998); the historic fortified town of Campeche; and Xochicalco's archaeological monuments zone, Morelos state (both 1999); the Ancient Maya City of Calakmul, Campeche (2002); the Franciscan Missions in the Sierra Gorda of Querétaro (2003); Luis Barragán House and Studio in Mexico City (2004); the islands and protected areas of the Gulf of California (2005 and 2007); the Agave landscape and ancient industrial facilities of Tequila (2006); the Central University City Campus of the Universidad Nacional Autónoma de México (2007); the Monarch Butterfly Biosphere

Reserve (2008); the fortified town of San Miguel and Sanctuary of Jesús Nazareno de Atotonilco (2008); Camino Real de Tierra Adentro, also known as the Silver Route, between Mexico City and the USA; and the Prehistoric Caves of Yagul and Mitla in the Central Valley of Oaxaca (both 2010).

## Press

In 2008 there were 462 daily newspapers with a circulation of 4,590,000. The three leading dailies are *Esto* (average daily circulation of 320,000 in 2008), *La Prensa* (315,000) and *El Universal Gráfico* (300,000).

## Tourism

There were 21.45m. non-resident tourists in 2009 (excluding same-day visitors), making Mexico the tenth most popular tourist destination; spending amounted to US\$11,275m. in 2009.

## DIPLOMATIC REPRESENTATIVES

Of Mexico in the United Kingdom (16 St George St., London, W1S 1FD)

*Ambassador:* Eduardo Medina Mora Icaza.

Of the United Kingdom in Mexico (Rio Lerma 71, Col. Cuauhtémoc, 06500 México, D.F.)

*Ambassador:* Judith Macgregor.

Of Mexico in the USA (1911 Pennsylvania Ave., NW, Washington, D.C., 20006)

*Ambassador:* Arturo Sarukhán Casamitjana.

Of the USA in Mexico (Paseo de la Reforma 305, 06500 México, D.F.)

*Ambassador:* Earl Anthony Wayne.

Of Mexico to the United Nations

*Ambassador:* Luis Alfonso de Alba.

Of Mexico to the European Union

*Ambassador:* Sandra Fuentes-Beráin.

*GNI per capita, 2011:* (PPP\$) 2,935

*HDI/world rank:* 0.636/116

## KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Caroline Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the Islands at the beginning of the First World War and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in the Second World War, the Islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. The Federated States of Micronesia came into being on 10 May 1979. American trusteeship was terminated on 3 Nov. 1986 by the UN Security Council and on the same day Micronesia entered into a 15-year Free Association with the USA. An amended 20-year Compact of Free Association was signed into law on 17 Dec. 2003, guaranteeing US\$1.8bn. to Micronesia in grants for a government trust fund.

## TERRITORY AND POPULATION

The Federated States lie in the North Pacific Ocean between 137° and 163° E, comprising 607 islands with a total land area of 701 sq. km (271 sq. miles). The 2010 provisional census population was 102,624; density, 146 per sq. km.

The UN gives a projected population for 2015 of 114,000.

In 2000 an estimated 71.5% of the population lived in rural areas.

The areas and populations of the four major groups of island states (east to west) are as follows:

State	Area (sq. km)	Population (2000 census)	Headquarters
Kosrae	110	7,686	Tofol
Pohnpei	345	34,486	Kolonia
Chuuk	127	53,595	Weno
Yap	119	11,241	Colonia

Kosrae consists of a single island. Its main town is Lelu (2,591 inhabitants in 2000). Pohnpei comprises a single island (covering 334 sq. km) and eight scattered coral atolls. Kolonia (5,681 inhabitants in 2000) was the national capital until 1989. The new capital, Palikir (6,444 inhabitants in 2000), lies approximately 10 km southwest in the Palikir valley. Chuuk consists of 542 islets

in a 7,190 sq. km reef-fringed lagoon (40,465 inhabitants in 2000); the state also includes coral atolls (13,130 inhabitants), the most important being the Mortlock Islands. The chief town is Weno (13,802 inhabitants in 2000). Yap comprises a main group of four islands (covering 100 sq. km with 7,391 inhabitants in 2000) and 15 outer islands (3,850 inhabitants), the main ones being Ulithi and Woleai. Colonia is its chief town (3,216 inhabitants in 2000).

English is used in schools and is the official language. Trukese, Pohnpeian, Yapese and Kosrean are also spoken.

## SOCIAL STATISTICS

2009 estimates: births, 2,800; deaths, 700. Rates, 2009 estimates (per 1,000 population): birth, 25; death, 6. Infant mortality rate (2005), 34 per 1,000 live births. 2007 life expectancy, 67.6 years for men and 69.2 years for women. Population growth rate, 2006, 0.1%; fertility rate, 2008, 3.6 births per woman.

## CLIMATE

Tropical, with heavy year-round rainfall, especially in the eastern islands, and occasional typhoons (June–Dec.). Kolonia, Jan. 80°F (26.7°C), July 79°F (26.1°C). Annual rainfall 194" (4,859 mm).

## CONSTITUTION AND GOVERNMENT

Under the Constitution founded on 10 May 1979, there is an executive presidency and a 14-member *National Congress*, comprising ten members elected for two-year terms from single-member constituencies of similar electorates, and four members elected one from each State for a four-year term by proportional representation. The *Federal President* and *Vice-President* first run for the Congress before they are elected by members of Congress for a four-year term.

## National Anthem

'Patriots of Micronesia'; words anonymous, tune adapted from J. Brahms' 'Academic Festival Overture'.

## RECENT ELECTIONS

The last election for Congress was held on 8 March 2011. Only non-partisans were elected. Immanuel Mori was re-elected president by Congress unopposed on 11 May 2011.

## CURRENT GOVERNMENT

*President:* Immanuel 'Manny' Mori; b. 1948 (took office 11 May 2007 and re-elected in May 2011).

*Vice-President:* Alik L. Alik.

In March 2012 the government comprised:

*Minister of Education:* Casiano Shoniber. *Finance and Administration:* Finley Perman. *Foreign Affairs:* Lorin Robert. *Health and Social Affairs:* Dr Vita Skilling. *Justice:* Maketo Robert. *Resources and Development:* Marion Henry. *Transportation, Communications and Infrastructure:* Francis Itimai. *Chief Public Defender:* Julius Joey Sapelalut.

*Speaker of the Congress:* Isaac V. Figir.

*Government Website:* <http://www.fsmgov.org>

## CURRENT LEADERS

### Immanuel Mori

*Position*  
President

### Introduction

Immanuel 'Manny' Mori became the seventh president of the Federated States of Micronesia (FSM) on 11 May 2007. He is the second president to come from the state of Chuuk. The president,

who is both head of state and of the unicameral government, serves for a four-year term.

#### *Early Life*

Mori was born on 25 Dec. 1948 in Sapore on the island of Fefan, Chuuk. He spent his childhood in Fefan and attended the Xavier High School in Chuuk's capital, Weno. From 1969–73 he studied at the University of Guam, graduating in business management. He joined Citycorp Credit as a management intern, becoming assistant manager at the Saipan branch.

Mori returned to the FSM in 1976 and joined the Trust Territory social security office. In 1979 he became responsible for Chuuk's tax and revenue office. From 1981–83 he served as comptroller of the Development Bank of the FSM before being appointed its president and CEO. He held the post until Feb. 1997, when the bank's board ousted him in an attempt to encourage reform. He was subsequently named vice-president.

Mori's political career began in July 1999 when he was elected a Chuuk congressman. He held several positions including chair of the ways and means committee and vice-chair of the committee on judiciary and government operation. He also sat on the committees for resource and development and for health and social affairs. In 2003 he was elected senator-at-large for Chuuk for a four-year term. In this capacity Mori served on the task force for national government restructuring and on the planning council of the College of Micronesia. He also served as a CEO of the Chuuk Public Utility Corporation and on the board of the Pacific Island Development Bank.

In May 2007 parliament selected Mori to replace Joseph Urusemal as president. Alik L. Alik was chosen as vice-president.

#### *Career in Office*

Under a Compact of Free Association Micronesia is guaranteed US aid until 2023. Chief among Mori's challenges has been to prepare for economic self-reliance and to reinvigorate the stagnant private sector. He was re-elected for a second term in May 2011.

## **ECONOMY**

### **Overview**

Following independence in 1986, the region signed a Compact of Free Association with the USA, providing it with grants upon which it relies heavily. A renegotiated Compact Agreement with the USA effective since 2004 steadily lowers aid payments to the economy until 2023. In addition, stricter rules have been placed on reporting, auditing and the use of grants, which the islands have been unable to meet. As a result of this, the economy has experienced a contraction of growth for five years running, among the worst returns of Pacific Island nations. Compact-related spending cuts have reduced public sector employment, stimulating migration to the USA where citizens can work without a visa. Higher fuel and food import costs have put further pressure on state finances.

Medium-term growth prospects are poor owing to declining aid revenues and the need for fiscal consolidation. The IMF has recommended reducing the large public sector wage bill and strengthening tax administration to improve long-term finances, alongside reforms to ease the cost of doing business and to stimulate private sector growth and employment. Owing to the global economic crisis, the near-term outlook is negative with the prospect of declining tourist arrivals, remittances, exports and foreign investment.

### **Currency**

US currency is used. Foreign exchange reserves were US\$50m. and total money supply was US\$23m. in June 2005.

### **Budget**

US compact funds are an annual US\$100m. Revenue (2006–07), US\$145.2m. (of which US\$92.5m. grants); expenditure, US\$151.6m. The financial year runs from 1 Oct.–30 Sept.

### **Performance**

In 2010 total GDP was US\$287m.; real GDP growth in 2005–06 was negative, at –2.3%.

### **Banking and Finance**

There are three commercial banks: Bank of Guam, Bank of Hawaii and Bank of the Federated States of Micronesia. There is also a Federated States of Micronesia Development Bank and a regulatory Banking Board.

## **ENERGY AND NATURAL RESOURCES**

### **Electricity**

Electricity production in 2007 was 67m. kWh.

### **Minerals**

The islands have few mineral deposits except for high-grade phosphates.

### **Agriculture**

Agriculture consists mainly of subsistence farming: coconuts, breadfruit, bananas, sweet potatoes and cassava. A small amount of crops are produced for export, including copra, tropical fruits, peppers and taro. Production (2008 estimates, in 1,000 tonnes): coconuts, 41; cassava, 12; sweet potatoes, 3; bananas, 2. Livestock (2008 estimates): pigs, 33,000; cattle, 14,000; goats, 4,000. In 2007 there were approximately 2,500 ha. of arable land and 18,000 ha. of permanent crops.

### **Forestry**

The total forest area was 63,000 ha. in 2005 (90.6% of the land area).

### **Fisheries**

In 2005 the catch amounted to approximately 29,336 tonnes, almost entirely from marine waters. In 2007, 303 fleet vessels were licensed to fish in Micronesia. Fishing licence fees were an estimated US\$12m. in 2007 and are a primary revenue source, making up around 7% of GDP.

## **INDUSTRY**

The chief industries are construction, fish processing, tourism and handicrafts (items from shell, wood and pearl).

### **Labour**

In 2007 just over half the labour force were government employees. In 2007, 41.7% of employees worked in public administration, 21.1% in wholesale and retail trade and repairs and 7.0% in transport, storage and communications. Agriculture, hunting, forestry and fishing accounted for 1.7% of employees. The unemployment rate was 22.0% in 2000.

## **INTERNATIONAL TRADE**

### **Imports and Exports**

Total imports (c.i.f.) in 2007, US\$142.7m.; exports (f.o.b.), US\$16.2m. Main import suppliers, 2007: US mainland, 41.2%; Guam, 14.4%; Singapore, 8.7%. Main export markets, 2007: Guam, 22.5%; US mainland, 17.2%; Northern Mariana Islands, 4.3%. The main imports are mineral products, foodstuffs and beverages, machinery, mechanical and electrical appliances, animals and animal products, and vegetable products. Main exports: marine products, kava, handicrafts and souvenirs, citrus fruits and garments.

## **COMMUNICATIONS**

### **Roads**

In 2000 there were 240 km of roads (42 km paved).

**Civil Aviation**

There are international airports on Pohnpei, Chuuk, Yap and Kosrae. Services are provided by Continental Airlines. In 2003 there were international flights to Guam, Honolulu, Manila, the Marshall Islands and Palau in addition to domestic services. There were five airports in 1996 (four paved).

**Shipping**

The main ports are Kolonia (Pohnpei), Colonia (Yap), Lepukos (Chuuk), Okat and Lelu (Kosrae). In Jan. 2009 there were 11 ships of 300 GT or over registered, totalling 9,000 GT.

**Telecommunications**

Micronesia had 36,100 telephone subscribers in total in 2007, or 325.2 per 1,000 population. Mobile phone subscribers numbered 27,400 in 2007. The islands are interconnected by shortwave radiotelephone. There are four earth stations linked to the Intelsat satellite system. There were 15,000 internet users in 2007.

**SOCIAL INSTITUTIONS****Justice**

There is a Supreme Court headed by the Chief Justice with two other judges, and a State Court in each of the four states with 13 judges in total.

**Education**

In 2007 there were 18,512 pupils in primary schools with 1,113 teaching staff; and 14,742 pupils in secondary schools. The College of Micronesia in Pohnpei, initially founded as the Micronesian Teacher Education Center in 1963, is the only institute of higher education and now has campuses on all four major island groups, including the Fisheries and Maritime Institute on the Yap Islands.

In 2001–02 total expenditure on education came to 6.7% of GNP.

**Health**

In 2006 there were 33 hospital beds per 10,000 population. There were 72 physicians, 13 dentists and 305 nursing staff in 2007.

**RELIGION**

The population is predominantly Christian. Yap is mainly Roman Catholic; Protestantism is prevalent elsewhere.

**CULTURE****Tourism**

In 2005 there were 19,000 visitors, bringing in US\$17m. in tourist revenue.

**DIPLOMATIC REPRESENTATIVES**

# MOLDOVA

Republica Moldova  
(Republic of Moldova)

*Capital:* Chișinău

*Population projection, 2015:* 3-45m.

*GNI per capita, 2011:* (PPP\$) 3,058

*HDI/world rank:* 0-649/111

## KEY HISTORICAL EVENTS

In antiquity the territories that make up Moldova were inhabited by the Dacians. In 1359 the region was subsumed into the Principality of Moldavia, founded by Dragoș of Bedeu. From the 16th to 19th centuries Russia and the Ottoman Empire wrestled for influence. In 1812 the Treaty of Bucharest gave Russia control of eastern Moldavia, or Bessarabia (the area between the River Prut and the Dniester, which corresponds to much of present-day Moldova). The Ottomans ruled western Moldavia. In 1918 Romania absorbed Bessarabia, while the Soviet Union controlled the territory east of the Dniester from 1924. Bessarabia reverted from Romanian rule to become part of the Moldavian Socialist Republic within the USSR in 1940.

In Dec. 1991 Moldova became a member of the Commonwealth of Independent States, a decision ratified by parliament in April 1994. Fighting took place in 1992 between government forces and separatists in the (largely Russian and Ukrainian) area east of the River Nistru (Transnistria). An agreement signed by the presidents of Moldova and Russia on 21 July 1992 brought to an end the armed conflict and established a 'security zone' controlled by peacekeeping forces from Russia, Moldova and Transnistria. On 21 Oct. 1994 a Moldo-Russian agreement obliged Russian troops to withdraw from the territory of Moldova over three years but the agreement was not ratified by

the Russian Duma. On 8 May 1997 an agreement between Transnistria and the Moldovan government to end the separatist conflict stipulated that Transnistria would remain part of Moldova as it was territorially constituted in Jan. 1990. In 1997 some 7,000 Russian troops were stationed in Transnistria. In the autumn of 1999 Ion Sturza's centre-right coalition collapsed, along with privatization plans for the wine and tobacco industries. Communist President Vladimir Voronin, who was elected in 2001, has proposed giving the Russian language official status and joining the Russia-Belarus union.

In Aug. 2009 the Communist government fell to a coalition of four opposition parties after earlier disputed elections and a failure to elect a new president.

## TERRITORY AND POPULATION

Moldova is bounded in the east and south by Ukraine and on the west by Romania. The area is 33,848 sq. km (13,067 sq. miles). At the last census, in 2004, the population was 3,938,679 (52.2% female). Population estimate, Jan. 2011: 4,078,000; density, 120 per sq. km.

The UN gives a projected population for 2015 of 3-45m. (excluding Transnistria).

In 2005, 53.3% of the population lived in rural areas. Ethnicity (2004): Moldovans accounted for 69.6%, Ukrainians 11.3%, Russians 9.3%, Gagauz 3.9%, Bulgarians 2.0%, Roma (Gypsy) 1.9% and others 2.0%.

Apart from Chișinău, the capital (population of 644,204 in 2004), major towns are Tiraspol (158,069 in 2004), Bălți (122,669 in 2004) and Tighina (97,027 in 2004). The official Moldovan language (i.e. Romanian) was written in Cyrillic prior to the restoration of the Roman alphabet in 1989. It is spoken by 62% of the population; the use of other languages (Russian, Gagauz) is safeguarded by the Constitution.

## SOCIAL STATISTICS

2007: births, 37,973; deaths, 43,050. Rates, 2007 (per 1,000 population): births, 10.6; deaths, 12.0. In 2006 the most popular age at first marriage was 20-24 for both males and females. Life expectancy at birth in 2007 was 65.0 years for males and 72.6 years for females. Annual population growth rate, 2000-05, -0.2%. Infant mortality, 2005, 14 per 1,000 live births; fertility rate, 2008, 1.3 births per woman (one of the lowest rates in the world). In the period 2000-06, 48.5% of the population were classified as living below the national poverty line.

## CLIMATE

The climate is temperate, with warm summers, crisp, sunny autumns and cold winters with snow. Chișinău, Jan. -7°C, July 20°C. Annual rainfall 677 mm.

## CONSTITUTION AND GOVERNMENT

A declaration of republican sovereignty was adopted in June 1990 and in Aug. 1991 the republic declared itself independent. A new constitution came into effect on 27 Aug. 1994, which defines Moldova as an 'independent, democratic and unitary state'. At a referendum on 6 March 1994 turnout was 75.1%; 95.4% of votes cast favoured 'an independent Moldova within its 1990 borders'. The referendum (and the Feb. parliamentary elections) were not held by the authorities in Transnistria. In a further referendum on 4 June 1999, on whether to switch from a parliamentary system to a presidential one, turnout was 58% with the majority of the votes cast being in favour of the change.

Parliament (*Parlamentul*) has 101 seats and is elected for four-year terms. There is a 4% threshold for election; votes falling

below this are redistributed to successful parties. The *President* is now elected for four-year terms by parliament, after the constitution had been amended to abolish direct presidential elections.

The 1994 constitution makes provision for the autonomy of Transnistria and the Gagauz (Gagauzi Yeri) region. Work began in July 2003 on the drafting of a new constitution to resolve the conflict between Moldova and Transnistria.

**Transnistria.** In the predominantly Russian-speaking areas of Transnistria a self-styled 'Dniester Republic' was established in Sept. 1991, and approved by a local referendum in Dec. 1991. A Russo-Moldovan agreement of 21 July 1992 provided for a special statute for Transnistria and a guarantee of self-determination should Moldova unite with Romania. The population at the 2004 census was 555,347. Romanian here is still written in the Cyrillic alphabet. At a referendum on 24 Dec. 1995, 81% of votes cast were in favour of adopting a new constitution proclaiming independence.

On 17 June 1996 the Moldovan government granted Transnistria a special status as 'a state-territorial formation in the form of a republic within Moldova's internationally recognized border'.

At elections to the Supreme Council held on 11 Dec. 2005, which were not internationally recognized as legitimate, the Renovation Party and its allies won 29 of 43 seats and the Republic Party 13. In a referendum held on 17 Sept. 2006, 97.2% of votes cast were in favour of independence and possible future union with Russia, although no international organization or foreign country recognized the referendum. Elections for president were held on 11 Dec. 2011. Turnout was 58.9%. Yevgeny Shevchuk won 38.6% of the vote, Anatoly Kaminsky 26.3% and incumbent Igor Smirnov 24.7%. In the run-off held on 25 Dec. 2011, Shevchuk won 73.9% and Kaminsky 19.7%. Turnout was 52.5%.

**Gagauz Yeri.** This was created an autonomous territorial unit by Moldovan legislation of 13 Jan. 1995. In 2004 the census population was 155,646. There is a 35-member *Popular Assembly* directly elected for four-year terms and headed by a *Governor*, who is a member of the Moldovan cabinet. At the elections of 16 and 30 March 2008 turnout was 60.5%.

*Governor:* Mihail Formuzal; b. 1959.

#### National Anthem

The Romanian anthem was replaced in 1994 by a traditional tune, 'Limba noastră' ('Our Tongue'); words by Alexei Mateevici, tune by Alexandru Cristî.

#### RECENT ELECTIONS

On 16 Dec. 2011 the only presidential candidate, Marian Lupu failed to obtain the requisite 61 votes from parliament to be elected after the communists boycotted the vote. On 12 Jan. 2012 the Constitutional Court ruled the elections invalid owing to violations of secret voting procedures. Nicolae Timofti was then elected president on 16 March 2012, with 62 votes in the 101-seat parliament, bringing an end to nearly three years of political deadlock.

Parliamentary elections were held on 28 Nov. 2010. The ruling Party of Communists of the Republic of Moldova won 42 seats with 39.3% of the vote, the Liberal Democratic Party of Moldova 32 with 29.4%, the Democratic Party of Moldova 15 with 12.7% and the Liberal Party 12 with 10.0%. Turnout was 59.1%.

#### CURRENT GOVERNMENT

In March 2012 the government comprised:

*President:* Nicolae Timofti; b. 1948 (ind.; sworn in 23 March 2012).

*Prime Minister:* Vladimir Filat; b. 1969 (Liberal Democratic Party of Moldova; since 25 Sept. 2009).

*Deputy Prime Ministers:* Iurie Leancă (also *Minister of Foreign Affairs and European Integration*); Valeriu Lazăr (also *Minister of the Economy*); Mihai Moldovanu; Eugen Carpov.

*Minister of Agriculture and Food Industries:* Vasile Bumacov. *Culture:* Boris Focşa. *Defence:* Vitalie Marinuta. *Education:* Mihai Şleahitişchi. *Environment:* Gheorghe Şalaru. *Finance:* Veaceslav Negruţă. *Health:* Andrei Usatii. *Information Technologies and Communications:* Pavel Filip. *Internal Affairs:* Alexei Roibu. *Justice:* Oleg Efrim. *Labour, Social Protection and Family:* Valentina Buliga. *Regional Development and Construction:* Marcel Răducan. *Transport and Road Infrastructure:* Anatol Şalaru. *Youth and Sports:* Ion Cebanu. *Minister of State:* Victor Bodiu.

*Government Website:* <http://www.gov.md>

#### CURRENT LEADERS

##### Nicolae Timofti

##### Position

President

##### Introduction

Nicolae Timofti was sworn into office on 23 March 2012 after the constitutional court confirmed the results of the previous week's parliamentary poll. He secured his appointment with 62 votes in the 101-seat parliament—one vote more than the minimum required—ending nearly three years of political deadlock.

##### Early Life

Nicolae Timofti was born on 22 Dec. 1948 in Ciutuleşti, north-eastern Moldova. Graduating in law from Moldova State University, Chişinău, in 1972, he completed two years national service in the Soviet Army. In 1974 he became a consultant for the ministry of justice and in 1976 joined the Chişinău district court. In 1980 he was appointed to the supreme court and a decade later was named its vice-president. In 1996 he joined the court of appeal and later became its president. In 2003 he was appointed to the Chişinău court of appeal and was made a member of the supreme council of magistrates. Two years later he was posted to the supreme court of justice and in 2011 became president of the supreme council of magistrates.

Timofti was nominated for the presidency in early 2012 by the pro-European ruling Alliance for European Integration coalition. On 16 March 2012 he was elected into office by parliament, though the vote was boycotted by the opposition Communist Party. He was the first permanently-appointed president since the end of Vladimir Voronin's tenure in 2009.

##### Career in Office

Timofti, considered by many as a neutral figure in Moldovan politics, has pledged to fight corruption and support democratic and free-market reforms. Nonetheless, some critics accuse him of failing to overhaul the notoriously corrupt judiciary while holding senior judicial positions.

Timofti supports Moldova's application for EU membership and is keen to maintain close ties with the USA and Russia. He also aims to solve the issue of the breakaway region of Transnistria.

#### DEFENCE

Conscription is for 12 months (three months for higher education graduates). In 2008 military expenditure totalled US\$22m. (US\$5 per capita), representing 0.4% of GDP.

Russian troops remained in Transnistria after Moldova gained independence, but in Nov. 1999 the Organization for Security and Co-operation in Europe (OSCE) passed a resolution at its summit requiring Russia to withdraw its troops to Russia by Dec. 2002, unconditionally and under international observation. This deadline was extended to Dec. 2003 but around 1,200 troops remained in the region in 2009.

**Army**

Personnel, 2007, 5,150 (3,479 conscripts). There is also a paramilitary Interior Ministry force of 2,379, riot police numbering 900 and combined forces reserves of 66,000.

**Air Force**

Personnel (including air defence), 2007, 850.

**ECONOMY**

Agriculture accounted for 18.1% of GDP in 2006, industry 15.1% and services 66.8%.

**Overview**

After poor performance through most of the 1990s, the economy began to recover in 2000, with real GDP growth exceeding 6% every year between 2001 and 2005. In spite of economic shocks (such as a 200% price increase for imported natural gas and a Russian ban on wine imports in 2006), growth remained robust for several years before the economy shrank by 6% in 2009 in the wake of the global downturn.

Growth rebounded to 6.9% in 2010 and the economy was among the fastest growing in Central and Eastern Europe in 2011, driven by private domestic demand and strong exports. However, high unemployment, political instability, volatile commodity prices and the fragile global economy pose a long-term risk to recovery.

**Currency**

A new unit of currency, the *leu* (MDL), replaced the *rouble* in Nov. 1993. Inflation was 12.7% in 2008 and 0.0% in 2009, down from a peak of 2,198% in the early 1990s. Foreign exchange reserves were US\$506m. in July 2005. Total money supply in June 2005 was 6,523m. lei.

**Budget**

Budgetary central government revenue and expenditure in 1m. lei (years ending 31 Dec.):

	2005	2006	2007
Revenue	7,941	9,823	14,059
Expenditure	7,031	9,121	12,164

Principal sources of revenue in 2007 were: taxes 10,900m. lei; grants, 967m. lei. Main items of expenditure by economic type in 2007: grants, 4,597m. lei; compensation of employees, 2,634m. lei; subsidies, 1,262m. lei.

VAT is 20% (reduced rates, 8% and 6%).

**Performance**

Moldova's economy shrank by 6.5% in 1998 and 3.4% in 1999. Between 2002 and 2008 it grew by an average 6.4% including growth of 7.8% in 2008. With the global economic downturn the economy contracted by 6.0% in 2009 but there was a return to growth in 2010 of 6.9%.

In 2002 the level of GDP was estimated to be only 38% of that in 1989. Total GDP was US\$5.8bn. in 2010 (excluding Transnistria). The private sector accounts for over 50% of official GDP. Moldova ranks among the countries most reliant on remittances from abroad, which accounted for 23% of total GDP in 2009.

**Banking and Finance**

The central bank and bank of issue is the National Bank (*Governor*, Dorin Drăguțanu). At June 2002 there were 21 commercial banks and one savings bank. There is a stock exchange in Chișinău.

**ENERGY AND NATURAL RESOURCES****Environment**

Moldova's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.7 tonnes per capita.

**Electricity**

Installed capacity in 2007 was 504,000 kW. Production was 1.10bn. kWh in 2007; consumption per capita in 2007 was 1,129 kWh.

**Minerals**

There are deposits of lignite, phosphorites, gypsum and building materials.

**Agriculture**

There were 387,400 people employed in agriculture in 2008. Land under cultivation in 2008 was 2.5m. ha., of which 0.3m. ha. was accounted for by private subsidiary agriculture and 668,600 ha. by farms. In 2008 there were 1.82m. ha. of arable land and 303,000 ha. of permanent crops. The agricultural and food sector accounts for 38% of Moldova's total exports.

Output of main agricultural products (in 1,000 tonnes) in 2008: maize, 1,479; wheat, 1,286; sugar beets, 961; grapes, 636; sunflower seeds, 372; barley, 353; potatoes, 271.

Livestock (2008): 853,000 sheep and goats, 299,000 pigs, 232,000 cattle, 17m. chickens.

Livestock products, 2008 (in 1,000 tonnes): milk, 542; meat, 78; eggs, 541m. units.

**Forestry**

In 2005 forests covered 329,000 ha., or 10.0% of the total land area. Timber production in 2007 was 188,000 cu. metres.

**Fisheries**

The catch in 2005 (exclusively freshwater fish) was 531 tonnes.

**INDUSTRY**

There are canning plants, wine-making plants, woodworking and metallurgical factories, a factory of ferro-concrete building materials, footwear, dairy products and textile plants. Manufacturing accounted for 14.8% of GDP in 2007. Production (in tonnes): crude steel (2007), 995,000; cement (2006), 837,000; flour (2007), 113,300; canned fruit and vegetables (2007), 94,000; granulated sugar (2007), 74,000; footwear (2007), 3.8m. pairs; 5.0bn. cigars and cigarettes (2007); wine (2008), 397.9m. litres.

**Labour**

In 2007 the labour force totalled 1,314,000. A total of 1,247,000 persons were in employment in 2007, including 409,000 engaged in agriculture, hunting, forestry and fisheries, 250,000 in public administration, education, health and social work, 198,000 in wholesale and retail trade/hotels and restaurants and 128,000 in manufacturing. In 2007 the unemployment rate was 5.1%.

**INTERNATIONAL TRADE**

Foreign debt was US\$2,053m. in 2005.

**Imports and Exports**

Imports and exports for calendar years in US\$1m.:

	2002	2003	2004	2005	2006
Imports f.o.b.	1,037.5	1,428.1	1,748.2	2,296.1	2,644.4
Exports f.o.b.	659.7	805.1	994.1	1,104.6	1,053.0

Chief import sources in 2006 were: Ukraine, 19.2%; Russia, 15.5%; Romania, 12.8%; Germany, 7.9%. Main export markets in 2006 were: Russia, 17.3%; Romania, 14.8%; Ukraine, 12.2%; Italy, 11.1%.

Moldova's leading imports are mineral products and fuel, machinery and equipment, chemicals and textiles. The main export commodity is wine, ahead of tobacco. Fruit and vegetables, textiles and footwear, and machinery are also significant exports.

## COMMUNICATIONS

### Roads

There were 9,343 km of public roads in 2009 (94.3% hard surfaced). Registered passenger cars (including taxis) in 2008 numbered 366,351, there were 115,967 goods vehicles and 21,491 buses and minibuses. In 2005 there were 2,289 road accidents resulting in 391 deaths.

### Rail

Total length in 2005 was 1,026 km of 1,520 mm gauge. Passenger-km travelled in 2005 came to 355m. and freight tonne-km to 2,980m.

### Civil Aviation

The main Moldovan-based airline is Air Moldova, which had flights in 2003 to Amman, Amsterdam, Athens, Bucharest, İstanbul, Larnaca, Moscow, Paris, Prague, Rome and Vienna. In 2000 the airport at Chişinău handled 254,234 passengers (all on international flights) and 2,159 tonnes of freight. In 2003 scheduled airline traffic of Moldovan-based carriers flew 5m. km, carrying 179,000 passengers (all on international flights).

### Shipping

In 2008, 0-11m. passengers and 0-20m. tonnes of freight were carried on inland waterways. In Jan. 2009 there were 63 ships of 300 GT or over registered, totalling 170,000 GT.

### Telecommunications

There were 2,962,700 telephone subscribers in total in 2007 (781.0 per 1,000 persons). There were 1,882,800 mobile phone subscribers in 2007—up from 338,200 in 2002—and 700,000 internet users.

Privatization of the state-owned telecommunications company, Moldtelecom, is a priority for the government. A majority stake offer from MGTS, Moscow's main telephone company, failed in Nov. 2002.

## SOCIAL INSTITUTIONS

### Justice

A total of 24,362 crimes were recorded in 2007. The population in penal institutions in Sept. 2007 was 8,130 (227 per 100,000 of national population). The death penalty was abolished for all crimes in 1995.

### Education

In 2007 there were 103,811 children and 10,517 teaching staff in pre-schools; 160,528 pupils and 9,876 teaching staff in primary schools; and 367,636 pupils and 30,376 teaching staff in secondary schools. There were 148,449 students (8,570 academic staff) in tertiary education in 2007. In 2006 there were 16 public and 15 private higher education institutions. Adult literacy rate in 2008 was 98%.

In 2007 public expenditure on education came to 7.3% of GNI and represented 19.8% of total government expenditure.

### Health

In 2007 there were 83 hospitals with 21,892 beds, a provision of 61 per 10,000 inhabitants. In 2007 there were 12,733 physicians

(11% private sector), 1,566 dentists, 20,868 nurses and 2,834 pharmacists (2006).

### Welfare

There were 469,600 age pensioners and 169,800 other pensioners in 2008.

## RELIGION

Religious affiliation in 2001: Romanian Orthodox, 1-26m.; Russian (Moldovan) Orthodox, 342,000.

## CULTURE

### World Heritage Sites

Moldova has one site on the UNESCO World Heritage List: the Struve Geodetic Arc (inscribed in 2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared as a UNESCO site with nine other countries.

### Press

In 2005 there were seven daily newspapers and 120 non-dailies with a combined circulation of 988,000.

### Tourism

In 2005 there were 23,000 non-resident tourists, spending US\$163m.

## DIPLOMATIC REPRESENTATIVES

Of Moldova in the United Kingdom (5 Dolphin Sq., Edensor Rd, Chiswick, London, W4 2ST)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Mihaela Manoli.

Of the United Kingdom in Moldova (18 Nicolae Iorga St., Chişinău MD-2012)

*Ambassador:* Keith Shannon.

Of Moldova in the USA (2101 S St., NW, Washington, D.C., 20008)

*Ambassador:* Igor Munteanu.

Of the USA in Moldova (103 Strada Alexei Matveevici, Chişinău)

*Ambassador:* William. H. Moser.

Of Moldova to the United Nations

*Ambassador:* Vladimir Lupan.

Of Moldova to the European Union

*Ambassador:* Daniela Cujba.

# MONACO

Principauté de Monaco  
(Principality of Monaco)

*Capital:* Monaco

*Population, 2010:* 31,000

*GNI per capita, 2010:* US\$153,177

## KEY HISTORICAL EVENTS

Monaco's natural harbour was settled by Phoenicians, Greeks and Ligurians and later by Saracens. A fortress, built where the palace now stands, was captured by the Grimaldi family of Genoa in 1297. It was passed on through the male line until 1731, when control of Monaco passed to Louise Hippolyte, daughter of Antoine I and wife of Jacques de Goyon Matignon, who took the name of Grimaldi. The Principality was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna in 1815, and under that of France in 1861. Prince Rainier III succeeded his grandfather, Louis II, in 1949 and ruled the Principality until his death on 6 April 2005 when his son, Prince Albert II, inherited the throne.

## TERRITORY AND POPULATION

Monaco is bounded in the south by the Mediterranean and elsewhere by France (Department of Alpes Maritimes). The area is 197 ha. (1.97 sq. km). The Principality is divided into four districts: Monaco-Ville, la Condamine, Monte-Carlo and Fontvieille. Population (2008 census), 31,109; there were 6,687 Monegasques (22%), 8,785 French (28%) and 5,778 Italian (19%).

The official language is French.

## SOCIAL STATISTICS

2008: births, 970; deaths, 545. 2005 marriages, 161; divorces, 69. Rates per 1,000 population, 2008: birth, 31.2; death, 17.5; marriage (2005), 5.0; divorce (2005), 2.1. Annual population growth rate, 1998–2008, 0.4%; fertility rate, 2008, 1.5 births per woman. Infant mortality per 1,000 live births (2005), 3.

## CLIMATE

A Mediterranean climate, with mild moist winters and hot dry summers. Monaco, Jan. 50°F (10°C), July 74°F (23.3°C). Annual rainfall 30" (758 mm).

## CONSTITUTION AND GOVERNMENT

On 17 Dec. 1962 a new constitution was promulgated which maintains the hereditary monarchy.

The reigning Prince is **Albert II**, b. 14 March 1958, son of Prince Rainier III, 1923–2005, and Grace Kelly, 1929–1982; married Charlene Wittstock on 1 and 2 July 2011. Prince Albert succeeded his father Rainier III, who died on 6 April 2005.

*Sisters of the Prince.* Princess Caroline Louise Marguerite, b. 23 Jan. 1957; married Philippe Junot on 28 June 1978, divorced 9 Oct. 1980; married Stefano Casiraghi on 29 Dec. 1983 (died 3 Oct. 1990); married Prince Ernst of Hanover on 23 Jan. 1999. *Offspring:* Andrea, b. 8 June 1984; Charlotte, b. 3 Aug. 1986; Pierre, b. 5 Sept. 1987; Alexandra, b. 20 July 1999. Princess Stéphanie Marie Elisabeth, b. 1 Feb. 1965, married Daniel Ducruet on 1 July 1995, divorced 4 Oct. 1996; married Adans López Peres on 12 Sept. 2003; divorced 24 Nov. 2004. *Offspring:* Louis, b. 26 Nov. 1992; Pauline, b. 4 May 1994; Camille, b. 15 July 1998.

Prince Rainier III renounced the principle of divine right. Executive power is exercised jointly by the Prince and a five-member *Council of government*, headed by a Minister of State (a French citizen). A 24-member *National Council* is elected for five-year terms.

The constitution can be modified only with the approval of the National Council. Laws of 1992, 2003 and 2005 permit Monegasque women to give their nationality to their children.

## National Anthem

'Principauté Monaco ma patrie' ('Principality of Monaco my fatherland'); words by T. Bellando de Castro, tune by C. Albrecht.

## RECENT ELECTIONS

In parliamentary elections held on 3 Feb. 2008 the ruling Union for Monaco won 21 of 24 seats against 3 for the Rally and Issues for Monaco. Turnout was 76.9%.

## CURRENT GOVERNMENT

*Chief of State:* Prince Albert II.

In March 2012 the cabinet comprised:

*Minister of State:* Michel Roger; b. 1949 (sworn in 29 March 2010).

*Minister of External Relations:* José Badia. *Facilities, Environmental Affairs and Town Planning:* Marie-Pierre Gramaglia. *Finance and Economics:* Marco Piccinini. *Interior:* Paul Masseron. *Social Affairs and Health:* Stéphane Valeri.

*President of the National Council:* Jean-François Robillon.

*Government Website:* <http://www.monaco.gouv.mc>

## CURRENT LEADERS

### Albert II

*Position*  
Prince

### Introduction

Albert II became ruler of Monaco on 6 April 2005 following the death of his father, Prince Rainier III, who had ruled the principality for 56 years. Albert II has maintained the status quo, upholding the low-tax regime that has made Monaco a haven for the super-rich.

### Early Life

Albert Alexandre Louis Pierre Grimaldi was born in Monaco on 14 March 1958, the second child and only son of Prince Rainier III and Grace Kelly, a US cinema actress. He attended the Lycée Albert Ier, then the principality's sole secondary school, where he developed a passion for sport. Having received his baccalaureate diploma in 1976, Albert enrolled the following year at Amherst College in Massachusetts, USA, and graduated with a degree in political science in 1981. From Sept. 1981–April 1982 he served in the French Navy as a sub-lieutenant on the aircraft carrier *Jeanne d'Arc*. On 14 Sept. 1982 his mother was killed in a car crash in the mountains near Monaco. Subsequently, he became vice-president of the Princess Grace-USA Foundation, which grants scholarships to talented young musicians, actors and dancers. In the same year he also became president of the Monaco Red Cross.

During the mid-1980s Albert undertook work experience at an investment bank and an international law firm in New York, as well as the French luxury goods group, Moët-Hennessy, in Paris. Back in Monaco he chaired the principality's prestigious Yacht Club, the International Television Festival and Monaco's Athletic Federation. Albert also became increasingly involved in the Olympic movement, both as an administrator (as a member of the International Olympic Committee in 1985 and president of Monaco's Olympic Committee in 1993) and competitor (in the principality's bobsleigh team at four Winter Olympics between 1988 and 2002).

During the 1990s he began to increase his involvement in the day-to-day administration of Monaco. In 1997 he organized the 700th anniversary celebrations of the Grimaldi family's control over the principality. He also assisted his father and the government in preparing reports that strongly denied allegations by French parliamentarians in 2000 that Monaco's lax policies had facilitated money laundering.

Long described in the press as the world's 'most eligible bachelor', Albert's unmarried status became a matter of political concern, casting doubt on the succession of the Grimaldi family and the independence of the principality. A change to the constitution was formulated in April 2002, however, allowing the throne to continue through the female line. On 31 March 2005 the Palace of Monaco announced that Albert would take over the duties of his father as Regent, after Prince Rainier III, who had been admitted to hospital, was no longer able to rule. Following the death of his father on 6 April 2005, he became Sovereign Prince of Monaco, and was enthroned on 12 July.

### Career in Office

In his first public statement as Prince Albert II, he said that the death of his father, who had governed for 56 years, had left the people of the principality feeling orphaned and united in a profound sense of loss. He did not make reference to the future direction of policy, but analysts expected him to retain the famously low-tax regime and continue to develop tourism, as well as nurturing Monaco's precision engineering, fish canning, banking and pharmaceutical industries. He was also expected to rule in a more consensual style than his father. In July 2011 he married Charlene Wittstock, a former Olympic swimmer for South Africa.

## ECONOMY

### Overview

A tiny economy with sparse natural resources, Monaco is primarily geared towards tourism, finance and commerce. Tourism provides one of the main sources of income thanks to the climate and Monte Carlo's famed gambling casino opened in 1856. The economy is a major banking centre attracting many foreign companies drawn by its low corporate taxes and has thrived as a tax haven for individuals and businesses.

Although not a member of the EU, it is closely associated with its economic structures. Customs, postal services,

telecommunications and banking are governed via an economic and customs union with France under EU rules. Living standards are high and per capita GDP is estimated to be among the highest in the world, although official economic statistics are not published. In May 2009 Monaco was removed from the OECD's blacklist of uncooperative tax havens following its commitment to implement the organization's standards of transparency and effective exchange of information.

### Currency

On 1 Jan. 1999 the euro (EUR) replaced the French franc as the legal currency in Monaco at the irrevocable conversion rate of 6.55957 French francs to one euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the franc ceased to be legal tender on 17 Feb. 2002.

### Budget

Revenues in 2009 totalled €744.21m. and expenditures €805.53m.

### Performance

In 2009 total GDP was US\$6.1bn.

### Banking and Finance

There were 43 banks in 2004 of which 19 were Monegasque banks.

## ENERGY AND NATURAL RESOURCES

### Electricity

Electricity is imported from France. 503 GWh were supplied to 24,178 customers in 2004. In 2001 output capacity was 83 MW.

### Oil and Gas

In 2004, 61 GWh of gas were supplied to 3,935 customers; output capacity was 21 MW.

### Water

Total consumption (2004), 5.38m. cu. metres.

## INDUSTRY

The main industry is tourism. There is some production of cosmetics, pharmaceuticals, glassware, electrical goods and precision instruments.

### Labour

There were 42,637 persons employed in Jan. 2004. 38,773 worked in the private sector; 3,864 in the public sector. 26,017 French citizens worked in Monaco in 2004.

## INTERNATIONAL TRADE

### Imports and Exports

There is a customs union with France. Imports for 2004 totalled €512m.; exports, €528m. Main imports: pharmaceuticals, perfume, clothing, paper, synthetic and non-metallic products, and building materials.

## COMMUNICATIONS

### Roads

There were 77 km of roads in 2007. In 2004 there were 33,275 vehicles. Monaco has the densest network of roads of any country in the world. In 2004, 5,141,964 people travelled by bus.

### Rail

The 1.7 km of main line passing through the country are operated by the French National Railways (SNCF). In 2004, 3,953,859 people arrived at or departed from Monaco railway station.

### Civil Aviation

There are helicopter flights to Nice with Heli Air Monaco and Heli Inter. Helicopter movements (2004) at the Heliport of Monaco (Fontvieille), 37,521; the number of passengers carried was 112,379. The nearest airport is at Nice in France.

**Shipping**

In 2004 there were 3,829 vessels registered, of which 12 were over 100 tonnes. 2,636 yachts put in to the port of Monaco and 1,193 at Fontvieille in 2004. 178 liners put in to port in Monaco; 10,581 people embarked, 10,195 disembarked and 104,202 were in transit.

**Telecommunications**

There were 34,100 fixed telephone lines in 2010 (964-0 per 1,000 inhabitants). Mobile phone subscribers numbered 26,300 in 2010. Internet users numbered 22,000 in 2008.

**SOCIAL INSTITUTIONS****Justice**

There are the following courts: *Tribunal Suprême*, *Cour de Révision*, *Cour d'Appel*, a Correctional Tribunal, a Work Tribunal, a Tribunal of the First Instance, two Arbitration Commissions for Rents (one commercial, one domestic), courts for Work-related Accidents and Supervision, a *Juge de Paix*, and a Police Tribunal. There is no death penalty.

**Police**

In 2004 the police force (*Sûreté Publique*) comprised 516 personnel. Monaco has one of the highest number of police per head of population of any country in the world.

**Education**

In 2004, in the public sector, there were six pre-school institutions (*écoles maternelles*) with 750 pupils; four elementary schools with 1,367 pupils; two secondary schools with 2,359 pupils. There were 277 primary teachers and 150 secondary school teachers in total in 2004. In the private sector there were two pre-schools and three primary schools with 179 and 481 pupils respectively; and one secondary school with 700 pupils. In 2005 the government allocated 5.2% of its total budget to education.

The International University of Monaco had 300 students in 2006.

**Health**

In 2005 the government allocated 6.4% of its total budget to public health. There were 191 doctors and 19 dentists in 2004 and 19 childcare nurses in 2002. There were 503 hospital beds in 2002. Monaco has the highest provision of hospital beds of any country: in 2002 there were 162 per 10,000 population.

**RELIGION**

90% of the resident population are Roman Catholic. There is a Roman Catholic archbishop.

**CULTURE****Press**

Monaco has no domestically-published daily newspaper. In 2008 there were two state weeklies: *Journal de Monaco* (published by the government) and *Monaco Hebdo*.

**Tourism**

In 2009, 264,540 foreign visitors (212,966 leisure and 51,574 business) spent a total of 778,451 nights in Monaco; the main visitors were French, followed by Italians and British. There were also 235,904 cruise ship passengers in 2009. There are three casinos run by the state, including the one at Monte Carlo.

**DIPLOMATIC REPRESENTATIVES**

Of Monaco in the United Kingdom (7 Upper Grosvenor St., London, W1K 2LX)

*Ambassador*: Evelyne Genta.

*British Consul-General* (resident in France): Vacant.

*British Honorary Consul*: Eric G. F. Blair.

Of Monaco in the USA (Suite 2K-100, 3400 International Drive, NW, Washington, D.C., 20008)

*Ambassador*: Gilles Noghès.

Of the USA in Monaco

*Ambassador*: Charles Rivkin (resides in Paris).

Of Monaco to the United Nations

*Ambassador*: Isabelle Picco.

Of Monaco to the European Union

*Ambassador*: Gilles Tonelli.

*GNI per capita, 2011:* (PPP\$) 3,391

*HDI/world rank:* 0.653/110

## KEY HISTORICAL EVENTS

Temujin became khan of Hamag Mongolia in 1190. Having united by conquest various Tatar and Mongolian tribes he was confirmed as 'Universal' ('Genghis', 'Chingiz') khan in 1206. The expansionist impulse of his nomadic empire (Beijing captured in 1215; Samarkand in 1220) continued after his death in 1227. Tamurlaine (died 1405) was the last of the conquering khans. In 1368 the Chinese drove the Mongols from Beijing, and for the next two centuries Sino-Mongolian relations alternated between war and trade. In 1691 Outer Mongolia accepted Manchu rule. The head of the Lamaist faith became the symbol of national identity, and his seat ('Urga', now Ulan Bator) was made the Mongolian capital. When the Manchu dynasty was overthrown in 1911 Outer Mongolia declared its independence under its spiritual ruler and turned to Russia for support against China. Soviet and Mongolian revolutionary forces set up a provisional government in March 1921. On the death of the spiritual ruler a people's republic and new constitution were proclaimed in May 1924. With Soviet help Japanese invaders were fended off during the Second World War. The Mongols then took part in the successful Soviet campaign against Inner Mongolia and Manchuria. On 5 Jan. 1946 China recognized the independence of Outer Mongolia. Until 1990 sole power was in the hands of the (Communist) Mongolian People's Revolutionary Party (MPRP), but an opposition Mongolian Democratic Party, founded in Dec. 1989, achieved tacit recognition and held its first congress in Feb. 1990. Following demonstrations and hunger-strikes, on 12 March the entire MPRP Politburo resigned and political opposition was legalized.

## TERRITORY AND POPULATION

Mongolia is bounded in the north by the Russian Federation, and in the east and south and west by China. Area, 1,564,100 sq. km (603,900 sq. miles). Population (2010 census), 2,647,545. Density, 2010, 1.7 per sq. km. In 2005, 56.7% of the population were urban. More Mongols live in China than in Mongolia (5.8m. according to China's 2000 census).

The UN gives a projected population for 2015 of 2.98m.

The population is predominantly made up of Mongolian peoples (78.8% Khalkh). There is a Turkic Kazakh minority (3.7%

of the population) and 21 Mongol minorities. The official language is Khalkh Mongol, which uses a modified Cyrillic alphabet.

The republic is administratively divided into 21 provinces (*aimag*) and the capital, Ulan Bator. The provinces are subdivided into 334 districts or counties (*suums*).

## SOCIAL STATISTICS

Births, 2005, 45,326; deaths, 16,480. 2001 rates: birth, 17.8 per 1,000 population; death, 6.5 per 1,000; marriage, 5.9 per 1,000; divorce, 0.6 per 1,000. Annual population growth rate, 2000-05, 1.3%. Infant mortality rate, 2005, 39 per 1,000 live births. Expectation of life in 2007 was 63.0 years for males and 69.6 for females. Fertility rate, 2008, 2.0 births per woman. Mongolia has had one of the most impressive reductions in its fertility rate of any country in the world over the past quarter of a century, having had a rate of 4.2 births per woman in 1990.

## CLIMATE

A very extreme climate, with six months of mean temperatures below freezing, but much higher temperatures occur for a month or two in summer. Rainfall is very low and limited to the months from mid-May to mid-Sept. Ulan Bator, Jan. -14°F (-25.6°C), July 61°F (16.1°C). Annual rainfall 8" (208 mm).

## CONSTITUTION AND GOVERNMENT

The constitution of 12 Feb. 1992 abolished the 'People's Democracy', introduced democratic institutions and a market economy and guarantees freedom of speech.

The *President* is directly elected for renewable four-year terms.

Since June 1992 the legislature has consisted of a single-chamber 76-seat parliament, the *Great Hural (Ulsyn Ich-Chural)*, which elects the Prime Minister.

## National Anthem

'Darkhan manai khuvsgalt uls' ('Our sacred revolutionary country'); words by Tsendiyn Damdinsüren, tune by Bilegin Damdinsüren and Luvsanjams Murjorj.

## RECENT ELECTIONS

At the parliamentary elections of 29 June 2008 turnout was 74.3%. Preliminary results declared that the Mongolian People's Revolutionary Party (MPRP) gained 47 of the 76 available seats, the Motherland Democracy (EOA, comprising the Democratic Party and two smaller parties—the Civic Will Republican Party and the Mongol Democratic New Socialist Party) 26 seats. Three seats went to independents. However, the Democratic Party (DP) refused to accept the results and protests leading to violence followed. After consultations between the main parties and recounts in some constituencies the MPRP had 44 seats, EOA 27 and independents one with the remaining seats still to be declared.

In presidential elections on 24 May 2009 former prime minister Tsakhiagiin Elbegdorj (Democratic Party) won with 51.2% of the vote against incumbent Nambaryn Enkhbayar (Mongolian People's Revolutionary Party) with 47.4%. Turnout was 73.5%.

## CURRENT GOVERNMENT

*President:* Tsakhiagiin Elbegdorj; b. 1963 (Democratic Party; sworn in 18 June 2009).

In March 2012 the MPRP-DP coalition government comprised:  
*Prime Minister:* Sukhbaataryn Batbold, b. 1963 (Mongolian People's Revolutionary Party; sworn in 29 Oct. 2009).

*First Deputy Prime Minister:* Norovyn Altankhuyag. *Deputy Prime Minister:* Miyegombo Enkhbold.

*Minister of Defence:* Luvsanvandan Bold. *Education, Culture and Science:* Yondon Otgonbayar. *Environment and Tourism:* Luimed Gansukh. *Finance:* Sangajav Bayartsogt. *Food, Agriculture and Light Industry:* Tunjin Badamjunai. *Foreign Affairs:* Gombojav Zandanshatar. *Health:* Sanbuu Lambaa. *Justice and the Interior:* Tsendiin Nyamdorj. *Mineral Resources and Energy:* Dashdorj Zorigt. *Roads, Transportation, Construction and Urban Development:* Khaltmaa Battulga. *Social Welfare and Labour:* Tugsjargal Gandi. *Chief of the Cabinet Secretariat:* Chimed Khurelbaatar.

*Office of the President:* <http://www.president.mn>

## CURRENT LEADERS

### Tsakhiaigiin Elbegdorj

#### *Position*

President

#### *Introduction*

Tsakhiaigiin Elbegdorj took office on 18 June 2009, the first president not to have been a member of the MPRP. Campaigning on a platform of change and anti-corruption that appealed to urban voters, he won the election with just over 51% of the vote on 24 May 2009, beating MPRP candidate and incumbent president Nambaryn Enkhbayar.

#### *Early Life*

Elbegdorj was born on 30 March 1963 in the district of Zereg. In 1988 he graduated from the Military Political Institute in Ukraine (then part of the USSR) and went on to attain a masters degree in public administration from Harvard University in the USA.

Elbegdorj was active in the fight against communism and in 1989 helped establish a recognized pro-democracy movement. The following year he founded Mongolia's first independent newspaper, *Democracy*. A few months later he was elected to government and was a key figure in drafting a new constitution, adopted in Jan. 1992. In 1996, as leader of the Democratic Party (DP), Elbegdorj led the Democratic Union Coalition to victory in parliamentary elections, paving the way for the country's first peaceful power transition.

Elbegdorj was elected prime minister in April 1998 but a banking scandal forced his resignation shortly afterwards. After the 2004 elections he was again appointed to the premiership, heading a fragile MPRP-DP coalition. During his tenure, he announced measures to boost tourism, reorganized domestic political structures, loosened control of the news media and oversaw the replacement of Russian by English as Mongolia's second language. In Jan. 2006 he was again forced to resign when the MPRP withdrew from the coalition, sparking public demonstrations in Ulan Bator.

At elections in May 2009 Elbegdorj won by only a narrow margin over the incumbent president. Nevertheless, the MPRP accepted the result, producing a peaceful outcome after fears of a repeat of the violence that followed the DP's claims of fraud at the 2008 parliamentary polling.

#### *Career in Office*

On taking office Elbegdorj faced the challenges of working with a parliament dominated by the MPRP and tackling high levels of corruption and unemployment. He also aimed to spread the profits of Mongolia's mineral wealth more widely. On the foreign stage, he was expected to cultivate Western ties to counterbalance the influence of Russia and China.

### Sukhbaataryn Batbold

#### *Position*

Prime Minister

#### *Introduction*

Sukhbaataryn Batbold became prime minister in Oct. 2009 after his predecessor, Sanj Bayar, resigned because of ill health. Batbold's appointment was approved with 62 of 66 votes cast in a plenary session of the Great Hural. His tenure was scheduled to last until parliamentary elections that were expected to take place in June 2012.

#### *Early Life*

Batbold was born in 1963 in Ulan Bator. He was educated at the University of Moscow, graduating from its School of International Relations in 1986. He joined the ministry of economic foreign relations and was appointed head of the Mongol Impex Cooperative in 1988. After returning to higher education, he graduated from the London School of Business in the UK in 1991. In 1992 he joined Altai Trading LLC as its director general, a post he held until 2000.

He was appointed deputy minister of foreign affairs after the return to power of the MPRP in 2000. From 2004–06 he served as minister of trade and industry and in 2008 was named minister of foreign affairs. During his tenure he hosted UN Secretary-General Ban Ki-moon's visit to Ulan Bator to discuss climate change in Mongolia and stood in for Bayar at a Council of Heads of State meeting of the Shanghai Cooperation Organisation.

On 26 Oct. 2009 parliament accepted Bayar's resignation and Batbold was nominated by the MPRP as his successor. His appointment was approved three days later.

#### *Career in Office*

Batbold's government undertook a review of strategies to take advantage of Mongolia's largely untapped natural resources without falling prey to 'Dutch Disease', where a sudden surge of wealth hampers long-term growth. He has also been keen to loosen economic reliance on Russia and China by developing relationships with the USA and Canada, while at the same time ensuring Mongolia does not alienate its powerful neighbours. His first year in office was, however, overshadowed by the devastation of the country's livestock, and its effects on herder communities, by extreme bad weather.

## DEFENCE

Conscription is for one year for males aged 18–25 years. Defence expenditure in 2008 totalled US\$52m. (US\$17 per capita), representing 1.1% of GDP.

#### *Army*

Strength (2007) 7,500 (3,300 conscripts). There is a border guard of 6,000, 1,200 internal security troops and 300 Construction Troops.

#### *Air Force*

The Air Force had a strength of 800 in 2007 with 11 attack helicopters and nine aircraft.

## ECONOMY

In 2006 agriculture accounted for 21.9% of GDP, industry 42.3% and services 35.9%.

#### *Overview*

Traditionally a nomadic pastoral economy, substantial progress has been made in the past decade towards a private sector-led open economy. The private sector now accounts for over 80% of GDP. The country is rich in mineral resources, especially copper and gold.

Assistance to Mongolia in the past has been dominated by loans to the energy and transport sectors, as a result of the high

cost of constructing and maintaining infrastructure in the country. However, since the recent opening-up of one of the world's largest copper mines, development agencies have focused on ensuring that mining revenues are used to fund development projects. According to the IMF, avoiding the impacts of the hypothetical 'natural resource curse' (whereby countries rich in natural resources paradoxically enjoy less development than nations poor in resources) will continue to be a challenge in the medium term.

The economy was hit hard by the global economic crisis that began in 2007 owing to its dependence on mineral exports. An 18-month IMF Stand-by Arrangement in April 2009 helped to stabilize the economy and growth rebounded to 6% in 2010. Mineral exports are projected to increase substantially over the next few years thanks to major, new mining projects. However, double digit inflation, resulting from heavy government spending and higher prices for imported oil and food, threaten short-term growth and macroeconomic stability. According to the 2010 Human Development Report, 22% of the population lives below the international poverty line of US\$1.25 (PPP) per day.

### Currency

The unit of currency is the *tugrik* (MNT) of 100 *möngö*. The tugrik was made convertible in 1993. In March 2005 foreign exchange reserves were US\$276m. and gold reserves totalled 112,000 troy oz. Total money supply was 222,085m. tugriks in Dec. 2004. Inflation, which reached a high of 268% in 1993, was just 0.9% in 2002. Although it rose to 26.8% in 2008 inflation fell to 6.3% in 2009 but went up again to 10.2% in 2010.

### Budget

In 2006 revenues were 1,360.4bn. tugriks and expenditures 1,237.0bn. tugriks; taxes accounted for 83.0% of revenue and economic services 26.1% of expenditure.

VAT was reduced from 15% to 10% as of 1 Jan. 2007.

### Performance

The economy contracted by 1.3% in 2009 but grew by 6.4% in 2010. Total GDP in 2010 was US\$6.1bn.

### Banking and Finance

The Mongolian Bank (established 1924) is the bank of issue, being also a commercial, savings and development bank: the *Governor* is Lhanaasuren Purevdorj. It has 21 main branches. There were 25 other banks in 2002. The largest bank is the state-owned Trade and Development Bank.

A stock exchange opened in Ulan Bator in 1992.

## ENERGY AND NATURAL RESOURCES

### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels in Mongolia were the equivalent of 2.4 tonnes per capita.

### Electricity

Installed capacity was 0.8m. kW in 2007. Production, 2007, 3.70bn. kWh; consumption per capita in 2007 was 1,486 kWh. Mongolia imports electricity from Russia to meet increasing demand.

### Minerals

There are large deposits of copper, gold, nickel, zinc, molybdenum, phosphorites, tin, wolfram and fluor spar; production of the latter in 2005, 367,000 tonnes. There are major coalmines near Ulan Bator and Darhan. A huge gold and copper mine at Oyu Tolgoi is scheduled to begin production in 2013. In 2007 lignite production was 7.73m. tonnes; coal production, 1.51m. tonnes. Copper production, 2008, 126,796 tonnes; gold production, 2008, 15,184 kg.

### Agriculture

The prevailing Mongolian style of life is pastoral nomadism. Livestock production comprises 79.5% of the total agricultural production. In 2003 there were 10.8m. sheep, 2.0m. horses, 1.8m. cattle and 257,000 camels. The number of goats rose from 5.5m. to 10.7m. between 1992 and 2003 as production of cashmere has increased along with the market economy. The winter of 2009–10 was extremely harsh, resulting in the loss of some 7.8m. animals, representing 17% of Mongolia's livestock. In spite of this, livestock outnumber humans by 14 to 1.

In 2007 there were around 851,000 ha. of arable land and 2,000 ha. of permanent crop land. In 2003 output of major crops was 165,000 tonnes of wheat (down from 607,000 in the period 1989–91) and 79,000 tonnes of potatoes (down from 128,000 in 1989–91). Vegetables produced in 2003 included (in tonnes): turnips, 25,000; cabbage, 15,000; carrots, 10,000. Livestock products, 2003 (in 1,000 tonnes): milk, 292; meat, 153. There were 48 tractors and seven harvester-threshers per 10,000 ha. of arable land in 2006.

### Forestry

Forests, chiefly larch, cedar, fir and birch, occupied 10.25m. ha. in 2005 (6.5% of the land area). Timber production was 791,000 cu. metres in 2007.

### Fisheries

The catch in 2005 was 366 tonnes, entirely from inland waters.

## INDUSTRY

Industry is still small in scale and local in character. The food industry accounts for 25% of industrial production. The main industrial centre is Ulan Bator; others are at Darhan and Erdenet. Production figures: cement (2009), 235,000 tonnes; lime (2009), 43,000 tonnes; bread (2003), 22,000 tonnes; carpets (2003), 663,000 sq. metres; sawnwood (2002), 300,000 cu. metres.

### Labour

Out of 870,800 people in employment in Dec. 2002, 381,400 were engaged in agriculture, hunting, fishing and forestry; 104,500 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods; 59,300 in education; and 55,600 in manufacturing. In July 2003 there were 37,300 registered unemployed persons.

## INTERNATIONAL TRADE

Mongolia is dependent on foreign aid. Total foreign assistance to Mongolia exceeds US\$300m. annually. Japan is the largest bilateral donor. Foreign debt was US\$1,327m. in 2005.

### Imports and Exports

In 2006 imports (f.o.b.) were valued at US\$1,356.7m. and exports (f.o.b.) at US\$1,545.2m. Main exports, 2006: copper concentrate, 42.7%; gold, 18.1%; refined copper, 7.2%. Minerals account for over 80% of Mongolia's exports. Principal import suppliers in 2006: Russia, 36.9%; China, 27.2%; Japan, 6.6%; South Korea, 5.6%. Main export markets, 2006: China, 67.8%; Canada, 11.1%; USA, 7.7%; Russia, 2.9%.

## COMMUNICATIONS

### Roads

The total road network covered 49,250 km in 2002, including 11,121 km of highway. There are 1,185 km of surfaced roads running around Ulan Bator, from Ulan Bator to Darhan, at points on the frontier with the Russian Federation and towards the south. Truck services run where there are no surfaced roads. Vehicles in use in 2007 included 110,200 passenger cars and 37,300 lorries and vans. In 2008 passenger transport totalled 1,215m. passenger-km and freight 782m. tonne-km. In 2007 there were 562 fatalities as a result of road accidents.

**Rail**

The Trans-Mongolian Railway (1,815 km of 1,520 mm gauge in 2005) connects Ulan Bator with the Russian Federation and China. There are spur lines to Erdenet and to the coalmines at Nalayh and Sharyn Gol. A separate line connects Choybalsan in the east with Borzaya on the Trans-Siberian Railway. Passenger-km travelled in 2007 came to 1,401m. and freight tonne-km to 8,373m.

**Civil Aviation**

MIAT-Mongolian Airlines operates internal services, and in 2003 flew from Ulan Bator to Beijing, Berlin, Frankfurt, Hohhot, Irkutsk, Moscow, Seoul and Tokyo. In 2003 scheduled airline traffic of Mongolian-based carriers flew 9m. km, carrying 289,000 passengers (139,000 on international flights). In 2001 Ulan Bator handled 285,399 passengers and 2,660 tonnes of freight.

**Shipping**

There is a steamer service on the Selenge River and a tug and barge service on Hövsgöl Lake.

**Telecommunications**

In 2008 there were 200,500 main (fixed) telephone lines; mobile phone subscribers numbered 1,763,200 in 2008 (66.8 per 100 persons). There were 360,100 PCs in use in 2006 and 330,000 internet users in 2008.

**SOCIAL INSTITUTIONS****Justice**

The Procurator-General is appointed, and the Supreme Court elected, by parliament for five years. There are also courts at province, town and district level. Lay assessors sit with professional judges. The death penalty is retained but has been subject to a moratorium since Jan. 2010; it was last used in 2008.

The population in penal institutions in 2006 was 6,593 (244 per 100,000 of national population).

**Education**

Adult literacy was 97.8% in 2003 (male, 98.0%; female, 97.5%). Schooling begins at the age of seven. In 2007 there were 94,702 children in pre-primary education and 3,262 teaching staff; 239,262 pupils and 7,572 teaching staff in primary education; and 328,009 pupils and 16,605 teaching staff in secondary schools. There were 142,411 students in tertiary education in 2007 and 8,754 academic staff. In 2003 there were eight state and three private universities, and 38 public and 134 private institutes and colleges.

In 2007 public expenditure on education came to 5.2% of GNI.

**Health**

In 2003 there were 385 state hospitals with the equivalent of 73 beds per 10,000 inhabitants. There were 6,823 physicians, 469 dentists, 612 midwives and 7,802 nurses in 2002.

**RELIGION**

Tibetan Buddhist Lamaism is the prevalent religion; the Dalai Lama is its spiritual head. In 1995 there were about 100 monasteries and 2,500 monks.

**CULTURE****World Heritage Sites**

Mongolia has three sites (one shared) on the UNESCO World Heritage List: the Orkhon Valley Cultural Landscape (inscribed on the list in 2004), an extensive area on both banks of the Orkhon River including the archaeological remains of Kharkhorum, the 13th and 14th century capital of Genghis Khan's vast Empire; and the Petroglyphic Complexes of the Mongolian Altai (2011), numerous rock carvings and funerary monuments that date back to 11,000 BC. The third site falls under joint Mongolian and Russian jurisdiction: Uvs Nuur Basin (2003), an important saline lake system supporting a rich wildlife, especially the snow leopard and Asiatic ibex.

**Press**

In 2008 there were 15 paid-for daily newspapers with a combined circulation of 61,000 and 115 paid-for non-dailies with a circulation of 197,000. The leading paid-for dailies are *Udriin Sonin* (Daily News) and *Onoodor*.

**Tourism**

In 2005 there were 338,000 non-resident tourists; spending by tourists totalled US\$223m.

**DIPLOMATIC REPRESENTATIVES**

## KEY HISTORICAL EVENTS

Montenegro emerged as a separate entity on the break-up of the Serbian Empire in 1355. Owing to its mountainous terrain, it was never effectively subdued by Turkey. It was ruled by Bishop Princes until 1851, when a royal house was founded. The Treaty of Berlin (1828) recognized the independence of Montenegro and doubled the size of the territory.

The assassination of Archduke Franz Ferdinand of Austria in Sarajevo on 28 June 1914 precipitated the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government aimed at a centralized, Serb-run state. But exiles from Croatia and Slovenia wanted a South Slav federation. This was accepted by the victorious Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918. From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes. The remains of King Nicholas I, who was deposed in 1918, were returned to Montenegro for reburial in Oct. 1989.

A constitution of 1921 established an assembly but the trappings of parliamentarianism could not bridge the gulf between Serbs and Croats. The Croat peasant leader Radić was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. On 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the regency of Prince Paul, the government pursued a pro-fascist line. On 25 March 1941 Paul was persuaded to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within ten days Yugoslavia surrendered; king and government fled to London. Resistance was led by a royalist group and the communist-dominated partisans of Josip Broz, nicknamed Tito. Having succeeded in liberating Yugoslavia, Tito set up a Soviet-type constitution but he was too independent for Stalin, who sought to topple him. However, Tito made a *rapprochement* with the west and it was the Soviet Union under Khrushchev that had to extend the olive branch in 1956. Yugoslavia was permitted to evolve its 'own road to socialism'. Collectivization of agriculture was abandoned; and Yugoslavia became a champion of international 'non-alignment'. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia between Serbs and Croats, reached crisis point after 1988. On 25 June 1991 Croatia and Slovenia declared independence. Fighting began in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia. A three-month moratorium agreed at EU peace talks on 30 June having expired, both Slovenia and Croatia declared their independence from the Yugoslav federation on 8 Oct. After 13 ceasefires had failed, a fourteenth was signed on 23 Nov. under UN auspices. A Security Council resolution of 27 Nov. proposed the deployment of a UN peacekeeping force if the ceasefire was kept. Fighting, however, continued. On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia and Herzegovina was recognized on 7 April 1992 and Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted to send a 14,000-strong peacekeeping force to Croatia and Yugoslavia. On 27 April 1992 Serbia and Montenegro created a new Federal Republic of Yugoslavia.

On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted to impose sanctions. In mid-1992 NATO committed air, sea and eventually land forces to enforce sanctions and protect humanitarian relief operations in Bosnia. At a joint UN-EC peace conference on Yugoslavia held in London on 26–27 Aug. some 30 countries and all the former republics of Yugoslavia endorsed a plan to end the fighting in Croatia and Bosnia, install UN supervision of heavy weapons, recognize the borders of Bosnia and Herzegovina and return refugees. At a further conference at Geneva on 30 Sept. the Croatian and Yugoslav presidents agreed to make efforts to bring about a peaceful solution in Bosnia, but fighting continued. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all UN sanctions were lifted in Nov. 1995.

In July 1997 Slobodan Milošević switched his power base to become president of federal Yugoslavia. The former Yugoslav foreign minister, Milan Milutinović, succeeded Milošević as Serbian President. Meanwhile, in Montenegro, the pro-western Milo Đukanović succeeded a pro-Milošević president.

Following the break-up of Yugoslavia, in March 1998 a coalition government was formed between the Socialist Party of Slobodan Milošević and the ultra-nationalist Serb Radical Party.

## Kosovo

In 1998 unrest in Kosovo, with its largely Albanian population, led to a bid for outright independence. Violence flared resulting in what a US official described as 'horrendous human rights

violations', including massive shelling of civilians and destruction of villages. A US-mediated agreement to allow negotiations to proceed during an interim period of autonomy allowed for food and medicine to be delivered to refugees; American support for a degree of autonomy (short of independence), accepted in principle by President Milošević, lifted the immediate threat of NATO air strikes. Further outbreaks of violence in early 1999 were followed by the departure of the 800-strong team of international 'verifiers' of the fragile peace. Peace talks in Paris broke down without a settlement though subsequently Albanian freedom fighters accepted terms allowing them broad autonomy. The sticking point on the Serbian side was the international insistence on having 28,000 NATO-led peacemakers in Kosovo to keep apart the warring factions. Meanwhile, the scale of Serbian repression in Kosovo persuaded the NATO allies to take direct action. On the night of 24 March 1999 NATO aircraft began a bombing campaign against Yugoslavian military targets. Further Serbian provocation in Kosovo caused hundreds of thousands of ethnic Albanians to seek refuge in neighbouring countries. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo.

When the general election held on 24 Sept. 2000 resulted in a victory for the opposition democratic leader Vojislav Koštunica, President Milošević demanded a second round of voting. A strike by miners at the Kolubara coal mine on 29 Sept. was followed by a mass demonstration in Belgrade on 5 Oct. when the parliament building was set on fire and on 6 Oct. Slobodan Milošević accepted defeat. He was arrested on 1 April 2001 after a 30-hour confrontation with the authorities. On 28 June he was handed over to the United Nations War Crimes Tribunal in the Hague to face charges of crimes against humanity. Prime Minister Zoran Žižić resigned the next day. On 12 Feb. 2002 the trial of Slobodan Milošević, on charges of genocide and war crimes in the Balkans over a period of nearly ten years, began at the International Criminal Tribunal in The Hague. Milošević defended himself and questioned the legitimacy of the court but died in March 2006 before his trial had ended.

On 14 March 2002 Montenegro and Serbia agreed to remain part of a single entity called Serbia and Montenegro, thus relegating the name Yugoslavia to history. The agreement was ratified in principle by the federal parliament and the republican parliaments of Serbia and Montenegro on 9 April 2002. The new union came into force on 4 Feb. 2003. Most powers in this loose confederation were divided between the two republics. After 4 Feb. 2006 Serbia and Montenegro had the right to vote for independence. Following a referendum held on 21 May 2006, Montenegro declared independence on 3 June and was recognized as such by Serbia on 15 June. Montenegro became the 192nd member state of the United Nations on 28 June 2006.

### TERRITORY AND POPULATION

Montenegro is a mountainous country which opens to the Adriatic in the southwest. It is bounded in the west by Croatia, northwest by Bosnia and Herzegovina, in the northeast by Serbia and in the southeast by Albania. The capital is Podgorica (2011 provisional census population, 151,312), although some capital functions have been transferred to Cetinje, the historic capital of the former kingdom of Montenegro. Its area is 13,812 sq. km. Population at the 2011 census was 620,029; population density per sq. km, 44.9. The main ethnic groups in 2011 were: Montenegrins (44.98%); Serbs (28.73%); Bosniaks (8.65%); Albanians (4.91%).

The UN gives a projected population for 2015 of 634,000.

The official language is the Serbian language of the Iekavian dialect. The Roman and Cyrillic alphabets have equal status.

### SOCIAL STATISTICS

Statistics for calendar years:

	Live births	Deaths	Marriages	Divorces
2005	7,352	5,839	3,291	499
2006	7,531	5,968	3,462	470
2007	7,834	5,979	4,005	453
2008	8,258	5,708	3,445	460

Life expectancy, 2007, 71.6 years for men and 76.5 years for women. Infant mortality per 1,000 births (2005), 9.

### CLIMATE

Mostly a central European type of climate, with cold winters and hot summers. Podgorica, Jan. 2.8°C, July 26.5°C. Annual rainfall 1,499 mm.

### CONSTITUTION AND GOVERNMENT

The *President* is elected by direct vote to serve a five-year term. There is an 81-member single-chamber *National Assembly*, elected through a party list proportional representation system to serve four-year terms. The *Prime Minister* is nominated by the President and has to be approved by the National Assembly.

A referendum was held on 29 Feb.–1 March 1992 to determine whether Montenegro should remain within a common state, Yugoslavia, as a sovereign republic. The electorate was 412,000, of whom 66% were in favour. The then president, Milo Đukanović, had pledged a referendum on independence in May 2002, but this was postponed with the announcement of the creation of the new entity of Serbia and Montenegro, which came into being on 4 Feb. 2003.

Montenegro held a referendum on 21 May 2006 in which 55.5% voted for independence. The margin required for victory was 55.0%. Turnout was 86.6%.

### RECENT ELECTIONS

In presidential elections held on 6 April 2008 incumbent president Filip Vujanović won 51.9% of the vote against Andrija Mandić with 19.5% and Nebojša Medojević with 16.6%. Turnout was 68.2%.

Following Milo Đukanović's resignation on 21 Dec. 2010, the ruling Democratic Party of Socialists unanimously nominated Igor Lukšić as the new prime minister. Parliament approved Lukšić by 48 out of 81 votes.

Parliamentary elections were held on 29 March 2009. The ruling Coalition for European Montenegro (consisting of the Democratic Party of Socialists of Montenegro/DPS CG, the Social Democratic Party of Montenegro, the Croatian Civic Initiative and the Bosniak Party) won 48 of 81 seats (51.9% of votes cast), the Socialist People's Party 16 (16.8%), New Serb Democracy 8 (9.2%), the Movement for Change 5 (6.0%), New Democratic Power 1 (1.9%), the Democratic Union of Albanians 1 (1.5%), the Albanian List 1 (0.9%) and the Albanian Coalition-Perspective 1 (0.8%). Turnout was 66.2%.

### CURRENT GOVERNMENT

*President:* Filip Vujanović; b. 1954 (DPS CG; sworn in 22 May 2003 and re-elected in April 2008).

In March 2012 the cabinet comprised:

*Prime Minister:* Igor Lukšić; b. 1976 (DPS CG; sworn in 29 Dec. 2010).

*Deputy Prime Minister for Political System, Foreign and Interior Policy and Minister of Justice:* Duško Marković. *Deputy Prime Minister for Economic Policy and Financial System and Minister of Information Society and Telecommunications:* Vujica Lazović.

*Minister of Agriculture:* Tarzan Milošević. *Culture, Sports and Media:* Branislav Mićunović. *Defence:* Milica Pejanović Đurišić. *Economy:* Vladimir Kavarić. *Education:* Slavoljub Stijepović. *Finance:* Milorad Katnić. *Foreign Affairs and European*

*Integration:* Milan Roćen. *Health:* Miodrag Radunović. *Human and Minority Rights:* Ferhat Dinoša. *Interior:* Ivan Brajović. *Labour:* Suad Numanović. *Science:* Tanja Vlahojvić. *Sustainable Development and Tourism:* Predrag Sekulić. *Transport and Maritime Affairs:* Andrija Lompar. *Minister without Portfolio:* Rafet Husović.

*Government Website:* <http://www.gov.me>

## CURRENT LEADERS

### Filip Vujanović

#### Position

President

#### Introduction

Filip Vujanović became Montenegro's president following independence in June 2006. He had served as president of Montenegro within the confederation of Serbia and Montenegro for the previous three years. Economic and structural reforms have included a programme of privatization, while closer links have been pursued with the European Union including an official application for EU membership.

#### Early Life

Born on 1 Sept. 1954 in Belgrade, then the capital of Yugoslavia, Filip Vujanović was educated in Nikšić and studied law at the University of Belgrade. After graduating in 1978 he worked at a municipal court and then as an official at the Belgrade District Court. In 1981 he moved south to Podgorica.

Following a period as secretary to the Podgorica district court, Vujanović worked as an attorney from 1981–93. Following the break-up of the Yugoslav Federation, Serbia and Montenegro formed the Federal Republic of Yugoslavia in 1992. In March 1993 the Montenegrin Prime Minister Đukanović appointed Vujanović as minister for justice. He served for two years, becoming a close ally of Đukanović, who adopted a pro-independence and pro-European stance. In May 1995 Vujanović took over as minister of the interior. When the ruling Democratic Party of Socialists (DPS CG) split into two factions in 1996, Vujanović backed Đukanović against his rival Momir Bulatović, a former ally of Serbian leader Slobodan Milošević.

In 1997 Đukanović was elected president of Montenegro and in Feb. 1998 Vujanović took up the premiership. While supporting Montenegro's independence campaign, he continued to maintain good relations with Serbia. He offered his resignation in April 2002 during a constitutional crisis over ratification of a looser federation between Serbia and Montenegro.

Following legislative elections in Oct. 2002 Vujanović was appointed parliamentary speaker and stood as the DPS CG candidate for Montenegro's presidency. He won the first round with 86% of the vote in Dec. 2002 and a second round with 81% in Feb. 2003 but the result was declared invalid as less than 50% of the electorate voted. Parliament subsequently abolished the minimum turnout rule and Vujanović became president in March 2003 with 63% of the vote.

#### Career in Office

Vujanović identified Montenegro's accession to the EU and entry into NATO's Partnership for Peace programme as priorities. To these ends, he oversaw the privatization of key parts of the economy, including the banking sector and Kombinat Aluminijuma Podgorica, the country's largest industrial company. He also introduced social and judicial reforms and made a start in combating organized crime. A long-time advocate of cross-border co-operation, he opened talks on joint commercial ventures with neighbouring states including Croatia, Slovenia and Serbia.

On 3 June 2006, following a referendum, Montenegro declared independence and on 28 June 2006 became a member of the United Nations. The country has since joined the World Bank

and International Monetary Fund, and in Dec. 2008 submitted a formal application to join the EU (achieving candidate status in Dec. 2010). Its decision in Jan. 2010 to establish diplomatic relations with Kosovo, which had unilaterally declared itself independent from Serbia in 2008, has aggravated tensions with the Serbian government.

Vujanović was re-elected for a further five-year term in the presidential election of April 2008. In Dec. 2010 he nominated Igor Lukšić as the new prime minister following the resignation of Đukanović.

## DEFENCE

The all-professional Military of Montenegro was formed from part of the Armed Forces of Serbia and Montenegro when the two countries became independent in 2006.

Defence expenditure in 2008 totalled US\$71m. (US\$105 per capita), representing 2.3% of GDP.

### Army

Strength (2007) 2,500. There are paramilitary forces numbering around 10,100.

### Navy

Strength (2007) 3,300 including 900 marines.

## ECONOMY

In 2006 agriculture accounted for 10.0% of GDP, industry 17.6% and services 72.4%.

### Overview

From its independence in 2006 up to the global crisis of 2008–09, Montenegro's economy experienced strong growth and expansion. Real GDP growth exceeded 10% in 2007, with tourism bringing large inflows of FDI and generating strong construction activity. The contribution of tourism to GDP rose from 15% in 2004 to 21% in 2007. In Dec. 2008 Montenegro applied to join the European Union.

The global economic crisis prompted a decline in tourism and a contraction in GDP, although tourism picked up in 2010, while metal production also bounced back. After contracting for almost two years, GDP began to grow in the second half of 2010 but was still much below pre-crisis levels by the end of the year. The construction sector remains depressed. Structural reforms, including improving labour participation and business environment, remain a top policy priority.

### Currency

On 2 Nov. 1999 the pro-Western government decided to make the Deutsche Mark legal tender alongside the dinar. Subsequently it was made the sole official currency, and consequently the euro (EUR) became the currency of Montenegro on 1 Jan. 2002. Inflation was 8.5% in 2008 and 3.4% in 2009.

### Budget

In 2006 total revenue was €582,258m. and total expenditure was €579,780m.

VAT is 17% (reduced rate, 7%).

### Performance

Total GDP in 2010 was US\$4.0bn. The economy contracted by 5.7% in 2009 but there was real GDP growth of 1.1% in 2010.

### Banking and Finance

The Central Bank of Montenegro (*Governor*, Radoje Žugić) was established in Nov. 2000. Montenegro has 11 commercial banks.

## ENERGY AND NATURAL RESOURCES

### Electricity

Electricity production in 2006 was 2.95bn. kWh.

**Minerals**

Lignite production in 2006 totalled 1,502,000 tonnes; bauxite production was 659,370 tonnes.

**Agriculture**

In 2004 the cultivated area was 188,766 ha. Yields (2004, in 1,000 tonnes): potatoes, 117; grapes, 43; maize, 10; oranges and tangerines, 7; plums, 6; wheat, 3. Livestock (15 Jan. 2005, 1,000 head): poultry, 800; sheep, 254; cattle, 169; pigs, 27.

**Forestry**

Timber cut in 2007: 457,000 cu. metres.

**INDUSTRY**

Production (2006, in 1,000 tonnes): alumina, 237; steel bars, 137; bread, 24; steel ingots, 20; wheat flour, 17; cigarettes, 433m. units; beer, 51.7m. litres.

**Labour**

In 2004 there were 143,485 people employed, including 26,277 in manufacturing; 24,105 in wholesale and retail trade, repair of vehicles, personal and household goods; 14,146 in transport, storage and communications; 13,098 in education; 11,606 in health and social work; 9,563 in hotels and restaurants; and 9,337 in public administration and compulsory social security. In Oct. 2004 there were 49,266 employees and 31,328 self-employed persons. Average monthly salary in 2004 was €302.81. Unemployment was running at 27.7% in Oct. 2004.

**COMMUNICATIONS****Roads**

In 2004 there were 7,314 km of roads. Passenger-km in 2004 were 100.6m.; tonne-km of freight carried, 64.5m.

**Rail**

In 2009 there were 249 km of railway. 1.1m. passengers and 2m. tonnes of freight were carried in 2009.

**Shipping**

In Jan. 2009 there were seven ships of 300 GT or over registered, totalling 13,000 GT.

**SOCIAL INSTITUTIONS****Justice**

There is a Supreme Court, two High Courts, 15 Municipal Courts, two Commercial Courts, one Appellate Court and one Administrative Court. In 2005 the Supreme Court had 14 judges, the High Courts 40, the Municipal Courts 147, the Commercial Courts 24, the Appellate Court 9 and the Administrative Court 8.

**Education**

In 2004–05 there were: 82 pre-schools with 11,761 pupils and 673 teachers; 457 primary schools with 74,205 pupils and 4,796 teachers; and 47 secondary schools with 32,078 pupils and 2,245 teachers. A total of 11,011 students were enrolled at the University of Montenegro at the beginning of the 2004–05 academic year.

**Health**

In 2005 there were eight general hospitals with 1,743 beds. A total of 54,332 patients were admitted in 2005.

**RELIGION**

The Serbian Orthodox Church is the official church in Montenegro. The Montenegrin church was banned in 1922, but in Oct. 1993 a breakaway Montenegrin church was set up under its own patriarch.

**CULTURE****World Heritage Sites**

There are two sites on the UNESCO World Heritage List: the Natural and Culturo-Historical Region of Kotor (inscribed on the list in 1979); and Durmitor National Park (1980 and 2005).

**Press**

In 2006 there were four daily newspapers with a combined circulation of 55,000.

**Tourism**

There were 984,138 non-resident overnight tourist arrivals in 2007. European tourists accounted for 98% of the total.

