Norway's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 8.7 tonnes per capita. An *Environmental Performance Index* compiled in 2010 ranked Norway fifth in the world behind Iceland, Switzerland, Costa Rica and Sweden, with 81.1%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

In 2010 there were 33 national parks (total area, 2,996,032 ha.), 2,010 nature reserves (495,771 ha.), 195 landscape protected areas (1,628,844 ha.) and 474 other areas with protected flora and fauna (42,749 ha.).

Norway is one of the world leaders in recycling. In 2008, 52% of all household waste was sent for recovery.

### Electricity

Norway is the sixth largest producer of hydropower in the world and the largest in Europe. The potential total hydro-electric power was estimated at 205,937m. kWh in 2010. Installed electrical capacity in 2007 was 30.5m. kW, 95% of it hydro-electric. Production, 2007, was 137,164m. kWh (98% hydro-electric). Consumption per capita in 2008, at 27,023 kWh, was one of the highest in the world. In 1991 Norway became the first country in Europe to deregulate its energy market. Norway is a net importer of electricity.

### Oil and Gas

There are enormous oil reserves in the Norwegian continental shelf. In 1966 the first exploration well was drilled. Production of crude oil, 2008, 114.2m. tonnes. Norway ranks among the world's biggest oil exporters, with net oil exports of around 1.9m. bbls a day in 2010. It had proven reserves of 7.5bn. bbls in 2008. In March 1998 Norway announced that it would reduce its output for the year by 100,000 bbls per day as part of a plan to cut global crude production. In June 2001 the Norwegian government sold a 17.5% stake in Statoil, the last major state-owned oil company in western Europe. In Oct. 2007 Statoil and the oil and gas division of Norsk Hydro (a Norwegian energy and metals company) merged to form StatoilHydro, as a result creating the world's largest offshore oil and natural gas producer.

Output of natural gas, 2010, 106.4bn. cu. metres with proven reserves in 2008 of 2,910bn. cu. metres.

### Minerals

Production in 2008 unless otherwise indicated (in tonnes): coal (2009), 2,640,000; aluminium, 1,368,000; ilmenite concentrate, 915,000; iron ore, 477,000; zinc, 145,469; nickel, 88,741; refined copper (2007), 34,212.

### Agriculture

Norway is barren and mountainous. The arable area is in strips in valleys and around fjords and lakes.

In 2010 the agricultural area was 1,003,010 ha., of which 651,176 ha. were meadow and pasture, 145,818 ha. were sown to barley, 75,810 ha. to oats, 71,945 ha. to wheat and 13,207 ha. to potatoes. Production in 2010 (in 1,000 tonnes): hay, 2,659; barley, 541; wheat, 331; potatoes, 321; oats, 299.

Livestock, 2010 (provisional), 875,169 cattle (308,399 dairy cows), 919,046 sheep (one year and over), 97,318 pigs for breeding, 36,935 dairy goats, 3,891,109 hens, 150,000 silver fox, 105,000 blue and silver blue fox, 650,000 mink and 251,400 tame reindeer.

### Forestry

In 2010 the total area under forests was 10.07m. ha., or 33% of the total land area. Productive forest area, 2010, approximately 6.77m. ha. About 80% of the productive area consists of conifers and 20% of broadleaves. In 2008, 8.07m. cu. metres of roundwood were cut.

### Fisheries

The total number of fishermen in 2009 was 12,656, of whom 2,528 had another chief occupation. In 2009 the number of registered fishing vessels (all with motor) was 6,506.

The catch in 2009 totalled 2,537,134 tonnes, almost entirely from sea fishing. The catch of herring in 2009 totalled 1,077,250 tonnes, cod 243,659 tonnes and capelin 233,005 tonnes. 4,652 harp seals were caught in 2010. The catch of hooded seals was prohibited in 2007. Commercial whaling was prohibited in 1988, but recommenced in 1993: 484 whales were caught in 2008. Norway is the second largest exporter of fishery commodities, after China. In 2009 exports were valued at US\$7.07bn.

### INDUSTRY

The leading companies by market capitalization in Norway in March 2012 were: Statoil, US\$86.4bn.; Telenor Group, a telecommunications company (US\$29.8bn.); and DNB, a financial services group (US\$20.9bn.).

Industry is chiefly based on raw materials. Paper and paper products, industrial chemicals and basic metals are important export manufactures. In the following table figures are given for industrial establishments in 2009. The values are given in 1m. kroner.

| Industries  | Establishments | Number of employees | Gross value of production | Value added (in market prices) |
|---|----------------|---------------------|---------------------------|--------------------------------|
| Mining and quarrying                                      | 745            | 4,680               | 11,463                    | 4,032                          |

### Labour

Norway has a tradition of centralized wage bargaining. Since the early 1960s the contract period has been for two years with intermediate bargaining after 12 months, to take into consideration such changes as the rate of inflation.

The labour force averaged 2,602,000 in 2010 (1,224,000 females). The total number of employed persons in 2010 averaged 2,508,000 (1,187,000 females), of whom 1,835,000 were in full-time employment, 667,000 in part-time employment and 6,000 working unspecified hours. Distribution of employed persons by

occupation in 2007 showed 492,700 in health and social work; 364,000 in trade; 300,200 in business services; 286,200 in manufacturing; 185,500 in education; 184,200 in construction; 167,300 in transport; 156,600 in public administration and defence; 78,800 in hotels and restaurants; 60,100 in agriculture.