**DIPLOMATIC REPRESENTATIVES**

Of Montenegro in the United Kingdom (11 Callcott Pl, London, W8 7SU)

*Ambassador:* Ljubiša Stanković.

Of the United Kingdom in Montenegro (Ulcinjaska 8, Gorica C, 81000 Podgorica)

*Ambassador:* Catherine Knight-Sands.

Of Montenegro in the USA (1610 New Hampshire Ave., Washington, D.C., 20009)

*Ambassador:* Srđan Darmanović.

Of the USA in Montenegro (Dzona Djeksona 2, 81000 Podgorica)

*Ambassador:* Sue K. Brown.

Of Montenegro to the United Nations

*Ambassador:* Milorad Šćepanović.

Of Montenegro to the European Union

*Ambassador:* Aleksandar Andrija Pejović.

## KEY HISTORICAL EVENTS

Neolithic settlements in western North Africa date from around 6000 BC. Semi-nomadic Berber clans established a foothold in the region at the end of the second millennium BC. Phoenician and Carthaginian merchants founded coastal settlements in northern Morocco from around 500 BC. In the following centuries Roman traders established bases, including Tangier and Volubilis. Roman influence increased after the fall of Carthage in 146 BC and endured until the 5th century AD, when the region was attacked by the Vandals in AD 429 and Byzantines in AD 533.

An Arab invasion of Morocco in 682 made Islam the dominant religion although several Jewish colonies remained. The first Arab rulers established an independent Kingdom in 788 under Idris I and held sway until around 900, when Morocco fragmented into Arab and Berber tribal states. Conflict ensued with the Fatimids of Tunisia and the Umayyids of Andalusia until 1062, when the Almoravids of Marrakesh established a kingdom that stretched from Spain to Senegal.

Portuguese forces captured the port of Ceuta in 1415 and subsequently took most other Moroccan coastal towns, except Melilla and Larache which fell to Spain. The threat from Christian Portugal and Spain spurred resistance among Islamic families, culminating in the rise of Ahmed I al-Mansur, whose Sharifian dynasty unified the country between 1579 and 1603. Moors and Jews expelled from Spain settled in Morocco during this time and the country flourished.

The second Sharifian dynasty emerged in 1660 and by 1700 Moroccan forces had regained control of most ports. During the 18th and early 19th centuries the North African (Barbary) coast

was notorious for piracy. The European powers vied to exploit Morocco's strategic position and resources as the century progressed, with French forces defeating Sultan Abd ar Rahman in 1844 and Spain invading in 1860.

As part of the Entente Cordiale, Britain recognized Morocco as a French sphere of influence and in 1904 Morocco was divided between France and Spain. In 1912 a Franco-Spanish agreement divided Morocco into four administrative areas: a French protectorate, the largest share of the territory, centred on Rabat; a Spanish protectorate with its capital at Tétouan; a Southern Protectorate of Morocco, administered as part of the Spanish Sahara; and the international zone of Tangier.

A revolt led by Abd al-Krim in the northern region of Rif in 1921 was crushed after five years. A nationalist movement gradually gained ground and an independence party, the Istiqlal, was formed during the Second World War. Facing growing disorder and nationalist revolts in its North African colonies, France relinquished control over Morocco in March 1956 and on 29 Oct. 1956 the international status of the Tangier Zone was abolished. Morocco became an independent kingdom on 18 Aug. 1957, with the Sultan taking the title Mohammed V.

Succeeding his father on 3 March 1961, King Hassan II tried to establish an elected House of Representatives but, following political unrest, he seized legislative and executive powers in June 1965. The country returned to partial democracy under a controversially amended constitution. Morocco annexed Western Sahara in 1975, which sparked a guerrilla war with Algerian-backed pro-independence forces (Polisario) that continued until 1991. The territory's status remains unresolved. Hassan II received plaudits for his work promoting peace in the Middle East but criticism for human rights abuses. Following his death in 1999 his son, Mohammed VI, introduced a more liberal economic and social regime but retains sweeping powers.

## TERRITORY AND POPULATION

Morocco is bounded by Algeria to the east and southeast, Mauritania to the south, the Atlantic Ocean to the northwest and the Mediterranean to the north. Excluding the Western Saharan territory claimed and retrieved since 1976 by Morocco, the area is 458,730 sq. km. The population at the 2004 census (including Western Sahara) was 29,891,708; density (including Western Sahara), 42.1 per sq. km. At the 2004 census Western Sahara had an area of 252,120 sq. km and a population of about 356,000. The Moroccan superficie is 710,850 sq. km. The population was 58.7% urban in 2005.

The UN gives a projected population for 2015 of 33-57m.

Morocco has 16 states (*wilaya't*) divided further into 71 prefectures and provincial units. Areas of the states and census populations in 2004:

State	Area in sq. km	Population
Chaouia-Ouardigha	16,760	1,655,660
Doukkala-Abda	13,285	1,984,039
Fès-Boulemane	19,795	1,573,055
Gharb-Chrarda-Béni Hssen	8,805	1,859,540
Grand Casablanca	1,615	3,631,061

<sup>1</sup>Laâyoune-Boujdour-Sakia El Hamra and Oued Eddahab-Lagouira correspond roughly to Western Sahara.

The chief cities (with populations in 1,000, 2004) are as follows:

Casablanca	2,934	Tangier	670	Safi	285
Rabat	1,623	Meknès	536	Mohammedia	189
Fez	947	Oujda	401	Khouribga	166
Marrakesh	823	Kénitra	359	Béni Mellal	163
Agadir	679	Tétouan	321		

The official language are Arabic, spoken by 65% of the population, and Berber (since July 2011). Berber languages, including Tachelhit (or Soussi), Tamazight and Tarafit (or Rifia), are spoken by about half the population. French (widely used for business), Spanish (in the north) and English are also spoken.

### SOCIAL STATISTICS

2008 estimates: births, 645,000; deaths, 184,000. Estimated rates, 2008 (per 1,000 population): birth, 20.4; death, 5.8. Annual population growth rate, 2000–08, 1.2%. Life expectancy at birth in 2007 was 68.8 years for males and 73.3 years for females. Infant mortality, 2005, 36 per 1,000 live births; fertility rate, 2008, 2.4 births per woman.

### CLIMATE

Morocco is dominated by the Mediterranean climate which is made temperate by the influence of the Atlantic Ocean in the northern and southern parts of the country. Central Morocco is continental while the south is desert. Rabat, Jan. 55°F (12.9°C), July 72°F (22.2°C). Annual rainfall 23" (564 mm). Agadir, Jan. 57°F (13.9°C), July 72°F (22.2°C). Annual rainfall 9" (224 mm). Casablanca, Jan. 54°F (12.2°C), July 72°F (22.2°C). Annual rainfall 16" (404 mm). Marrakesh, Jan. 52°F (11.1°C), July 84°F (28.9°C). Annual rainfall 10" (239 mm). Tangier, Jan. 53°F (11.7°C), July 72°F (22.2°C). Annual rainfall 36" (897 mm).

### CONSTITUTION AND GOVERNMENT

The ruling King is **Mohammed VI**, born on 21 Aug. 1963, married to Salma Bennani on 21 March 2002; succeeded on 23 July 1999, on the death of his father Hassan II, who reigned 1961–99. *Offspring*: Hassan, b. 8 May 2003; Khadija, b. 28 Feb. 2007. The King holds supreme civil and religious authority, the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. He resides usually at Rabat, but occasionally in one of the other traditional capitals, Fez (founded in 808), Marrakesh (founded in 1062), or at Skhirat.

In Feb. and March 2011, Morocco experienced popular protests echoing those occurring in other North African states. In response King Mohammed established a commission to bring about 'comprehensive constitutional reform'. It recommended that: the king select the prime minister from the party with the greatest parliamentary representation; the prime minister, not the king, be head of government and have the power to dissolve parliament; parliament have greater influence on civil rights, nationality issues and electoral law; women be guaranteed 'civic and social' equality with men; the Berber language become an official state language; and a reference to the king as 'sacred' be removed from the constitution. It also provides for the independence of the judiciary. On 1 July 2011 the reforms won 98.5% support in a referendum (turnout: 73.5%), though some opponents claimed electoral irregularities.

The new constitution came into effect on 29 July 2011, ahead of the parliamentary elections four months later. It replaced an

earlier constitution that was approved in March 1972 and amended several times. The Kingdom of Morocco is a constitutional monarchy. Parliament consists of a Chamber of Representatives composed of 395 deputies (up from 325 for the 2007 elections) directly elected for five-year terms. A referendum on 13 Sept. 1996 established a second Chamber of Counsellors, composed of 270 members serving nine-year terms, of whom 162 are elected by local councils, 81 by chambers of commerce and 27 by trade unions. One third are renewed every three years. The Chamber of Counsellors has power to initiate legislation, issue warnings of censure to the government and ultimately to force the government's resignation by a two-thirds majority vote.

An electoral code of March 1997 fixed voting at 20 and made enrolment on the electoral roll compulsory. In Dec. 2002 King Mohammed VI announced that the voting age was to be lowered from 20 to 18.

### National Anthem

'Manbit al Ahrah, mashriq al anwar' ('Fountain of freedom, source of light'); words by Ali Squalli Houssaini, tune by Leo Morgan.

### GOVERNMENT CHRONOLOGY

Kings since 1955.

1955–61	Mohammed V ibn Yusuf (sultan from 1955–57)
1961–99	Hassan II ibn Mohammed
1999–	Mohammed VI ibn al-Hasan

### RECENT ELECTIONS

Elections to the Chamber of Representatives took place on 25 Nov. 2011. The Islamist Parti de la Justice et du Développement (PJD/Party of Justice and Development) gained 107 seats of 395 seats; Parti de l'Indépendance/Istiqlal (PI/Independence Party) 60; Rassemblement National des Indépendants (RNI/National Rally of Independents) 52; Parti Authenticité et Modernité (PAM/ Authenticity and Modernity Party) 47; Union Socialiste des Forces Populaires (USFP/Socialist Union of Popular Forces) 39; Mouvement Populaire (MP/Popular Movement) 32; Union Constitutionnelle (UC/Constitutional Union) 23; Parti du Progrès et du Socialisme (PPS/Party of Progress and Socialism) 18; Parti Travailleiste (PT/Labour Party) 4. A further nine parties obtained fewer than two seats each. Turnout was 45.4%.

In indirect elections to the Chamber of Counsellors on 3 Oct. 2009 PAM gained 22 of 90 available seats, Istiqlal 17, MP 11, USFP 10 and RNI 9 with the remaining seats going to 11 other parties.

### CURRENT GOVERNMENT

In March 2012 the government comprised:

*Prime Minister*: Abdelilah Benkirane; b. 1954 (Party of Justice and Development; in office since 29 Nov. 2011).

*Minister of State*: Abdellah Baha.

*Minister for Interior*: Mohand Laenser. *Foreign Affairs and Co-operation*: Saad-Eddine El Othmani. *Justice and Freedoms*: Mustafa Ramid. *Endowments and Islamic Affairs*: Ahmed Toufiq. *Economy and Finance*: Nizar Baraka. *Housing, Town Planning and Urban Policy*: Nabil Benabdellah. *Agriculture and Marine Fisheries*: Aziz Akhenouch. *Education*: Mohamed El Ouafa. *Higher Education, Scientific Research and Executive Training*: Lahcen Daoudi. *Youth and Sports*: Mohamed Ouzzine. *Equipment and Transportation*: Aziz Rabbah. *Health*: El Hossein El Ouardi. *Communication and Government Spokesperson*: Mustapha El Khalfi. *Energy, Mines, Water and Environment*: Fouad Douiri. *Employment and Vocational Training*: Abdelouahed Souhail. *Industry, Trade and New Technologies*: Abdelkader Aâmara. *Tourism*: Lahcen Haddad. *Solidarity, Women, Family and Social Development*: Bassima Hakkaoui. *Culture*: Mohamed Amine Sbihi.

*Crafts:* Abdessamad Qaiouh. *Relations with Parliament and Civil Society:* Lahbib Choubani.

*Office of the Prime Minister (French and Arabic only):*  
<http://www.pm.gov.ma>

## CURRENT LEADERS

### Mohammed VI ibn al-Hasan

*Position*  
King

#### *Introduction*

Mohammed VI ibn al-Hasan was crowned King in July 1999 after the death of his father, King Hassan II. Less austere than his father, he pledged to improve Morocco's democratic institutions and encourage private investment in key economic sectors.

#### *Early Life*

King Mohammed VI was born on 21 Aug. 1963 in Rabat, Morocco. In 1985 he graduated from the College of Law in the Rabat Mohammed V University. In 1987 he took a degree in political science and in 1993 was awarded a law doctorate from the French University of Nice-Sophia Antipolis.

Mohammed undertook his first official royal duty aged 11 and by the time he was 20 he had led a Moroccan delegation to the Franco-African conference and negotiated with the Organization of African Unity (now the African Union) over the Western Sahara conflict.

Appointed head of the general staff of the Royal Armed Forces in 1985, he succeeded to the throne in 1999.

#### *Career in Office*

Mohammed voiced support for developing a market economy and urged increased private sector investment. However, economic liberalization did not significantly alleviate Morocco's widespread poverty or reduce unemployment. Political power remained concentrated in the monarchy until protests in early 2011, reflecting disaffection across much of the Arab world, prompted Mohammed to cede constitutional reforms in July that transferred some of the monarchy's powers to parliament and the prime minister. In line with the new constitution, Mohammed was obliged to choose Abdelilah Benkirane as his new premier following the Party of Justice and Development's victory in parliamentary elections in Nov.

In foreign policy, Mohammed has co-operated with the USA in its anti-terror initiatives since the Sept. 2001 attacks. Morocco has itself been targeted by terrorist violence, including co-ordinated suicide bombings in Casablanca in May 2003 and further incidents in 2007 and April 2011. Elsewhere, Mohammed has expressed support for Palestinian claims to their own independent state.

In 2002 the King came into conflict with Spain when Moroccan forces landed on the uninhabited island of Perejil (a Spanish possession since 1668) off the Moroccan coast. Spain launched a bloodless counter-assault before withdrawing its troops on the understanding that neither country would occupy the island. In Jan. 2006 Prime Minister Rodríguez Zapatero became the first Spanish leader in 25 years to make an official visit to the enclaves of Melilla and Ceuta. However, a subsequent visit to the territories by Spain's King Juan Carlos in Nov. 2007 was criticized by Mohammed, and tension arose again in Aug. 2010 following incidents near the Melilla border.

## DEFENCE

Compulsory national military service was abolished in 2006. Defence expenditure in 2008 totalled US\$2,977m. (US\$96 per capita), representing 3.5% of GDP.

## Army

The Army is deployed in two commands: Northern Zone and Southern Zone. There is also a Royal Guard of 1,500. Strength (2007), 175,000 (100,000 conscripts). There is also a Royal Gendarmerie of 20,000, an Auxiliary Force of 30,000 and reserves of 150,000.

## Navy

The Navy includes three frigates, 27 patrol and coastal combatants and four amphibious craft.

Personnel in 2007 numbered 7,800, including 1,500 marines. Bases are located at Casablanca, Agadir, Al Hoceima, Dakhla and Tangier.

## Air Force

Personnel strength (2007) about 13,000, with 89 combat capable aircraft, including F-5s and Mirage F-1s.

## ECONOMY

Agriculture accounted for 15.7% of GDP in 2006, industry 27.8% and services 56.5%.

### Overview

Morocco has achieved strong macroeconomic growth since 2001, thanks to diversification of the non-agricultural sector. The implementation of broad-based structural reforms has seen an increase in foreign direct investment, containment of inflation and a reduction in financial sector vulnerabilities. As a result, unemployment fell and the poverty rate shrank by 6.5% from 2000-08. Both the unemployment and poverty rates, however, remain around 9%.

Trade is focused on the EU, which in 2010 accounted for 59.3% of exports and 57.2% of imports. In March 2012 an agreement between the EU and Morocco came into force abolishing tariffs on a range of industrial goods as part of a wide-ranging free trade agreement. In the previous month the European parliament approved an agreement to cut tariffs on specified agricultural and fishery produce over a ten-year transitional period. However, instability within the eurozone in 2011, along with rising international food and oil prices, poses long-term challenges. In 2004 Morocco signed free trade agreements with the USA, Turkey, Egypt, Jordan and Tunisia.

### Currency

The unit of currency is the *dirham* (MAD) of 100 *centimes*, introduced in 1959. Foreign exchange reserves were US\$14,710m. in July 2005, gold reserves 708,000 troy oz and total money supply was DH353,598m. Inflation was 3.9% in 2008 and 1.0% in 2009.

### Budget

Revenues in 2007 totalled DH167,904m. and expenditures DH168,959m. The main revenue items were VAT (29.6%), corporate taxes (18.1%) and income tax (16.5%). Current expenditure accounted for 78.5% of total expenditures.

VAT is 20% (reduced rates, 14%, 10% and 7%).

### Performance

Real GDP growth was 4.9% in 2009 and 3.7% in 2010. Total GDP in 2010 was US\$91.2bn.

### Banking and Finance

The central bank is the Bank Al Maghrib (*Governor*, Abdellatif Jouahri) which had assets of DH161,873m. in Dec. 2004. There were 12 other banks in 2002 and three development banks, specializing respectively in industry, housing and agriculture.

There is a stock exchange in Casablanca.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.3 tonnes per capita.

**Electricity**

Installed capacity was 5.8m. kW in 2007. Production was 22.86bn. kWh (approximately 93% thermal) in 2007 and consumption per capita 843 kWh.

**Oil and Gas**

Natural gas reserves in 2007 were 1.6bn. cu. metres; output (2007), 65m. cu. metres.

**Minerals**

The principal mineral exploited is phosphate (Morocco has the largest reserves in the world), the output of which was 27.24m. tonnes in 2006. Other minerals (in tonnes, 2006) are: barytine, 628,400; salt, 506,700; zinc, 148,700; lead, 59,100; iron, 35,500; copper, 17,800; manganese, 4,815; silver, 246.

**Agriculture**

Agricultural production is subject to drought; about 1.35m. ha. were irrigated in 2002. 85% of farmland is individually owned. Only 1% of farms are over 50 ha.; most are under 3 ha. There were 8.40m. ha. of arable land in 2002 and 887,000 ha. of permanent crops. Main land usage, 2003 (in 1,000 ha.): wheat, 2,989; barley, 2,267; maize, 247. There were 43,226 tractors in 2001 and 3,763 harvester-threshers. Production in 2003 (in 1,000 tonnes): wheat, 5,147; sugar beets, 3,428; barley, 2,620; potatoes, 1,435; tomatoes, 1,004. Livestock, 2002: sheep, 16.34m.; goats, 5.09m.; cattle, 2.67m.; asses, 982,000; chickens, 137m. Livestock products in 2003 included (in 1,000 tonnes): milk, 1,311; meat, 598.

**Forestry**

Forests covered 4.36m. ha. in 2005, or 9.8% of the total land area. Timber production was 1.04m. cu. metres in 2007.

**Fisheries**

Total catch in 2005 was 932,704 tonnes (sea fish, 931,814 tonnes). Morocco's annual catch is the highest of any African country.

**INDUSTRY**

In 2006 industry contributed 27.8% of GDP, with manufacturing accounting for 16.5%. Production in 1,000 tonnes (2004 unless otherwise indicated): cement, 9,828; residual fuel oil, 2,264; distillate fuel oil, 2,254; sugar (2005), 1,059; petrol, 257; paper and paperboard (2005 estimate), 129; olive oil (2004–05), 50.

**Labour**

Of 9,927,728 persons in employment in 2006, 43.3% were engaged in agriculture, fishing and forestry, 12.4% in commerce, 12.3% in industry (including handicrafts), 8.0% in construction and public works, 5.4% in general administration and public services, 4.0% in transport and communication and 14.5% in other services. The unemployment rate in 2006 was 9.7%. In Nov. 2006 the minimum hourly wage for non-agricultural workers was DH9.66. The minimum wage for agricultural workers is set at DH50 per day.

**INTERNATIONAL TRADE**

In 1989 Morocco signed a treaty of economic co-operation with the four other Maghreb countries: Algeria, Libya, Mauritania and Tunisia. Morocco is an active participant in the Euromed process, which aims to create a Euro-Mediterranean Free Trade Area. Foreign debt was US\$16,846m. in 2005.

**Imports and Exports**

Imports (f.o.b.) in 2006 were US\$21,332m. and exports (f.o.b.) US\$11,916m. Imports in 2006 included: machinery and transport equipment, 27.7%; mineral fuels, 21.6%; chemicals and related products, 9.7%; food and live animals, 7.0%. Exports included: apparel and clothing accessories, 25.8%; machinery and transport equipment, 17.2%; chemicals and related products, 13.4%; fish and seafood, 9.3%. Main import suppliers, 2006: France, 16.5%; Spain, 11.6%; Saudi Arabia, 6.8%; Italy, 6.4%. Main export markets, 2006: France, 28.4%; Spain, 20.8%; UK, 6.0%; Italy, 4.9%.

**COMMUNICATIONS****Roads**

In 2007 there were 57,799 km of classified roads, including 813 km of motorways and 11,251 km of main roads. There are motorways linking Rabat to Casablanca, Fez and Tangier, and Casablanca to Marrakesh and El Jadida. In 2007 freight transport totalled 697m. tonne-km. In 2007 there were 1,644,500 passenger cars in use, 525,300 lorries and vans and 22,800 motorcycles and mopeds. There were 58,924 road accidents in 2007 (3,838 fatalities).

**Rail**

In 2005 there were 1,907 km of railways, of which 1,003 km were electrified. Passenger-km travelled in 2009 came to 4.19bn. and freight tonne-km to 4.11bn. In 2003 the construction of two 38 km-long rail tunnels under the Straits of Gibraltar was agreed with Spain although there are ongoing talks as to the project's feasibility.

**Civil Aviation**

The national carrier is Royal Air Maroc. The major international airport is Mohammed V at Casablanca; there are eight other airports. Casablanca handled 3,457,209 passengers in 2001 (2,612,998 on international flights) and 41,140 tonnes of freight; Marrakesh (Menara) handled 1,371,851 passengers and 2,471 tonnes of freight and Agadir (Al Massira) 1,052,181 passengers and 2,351 tonnes of freight. In July 1997 Morocco launched its first private air company, Regional Air Lines, to serve the major regions of the kingdom, in addition to southern Spain and the Canary Islands. In 2005 scheduled airline traffic of Moroccan-based carriers flew 70.3m. km, carrying 4,423,100 passengers.

**Shipping**

The busiest ports are Casablanca (which handled 26,572,000 tonnes of foreign cargo in 2008), Mohammedia, Nador, Tanger Med and Tangier. In Jan. 2009 there were 37 ships of 300 GT or over registered, totalling 341,000 GT.

**Telecommunications**

In 2008 there were 2,991,200 main (fixed) telephone lines; mobile phone subscribers numbered 22,815,700 in 2008 (72.2 per 100 persons). French media group Vivendi Universal bought a 35% stake in the state-run operator Maroc Telecom in 2000. It increased its holding to 51% in Jan. 2005 and to 53% in Oct. 2007. There were 920,000 PCs in use in 2006 and 10,442,500 internet users in 2008.

**SOCIAL INSTITUTIONS****Justice**

The legal system is based on French and Islamic law codes. There are a Supreme Court, 21 courts of appeal, 65 courts of first instance, 196 centres with resident judges and 706 communal jurisdictions for petty offences.

The population in penal institutions in Dec. 2006 was 53,580 (167 per 100,000 of national population). On ascending to the throne in July 1999, King Mohammed VI pardoned and ordered the release of 7,988 prisoners and reduced the terms of 38,224 others.

**Education**

The adult literacy rate in 2009 was 56.1% (68.9% among males and 43.9% among females). Education in Berber languages has been permitted since 1994; Berber languages were officially added to the syllabus in 2003. Education is compulsory from the age of six to 14 but is expected to be extended to 15 by 2015. In 2008–09 pre-primary schools had an estimated 33,000 teachers for 722,000 children and there were 145,000 teachers at primary schools for 3,851,000 pupils. In 2006–07 there were 2,173,000 pupils in secondary schools. There were 20,000 teaching staff at universities

for 419,000 students in 2008–09. There is an English-language university at Ifrane.

In 2008 public expenditure on education came to 5.6% of GDP.

### Health

In 2006 there were 18,269 physicians, 3,473 dentists, 27,658 paramedical personnel and 8,002 pharmacists. There were 133 public hospitals in 2006 with about 27,000 beds, a provision of 87 beds per 100,000 inhabitants.

### RELIGION

Islam is the established state religion. 98% of the population are Sunni Muslims of the Malekite school and 0.2% are Christians, mainly Roman Catholic, and there is a small Jewish community.

### CULTURE

#### World Heritage Sites

Morocco has eight sites on the UNESCO World Heritage List: the Medina of Fez (inscribed on the list in 1981); the Medina of Marrakesh (1985); the Ksar of Ait-Ben-Haddou (1987); the Historic City of Meknès (1996); the Archaeological Site of Volubilis (1997 and 2008); the Medina of Tétouan (1997); the Medina of Essaouira/Magador (2001); and the Portuguese City of Mazagan, now part of the city of El Jadida (2004).

#### Press

In 2008 there were 33 paid-for daily newspapers. The leading dailies are the Arabic-language *Al-Massae*, *Assabah* and *Al-Ahdath al-Maghrebia* and the French-language *Le Matin du Sahara et du Maghreb*.

#### Tourism

There were 5,843,000 foreign tourists in 2005, spending US\$5.4bn. The tourism sector employs some 600,000 people, equivalent to 5.8% of the workforce.

### DIPLOMATIC REPRESENTATIVES

Of Morocco in the United Kingdom (49 Queen's Gate Gdns, London, SW7 5NE)

*Ambassador*: HH Princess Lalla Joumala Alaoui.

Of the United Kingdom in Morocco (28 avenue S.A.R. Sidi Mohammed, Souissi, Rabat)

*Ambassador*: Timothy Morris.

Of Morocco in the USA (1601 21st St., NW, Washington, D.C., 20009)

*Ambassador*: Mohamed Rachad Bouhhal.

Of the USA in Morocco (2 Ave. de Mohamed el Fassi, Rabat)

*Ambassador*: Samuel L. Caplan.

Of Morocco to the United Nations

*Ambassador*: Mohammed Loulichki.

Of Morocco to the European Union

*Ambassador*: Menouar Alem.

## Western Sahara

### GENERAL DETAILS

The Western Sahara was designated by the United Nations in 1975, its borders having been marked as a result of agreements made between France, Spain and Morocco in 1900, 1904 and 1912. Sovereignty of the territory is in dispute between Morocco and the Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which formally proclaimed a government-in-exile of the Sahrawi Arab Democratic Republic (SADR) in Feb. 1976. According to a UN Security Council resolution adopted in July 2003, Western Sahara should be a semi-autonomous region of Morocco for five years. There would then be a referendum to decide whether it should remain part of Morocco or become a separate state. However, the Moroccan government rejected the plan.

Area 252,120 sq. km (97,346 sq. miles). Around 356,000 inhabitants (2004 estimate) are within Moroccan jurisdiction. Another estimated 196,000 Sahrawis live in refugee camps around Tindouf in southwest Algeria. The main towns are El-Aaiún (Laâyoune), the capital (183,691 inhabitants in 2004), Dakhla and Es-Semara.

Life expectancy at birth (1997 est.) male, 46.7 years; female, 50.0 years. Birth rate (1997 est.) per 1,000 population: 46.1; death rate: 17.5. The UN gives a projected population for 2015 of 624,000.

The population is Arabic-speaking, and almost entirely Sunni Muslim.

*President*: Mohammed Abdelaziz.

*Prime Minister*: Abdelkader Taleb Oumar.

Rich phosphate deposits were discovered in 1963 at Bu Craa. Morocco holds 100% of the shares of the former Spanish state-controlled company Phosboucraa. Production reached 5.6m. tonnes in 1975, but exploitation has been severely reduced by guerrilla activity. After a nearly complete collapse, production and transportation of phosphate resumed in 1978, ceased again, and then resumed in 1982. Installed electrical capacity was an estimated 58,000 kW in 2007, with production in 2007 of approximately 90m. kWh. Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita. There are about 6,100 km of motorable tracks, but only about 500 km of paved roads. There are airports at El-Aaiún and Dakhla. As most of the land is desert, less than 19% is in agricultural use, with about 2,000 tonnes of grain produced annually. In 1994 there were 100 physicians, equivalent to one per 2,504 inhabitants.

## KEY HISTORICAL EVENTS

Mozambique was at first ruled as part of Portuguese India but a separate administration was created in 1752. Following a decade of guerrilla activity, independence was achieved on 25 June 1975. A one-party state dominated by the Liberation Front of Mozambique (FRELIMO) was set up but armed insurgency led by the Mozambican National Resistance (RENAMO) continued until 4 Oct. 1992. The peace treaty provided for all weapons to be handed over to the UN and all armed groups to be disbanded within six months. In 1994 the country held its first multi-party elections. In early 2000 some 700 people died in the floods that made thousands homeless.

## TERRITORY AND POPULATION

Mozambique is bounded east by the Indian ocean, south by South Africa, southwest by Swaziland, west by South Africa and Zimbabwe and north by Zambia, Malawi and Tanzania. It has an area of 799,380 sq. km (308,642 sq. miles) and a population,

according to the 2007 census, of 20,226,296 (10,505,533 females), giving a density of 25.3 per sq. km.

The UN gives a projected population for 2015 of 26-16m.

In 2005, 65.5% of the population were rural. The areas, populations and capitals of the provinces are:

Province	Sq. km	2007 census	Capital
Cabo Delgado	82,625	1,605,649	Pemba
Gaza	75,709	1,226,272	Xai-Xai
Inhambane	68,615	1,252,479	Inhambane
Manica	61,661	1,412,029	Chimoio
City of Maputo	300	1,094,315	
Province of Maputo	26,058	1,205,553	Maputo
Nampula	81,606	3,985,285	Nampula
Niassa	129,056	1,169,347	Lichinga
Sofala	68,018	1,642,636	Beira
Tete	100,724	1,783,967	Tete
Zambézia	105,008	3,848,274	Quelimane

The capital is Maputo (2007 provisional population, 1,099,102). Other large cities (with 2007 provisional populations) are Matola (675,422), Nampula (477,900) and Beira (436,240).

The main ethnolinguistic groups are the Makua/Lomwe (52% of the population), the Tsonga/Ronga (24%), the Nyanja/Sena (12%) and Shona (6%).

Portuguese remains the official language, but vernaculars are widely spoken throughout the country. English is also widely spoken.

## SOCIAL STATISTICS

2008 estimates: births, 877,000; deaths, 357,000. Estimated rates per 1,000 population, 2008: births, 39.2; deaths, 15.9. Infant mortality per 1,000 live births, 2005, 100. Life expectancy at birth, 2007, was 46.9 years for males and 48.7 years for females. Annual population growth rate, 2000-08, 2.6%; fertility rate, 2008, 5.1 births per woman.

## CLIMATE

A humid tropical climate, with a dry season from June to Sept. In general, temperatures and rainfall decrease from north to south. Maputo, Jan. 78°F (25.6°C), July 65°F (18.3°C). Annual rainfall 30" (760 mm). Beira, Jan. 82°F (27.8°C), July 69°F (20.6°C). Annual rainfall 60" (1,522 mm).

## CONSTITUTION AND GOVERNMENT

On 2 Nov. 1990 the People's Assembly unanimously voted in favour of a new constitution, which came into force on 30 Nov. This changed the name of the state to 'Republic of Mozambique', legalized opposition parties, provided for universal secret elections and introduced a bill of rights including the right to strike, press freedoms and *habeas corpus*. The head of state is the *President*, directly elected for a five-year term. Parliament is a 250-member *Assembly of the Republic*, elected for a five-year term by proportional representation.

## National Anthem

'Patria Amada' ('Beloved Motherland'); words and tune by J. Sigaulane Chemane.

## RECENT ELECTIONS

In the parliamentary elections of 28 Oct. 2009 the Liberation Front of Mozambique (FRELIMO) won 191 of the 250 seats with 74.7% of the vote, the Mozambican National Resistance (RENAMO) 51 with 17.7% and the Democratic Movement of Mozambique 8 with 3.9%.

In the presidential election, also held on 28 Oct. 2009, incumbent Armando Guebuza of FRELIMO took 75.0% of the vote against 16.4% for RENAMO's Afonso Marceta Macacho Dhlakama and 8.6% for Daviz Simango of the Democratic Movement of Mozambique. Turnout was 44.6%.

### CURRENT GOVERNMENT

*President:* Armando Guebuza; b. 1943 (FRELIMO; sworn in 2 Feb. 2005 and re-elected in Oct. 2009).

In March 2012 the government comprised:

*Prime Minister:* Aires Bonifácio Ali; b. 1955 (took office on 16 Jan. 2010).

*Minister of Agriculture:* José Condungua António Pacheco. *Culture:* Armando Artur João. *Defence:* Filipe Jacinto Nhussi. *Development and Planning:* Aiuba Cuereneia. *Education:* Zeferino Martins. *Energy:* Salvador Namburete. *Environmental Action Co-ordinator:* Alcinda Abreu. *Finance:* Manuel Chang. *Fisheries:* Victor Borges. *Foreign Affairs and Co-operation:* Oldemiro Balói. *Health:* Alexandre Lourenço Jaime Manguele. *Industry and Commerce:* Armando Inroga. *Interior:* Alberto Ricardo Mondlane. *Justice:* Maria Benvinda Levi. *Labour:* Helena Taípo. *Mineral Resources:* Esperança Bias. *Public Service:* Vitória Dias Diogo. *Public Works and Housing:* Cadmiel Muthemba. *Science and Technology:* Venâncio Massingue. *State Administration:* Caremelita Namashalua. *Tourism:* Fernando Sumbana. *Transport and Communications:* Paulo Zucula. *Veterans' Affairs:* Mateus Óscar Kida. *Women's and Social Affairs:* Iolanda Cintura. *Youth and Sport:* Pedrito Caetano. *Minister of Civilian Affairs (President's Office):* António Correia Sumbana. *Minister of Parliamentary, Municipal and Provincial Affairs (President's Office):* Adelaide Amurane. *Minister of Social Affairs (President's Office):* Feliciano Salomão Gundana.

*Government Website (Portuguese only):*

### CURRENT LEADERS

#### Armando Guebuza

##### Position

President

##### Introduction

Armando Guebuza, a veteran of Mozambique's fight for independence and one of the nation's wealthiest businessmen, was chosen as the ruling party's candidate for the 2004 presidential elections. Having won a large majority, he took office in Feb. 2005 and was re-elected for a second term in Oct. 2009.

##### Early Life

Armando Emilio Guebuza was born on 20 Jan. 1943 in Murrupula, in the northern province of Nampula. Politically active from an early age, he was elected in 1963 as president of the Mozambican Centre of African Students, a group created by Eduardo Mondlane, then the leader of Mozambique's fight for independence from Portugal. Later that year Guebuza joined the Liberation Front of Mozambique (FRELIMO) and in 1965 was elected to the organization's central and executive committees. Having undergone military training in Tanzania, Guebuza was involved in guerrilla fighting against the Portuguese administration in northern Mozambique. Following Mondlane's assassination in 1969, FRELIMO was led by Uria Simango and then Samora Machel. Under Machel it grew to include over 7,000 guerrillas and by the early 1970s had control over much of northern and central Mozambique. Guebuza became a general and was also an inspector of the schools run by FRELIMO.

When Marcello Caetano was overthrown in a military coup in Portugal on 25 April 1974, independence was assured for Mozambique. Following the signing of the Lusaka Agreements later in 1974, Guebuza was appointed to the transitional

government that led the country to full independence in June 1975. He then served as minister of the interior in the single-party Marxist government led by President Machel. Guebuza was responsible for implementing the notorious '20-24' decree, which gave Portuguese settlers 24 hours to leave the country, carrying a maximum of 20 kg of luggage. He went on to serve as vice minister of defence in 1980, against a backdrop of warfare with the Mozambican National Resistance (RENAMO), which was backed by the apartheid government in South Africa. While Guebuza was again minister of the interior (1983-85) he was heavily identified with the forcible resettlement of unemployed residents of Maputo and Beira to work-camps in the isolated northern province of Niassa.

Joaquim Chissano became president in 1986, following Machel's death in an aircraft crash, and Guebuza was appointed minister of transport. In 1990 he headed the FRELIMO government's delegation to negotiations with RENAMO, leading to the signing of the Rome Peace Agreement in Oct. 1992. Having formally renounced Marxism in 1989, the government set about developing a market-oriented economy with Guebuza spearheading many of the reforms. He developed business interests in many sectors, including brewing, investment banking and shipping. In the country's first multi-party elections in 1994, won by FRELIMO, Guebuza was elected head of its parliamentary group. He retained that position in the elections of 1999, when Joaquim Chissano again led FRELIMO to victory.

Chissano announced that he would stand down at the 2004 elections. During FRELIMO's national congress in 2002, Guebuza was elected the party's secretary-general and presidential candidate. His uncompromising nationalist stance and promise to continue the economic reforms of his predecessor won him a large majority in the presidential polling in Dec. 2004 (with 63.7% of the vote), although RENAMO alleged electoral fraud. In parliamentary elections at the same time FRELIMO retained its majority in the National Assembly.

##### Career in Office

Guebuza was sworn in as president on 2 Feb. 2005, pledging to fight poverty, tackle corruption and seek further foreign investment to build infrastructure. In mid-2005 a trade and investment agreement was signed with the USA, whose officials cited Mozambique as 'a positive model because of its impressive track record on democracy, political stability, economic growth, openness to foreign direct investment and expanding exports'. In July 2006 the World Bank cancelled most of the country's debt under a scheme backed by the major industrialized nations.

Guebuza and FRELIMO increased their respective vote shares in the presidential and parliamentary elections in Oct. 2009, although RENAMO again disputed the results. In Sept. 2010 there were riots in Maputo and other cities over food price rises and several people were killed as police fired on protesters.

### DEFENCE

The President of the Republic is C.-in-C. of the armed forces. Defence expenditure totalled US\$76m. in 2008 (US\$4 per capita), representing 0.8% of GDP.

#### Army

Personnel numbered around 9-10,000 in 2007.

#### Navy

Naval personnel in 2007 were believed to total 200.

#### Air Force

Personnel (2007) 1,000 (including air defence units). There were four attack helicopters although their serviceability was in doubt but no combat capable aircraft.

## ECONOMY

Agriculture accounted for 27.6% of GDP in 2006, industry 26.6% and services 45.8%.

Formerly very heavily dependent on foreign assistance, in 2004 official aid made up only 12% of GDP.

### Overview

Following the end of civil war in 1992, Mozambique achieved average annual growth of 8% between 1994 and 2007. Although heavy flooding in 2000 devastated the economy and infrastructure, growth fully recovered by 2001. The IMF's Poverty Reduction and Growth Facility (PRGF) programme, including a low-interest lending facility, has helped maintain macroeconomic stability, reduce inflation and provide a sustainable fiscal and external position.

Despite the global economic crisis, growth fell less than expected owing to strong performances in the construction, energy and financial sectors. Reducing poverty, diversifying the economic base (especially through expansion of the transport and electricity infrastructure) and fostering private sector activity remain long-term challenges.

### Currency

The unit of currency is the *new metical* (MZN) of 100 *centavos*, which replaced the *metical* (MZM) in July 2006. The currency was revalued at a rate of 1 new metical = 1,000 meticais. Inflation was 10.3% in 2008 and 3.3% in 2009. Foreign exchange reserves were US\$979m. in July 2005 and total money supply was 18,258.3bn. meticais.

### Budget

In 2008 revenues were 69,107m. meticais and expenditures 83,220m. meticais.

### Performance

GDP growth has averaged 8.0% since 2001, making Mozambique one of Africa's fastest-expanding economies. There was real GDP growth of 6.3% in 2009 and 6.8% in 2010. Total GDP in 2010 was US\$9.6bn.

### Banking and Finance

Most banks had been nationalized by 1979. The central bank and bank of issue is the Bank of Mozambique (*Governor*, Ernesto Gouveia Gove) which hived off its commercial functions in 1992 to the newly-founded Commercial Bank of Mozambique. It in turn merged in 2001 with Banco Internacional de Moçambique, which now trades as Millennium bim and is the country's largest bank. In July 2010 the Bank of Mozambique had external assets of US\$2,105.0m. In 2008 there were 14 commercial banks, one microbank and six credit co-operatives. The Mozambique Stock Exchange opened in Maputo in Oct. 1999. By the late 1990s financial services had become one of the fastest-growing areas of the economy.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

### Electricity

Installed capacity was 2.5m. kW in 2007. Production in 2007 was 16.08bn. kWh; consumption per capita was 615 kWh.

### Oil and Gas

Natural gas finds are being explored for potential exploitation, and both onshore and offshore foreign companies are prospecting for oil. In 2007 natural gas reserves were 127bn. cu. metres; output, 2.8bn. cu. metres. Some river basins, especially the Rovuma, Zambezi and Limpopo, are of interest to oil prospectors.

### Water

Although the country is rich in water resources, the provision of drinking water to rural areas remains a major concern.

### Minerals

There are deposits of pegamite, tantalite, graphite, apatite, tin, iron ore and bauxite. Other known reserves are: nepheline, syenite, magnetite, copper, garnet, kaolin, asbestos, bentonite, limestone, gold, titanium and tin. Mozambique also has extensive—largely unexploited—coal reserves. Output in 2005 (in 1,000 tonnes): aluminium, 554; sea salt (estimate), 80; bauxite, 10; coal, 3.

### Agriculture

All land is owned by the state but concessions are given. There were an estimated 4.2m. ha. of arable land in 2002 and 0.24m. ha. of permanent crops. Around 107,000 ha. were irrigated in 2002. There were about 5,750 tractors in 2002. Production in 1,000 tonnes (2003): cassava, 6,150; maize, 1,248; sugarcane, 400; sorghum, 314; coconuts, 265; rice, 200; groundnuts, 110. Livestock, 2003 estimates: 1.32m. cattle, 392,000 goats, 180,000 pigs, 125,000 sheep, 28m. chickens.

### Forestry

In 2005 there were 19.26m. ha. of forests, or 24.6% of the land area, including eucalyptus, pine and rare hardwoods. In 2007 timber production was 18.03m. cu. metres.

### Fisheries

The catch in 2005 was 42,473 tonnes, of which 29,466 tonnes were from sea fishing. Prawn and shrimp are the major exports at 10,000 tonnes per year. The potential sustainable annual catch is estimated at 500,000 tonnes of fish (anchovies 300,000 tonnes, the rest mainly mackerel).

## INDUSTRY

Although the country is overwhelmingly rural, there is some substantial industry in and around Maputo (steel, engineering, textiles, processing, docks and railways). A huge aluminium smelter, Mozal, was constructed in two phases—the last phase was completed in 2003. Production exceeds its theoretical annual capacity of 506,000 tonnes and is a focal point in the country's strategy of attracting foreign investment.

### Labour

The economically active population in 2010 totalled an estimated 11,261,000 (52% females). In 2007, 75% of the employed workforce were engaged in agriculture, forestry and fisheries. The leading occupations in non-agricultural sectors were commerce and services.

## INTERNATIONAL TRADE

Foreign debt was US\$5,121m. in 2005.

### Imports and Exports

Imports (c.i.f.) totalled US\$2,869m. in 2006 (US\$2,408m. in 2005). Exports (f.o.b.) totalled US\$2,381m. in 2006 (US\$1,783m. in 2005). Principal imports in 2003: mineral fuels, 16.5%; machinery and apparatus, 16.2%; foodstuffs, 12.3%; transport equipment, 9.0%. Principal exports in 2003: aluminium, 54.4%; electricity, 10.9%; prawns, 7.3%; cotton, 3.1%. Main import suppliers in 2003: South Africa, 37.3%; Australia, 12.1%; USA, 5.9%; India, 4.2%. Main export markets in 2003: Belgium, 43.5%; South Africa, 16.2%; Spain, 6.7%; Portugal, 3.7%.

## COMMUNICATIONS

### Roads

In 2008 there were 29,323 km of roads, of which 17.9% were paved. There were 290,600 vehicles in 2008. There were 5,438 road accidents in 2008, with 1,529 fatalities. The flooding of early 2000 washed away at least one fifth of the country's main road linking the north and the south.

**Rail**

The railway system consists of three separate networks, with principal routes on 1,067 mm gauge radiating from the ports of Maputo, Beira and Nacala. Total length in 2009 was 3,116 km, mainly on 1,067 mm gauge with some 762 mm gauge lines, but only 1,929 km was operational. In 2009 passenger-km travelled on the Mozambique Ports and Railways network came to 164m. and freight tonne-km to 2,078m.

**Civil Aviation**

There are international airports at Maputo and Beira. The national carrier is the state-owned Linhas Aéreas de Moçambique (LAM). It provides domestic services and in 2003 operated international routes to Comoros, Dar es Salaam, Durban, Harare, Johannesburg and Lisbon. In 2001 Maputo handled 394,671 passengers (213,612 on international flights) and Beira 106,586 (98,590 on domestic flights). In 2003 scheduled airline traffic of Mozambique-based carriers flew 6m. km, carrying 281,000 passengers (103,000 on international flights).

**Shipping**

The principal ports are Maputo, Beira, Nacala and Quelimane. In Jan. 2009 there were six ships of 300 GT or over registered, totalling 5,000 GT.

**Telecommunications**

Telephone subscribers numbered 2,406,300 in 2006 (119.4 per 1,000 persons). There were 2,339,300 mobile phone subscribers in 2006, up from just 254,800 in 2002, and 200,000 internet users in 2007.

**SOCIAL INSTITUTIONS****Justice**

The 1990 constitution provides for an independent judiciary, *habeas corpus*, and an entitlement to legal advice on arrest. The death penalty was abolished in Nov. 1990.

The population in penal institutions in 2007 was approximately 15,000 (53 per 100,000 of national population).

**Education**

The adult literacy rate in 2008 was 54%.

In 2007 there were 4,563,633 pupils with 70,389 teaching staff in primary schools; and 444,926 pupils with 12,064 teaching staff at secondary schools. Private schools and universities were permitted to function in 1990. There were 28,298 students and 3,009 academic staff in higher education in 2005. The largest higher education institution is the Eduardo Mondlane University, founded in 1962 and granted university status in 1968.

In 2006 public expenditure on education came to 5.8% of GNI and 21.0% of total government spending.

**Health**

There were (2004) 46 hospitals, 722 health centres and 479 medical posts. There were two psychiatric hospitals. In 2000 there were 435 doctors, 1,414 midwives, 3,664 nursing personnel, 136 dentists and 419 pharmacists. Private health care was introduced alongside the national health service in 1992.

**RELIGION**

About 55% of the population follow traditional animist religions. In 2001 there were 6.18m. Christians (mainly Roman Catholic) and 2.04m. Muslims. In Feb. 2012 there was one cardinal.

**CULTURE****World Heritage Sites**

Mozambique has one site on the UNESCO World Heritage List: the Island of Mozambique (inscribed on the list in 1991), a Portuguese trading post with a style of architecture unchanged since the 16th century.

**Press**

There were two well-established daily newspapers in 2006 (*Notícias* and *Diário* in Maputo and Beira respectively) with a combined circulation of 17,000.

**Tourism**

Tourism is a potential growth area for the country. There were 578,000 non-resident tourists in 2005, spending US\$138m.

**DIPLOMATIC REPRESENTATIVES**

Of Mozambique in the United Kingdom (21 Fitzroy Sq., London, W1T 6EL)

*High Commissioner:* Carlos dos Santos.

Of the United Kingdom in Mozambique (Ave. Vladimir I. Lenine 310, Maputo)

## KEY HISTORICAL EVENTS

After Burma's invasion of the kingdom of Assam, the British East India Company retaliated in defence of its Indian interests and in 1826 drove the Burmese out of India. Territory was annexed in south Burma but the kingdom of Upper Burma, ruled from Mandalay, remained independent. A second war with Britain in 1852 ended with the British annexation of the Irrawaddy Delta. In 1885 the British invaded and occupied Upper Burma. In 1886 all Burma became a province of the Indian empire. There were violent uprisings in the 1930s and in 1937 Burma was separated from India and permitted some degree of self-government. Independence was achieved in 1948. In 1958 there was an army

coup, and another in 1962 led by Gen. Ne Win, who installed a Revolutionary Council and dissolved parliament.

The Council lasted until March 1974 when the country became a one-party socialist republic. On 18 Sept. 1988 the Armed Forces seized power and set up the State Law and Order Restoration Council (SLORC). Since then civil unrest has cost more than 10,000 lives. On 19 June 1989 the government changed the name of the country in English to the Union of Myanmar. Aung San Suu Kyi, leader of the National League for Democracy, was put under house arrest in July 1989. In spite of her continuing detention, her party won the 1990 election by a landslide, but the military junta refused to accept the results. She was eventually freed in July 1995, only to be placed under house arrest for a second time in Sept. 2000; she was again released in May 2002, and then again detained in May 2003.

In Aug. 2007 the government implemented fuel price hikes that prompted public protests, led chiefly by students and political activists. Despite the authorities taking a hard line, the demonstrations were given renewed force when several thousand monks came out in support in mid-Sept. The government crackdown, during which thousands of monks were reportedly rounded up and several protesters killed, brought condemnation from the international community.

In May 2008 the Irrawaddy delta suffered a cyclone that caused massive damage, claimed an estimated 145,000 lives and left 1m. people displaced. Nonetheless, the following week the government proceeded with a referendum on a new constitution, which it claimed secured 92% support. In Nov. 2010 the pro-government Union Solidarity and Development Party won the first elections for 20 years. Thein Sein became president in a nominal transition to civilian rule.

## TERRITORY AND POPULATION

Myanmar is bounded in the east by China, Laos and Thailand, and west by the Indian Ocean, Bangladesh and India. Three parallel mountain ranges run from north to south; the Western Yama or Rakhine Yama, the Bagu Yama and the Shaun Plateau. The total area of the Union is 676,590 sq. km (261,230 sq. miles), including 23,070 sq km (8,910 sq. miles) of inland water. At the last census, in 1983, the population was 35,307,913. Estimate, 2010, 47.96m.; density, 73 per sq. km. In 2005, 69.4% of the population lived in rural areas.

The UN gives a projected population for 2015 of 49.19m.

The administrative capital is Naypyidaw (Pyinmana), with an estimated population of 97,400 in 2005. The largest city is Yangon (Rangoon); its population was 3,874,000 in 2003. Other leading towns are Mandalay, Naypyidaw, Moulmein, Bago (Pegu), Bassein, Sittwe (Akyab), Taunggye and Monywa. In Nov. 2005 the government began relocating from Yangon to a new administrative and legislative capital, Pyinmana, subsequently renamed Naypyidaw. The move was completed in Feb. 2006.

The population of the seven states and seven administrative divisions (2000 estimates): Ayeyarwady (Irrawaddy) Division, 6,779,000; Bago (Pegu) Division, 5,099,000; Magway Division, 4,548,000; Mandalay Division, 6,574,000; Sagaing Division, 5,488,000; Tanintharyi Division, 1,356,000; Yangon (Rangoon) Division, 5,560,000; Chin State, 480,000; Kachin State, 1,272,000; Kayah State, 266,000; Kayin (Karen) State, 1,489,000; Mon State, 2,502,000; Rakhine (Arakan) State, 2,744,000; Shan State, 4,851,000. Myanmar is inhabited by many ethnic nationalities. There are as many as 135 national groups with the Barmars, comprising about 68% of the population, forming the largest group. The Shan and the Karen account for 9% and 7% of the population respectively.

The official language is Burmese; English is also in use.

### SOCIAL STATISTICS

2008 estimates: births, 1,020,000; deaths, 496,000. Estimated birth rate in 2008 was 21 per 1,000 population; estimated death rate, 10. Annual population growth rate, 2000–08, 0.8%. Life expectancy at birth, 2007, was 59.0 years for males and 63.4 years for females. Infant mortality, 2005, 74 per 1,000 live births; fertility rate, 2008, 2.3 births per woman.

### CLIMATE

The climate is equatorial in coastal areas, changing to tropical monsoon over most of the interior, but humid temperate in the extreme north, where there is a more significant range of temperature and a dry season lasting from Nov. to April. In coastal parts, the dry season is shorter. Very heavy rains occur in the monsoon months May to Sept. Yangon, Jan. 77°F (25°C), July 80°F (26.7°C). Annual rainfall 104" (2,616 mm). Sittwe, Jan. 70°F (21.1°C), July 81°F (27.2°C). Annual rainfall 206" (5,154 mm). Mandalay, Jan. 68°F (20°C), July 85°F (29.4°C). Annual rainfall 33" (828 mm).

### CONSTITUTION AND GOVERNMENT

In Nov. 1997 the country's ruling generals changed the name of the government to the *State Peace and Development Council* (SPDC). It nominally ceded power to an elected president in Feb. 2011 and was abolished a month later. However, several of its members immediately formed the *State Supreme Council*, an advisory body headed by Than Shwe that ensures the military maintains a firm grasp on the nation's political life.

In May 2008 an army-drafted constitution won 92.5% support in a referendum. The constitution specified that multi-party elections should be scheduled for 2010; 25% of parliamentary seats were automatically allocated to the military. It called for the creation of a National Defence and Security Council, dominated by military appointments, with the power to suspend the constitution under certain circumstances. It also laid out rules that would ban opposition leader Aung San Suu Kyi from holding public office. The constitution was formally adopted on 30 May 2008. The previous constitution, dating from 3 Jan. 1974, had been suspended since 1988. Amendments to the Political Party Registration law in Oct. 2011 now allow Aung San Suu Kyi to hold public office.

The 440-member lower chamber, the House of Representatives (*Pythu Hluttaw*), has 330 elected seats with 110 appointed and the 224-member upper chamber, the House of Nationalities (*Amyotha Hluttaw*), has 168 elected seats with 56 appointed. Parliament convened in Jan. 2011 for the first time since 1988.

### National Anthem

'Gba majay Bma' ('We shall love Burma for ever'); words and tune by Saya Tin.

### RECENT ELECTIONS

In elections in May 1990 the opposition National League for Democracy (NLD), led by Aung San Suu Kyi (b. 1945), won 392 of the 485 People's Assembly seats contested with some 60% of the valid vote. Turnout was 72%, but 12.4% of ballots cast were declared invalid. The military ignored the result and refused to hand over power.

The next elections were not held until 7 Nov. 2010 and were boycotted by the NLD who claimed that they would not be free and fair. This was confirmed when the government Union Solidarity and Development Party (USDP) won large majorities in both houses and pro-democracy candidates complained of ballot-rigging. Of the 330 elected seats in the House of Representatives, the Union Solidarity and Development Party won 259. In the House of Nationalities they won 129 of 168 elected seats.

On 4 Feb. 2011 parliament elected prime minister Thein Sein as president, winning 408 of 659 votes. Tin Aung Myint Oo (171 votes) and Sai Mauk Kham (75) became vice-presidents.

### CURRENT GOVERNMENT

*Head of the State Supreme Council:* Senior Gen. Than Shwe; b. 1933 (since 15 March 2011; previously Chairman of the State Peace and Development Council from April 1992–March 2011).

In March 2012 the government comprised:

*President:* Gen. Thein Sein; b. 1945 (since 30 March 2011).

*Vice Presidents:* Tin Aung Myint Oo (also *Minister of Military Affairs*); Sai Mauk Kham.

*Minister of Defence:* Maj.-Gen. Hla Min. *Home Affairs:* Lieut.-Gen. Ko Ko. *Border Affairs and Industrial Development:* Maj.-Gen. Thein Htay. *Foreign Affairs:* U Wunna Maung Lwin. *Information, and Culture:* U Kyaw Hsan. *Agriculture and Irrigation:* U Myint Hlaing. *Forestry:* U Win Tun. *Finance and Revenue:* U Hla Tun. *Construction:* U Khin Maung Myint. *National Planning and Economic Development, and Livestock and Fisheries:* U Tin Naing Thein. *Commerce:* U Win Myint. *Communications, Posts and Telegraphs:* U Thein Tun. *Labour, and Social Welfare, Relief and Resettlement:* U Aung Kyi. *Mines:* U Thein Htaik. *Co-operatives:* U Ohn Myint. *Transport:* U Nyan Tun Aung. *Hotels and Tourism, and Sports:* U Tint Hsan. *Industry (No. 1):* U Kyaw Swa Khaing. *Industry (No. 2):* U Soe Thein. *Rail Transportation:* U Aung Min. *Energy:* U Than Htay. *Electric Power (No. 1):* U Zaw Min. *Electric Power (No. 2):* U Khin Maung Soe. *Education:* Mya Aye. *Health:* Dr Pe Thet Khin. *Religious Affairs:* Thura U Myint Maung. *Science and Technology:* U Aye Myint. *Immigration and Population:* U Khin Yi. *Ministers in the President's Office:* U Thein Nyunt; U Soe Maung.

### CURRENT LEADERS

#### Thein Sein

##### Position

President

##### Introduction

Thein Sein was sworn into office on 30 March 2011 after his party, the Union Solidarity and Development Party (USDP), dominated the Nov. 2010 polls. He is the country's first civilian president in nearly 50 years. Despite his close links to the military and international scepticism at the validity of the 2010 elections, he has sought to improve Myanmar's image as an aspiring democracy.

##### Early Life

Thein Sein was born on 20 April 1945 in Bassein, Irrawaddy Division. Graduating from the Defence Services Academy in 1968, he rose through the ranks to become a major in 1988. In 1989 he graduated from the Command and General Staff College and was appointed commander of the 89th Infantry Battalion in Sagaing Division.

From 1992–95 he served as General Staff Officer (with the rank of colonel) at the war office under Than Shwe, then commander-in-chief of the armed forces. Thein Sein took charge of a military command in Yangon before leading the newly-formed Triangle Regional Military Command in Kengtung, Shan State, in 1996. In 2003 he was promoted to lieutenant-general. He was appointed first secretary of the State Peace and Development Council in 2004 after the ousting of Gen. Khin Nyunt. From May 2004–Sept. 2007 he chaired the National Convention Convening Commission that oversaw the drafting of a new constitution.

In April 2007 Thein Sein was named interim prime minister and on 24 Oct. 2007 became prime minister when the incumbent, Soe Win, died. Following his appointment, Thein Sein was promoted to the rank of general and represented Myanmar in regional negotiations. In the aftermath of Cyclone Nargis in May

2008 he was criticized when the government obstructed aid efforts.

On 29 April 2010 Thein Sein retired from the military to set up and lead the Union Solidarity and Development Party (USDP). He contested the constituency of Zabu Thiri Township, Naypyidaw Union Territory, winning over 90% of the vote in the election of Nov. 2010. On 4 Feb. 2011 he was elected president by parliament.

#### *Career in Office*

Since taking office Thein Sein has held talks with pro-democracy leader Aung San Suu Kyi, freed a number of political prisoners, eased media restrictions, agreed a ceasefire with the Shan State Army South and passed laws allowing for trade unions and peaceful protest.

Myanmar has been granted the 2014 ASEAN chair and hosted a visit from US Secretary of State Hillary Clinton, who welcomed Myanmar's democratic progress. Aung San Suu Kyi and her party, the National League for Democracy (NLD), cautiously backed the changes by re-registering the party ahead of by-elections held in April 2012.

#### **Senior Gen. Than Shwe**

##### *Position*

Head of the State Supreme Council

##### *Introduction*

Than Shwe became head of state and government in 1992. Political oppression under his military regime has attracted international condemnation while the economy has been blighted by corruption and bad management. Than Shwe did not stand for president following parliamentary elections in Nov. 2010 but is believed to have retained significant political influence.

##### *Early Life*

Than Shwe was born on 2 Feb. 1933 in Kyaukse. He had a decorated army career before succeeding Saw Maung in 1992 as chairman of the State Law and Order Restoration Council (SLORC), prime minister and minister of defence.

##### *Career in Office*

Than Shwe's political legitimacy was challenged by Aung San Suu Kyi, who had led the National League for Democracy (NLD) to victory in free elections of 1990. The military refused to recognize the result and instead continued to oppress the NLD, including imposing repeated terms of house arrest on Aung San Suu Kyi. She received the Nobel Peace Prize in 1991. In 1997 the SLORC reconstituted itself as the State Peace and Development Council (SPDC).

In foreign policy, the oppressive nature of Than Shwe's regime saw Myanmar increasingly isolated, although the country was accepted into ASEAN in 1997 and closer relations with Bangladesh were fostered from 2002. Also in 2002 the international community expressed concern at Than Shwe's deal with Russia to develop nuclear facilities. The USA, EU, China and IAEA all raised doubts over Myanmar's ability to ensure the safety of such enterprises, while the NLD suggested that it could lead to the development of nuclear arms.

The renewed detention of Aung San Suu Kyi in May 2003 provoked further hostility from the international community and unprecedented public criticism from ASEAN. Fresh sanctions were imposed by the USA and the EU.

From May–July 2004 a national convention was reconvened for the first time since 1996 to draw up a new constitution. It met again intermittently between Feb. 2005 and Jan. 2006, with a further session beginning in Oct. 2006. However, without the participation of the main opposition and ethnic minority groups, independent observers questioned the validity of the process. UN concern about the junta's policies prompted the preparation of a

critical Security Council resolution but this was vetoed by China and Russia in Jan. 2007.

In Sept. 2007 the government declared that constitutional talks were complete and closed the national convention. Buddhist monks then led a series of pro-democracy demonstrations in Yangon and other cities that provoked a violent response from the authorities and mass detentions. The UN Security Council condemned the military crackdown and the EU adopted tighter sanctions. In April 2008 the government published the proposed new constitution, which reserved 25% of parliamentary seats for the military and banned Aung San Suu Kyi from holding office. In a subsequent national referendum in May, the government claimed that 93% of voters endorsed the constitution.

The referendum took place amid a humanitarian crisis, following a cyclone that hit the south of the country. By the end of May 2008 about 145,000 people were thought to have died, with thousands more made homeless. The effects of the disaster were exacerbated by restrictions imposed on international relief efforts by Than Shwe's regime, which played down the scale of the devastation.

In Aug. 2009 tougher sanctions were imposed on Myanmar by the international community after Aung San Suu Kyi's detention was extended. In Oct., however, she met with a minister from the military government in the first such contact for two years and was also allowed to meet Western diplomats.

In March 2010 the government announced new party registration laws in preparation for national and state elections. However, the NLD considered them too restrictive. The elections took place in Nov., resulting in an overwhelming victory for the military-backed Union Solidarity and Development Party, although opposition groups claimed widespread fraud and international observers condemned the poll. A week later, Aung San Suu Kyi was once more released from house arrest, having been prevented from taking any part in the electoral process.

In Feb. 2011 the new parliament named Thein Sein, previously the prime minister, as the new state president. However, it was widely assumed that Than Shwe would continue to exercise overriding influence behind the scenes. In March 2011 the SPDC was dissolved but several of its members joined the newly-formed, advisory State Supreme Council, headed by Than Shwe. He retired from the military in April 2011.

#### **DEFENCE**

Military expenditure in 2006 totalled US\$6,920m. (US\$147 per capita), representing 18.7% of GDP.

##### **Army**

The strength of the Army was reported to be about 375,000 in 2007. The Army is organized into 12 regional commands. There are three paramilitary units: People's Police Force (72,000), People's Militia (35,000) and People's Pearl and Fishery Ministry (approximately 250).

##### **Navy**

Personnel in 2007 totalled about 16,000 including 800 naval infantry.

##### **Air Force**

The Air Force is intended primarily for internal security duties. Personnel (2007) approximately 15,000 operating 125 combat capable aircraft, including F-7s.

#### **ECONOMY**

Agriculture accounted for 48.3% of GDP in 2004–05, trade 22.3%, manufacturing 11.6% and transport and communications 10.3%.

Myanmar featured among the ten most corrupt countries in the world in a 2011 survey of 183 countries carried out by the anti-corruption organization *Transparency International*.

## Overview

Myanmar is subject to sanctions from the EU and the USA, which were expanded after a state crackdown on popular protests in 2007. That event also effected tourism, prompting a sharp decrease in visitor numbers. The 2004 tsunami and Cyclone Nargis in 2008 further contributed to the country's economic woes.

Agriculture employs 70% of the labour force and contributes 48% of GDP. Oil and gas reserves attract much-needed foreign investment. Further inward investment is limited owing to an inefficient and corrupt business environment which supports a black market. A significant privatization programme is under way.

## Currency

The unit of currency is the *kyat* (MMK) of 100 *pyas*. Total money supply was K.1,742,810m. in June 2005. Foreign exchange reserves were US\$691m. and gold reserves 231,000 troy oz in May 2005. Inflation was 22.5% in 2008, falling to 8.0% in 2009. Since 1 June 1996 import duties have been calculated at a rate US\$1 = K.100.

## Budget

In 2005–06 revenues were K.819,534m. and expenditures K.1,008,785m. Tax revenue accounted for 58.2% of revenues in 2005–06; general public services accounted for 35.2% of expenditures and economic affairs 34.3%. The fiscal year begins on 1 April.

## Performance

Real GDP growth was 5.1% in 2009 and 5.5% in 2010.

## Banking and Finance

The Central Bank of Myanmar was established in 1990. Its *Governor* is U Than Nyein. In 2010 there were four state banks (Myanma Economic Bank, Myanma Foreign Trade Bank, Myanma Agricultural and Rural Development Bank, and Myanma Investment and Commercial Bank) and 19 private banks. Since 1996 foreign banks with representative offices have been permitted to set up joint ventures with Myanmar banks. The foreign partner must provide at least 35% of the capital. The state insurance company is the Myanmar Insurance Corporation. Deposits in state and private banks were K.903,722m. in 2006.

Before being delisted in Oct. 2006, Myanmar was the only country named in a report in June 2006 as failing to co-operate in the fight against international money laundering. The Financial Action Task Force on Money Laundering was set up by the G7 group of major industrialized nations.

A stock exchange opened in Yangon in 1996.

## ENERGY AND NATURAL RESOURCES

### Environment

Myanmar's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.3 tonnes per capita.

### Electricity

Total electricity generated, 2007–08, 6.50bn. kWh; consumption per capita in 2007–08 was 113 kWh. Installed capacity was approximately 1.8m. kW in 2007–08.

### Oil and Gas

Production (2007–08) of crude oil was 1.0m. tonnes; natural gas (2008), 12.4bn. cu. metres. There were proven natural gas reserves of 490bn. cu. metres in 2008.

### Minerals

Myanmar's mineral resources include antimony, coal, copper, lead, limestone, marble, precious stones, tin, tungsten and zinc. Production (in tonnes unless otherwise indicated): hard coal (2007–08), 1,075,000; lignite (2007–08), 414,000; gypsum (2004), 71,155; copper (2004), 31,756; jade (2004), 12,408, ruby, sapphire and spinel (2004), 6,198,915 carats. 90% of the world's rubies are mined in Myanmar.

## Agriculture

In 2007 there were 10.6m. ha. of arable land and 1.1m. ha. of permanent crops. 2.2m. ha. were irrigated in 2006–07. Production (2006–07, in 1,000 tonnes): rice, 30,435; sugarcane, 8,039; pulses, 4,198; maize, 1,114; groundnuts, 1,088; onions, 918; plantains (2008 estimate), 630; sesame seeds, 614; potatoes, 508. Opium output was 1,097 tonnes in 2001, falling to 312 tonnes in 2005. In 2009 it was 330 tonnes. Myanmar's opium production is second only to that of Afghanistan.

Livestock (2005–06): cattle, 12.15m.; pigs, 5.79m.; buffaloes, 2.71m.; sheep and goats, 2.44m.; chickens, 85m. In 2006–07 there were 12,000 tractors.

## Forestry

Forest area in 2005 was 32.22m. ha., covering 49.0% of the total land area. Teak resources cover about 6m. ha. (15m. acres). In 2007, 42.55m. cu. metres of roundwood were cut.

## Fisheries

In 2005 the total catch was 1,742,956 tonnes (1,204,286 tonnes from sea fishing). Aquaculture production totalled 604,660 tonnes in 2007. Cultured pearls and oyster shells are produced.

## INDUSTRY

Production in 1,000 tonnes (unless otherwise specified): cement (2007), 618; raw sugar (2007), 160; nitrogenous fertilizers (2007), 115; paper and paperboard (2007), 45; sawnwood (2007), 1.5m. cu. metres; cigarettes (2007), 2,755m. units; clay bricks (2004, government production only), 77m. units; bicycles (2007), 53,880 units.

## Labour

The estimated economically active population in 2010 was 27,337,000. In 1998 the leading areas of activity (in 1,000) were: agriculture, hunting, forestry and fishing, 11,507; wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 1,781; manufacturing, 1,666. In 2001 there were 398,300 persons aged 18 years and over registered as unemployed.

## INTERNATIONAL TRADE

In Aug. 1991 the USA imposed trade sanctions in response to alleged civil rights violations. Foreign debt was US\$6,645m. in 2005. A law of 1989 permitted joint ventures, with foreign companies or individuals able to hold 100% of the shares.

## Imports and Exports

Since 1990, in line with market-oriented measures, firms have been able to participate directly in trade.

Imports in 2006–07 totalled K.16,835.0m. and exports K.30,026.1m. Main imports, 2006–07: mineral fuels, lubricants and related materials, 24.1%; machinery and transport equipment, 20.3%; manufactured goods, 19.6%; chemicals, 10.7%. Leading import suppliers in 2006–07 were Singapore, 35.2%; China, 24.9%; Thailand, 10.4%; Japan, 5.3%. Main exports in 2006–07: gas, 38.9%; pulses, 11.6%; timber, 9.8%; precious stones and pearls, 7.4%. Main export markets, 2006–07: Thailand, 45.1%; India, 14.0%; China, 11.8%; Hong Kong, 7.7%.

## COMMUNICATIONS

### Roads

There were 27,000 km of roads in 2005, of which 11.9% were surfaced. In 2005 there were 194,411 passenger cars, 54,482 vans and lorries, 17,985 buses and coaches, and 640,313 motorcycles and mopeds. There were 1,638 deaths as a result of road accidents in 2007.

**Rail**

In 2005 there were 4,809 km of route on metre gauge. Passenger-km travelled in 2006–07 came to 5,307m. and freight tonne-km to 887m.

**Civil Aviation**

Myanmar Airways International operates domestic services and in 2003 had international flights to Bangkok, Kuala Lumpur and Singapore. In 2003 scheduled airline traffic of Myanmar-based carriers flew 16m. km, carrying 1,117,000 passengers (691,000 on international flights).

**Shipping**

There are nearly 100 km of navigable canals. The Irrawaddy is navigable up to Myitkyina, 1,450 km from the sea, and its tributary, the Chindwin, is navigable for 630 km. The Irrawaddy delta has approximately 3,000 km of navigable water. The Salween, the Attaran and the G'yne provide about 400 km of navigable waters around Moulmein. In Jan. 2009 merchant shipping totalled 140,000 GT (vessels of 300 GT and over).

In 2006–07, 26.33m. passengers and 4.28m. tonnes of freight were carried on inland waterways. The ocean-going fleet of the state-owned Myanma Five Star Line in 2006–07 comprised 26 vessels; in addition there were eight chartered vessels. In 2006–07, 51,373 passengers and 10,954,800 tonnes of seaborne cargo were transported coastally and overseas. Myanmar's main port is Yangon, which handles about 90% of the country's imports and exports.

**Telecommunications**

Myanmar had 632,600 telephone subscribers in 2005 (12.5 per 1,000 persons). In 2005 mobile phone subscribers numbered 128,700 and in 2007 there were 40,000 internet users.

**SOCIAL INSTITUTIONS****Justice**

The highest judicial authority is the Chief Judge, appointed by the government. In mid-2007 there were 65,063 people (126 per 100,000 of national population) held in prisons. Amnesty International reported in 2007 that before the protests against the government resulting in hundreds more arrests there were around 1,150 political prisoners in the country's jails. In Oct. 2011 President Thein Sein granted amnesty to more than 6,300 prisoners, although it was unclear how many of Myanmar's 2,100 political prisoners would be freed. In Jan. 2012, 651 prisoners were released, including political activists, student leaders and army dissidents.

**Education**

Education is free in primary, middle and vocational schools; fees are charged in senior secondary schools and universities. In 2007 there were 5,013,582 pupils at primary schools with 172,209 teaching staff; and 2,686,198 pupils at secondary schools with 81,943 teaching staff. In 2006–07 there were 1,055 monastic primary schools (permitted since 1992) with 152,548 pupils, 256 monastic middle schools with 22,992 pupils and two monastic high schools with 3,887 pupils. There were 507,660 students and 10,669 academic staff in tertiary education in 2007.

In higher education in 2005–06 there were 521,702 students enrolled at 35 universities of arts and sciences, including 413,902 at the University of Distance Education. There were also 59,503 students enrolled at vocational universities in 2005–06, with 16,216 studying computers, computer science and technology, 14,516 medicine, 12,079 economics, 6,286 education, 1,738 dentistry, 1,711 technology, 1,387 nursing, 1,287 agriculture, 1,231 pharmacy and 1,077 paramedical science.

The adult literacy rate was an estimated 92.0% in 2009.

In the period 1998–2007, 13% of central government expenditure was allocated to education.

**Health**

In 2006–07 there were 826 government hospitals with 43,128 beds. In 2006–07 there were 20,501 doctors (65% private), 21,075 nurses, 17,703 midwives and 1,732 dentists. Spending on health in 2005 amounted to 2.2% of GDP although only 10.6% came from the state. General government expenditure on health in 2005 totalled 1.1% of total government spending.

**Welfare**

In 2006–07 contributions to social security totalled (K.lm.) 3,697.9 (from employers, 2,311.2; from employees, 1,386.7). Benefits paid totalled 935.7, and included: medical care, 764.7; sickness, 77.5; maternity, 41.0; death, 36.0.

**RELIGION**

About 89.3% of the population—mainly Bamars, Shans, Mons, Rakhines and some Kayins—are Buddhists, while the rest are Christians, Muslims, Hindus and Animists. The Christian population is composed mainly of Kayins, Kachins and Chins. There are about 400,000 monks. Islam and Hinduism are practised mainly by people of Indian origin.

**CULTURE****Press**

There were eight daily newspapers in 2006, with a combined circulation of 550,000. The three largest newspapers were all government-owned. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Myanmar ranked 174th out of 178 countries.

**Tourism**

In 2007 there were 264,000 non-resident tourists; spending by tourists totalled US\$59m. in 2006.

**DIPLOMATIC REPRESENTATIVES**

Of Myanmar in the United Kingdom (19A Charles St., London, W1J 5DX)

*Ambassador:* Kyaw Myo Htut.

Of the United Kingdom in Myanmar (80 Strand Rd, Yangon)

*Ambassador:* Andrew Heyn.

Of Myanmar in the USA (2300 S. St., NW, Washington, D.C., 20008)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Soe Paing.

Of the USA in Myanmar (110 University Ave., Yangon)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Michael Thurston.

Of Myanmar to the United Nations

*Ambassador:* U Than Swe.

Of Myanmar to the European Union

*Ambassador:* Thant Kyaw.

### KEY HISTORICAL EVENTS

Namibia was first settled by people from the Khoisan language group. The earliest, the nomadic San people, were followed about 2000 years ago by the pastoral Nama, who became dominant in the south. In the 9th century AD the Damara settled the central grasslands (known as Damaraland). Other clans followed and by the 19th century three Bantu peoples were established: the Herero in northeastern and central Namibia (Kaokoland); the Ovambo around the Kunene River in the north; and the Kavango people in the east. In the far east, the Barotse expanded from Zambia to settle the Caprivi Strip while the Tswana (from Botswana) settled the edges of the Kalahari desert.

European traders and settlers arrived in the late 18th century. Walvis Bay came under Dutch (1793) then British (1797) control, and European settlement began on the coast. In the 1830s the Orlans, from South Africa, expanded into Nama and Damara territory, becoming dominant under the leadership of Jonker Afrikaner.

In 1884 the area then known as South West Africa became a German protectorate. From 1904–08 conflict between German troops and the Herero and Nama peoples saw the deaths of 80% of the Herero population and 50% of the Nama. In the aftermath, Germany introduced racial segregation and used forced labour for diamond mines. In 1915 the Union of South Africa occupied German South West Africa and on 17 Dec. 1920 the League of Nations entrusted the territory as a Mandate to the Union of South Africa. After the Second World War South Africa applied unsuccessfully to annex the territory, continuing to administer it in defiance of the UN. Indigenous opposition to South African rule intensified in the 1950s: the Ovamboland Peoples' Organization was founded in 1958 (known as the South West

Africa Peoples' Organization, or SWAPO, from 1960) and the South West Africa National Union (SWANU) in 1959.

In 1968 the UN changed the territory's name to Namibia. Following widespread strikes in 1971–72, negotiations took place between South Africa and the UN and in 1973 a multi-racial advisory council was appointed in preparation for independence. However, attempts at organizing free elections failed. In 1988, after military defeat in Angola, South Africa withdrew. UN-supervised elections took place in Nov. 1989, delivering a victory for SWAPO. After independence on 21 March 1990, Namibia joined the Commonwealth.

In April 1990 Namibia joined the UN and in June 1990 the Organization of African Unity, forerunner of the African Union. In 2004 the country suffered major flooding. It continues to face a serious AIDS epidemic, with around 20% of adults infected, though in 2007 the rate fell for the first time.

### TERRITORY AND POPULATION

Namibia is bounded in the north by Angola and Zambia, west by the Atlantic Ocean, south and southeast by South Africa and east by Botswana. The Caprivi Strip (Caprivi Region), about 300 km long, extends eastwards up to the Zambezi river, projecting into Zambia and Botswana and touching Zimbabwe. The area, including the Caprivi Strip and Walvis Bay, is 825,112 sq. km. South Africa transferred Walvis Bay to Namibian jurisdiction on 1 March 1994. Census population, 1991, 1,409,920 (723,593 females; urban, 32.76%). 2001 census population, 1,830,330 (density 2.2 per sq. km). In 2005, 64.9% of the population were rural.

The UN gives a projected population for 2015 of 2.48m.

Population by ethnic group at the censuses of 1970 and 1981 and estimates for 1991:

	1970	1981	1991
Ovambos	342,455	506,114	665,000
Kavangos	49,577	95,055	124,000
Damaras	64,973	76,179	100,000
Hereros	55,670	76,296	100,000
Whites	90,658	76,430	85,000
Namas	32,853	48,541	64,000
Caprivians	25,009	38,594	50,000
Coloureds	28,275	42,254	—
Bushmen	21,909	29,443	—
Basters	16,474	25,181	—
Tswanas	4,407	6,706	—
Other	—	12,403	—
	732,260	1,033,196	1,401,711

Namibia is administratively divided into 13 regions. Area, population and chief towns in 2001:

Region	Area (in sq. km)	Population	Chief town
Caprivi (Liambezi)	19,532	79,826	Katima Mulilo
Erongo	63,719	107,663	Swakopmund
Hardap	109,888	68,249	Mariental
Karas	161,324	69,329	Keetmanshoop
Khomas	36,804	250,262	Windhoek
Kunene	144,254	68,735	Opuwo
Ohangwena	10,582	228,348	Oshikango
Okavango	43,417	202,694	Rundu
Omaheke	84,731	68,039	Gobabis
Omusati	13,637	228,842	Outapi
Oshana	5,290	161,916	Oshakati
Oshikoto	26,607	161,007	Tsumeb
Otjozondjupa	105,327	135,384	Grootfontein

Towns with populations over 5,000 (2001): Windhoek, 233,529; Walvis Bay, 43,611; Rundu, 36,964; Oshakati, 28,255; Swakopmund, 23,808; Katima Mulilo, 22,134; Rehoboth, 21,308; Otjiwarongo, 19,614; Keetmanshoop, 15,778; Tsumeb, 14,929; Grootfontein, 14,249; Okahandja, 14,039; Gobabis, 13,856; Lüderitz, 13,295; Ongwediva, 10,742; Mariental, 9,836; Outjo, 6,013; Khorixas, 5,890; Opuwo, 5,101.

English is the official language. Afrikaans and German are also spoken.

### SOCIAL STATISTICS

Estimates, 2008: births, 59,000; deaths, 18,000. Estimated birth rate in 2008 was 27.6 per 1,000 population; estimated death rate, 8.6. Expectation of life, 2007: males, 59.3 years; females, 61.2. Annual population growth rate, 2000–08, 1.9%; infant mortality, 2005, 46 per 1,000 live births. The fertility rate dropped from 5.5 births per woman in 1994 to 3.4 births per woman in 2008.

### CLIMATE

The rainfall increases steadily from less than 50 mm in the west and southwest up to 600 mm in the Caprivi Strip. The main rainy season is from Jan. to March, with lesser showers from Sept. to Dec. Namibia is the driest African country south of the Sahara.

### CONSTITUTION AND GOVERNMENT

On 9 Feb. 1990 with a unanimous vote the Constituent Assembly approved the Constitution which stipulated a multi-party republic, an independent judiciary and an executive *President* who may serve a maximum of two five-year terms. The constitution became effective on 12 March 1990 and was amended in 1999 to allow President Sam Nujoma to stand for a third term in office. The bicameral legislature consists of a 78-seat *National Assembly*, 72 members of which are elected for five-year terms by proportional representation and up to six appointed by the president by virtue of position or special expertise, and a 26-seat *National Council* consisting of two members from each Regional Council elected for six-year terms.

### National Anthem

'Namibia, land of the brave'; words and tune by Axali Doeseb.

### RECENT ELECTIONS

Presidential and parliamentary elections were held on 27–28 Nov. 2009. Hifikepunye Pohamba (South West Africa People's Organization/SWAPO) was elected president with 75.3% of votes cast followed by Hidipo Hamutenya (Rally for Democracy and Progress/RDP) with 10.9%, Katuutire Kaura (Democratic Turnhalle Alliance/DTA) with 3.0%, Kuaima Riruako (National Unity Democratic Organization/NUDO) with 2.9% and Chief Justus Garoëb (United Democratic Front/UDF) with 2.4%. There were seven other candidates. Turnout was an estimated 75%. In the parliamentary elections SWAPO won 54 of the available 72 seats with 74.3% of the vote; the RDP, 8 with 11.2%; DTA, 2 with 3.1%; NUDO, 2 with 3.0%; UDF, 2 with 2.4%; All People's Party, 1 with 1.3%; Republican Party, 1 with 0.8%; Congress of Democrats, 1 with 0.7%; South West Africa National Union, 1 with 0.6%.

### CURRENT GOVERNMENT

*President:* Hifikepunye Pohamba; b. 1935 (SWAPO; sworn in 21 March 2005 and re-elected in Nov. 2009).

In March 2012 the government comprised:

*Prime Minister:* Nahas Angula; b. 1943 (SWAPO; sworn in 21 March 2005).

*Deputy Prime Minister:* Marco Hausiku.

*Minister of Home Affairs and Immigration:* Rosalia Ngidinwa. *Presidential Affairs and Attorney General:* Albert Kawana. *Foreign Affairs:* Utoni Nujoma. *Defence:* Maj.-Gen. Charles Namoloh. *Finance:* Saara Kuugongelwa-Amadhila. *Education:* Abraham Iyambo. *Health:* Richard Kamwi. *Mines and Energy:* Isak Katali.

*Justice:* Pendukeni Iivula-Iithana. *Regional and Local Government, Housing and Rural Development:* Jerry Ekandjo. *Agriculture, Water and Forests:* John Mutorwa. *Trade and Industry:* Hage Geingob. *Environment and Tourism:* Netumbo Nandi-Ndaitwah. *Works and Transport:* Erkki Nghimtina. *Lands and Rehabilitation:* Alpheus Naruseb. *Fisheries and Marine Resources:* Bernard Esau. *Safety and Security:* Nangolo Mbumba. *Youth, National Service, Sport and Culture:* Kazenambo Kazenambo. *Gender Equality and Child Welfare:* Doreen Sioka. *Labour and Social Protection:* Immanuel Ngatjizeto. *Information and Information Technology:* Joel Kaapanda. *Veterans' Affairs:* Nickey Iyambo.

*Office of the Prime Minister:* <http://www.opm.gov.na>

### CURRENT LEADERS

#### Hifikepunye Pohamba

##### *Position*

President

##### *Introduction*

Lucas Hifikepunye Pohamba, representing the ruling South West Africa People's Organization (SWAPO), won a landslide victory at presidential elections in Nov. 2004 and took office in March 2005. He succeeded Namibia's 'founding father' and former president, Sam Nujoma, and has continued with the same broad political programme. He was re-elected in Nov. 2009.

##### *Early Life*

Pohamba was born on 18 Aug. 1935 at Okanghudi in South West Africa (modern Namibia) and educated at the Holy Cross Mission School at Onamunama. He worked in the Tsumeb copper mines and joined SWAPO in April 1959. He joined Nujoma in exile in Dar es Salaam (Tanzania) and became a leading figure in SWAPO, representing it in Zambia and Algeria and raising funds. In 1969 he was appointed to SWAPO's central committee and in 1975 became secretary for finance and administration. From 1979 until the late 1980s he was based in Luanda, Angola.

Following Nujoma's victory in the country's first presidential elections on 7 Nov. 1989, Pohamba was appointed as minister of home affairs. In 1995 he became minister for fisheries and marine resources until 2001, when he took responsibility for lands, resettlement and rehabilitation. As such, he pushed ahead with Namibia's controversial 'land reform' scheme, involving the compulsory purchase of land owned by white farmers for distribution to black citizens.

##### *Career in Office*

Since his inauguration on 21 March 2005 Pohamba has pursued established policies, including development of education, the rural water supply and the infrastructure network. He has also continued the controversial compulsory land purchases scheme. In elections in Nov. 2009, Pohamba was returned to the presidency with about 75% of the vote and SWAPO retained its majority of parliamentary seats with a similar vote share. A legal challenge launched in 2010 by opposition parties against the election results was dismissed by the High Court in Feb. 2011 for lack of evidence.

### DEFENCE

In 2008 defence expenditure totalled US\$287m. (US\$137 per capita), representing 3.3% of GDP.

#### Army

Personnel (2007), 9,000. There is also a 6,000-strong paramilitary police force.

#### Navy

A force of around 200 (2007) is based at Walvis Bay.

**Air Force**

The Army has a small air wing that operates two combat capable aircraft.

**ECONOMY**

Agriculture accounted for 10.9% of GDP in 2006, industry 30.6% and services 58.5%.

The Namibian economy is heavily dependent on mining and fisheries.

**Overview**

A small open economy closely linked to South Africa, Namibia is classified as an upper middle-income country. The economy is stable and has been characterized by high rates of investment and real GDP growth (averaging about 5.1% during the period 2003–07). Exports account for almost 60% of GDP, with diamonds and other minerals accounting for close to 55% of total exports.

Namibia's small market size, openness and heavy dependence on international trade makes it vulnerable to external shocks such as changes in the terms of trade, external demand and climatic variations. The global economic crisis in 2008 impacted through lower demand for commodity exports (especially diamonds).

Poverty is widespread, running at 28%, and unemployment in 2008 was 36.7%. The inequality rate is the highest in the world (Namibia is ranked last in the world in terms of the Gini coefficient, a measure of income equality) and HIV remains a serious threat to development.

However, the Third National Development Plan aims to address the challenges of poverty, inequality and unemployment. The government is seeking to diversify the economy away from minerals and into tourism and financial services. Namibia is a member of the Southern African Customs Union.

**Currency**

The unit of currency is the *Namibia dollar* (NAD) of 100 cents, introduced on 14 Sept. 1993 and pegged to the South African rand. The rand is also legal tender at parity. Inflation was 10.0% in 2008 and 9.1% in 2009. In May 2005 foreign exchange reserves were US\$333m. Total money supply in Dec. 2003 was N\$7,851m.

**Budget**

The financial year runs from 1 April. In 2008–09 revenues were N\$21,973m. and expenditures N\$22,469m. Tax revenue constituted 91.9% of revenues in 2008–09; current expenditure accounted for 76.9% of expenditures.

**Performance**

The economy contracted by 0.7% in 2009 but there was growth of 4.8% in 2010; total GDP in 2010 was US\$12.2bn.

**Banking and Finance**

The Bank of Namibia is the central bank. Its *Governor* is Ipumbu Wendelinus Shiimi. Assets in June 2010 were N\$12,717.4m. Total assets of other depository corporations (First National Bank of Namibia, Standard Bank of Namibia, Nedbank Namibia, Bank Windhoek, Agribank of Namibia, National Housing Enterprise and the Namibia Post Office Savings Bank) were N\$50,990.5m. in June 2010.

A stock exchange (NSE) is in operation in Windhoek.

**ENERGY AND NATURAL RESOURCES****Environment**

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 1.5 tonnes per capita in 2008.

**Electricity**

In 2007 electricity production was 1.7bn. kWh. Namibia also imports electricity to meet demand (2.1bn. kWh in 2007, mainly from South Africa). Consumption per capita in 2007 was 1,824 kWh.

**Oil and Gas**

Natural gas reserves in 2007 totalled 62bn. cu. metres.

**Minerals**

There are diamond deposits both inshore and off the coast, with production equally divided between the two. Some 1.5bn. carats of diamonds are believed to be lying in waters off Namibia's Atlantic coast. Namibia produced 2.0m. carats in 2004, exclusively of gem quality. Output in 2005 (in tonnes): salt, 573,248; zinc (metal content), 69,368; lead (metal content), 14,320; copper (metal content), 10,157; uranium (metal content), 2,855; silver (metal content), 34; gold (metal content), 2,649 kg.

**Agriculture**

Namibia is essentially a stock-raising country, the scarcity of water and poor rainfall rendering crop-farming, except in the northern and northeastern parts, almost impossible. There were an estimated 800,000 ha. of arable land in 2007 and 5,000 ha. of permanent crops. There were 39 tractors per 10,000 ha. of arable land in 2006. Generally speaking, the southern half is suited for the raising of small stock, while the central and northern parts are more suited for cattle. Guano is harvested from the coast, converted into fertilizer in South Africa and most of it exported to Europe. In 2007 the agricultural population was an estimated 905,000, of which some 252,000 were economically active.

Principal crops (2003, in tonnes): millet, 51,000; maize, 33,000; wheat, 8,000; grapes, 6,000; seed cotton, 5,000; sorghum, 5,000. Livestock (2003 estimates): 2.51m. cattle, 2.37m. sheep, 1.78m. goats, 3m. chickens. In 2003 an estimated 105,000 tonnes of milk and 83,000 tonnes of meat were produced.

**Forestry**

Forests covered 7.66m. ha. in 2005, or 9.3% of the land area.

**Fisheries**

Pilchards, mackerel and hake are the principal fish caught. The catch in 2005 was 552,695 tonnes, of which more than 99% came from marine waters. Conservation policies are in place. The policy aims at ensuring that the country's fisheries resources are utilized on a sustainable basis and also aims to ensure their lasting contribution to the country's economy.

**INDUSTRY**

Of the estimated total of 400 undertakings, the most important branches are food production (accounting for 29.3% of total output), metals (12.7%) and wooden products (7%). The supply of specialized equipment to the mining industry, the assembly of goods from predominantly imported materials and the manufacture of metal products and construction material play an important part. Small industries (including home industries, textile mills, leather and steel goods) have expanded. Products manufactured locally include chocolates, beer, cement, leather shoes, delicatessen meats and game meat products.

**Labour**

Of 431,800 people in employment in 2000, 126,500 were engaged in agriculture, hunting and forestry; 46,300 in community, social and personal service activities; 39,300 in real estate, renting and business activities; and 38,900 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods. In 2000 the unemployment rate was 33.8%.

**INTERNATIONAL TRADE**

Total foreign debt was US\$2.0bn. in Dec. 2009. Export Processing Zones were established in 1995 to grant companies with EPZ status some tax exemptions and other incentives. The Offshore Development Company (ODC) is the flagship of the Export Processing Zone regime. The EPZ regime does not restrict; any investor (local or foreign) enjoys the same or equal advantages in engaging themselves in any choice of business (allowed by law).

### Imports and Exports

In 2007 imports (c.i.f.) were valued at US\$4,026.0m. and exports (f.o.b.) at US\$4,040.3m. Exports in 2007 (in US\$1m.) included diamonds (705), zinc (624), fish (432), uranium ores and concentrates (350), machinery and transport equipment (280), meat products (153). The largest import supplier in 2006 was South Africa with 82.4%; largest export markets: UK, 25.6%; South Africa, 24.6%.

### COMMUNICATIONS

#### Roads

In 2002 the total road network covered 42,237 km, including 4,550 km of national roads. In 2008 there were 107,800 passenger cars in use and 117,400 lorries and vans. There were 368 deaths as a result of road accidents in 2007.

#### Rail

The Namibia system connects with the main system of the South African railways at Ariamsvlei. The total length of the line inside Namibia was 2,628 km of 1,065 mm gauge in 2005. In 2002–03 railways carried 150,000 passengers and 1.9m. tonnes of freight.

#### Civil Aviation

The national carrier is the state-owned Air Namibia. In 2001 the major airport, Windhoek's Hosea Kutako International, handled 379,000 passengers (363,000 on international flights). Eros is used mainly for domestic flights. In 2003 scheduled airline traffic of Namibian-based carriers flew 11m. km, carrying 266,000 passengers (222,000 on international flights).

#### Shipping

Walvis Bay, the busiest port, handled 4,960,000 tonnes of cargo in 2007–08. There is a harbour at Lüderitz which handles mainly fishing vessels. Merchant shipping totalled 3,000 GT in Jan. 2009.

#### Telecommunications

Telecom Namibia is the responsible corporation. In 2008 there were 140,000 main (fixed) telephone lines and 1,052,000 mobile phone subscribers (49.4 per 100 persons). There were 400,000 PCs in use in 2006 and 113,500 internet users in 2008.

### SOCIAL INSTITUTIONS

#### Justice

There is a Supreme Court, a High Court and a number of magistrates' and lower courts. An Ombudsman is appointed. Judges are appointed by the president on the recommendation of the Judicial Service Commission.

The population in penal institutions at 31 Dec. 2007 was 4,064 (194 per 100,000 of national population).

#### Education

Literacy was an estimated 88.5% in 2009 (male, 88.9%; female, 88.1%). Primary education is free and compulsory. In 2007 there were 409,508 pupils at primary schools, 158,162 at secondary

schools and (2006) 13,185 students at institutions of higher education.

In 2010 public expenditure on education came to 8.1% of GDP.

#### Health

There were 45 hospitals (11 private) and 296 health centres and clinics in 2005. In 2006 there were 33 hospital beds per 10,000 population. There were 598 physicians, 113 dentistry personnel and 6,145 nursing and midwifery personnel in 2004.

#### RELIGION

About 75% of the population is Christian (mainly Protestant).

#### CULTURE

##### World Heritage Sites

Namibia has one site on the UNESCO World Heritage List: a large collection of rock engravings at Twyfelfontein (added to the list in 2007).

#### Press

There were four daily newspapers in 2006 with a combined circulation of 28,000.

#### Tourism

In 2005 there were 778,000 visitors who spent US\$348m.

#### DIPLOMATIC REPRESENTATIVES

Of Namibia in the United Kingdom (6 Chandos St., London, W1G 9LU)

*High Commissioner:* George Mbanga Liswaniso.

Of the United Kingdom in Namibia (116 Robert Mugabe Ave., 9000 Windhoek)

*High Commissioner:* Marianne Young.

Of Namibia in the USA (1605 New Hampshire Ave., NW, Washington, D.C., 20009)

*Ambassador:* Martin Andjaba.

Of the USA in Namibia (14 Lossen St., Private Bag 12029, Windhoek)

*Ambassador:* Wanda Nesbitt.

Of Namibia to the United Nations

*Ambassador:* Wilfried Emvula.

Of Namibia to the European Union

*Ambassador:* Hanno Burkhard Rumpf.

# NAURU

Ripublik Naoero  
(Republic of Nauru)

Population, 2002: 10,000

GNI per capita, 2010: US\$6,084

## KEY HISTORICAL EVENTS

Nauru was originally settled by Melanesians and Polynesians. Tradition holds that among the earliest settlers were castaways from another island, probably Kiribati. The name 'Nauru' is a European corruption of 'A-nao-ero', which means 'I am going to the beach to lay my bones'. The island has had little contact with its neighbours, enabling its distinctive language to survive. By the 18th century the society was organized into 12 matrilineal tribes, each headed by a different chief.

The island was discovered by a British captain, John Fearn, in 1798 but was avoided by most ships in subsequent decades because of the region's notoriety for piracy. In the 1830s European whaling ships began using Nauru as a supply port and European settlers arrived. Though small in number, they had a profound impact by introducing alcohol, firearms and disease. An escalation in tribal conflict resulted in a war from 1878–88, killing 500 people or one third of the population. Germany annexed the island in 1888 to protect its trading interests and in the early 1900s agreed a deal to allow the British Pacific Phosphate Company to mine newly discovered phosphates.

Nauru was surrendered to Australian forces in 1914. In 1920 its administration was formally passed to the UK under a League of Nations mandate but in practice Australia continued to run the island. Australia, Britain and New Zealand set up and jointly ran the British Phosphate Commission, which controlled the phosphate mining industry. During the Second World War Japanese forces occupied from 1942–45, deporting 1,200 Nauruans to Truk (now Chuuk, in present-day Micronesia) as forced labour. Only 737 of the deportees returned. In 1947 Nauru became a UN trust, with Australia, New Zealand and the UK as trustees.

On 31 Jan. 1968 the country gained independence. The government of President Hammer DeRoburt took over the phosphate industry, continuing to run it as a communal trust. Phosphate prices rose and the country enjoyed a boom throughout the 1970s, achieving one of the world's highest rates of GDP per capita. However, mismanagement of the revenues, poor investment decisions and a lack of political accountability led to problems when prices fell in 1988. In 1993 Australia and the

UK paid US\$73m. compensation for environmental damage during mining. Nauru developed an offshore banking industry in the 1990s but was accused of money-laundering by the international community. In the mid-1990s the economic crisis deepened with the collapse of the Bank of Nauru and in 2000 the OECD's financial watchdog (Financial Action Task Force on Money Laundering, or FATF) blacklisted the country. In 2001 Nauru agreed to hold detained asylum seekers on behalf of Australia and has subsequently relied heavily on Australian aid.

The 21st century has seen much political turmoil. During 2003 there were six changes of president and in Sept. 2004 President Ludwig Scotty declared a state of emergency. Following regulatory tightening of the offshore banking industry, Nauru was removed from the FATF blacklist in 2005. The island continues to face severe challenges, including a health crisis arising from the world's highest obesity rate.

## TERRITORY AND POPULATION

Nauru is a coral island surrounded by a reef situated 0° 32' S. lat. and 166° 56' E. long. Area, 21.2 sq. km. At the 2002 census the population totalled 10,065 (5,136 males), of whom 7,572 were indigenous Nauruans. Population density, 475 per sq. km. The *de facto* capital is Yaren.

Nauruan is the official language, although English is widely used for government purposes.

## SOCIAL STATISTICS

2006 estimated births, 120; 2002 estimated deaths, 75. Infant mortality (2005), 25 (per 1,000 live births). Annual population growth rate, 1998–2008, 0.1%; fertility rate, 2008, 2.9 births per woman.

## CLIMATE

A tropical climate, tempered by sea breezes, but with a high and irregular rainfall, averaging 82" (2,060 mm). Average temperature, Jan. 81°F (27.2°C), July 82°F (27.8°C). Annual rainfall 75" (1,862 mm).

## CONSTITUTION AND GOVERNMENT

A Legislative Council was inaugurated on 31 Jan. 1966. The constitution was promulgated on 29 Jan. 1968 and was amended on 17 May 1968. An 18-member Parliament is elected on a three-yearly basis.

## National Anthem

'Nauru bwiiema, ngabena ma auwe' ('Nauru our homeland, the country we love'); words by M. Hendrie, tune by L. H. Hicks.

## RECENT ELECTIONS

At the parliamentary elections of 19 June 2010, President Marcus Stephen's supporters won 9 of the 18 seats. On 15 Nov. 2011 Sprent Dabwido was elected president by parliament by 9 votes to 8.

## CURRENT GOVERNMENT

In March 2012 the government comprised:

*President, Cabinet Chairman and Minister of Public Service, Foreign Affairs and Trade, Police and Emergency Services, and Home Affairs:* Sprent Dabwido; b. 1972 (sworn in 15 Nov. 2011).

*Minister for Finance and Sustainable Development, Justice and Nauru Rehabilitation Corporation:* David Adeang. *Telecommunications, Nauru Phosphate Royalties Trust and Nauru Utilities Corporation:* Shadlog Bernicke. *Commerce, Industry, Environment and Fisheries:* Rykers Solomon. *Education, Health and Sport:* Valdon Dowiyogo. *Transport and the Republic of Nauru Phosphate Company:* Godfrey Awaire Thoma.

## CURRENT LEADERS

### Sprent Dabwido

#### Position

President

#### Introduction

Sprent Dabwido became Nauru's third president in less than a week on 15 Nov. 2011, following the resignation of Marcus Stephen amid corruption allegations and the removal of Freddy Pitcher by a parliamentary vote of no confidence. In accordance with the constitution Dabwido became both head of government and head of state.

#### Early Life

Born on 16 Sept. 1972 Sprent Dabwido was elected to parliament at the 2004 general election when he won the seat of Meneng. He was re-elected in 2007 and 2008, and in 2009 he was appointed minister of telecommunications in Stephen's government. In this role Dabwido oversaw the introduction of a mobile telephone system to Nauru and retained his Meneng seat at the June 2010 general election.

On 15 Nov. 2011 Dabwido cut his ties with the ruling faction in parliament and joined the opposition in support of a motion of no confidence that brought down Pitcher. Dabwido was subsequently elected president by 9 votes to 8 in a parliamentary vote.

#### Career in Office

Dabwido represented the Pacific Small Island Developing States at the UN Climate Change Conference in Durban in Dec. 2011. He highlighted the problem of rising sea levels for Pacific island nations and called for a legally binding protocol to complement the existing Kyoto Protocol and Bali Action Plan.

His government is open to talks with Australia should the administration in Canberra change its mind over a decision not to re-open two refugee processing centres on Nauru.

## ECONOMY

### Overview

The exhaustion of phosphate deposits has seen GDP per capita recede since peaking in the 1970s and 1980s. The economy is now dependent on external aid and imports owing to its narrow resource base. Attempts to diversify the economy into offshore banking during the 1990s proved unsuccessful and the country became a haven for money laundering, resulting in blacklisting by international bodies (including the Financial Action Task Force) until 2005. In 2001 Nauru signed an agreement with Australia to house asylum seekers on the island, generating millions of dollars in revenue. However, this agreement was terminated in 2008.

New phosphate contracts came into force in 2008 resulting in the resumption of growth-driving exports. Mining of deeper, secondary reserves has commenced and the long-term future of the economy depends on the conversion of this mineral wealth into alternative sources of income. Further challenges include reducing public debt and promoting sound public and private investment.

### Currency

The Australian dollar is in use.

### Budget

The fiscal year is 1 July–30 June. Revenues in 2005–06 were \$A27.0m. and expenditures \$A26.4m.

### Performance

Real GDP growth was –27.3% in 2007 as a result of low construction spending on phosphate facilities and the suspension of phosphate mining owing to storm damage to port infrastructure, combined with a contracted public sector.

### Banking and Finance

The Bank of Nauru is a state bank and there is a commercial bank, Hampshire Bank and Trust Inc.

Nauru was one of three countries named in a report in June 2005 as failing to co-operate in the fight against international money laundering. In Oct. 2005 Nauru was delisted and its formal monitoring was ended a year later. The Financial Action Task Force on Money Laundering was set up by the G7 group of major industrialized nations.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 14.7 tonnes per capita in 2008.

### Electricity

Installed capacity in 2007 was an estimated 11,000 kW; production was estimated at 35m. kWh in 2007.

### Minerals

A central plateau contained high-grade phosphate deposits. The interests in the phosphate deposits were purchased in 1919 from the Pacific Phosphate Company by the UK, Australia and New Zealand. In 1967 the British Phosphate Corporation agreed to hand over the phosphate industry to Nauru for approximately \$A20m. over three years. Nauru took over the industry in July 1969, and the profits from the mining meant that Nauru had, for a brief period, one of the highest rates of GDP per capita in the world. However, production declined (from 1.67m. tonnes in 1985–86 to 162,000 tonnes in 2001–02) and the primary reserves were exhausted in 2003. Mining of a deeper layer of secondary phosphate began in 2006, and it is hoped that this development might resuscitate Nauru's ailing economy. Production was an estimated 84,000 tonnes in 2006. In May 1989 Nauru filed a claim against Australia for environmental damage caused by the mining. In Aug. 1993 Australia agreed to pay compensation of \$A73m. In March 1994 New Zealand and the UK each agreed to pay compensation of \$A12m.

### Agriculture

In 2007 about 1,000 people were economically active in agriculture. In 2009 the crop of coconuts was an estimated 2,200 tonnes. Livestock (2009 estimates): pigs, 3,000.

### Fisheries

The catch in 2005 was 39 tonnes.

## INTERNATIONAL TRADE

### Imports and Exports

Imports are food, building construction materials, machinery for the phosphate industry and medical supplies. Phosphate accounts for virtually all of Nauru's exports.

Imports, 2005, \$A33.7m.; exports, \$A5.0m. The leading import sources in 2005 were Korea, Australia and the USA; the main export markets in 2005 were Korea, Canada and the UK.

## COMMUNICATIONS

### Roads

In 2002 there were 30 km of roads, 24 km of which were paved.

### Civil Aviation

There is an airfield on the island capable of accepting medium size jet aircraft. The national carrier, Our Airline (formerly Air Nauru), is a wholly-owned government subsidiary. It has one aircraft. In 2006 it flew to Brisbane, Honiara, Tarawa and Majuro. In 2003 Our Airline flew 3m. km, carrying 156,000 passengers (all on international flights).

### Shipping

Deep offshore moorings can accommodate medium-size vessels. Shipping coming to the island consists of vessels under charter to

the phosphate industry or general purpose vessels bringing cargo by way of imports.

#### Telecommunications

There were 1,800 main telephone lines in operation in 2008.

### SOCIAL INSTITUTIONS

#### Justice

The highest Court is the Supreme Court of Nauru. It is the Superior Court of record and has the jurisdiction to deal with constitutional matters in addition to its other jurisdiction. There is also a District Court which is presided over by the Resident Magistrate who is also the Chairman of the Family Court and the Registrar of Supreme Court. The laws applicable in Nauru are its own Acts of Parliament. A large number of British statutes and much common law has been adopted insofar as is compatible with Nauruan custom.

#### Education

Attendance at school is compulsory between the age of six and 16. In 2007–08 there were 1,000 children in pre-primary schools with 40 teachers, 1,000 pupils in primary schools with 100 teachers and 1,000 pupils in secondary education with (2006–07) 30 teachers. There is a technical school and also a mission school. Scholarships are available for Nauruan children to receive secondary and higher education and vocational training in Australia and New Zealand.

In 2007 public expenditure on education came to an estimated 7.5% of total government spending.

#### Health

In 2004 there were ten physicians and 63 nursing and midwifery personnel.

Nauru has the highest percentage of overweight people of any country, with 94% overweight or obese according to a 2006 World Health Organization survey.

#### RELIGION

The population is mainly Roman Catholic or Protestant.

#### DIPLOMATIC REPRESENTATIVES

Of Nauru in the United Kingdom

*Honorary Consul:* Martin W. L. Weston (Romshed Courtyard, Underriver, Nr Sevenoaks, Kent, TN15 0SD).

Of the United Kingdom in Nauru

*High Commissioner:* Vacant (resides in Suva, Fiji Islands).

*Chargé d'Affaires a.i.:* Timothy Smart.

Of Nauru in the USA and to the United Nations (800 Second Ave., New York, NY 10017)

*Ambassador:* Marlene Inemwin Moses.

Of the USA in Nauru

*Ambassador:* Frankie A. Reed (resides in Suva, Fiji Islands).

## KEY HISTORICAL EVENTS

Nepal is an independent Himalayan republic located between India and the Tibetan region of China. From the 8th to the 11th centuries many Buddhists fled to Nepal from India, which had been invaded by Muslims. In the 18th century Nepal was a collection of small principalities (many of Rajput origin) and the three kingdoms of the Malla dynasty: Kathmandu, Patan and Bhadgaon. In central Nepal lay the principality of Gurkha (or Gorkha); its ruler after 1742 was Prithvi Narayan Shah, who conquered the small neighbouring states. Fearing his ambitions, in 1767 the Mallas requested armed support from the British East India Company. In 1769 these forces were withdrawn and Gurkha was then able to conquer the Malla kingdoms and unite Nepal as one state with its capital at Kathmandu. In 1846 the Rana family became the effective rulers of Nepal, establishing the office of prime minister as hereditary. In 1860 Nepal reached agreement with the British in India whereby Nepali independence was preserved and the recruitment of Gurkhas to the British army was sanctioned.

In 1950 the Shah royal family allied itself with Nepalis abroad to end the power of the Ranas. The last Rana prime minister resigned in Nov. 1951, the king having proclaimed a constitutional monarchy in Feb. 1951. A new constitution, approved in 1959, led to confrontation between the king and his ministers; it was replaced by one less liberal in 1962. In Nov. 1990 the king relinquished his absolute power. The Maoists abandoned parliament in 1996 and launched a 'people's war' in the aim of turning the kingdom into a republic. This resulted in over 13,000 deaths over a ten-year period.

In June 2001 the king and queen, along with six other members of the royal family, were shot dead by their son and heir to the throne, Crown Prince Dipendra, allegedly following a dispute over his choice of bride. Prince Dipendra then shot himself. The former monarch's younger brother, Gyanendra, was crowned king. In Nov. 2001 King Gyanendra declared a state of emergency and ordered troops to contain a fresh outbreak of Maoist violence. The government lifted the state of emergency in Aug. 2002.

In Jan. 2003 the government and Maoist rebels reached a ceasefire agreement, seen as a first step towards bringing to an end the rebels' seven-year insurgency. In Feb. 2005 King Gyanendra dismissed his government and once more declared a state of emergency, taking control of the country and suspending democracy for three years. He lifted the state of emergency on 29 April 2005. In April 2006 he agreed to a return to parliamentary democracy after more than two weeks of unrest. On 21 Nov. 2006 a peace agreement was signed between the government and the country's Maoist rebels, bringing a formal end to the decade-long insurgency. In Dec. 2007 an agreement was made to abolish the monarchy and establish Nepal as a republic. On 28 May 2008 the newly-elected Constituent Assembly officially inaugurated the Federal Democratic Republic of Nepal and began the process of creating a new constitution.

## TERRITORY AND POPULATION

Nepal is bounded in the north by China (Tibet) and the east, south and west by India. Area 147,181 sq. km; 2011 provisional census population, 26,620,809 (13,693,378 females); density 180.9 per sq. km. In 2005, 84.2% of the population were rural.

The UN gives a projected population for 2015 of 32.58m.

The country is divided into five developmental regions and 75 administrative districts. Area, population and administrative centres are:

Region	Sq. km	Population (2011, provisional)	Administrative centre
Central Region	27,410	9,713,702	Kathmandu
East Region	28,456	5,834,182	Dhankuta
West Region	29,398	4,945,190	Pokhara
Mid-West Region	42,378	3,584,386	Surkhet
Far West Region	19,539	2,543,349	Dipayal

Capital, Kathmandu; population (2001) 671,846. Other towns include (2001 census population): Biratnagar, 166,674; Lalitpur, 162,991; Pokhara, 156,312.

The indigenous people are of Tibetan origin with a considerable Hindu admixture. The Gurkha clan became predominant in 1559 and has given its name to men from all parts of Nepal. There are 18 ethnic groups, the largest being: Newars, Indians, Tibetans, Gurungs, Mogars, Tamangs, Bhotias, Rais, Limbus and Sherpas. The official language is Nepalese but there are 20 new languages divided into numerous dialects.

## SOCIAL STATISTICS

2008 estimates: births, 731,000; deaths, 185,000. Estimated rates per 1,000 population, 2008: births, 25.4; deaths, 6.4. Annual population growth rate, 2000–08, 2.1%. Expectation of life was 65.6 years for males and 66.9 years for females in 2007. Infant mortality, 2005, 56 per 1,000 live births; fertility rate, 2008, 2.9 births per woman.

## CLIMATE

Varies from cool summers and severe winters in the north to sub-tropical summers and mild winters in the south. The rainfall is high, with maximum amounts from June to Sept., but conditions are very dry from Nov. to Jan. Kathmandu, Jan. 10°C, July, 25°C. Average annual rainfall, 1,424 mm.

## CONSTITUTION AND GOVERNMENT

Following years of political turbulence an interim constitution was approved in Dec. 2006, effectively removing King Gyanendra as the head of the state.

On 23 Dec. 2007 the interim government declared the establishment of the Federal Democratic Republic of Nepal, with the abolition of the monarchy approved by parliament five days later. This change entered into force on 28 May 2008 at the first meeting of a 601-member *Constituent Assembly* (with 240 seats filled on a first-past-the-post system, 335 filled through proportional representation and 26 nominated by the cabinet). The Constituent Assembly is charged with drafting a new constitution.

#### National Anthem

'Sayaun thunga phoolka hami eutai mala Nepali' ('From hundreds of flowers, we are one garland Nepali'); words by Byakul Maila, tune by Ambar Gurung.

#### RECENT ELECTIONS

In elections to the Constituent Assembly held on 10 April 2008 the Communist Party of Nepal (Maoist) (CPN-M) won 220 of the 575 elected seats (26 seats are reserved for nominated members). The Nepali Congress won 110 seats, the Communist Party of Nepal (Unified Marxist-Leninist) 103, the Madhesi Jana Adhikar Forum/Madhesi People's Rights Forum 52 and the Tarai-Madhes Loktantrik Party 20. The remaining 70 seats were shared among fringe parties and independents.

Following the resignation of Jhalanath Khanal, Baburam Bhattarai of the Unified Communist Party of Nepal (Maoist) was elected prime minister by parliament on 28 Aug. 2011 with 340 votes. His only rival, Ram Chandra Poudel of the Nepali Congress, received 235 votes.

#### CURRENT GOVERNMENT

*President:* Ram Baran Yadav; b. 1948 (Nepali Congress; sworn in 23 July 2008).

*Vice President:* Parmanand Jha.

In March 2012 the cabinet comprised:

*Prime Minister:* Baburam Bhattarai; b. 1954 (Unified Communist Party of Nepal (Maoist); sworn in 29 Aug. 2011).

*Deputy Prime Ministers:* Narayan Kaji Shrestha (also *Minister of Foreign Affairs*); Bijay Kumar Gachhadar (also *Minister of Defence and Home Affairs*).

*Minister of Agriculture and Co-operatives:* Nandan Kumar Dutta. *Commerce and Supplies:* Lekh Raj Bhatta. *Education:* Dinanath Sharma. *Energy:* Posta Bahadur Bogati. *Environment:* Hem Raj Tater. *Federal Affairs, Constituent Assembly, Parliamentary Affairs and Culture:* Gopal Kiranti. *Finance:* Barsha Man Pun. *Forests and Soil Conservation:* Mohammad Wakil Musalman. *General Administration:* Ram Kumar Yadav. *Health and Population:* Rajendra Mahato. *Industry:* Anil Kumar Jha. *Information and Communications:* Jaya Prakash Prasad Gupta. *Irrigation:* Mahendra Prasad Yadav. *Labour and Transport Management:* Sarita Giri. *Land Reform and Management:* Bhim Prasad Gautam. *Law and Justice:* Brijesh Kumar Gupta. *Local Development:* Top Bahadur Rayamajhi. *Peace and Reconstruction:* Satya Pahadi. *Physical Planning and Works:* Hridayesh Tripathi. *Science and Technology:* Kalpana Dhamala. *Tourism and Civil Aviation:* Lokendra Bista Magar. *Women and Children, and Social Welfare:* Dan Bahadur Chaudhary Kurmi. *Youth and Sports:* Kamala Rokka.

*Office of the Prime Minister and Council of Ministers:*

<http://www.opmcm.gov.np>

#### CURRENT LEADERS

##### Ram Baran Yadav

*Position*  
President

##### Introduction

Ram Baran Yadav became president in July 2008 after winning a comfortable majority in the first presidential elections since the

country became a federal democratic republic. Yadav's role is largely ceremonial, including the performance of traditional Hindu duties previously carried out by the now abolished monarchy.

##### Early Life

Ram Baran Yadav was born on 4 Feb. 1948 to an ethnic Madhesi family in the village of Sapahi, in the Dhanusha District. He studied medicine at the School of Tropical Medicine (Kolkata) and the Calcutta Medical College. He obtained his postgraduate degree from the Institute of Medical Education and Research in Chandigarh, India. Upon returning to Nepal, Yadav ran his own medical practice in Janakpur.

While in India, Yadav had become involved in the Nepali pro-democracy movement and in 1980 he joined the Nepali Congress (NC) party. He participated in the 1990 Jana Andolan (People's Movement) but was arrested and jailed for three months until the implementation of a democratic constitution. Yadav was elected to parliament as an NC candidate in 1991 and served as minister of health for three years in the administration of Girija Prasad Koirala.

At the 1999 general election Yadav was re-elected and continued as health minister, establishing a healthcare system in rural Nepal. He then became general secretary of the NC. He won the seat of Dhanusa-5 at elections for the constituent assembly in April 2008.

Yadav contested the presidential election of July 2008 on an NC ticket but fell four votes short of the 298 needed to win a simple majority. In a second round of voting he won 308 of 590 votes cast. Yadav's victory came as an upset to the Communist Party of Nepal (Maoist) (CPN-M) who were seeking to form the government after their win in the April 2008 Constituent Assembly election. Yadav was sworn into office on 23 July 2008.

##### Career in Office

Yadav prioritized the drafting of a new democratic constitution in a bid to end Nepal's long track record of political violence, and has been keen to maintain friendly ties with both India and China. However, he faced opposition from the CPN-M whose leader, Pushpa Kamal Dahal (Prachanda), led a coalition government from Aug. 2008 until May 2009 when he resigned in protest at Yadav's blocking of his controversial attempt to dismiss the country's army head. Madhav Kumar Nepal of the Communist Party (Unified Marxist-Leninist) was sworn in as the prime minister of a new coalition, excluding the CPN-M, later in the month. The CPN-M demanded a return to power, claiming that Yadav had acted unconstitutionally, and kept up prolonged political pressure on Madhav Kumar Nepal until he resigned as prime minister in June 2010. The previous month the coalition government and Maoist opposition had agreed to extend a deadline for drafting a new constitution until May 2011. Repeated efforts to elect a new premier were unsuccessful until Feb. 2011 when, following the withdrawal of Pushpa Kamal Dahal and then Ram Chandra Poudel of the NC as candidates, Jhalanath Khanal of the Communist Party of Nepal (Unified Marxist-Leninist) was approved by parliament and sworn in by Yadav. In a further premiership change in Aug. 2011 Khanal resigned after the government and opposition failed to meet the May deadline for agreeing a new constitution and was replaced by Baburam Bhattarai of the Unified Communist Party of Nepal (Maoist).

##### Baburam Bhattarai

*Position*  
Prime Minister

##### Introduction

Baburam Bhattarai became prime minister in Aug. 2011. His principal challenge has been to draft a new constitution by the scheduled date of 28 May 2012 (exactly four years after Nepal became a republic).

### Early Life

Baburam Bhattarai was born on 18 June 1954 in Khopleng, Gorkha District. As a schoolboy he achieved among the nation's highest test results and graduated in architecture at the Chandigarh College of Architecture in 1977. He completed a masters degree in town and country planning from the School of Planning and Architecture, New Delhi in 1979 and received a doctorate in regional development planning from Jawaharlal Nehru University, New Delhi in 1986. While in India he founded the All India Nepalese Students' Association and in 1981 joined the Communist Party of Nepal (CPN). On his return to Nepal he became a Politburo Member of CPN (Unity Centre) and later of the Communist Party of Nepal (Maoist), which has in the meantime become the Unified Communist Party of Nepal (Maoist).

On 4 Feb. 1996 Bhattarai submitted a 40-point memorandum to the government on behalf of the United People's Front. Shortly afterwards he went into hiding when the Maoists launched their armed insurgency, emerging in 2003 as the Maoist party spokesman. He was a leading negotiator on the Nov. 2006 Comprehensive Peace Accord. In 2008 he was elected to parliament representing Gorkha constituency no. 2 and served as finance minister in Pushpa Kamal Dahal's short-lived government.

Parliament elected Bhattarai prime minister on 28 Aug. 2011 after the political parties failed to form a consensus government following Jhalanath Khanal's resignation. Bhattarai received 340 of the 575 votes cast. He was sworn in the following day.

### Career in Office

Bhattarai's first challenge was to draft a new constitution before 28 May 2012, at which point the Constituent Assembly was scheduled to be dissolved after a Nov. 2011 deadline was missed. In Nov. 2011 he secured the support of opposition parties and his own party hard-liners for a programme that will integrate into the army a third of the nation's 19,000 former Maoist fighters, while offering re-training and financial assistance to the rest. Securing the future of the fighters was seen as a major component of the peace process.

Days after Bhattarai's election the Maoists kick-started the arms handover process, a major step towards completing the five-year peace process. Bhattarai must also tackle the high poverty rate and maintain good relations with India while ensuring Nepal's independence in internal affairs.

### DEFENCE

The then King was formerly commander-in-chief of the armed forces, but he was stripped of the position in May 2006. The cabinet now has the power to appoint the army chief.

Defence expenditure in 2008 totalled US\$176m. (US\$6 per capita), representing 3.5% of GDP.

As at July 2010, 5,097 personnel (including 4,072 troops and 961 police) were deployed in UN peacekeeping operations.

### Army

Strength (2007) 69,000, and there is also a 62,000-strong paramilitary police force (15,000 armed).

### Air Force

The Army's air wing has no combat capable aircraft. Personnel, 2007, 320.

### ECONOMY

Agriculture accounted for 35.1% of GDP in 2006, industry 17.4% and services 47.5%.

### Overview

In the early 2000s the economy underperformed as a result of political conflict and internal unrest. Tourism, an important source of earnings, also suffered with visitor numbers falling below the peak of the late 1990s. Since conflict ended in 2006

annual growth has averaged about 4% but political tensions and poor security remain obstacles to economic potential.

Agriculture is the principal area of activity, employing around 80% of the workforce and accounting for a third of GDP. Apart from agricultural land and forests, exploitable natural resources include mica, hydropower and tourism. Remittances accounted for nearly 22% of GDP in 2009. As a result of the global financial crisis, remittances and exports have declined while imports have increased.

Nepal is the poorest country in South Asia, with high unemployment and the highest inequality level. It is ranked 157th of 187 countries on the UN Human Development Index, although poverty levels fell from 42% in 1995 to 24.7% in 2008. An inadequate infrastructure, frequent power shortages, a poor business climate and troublesome labour relations are impediments to growth.

### Currency

The unit of currency is the *Nepalese rupee* (NPR) of 100 *paisas*. 50 *paisas* = 1 *mohur*. Inflation was 7.7% in 2008 and 13.2% in 2009. Foreign exchange reserves were US\$1,478m. in July 2005 and gold reserves totalled 129,000 troy oz. Total money supply in March 2009 was NRs 177,682m.

### Budget

Budgetary central government revenue totalled NRs 102,188m. in 2006–07 (NRs 84,100m. in 2005–06) and expenditure NRs 116,606m. (NRs 94,881m. in 2005–06). Main sources of revenue, 2006–07 (NRs 1m.): taxes, 71,127 (including: taxes on goods and services, 36,434; taxes on international trade and transactions, 16,708); grants, 15,801. Major items of expenditure, 2006–07 (NRs 1m.): general public services, 27,151; economic affairs, 26,571; education, 21,388; defence, 10,958.

VAT is 13%.

### Performance

Real GDP growth was 4.4% in 2009 and 4.6% in 2010. Nepal's total GDP in 2010 was US\$15.7bn.

### Banking and Finance

The Central Bank is the bank of issue (*Governor*, Dr Yuvraj Khatiwada). In 2002 there were four domestic commercial banks (Kumari Bank; Nepal Bank; Nepal Industrial and Commercial Bank; Rastriya Banijya Bank), ten joint-venture banks and four development finance organizations (Agricultural Development Bank; Nepal Development Bank; Nepal Housing Development Finance Corporation; Nepal Industrial Development Corporation).

There is a stock exchange in Kathmandu.

### ENERGY AND NATURAL RESOURCES

#### Environment

Nepal's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

#### Electricity

Installed capacity was approximately 0.6m. kW in 2006–07. Production in 2006–07 was an estimated 2.81bn. kWh (over 99% hydro-electric), with consumption per capita 109 kWh.

#### Minerals

Production (in tonnes), 2005: limestone, 263,701; red clay, 35,484; agricultural lime (2003), 13,025; coal, 9,289; talc, 5,832; salt, 2,000.

#### Agriculture

Agriculture is the mainstay of the economy, providing a livelihood for over 90% of the population and accounting for 39% of GDP. In 2002 there were about 3.2m. ha. of arable land and 94,000 ha. of permanent crops. Cultivated land accounts for 26.5% of land use; forest and woodland 42.4%. Crop production (2003, in 1,000

tonnes): rice, 4,155; sugarcane, 2,250; potatoes, 1,480; maize, 1,441; wheat, 1,344; millet, 288.

Livestock (2002); cattle, 6-98m.; goats, 6-61m.; buffaloes, 3-70m.; pigs, 934,000; sheep, 840,000; chickens, 21m.

Livestock products (2003 estimates, in 1,000 tonnes): buffalo meat, 130; beef and veal, 48; goat meat, 39; poultry meat, 15; buffalo's milk, 816; cow's milk, 353; goat's milk, 64; eggs, 27.

### Forestry

In 2005 the area under forests was 3-64m. ha., or 25-4% of the total land area. There are eight national parks, covering 1m. ha., five wildlife reserves (170,490 ha.) and two conservation areas (349,000 ha.). Timber production was 13-88m. cu. metres in 2007, mainly for use as fuelwood and charcoal. Expansion of agricultural land has led to widespread deforestation.

### Fisheries

The catch in 2005 was 19,983 tonnes, exclusively from inland waters.

## INDUSTRY

In 2008-09 manufacturing accounted for 6-8% of GDP. In 2006-07 there were 158 manufacturing establishments with 200 or more staff employing 71,409 people. Production (2007 unless otherwise stated): cement, 1,060,490 tonnes; raw sugar, 140,000 tonnes; soap (2005-06), 55,000 tonnes; jute fibres, 17,000 tonnes; paper and paperboard, 13,000 tonnes; tea, 12,200 tonnes; sawnwood, 630,000 cu. metres; plywood, 30,000 cu. metres; spirits and liqueurs (2007-08), 10-5m. litres; beer (2005-06), 26-0m. litres; cigarettes, 6,081m. units; clay bricks, 12-7m. units; shoes, 10m. pairs.

### Labour

The estimated labour force in 2009 totalled 131,315,000 (55% males).

## INTERNATIONAL TRADE

External debt was an estimated US\$3,285m. in 2005.

### Imports and Exports

Imports (c.i.f.) in 2010 totalled US\$5,127-5m. and exports (f.o.b.) US\$834-0m. The main import suppliers in 2004 were: India (43-0%), China (10-0%), UAE (10-0%), Saudi Arabia (4-4%). The leading export markets in 2004 were: India (48-8%), USA (22-3%), Germany (8-5%), UK (2-8%).

Principal import commodities are petroleum products, transport equipment and parts, chemical fertilizer and raw wool. Principal export commodities are carpets, clothing, leather goods, pulses, raw jute and jute goods, and handicrafts. Hand-knotted woollen carpets are the largest overseas export item constituting almost 32% of foreign exchange earnings.

## COMMUNICATIONS

### Roads

In 2006 there were 16,834 km of roads, of which 17% were paved.

### Rail

59 km (762 mm gauge) connect Jayanagar on the North Eastern Indian Railway with Janakpur. 653,000 passengers and 9,151 tonnes of freight were carried in 1994.

### Civil Aviation

There is an international airport (Tribhuvan) at Kathmandu. The national carrier is the state-owned Nepal Airlines (formerly known as Royal Nepal Airlines). It operates domestic services and in 2003 flew to Bangalore, Bangkok, Delhi, Dubai, Hong Kong, Kuala Lumpur, Mumbai, Osaka, Shanghai and Singapore. In 2004 Kathmandu handled 2,066,950 passengers (1,140,660 on international flights) and 15-3m. tonnes of freight. In 2003 scheduled airline traffic of Nepali-based carriers flew 8m. km, carrying 356,000 passengers (279,000 on international flights).

## Telecommunications

In 2008 there were 805,100 main (fixed) telephone lines in Nepal and mobile phone subscribers numbered 4,200,000 (14-6 per 100 persons). There were 132,000 PCs in use in 2005 and 499,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The Supreme Court Act established a uniform judicial system, culminating in a supreme court of a Chief Justice and no more than six judges. Special courts to deal with minor offences may be established at the discretion of the government. The King previously had the power to appoint the Chief Justice, but this power passed to the prime minister under the temporary constitution signed in Dec. 2006.

The death penalty was abolished in 1997. The population in penal institutions in Jan. 2008 was approximately 6,700 (24 per 100,000 of national population).

### Education

The adult literacy rate in 2009 was estimated 59-1% (72-0% among males but only 46-9% among females).

In 2007 there were 4,515,059 pupils and 112,827 teaching staff in primary schools and 1,998,990 pupils in secondary schools with (in 2008) 56,294 teaching staff. There were 320,844 students in tertiary education in 2007 with 9,932 academic staff. The oldest and largest university in Nepal is Tribhuvan University, which was established in 1959.

In 2009 public expenditure on education came to 4-7% of GDP and 19-5% of total government spending.

### Health

There were 1,259 physicians and 6,216 nurses in 2001. In 2000 there were 133 hospitals, 180 primary health care centres and 711 health posts.

## RELIGION

Nepal is a Hindu state. Hinduism was the religion of 82-8% of the people in 2001. Buddhists comprise 8-9% and Muslims 4-2%. Christian missions are permitted, but conversion is forbidden.

## CULTURE

### World Heritage Sites

Nepal has four sites on the UNESCO World Heritage List: Sagarmatha National Park (inscribed on the list in 1979); Kathmandu Valley (1979 and 2006); Royal Chitwan National Park (1984); and Lumbini, the Birthplace of the Lord Buddha (1997).

### Press

In 2008 there were 298 daily newspapers, including the official English-language *Rising Nepal*, 25 bi-weeklies, 1,442 weeklies and 273 fortnightlies. Press censorship was relaxed in 1991, but following the imposition of a state of emergency in 2005 the press was subjected to total censorship.

### Tourism

Foreign tourists visiting Nepal numbered 361,200 in 2001, down from 463,600 in 2000, largely as a consequence of the massacre of the royal family and an upsurge in Maoist rebel violence. They have since returned to and surpassed former levels with 526,700 tourists in 2007, an increase of 37-2% on 2006. Gross foreign exchange earnings came to US\$230-6m. in 2007, an increase of 41-7% on the previous year. In 2007, 24,700 hotel beds were available. Tourism accounts for approximately 4% of GDP.

### Festivals

Hindu, Buddhist and traditional festivals crowd the Nepali lunar calendar. Dasain (Sept./Oct.) is the longest and most widely observed festival in Nepal. The 15 days of celebration include

Dashami, when family elders are honoured. Tihar (Oct./Nov.) celebrates the Hindu goddess Laxmi. During the first three days crows, dogs and cows are worshipped, followed by the spirit, or self. It concludes with Bhai Tika ('Brother's Day'). Buddha Jayanti (May/June) remembers the birth, enlightenment and death of the Buddha. Sherpas gather at Tengboche Monastery near Mount Everest in May to observe Mani Rimdu with meditation, mask dances and Buddhist ceremonies.

#### DIPLOMATIC REPRESENTATIVES

Of Nepal in the United Kingdom (12A Kensington Palace Gdns, London, W8 4QU)

*Ambassador:* Dr Suresh Chandra Chalise.

Of the United Kingdom in Nepal (Lainchaur, Kathmandu, POB 106)

*Ambassador:* John Tucknott, MBE.

Of Nepal in the USA (2131 Leroy Pl., NW, Washington, D.C., 20008)

*Ambassador:* Shankar Prasad Sharma.

Of the USA in Nepal (Maharajguni, Kathmandu)  
*Ambassador:* Scott H. Delisi.

Of Nepal to the United Nations  
*Ambassador:* Gyan Chandra Acharya.

Of Nepal to the European Union  
*Ambassador:* Pramesh Kumar Hamal.

# THE NETHERLANDS

Koninkrijk der Nederlanden  
(Kingdom of the Netherlands)

*Capital:* Amsterdam

*Seat of government:* The Hague

*Population projection, 2015:* 16.85m.

*GNI per capita, 2011:* (PPP\$) 36,402

*HDI/world rank:* 0.910/3

## KEY HISTORICAL EVENTS

Flint tools found in the Maastricht area have been estimated to be 250,000 years old. The first definable culture (c. 3000 BC) was the Late Stone Age 'Funnel-neck Beaker' culture, named after the objects made by a people known for their monolithic burial monuments. The environment of the 'Low Countries' affected the behaviour of its earliest inhabitants, as demonstrated by the *terpen*—islands of earth and clay—built by the autochthonous Frisians (Frisii) c. 500 BC as protection from the sea.

The Romans encountered Celtic tribes to the west and south of the Rhine and Germanic tribes, such as the Frisii, to the north and east. In the 1st century BC Julius Caesar attested to the resistance of the Celtic Eburones and Aduatuci. Roman power beyond the Rhine was limited to isolated forts and client kingdoms.

In the 3rd century AD the stagnant Roman borders began to crumble as military posts were abandoned. Among the most prominent of the encroaching Germanic tribes were the Franks, who settled at first in Toxandria (modern Brabant). Like many 'barbarian' tribes, the Franks entered into agreements with Rome, settling and guarding the border region and assimilating Roman culture. The Frisians became important traders, holding strategic territory between the German (North) Sea and the Meuse and Rhine rivers. With the collapse of Roman government in Gaul and the Rhine in the 5th century, the Franks extended their power, centred on Austrasia (the central Rhine region). The spread of Christianity in the 7th century, first from the bishoprics

of Arras, Tournai and Cambrai, assisted Frankish expansion into the northern Low Countries, where the missionary bishopric of Utrecht was established.

Viking raids on the North Sea coast devastated the flourishing Frisian economy. The Frisian trading centre of Dorestad was destroyed four times between 834–37 by raiders seeking Carolingian silver. Frisia came under Frankish domination during the reign of Pippin the Short, the founder of the Carolingian Empire.

The High Middle Ages saw the development of independent and semi-autonomous principalities, both secular and ecclesiastical. Great landlords established the large counties (Flanders, Hainault, Namur and Holland and Zeeland) and duchies (Brabant, Limburg and Guelders), increasing their authority and size through dynastic alliances and inheritance. The majority fell broadly under the authority of the German king, heirs to the Eastern Frankish realm, though the feudal relationship allowed the growth of a tradition of independence that became a defining characteristic of Dutch politics. The growth of population and its pressure on the land increased the need for land reclamation. Dykes were built from Friesland to Flanders to drain the bogs and marshes for pasturage and, later, agrarian use. The development of urban centres outside the feudal structure was encouraged by the strength of trade and the merchant classes.

The Burgundian era in the Low Countries was born of a series of dynastic matches, most importantly that of Duke Philip II (the Bold) of Burgundy and Margaret, Countess of Flanders and Artois in 1369. Their son, Philip III (the Good), brought most of the northern Low Countries under one lord by inheriting Brabant and Hainault-Holland in the 1430s as well as Luxembourg in 1443. Although the dukes attempted to rule through new centralized bodies, the Burgundian Low Countries were held in a personal union and did not constitute a state. The duke appointed *stadhouders* (stadtholders) and governors to represent him in each of his territories. The summoning of the Estates in 1464 in Brugge (Bruges) represented the first parliamentary assembly in the Low Countries and the importance of the *Nederlands* in the Burgundian realm.

## *Burgundian Rule*

The reign of Charles the Bold, or Rash (1467–77), saw the brief land connection of the realm (by the acquisition of Lorraine) and the first explicit attempt to create a unitary kingdom—an echo of the Middle Frankish Kingdom, Lotharingia. Charles failed in his bid to make himself regent of this kingdom in 1473 and his death at the Battle of Nancy left his domains to his daughter, Mary. The duchess was soon stripped of the Duchy of Burgundy by the French king and was forced to concede privileges to the provinces. Her marriage to Maximilian of Habsburg, the future Holy Roman Emperor, brought the Low Countries into personal union with Austria and, later, Spain. Mary's son, Philip the Handsome, inherited the Spanish throne through his wife, Juana the Mad, forging a massive and disparate empire of kingdoms, principalities and lordships. Philip's son, Charles V, though born in Ghent, spent little time in the Low Countries after succeeding to the Spanish throne. They were administered by governors-general, normally taken from the ruler's family. Centralization, though consistently opposed, continued to be pressed on the inhabitants of the Low Countries. The 17 provinces were brought together formally in 1548 as the 'Burgundian *Kreis*' and the sovereign succession regulated by Pragmatic Sanction the following year. Brussels became the centre of government, being the location of the court and most organs of government.

Philip (II of Spain) imposed a new ecclesiastical hierarchy, sanctioned by papal bull in 1559, in an attempt to use the church as a centralizing force. The traditional resistance of the towns and provinces was given added fervour by the religious controversies attributable to the Reformation. Erasmus, a leading Dutch humanist, openly attacked the abuses and corruptions of the Church but rejected the theology of the reformers such as Martin Luther. However, the works of the radical Jean Calvin arrived in Antwerp in 1545, spreading throughout the region rapidly after their translation in 1560. Calvinism appealed to the intellectual middle classes, as well as the artisans, whose work ethic it extolled. The government focused its repressive efforts on the Anabaptists, whose refusal to swear allegiance to the prince was an affront to temporal and spiritual authority. The iconoclastic purges of 1566 provoked Philip to send the duke of Alba to restore his authority, thereby sparking full-scale revolt and the Eighty Years War (1568–1648).

The causes of the Dutch Revolt were numerous; religious tensions, resentment towards 'Spanish' authority, the heavy burden of taxes and absolutist government and the perceived desecration of traditional privileges were combined with years of hardship caused by climatic conditions and wars with France. However, in the earlier years of the revolt, the 'legitimate' *casus belli* claimed by the Dutch was the influence of 'evil advisers' around the prince—few openly rejected Philip's sovereignty. The *Geuzen*, an army of beggars, pillaging and pirating in the name of William of Orange, took the port of Brielle in 1572. This began the expulsion of Spanish authority from the northern provinces, a process completed by 1574.

The conversion of William (the Silent) to Calvinism in 1572, in response to his selection as stadtholder of Holland and Zeeland, was a political move to gain support for a united Netherlands of Catholics and Protestants. The 1576 Pacification of Ghent brought together predominantly Catholic and Protestant provinces in the face of bloody repression meted out by Alba's Council of Troubles (Council of Blood) and the notorious 'Spanish Fury' massacre in Antwerp. The mainly Catholic southern provinces were largely regained for Philip by the brilliant Alessandro Farnese, duke of Parma in 1578, forcing a 'closer union'—the Union of Utrecht—in the north in 1579, committed to resisting the Spanish. This marked the birth of the United Provinces of the Netherlands, or the 'Dutch Republic', with power concentrated in the hands of the stadtholders, nominally representing the hereditary prince. Philip's refusal to compromise led to his 'forfeiture of sovereignty' in the States-General Act of Abjuration in 1581, on the grounds of persistent tyranny.

The constitutional position of the Republic was unclear. The House of Orange was recognized as the traditional stadtholders of each province, though the lordship of the territories was tendered to both France and England in the 1580s. Maurice of Nassau, the son of William of Orange, was named stadtholder of Holland and Zeeland in 1587. Maurice's victories over Farnese came to be called the 'closing of the garden', giving the United Provinces the approximate borders it has maintained to the modern day. With recognition from England and France, the government negotiated the Twelve Year Truce in 1609 with Spain, which recognized the independence of the United Provinces.

The Calvinist church divided between the followers of two prominent clerics, Jacobus Arminius (the Remonstrants) and Franciscus Gomarus (the Contra-Remonstrants). The Arminians, championed by the elite of Holland and the towns, objected to the repressive orthodoxy of the Gomarists and demanded an inclusive reformed church to protect trade and foreign relations. The execution of the Remonstrant Johan van Oldenbarnvelt, the Advocate of Holland, signified the triumph of Maurice's Contra-Remonstrants and made permanent peace with Spain impossible. After initial Spanish success at Breda in 1621, Maurice's successor, Frederick Henry, turned the tide, taking Maastricht in the far south. Ending the persecution of the Remonstrants, Frederick

Henry augmented the authority of his princely house, even earning an honorific royal title from the French King. Lasting peace with Spain was finally won at the 1648 Treaty of Münster, which formally recognized the Dutch Republic.

#### *Independence and the Golden Age*

The 17th century has traditionally been called the Golden Age of the Dutch. From the Twelve Year Truce, the Dutch economy expanded massively, principally through trade in the Baltic and with France, Iberia and the colonies of the West and East Indies. The United East Indies Company, chartered in 1602, held quasi-sovereign authority over its colonies in Sri Lanka, India and Indonesia. Dutch banking financed the northern European markets, chiefly through foreign government bonds. The increase of wealth stimulated the arts. Prosperous life in Dutch towns was painted by Jan Vermeer and Amsterdam's burghers by Rembrandt. Although Calvinism had been officially adopted, Catholics were left unmolested but public worship was prohibited.

After the death of Frederick Henry's bellicose son, William II, in 1650, the republic experienced its first 'stadtholderless' period when the prosperous province of Holland dominated the Netherlands. Relations with Republican England deteriorated because of the execution of Charles I, who was closely related to the House of Orange. More importantly, competition for trade and shipping between the two great maritime powers caused skirmishes in America and Europe and a series of Anglo-Dutch Wars, conducted at sea. The destruction of the English fleet at Chatham in 1667 destroyed relations with Charles II, who had supported Orangist interests in the Netherlands.

The House of Orange reassumed the leadership of the Netherlands when William III took the stadtholdership of Holland in 1672 and defeated the French and the English in naval encounters. The Dutch supported William in his invasion of England—the Glorious Revolution—in 1688, claiming the throne with his wife, Mary Stuart. His death without issue in 1702 heralded the second stadtholderless period, when the councillor pensionaries of Holland asserted the province's leadership. However, the oligarchic nature of government attracted little support, especially during Dutch humiliations at the hands of the French in the War of the Austrian Succession (1740–48). William IV of Orange was elected to all provinces in 1747, the House of Orange being seen as the natural leaders of the Dutch people.

Both William IV and William V resisted calls for a more relaxed rule. The Patriot Movement took advantage of the Dutch defeat in the Fourth Anglo-Dutch War of the 1780s to depose William V. However, Prussia's intervention restored the stadtholder and many Patriots fled to France, then on the brink of revolution.

Revolutionary France's invasion of Belgium (the Spanish Netherlands) in 1794 was soon extended to the United Provinces. William V fled to England and the Patriots, supported by the French, assumed control of government. The new 'Batavian Republic', styled after the supposedly original inhabitants, was in reality a protectorate of France. This truly republican period enabled political modernization, much of which has lasted to the modern day. An elected national assembly was instituted (though the franchise was retained by property owners only), with new electoral constituencies to replace the old provinces. Religious toleration was adopted, with all denominations awarded equal treatment. However, the economy declined, partly because of the seizure of the Dutch colonies in the name of William V by Great Britain, which had declared war on France.

#### *Napoleon*

The republic was ended in 1806 when Napoleon incorporated the Netherlands into his empire. He installed his brother, Louis, as king of Holland. Louis adopted the cause of his new subjects, frequently defying his brother's orders in favour of Dutch interests. Napoleon ended his brother's reign in 1810 and brought his kingdom under French rule. Gijsbert Karel van Hogendorp,

who drew up the new constitution after the French withdrawal in 1813, led the opposition to France. The new constitution provided for a constitutional monarchy, with William V's son proclaimed king (William I), as demanded by the Congress of Vienna. The northern provinces were united with Belgium and Luxembourg under the Kingdom of the Netherlands.

William I saw the revival of the economy as the first priority. Using his personal resources as well as the treasury, he invested heavily in the re-establishment of Dutch shipping, especially to the restored colonies. Domestically, William was not so successful. In 1830 Belgium proclaimed its independence, rejecting a common identity with the predominantly Protestant north—the declaration of Dutch as the sole official language had alienated the French-speaking Walloons in Brussels. Though defeated by the Dutch army, the Belgians gained their independence in 1839 thanks to French and British intervention in 1832.

In response to the European revolutions of 1848, the king granted a liberal constitution. Support for the king was bolstered by the patriotic reaction in the northern provinces to the Belgian secession. The reintroduction of the Catholic hierarchy in 1853 won over a community which made up over a third of the population.

Dutch imperialism was consolidated in the second half of the 19th century. Having lost numerous colonies in the Americas, southern Africa and India, attention focused on the Indonesian archipelago. War with Aceh in northern Sumatra, famous for its piracy, was long and bloody but secured the archipelago for the Netherlands. The division of New Guinea was settled with Germany and Great Britain in 1875. Personal union with Luxembourg came to an end on the accession of Wilhelmina in 1890, barred by Salic Law from inheriting the Grand Duchy.

#### European War

In 1917 universal male suffrage was granted in return for the secular parties' acceptance of funding for religious schools, thus concluding the thirty-year School Conflict. Female suffrage followed in 1922. Wilhelmina, though less active in government than her father, William III, strongly advocated neutrality in the conflicts of the early 20th century, keeping the Netherlands out of the First World War. The German Kaiser, Wilhelm II, was granted asylum in the Netherlands.

The inter-war years were a period of social and political continuity. The *zuilen* system expanded, cementing what has been described as a bourgeois consensus, though worldwide depression hit the Netherlands hard in the 1930s. In 1932 the IJsselmeer dam was completed, transforming the Zuider Zee, an inlet of the North Sea, into a freshwater lake, the IJsselmeer.

The neutrality of the Netherlands was not respected by Germany in the Second World War, despite assurances from Hitler after the invasion of Poland. Control of the Netherlands and Belgium was seen as essential to protect the industrial centres of the Ruhr and to gain broader access to the North Sea. The Dutch armed forces were overwhelmed within a week in May 1940. The queen and government went into exile in London. Persecution of the Jews began in Oct. 1941. The first transports left in July 1942, mostly to Auschwitz. 107,000 Dutch Jews died. Dutch resistance took the form of civilian sabotage and the hiding of Jews and *onkerduikers* ('underdivers')—underground military operatives.

The Netherlands saw some of the bitterest fighting near the close of the war when Allied troops made airborne incursions—Arnhem Bridge in Sept. 1944—to speed victory over Germany. By the end of the war the Dutch were on the brink of famine. The destruction of the economy and much of the infrastructure caused large-scale emigration. In 1947 the Netherlands accepted US\$1bn. for reconstruction from the Marshall Plan and entered the Benelux Economic Union with Belgium and Luxembourg (fully established in 1958). The Netherlands abandoned its neutrality when it joined NATO in 1949, the year it granted Indonesia independence. Further changes to Dutch overseas possessions

took place in 1954 under the *Statute for the Kingdom*, which gave the territories in the West Indies equal status. Dutch New Guinea (Irian Jaya) was ceded to Indonesia in 1963 and Suriname was given its independence in 1974.

Dutch politics saw several important changes in the post-war years, such as the introduction of proportional representation in elections. From the end of the war until 1958, a coalition of Catholic and labour parties held power, taking the Netherlands into the Korean War in 1950. The Netherlands was a founder member of the European Coal and Steel Community (ECSC) in 1951, which later merged with the European Economic Community (EEC).

The economy grew rapidly in the late 1950s when the welfare state was greatly expanded. Social unrest in the 1960s was led by youth and labour groups. Social changes in the '70s included the demise of the traditional *zuilen* and the creation of new political parties across religious divides; most notable of these was the Christian Democratic Appeal (CDA). Newspapers, the voice of the *zuilen*, disassociated themselves from religious denominations, becoming independent commercial enterprises. The decriminalization of personal cannabis use in the 1970s indicated a policy towards drug use and abuse that focused on rehabilitation (for hard drug users) as opposed to punishment. Vocal youth action was seen most clearly in the confrontations between the police and the *krakers*—squatters demanding affordable housing.

Opposition to nuclear weapons grew in the 1980s, sparked by the support given by Prime Minister Andreas van Agt to placing US cruise missiles on Dutch soil. In 1986 the pressures of the Netherlands' population density led to creation of the 12th province, Flevoland, from four polders reclaimed from the IJsselmeer.

The Netherlands joined the coalition forces in the 1991 Gulf War, providing two naval frigates. Serious flooding in Gelderland and the threat of worse to come led to the evacuation of 240,000 people from the province in 1995.

The Netherlands became the first country to legalize homosexual marriage and adoption, in 2001, and euthanasia, in 2002. In April 2002, Prime Minister Wim Kok's government resigned in the wake of a report that criticized Dutch inaction in preventing the massacre at Srebrenica in 1995. During the subsequent election campaign, the right-wing politician Pim Fortuyn was assassinated by an animal-rights activist who opposed Fortuyn's anti-immigration policies.

The coalition government led by Jan Peter Balkenende, formed in July, collapsed in Oct., necessitating fresh elections. Balkenende formed a new government in May 2003. In 2005 the electorate voted in a referendum against adopting a proposed EU constitution. In June 2006 Balkenende's coalition again collapsed, although he remained head of a minority government until elections in Nov. In Feb. 2007, after months of negotiations, he was sworn in for a new tenure as premier, leading a centrist coalition of three parties. It lasted until Feb. 2010 when it collapsed after tensions over troop deployment in Afghanistan. The People's Party for Freedom and Democracy emerged from elections in June 2010 with the most seats and formed a coalition, with Mark Rutte as prime minister, with the support of the far-right Freedom Party.

#### TERRITORY AND POPULATION

The Netherlands is bounded in the north and west by the North Sea, south by Belgium and east by Germany. The area is 41,543 sq. km, of which 33,756 sq. km is land. Projects of sea-flood control and land reclamation (polders) by the construction of dams and drainage schemes have continued since 1920. More than a quarter of the country is below sea level.

The population was 13,060,115 at the census of 1971 and 16,655,799 on 1 Jan. 2011. Population growth in 2010, 0.5%.

The UN gives a projected population for 2015 of 16.85m.

Ongoing 'rolling' censuses have replaced the former decennial counts.

Area, estimated population and density, and chief towns of the 12 provinces on 1 Jan. 2011:

	Area 2008 (in sq. km)	Population 2011	Density 2011 per sq. km land area	Provincial capital
Groningen	2,967.90	579,036	248	Groningen
Friesland	5,740.87	647,282	193	Leeuwarden
Drenthe	2,680.37	491,411	186	Assen
Overijssel	3,420.86	1,134,465	341	Zwolle
Flevoland	2,412.30	391,967	276	Lelystad
Gelderland	5,136.51	2,004,671	403	Arnhem
Utrecht	1,449.12	1,228,794	887	Utrecht
Noord-Holland	4,091.76	2,691,477	1,008	Haarlem
Zuid-Holland <sup>1</sup>	3,418.50	3,528,324	1,252	The Hague
Zeeland	2,933.89	381,530	213	Middelburg
Noord-Brabant	5,081.76	2,454,215	499	's-Hertogenbosch
Limburg	2,209.22	1,122,627	521	Maastricht
Total	41,543.06	16,555,799	490	

<sup>1</sup>Since 29 Sept. 1994 includes inhabitants of the municipality of The Hague formerly registered in the abolished Central Population Register.

In 2005, 80.2% of the population lived in urban areas.

Population of municipalities with over 50,000 inhabitants on 1 Jan. 2011:

Alkmaar	93,936	Kampen	50,403
Almelo	72,599	Katwijk	62,044
Almere	190,655	Lansingerland	54,090
Alphen a/d Rijn	72,680	Leeuwarden	94,838
Amersfoort	146,592	Leiden	117,915
Amstelveen	81,796	Leidschendam-	
Amsterdam	779,808	Voorburg	72,068
Apeldoorn	156,199	Lelystad	75,111
Arnhem	148,070	Maastricht	119,664
Assen	67,177	Nieuwegein	60,947
Barneveld	53,026	Nijmegen	164,223
Bergen op Zoom	66,074	Oosterhout	54,072
Breda	174,599	Oss	84,201

Urban agglomerations as at 1 Jan. 2010: Amsterdam, 1,053,413; Rotterdam, 996,183; The Hague, 633,201; Utrecht, 441,866; Eindhoven, 327,245; Leiden, 251,436; Dordrecht, 236,285; Tilburg, 227,614; Groningen, 205,814; Heerlen, 204,825; Haarlem, 197,660; Amersfoort, 173,674; Breda, 173,299; 's-Hertogenbosch, 165,007; Nijmegen, 162,963; Enschede, 157,052; Apeldoorn, 155,726; Arnhem, 148,513; Sittard-Geleen, 137,495; Zwolle, 119,030; Maastricht, 118,533; Leeuwarden, 94,073.

Dutch is the official language. Frisian, spoken as a first language by 2.2% of the population, is also recognized as an official language in the northern province of Friesland.

## SOCIAL STATISTICS

Vital statistics for calendar years:

	Live births		Marriages	Divorces	Deaths
	Total	Outside marriage			
2002	202,083	58,525	85,808	33,179	142,355
2003	200,297	61,439	80,427	31,479	141,936
2004	194,007	63,029	73,441	31,098	136,553
2005	187,910	65,563	72,263	31,905	136,402
2006	185,057	68,575	72,369	31,734	135,372
2007	181,336	71,559	72,485	31,983	133,022

2007 rates per 1,000 population: birth, 11.1; death, 8.1. Annual population growth rate, 2000–05, 0.5%. In 2009 the suicide rate per 100,000 population was 9.3 (men, 13.1; women, 5.5). In 2006 the most popular age range for marrying (excluding same-sex marriages) was 30–34 for males and 25–29 for females. Expectation of life, 2007, was 77.6 years for males and 81.9 for females. Infant mortality, 2008, 3.8 per 1,000 live births; fertility rate, 2008, 1.7 births per woman. Percentage of population by age in 2007: 0–24 years, 30.1%; 25–64, 55.5%; 65 and over, 14.5%. In 2009 the Netherlands received 14,905 asylum applications, up from 13,399 in 2008. In 2001 the Netherlands became the first country to legalize same-sex marriage.

## CLIMATE

A cool temperate maritime climate, marked by mild winters and cool summers, but with occasional continental influences. Coastal temperatures vary from 37°F (3°C) in winter to 61°F (16°C) in summer, but inland the winters are slightly colder and the summers slightly warmer. Rainfall is least in the months Feb. to May, but inland there is a well-defined summer maximum in July and Aug.

The Hague, Jan. 37°F (2.7°C), July 61°F (16.3°C). Annual rainfall 32.8" (820 mm). Amsterdam, Jan. 36°F (2.3°C), July 62°F (16.5°C). Annual rainfall 34" (850 mm). Rotterdam, Jan. 36.5°F (2.6°C), July 62°F (16.6°C). Annual rainfall 32" (800 mm).

## CONSTITUTION AND GOVERNMENT

According to the Constitution (promulgated 1815; last revision, 2005), the Kingdom consists of the Netherlands and its overseas countries and territories. Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec. 1954 and was revised on 10 Oct. 2010 in recognition of the dissolution of the Netherlands Antilles, by which Curaçao and Sint Maarten became (along with Aruba) independent countries within the Kingdom and Bonaire, Saba and Sint Eustatius became autonomous special municipalities. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The Netherlands is a constitutional and hereditary monarchy. The royal succession is in the direct female or male line in order of birth. The reigning Queen is **Beatrix Wilhelmina Armgard**, born 31 Jan. 1938, daughter of Queen Juliana and Prince Bernhard; married to Claus von Amsberg on 10 March 1966 (born 6 Sept. 1926, died 6 Oct. 2002); succeeded to the crown on 30 April 1980, on the abdication of her mother. *Offspring*: Prince Willem-Alexander, born 27 April 1967, married to Máxima Zorreguieta on 2 Feb. 2002 (*offspring*: Catharina-Amalia, born 7 Dec. 2003; Alexia, born 26 June 2005; Ariane, born 10 April 2007); Prince Johan Friso, born 25 Sept. 1968, married to Mabel Wisse Smit on 24 April 2004 (*offspring*: Luana, born 26 March 2005; Zaria, born 18 June 2006); Prince Constantijn, born 11 Oct. 1969, married to Laurentien Brinkhorst on 19 May 2001 (*offspring*: Eloise, born 8 June 2002; Claus-Casimir, born 21 March 2004; Leonore, born 3 June 2006).

The Queen receives an allowance from the civil list. This was €5,143,000 in 2011; and that of Crown Prince Willem-Alexander,

€1,386,000. Princess Máxima also receives allowances from the civil list (€626,000 in 2011).

*Sisters of the Queen.* Princess Irene Emma Elisabeth, born 5 Aug. 1939, married to Prince Charles Hugues de Bourbon-Parma on 29 April 1964 (born 8 April 1930, died 18 Aug. 2010), divorced 1981 (*sons:* Prince Carlos Javier Bernardo, born 27 Jan. 1970; Prince Jaime Bernardo, born 13 Oct. 1972; *daughters:* Princess Margarita Maria Beatriz, born 13 Oct. 1972; Princess Maria Carolina Christina, born 23 June 1974); Princess Margriet Francisca, born in Ottawa, 19 Jan. 1943, married to Pieter van Vollenhoven on 10 Jan. 1967 (*sons:* Prince Maurits, born 17 April 1968; Prince Bernhard, born 25 Dec. 1969; Prince Pieter-Christiaan, born 22 March 1972; Prince Floris, born 10 April 1975); Princess Maria Christina, born 18 Feb. 1947, married to Jorge Guillermo on 28 June 1975, divorced 1996 (*sons:* Bernardo, born 17 June 1977; Nicolás, born 6 July 1979; *daughter:* Juliana, born 8 Oct. 1981).

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament (the *States-General*), consisting of two Chambers. The upper *First Chamber* is composed of 75 members, elected by the members of the Provincial States. The 150-member *Second Chamber* is directly elected by proportional representation for four-year terms. Members of the States-General must be Netherlands subjects of 18 years of age or over. The Hague is the seat of the Court, government and Parliament; Amsterdam is the capital.

The *Council of State*, appointed by the Crown, is composed of a vice-president and not more than 28 members. The monarch is president, but the day-to-day running of the Council is in the hands of the vice-president. The Council has to be consulted on all legislative matters. The Sovereign has the power to dissolve either Chambers, subject to the condition that new elections take place within 40 days, and the new Chamber be convoked within three months. Both the government and the Second Chamber may propose Bills; the First Chamber can only approve or reject them without inserting amendments. The meetings of both Chambers are public, although each of them may by a majority vote decide on a secret session. A Minister or Secretary of State cannot be a member of Parliament at the same time.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the overseas parts of the kingdom.

### National Anthem

'Wilhelmus van Nassau' ('William of Nassau'); words by Philip Marnix van St Aldegonde, tune anonymous.

### GOVERNMENT CHRONOLOGY

Prime Ministers since 1940. (ARP = Anti-Revolutionary Party; CDA = Christian Democratic Appeal; KVP = Catholic People's Party; PvdA = Labour Party; VDB = Liberal Democratic League; VVD = People's Party for Freedom and Democracy)

1940–45	ARP	Pieter Sjoerds Gerbrandy
1945–46	VDB/PvdA	Willem Schermerhorn
1946–48	KVP	Louis Jozef Maria Beel
1948–58	PvdA	Willem Drees
1958–59	KVP	Louis Jozef Maria Beel
1959–63	KVP	Jan Eduard de Quay
1963–65	KVP	Victor Gérard Marie Marijnen
1965–66	KVP	Joseph Maria Laurens Theo (Jo) Cals
1966–67	ARP	Jelle Zijlstra
1967–71	KVP	Petrus Josephus Sietse (Piet) de Jong
1971–73	ARP	Barend Willem Biesheuvel
1973–77	PvdA	Johannes Marten (Joop) den Uyl

1977–82	CDA	Andreas Maria (Andries) van Agt
1982–94	CDA	Rudolphus Frans Marie (Ruud) Lubber
1994–2002	PvdA	Willem (Wim) Kok
2002–10	CDA	Jan Peter Balkenende
2010–	VVD	Mark Rutte

### RECENT ELECTIONS

Party affiliation in the First Chamber as elected on 23 May 2011: People's Party for Freedom and Democracy (VVD), 16 seats; Labour Party (PvdA), 14; Christian Democratic Appeal (CDA), 11; Party for Freedom (PVV), 10; Socialist Party (SP), 8; Democrats '66 (D66), 5; Green Left (GL), 5; Christian Union (CU), 2; Political Reformed Party (SGP), 1; 50Plus (50+), 1; Party for the Animals (PvdD), 1; Independent Group in the Senate, 1.

Elections to the Second Chamber were held on 9 June 2010. The VVD won 31 seats with 20.5% of votes cast (22 seats at the 2006 election); PvdA, 30 seats and 19.6% (33 in 2006); PVV, 24 seats and 15.5% (9); CDA, 21 seats and 13.6% (41); SP, 15 seats and 9.8% (25); D66, 10 seats and 7.0% (3); GL, 10 seats and 6.7% (7); CU, 5 seats and 3.2% (6); SGP, 2 seats and 1.7% (2); PvdD, 2 seats and 1.3% (2). Turnout was 75.4%.

### European Parliament

The Netherlands has 25 (27 in 2004) representatives. At the June 2009 elections turnout was 36.8% (39.3% in 2004). The CDA won 5 seats with 20.1% of votes cast (political affiliation in European Parliament: European People's Party); PVV, 4 with 17.0% (non-attached); PvdA 3 with 12.1% (Progressive Alliance of Socialists and Democrats); VVD, 3 with 11.4% (Alliance of Liberals and Democrats for Europe); D66, 3 with 11.3% (Alliance of Liberals and Democrats for Europe); Green Left, 3 with 8.9% (Greens/European Free Alliance); SP, 2 with 7.1% (European United Left/Nordic Green Left); Christian Union-Political Reformed Party, 2 with 6.8% (one with European Conservatives and Reformists and one with Europe of Freedom and Democracy).

### CURRENT GOVERNMENT

Following parliamentary elections in June 2010 a coalition government of VVD and CDA was sworn in on 14 Oct. 2010. In April 2012 the caretaker government comprised:

*Prime Minister and Minister of General Affairs:* Mark Rutte; b. 1967 (VVD).

*Deputy Prime Minister and Minister of Economic Affairs, Agriculture and Innovation:* Maxime Verhagen (CDA).

*Minister of Foreign Affairs:* Uri Rosenthal (VVD). *Interior and Kingdom Relations:* Liesbeth Spies (CDA). *Immigration and Asylum Policy:* Gerd Leers (CDA). *Security and Justice:* Ivo Opstelten (VVD). *Education, Culture and Science:* Marja van Bijsterveldt (CDA). *Finance:* Jan Kees de Jager (CDA). *Defence:* Hans Hillen (CDA). *Infrastructure and Environment:* Melanie Schultz van Haegen (VVD). *Social Affairs and Employment:* Henk Kamp (VVD). *Health, Welfare and Sport:* Edith Schippers (VVD).

*Government Website:* <http://www.government.nl>

### CURRENT LEADERS

#### Mark Rutte

#### Position

Prime Minister

#### Introduction

Mark Rutte became prime minister in Oct. 2010. He is leader of the People's Party for Freedom and Democracy (VVD) and heads a coalition with the Christian Democratic Appeal (CDA) with outside support of the Party for Freedom (PVV). Rutte's premiership ended an era of alternating Labour Party and Christian Democratic governments uninterrupted since 1918.

### Early Life

Rutte was born in The Hague on 14 Feb. 1967 and read history at Leiden University. He served as national president of the VVD youth party from 1988–91. After graduating in 1992, he was employed by the Unilever group as a human resources manager.

Rutte became a member of the VVD's national board in 1993, resigning in 1997 to focus on his business career. He was a personnel manager at Unilever subsidiary Van den Bergh Nederland until 2000, when he was promoted to Unilever's corporate human resources group. In 2002 he became director of human resources for Unilever subsidiary IgloMora Group.

Rutte worked on the VVD candidate committee at the 2002 general election. Later that year he became state secretary for social affairs and employment in the coalition government. In 2003 he entered the House of Representatives and in 2004 was appointed state secretary for higher education and science.

Despite managing a disappointing VVD municipal election campaign, in May 2006 the party elected him 'lijstrekker' (effective leader). In June 2006 he resigned from Jan Peter Balkenende's cabinet. He won notable victories in televised debates ahead of the June 2010 general election, attracting praise for his stance on economic affairs. The VVD won the election and after months of coalition talks Rutte was appointed premier.

### Career in Office

Rutte and the VVD negotiated a coalition agreement with the CDA and the right-leaning PVV. Rutte shared executive posts evenly between VVD and CDA politicians, giving the CDA the ministries of defence, the interior and finance. The PVV, whose popularity sprang from its stance on immigration, was given a stake in policy-making, although controversial leader Geert Wilders subsequently faced trial (but was acquitted in June 2011) for inciting hatred against Muslims.

Rutte pledged to cut the budget deficit from 6% to 0.9% of GDP by 2015, raise the retirement age from 65 to 66 and support nuclear power. He imposed funding cuts on universities, while immigration policy was also tightened, with a clamp-down on repeat asylum applications and low-skilled immigrants, and restrictions on the wearing of the Islamic burqa in public.

In Jan. 2011 Rutte won parliamentary approval to send personnel to Afghanistan (the Netherlands having previously withdrawn from involvement there) to train the Afghan police. In the same month he held talks with the UK prime minister, David Cameron, on re-activating the EU's Service Directive to encourage free-market reforms in the European business community.

In April 2012 Rutte and his government resigned, having failed to secure parliamentary support for austerity cuts. He stayed in office in a caretaker capacity, pending an early election expected to be held in Sept. 2012.

### DEFENCE

Conscription ended on 30 Aug. 1996.

The total strength of the armed forces in 2007 was 45,608. Reserves, 32,200. In 2006 defence expenditure totalled US\$9,904m. (US\$601 per capita), representing 1.5% of GDP.

### Army

The core fighting element of the Royal Netherlands Army is divided into two mechanized brigades and one airborne brigade. The 1st Netherlands Army Corps merged with a German corps to become 1 German/Netherlands Corps in 1995. It is based in Münster, Germany and is a certified NATO Response Force.

Personnel in 2007 numbered 18,266. The core fighting element of the Army consists of a single element divided into two mechanized brigades and one airborne brigade. Some units in the Netherlands may be assigned to the UN as peacekeeping forces. The army is responsible for the training of these units.

There is a paramilitary Royal Military Constabulary, 6,800 strong. In addition there are 22,200 army reservists.

### Navy

The principal headquarters and main base of the Royal Netherlands Navy is at Den Helder, with a minor base at Curaçao. Command and control in home waters is exercised jointly with the Belgian Naval Component (submarines excepted).

The combatant fleet includes four diesel submarines, four destroyers and four frigates. In 2007 personnel totalled 10,401 including 3,100 in the Royal Netherlands Marine Corps.

### Air Force

The Royal Netherlands Air Force (RNLAf) had 10,141 personnel in 2007. It had 105 combat capable aircraft in 2007 (F-16s) and 24 attack helicopters. All squadrons are operated by Tactical Air Command.

### INTERNATIONAL RELATIONS

On 1 June 2005 the Netherlands became the second European Union member after France to reject the proposed EU constitution, with 61.54% of votes cast in a referendum against the constitution and only 38.46% in favour.

The Hague is the seat of several international organizations, including the International Court of Justice.

### ECONOMY

Services accounted for 74% of GDP in 2007, industry 24% and agriculture 2%.

According to the anti-corruption organization *Transparency International*, the Netherlands ranked seventh in the world in a 2011 survey of the countries with the least corruption in business and government. It received 8.9 out of 10 in the annual index.

The Netherlands gave US\$6.4bn. in international aid in 2009, which at 0.82% of GNI made it the fifth most generous developed country as a percentage of its gross national income. The Netherlands was one of only five countries to exceed the UN target of 0.7% in 2007.

### Overview

The Dutch economy boasts one of the world's highest levels of average income and relatively low income inequality. GDP per capita in 2010 was a third above the EU average. Given its small domestic market, a location at the heart of northwest Europe's economy and favourable harbour facilities, the economy is among the most open and outward-looking. The Netherlands is among the most competitive destinations for global foreign direct investment (FDI). A favourable tax environment for multinationals has attracted many foreign companies and significant FDI inflows. One of the leading donors of international aid, it has committed itself to poverty reduction in Africa.

Exports accounted for 76.7% of GDP in 2008. Rotterdam is Europe's largest port and generates annual added value equal to 3.7% of total GDP. Trade dependency is even stronger because of the scarcity of industrial raw materials while industry is geared towards processing. Relative to the European Big Four, the manufacturing sector share of GDP is small compared to its agricultural and service sectors. The Netherlands is a leader in horticulture and is a competitive meat and dairy product exporter.

In 2006 the government introduced tax cuts and increased expenditure by 6.2% on the previous year, resulting in greater economic activity, rising employment rates, modest wage rises and favourable fiscal conditions. Private consumption also rose. Annual budget deficits between 2000 and 2008 averaged roughly 1% compared to 3.7% over the previous half decade, despite weaker growth.

However, the global economic crisis of 2008 saw the economy fall into its worst recession for several decades with negative growth of 3.5% in 2009. Exports declined by 25%. Along with a fall in domestic demand, manufacturing suffered. State support was needed to save several financial institutions, with four of the

five largest subject to restructuring programmes. Public debt rose to 62.9% of GDP in 2010.

Nonetheless, the Netherlands weathered the crisis better than many of its European partners and, stimulated by strong exports, growth resumed in 2010. Unemployment was the lowest in the EU in 2010 at 4.5%. The Netherlands also has one of the highest levels of labour productivity in the world. However, the recovery remains fragile, with more than 77% of Dutch exports going to other European countries (less than 3% of total exports go to Asia). The economy is therefore highly vulnerable to the debt problems rampant in the eurozone. Household debt has grown substantially and is now among the highest in advanced economies.

The welfare system and labour market institutions follow the German model, with extensive welfare provisions and worker influence at the corporate level. The state's pension liabilities are substantial. An ageing population is a significant challenge and the chief reason for the aggressive strengthening of public finances in recent years.

### Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in the Netherlands at the irrevocable conversion rate of 2.20371 guilders to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the guilder ceased to be legal tender on 28 Jan. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €29.7bn.

Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.2%	3.3%	2.1%	1.2%	1.7%	1.2%	1.6%	2.5%	1.2%	1.3%

Gold reserves were 19.69m. troy oz in Sept. 2009 and foreign exchange reserves US\$10,102m. Total money supply was €217,793m. in Aug. 2009.

### Budget

In 2009 central government revenues totalled €234,498m. (€249,637m. in 2008) and expenditures €260,136m. (€241,951m. in 2008). Principal sources of revenue in 2009: social security contributions, €78,959m.; taxes on goods and services, €62,606m.; taxes on income, profits and capital gains, €61,512m. Main items of expenditure by economic type in 2009: social benefits, €118,723m.; grants, €74,672m.; use of goods and services, €19,765m.

The Netherlands' budget deficit in 2010 was 5.1% of GDP (2009, 5.6%). In 2008 it had a surplus of 0.5%. The required target set by the EU is a budget deficit of no more than 3%.

VAT is 19.0% (reduced rate, 6.0%).

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.0%	0.1%	0.3%	2.0%	2.2%	3.5%	3.9%	1.8%	-3.5%	1.6%

In 2010 total GDP was US\$783.4bn.

### Banking and Finance

The central bank and bank of issue is the Netherlands Bank (*President, Klaas Knot*), founded in 1814 and nationalized in 1948. Its Governor is appointed by the government for seven-year terms. The capital amounted to €500m. in 2002. In 2002 there were 18 leading commercial banks. The largest banks in 2007 were ABN Amro Holding NV (assets in 2007 of €1,025.2bn.) and ING Bank NV (assets in 2007 of €994.1bn.). In Oct. 2007 ABN Amro and a consortium led by the UK's Royal Bank of Scotland (and including Santander from Spain and the Belgian-Dutch company Fortis) agreed a merger worth US\$98.5bn., representing Europe's largest banking takeover. The Dutch part of Fortis was nationalized in Oct. 2008 and its shares in ABN Amro were also transferred to the Dutch government. There is a stock exchange in

Amsterdam; it is a component of Euronext, which was created in Sept. 2000 through the merger of the Amsterdam, Brussels and Paris bourses.