The unemployment rate in Nov. 2012 was 3.5% (3.3% in 2011 as a whole).

There were 12 work stoppages in 2010 (two in 2009): 500,009 working days were lost (180 in 2009).

## INTERNATIONAL TRADE

### Imports and Exports

Total imports and exports in calendar years (in 1m. kroner):

|         | 2006    | 2007    | 2008    | 2009    | 2010    |
|---------|---------|---------|---------|---------|---------|
| Imports | 411,755 | 468,918 | 504,481 | 430,363 | 466,810 |
| Exports | 782,943 | 795,366 | 953,154 | 717,965 | 792,575 |

Norway's trade surplus was 325,765m. kroner in 2010. Major import suppliers in 2010 (value in 1m. kroner): Sweden, 65,603.1; Germany, 57,461.5; China, 39,614.9; Denmark, 29,018.6; UK, 27,460.5; USA, 25,324.6. Imports from economic areas: EU, 295,667.6; Nordic countries, 108,068.6; OECD, 360,693.1.

Major export markets in 2010 (value in 1m. kroner): UK, 213,981.8; Netherlands, 94,720.9; Germany, 89,725.8; Sweden, 55,315.6; France, 50,532.8; USA, 39,368.0. Exports to economic areas: EU, 639,798.7; Nordic countries, 93,203.0; OECD, 721,729.5.

Principal imports in 2010 (in 1m. kroner): motor vehicles, 43,800.5 (including passenger cars and station wagons, 26,205.3); transport equipment excluding motor vehicles, 32,708.0; petroleum, petroleum products and related materials, 23,151.6; electrical machinery, apparatus and appliances, 22,784.0; metalliferous ores and metal scrap, 22,288.8; general industrial machinery and equipment, 21,925.9.

Principal exports in 2010 (in 1m. kroner): petroleum, petroleum products and related materials, 315,259.3 (including crude petroleum, 283,337.2); natural and manufactured gas, 188,010.4 (including natural gas, 163,970.3); fish, crustaceans and molluscs, and preparations thereof, 52,307.6; non-ferrous metals, 44,083.6 (including aluminium, 26,493.6); general industrial machinery and equipment, 18,423.9; chemical materials and products, 17,992.3.

## COMMUNICATIONS

### Roads

In Jan. 2011 the length of public roads (including roads in towns) totalled 93,509 km. Total road length in Jan. 2011 included: national roads, 10,496 km; provincial roads, 44,281 km; local roads, 38,732 km. Number of registered motor vehicles, 2010, included: 2,308,548 passenger cars (including station wagons and ambulances), 397,279 vans, 254,674 tractors and special purpose vehicles, 168,904 mopeds, 146,592 motorcycles, 81,330 goods vehicles (including lorries), 48,432 combined vehicles and 20,348 buses. In 2010, 9,130 injuries were sustained in road accidents, with 208 fatalities. Norway has one of the lowest death rates in road accidents of any industrialized country, at 4.3 deaths per 100,000 people in 2010.

### Rail

The length of state railways in 2010 was 4,169 km (2,566 km electrified). In 2009 passenger-km travelled came to 2,669m. and freight tonne-km to 2,804m. Sales and other operating income totalled 11,179m. kroner in 2010.

There is a metro (104 km) and a tram network (146 km) in Oslo.

### Civil Aviation

The main international airports are at Oslo (Gardermoen), Bergen (Flesland), Stavanger (Sola), Sandefjord (Torp) and Moss (Rygge). Norway's largest airline is SAS Norge, a wholly-owned subsidiary

of the Scandinavian Airlines System (SAS) Group. It was established in 2004 as SAS Braathens through the merger of the Norwegian part of SAS and Braathens, and was renamed SAS Norge in 2007. SAS Norge carries around 10m. passengers a year to 55 destinations. The second largest airline is the low-cost carrier Norwegian.

In 2010 Oslo (Gardermoen) handled 19,140,384 passengers (10,123,605 on international flights). Bergen is the second busiest airport for passenger traffic, with 5,189,714 passengers in 2010 (3,604,882 on domestic flights).

### Shipping

The Norwegian International Ship Register was set up in 1987. In 2010, 525 ships were registered (400 Norwegian) totalling 13,792,000 GT. 218 tankers accounted for 6,948,000 GT. There were also 882 vessels totalling 1,917,000 GT on the Norwegian Ordinary Register. These figures do not include fishing boats, tugs, salvage vessels, icebreakers and similar special types of vessels. In Jan. 2011 Norway's merchant fleet represented 3.4% of total world tonnage. In 2009, 41m. passengers travelled on internal ferries. The warm Gulf Stream ensures ice-free harbours throughout the year.

### Telecommunications

At 31 Dec. 2010 there were 1,648,927 main (fixed) telephone lines and 5,648,673 mobile phone subscribers (1,148.0 per 1,000 persons). There were 3.9m. internet users in 2008. In March 2012 there were 2.6m. Facebook users. Since 2000 the government has been reducing its interest in Telenor, the country's largest telecommunications operator, and in March 2004 lowered its stake to 54.0%.

## SOCIAL INSTITUTIONS

### Justice

The judicature is common to civil and criminal cases; the same professional judges preside over both. These judges are state officials. The participation of lay judges and jurors, both summoned for the individual case, varies according to the kind of court and kind of case.