### ENERGY AND NATURAL RESOURCES

In 2008, 3.2% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 14% has been set by the EU for 2020.

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 15.9 tonnes per capita.

The Netherlands is one of the world leaders in recycling. In 2008 an estimated 59% of municipal waste was recycled or composted, with only 1% going to landfill.

### Electricity

Installed capacity was 23.9m. kW in 2007. Production of electrical energy in 2007 was 103.24bn. kWh (approximately 4% nuclear); consumption per capita was 7,375 kWh. There was one nuclear reactor in operation in 2010.

### Oil and Gas

Production of natural gas in 2008, 67.5bn. cu. metres. Reserves in 2008 were 1,390bn. cu. metres. The Groningen gas field in the north of the country is the largest in continental Europe. In 2005 crude oil production was 2.5m. tonnes; reserves were 100m. bbls in 2007.

### Minerals

In 2005, 5.0m. tonnes of salt were produced. Aluminium production in 2005 totalled 341,000 tonnes.

### Agriculture

The Netherlands is one of the world's largest exporters of agricultural produce. There were 83,885 farms in 2004. Agriculture accounted for 11.6% of exports and 7.6% of imports in 2005. The agricultural sector employs 2.8% of the workforce. In 2002 there were 916,000 ha. of arable land and 33,000 ha. of permanent crops. The total area of cultivated land in 2004 was 1,926,000 ha.: grassland, 983,000 ha.; arable crops, 825,000 ha.; open ground horticultural and permanent crops, 107,000 ha.; glasshouse horticulture, 10.5 ha. In 2004, 230,000 people were employed in agriculture (of which family workers, 168,000; non-family workers, 62,000).

The yield of the more important arable crops, in 1,000 tonnes, was as follows:

Crop	2003	2004	2005 <sup>1</sup>
Potatoes	6,469	7,488	6,777
Sugar beets	6,210	6,292	5,931
Wheat	1,130	1,224	1,175
Sown onions	809	1,225	983
Barley	349	288	307

<sup>1</sup>Provisional.

Other major fruit and vegetable production in 2004 included (in 1,000 tonnes): tomatoes, 655; apples, 436; cucumbers, 435; carrots, 342; sweet peppers, 318; mushrooms, 260; pears, 210.

Cultivated areas of main flowers (2004) in 1,000 ha.: tulips, 11.0; lilies, 4.5; daffodils, 1.8; gladioli, 1.4; hyacinths, 1.1.

Livestock, 2004 (in 1,000) included: 11,153 pigs; 3,767 cattle; 1,236 sheep; 168 milk goats; 85,816 chickens.

Animal products in 2002 (in 1,000 tonnes) included: pork, bacon and ham, 1,420; beef and veal, 464; poultry, 774; milk, 10,842; cheese, 637; butter, 119; hens' eggs, 583.

### Forestry

Forests covered 365,000 ha. in 2005, or 10.8% of the land area. In 2007, 1.02m. cu. metres of roundwood were cut.

### Fisheries

Total catch in 2005 was 549,208 tonnes (chiefly scad, herring, mackerel and plaice), of which 547,108 tonnes were from marine waters. In 2008 the fishing fleet comprised 825 vessels of 146,925 GT.

### INDUSTRY

In March 2011 the leading companies by market capitalization were: Unilever (Dutch/British), a consumer goods firm (US\$87.3bn.); ArcelorMittal, the world's largest steel producer (US\$56.5bn.); and ING, a finance company (US\$48.5bn.).

At 1 Jan. 2001 there were 1,524 enterprises in the manufacturing industry (with 100 employees or more), of which 772 had 100–199 employees and 249 had 500 employees or more; total annual sales of these enterprises for 2001 were €133,568m.

The three largest industrial sectors are chemicals, food processing and metal, mechanical and electrical engineering. The food, drink and tobacco industry employed 123,000 people in 2002 (annual sales for 2002 in €1m., 42,411); basic metal and metal products, 118,000 (11,318); machinery and equipment, 86,000 (8,690); electrical and optical equipment, 83,000 (16,766); publishing and printing, 73,000 (6,806); chemical products, 68,000 (31,460); transport equipment, 48,000 (9,028); rubber and synthetic products, 33,000 (3,256).

### Labour

The total labour force in 2005 was 7,401,000 persons (3,182,000 women) of whom 483,000 (245,000) were unemployed. By education level, the 2005 employed labour force included (in 1,000): primary education, 331; junior secondary education, 463; junior vocational training, 825; senior secondary education, 608; senior vocational training; 2,448; higher professional education, 1,370; university education, 840.

The unemployment rate was 4.9% in Dec. 2011, the second lowest in the EU. Youth unemployment was only 7.8% in Jan. 2011. Although the Netherlands has a very low unemployment rate, for every 100 people below the age of 65 who are active in the labour market, 35 are not. In 2010, 48.9% of the labour force was in part-time employment with 76.5% of all women employed working part-time. In 2008 the average age for retirement was 63.

At 31 Dec. 2004 the weekly working hours (excluding overtime) of employees were 35.2. In 2004 employees' working hours (excluding overtime) totalled 1,340; full-time employees totalled 1,723. Workers in the Netherlands put in among the shortest hours of any industrialized country. In 2004 part-time work accounted for approximately 35% of all employment in the Netherlands—the highest percentage in any major industrialized country. 76.0% of part-time workers in 2004 were women. Average annual earnings of employees in 2004 totalled €27,400, with average hourly earnings of €18.18 (men, €19.59; women, €15.81). By type of employment, hourly earnings at 31 Dec. 2004 ranged from €11.96 in hotels and restaurants to €23.98 in energy and water companies and €27.71 in mineral extraction.

### INTERNATIONAL TRADE

On 5 Sept. 1944 and 14 March 1947 the Netherlands signed agreements with Belgium and Luxembourg for the establishment of a customs union. On 1 Jan. 1948 this union came into force and the existing customs tariffs of the Belgium–Luxembourg Economic Union and of the Netherlands were superseded by the joint Benelux Customs Union Tariff. It applied to imports into the three countries from outside sources, and exempted from customs duties all imports into each of the three countries from the other two.

### Imports and Exports

In 2005 imports totalled €248,827m. (€228,247m. in 2004); exports, €280,743m. (€255,660m. in 2004).

Value of trade with major partners (in €1m.):

Region/Country	Imports 2005	Exports 2005	Imports (% change on 2004)	Exports
Europe	154,904	233,413	+6	+9
Belgium	26,708	33,328	+7	+13
France	12,352	25,834	0	+5
Germany	47,345	66,311	+6	+9
Italy	6,424	15,940	+8	+2
Russia	8,345	4,145	+36	+29
UK	15,610	25,985	+6	+1
Africa	6,453	5,510	+49	+19
Americas	30,010	18,747	+13	+16
USA	19,949	13,789	+9	+16
Asia	56,696	20,083	+11	+9
China	19,207	2,514	+32	+9
Japan	6,126	2,221	-9	+2
Australia and Oceania	764	2,988	+1	+15

The main imports in 2005 (in €1m.) were machines and transport equipment, 88,845; mineral fuels, 36,485; chemical products, 32,709; manufactured goods, 28,361; food and live animals, 18,963; inedible raw materials except fuel, 9,789; beverages and tobacco, 2,719. Main exports in 2005 (in €1m.) were machines and transport equipment, 89,365; chemical products, 47,757; food and live animals, 32,618; mineral fuels, 30,786; manufactured goods, 27,209; inedible raw materials except fuels, 15,737; beverages and tobacco, 5,699.

### COMMUNICATIONS

#### Roads

In 2008 the total length of the Netherlands road network was 136,135 km (including 2,637 km of motorways). Number of vehicles (2008): private cars, 7.39m.; trucks and vans, 1.07m.; motorcycles and mopeds, 1.37m. There were 750 fatalities as a result of road accidents in 2008, equivalent to 4.6 fatalities per 100,000 population (one of the lowest death rates in road accidents of any industrialized country).

#### Rail

All railways are run by the mixed company 'N.V. Nederlandse Spoorwegen'. Route length in 2004 was 2,807 km. Passenger-km travelled in 2009 came to 16.32bn. Goods transported in 2004 totalled 30.4m. tonnes. There is a metro (44 km) and tram/light rail network (154 km) in Amsterdam and in Rotterdam (76 km and 67 km). Tram/light rail networks operate in The Hague (128 km) and Utrecht (22 km).

#### Civil Aviation

There are international airports at Amsterdam (Schiphol), Rotterdam, Maastricht and Eindhoven. The Royal Dutch Airlines (KLM) was founded on 7 Oct. 1919. In Oct. 2003 it merged with Air France to form Air France-KLM, in which the French state owns a 15.7% stake. In 2005 KLM carried 21.5m. passengers (21.4m. on international flights); passenger-km totalled 68.3bn. Services were provided in 2003 by around 80 foreign airlines. In 2004 Amsterdam handled 42,425,000 passengers. Rotterdam is the second busiest airport, handling 1,097,000 passengers in 2004, followed by Maastricht, with 228,000 in 2004. 1,466,000 tonnes of freight were transported via Dutch airports in 2004.

#### Shipping

In Jan. 2009 there were 810 ships of 300 GT or over registered, totalling 7,428,000 GT. Of the 810 vessels registered, 593 were general cargo ships, 83 container ships, 47 passenger ships, 43 oil tankers, 20 chemical tankers, 18 liquid gas tankers and six bulk carriers. The Dutch-controlled fleet comprised 578 vessels of 1,000 GT or over in Jan. 2009, of which 426 were under the Dutch flag and 152 under foreign flags.

Total throughput at Rotterdam, the busiest port in the Netherlands and Europe and the third busiest in the world, was 386,957,000 tonnes in 2009 (down from a record 421,136,000 tonnes in 2008). Of the total cargo handled in 2009, 273,292,000 tonnes were incoming and 113,665,000 tonnes outgoing.

Rotterdam is also the busiest container port in both the Netherlands and Europe; in 2008 it was the ninth busiest container port in the world, handling 10,784,000 TEUs (twenty-foot equivalent units). The Amsterdam ports were the second busiest in the Netherlands in 2009, handling 86,677,000 tonnes of cargo (down from 94,833,000 tonnes in 2008).

There were 6,215 km of inland waterways in 2008, including 2,686 km of canals and 823 km of canalized rivers; 271.5m. tonnes of freight were carried on inland waterways in 2009.

The Netherlands was ranked third in the World Economic Forum's *Global Competitiveness Report 2009–2010* for the quality of its port facilities.

### Telecommunications

In 2008 there were 7,317,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 20,627,000 (1,248.0 per 1,000 persons). There were 14.3m. internet users in 2008. The Netherlands has one of the highest fixed broadband penetration rates, at 38.1 subscribers per 100 inhabitants in Dec. 2010.

## SOCIAL INSTITUTIONS

### Justice

Justice is administered by the High Court (Court of Cassation), by five courts of justice (Courts of Appeal), by 19 district courts and by 61 cantonal courts. The Cantonal Court, which deals with minor offences, comprises a single judge; more serious cases are tried by the district courts, comprising as a rule three judges (in some cases one judge is sufficient); the courts of appeal are constituted of three and the High Court of five judges. All judges are appointed for life by the Sovereign (the judges of the High Court from a list prepared by the Second Chamber of the States-General). They can be removed only by a decision of the High Court.

At the district court the juvenile judge is specially appointed to try children's civil cases and at the same time charged with administration of justice for criminal actions committed by young persons between 12 and 18 years old, unless imprisonment of more than six months ought to be inflicted; such cases are tried by three judges.

The population in penal institutions in Aug. 2008 was 16,416. Owing to a declining prison population, since Feb. 2010 some Belgian prison inmates have been accommodated at Tilburg prison in the Netherlands. 1,215,000 crimes were recorded by the police in 2007 (1,402,000 in 2002).

### Police

The police force is divided into 25 regions. There is also a National Police Service which includes the Central Criminal Investigation Office, which deals with serious crimes throughout the country, and the International Criminal Investigation Office, which informs foreign countries of international crimes.

### Education

Statistics for the academic year 2004–05:

	Schools/ institutions	Full-time pupils/students (in 1,000)
		Total
Primary education	6,986	1,549
Special primary education	328	50
Expertise centres	324	56
Secondary education	668	938
Senior vocational secondary education	68	332
Apprenticeship training	67	143
Vocational colleges	54	346
University education	13	199

In 2004–05 there were 199,900 students enrolled in Dutch universities (of which female, 49.7%). Enrolment by subject in 2004–05 (with total students): social sciences (46,600); business and administration (31,800); humanities and arts (25,300); law (24,400); health and welfare (23,500); science (19,200);

engineering, manufacturing and construction (18,000); education (7,900); agriculture and veterinary science (2,400); services (800).

In 2007 there were 29,104 Open University students and 752 staff. There are 12 study centres in the Netherlands and three support centres, plus six study centres in Belgium.

In 2006 public expenditure on education came to 5.4% of GNI and 12.0% of total government spending. The adult literacy rate is at least 99%.

### Health

There were 8,673 general practitioners on 1 Jan. 2007; 2,825 pharmacists and 2,197 midwives on 1 Jan. 2006; and 16,346 specialists and 13,355 physiotherapists on 1 Jan. 2005. There were 7,994 dentists in 2005. At 1 Jan. 2006 there were 117 hospitals and 50,209 licensed hospital beds (excluding mental hospitals). The 1919 Opium Act (amended in 1928 and 1976) regulates the production and consumption of 'psychoactive' drugs. Personal use of cannabis is effectively decriminalized and the sale of soft drugs through 'coffee shops' is not prosecuted provided certain conditions are met. Euthanasia became legal when the First Chamber (the Senate) gave its formal approval on 10 April 2001 by 46 votes to 28. The Second Chamber had voted to make it legal by 104 votes to 40 in Nov. 2000. The law came into effect on 1 April 2002. In 2007 euthanasia organizations recorded 2,120 instances of doctors helping patients to die. The Netherlands was the first country to legalize euthanasia. In 2007 the Netherlands spent 8.9% of its GDP on health.

### Welfare

The General Old Age Pension Act (AOW) entitles everyone to draw an old age pension from the age of 65. At 31 Dec. 2005 there were 2,554,000 persons entitled to receive an old age pension, and 138,000 a pension under the Surviving Relatives Insurance; 1,915,000 parents were receiving benefits under the General Family Allowances Act. In 2005 there were 899,000 persons claiming labour disablement benefits and 305,000 persons claiming benefits under the Unemployment Act.

## RELIGION

Entire liberty of conscience is granted to the members of all denominations. The royal family belong to the Dutch Reformed Church.

Population aged 12 years and over in 2004 was: Roman Catholics, 30%; Dutch Reformed Church, 11%; Calvinist, 6%; other creeds, 12%; no religion, 42%. The Dutch Reformed Church merged with the Reformed Churches in the Netherlands and the Evangelical Lutheran Church in the Kingdom of the Netherlands in May 2004 to form the Protestant Church in the Netherlands—now the second largest church body in the country. The Roman Catholic Church had, Jan. 1992, one archbishop (of Utrecht), six bishops, four assistant bishops and about 1,750 parishes and rectorships. In Feb. 2012 there were two Roman Catholic cardinals. The Old Catholic Church of the Netherlands has one Archbishop (of Utrecht), one Bishop (of Haarlem) and 26 parishes. The Jews had, in 2008, 30 communities. In 2006 there were 825,000 Muslims (5.1% of the population). There were 99,000 Hindus (0.6% of the population) in 2004.

Source: Statistics Netherlands

## CULTURE

### World Heritage Sites

The Kingdom of the Netherlands has nine sites on the UNESCO World Heritage List: Schokland and its surroundings (inscribed on the list in 1995); the defence line at Amsterdam (1996); the mill network at Kinderdijk-Elshout (1997); the historic area of Willemstad, the inner city and harbour in Curaçao (1997); the D. F. Wouda steam pumping station (1998); Droogmakerij de Beemster (Beemster Polder) (1999); the Rietveld Schröder house (2000); and the Seventeenth-century canal ring area of Amsterdam inside the Singelgracht (2010).

The Netherlands shares the Wadden Sea (2009) with Germany.

#### Press

In 2006 there were 32 daily newspapers with a combined circulation of 4,769,000. The most widely read daily is *De Telegraaf*, with an average daily circulation of 723,000 copies in 2006.

#### Tourism

Tourism is a major sector of the economy. In 2005 tourist spending (excluding passenger transport) came to US\$10,383m. A total of 10,383,000 non-resident tourists stayed in holiday accommodation in 2005.

#### Festivals

Floriade, a world-famous horticultural show, takes place every ten years and is the largest Dutch attraction, being attended by 2.3m. people in 2002. The Maastricht Carnival in April attracts many visitors. The Flower Parade from Noordwijk to Haarlem occurs in late April. Koninginnedag on 30 April is a nationwide celebration of Queen Beatrix's birthday. The Oosterparkfestival, a cultural celebration of that district of Amsterdam, runs for three days in the first week of May. Liberation Day is celebrated every five years on 5 May, with the next occurrence being in 2015. An international music festival, the Holland Festival, is held in Amsterdam throughout June each year and the Early Music Festival is held in Utrecht. The North Sea Jazz Festival, the largest in Europe, takes place in The Hague. Each year the most important Dutch and Flemish theatre productions of the previous season are performed at the Theatre Festival in Amsterdam and Antwerp (Belgium). The Holland Dance Festival is held every other year in The Hague and the Springdance Festival in Utrecht annually. Film festivals include the Rotterdam Film Festival in Feb., the World Wide Video Festival in April, the Dutch Film Festival in Sept. and the International Documentary Film Festival of Amsterdam in Dec.

#### DIPLOMATIC REPRESENTATIVES

Of the Netherlands in the United Kingdom (38 Hyde Park Gate, London, SW7 5DP)

*Ambassador:* Pieter Willem Waldeck.

Of the United Kingdom in the Netherlands (Lange Voorhout 10, 2514 ED The Hague)

*Ambassador:* Paul Arkwright.

Of the Netherlands in the USA (4200 Linnean Ave., NW, Washington, D.C., 20008)

*Ambassador:* Renée Jones-Bos.

Of the USA in the Netherlands (Lange Voorhout 102, The Hague)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Edwin R. Nolan.

Of the Netherlands to the United Nations

*Ambassador:* Herman Schaper.

Of the Netherlands to the European Union

*Permanent Representative:* Pieter de Gooijer.

## OVERSEAS COUNTRIES AND TERRITORIES

### Landen en gebieden overzee

These fall into two categories: *Autonomous Countries within the Kingdom of the Netherlands* (Aruba, Curaçao and Sint Maarten) and *Autonomous Special Municipalities of the Netherlands* (Bonaire, Saba and Sint Eustatius). Following the dissolution of the Netherlands Antilles on 10 Oct. 2010, Curaçao

and Sint Maarten became autonomous countries within the Kingdom of the Netherlands (a status held by Aruba since 1986) while Bonaire, Saba and Sint Eustatius were granted a status comparable to that of the municipalities within the Netherlands itself.

## AUTONOMOUS COUNTRIES WITHIN THE KINGDOM OF THE NETHERLANDS

### Zelfstandige landen binnen het Koninkrijk der Nederlanden

#### Aruba

#### KEY HISTORICAL EVENTS

Discovered by Alonzo de Ojeda in 1499, Aruba was claimed for Spain but not settled. It was acquired by the Dutch in 1634, but

apart from garrisons, was left to the indigenous Caiquetious (Arawak) Indians until the 19th century. From 1828 it formed part of the Dutch West Indies and, from 1845, part of the Netherlands Antilles with which, on 29 Dec. 1954, it achieved internal self government. Following a referendum in March 1977 the Dutch government announced on 28 Oct. 1981 that Aruba

would proceed to independence separately from the other islands. Aruba was constitutionally separated from the Netherlands Antilles from 1 Jan. 1986. An agreement with the Netherlands government in June 1990 deleted references to eventual independence at Aruba's request.

### TERRITORY AND POPULATION

The island, which lies in the southern Caribbean 32 km north of the Venezuelan coast and 68 km west of Curaçao, has an area of 193 sq. km (75 sq. miles) and a population at the last census in Sept. 2010 of 101,484; density 526 inhabitants per sq. km. The UN gives a projected population for 2015 of 109,000. The chief towns are Oranjestad, the capital (2010 census population, 28,294) and San Nicolas. Dutch is the official language, but the language usually spoken is Papiamentu, a creole language. Over half the population is of Indian stock, with the balance of Dutch, Spanish and mestizo origin.

### SOCIAL STATISTICS

Population growth rate, 2008, 1.5%. Life expectancy in the period 2000–05 was 71 years for males and 77 years for females. Birth rate per 1,000 population (2008), 11.6; death rate, 4.9; infant mortality, 1.6.

### CLIMATE

Aruba has a tropical marine climate, with a brief rainy season from Oct. to Dec.

### CONSTITUTION AND GOVERNMENT

Under the separate constitution inaugurated on 1 Jan. 1986, Aruba is an autonomous part of the Kingdom of the Netherlands with its own legislature, government, judiciary, civil service and police force. The Netherlands is represented by a Governor appointed by the monarch. The unicameral legislature (*Staten*) consists of 21 members elected for a four-year term of office.

### RECENT ELECTIONS

Elections were held on 25 Sept. 2009. The Aruban People's Party (AVP) won with 12 out of 21 seats (48.1% of the vote), against 8 seats (35.9%) for the People's Electoral Movement (MEP) and 1 seat (5.7%) for the Real Democracy Party (PDR). Turnout was 86.3%.

### CURRENT GOVERNMENT

*Governor:* Fredis Refunjol; b. 1950 (took office on 11 May 2004).

*Prime Minister:* Mike Eman; b. 1961 (sworn in on 30 Oct. 2009).

*Government Website:* <http://www.gobierno.aw>

### ECONOMY

#### Currency

The currency is the *Aruban florin* (AWG). Inflation was 3.8% in 2005. Total money supply in July 2005 was 1,030m. Aruban florins, foreign exchange reserves were US\$297m. and gold reserves were 100,000 troy oz.

#### Budget

In 2007 revenues totalled 1,632.6m. Aruban florins and expenditures 1,685.6m. Aruban florins.

#### Performance

Real GDP growth was 0.6% in 2006 and 0.4% in 2007.

#### Banking and Finance

The *President* of the Central Bank of Aruba is Jane Semeleer.

### ENERGY AND NATURAL RESOURCES

#### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 10.9 tonnes per capita in 2008.

#### Electricity

In 2007 consumption of electricity was 936,000 MWh.

#### Fisheries

In 2008 the catch totalled 151 tonnes.

### INDUSTRY

The quantity of oil refined in 2001 was 64m. bbls.

#### Labour

The economically active population in 2000 numbered 44,384 persons of which 41,286 were employed and 3,098 unemployed.

### EXTERNAL ECONOMIC RELATIONS

There are two Free Zones at Oranjestad.

#### Imports and Exports

2008: imports, US\$1,113m.; exports, US\$101m. Leading import suppliers are the USA, Netherlands, UK and Colombia. Leading export destinations are Panama, Colombia, Venezuela and the USA.

### COMMUNICATIONS

#### Roads

In 2000 there were 39,995 passenger cars and 5,443 commercial vehicles. There were 439 passenger cars per 1,000 inhabitants.

#### Civil Aviation

There is an international airport (Aeropuerto Internacional Reina Beatrix).

#### Shipping

Oranjestad has a container terminal and cruise ship port. The port at Barcadera services the offshore and energy sector and a deep-water port at San Nicolas services the oil refinery.

#### Telecommunications

Aruba had 128,000 mobile phone subscribers in 2009 and 38,300 fixed telephone lines. There were 24,000 internet users in 2007.

### SOCIAL INSTITUTIONS

#### Justice

There is a Joint Court of Justice of Aruba, Curaçao, Sint Maarten and the Caribbean part of the Netherlands. Final Appeal is to the Supreme Court in the Netherlands. The population in penal institutions in Jan. 2005 was 231 (equivalent to 324 per 100,000 population).

#### Education

In 2007 there were 2,713 pupils in pre-primary schools, 9,511 in primary schools, 2,950 in junior high schools, 2,372 in high schools and 2,192 in technical or vocational schools. Literacy rate (2008), 98%. In 2007 public spending on education amounted to 4.0% of GDP and 11.4% of total government expenditure.

#### Health

In 2000 there was one hospital with 305 beds.

### RELIGION

In 2000, 86.2% of the population were Roman Catholic.

### CULTURE

#### Press

In 2006 there were four daily newspapers with a combined circulation of 54,000 (667 per 1,000 adult inhabitants).

**Tourism**

In 2008 there were 826,774 tourists staying 6,264,689 nights and 556,090 cruise passenger visitors. The majority of tourists are from the USA (65.3%) and Venezuela (13.6%).

## Curaçao

**KEY HISTORICAL EVENTS**

The Arawak Amerindians were the first people to settle the island. Spanish sailors sighted it in 1499 but it was not until 1634 that the Dutch established a presence. The Dutch West India Company built the capital, Willemstad, on a natural harbour. The island became an important centre for regional commerce, in particular the slave trade. In 1828 it was integrated into the Dutch West Indies and from 1845 was part of the Netherlands Antilles.

Economic decline took hold after slavery was outlawed by the Dutch in 1863. When oil was discovered in 1914, Royal Dutch Shell and the Dutch government combined to build a refinery. Internal self-government was granted in 1954 and in Oct. 2010 Curaçao became autonomous within the Kingdom of the Netherlands. The Netherlands Antilles was formally dissolved.

**TERRITORY AND POPULATION**

Situated around 100 km north of the Venezuelan coast, Curaçao covers 444 sq. km and at 1 Jan. 2009 had a population of 141,766. Willemstad is the capital with a population (2001) of 125,000.

Dutch, Papiamentu (a Creole language with elements of Dutch, English, Portuguese and Spanish) and English are all official languages.

**CLIMATE**

Willemstad, Feb. 27-2°C, Aug. 29-4°C. Annual rainfall 553 mm.

**CONSTITUTION AND GOVERNMENT**

At a non-binding referendum on 8 April 2005, 68% of votes cast favoured Curaçao seceding from the Netherlands Antilles and becoming a territory of the Netherlands in its own right. In Oct. 2010 the Netherlands Antilles was dissolved and Curaçao became an autonomous state within the Kingdom of the Netherlands, independent in all respects except defence and foreign affairs.

The head of state is the monarch of the Netherlands, represented by a *Governor*. The *Prime Minister* heads the Executive Council. The *Staten* (parliament) is comprised of 21 members elected by popular vote every four years.

**RECENT ELECTIONS**

Parliamentary elections were held on 27 Aug. 2010. Partido Antia Restrukturá (PAR) won 8 seats (30.2% of the vote), Movimentu Futuro Korsou (MFK) 5 (21.5%), Pueblo Soberano (PS) 4 (18.7%), Movishon Antia Nobo (MAN) 2 (8.8%), Partido Frente Obrero Liberashon 30 Di Mei (FOL) 1 (6.5%) and Partido Nashonal di Pueblo (PNP) 1 (6.2%). With no party achieving a clear majority, MFK, MAN and PS agreed to form the government.

**CURRENT GOVERNMENT**

*Governor:* Frits Goedgedrag, b. 1951 (in office since 10 Oct. 2010)

*Prime Minister:* Gerrit Schotte, b. 1974 (MFK; in office since 10 Oct. 2010).

*Government Website (Dutch and Papiamentu only):*

<http://www.curaçao-gov.an>

**ECONOMY**

The economy is reliant on oil refining, tourism and offshore finance.

**Currency**

It is expected that the *Caribbean guilder* will replace the *Netherlands Antillean guilder* in 2013. Inflation was 1.8% in 2008 (2.2% in 2007).

**Performance**

Real GDP growth was 2.1% in 2008 (1.6% in 2007).

**Banking and Finance**

After dissolution, the Bank of the Netherlands Antilles was renamed the Central Bank of Curaçao and Sint Maarten.

**ENERGY AND NATURAL RESOURCES****Oil and Gas**

The economy was formerly based on oil refining at the Shell refinery but following an announcement that closure was imminent, it was sold to the government in Sept. 1985 and leased to Petróleos de Venezuela on a reduced scale.

**INDUSTRY****Labour**

Unemployment stood at 9.7% in 2009.

**COMMUNICATIONS****Roads**

In 2004 there were 75,248 registered vehicles (60,590 passenger cars).

**Civil Aviation**

There is an international airport (Curaçao-Hato Airport), which handled 840,581 passengers in 2005.

**Shipping**

In 2006, 2,889 ships (including 1,304 freighters, 920 tankers and 205 cruise ships) entered Curaçao's port.

**RELIGION**

At the 2001 census 80.1% of the population was Roman Catholic.

**CULTURE**

The Historic Area of Willemstad, Inner City and Harbour was inscribed on the UNESCO World Heritage List in 1997.

**Tourism**

In 2006 Curaçao handled 324,345 cruise ship passengers.

**DIPLOMATIC REPRESENTATIVES**

*US Consul-General:* Valerie Belon (J. B. Gorsiraweg 1, Curaçao).

## Sint Maarten

**KEY HISTORICAL EVENTS**

Sighted by Christopher Columbus on 11 Nov. 1493, the feast day for St Martin of Tours, the island was eventually settled by the Dutch in 1631. A centre of salt mining, the British, French and

Spanish competed for control with the Dutch. In 1648 the island was divided in two by the Treaty of Concordia, with the French administering the north (called St Martin) and the Dutch the south. Slaves in the south worked on cotton, sugar and tobacco plantations until the Dutch abolished slavery in 1863. Economic decline set in until Sint Maarten became a free port at the outbreak of the Second World War.

In 1954 it was incorporated into the Netherlands Antilles. In 2000 a referendum supported self-government, a status achieved in Oct. 2010 when Sint Maarten became autonomous within the Kingdom of the Netherlands.

#### TERRITORY AND POPULATION

Situated around 950 km northeast of the Venezuelan coast, Sint Maarten covers 34 sq. km and at 1 Jan. 2009 had a population of 40,917. Philipsburg is the capital. The northern half of the island is the French possession of St Martin.

The official languages are Dutch and English. Creole, Papiamento and Spanish are also spoken.

#### CLIMATE

Feb. 25-0°C, Aug. 28-5°C. Annual rainfall averages between 931 mm and 955 mm.

#### CONSTITUTION AND GOVERNMENT

In a referendum on 22 June 2000, 70% of votes cast were in favour of Sint Maarten becoming a self-governing country within the Kingdom of the Netherlands. This status was achieved in all respects except defence and foreign affairs in Oct. 2010 when the Netherlands Antilles was dissolved.

The head of state is the monarch of the Netherlands, represented by a *Governor*. The *Prime Minister* heads a *Council of Ministers*. The *Staten* (parliament) is comprised of 15 members elected by proportional representation every four years.

#### RECENT ELECTIONS

Parliamentary elections were held on 17 Sept. 2010. The National Alliance (NA) won 7 seats (45.9% of the vote), United People (UP) 6 (36.1%) and Democratic Party (DP) 2 (17.1%). With no party achieving a clear majority, UP and DP agreed to form the government.

#### CURRENT GOVERNMENT

*Governor*: Eugene Holiday (in office since 10 Oct. 2010).

*Prime Minister*: Sarah Wescot-Williams (DP; in office since 10 Oct. 2010).

*Government Website*: <http://www.sintmaartengov.org>

#### ECONOMY

Tourism is the mainstay of the economy, providing 80% of jobs. Virtually all food, energy and manufactured goods are imported.

#### Currency

It is expected that the *Caribbean guilder* will replace the *Netherlands Antillean guilder* in 2013. Inflation was 1.8% in 2008 (2.2% in 2007).

#### Performance

The economy grew by 1.6% in 2008, down from 4.5% in 2007. GDP at purchasing power parity was estimated at US\$794.7m. in 2008. Unemployment stood at 10.2% in the same year.

#### Banking and Finance

After dissolution, the Bank of the Netherlands Antilles was renamed the Central Bank of Curaçao and Sint Maarten.

#### INDUSTRY

##### Labour

The labour force in June 2009 totalled 24,344, with 21,378 people in employment. The unemployment rate in June 2009 was 12.2%.

#### COMMUNICATIONS

##### Civil Aviation

There is an international airport (Princess Juliana Airport), which handled 1,663,226 passengers in 2005.

##### Shipping

In 2008 Sint Maarten handled 1,345,812 cruise ship passengers.

#### RELIGION

At the 2001 census 39% of the population was Roman Catholic, 27% Protestant and 12% Pentecostal.

#### CULTURE

##### Tourism

There were 475,410 stay-over tourist arrivals in 2008.

#### DIPLOMATIC REPRESENTATIVES

*US Consul-General*: Valerie Belon (J. B. Gorsiraweg 1, Curaçao).

## AUTONOMOUS SPECIAL MUNICIPALITIES OF THE NETHERLANDS

### Bijzondere gemeenten van Nederland

#### Bonaire

Inhabited by Arawak Caquetios Indians by AD 1000, the island was sighted by Spanish sailors in 1499 and settled by the Dutch from 1623. The two nations exchanged control of the island until the Dutch established dominance in 1636, with the Dutch West India Company running the island. The British seized control from 1800–03 and also from 1807–16. Slavery was outlawed in 1862. After Nazi Germany invaded the Netherlands in 1940 Bonaire was used as an internment camp. In the post-war years tourism became the staple of the economy. When the Netherlands Antilles was dissolved on 10 Oct. 2010, Bonaire became an Autonomous Special Municipality of the Netherlands.

Bonaire is situated some 100 km north of the Venezuelan coast. It has an area of 288 sq. km and, in Jan. 2009, a population of 12,877. The capital is Kralendijk. Dutch, English and Papiamento are all official languages.

The US dollar replaced the Netherlands Antillean guilder as the legal currency in Jan. 2011. Real GDP grew by 2.7% in 2005 and inflation was 1.3%. The mainstays of the economy are tourism (particularly diving) and the salt industry. Flamingo International Airport handled 573,792 passengers in 2006 (of whom 277,505 were in transit). In 2004 there were 6,766 registered vehicles (4,139 passenger cars). In 2006 there were 63,552 tourist arrivals. Bonaire handled 40,077 cruise ship passengers in 2005.

*Lieut.-Governor*: Lydia Emerencia (took office on 1 March 2012).

## Saba

Archaeological evidence suggests the island was originally inhabited by Arawak or Carib Indians. Sighted by Columbus in 1493, there was no serious attempt at Western colonization until the Dutch West India Company sent a party of settlers in 1640. An English buccaneer, Thomas Morgan, seized the island in 1664 and it served as a centre of piracy in the 17th century. The French, English and Dutch long battled for dominance, with rum and sugar important revenue earners. The Dutch reclaimed Saba in 1816 and have maintained control ever since. After the dissolution of the Netherlands Antilles on 10 Oct. 2010, Saba became an Autonomous Special Municipality of the Netherlands.

The island has an area of 13 sq. km and a population, in Jan. 2009, of 1,601. The capital is The Bottom. Dutch, English and Papiamentu are all official languages. Roman Catholicism is the dominant religion. There is a single main road plus the Juancho E. Yrausquin Airport. A ferry service operates regularly to and from Sint Maarten. Tourism is increasingly important to the economy, with some 25,000 visitors a year. Fishing is also a major revenue earner. The US dollar replaced the Netherlands Antillean guilder as the legal currency in Jan. 2011. The Saba University School of Medicine has been in operation since 1986.

*Lieut.-Governor:* Jonathan G. A. Johnson (took office on 2 July 2008).

## Sint Eustatius

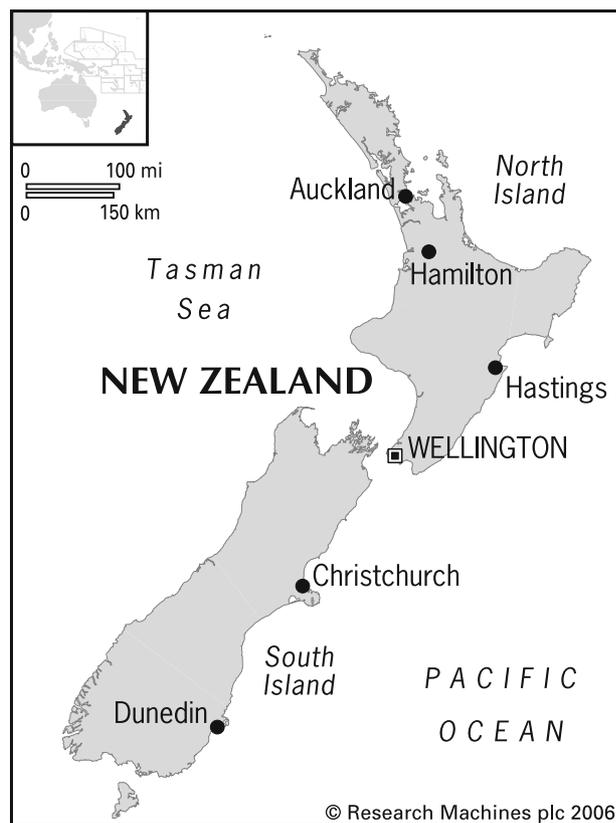

Sighted, but not landed, by Christopher Columbus in 1493, the island was settled by a delegation from Zeeland, a province of the Netherlands, in 1636. From 1678 the Dutch West India Company was directly responsible for government. A free port from 1756, it became a focus of smuggling as well as a centre of sugar production. On 16 Nov. 1766 the guns of Fort Oranje were fired to return the salute of a visiting American ship, an act generally considered as the first international recognition of the newly independent USA. Against the backdrop of the Fourth Anglo-Dutch War, the British seized control of the island but yielded power to the French within a year, who transferred sovereignty back to the Dutch in 1784. A referendum in April 2005 came out in favour of remaining within the Netherlands Antilles, but it was the only constituent island in favour of its continuation. Following the dissolution of the Netherlands Antilles on 10 Oct. 2010, Sint Eustatius became an Autonomous Special Municipality of the Netherlands.

The island covers an area of 21 sq. km and in Jan. 2009 had a population of 2,768. Its capital is Oranjestad. Dutch, English and Papiamentu are all official languages. The US dollar replaced the Netherlands Antillean guilder as the legal currency in Jan. 2011. The government is the principal employer. F. D. Roosevelt Airport has six scheduled flights from St Maarten every day. The University of Sint Eustatius School of Medicine received its charter in 1999.

*Lieut.-Governor:* Gerald Berkel (took office on 1 April 2010).

# NEW ZEALAND

## Aotearoa

*Capital:* Wellington

*Population projection, 2015:* 4.60m.

*GNI per capita, 2011:* (PPP\$) 23,737

*HDI/world rank:* 0.908/5

## KEY HISTORICAL EVENTS

The earliest settlers of New Zealand are thought to have come from eastern Polynesia, around the turn of the first millennium. Maori oral traditions point to discovery of the country by Kupe, who gave New Zealand its first name, Aotearoa, or 'Land of the Long White Cloud'. Oral tradition also refers to seven waka leaving a homeland known as Hawaiiki in a Great Fleet. The waka are still remembered in the names of significant tribal groupings and descent lines: *Aotea*, *Kurahaupo*, *Mataatua*, *Tainui*, *Takitimu*, *Te Arawa*, and *Tokomaru*.

By Capt. James Cook's arrival in 1769, substantial settlements existed throughout the North Island, with smaller settlements in the South Island. Sporadic warfare was common as tribes, or 'iwi', fought for resources and status, or 'mana'.

The first recorded European contact was with Dutch explorer Abel Tasman in 1642. Believing the South Island to be the beginning of a mythical continent connected to Southern Africa, he bequeathed the name 'Staten Land'. A Dutch cartographer corrected Tasman, giving the name New Zealand to compliment the larger New Holland, as Australia was known at the time. Earlier on the same voyage Tasman had landed on an island off Australia which he named Van Diemen's Land, later called Tasmania.

Contact between Maori and Europeans, or 'Pakeha', followed Cook's journeys to New Zealand and mapping of the coastline, opening the way for sealing and whaling stations. Coastal trade grew throughout the first decades of the 19th century and trade routes were established between Maori and the new colony of New South Wales as early as the 1820s. The Maori adapted quickly to both a market economy—selling provisions, timber and flax—and to new technologies (notably the musket). Pakeha settlement in the decades following Cook's arrival was often on Maori terms and was used by Maori in the traditional pursuit of mana in the eyes of rivals and neighbours. Mission stations soon appeared: the Church Missionary Society established three stations in the Bay of Islands between 1814 and 1823, and were joined by a Wesleyan Missionary Society station in the Hokianga in the 1820s.

## British Ascendancy

With greater contact both Maori and Pakeha saw the need to regulate Pakeha settlement. The Colonial Office in London appointed a Resident, James Busby, in 1833. In 1835, prompted by Busby, thirty-five chiefs signed a Declaration of Independence naming themselves the heads of state of a 'United Tribes of New Zealand'. Relations between Maori and Pakeha were formalized by the signing of the Treaty of Waitangi in 1840. In principle—or at least in the Maori text—this treaty guaranteed Maori chieftainship, or 'rangatiratanga', while granting governorship, or 'kawanatanga', to Queen Victoria. Until 1860 Maori outnumbered Pakeha but in practice—and in the English text—sovereignty was transferred, allowing greater British settlement and control.

Established in 1840, Auckland was chosen as the colony's capital by its first governor, Capt. William Hobson. Immigration was encouraged by the New Zealand Company with settlements at Wellington and Wanganui (1840), New Plymouth (1841), and Nelson (1842). Scottish immigrants founded Dunedin (1848); and Edward Gibbon Wakefield made plans for a model English settlement at Christchurch (1851). In 1852 representative government was established with a constitution providing for a House of Representatives and Legislative Council, as well as six provincial councils. The governor at the time, Sir George Grey, retained the right of veto and was responsible for 'Native' policy. At first, each provincial council exercised extensive powers. Their abolition in 1876 marked the beginnings of central government. The Legislative Council was disbanded in 1950 leaving New Zealand with a single-tier parliament.

Initially, voting—based on individual land ownership—excluded Maori who traditionally owned land collectively. Participation was extended to Maori in 1867 with four Maori seats. James Carroll, Apirana Ngata, Maui Pomare, and Peter Buck (Te Rangi Hiroa) were all prominent: Carroll was the first Maori to enter government. He was minister of native affairs and later acting prime minister.

Settlement was not always peaceful: war broke out in the 1840s and 1860s in the central and western North Island. British troops fought alongside local militia and friendly Maori, facing some of the earliest forms of trench and guerrilla warfare. The Native Land Court was set up in 1865 to determine the ownership of Maori land according to Pakeha law. Where Maori land and user rights existed communally, the Court sought to define parcels of land owned individually, thereby facilitating land sales.

## Economic Boom

Land speculation fuelled an agricultural boom in the 1840s and 1850s providing the colony's first sustainable export commodity. New Zealand provided 8.6% of Britain's wool imports in 1861 and had 8.5m. sheep by 1867. The development of refrigerated

shipping in the 1880s bolstered the pastoral economy through meat exports. Gold rushes in the 1860s and 1870s in Otago, the west coast of the South Island, and in Coromandel also contributed to the economy. Gold exports totalled £46m. by 1890. Wealth brought progress; the 1870s administrations of Julius Vogel and Harry Atkinson borrowed heavily to fund work schemes to encourage immigration and settlement. 1,100 miles of rail track were laid by 1879, and telegraphs linked all the main towns. The population doubled to 500,000 by 1881.

The 1880s saw the beginnings of party politics. A Liberal agenda, with policies of 'one man, one vote' and the compulsory purchase of large estates, was popular and succeeded in extending suffrage to all men. Robert Stout and John Ballance's leasehold land policies in the mid-1880s were also popular. A Liberal Party was formed in 1889 and, backed by unions and the landless, won the 1890 election with Ballance as its leader. The Conservatives formed the first genuine opposition. Richard John Seddon took over the Liberal leadership in 1892 and remained premier until his death in 1906. Among Liberal achievements were the Land and Income Tax Act 1891 and the Advance to Settlers Act 1894, which assisted 17,000 people by 1912. In 1893, New Zealand became the first country to extend the suffrage to women. Other reforms included William Pember Reeves' Industrial Conciliation and Arbitration Act of 1894 and one of the world's first national pension schemes.

In 1901 New Zealand declined the offer to join the Commonwealth of Australia and remained a British colony until 1907 when it gained Dominion status. Parliament remained subordinate to the British parliament until the adoption of the *Statute of Westminster 1931* in 1947, when New Zealand became fully sovereign with the British monarch as head of state. New Zealand annexed the Cook Islands in 1901, and was granted administration of Western Samoa at the Treaty of Versailles in 1918. It administered Samoa until the 1960s. New Zealand contributed around 100,000 soldiers in the First World War from a population of little more than a million; nearly 17,000 did not return. Nearly 9,000 New Zealanders died in the influenza epidemic spread by returning soldiers, with a Maori mortality rate six times that of Pakeha. In the Second World War around 200,000 New Zealanders joined Allied forces from a population of 1.6m.

### *Twentieth Century*

Class-based political divisions intensified in the early twentieth century. Amid industrial unrest in 1912, the Liberal government fell to a vote of no confidence. Reform took power, introducing anti-union legislation. Strikes in Waihi, Wellington and Huntly were quelled. Reform governed until 1928, assisted at first by a wartime coalition with the Liberals, and then with tacit Liberal support. Policies broadly followed the dictates of farmers, creating a national Meat Board (1922) and Dairy Board (1923).

A United-Reform coalition (1931–35) coped with world recession. Employment reached 12%; the national income fell from an estimated £150m. to £90m., and the value of exports fell by 40%. To balance the budget, cuts were made to pensions, education, health and public works. In the absence of an unemployment benefit, men were sent to rural relief camps to work on low-capital, high-labour tasks. Measures such as a Reserve Bank and currency devaluation in 1933 helped farmers but did not address the broader social distress.

### *Welfare State*

Michael Joseph (Micky) Savage's first Labour government (1935–49) reclaimed for New Zealand its title of social laboratory of the world. It introduced one of the world's most comprehensive social welfare systems—incorporating pensions, health, education and family benefits—and increased state housing; introduced state guaranteed prices for farm produce to protect farmers from

international price fluctuations; and nationalized the Reserve Bank.

After 1936 rural support rallied around a National Party formed from remnants of the United-Reform coalition. Labour retained power with support of the four Maori seats, all held by the Ratana Party. The National Party won the 1949 election, promising to increase spending power and curb union power and economic controls. National retained power for most of the post-war boom years; brief Labour administrations under Walter Nash (1957–60) and Norman Kirk (1972–75) coincided with unfavourable economic conditions. Keith Holyoake's National government (1960–72) was concerned that Britain's anticipated entry to the EEC would damage New Zealand's exports to the UK. The Equal Pay Act (1972) challenged gender-based pay discrimination. A state-funded workplace injury compensation was set up.

Maori demands for recognition of the Treaty of Waitangi grew in the 1970s. The 1975 Land March saw tens of thousands march on parliament and the occupation of Bastion Point in 1977–78 centred on land compulsorily acquired by the government in 1951. Labour established the Waitangi Tribunal in 1975 to hear Maori claims of Treaty breaches. It lacked authority until 1985 when a Labour government made its powers retrospective to 1840. Tribunal recommendations have formed the basis for negotiations between the Crown and tribal authorities.

Britain's entry into the EEC in 1973 was a set-back for an economy dependent on exports to Britain. Robert Muldoon's National government (1975–84) introduced tariff protection, wage and price freezes, and increased borrowing for 'Think Big' public works. Muldoon won a narrow victory in the 1981 election following civil unrest during the 'Springbok' rugby tour. Riot police faced massive demonstrations as many New Zealanders opposed sporting links with the South African apartheid regime. The country found a new direction in the free market policies of David Lange's Labour government, which came to power in 1984. The economic direction of Roger Douglas, 'Rogernomics', radically altered the socio-economic landscape, reducing trade barriers and selling state assets to fund debt recovery.

In international affairs the Labour government introduced the New Zealand Nuclear Free Zone, Disarmament, and Arms Control Act 1987, declaring the country nuclear free. The legislation—supported by all political parties—led to the end of New Zealand's involvement in the ANZUS military agreement with Australia and the USA. In 1973 Australia and New Zealand tried to halt French nuclear testing in the Pacific through the International Court of Justice. New Zealand sent two frigates to Mururoa Atoll in protest. The 1985 bombing of the *Rainbow Warrior* in Auckland harbour by French secret service agents reopened the issue.

Wrangling over economic direction in the late 1980s led to Lange's resignation. He was replaced by Geoffrey Palmer in 1989, who in turn resigned shortly before the 1990 election. He was succeeded by Mike Moore. Labour lost the 1990 election to a National Party led by Jim Bolger who was determined on free market reforms. Social welfare reform, cuts in tertiary education funding and reform of accident compensation legislation cut back state intervention. The Employment Contracts Act (1991) outlawed compulsory union membership and introduced individual contracts, weakening union power. Jenny Shipley led a leadership coup in 1997 to become the country's first female prime minister, though not the first elected female prime minister. That landmark was achieved by Helen Clark who led the Labour Party to victory in the 1999 election. In 2008 John Key led National back to power.

Electorate reform in the 1990s saw New Zealand move from a first-past-the-post system to proportional representation under the mixed-member-proportional system (MMP). Despite the debacle of the first MMP election in 1996 when a minor party (New Zealand First, formed by disgruntled National supporters)

played National off against Labour for two months before forming a coalition with National, the system has provided greater representation for minorities.

### TERRITORY AND POPULATION

New Zealand lies southeast of Australia in the south Pacific, Wellington being 1,983 km from Sydney. There are two principal islands, the North and South Islands, besides Stewart Island, Chatham Islands and small outlying islands, as well as the territories overseas.

New Zealand (i.e. North, South and Stewart Islands) extends over 1,750 km from north to south. Area, excluding territories overseas, 267,707 sq. km. The main islands are: North Island, 114,154 sq. km; South Island, 150,416 sq. km; Stewart Island, 1,681 sq. km; Chatham Islands, 963 sq. km. The minor islands included within the geographical boundaries of New Zealand (but not within any local government area) are: Antipodes Islands, Auckland Islands, Bounty Islands, Campbell Island, Kermadec Islands, Snares Islands, Solander Island and Three Kings Islands. With the exception of meteorological station staff on Raoul Island in the Kermadec Group and Campbell Island there are no inhabitants.

The Kermadec Islands were annexed to New Zealand in 1887, have no separate administration and all New Zealand laws apply to them. Situation, 29° 10' to 31° 30' S. lat., 177° 45' to 179° W. long., 1,600 km NNE of New Zealand. The largest of the group is Raoul or Sunday Island, 29 sq. km, smaller islands being Macaulay and Curtis, while Macaulay Island is 5 km in circuit.

Growth in census population, exclusive of territories overseas:

	Total population	Average annual increase (%)		Total population	Average annual increase (%)
1858	115,461	—	1945 <sup>1,2</sup>	1,702,329	0.83
1874	344,985	—	1951 <sup>1</sup>	1,939,473	2.37
1878	458,007	7.33	1956 <sup>1</sup>	2,174,061	2.31
1881	534,030	5.10	1961 <sup>1</sup>	2,414,985	2.12
1886	620,451	3.06	1966 <sup>1</sup>	2,676,918	2.11
1891	668,652	1.50	1971 <sup>1</sup>	2,862,630	1.35
1896	743,214	2.13	1976 <sup>1</sup>	3,129,384	1.80
1901 <sup>1</sup>	815,862	1.90	1981 <sup>1</sup>	3,175,737	0.29
1906	936,309	2.75	1986 <sup>1</sup>	3,307,083	0.82
1911	1,058,313	2.52	1991 <sup>1</sup>	3,434,949	0.76
1916 <sup>1</sup>	1,149,225	1.50	1996 <sup>1</sup>	3,681,546	1.40

1926	1,408,140	2.06	2006 <sup>1</sup>	4,143,279	1.63
1936 <sup>2</sup>	1,573,812	1.13			

<sup>1</sup>Excluding members of the Armed Forces overseas.  
<sup>2</sup>The census of New Zealand is quinquennial, but the census falling in 1931 was abandoned as an act of national economy, and owing to war conditions the census due in 1941 was not taken until 25 Sept. 1945.

The latest census took place on 7 March 2006. Of the 4,143,279 people counted, 4,027,947 were usually resident in the country and 115,332 were overseas visitors.

The usually-resident populations of the 12 regional councils, four unitary authorities and one special territorial authority (all data conforms with boundaries redrawn after the 1989 reorganization of local government) in 2001 and 2006:

Local Government Region	Total Population		Percentage change 2001–06 (%)
	2001 census	2006 census	
Northland	140,133	148,470	5.9
Auckland	1,158,891	1,303,068	12.4
Waikato	357,726	382,713	7.0

<sup>1</sup>Unitary Authorities. <sup>2</sup>Special Territorial Authority—Chatham Islands.

The UN gives a projected population for 2015 of 4.60m.

In 2005, 86.2% of the population lived in urban areas. Density, 15.3 per sq. km (2006).

Resident populations of main urban areas at the 2006 census were as follows:

North Island			
Auckland	1,208,091	Wanganui	38,988
Gisborne	32,529	Wellington	397,974
Hamilton	184,838	Whangarei	49,080
Kapiti	37,344	South Island	
Napier	118,404	Christchurch	360,768
New Plymouth	49,281	Dunedin	110,997
Palmerston North	76,032	Invercargill	46,773
Rotorua	53,766	Nelson	56,364
Tauranga	108,882		

Between 1996 and 2006 the number of people who identified themselves as being of European ethnicity dropped from 83.1% to 77.6%. Pacific Island people made up 6.9% of the population in 2006 (5.8% in 1996); Asian ethnic groups went from 5.0% in 1996 to 9.2% in 2006. Permanent and long-term arrivals in 2009–10 totalled 82,106, including 15,691 from Australia, 15,340 from the UK, 6,924 from India, 5,951 from the People's Republic of China and 3,476 from the USA. Permanent and long-term departures in 2009–10 totalled 67,599, including 33,027 to Australia, 8,809 to the UK, 2,646 to the USA and 2,398 to the People's Republic of China.

Maori population: 1896, 42,113; 1936, 82,326; 1945, 98,744; 1951, 115,676; 1961, 171,553; 1971, 227,414; 1981, 279,255; 1986, 294,201; 1991, 324,000; 1996, 523,374; 2001, 526,281; 2006, 565,329 (14.6% of the total population compared with 15.1% in 1996). In the 2006 census, 157,110 New Zealand residents (4.1%) said they could hold a conversation about everyday matters in Maori. In 2006, 23.7% of people of Maori ethnicity could hold a conversation about everyday matters in Maori.

From the 1970s organizations were formed to pursue Maori grievances over loss of land and resources. The Waitangi Tribunal was set up in 1975 as a forum for complaints about breaches of the Treaty of Waitangi, and in 1984 empowered to hear claims against Crown actions since 1840. Direct negotiations with the Crown have been offered to claimants and a range of proposals to resolve historical grievances launched for public discussion in Dec. 1994. These proposals specify that all claims are to be met over ten years with treaty rights being converted to economic assets. There have been four recent major treaty settlements: NZ\$170m. each for Tainui and Ngai Tahu, the NZ\$150m. Sealord fishing agreement and NZ\$40m. for Whakatohea in the Bay of Plenty. The Maori Land Court has jurisdiction over Maori freehold land and some general land owned by Maoris under the Te Ture Whenua Maori Act 1993.

English and Maori are the official languages.

## SOCIAL STATISTICS

Statistics for calendar years:

	<i>Live births</i>	<i>Deaths</i>	<i>Marriages</i>	<i>Divorces</i>
2002	54,021	28,065	20,690	10,292
2003	56,134	28,010	21,419	10,491
2004	58,073	28,419	21,006	10,609
2005	57,745	27,034	20,470	9,972
2006	59,193	28,245	21,423	10,065
2007	64,044	28,522	21,494	9,650

Birth rate, 2007, 15.1 per 1,000 population; death rate, 6.7 per 1,000 population; infant mortality, 2005, 5 per 1,000 live births. Annual population growth rate, 2000–05, 1.2%. In 2005 there were 514 suicides (382 males). Expectation of life, 2006: males, 78.0 years; females, 82.2. Fertility rate, 2007, 2.2 births per woman.

In 2007 there were 82,572 permanent and long-term immigrants (78,963 in 2005) and 77,081 permanent and long-term emigrants (71,992 in 2005).

## CLIMATE

Lying in the cool temperate zone, New Zealand enjoys very mild winters for its latitude owing to its oceanic situation, and only the extreme south has cold winters. The situation of the mountain chain produces much sharper climatic contrasts between east and west than in a north-south direction. Mean daily maximum temperatures and rainfall figures:

	<i>Annual rainfall (mm) in 2004</i>	<i>Jan (°C)</i>	<i>July (°C)</i>
Auckland	23.3	14.5	1,331
Christchurch	22.5	11.3	643
Dunedin	18.9	9.8	765
Wellington	20.3	11.4	1,447

The highest extreme temperature recorded in 2004 was 38.4°C, recorded at Darfield on 1 Jan., and the lowest –12.0°C, at Fairlie on 16 Aug.

## CONSTITUTION AND GOVERNMENT

Definition was given to the status of New Zealand by the (Imperial) Statute of Westminster of Dec. 1931, which had received the antecedent approval of the New Zealand Parliament in July 1931. The Governor-General's assent was given to the Statute of Westminster Adoption Bill on 25 Nov. 1947.

The powers, duties and responsibilities of the *Governor-General* and the *Executive Council* are set out in Royal Letters Patent and Instructions thereunder of 11 May 1917. In the execution of the powers vested in him the Governor-General must be guided by the advice of the Executive Council.

At a referendum on 6 Nov. 1993 a change from a first-past-the-post to a proportional representation electoral system was favoured by 53.9% of votes cast.

Parliament is the *House of Representatives*, consisting of 121 members (for the 2011 election 63 were general seats, 51 party list seats and seven Maori seats), elected by universal adult suffrage on the mixed-member-proportional system (MMP) for three-year terms. The seven Maori electoral districts cover the whole country. Maori and people of Maori descent are entitled to register either for a general or a Maori electoral district. As at Oct. 2008 there were 229,666 persons on the Maori electoral roll.

## National Anthem

'God Defend New Zealand'; words by T. Bracken, tune by J. J. Woods. There is a Maori version, 'Aotearoa', words by T. H. Smith. The UK national anthem has equal status.

## GOVERNMENT CHRONOLOGY

Prime Ministers since 1940. (Lab = Labour; Nat = National)

1940–49	Lab	Peter Fraser
1949–57	Nat	Sidney Holland
1957	Nat	Keith Jacka Holyoake
1957–60	Lab	Walter Nash
1960–72	Nat	Keith Jacka Holyoake
1972	Nat	John Ross Marshall
1972–74	Lab	Norman Eric Kirk
1974	Lab	Hugh Watt (acting)
1974–75	Lab	Wallace Edward Rowling
1975–84	Nat	Robert David Muldoon
1984–89	Lab	David Lange
1989–90	Lab	Geoffrey Palmer
1990	Lab	Mike Moore
1990–97	Nat	Jim Bolger
1997–99	Nat	Jenny Shipley
1999–2008	Lab	Helen Clark
2008–	Nat	John Key

## RECENT ELECTIONS

At parliamentary elections on 26 Nov. 2011 turnout was 73.2%. The ruling National Party won 60 seats with 48.0%; the Labour Party 34 with 27.1%; the Green Party 13 with 10.6%; New Zealand First 8 with 6.8%; the Maori Party 3 with 1.4%; ACT New Zealand 1 with 1.1%; Mana 1 with 1.0%; and UnitedFuture 1 with 0.6%.

## CURRENT GOVERNMENT

*Governor-General*: Lieut.-Gen. Sir Jeremiah Mateparae, GNZM, QSO (b. 1954; sworn in 31 Aug. 2011).

In April 2012 the cabinet consisted of:

*Prime Minister and Minister of Tourism*: John Key; b. 1961 (National Party; in office since 19 Nov. 2008).

*Deputy Prime Minister and Minister of Finance*: Bill English.

*Minister of Canterbury Earthquake Recovery and Transport*: Gerry Brownlee. *Commerce, and Broadcasting*: Craig Foss. *Conservation, Labour, and Food Safety*: Kate Wilkinson. *Defence, and State Services*: Jonathan Coleman. *Economic Development, Science and Innovation, and Tertiary Education, Skills and Employment*: Steven Joyce. *Education, and Pacific Island Affairs*: Hekia Parata. *Energy and Resources, and Housing*: Phil Heatley. *Environment, and Communications and Information Technology*: Amy Adams. *Foreign Affairs, and Sport and Recreation*: Murray McCully. *Health, and State-Owned Enterprises*: Tony Ryall. *Immigration, Racing, and Veterans' Affairs*: Nathan Guy. *Internal Affairs, and Civil Defence*: Chris Tremain. *Justice, the ACC (Accident Compensation Corporation), and Ethnic Affairs*: Judith Collins. *Police, and Corrections*: Anne Tolley. *Primary Industries, and Local Government*: David Carter. *Social Development, and Youth Affairs*: Paula Bennett. *Trade, and Climate Change Issues*: Tim Groser. *Treaty of Waitangi Negotiations, Arts, Culture and Heritage, and Attorney General*: Christopher Finlayson.

In addition there are eight ministers who are not in the cabinet: *Minister of Building and Construction, Customs, Land Information, and Statistics*: Maurice Williamson (National Party). *Community and the Voluntary Sector, Senior Citizens, and Women's Affairs*: Jo Goodhew (National Party). *Consumer Affairs*: Simon Bridges (National Party). *Courts*: Chester Borrows (National Party). *Maori Affairs*: Dr Pita Sharples (Maori Party). *Regulatory Reform, and Small Business*: John Banks (ACT New Zealand). *Revenue*: Peter Dunne (UnitedFuture). *Whanau Ora, and Disability Issues*: Tariana Turia (Maori Party).

*Office of the Prime Minister*: <http://newzealand.govt.nz>

## CURRENT LEADERS

### John Key

#### Position

Prime Minister

#### Introduction

John Key, a former currency trader, was elected prime minister in Nov. 2008. Leading the National Party to electoral victory, he ended nine years of Labour government under Helen Clark. He won a further term at elections in Nov. 2011.

#### Early Life

John Phillip Key was born on 9 Aug. 1961 in Auckland, where his British father and Austrian-Jewish mother ran a restaurant. When his father died in 1967 the family were left with large debts and lived in state housing in a suburb of Christchurch. After finishing at Burnside School, he graduated in accounting from the University of Canterbury. He then studied management at Harvard University in the USA.

In 1982 Key began working as an auditor, subsequently joining a clothing manufacturer as a project manager. In 1985 he started his career in foreign exchange (forex) trading just as the NZ dollar was floated on currency markets. In 1988 he was recruited by the Bankers Trust in Auckland as head of their forex dealing team, remaining there until 1995.

Key then joined Merrill Lynch as managing director of the Asia forex group in Singapore, subsequently becoming head of Merrill's global forex group in London. In 2001 he moved to Sydney as head of the institution's debt markets. In 2008 Key was listed in the National Business Review's rich list with an estimated wealth of NZ\$50m.

In 2001 he joined the National Party, winning the seat for Helensville, a newly-created constituency in northwest Auckland. He won re-election in 2005, a year after joining the opposition front benches as finance spokesman, and again in 2008. In 2006 Key became party leader following the resignation of Don Brash. He led the party to victory at the general election of 8 Nov. 2008 and was sworn in as prime minister 11 days later.

#### Career in Office

Following the election, the National Party signed deals with ACT New Zealand, the Maori Party and United Future, offering ministerial positions outside the cabinet. Key has guaranteed the continuation of a number of Maori-specific parliamentary seats. He has a reputation as a pragmatic centrist and favours privatization, but his first year in office was largely overshadowed by the longest economic recession in the country's history. In Feb. 2009 he launched an NZ\$480m. strategy to help small businesses, including a 90-day probation period for workers, the lowering of provisional tax and the relaxing of tax penalties for businesses with incorrect tax returns. The plan also provided for short-term export credit and the fast-tracking of several government building projects.

In foreign affairs, there was a diplomatic rift with the Fiji Islands over alleged interference by New Zealand in Fijian affairs, leading to the temporary mutual expulsion of high commissioners.

In Nov. 2010 Key declared a national state of mourning in response to a mining accident on the South Island in which 29 miners were killed. In Feb. 2011 Christchurch was struck by a 6.3-magnitude earthquake that killed at least 166 and caused damage put at US\$12bn.

In parliamentary elections in Nov. 2011 the National Party increased its share of the vote and Key secured a second term in office, heading a new coalition with ACT New Zealand and UnitedFuture.

## DEFENCE

The control and co-ordination of defence activities is obtained through the Ministry of Defence. New Zealand forces serve abroad in Australia, Iraq and Singapore, and with UN peace-keeping missions.

Defence expenditure in 2008 totalled US\$1,754m. (US\$420 per capita), representing 1.4% of GDP.

### Army

Personnel total in 2007: 4,580, plus reserves numbering 1,762.

### Navy

The Navy includes three frigates. The main base and Fleet headquarters is at Auckland.

The Royal New Zealand Navy personnel totalled 2,034 uniformed plus 291 reserve personnel in 2007.

### Air Force

Squadrons are based at RNZAF Base Auckland and RNZAF Base Ohakea. Flying training is conducted at Ohakea and Auckland. Ground training is carried out at RNZAF Base Woodbourne.

The uniform strength in 2007 was 2,437 with 190 reserves. There were six combat capable aircraft.

## ECONOMY

Agriculture accounted for 8% of GDP in 2001, industry 23% and services 69%.

According to the anti-corruption organization *Transparency International*, New Zealand ranked first in a 2011 survey of the countries with the least corruption in business and government. It received 9.5 out of 10 in the annual index.

New Zealand gave US\$309m. in international aid in 2009, equivalent to 0.28% of GNI (compared to the UN target of 0.7%).

### Overview

Tourism and dairy exports are important sources of revenue, with Australia and China the country's largest export partners. Prior to the 1980s the economy was one of the most regulated and protected in the developed world. Liberalization in the 1990s stalled towards the end of the century, with public ownership of commercial enterprises increasing in the following decade.

The economy grew every year from 1991 until 2007 despite the 1997 Asian crisis, periods of drought and the global slowdown in the wake of the 11 Sept. attacks in the USA. Following an economic downturn in late 2005, domestic demand regained momentum, aided by a recovery in the housing market and improved business and consumer confidence.

However, the economy entered recession in early 2008. A severe drought and the end of a housing boom initiated a slowdown in domestic demand, exacerbated by the global economic crisis. Unemployment rose from 3.7% in 2007 to 6.5% in 2010. Nonetheless, thanks to the absence of a banking crisis, the implementation of a government stimulus package and ties to the fast-growing Asian markets as well as the robust Australian economy, the economy soon began to recover. The recovery stalled following two earthquakes in 2010 and 2011. Reconstruction, estimated to cost 8% of GDP, was expected to provide boosts to several sectors, albeit temporarily.

Weak business investment, low household saving, an overvalued exchange rate and high external debt pose challenges to the long-term outlook.

### Currency

The monetary unit is the *New Zealand dollar* (NZD), of 100 cents. The total value of notes and coins on issue from the Reserve Bank in Sept. 2010 was NZ\$3,979m. Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.6%	2.7%	1.8%	2.3%	3.0%	3.4%	2.4%	4.0%	2.1%	2.3%

In Aug. 2009 foreign exchange reserves were US\$11,783m. and total money supply was NZ\$33,640m. Gold reserves are negligible.

### Budget

The government fiscal year begins 1 July; the company and personal financial year begins on 1 April. Total central government revenue for 2009–10 was NZ\$74,725m. (NZ\$79,506m. in 2008–09). Central government expenditure in 2009–10 was NZ\$81,040m. (NZ\$83,399m. in 2008–09).

In 2009–10 tax revenue was NZ\$50,744m. (NZ\$54,681m. in 2008–09). Social security and welfare was the leading item of expenditure in 2009–10, at NZ\$21,185m. (NZ\$19,382m. in 2008–09).

The gross public debt at June 2010 was NZ\$69,733m. (NZ\$61,953m. at June 2009).

There is a Goods and Services Tax (GST) of 15%.

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.5%	4.6%	4.4%	4.1%	3.2%	2.0%	3.4%	-0.7%	0.1%	2.3%

Total GDP was US\$125.2bn. in 2009.

### Banking and Finance

The central bank and bank of issue is the Reserve Bank (*Governor*, Dr Alan Bollard).

The financial system comprises a central bank (the Reserve Bank of New Zealand), registered banks and other financial institutions. Registered banks include banks from abroad, which have to satisfy capital adequacy and managerial quality requirements. Other financial institutions include the regional trustee banks, now grouped under Trust Bank, building societies, finance companies, merchant banks and stock and station agents. The number of registered banks in 2007 was 17, of which only two (TSB Bank Ltd and Kiwibank Ltd) were not wholly overseas-owned. Around 99% of the assets of the New Zealand banking system were under the ownership of a foreign bank parent.

The primary functions of the Reserve Bank are the formulation and implementation of monetary policy to achieve the economic objectives set by the government, and the promotion of the efficiency and soundness of the financial system, through the registration of banks, and supervision of financial institutions. Since 1996 supervision has been conducted on a basis of public disclosure by banks of their activities every quarter.

On 30 June 2007 the assets of the Reserve Bank were NZ\$21,095m. (including government securities totalling NZ\$4,342m. and marketable securities totalling NZ\$12,526m.).

The stock exchange in Wellington conducts on-screen trading, unifying the three former trading floors in Auckland, Christchurch and Wellington. There is also a stock exchange in Dunedin.

## ENERGY AND NATURAL RESOURCES

### Environment

New Zealand's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 9.4 tonnes per capita in 2008. An *Environmental Performance Index* compiled in 2008 ranked New Zealand seventh in the world, with 88.9%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

On 1 April 1987 the former Electricity Division of the Ministry of Energy became a state-owned enterprise, the Electricity Corporation of N.Z. Ltd. In 1994 Transpower separated out from the company to operate the national grid. The remainder of ECNZ was subsequently divided in stages into four state-owned

enterprises (Contact Energy, Genesis Power Limited, Meridian Energy Limited and Mighty River Power Limited), causing a competitive wholesale electricity market to be established. Around 70% of the country's electricity is generated by renewable sources. Hydro-electric plants, mainly based in the South Island, account for some 55% with geothermal power, generated in the North Island, accounting for around 8%. The rest comes from natural gas (22%), coal, wind and landfill gas. Electricity generating capacity, 2007, 9.1m. kW. Consumption per capita was 9,646 kWh in 2006.

Electricity consumption statistics (in GWh) for years ended 31 March are:

	Residential	Commercial	Industrial	Total consumption
2003	11,723	7,734	15,431	34,889
2004	12,255	7,389	16,151	35,795
2005	12,161	7,975	16,190	36,326
2006	12,231	8,383	16,780	37,394

New Zealand also has 12 wind farms.

### Oil and Gas

Crude oil production was 1.9m. tonnes in 2007–08. New Zealand's annual crude petroleum imports are more than three times as much as its production. Proven reserves were estimated at 53m. bbls in 2007.

In 2008 gasfields produced 3.8bn. cu. metres. Gas reserves are estimated to last until about 2014. In 2007 proven natural gas reserves were estimated at 25.0bn. cu. metres.

### Minerals

Coal production in 2009 was 4.56m. tonnes. Of 26 mines operating in 2006, 22 were opencast and four underground, responsible for 80.9% and 19.1% of total coal production respectively. 47% of coal produced in 2006 was exported, with India and Japan being the main markets.

While New Zealand's best known non-fuel mineral is gold (producing about 13.44 tonnes in 2009 worth NZ\$662m.) there is also production of silver, ironsand, aggregate, limestone, clay, aluminium, dolomite, pumice, salt, serpentinite, zeolite and bentonite. In addition, there are resources or potential for deposits of titanium (ilmenite beach sands), platinum, sulphur, phosphate, silica and mercury.

### Agriculture

Two-thirds of the land area is suitable for agriculture and grazing. The total area of farmland in use in 2005 was 15,305,478 ha. There were 11,967,000 ha. of grazing, arable, fodder and fallow land, 110,000 ha. of land for horticulture and 1,879,000 ha. of plantations of exotic timber in 2002. In 2001 there were 1.5m. ha. of arable land and 1.87m. ha. of permanent crops.

The largest freehold estates are held in the South Island. The number of occupied holdings as at 30 June 2007 were as follows:

Regional Council	No. of farms	Total area of farms (2002, in 1,000 ha.)
Auckland	4,044	302
Bay of Plenty	5,364	600
Gisborne	1,329	653
Hawke's Bay	3,405	962
Manawatu-Wanganui	5,847	1,545
Northland	5,175	836
Taranaki	3,426	496
Waikato	10,680	1,730
Wellington	2,157	504
<i>Total North Island</i>	<i>41,424</i>	<i>7,627</i>
Canterbury	9,522	3,151
Marlborough	1,788	723
Nelson	117	21
Otago	3,942	2,368
Southland	3,948	1,198
Tasman	1,731	277
West Coast	822	225

Regional Council	No. of farms	Total area of farms (2002, in 1,000 ha.)
Chatham Islands	42	—
Total South Island	21,915	8,013
Total New Zealand	63,339	15,640

Production of main crops (2000, in 1,000 tonnes): potatoes, 500; apples, 482; wheat (2006–07), 344; barley (2006–07), 336; maize (2006–07), 186; pumpkins and squash, 155; tomatoes, 85; carrots, 80; grapes, 80; cauliflower, 63.

Livestock, 2010: sheep, 32.56m.; dairy cattle, 5.92m.; beef cattle, 3.95m.; deer, 1.12m.; pigs (2007), 367,000; goats (2007), 112,000; chickens (2000), 13m. Total meat produced in 2006–07 was 1.44m. tonnes (including 624,000 tonnes of beef and veal, and 573,000 tonnes of lamb and mutton). Meat industry products are New Zealand's second largest export income earner, accounting for about 12% of merchandise exports. New Zealand's main meat exports are beef, lamb and mutton. About 73% of lamb, 58% of mutton and 57% of beef produced in New Zealand in 2006–07 was exported overseas. The domestic market absorbs over 99% of the pigmeat and poultry produced in New Zealand. 54% of the world's exported sheepmeat comes from New Zealand.

Production of wool for the year 2006–07 was 216,300 tonnes. Milk production for 2010–11 totalled a record 17,339m. litres. In 1999–2000 butter production totalled 254,639 tonnes and cheese production 296,745 tonnes.

### Forestry

Forests covered 8.0m. ha. in 2007 (30% of New Zealand's land area), up from 7.67m. ha. in 1990. Of this, about 6.2m. ha. are indigenous forest and 1.8m. ha. planted productive forest. New planting was 5,000 ha. in 2006, the lowest amount since 1959. Introduced pines form the bulk of the large exotic forest estate and among these radiata pine is the best multi-purpose tree, reaching log size in 25–30 years. Other species planted are Douglas fir and Eucalyptus species. Total roundwood production in 2006–07 was 20.04m. cu. metres. The table below shows production of rough sawn timber in 1,000 cu. metres for years ending 31 March:

	Indigenous		Exotic		All Species		
	Rimu and Miro	Beech others	Pine Radiata	Douglas Fir	Total (including others)	Total	
2004	5	8	16	3,992	178	4,206	4,222
2005	5	7	13	4,178	167	4,379	4,392
2006	0	0	12	4,038	156	4,222	4,234
2007	3	6	9	4,102	157	4,292	4,301

In 2006–07 forest industries consisted of approximately 264 sawmills, seven plywood and 11 veneer plants, and six fibreboard mills.

Production of wood pulp in the year ending 31 March 2007 amounted to 1,528,991 tonnes and of paper (including newsprint paper and paperboard) to 871,946 tonnes.

### Fisheries

In 2007 the total catch was 494,492 tonnes, almost entirely from sea fishing. The total value of New Zealand fisheries exports in 2006–07 was NZ\$1,275m., of which frozen fish exports constituted NZ\$345m.

## INDUSTRY

The leading companies in New Zealand in Feb. 2009 by market capitalization were the Telecom Corporation of New Zealand (TCNZ), US\$2.2bn.; and Fletcher Building (US\$1.3bn.).

Statistics of manufacturing industries (in NZ\$1m.):

Production year	Salaries and wages paid	Closing stocks of raw materials	Closing stocks of finished goods	Operating income	Purchases operating and other expenses
2001–02	8,961	2,618	4,945	63,396	47,163
2002–03	9,523	2,595	6,954	65,146	47,770

The following is a statement of the value of the products (including repairs) of the principal industries for the year 2002–03 (in NZ\$1m.):

Industry group	Salaries and wages paid	Closing stocks of raw materials	Closing stocks of finished goods	Operating income	Purchases and other operating expenses
Dairy and meat products	1,481	261	3,015	16,057	13,777
Other food	869	213	651	6,939	5,063
Beverage, malt and tobacco	292	154	423	2,926	2,060
Textile and apparel	579	205	296	3,069	2,092
Wood products	674	107	381	4,245	3,227
Paper and paper products	407	110	206	2,870	2,002
Printing, publishing and recorded media	796	84	84	3,392	2,001
Petroleum and industrial chemical	267	195	192	3,202	2,154
Rubber, plastic and other chemical products	728	218	513	4,144	2,840
Non-metallic mineral products	295	52	137	2,041	1,364
Basic metal	314	108	161	2,041	1,524
Structural, sheet and fabricated metal products	780	195	214	4,112	2,849
Transport equipment manufacturing	499	212	145	2,244	1,488
Machinery and equipment	1,138	357	429	5,876	4,010
Furniture and other manufacturing	405	124	106	1,984	1,317

According to the World Bank's *Doing Business 2012* New Zealand is the easiest country in which to start a business.

### Labour

There were 2,142,500 persons employed in the year ending Sept. 2007 (1,664,000 full-time and 478,500 part-time). The largest number of employed people worked in the education, health and community, and other services area (27.7%); followed by wholesale and retail trade, restaurants and hotels (22.4%); and finance and insurance, property and business services (14.7%). Average unemployment total for the year ending Sept. 2007 was 81,400. The unemployment rate in the fourth quarter of 2011 was 6.3%. Long-term unemployment is low, with only 9.0% of the labour force in 2010 having been out of work for more than a year.

The weekly average earnings in the year ending March 2007 was NZ\$963 for men, NZ\$760 for women. A minimum wage is set by the government annually. As of 1 April 2010 it was NZ\$12.75 an hour; a new rate for those entering the labour market for the first time was introduced in April 2008—it was NZ\$10.20 an hour in April 2010. In 2006 there were 42 work stoppages (60 in 2005) with 27,983 person-days of work lost (30,028 in 2005).

## INTERNATIONAL TRADE

Total overseas debt was NZ\$246,462m. in June 2010. In 1990 New Zealand and Australia completed the Closer Economic Relations Agreement (initiated in 1983), which provides for mutual free trade in goods.

## Imports and Exports

Trade in NZ\$1m. for recent years ending 30 June:

	Imports (c.i.f.)	Exports, including re-exports (f.o.b.)	Balance of Merchandise Trade
2002	31,811	32,332	521
2003	32,161	29,291	-2,870
2004	33,378	29,864	-3,514
2005	35,793	30,618	-5,175

The principal imports for the 12 months ended 30 June 2003 were:

Commodity	Value (NZ\$1m. v.f.d.)
Vehicles, parts and accessories	4,985
Mechanical machinery and equipment	4,333
Mineral fuels	3,152
Electrical machinery and equipment	2,699
Plastics and plastic articles	1,279
Optical, medical and measuring equipment	967
Paper, paperboard and paper articles	924
Aircraft and parts	804
Pharmaceutical products	747
Iron or steel articles	491

The principal exports for the 12 months ended 30 June 2003 were:

Commodity	Value (NZ\$1m. f.o.b.)
Dairy produce, eggs and honey	4,714
Meat and edible offal	4,111
Wood and articles of wood	2,386
Machinery and mechanical appliances	1,356
Fish, crustaceans and molluscs	1,215
Albuminoidal substances; modified starches; glues; enzymes	1,148
Fruits and nuts (edible)	1,032
Aluminium and aluminium articles	980
Wool, fine or coarse animal hair	943
Electrical machinery, equipment and parts	938

The principal import suppliers in 2002-03 (imports v.f.d., in NZ\$1m.) were: Australia, 7,278; USA, 4,067; Japan, 3,876; China, 2,687; Germany, 1,713; UK, 1,120; Malaysia, 864. The leading export destinations in 2002-03 (exports and re-exports f.o.b., in NZ\$1m.) were: Australia, 6,050; USA, 4,366; Japan, 3,354; China, 1,457; UK, 1,361; South Korea, 1,178; Germany, 855.

## COMMUNICATIONS

### Roads

Total length of roads in 2007 was 93,748 km (65.4% paved), including 172 km of motorways. There were 10,893 km of highways, main or national roads. At 30 June 2008 motor vehicles licensed numbered 4,125,932, of which 2,788,938 were passenger cars and vans. In addition there were 577,684 trailers and caravans, 519,992 commercial vehicles, and 130,213 motorcycles and mopeds. In 2007 there were 422 deaths in road accidents.

In 2008 there were 34,590 persons employed in road transport. Total expenditure on roads (including infrastructure) by the central government and local authorities combined amounted to NZ\$1,751m. in 2008.

### Rail

The national rail operator is Kiwi Rail. In 2008-09 KiwiRail rolling stock included 231 diesel, electric and shunting locomotives, 4,215 freight wagons, 50 passenger carriages and 16 non-passenger coaches.

In 1994 a 24-hour freight link was introduced between Auckland and Christchurch. There were, in 2002, 3,898 km of 1,067 mm gauge railway open for traffic (506 km electrified). In

2008-09 KiwiRail carried 4.0m. tonnes of freight and 12.4m. passengers. Total income in the financial year 2008-09 was NZ\$636.6m. and total expense NZ\$573.3m.

### Civil Aviation

There are international airports at Wellington, Auckland and Christchurch, with Auckland International being the main airport. The national carrier is Air New Zealand, which was privatized in 1989 but then renationalized in 2001. Trans-Tasman air travel is subject to agreement between Air New Zealand and Qantas.

New Zealand has one of the highest ratios of aircraft to population in the world with 3,530 aircraft in the year to March 2003. In 2005 scheduled airline traffic of New Zealand-based carriers flew 243.0m. km, carrying 11,402,400 passengers. In 2002 there were 113 airports, of which 46 had paved runways.

### Shipping

In Jan. 2009 there were 29 ships of 300 GT or over registered, totalling 150,000 GT. The busiest port is Tauranga, which handled a record 13,748,000 tonnes of cargo in 2009-10 (up from 13,458,000 tonnes in 2008-09).

### Telecommunications

The predominant telecommunications service provider is the Telecom Corporation of New Zealand (Telecom New Zealand), formed in 1987 and privatized in 1990. The largest mobile phone operators are Vodafone New Zealand and Telecom Mobile. In 2008 there were 1,750,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 4,620,000 (1,092.2 per 1,000 persons). There were 2.2m. PCs in use in 2006 and 3.0m. internet users in 2008. The fixed broadband penetration rate was 24.9 subscribers per 100 inhabitants in Dec. 2010.

## SOCIAL INSTITUTIONS

### Justice

The judiciary consists of the Supreme Court, the Court of Appeal, the High Court and District Courts. All exercise both civil and criminal jurisdiction. The Supreme Court replaced the Privy Council in London as the court of final appeal in 2004. Special courts include the Maori Land Court, the Maori Appellate Court, Family Courts, the Youth Court, Environment Court and the Employment Court. In 2003 there were 5,826 sentenced inmates of whom 274 were women. Of male inmates in 2001, 53% (some 2,499) identified themselves as Maori only compared to 29% who identified themselves as European only. There were 170,999 convictions, including 14,537 for violent offences, in 2002. The death penalty for murder was replaced by life imprisonment in 1961.

The Criminal Injuries Compensation Act, 1963, which came into force on 1 Jan. 1964, provided for compensation of persons injured by certain criminal acts and the dependants of persons killed by such acts. However, this has now been phased out in favour of the Accident Compensation Act, 1982, except in the residual area of property damage caused by escapees. The Offenders Legal Aid Act 1954 provides that any person charged or convicted of any offence may apply for legal aid which may be granted depending on the person's means and the gravity of the offence etc. Since 1970 legal aid in civil proceedings (except divorce) has been available for persons of small or moderate means. The Legal Services Act 1991 now brings together in one statute the civil and criminal legal aid schemes.

### Police

The police are a national body maintained by the central government. In June 2003 there were 7,257 full-time equivalent sworn officers (16% female).

### Ombudsmen

The office of Ombudsman was created in 1962. From 1975 additional Ombudsmen have been authorized. There are currently two. Ombudsmen's functions are to investigate complaints under

the Ombudsman Act, the Official Information Act and the Local Government Official Information and Meetings Act from members of the public relating to administrative decisions of central, regional and local government. During the year ended 30 June 2003 a total of 4,418 complaints were received. A total of 27 complaints were sustained during the year and 729 were still under investigation.

### Education

Education is compulsory between the ages of six and 16. Early childhood services are available for education and care for children from birth to six years of age. In 2009 there were 626 kindergartens and 485 play centres (24 licence exempt). In 2009 there were 39,346 and 15,498 children on the rolls respectively. There were also 464 *te kohanga reo* (providing early childhood education in the Maori language) with 9,288 children, and a number of other providers of early childhood care and education.

In 2009 there were 2,027 primary schools (including full primary, contributing primary and intermediate schools), with 434,810 pupils; the number of teachers was 27,640. A correspondence school for children in remote areas (*Te Kura*) and those otherwise unable to attend school had 6,076 pupils and 270 teachers.

In 2009 there were 336 secondary schools with 20,439 teachers and 273,409 pupils. There were also 149 composite schools with 2,500 teachers and 43,149 pupils.

There were 469,107 (including 43,457 international) enrolments in tertiary institutions in 2009. Of the international students in 2009, 30,946 were from Asia and 4,068 from Europe. The most popular subject areas studied in 2009 by domestic students were society and culture, management and commerce, health, and engineering related technologies. New Zealand has eight state-funded universities—the University of Auckland, Auckland University of Technology, University of Waikato (at Hamilton), Victoria University of Wellington, Massey University (at Palmerston North), the University of Canterbury (at Christchurch), the University of Otago (at Dunedin) and Lincoln University (near Christchurch). The number of students attending universities in 2009 was 154,866. 180,709 students were enrolled in institutes of technology and polytechnics in 2009.

In 2008–09 public expenditure on education came to 6.4% of GDP, representing 17.9% of total government spending. The universities are autonomous bodies. All state-funded primary and secondary schools are controlled by boards of trustees. Education in state schools is free for children under 19 years of age. All educational institutions are reviewed every three years by teams of educational reviewers.

The adult literacy rate is at least 99%.

### Health

In 2003 there were 10,355 practising doctors. In 2002 there were 85 public hospitals with 12,484 beds and 360 private hospitals with 11,341 beds. In 2008 New Zealand spent 9.8% of its GDP on health. Total budgeted expenditure on health in 2003–04 was NZ\$9.6bn.

### Welfare

Non-contributory old-age pensions were introduced in 1898. Large reductions in welfare expenditure were introduced by the government in Dec. 1990.

From 1 Oct. 1998 anyone receiving unemployment benefit, sickness benefit, a training benefit, a 55 plus benefit, or a young job seekers allowance has received a benefit called the Community Wage. In return for receiving the Community Wage, recipients are expected to search for work, meet with Work and Income New Zealand when asked, take a suitable work offer and take part in activities that would improve their chances of finding a job.

Non-contributory old-age pensions were introduced in 1898. Large reductions in welfare expenditure were introduced by the government in Dec. 1990.

From 1 Oct. 1998 anyone receiving unemployment benefit, sickness benefit, a training benefit, a 55 plus benefit, or a young job seekers allowance has received a benefit called the Community Wage. In return for receiving the Community Wage, recipients are expected to search for work, meet with Work and Income New Zealand when asked, take a suitable work offer and take part in activities that would improve their chances of finding a job.

On 1 April 1992 the Guaranteed Retirement Income Scheme (GRI) was replaced by the national superannuation scheme which is income-tested. Eligibility has been gradually increased to 65 years. Universal eligibility is available at 70 years. At 1 April 2008 a married couple received NZ\$439.80 per week, a single person living alone NZ\$285.87 per week.

### Social Welfare Benefits

Benefits	Number in force at 30 June 2003	Total expenditure 2003 (NZ\$1,000)
Community Wage—Job Seeker	111,906	1,287,730
Community Wage—Training	4,291	37,942
Community Wage—Sickness	39,902	460,209
Invalids' Benefit	68,507	926,515
Domestic Purposes' Benefit	109,295	1,634,477
Orphans' Benefit/Unsupported Child's Benefit	6,789	47,081
Widows' Benefit	8,659	90,265
Transitional Retirement Benefit	2,110	42,013
New Zealand Superannuation	457,278	5,798,873
Veterans' Pension	7,872	87,625
War Pension	22,271	108,862
<b>Total Income Support</b>	<b>838,880</b>	<b>10,521,592</b>

*Reciprocity with Other Countries.* New Zealand has overseas social security agreements with the United Kingdom, the Netherlands, Greece, Ireland, Australia, Jersey and Guernsey, Denmark and Canada. The main purpose of these agreements is to encourage free movement of labour and to ensure that when a person has lived or worked in more than one country, each of those countries takes a fair share of the responsibility for meeting the costs of that person's social security coverage. New Zealand also pays people eligible for New Zealand Superannuation or veterans' pensions who live in the Cook Islands, Niue or Tokelau.

### RELIGION

No direct state aid is given to any form of religion. For the Church of England the country is divided into seven dioceses, with a separate bishopric (Aotearoa) for the Maori. The Presbyterian Church is divided into 23 presbyteries and the Maori Synod. The Moderator is elected annually. The Methodist Church is divided into ten districts; the President is elected annually. The Roman Catholic Church is divided into four dioceses, with the Archbishop of Wellington as Metropolitan Archbishop. In Feb. 2012 there was one cardinal.

Adherents of leading religions at the 2001 census were as follows:

Religious denomination	Adherents
Anglican	584,793
Catholic	486,012
Presbyterian	417,453
Methodist	120,708
Baptist	51,426
Ratana	48,975
Buddhist	41,664
Latter-day Saints (Mormons)	39,915
Hindu	39,876
Pentecostal	30,222
Islam/Muslim	23,637
Brethren	20,406
Jehovah's Witnesses	17,826
Assemblies of God	16,023
Salvation Army	12,618
Seventh-day Adventist	12,600

Religious denomination	Adherents
All other religious affiliations	398,847
No religion	1,028,052
Object to state	239,241
Not specified	211,638
<b>Total</b>	<b>3,841,932<sup>1</sup></b>

<sup>1</sup>Where a person reported more than one religious affiliation, they have been counted in each applicable group.

## CULTURE

### World Heritage Sites

There are three UNESCO World Heritage sites under New Zealand jurisdiction. Te Wahipounamu on South Island was listed in 1990; Tongariro National Park, on North Island, was listed in 1990 and 1993; the Sub-Antarctic Islands, consisting of the Auckland Islands, Antipodes Islands, Bounty Islands, Campbell Island and the Snares, were inscribed on the list in 1998.

### Press

In 2008 there were 22 paid-for daily newspapers with a combined circulation of 653,000. The *New Zealand Herald*, published in Auckland, had the largest daily circulation in 2008, with an average of 187,000 copies. Other major dailies are *The Dominion Post* and *The Press*, with circulations of 94,000 and 87,000 copies respectively. In 2007 there were also three Sunday newspapers, four paid-for non-dailies and 109 free non-dailies.

### Tourism

There were 2,400,719 tourists in the year to March 2009 (down from a record 2,496,994 in the year to March 2008) of whom 975,870 were from Australia, 263,733 were from the UK, 196,655 were from the USA and 113,465 were from China. Tourism receipts excluding passenger transport totalled US\$4.98bn. in 2005.

### Festivals

The biennial New Zealand Festival takes place in Wellington in Feb./March in even-numbered years. The biennial Christchurch Arts Festival takes place in July/Aug. in odd-numbered years.

## DIPLOMATIC REPRESENTATIVES

Of New Zealand in the United Kingdom (New Zealand House, Haymarket, London, SW1Y 4TQ)  
*High Commissioner:* Derek Leask.

Of the United Kingdom in New Zealand (44 Hill St., Wellington, 6011)

*High Commissioner:* Vicki Treadell.

Of New Zealand in the USA (37 Observatory Cir., NW, Washington, D.C., 20008)

*Ambassador:* Mike Moore.

Of the USA in New Zealand (29 Fitzherbert Terr., Wellington)

*Ambassador:* David Huebner.

Of New Zealand to the United Nations

*Ambassador:* Jim McLay.

Of New Zealand to the European Union

*Ambassador:* Vangelis Vitalis.

## TERRITORIES OVERSEAS

Territories Overseas coming within the jurisdiction of New Zealand consist of Tokelau and the Ross Dependency.

### Tokelau

Tokelau is situated some 500 km to the north of Samoa and comprises three dispersed atolls—Atafu, Fakaofu and Nukunonu. The land area is 10.1 sq. km and the population at the 2011 census was 1,411, giving a density of 140 per sq. km.

The British government transferred administrative control of Tokelau to New Zealand in 1925. Formal sovereignty was transferred to New Zealand in 1948 by act of the New Zealand Parliament. New Zealand statute law, however, does not apply to Tokelau unless it is expressly extended to Tokelau. In practice New Zealand legislation is extended to Tokelau only with its consent.

Under a programme agreed in 1992, the role of Tokelau's political institutions is being better defined and expanded. The process under way enables the base of Tokelau government to be

located within Tokelau's national level institutions rather than as before, within a public service located largely in Samoa. In 1994 the Administrator's powers were delegated to the *General Fono* (the national representative body), and when the *General Fono* is not in session, to the *Council of Faipule*. The Tokelau Amendment Act 1996 conferred on the *General Fono* a power to make rules for Tokelau, including the power to impose taxes. There are no parties—in elections of 18 and 19 Jan. 2008, 20 independents were elected to the *General Fono*.

*Administrator:* Jonathan Kings.

*Head of Government:* Keli Hiano Kalolo.

Coconuts (the source of copra) are the only cash crop. Pulaka, breadfruit, papayas, the screw-pine and bananas are cultivated as food crops. Livestock comprises pigs, poultry and goats.

Tokelau affirmed to the United Nations in 1994 that it had under active consideration both the Constitution of a self-governing Tokelau and an act of self-determination. It also

expressed a strong preference for a future status of free association with New Zealand. A referendum on self-determination took place in Feb. 2006 with 60% voting in favour of the proposal, short of the two-thirds majority needed for the referendum to succeed. Another referendum in Oct. 2007 showed 64% in favour, still short of the required two-thirds majority. In May 2008 Ban Ki-moon, secretary general of the UN, reiterated his desire that the process of 'decolonizing' all of the 16 non-self-governing regions around the world be accelerated.

#### Ross Dependency

By Imperial Order in Council, dated 30 July 1923, the territories between 160° E. long. and 150° W. long. and south of 60° S. lat. were brought within the jurisdiction of the New Zealand

government. The region was named the Ross Dependency. From time to time laws for the Dependency have been made by regulations promulgated by the Governor-General of New Zealand.

The mainland area is estimated at 400,000–450,000 sq. km and is mostly ice-covered. In Jan. 1957 a New Zealand expedition under Sir Edmund Hillary established a base in the Dependency. In Jan. 1958 Sir Edmund Hillary and four other New Zealanders reached the South Pole.

The main base—Scott Base, at Pram Point, Ross Island—is manned throughout the year, about 12 people being present during winter. The annual activities of 200–300 scientists and support staff are managed by a crown agency, Antarctica New Zealand, based in Christchurch.

## SELF-GOVERNING TERRITORIES OVERSEAS

### The Cook Islands

#### KEY HISTORICAL EVENTS

The Cook Islands, which lie between 8° and 23° S. lat., and 156° and 167° W. long., were made a British protectorate in 1888, and on 11 June 1901 were annexed as part of New Zealand. In 1965 the Cook Islands became a self-governing territory in 'free association' with New Zealand.

#### TERRITORY AND POPULATION

The islands fall roughly into two groups—the scattered islands towards the north (Northern group) and the islands towards the south (Southern group). The islands with their populations at the census of 2006:

	Area sq. km	Population
<i>Southern Group—</i>		
Aitutaki	18.3	2,235
Atiu	26.9	570
Mangaia	51.8	640
Manuae and Te au-o-tu	6.2	—
Mauke (Parry Is.)	18.4	391
Mitiaro	22.3	219
Rarotonga	67.1	13,890
<i>Northern Group—</i>		
Manihiki (Humphrey)	5.4	356
Nassau	1.3	75
Palmerston (Avarua)	2.1	63
Penrhyn (Tongareva)	9.8	255
Pukapuka (Danger)	1.3	507
Rakahanga (Reirson)	4.1	141
Suvarrow (Anchorage)	0.4	—
Total	235.4	19,342

Population density in 2006 was 82 per sq. km. In 2007, estimated 73% of the population lived in urban areas. Between 1996 and 2001 the population had been in decline. However, the 2006 census saw a 7.3% increase in the population over 2001.

#### SOCIAL STATISTICS

2005: births, 278; deaths, 86. Birth rate (2005, per 1,000 population), 22.4; death rate, 6.9. Life expectancy was estimated in 2009 at: males, 72 years; females 80. Fertility rate, 2008, 2.6 births per woman.

#### CLIMATE

Oceanic climate where rainfall is moderate to heavy throughout the year, with Nov. to March being particularly wet. Weather can be changeable from day to day and can end in rainfall after an otherwise sunny day. Rarotonga, Jan. 26°C, July 20°C. Annual rainfall 2,060 mm.

#### CONSTITUTION AND GOVERNMENT

The Cook Islands Constitution of 1965 provides for internal self-government but linked to New Zealand by a common Head of State and a common citizenship, that of New Zealand. It provides for a ministerial system of government with a Cabinet consisting of a Prime Minister and not more than eight nor fewer than six other Ministers. There is also an advisory council composed of hereditary chiefs, the 15-member House of Ariki, without legislative powers. The New Zealand government is represented by a New Zealand Representative and the Queen, as head of state, by the Queen's Representative. The capital is Avarua on Rarotonga.

The bicameral *Parliament* comprises a Legislative Assembly (or lower house) of 25 members (including one representing overseas voters) elected for a term of five years and a House of Ariki (or upper house) that has an advisory role only and is made up of chiefs.

#### RECENT ELECTIONS

At the elections of 17 Nov. 2010 the Cook Islands Party won 16 of the 24 seats and the Democratic Party 8 seats.

#### CURRENT GOVERNMENT

*High Commissioner:* Linda Te Puni.

*Prime Minister:* Henry Puna.

*Government Website:* <http://www.cook-islands.gov.ck>

#### ECONOMY

##### Currency

The Cook Island *dollar* was at par with the New Zealand *dollar*, but was replaced in 1995 by New Zealand currency.

##### Budget

Revenue, 2008–09 (provisional), NZ\$116.7m.; expenditure, NZ\$124.4m. Domestic taxes accounted for 29.8% of revenues in 2008–09, taxes on income 27.9% and grants 18.1%.

##### Performance

The economy contracted by 1.2% in 2008 and by 0.1% in 2009.

### Banking and Finance

There are four banks in the Cook Islands. The Cook Islands Savings Bank is state-owned and has deposit services throughout the islands. The Cook Islands Development Bank is a state-owned corporation funded in part by loans from the Asian Development Bank. The two remaining banks are subsidiaries of the Australia and New Zealand Banking Group Limited and the Westpac Bank, which are both Australian-owned and major banks in Australasia.

### ENERGY AND NATURAL RESOURCES

#### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 7.4 tonnes per capita.

#### Electricity

Production in 2007 was 34m. kWh. Installed capacity was an estimated 8,000 kW in 2007.

#### Minerals

The islands of the Cook group have no significant mineral resources. However, the seabed, which forms part of the exclusive economic zone, has some of the highest concentrations of manganese nodules in the world. Manganese nodules are rich in cobalt and nickel.

#### Agriculture

In 2002 there were approximately 4,000 ha. of arable land and 2,000 ha. of permanent crops. Production estimates (2002, in 1,000 tonnes): coconuts, 5; cassava, 3; mangoes, 3. Livestock (2002): 40,000 pigs, 2,000 goats.

#### Forestry

Timber production was 5,000 cu. metres in 2007.

#### Fisheries

In 2005 the total catch was 3,737 tonnes, entirely from sea fishing.

### INDUSTRY

#### Labour

In 2001 there were 5,928 employed persons in the Cook Islands and 892 unemployed. Of those employed, 3,386 were men and 2,542 were women.

### INTERNATIONAL TRADE

#### Imports and Exports

Exports (f.o.b.) were valued at NZ\$7.1m. in 2007. Main items exported are fish and pearls. Imports (c.i.f.) totalled NZ\$144.7m.

In 2004 the main import suppliers were (in NZ\$1m.): New Zealand, 92.4; Fiji Islands, 7.9; Australia, 4.7. Main export markets in 2004 (in NZ\$1m.): Japan, 4.2; New Zealand, 2.0; USA, 0.5.

### COMMUNICATIONS

#### Roads

In 1992 there were 320 km of roads and, in 1991, 5,015 vehicles.

#### Civil Aviation

New Zealand has financed the construction of an international airport at Rarotonga which became operational for jet services in 1973. There are nine useable airports. Domestic services are provided by Air Rarotonga, and in 2003 there were also services to Auckland, Honolulu, Los Angeles, the Fiji Islands, French Polynesia and Vancouver.

#### Shipping

Two international shipping services connect Rarotonga with Auckland, Samoa, Tonga and Niue. In Jan. 2009 there were 44 ships of 300 GT or over registered, totalling 143,000 GT.

### Telecommunications

In 2008 there were 6,700 main telephone lines in service. There were 6,700 mobile phone subscribers in 2008 and 5,000 internet users.

### SOCIAL INSTITUTIONS

#### Justice

There is a High Court and a Court of Appeal, from which further appeal is to the Privy Council in the UK.

The population in penal institutions in April 2005 was 27 (equivalent to 126 per 100,000 population).

#### Education

In 2010 there were 24 early childhood education centres, 13 primary schools, four secondary schools and 12 combined primary and secondary schools. Pupils in primary education in 2010 totalled 1,841 with 123 teachers; there were 1,893 pupils in secondary education with 121 teachers.

In 2009–10 the education budget was an estimated NZ\$9,928,000.

#### Health

A user pay scheme was introduced in July 1996 where all Cook Islanders pay a fee of NZ\$5.00 for any medical or surgical treatment including consultation. Those under the age of 16 years or over the age of 60 years are exempted from payment of this charge. The dental department is privatized except for the school dental health provision. This service continues to be free to all schools.

The Rarotonga Hospital, which is the referral hospital for the outer islands, consists of 80 beds. The hospital has eight doctors, 33 registered nurses and 11 hospital aides.

### RELIGION

From the census of 2001, 55% of the population belong to the Cook Islands Christian Church; about 17% are Roman Catholics, and the rest are Seventh-Day Adventists and Latter-day Saints and other religions.

### CULTURE

#### Press

The *Cook Islands News* (circulation 2,000 in 2006) is the sole daily newspaper. The *Cook Islands Star*, which is published fortnightly, is sold in the Cook Islands and in New Zealand.

#### Tourism

In 2008 there were 94,152 tourist arrivals.

## Niue

### KEY HISTORICAL EVENTS

Capt. James Cook sighted Niue in 1774 and called it 'Savage Island'. Christian missionaries arrived in 1846. Niue became a British Protectorate in 1900 and was annexed to New Zealand in 1901. Internal self-government was achieved in free association with New Zealand on 19 Oct. 1974, with New Zealand taking responsibility for external affairs and defence. Niue is a member of the South Pacific Forum. In Jan. 2004 Cyclone Heta destroyed

the capital, Alofi, and a state of emergency was declared, although it was lifted a month later.

### TERRITORY AND POPULATION

Niue is the largest uplifted coral island in the world. Distance from Auckland, New Zealand, 2,161 km; from Rarotonga, 933 km. Area, 261 sq. km; height above sea level, 67 metres. The population has been declining steadily, from around 6,000 in the 1960s to 1,625 recorded in the 2006 census, giving a population density of 6 per sq. km. Migration to New Zealand is the main factor in population change. The capital is Alofi.

### SOCIAL STATISTICS

Annual growth rate, 1998–2008, –2.7%. 2009: births, 31; deaths, 12.

### CLIMATE

Oceanic, warm and humid, tempered by trade winds. May to Oct. are cooler months. Temperatures range from 20°C to 28°C.

### CONSTITUTION AND GOVERNMENT

There is a Legislative Assembly (*Fono*) of 20 members, 14 elected from 14 constituencies and six elected by all constituencies.

### RECENT ELECTIONS

Parliamentary elections were held on 7 May 2011. 20 non-partisan members were elected. On 16 May Toke Talagi was re-elected as premier, receiving 12 votes.

### CURRENT GOVERNMENT

*High Commissioner:* Mark Blumsky.

*Prime Minister:* Toke Talagi.

*Government Website:* <http://www.gov.nu>

### ECONOMY

#### Budget

Financial aid from New Zealand, 2006–07, totalled NZ\$9.1m.

### ENERGY AND NATURAL RESOURCES

#### Electricity

Production in 2007 was about 3m. kWh; installed capacity was estimated at 1,000 kW in 2007.

#### Agriculture

In 2002 there were approximately 4,000 ha. of arable land and 3,000 ha. of permanent crops. The main commercial crops of the island are coconuts, taro and yams.

In 2002 there were 2,000 pigs.

### Fisheries

In 2005 the total catch was approximately 200 tonnes, exclusively from marine waters.

### INTERNATIONAL TRADE

#### Imports and Exports

Imports, 2002, NZ\$3.25m.; exports, NZ\$0.14m.

### COMMUNICATIONS

#### Civil Aviation

Weekly commercial air services link Niue with New Zealand, Sydney and Samoa.

#### Telecommunications

There is a wireless station at Alofi, the port of the island. Main telephone lines (2008) 1,000. There were 1,000 internet users in 2008. Niue launched its own mobile phone service in 2011.

### SOCIAL INSTITUTIONS

#### Justice

There is a High Court under a Chief Justice, with a right of appeal to the New Zealand Supreme Court.

#### Education

In 2002 there was one primary school with 17 teachers and 251 pupils, and one secondary school with 29 teachers and 240 pupils. There is also the University of the South Pacific.

#### Health

In 2003 there were four doctors, two dentists, three midwives and 14 nursing personnel. The 24-bed hospital at Alofi was destroyed by Cyclone Heta in Jan. 2004.

### RELIGION

At the 1991 census, 1,487 people belonged to the Congregational (Ekalesia Niue); Latter-day Saints (213), Roman Catholics (90), Jehovah's Witness (47), Seventh Day Adventists (27), other (63), no religion (34), not stated (1).

### CULTURE

#### Press

A weekly newspaper is published in English and Niuean; circulation about 400.

#### Tourism

In 2007 there were 3,463 visitor arrivals.

# NICARAGUA

República de Nicaragua  
(Republic of Nicaragua)

*Capital:* Managua

*Population projection, 2015:* 6·21m.

*GNI per capita, 2011:* (PPP\$) 2,430

*HDI/world rank:* 0·589/129

## KEY HISTORICAL EVENTS

There is evidence of settlement by Paleo-Indians in the region around 4000 BC. Spanish explorers, led by Gil González de Ávila, arrived in the west of present-day Nicaragua in 1523. They made contact with the Niquirano and the Chorotegano tribes, thought to have been linked to the Aztec civilization in Mexico, and the Chontal, who shared cultural traits with the Honduran Maya people. Government up to this point was through tribal monarchies and each grouping had distinct customs. In 1524 Francisco Hernández de Córdoba established Granada on Lake Nicaragua and León on Lake Managua. Many indigenous Indians were killed, died of introduced diseases or were enslaved. Estimates suggest the population fell from 1m. to less than 100,000.

In 1538 the Vice Royalty of New Spain was established, spanning Mexico and most of Central America. In 1570 present-day Nicaragua came under the authority of the Captaincy General of Guatemala. A conservative landholding elite developed around Granada, whilst León was associated with the colonial government. British pirates and adventurers took control of parts of the Mosquito Coast during the 17th century. After it declared independence from Spain in 1821, Nicaragua briefly came under the influence of the Mexican Empire, ruled by Agustín de Iturbide. From 1825–38 it was part of the Central American Federation, which unsuccessfully attempted to build a democratic union along US lines.

The 1840s and '50s saw escalating conflict between the elites of Conservative Granada and Liberal León. In 1855 the American mercenary, William Walker, arrived with 57 men to support the

Liberal cause. Having defeated the national Nicaraguan army, he took Granada and proclaimed himself the country's ruler. However, his rule was short-lived and he was driven out of office by Honduran forces, with British assistance, two years later. There followed 30 years of relative stability under Conservative rule.

José Santos Zelaya's defeat of the Conservatives in 1893 led to a Liberal dictatorship, which became synonymous with economic decline. Civil war erupted in 1912, prompting the arrival of US forces. The Bryan–Chamarro Treaty of 1914 entitled the USA to a permanent option for a canal route through Nicaragua, a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast and occupation of the Corn Islands on the Atlantic coast. The treaty was not abrogated until 1970 when the Corn Islands returned to Nicaragua.

The Somoza family dominated Nicaragua from 1933 to 1979. Imposing a brutal dictatorship, they plundered a large share of the national wealth. In 1962 the Sandanista National Liberation Front (FLSN; named after the murdered Liberal general, Augusto César Sandino, who fought against the US military presence in the 1920s) was formed to overthrow the Somozas. After 17 years of civil war the Sandanistas triumphed. On 17 July 1979 President Somoza fled into exile. The USA made efforts to unseat the revolutionary government by supporting the Contras (counter-revolutionary forces). It was not until 1988 that the state of emergency was lifted as part of the Central American peace process. Rebel anti-Sandanista activities had ceased by 1990 and the last organized insurgent group negotiated an agreement with the government in April 1994. In Oct. 1998 Hurricane Mitch devastated the country, killing 3,800. In Nov. 2006 presidential elections were won by Daniel Ortega of the FLSN, returning him to power after 16 years in opposition.

## TERRITORY AND POPULATION

Nicaragua is bounded in the north by Honduras, east by the Caribbean, south by Costa Rica and west by the Pacific. Area, 131,812 sq. km (121,428 sq. km dry land). The coastline runs 450 km on the Atlantic and 305 km on the Pacific. The census population in May 2005 was 5,142,098 (density, 39·0 per sq. km). The United Nations population estimate for 2005 was 5,424,000. 59·0% of the population were urban in 2005.

The UN gives a projected population for 2015 of 6·21m.

15 administrative departments and two autonomous regions are grouped in three zones. Areas (in sq. km), populations at the 2005 census and chief towns:

	Area	Population	Chief town
<i>Pacific Zone</i>	18,429	2,778,257	
Carazo	1,050	166,073	Jinotepe
Chinandega	4,926	378,970	Chinandega
Granada	929	168,186	Granada
León	5,107	355,779	León
Managua	3,672	1,262,978	Managua
Masaya	590	289,988	Masaya
Rivas	2,155	156,283	Rivas
<i>Central-North Zone</i>	35,960	1,647,605	
Boaco	4,244	150,636	Boaco
Chontales	6,378	153,932	Juigalpa
Estelí	2,335	201,548	Estelí
Jinotega	9,755	331,335	Jinotega
Madriz	1,602	132,459	Somoto
Matagalpa	8,523	469,172	Matagalpa
Nueva Segovia	3,123	208,523	Ocotal
<i>Atlantic Zone</i>	67,039	716,236	
Atlántico Norte <sup>1</sup>	32,159	314,130	Puerto Cabezas
Atlántico Sur <sup>1</sup>	27,407	306,510	Bluefields
Río San Juan	7,473	95,596	San Carlos

<sup>1</sup>Autonomous region.

The capital is Managua with (2005 census population) 908,892 inhabitants. Other cities (2005 populations): León, 139,433; Chinandega, 95,614; Masaya, 92,598; Estelí, 90,294; Tipitapa, 85,948; Matagalpa, 80,228; Granada, 79,418; Ciudad Sandino, 72,501; Juigalpa, 42,763.

The population is of Spanish and Amerindian origins with an admixture of Afro-Americans on the Caribbean coast. Ethnic groups in 2000: Mestizo (mixed Amerindian and White), 63%; White, 14%; Black, 8%; Amerindian, 5%. The official language is Spanish.

### SOCIAL STATISTICS

2008 estimates: births, 140,000; deaths, 27,000. Estimated rates (per 1,000 population), 2008: births, 24.6; deaths, 4.7. Annual population growth rate, 2000–08, 1.3%. 2007 life expectancy: male 69.8 years, female 75.9. Infant mortality, 2005, 30 per 1,000 live births; fertility rate, 2008, 2.7 births per woman. A law prohibiting abortion was passed in Nov. 2006.

### CLIMATE

The climate is tropical, with a wet season from May to Jan. Temperatures vary with altitude. Managua, Jan. 81°F (27°C), July 81°F (27°C). Annual rainfall 38" (976 mm).

### CONSTITUTION AND GOVERNMENT

A new constitution was promulgated on 9 Jan. 1987 and underwent reforms in 1995 and 2000. It provides for a unicameral 92-seat *National Assembly* comprising 90 members directly elected by proportional representation for a five-year term, together with one seat for the previous president and one seat for the runner-up in the previous presidential election. Citizens are entitled to vote at the age of 16.

The *President* and *Vice-President* are directly elected for a five-year term commencing on the 10 Jan. following their date of election. At present the President may stand for a second term, but not consecutively. However, in Oct. 2009 the Supreme Court ruled in favour of a petition brought by President Daniel Ortega to remove the barrier against consecutive terms.

### National Anthem

'Salve a ti Nicaragua' ('Hail to thee, Nicaragua'); words by S. Ibarra Mayorga, tune by L. A. Delgadillo.

### RECENT ELECTIONS

Presidential and parliamentary elections took place on 6 Nov. 2011. In the presidential elections incumbent José Daniel Ortega Saavedra of the Sandinista National Liberation Front (FSLN) was elected with 62.5% of votes cast, defeating Fabio Gadea Mantilla (31.0%) and Arnoldo Alemán (5.9%). Despite accusations of electoral fraud by Gadea, international observers deemed the irregular voting patterns not strong enough to change the results. At the parliamentary elections the Sandinista National Liberation Front won 63 seats, the Independent Liberal Party 27 and the Constitutional Liberal Party 2.

### CURRENT GOVERNMENT

*President:* José Daniel Ortega Saavedra; b. 1945 (FSLN; in office since 10 Jan. 2007, having previously been president from Jan. 1985–April 1990).

*Vice President:* Omar Hallelevens.

In March 2012 the government comprised:

*Minister of Agriculture and Forestry:* Ariel Bucardo. *Defence:* Ruth Esperanza Tapia Roa. *Education:* Miriam Ráudez. *Environment and Natural Resources:* Juana Argeñal. *Family:* Marcia Ramírez Mercado. *Finance:* Alberto Guevara. *Foreign Affairs:* Samuel Santos López. *Health:* Dr Sonia Castro González. *Industry, Commerce and Development:* Orlando Solórzano Delgadillo. *Interior:* Ana Isabel Morales Mazún. *Labour:* Jeaneth

Chávez Gómez. *Tourism:* Mario Salinas. *Transportation and Infrastructure:* Pablo Martínez.

*Office of the President (Spanish only):*  
<http://www.presidencia.gob.ni>

### CURRENT LEADERS

#### Daniel Ortega

*Position*  
President

#### Introduction

An iconic figure of the Sandinista movement since the late 1970s, Daniel Ortega first served as president from 1985–90 and was elected to further five-year terms in Nov. 2006 and Nov. 2011.

#### Early Life

Ortega was born in Nov. 1945 in La Libertad, Chontales to a middle-class family who opposed the Somoza family's dictatorship. After briefly attending the University of Central America in Managua, Ortega joined the Sandinista National Liberation Front (FSLN) in 1963. In 1967 he was convicted of staging a bank robbery to raise money for arms. He was released in 1974 in exchange for FSLN-held hostages and spent a brief spell in Cuba.

He led the FSLN in Somoza Debayle's overthrow in 1979 and joined the governing junta of national reconstruction. The Sandinistas dominated the junta and established a national constitution and democratic elections, which Ortega won in 1984. His presidency was marked by conflict with the US-backed Contras, resulting in tens of thousands of deaths. US sanctions and high inflation weakened the economy.

At the end of his term Ortega enacted the 'Piñata' laws by which large estates were appropriated and handed to FSLN supporters. In the 1990 elections Ortega suffered a surprise defeat to a US-supported coalition of anti-Sandinista groups led by Violeta de Chamorro. Ortega retained the leadership of the FSLN but was again defeated at the 1996 elections. He survived several damaging scandals, including allegations, in 1998, by his step-daughter of sexual abuse, followed in 1999 by a furore over an immunity pact with then president Miguel Alemán, who was facing charges of corruption. Ortega again made an unsuccessful bid for office in 2001.

Ortega publicly apologized for excesses during his first presidency. His politics moderated and he increasingly embraced Catholicism. The USA openly opposed his candidacy for the 2006 presidential election but he emerged victorious from the polls in Nov. 2006.

#### Career in Office

Ortega campaigned on a platform of 'unity and reconciliation', symbolized by his appointment of former Contra leader Jaime Morales as vice president. He announced plans to address poverty, affecting 80% of the population, as well as soaring inflation, crippling interest payments on public debt, a national energy shortage and endemic corruption. In Nov. 2006 the FSLN came out in support of a strict anti-abortion law.

On the international stage Ortega sought to reassure foreign investors and the private sector, many of whom feared further deterioration in US–Nicaraguan relations. His tenure received an early boost when the Inter-American Development Bank confirmed its commitment to an assistance loan of US\$100m. promised to the previous government.

Ortega committed Nicaragua to the Bolivarian Alternative for the Americas (ALBA) while guaranteeing active membership of a free trade agreement with the USA (CAFTA). He pledged to maintain good relations with the USA while simultaneously strengthening links with Iran, Cuba and China. He also signed off a major natural gas deal with Bolivia. Venezuela pledged US\$60m.

in debt relief and donations for social development and helped establish a 40% Nicaraguan-owned and 60% Venezuelan-owned oil company, Albanc. In Oct. 2007 the Nicaraguan and Honduran governments accepted an International Court of Justice ruling settling a long-running territorial dispute between their two countries. However, in Nov. 2010 a dispute with neighbouring Costa Rica over a river border area led to the deployment of security forces by both countries. In March 2011 the International Court of Justice ruled that all troops should be withdrawn from the area in a judgment viewed as favouring Costa Rica.

In 2008 doubts about Ortega's democratic credentials resurfaced and in municipal elections in Nov. opposition parties denounced the Sandinista victory (in 94 of 146 mayorships, including the capital Managua) as rigged. He also circumvented a constitutional barrier to his standing for re-election through a favourable Supreme Court ruling in Oct. 2010. In the Nov. 2011 presidential polls Ortega retained power with 63% of the vote, although international observers expressed concerns over the official results.

### DEFENCE

In 2008 defence expenditure totalled US\$42m. (US\$7 per capita), representing 0.7% of GDP.

#### Army

There are six regional commands. Strength (2007) around 12,000.

#### Navy

The Nicaraguan Navy was some 800 strong in 2007.

#### Air Force

The Air Force has been semi-independent since 1947. Personnel (2007) 1,200, with no combat capable aircraft.

### ECONOMY

In 2006 agriculture accounted for 19.7% of GDP, industry 29.5% and services 50.8%.

#### Overview

Nicaragua, one of Latin America's poorest countries, suffers from low productivity, high unemployment and a severe external debt. However, in the first decade of the century it experienced sound economic growth, averaging near 4% from 2004-08.

Coffee and meat account for around 40% of exports, and tourism is enjoying a revival. Leading trading partners include the USA, the members of the Central American Common Market and the EU. 30% of exports are directed to the USA while workers' remittances, mainly from the USA and Costa Rica, constitute 13% of GDP. Shocks including the global financial crisis, Hurricane Felix and a spike in oil and food prices, contributed to a 1.5% contraction in growth in 2009. The government's National Human Development Plan (NHDP) sets out plans to accelerate growth and reduce poverty while absorbing the impact of the global economic crisis.

#### Currency

The monetary unit is the *córdoba* (NIO), of 100 *centavos*, which replaced the *córdoba oro* in 1991 at par. Inflation was 19.8% in 2008, falling to 3.7% in 2009. In July 2005 Nicaragua had foreign exchange reserves of US\$628m. In June 2005 total money supply was 4,746m. *córdobas*.

#### Budget

In 2008 budgetary central government revenues were 27,042m. *córdobas* and expenditures 25,032m. *córdobas*. Tax revenue accounted for 80.4% of revenues in 2008; compensation of employees accounted for 36.2% of expenditures.

The standard rate of VAT is 15%.

### Performance

The economy shrank by 1.5% in 2009 but there was growth of 4.5% in 2010. Total GDP in 2010 was US\$6.6bn.

### Banking and Finance

The Central Bank of Nicaragua came into operation on 1 Jan. 1961 as an autonomous bank of issue, absorbing the issue department of the National Bank. The *President* is Alberto Guevara. There were seven private commercial banks in 2000.

There is a stock exchange in Managua.

### ENERGY AND NATURAL RESOURCES

#### Environment

Nicaragua's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.9 tonnes per capita.

#### Electricity

Installed capacity in 2007 was 0.8m. kW. In 2007, 3.21bn. kWh were produced; consumption per capita in 2007 was 585 kWh.

#### Minerals

Production in 2005: gold, 3,674 kg; silver, 2,999 kg. Calcium carbonate, gypsum and limestone are also mined.

#### Agriculture

In 2002 there were an estimated 1.93m. ha. arable land and 236,000 ha. permanent cropland. Approximately 94,000 ha. were irrigated in 2002. Production (in 1,000 tonnes) in 2003: sugarcane, 3,603; maize, 524; rice, 291; dry beans, 203; sorghum, 99; groundnuts, 82; oranges, 70; coffee, 60; bananas, 59; cassava, 52; pineapples, 48; plantains, 40.

In 2003 there were 3.5m. cattle, 440,000 pigs, 260,000 horses and 16m. chickens. Livestock products (in 1,000 tonnes), 2003: beef and veal, 66; poultry meat, 62; milk, 281; eggs, 22.

#### Forestry

The forest area in 2005 was 5.19m. ha., or 42.7% of the land area. Timber production was 6-10m. cu. metres in 2007.

#### Fisheries

In 2005 the catch was 30,914 tonnes (29,567 tonnes from sea fishing).

### INDUSTRY

Industry contributed 26.0% of GDP in 2001, with manufacturing accounting for 14.4%. Important industries include chemicals, textiles, metal products, oil refining and food processing. Production (in 1,000 tonnes): cement (2009 estimate), 530; raw sugar (2000), 398; residual fuel oil (2007), 395; distillate fuel oil (2007), 198; petrol (2007), 87; wheat flour (2001), 60; vegetable oil (2001), 21; rum (1998), 7.7m. litres; sawnwood (2002), 45,000 cu. metres.

#### Labour

The workforce in 2001 was 1,900,400 (1,315,000 males). In 2001, 1,701,700 persons were in employment, of whom 739,000 were engaged in agriculture, hunting, forestry and fishing; 294,300 in community, social and personal services; 279,800 in wholesale and retail trade, and restaurants and hotels; and 131,600 in manufacturing. There were 159,500 unemployed in 2005, a rate of 7.2%.

### INTERNATIONAL TRADE

In 2004 Nicaragua signed the Central America-Dominican Republic-United States Free Trade Agreement (CAFTA-DR), along with Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras and the USA. The agreement entered into force for Nicaragua on 1 April 2006. Foreign debt was US\$5,144m. in 2005.

## Imports and Exports

Imports and exports in US\$1m.:

	2003	2004	2005	2006	2007
Imports c.i.f.	1,904.6	2,249.7	2,535.6	2,740.7	3,538.0
Exports f.o.b.	605.2	759.8	866.0	758.6	1,194.5

Main imports in 2006 were: petroleum and petroleum products, 24.3%; machinery and transport equipment, 22.9%; chemicals and related products, 16.7%; food and live animals, 9.7%. Principal exports were: coffee, 26.5%; beef, 10.3%; seafood, 9.5%; gold, 7.7%; cane sugar, 6.6%.

Main import suppliers, 2006: USA, 22.8%; Mexico, 14.8%; China, 7.6%; Venezuela, 6.8%; Costa Rica, 5.4%. Main export markets, 2006: USA, 46.5%; Mexico, 6.9%; Canada, 6.0%; Spain, 4.5%; Honduras, 4.4%.

## COMMUNICATIONS

### Roads

Road length in 2007 was 20,333 km, of which 1,081 km were main roads. In 2007 there were 101,900 passenger cars (18 per 1,000 inhabitants), 7,700 buses and coaches, 179,900 lorries and vans and 61,200 motorcycles and mopeds. 522 fatalities were caused by road accidents in 2007.

### Civil Aviation

In 1999 scheduled airline traffic of Nicaragua-based carriers flew 0.8m. km, carrying 59,000 passengers (all on international flights). The Augusto Sandino international airport at Managua handled 754,000 passengers in 2001 (608,000 on international flights) and 20,000 tonnes of freight.

### Shipping

In Jan. 2009 there were two ships of 300 GT or over registered, totalling 1,000 GT. The Pacific ports are Corinto (the largest), San Juan del Sur and Puerto Sandino through which pass most of the external trade. The chief eastern ports are El Bluff (for Bluefields) and Puerto Cabezas.

### Telecommunications

In 2008 there were 312,000 main (fixed) telephone lines; mobile phone subscribers numbered 3,108,000 in 2008 (54.8 per 100 persons). There were 220,000 PCs in use in 2005 and 185,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The judicial power is vested in a Supreme Court of Justice at Managua, five chambers of second instance and 153 judges of lower courts.

The population in penal institutions in Dec. 2006 was 6,060 (107 per 100,000 of national population).

### Education

Adult literacy rate in 2005 was 78.0% (male, 78.1%; female, 77.9%). In 2007 there were 952,964 primary school pupils (31,188 academic staff), 470,520 secondary school pupils (15,126 academic staff) and (2003) 103,577 students at tertiary level with 6,757 academic staff. The largest university is the National Autonomous University of Nicaragua, established in 1812.

In 2003 public expenditure on education came to 3.3% of GNI.

## Health

In 2003 there were 32 hospitals, with a provision of nine beds per 10,000 population. There were 8,986 physicians, 1,585 dentists and 5,862 nurses in 2003.

## RELIGION

The prevailing form of religion is Roman Catholicism (3.59m. adherents in 2001), but religious liberty is guaranteed by the Constitution. There were also 810,000 Protestants in 2001. There is one arch-bishopric, seven bishoprics and one cardinal.

## CULTURE

### World Heritage Sites

Nicaragua has two sites on the UNESCO World Heritage List: the Ruins of León Viejo (inscribed on the list in 2000), a 16th century Spanish settlement; and León Cathedral (2011), a Baroque and Neoclassical monument built between 1747 and the early 19th century.

### Press

In 2005 there were six daily newspapers in Managua, with a total circulation of 180,000.

### Tourism

In 2005 there were 712,000 non-resident tourists, spending US\$211m.

## DIPLOMATIC REPRESENTATIVES

Of Nicaragua in the United Kingdom (Suite 31, Vicarage House, 58–60 Kensington Church St., London, W8 4DP)  
*Ambassador:* Carlos Argüello Gómez.

Of the United Kingdom in Nicaragua (embassy in Managua closed in March 2004)

*Ambassador:* Christopher Campbell (resides in San José, Costa Rica).

Of Nicaragua in the USA (1627 New Hampshire Ave., NW, Washington, D.C., 20009)

*Ambassador:* Francisco Obadiah Campbell Hooker.

Of the USA in Nicaragua (Km. 5½ Carretera Sur, Managua)

*Ambassador:* Vacant.

*Chargé d'Affaires a.i.:* Robert R. Downes.

Of Nicaragua to the United Nations

*Ambassador:* María Rubiales de Chamorro.

Of Nicaragua to the European Union

*Ambassador:* Mauricio Lautaro Sandino Montes.

*GNI per capita, 2011:* (PPP\$) 641

*HDI/world rank:* 0.295/186

## KEY HISTORICAL EVENTS

Niger has been settled for at least 6,000 years. Early cattle-herding and agricultural economies developed in the Sahara and by the 14th century the Hausa people had established city-states in the south of the region. Meanwhile Berbers dominated trade routes in the north, which came under the control of the Songhai Empire around 1515. After the fall of the Songhai Empire in the late 16th century the Bornu Empire expanded into the centre and east of the region, while the Hausa people retained the south and the Tuareg were prominent in the north. The Djerma people later became established in the southwest.

In the 19th century Fulani Muslims vied for power with the Hausas and Bornus. French forces took control of the region at the end of the century, creating the military district of Niger as part of the larger territory of Haut-Sénégal et Niger. Tuareg resistance led to a major uprising during the First World War, which was put down by combined French and British forces. France formally designated Niger as a colony in 1922.

Gradual decentralization of power began in 1946. Niger became an autonomous state in 1958 and on 3 Aug. 1960 it obtained independence, with Hamani Diori as its first president. In 1968 severe drought culminated in civil unrest. Diori was deposed in a 1974 military coup and Lieut. (later Col.) Seyni Kountché took power. Kountché gradually replaced the military government with civilians, surviving several coup attempts in the process. He was succeeded in 1987 by Ali Seibou, whose National Movement for the Development Society (MNSD), became Niger's only legal political party. A new constitution was approved in 1989 and in the early 1990s Seibou responded to pro-reform demonstrations by legalizing opposition parties.

In 1990 conflict broke out in the north between government forces and the Tuaregs, who demanded autonomy. Relations

with Libya deteriorated as the Niger government suspected its neighbour of encouraging the insurgency. In 1995 a ceasefire established land rights for the Tuaregs and formalized their relationship with government. The agreement has largely held despite sporadic conflict.

In July 1991 a constitutional conference removed Seibou's powers and established a transitional government under André Salifou. Multi-party elections were held in 1993 and, following victory for the Alliance of the Forces of Change, Mahamane Ousmane was elected president. However, the MNSD won back control of the national assembly in 1995 and tensions mounted between President Ousmane and the government. In Jan. 1996 Ousmane was deposed in a military coup and replaced by Col. Ibrahim Baré Maïnassara (known as Baré).

Strict military rule was eventually relaxed and in July 1996 Baré claimed decisive victory in a disputed election. In April 1999 Baré was killed by his bodyguards and Major Daoude Wanké took power with military backing. Under international pressure, multi-party elections were held in Oct. 1999 and were declared by independent observers to be largely fair. Mamadou Tandja of the MNSD was elected president and his party won control of the national assembly. Niger held its first local elections in July 2004, with most seats being won by parties supporting the president. The new national assembly established amnesties for those involved in the 1996 and 1999 coups. In Dec. 2004 Mamadou Tandja won a second term as president, with Hama Amadou as prime minister.

Niger continues to suffer severe economic problems. In 2005 the government increased tax on basic goods (including food), leading to widespread protests and strikes until the government granted exemptions on some staples. Drought and locust infestations the previous year devastated harvests. After UN World Food Programme warnings that millions faced severe malnutrition, an international relief effort staved off the worst of the disaster but thousands still died of diseases associated with hunger and poverty. In June 2006 unions organized a national strike to protest against rising prices. In response to allegations of corruption by aid donors, several ministers were dismissed from the government.

In 2006 the International Court of Justice settled a land dispute with Benin by awarding Niger most of the river islands along the shared border. In April 2009 the government reached a peace agreement with the rebel Movement of Niger People for Justice after several years of troubles. The following month President Mamadou Tandja dismissed parliament and suspended the constitution after a constitutional court ruling against his attempt to hold a referendum on his running for a third presidential term. In Aug. 2009 the referendum, criticized for lacking legitimacy, supported Tandja's candidacy but elections in Oct. were boycotted by opponents. Tandja claimed a landslide victory but was removed from office in a coup in Feb. 2010, with power falling to a military junta. The presidential elections in Jan.-March 2011 signalled a peaceful return to democracy with outgoing President Salou Djibo heralding them as an example for Africa.

## TERRITORY AND POPULATION

Niger is bounded in the north by Algeria and Libya, east by Chad, south by Nigeria, southwest by Benin and Burkina Faso, and west by Mali. Area, 1,186,408 sq. km, with a population at the 2001 census of 11,060,291; density, 9.3 per sq. km. Estimate, 2010, 15,204,000. In 2005, 83.2% of the population were rural.

The UN gives a projected population for 2015 of 18.50m. Niger's population has doubled since the early 1990s.

The country is divided into the capital, Niamey, an autonomous district, and seven departments. Area, population and chief towns at the 2001 census:

Department	Sq. km	Population	Chief town	Population
Agadez	634,209	321,639	Agadez	78,289
Diffa	140,216	346,595	Diffa	23,409
Dosso	31,002	1,505,864	Dosso	43,561
Maradi	38,581	2,235,748	Maradi	148,017
Niamey	670	707,951	Niamey	707,951
Tahoua	106,677	1,972,729	Tahoua	73,002
Tillabéri	89,623	1,889,515	Tillabéri	16,683
Zinder	145,430	2,080,250	Zinder	170,575

The population is composed chiefly of Hausa (53%), Djerma-Songhai (21%), Fulani (10%), Tuareg (10%) and Kanuri-Manga (4%). The official language is French. Hausa, Djerma and Fulani are national languages.

### SOCIAL STATISTICS

Estimates, 2008: births, 787,000; deaths, 219,000. Estimated birth rate in 2008 was 53.5 per 1,000 population (the highest in the world); estimated death rate, 14.9. Niger has one of the youngest populations of any country, with 73% of the population under the age of 30 and 49% under 15. Infant mortality, 2005, 150 per 1,000 live births. Annual population growth rate, 2000–08, 3.6%. Expectation of life at birth, 2007, 50.0 years for males and 51.7 for females. Fertility rate, 2008, 7.1 children per woman (the highest anywhere in the world).

### CLIMATE

Precipitation determines the geographical division into a southern zone of agriculture, a central zone of pasturage and a desert-like northern zone. The country lacks water, with the exception of the southwestern districts, which are watered by the Niger and its tributaries, and the southern zone, where there are a number of wells. Niamey, 95°F (35°C). Annual rainfall varies from 22" (560 mm) in the south to 7" (180 mm) in the Sahara zone. The rainy season lasts from May until Sept., but there are periodic droughts.

### CONSTITUTION AND GOVERNMENT

In May 2009 former president Mamadou Tandja dissolved the 113-member *National Assembly*, allowing a constitutional referendum to be pushed through. At the referendum on 4 Aug. 2009, 92.5% of votes cast were in favour of abolishing the two-term limit that had existed under the constitution of 1999, although both the opposition and the international community condemned the poll. A coup followed in Feb. 2010 with the military junta suspending the constitution and dissolving the cabinet. In March 2010 the military leadership announced it had formed a transitional government of 20 ministers and promised to return Niger to democracy, although no date was set for fresh elections. In Oct. 2010 a new constitution received 90.18% support in a referendum; turnout was 52.65%. Establishing Niger as a secular state, it reimposes a two-term limit (each of five years) on the presidency, prohibits members of the military from running for office and guarantees that the government will release data on national oil and mining revenues.

### National Anthem

'Auprès du grand Niger puissant' ('By the banks of the mighty great Niger'); words by M. Thiriet, tune by R. Jacquet and N. Frionnet.

### RECENT ELECTIONS

In the first round of presidential elections held on 31 Jan. 2011 former prime minister Mahamadou Issoufou won 36.1% of the votes, Seyni Oumarou (a second former prime minister) 23.2%, Hama Amadou (a third former prime minister) 19.8% and

Mahamane Ousmane (a former president) 8.4%. There were six other candidates. Turnout was 52.8%. In the run-off on 12 March 2011 Mahamadou Issoufou won 57.9% of the votes and Seyni Oumarou 42.1%. Turnout was 48.2%.

Parliamentary elections were also held on 31 Jan. 2011. The Nigerien Party for Democracy and Socialism (PNDS) won 39 seats; the National Movement for the Development of Society (MNSD), 26; the Nigerien Democratic Movement for an African Federation (MODEN/FA), 23; the Nigerien Alliance for Democracy and Progress, 8; the Rally for Democracy and Progress, 7; the Union for Democracy and the Republic, 6; the Democratic and Social Convention, 3; and the National Union of Independents, 1.

### CURRENT GOVERNMENT

*President:* Mahamadou Issoufou; b. 1952 (in office since 7 April 2011).

*Prime Minister:* Brigi Rafini; b. 1953 (in office since 7 April 2011).

In March 2012 the government comprised:

*Minister of State for Foreign Affairs, Co-operation and African Integration, Responsible for Nigeriens Abroad:* Bazoum Mohamed. *Planning, Land Management and Community Development:* Amadou Boubacar Cissé. *Interior, Public Security and Decentralization of Religious Affairs:* Abdou Labo. *Mines and Industrial Development:* Omar Hamidou Tchiana.

*Minister of Agriculture:* Oua Saidou. *Civil Service and Labour:* Sabo Fatouma Zara Boubacar. *Commerce and Promotion of the Private Sector:* Saley Saidou. *Communication, New Information Technologies and Relations with Institutions:* Salifou Labo Bouché. *Energy and Oil:* Foumakoye Gado. *Equipment:* Saddy Soumaila. *Finance:* Jules Baillet. *Higher Education and Scientific Research:* Mamadou Youba Diallo. *Industrial Development, Handicrafts and Tourism:* Yahaya Baré Haoua Abdou. *Justice and Government Spokesperson:* Marou Amadou. *Livestock:* Mahaman El Ousmane. *National Defence:* Karidjo Mahamadou. *National Education, Literacy and Promotion of National Languages:* Ali Mariama El Hadj Ibrahim. *Parliamentary Affairs:* Elhadj Laouali Chaibou. *Population, the Promotion of Women and Child Protection:* Maïtchibi Kadidjatou Dan Dobi. *Professional Training and Employment:* N'Gadé Nana Hadiza Noma Kaka. *Public Health:* Soumana Sanda. *Transport:* Ibrahim Yacouba. *Urban Affairs, Housing and Sanitation:* Moussa Bako Abdoulkarim. *Water and Environment:* Issoufou Issaka. *Youth, Sports and Culture:* Kounou Hassan.

*Government Website (French only):* <http://www.gouv.ne>

### CURRENT LEADERS

#### Mahamadou Issoufou

#### Position

President

#### Introduction

Mahamadou Issoufou was sworn in as president on 7 April 2011. The veteran opposition leader defeated rival candidate Seyni Oumarou, a former ally of deposed leader Mamadou Tandja, in a run-off on 12 March 2011. The election fulfilled a pledge by the military that it would reinstate civilian rule following the ousting of Tandja in a coup in 2010. Heading the Nigerien Party for Democracy and Socialism (PNDS), Issoufou has previously served as prime minister and as president of the National Assembly.

#### Early Life

Issoufou was born in 1952 in the town of Dan Daji, in the Tahoua department of central Niger. He is an ethnic Hausa, the country's most populous group. Trained as a mining engineer in France, Issoufou returned to Niger to work as a technical director for French company Areva. In 1980 he was appointed national

director of mines, a post he held for five years before becoming secretary-general of the Mining Company of Niger.

In Feb. 1993, at the country's first open elections, Issoufou was elected to parliament as a representative of the PNDS. Later that month he came third in presidential elections, marking the first of four failed attempts to gain the presidency. He was appointed prime minister by the successful candidate, Mahamane Ousmane, in April 1993 but resigned in Sept. 1994 in protest at Ousmane's decree diminishing prime ministerial influence.

The following year, after parliamentary elections had led to the establishment of a new coalition, he was appointed president of the National Assembly. Following a military coup in Jan. 1996 and subsequent flawed presidential elections, Issoufou spent intermittent periods under house arrest. He made two further unsuccessful bids for the presidency in 1999 and 2004.

In 2009 he was charged with misappropriating funds after the opposition called for a general strike to protest Mamadou Tandja's attempt at changing the constitution to secure a third term. Issoufou briefly fled the country, claiming that the charge against him was politically motivated. However, the ousting of Tandja and the establishment of a transitional junta allowed him to return to national politics. He gained 58% of the vote in the second round of presidential elections in March 2011, defeating Seyni Oumarou.

#### Career in Office

Issoufou pledged to secure a more equal distribution of the wealth from Niger's substantial uranium reserves. Among his first challenges is to devise a plan to cope with the influx of refugees fleeing conflict in Libya and Côte d'Ivoire. An alleged assassination plot against him was foiled in July 2011.

#### DEFENCE

Selective conscription for two years operates. Defence expenditure totalled US\$58m. in 2008 (US\$4 per capita), representing 1.1% of GDP.

#### Army

There are three military districts. Strength (2007) 5,200. There are additional paramilitary forces of 5,400.

#### Air Force

In 2007 the Air Force had 100 personnel. There are no combat capable aircraft.

#### ECONOMY

Agriculture, forestry and fishing accounted for 43.0% of GDP in 2006; trade and hotels 14.7%; services 8.8%; and finance and real estate 7.6%.

#### Overview

Niger is among the poorest countries in the world, ranking 186th out of 187 countries in the UN Human Development Index in 2011. Long-term GDP growth has been low and volatile, averaging 1.7% per year between 1970 and 2005 while failing to keep pace with population growth. The economy is dominated by agriculture, uranium mining and development assistance. About 45% of the national budget is financed by development assistance. Over 60% of the population live on less than a dollar a day.

Niger received enhanced debt relief from Dec. 2000 under the IMF programme for Heavily Indebted Poor Countries (HIPC), completing the programme in April 2004. It continues to qualify for the Multilateral Debt Relief Initiative (MDRI), which covers large fiscal and external current account deficits.

#### Currency

The unit of currency is the *franc CFA* (XOF) with a parity of 655.957 francs CFA to one euro. In June 2005 total money supply was 170,798m. francs CFA and foreign exchange reserves were US\$177m. Inflation was 10.5% in 2008, falling to 1.1% in 2009.

#### Budget

In 2008 revenue totalled 584.1bn. francs CFA and expenditure 546.0bn. francs CFA.

#### Performance

The economy contracted by 0.9% in 2009 but there was growth of 8.0% in 2010; total GDP in 2010 was US\$5.5bn.

#### Banking and Finance

The regional Central Bank of West African States (BCEAO)—*Governor*, Tiémoko Meyliet Koné—functions as the bank of issue. There were six commercial banks in 2002, three development banks and a savings bank.

There is a stock exchange in Niamey.

#### ENERGY AND NATURAL RESOURCES

##### Environment

In 2008 Niger's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.1 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Niger 149th in the world out of 149 countries analysed, with 39.1%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

##### Electricity

Installed capacity was approximately 0.1m. kW in 2007. Production in 2007 amounted to about 197m. kWh, with consumption per capita an estimated 42 kWh.

##### Minerals

Large uranium deposits are mined at Arlit and Akouta. Uranium production (2010), 4,198 tonnes. Niger's uranium production is the fifth largest in the world. Phosphates are mined in the Niger valley, and coal reserves are being exploited by open-cast mining (production of hard coal in 2007 was an estimated 185,000 tonnes). Salt production in 2006 was an estimated 1,300 tonnes.

##### Agriculture

There were an estimated 4.49m. ha. of arable land in 2002 and 13,000 ha. of permanent crops. About 66,000 ha. were irrigated in 2002. There were about 130 tractors in 2002. Production estimates in 2003 (in 1,000 tonnes): millet, 2,500; sorghum, 797; onions, 270; sugarcane, 220; cabbage, 120; cassava, 105; groundnuts, 100; tomatoes, 100. Livestock (2003 estimates): goats, 6.9m.; sheep, 4.5m.; cattle, 2.3m.; asses, 580,000; camels, 420,000; chickens, 25m. Livestock products (in 1,000 tonnes), 2003 estimates: milk, 305; meat, 130; cheese, 15; eggs, 11.

##### Forestry

There were 1.27m. ha. of forests in 2005 (1.0% of the land area). Timber production in 2007 was 9.63m. cu. metres, mainly for fuel.

##### Fisheries

There are fisheries on the River Niger and along the shores of Lake Chad. In 2005 the catch was 50,018 tonnes, exclusively from inland waters.

#### INDUSTRY

Some small manufacturing industries, mainly in Niamey, produce textiles, food products, furniture and chemicals. Output of cement in 2007 (estimate), 42,000 tonnes.

##### Labour

The estimated economically active population in 2009 totalled 4,803,000 (68% males). Agriculture, fisheries and forestry remains the largest sector of employment.

#### INTERNATIONAL TRADE

Foreign debt was US\$1,972m. in 2005.

### Imports and Exports

In 2008 imports (c.i.f.) were valued at US\$1,247.5m. and exports at US\$503.1m. Main imports in 2008: machinery and transport goods, 20.2%; petroleum and petroleum products, 15.2%; cereal and cereal preparations, 11.4%; medicinal and pharmaceutical products, 9.5%. Main exports in 2008: uranium ores and concentrates, 57.5%; livestock, 9.2%; textile fibres, 6.1%; cotton fabrics, 4.5%. Main import suppliers in 2008 (as % of total): France, 13.2; China, 12.6; USA, 7.6; Netherlands, 7.2. Main export destinations in 2008: France, 33.3; USA, 17.6; Nigeria, 11.8; Japan, 9.9.

### COMMUNICATIONS

#### Roads

In 2007 there were 18,949 km of roads including 3,912 km of paved roads. Niamey and Zinder are the termini of two trans-Saharan motor routes; the Hoggar–Air–Zinder road extends to Kano and the Tanezrouft–Gao–Niamey road to Benin. A 648-km ‘uranium road’ runs from Arlit to Tahoua. There were, in 2005, 57,732 passenger cars, 11,261 vans, 2,613 buses and 1,035 lorries. In 2007 there were 676 road accidents resulting in 265 fatalities.

#### Civil Aviation

There is an international airport at Niamey (Diori Hamani Airport), which handled 108,000 passengers in 2006 and 2,300 tonnes of freight. In 2003 there were international flights to Abidjan, Bamako, Casablanca, Dakar, Khartoum, Libreville, Ouagadougou, Paris and Tripoli. In 1999 scheduled airline traffic of Niger-based carriers flew 3.0m. km, carrying 84,000 passengers (all on international flights).

#### Shipping

Sea-going vessels can reach Niamey (300 km inside the country) between Sept. and March.

#### Telecommunications

Niger had 347,800 telephone subscribers in 2005 (24.9 per 1,000 population), including 323,900 mobile phone subscribers. Internet users numbered 40,000 in 2006.

### SOCIAL INSTITUTIONS

#### Justice

There are Magistrates’ and Assize Courts at Niamey, Zinder and Maradi, and justices of the peace in smaller centres. The Court of Appeal is at Niamey.

The population in penal institutions in May 2006 was 5,709 (46 per 100,000 of national population).

#### Education

In 2007 there were 31,131 teaching staff for 1,235,065 primary school pupils and 7,852 teaching staff for 213,991 secondary school pupils. There were 11,208 students in tertiary education (1,095 academic staff) in 2006. There is a university and an Islamic university.

Adult literacy in 2005 was 29%.

In 2006 public expenditure on education came to 3.3% of GNI and 17.6% of total government spending.

#### Health

In 1998 there were 1.2 hospital beds per 10,000 inhabitants. There were 427 physicians, 28 dentists, 1,988 nurses, 500 midwives and 22 pharmacists in 2008.

#### RELIGION

In 2001 there were 9.39m. Sunni Muslims. There are some Roman Catholics, and traditional animist beliefs are widespread.

#### CULTURE

##### World Heritage Sites

Niger has two sites on the UNESCO World Heritage List: the Air and Ténéré Natural Reserves (inscribed on the list in 1991), part of the largest protected area in Africa (7.7m. ha.); and the ‘W’ National Park of Niger (1996), a savannah and forested area of biodiversity.

#### Press

In 2005 there was one government-owned daily newspaper and around 15 weekly and monthly newspapers.

#### Tourism

In 2007 there were 41,000 non-resident tourists; spending by tourists totalled US\$41m. in 2007.

#### DIPLOMATIC REPRESENTATIVES

Of Niger in the United Kingdom  
*Ambassador:* Adamou Seydou (resides in Paris).

Of the United Kingdom in Niger  
*Ambassador:* Nicholas Griffiths (resides in Bamako, Mali).

Of Niger in the USA (2204 R. St., NW, Washington, D.C., 20008)  
*Ambassador:* Maman Sambo Sidikou.

Of the USA in Niger (BP 11201, Rue des Ambassades, Niamey)  
*Ambassador:* Vacant.  
*Chargé d’Affaires a.i.:* Lucy K. Abbott.

Of Niger to the United Nations  
*Ambassador:* Baboucar Boureima.

Of Niger to the European Union  
*Ambassador:* Abdou Agbarry.

# NIGERIA

## Federal Republic of Nigeria

*Capital:* Abuja

*Population projection, 2015:* 179.79m.

*GNI per capita, 2011:* (PPP\$) 2,069

*HDI/world rank:* 0.459/156

### KEY HISTORICAL EVENTS

The earliest evidence of human settlement in Nigeria dates from 9000 BC and by 2000 BC its inhabitants were cultivating crops and domestic animals. However, the first organized society was of the Nok people, from around 800 BC to AD 200. Traces of Nok influence are visible in Nigerian art today, particularly in areas such as Igbo, Ukwe, Esie and Benin City. By AD 1000, Nok had given way to the Kanem, thanks to the trans-Saharan trade route that ran from West Africa to the Mediterranean.

In the 11th century northern Nigeria split into seven independent Hausa city-states, Biram, Daura, Gobir, Kano, Katsina, Rano and Zaria. By the 14th century, two states had developed in the south, Oyo and Benin, with the Igbo people of the southeast living in small village communities. South of the Hausa states and west of the Niger, the Ife flourished between the 11th and 15th centuries. The importance of the Ife civilization is evident today; all Yoruba states claim that their leaders are descended from the Ife as a way of establishing legitimacy, and its ritual is imitated in their modern public ceremonies.

Most of the north was held by the Songhai empire by the early 16th century, only to be taken later in the century by Kanem-Bornu, allowing the Hausa states to retain their autonomy. At the end of the 18th century, Fulani religious groups waged war in the north, merging states to create the single Islamic state of the Sokoto Caliphate.

In the late 15th century Portuguese navigators, following the demise of the spice trade, began to purchase slaves from middlemen in the region. They were followed by British, French and Dutch traders. Wealthy traders established towns such as

Bonny, Owome and Okrika. Slave trading had a profound effect on Nigeria. From the 1650s until the 1860s, it caused a forced migration of around 3-5m. people. Within Nigeria itself, the defensive measures adopted to avoid enslavement led to the reinforcement of ethnic distinctions and of the north-south divide.

After the abolition of the slave trade in Britain in 1807, attempts to find a lucrative alternative and to discourage the predominance of slavery in Nigeria (other countries continued to trade in slaves until 1875) led to a large-scale campaign to encourage the production of palm oil for export. This itself caused the development of an internal slave trade, involving slaves in the collection and manufacture of palm fruits, as well as the transportation of the oil. The British also took over the mines at Jos at the expense of the livelihoods of independent tin producers. When heavy reliance on mining exports resulted in the neglect of agricultural work, Nigeria experienced its first food shortage.

Religious missions were active at this time, with Presbyterians, Methodists, Baptists and the Church Missionary Society (CMS) operating in Lagos, Abeokuta, Ibadan, Oyo and Ogbomosho. The CMS pioneered trade on the Niger by encouraging merchants to run steamboats, partially as a means of travel for the missionaries but also to ship goods.

In 1804 Usuman dan Fodio began a 'Holy war' to reform the practice of Islam in the north, conquering the Hausa city-states, though Kanem-Bornu retained its independence. However, by the late 19th century Kanem-Bornu's power was in decline. Usuman's son, Muhammed Bello, established a state centred at Sokoto, controlling most of northern Nigeria for the rest of the century. In the south, the Oyo region was troubled by civil wars, only brought to a close when the British intervened and the Oyo Empire collapsed. Britain took Lagos as its colony in 1861.

In 1879 Sir George Goldie gained all British firms trading on the Niger, and in the 1880s took over French companies trading there, signing treaties with African leaders and enabling Britain's domination of southern Nigeria in 1884-85. In 1887, Jaja, an African trader based in the Niger Delta, was deported following his fierce opposition to European competition. Goldie's firm received a British Royal Charter as the Royal Niger Company to administer the Niger River and north Nigeria, and this monopoly of trade on the river angered Africans and Europeans alike. The Royal Niger Company also lacked sufficient power to control north Nigeria. In 1900 its charter was revoked and British forces moved in, taking Sokoto in 1903. By 1906 Britain controlled Nigeria as the Colony (Lagos), the Protectorate of Southern Nigeria and the Protectorate of Northern Nigeria, amalgamating the regions in 1914 to establish the Colony and Protectorate of Nigeria. The administration was based on existing leadership systems. Yet the appointment of African officials failed to gain wide acceptance from Nigeria's people. The British governor made all major decisions, and the traditional authority of African rulers was weakened irreparably.

British dominance met with major resistance from the Nigerian people. In the south, the tribal Yoruba group, the Ijebu, fought against colonial rule in 1892, as did the Aro in the east and the Aniocha (both Igbo groups) in the west. There were also rebellions in the north. The British forces responded with brutality, destroying the homes of many Nigerians in order to secure their capitulation.

British colonial rule brought development in the transportation and communications systems and a shift towards cash crops. Western and Christian influences prevailed, including widespread use of the English language. This influence spread far more rapidly in the south, where British control had been secure over a longer period, and this added to the growing disparity between

north and south. Nigerian forces helped defeat the German army in Cameroon during the First World War, involved in an arduous campaign until 1916.

Growing unrest and widespread anticolonialism became focused in the 1920s as demands for African representation increased. In 1923 Herbert Macaulay, grandson of the first Nigerian to be ordained, established the first Nigerian political party, the Nigerian National Democratic Party. In 1944 he united the party with several others to form the National Council of Nigeria and the Cameroons (NCNC). In response to this activity, the British attempted to quell demands for an end to colonial rule by granting some political reforms. In 1947 they announced a new constitution that they claimed would give traditional authorities a stronger voice. This met with resistance, and in 1951 the British agreed to form a new constitution that would provide for elected representation on a regional basis.

Three political parties developed, the National Council of Nigeria and the Cameroons (later the National Convention of Nigerian Citizens), largely supported by the Igbo, the Action Group, with mostly Yoruba membership, and the Northern People's Congress (NPC). When the constitution failed in 1952, a new one divided Nigeria into three regions, Eastern, Western and Northern, plus the federal territory of Lagos. In 1956 the Western and Eastern regions became self-governing, as did the Northern region in 1959.

In 1960 Nigeria declared independence. Elections failed to elect any one party by a majority, and the NPC and the NCNC formed a coalition government, with Abukar Tafawa Balewa (NPC) as prime minister. Nnamdi Azikiwe, who had helped Herbert Macaulay to establish the NCNC in 1944, was governor-general. When Nigeria became a republic in 1963 Azikiwe became president.

Continuing conflict between north and south undermined the new republic. In 1966 fighting culminated in a military coup that installed Maj.-Gen. Aguiyi-Ironsi, an Igbo, as head of a military government. Another coup later in the year placed Lieut.-Col. Yakubu Gowon in power and saw many northern Igbo massacred. In May 1967 the Igbo people of the south declared their region independent from the rest of the country, naming the breakaway republic Biafra. Civil war raged for three years until federal Nigeria triumphed at the price of 1m. dead and widespread famine and destruction.

This was followed by a period of relative prosperity as oil prices rose. Foreign interest and investment flourished but government overspending and high levels of corruption and crime led to social chaos. In the 1980s recession sent oil prices down, and Nigeria found itself struggling with major debt, rising inflation and mass unemployment.

Gowon's regime was overthrown in 1975 by Gen. Murtala Muhammed whose plans for a new capital to be built at Abuja drained the economy. He was assassinated in 1976, to be succeeded by Gen. Olusegun Obasanjo who oversaw the transition to civilian rule, while juggling the need for Western aid with his support for African nationalist movements.

In 1979 elections brought Alhaji Shehu Shagari to power. Shagari's government came under popular attack for alleged corruption but he was re-elected in 1983, amidst rumours of voting irregularities. Under Shagari relations with the USA improved, heralded by a visit from President Jimmy Carter. However, dogged by worsening economic problems, Shagari was ousted in a military coup in 1983 and replaced by Gen. Muhammadu Buhari. Buhari's regime quickly fell out of favour with the public when it arrested not only the politicians blamed for the country's social and economic problems, but also journalists and academics.

A bloodless coup in 1985 brought to power Maj.-Gen. Ibrahim Babangida, who promulgated a new constitution with the aim of returning to civilian government. Babangida, however, clung to power and refused to accept electoral defeat in 1990, 1992 and 1993. Unrest eventually forced his resignation, but after just three

months of rule by an interim leader, one of Babangida's long-term allies, Gen. Sani Abacha, became president and closed down all unions and political institutions. He extended his military rule for a further three years in 1995, proposing a return to civilian rule after this period. To this end five political parties were formed in 1996. However, the Abacha regime attracted international controversy when it executed writer Ken Saro-Wiwa and eight other human rights activists for alleged seditious political activity. Nigeria was suspended from the Commonwealth as a result. Further outrage followed with the arrest of former leader Obasanjo and the murder of the wife of leading political dissident, Chief Moshood Abiola, who had claimed victory at the presidential elections of 1993. Rioting and civil unrest broke out across Nigeria and Abacha's family was accused of siphoning off US\$4bn. of national assets.

Abacha died in office in 1998. Maj.-Gen. Abdusalam Abubakar came to power and brought about a return to civilian rule, scrapping plans that would have extended Abacha's rule and releasing political prisoners. Abiola was scheduled to be freed as part of this process but died the day before his scheduled release. In Feb. 1999 Nigeria chose Obasanjo, the 62-year-old retired general and previous military leader, to be president.

This transition of power greatly improved Nigeria's international standing and the country was readmitted to the Commonwealth. However, tribal and religious conflict continued and fighting between the Igbo Christians and Hausa Muslims over the implementation of Islamic law has left thousands dead. Obasanjo's re-election in 2003 was accompanied by violence and rumours of ballot-rigging and bribery.

In July 2005 the Paris Club (an informal grouping of wealthy nations) wrote off around US\$20bn. of Nigeria's debt. Assisted by high oil prices, Nigeria had paid off the remaining US\$10bn. by April 2006, the first African nation to fully service its Paris Club debt. In April 2007 Umaru Yar'Adua won disputed presidential elections. In March 2008 Nigeria and Cameroon reached agreement on the long-running dispute over sovereignty of the Bakassi Peninsula.

## TERRITORY AND POPULATION

Nigeria is bordered in the north by Niger, east by Chad and Cameroon, south by the Gulf of Guinea and west by Benin. It has an area of 923,768 sq. km (356,667 sq. miles). For sovereignty over the Bakassi Peninsula *see* CAMEROON: Territory and Population. Census population, 2006, 140,431,790 (69,086,302 females); population density, 152.0 per sq. km. Nigeria is Africa's most populous country. In 2005, 51.8% of the population were rural.

The UN gives a projected population for 2015 of 179.79m.

There were 36 states and a Federal Capital Territory (Abuja) in 2006.

Area, population and capitals of these states:

State	Area (in sq. km)	Population (2006 census)	Capital
Adamawa	36,917	3,178,950	Yola
Bauchi	45,837	4,653,066	Bauchi
Benue	34,059	4,253,641	Makurdi

<b>Total South</b>	<b>192,883</b>	<b>65,162,068</b>	

Abuja replaced Lagos as the federal capital and seat of government in Dec. 1991.

Estimated population of the largest cities, 1995:

Lagos	1,484,000 <sup>1</sup>	Ikorodu	180,300
Ibadan	1,365,000	Ilawe-Ekiti	179,900
Ogbomosho	711,900	Owo	178,900
Kano	657,300	Ikirun	177,000
Oshogbo	465,000	Calabar	170,000
Ilorin	464,000	Shaki	169,700
Abeokuta	416,800	Ondo	165,400
Port Harcourt	399,700	Akure	158,200
Zaria	369,800	Gusau	154,000
Ilesha	369,000	Ijebu-Ode	152,500
Onitsha	362,700	Effon-Alaiye	149,300
Iwo	353,000	Kumo	144,400
Ado-Ekiti	350,500	Shomolu	144,100
Abuja (capital)	339,100	Oka	139,600
Kaduna	333,600	Ikare	137,300
Mushin	324,900	Sapele	135,800
Maiduguri	312,100	Deba Habe	135,400
Enugu	308,200	Minna	133,600
Ede	299,500	Warri	122,900
Aba	291,600	Bida	122,500
Ife	289,500	Ikire	120,200
Ila	257,400	Makurdi	120,100
Oyo	250,100	Lafia	119,500
Ikerre	238,500	Inisa	116,800
Benin City	223,900	Shagamu	114,300
Iseyin	211,800	Awka	108,400
Katsina	201,500	Gombe	105,200
Jos	201,200	Ejigbo	103,300
Sokoto	199,900	Igboho	103,300
Ilobu	194,400	Agege	100,300
Offa	192,300	Ugpe	100,000

<sup>1</sup>Greater Lagos had a population of 12,763,000 in 1999.

There are about 250 ethnic groups. The largest linguistic groups are the Yoruba (17.5% of the total) and the Hausa (17.2%), followed by Igbo (13.3%), Fulani (10.7%), Ibibio (4.1%), Kanuri (3.6%), Egba (2.9%), Tiv (2.6%), Bura (1.1%), Edo (1.0%) and Nupe (1.0%). The official language is English, but 50% of the population speak Hausa as a *lingua franca*.

## SOCIAL STATISTICS

2008 estimates: births, 6,050,000; deaths, 2,420,000. Rates, 2008 estimates (per 1,000 population): births, 40; deaths, 16. Infant mortality, 2005, 101 (per 1,000 live births). Annual population

growth rate, 2000–05, 3.0%. Life expectancy at birth, 2007, was 47.2 years for males and 48.2 years for females. Fertility rate, 2008, 5.3 children per woman.

## CLIMATE

Lying wholly within the tropics, temperatures everywhere are high. Rainfall varies greatly, but decreases from the coast to the interior. The main rains occur from April to Oct. Lagos, Jan. 81°F (27.2°C), July 78°F (25.6°C). Annual rainfall 72" (1,836 mm). Ibadan, Jan. 80°F (26.7°C), July 76°F (24.4°C). Annual rainfall 45" (1,120 mm). Kano, Jan. 70°F (21.1°C), July 79°F (26.1°C). Annual rainfall 35" (869 mm). Port Harcourt, Jan. 79°F (26.1°C), July 77°F (25°C). Annual rainfall 100" (2,497 mm).

## CONSTITUTION AND GOVERNMENT

The constitution was promulgated on 5 May 1999, and entered into force on 29 May. Nigeria is a federation, comprising 36 states and a federal capital territory. The constitution includes provisions for the creation of new states and for boundary adjustments of existing states. The legislative powers are vested in a *National Assembly*, comprising a *Senate* and a *House of Representatives*. The 109-member Senate consists of three senators from each state and one from the federal capital territory, who are elected for a term of four years. The House of Representatives comprises 360 members, representing constituencies of nearly equal population as far as possible, who are elected for a four-year term. The *President* is elected for a term of four years and must receive not less than one-quarter of the votes cast at the federal capital territory. A president may not serve more than two consecutive four-year terms. In 2006 Olusegun Obasanjo sought to alter the constitution to allow him to run for a third term, but he failed to win backing for the amendment.

### National Anthem

'Arise, O compatriots, Nigeria's call obey'; words by a collective, tune by B. Odiase.

## GOVERNMENT CHRONOLOGY

(NCNC = National Council of Nigeria and the Cameroons; NPN = National Party of Nigeria; PDP = People's Democratic Party; n/p = non-partisan)

Heads of State since 1963.

### President of the Republic

1963–66 NCNC Benjamin Nnamdi Azikiwe

### Heads of the Military Government

1966 military Johnson Aguiyi-Ironsi  
1966–75 military Yakubu Gowon  
1975–76 military Murtala Ramat Muhammed  
1976–79 military Olusegun Obasanjo

### President of the Republic

1979–83 NPN Shehu Shagari

### Head of the Federal Military Government

1983–85 military Muhammadu Buhari

### Chairman of the Armed Forces Ruling Council, then Chairman of the National Defence and Security Council

1985–93 military Ibrahim Babangida

### Head of the Interim National Government

1993 n/p Ernest Shonekan

### Chairmen of the Provisional Ruling Council

1993–98 military Sani Abacha  
1998–99 military Abdulsalam Abubakar

### President of the Republic

1999–2007 PDP Olusegun Obasanjo  
2007–10 PDP Umaru Yar'Adua  
2010– PDP Goodluck Jonathan

## RECENT ELECTIONS

Presidential elections were held on 16 April 2011. Goodluck Jonathan, the candidate for the ruling People's Democratic Party (PDP), won against 19 opponents with 58.9% of the votes cast. His main opponent, Muhammadu Buhari of the Congress for Progressive Change (CPC), received 32.0%, and Nuhu Ribadou of Action Congress of Nigeria (ACN) 5.4%.

Elections to the House of Representatives were held on 9 April 2011, but with voting in several constituencies postponed owing to logistical problems. The PDP won 123 seats, ACN 47, CPC 30, the All Nigeria's People Party (ANPP) 25 and others 9.

In Senate elections held on the same day 45 seats went to the PDP, 13 to the ACN, 7 to the ANPP, 5 to CPC and 4 to others. Again, voting was postponed in some constituencies.

## CURRENT GOVERNMENT

*President and Minister of Power:* Goodluck Jonathan; b. 1957 (PDP; since 9 Feb. 2010—acting until 6 May 2010).

*Vice President:* Namadi Sambo.

In March 2012 the government comprised:

*Minister of Aviation:* Stella Oduah-Ogiamwonyi. *Defence:* Bello H. Mohammed. *Education:* Ruqayyatu A. Rufa'i. *Federal Capital Territory:* Bala Muhammed. *Finance:* Ngozi Okonjo-Iweala. *Foreign Affairs:* Olugbenga Ashiru. *Health:* Prof. Christian Onyebuchi Chukwu. *Information and Communications:* Labaran Maku. *Interior:* Abba Moro. *Justice and Attorney General:* Mohammed Bello Adoke. *Labour:* Chukwuemeka Ngozichineke Wogu. *Mines and Steel Development:* Musa Mohammed Sada. *National Planning:* Shamsudeen Usman. *Niger Delta:* Peter Godsdan Orubebe. *Petroleum Resources:* Dieziani Alison-Madueke. *Police Affairs:* Caleb Olubolade. *Power:* Prof. Bart Nnaji. *Science and Technology:* Prof. Ita Okon Basse Ewa. *Sports:* Yusuf Suleiman. *Trade and Investment:* Olusegun O. Aganga. *Transport:* Idris A. Umar. *Women's Affairs:* Zainab Maina. *Works:* Mike Onolememe. *Youth Development:* Bolaji Abdullahi.

*Nigerian Parliament:* <http://www.nassnig.org>

## CURRENT LEADERS

### Goodluck Ebele Jonathan

*Position*  
President

#### Introduction

The National Assembly appointed Goodluck Jonathan as acting president in Feb. 2010, replacing President Umaru Yar'Adua, who had been undergoing medical treatment since Nov. 2009. An academic and former governor of Bayelsa State, Jonathan had been vice-president since Nov. 2007. He became president in May 2010 on Yar'Adua's death.

#### Early Life

Goodluck Ebele Jonathan was born on 20 Nov. 1957 in Otuoke, Bayelsa State, in the oil-rich Niger Delta. A member of the indigenous Ijaw people, he was raised as a Pentecostal Christian by his father, a canoe builder and fisherman. After attending local primary schools Jonathan went to Mater Dei High School in Imiringi. He graduated in zoology from Port Harcourt University in 1981.

After completing military service Jonathan pursued an academic career, gaining a masters degree in hydrobiology and fisheries in 1985 and a PhD in zoology ten years later, both from Port Harcourt University. He worked as a lecturer, education inspector and environmental protection officer before entering politics in 1998 with the People's Democratic Party (PDP). He was appointed deputy governor of Bayelsa State in 1999 and again in 2003. When state governor Diepriye Alamiyeseigha was charged with corruption in the UK in 2005, Jonathan replaced him.

In Dec. 2006, months after his wife Patience Faka was accused of, but not charged with, money laundering, Jonathan was elected vice-presidential running mate to Yar'Adua for the 2007 elections. The pair won, although opponents questioned the legitimacy of the vote and Jonathan's house in Bayelsa was bombed shortly after.

Jonathan's knowledge of the Niger Delta region helped Yar'Adua secure a ceasefire and disarmament from Delta rebels, generally considered the biggest achievement of his time in office. In Nov. 2009 Yar'Adua left Nigeria for medical treatment in Saudi Arabia without designating an interim presidential replacement. Jonathan was granted presidential powers after much wrangling by a parliamentary resolution of 9 Feb. 2010, though its constitutional validity was questioned. Yar'Adua returned to Nigeria in Feb. 2010 but remained out of public view, fuelling speculation about his condition.

#### Career in Office

On becoming acting president, Jonathan made moves to secure his tenuous position. In a government reshuffle he replaced two-thirds of Yar'Adua's appointments, including the justice minister and the national security adviser. He selected a London-based Goldman Sachs banker as finance minister and named the first female oil minister.

Jonathan vowed to calm militancy in the Delta region and address electricity shortages. He met with major oil corporations in Feb. 2010 after one of the main rebel groups renewed its campaign against the oil infrastructure in Dec. 2009. In April 2010 he dismissed the head of the state-run Nigerian National Petroleum Corporation. After Yar'Adua died on 5 May 2010, Jonathan was sworn in as his successor the following day.

In Sept. 2010 Jonathan announced that he would contest presidential elections to be staged in 2011. The following month Nigeria marked 50 years of independence from Britain, although the celebrations were marred by a car bomb incident in Abuja in which at least 12 people were killed. The presidential poll took place in April 2011 and Jonathan was returned with almost 60% of the vote. Nevertheless, voting was divided along religious and ethnic lines, and Jonathan has been confronted with serious outbursts of violence between Nigeria's Christian and Muslim communities and a series of bombings and shootings by Boko Haram, an extremist Islamist sect.

## DEFENCE

In 2008 defence expenditure totalled US\$1,339m., equivalent to US\$9 per capita and representing 0.7% of GDP.

Nigeria's armed forces have over 3,000 personnel in peace-keeping missions in other African countries, notably Liberia and Sierra Leone.

### Army

Strength (2007) 62,000.

### Navy

The Navy includes one frigate with a helicopter and one corvette. There is a small aviation element. Naval personnel in 2007 totalled 8,000, including Coastguard. The main bases are at Apapa (Lagos) and Calabar.

### Air Force

Personnel (2007) total 10,000 although the force has a very limited operational capacity. There were 75 combat capable aircraft in 2007 including MiG-21s and Aero L-39s, but the serviceability of much of the equipment is in doubt. In addition there were five attack helicopters in 2007.

## ECONOMY

Agriculture accounted for 32.0% of GDP in 2006, industry 41.9% and services 26.1%.

## Overview

Since independence in 1960, weak and corrupt government has damaged the economy. GDP per capita is low (at approximately US\$2,300 in 2009), while poverty is widespread (estimated at 54%, compared to 43% in 1985). The black market constitutes 77% of the country's official GDP. Unemployment remains high.

However, Nigeria is well-positioned to build a prosperous economy. It is Africa's largest oil exporter, with the continent's greatest reserves of natural gas. It was among the pioneers in adopting and implementing the Extractive Industries Transparency Initiative (EITI), which aims to improve governance in the hydrocarbon sector.