The 96 city or district courts of first instance are in criminal cases composed of one professional judge and two lay judges, chosen by ballot from a panel elected by the local authority. In civil cases two lay judges may participate. These courts are competent in all cases except criminal cases where the maximum penalty exceeds six years imprisonment. In every community there is a Conciliation Board composed of three lay persons elected by the district council. A civil lawsuit usually begins with mediation by the Board which can pronounce judgement in certain cases.

The five high courts, or courts of second instance, are composed of three professional judges. Additionally, in civil cases two or four lay judges may be summoned. In serious criminal cases, which are brought before high courts in the first instance, a jury of ten lay persons is summoned to determine whether the defendant is guilty according to the charge. In less serious criminal cases the court is composed of two professional and three lay judges. In civil cases, the court of second instance is an ordinary court of appeal. In criminal cases in which the lower court does not have judicial authority, it is itself the court of first instance. In other criminal cases it is an appeal court as far as the appeal is based on an attack against the lower court's assessment of the facts when determining the guilt of the defendant. An appeal based on any other alleged mistakes is brought directly before the Supreme Court.

The Supreme Court (*Høyesterett*) is the court of last resort. There are 18 Supreme Court judges. Each individual case is heard by five judges. Some major cases are determined in plenary session. The Supreme Court may in general examine every aspect of the case and the handling of it by the lower courts. However, in

criminal cases the Court may not overrule the lower court's assessment of the facts as far as the guilt of the defendant is concerned.

The Court of Impeachment (*Riksretten*) is composed of five judges of the Supreme Court and ten members of Parliament.

All serious offences are prosecuted by the State. The Public Prosecution Authority consists of the Attorney General, 18 district attorneys and legally qualified officers of the ordinary police force. Counsel for the defence is in general provided for by the State.

The population in penal institutions in Aug. 2008 was 3,276 (69 per 100,000 of national population).

### Education

Free compulsory schooling in primary and lower secondary schools was extended to 10 years from 9, and the starting age lowered to 6 from 7, in July 1997. All young people between the ages of 16 and 19 have the statutory right to three years of upper secondary education. In 2010 there were 6,579 kindergartens (children up to six years old) with 277,139 children and 87,401 staff. There were 614,020 pupils at primary and lower secondary schools in 2010; 228,170 pupils at upper secondary schools; and 20,658 students at folk high schools and vocational schools.

There are eight universities: Oslo (founded 1811), with 27,341 students in 2007; Bergen (1948), with 14,057 students; Tromsø (1972), with 5,424 students; the Norwegian University of Science and Technology (1996, formerly the University of Trondheim and the Norwegian Institute of Technology), with 19,351 students; Stavanger (2005, formerly Stavanger University College), with 8,050 students; Norwegian University of Life Sciences (1859, university since 2005—formerly the Agricultural University of Norway), with 2,817 students; Agder (2007, formerly Agder University College), with 7,801 students; and Nordland (2011, formerly Bodø University College), with 5,700 students in 2011. There are also nine specialized university institutions, 21 state university colleges and a number of private colleges. In 2010 the universities had 93,768 students and the state university colleges 89,572 students. The University of Tromsø is responsible for Sami language and studies.

In 2006 public expenditure on education came to 6.6% of GNI and 16.2% of total government spending. The adult literacy rate is at least 99%.

### Health

The health care system, which is predominantly publicly financed (mainly by a national insurance tax), is run on both county and municipal levels. Persons who fall ill are guaranteed medical treatment, and health services are distributed according to need. In Aug. 2008 there were 20,035 active physicians in Norway. On 31 Dec. 2009 there were 15,205 hospital beds (excluding those in psychiatric institutions). In 2007 Norway spent 8.9% of its GDP on health. In 2010, 19% of men and 19% of women aged 16–74 smoked on a daily basis.

### Welfare

Expenditure on social assistance in 2009 totalled 4,642m. kroner. On 31 Dec. 2010 there were 663,799 old age pensioners (377,170 women) and 301,088 disability pensioners (170,959 women). Maternity leave is either for 44 weeks on 100% of previous salary or 54 weeks on 80% of previous salary; unused portions may pass to the father. In Dec. 2010, 33,433 children aged one to three received cash benefit (27% of all children between one and three years of age).

### RELIGION

There is freedom of religion, the Church of Norway (Evangelical Lutheran), however, being the national church, endowed by the State. Its clergy are nominated by the King. Ecclesiastically Norway is divided into 11 dioceses, 100 deaneries and 1,298 parishes. About 80% of Norwegians belong to the Church of Norway (which had 3,848,841 members in 2009) and

approximately 68% of infants were baptised in the Church in 2009. There were 431,287 members of registered and unregistered religious and philosophical communities outside the Church of Norway in 2009, subsidized by central government and local authorities, including 234,772 Christians and 92,744 Muslims. The Roman Catholics are under a Bishop at Oslo, and Prelates at Tromsø and Trondheim.

### CULTURE

#### World Heritage Sites

Norway's UNESCO heritage sites (with year listed) are: the 12–13th century wooden church in Sogn og Fjordane on the west coast, the Urnes Stave Church (1979), a testimony to the city's key role in the Hanseatic League trading route between the 14–16th centuries; the 58 wooden buildings in Bergen's wharf of Bryggen (1979); the wooden houses of the copper mining village of Røros (1980), active between the 17–20th centuries; the pre-historic Rock Drawings of Alta (1995) in the Alta Fjord, near the Arctic Circle, dating from 4200 to 500 BC; Vegaøyen—the Vega Archipelago (2004), a cluster of dozens of islands centred on Vega, just south of the Arctic Circle; the West Norwegian Fjords—Geirangerfjord and Naerøyfjord (2005); and the Struve Geodetic Arc (2005). The Arc is a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries.