A ten-year rift with the IMF ended with an agreement in Jan. 1999 on a Fund-monitored reform programme, which includes provisions for abolishing the dual exchange rate, ending the subsidy on local fuel and increasing privatization. Between 2004 and 2007, wide-ranging reforms were undertaken, particularly in the management of public finance, governance, banking and finance. Average growth in 2003–09 of 7.5% was based predominantly on the agricultural sector but growth was also strong in manufacturing, minerals and telecommunications. The reforms helped Nigeria to cope with the effects of the global financial crisis, although growth is expected to slow. External debt is low following successful negotiations with the Paris and London Clubs to eradicate its major arrears. In its Vision 2020, the government aims to diversify the economy away from oil.

## Currency

The unit of currency is the *naira* (NGN) of 100 *kobo*. Foreign exchange reserves were US\$44,786m. in May 2009 (US\$7,100m. in 1998) and gold reserves were 687,000 troy oz. Inflation rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
18.9%	12.9%	14.0%	15.0%	17.9%	8.2%	5.4%	11.6%	12.5%	13.7%

In June 2009 total money supply was ₦4,247.6bn.

## Budget

The financial year is the calendar year. 2008 budgetary central government revenue, ₦2,386.9m. (tax revenue 2.9%; non-tax revenue 97.1%); expenditure, ₦1,771.3m. (including social benefits, 27.4%; grants, 25.5%).

VAT was raised from 5% to 10% in May 2007, but as a result of a general strike in protest against the increase was lowered back to 5% a month later.

## Performance

Real GDP growth rates (based on IMF statistics):

2002	2003	2004	2005	2006	2007	2008	2009	2010
21.2%	10.3%	10.6%	5.4%	6.2%	7.0%	6.0%	7.0%	8.7%

Before the discovery of oil in the early 1970s Nigeria's GDP per head was around US\$200. By the early 1980s it had reached around US\$800, but has now declined to some US\$300. Total GDP in 2010 was US\$193.7bn.

## Banking and Finance

The Central Bank of Nigeria (CBN) is the bank of issue (*Governor*, Lamido Sanusi).

In 2004 a major banking reform was announced, consolidating the existing institutions at the time (nearly 100) into 25 large universal banks. However, despite attempts to strengthen the banking sector, the financial condition of the banks deteriorated. Subsequently the CBN requested technical assistance from the IMF to strengthen the banking system. Another banking crisis in 2008 prompted a ₦600bn. bailout from the Central Bank to five of the leading banks: Intercontinental Bank, Oceanic International Bank, Union Bank of Nigeria, Bank PHB and Afribank. More

ambitious reforms took effect in Oct. 2010. In 2007 bank reserves at the CBN totalled ₦1,195bn. and CBN foreign assets amounted to ₦6,570bn.

Nigeria was one of three countries and territories named in a report in June 2005 as failing to co-operate in the fight against international money laundering. In June 2006 Nigeria was delisted and its formal monitoring was ended a year later. The Financial Action Task Force on Money Laundering was set up by the G7 group of major industrialized nations.

The Nigerian Stock Exchange is in Lagos.

## ENERGY AND NATURAL RESOURCES

### Environment

Nigeria's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.7 tonnes per capita in 2008.

### Electricity

Installed capacity, 2007 estimate, 5.9m. kW. Production, 2007, 22.98bn. kWh (28% kWh hydro-electric); consumption per capita was 156 kWh in 2007. Power cuts are frequent, with both businesses and homes having to rely on generators as demand for electricity far outweighs supply.

### Oil and Gas

Nigeria's oil production, though declining, is the largest of any African country and amounted to 105.3m. tonnes in 2008. Reserves in 2008 totalled 36.2bn. bbls. There are four refineries. For many years oil accounted for over 90% of Nigeria's exports, but in 2009 this declined sharply. In the first quarter of 2009 oil revenue was around US\$4.9bn., down 50% from the fourth quarter of 2008 with militant activity blamed for the decline. Most of Nigeria's oil wealth comes from onshore wells, but there are also large untapped offshore deposits.

Natural gas reserves, 2008, were 5,220bn. cu. metres; production, 35.0bn. cu. metres. In March 2007 the 678-km West Africa Gas pipeline was completed to supply natural gas to Benin, Ghana and Togo. After a series of delays resulting from vandalism and fuel quality problems, it was restarted in March 2010 and should help to reduce Nigeria's dependence on oil for government revenue.

The Petroleum Industry Bill was introduced in the Nigerian Senate in Jan. 2009 but has yet to be passed into law. It proposes the break-up of the National Petroleum Corporation into seven independent regulatory agencies and a new commercial national oil company, the National Petroleum Company of Nigeria.

### Minerals

Production, 2005 estimates (in tonnes): limestone, 2.10m.; kaolin, 200,000; marble, 149,000. There are large deposits of iron ore, coal (reserves estimate 245m. tonnes), lead and zinc. There are small quantities of gold and uranium. Lead production was an estimated 5,000 tonnes in 2009. Tin is also mined.

### Agriculture

Of the total land mass, 75% is suitable for agriculture, including arable farming, forestry, livestock husbandry and fisheries. In 2001, 28.5m. ha. were arable and 2.7m. ha. permanent cropland. 0.23m. ha. were irrigated in 2001. 90% of production was by smallholders with less than 3 ha. in 2000, and less than 1% of farmers had access to mechanized tractors. Main food crops are millet and sorghum in the north, plantains and oil palms in the south, and maize, yams, cassava and rice in much of the country. The north is, however, the main food producing area. Cocoa is the crop that contributes most to foreign exchange earnings. Output, 2000 (in 1,000 tonnes): cassava, 32,697; yams, 25,873; sorghum, 7,520; millet, 5,960; maize, 5,476; taro, 3,835; rice, 3,277; groundnuts, 2,783; plantains, 1,902; sweet potatoes, 1,662; palm oil, 896; pineapples, 881; tomatoes, 879. Nigeria is the biggest producer of yams, accounting for more than two-thirds of the

annual world output. It is also the leading cassava and taro producer and the second largest millet producer.

Livestock, 2000: cattle, 19.83m.; sheep, 20.50m.; goats, 24.30m.; pigs, 4.86m.; chickens, 126m. Products (in 1,000 tonnes), 2000: beef and veal, 298; goat meat, 154; mutton and lamb, 91; pork, bacon and ham, 78; poultry meat, 172; milk, 386; eggs, 435.

#### Forestry

There were 11.09m. ha. of forests in 2005, or 12.2% of the land area. Timber production in 2007 was 71.42m. cu. metres.

#### Fisheries

The total catch in 2005 was 523,182 tonnes, of which 285,131 tonnes came from sea fishing.

### INDUSTRY

In 2009 manufacturing accounted for 4.2% of GDP. Production, in 1,000 tonnes: cement (2008 estimate), 5,000; palm oil (2006), 1,287; residual fuel oil (2007), 1,002; distillate fuel oil (2007), 623; petrol (2007), 287; jet fuel (2007), 232; kerosene (2007), 98; paper and paperboard (2007 estimate), 19; cigarettes (2005), 1,813m. units; motorcycles (2005), 6,900 units. Also plywood (2007 estimate), 55,000 cu. metres.

#### Labour

The labour force in 2004 totalled an estimated 55.67m. There were 33 work stoppages in 2003–04 with 407,000 working days lost (233.5m. working days lost in 1994–95).

### INTERNATIONAL TRADE

Nigeria's external debt was US\$22,178m. in 2005.

#### Imports and Exports

Imports (c.i.f.) in 2006 totalled US\$22,903m.; exports (f.o.b.) US\$59,215m. Principal imports in 2003 were: machinery and transport equipment, 38.0%; manufactured goods, 16.0%; food and livestock, 14.0%; petroleum and petroleum products, 12.3%. In 2003 crude oil amounted to 96.4% of exports by value. Other exports included ships and boats, and natural gas.

In 2006 the main import suppliers were: USA, 15.7%; China, 13.8%; UK, 11.8%; Germany, 5.6%. Leading export destinations in 2006 were: USA, 45.0%; India, 9.3%; Spain, 8.0%; France, 5.7%.

### COMMUNICATIONS

#### Roads

The road network covered 193,200 km in 2004, including 15,688 km of main roads. In 2007 there were 4,560,000 passenger cars in use and 3,040,000 motorcycles and mopeds. There were 17,797 road accidents with 9,390 fatalities in 2007.

#### Rail

In 2005 there were 3,505 route-km of track (1,067 mm gauge). There are plans to convert the entire network to 1,435 mm gauge. Passenger-km travelled in 2008 came to 773m. and freight tonne-km to 41m.

#### Civil Aviation

Lagos (Murtala Muhammed) is the major airport, and there are also international airports at Port Harcourt and Kano (Mallam Aminu Kano Airport). The main carrier is Air Nigeria, established in 2004 as Virgin Nigeria Airways and rebranded as Nigerian Eagle Airlines in Sept. 2009 and Air Nigeria in June 2010. It operated direct flights in Sept. 2009 to Abidjan, Accra, Banjul, Cotonou, Dakar, Douala, Libreville and Monrovia as well as providing domestic services. In 2008 Murtala Muhammed International Airport handled 2,688,595 passengers and 130,163 tonnes of freight.

#### Shipping

In Jan. 2009 there were 107 ships of 300 GT or over registered, totalling 427,000 GT. The principal ports are Lagos and Port Harcourt. There is an extensive network of inland waterways.

### Telecommunications

In 2010 there were 1,050,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 87,298,000 (551.0 per 1,000 persons), up from 18,587,000 in 2005. Nigeria has now surpassed South Africa as the continent's largest mobile phone market. The largest mobile phone company is MTN Nigeria Communications. There were 1.2m. PCs in use in 2006 and 24.0m. internet users in 2008, up from 5.0m. users in 2005.

### SOCIAL INSTITUTIONS

#### Justice

The highest court is the Federal Supreme Court, which consists of the Chief Justice of the Republic, and up to 15 Justices appointed by the government. It has original jurisdiction in any dispute between the Federal Republic and any State or between States; and to hear and determine appeals from the Federal Court of Appeal, which acts as an intermediate appellate Court to consider appeals from the High Court.

High Courts, presided over by a Chief Justice, are established in each state. All judges are appointed by the government. Magistrates' courts are established throughout the Republic, and customary law courts in southern Nigeria. In each of the northern States of Nigeria there are the Sharia Court of Appeal and the Court of Resolution. Muslim Law has been codified in a Penal Code and is applied through Alkali courts. The northern province of Zamfara introduced *sharia*, or Islamic law, in Oct. 1999, as have the other 11 predominantly Muslim northern provinces in the meantime. The death penalty is in force and was used in 2006, although there have been no reported executions since.

The population in penal institutions in Jan. 2007 was 39,438 (28 per 100,000 of national population).

#### Education

The adult literacy rate was an estimated 60.8% in 2009. Free, compulsory education for nine years is provided for all children from the age of six. In 2006 there were 22.86m. pupils and 565,646 teaching staff in primary schools; 6.44m. pupils and 202,082 teaching staff in secondary schools; and (2005) 1.39m. students in tertiary education with 37,031 academic staff.

Among the leading institutions of higher education are Ahmadu Bello University in Zaria—Nigeria's largest university—with around 35,000 students, and the University of Ibadan—the country's oldest university—founded in 1948.

#### Health

Health personnel, 2000: 30,885 doctors, 2,180 dentists and 8,642 pharmacists.

Nigeria has made significant progress in the reduction of undernourishment in the past 25 years. In the period 2001–03 only 9% of the population was undernourished, one of the lowest rates in sub-Saharan Africa.

An estimated 2.9m. people in Nigeria are living with HIV/AIDS, a total exceeded only in South Africa.

### RELIGION

Muslims and Christians both constitute about 45% of the population; traditional animist beliefs are also widespread. Northern Nigeria is mainly Muslim; southern Nigeria is predominantly Christian and western Nigeria is evenly divided between Christians, Muslims and animists. Far more Nigerians consider their religion to be of prime importance rather than their nationality. In Feb. 2012 the Roman Catholic church had two cardinals.

### CULTURE

#### World Heritage Sites

The Sukur Cultural Landscape, a hilly area in Adamawa State (northeastern Nigeria), was entered on the UNESCO World

Heritage list in 1999. Osun Sacred Grove is one of the last remnants of primary high forest in southern Nigeria and was inscribed in 2005.

#### Press

In 2005 there were 26 daily newspapers with a combined circulation of 820,000.

#### Tourism

In 2006 there were 3,056,000 non-resident visitors (including 2,108,000 from other African countries and 506,000 from Europe); spending by tourists totalled US\$51m.

#### DIPLOMATIC REPRESENTATIVES

Of Nigeria in the United Kingdom (Nigeria House, 9 Northumberland Ave., London, WC2N 5BX)  
*High Commissioner:* Dr Dahaltu S. Tafida.

Of the United Kingdom in Nigeria (Dangote House, Aguyi Ironsi St., Wuse, Abuja)  
*High Commissioner:* Andrew Lloyd, CMG, MBE.

Of Nigeria in the USA (3519 International Court, NW, Washington, D.C., 20008)  
*Ambassador:* Adebowale Ibidapo Adefuye.

Of the USA in Nigeria (Plot 1075, Diplomatic Drive, Central District Area, Abuja)  
*Ambassador:* Terence McCulley.

Of Nigeria to the United Nations  
*Ambassador:* U. Joy Ogwu.

Of Nigeria to the European Union  
*Ambassador:* Usman Alhaji Baraya.

## KEY HISTORICAL EVENTS

The first settlers arrived at the end of the Ice Age, as the glaciers retreated north. Archaeological remains in Finnmark in the north and in Rogaland in the southwest of Norway date from between 9500 to 8000 BC and suggest coastal, hunting-fishing communities. By 2500 BC a new influx of settlers brought cattle and crop farming and gradually replaced the earlier hunting-fishing communities. Although there is little evidence of the impact of the bronze and iron ages on Norway as its people had not yet found ways to exploit their natural resources for trade, links with Roman-occupied Gaul in the first four centuries AD were strong. By the time of the collapse of the Roman Empire, tribal groups had started to develop and by AD 800 had each established their own legislative and adjudicatory assemblies, known as *things*.

In the ninth century communities from the Vik, an area between the south coasts of Norway and Sweden, gave their name to the people collectively known as Vikings. The Norwegian Vikings sailed to the Atlantic islands, England, France, Scotland and Ireland, and also colonized Iceland. One of the many whose exploits were faithfully recorded by the saga writers was Eric the Red, who discovered Greenland. His son, Leif Erikson, voyaged across the Davis Strait, to America, becoming possibly the first European to do so.

The first steps towards centralized rule were taken by Harold Fairhair who extended his rule along the coastal region of Norway. Battles with rival chieftains culminated in about 900 when Harold was proclaimed king of the Norwegians. His successors were less assertive and by the mid-tenth century the country was effectively under the suzerainty of Harold Bluetooth, king of Denmark and Skåne. Bluetooth's grandson, Canute the Great, fought successfully to incorporate England into his North Sea Empire before setting his sights on Sweden. But the limitations of royal authority were shown on the death of Canute when the English, unchallenged, simply chose their own king while the Danish and Norwegian nobles decided that whichever of their own monarchs lived longest should take power in both countries, an agreement which for a time resulted in a Norwegian ruler for Denmark.

## Viking Strength

The Viking's territorial expansion came to an end with the Norwegian King Harald Hardrada's defeat at the battle of Stamford Bridge in England in 1066. Supported by the English church, the Norwegian monarchy gained strength. By the 12th century the balance of power between the church and monarchy had become a source of civil conflict which was only resolved when Håkon IV became King in 1217. Thus began Norway's 'Golden Age' in which the unity of the kingdom was solidly established. Blood feuds were prohibited, a royal council was created, and primogeniture was introduced to secure the continuity of the monarchic line. Under Håkon's rule, both Greenland and Iceland ceded control to Norway. It was Håkon's son, Magnus VI, known as the Lawmender, who oversaw the codification of a national law system between 1274–76, elements of which have survived to this day. Under Erik II, Magnus' son, much of the royal power was divested to wealthy magnates. His succession by his brother Håkon V in 1299 marked a renewed effort to strengthen the monarchy and also a movement of political power to Oslo.

Union with Sweden came in 1319 with the coronation of Magnus VII, the son of Håkon's daughter and Duke Erik of Sweden. This was to last until 1355, when the Swedish crown passed to Magnus' son. Between 1349–50 Norway fell victim to the Black Death which killed around two-thirds of its population. The effects of this were to dramatically reduce the strength of the nobility and to undermine the cohesion of the government, as many official positions were taken up by Danes and Swedes. Newly vulnerable to the threat of encroachment by the Germans, the incentive for all three Scandinavian kingdoms to unite was strong. When the Danish king died in 1375 his widow, Margaret, claimed the throne on behalf of her five-year-old son, Olav. Acting for her son, Margaret became regent of Denmark and, on the death of Håkon, regent of Norway. Confirmed as regent of Denmark and Norway, Margaret defeated Albrecht, the German claimant to the Swedish throne, thus clearing the way to a Nordic union. With the death of her son in 1387 and unable to take the triple crown for herself, she nominated her five-year-old nephew, Erik of Pomerania, as king of all three countries. His election was formalized at Kalmar in 1397.

From 1450 the Norwegian government was based in Copenhagen and many administrative positions were taken by Germans and Danes. An attempt by the Norwegian council to gain independence in 1523 led to civil war between 1534–36 and the council's subsequent abolition. Norway was then to remain a province of Denmark, with limited control over internal affairs, until the 19th century.

In the Napoleonic Wars, Denmark and Norway were allied with Napoleon I. Napoleon's defeat at the battle of Leipzig in 1813 was followed by a successful attack on Denmark from Sweden which resulted in the Treaty of Kiel (Jan. 1814). With the signing of the treaty Norway was conceded to the Swedish throne and, despite Denmark's continued resistance, its newly written constitution came into force in Nov. 1814. Although the arrangement meant the regency and foreign policy were to be shared with Sweden, the new constitution gave Norway control over internal affairs, with a newly established political base at Christiania.

The economic damage of the Napoleonic Wars was remedied by the rapid expansion of the fishing industry and, from the 1850s onwards, agriculture. In the latter half of the century, the merchant navy grew to become the third largest in the world after the United States and Great Britain.

### Independence

From the 1880s, successive steps towards self-government within the union culminated in a referendum in which the overwhelming majority of Norwegians voted for separation. In Oct. 1905 Oscar II renounced his title to the western provinces and a month later a Danish prince was confirmed as Håkon VII of free Norway. Reigning for 52 years, he was succeeded by his son.

At the outset of the First World War Norway declared its neutrality. This did not prevent the loss of almost half of its merchant navy and damage to the economy as a result of trade embargos. But despite the hardships of the 1930s' depression, industrial expansion continued.

From 1940 to 1944, during the Second World War, Norway was occupied by the Germans who set up a pro-German government under Vidkun Quisling. Apart from this wartime episode, the Labour Party held office, and the majority in the *Storting* (parliament), from 1935 to 1965. Norway's first post-war prime minister, Einar Gerhardsen, had spent four years in a concentration camp. He had been vice-chairman of Oslo city council until he became leader of the underground anti-Nazi movement in the early days of the occupation. As recently elected social democrat leader he was the natural choice to head the 1945 caretaker government.

The action needed to restore Norway's prosperity was self evident: to make good the heavy losses in the merchant fleet; to increase the output of hydro-electricity; and to develop new industries. The chief worry for the social democrats was the likely impact of communists who had gained credit for leading the resistance. Talks on a possible merger of the parties were as unproductive as parallel negotiations in Denmark, but the electoral results of each party's going its own way were markedly different in the two countries. More confident of their purpose, the Norwegian social democrats took the electorate by storm, increasing their share of the popular vote in the 1945 election by close on 10%. Their advance gave them the one prize that eluded their colleagues everywhere else in Scandinavia—an absolute majority and the freedom to govern without always looking over their shoulder.

The government was supported wholeheartedly by the trade unions. In return for price controls and food subsidies which stabilized the cost of living for almost five years, and the guarantee of full employment, the unions accepted compulsory arbitration for all wage disputes. Returned in 1949 with an increased majority, the social democrats were able to point to a rise in productivity and living standards well beyond that achieved by most other Western countries. But the general increase in world prices triggered by the Korean War meant that Norway had to pay much more for essential imports. The use of subsidies to counteract price increases reached its limit when they became the largest item in the national budget. In 1950 food prices were allowed to get closer to their market level and the cost of living started on an upward curve, leading to a 30% increase over three years. Industrial investment suffered a sharp cutback.

The social democrats held on to power until the mid-sixties when a centre right coalition took over led by Per Borten. By 1969 the social democrats had recovered much of their lost ground. The centre right coalition government struggled on with a majority of two until the EEC issue broke through the normally placid surface of Norwegian politics.

Although Norway's application for membership in the EEC in 1969 was successful, a referendum held in 1972 found more than 53% of voters opposed to joining. Norway had been a member of EFTA since that organization's foundation, and continued to sign up to a series of bilateral free-trade treaties with members of the EEC, but opposition to joining the EEC remained strong. On the inception of the EU in 1992, Norway, like its Scandinavian neighbours, applied for membership. But, again, a referendum was won by the anti-European lobby.

Norway's continued reluctance to join the EU hinges on its dependence on the export of petroleum and natural gas. Since the 1960s and the discovery of vast off-shore deposits, the oil and gas export industry has contributed to making Norway one of the world's richest economies.

In 2010 relations with China came under pressure when the Norwegian Nobel committee awarded its Peace Prize to Liu Xiaobo, a jailed dissident. In July 2011 an anti-immigration extremist set off a bomb at the prime minister's office in Oslo before carrying out a gun attack at a summer camp on the island of Utøya in Tyrifjorden, organized by the youth wing of the Labour Party. A total of 77 people were killed in the two attacks.

### TERRITORY AND POPULATION

Norway is bounded in the north by the Arctic Ocean, east by Russia, Finland and Sweden, south by the Skagerrak Straits and west by the Norwegian Sea. The total area of mainland Norway is 323,787 sq. km, including 19,539 sq. km of fresh water. Total coastline, including fjords, 25,148 km. There are more than 50,000 islands along the coastline. Exposed mountain (either bare rock or thin vegetation) makes up over 70% of the country. 25% of the land area is woodland and 4% tilled land.

Population (2001 census) was 4,520,947 (2,240,281 males; 2,280,666 females); population density per sq. km, 14.8. Estimated population, 1 Jan. 2011, 4,920,305; population density, 16.2. With the exception of Iceland, Norway is the most sparsely populated country in Europe.

The UN gives a projected population for 2015 of 5.05m.

There are 19 counties (*fylke*). Land area, population and densities:

	Land area (sq. km)	Population (2001 census)	Population (2011 estimate)	Density per sq. km 2011
Østfold	3,922	252,520	274,827	70
Akershus	4,620	476,440	545,653	118
Oslo (City)	427	512,093	599,230	1,404
Hedmark	26,244	187,878	191,622	7

Tromsø	56,466	Halden	23,711
Tønsberg	48,350		

The official language is Norwegian, which has two versions: Bokmål (or Riksmål) and Nynorsk (or Landsmål).

The Sami, the indigenous people of the far north, number some 40,000 and form a distinct ethnic minority with their own culture and language.

## SOCIAL STATISTICS

Statistics for calendar years:

	Births	Still-born	Outside marriage	Deaths	Marriages	Divorces
2006	58,545	201	31,056	41,253	21,721	10,598
2007	58,459	241	31,849	41,954	23,471	10,280
2008	60,497	221	33,302	41,712	25,125	10,158
2009	61,807	215	34,038	41,449	24,582	10,235
2010	61,442	190	33,655	41,499	23,577	10,264

Rates per 1,000 population, 2010, birth, 12.6; death, 8.5; marriage, 4.8; divorce, 2.1. Average annual population growth rate, 2000–10, 0.86% (2010, 1.28%). In 2009 there were 573 suicides, giving a rate of 11.9 per 100,000 population (men, 17.3 per 100,000; women, 6.5).

Expectation of life at birth, 2010, was 78.9 years for males and 83.2 years for females. Infant mortality, 2010, 2.8 per 1,000 live births; fertility rate, 2010, 1.95 births per woman. 55% of births are to unmarried mothers. In 2009 the average age at marriage was 37.3 years for males and 33.8 years for females (33.8 years and 31.0 years respectively for first marriages). Norway legalized same-sex marriage in Jan. 2009.

At 1 Jan. 2011 the immigrant population totalled 600,922, including 60,610 from Poland, 34,108 from Sweden, 31,884 from Pakistan and 27,827 from Iraq. In 2010 Norway received 10,064 asylum applications. Most were from Eritrea (1,711), Somalia (1,397), Afghanistan (979) and Russia (628).

A UNICEF report published in 2005 showed that 3.4% of children in Norway live in poverty (in households with income below 50% of the national median), the third lowest percentage of any country behind Denmark and Finland.

In the Human Development Index, or HDI (measuring progress in countries in longevity, knowledge and standard of living), Norway was ranked first in the 2011 rankings published in the annual Human Development Report.

## CLIMATE

There is considerable variation in the climate because of the extent of latitude, the topography and the varying effectiveness of prevailing westerly winds and the Gulf Stream. Winters along the whole west coast are exceptionally mild but precipitation is considerable. Oslo, Jan. 24.3°F (−4.3°C), July 61.5°F (16.4°C). Annual rainfall 30.0" (763 mm). Bergen, Jan. 34.3°F (1.3°C), July 57.7°F (14.3°C). Annual rainfall 88.6" (2,250 mm). Trondheim, Jan. 26°F (−3.5°C), July 57°F (14°C). Annual rainfall 32.1" (870 mm). Bergen has one of the highest rainfall figures of any European city. The sun never fully sets in the northern area of the

country in the summer and even in the south the sun rises at around 3 a.m. and sets at around 11 p.m.

## CONSTITUTION AND GOVERNMENT

Norway is a constitutional and hereditary monarchy.

The reigning King is **Harald V**, born 21 Feb. 1937, married on 29 Aug. 1968 to Sonja Haraldsen. He succeeded on the death of his father, King Olav V, on 21 Jan. 1991. *Offspring*: Princess Märtha Louise, born 22 Sept. 1971 (married Ari Behn, b. 30 Sept. 1972, on 24 May 2002; *offspring*, Maud Angelica, b. 29 April 2003; Leah Isadora, b. 8 April 2005; Emma Tallulah, b. 29 Sept. 2008); Crown Prince Haakon Magnus, born 20 July 1973 (married Mette-Marit Tjessem Høiby, b. 19 Aug. 1973, on 25 Aug. 2001; *offspring*, Ingrid Alexandra, b. 21 Jan. 2004; Sverre Magnus, b. 3 Dec. 2005; *offspring* of Crown Princess Mette-Marit from previous relationship, Marius, b. 13 Jan. 1997). The king and queen together receive an annual personal allowance of 9.3m. kroner from the civil list, and the Crown Prince and Crown Princess together 7.8m. kroner. Princess Märtha Louise relinquished her allowance in 2002. Women have been eligible to succeed to the throne since 1990. There is no coronation ceremony. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the *Storting*, but this assembly has the right to nominate another, if it does not agree with the proposal.

The Constitution, voted by a constituent assembly on 17 May 1814 and modified at various times, vests the legislative power of the realm in the *Storting* (Parliament). The royal veto may be exercised; but if the same Bill passes two *Stortings* formed by separate and subsequent elections it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

The 169-member *Storting* (increased from 165 for the 2005 election) is directly elected by proportional representation. The country is divided into 19 districts, each electing from 4 to 15 representatives.

The *Storting*, when assembled, divides itself by election into the *Lagting* and the *Odelsting*. The former is composed of one-fourth of the members of the *Storting*, and the other of the remaining three-fourths. Each Ting (the *Storting*, the *Odelsting* and the *Lagting*) nominates its own president. Most questions are decided by the *Storting*, but questions relating to legislation must be considered and decided by the *Odelsting* and the *Lagting* separately. In the event of the *Odelsting* and the *Lagting* disagreeing the Bill is considered by the *Storting* in plenary sitting, with a majority of two-thirds of the votes required for a new law to be passed. The same majority is required for alterations of the Constitution, which can only be decided by the *Storting* in plenary sitting. The *Storting* elects five delegates, whose duty it is to revise the public accounts. The *Lagting* and the ordinary members of the Supreme Court of Justice (the *Høyesterett*) form a High Court of the Realm (the *Riksstrett*) for the trial of ministers, members of the *Høyesterett* and members of the *Storting*. The impeachment before the *Riksstrett* can only be decided by the *Odelsting*.

The executive is represented by the King, who exercises his authority through the Cabinet. Cabinet ministers are entitled to be present in the *Storting* and to take part in the discussions, but without a vote.

## National Anthem

'Ja, vi elsker dette landet' ('Yes, we love this land'); words by B. Bjørnson, tune by R. Nordraak.

## GOVERNMENT CHRONOLOGY

Prime Ministers since 1945. (AP = Labour Party; DNA = Norwegian Labour Party; H = Conservative Party; KrF = Christian People's Party; Sp = Center Party)

1945–51	DNA	Einar Henry Gerhardsen

2000–01	DNA	Jens Stoltenberg
2001–05	KrF	Kjell Magne Bondevik
2005–	DNA, AP	Jens Stoltenberg

### RECENT ELECTIONS

At the elections for the Storting held on 14 Sept. 2009 the following parties were elected: the ruling Norwegian Labour Party (DNA), winning 64 out of 169 seats (with 35.4% of the vote, up from 61 and 32.7% in 2005); Progress Party (FrP), 41 (22.9%); Conservative Party (H), 30 (17.2%); Socialist Left Party (SV), 11 (6.2%); Centre Party (Sp), 11 (6.2%); Christian People's Party (KrF), 10 (5.5%); Liberal Party (V), 2 (3.9%). Turnout was 75.7%.

### CURRENT GOVERNMENT

In March 2012 the three-party coalition government comprised:

*Prime Minister:* Jens Stoltenberg; b. 1959 (Labour Party/AP—formerly DNA; sworn in 17 Oct. 2005 and re-elected in Sept. 2009, having previously held office from March 2000 to Oct. 2001).

*Minister of Agriculture and Food:* Lars Peder Brekk (Sp). *Children, Equality and Social Inclusion:* Audun Lysbakken (SV). *Culture:* Anniken Huitfeldt (AP). *Defence:* Espen Barth Eide (AP). *Education:* Kristin Halvorsen (SV). *Environment and International Development:* Erik Solheim (SV). *Finance:* Sigbjørn Johnsen (AP). *Fisheries and Coastal Affairs:* Lisbeth Berg-Hansen (AP). *Foreign Affairs:* Jonas Gahr Støre (AP). *Government Administration, Reform and Church Affairs:* Rigmor Aasrud (AP). *Health and Care Services:* Anne-Grete Strøm-Erichsen (AP). *Justice, Police and Immigration:* Grete Faremo (AP). *Labour:* Hanne Bjørstrøm (AP). *Local Government and Regional Development:* Liv Signe Navarsete (Sp). *Petroleum and Energy:* Ola Borten Moe (Sp). *Research and Higher Education:* Tora Aasland (SV). *Trade and Industry:* Trond Giske (AP). *Transport and Communication:* Magnhild Meltveit Kleppa (Sp). *Minister at the Office of the Prime Minister:* Karl Eirik Schjøtt-Pedersen (AP).

*Office of the Prime Minister:* <http://www.regjeringen.no>

### CURRENT LEADERS

#### Jens Stoltenberg

##### Position

Prime Minister

##### Introduction

Jens Stoltenberg became prime minister of Norway for a second time on 17 Oct. 2005, following the victory of his centre-left coalition in parliamentary elections, having previously held the office from 2000–01. He was returned to power again in elections in Sept. 2009.

##### Early Life

Jens Stoltenberg was born in Oslo on 16 March 1959, the son of former politicians. He studied economics at Oslo University, where he became an active member of the Norwegian Labour

Party (Det Norske Arbeiderpartiet, DNA). In 1985 he was appointed leader of the Labour Youth League, having served on its central board for six years. From 1985–89 he was vice president of the International Union of Socialist Youth. He also worked briefly at the National Statistics Office and was an economics lecturer at the University of Oslo before serving for two years as leader of the Oslo Labour Party (1990–92). He was also a state secretary at the department of the environment at this time.

Elected a member of the Storting (parliament) for Oslo in the Sept. 1993 general election, Stoltenberg served as minister of trade and energy from 1993–96 in Gro Harlem Brundtland's administration and oversaw Norway's accession to the European Economic Area in 1994.

When Brundtland resigned in Oct. 1996 her successor, Thorbjørn Jagland, made Stoltenberg minister of finance, a post he held for a year until the DNA lost power to the conservative Christian People's Party, led by Kjell Magne Bondevik. Bondevik, who attempted to govern with a coalition which held a slim majority, resigned in March 2000 and Stoltenberg (by now deputy leader of the DNA) was asked to form a government. On 17 March 2000 he was sworn in to become the youngest prime minister in Norway's history.

##### Career in Office

Stoltenberg kept up Norway's reputation as an international peace-broker by mediating between Tamil separatists and the government of Sri Lanka. More controversially, he ushered in reforms to the welfare state that included the part-privatization of several state-owned services. In the parliamentary elections of Sept. 2001 the party suffered a heavy defeat, gaining only 24% of the vote. Bondevik returned as prime minister of a centre-right coalition. A DNA party leadership battle between Stoltenberg and Jagland (leader since 1992) ensued with Stoltenberg emerging victorious.

Thanks to burgeoning oil and gas exports and high international prices, the economy prospered under Bondevik but Stoltenberg tapped into people's dissatisfaction with the welfare system. The DNA's campaign in the run-up to the Sept. 2005 parliamentary elections centred on increased funding for education, health and care of the elderly. In partnership with the Socialist Left Party and the Centre Party, the DNA took 87 of 169 seats. Stoltenberg was sworn in to office on 17 Oct. 2005.

Stoltenberg vowed to reform the welfare system while creating conditions for Norway to develop as a knowledge-based economy. He also pledged sustainable management of the country's fish and energy resources. In 2006 his administration approved the expansion of oil exploration in the Barents Sea and also the huge merger (agreed in Dec.) of Norway's two largest energy companies, Statoil and Norsk Hydro (with the government having a controlling stake in the combined group). Stoltenberg withdrew the small contingent of Norwegian troops from Iraq, but promised to increase the country's participation in United Nations peacekeeping missions elsewhere in the world.

In Sept. 2009 his centre-left coalition was returned to power in parliamentary elections, with the DNA (renamed the Labour Party/AP in April 2011) marginally increasing its share of the vote.

In July 2011 the government was confronted with an unprecedented act of violence in Norway as a right-wing extremist set off a bomb in central Oslo, killing eight people, before going on a shooting rampage at a political youth camp run by Stoltenberg's AP near the capital and murdering another 69 victims.

##### DEFENCE

Conscription is for 12 months, with four to five refresher training periods.

In 2008 defence spending totalled US\$5,869m. (US\$1,264 per capita), representing 1.3% of GDP. Expenditure per capita was the highest of any European country in 2008.

### Army

Strength (2007) 6,700 (including 3,500 conscripts). The Army fast mobilization reserve numbers 83,000.

### Navy

The Royal Norwegian Navy has three components: the Navy, Coast Guard and Coastal Artillery. Main naval combatants include six German-built Ula class submarines and five frigates.

The personnel of the Navy totalled 4,100 in 2007, of whom 2,000 were conscripts. 721 (400 conscripts) served in the Coast Guard. The main naval base is at Bergen (Håkonsvern), with a subsidiary base at Ramsund.

### Air Force

The Air Force consists of seven air stations, two control and reporting centres, ten squadrons with aircraft and helicopters, and two surface-to-air battalions. Total strength (2007) is 5,000 personnel, including 3,200 conscripts. There were 52 combat capable aircraft in operation including F-16A/Bs.

### Home Guard

The Home Guard is organized in small units equipped and trained for special tasks. Service after basic training is one week a year. The Home Guard consists of the Land Home Guard (strength, 2007, 46,000 reservists in mobilization), Naval Home Guard (1,800) and Anti-Air Home Guard (2,500).

## INTERNATIONAL RELATIONS

In a referendum on 27–28 Nov. 1994, 52.2% of votes cast were against joining the EU. The electorate was 3,266,182; turnout was 88.9%.

## ECONOMY

Services accounted for 56% of GDP in 2007, industry 43% and agriculture 1%.

*Transparency International*, the anti-corruption organization, ranked Norway sixth in the world in a survey of the countries with the least corruption in business and government in 2011. It received 9.0 out of 10 in the annual index.

Norway gave US\$4.09bn. in international aid in 2009, which at 1.06% of GNI made it the second most generous developed country as a percentage of its gross national income (behind Sweden) and one of only five countries to exceed the UN target of 0.7%.

### Overview

Norway has one of the world's highest levels of GDP per capita and one of the lowest levels of income inequality. In 2009 it was the 13th largest oil producer and fifth largest oil exporter in the world. Oil and gas account for about a quarter of GDP. The country is well endowed with other natural resources including hydropower, fish, forests and minerals.

Since emerging as a major oil and gas exporter in the mid-1970s, Norway has enjoyed solid growth linked to global oil prices, allowing the government to run large fiscal surpluses. Fiscal guidelines effective since the 2002 budget hold the central government non-oil deficit to 4% of the assets of the Government Pension Fund—Global. Revenue from oil production is transferred to this fund. In 2011 Statoil—in which the government is the largest shareholder—made two new, large discoveries at the Skrugard oil field and the Aldous/Avaldsnes oil field, the latter representing one of the ten largest oil finds ever on the Norwegian continental shelf.

The economy combines free market capitalism and an advanced welfare state. GDP growth slowed in 2008 as a result of lower oil prices and the global financial crisis. Norway went into

recession in the first half of 2009. However, a recovery started in the second half of the year and by 2011 output had surpassed its pre-recession levels. Unemployment is low, standing at 3.3% in Oct. 2011.

A significant policy issue is how to finance pensions for an ageing population. The 2007 budget projected pension spending to rise by 10% of GDP by 2060. IMF calculations suggest that income from the Government Pension Fund—Global will cover only about two percentage points of the gap. Parliament agreed on a pension reform package in 2007. House prices, one of the highest ratios of household debt in the OECD, and eurozone turmoil are further causes for concern. The twin violent attacks in July 2011 also had a significant financial cost, accounting for some US\$178m. in the year's budget.

### Currency

The unit of currency is the *Norwegian krone* (NOK) of 100 *øre*. After Oct. 1990 the krone was fixed to the ecu in the EMS of the EU in the narrow band of 2.25%, but it was freed in Dec. 1992. Inflation rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
3.0%	1.3%	2.5%	0.5%	1.5%	2.3%	0.7%	3.8%	2.2%	2.4%

Foreign exchange reserves were US\$42,214m. in Aug. 2009. Gold reserves are negligible. On 30 Sept. 2011 the nominal value of notes and coins in circulation was 49,609m. kroner.

### Budget

Central government current revenue and expenditure (in 1m. kroner) for years ending 31 Dec.:

	2006	2007	2008	2009	2010
Revenue	1,100,076	1,146,478	1,310,399	1,150,070	1,217,295
Expenditure	699,677	734,785	798,146	873,414	906,804

The standard rate of VAT is 25.0% (reduced rates of 15% and 8%).

### Performance

Real GDP growth rates (based on OECD statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.0%	1.5%	1.0%	3.9%	2.7%	2.3%	2.7%	0.7%	-1.7%	0.3%

Major oil discoveries on the Norwegian continental shelf coincided with the 1974 and 1979 oil shocks, resulting in a pronounced upswing in the mainland economy which lasted until the 1986 oil price collapse. Norway only began to recover from the subsequent slump in the economy in 1993. The strong performance of the Norwegian economy in 1993–98 lifted mainland GDP by 20%, but there was a significant slowdown in 1998 when the oil price collapsed at a time when the labour market was overheated. Norway's total GDP in 2010 was US\$414.5bn.

### Banking and Finance

Norges Bank is the central bank and bank of issue. Supreme authority is vested in the Executive Board consisting of seven members appointed by the King and the Supervisory Council consisting of 15 members elected by the Storting. The *Governor* is Øystein Olsen. Total assets and liabilities at 30 Sept. 2011 were 3,375,882m. kroner.

Norway's largest commercial bank is DNB bank (with assets at 31 Dec. 2010 of 1,862bn. kroner); the second largest bank is Nordea Bank Norge. There were 16 commercial banks in 2007 (with total assets of 1,799bn. kroner) and 121 savings banks (with total assets of 1,993bn. kroner).

There is a stock exchange in Oslo.

## ENERGY AND NATURAL RESOURCES

### Environment

Norway's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 8.7 tonnes per capita. An *Environmental Performance Index* compiled in 2010 ranked Norway fifth in the world behind Iceland, Switzerland, Costa Rica and Sweden, with 81.1%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

In 2010 there were 33 national parks (total area, 2,996,032 ha.), 2,010 nature reserves (495,771 ha.), 195 landscape protected areas (1,628,844 ha.) and 474 other areas with protected flora and fauna (42,749 ha.).

Norway is one of the world leaders in recycling. In 2008, 52% of all household waste was sent for recovery.

### Electricity

Norway is the sixth largest producer of hydropower in the world and the largest in Europe. The potential total hydro-electric power was estimated at 205,937m. kWh in 2010. Installed electrical capacity in 2007 was 30.5m. kW, 95% of it hydro-electric. Production, 2007, was 137,164m. kWh (98% hydro-electric). Consumption per capita in 2008, at 27,023 kWh, was one of the highest in the world. In 1991 Norway became the first country in Europe to deregulate its energy market. Norway is a net importer of electricity.

### Oil and Gas

There are enormous oil reserves in the Norwegian continental shelf. In 1966 the first exploration well was drilled. Production of crude oil, 2008, 114.2m. tonnes. Norway ranks among the world's biggest oil exporters, with net oil exports of around 1.9m. bbls a day in 2010. It had proven reserves of 7.5bn. bbls in 2008. In March 1998 Norway announced that it would reduce its output for the year by 100,000 bbls per day as part of a plan to cut global crude production. In June 2001 the Norwegian government sold a 17.5% stake in Statoil, the last major state-owned oil company in western Europe. In Oct. 2007 Statoil and the oil and gas division of Norsk Hydro (a Norwegian energy and metals company) merged to form StatoilHydro, as a result creating the world's largest offshore oil and natural gas producer.

Output of natural gas, 2010, 106.4bn. cu. metres with proven reserves in 2008 of 2,910bn. cu. metres.

### Minerals

Production in 2008 unless otherwise indicated (in tonnes): coal (2009), 2,640,000; aluminium, 1,368,000; ilmenite concentrate, 915,000; iron ore, 477,000; zinc, 145,469; nickel, 88,741; refined copper (2007), 34,212.

### Agriculture

Norway is barren and mountainous. The arable area is in strips in valleys and around fjords and lakes.

In 2010 the agricultural area was 1,003,010 ha., of which 651,176 ha. were meadow and pasture, 145,818 ha. were sown to barley, 75,810 ha. to oats, 71,945 ha. to wheat and 13,207 ha. to potatoes. Production in 2010 (in 1,000 tonnes): hay, 2,659; barley, 541; wheat, 331; potatoes, 321; oats, 299.

Livestock, 2010 (provisional), 875,169 cattle (308,399 milch cows), 919,046 sheep (one year and over), 97,318 pigs for breeding, 36,935 dairy goats, 3,891,109 hens, 150,000 silver fox, 105,000 blue and silver blue fox, 650,000 mink and 251,400 tame reindeer.

### Forestry

In 2006 the total area under forests was 9.12m. ha., or 29.7% of the total land area. Productive forest area, 2010, approximately 6.77m. ha. About 80% of the productive area consists of conifers

and 20% of broadleaves. In 2008, 8.07m. cu. metres of roundwood were cut.

### Fisheries

The total number of fishermen in 2009 was 12,656, of whom 2,528 had another chief occupation. In 2009 the number of registered fishing vessels (all with motor) was 6,506.

The catch in 2009 totalled 2,537,134 tonnes, almost entirely from sea fishing. The catch of herring in 2009 totalled 1,077,250 tonnes, cod 243,659 tonnes and capelin 233,005 tonnes. 4,652 harp seals were caught in 2010. The catch of hooded seals was prohibited in 2007. Commercial whaling was prohibited in 1988, but recommenced in 1993: 484 whales were caught in 2008. Norway is the second largest exporter of fishery commodities, after China. In 2009 exports were valued at US\$7.07bn.

## INDUSTRY

The leading companies by market capitalization in Norway in March 2011 were: Statoil, US\$88.4bn.; Telenor Group, a telecommunications company (US\$27.3bn.); and DnB Nor (since renamed DNB), a financial services group (US\$25.0bn.).

Industry is chiefly based on raw materials. Paper and paper products, industrial chemicals and basic metals are important export manufactures. In the following table figures are given for industrial establishments in 2009. The values are given in 1m. kroner.

Industries	Establishments	Number of employees	Gross value of production	Value added (in market prices)
Mining and quarrying	745	4,680	11,463	4,032
Food products	2,269	44,207	131,352	23,700
Beverages and tobacco	106	4,487	16,405	9,932
Textiles, clothing and leather	1,338	4,772	6,101	2,183
Wood and wood products	1,930	14,248	21,557	6,429
Paper and paper products	93	5,475	14,470	2,415
Printing and reproduction of recorded media	1,414	7,461	10,851	4,079
Refined petroleum products, chemicals and pharmaceuticals	316	13,443	108,196	23,464
Rubber, plastic and mineral products	1,389	15,887	33,734	10,608
Basic metals	163	10,515	47,753	3,638
Fabricated metal products	2,609	25,225	44,124	15,314
Computer and electrical equipment	822	16,841	38,587	13,563
Machinery and equipment	1,501	20,872	78,404	23,620
Ships, boats, and oil platforms	534	22,761	65,130	16,353
Other transport equipment	182	4,085	6,482	2,157
Furniture and other manufacturing industries	2,056	11,335	13,553	5,371
Repair and installation of machinery and equipment	2,117	17,307	33,856	11,765
<b>Total</b>	<b>19,584</b>	<b>243,601</b>	<b>682,019</b>	<b>178,623</b>

### Labour

Norway has a tradition of centralized wage bargaining. Since the early 1960s the contract period has been for two years with intermediate bargaining after 12 months, to take into consideration such changes as the rate of inflation.

The labour force averaged 2,602,000 in 2010 (1,224,000 females). The total number of employed persons in 2010 averaged

2,508,000 (1,187,000 females), of whom 1,835,000 were in full-time employment, 667,000 in part-time employment and 6,000 working unspecified hours. Distribution of employed persons by occupation in 2007 showed 492,700 in health and social work; 364,000 in trade; 300,200 in business services; 286,200 in manufacturing; 185,500 in education; 184,200 in construction; 167,300 in transport; 156,600 in public administration and defence; 78,800 in hotels and restaurants; 60,100 in agriculture.

The unemployment rate in Oct. 2011 was 3.3% (3.5% in 2010 as a whole).

There were 12 work stoppages in 2010 (two in 2009): 500,009 working days were lost (180 in 2009).

## INTERNATIONAL TRADE

### Imports and Exports

Total imports and exports in calendar years (in 1m. kroner):

	2006	2007	2008	2009	2010
Imports	411,755	468,918	504,481	430,363	466,810
Exports	782,943	795,366	953,154	717,965	792,575

Norway's trade surplus was 325,765m. kroner in 2010. Major import suppliers in 2010 (value in 1m. kroner): Sweden, 65,603.1; Germany, 57,461.5; China, 39,614.9; Denmark, 29,018.6; UK, 27,460.5; USA, 25,324.6. Imports from economic areas: EU, 295,667.6; Nordic countries, 108,068.6; OECD, 360,693.1.

Major export markets in 2010 (value in 1m. kroner): UK, 213,981.8; Netherlands, 94,720.9; Germany, 89,725.8; Sweden, 55,315.6; France, 50,532.8; USA, 39,368.0. Exports to economic areas: EU, 639,798.7; Nordic countries, 93,203.0; OECD, 721,729.5.

Principal imports in 2010 (in 1m. kroner): motor vehicles, 43,800.5 (including passenger cars and station wagons, 26,205.3); transport equipment excluding motor vehicles, 32,708.0; petroleum, petroleum products and related materials, 23,151.6; electrical machinery, apparatus and appliances, 22,784.0; metalliferous ores and metal scrap, 22,288.8; general industrial machinery and equipment, 21,925.9.

Principal exports in 2010 (in 1m. kroner): petroleum, petroleum products and related materials, 315,259.3 (including crude petroleum, 283,337.2); natural and manufactured gas, 188,010.4 (including natural gas, 163,970.3); fish, crustaceans and molluscs, and preparations thereof, 52,307.6; non-ferrous metals, 44,083.6 (including aluminium, 26,493.6); general industrial machinery and equipment, 18,423.9; chemical materials and products, 17,992.3.

## COMMUNICATIONS

### Roads

In Jan. 2011 the length of public roads (including roads in towns) totalled 93,509 km. Total road length in Jan. 2011 included: national roads, 10,496 km; provincial roads, 44,281 km; local roads, 38,732 km. Number of registered motor vehicles, 2010, included: 2,308,548 passenger cars (including station wagons and ambulances), 397,279 vans, 254,674 tractors and special purpose vehicles, 168,904 mopeds, 146,592 motorcycles, 81,330 goods vehicles (including lorries), 48,432 combined vehicles and 20,348 buses. In 2010, 9,130 injuries were sustained in road accidents, with 208 fatalities. Norway has one of the lowest death rates in road accidents of any industrialized country, at 4.3 deaths per 100,000 people in 2010.

### Rail

The length of state railways in 2010 was 4,169 km (2,566 km electrified). In 2009 passenger-km travelled came to 2,669m. and freight tonne-km to 2,804m. Sales and other operating income totalled 11,179m. kroner in 2010.

There is a metro (104 km) and a tram network (146 km) in Oslo.

## Civil Aviation

The main international airports are at Oslo (Gardermoen), Bergen (Flesland), Stavanger (Sola), Sandefjord (Torp) and Moss (Rygge). Norway's largest airline is SAS Norge, a wholly-owned subsidiary of the Scandinavian Airlines System (SAS) Group. It was established in 2004 as SAS Braathens through the merger of the Norwegian part of SAS and Braathens, and was renamed SAS Norge in 2007. SAS Norge carries around 10m. passengers a year to 55 destinations. The second largest airline is the low-cost carrier Norwegian.

In 2010 Oslo (Gardermoen) handled 19,140,384 passengers (10,123,605 on international flights). Bergen is the second busiest airport for passenger traffic, with 5,189,714 passengers in 2010 (3,604,882 on domestic flights).

## Shipping

The Norwegian International Ship Register was set up in 1987. In 2010, 525 ships were registered (400 Norwegian) totalling 13,792,000 GT. 218 tankers accounted for 6,948,000 GT. There were also 882 vessels totalling 1,917,000 GT on the Norwegian Ordinary Register. These figures do not include fishing boats, tugs, salvage vessels, icebreakers and similar special types of vessels. In Jan. 2011 Norway's merchant fleet represented 3.4% of total world tonnage. In 2009, 41m. passengers travelled on internal ferries. The warm Gulf Stream ensures ice-free harbours throughout the year.

## Telecommunications

At 31 Dec. 2010 there were 1,648,927 main (fixed) telephone lines and 5,648,673 mobile phone subscribers (1,148.0 per 1,000 persons). There were 2.9m. PCs in 2006 and 3.9m. internet users in 2008. Since 2000 the government has been reducing its interest in Telenor, the country's largest telecommunications operator, and in March 2004 lowered its stake to 54.0%.

## SOCIAL INSTITUTIONS

### Justice

The judicature is common to civil and criminal cases; the same professional judges preside over both. These judges are state officials. The participation of lay judges and jurors, both summoned for the individual case, varies according to the kind of court and kind of case.

The 96 city or district courts of first instance are in criminal cases composed of one professional judge and two lay judges, chosen by ballot from a panel elected by the local authority. In civil cases two lay judges may participate. These courts are competent in all cases except criminal cases where the maximum penalty exceeds six years imprisonment. In every community there is a Conciliation Board composed of three lay persons elected by the district council. A civil lawsuit usually begins with mediation by the Board which can pronounce judgement in certain cases.

The five high courts, or courts of second instance, are composed of three professional judges. Additionally, in civil cases two or four lay judges may be summoned. In serious criminal cases, which are brought before high courts in the first instance, a jury of ten lay persons is summoned to determine whether the defendant is guilty according to the charge. In less serious criminal cases the court is composed of two professional and three lay judges. In civil cases, the court of second instance is an ordinary court of appeal. In criminal cases in which the lower court does not have judicial authority, it is itself the court of first instance. In other criminal cases it is an appeal court as far as the appeal is based on an attack against the lower court's assessment of the facts when determining the guilt of the defendant. An appeal based on any other alleged mistakes is brought directly before the Supreme Court.

The Supreme Court (*Høyesterett*) is the court of last resort. There are 18 Supreme Court judges. Each individual case is heard

by five judges. Some major cases are determined in plenary session. The Supreme Court may in general examine every aspect of the case and the handling of it by the lower courts. However, in criminal cases the Court may not overrule the lower court's assessment of the facts as far as the guilt of the defendant is concerned.

The Court of Impeachment (*Riksretten*) is composed of five judges of the Supreme Court and ten members of Parliament.

All serious offences are prosecuted by the State. The Public Prosecution Authority consists of the Attorney General, 18 district attorneys and legally qualified officers of the ordinary police force. Counsel for the defence is in general provided for by the State.

The population in penal institutions in Aug. 2008 was 3,276 (69 per 100,000 of national population).

### Education

Free compulsory schooling in primary and lower secondary schools was extended to 10 years from 9, and the starting age lowered to 6 from 7, in July 1997. All young people between the ages of 16 and 19 have the statutory right to three years of upper secondary education. In 2010 there were 6,579 kindergartens (children up to six years old) with 277,139 children and 87,401 staff. There were 614,020 pupils at primary and lower secondary schools in 2010; 228,170 pupils at upper secondary schools; and 20,658 students at folk high schools and vocational schools.

There are eight universities: Oslo (founded 1811), with 27,341 students in 2007; Bergen (1948), with 14,057 students; Tromsø (1972), with 5,424 students; the Norwegian University of Science and Technology (1996, formerly the University of Trondheim and the Norwegian Institute of Technology), with 19,351 students; Stavanger (2005, formerly Stavanger University College), with 8,050 students; Norwegian University of Life Sciences (1859, university since 2005—formerly the Agricultural University of Norway), with 2,817 students; Agder (2007, formerly Agder University College), with 7,801 students; and Nordland (2011, formerly Bodø University College), with 5,700 students in 2011. There are also nine specialized university institutions, 21 state university colleges and a number of private colleges. In 2010 the universities had 93,768 students and the state university colleges 89,572 students. The University of Tromsø is responsible for Sami language and studies.

In 2006 public expenditure on education came to 6.6% of GNI and 16.2% of total government spending. The adult literacy rate is at least 99%.

### Health

The health care system, which is predominantly publicly financed (mainly by a national insurance tax), is run on both county and municipal levels. Persons who fall ill are guaranteed medical treatment, and health services are distributed according to need. In Aug. 2008 there were 20,035 active physicians in Norway. On 31 Dec. 2009 there were 15,205 hospital beds (excluding those in psychiatric institutions). In 2007 Norway spent 8.9% of its GDP on health. In 2010, 19% of men and 19% of women aged 16–74 smoked on a daily basis.

### Welfare

Expenditure on social assistance in 2009 totalled 4,642m. kroner. On 31 Dec. 2010 there were 663,799 old age pensioners (377,170 women) and 301,088 disability pensioners (170,959 women). Maternity leave is either for 44 weeks on 100% of previous salary or 54 weeks on 80% of previous salary; unused portions may pass to the father. In Dec. 2010, 33,433 children aged one to three received cash benefit (27% of all children between one and three years of age).

### RELIGION

There is freedom of religion, the Church of Norway (Evangelical Lutheran), however, being the national church, endowed by the State. Its clergy are nominated by the King. Ecclesiastically

Norway is divided into 11 dioceses, 100 deaneries and 1,298 parishes. About 80% of Norwegians belong to the Church of Norway (which had 3,848,841 members in 2009) and approximately 68% of infants were baptised in the Church in 2009. There were 431,287 members of registered and unregistered religious and philosophical communities outside the Church of Norway in 2009, subsidized by central government and local authorities, including 234,772 Christians and 92,744 Muslims. The Roman Catholics are under a Bishop at Oslo, and Prelates at Tromsø and Trondheim.

### CULTURE

#### World Heritage Sites

Norway's UNESCO heritage sites (with year listed) are: the 12–13th century wooden church in Sogn og Fjordane on the west coast, the Urnes Stave Church (1979), a testimony to the city's key role in the Hanseatic League trading route between the 14–16th centuries; the 58 wooden buildings in Bergen's wharf of Bryggen (1979); the wooden houses of the copper mining village of Røros (1980), active between the 17–20th centuries; the pre-historic Rock Drawings of Alta (1995) in the Alta Fjord, near the Arctic Circle, dating from 4200 to 500 BC; Vegaøyen—the Vega Archipelago (2004), a cluster of dozens of islands centred on Vega, just south of the Arctic Circle; the West Norwegian Fjords—Geirangerfjord and Naerøyfjord (2005); and the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

#### Press

There were 74 paid-for daily newspapers with a combined average net circulation of 2.19m. in 2008, and in 2007 there were 151 non-dailies with a circulation of 623,000. Norway has among the highest circulation rates of daily newspapers in the world, at 580 per 1,000 adult inhabitants in 2007. In 2007 a total of 7,074 book titles were published.

#### Tourism

In 2007 there were 3,260,000 foreign holiday and leisure visitors (excluding day-visitors) who stayed an average of 7.4 nights each, totalling 24,252,000 nights. The main countries of origin were Sweden (761,000), Germany (548,000), Denmark (431,000) and the UK (246,000). In 2010 there were 1,128 hotels and 782 camping sites. Spending by foreign tourists totalled 30.8bn. kroner in 2007.

#### Festivals

The Bergen International Festival, Norway's oldest festival, is held annually in May/June and includes music, dance and theatre. The biennial Ibsen Festival (theatre) is held in Oslo in Aug./Sept. in even-numbered years. CODA (the Oslo International Dance Festival) runs for three weeks every Sept./Oct.

### DIPLOMATIC REPRESENTATIVES

Of Norway in the United Kingdom (25 Belgrave Sq., London, SW1X 8QD)

*Ambassador:* Kim Traavik.

Of the United Kingdom in Norway (Thomas Heftyesgate 8, 0264 Oslo)

*Ambassador:* Jane Owen.

Of Norway in the USA (2720 34th St., NW, Washington, D.C., 20008)

*Ambassador:* Wegger Christian Strommen.

Of the USA in Norway (Henrik Ibsens Gate 48, 0244 Oslo)

*Ambassador:* Barry B. White.

Of Norway to the United Nations

*Ambassador:* Morten Wetland.

Of Norway to the European Union  
Ambassador: Atle Leikvoll.

## Svalbard

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. Total area, 61,022 sq. km (23,561 sq. miles). The main islands are Spitsbergen, Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land and Kvitøya. The Arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century whale-hunting gave rise to rival Dutch, British and Danish-Norwegian claims to sovereignty; but when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its significance. It was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Total population on 1 Jan. 2011 was 2,394, of whom 2,017 lived in the two Norwegian settlements, 370 in the Russian settlement and seven in the Polish settlement. Coal is the principal product. There are two Norwegian and two Russian mining camps. In 2009, 2.6m. tonnes of coal were produced from Norwegian mines.

In 2008, 69% of households on Svalbard had one or more snow scooters but only 49% of households had a car. There are research and radio stations, and an airport near Longyearbyen (Svalbard Lufthavn) opened in 1975.

## Jan Mayen

This bleak, desolate and mountainous island of volcanic origin and partly covered by glaciers is situated at 71° N. lat. and 8° 30' W. long., 300 miles north-northeast of Iceland. The total area is 377 sq. km (146 sq. miles). Beerenberg, its highest peak, reaches

a height of 2,277 metres. Volcanic activity, which had been dormant, reactivated in Sept. 1970.

There exist several unverified and inconclusive reports of the island's discovery. Its present name derives from the Dutch whaling captain Jan Jacobsz May, who mapped the island in 1614. Jan Mayen was subsequently established as a whaling base for the Dutch Noordsche Compagnie. The island was abandoned in 1638 owing to the near extinction of the local whale population, and remained uninhabited, though occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated into the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959) and a CONSOL station (1968) have been established.

---

## Bouvet Island

### Bouvetøya

This uninhabited volcanic island, mostly covered by glaciers and situated at 54° 25' S. lat. and 3° 21' E. long., was discovered in 1739 by a French naval officer, Jean Baptiste Loziert Bouvet, but no flag was hoisted until, in 1825, Capt. Norris raised the Union Jack. In 1928 Great Britain waived its claim to the island in favour of Norway, which in Dec. 1927 had occupied it. A law of 27 Feb. 1930 declared Bouvetøya a Norwegian dependency. The area is 49 sq. km (19 sq. miles). Since 1977 Norway has had an automatic meteorological station on the island.

---

## Peter I Island

### Peter I Øy

This uninhabited island, situated at 68° 48' S. lat. and 90° 35' W. long., was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated as a dependency. The area is 156 sq. km (60 sq. miles).

---

## Queen Maud Land

### Dronning Maud Land

On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W. and 45° E.) under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. In 1957 it was given the status of a dependency.

# OMAN

Saltanat 'Uman  
(Sultanate of Oman)

*Capital:* Muscat

*Population projection, 2015:* 3.06m.

*GNI per capita, 2011:* (PPP\$) 22,841

*HDI/world rank:* 0.705/89

## KEY HISTORICAL EVENTS

The ancestors of present day Oman are believed to have arrived in two waves of migration, the first from Yemen and the second from northern Arabia. In the 9th century maritime trade flourished and Sohar became the greatest sea port in the Islamic world. In the early 16th century the Portuguese occupied Muscat. The Ya'aruba dynasty introduced a period of renaissance in Omani fortunes both at home and abroad, uniting the country and bringing prosperity; but, on the death in 1718 of Sultan bin Saif II, civil war broke out over the election of his successor. Persian troops occupied Muttrah and Muscat but failed to take Sohar which was defended by Ahmad bin Said, who expelled the Persians from Oman after the civil war had ended. In 1744 the Al bu Said family assumed power and has ruled to the present day. Oman remained largely isolated from the rest of the world until 1970 when Said bin Taimur was deposed by his son Qaboos in a bloodless coup.

## TERRITORY AND POPULATION

Situated at the southeast corner of the Arabian peninsula, Oman is bounded in the northeast by the Gulf of Oman and southeast by the Arabian Sea, southwest by Yemen and northwest by Saudi Arabia and the United Arab Emirates. There is an enclave at the

northern tip of the Musandam Peninsula. An agreement of April 1992 completed the demarcation of the border with Yemen, and an agreement of March 1990 finalized the border with Saudi Arabia.

With a coastline of 1,700 sq. km from the Strait of Hormuz in the north to the borders of the Republic of Yemen, the Sultanate is strategically located overlooking ancient maritime trade routes linking the Far East and Africa with the Mediterranean.

The Sultanate of Oman occupies a total area of 309,500 sq. km and includes different terrains that vary from plain to highlands and mountains. The coastal plain overlooking the Gulf of Oman and the Arabian Sea forms the most important and fertile plain in Oman.

The **Kuria Muria** islands were ceded to the UK in 1854 by the Sultan of Muscat and Oman. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman, in accordance with the wishes of the population. They are now known as the **Halaniyat Islands**.

Population at the census of Dec. 2010, 2,773,479 (1,612,411 males); density 9.0 per sq. km. The population comprised 1,957,336 Omanis and 816,143 expatriates.

The UN gives a projected population for 2015 of 3.06m.

In 2005, 71.5% of the population lived in urban areas. The census population of the capital, Muscat, in 2010 was 775,878.

The official language is Arabic; English is in commercial use.

## SOCIAL STATISTICS

2008 estimates: births, 61,000; deaths, 8,000. Estimated rates, 2008 (per 1,000 population): births, 22.0; deaths, 2.7. Expectation of life at birth, 2007, was 74.1 years for males and 77.3 years for females. Average annual population growth rate, 2000–08, 1.8%. Fertility rate, 2008, 3.0 births per woman, down from 7.8 in 1988.

Oman has achieved some of the most rapid advances ever recorded. Infant mortality declined from 200 per 1,000 live births in 1960 to ten per 1,000 live births in 2005, and as recently as 1970 life expectancy was just 40.

## CLIMATE

Oman has a desert climate, with exceptionally hot and humid months from April to Oct., when temperatures may reach 47°C. Light monsoon rains fall in the south from June to Sept., with highest amounts in the western highland region. Muscat, Jan. 28°C, July 46°C. Annual rainfall 101 mm. Salalah, Jan. 29°C, July 32°C. Annual rainfall 98 mm.

## CONSTITUTION AND GOVERNMENT

Oman is a hereditary absolute monarchy. The Sultan legislates by decree and appoints a Cabinet to assist him. The Basic Statute of the State was promulgated on 6 Nov. 1996.

The present Sultan is **Qaboos bin Said Al Said** (b. Nov. 1940).

In 1991 a new consultative assembly, the *Majlis al-Shura*, replaced the former State Consultative Chamber. The Majlis consists of 84 elected members. It debates domestic issues, but has no legislative or veto powers. There is also an upper house, the *Majlis al-Dawla*, which consists of 83 appointed members; it too has advisory powers only.

In Dec. 2002 the Sultan of Oman extended voting rights to all citizens over the age of 21.

## National Anthem

'Ya Rabbana elifidh lana jalalat al Saltan' ('O Lord, protect for us his majesty the Sultan'); words by Rashid bin Aziz, tune by Rodney Bashford.

## GOVERNMENT CHRONOLOGY

Sultans since 1932.

1932–70 Said bin Taimur Al Said  
1970– Qaboos bin Said Al Said

## RECENT ELECTIONS

The last elections to the *Majlis al-Shura* were on 15 Oct. 2011. No parties are allowed. 84 legislators were chosen for four-year terms from over 1,300 candidates, including 76 women (although only one woman was elected). Three activists who took part in the Feb. 2011 protests were elected.

## CURRENT GOVERNMENT

The Sultan is nominally Prime Minister and Minister of Foreign Affairs, Defence and Finance.

In March 2012 the other Ministers were:

*Special Representative of the Sultan:* Thuwayni bin Shihab Al Said.

*Deputy Prime Minister for Cabinet Affairs:* Fahd bin Mahmud Al Said.

*Minister Responsible for Defence Affairs:* Sayyid Badr bin Saud bin Harib Al Busaidi. *Minister Responsible for Foreign Affairs:* Yusuf bin Alawi bin Abdallah. *Minister Responsible for Financial Affairs:* Darwish bin Ismail bin Ali Al Balushi.

*Minister of Agriculture and Fisheries:* Fuad bin Jaffer bin Mohammed Al Sajwani. *Awqaf and Religious Affairs:* Abdallah bin Muhammad bin Abdallah Al Salimi. *Civil Service:* Shaikh Khalid bin Omar bin Saeed Al Marhoon. *Commerce and Industry:* Shaikh Saad bin Mohammed Al Saadi. *Education:* Madeeha bint Ahmed bin Nassir Al Shibaniyah. *Environment and Climate Change:* Mohammed Salem Al Tobi. *Health:* Ahmed bin Mohammed bin Obaid Al Sa'eedi. *Higher Education:* Rawya bint Saud Al Busaidi. *Housing:* Sheikh Saif bin Mohammed bin Saif Al Shabibi. *Information:* Hamad bin Mohammed bin Mohsin Al Rashdi. *Interior:* Sayyid Hamoud bin Faisal Al Busaidi. *Justice:* Muhammad bin Abdallah bin Zahir Al Hinai. *Legal Affairs:* Abdullah bin Mohammed bin Saeed Al Saeedi. *Manpower:* Abdullah bin Nasser Al Bakri. *National Heritage and Culture:* Sayyid Haitham bin Tariq Al Said. *Oil and Gas:* Muhammad bin Hamad bin Seif Al Rumhi. *Regional Municipalities and Water Resources:* Ahmed bin Abdullah bin Mohammed Al Sahi. *Social Development:* Shaikh Mohammed bin Saeed Al Kalbani. *Sport:* Ali bin Masoud bin Ali Al Sunaidi. *Tourism:* Shaikh Abdul Malik bin Abdallah Al Khalili. *Transportation and Communications:* Ahmed bin Mohammed bin Salem Al Futaisi. *Diwan of the Royal Court:* Sayyid Khalid bin Hilal bin Saud Al Busaidi. *Royal Office:* Lieut.-Gen. Sultan bin Mohammed Al Nu'amani. *Minister of State and Governor of the Capital:* Sayyid Soud bin Hilal Al Busaidi. *Minister of State and Governor of Dhofar:* Shaikh Mohammed bin Marhoon bin Ali Al Maamari. *Secretary General of the Council of Ministers:* Shaikh Fadhil bin Mohammed Al Harthi.

## CURRENT LEADERS

### Qaboos bin Said

*Position*  
Sultan

#### Introduction

Qaboos has been the Sultan since 23 July 1970 when he deposed his father, Said bin Taimur. He has carried out an ambitious social and economic modernization programme, opening Oman to the outside world through accession to the League of Arab States, Gulf Co-operation Council and United Nations and pursuing a moderate regional foreign policy while preserving a longstanding political and military relationship with the United Kingdom. He is nominally prime minister, minister of defence, minister of foreign affairs, minister of finance and chairman of the central bank.

#### Early Life

Born in Salalah on 18 Nov. 1940, Qaboos attended a private school in England from the age of 16. In 1960 he went to the British Royal Military Academy at Sandhurst as an officer cadet. He subsequently served in the British army on operational duty and then studied in England before returning to Oman.

#### Career in Office

Concerned at his father's reactionary regime and inability to channel Oman's new oil wealth into the country's development, Qaboos led a coup in 1970. He then undertook a range of infrastructure projects, including the construction of roads, hospitals, schools, communications systems, and industrial and port facilities. He also abrogated his father's more extreme moralistic laws. His regime has since remained stable despite periods of labour unrest, an alleged Islamist extremist plot in 2005 to overthrow the government and protests in early 2011 demanding employment and political reform against a background of wider disaffection spreading across the Arab world. Although the Sultan continues to legislate by decree, he is advised by an appointed Cabinet, an elected consultative assembly (*Majlis al-Shura*) and an appointed upper house (*Majlis al-Dawla*). In March 2004 Qaboos appointed Oman's first female Cabinet minister.

## DEFENCE

Military expenditure in 2008 totalled US\$4,671m. (US\$1,410 per capita), representing 8.5% of GDP—one of the highest percentages of any country in the world.

### Army

Strength (2007) 25,000. In addition there are 6,400 Royal Household troops. A paramilitary tribal home guard numbers 4,000.

### Navy

The main naval base is at Wudam. Naval personnel in 2007 totalled 4,200.

The wholly separate Royal Yacht Squadron consists of a yacht, a support ship with helicopter and troop-carrying capability, and a dhow.

### Air Force

The Air Force, formed in 1959, has 64 combat capable aircraft including F-16s, Jaguars and Hawks.

Personnel (2007) 5,000.

## ECONOMY

Oil and natural gas accounted for 48% of GDP in 2006; trade, restaurants and hotels 12%; manufacturing 10%; and services 8%.

### Overview

Oman is diversifying its economy by increasing investment in tourism, shipping and infrastructure. Nonetheless, crude oil still accounts for over two-thirds of total exports. Growth since 2006 has been strong, averaging over 6%, supported by high oil prices and accelerated growth of non-hydrocarbon sectors including petrochemicals, trade, and transport and communications. Higher global commodity prices, domestic demand growth (prompted by fiscal stimuli) and strong private sector credit growth have placed upward pressure on inflation. The economy continues to register strong fiscal and external surpluses that support infrastructure investment and consumption. The current account surplus narrowed in 2007 to 10% of GDP (down from 12% in 2006).

The Seventh Five-Year Development Plan from 2006 allowed for the expansion of liquefied natural gas output capacity, the development of gas-based and non-hydrocarbon industries such as manufacturing and tourism, and the creation of new employment opportunities for the rapidly growing population. Medium-term growth prospects are positive, so long as energy

prices remain favourable and progress is made in diversification. The banking sector reflects well-capitalized and profitable institutions. However, unemployment is a major concern, with authorities prioritizing education and training to raise the productivity of the labour force.

#### Currency

The unit of currency is the *Rial Omani* (OMR). It is divided into 1,000 *baiza*. The rial is pegged to the US dollar. In July 2005 foreign exchange reserves were US\$4,511m. and gold reserves totalled 1,000 troy oz (291,000 troy oz in April 2002). Total money supply was RO 1,067m. in May 2005. Inflation was 12.6% in 2008 and 3.5% in 2009.

In 2001 the six Gulf Arab states—Oman, along with Bahrain, Kuwait, Qatar, Saudi Arabia and the United Arab Emirates—signed an agreement to establish a single currency by 2010. However, Oman withdrew from the scheme in 2007.

#### Budget

In 2008 revenues were RO 7,829.4m. and expenditures RO 7,556.7m. Oil revenue accounted for 67.5% of revenues in 2008; current expenditure accounted for 58.5% of expenditures.

#### Performance

Real GDP growth was 1.1% in 2009 and 4.1% in 2010. Total GDP in 2009 was US\$48.9bn.

#### Banking and Finance

The bank of issue is the Central Bank of Oman, which commenced operations in 1975 (*President*, Hamood Sangour Al Zadjali). All banks must comply with BIS capital adequacy ratios and have a minimum capital of RO 20m. (minimum capital requirement for foreign banks established in Oman is RO 3m.). In 2002 there were 15 commercial banks (of which nine were foreign) and three specialized banks. The largest bank is BankMuscat SAOG, with assets of RO 1.3bn.

There is a stock exchange in Muscat, which is linked with those in Bahrain and Kuwait.

### ENERGY AND NATURAL RESOURCES

#### Environment

Oman's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 13.2 tonnes per capita.

#### Electricity

Installed capacity was 3.4m. kW in 2007. Production in 2007 was 14.44bn. kWh, with consumption per capita 5,264 kWh.

#### Oil and Gas

The economy is dominated by the oil industry. Oil in commercial quantities was discovered in 1964 and production began in 1967. Production in 2008 was 36.0m. tonnes. In 2007 exports of oil stood at 30.3m. tonnes. Total proven reserves in 2008 were 5.6bn. bbls. It was announced in Aug. 2000 that two new oilfields in the south of the country had been discovered, with a potential combined daily production capacity of 12,200 bbls. Earlier in 2000 oil began to be pumped from two further recently-discovered oilfields.

Gas is likely to become the second major source of income for the country. Oman's proven natural gas reserves were 980bn. cu. metres in 2008 (570bn. cu. metres in 1998). Natural gas production was 24.1bn. cu. metres in 2008 (5.2bn. cu. metres in 1998).

#### Water

Oman relies on a combination of aquifers and desalination plants for its water, augmented by a construction programme of some 60 recharge dams. Desalination plants at Ghubriah and Wadi Adai provide most of the water needs of the capital area. In 2005 water production was 32,951m. gallons.

#### Minerals

Production in 2009 (in 1,000 tonnes): sand and gravel, 77,114; limestone, 7,948; chromite (2009), 636 (up from 19 in 2004); marble, 588; gypsum, 333; quartz, 198. The mountains of Oman are rich in mineral deposits; these include chromite, coal, asbestos, manganese, gypsum, limestone and marble.

#### Agriculture

Agriculture and fisheries are the traditional occupations of Omanis and remain important to the people and economy of Oman to this day. The country now produces a wide variety of fresh fruit, vegetables and field crops. The country is rapidly moving towards its goal of self-sufficiency in agriculture with the total area under cultivation standing at over 70,000 ha. and total output more than 1m. tonnes. This has not been achieved without effort. In a country where water is a scarce commodity it has meant educating farmers on efficient methods of irrigation and building recharge dams to make the most of infrequent rainfall. In 2002 there were an estimated 38,000 ha. of arable land and 43,000 ha. of permanent crops. Approximately 62,000 ha. were irrigated in 2002. In 2002, 35.2% of the economically active population were engaged in agriculture.

The coastal plain (Batinah) northwest of Muscat is fertile, as are the Dhofar highlands in the south. In the valleys of the interior, as well as on the Batinah coastal plain, date cultivation has reached a high level, and there are possibilities of agricultural development. Agricultural products, 2004 estimates (in 1,000 tonnes): dates, 239; tomatoes, 43; bananas, 33; watermelons, 27. Vegetable and fruit production are also important, and livestock are raised in the south where there are monsoon rains. Camels (125,000 in 2004) are bred by the inland tribes. Other livestock, 2004: sheep, 355,000; cattle, 315,000; goats, 1m.; chickens, 3.4m.

#### Fisheries

The catch was 150,571 tonnes in 2005, exclusively sea fish. More than 80% is taken by some 85,000 self-employed fishermen.

### INDUSTRY

Apart from oil production, copper smelting and cement production, there are light industries, mainly food processing and chemical products. The government gives priority to import substitute industries.

#### Labour

Males constituted 83.9% of the economically active population in 2000. In 2003 there were 482,632 employees in the private sector and 123,045 persons in government service. The employment of foreign labour is being discouraged following 'Omanization' regulations of 1994. More than a quarter of the total population are foreign workers. Following the unrest of early 2011 the private sector monthly minimum wage for national workers was increased in Feb. 2011 from RO 140 to RO 200. There is no minimum wage for foreign workers.

### INTERNATIONAL TRADE

Total foreign debt was US\$3,472m. in 2005.

Oman, along with Bahrain, Kuwait, Qatar, Saudi Arabia and the United Arab Emirates entered into a customs union in Jan. 2003.

#### Imports and Exports

Imports and exports in US\$1m.:

	2003	2004	2005	2006	2007
Imports c.i.f.	6,801	8,796	8,970	11,038	16,025
Exports f.o.b.	12,196	13,381	18,692	21,586	24,692

Main import suppliers, 2006: United Arab Emirates, 25.5%; Japan, 17.1%; India, 5.2%; USA, 5.2%. In 2004 crude oil exports made up approximately 68% of total exports. Main export

markets in 2006 were: China, 26.5%; South Korea, 16.0%; Thailand, 12.4%; United Arab Emirates, 9.5%.

## COMMUNICATIONS

### Roads

A network of adequate graded roads links all the main sectors of population, and only a few mountain villages are not accessible by motor vehicles. In 2005 there were about 42,300 km of roads (16,500 km paved) including 953 km of dual carriageway. In 2007 there were 453,400 passenger cars in use (174 per 1,000 inhabitants), 113,300 vans and lorries, and 26,400 buses and coaches. In 2007 there were 8,816 road accidents and 798 deaths. With 30.7 deaths per 100,000 population in 2007, Oman has among the highest death rates in road accidents of any country.

### Civil Aviation

The national airline is Oman Air, which in 2007 had 15 aircraft and served 26 destinations. Oman formerly had a 50% share in Gulf Air with Bahrain, but withdrew in May 2007. In 2002 Seeb International Airport (Muscat) handled 2,314,102 passengers and 50,008 tonnes of freight.

There are plans to expand Oman's two major airports, Seeb International and Salalah (mainly domestic flights).

### Shipping

In Mutrah a deep-water port (named Mina Qaboos) was completed in 1974. In 2008 it handled 6.3m. tonnes of foreign cargo. In Jan. 2009 there were seven ships of 300 GT or over registered, totalling 17,000 GT.

### Telecommunications

In 2008 there were 274,200 main (fixed) telephone lines in Oman; mobile phone subscribers numbered 3,219,300 in 2008 (115.6 per 100 persons). There were 180,000 PCs in use in 2006 and an estimated 557,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The population in penal institutions in 2000 was 2,020 (81 per 100,000 of national population). The death penalty is in force, but has not been used since 2001.

### Education

Adult literacy was 87% in 2008. In 2003–04 there were 1,022 schools, up from just three when Qaboos bin Said became Sultan in 1970. The total number of pupils in state education in 2003–04 was 576,472 (139,082 in basic education and 437,390 in general education) with 32,345 teachers (13,939 in basic education and 18,406 in general education). Oman's first university, the Sultan Qaboos University, opened in 1986 and in 2003–04 there were 12,437 students. It remains the only public university although a number of private universities and colleges have opened in the meantime.

In 2006 public expenditure on education came to 4.2% of GNI and 31.1% of total government spending (the highest percentage of any country).

### Health

In 2003 there were 49 hospitals with 4,501 beds. There were also 129 health centres. In 2002 there were 3,478 doctors, 297 dentists, 594 pharmacists and 8,004 nursing staff.

## RELIGION

In 2001, 83.5% of the population were Muslim. There were also Hindu and Christian minorities.

## CULTURE

### World Heritage Sites

The four sites on the UNESCO World Heritage List under Omani jurisdiction are (with the year entered on the list): Bahla Fort (1987); the archaeological sites of Bat, Al-Khutm and Al-Ayn, a collection of settlements and necropolises of the 3rd millennium BC (1988); the Frankincense Trail, a group of archaeological sites representing the production and distribution of frankincense (2000); and the five ancient Aflaj irrigation systems (2006). A fifth site, the Arabian Oryx Sanctuary, was removed from the list after the Omani government decided to reduce the size of the protected area by 90%.

### Press

In 2006 there were six daily newspapers with a combined circulation of 165,000.

### Tourism

Non-resident tourists staying at hotels and similar establishments numbered 1,144,000 in 2007; spending by tourists in 2007 totalled US\$902m. In 2005 there were 153 hotels with a total of over 7,200 rooms.

### Festivals

National Day (18 Nov.); Spring Festival in Salalah (July–Aug.); Ramadan (July–Aug. in both 2012 and 2013).

## DIPLOMATIC REPRESENTATIVES

Of Oman in the United Kingdom (167 Queen's Gate, London, SW7 5HE)

*Ambassador:* Sheikh Abdulaziz bin Abdullah bin Zahir al-Hinai.

Of the United Kingdom in Oman (PO Box 185, Mina Al Fahal, Postal Code 116, Muscat)

*Ambassador:* Jamie Bowden.

Of Oman in the USA (2535 Belmont Rd, NW, Washington, D.C., 20008)

*Ambassador:* Hunaina Sultan Ahmed Al-Mughairi.

Of the USA in Oman (PO Box 202, Medinat Qaboos, Muscat)

*Ambassador:* Richard J. Schmierer.

Of Oman to the United Nations

*Ambassador:* Lyutha Al-Mughairy.

Of Oman to the European Union

*Ambassador:* Sheikh Ghazi Bin Said Al-Bahar Al-Rawas.

## KEY HISTORICAL EVENTS

The Neolithic settlement of Mehrgarh in Balochistan, western Pakistan dates from around 7000 BC. Continuously occupied for over 4,000 years, it was a precursor to the Indus Valley civilization, which flourished between 3300 and 1700 BC. Indus Valley settlements spread across much of present-day Pakistan and northwest India, from the Arabian Sea to the foothills of the Himalayas, centring on the cities of Mohenjo-Daro and Harappa. The civilization's decline coincided with the arrival of Indo-European-speaking tribes, including the Aryans, from central Asia. Taxila in northern Pakistan became a centre for the development of Vedic/Hindu culture from the 6th century BC.

Under the influence of the Persian Achaemenid Empire from around 550 BC, most of present-day Pakistan was ruled by Darius the Great from Persepolis after 515 BC. Alexander the Great, conqueror of the Persian Empire, invaded northern Pakistan in 326 BC but was superseded by the Maurya dynasty from around 300 BC. Its emperor, Ashoka the Great, ruled over central Asia and much of the Indian sub-continent between 273 and 232 BC. The Indus Valley came under Greco-Bactrian control from around 180 BC, bringing about a fusion of classical Greek culture and Buddhism. Invasions by Scythians and Parthians were followed by the arrival of the Yuechi from the steppes of western China. They established the Buddhist Kushan dynasty in the 1st century AD. Centred on Peshawar, it linked the Silk Road with the Arabian Sea and the Ganges Valley.

Arab settlers introduced Islam early in the 8th century. In 712 Muhammad ibn Qasim conquered Sindh province and incorporated it into the Umayyad Caliphate, ruled from Baghdad. Over the next three centuries the southern provinces of Multan and Balochistan were also absorbed. In 1005 Peshawar was conquered by the Turkic-Afghan warlord, Sultan Mahmud of Ghazni, who went on to take Punjab, Kashmir and Balochistan.

The Ghaznavid Dynasty made Lahore one of its key cities—the easternmost outpost of Islam—though it was destroyed during Genghis Khan's Mongol invasion of 1219.

In the late 13th century northern and eastern Pakistan came under the influence of Islamic sultanates. Centred on Delhi, they gradually gained control of most of the Indian subcontinent. Timur-i Lang seized Persia, Afghanistan and western Pakistan in the 1380s, absorbing them into a vast central Asian empire. Babur, the founder of the Moghul dynasty in the early 16th century, initially made Kabul his capital, before power transferred to Lahore, Delhi and Agra. While most of the Indian subcontinent remained part of a united Moghul empire between the 16th and 19th centuries, the northwestern fringe was attacked by Persians in the 1730s and Sindh and Punjab were incorporated into Ahmad Shah Durrani's Afghan state from 1747.

The British, who established a protectorate in Bengal in 1757 and subsequently controlled much of the sub-continent, attempted to secure the anarchic northwest against Russian expansion in the first Afghan War (1838–42). Although Sindh and the Punjab were absorbed into British India in the 1840s, Balochistan and Afghanistan remained independent. Following Britain's failure to win these mountainous regions in the second Afghan War (1878–80), the North-West Frontier Province was created in 1901 as a semi-autonomous region.

Hindu-Muslim tensions escalated and in the 1930s the poet Muhammad Iqbal proposed a separate Muslim nation, an idea taken up by Muhammad Ali Jinnah, leader of the Muslim League. Following the League's victories in most of the majority-Muslim constituencies in the 1946 elections, the British agreed to the formation of East and West Pakistan under the 1947 Independence of India Act. Jinnah became West Pakistan's governor-general in the new capital, Karachi.

The partition of India saw 14m. people leaving their homes, with violence claiming 500,000 lives on both sides of the border. The signing over to India of Kashmir in Oct. 1947 was disputed by Pakistan. War broke out until a UN-brokered ceasefire and temporary border was agreed in 1949. In 1951 Pakistan's first prime minister, Liaquat Ali Kahn, was assassinated. The popularity of the Muslim League declined and Pakistan became increasingly unstable.

1958 saw the first of several periods of martial law, followed by the rule of Field Marshal Mohammad Ayub Khan (until 1969) and Gen. Agha Mohammad Yahya Khan (until 1971). Discontent in East Pakistan with the federal government led to calls by the Awami League for full autonomy. Following East Pakistan's declaration of independence as Bangladesh in March 1971, West Pakistan sent in troops, sparking civil war. Hundreds of thousands died and 10m. refugees fled to India. The surrender of Pakistan's forces to the Indian army in Dhaka on 16 Dec. 1971 cleared the way to an independent Bangladesh.

A new constitution in 1973 provided for a federal parliamentary government with a president and prime minister. Zulfikar Ali Bhutto, representing the Pakistan People's Party (PPP), became premier. Considered by traditionalists to be insufficiently Islamic, in July 1977 Gen. Mohammad Zia ul-Haq led an army coup against Ali Bhutto, who was hanged for conspiracy to murder. His daughter, Benazir, led the PPP to victory in the elections in 1988 but was dismissed on charges of corruption and incompetence in 1990. Reinstated as prime minister following elections in 1993, President Farooq Leghari overthrew her administration in 1996.

Indo-Pakistani relations have foundered over Kashmir. In May 1998 Pakistan carried out five nuclear tests in the deserts of Balochistan in response to India's tests earlier in the month. US President Bill Clinton invoked sanctions but Pakistan carried out

a sixth test. On 11 June, following India's example, Pakistan announced a unilateral moratorium on nuclear tests. On 12 Oct. 1999 Gen. Pervez Musharraf seized power in a coup, overthrowing the democratically-elected government of Nawaz Sharif after Sharif tried to dismiss Musharraf as army chief of staff. Sharif was convicted of corruption and sentenced to life imprisonment.

Negotiations with India over Kashmir began in July 1999. In May 2001 India ended its six-month long ceasefire but invited Pakistan for further talks, prompting hopes of avoiding more violence. Following the attacks on New York and Washington of 11 Sept. 2001 Pakistan found itself central to the war against terrorism. Neighbouring Afghanistan was believed to be sheltering Osama bin Laden and the USA persuaded Musharraf to allow its forces to use Pakistani air bases. In return the USA lifted its remaining sanctions. In Dec. 2001 suicide bombers attacked the Indian parliament. Although no-one claimed responsibility, the Indian authorities suspected Kashmiri separatists, heightening Indo-Pakistani tensions. Musharraf's subsequent crackdown on militants helped to reduce tension between the two countries.

An attack on an Indian army base in Indian-occupied Kashmir in May 2002, killing 31, was linked to terrorists infiltrating from Pakistan. Musharraf drew widespread criticism for failing to combat terrorism in the region. In Nov. 2003 Pakistan and India agreed to another ceasefire along Kashmir's Line of Control. Relations gradually improved and in April 2005 bus services resumed across the divided territory for the first time in 60 years.

In Oct. 2005 Pakistan-administered Kashmir was struck by an earthquake which killed 73,300 people and left 3m. homeless. In 2006 there was an upsurge in violence by tribal groups in Balochistan demanding greater autonomy. Bomb blasts rocked Karachi and Islamabad in early 2007 and 68 passengers were killed in an explosion on a train travelling between Lahore and New Delhi. Musharraf's decision to suspend the chief justice of the Supreme Court, Iftikhar Mohammad Chaudhry, for alleged abuse of power in March 2007 sparked riots in Karachi.

In July 2007 security forces stormed Islamabad's Red Mosque, considered to have close links with militant groups. At the end of a week-long siege, over 100 people were killed and 250 injured. In Oct. 2007 Musharraf won the presidential election, though the Supreme Court refused to confirm the result until it had ruled on Musharraf's eligibility to stand while still head of the army. The court dismissed challenges to the result the following month. Meanwhile, fighting intensified in Waziristan, a stronghold of Islamic militant groups.

The assassination of Benazir Bhutto in Dec. 2007 ahead of elections in Jan. 2008 threw the already fragile political climate into turmoil. The election was rescheduled for Feb. when the leading opposition parties, including Bhutto's, won a resounding victory against pro-Musharraf parties and formed a coalition government. Musharraf's presidency was severely weakened as a result and he eventually resigned in Aug. 2008. In Sept. 2008 Asif Ali Zardari was elected his successor. His term in office has seen continued fighting between government forces and Islamic militant groups linked with several high-profile attacks including the Mumbai bombings of Nov. 2008 and an assault on the visiting Sri Lankan cricket team in March 2009. In Oct. 2009 the military launched an offensive against Taliban forces in the South Waziristan region. Since then more than 500 civilians have been killed in terrorist attacks throughout the country.

## TERRITORY AND POPULATION

Pakistan is bounded in the west by Iran, northwest by Afghanistan, north by China, east by India and south by the Arabian Sea. The area (excluding the disputed area of Kashmir) is 796,100 sq. km (307,380 sq. miles), including 25,220 sq. km (9,740 sq. miles) of inland water; population (1998 census, excluding the autonomous states Azad-Kashmir and Gilgit-Baltistan), 132,352,279 (68,873,686 males). Estimate, 2010, 173.59m.; density, 225 per sq. km. In 2005, 65.1% lived in rural areas. There were

1.9m. refugees in 2010, mostly from Afghanistan, the highest number in any country and 19% of the global total.

The UN gives a projected population for 2015 of 189.65m.

The population of the principal cities is as follows:

1998 census					
Karachi	9,339,023	Multan	1,197,384	Peshawar	982,816

<sup>1</sup>Province—formerly known as North-West Frontier Province.

<sup>2</sup>Territory. <sup>3</sup>Province.

English, the official language, is used in business, higher education and in central government; Urdu is the national language and the *lingua franca*, although only spoken as a first language by about 8% of the population. Around 48% of the population speak Punjabi.

## SOCIAL STATISTICS

Estimates, 2008: births, 5,324,000; deaths, 1,224,000. Estimated birth rate in 2008 was 30.1 per 1,000 population; estimated death rate, 6.9. Infant mortality (per 1,000 live births), 80 (2005). Formal registration of marriages and divorces has not been required since 1992. Expectation of life in 2007 was 65.9 years for men and 66.5 years for women. Annual population growth rate, 2000–08, 2.2%. Fertility rate, 2008, 4.0 births per woman.

## CLIMATE

A weak form of tropical monsoon climate occurs over much of the country, with arid conditions in the north and west, where the wet season is only from Dec. to March. Elsewhere, rain comes mainly in the summer. Summer temperatures are high everywhere, but winters can be cold in the mountainous north. Islamabad, Jan. 50°F (10°C), July 90°F (32.2°C). Annual rainfall 36" (900 mm). Karachi, Jan. 61°F (16.1°C), July 86°F (30°C). Annual rainfall 8" (196 mm). Lahore, Jan. 53°F (11.7°C), July 89°F (31.7°C). Annual rainfall 18" (452 mm). Multan, Jan. 51°F (10.6°C), July 93°F (33.9°C). Annual rainfall 7" (170 mm). Quetta, Jan. 38°F (3.3°C), July 80°F (26.7°C). Annual rainfall 10" (239 mm).

## CONSTITUTION AND GOVERNMENT

Under the 1973 constitution, the *President* was elected for a five-year term by a college of parliamentary deputies, senators and members of the Provincial Assemblies. Parliament is bicameral, comprising a *Senate* of 100 members and a *National Assembly* of 342. In the *Senate*, each of the four provinces is allocated 14 seats, while the federally administered tribal areas and the federal capital are assigned eight and two seats respectively. In addition, each province is conferred four seats for technocrats and four for women. Two seats, one for technocrats and another for women, are reserved for the federal capital. The *National Assembly* is directly elected for five-year terms. 272 members are elected in

single-seat constituencies, there are ten seats for non-Muslim minorities and 60 seats for women.

Following the 1999 coup Gen. Musharraf announced that the Constitution was to be held 'in abeyance' and issued a 'Provisional Constitution Order No. 1' in its place. In Aug. 2002 he unilaterally amended the constitution to grant himself the right to dissolve parliament.

During the period of martial law from 1977-85 the Constitution was also in abeyance, but not abrogated. In 1985 it was amended to extend the powers of the President, including those of appointing and dismissing ministers and vetoing new legislation until 1990. Legislation of 1 April 1997 abolished the President's right to dissolve parliament, appoint provincial governors and nominate the heads of the armed services.

Gen. Pervez Musharraf, Chief of the Army Staff, assumed the responsibilities of the chief executive of the country following the removal of Prime Minister Nawaz Sharif on 12 Oct. 1999. He formed a National Security Council consisting of six members belonging to the armed forces and a number of civilians with expertise in various fields. A Federal Cabinet of Ministers was also installed working under the guidance of the National Security Council. Also formed was the National Reconstruction Bureau, a think tank providing institutional advice and input on economic, social and institutional matters. The administration declared that it intended to first restore economic order before holding general elections to install a civilian government. The Supreme Court of Pakistan allowed the administration a three-year period, which expired on 12 Oct. 2002, to accomplish this task. Elections were held on 10 Oct. 2002. On 30 April 2002 a referendum was held in which 97.7% voted in favour of extending Musharraf's rule by a further five years. Turnout was around 50%. He amended the constitution in Aug. 2002 to formally extend his mandate by five years. The constitution was further amended in Dec. 2003 to enhance Musharraf's power and allow a vote of confidence in his presidency.

In March 2007 Musharraf announced his intention to stand for a five-year presidential term. The Supreme Court rejected his candidacy while opposition parties challenged his constitutional right to hold the presidency and head the military. In Sept. 2007 the Supreme Court's earlier judgement was overturned and the following month Musharraf was granted a further term of office by the national parliament and provincial assemblies. However, the Supreme Court refused to sanction the appointment until the surrounding legal questions had been resolved. In Nov. 2007 Musharraf suspended the constitution and imposed martial law. Several prominent members of the judiciary and opposition leaders, including Benazir Bhutto and Imran Khan, were arrested or jailed. The Constitution was reinstated in Dec. but judicial freedom was severely compromised by the dismissal of senior court officials. Amendments were introduced to extend the military's power to try citizens and facilitate the arrest of political opponents. Following Musharraf's resignation in Aug. 2008, ousted Chief Justice Iftikhar Chaudry was reinstated in March 2009. The 2007 amendments to the constitution were subsequently revoked in July 2009 and in Aug. the Supreme Court ruled that Musharraf's actions had been illegal.

#### National Anthem

'Pak sarzamin shadbad' ('Blessed be the sacred land'); words by Abul Asr Hafeez Jaulandhari, tune by Ahmad G. Chaagla.

#### GOVERNMENT CHRONOLOGY

Heads of State since 1947. (ML = Muslim League; n/p = non partisan; PML-N = Pakistan Muslim League-Nawaz Sharif; PML-Q = Pakistan Muslim League (Quaid-e-Azam); PPP = Pakistan People's Party; RP = Republican Party)

2008	PML-Q	Mohammadmian Soomro (acting)
2008-	PPP	Asif Ali Zardari

#### RECENT ELECTIONS

Parliamentary elections were held on 18 Feb. 2008 having been delayed following the assassination of Benazir Bhutto, the leader of the Pakistan People's Party (PPP), in Dec. 2007. Turnout was 44.5%. The PPP gained 87 of the National Assembly's 272 elected seats and received 30.6% of votes cast; the Pakistan Muslim League-N (PML-N, led by ex-prime minister Nawaz Sharif) won 67 seats and received 19.6% of the vote; the pro-Musharraf Pakistan Muslim League (Quaid-e-Azam) (PML-Q) gained 42 seats and 23.0% of the vote; and the United National Movement (MQM) 19 seats with 7.4% of the vote. The remaining seats went to smaller parties and non-partisans. After the election, allocation of seats to women and minority representatives was carried out in accordance with the constitution resulting in the PPP having 121 seats, the PML-N 91 seats, the PML-Q 54 and the MQM 25. On 21 Feb. 2008 the PPP, the PML-N and the Awami National Party agreed to form a coalition government; the PPP's Yousaf Raza Gilani was elected prime minister on 24 March 2008.

In indirect elections held on 6 Sept. 2008 Asif Ali Zardari (PPP) was elected president by federal and provincial lawmakers, winning 481 votes against 153 for Saeeduz Zaman Siddique (PML-N) and 44 for Mushahid Hussain Syed (PML-Q).

#### CURRENT GOVERNMENT

*President:* Asif Ali Zardari; b. 1955 (Pakistan People's Party; since 9 Sept. 2008).

In March 2012 the government comprised:

*Prime Minister and Minister for Human Rights, and Information Technology and Telecommunication:* Yousaf Raza Gilani; b. 1952 (Pakistan People's Party; sworn in 25 March 2008).

*Senior Minister for Defence Production and Industries:* Chaudhary Pervaiz Elahi.

*Minister for Commerce:* Makhdoom Ameen Faheem. *Communications:* Arbab Alamgir Khan. *Defence:* Chaudhry Ahmed Mukhtar. *Finance, Revenue, Planning and Development, Economic Affairs and Statistics:* Abdul Hafeez Sheikh. *Foreign Affairs:* Hina Rabbani Khar. *Housing and Works:* Makhdoom Syed Faisal Saleh Hayat. *Human Resource Development:* Chaudhry Wajahat Hussain. *Information and Broadcasting:* Firdos Ashiq Awan. *Interior:* Rehman Malik. *Inter-provincial Co-ordination:* Mir Hazar Khan Bijarani. *Kashmir and Gilgit-Baltistan Affairs:* Mian Manzoor Ahmad Wattoo. *Law, Justice and Parliamentary Affairs:* Moula Bakhsh Chandio. *Narcotics Control:* Haji Khuda Bux Rajar. *National Heritage and Integration:* Samina Khalid Ghurki. *National Food Security and Research:* Israrullah Zehri. *Overseas Pakistanis:* Muhammad Farooq Sattar. *Petroleum and Natural Resources:* Asim Hussain. *Ports and Shipping:* Babar Khan Ghauri. *Postal Services:* Sardar Al-Haaj Mohammad Umar Gorage. *Privatization:* Ghous Bux Khan Maher. *Production:* Anwar Ali Cheema. *Professional and Technical Training:* Riaz Hussain Pirzada. *Railways:* Ghulam Ahmed Bilour. *Religious Affairs:* Syed Khursheed Shah. *Science and Technology:* Mir

Changez Khan Jamali. *States and Frontier Regions*: Shaukat Ullah. *Textile Industry*: Makhdoom Shahabuddin. *Water and Power*: Syed Naveed Omar.

*Office of the President*: <http://www.president.gov.pk>

## CURRENT LEADERS

### Asif Ali Zardari

#### *Position*

President

#### *Introduction*

Asif Ali Zardari became Pakistan's president in Sept. 2008 following the resignation of Pervez Musharraf. He has been co-chairman of the Pakistan's People's Party (PPP), the largest grouping in the National Assembly, since the assassination of his wife, Benazir Bhutto, in Dec. 2007. A controversial figure, he has struggled to maintain a stable coalition government.

#### *Early Life*

Born on 26 July 1955 in Nawabshah, Zardari was brought up and educated in Karachi. He established a career in business and property and in 1983 unsuccessfully contested local elections in Nawabshah. In 1987 Zardari married Benazir Bhutto, then leader-in-exile of the PPP in London. The following year Bhutto became prime minister when the PPP won the general election.

During Bhutto's first term of office Zardari prospered amid rumours of corruption. In 1990 Bhutto was ousted by President Ghulam Ishaq Khan, and Zardari was arrested and jailed on corruption and blackmail charges although never brought to trial. He claimed the action was politically motivated. While in prison Zardari was elected to the National Assembly and in 1993, when Bhutto won a second term as prime minister, the charges against him were dropped. He then served as minister for the environment from 1993–96 and as minister for investment from 1995–96.

In 1996 Bhutto was again removed from office and Zardari was arrested on charges of murder and corruption. He was detained for eight years, during which time he and Bhutto appealed against a Swiss court conviction for money laundering. With Bhutto in exile in Dubai, Zardari continued to deny all charges and claimed political persecution. In 2004 he was freed and the charges against him in Pakistan were dropped. From 2004–07 he lived primarily in the USA, where he received medical treatment for several conditions.

In Nov. 2007 President Musharraf introduced a measure to cancel criminal charges against National Assembly members, clearing the way for Zardari and Bhutto to return to Pakistan. Following Bhutto's assassination during a PPP rally on 27 Dec. 2007, Zardari assumed joint chairmanship of the party with his 19-year-old son, Bilawal. In Feb. 2008 the PPP won the general election in coalition with the Pakistan Muslim League-Nawaz Sharif (PML-N). Zardari and Sharif sought to establish a coalition government and made preparations to impeach Musharraf, who was refusing to relinquish power. Musharraf finally resigned on 18 Aug. 2008 and four days later the PPP nominated Zardari as their presidential candidate. However, on 25 Aug. Sharif took his party out of the coalition, protesting at the concentration of executive power in Zardari's hands and claiming that he had reneged on a promise to reinstate 60 Supreme Court judges. Zardari was elected president on 6 Sept. 2008.

#### *Career in Office*

Zardari's tenure has been marked by political tensions, both domestic and with neighbouring states. In March 2009 he defused mounting friction with the Pakistani judiciary and the PML-N by announcing the reinstatement of former chief justice Iftikhar Chaudhry—sacked by Musharraf in 2007 and since championed by Sharif—in response to widespread popular protests. Zardari

also pledged to reduce some of the powers invested in the presidency (under constitutional changes which were later approved by parliament in April 2010), and in Nov. 2009 relinquished his control of the country's nuclear weapons to the prime minister in an apparent effort to deflect growing opposition. This gesture, however, was overshadowed the following month as the Supreme Court quashed an earlier legal amnesty protecting Zardari and several political allies from corruption charges, prompting calls for his resignation. Prime Minister Gilani's failure to pursue further investigations into Zardari prompted the Court to charge the premier with contempt in Feb. 2012, potentially triggering further political turmoil.

Meanwhile, Zardari's attempt to improve relations with India suffered when militants involved in the Nov. 2008 terrorist attacks in Mumbai were found to have come from Pakistan. He has also faced an increasing domestic security threat from Islamic extremists, especially in the volatile northwest region of the country. In response to a series of attacks, government forces launched major military offensives against Taliban militants from April 2009 in the Swat valley and from Oct. in the tribal area of South Waziristan. However, suicide bombings by militants continued unabated in most of Pakistan's major cities through 2010, further undermining Zardari's political authority.

In July–Aug. 2010 Zardari was criticized for his government's inadequate response to a humanitarian crisis unleashed by unprecedented flooding that devastated huge areas of Pakistan. More than 1,600 people were confirmed dead and some 20m. were displaced by the deluge.

Relations with the USA became increasingly strained in 2010 and 2011. Cross-border US air strikes in anti-Taliban operations led Pakistan to temporarily suspend NATO's supply routes into Afghanistan in Sept. 2010 and again in Nov. 2011. Meanwhile, Osama bin Laden, founder of the al-Qaeda militant network, was killed by US special forces in Abbottabad in Pakistan in May 2011. The Pakistani security establishment's apparent ignorance about Bin Laden's presence in the city, and the US government's failure to notify the Pakistani authorities about its military intentions, caused further friction between the two uneasy allies.

Concurrently, there were increasing tensions between the Zardari government and Pakistan's powerful military leadership. In Dec. 2011 Zardari underwent hospital treatment in Dubai, triggering rumours of his resignation under coercion from the army, and in Jan. 2012 a scandal over a leaked memo alleging that senior government officials had sought US aid against a possible military coup further soured the political atmosphere.

## DEFENCE

A *Council for Defence and National Security* was set up in Jan. 1997, comprising the President, the Prime Minister, the Ministers of Defence, Foreign Affairs, Interior, Finance and the military chiefs of staff. The Council advised the government on the determination of national strategy and security priorities, but was disbanded in Feb. 1997. The Council was revived in Oct. 1999 following the change of government but was to have a wider scope and not restrict itself to defence matters.

Defence expenditure in 2008 totalled US\$4,442m. (US\$26 per capita), representing 3.0% of GDP. However, following the return of civilian government in March 2008, the 2008–09 defence budget was reduced. Expenditure is also increasingly targeted at developing counter-insurgency capabilities as a result of the threat from Taliban forces along the border with Afghanistan.

As at July 2010 Pakistan had 10,656 personnel serving in UN peacekeeping operations (the second largest contingent of any country, after Bangladesh).

#### *Nuclear Weapons*

Pakistan began a secret weapons programme in 1972 to reach parity with India, but was restricted for some years by US sanctions. The Stockholm International Peace Research Institute

estimates that Pakistan possesses 90–110 nuclear warheads. In May 1998 Pakistan carried out six nuclear tests in response to India's tests earlier in the month. Pakistan, known to have a nuclear weapons programme, has not signed the Comprehensive Nuclear-Test-Ban-Treaty, which is intended to bring about a ban on any nuclear explosions. According to *Deadly Arsenals*, published by the Carnegie Endowment for International Peace, Pakistan has both chemical and biological weapon research programmes.

### Army

Strength (2007) 550,000. There were also about 304,000 personnel in paramilitary units: National Guard, Frontier Corps and Pakistan Rangers.

Most armoured equipment is of Chinese origin including over 2,450 main battle tanks. There is an air wing with fixed-wing aircraft and 26 attack helicopters.

### Navy

The combatant fleet includes five French-built diesel submarines, three midget submarines for swimmer delivery and six ex-British frigates. The Naval Air wing operates 16 combat capable aircraft.

The principal naval base and dockyard are at Karachi. There are secondary bases at Gwadar and Ormara. Naval personnel in 2007 totalled 24,000 (including an estimated 1,400 marines and some 2,000 Marine Security Agency personnel).

### Air Force

The Pakistan Air Force came into being on 14 Aug. 1947. It has its headquarters at Peshawar and is organized within three air defence sectors, in the northern, central and southern areas of the country. There is an Air Force Academy at Risalpur, which includes a College of Aeronautical Engineering.

Total strength in 2007 was 360 combat capable aircraft and 45,000 personnel. Equipment included Mirage IIIs, Mirage 5s, F-16s, Q-5s and J-7s.

## INTERNATIONAL RELATIONS

Following Gen. Musharraf's coup in Oct. 1999, Pakistan was suspended from the Commonwealth's councils although the suspension was ended in May 2004. Pakistan was again suspended in Nov. 2007 after President Musharraf declared emergency rule but it was readmitted in May 2008.

## ECONOMY

Agriculture accounted for 19.4% of GDP in 2006, industry 27.2% and services 53.4%.

### Overview

Agriculture contributes around a quarter of GDP. Pakistan is one of the world's largest producers of raw cotton but historically textile exports have added little value. Chiefly grown in Punjab province, cotton is crucial to the success of the yarn-spinning industry concentrated around Karachi. In recent years Pakistan has enjoyed increased US quotas for higher added value textile products, largely as a result of Pakistan's support for US military action in Afghanistan.

From 2004–07 the economy grew by over 5% per year, driven by the industrial and service sectors. Broad-based growth was supported by sound macroeconomic management and progress in implementing structural reforms and privatization. The Oct. 2005 earthquake in northern Pakistan had little impact on Pakistan's total production. However, the cost of reconstruction put major strain on the public finances and adversely affected the current-account balance.

Poverty levels fell by 10% between 2001 and 2007. Public debt was reduced from 75.1% of GDP in 2001 to 50.6% in 2007. In 2007–08 international oil and food prices rose sharply, with negative effects. A stabilization programme supported by the IMF was initiated by the government in Nov. 2008 to avoid default on debt payments.

Severe flooding in July 2010 affected more than 20m. people and disrupted 500,000 ha. of cropped land. A US\$451m. emergency assistance package was provided by the IMF in response to the crisis. The World Bank estimated the damage at US\$9.7bn. and committed US\$1bn. towards recovery. In the near term, the government is focused on helping flood victims, rebuilding infrastructure and reining in inflation, which stood at 20.8% in 2009. Political instability, poor infrastructure and a volatile security situation pose additional challenges.

### Currency

The monetary unit is the *Pakistan rupee* (PKR) of 100 *paisas*. Gold reserves in Sept. 2009 were 2.10m. troy oz; foreign exchange reserves, US\$10,418m. Inflation rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
4.4%	2.5%	3.1%	4.6%	9.3%	7.9%	7.8%	12.0%	20.8%	11.7%

The rupee was devalued by 3.65% in Sept. 1996, 8.5% in Oct. 1996 and 8.7% in Oct. 1997, and by 4.2% in June 1998 in response to the financial problems in Asia. In June 2008 total money supply was Rs3,359.3bn.

### Budget

The financial year ends on 30 June. Budgetary central government revenues totalled Rs1,803.2bn. in 2008–09; expenditures totalled Rs2,137.4bn. in 2008–09. Taxes accounted for 65.5% of revenues in 2008–09; interest accounted for 35.2% of expenditures, and goods and services 21.8%.

There is a general sales tax of 16%.

### Performance

Real GDP growth rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.0%	3.1%	4.7%	7.5%	9.0%	5.8%	6.8%	3.7%	1.7%	3.8%

Pakistan's total GDP in 2010 was US\$174.8bn.

### Banking and Finance

The State Bank of Pakistan is the central bank (*Governor*, Yaseen Anwar); it came into operation as the Central Bank on 1 July 1948 and was nationalized in 1974 with other banks. Private commercial bank licences were reintroduced in 1991.

The State Bank of Pakistan is the issuing authority of domestic currency, custodian of foreign exchange reserves and bankers for the federal and provincial governments and for scheduled banks. It also manages the rupee public debt of the federal and provincial governments. The National Bank of Pakistan acts as an agent of the State Bank where the State Bank has no offices of its own.

In Feb. 1994 the State Bank of Pakistan was granted more autonomy to regulate the monetary sector of the economy.

In Dec. 1999 the Supreme Court ruled that Islamic banking methods, whereby interest is not permitted, had to be used from 1 July 2001. However, the decision was rescinded in June 2002. The State Bank offered three options for the implementation of Islamic banking practices: i) banks to establish an independent Islamic bank; ii) the opening of subsidiaries of existing commercial banks; iii) the establishment of new branches to execute Islamic banking procedures.

In Sept. 2003 total assets of public sector commercial banks amounted to Rs980,300m., total assets of local private banks to Rs1,122,400m., total assets of foreign banks to Rs276,900m. and total assets of all commercial banks amounted to Rs2,379,600m. In Dec. 2005 total deposits of scheduled banks (stocks) equalled Rs2,661,697m. and net foreign assets amounted to Rs523,044m.

There were 37 commercial banks in Sept. 2003 (five state-owned and 15 foreign) with assets Rs2,380bn. In 2002 there were 45 leasing banks, operating in accordance with Sharia demands. There is a Federal Bank for Co-operatives.

Foreign direct investment was US\$2,016m. in 2010, down from US\$2,338m. in 2009 and US\$5,438m. in 2008. The total stock of FDI at the end of 2010 was US\$21.49bn.

There are stock exchanges in Islamabad, Karachi and Lahore.

## ENERGY AND NATURAL RESOURCES

### Environment

Pakistan's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.9 tonnes per capita in 2008.

### Electricity

Installed capacity in 2006–07 was 19.42m. kW, of which 12.48m. kW was thermal, 6.48m. kW was hydro-electric and 0.46m. kW was nuclear. In 2010 there were two nuclear reactors in use. Production in 2006–07 was 95.66bn. kWh, of which 68% was thermal and 14% was hydro-electric. Power shortages are frequent. Consumption per capita in 2006–07 was 601 kWh.

### Oil and Gas

Crude petroleum production in 2006–07 was 3.4m. tonnes. Reserves in 2007 were 289m. bbls. Exploitation is mainly through government incentives and concessions to foreign private sector companies. Natural gas production in 2008 was 37.5bn. cu. metres with 850bn. cu. metres of proven reserves. The French oil company Total agreed a US\$3bn. deal with the government in July 2003 for exploration in the Arabian Sea.

### Water

Pakistan's Indus Basin irrigation system is the largest and oldest in the world. It includes a network of 43 independent canal systems and two storage reservoirs. Total length of main canals is 58,000 km which serve 35m. acres of cultivatable land.

Currently three major surface water projects are under way, as are flood control schemes and programmes to check the problems of waterlogging and salinity.

### Minerals

Production (tonnes, 2005): limestone, 14.86m.; coal, 3.37m.; rock salt, 1.65m.; gypsum, 552,496; fire clay, 253,501; dolomite, 199,653; chromite, 46,359; barytes, 42,087; china clay, 37,732; fuller's earth, 17,001; bauxite, 6,504. Other minerals of which useful deposits have been found are magnesite, sulphur, marble, antimony ore, bentonite, celestite, fluorite, phosphate rock, silica sand and soapstone.

### Agriculture

The north and west are covered by mountain ranges. The rest of the country consists of a fertile plain watered by five big rivers and their tributaries. Agriculture is dependent almost entirely on the irrigation system based on these rivers. Area irrigated, 2002, about 17.80m. ha. Agriculture employs around half of the workforce. In 2002 there were an estimated 21.45m. ha. of arable land and 672,000 ha. of permanent crops.

Pakistan is self-sufficient in wheat, rice and sugar. Areas harvested, 2003: wheat, 8.07m. ha.; seed cotton, 3.00m. ha.; rice, 2.21m. ha.; chick-peas, 1.68m. ha.; sugarcane, 1.09m. ha.; maize, 0.88m. ha. Production, 2003 (1,000 tonnes): sugarcane, 52,056; wheat, 19,210; rice, 6,751; seed cotton, 5,071; cottonseed, 3,337; potatoes, 1,946; cotton lint, 1,690; onions, 1,400; oranges, 1,400; maize, 1,275; mangoes, 1,036; chick-peas, 672; dates, 650.

A Land Reforms Act of 1977 reduced the upper limit of land holding to 100 irrigated or 200 non-irrigated acres. A new agricultural income tax was introduced in 1995, from which holders of up to 25 irrigated or 50 unirrigated acres are exempt. Of about 5m. farms, 12% are of less than 10 ha.

Livestock, 2003 (in 1m.): goats, 52.8; buffaloes, 24.8; sheep, 24.6; cattle, 23.3; asses, 4.1; camels, 0.8; chickens, 155.0.

Livestock products, 2003 (in 1,000 tonnes): beef and veal, 445; poultry meat, 375; goat meat, 373; mutton and lamb, 174;

buffalo's milk, 18,520; cow's milk, 8,620; goat's milk, 640; eggs, 354; wool, 40.

### Forestry

The area under forests in 2005 was 1.90m. ha., some 2.5% of the total land area. Timber production in 2007 totalled 29.22m. cu. metres.

### Fisheries

In 2005 the catch totalled 434,473 tonnes, 78% from marine waters and the rest from inland waters. Exports of fishery commodities were valued at US\$193m. in 2008.

## INDUSTRY

The leading company by market capitalization in April 2011 was Oil & Gas Development (US\$7.8bn.).

Industry is based largely on agricultural processing, with engineering and electronics. Government policy is to encourage private industry, particularly small businesses. The public sector, however, is still dominant in large industries. Steel, cement, fertilizer and vegetable ghee are the most valuable public sector industries.

Production in 1,000 tonnes (in 2006–07 unless otherwise stated): cement (2007 estimate), 21,000; raw sugar (2007), 4,355; distillate fuel oil, 3,697; residual fuel oil, 3,324; cotton yarn (2005–06), 2,547; petrol, 1,337; paper and paperboard (2007), 1,010; pig iron (2005–06), 768; clays, 358; coke, 326; soda ash (2005), 260; caustic soda, 242; woven cotton fabrics, 965m. sq. metres; bicycles, 486,350 items; tractors (2007), 54,610 items.

### Labour

Out of 45.29m. economically active people in 2005, 37.81m. were males. The rate of unemployment in 2005 was 6.8%. In 2005 a total of 17.18m. persons were engaged in agriculture, forestry and fishing, 6.67m. in manufacturing, 6.50m. in community, social and personal services and 6.29m. in wholesale and retail trade, restaurants and hotels.

In 2001 there were four industrial disputes and 7,078 working days were lost.

## INTERNATIONAL TRADE

Foreign debt was US\$33,675m. in 2005. Most foreign exchange controls were removed in Feb. 1991. Tax exemptions are available for companies set up before 30 June 1995.

### Imports and Exports

Trade in US\$1m.:

	2005	2006	2007	2008	2009
Imports c.i.f.	25,097	29,826	32,594	42,327	31,584
Exports f.o.b.	16,050	16,933	17,838	20,279	17,555

Major imports in 2009 (as % of total value): petroleum and petroleum products, 26.2; machinery and transport equipment, 22.9; chemicals and related products, 16.9; manufactured goods, 10.6. Major exports in 2009: textile yarn, fabrics and finished articles, 37.1; clothing and apparel, 19.1; rice, 10.1; petroleum and petroleum products, 4.1.

Major import suppliers in 2009 (as % of total): China, 12.0; Saudi Arabia, 11.1; UAE, 10.6; Kuwait 5.7; USA, 5.7. Major export markets in 2009: USA, 18.3; UAE, 8.8; Afghanistan; 7.8; China, 5.7; UK, 5.4.

## COMMUNICATIONS

### Roads

In 2006 there were 260,420 km of roads, of which 65.4% were paved. There are ten motorways providing links between Pakistan's major cities. These include the M-1 from Islamabad to Peshawar, the M-2 from Islamabad to Lahore, the M-4 from Faisalabad to Multan and the M-9 from Karachi to Hyderabad.

In 2007 there were 1,440,100 passenger cars in use, 187,100 vans and lorries, 170,400 buses and coaches and 2,684,300 motorcycles. There were 10,466 road accidents involving injury in 2007, with 5,465 fatalities.

All traffic in Pakistan drives on the left. All cars must be insured and registered. Minimum age for driving: 18 years.

### Rail

In 2005 Pakistan Railways had a route length of 7,791 km (of which 305 km electrified) mainly on 1,676 mm gauge, with some metre gauge line. Passenger-km travelled in 2004–05 came to 24.2bn. and freight tonne-km to 5.0bn.

### Civil Aviation

There are international airports at Karachi, Islamabad, Lahore, Peshawar and Quetta.

The national carrier is the state-owned Pakistan International Airlines, or PIA. It operates scheduled services to 46 international and 24 domestic destinations. In 2006, 88,302,000 revenue-km were flown. The revenue passengers carried totalled 5.73m. in 2006 and revenue tonne-km came to 1,801m. Operating revenues of the corporation stood at Rs70,587m. in 2006 and operating expenditure at Rs79,164m.

### Shipping

In Jan. 2009 there were 16 ships of 300 GT or over registered, totalling 384,000 GT. The busiest port is Karachi. In 2008–09 cargo traffic totalled a record 38,732,000 tonnes (13,364,000 tonnes loaded and 25,368,000 tonnes discharged). In 2008–09, 2,386 vessels were handled at the port of Karachi. There is also a port at Port Qasim, which handled 25,023,000 tonnes in 2008–09.

### Telecommunications

The telephone system is government-owned. In 2008 there were 4,416,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 88,020,000 (497.4 per 1,000 persons). There were 18.5m. internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The Federal Judiciary consists of the Supreme Court of Pakistan, which is a court of record and has three-fold jurisdiction; original, appellate and advisory. There are four High Courts in Lahore, Peshawar, Quetta and Karachi. Under the Constitution, each has power to issue directions of writs of *Habeas Corpus*, *Mandamus*, *Certiorari* and others. Under them are district and sessions courts of first instance in each district; they have also some appellate jurisdiction. Below these are subordinate courts and village courts for civil matters and magistrates for criminal matters.

The Constitution provides for an independent judiciary, as the greatest safeguard of citizens' rights. There is an Attorney-General, appointed by the President, who has right of audience in all courts and the Parliament, and a Federal Ombudsman.

A Federal Sharia Court at the High Court level has been established to decide whether any law is wholly or partially un-Islamic. In Aug. 1990 a presidential ordinance decreed that the criminal code must conform to Islamic law (Sharia), and in May 1991 parliament passed a law incorporating it into the legal system.

538,048 crimes were reported in 2007 (399,558 in 2002). Execution of the death penalty for murder, in abeyance since 1986, was resumed in 1992. According to Amnesty International there were at least 36 executions in 2008 but none since. However, there have been reports of extrajudicial executions since 2008. There were 10,556 murders in 2007 (9,396 in 2002). The population in penal institutions in 2007 was 90,000 (55 per 100,000 of national population).

### Education

The National Education Policy (1998–2010) was launched in March 1998. The major aim was the eradication of illiteracy and the spread of a basic education. The policy stresses vocational and technical education, disseminating a common culture based on Islamic ideology. The principle of free and compulsory primary education has been accepted as the responsibility of the state. The adult literacy rate in 2008 was 54%. Adult literacy programmes are being strengthened.

In 2007 there were 17.98m. primary schools pupils (450,027 teaching staff), 9.15m. secondary school pupils (197,082 teaching staff in 2004) and 955,000 students in tertiary education (52,245 academic staff). There are 70 public and 58 private universities of which Quaid-i-Azam University in Islamabad and the University of the Punjab in Lahore are considered to be the most prestigious.

Public expenditure on education came to 2.8% of GNI and 11.2% of total government spending in 2007.

### Health

In 2002 there were 906 hospitals and 4,590 dispensaries (with a total of 98,264 beds) and 862 maternity and child welfare centres. There were 126,350 doctors, 70,698 nurses and midwives and 15,790 dentists in 2005.

### Welfare

The official retirement age is 60 (men), 55 (women) or 50 (miners). To qualify for a pension, 15 years of contributions are needed. The minimum old age and survivor pension is Rs3,000 per month (as of 2010).

Medical services, provided mainly through social security facilities, cover cash and medical benefits such as general medical care, specialist care, medicines, hospitalization, maternity care and transportation.

## RELIGION

Pakistan was created as a Muslim state. The Muslims are mainly Sunni, with an admixture of 15–20% Shia. Religious groups: Muslims, 93%; Christians, 2%; Hindus, Parsees, Buddhists, Qadianis and others. Pakistan has the second highest number of Muslims, after Indonesia. There is a Minorities Wing at the Religious Affairs Ministry to safeguard the constitutional rights of religious minorities.

## CULTURE

There is a Pakistan National Council of the Arts, a cultural organization to promote art and culture in Pakistan and abroad.

### World Heritage Sites

There are six sites under Pakistani jurisdiction which appear on the UNESCO World Heritage List. They are (with year entered on list): the archaeological ruins at Moenjodaro (1980), Taxila (1980), the Buddhist ruins at Tahkt-i-Bahi and the neighbouring city remains at Sahr-i-Bahlol (1980), Thatta (1981), the Fort and Shalamar Gardens in Lahore (1981) and Rohtas Fort (1997).

### Press

In 2007 there were 400 paid-for dailies and 1,200 paid-for non-daily periodicals. Average combined circulation of all dailies in 2007 was 9,935,000. The most popular daily papers in 2008 were *Jang*, with a circulation of 450,000, and *Express*, with a circulation of 375,000. The most widely read English-language paper is *Dawn*, with an average daily circulation of 225,000 copies in 2008.

### Tourism

In 2005 there were 798,000 non-resident tourists. More than half of foreign tourist arrivals in 2006 were for the purpose of visiting friends and relatives, followed by business (21.4%) and holidays and recreation (14.7%). Tourist receipts totalled US\$827m. in 2005.

**Festivals**

Pakistan is rich in culture. Famous festivals include the Eid Festival, Eid-e-Milad un Nabi (Birthday of Prophet Muhammad), the Basnat Festival, Shab-e-Baraat Festival and the Independence Day Festival.

**DIPLOMATIC REPRESENTATIVES**

Of Pakistan in the United Kingdom (35–36 Lowndes Sq., London, SW1X 9JN)

# PALAU

Beluu er a Belau  
(Republic of Palau)

*Capital:* Melekeok

*Population, 2005:* 20,000

*GNI per capita, 2010:* US\$10,073

*HDI/world rank:* 0.782/49

## KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Palau Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the islands in 1914 and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in 1944, the islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. Following a referendum in July 1978 in which Palauans voted against joining the new Federated States of Micronesia, the islands became autonomous from 1 Jan. 1981. A referendum in Nov. 1993 favoured a Compact of Free Association with the USA. Palau became an independent republic on 1 Oct. 1994.

## TERRITORY AND POPULATION

The archipelago lies in the western Pacific and has a total land area of 488 sq. km (188 sq. miles). It comprises 26 islands and over 300 islets. Only nine of the islands are inhabited, the largest being Babelthup (396 sq. km), but most inhabitants live on the small island of Koror (18 sq. km) to the south. In Oct. 2006 the capital moved from Koror to Melekeok, a newly-built town in eastern Babelthup. The total population of Palau at the time of the 2005 census was 19,907, giving a density of 40.8 per sq. km. Koror's population according to the 2005 census was 12,676. In 2000 approximately 70% of the population were Palauans.

In 2000 an estimated 69.5% of the population lived in urban areas. Some 6,000 Palauans live abroad. The local language is Palauan; both Palauan and English are official languages.

## SOCIAL STATISTICS

2005 births, 279; deaths, 134. Rates, 2005 (per 1,000 population): births, 14.0; deaths, 6.7; infant mortality (2005), ten per 1,000 live

births. Annual population growth rate, 1998–2008, 1.0%. Expectation of life: males, 69 years; females, 73. Fertility rate, 2008, 1.9 births per woman.

## CLIMATE

Palau has a pleasantly warm climate throughout the year with temperatures averaging 81°F (27°C). The heaviest rainfall is between July and Oct.

## CONSTITUTION AND GOVERNMENT

The Constitution was adopted on 2 April 1979 and took effect from 1 Jan. 1981. The Republic has a bicameral legislature, the *Olbiil Era Kelulau* (National Congress), comprising a 13-member *Senate* and a 16-member *House of Delegates* (one from each of the Republic's 16 states), both elected for a term of four years as are the *President* and *Vice-President*. Customary social roles and land and sea rights are allocated by a matriarchal 16-clan system.

## National Anthem

'Belau loba klisiich er a kelulul' ('Palau is coming forth with strength and power'); words anonymous, tune Y. O. Ezekiel.

## RECENT ELECTIONS

At the elections on 4 Nov. 2008 Johnson Toribiong was elected president with 51.1% of votes cast against 48.9% for Elias Camsek Chin. At the legislative elections that were also held on 4 Nov. 2008 only non-partisans were elected.

Presidential and parliamentary elections are scheduled to take place on 6 Nov. 2012.

## CURRENT GOVERNMENT

*President:* Johnson Toribiong; b. 1946 (in office since 15 Jan. 2009).

*Vice-President and Minister of Finance:* Kerai Mariur.

In March 2012 the cabinet consisted of:

*Minister of Community and Cultural Affairs:* Faustina Rehuher-Marugg. *Education:* Masa-Aki Emesiochl. *Health:* Dr Stevenson Kuartei. *Justice:* Johnny Gibbons. *Natural Resources, Environment and Tourism:* Harry Fritz. *Public Infrastructure, Industries and Commerce:* Jackson Ngiraingas. *Minister of State for Foreign Affairs:* Dr Victor Yano.

*Government Website:* <http://www.palau.gov.net>

## CURRENT LEADERS

### Johnson Toribiong

*Position*

President

### Introduction

Johnson Toribiong assumed the presidency on 15 Jan. 2009 following victory in the presidential election of Nov. 2008. A prominent attorney, Toribiong is a former ambassador to Taiwan.

### Early Life

Toribiong was born in Airai village in 1946. Adopted by his paternal grandmother, Toribiong grew up in Ngialu in a traditional family. In 1972 he graduated from the University of Washington, School of Law, from where he also gained a masters degree the following year. In 1999, when he was appointed to succeed his uncle as chief of Airai village, he expressed his determination to preserve the Palauan heritage.

In 2005, while serving as Palau's ambassador to Taiwan, Toribiong refused to attend a Taiwanese court hearing to answer allegations that he was involved in investment fraud linked to the

sale of funds to Taiwan by a Palauan bank. He was granted diplomatic immunity and did not face charges.

#### **Career in Office**

Toribiong campaigned for the presidency on a platform of government transparency and increased spending on public health. He also promised sustainable economic growth. While Toribiong was in Taiwan for his first state visit, the Taiwanese president, Ma Ying-jeou, described Palau as Taiwan's 'closest ally'. Toribiong was expected to continue to campaign for international recognition for Taiwan. He also pledged to reduce Palau's dependence on US aid, although an agreement on a long-term US\$250m. financial assistance package was signed after months of wrangling in Sept. 2010.

### **ECONOMY**

#### **Overview**

Following independence in 1994, Palau has been highly dependent on foreign aid. The USA provides assistance under a Compact of Free Association, giving Washington responsibility for Palau's defence and security matters. Grant assistance under the Compact, guaranteed until 2024, increased in 2010 ahead of a gradual decline.

Tourism, which accounts for nearly half of GDP, has been hit by the global downturn and, specifically, financial difficulties in the Taiwanese air industry (with Taipei being a key hub for incoming tourists). In the medium term the government looks to reduce dependence on foreign grants and to fund current fiscal spending from domestic revenues. Such adjustment will require comprehensive tax and fiscal reforms, while authorities are looking to generate new sources of revenue through liberalization of the FDI regime and offshore exploration of oil and gas.

#### **Currency**

US currency is used.

#### **Budget**

The fiscal year begins on 1 Oct. Revenues for 2008–09 were US\$81.3m. and expenditures US\$95.0m.

#### **Performance**

Total GDP in 2010 was US\$170m. The economy contracted by 4.9% in 2008 and by 2.1% in 2009.

#### **Banking and Finance**

The National Development Bank of Palau is situated in Koror. Other banks include the Bank of Guam, the Bank of Hawaii, Bank Pacific, Melekeok Government Bank and the Pacific Savings Bank.

### **ENERGY AND NATURAL RESOURCES**

#### **Electricity**

Electricity production was approximately 154m. kWh in 2007; installed capacity was about 52,000 kW in 2007.

#### **Agriculture**

The main agricultural products are bananas, coconuts, copra, cassava and sweet potatoes. In 2007 approximately 2,000 people were economically active in agriculture. There were about 1,000 ha. of arable land in 2007 and 2,000 ha. of permanent crop land.

#### **Forestry**

Forests covered 40,000 ha. in 2005, or 87.6% of the land area.

#### **Fisheries**

In 2005 the catch totalled 932 tonnes, mainly tuna.

### **INDUSTRY**

There is little industry, but the principal activities are food-processing and boat-building.

#### **Labour**

In 2000 the total labour force numbered 9,607 (61.9% males), of whom 9,383 were employed.

### **INTERNATIONAL TRADE**

#### **Imports and Exports**

Imports (2006–07) US\$91.3m.; exports (2006–07) US\$10.1m. The main trading partner is Japan for exports and the USA for imports.

### **COMMUNICATIONS**

#### **Roads**

There were 61 km of roads in 1996 of which 36 km are paved.

#### **Civil Aviation**

The main airport is on Koror (Airai). In 2003 there were scheduled flights to Guam, Manila, Yap (Micronesia) and Taipei.

#### **Shipping**

There is a port at Malakal.

#### **Telecommunications**

In 2008 there were 7,400 main (fixed) telephone lines and 12,200 mobile phone subscribers.

### **SOCIAL INSTITUTIONS**

#### **Justice**

There is a Supreme Court and various subsidiary courts. The population in penal institutions in April 2005 was 97 (478 per 100,000 national population).

#### **Education**

In 2007 there were 1,544 pupils at primary schools and 2,448 at secondary schools. In 2004 there were 23 primary schools and six secondary schools. There were 727 students at Palau Community College in 2002–03. The adult literacy rate is 92%.

In 2002 government expenditure on education came to an estimated 10.3% of GDP.

#### **Health**

There were 26 doctors, 117 nurses and one midwife in 2006 and five dentists and one pharmacist in 2007.

### **RELIGION**

The majority of the population is Roman Catholic.

### **CULTURE**

#### **Press**

There were three weekly newspapers in 2006: *Tia Belau* and *Palau Horizon*, published in English, and *Roureur Belau*, published in Palauan.

#### **Tourism**

Tourism is a major industry, particularly marine-based. There were 83,114 foreign tourists in 2008.

### **DIPLOMATIC REPRESENTATIVES**

Of the United Kingdom in Palau

*Ambassador:* Stephen Lillie (resides in Manila, Philippines).

Of Palau in the USA (1800 K St., NW, Suite 400, Washington, D.C., 20006)

*Ambassador:* Hersey Kyota.

Of the USA in Palau (PO Box 6028, PW 96940, Koror)

*Ambassador:* Helen Reed-Rowe.

Of Palau to the United Nations

*Ambassador:* Stuart Beck.

Of Palau to the European Union

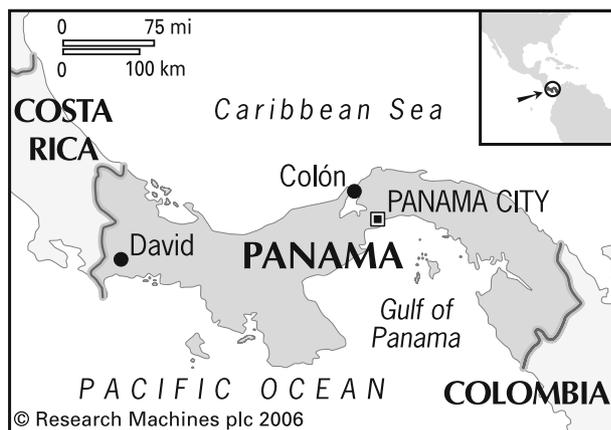

*Ambassador:* Carlos Hiroshi Sali.

*HDI/world rank:* 0-768/58

## KEY HISTORICAL EVENTS

Ceramic objects unearthed on Panama's Pacific coast suggest the area was settled from 2,500 BC. Maize cultivation began in southern Panama around 1,500 BC and by 300 BC it supported numerous large, permanent villages. Public architecture was in evidence by AD 500, along with pottery (Gran Cocle), gold ornaments and elaborate burial chambers. From AD 750 present-day Panama was widely settled by Chibchan, Chocoan and Cueva peoples, and there was trade with other groups across central America.

A Spanish adventurer, Rodrigo de Bastidas, explored the isthmus of Panama in 1501, followed by Christopher Columbus the following year. Nuestra Señora de la Asunción de Panamá (present-day Panama City) was founded in 1519. The first European settlement on the Pacific Ocean, it was a staging post for later Spanish conquests across central and south America. A part of the New Kingdom of Granada, from 1549 Panama was ruled by the *Audiencia* of Bogotá. It was a key port for shipping gold, silver and other treasures from the western fringe of South America to Spain.

In the late 1690s the isthmus saw an ill-fated attempt by the Kingdom of Scotland to establish a colony called New Caledonia. Poor planning, insufficient resources, a lack of opportunities for trade and crippling diseases led to the scheme's demise at the hands of Spanish forces in 1700. Panama was formally incorporated into the Viceroyalty of New Granada in 1739, which encompassed present-day Colombia, Ecuador and Venezuela.

An independence movement for New Granada was precipitated by the Napoleonic invasion of Spain in 1808. Antonio Nariño, who took part in an uprising at Bogotá in 1810, and Simón Bolívar became leading revolutionary figures. Bolívar's victory at Boyacá in 1819 was followed by the Spanish surrender of Cartagena in 1821. Panama was incorporated into the new independent Republic of Colombia, which included Venezuela and (from 1822) Ecuador under Bolívar's leadership. Rebellions against rule from Bogotá took place in 1830 and 1840, before the

Bidlack-Mallarino Treaty of 1846 granted the USA rights to both build a railway across Panama (completed in 1855) and intervene militarily in the event of disturbances.

While Colombia was embroiled in the Thousand Day War (1899–1902) Panama again sought independence, with separatists such as José Agustín Arango favouring direct negotiation with the USA over plans for a Panama Canal. The USA chose to back the revolution and Panama declared independence on 3 Nov. 1903. A subsequent treaty granted the USA the use, occupation and control of a Canal Zone, with full sovereign rights in perpetuity. In return the USA guaranteed the independence of the republic. The Canal was opened on 15 Aug. 1914.

US domination of Panama provoked frequent anti-American protests. In 1968 Col. Omar Torrijos Herrera took power in a coup and attempted to negotiate a more advantageous treaty with the USA. Two new treaties between Panama and the USA were agreed in Aug. 1977 and signed in Sept. of the same year. One dealt with the operation and defence of the Canal until the end of 1999 and the other guaranteed permanent neutrality.

Torrijos vacated his position as chief of government in 1978 but remained head of the National Guard until his death in an air crash in 1981. Subsequently, Gen. Manuel Noriega, Torrijos' successor as head of the National Guard, became the strong man of the regime. His position was threatened by internal political opposition and economic pressure applied by the USA but in Oct. 1989 a US-backed coup attempt failed. On 15 Dec. Gen. Noriega declared a 'state of war' with the USA. On 20 Dec. the USA invaded. Gen. Noriega surrendered on 3 Jan. 1990. Accused of drug dealing, he was convicted by a court in Miami. All remaining US troops left the country when the Panama Canal was handed back to Panama at the end of 1999.

In a referendum in 2006, voters backed a US\$5-2bn. plan to widen the Panama Canal, potentially doubling its capacity. The conservative retail tycoon Ricardo Martinelli won a landslide victory in the April 2009 presidential election, promising to take a tough stance on crime and rising prices.

## TERRITORY AND POPULATION

Panama is bounded in the north by the Caribbean Sea, east by Colombia, south by the Pacific Ocean and west by Costa Rica. The area is 75,001 sq. km. Population at the census of 2010 was 3,405,813 (1,693,229 females); density, 44.9 per sq. km. The population was 70-8% urban in 2005.

The UN gives a projected population for 2015 of 3-78m.

The largest towns (2010) are Panama City, the capital, on the Pacific coast (430,299) and its suburb San Miguelito (315,019). Other large towns are Las Cumbres, Tocumen, David, Arraiján and Colón.

The areas and populations of the nine provinces and the three province-level indigenous districts, plus their capitals, are:

Province	Sq. km	Census 2010	Capital
Bocas del Toro	4,601	125,461	Bocas del Toro
Chiriquí	6,477	416,873	David
Coclé	4,927	233,708	Penonomé
Colón	4,891	241,928	Colón
Darién <sup>1</sup>	11,866	48,378	La Palma
Emberá <sup>2</sup>	4,398	10,001	Cirilo Guainora
Herrera	2,341	109,955	Chitré
Kuna Yala <sup>2</sup>	2,393	33,109	El Porvenir
Los Santos	3,805	89,592	Las Tablas
Ngöbe-Buglé <sup>2</sup>	6,673	156,747	Chichica
Panamá <sup>3</sup>	11,952	1,713,070	Panama City
Veraguas	10,677	226,991	Santiago

<sup>1</sup>Includes the indigenous district of Kuna de Wargandí. <sup>2</sup>Indigenous district. <sup>3</sup>Includes the indigenous district of Kuna de Madungandí.

The population is a mix of African, American, Arab, Chinese, European and Indian immigrants. The official language is Spanish.

### SOCIAL STATISTICS

2006 births, 65,764; deaths, 14,358; marriages, 10,747; divorces, 2,866. Birth rate, 2006 (per 1,000 population), 20.0; death rate, 4.4. Annual population growth rate, 2000–05, 2.5%. Expectation of life at birth, 2007, was 73.0 years for males and 78.2 years for females. In 2006 the most popular age range for marrying was 25–29 for both males and females. Infant mortality, 2006, 15 per 1,000 live births; fertility rate, 2006, 2.4 births per woman.

### CLIMATE

Panama has a tropical climate, unvaryingly with high temperatures and only a short dry season from Jan. to April. Rainfall amounts are much higher on the north side of the isthmus. Panama City, Jan. 79°F (26.1°C), July 81°F (27.2°C). Annual rainfall 70" (1,770 mm). Colón, Jan. 80°F (26.7°C), July 80°F (26.7°C). Annual rainfall 127" (3,175 mm). Balboa Heights, Jan. 80°F (26.7°C), July 81°F (27.2°C). Annual rainfall 70" (1,759 mm). Cristóbal, Jan. 80°F (26.7°C), July 81°F (27.2°C). Annual rainfall 130" (3,255 mm).

### CONSTITUTION AND GOVERNMENT

The 1972 constitution, as amended in 1978, 1983, 1994 and 2004, provides for a *President*, elected for five years, two *Vice-Presidents* and a 72-seat *Legislative Assembly* (since reduced to 71 seats) to be elected for five-year terms by a direct vote. As a result of the amendment of 2004 there has only been one *Vice-President* since the election of May 2009. To remain registered, parties must have attained at least 50,000 votes at the last election. A referendum held on 15 Nov. 1992 rejected constitutional reforms by 64% of votes cast. Turnout was 40%. In a referendum on 30 Aug. 1998 voters rejected proposed changes to the constitution which would allow for a President to serve a second consecutive term.

### National Anthem

'Alcanzamos por fin la victoria' ('We achieve victory in the end'); words by J. de la Ossa, tune by Santos Jorge.

### GOVERNMENT CHRONOLOGY

(CD = Democratic Change; CNP = National Patriotic Coalition; PA = Arnulfist Party; PL = Liberal Party; PLN = National Liberal Party; PP = Panameñista Party; PR = Republican Party; PRA = Authentic Revolutionary Party; PRD = Revolutionary Democratic Party; n/p = non-partisan)

Heads of State since 1941.

#### Presidents of the Republic

1941–45	n/p	Ricardo Adolfo de la Guardia Arango
1945–48	PL	Enrique Adolfo Jiménez Brin
1948–49	PL	Domingo Díaz Arosemena
1949	PL	Daniel Chanis Pinzón
1949–51	PRA	Arnulfo Arias Madrid
1951–52	PRA	Alcibiades Arosemena Quinzada
1952–55	CNP	José Antonio Remón Cantera
1955–56	CNP	Ricardo Manuel Arias Espinosa
1956–60	CNP	Ernesto de la Guardia Navarro
1960–64	PLN	Roberto Francisco Chiari Remón
1964–68	PLN	Marco Aurelio Robles Méndez
1968	PP	Arnulfo Arias Madrid

#### Chairmen of the Provisional Junta of Government

1968–69	military	José María Pinilla Fábrega
1969–72	n/p	Demetrio Basilio Lakas Bahas

#### Presidents of the Republic

1972–78	n/p	Demetrio Basilio Lakas Bahas
1978–82	n/p	Aristides Royo Sánchez

1982–84	n/p	Ricardo de la Escriella Toral
1984	n/p	Jorge Enrique Illueca Sibauste
1984–85	PRD	Nicolás Ardito Barletta Vallarino
1985–88	PR	Eric Arturo Delvalle Cohen-Henríquez
1989–94	PA	Guillermo David Endara Galimany
1994–99	PRD	Ernesto Pérez Balladares González
1999–2004	PA	Mireya Elisa Moscoso de Arias
2004–09	PRD	Martín Erasto Torrijos Espino
2009–	CD	Ricardo Martinelli Berrocal

De facto rulers from 1968–89.

1968–81	military	Omar Efraín Torrijos Herrera
1982–83	military	Rubén Darío Paredes del Río
1983–89	military	Manuel Antonio Noriega Moreno

### RECENT ELECTIONS

In the presidential election on 3 May 2009 Ricardo Martinelli of Democratic Change (CD) won 60.3% of the vote, against 37.3% for Balbina Herrera of the ruling Revolutionary Democratic Party (PRD) and 2.4% for Guillermo Endara (Moral Vanguard of the Fatherland).

At the parliamentary elections, also held on 3 May 2009, the PRD won 26 seats; the Panameñista Party won 21 seats; CD, 15; Patriotic Union Party, 4; Nationalist Republican Liberal Movement (Molirena), 2; independents, 2; People's Party, 1. Turnout was 70.1%.

### CURRENT GOVERNMENT

*President:* Ricardo Martinelli; b. 1952 (Democratic Change; sworn in 1 July 2009).

*Vice-President:* Juan Carlos Varela Rodríguez.

In March 2012 the government comprised:

*Minister of Public Security:* José Raúl Mulino. *Interior:* Jorge Ricardo Fábrega. *Education:* Lucinda Molinar. *Public Works:* Federico José Suárez. *Health:* Franklin Vergara. *Labour and Work Development:* Alma Lorena Cortés Aguilar. *Foreign Affairs:* Roberto Henríquez. *Commerce and Industry:* Ricardo Quijano. *Housing:* Carlos Alberto Duboy Sierra. *Agricultural Development:* Oscar Armando Osorio. *Canal Affairs:* Rómulo Roux. *Social Development:* Guillermo Antonio Ferrufino Benítez. *Economy and Finance:* Frank de Lima. *Tourism:* Salomón Shamah Zuchin. *Micro, Small and Medium-sized Business Authority:* Giselle de Calcagno. *Minister of the Presidency:* Demetrio Papadimitriou.

*Office of the President (Spanish only):*

<http://www.presidencia.gob.pa>

### CURRENT LEADERS

#### Ricardo Martinelli Berrocal

##### Position

President

##### Introduction

Businessman Ricardo Martinelli became president in May 2009. He led the Democratic Change party to a landslide victory, ending 40 years of bipartisan government.

##### Early Life

Ricardo Martinelli was born in March 1952 in Panama City to parents of Italian and Spanish descent. He was schooled in Panama City before attending Staunton Military Academy in Virginia, USA. In 1973 he graduated in business administration from Arkansas University and subsequently obtained a masters degree in the same subject from the Central American Institute of Business Administration in Costa Rica.

He returned to Panama to embark on a business career, first at Citibank before joining the retail company Almacén 99 in 1981. By 1985 he had set up the Super 99 supermarket chain and variously headed the Panamanian Chamber of Commerce, the Italian-Panamanian Chamber of Commerce and the governing

association of retail companies. In 1991 he set up the Ricardo Martinelli Foundation, which grants scholarships to several thousand poor students each year. From 1993–96 Martinelli was involved with the Revolutionary Democratic Party (PRD) and was briefly head of the National Social Security Institute (CSS).

After two years out of the political spotlight, Martinelli established his own party in 1998, called Democratic Change (CD). In 1999 he allied himself with Mireya Moscoso in a conservative coalition against the PRD. When Moscoso went on to win the presidency, CD was rewarded with the ministry for the Panama Canal, just as management of the Canal was being handed over to Panama by the USA. Martinelli was a strong advocate for expansion of the Canal but progress was slow and in 2003 he resigned to stand for the presidency in 2004. Martinelli started with a strong base in local and international commerce, insurance, banking, food, the agricultural and chemical industries, and the media.

Although his 2004 campaign was unsuccessful, it positioned him in the public eye ahead of his second run in 2009. He stood as the candidate for the CD-led Alliance for Change coalition campaigning on a platform of change and fighting corruption. He won with over 60% of the vote.

#### Career in Office

Martinelli's election bucked the left-leaning trend in neighbouring El Salvador and Nicaragua. Among the policies he has advocated are Panama's exit from the Central American Parliament (Parlacen), increased police wages, a monthly stipend of 100 balboas for the unpensioned elderly and the eradication of corruption. In 2009 he appointed the ex-military Gustavo Pérez as head of police and pledged to tackle the 'wild capitalism' of Panama. Martinelli also planned to reform the tax system and to overhaul Panama City's transport system with the construction of a metro network.

#### DEFENCE

The armed forces were disbanded in 1990 and constitutionally abolished in 1994. Divided between both coasts, the National Maritime Service, a coast guard rather than a navy, numbered around 600 personnel in 2007. In addition there is a paramilitary police force of 11,000 and a paramilitary national air service of 400 with no combat capable aircraft. In 2008 defence expenditure totalled US\$226m. (US\$68 per capita), representing 1.0% of GDP. For Police *see* JUSTICE *below*.

#### ECONOMY

Agriculture accounted for 8.2% of GDP in 2006, industry 18.6% and services 73.2%.

#### Overview

Panama boasts one of the fastest-growing GDP rates in Latin America, averaging over 9.5% between 2006–08, although growth slowed to 3% in 2009. It has buoyant transportation, commerce and tourism sectors and a sound banking system. However, 28.6% of the population lived in poverty in 2006 and inequality is very high, despite the government of Martín Torrijos that was in power from 2004 to 2009 setting a goal of reducing poverty by 20% by 2009.

As the link between North and South America, Panama benefits from its strategic importance for shipping and trade. About 80% of GDP is derived from related service sectors such as transportation, packaging, shipping, importing and exporting. The sector is centred around the Canal and the Colón Free Zone, at the Canal's Atlantic entrance. An expansion of the Canal, begun in 2007 and scheduled to be completed by 2014, is expected to boost the economy. Panama and the USA agreed a Free Trade Agreement in June 2007, which was approved by the Panamanian National Assembly the following month. However, it was not

ratified by the US Congress until Oct. 2011, with further delays expected before its implementation.

The banking system is highly integrated with international markets. The national currency is pegged to the US dollar, making it vulnerable to global trends.

#### Currency

The monetary unit is the *balboa* (PAB) of 100 *centésimos*, at parity with the US dollar. The only paper currency used is that of the USA. US coinage is also legal tender. Inflation was 8.8% in 2008 and 2.4% in 2009. In July 2005 foreign exchange reserves were US\$1,018m. and total money supply was 1,587m. balboas.

#### Budget

Revenues in 2007 were 4,433m. balboas (tax revenue, 48.1%) and expenditures 4,432m. balboas (current expenditure, 78.1%).

VAT is 7%.

#### Performance

Real GDP growth was 10.1% in 2008, 3.2% in 2009 and 7.5% in 2010. Panama's annual average growth throughout the 2000s, at 5.8%, was the highest in Latin America. Total GDP in 2010 was US\$26.8bn.

#### Banking and Finance

There is no statutory central bank. Banking is supervised and promoted by the Superintendency of Banks (formerly the National Banking Commission); the *Superintendent* is Alberto Diamond. Government accounts are handled through the state-owned Banco Nacional de Panama. In 2007 there were two other state banks, 39 banks operating under general licence, 34 under international licence and 11 as representative offices. In Aug. 2007 the combined assets of those banks operating under general and international licences totalled US\$50,500m.; their combined deposits were US\$36,500m.

There is a stock exchange in Panama City.

#### ENERGY AND NATURAL RESOURCES

##### Environment

Panama's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.6 tonnes per capita.

##### Electricity

In 2007 capacity was 1.5m. kW. Production was 6.5bn. kWh in 2007 (57% hydro-electric and 43% thermal), with consumption per capita 1,904 kWh.

##### Minerals

Limestone, clay and salt are produced. There are known to be copper deposits.

##### Agriculture

In 2002, 19.3% of the economically active population were engaged in agriculture. In 2002 there were approximately 548,000 ha. of arable land and 147,000 ha. of permanent crops. Production in 2002 (in 1,000 tonnes): sugarcane, 1,441; bananas, 500; rice, 245; plantains, 105; maize, 76; melons and watermelons, 63; oranges, 47; potatoes, 26; yams, 26; pineapples, 23; tomatoes, 21; cassava, 20.

Livestock (2003 estimates): 1,550,000 cattle, 305,000 pigs, 175,000 horses and 14m. chickens.

Livestock products (2002, in 1,000 tonnes): beef and veal, 54; pork, bacon and ham, 18; poultry meat, 89; milk, 178; eggs, 26.

##### Forestry

Forests covered 4.29m. ha. in 2005 (57.7% of the land area). There are great timber resources, notably mahogany. Production in 2007 totalled 1.35m. cu. metres.

### Fisheries

In 2005 the catch totalled 214,737 tonnes (mainly shrimp), almost entirely from sea fishing. Exports of fishery commodities were valued at US\$442m. in 2008.

### INDUSTRY

The main industry is agricultural produce processing. Other areas include chemicals and paper-making. Cement production (2008 estimate), 1,843,000 tonnes; sugar (2005), 157,280 tonnes.

### Labour

In Aug. 2003 a total of 1,145,982 persons were in employment, with principal areas of activity as follows: agriculture, hunting and forestry, 228,305; wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 196,418; manufacturing, 105,830; transport, storage and communications, 85,883. In Aug. 2003 the unemployment rate was 13.1%.

### INTERNATIONAL TRADE

The Colón Free Zone, the largest free zone in the Americas, is an autonomous institution set up in 1953. More than 2,500 companies were operating there in 2007. Foreign debt was US\$9,765m. in 2005.

### Imports and Exports

Imports and exports in US\$1m.:

	2002	2003	2004	2005	2006
Imports f.o.b.	3,035.3	3,122.3	3,592.2	4,152.8	4,817.7
Exports f.o.b.	759.6	805.0	891.1	963.2	1,021.8

Main imports: machinery and apparatus, mineral fuels, chemicals and chemical products. Main exports: marine products, bananas, melons.

Chief import suppliers, 2006: USA, 27%; Curaçao, 10%; Costa Rica, 5%; Japan, 5%. Principal export markets, 2006: USA, 39%; Spain, 8%; Netherlands, 7%; Sweden, 6%.

### COMMUNICATIONS

#### Roads

In 2006 there were 13,365 km of roads, of which 34.1% were paved. The road from Panama City westward to the cities of David and Concepción and to the Costa Rican frontier, with several branches, is part of the Pan-American Highway. The Trans-Isthmian Highway connects Panama City and Colón. In 2007 there were 436,200 passenger cars, 174,500 lorries and vans and 20,100 buses and coaches. There were 425 road accident fatalities in 2007.

#### Rail

The 1,435 mm gauge Ferrocarril de Panama, which connects Ancón on the Pacific with Cristóbal on the Atlantic along the bank of the Panama Canal, is the principal railway. Traffic in 2004 amounted to 77,000 passengers and 700,000 tonnes of freight. The United Brands Company runs 376 km of railway, and the Chiriquí National Railroad 171 km.

#### Civil Aviation

There is an international airport at Panama City (Tocumén International). The national carrier is COPA, which flew to 15 different countries in 2003. In 2003 scheduled airline traffic of Panama-based carriers flew 43m. km and carried 1,313,000 passengers (all on international flights). In 2005 Tocumén International handled 2,710,857 passengers and 100,063 tonnes of freight.

#### Shipping

Panama, a nation with a transcendental maritime career and a strategic geographic position, is the shipping world's preferred flag for ship registry. The Ship Registry System equally accepts vessels of local or international ownership, as long as they comply with

all legal parameters. Ship owners also favour Panamanian registry because fees are low. The Panamanian merchant fleet is the largest in the world. In Jan. 2009 there were 6,842 ships of 300 GT or over registered, totalling 180.87m. GT (representing 22.9% of the world total). Of the 6,842 vessels registered, 2,198 were bulk carriers, 2,174 general cargo ships, 1,078 oil tankers, 798 container ships, 221 chemical tankers, 201 liquid gas tankers and 172 passenger ships.

All the international maritime traffic for Colón and Panama runs through the Canal ports of Cristóbal, Balboa and Manzanillo International.

#### Panama Canal

The Panama Canal Commission is concerned primarily with the operation of the Canal. In Oct. 2002 a new toll structure was adopted based on ship size and type.

Although most of the world's shipping fleet can use the Canal the percentage that is able to is gradually declining as many new ships are too wide for the Canal. A referendum was held in Oct. 2006 on whether to expand the canal and double its capacity. The US\$5.25bn. plan was approved by 78% of voters. The expansion work began in Sept. 2007 and is expected to be completed in 2014.

*Administrator of the Panama Canal Authority:* Alberto Alemán Zubieta.

Particulars of the ocean-going commercial traffic through the Canal are given as follows:

Fiscal year ending 30 Sept.	No. of vessels transiting	Cargo in long tons	Tolls revenue (in US\$1)
2008	13,138	209,705,000	1,316,031,000
2009	12,849	197,896,000	1,436,810,000
2010	12,582	204,816,000	1,480,554,000

Most numerous transits by flag (fiscal year 2010): Panama, 2,636; Liberia, 1,989; Bahamas, 849; Marshall Islands, 703; Hong Kong, 646.

*Statistical Information:* The Panama Canal Authority Corporate Communications Division

*Annual Reports on the Panama Canal,* by the Administrator of the Panama Canal

*Rules and Regulations Governing Navigation of the Panama Canal.* The Panama Canal Authority

Major, J., *Prize Possession: the United States and the Panama Canal, 1903-1979.* 1994

#### Telecommunications

Panama had 3,505,900 telephone subscribers in 2007, or 1,048.6 per 1,000 persons, including 3,010,600 mobile phone subscribers. There were 745,300 internet users in 2007, including 143,900 broadband subscribers.

### SOCIAL INSTITUTIONS

#### Justice

The Supreme Court consists of nine justices appointed by the executive. There is no death penalty. The police force numbered 11,000 in 2007, and includes a Presidential Guard.

The population in penal institutions in Nov. 2008 was 10,036 (295 per 100,000 of national population).

#### Education

Adult literacy was 94% in 2008. Elementary education is compulsory for all children from six to 14 years of age. In 2007 there were 446,176 pupils with 18,183 teaching staff at primary schools and 260,694 pupils with 16,847 teaching staff at secondary schools. In 2006 there were 130,838 students and 11,528 academic staff in tertiary education. The University of Panama (Universidad de Panamá), founded in 1935 in Panama City, is the leading higher education institution.

In 2008 public expenditure on education came to 3.8% of GDP.

**Health**

In 2002 there were 61 hospitals with a provision of 25 beds per 10,000 persons. There were 4,203 physicians, 897 dentists, 3,451 nurses and 612 pharmacists.

**RELIGION**

80% of the population is Roman Catholic, 14% Protestant. The remainder of the population follow other religions (notably Islam). There is freedom of religious worship and separation of Church and State. Clergymen may teach in schools but may not hold public office.

**CULTURE****World Heritage Sites**

Panama has five sites on the UNESCO World Heritage List: the Fortifications on the Caribbean side of Panama: Portobelo-San Lorenzo (inscribed on the list in 1980); Darien National Park (1981); the Archaeological Site of Panamá Viejo and the Historic District of Panamá (1997 and 2003); and the Coiba National Park (2005).

Panama shares a UNESCO site with Costa Rica: the Talamanca Range-La Amistad Reserves (1983 and 1990), an important cross-breeding site for North and South American flora and fauna.

**Press**

In 2005 there were seven dailies with a combined circulation of 191,000.

**Tourism**

In 2006 there were 843,000 non-resident tourists (702,000 in 2005); spending by tourists totalled US\$1,450m. in 2006 (US\$1,108m. in 2005).

**Festivals**

Leading festivals include: the National Folkloric Festival, held annually (Sept.) in Guararé since 1949; the Panama Jazz Festival (Jan.); the International Fair of the Sea, held in Bocas del Toro

province in Sept.; and the International Fair of Changuinola, also in Bocas del Toro in Sept.

**DIPLOMATIC REPRESENTATIVES**

Of Panama in the United Kingdom (40 Hertford St., London, W1J 7SH)

*Ambassador:* Ana Irene Delgado.

Of the United Kingdom in Panama (MMG Tower, Calle 53, Apartado/POB 0816-07946, Panama City)

*Ambassador:* Michael John Holloway, OBE.

Of Panama in the USA (2862 McGill Terr., NW, Washington, D.C., 20008)

*Ambassador:* Mario E. Jaramillo.

Of the USA in Panama (Edificio 783, Avenida Demetrio Basilio Lakas, Panama City 5)

*Ambassador:* Phyllis M. Powers.

Of Panama to the United Nations

*Ambassador:* Pablo Antonio Thalassinos.

Of Panama to the European Union

*Ambassador:* Carlos Constantino Arosemena Ramos.

## KEY HISTORICAL EVENTS

The region was settled by Asian peoples around 50,000 years ago, when New Guinea was still part of the main Australian landmass. 10,000 years ago, at the end of the last ice age, the waters of the Torres Strait cut off New Guinea from Australia, giving rise to separate development of the indigenous peoples. Plant-based agriculture developed about 9,000 years ago in the New Guinea highlands. 2,500 years ago a large migration of Austronesian-speaking peoples settled the coastal areas. These communities developed animal husbandry, pottery and fishing and there is evidence of trade with the southeast Asian mainland. The rugged topography meant that contact between communities was limited and they retained their separate languages and customs. This heterogeneity continued down the centuries, so that today Papua New Guinea has an estimated 1,000 different cultural groups. Spanish and Portuguese explorers reached the island in the early 16th century and the Portuguese are thought to have introduced the kaukau (sweet potato), which became a staple crop. Spain laid claim to the western half of the island in 1545, naming it 'New Guinea' because of the supposed resemblance of its inhabitants to the people of Africa's Guinea coast.

From the late 18th century the British and Dutch competed for control of the island. In 1828 the Dutch claimed the western half as part of the Dutch East Indies, while the eastern half came under British influence. Following an abortive annexation attempt by Australian colonists, Britain declared a protectorate over the southern coast and islands adjacent to the eastern half of New Guinea on 6 Nov. 1884. Germany colonized the northern portion of the eastern half, along with New Britain, New Ireland and Bougainville, an arrangement formalized by the 1885 Anglo-German Agreement.

In 1888 Britain formally annexed the area under its control as British New Guinea and passed its administration to Australia in 1902. On 1 Sept. 1906 the Australian administration renamed it the Territory of Papua, Papua being a Malay word used to describe the Melanesian inhabitants' curly hair. The northeastern

section of the island remained a German colony until the outbreak of the First World War in 1914, when Australian armed forces occupied it. For the next seven years it was under their administration and remained so after 1921, when it became a League of Nations mandated territory. In the Second World War, Allied and Japanese forces fought a prolonged military campaign on the island. It began with a Japanese victory at the Battle of Rabaul, New Britain in Feb. 1942 and continued throughout the war, with Japanese troops in occupation for much of the time until the Allies' victory in Aug. 1945.

In 1947 the northeastern part of the island became the UN Trust Territory of New Guinea, before merging in 1949 with the Territory of Papua to become the Territory of Papua New Guinea. A legislative council was established in 1953, succeeded by a house of assembly in 1964. On 1 Dec. 1973 Australia granted Papua New Guinea self-government. After a vigorous debate over questions of land-reform and citizenship, a constitution was passed and on 16 Sept. 1975 Papua New Guinea became fully independent. It also became a member of the Commonwealth, recognizing the British monarch as its own. In the same year the new state ignored a unilateral declaration of independence by the island of Bougainville and suppressed its campaign of civil disobedience. In 1988 an armed campaign by tribes claiming traditional land rights against the Australian owner of the massive Panguna copper field escalated into a civil war for Bougainville's secession. Fighting lasted nine years and cost an estimated 20,000 lives before a permanent truce was signed in April 1998. Bougainville gained autonomy in 2005 and is expected to hold a referendum on full independence in the future.

Political volatility caused frequent changes of government in Papua New Guinea during its first three decades of independence. In 2002, following violence in the general election, the electoral system was changed to encourage stable government. The deployment of Australian police on the island in 2003 caused resentment and from 2005, under a new agreement between the two governments, they operated in smaller numbers and with reduced powers. Despite its considerable mineral resources, the country's economy has stagnated in recent years; the difficulty of establishing land ownership has contributed to this, as has the need to protect the environment in what remains a largely subsistence culture. In 2006 the United Nations downgraded Papua New Guinea's status to least developed nation.

In 2011 Papua New Guinea experienced a leadership crisis between Sir Michael Somare and Peter O'Neill. In Aug. 2011, with Prime Minister Somare having been out of the country for five months on medical leave, the government declared the post vacant and O'Neill was elected by parliament, replacing acting prime minister Sam Abal. However, in Dec. the Supreme Court ruled the declaration and the election of O'Neill illegal. It also ordered the reinstatement of Somare. Although Somare and a new cabinet were sworn in, O'Neill refused to step down and the power struggle triggered a failed mutiny by rebel soldiers in Jan. 2012. Having the support of the civil service, the police, the defence force and most MPs, O'Neill is effectively in control of the country.

## TERRITORY AND POPULATION

Papua New Guinea extends from the equator to Cape Baganowa in the Louisiade Archipelago to 11° 40' S. lat. and from the border of West Irian to 160° E. long. with a total area of 462,840 sq. km. According to the 2000 census the population was 5,190,786 (2,691,744 males); density, 11.2 per sq. km.

The UN gives a projected population for 2015 of 7-65m.

In 2005, 86.6% of the population lived in rural areas. In 2000 population of Port Moresby (National Capital District) was 254,158. Population of other main towns (2000 census): Lae, 123,398; Madang, 32,318; Mount Hagen, 27,877; Wewak, 27,031; Goroka, 19,523; Kimbe, 14,184. The areas, populations and capitals of the provinces are:

Provinces	Sq. km	Census 2000	Capital
Bougainville	9,300	175,160	Arawa
Central	29,500	183,983	Port Moresby
Chimbu	6,100	259,703	Kundiawa
East New Britain	15,500	220,133	Rabaul
East Sepik	42,800	343,181	Wewak
Eastern Highlands	11,200	432,972	Goroka
Enga	12,800	295,031	Wabag
Gulf	34,500	106,898	Kerema
Madang	29,000	365,106	Madang
Manus	2,100	43,387	Lorengau
Milne Bay	14,000	210,412	Alotau
Morobe	34,500	539,404	Lae
National Capital District	240	254,158	—
New Ireland	9,600	118,350	Kavieng
Oro	22,800	133,065	Popondetta
Sandaun	36,300	185,741	Vanimo
Southern Highlands	23,800	546,265	Mendi
West New Britain	21,000	184,508	Kimbe
Western	99,300	153,304	Daru
Western Highlands	8,500	440,025	Mount Hagen

Tok Pisin (or Pidgin, a creole of English), Hiri Motu and English are all official languages.

### SOCIAL STATISTICS

Estimates, 2008: births, 207,000; deaths, 52,000. Rates, 2008 estimates (per 1,000 population): births, 31.4; deaths, 7.9. Expectation of life at birth in 2007 was 58.7 years for males and 63.0 years for females. Annual population growth rate, 2000–08, 2.5%. Infant mortality, 2005, 54 per 1,000 live births; fertility rate, 2008, 4.1 births per woman.

### CLIMATE

There is a monsoon climate, with high temperatures and humidity the year round. Port Moresby is in a rain shadow and is not typical of the rest of Papua New Guinea. Jan. 82°F (27.8°C), July 78°F (25.6°C). Annual rainfall 40" (1,011 mm).

### CONSTITUTION AND GOVERNMENT

The constitution took effect on 16 Sept. 1975. The head of state is the British sovereign, who is represented by a *Governor-General*, nominated by parliament for six-year terms. A single legislative house, known as the *National Parliament*, is made up of 109 members: 89 district representatives and 20 provincial representatives (MPs). The members are elected by universal suffrage; elections are held every five years. All citizens over the age of 18 are eligible to vote and stand for election. Voting is by secret ballot and follows the limited preferential system. The *Prime Minister*, nominated by parliament and appointed by the Governor-General, selects ministers for the National Executive Council. The government cannot be subjected to a vote of no confidence in the first 18 months of office. The 20 provincial assemblies, comprising elected national MPs, appointed members and elected local government representatives, are headed by a Governor, normally the provincial representative in the National Parliament.

### National Anthem

'Arise, all you sons of this land'; words and tune by T. Shacklady.

### RECENT ELECTIONS

Parliamentary elections were held between 30 June and 14 July 2007. Sir Michael Somare's National Alliance Party won 27 out of 109 seats; Papua New Guinea Party, 8 seats; People's Action Party,

6; Pangu Party, 5; People's Democratic Movement, 5; United Resources Party, 5; People's Progress Party, 4; New Generation Party, 4; People's National Congress Party, 4; Rural Development Party, 4; People's Party, 3; Melanesian Liberal Party, 2; People's Labour Party, 2; PNG Country Party, 2; United Party, 2; Melanesian Alliance Party, 1; National Advance Party, 1; People's First Party, 1; PNG Conservative Party, 1; PNG Labour Party, 1; PNG National Party, 1; ind. 20.

Sir Michael Ogio was elected governor-general by parliament on 14 Jan. 2011.

### CURRENT GOVERNMENT

*Governor-General*: Sir Michael Ogio; b. 1942 (since 20 Dec. 2010—acting until 25 Feb. 2011).

In March 2012 the government comprised:

*Prime Minister and Minister of Finance*: Peter O'Neill; b. 1965 (People's National Congress; in office since 3 Aug. 2011).

*Deputy Prime Minister, Minister for Forestry and Climate Change, and Defence (acting)*: Belden Namah.

*Minister of Agriculture*: Sir Puka Temu. *Bougainville Affairs*: Steven Pirika. *Civil Aviation*: Puri Ruing. *Communication*: Jim Miringtoro. *Community Development*: Andrew Mald. *Correctional Services*: Sai Besoe. *Education*: Theo Zurenuoc. *Environment*: Thomson Harokaqeh. *Fisheries*: Job Pomat. *Foreign Affairs and Immigration*: Ano Pala. *Health*: Jamie Maxtone Graham. *Higher Education*: David Arore. *Housing*: Ken Fearweather. *Implementation and Rural Development*: Moses Maladina. *Inter-Government Relations*: Mark Maipakai. *Internal Security*: John Boito. *Justice and Attorney General*: Allan Marat. *Labour and Industrial Relations*: Martin Aini. *Lands*: Lucas Dekena. *Mining*: Byron Chan. *National Planning*: Sam Basil. *Petroleum and Energy*: William Duma. *Public Enterprises*: Sir Mekere Morauta. *Public Service*: Bart Philemon. *Sports*: Sali Subam. *Tourism*: Benjamin Philip. *Trade, Commerce and Industry*: Charles Abel. *Transport*: Francis Awesa. *Treasury and Border Development*: Don Polye. *Minister Assisting the Prime Minister on Constitutional Matters*: Waka Goi.

### CURRENT LEADERS

#### Peter O'Neill

#### Position

Prime Minister

#### Introduction

Peter O'Neill was elected by MPs to succeed Sir Michael Somare in Aug. 2011. After Somare refused to acknowledge the result, there were two rival administrations in late 2011. Now confirmed in office, O'Neill, a businessman and former treasury minister, has pledged to fight corruption and develop the nation's infrastructure and services.

#### Early Life

Born on 13 Feb. 1965 in Pangia District in the Southern Highlands Province of Papua New Guinea, O'Neill graduated in accountancy and commerce from the University of Papua New Guinea in 1988. He practised as a chartered accountant before going into the real estate business. From 1993–97 he was executive chairman of Pangia Enterprises and from 1997–99 served as executive chairman of Pacific Finance, which managed state-owned enterprises including the PNG Banking Corporation and the National Provident Fund (NPF).