#### Press

There were 74 paid-for daily newspapers with a combined average net circulation of 2.19m. in 2008, and in 2007 there were 151 non-dailies with a circulation of 623,000. Norway has among the highest circulation rates of daily newspapers in the world, at 580 per 1,000 adult inhabitants in 2007. In 2007 a total of 7,074 book titles were published.

#### Tourism

In 2007 there were 3,260,000 foreign holiday and leisure visitors (excluding same-day visitors) who stayed an average of 7.4 nights each, totalling 24,252,000 nights. The main countries of origin were Sweden (761,000), Germany (548,000), Denmark (431,000) and the UK (246,000). In 2010 there were 1,128 hotels and 782 camping sites. Spending by foreign tourists totalled 30.8bn. kroner in 2007.

#### Festivals

The Bergen International Festival, Norway's oldest festival, is held annually in May/June and includes music, dance and theatre. The biennial Ibsen Festival (theatre) is held in Oslo in Aug./Sept. in even-numbered years. CODA (the Oslo International Dance Festival) runs for three weeks every Sept./Oct.

**Svalbard**

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. Total area, 61,022 sq. km (23,561 sq. miles). The main islands are Spitsbergen, Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land and Kvitøya. The Arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century whale-hunting gave rise to rival Dutch, British and Danish-Norwegian claims to sovereignty; but when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its significance. It was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Total population on 1 Jan. 2011 was 2,394, of whom 2,017 lived in the two Norwegian settlements, 370 in the Russian settlement and seven in the Polish settlement. Coal is the principal product. There are two Norwegian and two Russian mining camps. In 2009, 2.6m. tonnes of coal were produced from Norwegian mines.

In 2008, 69% of households on Svalbard had one or more snow scooters but only 49% of households had a car. There are research and radio stations, and an airport near Longyearbyen (Svalbard Lufthavn) opened in 1975.

**Jan Mayen**

This bleak, desolate and mountainous island of volcanic origin and partly covered by glaciers is situated at 71° N. lat. and 8° 30' W. long., 300 miles north-northeast of Iceland. The total area is 377 sq. km (146 sq. miles). Beerenberg, its highest peak, reaches a height of 2,277 metres. Volcanic activity, which had been dormant, reactivated in Sept. 1970.

There exist several unverified and inconclusive reports of the island's discovery. Its present name derives from the Dutch whaling captain Jan Jacobsz May, who mapped the island in 1614. Jan Mayen was subsequently established as a whaling base for the Dutch Noordsche Compagnie. The island was abandoned in 1638 owing to the near extinction of the local whale population, and remained uninhabited, though occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated into the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959) and a CONSOL station (1968) have been established.

---

**Bouvet Island****Bouvetøya**

This uninhabited volcanic island, mostly covered by glaciers and situated at 54° 25' S. lat. and 3° 21' E. long., was discovered in 1739 by a French naval officer, Jean Baptiste Lozier Bouvet, but no flag was hoisted until, in 1825, Capt. Norris raised the Union Jack. In 1928 Great Britain waived its claim to the island in favour of Norway, which in Dec. 1927 had occupied it. A law of 27 Feb. 1930 declared Bouvetøya a Norwegian dependency. The area is 49 sq. km (19 sq. miles). Since 1977 Norway has had an automatic meteorological station on the island.

---

**Peter I Island****Peter I Øy**

This uninhabited island, situated at 68° 48' S. lat. and 90° 35' W. long., was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated as a dependency. The area is 156 sq. km (60 sq. miles).

---

**Queen Maud Land****Dronning Maud Land**

On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W. and 45° E.) under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. In 1957 it was given the status of a dependency.

## KEY HISTORICAL EVENTS

The ancestors of present day Oman are believed to have arrived in two waves of migration, the first from Yemen and the second from northern Arabia. In the 9th century maritime trade flourished and Sohar became the greatest sea port in the Islamic world. In the early 16th century the Portuguese occupied Muscat. The Ya'aruba dynasty introduced a period of renaissance in Omani fortunes both at home and abroad, uniting the country and bringing prosperity; but, on the death in 1718 of Sultan bin Saif II, civil war broke out over the election of his successor. Persian troops occupied Muttrah and Muscat but failed to take Sohar which was defended by Ahmad bin Said, who expelled the Persians from Oman after the civil war had ended. In 1744 the Al bu Said family assumed power and has ruled to the present day. Oman remained largely isolated from the rest of the world until 1970 when Said bin Taimur was deposed by his son Qaboos in a bloodless coup.

## TERRITORY AND POPULATION

Situated at the southeast corner of the Arabian peninsula, Oman is bounded in the northeast by the Gulf of Oman and southeast by the Arabian Sea, southwest by Yemen and northwest by Saudi

Arabia and the United Arab Emirates. There is an enclave at the northern tip of the Musandam Peninsula. An agreement of April 1992 completed the demarcation of the border with Yemen, and an agreement of March 1990 finalized the border with Saudi Arabia.

With a coastline of 1,700 sq. km from the Strait of Hormuz in the north to the borders of the Republic of Yemen, the Sultanate is strategically located overlooking ancient maritime trade routes linking the Far East and Africa with the Mediterranean.

The Sultanate of Oman occupies a total area of 309,500 sq. km and includes different terrains that vary from plain to highlands and mountains. The coastal plain overlooking the Gulf of Oman and the Arabian Sea forms the most important and fertile plain in Oman.