O'Neill came in for criticism when several of these public enterprises failed, though his supporters praised his financial management and efforts to improve transparency. In 1999 he became executive chairman of Remington Technologies and in 2002 was elected to parliament for the People's National Congress Party (PNC), representing the constituency of Ialibu-Pangia. From 2002–03 he served as minister for labour and industrial

relations and from 2003–04 was minister for public service and leader of government business.

As head of the PNC, he led the opposition from 2004–07. In 2007 he was appointed minister for public service in Somare's National Alliance Party-led coalition government and from 2010–11 also took on the finance and treasury portfolios. In office, he supported the liquefied natural gas projects undertaken in partnership with foreign companies. On 2 Aug. 2011, during Somare's prolonged absence from government for medical treatment, MPs from across the political spectrum elected O'Neill prime minister by 70 votes to 24.

#### Career in Office

O'Neill's early months were dominated by political instability as Somare challenged the legality of his election. In Dec. 2011 Somare formed a rival administration after the Supreme Court found in favour of the ex-incumbent. Somare's government was initially recognized by Governor-General Michael Ogio but he later reversed his decision and declared O'Neill's premiership to be legitimate. By early 2012 O'Neill had gained widespread recognition, though Somare pursued his legal challenge.

Parliamentary elections were scheduled for June 2012. O'Neill has to meet urgent demands to develop the education and health sectors and to improve the national infrastructure. He has pledged to combat corruption and will be under pressure to manage a natural gas and minerals boom in the national interest.

#### DEFENCE

The Papua New Guinea Defence Force had a total estimated strength of 3,100 in 2007 consisting of land, maritime and air elements. The Navy is based at Port Moresby and Manus. Personnel numbered around 400 in 2007. There is an air force, 200 strong in 2007, but it does not possess any combat capable aircraft.

Defence expenditure in 2008 totalled US\$35m. (US\$6 per capita), representing 0.6% of GDP.

#### ECONOMY

Agriculture accounted for 19.1% of GDP in 2006, industry 45.2% and services 35.7%.

#### Overview

Papua New Guinea has experienced sound growth and macroeconomic stability since 2002. The country has large deposits of oil, gas, gold, copper, timber and silver, as well as abundant fisheries. The formal economy is focused on large-scale export of natural resources, while the informal sector consists of subsistence activities by a large proportion of the rural population.

Growth has remained strong through the global economic crisis, particularly in the extractive, construction and telecommunications industries. Prudent macroeconomic management in previous years provided fiscal space to adjust to the external shock. A significant driver in the economy is the Liquefied Natural Gas NG Project, approved in Dec. 2009 with production scheduled to start in 2014. Developing infrastructure remains crucial for further private sector growth.

Poverty remains a concern, however, with an estimated 40% of people living on less than US\$1 per day.

#### Currency

The unit of currency is the *kina* (PGK) of 100 *toea*. The kina was floated in Oct. 1994. Foreign exchange reserves were US\$543m. in July 2005, gold reserves 63,000 troy oz and total money supply was K2,765m. Inflation was 10.8% in 2008 and 6.9% in 2009.

#### Budget

In 2009 revenues totalled K6,651.0m. (tax revenue, 74.8%) and expenditures K6,688.0m. (current expenditure, 62.3%).

VAT is 10%.

#### Performance

Real GDP growth was 5.5% in 2009, rising to 7.0% in 2010. Total GDP in 2010 was US\$9.5bn.

#### Banking and Finance

The Bank of Papua New Guinea (*Governor*, Loi Martin Bakani) assumed the central banking functions formerly undertaken by the Reserve Bank of Australia on 1 Nov. 1973. A national banking institution, the Papua New Guinea Banking Corporation, has been established. This bank has assumed the Papua New Guinea business of the Commonwealth Trading Bank of Australia.

In 2002 there were seven commercial banks (Australia and New Zealand Banking Group; Bank of Hawaii; Bank of South Pacific; Maybank; MBf Finance; Papua New Guinea Banking Corporation; Westpac Bank) and a Rural Development Bank.

Total commercial bank deposits, 1992, K1,318.2m. Total savings account deposits, 1992, K226.8m. In addition, the Agriculture Bank of Papua New Guinea had assets of K82.6m. in 1992, and finance companies and merchant banks had total assets of K198.4m.

There is a stock exchange in Port Moresby.

#### ENERGY AND NATURAL RESOURCES

##### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita.

##### Electricity

Installed capacity was an estimated 0.7m. kW in 2007. Production in 2007 was estimated at 3.05bn. kWh, around 29% of it hydroelectric. Consumption per capita was an estimated 258 kWh.

##### Oil and Gas

Natural gas reserves in 2008 were 440bn. cu. metres; output in 2006 was 283m. cu. metres. Crude oil production (2007), 2.1m. tonnes. Oil predominantly comes from the Iagifu field in the Southern Highlands. There were 240m. bbls of proven oil reserves in 2007.

##### Minerals

In 2004 the mineral sector produced 20.8% of GDP. Copper is the main mineral product. Gold, copper and silver are the only minerals produced in quantity. The Misima open-pit gold mine was opened in 1989 but its resources were depleted by the end of 2001. The Porgera gold mine opened in 1990 with an expected life of 20 years. Major copper deposits in Bougainville have proven reserves of about 800m. tonnes; mining was halted by secessionist rebel activity. Copper and gold deposits in the Star Mountains of the Western Province are being developed by Ok Tedi Mining Ltd at the Mt Fubilan mine. Production of gold commenced in 1984 and of copper concentrates in 1987. In 2005 Ok Tedi Mining Ltd produced 192,978 tonnes of copper and 16 tonnes of gold. Gold mining also began at Lihir in 1997. In 2005 total gold production was 67 tonnes; silver production in 2002 was 64 tonnes.

##### Agriculture

In 2002 agriculture employed 73% of the economically active population. In 2002 there were approximately 220,000 ha. of arable land and 650,000 ha. of permanent cropland. Minor commercial crops include pyrethrum, tea, peanuts and spices. Locally consumed food crops include sweet potatoes, maize, taro, bananas, rice and sago. Tropical fruits grow abundantly. There is extensive grassland. The sugar industry has made the country self-sufficient in this commodity while a beef-cattle industry is being developed.

Production (2002, in 1,000 tonnes): bananas, 860; coconuts, 513; sweet potatoes, 490; sugarcane, 370; palm oil, 316; yams, 280.

Livestock (2003 estimates): pigs, 1.8m.; cattle, 90,000; chickens, 4m.

### Forestry

The forest area totalled 29.44m. ha. in 2005 (65.0% of the land area). Timber production is important for both local consumption and export. Timber production was 7.24m. cu. metres in 2007.

### Fisheries

Tuna is the major resource. In 2005 the fish catch was an estimated 250,280 tonnes (85% sea fish).

### INDUSTRY

Secondary and service industries are expanding for the local market. The main industries are food processing, beverages, tobacco, timber products, wood and fabricated metal products. Industry accounted for 45.2% of GDP in 2006, with manufacturing contributing 6.1%. Production (2002): palm oil, 370,000 tonnes; copra, 110,000 tonnes; wood-based panels, 79,000 cu. metres; sawnwood, 70,000 cu. metres.

### Labour

In 2000 there were 2,344,734 persons in employment (51.3% males). The rate of unemployment was 2.8%.

### INTERNATIONAL TRADE

Australian aid amounts to an annual \$A300m. The 'Pactra II' agreement of 1991 established a free trade zone with Australia and protects Australian investments. Foreign debt was US\$1,849m. in 2005.

### Imports and Exports

Imports in 2008 were US\$3,550m. (US\$2,945m. in 2007); exports were US\$5,805m. (US\$4,683m. in 2007).

The main imports in terms of value are machinery and transport equipment, manufactured goods, and food and live animals; and the main exports crude petroleum, gold and logs.

Of imports in 2001, Australia furnished 60.0%; Japan, 8.5%; Singapore, 7.8%; USA, 7.1%. Of exports in 2001, Singapore took 27.5%; Japan, 13.2%; Australia 10.6%; China, 4.4%.

### COMMUNICATIONS

#### Roads

In 2002 there were 19,600 km of roads, only about 690 km of which were paved. There were 38,200 passenger cars in use in 2007 and 11,300 lorries and vans.

#### Civil Aviation

Jacksons International Airport is at Port Moresby. The state-owned national carrier is Air Niugini. In 2003 there were scheduled international flights to Brisbane, Cairns, Honiara, Manila, Singapore, Sydney and Tokyo. There are a total of 177 airports and airstrips with scheduled services.

#### Shipping

There are 12 entry and four other main ports served by five major shipping lines; the Papua New Guinea Shipping Corporation is state-owned. In Jan. 2009 there were 55 ships of 300 GT or over registered, totalling 44,000 GT.

#### Telecommunications

In 2007 there were 360,000 telephone subscribers, or 56.9 for every 1,000 inhabitants. There were 300,000 mobile phone subscribers in 2007 and 110,000 internet users in 2006. In Dec. 2004 the government rejected a bid by a South African joint venture to acquire a 51% stake in the state-owned telecommunications company Telikom PNG.

### SOCIAL INSTITUTIONS

#### Justice

The judicial system consists of a Supreme Court, a National Court, and district and local courts. The Supreme Court sittings are usually held with three or five judges. In 2004 there were 64,709 court cases registered of which 16,459 were civil cases. The death

penalty for wilful murder was abolished in 1970 but reintroduced in 1991, although there have not been any executions since 1954.

The population in penal institutions in April 2005 was 4,056 (69 per 100,000 of national population).

### Education

Obligatory universal primary education is a government objective. In 1990 about two-thirds of eligible children were attending school. In 2001 there were 3,055 elementary and primary schools with 395,129 pupils and 11,307 teachers, 77,451 pupils in secondary schools (2,187 teachers) and 14,333 students in institutes of higher education. There are six universities: the University of Papua New Guinea (UPNG), Port Moresby; the Papua New Guinea University of Technology, Lae; Divine Word University, Madang; Pacific Adventist University, Boroko; the University of Goroka; and the University of Vudal, Rabaul. UPNG, founded in 1965, has two campuses in the capital, five provincial open campuses and 13 study centres. In 2002 there were also ten colleges, eight nursing schools and three academic institutes.

Adult literacy rate was an estimated 60.1% in 2009 (63.6% among males and 56.5% among females).

In 2000–01 total expenditure on education came to 2.4% of GNP and 17.5% of total government spending.

### Health

In 2000 there were 275 physicians, 90 dentists and 2,841 nurses. Provision of hospital beds in 1993 was 34 per 10,000 persons.

### RELIGION

At the 2000 census there were 4.93m. Christians: Roman Catholics made up 27.0%; Lutherans, 19.5%; United Church, 11.5%; Anglicans, 3.2%. In 1998 the Catholic Church had four archdioceses (Madang, Mount Hagen, Port Moresby and Rabaul), 14 dioceses, 340 parishes and 540 priests.

### CULTURE

#### World Heritage Sites

There is one UNESCO site in Papua New Guinea: Kuk Early Agricultural Site (inscribed on the list in 2008).

#### Press

In 2008 there were two daily newspapers (the *Papua New Guinea Post-Courier* and the *National*) and a number of weeklies and monthlies. The *Papua New Guinea Post-Courier* is the oldest (1969) and most widely read, with a daily circulation of 30,000 (2007).

#### Tourism

In 2007 there were 104,000 tourists; spending by tourists totalled US\$4m. in 2005.

#### Festivals

Alongside the major Christian festivals several cultural shows are held, in Enga (late July), at Mount Hagen (Western Highlands; late Aug.) and at Goroka (Eastern Highlands; mid-Sept.). The Tumbuan Mask Festival takes place at Rabaul (July) and the Hiri Moale Festival in Port Moresby (Sept.) was established to preserve the trading expeditions between the Motu-Koitabu people and the Erema (Kerema). Independence Day is celebrated on 16 Sept.

### DIPLOMATIC REPRESENTATIVES

Of Papua New Guinea in the United Kingdom (3rd Floor, 14 Waterloo Pl., London, SW1Y 4AR)  
*High Commissioner:* Winnie Anna Kiap.

Of the United Kingdom in Papua New Guinea (Sec 411 Lot 1 and 2, Kiroki St., Waigani, Port Moresby)  
*High Commissioner:* Jackie Barson.

Of Papua New Guinea in the USA (1779 Massachusetts Ave., NW, Washington, D.C., 20036)  
*Ambassador:* Evan Paki.

Of the USA in Papua New Guinea (Douglas St., Port Moresby)  
*Ambassador:* Teddy B. Taylor.

Of Papua New Guinea to the United Nations  
*Ambassador:* Robert Aisi.

Of Papua New Guinea to the European Union  
*Ambassador:* Peter Pulkiye Maginde.

## **Bougainville**

The region of Bougainville, as part of New Guinea, became a United Nations Trust Territory in 1947 under the jurisdiction of Australia. Bougainville declared independence in 1975 but the

uprising was suppressed and the islands became part of the North Solomons Province of the newly independent Papua New Guinea. Following tensions between landowners and Rio Tinto, the owners of the Panguna copper mine, conflict between separatists and Papua New Guinea began in 1989, lasting nearly a decade. A ceasefire was agreed in 1998, overseen by the United Nations. The Bougainville Peace Agreement was signed in Aug. 2001, allowing for the creation of an autonomous government and a referendum on full independence 10–15 years later. After the promulgation of a constitution, elections were held for the autonomous government in May–June 2005. A referendum on independence is now expected to take place between 2015 and 2020.

Area, 9,300 sq. km (3,600 sq. miles); population (2000), 175,160. The autonomous region consists of the main Bougainville island, Buka island and several smaller island groups. The government is currently based at Buka but the capital city will eventually revert to the former capital, Arawa.

In presidential elections held in May 2010 John Momis was elected with 52.4% of votes cast, defeating incumbent president James Tanis who took 20.9%. There were five other candidates. Momis was sworn in on 10 June.

Agriculture is the mainstay of Bougainville's economy. Major crops include cocoa (production in 2006, 16,000 tonnes) and copra (12,472 tonnes). However, the region is still reliant on grants and donors, raising only 20% of its 2007 budget internally. New exploration for minerals is banned but the government is considering reopening Panguna. There is an airport at Buka.

## KEY HISTORICAL EVENTS

Paraguay was occupied by the Spanish in 1537 and became a Spanish colony as part of the viceroyalty of Peru. The area gained its independence, as the Republic of Paraguay, on 14 May 1811. Paraguay was then ruled by a succession of dictators. A devastating war fought from 1865 to 1870 between Paraguay and a coalition of Argentina, Brazil and Uruguay reduced Paraguay's population from about 600,000 to 233,000. Further severe losses were incurred during the war with Bolivia (1932–35) over territorial claims in the Chaco inspired by the unfounded belief that minerals existed in the territory. A peace treaty by which Paraguay obtained most of the area her troops had conquered was signed in July 1938.

A new constitution took effect in Feb. 1968 under which executive power is discharged by an executive president. Gen. Alfredo Stroessner Mattiauda was re-elected seven times between 1958 and 1988. Since then, Paraguay has had more or less democratic government. On 23 March 1999 Paraguay's vice-president Luis Maria Argaña was assassinated. The following day, Congress voted to impeach President Raúl Cubas who was said to be implicated in the murder. He then resigned. The victory of Fernando Lugo of the Patriotic Alliance for Change in the April 2008 presidential election brought to an end the 61-year rule of the Colorado Party, at the time the world's longest-ruling party.

## TERRITORY AND POPULATION

Paraguay is bounded in the northwest by Bolivia, northeast and east by Brazil and southeast, south and southwest by Argentina. The area is 406,752 sq. km (157,042 sq. miles).

The 2002 census population was 5,163,198 (2,603,242 males), giving a density of 12.7 per sq. km. In 2005, 58.5% lived in urban areas.

The UN gives a projected population for 2015 of 7.03m.

In 2002 the capital, Asunción, had a population of 512,112. Other major cities (2002 census populations) are: Ciudad del Este, 222,274; San Lorenzo, 204,356; Luque, 185,127.

There are 17 departments and the capital city. Area and population at the 2002 census:

Department	Area in sq. km	Population
Asunción (city) <sup>1</sup>	117	512,112
Central	2,465	1,362,893
Alto Paraná	14,895	558,672
Itapúa	16,525	453,692
Caaguazú	11,474	435,357
San Pedro	20,002	318,698
Cordillera	4,948	233,854
Paraguari	8,705	221,932
Concepción	18,051	179,450
Guairá	3,846	178,650
Canendiyú	14,667	140,137
Caazapá	9,496	139,517
Amambay	12,933	114,917
Misiones	9,556	101,783
Neembucú	12,147	76,348
Oriental	159,827	5,028,012
Presidente Hayes	72,907	82,493
Boquerón <sup>2</sup>	91,669	41,106
Alto Paraguay <sup>3</sup>	82,349	11,587
Occidental	246,925	135,186

<sup>1</sup>Capital district. <sup>2</sup>Incorporates former department of Nueva Asunción. <sup>3</sup>Incorporates former department of Chaco.

The population is mixed Spanish and Guaraní Indian. There are 89,000 unassimilated Indians of other tribal origin, in the Chaco and the forests of eastern Paraguay. The official languages are Spanish and Guaraní: 24.8% of the population speak only Guaraní; 51.5% are bilingual (Spanish/Guaraní); and 7.6% speak only Spanish.

Mennonites, who arrived in three groups (1927, 1930 and 1947), are settled in the Chaco and eastern Paraguay. There are also Korean and Japanese settlers.

## SOCIAL STATISTICS

2006 births, 112,659; deaths, 19,298. Rates, 2006 (per 1,000 population): birth, 18.7; death, 3.2. Annual population growth rate, 2000–05, 2.0%. Expectation of life, 2007: 69.6 years for males and 73.8 for females. Infant mortality, 2005, 20 per 1,000 live births; fertility rate, 2008, 3.0 births per woman.

## CLIMATE

A tropical climate, with abundant rainfall and only a short dry season from July to Sept., when temperatures are lowest. Asunción, Jan. 81°F (27°C), July 64°F (17.8°C). Annual rainfall 53" (1,316 mm).

## CONSTITUTION AND GOVERNMENT

On 18 June 1992 a Constituent Assembly approved a new constitution. The head of state is the *President*, elected for a non-renewable five-year term. Parliament consists of an 80-member *Chamber of Deputies*, elected from departmental constituencies,

and a 45-member *Senate*, elected from a single national constituency.

### National Anthem

'Paraguayos, república o muerte!' ('Paraguayans, republic or death!'); words by F. Acuña de Figueroa, tune by F. Dupuy.

### RECENT ELECTIONS

Parliamentary and presidential elections were held on 20 April 2008. Fernando Lugo of the Patriotic Alliance for Change (APC) was elected president with 42.3% of votes cast. Bianca Ovelar of the National Republican Association–Colorado Party (ANR), which had held power for the previous 61 years, won 31.8% and Lino Oviedo of the National Union of Ethical Citizens (UNACE) won 22.8%. Turnout was 65.6%.

In the parliamentary elections the ANR won 30 seats in the Chamber of Deputies, the Authentic Radical Liberal Party (PLRA) won 27 seats, the UNACE won 15, the Beloved Fatherland Movement (MPQ) 3, the APC 2, the Popular Movement Tekojoja 1, the Democratic Progressive Party (PDP) 1 and the Departmental Alliance Boquerón 1. In the Senate the ANR won 15 seats, the PLRA won 14, the UNACE 9, the MPQ 4, the Popular Movement Tekojoja 1, the PDP 1 and the Party for a Country of Solidarity (PPS) 1.

### CURRENT GOVERNMENT

*President:* Fernando Lugo; b. 1951 (APC; sworn in 15 Aug. 2008).

*Vice-President:* Federico Franco.

In March 2012 the cabinet comprised:

*Minister of Agriculture and Livestock:* Enzo Cardozo Jiménez. *Communications:* Augusto Dos Santos. *Defence:* Catalino Roy Ortiz. *Education and Culture:* Luis Alberto Riart. *Emergency Preparedness:* Camilo Soares Machado. *Finance:* Dionisio Cornelio Borda. *Foreign Affairs:* Jorge Lara Castro. *Industry and Commerce:* Francisco Rivas Almada. *Interior:* Carlos Filizzola. *Justice and Labour:* Humberto Blasco Gavilán. *Presidency:* Miguel López Perito. *Public Health and Social Welfare:* Esperanza Martínez. *Public Works:* Cecilio Pérez Bordón.

*Office of the President (Spanish only):*

<http://www.presidencia.gov.py>

### CURRENT LEADERS

#### Fernando Armindo Lugo Mendes

##### *Position*

President

##### *Introduction*

Fernando Lugo was elected president in Aug. 2008 for a five-year term. A former bishop of San Pedro, he is leader of the Christian Democratic Party and head of a 12-party coalition, the Patriotic Alliance for Change (APC). He is the first president from a party other than the National Republican Association (ANR, or Colorado Party) since 1947.

##### *Early Life*

Fernando Lugo was born on 30 May 1951 in the San Pedro del Parana District of Itapúa. His parents were members of the ruling Colorado Party while Lugo's uncle, Epifanio Mendez Fleitas, was a Colorado Party dissident and the main rival of Gen. Alfredo Stroessner. During Stroessner's rule (1954–89), both Lugo's parents were arrested while his three brothers and uncle spent periods in exile.

In Oct. 1951 the Lugo family moved to Itapúa's capital, Encarnación, where Lugo completed his education and qualified as a teacher in 1969. He taught in the San Pedro department and in 1970 joined the Catholic Society of the Divine Word. In 1972 he took religious vows and in 1977 was ordained. He went as a missionary to Ecuador, where he spent five years and became

influenced by liberation theology. Returning to Paraguay in 1982, the Church, under pressure from the Stroessner regime, sent Lugo to Rome to study at the Pontificia Università Gregoriana. In 1987 he graduated in sociology and returned to Paraguay. He taught at the Superior Institute of Theology in Asunción, set up national and regional Episcopal commissions and, after Stroessner's fall in 1989, pressed for land reform. In 1992 he became vice president of the Confederation of Religious Leaders and in 1994 was made bishop of the diocese of San Pedro.

As internal rifts weakened the Colorado Party, Lugo's public profile rose and he became a leading non-partisan critic of the government. In 2005 he resigned his bishopric and in Dec. 2006 applied to be laicized to allow him to run for president. In Oct. 2007 he joined the Christian Democratic Party in a 12-party coalition and won the presidential election of April 2008. The Pope accepted his laicism in July 2008.

##### *Career in Office*

Having campaigned on a platform of social reform, Lugo needed to confront the country's widespread poverty and social inequality and promised to enact land reform, prompting conservatives to label him a leftist ally of President Hugo Chávez of Venezuela. In 2009 he initiated modest reforms in education and health care and negotiated an agreement with neighbouring Brazil to increase Paraguay's revenue from their jointly-controlled Itaipu hydro-electric plant. However, he has encountered increasing hostility and resistance within Congress and from the armed forces, and had his moral authority undermined by paternity claims made against him by three women. In Aug. 2010 he was diagnosed with cancer but said that he would continue in office.

### DEFENCE

The army, navy and air forces are separate services under a single command. The President of the Republic is the active C.-in-C. Conscription is for 12 months (two years in the navy).

In 2008 defence expenditure totalled US\$132m. (US\$19 per capita), representing 0.8% of GDP.

#### **Army**

Strength (2007) 7,600 (1,500 conscripts). In addition there is a paramilitary Special Police Force numbering 14,800 (4,000 conscripts).

#### **Navy**

Personnel in 2007 totalled 1,950 (or which 850 conscripts) including 900 marines (of which 200 conscripts) and 100 naval aviation.

#### **Air Force**

The air force had a strength of 1,100 in 2007 (200 conscripts). There are ten combat capable aircraft including Lockheed T-33s.

### ECONOMY

In 2006 agriculture accounted for 21.0% of GDP, industry 18.3% and services 60.7%.

#### **Overview**

In the 1990s growth was slow but steady until 1998 when the economy stagnated. In 2002 performance slumped again, partly as a knock-on from the recession in Argentina, leading to a request for IMF help. There was a return to growth from 2003–08, with restored confidence in public institutions, structural reform and debt reduction leading to fiscal account stability. Economic growth was at its highest level since the 1970s, boosted by strong exports, but the economy began to contract again in 2009.

There are few mineral resources and the economy is focused on agriculture, which contributed 21.0% of GDP in 2006. 42% of the population live in rural areas and agriculture (particularly meat and soy) accounts for nearly all registered exports. The country is also a major exporter of hydro-electric power.

Commercialization of the agricultural and timber production sectors has led to forest clearances. Combined with rising population levels, this has accelerated movement into urban areas. There is a large informal component of the economy and most enterprises are small. A growing concern is the lack of infrastructure to serve basic needs. Some 60% of the population is in poverty and only 35% of the rural population has access to drinking water. Owing to high food prices, absolute poverty increased in the period 2002–07. Other problems include endemic corruption and Paraguay's reputation as a centre for smuggling, organized crime and money laundering.

### Currency

The unit of currency is the *guaraní* (PYG), notionally divided into 100 *céntimos*. In July 2005 total money supply was 4,733.6bn. guaraníes and foreign exchange reserves were US\$1,109m. Inflation was 10.2% in 2008 and 2.6% in 2009.

### Budget

Budgetary central government revenue and expenditure in 1bn. guaraníes:

	2005	2006	2007
Revenue	8,430.0	9,556.5	10,812.4
Expenditure	7,157.4	8,175.6	8,975.2

Principal sources of revenue in 2007: taxes on goods and services, 4,835.4bn. guaraníes; taxes on income, profits and capital gains, 1,228.5bn. guaraníes; taxes on international trade and transactions, 837.6bn. guaraníes. Main items of expenditure by economic type in 2007: compensation of employees, 4,456.1bn. guaraníes; social benefits, 1,442.6bn. guaraníes; grants, 1,218.2bn. guaraníes.

VAT is 10% (reduced rate, 5%).

### Performance

The economy contracted by 3.8% in 2009 but there was growth of 15.0% in 2010, among the highest rates in the world. Total GDP in 2010 was US\$18.5bn.

### Banking and Finance

The Central Bank is a state-owned autonomous agency with the sole right of note issue, control over foreign exchange and the supervision of commercial banks (*Governor*, Jorge Raúl Corvalán Mendoza). There is a Superintendencia de Bancos under Edgar Virgilio Paredes Álvarez. In 2002 there were five commercial banks and 11 foreign banks.

There is a stock exchange in Asunción.

## ENERGY AND NATURAL RESOURCES

### Environment

Paraguay's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.6 tonnes per capita in 2008.

### Electricity

Installed capacity was 8.1m. kW in 2007. Output (2007), 53.71bn. kWh (almost exclusively hydro-electric); consumption per capita in 2007 was 1,402 kWh. Paraguay is the third largest exporter of electricity (after France and Germany), with 45.1bn. kWh in 2007.

### Minerals

The country is poor in minerals. Limestone, gypsum, kaolin and salt are extracted. Deposits of bauxite, iron ore, copper, manganese and uranium exist. 2006 estimated output: kaolin, 66,000 tonnes; limestone, 16,000 tonnes.

### Agriculture

In 2002, 33.4% of the economically active population were engaged in agriculture. In 2002 there were approximately 3.02m. ha. of arable land and 95,000 ha. of permanent crops.

Output (in 1,000 tonnes), 2002: cassava, 4,430; soybeans, 3,300; sugarcane, 3,210; maize, 867; wheat, 359; oranges, 207; seed cotton, 124; sweet potatoes, 124; watermelons, 115; rice, 105. *Yerba maté*, or strongly flavoured Paraguayan tea, continues to be produced but is declining in importance.

Livestock (2003 estimates): 8.81m. cattle, 3.25m. pigs, 410,000 sheep, 360,000 horses and 16m. chickens.

### Forestry

The area under forests in 2005 was 18.48m. ha., or 46.5% of the total land area. Timber production was 10.30m. cu. metres in 2007.

### Fisheries

In 2005 the catch totalled approximately 21,000 tonnes, exclusively from inland waters.

## INDUSTRY

Paraguay is one of the least industrialized countries in Latin America. Industries include meat packing, sugar processing, cement, textiles, brewing, wood products and consumer goods. In 2006 industry accounted for 18.3% of GDP, with manufacturing contributing 11.8%.

### Labour

The labour force in 2002 totalled 1,980,492 (67.9% males). In 2002, 27% of the economically active population were engaged in agriculture, fisheries, hunting and forestry.

## INTERNATIONAL TRADE

Foreign debt was US\$3,120m. in 2005.

### Imports and Exports

Trade in US\$1m.:

	2003	2004	2005	2006	2007
Imports c.i.f.	2,227.5	3,097.4	3,714.9	5,878.8	5,844.7
Exports f.o.b.	1,241.5	1,625.7	1,687.8	1,906.4	2,784.7

Main imports in 2006: machinery and transport equipment, 46.9%; chemicals and chemical products, 12.2%; petroleum oils, 11.8%; metal tools, 2.6%. Main exports, 2006: soybeans, 23.0%; beef, 21.5%; maize, 8.7%; oilcake and other solid residues, 7.2%. Main import suppliers in 2006: China, 25.1%; Brazil, 19.0%; Argentina, 13.0%; USA, 6.0%. Main export markets, 2006: Uruguay, 22.0%; Brazil, 17.2%; Russia, 11.9%; Cayman Islands, 9.5%.

## COMMUNICATIONS

### Roads

In 2002 there were around 29,500 km of roads, of which 53.9% were paved. Passenger cars numbered 240,700 in 2007, there were 248,100 lorries and vans, 12,800 buses and coaches, and 134,900 motorcycles and mopeds. There were 845 fatalities as a result of road accidents in 2007.

### Rail

The President Carlos Antonio López (formerly Paraguay Central) Railway runs from Asunción to Encarnación, on the Río Alto Paraná, with a length of 441 km (1,435 mm gauge), and connects with Argentine Railways over the Encarnación-Posadas bridge opened in 1989. In 2003 freight carried came to 210,000 tonnes.

### Civil Aviation

There is an international airport at Asunción (Silvio Pettirossi). The main Paraguay-based carrier is TAM Airlines (formerly TAM Mercosur). In 2003 scheduled airline traffic of Paraguay-based carriers flew 6m. km, carrying 299,000 passengers (288,000 on international flights). In 2000 Asunción handled 466,000 passengers (422,000 on international flights) and 6,600 tonnes of freight.

### Shipping

Asunción, the chief port, is 1,500 km from the sea. In Jan. 2009 there were 32 ships of 300 GT or over registered, totalling 44,000 GT.

### Telecommunications

In 2008 there were 491,000 main (fixed) telephone lines; mobile phone subscribers numbered 5,954,400 in 2008 (95.5 per 100 persons). There were 460,000 PCs in use in 2005 and 894,200 internet users in 2008.

### SOCIAL INSTITUTIONS

#### Justice

The 1992 constitution confers a large measure of judicial autonomy. The highest court is the Supreme Court with nine members. Nominations for membership must be backed by six of the eight members of the Magistracy Council, which appoints all judges, magistrates and the electoral tribunal. The Council comprises elected representatives of the Presidency, Congress and the bar. There are special Chambers of Appeal for civil and commercial cases, and criminal cases. Judges of first instance deal with civil, commercial and criminal cases in six departments. Minor cases are dealt with by Justices of the Peace.

The Attorney-General represents the State in all jurisdictions, with representatives in each judicial department and in every jurisdiction.

The population in penal institutions in Nov. 2008 was 6,031 (97 per 100,000 of national population). The death penalty was abolished for all crimes in 1992.

#### Education

Adult literacy was 95% in 2007. Education is free and nominally compulsory. In 2005 there were 933,995 pupils at primary schools (with 33,434 teaching staff in 2004) and 529,309 at secondary level (with 44,440 teaching staff in 2004). There were 156,167 students in tertiary education in 2005. Paraguay's leading institute of higher education is the National University of Asunción (Universidad Nacional de Asunción), the country's oldest university, founded in 1889.

In 2007 public expenditure on education came to 4.0% of GDP and 11.9% of total government spending.

#### Health

In 2003 there were 1,117 health establishments (including 84 hospitals) with 7,167 beds. There were 6,400 physicians, 1,947 dentists and 1,089 nurses in 2000.

### RELIGION

Religious liberty was guaranteed by the 1967 constitution. Article 6 recognized Roman Catholicism as the official religion of the

country. It had 3.5m. adherents in 2002. There are Mennonite, Anglican and other communities as well. In 2002 followers of other religions (mostly Protestants) totalled 322,000.

### CULTURE

#### World Heritage Sites

Paraguay has one site on the UNESCO World Heritage List: the Jesuit Missions of La Santísima Trinidad de Paraná and Jesús de Tavarangue (inscribed on the list in 1993).

#### Press

In 2006 there were four daily newspapers with a combined circulation of 130,000.

#### Tourism

In 2005 there were 341,000 foreign tourists, spending US\$96m.

### DIPLOMATIC REPRESENTATIVES

Of Paraguay in the United Kingdom (3rd Floor, 344 High St. Kensington, London, W14 8NS)  
*Ambassador:* Miguel Solano López.

Of the United Kingdom in Paraguay (embassy in Asunción closed in April 2005)

*Ambassador:* Shan Morgan (resides in Buenos Aires, Argentina).

Of Paraguay in the USA (2400 Massachusetts Ave., NW, Washington, D.C., 20008)

*Ambassador:* Rigoberto Gauto.

Of the USA in Paraguay (1776 Mariscal López Ave., Asunción)

*Ambassador:* James H. Thessin.

Of Paraguay to the United Nations

*Ambassador:* José Antonio dos Santos.

Of Paraguay to the European Union

*Ambassador:* Mario Francisco Sandoval Fernández.

## KEY HISTORICAL EVENTS

Hunter-gatherers lived in Peru from at least 9000 BC. Irrigation canals discovered recently in the Andean foothills of northern Peru date farming from around 3400 BC. The Chavin culture in central and northern Peru between 900 BC and 200 BC left monumental temples and intricate artwork across a wide area. The Paracas culture emerged on the southern coast in around 300 BC and evolved into the Nazca culture, famed for its exquisite textiles. Further north, the coastal Moche culture flourished between around 100 BC and AD 700, producing distinctive metalwork and pottery. The following centuries saw the rise of inland, Andean cultures and powerful city states such as Chancay, Sipan and Cajamarca.

The Inca civilization is thought to have its origins in a Quechua-speaking tribe that settled in the Cusco Valley from about 1200. By the mid-15th century, under Emperor Tupac Yupanqui (1471–93) and subsequently under Huayna Capac, the empire stretched along the Andes from Ecuador to Chile. The Inca's road network was an engineering masterpiece, as were the terraced fields and cities such as the famed Machu Picchu.

The Spanish adventurer, Francisco Pizarro, landed on the Ecuadorian coast in 1532 and moved south. Relations between the Spanish and the Incas quickly soured and Emperor Atahualpa was captured following the battle of Cajamarca. He was executed in 1533 and a year later Pizarro conquered the city of Cusco. Lima was founded in 1535 and in 1542 it became the seat of the Viceroyalty of Peru, which for a time had jurisdiction over all the Spanish colonies in South America. The Spanish conquistadors amassed vast wealth and power by controlling the trade in Andean gold and silver, while the Incas became increasingly marginalized. Revolts against Spanish rule occurred in the 1780s but concerted demands for independence came only after the French Revolution and Napoleon's conquest of Spain in 1808.

José de San Martín of Argentina (who had ended Spanish rule in Chile in 1818) and Simón Bolívar of Venezuela proclaimed Peruvian independence on 28 July 1821 but it was only confirmed in Dec. 1824, when Antonio José de Sucre defeated Spanish troops at Ayacucho. After independence Peru and its neighbours engaged in various territorial disputes. Chile's victory over Peru and Bolivia in the War of the Pacific (1879–83) resulted in Peru ceding the department of Tarapaca and the provinces of Tacna and Arica to Chile. Gen. Andrés Bello became president in 1885 and tried to breathe life into the crippled economy by encouraging foreign management of the railways and guano (fertilizer) exports.

A businessman, Augusto Leguía, who became president for four years in 1908, pushed through economic reforms. He became increasingly authoritarian during his second term of office (1919–30), and in 1924 Dr Victor Raúl Haya de la Torre founded the Alianza Popular Revolucionaria Americana (APRA), which called for radical reform. The party was banned by Leguía and then outlawed by his successor, Sánchez Cerro, during the 1930s. Peru sided with the Allies during the Second World War and in 1945 Luis Bustamante y Rivero was elected president, with APRA backing. Splits soon emerged and Manuel Odría led a military coup three years later. An inconclusive election in 1962 enabled Gen. Ricardo Pérez Godoy to seize power, although he was deposed in a coup led by Gen. Nicolás Lindley López a year later. There followed a period of civilian rule but the military staged yet another coup in 1968. In 1978–79 a constituent assembly drew up a new constitution, after which a civilian government was installed.

Peru was plagued by political violence between the early 1980s and the late 1990s with 69,000 people killed by Maoist Shining Path insurgents, the smaller Tupac Amaru Revolutionary Movement and government forces. On 5 April 1992 President Alberto Fujimori suspended the constitution, dissolved parliament and implemented drastic economic reforms to tackle rampant inflation. A new constitution was promulgated on 29 Dec. 1993. But while Peru enjoyed stability and economic growth, continuing autocratic rule put some politicians above the law. Embroiled in a bribery and corruption scandal, President Fujimori's discredited administration came to an end in Nov. 2000 when he resigned while out of the country.

A caretaker government under Valentín Paniagua presided over new presidential and congressional elections in April 2001. A new government led by President Alejandro Toledo took office in July 2001. The Toledo government consolidated Peru's return to democracy and presided over a period of strong economic growth, although great inequalities persisted. Alan García, who had been president for five years in the second half of the 1980s, narrowly won a run-off election in April 2006 and was sworn in as president for a second term in July 2006.

## TERRITORY AND POPULATION

Peru is bounded in the north by Ecuador and Colombia, east by Brazil and Bolivia, south by Chile and west by the Pacific Ocean. Area, 1,285,216 sq. km (including the area of the Peruvian part of Lake Titicaca).

For an account of the border dispute with Ecuador, *see* ECUADOR: Territory and Population.

Census population, 2007, 28,220,764 (adjusted for under-enumeration); density, 22.0 per sq. km. In 2005 the population was 75.9% urban.

The UN gives a projected population for 2015 of 30.76m.

The country is administratively divided into 25 regions and an autonomous province of Lima (with capitals): Amazonas (Chachapoyas), Ancash (Huaráz), Apurímac (Abancay), Arequipa (Arequipa), Ayacucho (Ayacucho), Cajamarca (Cajamarca), Callao (Callao), Cusco (Cusco), Huancavelica (Huancavelica), Huánuco (Huánuco), Ica (Ica), Junín (Huancayo), La Libertad (Trujillo), Lambayeque (Chiclayo), Lima (Huacho), Lima province (Lima), Loreto (Iquitos), Madre de Dios (Puerto Maldonado), Moquegua (Moquegua), Pasco (Cerro de Pasco), Piura (Piura), Puno (Puno), San Martín (Moyobamba), Tacna (Tacna), Tumbes (Tumbes), Ucayali (Pucallpa).

The largest cities (with 2007 census populations) are: Lima, 8,472,935; Arequipa, 784,651; Trujillo, 682,834; Chiclayo, 524,442; Piura, 377,496; Iquitos, 370,962.

In 1991 there were some 100,000 Peruvians of Japanese origin. Indigenous peoples account for 47% of the population.

The official languages are Spanish (spoken by 83.9% of the population in 2007), Quechua (13.2%) and Aymara (1.8%).

## SOCIAL STATISTICS

2009 births (estimate), 604,000; 2009 deaths (estimate), 144,000. Rates per 1,000 population (2009): birth, 21; death, 5. Annual population growth rate, 2000–05, 1.5%; infant mortality, 2005, 23 per 1,000 live births. Life expectancy, 2007: males, 70.4 years; females, 75.8. Fertility rate, 2008, 2.6 births per woman.

## CLIMATE

There is a very wide variety of climates, ranging from tropical in the east to desert in the west, with perpetual snow in the Andes. In coastal areas, temperatures vary very little, either daily or annually, though humidity and cloudiness show considerable variation, with highest humidity from May to Sept. Little rain is experienced in that period. In the Sierra, temperatures remain fairly constant over the year, but the daily range is considerable. There the dry season is from April to Nov. Desert conditions occur in the extreme south, where the climate is uniformly dry, with a few heavy showers falling between Jan. and March. Lima, Jan. 74°F (23.3°C), July 62°F (16.7°C). Annual rainfall 2" (48 mm). Cusco, Jan. 56°F (13.3°C), July 50°F (10°C). Annual rainfall 32" (804 mm). El Niño is the annual warm Pacific current that develops along the coasts of Peru and Ecuador. El Niño in 1982–83 resulted in agricultural production down by 8.5% and fishing output down by 40%. El Niño in 1991–94 was unusually long. El Niño in 1997–98 resulted in a sudden rise in the surface temperature of the Pacific by 9°F (5°C) and caused widespread damage and loss of life.

## CONSTITUTION AND GOVERNMENT

The 1980 constitution provided for a legislative *Congress* consisting of a *Senate* and a *Chamber of Deputies*, and an Executive formed of the President and a Council of Ministers appointed by him. Elections were to be every five years with the President and Congress elected, at the same time, by separate ballots.

On 5 April 1992 President Fujimori suspended the 1980 constitution and dissolved Congress.

A referendum was held on 31 Oct. 1993 to approve the twelfth constitution, including a provision for the president to serve a consecutive second term. 52.24% of votes cast were in favour. The constitution was promulgated on 29 Dec. 1993. In Aug. 1996 Congress voted for the eligibility of the President to serve a third consecutive term of office.

Congress has 130 members, elected for a five-year term by proportional representation. All citizens over the age of 18 are eligible to vote. Voting is compulsory.

## National Anthem

'Somos libres, seámoslo siempre' ('We are free, let us always be so'); words by J. De La Torre Ugarte, tune by J. B. Alcedo.

## GOVERNMENT CHRONOLOGY

Heads of State since 1945. ## RECENT ELECTIONS

The first round of presidential elections were held on 10 April 2011. Ollanta Humala Tasso of the Gana Perú alliance (Peru Wins) won 31.7% of the vote, followed by Keiko Fujimori of Fuerza 2011 (Force 2011) with 23.5%, Pedro Pablo Kuczynski of Alianza por el Gran Cambio (Alliance for the Great Change) with 18.5% and former president Alejandro Celestino Toledo Manrique of Perú Posible (Peru Possible) 15.6%. There were six other candidates. In the presidential run-off held on 5 June 2011 Ollanta Humala Tasso won with 51.5% of the vote against 48.5% for Keiko Fujimori.

In the congressional elections held on the same day Gana Perú gained 47 seats with 25.3% of votes cast. Fuerza 2011 came second with 37 seats (23.0%), ahead of the Alianza Electoral Perú Posible (Possible Peru Alliance) with 21 (14.8%), the Alianza por el Gran Cambio 12 (14.4%), Alianza Solidaridad Nacional (National Solidarity Alliance) 9 (10.2%) and Partido Aprista Peruano (American Popular Revolutionary Alliance) 4 (6.4%). Other parties received 5.9% of the vote between them but won no seats.

## CURRENT GOVERNMENT

*President:* Ollanta Moisés Humala Tasso; b. 1962 (Peruvian Nationalist Party; sworn in 28 July 2011).

*First Vice-President:* Marisol Espinoza Cruz. *Second Vice-President:* Vacant.

In March 2012 the government comprised:

*President of the Council of Ministers (Prime Minister):* Óscar Valdés Dancuart; b. 1949 (ind.; sworn in 10 Dec. 2011).

*Minister of Foreign Affairs:* Rafael Roncagliolo Orbegozo. *Defence:* Alberto Otárola. *Economy and Finance:* Miguel Castilla Rubio. *Interior:* Daniel Lozada. *Justice:* Juan Jiménez. *Education:* Patricia Salas O'Brien. *Health:* Alberto Tejada Noriega. *Agriculture:* Luis Ginocchio. *Labour and Employment Promotion:* José Villena. *Production:* José Urquiza. *Foreign Trade and Tourism:* José Luis Silva Martinot. *Energy and Mines:* Jorge Humberto Merino. *Transport and Communications:* Carlos Paredes Rodríguez. *Housing, Construction and Sanitation:* René Cornejo Díaz. *Women's Affairs and Social Development:* Ana Jara. *Environment:* Manuel Pulgar Vidal. *Culture:* Luis Peirano. *Development and Social Inclusion:* Carolina Trivelli.

*President of the Council of Ministers (Spanish only):*

## CURRENT LEADERS

### Ollanta Moisés Humala Tasso

#### *Position*

President

#### *Introduction*

Ollanta Humala became president in July 2011. Leader of the Peruvian Nationalist Party, he was elected after two rounds of voting, defeating Keiko Fujimori, daughter of former president Alberto Fujimori. Humala was backed by the Gana Perú coalition and succeeded Alan García.

#### *Early Life*

Born in Lima in June 1962, Humala is the son of Isaac Humala who developed the ethno-nationalist ideology called 'ethnocacerism'. Ollanta Humala studied in Lima before joining the military. He trained initially as a paratrooper and amphibious combatant at the School of the Americas in Panama. In 1992, as head of a detachment in Tingo María, he was involved in operations against the rebel group Shining Path, for which he was later accused of human rights abuses. By 2000 he had been promoted to lieutenant-colonel.

Also in 2000, he led an uprising (along with his brother) in a bid to force out President Alberto Fujimori and leading military commanders. Following Fujimori's resignation the interim government pardoned Humala and awarded him the Peru Cross for Military Merit.

From 2000 to 2004 Humala worked for the ministry of defence and in 2001 completed a masters degree in political sciences from the Pontifical Catholic University of Peru. He became the military attaché to the Peruvian embassy in Paris in 2003 and studied for a doctorate in international law at the Sorbonne. In 2004 he was posted to South Korea. While there his name was linked to an uprising in Peru against President Alejandro Toledo.

In 2005 Humala founded the Peruvian Nationalist Party (PNP). With support from the Union for Peru (UPP), he ran for the presidency in 2006 but lost support over questions about his past and his left-wing sympathies. From 2006 until 2011 he fought off several legal cases related to previous coups. In 2011, backed by the Gana Perú coalition, he ran for the presidency again, defeating Keiko Fujimori.

#### *Career in Office*

In 2006 Humala had defined himself as 'anti-neoliberal' and 'anti-global capitalist' but in 2011 he adopted a more moderate profile.

He distanced himself from associations with Venezuela's Hugo Chávez and stood on a platform of energy self-sufficiency, a more equitable distribution of wealth and increased taxes on mining. On coming to power, he chose a moderate cabinet, quelling worries in business circles and cutting short an initial shock in the Lima stock market.

In 2011 he increased taxes on mining and announced social programmes including a non-contributory basic pension of US\$90 a month for the elderly, a public childcare programme and more scholarships to promote university education. The minimum wage was increased to US\$273 a month.

Peru has potentially lucrative revenue sources for the future in large-scale mining projects, such as the Conga copper and gold mine project. However, popular opposition to mining projects is widespread in Peru. Protests led to the resignation of the prime minister, Salomon Lerner, in Dec. 2011, prompting a cabinet reshuffle in which ten out of 19 ministers were changed. In response, Humala announced emergency police powers to crack down on protesters.

## DEFENCE

Conscription was abolished in 1999. In 2008 defence expenditure totalled US\$1,424m. (US\$49 per capita), representing 1.1% of GDP.

### Army

There are four military regions. In 2007 the Army comprised 74,000 personnel and 188,000 reserves. In addition there is a paramilitary national police force of 77,000 personnel.

### Navy

The principal ship of the Navy is the former Netherlands cruiser *Almirante Grau*, built in 1953. Other combatants include six diesel submarines (two in refit) and eight Italian-built frigates.

Callao is the main base, where the dockyard is located and most training takes place. Smaller bases exist at Iquitos, Paita, Puerto Maldonado, Puno, San Lorenzo Island and Talara.

Naval personnel in 2007 totalled 23,000 including 1,000 Coast Guards, about 800 Naval Air Arm and 4,000 Marines.

### Air Force

The operational force is divided into five regions—North, Lima, South, Central and Amazon.

In 2007 there were some 17,000 personnel and 60 combat capable aircraft (including Su-25s, Mirage 2000s and MiG-29s) and 16 attack helicopters.

## ECONOMY

Agriculture produced 6.8% of GDP in 2006, industry 37.5% and services 55.7%.

### Overview

The economy has undergone a transformation since 1990 with the ending of hyperinflation and a debt crisis. Tax and pension reforms have accompanied a programme of liberalization and privatization. Inflation fell steadily in the 1990s and has since stayed under the central bank's inflation target, permitting a gradual reduction in interest rates. From 77.9% in 1986, annual consumer price growth fell to 11.5% in 1996 and has averaged less than 2% for over half a decade.

Recession between 1997 and 2001 was caused by a spillover from emerging market crises and commodity price weaknesses. The economy has since responded well to a policy of fiscal responsibility, job creation programmes and rising commodity prices. The government has overseen reforms to open the economy, reduce labour costs in the formal sector and improve the climate for private investment.

Following the difficulties of 1997–2001 the economy has grown at its most sustained pace since the 1950s with higher commodity prices, particularly for minerals and metals, as well as growth in

agriculture, textiles, manufacturing and construction. GDP per capita has increased significantly and the country has a growing middle class. The poverty rate fell from 44.5% in 2006 to 36.2% in 2008, although poverty remains a concern.

Private investment has been concentrated in the natural resource sector while employment creation has been predominantly in the capital, Lima (home to roughly a third of the population), and the mining-intensive north coast region. The impoverished rural highlands have benefited little and remain without proper access to basic infrastructure and running water. Key challenges include improving the national infrastructure and investment climate. The economy remains vulnerable to fluctuation in world commodity prices.

The global economic crisis has led to a reduction in Peru's economic growth, with lower commodity prices and a weakened demand. The government has appealed for increased World Bank loans.

### Currency

The monetary unit is the *nuevo sol* (PEN), of 100 *céntimos*, which replaced the *inti* in 1991 at a rate of 1m. intis = 1 nuevo sol. Inflation, which had been over 7,000% in 1990, was 5.8% in 2008 and 2.9% in 2009. Foreign exchange reserves were US\$14,773m. in July 2005, gold reserves totalled 1.12m. troy oz and total money supply was 24,565m. nuevos soles.

### Budget

Central government revenue and expenditure (in 1m. sols), year ending 31 Dec.:

	2007	2008	2009
Revenue	67,324	74,356	67,932
Expenditure	57,165	62,424	67,245

Principal sources of revenue in 2009 were: taxes on goods and services, 26,325m. sols; taxes on income, profits and capital gains, 20,352m. sols; social security contributions, 6,659m. sols. Main items of expenditure by economic type in 2009 were: grants, 24,157m. sols; use of goods and services, 13,727m. sols; compensation of employees, 12,233m. sols.

In Dec. 2005 the World Bank approved a US\$150m. loan to assist with the government decentralization process and enhance competitiveness.

VAT is 18%.

### Performance

Real GDP growth was 0.9% in 2009, rising to 8.8% in 2010. Peru's real GDP growth was above average for Latin America every year between 2002 and 2009 apart from 2004. Total GDP in 2010 was US\$153.8bn.

### Banking and Finance

The bank of issue is the Banco Central de Reserva (*President*, Julio Velarde Flores), which was established in 1922. The government's fiscal agent is the Banco de la Nación. In 2002 there were three other government banks (Banco Central Hipotecario del Perú, Banco de la Nación and Corporación Financiera de Desarrollo), ten commercial banks, one regional bank and three foreign banks. Legislation of April 1991 permitted financial institutions to fix their own interest rates and reopened the country to foreign banks. The Central Reserve Bank sets the upper limit.

In 2010 Peru received US\$7,328m. of foreign direct investment, up from US\$5,576m. in 2009. The total stock of FDI at the end of 2010 was US\$41.8bn.

There are stock exchanges in Lima and Arequipa.

## ENERGY AND NATURAL RESOURCES

Peru lays claim to 84 of the world's 114 ecosystems; 28 of its climate types; 19% of all bird species; 20% of all plant species; and

25 conservation areas (seven national parks, eight national reserves, seven national sanctuaries and three historic sanctuaries).

### Environment

Peru's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.2 tonnes per capita.

### Electricity

In 2007 output was 29.93bn. kWh (19.55bn. kWh hydro-electric and 10.38bn. kWh thermal). Total generating capacity was 7.0m. kW in 2007. Consumption per capita in 2007 was 1,092 kWh.

### Oil and Gas

Proven oil reserves at the end of 2008 amounted to 1.1bn. bbls. Output, 2008, 5.3m. tonnes. Natural gas reserves in 2008 were 330bn. cu. metres; output in 2007 was 2,831m. cu. metres. Commercial development of the huge Camisea gas field began in late 2004. In June 2010 Peru became a net gas exporter.

### Minerals

The mining and fuel sectors accounted for some 8.1% of GDP in 2005. Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Mineral production, 2004 (in 1,000 tonnes): iron, 4,315; zinc, 1,209; copper, 1,036; lead, 306; silver, 3.1; gold, 0.17. 16,000 tonnes of coal were produced in 2004. Early in 1998 Southern Peru Copper, the country's largest mining company, estimated that 3,000 tonnes of copper production had been lost as a result of flooding caused by El Niño.

### Agriculture

There are four natural zones: the Coast strip, with an average width of 80 km; the Sierra or Uplands, formed by the coast range of mountains and the Andes proper; the Montaña or high wooded region which lies on the eastern slopes of the Andes; and the jungle in the Amazon Basin, known as the Selva. Legislation of 1991 permits the unrestricted sale of agricultural land. Workers in co-operatives may elect to form limited liability companies and become shareholders.

Production in 2003 (in 1,000 tonnes): sugarcane, 9,550; potatoes, 3,300; rice, 2,139; bananas and plantains, 1,600; maize, 1,471; cassava, 890; onions, 450; oranges, 295; lemons and limes, 255; sweet potatoes, 225.

Livestock, 2003 estimates: sheep, 14.1m.; cattle, 5.0m.; pigs, 2.9m.; alpacas, 2.5m.; goats, 2.0m.; poultry, 95m. Livestock products (in 1,000 tonnes), 2003 estimates: poultry meat, 635; beef and veal, 146; pork, bacon and ham, 85; mutton and lamb, 32; milk, 1,220.

In 2002 there were approximately 3.70m. ha. of arable land and 0.61m. ha. of permanent crops. About 1.2m. ha. were irrigated in 2002.

Coca was cultivated in 2005 on approximately 38,000 ha., down from 115,000 ha. in 1995.

### Forestry

In 2005 the area covered by forests was 68.74m. ha., or 53.7% of the total land area. The forests contain valuable hardwoods; oak and cedar account for about 40%. In 2007 timber production was 9.45m. cu. metres.

### Fisheries

Sardines and anchovies are caught offshore to be processed into fishmeal, of which Peru is a major producer. Fishing in deeper waters is being developed, subject to government conservation by the imposition of quotas and fishing bans.

Total catch in 2005 was 9,388,662 tonnes, almost entirely from sea fishing. Peru's annual catch is the second largest in the world after that of China. In 2006 total exports of fish and seafood came to a value of US\$1.77bn. Peru is the world's leading fishmeal producer, with a 2007 output of 1.4m. tonnes or 28% of world production.

## INDUSTRY

About 70% of industries are located in the Lima/Callao metropolitan area. Industry accounted for 29.7% of GDP in 2001, with manufacturing contributing 15.3%. Production (2007 unless otherwise indicated, in 1,000 tonnes): cement (2002), 4,120; distillate fuel oil, 3,063; residual fuel oil, 2,693; petrol, 2,356; prepared animal feeds (2001), 1,508; sugar (2001), 755; soft drinks (2002), 1,179.7m. litres; beer (2005), 797.0m. litres; cigarettes (2002), 3.8bn. units.

### Labour

The labour force in 1996 totalled 8,652,000 (71% males). In 1993, 1,852,800 people worked in agriculture, 1,167,000 in commerce, 783,900 in manufacturing, 599,700 in services, 347,500 in transport, 255,000 in building and 72,200 in mining. In 2002 an estimated 8.4% of the workforce was unemployed, up from 5.9% in 1991. On taking office in July 2011 the new president, Ollanta Humala, announced an immediate rise in the monthly minimum wage from 600 to 675 nuevos soles, with a further increase to 750 nuevos soles from Jan. 2012 (although this was subsequently postponed and was set to take effect by the end of July 2012).

## INTERNATIONAL TRADE

An agreement of 1992 gives Bolivia duty-free transit for imports and exports through a corridor leading to the Peruvian Pacific port of Ilo from the Bolivian frontier town of Desaguadero, in return for Peruvian access to the Atlantic via Bolivia's roads and railways. In April 2006 Peru and the USA signed a free trade agreement that eliminates tariffs on each other's goods; it took effect in Jan. 2009. Foreign debt was US\$28,653m. in 2005.

### Imports and Exports

The following table shows the value of Peru's foreign trade (in US\$1m.):

	2007	2008	2009	2010
Imports c.i.f.	20,368.3	29,952.8	21,869.7	29,879.5
Exports f.o.b.	28,084.6	31,288.2	26,738.3	35,073.2

The principal import suppliers in 2009 were: USA, 19.8%; China, 14.9%; Brazil, 7.7%; Ecuador, 4.7%. The principal export markets in 2009 were: USA, 17.2%; China, 15.3%; Switzerland, 14.8%; Canada, 8.6%.

The leading imports in 2009 were machinery and transport equipment (34.8%), manufactured goods (15.9%), chemicals and related products (15.0%), and petroleum and petroleum products (13.6%). Leading exports in 2009 were gold (25.2%), copper, copper ores and concentrates (22.9%), petroleum and petroleum products (7.2%), and animal feeds (5.7%).

## COMMUNICATIONS

### Roads

In 2006 there were 78,986 km of roads, of which 13.9% were paved. In 2007 there were 917,100 passenger cars, 480,900 lorries and vans and 44,400 buses and coaches. There were 67,155 road accidents involving injury in 2006 with 3,481 fatalities.

### Rail

Total length (2002), 2,121 km on 1,435- and 914-mm gauges. Passenger-km travelled in 2005 came to 126m. and freight tonne-km to 1,101m. A mass transit system opened in Lima in 2003. Peru's first metro, also in Lima, opened in Jan. 2012.

### Civil Aviation

There is an international airport at Lima (Jorge Chávez International). The main airline is the Chilean-owned Lan Perú. In 2003 services were also provided by the domestic airlines Aero C6ndor, AVIANDINA and Transportes A6reos Nacionales de Selva, and by more than 20 international carriers. In 2003

scheduled airline traffic of Peruvian-based carriers flew 44m. km, carrying 2,226,000 passengers (547,000 on international flights). In 2001 Jorge Ch6vez International handled 4,089,914 passengers (2,128,872 on international flights) and 112,709 tonnes of freight.

### Shipping

In 2004 there were 46 sea-going vessels and 651 lake and river craft. In Jan. 2009 there were nine ships of 300 GT or over registered, totalling 87,000 GT. Callao is the busiest port, handling 18,191,000 tonnes of cargo in 2008. There are also ports at Chimbote, Paita and Talara.

### Telecommunications

In 2008 there were 2,878,200 main (fixed) telephone lines; mobile phone subscribers numbered 20,951,800 in 2008 (72.7 per 100 persons). There were 2.8m. PCs in use in 2005 and an estimated 4.6m. internet users.

## SOCIAL INSTITUTIONS

### Justice

The judicial system is a pyramid at the base of which are the justices of the peace who decide minor criminal cases and civil cases involving small sums of money. The apex is the Supreme Court with a president and 12 members; in between are the judges of first instance, who usually sit in the provincial capitals, and the superior courts.

The police had 95,789 personnel in 2008. The population in penal institutions in Oct. 2004 was 32,129 (114 per 100,000 of national population).

### Education

Adult literacy was 90% in 2007. Elementary education is compulsory and free between the ages of six and 16; secondary education is also free. In 2007 there were 1,204,022 children in pre-school education with 58,177 teaching staff, 3,993,965 pupils in primary schools with 179,743 teaching staff and 2,861,313 pupils in secondary schools with 158,890 teaching staff. There were 952,437 students in tertiary education in 2006. The leading higher education institute is the National University of San Marcos (Universidad Nacional Mayor de San Marcos), founded in 1551, making it the oldest both in the country and in South America.

In 2007 public expenditure on education came to 2.7% of GNI and 16.4% of total government spending.

### Health

There were 483 hospitals with 43,074 beds (provision of 16 beds per 10,000 inhabitants) in 2002. There were 29,138 physicians, 3,190 dentists and 21,351 nurses in 2002.

Peru has been one of the most successful countries in reducing undernourishment in the past 20 years. Between 1990-92 and 2001-03 the proportion of undernourished people declined from 42% of the population to 12%.

### Welfare

An option to transfer from state social security (IPSS) to privately-managed funds was introduced in 1993.

## RELIGION

Religious liberty exists, but the Roman Catholic religion is protected by the State, and since 1929 only Roman Catholic religious instruction is permitted in schools, state or private. There were 17.0m. Catholics in 2007 as well as 2.6m. Protestants and 1.3m. with other beliefs (including non-religious). In Feb. 2012 there was one cardinal.

## CULTURE

### World Heritage Sites

There are 11 sites under Peruvian jurisdiction that appear on the UNESCO World Heritage List. They are (with the year entered on

the list): the City of Cusco (1983), the Historic Sanctuary of Machu Picchu (1983), Chavin Archaeological Site (1985), Huascarán National Park (1985), Chan Chan Archaeological Zone (1986), Manú National Park (1987), Historic Centre of Lima (1988 and 1991), Río Abiseo National Park (1990 and 1992), Lines and Geoglyphs of Nasca and Pampas de Jumana (1994), the Historical Centre of the City of Arequipa (2000) and the Sacred City of Caral-Supe (2009).

#### Press

In 2008 there were 89 paid-for daily newspapers, of which 23 were national and 66 regional and local. The leading dailies are *Liberio* (with an average daily circulation in 2008 of 214,000), *Trome* (average daily circulation in 2008 of 213,000) and *El Comercio* (average daily circulation in 2008 of 199,000).

#### Tourism

There were 1,916,000 non-resident tourists in 2007, up from 1,064,000 in 2002; tourist spending in 2007 totalled US\$2,222m., compared to US\$836m. in 2002.

#### Festivals

The Lord of Tremors festival (the second part of March and the first week of April) renders homage to the image of Taitacha Temblores, the Lord of the Earthquakes, and demonstrates the fusion of Andean religions and Christianity; Fiesta de las Cruces (3 May) is celebrated across Peru as well as Spain and other parts of Hispanic America, and includes processions, folk music and dance; Inti Raymi (24 June), one of the biggest celebrations in Peru, celebrates the winter solstice and the Inca sun god; Corpus Christi (June) includes a traditional and colourful procession of saints and virgins; Virgin of the Carmen (second week of July) takes place in the small town of Paucartambo and includes a series of processions in honour of Mamacha Carmen, the patron saint of the mestizo population; All Saints Day (1–2 Nov.) is dedicated to the memory of the dead.

#### DIPLOMATIC REPRESENTATIVES

Of Peru in the United Kingdom (52 Sloane St., London, SW1X 9SP)

*Ambassador:* Hernán Couturier Mariátegui.

Of the United Kingdom in Peru (Torre Parque Mar, Piso 22, Avenida Jose Larco 1301, Miraflores, Lima)

*Ambassador:* James Dauris.

Of Peru in the USA (1700 Massachusetts Ave., NW, Washington, D.C., 20036)

*Ambassador:* Harold Forsyth.

Of the USA in Peru (Avenida La Encalada Cdra 17-Monterrico, Lima)

*Ambassador:* Rose Likins.

Of Peru to the United Nations

*Ambassador:* Enrique Armando Román-Moray.

Of Peru to the European Union

*Ambassador:* Cristina Ronquillo.

# PHILIPPINES

Republika ng Pilipinas  
(Republic of the Philippines)

*Capital:* Manila

*Population projection, 2015:* 101.42m.

*GNI per capita, 2011:* (PPP\$) 3,478

*HDI/world rank:* 0.644/112

## KEY HISTORICAL EVENTS

Pottery was being made on the Philippine archipelago from at least 3000 BC, probably by people of Malay origin, and metals were being worked by the first millennium BC. Merchants from south China reached the islands during the 10th century AD (T'ang Dynasty), heralding centuries of Chinese trade with the region. Arab traders brought Islam from the Malay peninsula via Borneo and the Sulu archipelago in the late 13th century, and by the 15th century Islamic influence had spread as far north as Luzon. Most islanders lived in barangays, communities of 30–100 households based largely on kinship.

The Portuguese explorer, Ferdinand Magellan, landed at Samar on 16 April 1521 during his Spanish-financed expedition round the world. Subsequent expeditions consolidated Spanish control over the islands, which were named after Philip II of Spain in

1542. Manila was established by Miguel Lopez de Legaspi in 1571 on the site of an existing Moro (Muslim Filipinos) settlement. By the end of the 16th century the Philippines had become a major trading centre with India, China and the East Indies. The islands came under Dutch control from around 1600.

The waning of the Spanish Empire during the 18th century saw a rise in the power base of the Jesuit orders, which caused resentment and stoked demands for independence. In 1896 revolution in the province of Cavite, led by Emilio Aguinaldo among others, spread through the major islands. However, in Dec. 1898, following the Spanish-American War, the Philippines were ceded to the United States. Aguinaldo fought a guerrilla campaign but was captured in 1901. The US granted the Philippines partial autonomy in 1916 and the Hare-Hawes-Cutting Act of 1932 set a timetable for full independence after a ten-year period of self-governance as a Commonwealth of the USA. Manuel Quezon was elected the first president in Sept. 1935.

In Dec. 1941 the islands were invaded by Japanese troops, who went on to take complete control in 1942. Quezon escaped to the USA and established a government-in-exile in Washington, D.C. Sergio Osmena succeeded Quezon in 1944 and returned to the Philippines with a US-backed liberation force in Oct. 1944. Manuel Roxas defeated Osmena in the election of April 1946, becoming president of the Republic of the Philippines when independence was achieved on 4 July 1946. The USA continued to play a key role in its former colony, particularly in economic policy. In return for assistance in rebuilding the country's war-torn infrastructure, the USA secured 99-year leases over several air and naval bases. Relations with neighbouring countries improved and in 1954 the Philippines joined the Southeast Asia Treaty Organization, precursor to the Association of South East Asian Nations (ASEAN).

Ferdinand Marcos was elected president in 1965 and re-elected four years later, although his rule became increasingly unpopular. In Sept. 1972 Marcos declared martial law and thousands of political opponents were arrested. In May 1980 Benigno Aquino, Jr, the leading opponent of Marcos, was released from prison to go to the USA for medical treatment. His assassination, on his return to the Philippines in 1983, led to growing US pressure for Marcos to restore democracy. In late 1985 he announced a snap presidential election. He was challenged by Aquino's widow, Corazon, who eventually emerged victorious from a controversial poll and was installed as president on 25 Feb. 1986. Marcos fled the country and a new constitution limiting the president to a single, six-year term in office was ratified in Feb. 1987.

More than twenty years of insurgency by the Moro National Liberation Front were ended by a peace agreement of 2 Sept. 1996, providing for a Muslim autonomous region in an area of Mindanao island. The rebellion left more than 120,000 people dead. In Oct. 2000 impeachment proceedings began against President Estrada who was alleged to have received more than US\$10.8m. from gambling kickbacks. His impeachment trial collapsed in Jan. 2001 when he was forced from office by mass protests. Subsequently Estrada's supporters tried to overthrow his successor, Gloria Macapagal-Arroyo.

In Nov. 2001 the fragile peace between the government and Islamic militants was shattered. Since then violence has frequently erupted, notably in early 2005, when fighting on the southern island of Jolo left 90 dead and caused 12,000 people to flee. On 14 Feb. 2005 three bombs were detonated killing nine and injuring 130. In Feb. 2006 President Arroyo declared a week-long state of emergency after the military declared it had discovered a coup plot.

## TERRITORY AND POPULATION

The Philippines is situated between 21° 25' and 4° 23' N. lat. and between 116° and 127° E. long. It is composed of 7,100 islands and islets, 3,144 of which are named. Approximate land area, 300,076 sq. km (115,859 sq. miles). The largest islands (in sq. km) are Luzon (104,688), Mindanao (94,630), Samar (13,080), Negros (12,710), Palawan (11,785), Panay (11,515), Mindoro (9,735), Leyte (7,214), Cebu (4,422), Bohol (3,865) and Masbate (3,269).

The census population in Aug. 2007 was 88,574,614; density, 295.2 per sq. km. In 2005, 62.7% of the population lived in urban areas.

The UN gives a projected population for 2015 of 101.42m.

The area and population of the 17 regions (from north to south):

Region	Sq. km	2007
Ilocos	12,840	4,545,906
Cordillera <sup>1</sup>	18,294	1,520,743
Cagayan Valley	26,838	3,051,487
Central Luzon	21,470	9,720,982
National Capital	636	11,553,427
Calabarzon	16,229	11,743,110
Mimaropa	27,456	2,559,791
Bicol	17,632	5,109,798
Western Visayas	20,223	6,843,643
Central Visayas	14,951	6,398,628
Eastern Visayas	21,432	3,912,936
Northern Mindanao	17,125	3,952,437
Davao	19,672	4,156,653
Soccskargen	18,433	3,829,081
Zamboanga Peninsula	14,811	3,230,094
Muslim Mindanao <sup>2</sup>	12,695	4,120,795
Caraga	18,847	2,293,480

<sup>1</sup>Administrative region. <sup>2</sup>Autonomous region.

City populations (2007 census, in 1,000) are as follows; all on Luzon unless indicated in parenthesis.

Quezon City <sup>1</sup>	2,679	Muntinlupa <sup>1</sup>	453
Manila (the capital) <sup>1</sup>	1,661	General Santos	
Caloocan <sup>1</sup>	1,379	(Mindanao)	443
Cebu (Cebu)	798	Bacoor	441
Davao (Mindanao)	786	San Jose del Monte	439
Antipolo	634	Marikina <sup>2</sup>	425
Pasig <sup>1</sup>	617	Iloilo (Panay)	419
Taguig <sup>2</sup>	613	Pasay <sup>1</sup>	403
Valenzuela <sup>2</sup>	569	Zamboanga (Mindanao)	392
Dasmariñas	556	Malabon <sup>2</sup>	364
Cagayan de Oro		Calamba	360
(Mindanao)	554	Mandaue (Cebu)	319
Parañaque <sup>2</sup>	553	Angeles	314
Las Piñas <sup>2</sup>	532	Mandaluyong <sup>1</sup>	306
Makati <sup>1</sup>	510	Baguio <sup>1</sup>	302
Bacolod (Negros)	499		

<sup>1</sup>City within Metropolitan Manila. Population of Metro Manila in 2007, 11,553,427. <sup>2</sup>Municipality within Metropolitan Manila.

Filipino (based on Tagalog) is spoken as a mother tongue by only 29.3%; among the 76 other indigenous languages spoken, Cebuano is spoken as a mother tongue by 23.3% and Ilocano by 9.3%. English, which along with Filipino is one of the official languages, is widely spoken.

In 2000 some 5.5m. Filipinos were living and working abroad, including 2m. in the USA, 850,000 in Saudi Arabia and 620,000 in Malaysia.

## SOCIAL STATISTICS

Births, 2007, 1,749,878; deaths, 2007, 441,956. Divorce is illegal. Birth rate per 1,000 population (2007), 19.7; death rate (2007), 5.1. Expectation of life at birth, 2007, was 69.4 years for males and 73.9 years for females. Annual population growth rate, 2000–05,

2.2%. Infant mortality, 2005, 25 per 1,000 live births; fertility rate, 2008, 3.1 births per woman. Abortion is illegal.

## CLIMATE

Some areas have an equatorial climate while others experience tropical monsoon conditions, with a wet season extending from June to Nov. Mean temperatures are high all year, with very little variation. Manila, Jan. 77°F (25°C), July 82°F (27.8°C). Annual rainfall 83.3" (2,115.9 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was ratified by referendum in Feb. 1987 with the approval of 78.5% of voters. The head of state is the *President*, directly elected for a non-renewable six-year term.

Congress consists of a 24-member upper house, the *Senate* (elected for a six-year term from 'at large' seats covering the country as a whole, half of them renewed every three years), and a *House of Representatives* of 287 members. In the *House of Representatives* 230 members are directly elected for a three-year term and the rest are chosen from party and minority-group lists.

A campaign led by the president at the time, Fidel Ramos, to amend the constitution to allow him to stand for a second term was voted down by the Senate by 23 to one in Dec. 1996.

## National Anthem

'Land of the Morning', lyric in English by M. A. Sane and C. Osias, tune by Julian Felipe; 'Lupang Hinirang', Tagalog lyric by the Institute of National Language.

## GOVERNMENT CHRONOLOGY

Presidents since 1946. (KBL = New Society Movement; Lakas-CMD = Lakas-Christian Muslim Democrats; LE-NUCD = People's Power-National Union of Christian Democrats; LMP = Struggle of the Philippine Masses; PL = Liberal Party; PN = Nacionalista Party; UNIDO = Nationalist Democratic Organization)

1946–48	PL	Manuel Roxas y Acuña
1948–53	PL	Elpidio Quirino y Rivera
1953–57	PN	Ramon Magsaysay y del Fierro
1957–61	PN	Carlos Polestico García
1961–65	PL	Diosdado Pañgan Macapagal
1965–86	PN, KBL	Ferdinand Emmanuel Edralin Marcos
1986–92	UNIDO	Corazón Cojuangco Aquino
1992–98	LE-NUCD	Fidel Valdez Ramos
1998–2001	LMP	Joseph Marcelo Ejercito Estrada
2001–10	Lakas-CMD	Gloria Macapagal-Arroyo
2010–	PL	Benigno Aquino III

## RECENT ELECTIONS

The presidential elections of 10 May 2010 were won by Benigno 'Noynoy' Aquino III (Liberal Party, PL) with 42.1% of votes cast, ahead of Joseph Estrada (Force of the Filipino Masses, PMP) with 26.3% of the vote, Manny Villar (Nacionalista Party, PN) with 15.4% and Gilberto Teodoro (Lakas-Kampi-Christian Muslim Democrats) with 11.3%. There were five other candidates.

Elections to the House of Representatives were also held on 10 May 2010. 119 seats went to PL, 45 to Lakas-Kampi-Christian Muslim Democrats, 22 to PN and five to PMP. The remaining seats went to independents and smaller parties.

Senate elections were likewise most recently held on 10 May 2010, following which Lakas-Kampi-Christian Muslim Democrats had 4 seats, PL 4, PN 4, Nationalist People's Coalition 2, PMP 2, People's Reform Party 1, Struggle of Democratic Filipinos 1 and ind. 5.

## CURRENT GOVERNMENT

*President*: Benigno 'Noynoy' Aquino III; b. 1960 (PL; sworn in 30 June 2010). His mother, Corazón Aquino, had been president from 1986–92.

*Vice-President:* Jejomar Binay (sworn in 30 June 2010).

In March 2012 the government comprised:

*Minister of Agrarian Reform:* Virgilio de los Reyes. *Agriculture:* Proceso Alcala. *Budget and Management:* Florencio 'Butch' Abad. *Education:* Armin Luistro. *Energy:* Jose Rene Almendras. *Environment and Natural Resources:* Ramon Paje. *Finance:* Cesar Purisima. *Foreign Affairs:* Albert del Rosario. *Health:* Enrique Ona. *Interior and Local Government:* Jesse Robredo. *Justice:* Leila de Lima. *Labour and Employment:* Rosalinda Baldoz. *National Defence:* Voltaire Gazmin. *Public Works and Highways:* Rogelio Singson. *Science and Technology:* Mario Montejo. *Social Welfare and Development:* Corazon 'Dinky' Soliman. *Socioeconomic Planning:* Cayetano Paderanga. *Tourism:* Alberto Lim. *Trade and Industry:* Gregorio Domingo. *Transport and Communications:* Manuel Roxas II.

*Executive Secretary:* Paquito Ochoa, Jr.

*Speaker of the House of Representatives:* Feliciano Belmonte, Jr.

*Government Website:* <http://www.gov.ph>

## CURRENT LEADERS

### Benigno Aquino III

#### *Position*

President

#### *Introduction*

Benigno Simeon Cojuangco Aquino III was sworn in as president in June 2010 after a landslide victory at the election in May. He campaigned on a platform of tackling corruption and eradicating poverty.

#### *Early Life*

Aquino, popularly known as Noynoy, was born on 8 Feb. 1960 in Manila into the influential Aquino political family. His father, Benigno Simeon 'Ninoy' Aquino, Jr, was a prominent opposition leader who was assassinated by Ferdinand Marcos' regime. His mother, Corazón Aquino, led a non-violent people's revolution following her husband's death that brought about an end to the Marcos dictatorship and secured her the presidency. Benigno Aquino III graduated in economics from Ateneo de Manila University in 1981 before joining his family in exile in the USA. On his father's death in 1983, he returned to the Philippines.

From 1983–98 Aquino worked in business for companies including Nike, Intra-Strata Assurance Corp., Best Security Agency Corporation and Central Azucarera Tarlac, an organization owned by the Cojuangco clan. In 1989 in an attempted coup led by Gregorio Honasan against his mother's administration Aquino narrowly escaped assassination.

Joining the Liberal Party in 1998, he was elected to the House of Representatives to represent the 2nd District of Tarlac, a seat he held until 2007. He served as deputy speaker of the House from Nov. 2004–Feb. 2006, resigning when he joined other Liberal leaders in calling for the resignation of President Macapagal-Arroyo at the height of the 'Hello Garci' vote-rigging scandal. On 17 March 2006 Aquino was appointed vice chairman of the Liberal Party. Constitutionally unable to seek a fourth term in the House of Representatives, he won a Senate seat in the May 2007 elections.

After the death of his mother in Aug. 2009, there was a swell of public support for Aquino to stand for the presidency. Announcing his candidacy on 9 Sept. 2009 his subsequent campaign used the colour yellow to evoke his mother's 'people power' movement. The front runner leading up to the election, Aquino won with 42% of the vote.

#### *Career in Office*

On assuming office, Aquino announced the creation of an independent commission to investigate the alleged corruption of the Arroyo administration. He appointed a new justice secretary,

Leila de Lima, the former head of the commission on human rights. In education, he has pushed for the extension of the basic education system from a ten-year programme to 12 years. He also came out in support of a family planning bill, prompting strong opposition from the Catholic Church. Critics question Aquino's ability to introduce reforms that act against the interests of the Philippines' powerful clans, of which he himself is a member.

## DEFENCE

An extension of the 1947 agreement granting the USA the use of several Army, Navy and Air Force bases was rejected by the Senate in Sept. 1991. An agreement of Dec. 1994 authorizes US naval vessels to be repaired in Philippine ports. The Philippines is a signatory of the South-East Asia Collective Defence Treaty.

Defence expenditure in 2008 totalled US\$1,427m. (US\$15 per capita), representing 0.9% of GDP.

### Army

The Army is organized into five area joint-service commands.

Strength (2007) 66,000, with reserves totalling 100,000. The paramilitary Philippines National Police numbered 40,500 in 2007 with 40,000 reservists.

### Navy

The Navy consists principally of ex-US ships completed in 1944 and 1945, and serviceability and spares are a problem. The modernization programme in progress has been revised and delayed, but the first 30 inshore patrol craft of US and Korean design have been delivered. The present fleet includes one ex-US frigate.

Navy personnel in 2007 was estimated at 24,000 including 7,500 marines.

### Air Force

The Air Force had an estimated strength of 16,000 in 2007, with 30 combat capable aircraft. There was one fighter squadron of Agusta S-211s.

## ECONOMY

Agriculture accounted for 14.2% of GDP in 2006, industry 31.6% and services 54.2%.

### Overview

Market-oriented reforms have been implemented over the last two decades. Foreign investment and trade barriers have been dismantled and many industries deregulated. Most state industrial assets were privatized between 1992 and 1995 and monopolies were ended in the telecommunications, oil, civil aviation, shipping, water and power industries.

In 2004 President Arroyo was re-elected to office on a platform of public debt reduction, pledging to address low government revenues (14.5% of GDP in 2004). Chronic public deficits have been significantly reduced, while tax collection has become more aggressive and VAT reform was implemented in early 2006.

Growth has been robust in the 21st century, averaging around 5% per year, and the economy has held strong against a number of external shocks. Despite growth plunging as a result of the global economic crisis, the economy avoided a technical recession in 2009, with a combination of remittances and fiscal stimuli supporting growth. 2010 saw a continuation of the recovery with broad-based growth across private consumption, investment and exports, despite the impact of the El Niño drought during the first half of the year. The handover of power following elections in May 2010 was smooth, while in Nov. 2010 Standard & Poor's upgraded the Philippines' credit rating to BB in recognition of its stronger financial position.

However, robust growth has not translated into poverty reduction, with just over a quarter of the population living below the poverty line.

### Currency

The unit of currency is the *peso* (PHP) of 100 *centavos*. Inflation rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
6.8%	3.0%	3.5%	6.0%	7.6%	6.2%	2.8%	9.3%	3.2%	3.8%

Foreign exchange reserves were US\$35,493m. in Aug. 2009 and gold reserves 5.08m. troy oz. Total money supply in Feb. 2008 was 836,709m. pesos.

### Budget

In 2007 revenues totalled 1,047,500m. pesos and expenditures 1,145,030m. pesos.

VAT was introduced in 1988. The standard rate was raised from 10.0% to 12.0% in 2006.

### Performance

Real GDP growth rates (based on IMF statistics):

2001	2002	2003	2004	2005	2006	2007	2008	2009	2010
2.9%	3.6%	5.0%	6.7%	4.8%	5.2%	6.6%	4.2%	1.1%	7.6%

The 2010 growth rate was the highest since democracy was restored to the Philippines in 1986 following the Marcos era. Total GDP in 2010 was US\$199.6bn.

### Banking and Finance

The Central Bank (*Governor*, Amando Tetangco, Jr) issues the currency, manages foreign exchange reserves and supervises the banking system. At 30 June 2003 there were 42 commercial banks (24 regular commercial banks and 18 universal banks), 93 thrift banks and 771 rural and co-operative banks. In June 2003 the total number of banking institutions was 6,414, with total assets of 3,529,128m. pesos.

There is a stock exchange in Manila.

The financial crisis that struck southeast Asia in 1997 led to the floating of the peso in July of that year. It subsequently lost 36% of its value against the dollar.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita.

### Electricity

Total installed capacity was 16.0m. kW in 2007. Production was 59.65bn. kWh in 2007 (40.79bn. kWh thermal and 8.58bn. kWh hydro-electric). Consumption per capita was 672 kWh in 2007.

### Oil and Gas

The largest natural gas field is the Camago-Malampaya gas field, discovered off the island of Palawan in 1992, with reserves initially put at 76bn. cu. metres but now increased to 85bn. cu. metres. The Philippines' total natural gas reserves in 2007 were 99bn. cu. metres.

Crude petroleum reserves were 139m. bbls in 2007.

### Water

Water production in 1997 was 997m. cu. metres and water consumption 230m. cu. metres. Breakdown of water consumption: industrial, 89m. cu. metres; residential, 82m. cu. metres; and commercial, 59m. cu. metres.

### Minerals

Mineral production in 2003, unless otherwise indicated (in tonnes): coal (2004), 2,482,000; salt, 429,160; silica sand, 372,200; copper, 80,920; chromite refractory ore (chromium content), 13,220; nickel bearing ore (2002), 26,532 (nickel content); gold, 37,840 kg; silver, 9,530 kg. Other minerals include rock asphalt,

sand and gravel. Total value of mineral production, 2003, 139,597m. pesos.

### Agriculture

Agriculture is a mainstay of the economy, contributing up to 30% of national output. In 2001 there were 5.65m. ha. of arable land and 5.0m. ha. of permanent crops. In 2001, 37.4% of the working population was employed in agriculture. In 2002 agricultural production grew by 2.6% (7.4% in 2001).

Output (in 1,000 tonnes) in 2002: sugarcane, 21,417; coconuts, 13,683; rice, 13,271; bananas, 5,275; maize, 4,319; copra, 2,010; pineapples, 1,639; cassava, 1,626. The output of both copra and pineapples is the highest of any country in the world. Minor crops are fruits, nuts, vegetables, coffee, cacao, peanuts, ramie, rubber, maguey, kapok, abaca and tobacco.

Livestock, 2003: pigs, 12.36m.; goats, 3.27m.; buffaloes, 3.18m.; cattle, 2.56m.; chickens, 128.51m.; ducks, 9.81m.

### Forestry

Forests covered 7.16m. ha. (24.0% of the land area) in 2005. Timber production was 15.79m. cu. metres in 2007.

### Fisheries

The catch in 2005 was 2,246,352 tonnes (94% from marine waters). Imports of fishery commodities were valued at US\$147m. in 2008 and exports at US\$645m.

## INDUSTRY

Leading sectors are foodstuffs, oil refining and chemicals. Production, 2002 (in 1,000 tonnes): cement, 11,396; residual fuel oil, 3,537; distillate fuel oil, 3,004; sugar, 1,988; petrol, 1,501; paper and paperboard, 1,056; plywood, 409,000 cu. metres.

### Labour

In 2003 the total workforce was 34,635,000, of whom 30,418,000 were employed (19,263,000 in non-agricultural work). Employees by sector, 2003: 14.4m. in services; 11.2m. in agriculture, hunting, forestry and fisheries; 4.9m. in industry. 3.9m. persons were registered unemployed in 2004. 868,000 persons worked overseas in 2003 (652,000 land-based).

The unemployment rate in Oct. 2001 was 9.8%.

## INTERNATIONAL TRADE

Foreign debt totalled US\$61,527m. in 2005. A law of June 1991 gave foreign nationals the right to full ownership of export and other firms considered strategic for the economy.

### Imports and Exports

Imports (c.i.f.) in 2007 totalled US\$57,995.7m. (US\$54,078.0m. in 2006) and exports (f.o.b.) US\$50,465.7m. (US\$47,410.1m. in 2006).