The **Kuria Muria** islands were ceded to the UK in 1854 by the Sultan of Muscat and Oman. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman, in accordance with the wishes of the population. They are now known as the **Halaniyat Islands**.

Population at the census of Dec. 2010, 2,773,479 (1,612,411 males); density 9-0 per sq. km. The population comprised 1,957,336 Omanis and 816,143 expatriates.

The UN gives a projected population for 2015 of 3-06m.

In 2011, 73-3% of the population lived in urban areas. The census population of the capital, Muscat, in 2010 was 775,878.

The official language is Arabic; English is in commercial use.

## SOCIAL STATISTICS

2008 estimates: births, 61,000; deaths, 8,000. Estimated rates, 2008 (per 1,000 population): births, 22-0; deaths, 2-7. Expectation of life at birth, 2007, was 74-1 years for males and 77-3 years for females. Average annual population growth rate, 2000-08, 1-8%. Fertility rate, 2008, 3-0 births per woman, down from 7-8 in 1988.

Oman has achieved some of the most rapid advances ever recorded. Infant mortality declined from 200 per 1,000 live births in 1960 to eight per 1,000 live births in 2010, and as recently as 1970 life expectancy was just 40.

## CLIMATE

Oman has a desert climate, with exceptionally hot and humid months from April to Oct., when temperatures may reach 47°C. Light monsoon rains fall in the south from June to Sept., with highest amounts in the western highland region. Muscat, Jan. 28°C, July 46°C. Annual rainfall 101 mm. Salalah, Jan. 29°C, July 32°C. Annual rainfall 98 mm.

## CONSTITUTION AND GOVERNMENT

Oman is a hereditary absolute monarchy. The Sultan legislates by decree and appoints a Cabinet to assist him. The Basic Statute of the State was promulgated on 6 Nov. 1996.

The present Sultan is **Qaboos bin Said Al Said** (b. Nov. 1940).

In 1991 a new consultative assembly, the *Majlis al-Shura*, replaced the former State Consultative Chamber. The Majlis consists of 84 elected members. It debates domestic issues, but has no legislative or veto powers. There is also an upper house, the *Majlis al-Dawla*, which consists of 83 appointed members; it too has advisory powers only.

In Dec. 2002 the Sultan of Oman extended voting rights to all citizens over the age of 21.

## National Anthem

'Ya Rabbana elifidh lana jalalat al Saltan' ('O Lord, protect for us his majesty the Sultan'); words by Rashid bin Aziz, tune by Rodney Bashford.

## GOVERNMENT CHRONOLOGY

Sultans since 1932.

1932–70 Said bin Taimur Al Said  
1970– Qaboos bin Said Al Said

## RECENT ELECTIONS

The last elections to the *Majlis al-Shura* were on 15 Oct. 2011. No parties are allowed. 84 legislators were chosen for four-year terms from over 1,300 candidates, including 76 women (although only one woman was elected). Three activists who took part in the Feb. 2011 protests were elected.

## CURRENT GOVERNMENT

The Sultan is nominally Prime Minister and Minister of Foreign Affairs, Defence and Finance.

In March 2013 the other Ministers were:

*Special Representative of the Sultan:* Thuwayni bin Shihab Al Said.

*Deputy Prime Minister for Cabinet Affairs:* Fahd bin Mahmud Al Said.

## CURRENT LEADERS

### Qaboos bin Said

*Position*  
Sultan

#### Introduction

Qaboos has been the Sultan since 23 July 1970 when he deposed his father, Said bin Taimur. He has carried out an ambitious social and economic modernization programme, opening Oman to the outside world through accession to the League of Arab States, Gulf Co-operation Council and United Nations and pursuing a moderate regional foreign policy while preserving a longstanding political and military relationship with the United Kingdom. He is nominally prime minister, minister of defence, minister of foreign affairs, minister of finance and chairman of the central bank.

#### Early Life

Born in Salalah on 18 Nov. 1940, Qaboos attended a private school in England from the age of 16. In 1960 he went to the British Royal Military Academy at Sandhurst as an officer cadet. He subsequently served in the British army on operational duty and then studied in England before returning to Oman.

#### Career in Office

Concerned at his father's reactionary regime and inability to channel Oman's new oil wealth into the country's development, Qaboos led a coup in 1970. He then undertook a range of infrastructure projects, including the construction of roads, hospitals, schools, communications systems, and industrial and port facilities. He also abrogated his father's more extreme moralistic laws. His regime has since remained stable despite periods of labour unrest, an alleged Islamist extremist plot in 2005 to overthrow the government and protests in 2011 demanding employment and political reform against a background of wider disaffection spreading across the Arab world. Although the Sultan continues to legislate by decree, he is advised by an appointed Cabinet, an elected consultative assembly (*Majlis al-Shura*) and an appointed upper house (*Majlis al-Dawla*). In March 2004 Qaboos appointed Oman's first female Cabinet minister.

## DEFENCE

Military expenditure in 2008 totalled US\$4,671m. (US\$1,410 per capita), representing 8.5% of GDP—one of the highest percentages of any country in the world.

### Army

Strength (2007) 25,000. In addition there are 6,400 Royal Household troops. A paramilitary tribal home guard numbers 4,000.

### Navy

The main naval base is at Wudam. Naval personnel in 2007 totalled 4,200.

The wholly separate Royal Yacht Squadron consists of a yacht, a support ship with helicopter and troop-carrying capability, and a dhow.

### Air Force

The Air Force, formed in 1959, has 64 combat-capable aircraft including F-16s, Jaguars and Hawks.

Personnel (2007) 5,000.

## ECONOMY

Oil and natural gas accounted for 48% of GDP in 2006; trade, restaurants and hotels 12%; manufacturing 10%; and services 8%.

### Overview

Crude oil dominates the economy, accounting for 37% of exports in 2009, with China, Japan and India taking 32%, 17% and 11% respectively. Government attempts to diversify the economy have focused on tourism, shipping and investment in infrastructure. There are also plans to increase natural gas production as a share of gross domestic product to 10% by 2020. Oman holds 0.5% of the world's liquefied natural gas supply.

Growth from 2005 to 2009 averaged 7.1%, supported by high oil prices and accelerated growth in non-hydrocarbon sectors including trade, transport and communications. Higher global commodity prices, domestic demand growth (prompted by fiscal stimuli) and strong private sector credit growth raised inflation to over 12% in 2008 although it has fallen since then.

Public debt was 5.6% of GDP in 2012, while unemployment stood at 15%. The government's eighth Five Year Plan (for 2011 until 2015) aims for GDP growth at a minimum of 3% per year, with RO 12bn. earmarked for investment in the natural gas sector. It is hoped that development of gas-based and non-hydrocarbon industries will reduce unemployment.

### Currency

The unit of currency is the *Rial Omani* (OMR). It is divided into 1,000 *baiza*. The rial is pegged to the US dollar. In July 2005 foreign exchange reserves were US\$4,511m. and gold reserves totalled 1,000 troy oz (291,000 troy oz in April 2002). Total money supply was RO 1,067m. in May 2005. Inflation was 12.6% in 2008, 3.5% in 2009, 3.3% in 2010 and 4.0% in 2011.

In 2001 the six Gulf Arab states—Oman, along with Bahrain, Kuwait, Qatar, Saudi Arabia and the United Arab Emirates—signed an agreement to establish a single currency by 2010. However, Oman withdrew from the scheme in 2007.

### Budget

In 2008 revenues were RO 7,829.4m. and expenditures RO 7,556.7m. Oil revenue accounted for 67.5% of revenues in 2008; current expenditure accounted for 58.5% of expenditures.

### Performance

Real GDP growth was 3.9% in 2009, 5.0% in 2010 and 5.4% in 2011. Total GDP in 2009 was US\$71.8bn.

### Banking and Finance

The bank of issue is the Central Bank of Oman, which commenced operations in 1975 (*President*, Hamood Sangour Al Zadjali). All banks must comply with BIS capital adequacy ratios and have a minimum capital of RO 20m. (minimum capital requirement for foreign banks established in Oman is RO 3m.). In 2002 there were 15 commercial banks (of which nine were foreign) and three specialized banks. The largest bank is BankMuscat SAOG, with assets of RO 1.3bn.

Total foreign debt was US\$3,472m. in 2005.

There is a stock exchange in Muscat, which is linked with those in Bahrain and Kuwait.

## ENERGY AND NATURAL RESOURCES

### Environment

Oman's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 13.2 tonnes per capita.

### Electricity

Installed capacity was 3.4m. kW in 2007. Production in 2007 was 14.44bn. kWh, with consumption per capita 5,264 kWh.

### Oil and Gas

The economy is dominated by the oil industry. Oil in commercial quantities was discovered in 1964 and production began in 1967. Production in 2008 was 36.0m. tonnes. In 2007 exports of oil stood at 30.3m. tonnes. Total proven reserves in 2008 were 5.6bn. bbls. It was announced in Aug. 2000 that two new oilfields in the south of the country had been discovered, with a potential combined daily production capacity of 12,200 bbls. Earlier in 2000 oil began to be pumped from two further recently-discovered oilfields.

Gas is likely to become the second major source of income for the country. Oman's proven natural gas reserves were 980bn. cu. metres in 2008 (570bn. cu. metres in 1998). Natural gas production was 24.1bn. cu. metres in 2008 (5.2bn. cu. metres in 1998).

### Water

Oman relies on a combination of aquifers and desalination plants for its water, augmented by a construction programme of some 60 recharge dams. Desalination plants at Ghubriah and Wadi Adai provide most of the water needs of the capital area. In 2005 water production was 32,951m. gallons.

### Minerals

Production in 2009 (in 1,000 tonnes): sand and gravel, 77,114; limestone, 7,948; chromite, 636 (up from 19 in 2004); marble, 588; gypsum, 333; quartz, 198. The mountains of Oman are

rich in mineral deposits; these include chromite, coal, asbestos, manganese, gypsum, limestone and marble.

### Agriculture

Agriculture and fisheries are the traditional occupations of Omanis and remain important to the people and economy of Oman to this day. The country now produces a wide variety of fresh fruit, vegetables and field crops. The country is rapidly moving towards its goal of self-sufficiency in agriculture with the total area under cultivation standing at over 70,000 ha. and total output more than 1m. tonnes. This has not been achieved without effort. In a country where water is a scarce commodity it has meant educating farmers on efficient methods of irrigation and building recharge dams to make the most of infrequent rainfall. In 2002 there were an estimated 38,000 ha. of arable land and 43,000 ha. of permanent crops. Approximately 62,000 ha. were irrigated in 2002. In 2002, 35.2% of the economically active population were engaged in agriculture.

The coastal plain (Batinah) northwest of Muscat is fertile, as are the Dhofar highlands in the south. In the valleys of the interior, as well as on the Batinah coastal plain, date cultivation has reached a high level, and there are possibilities of agricultural development. Agricultural products, 2004 estimates (in 1,000 tonnes): dates, 239; tomatoes, 43; bananas, 33; watermelons, 27. Vegetable and fruit production are also important, and livestock are raised in the south where there are monsoon rains. Camels (125,000 in 2004) are bred by the inland tribes. Other livestock, 2004: sheep, 355,000; cattle, 315,000; goats, 1m.; chickens, 3.4m.

### Fisheries

The catch was 163,927 tonnes in 2010, exclusively sea fish.

## INDUSTRY

Apart from oil production, copper smelting and cement production, there are light industries, mainly food processing and chemical products. The government gives priority to import substitute industries.

### Labour

Males constituted 83.9% of the economically active population in 2000. In 2003 there were 482,632 employees in the private sector and 123,045 persons in government service. The employment of foreign labour is being discouraged following 'Omanization' regulations of 1994. More than a quarter of the total population are foreign workers. Following the unrest of early 2011 the private sector monthly minimum wage for national workers was increased in Feb. 2011 from RO 140 to RO 200. There is no minimum wage for foreign workers.

## INTERNATIONAL TRADE

Oman, along with Bahrain, Kuwait, Qatar, Saudi Arabia and the United Arab Emirates entered into a customs union in Jan. 2003.

### Imports and Exports

Imports and exports in US\$1m.:

|                | 2003   | 2004   | 2005   | 2006   | 2007   |
|----------------|--------|--------|--------|--------|--------|
| Imports c.i.f. | 6,801  | 8,796  | 8,970  | 11,038 | 16,025 |
| Exports f.o.b. | 12,196 | 13,381 | 18,692 | 21,586 | 24,692 |

Main import suppliers, 2006: United Arab Emirates, 25.5%; Japan, 17.1%; India, 5.2%; USA, 5.2%. In 2004 crude oil exports made up approximately 68% of total exports. Main export markets in 2006 were: China, 26.5%; South Korea, 16.0%; Thailand, 12.4%; United Arab Emirates, 9.5%.

## COMMUNICATIONS

### Roads

A network of adequate graded roads links all the main sectors of population, and only a few mountain villages are not accessible by

motor vehicles. In 2005 there were about 42,300 km of roads (16,500 km paved) including 953 km of dual carriageway. In 2007 there were 453,400 passenger cars in use (174 per 1,000 inhabitants), 113,300 vans and lorries, and 26,400 buses and coaches. In 2007 there were 8,816 road accidents and 798 deaths. With 30.7 deaths per 100,000 population in 2007, Oman has among the highest death rates in road accidents of any country.

#### Civil Aviation

The national airline is Oman Air, which in 2007 had 15 aircraft and served 26 destinations. Oman formerly had a 50% share in Gulf Air with Bahrain, but withdrew in May 2007. In 2009 Seeb International Airport (Muscat) handled 4,556,502 passengers (3,983,413 international) and 64,418 tonnes of freight.

There are plans to expand Oman's two major airports, Seeb International and Salalah (mainly domestic flights).

#### Shipping

In Mutrah a deep-water port (named Mina Qaboos) was completed in 1974. In 2008 it handled 6.3m. tonnes of foreign cargo. In Jan. 2009 there were seven ships of 300 GT or over registered, totalling 17,000 GT.

#### Telecommunications

In 2008 there were 274,200 main (fixed) telephone lines in Oman; mobile phone subscribers numbered 3,219,300 in 2008 (115.6 per 100 persons). There were an estimated 557,000 internet users in 2008. In March 2012 there were 422,000 Facebook users.

#### SOCIAL INSTITUTIONS

##### Justice

The population in penal institutions in 2002 was 1,403 (61 per 100,000 of national population). The death penalty is in force, but has not been used since 2001.

##### Education

Adult literacy was 87% in 2008. In 2003–04 there were 1,022 schools, up from just three when Qaboos bin Said became Sultan in 1970. The total number of pupils in state education in 2003–04 was 576,472 (139,082 in basic education and 437,390 in general education) with 32,345 teachers (13,939 in basic education and 18,406 in general education). Oman's first university, the Sultan Qaboos University, opened in 1986 and in 2003–04 there were 12,437 students. It remains the only public university although a number of private universities and colleges have opened in the meantime.

In 2006 public expenditure on education came to 4.2% of GNI and 31.1% of total government spending (the highest percentage of any country).

##### Health

In 2003 there were 49 hospitals with 4,501 beds. There were also 129 health centres. In 2002 there were 3,478 doctors, 297 dentists, 594 pharmacists and 8,004 nursing staff.

#### RELIGION

In 2001, 83.5% of the population were Muslim. There were also Hindu and Christian minorities.

#### CULTURE

##### World Heritage Sites

The four sites on the UNESCO World Heritage List under Omani jurisdiction are (with the year entered on the list): Bahla Fort (1987); the archaeological sites of Bat, Al-Khutm and Al-Ayn, a collection of settlements and necropolises of the 3rd millennium BC (1988); the Frankincense Trail, a group of archaeological sites representing the production and distribution of frankincense (2000); and the five ancient Aflaj irrigation systems (2006). A fifth site, the Arabian Oryx Sanctuary, was removed from the list after the Omani government decided to reduce the size of the protected area by 90%.

##### Press

In 2006 there were six daily newspapers with a combined circulation of 165,000.

##### Tourism

Non-resident tourists staying at hotels and similar establishments numbered 1,276,000 in 2009 (down from 1,378,000 in 2008 although up from 1,182,000 in 2007).

##### Festivals

National Day (18 Nov.); Spring Festival in Salalah (July–Aug.); Ramadan (July–Aug. in 2013 and June–July in 2014).

#### DIPLOMATIC REPRESENTATIVES

## KEY HISTORICAL EVENTS

The Neolithic settlement of Mehrgarh in Balochistan, western Pakistan dates from around 7000 BC. Continuously occupied for over 4,000 years, it was a precursor to the Indus Valley civilization, which flourished between 3300 and 1700 BC. Indus Valley settlements spread across much of present-day Pakistan and northwest India, from the Arabian Sea to the foothills of the Himalayas, centring on the cities of Mohenjo-Daro and Harappa. The civilization's decline coincided with the arrival of Indo-European-speaking tribes, including the Aryans, from central Asia. Taxila in northern Pakistan became a centre for the development of Vedic/Hindu culture from the 6th century BC.

Under the influence of the Persian Achaemenid Empire from around 550 BC, most of present-day Pakistan was ruled by Darius the Great from Persepolis after 515 BC. Alexander the Great, conqueror of the Persian Empire, invaded northern Pakistan in 326 BC but was superseded by the Maurya dynasty from around 300 BC. Its emperor, Ashoka the Great, ruled over central Asia and much of the Indian sub-continent between 273 and 232 BC. The Indus Valley came under Greco-Bactrian control from around 180 BC, bringing about a fusion of classical Greek culture and Buddhism. Invasions by Scythians and Parthians were followed by the arrival of the Yuechi from the steppes of western China. They established the Buddhist Kushan dynasty in the 1st century AD. Centred on Peshawar, it linked the Silk Road with the Arabian Sea and the Ganges Valley.

Arab settlers introduced Islam early in the 8th century. In 712 Muhammad ibn Qasim conquered Sindh province and incorporated it into the Umayyad Caliphate, ruled from Baghdad. Over the next three centuries the southern provinces of Multan and Balochistan were also absorbed. In 1005 Peshawar was conquered by the Turkic-Afghan warlord, Sultan Mahmud of

Ghazni, who went on to take Punjab, Kashmir and Balochistan. The Ghaznavid Dynasty made Lahore one of its key cities—the easternmost outpost of Islam—though it was destroyed during Genghis Khan's Mongol invasion of 1219.

In the late 13th century northern and eastern Pakistan came under the influence of Islamic sultanates. Centred on Delhi, they gradually gained control of most of the Indian subcontinent. Timur-i Lang seized Persia, Afghanistan and western Pakistan in the 1380s, absorbing them into a vast central Asian empire. Babur, the founder of the Moghul dynasty in the early 16th century, initially made Kabul his capital, before power transferred to Lahore, Delhi and Agra. While most of the Indian subcontinent remained part of a united Moghul empire between the 16th and 19th centuries, the northwestern fringe was attacked by Persians in the 1730s and Sindh and Punjab were incorporated into Ahmad Shah Durrani's Afghan state from 1747.

The British, who established a protectorate in Bengal in 1757 and subsequently controlled much of the sub-continent, attempted to secure the anarchic northwest against Russian expansion in the first Afghan War (1838–42). Although Sindh and the Punjab were absorbed into British India in the 1840s, Balochistan and Afghanistan remained independent. Following Britain's failure to win these mountainous regions in the second Afghan War (1878–80), the North-West Frontier Province was created in 1901 as a semi-autonomous region.

Hindu-Muslim tensions escalated and in the 1930s the poet Muhammad Iqbal proposed a separate Muslim nation, an idea taken up by Muhammad Ali Jinnah, leader of the Muslim League. Following the League's victories in most of the majority-Muslim constituencies in the 1946 elections, the British agreed to the formation of East and West Pakistan under the 1947 Independence of India Act. Jinnah became West Pakistan's governor-general in the new capital, Karachi.

The partition of India saw 14m. people leaving their homes, with violence claiming 500,000 lives on both sides of the border. The signing over to India of Kashmir in Oct. 1947 was disputed by Pakistan. War broke out until a UN-brokered ceasefire and temporary border was agreed in 1949. In 1951 Pakistan's first prime minister, Liaquat Ali Kahn, was assassinated. The popularity of the Muslim League declined and Pakistan became increasingly unstable.

1958 saw the first of several periods of martial law, followed by the rule of Field Marshal Mohammad Ayub Khan (until 1969) and Gen. Agha Mohammad Yahya Khan (until 1971). Discontent in East Pakistan with the federal government led to calls by the Awami League for full autonomy. Following East Pakistan's declaration of independence as Bangladesh in March 1971, West Pakistan sent in troops, sparking civil war. Hundreds of thousands died and 10m. refugees fled to India. The surrender of Pakistan's forces to the Indian army in Dhaka on 16 Dec. 1971 cleared the way to an independent Bangladesh.

A new constitution in 1973 provided for a federal parliamentary government with a president and prime minister. Zulfikar Ali Bhutto, representing the Pakistan People's Party (PPP), became premier. Considered by traditionalists to be insufficiently Islamic, in July 1977 Gen. Mohammad Zia ul-Haq led an army coup against Ali Bhutto, who was hanged for conspiracy to murder. His daughter, Benazir, led the PPP to victory in the elections in 1988 but was dismissed on charges of corruption and incompetence in 1990. Reinstated as prime minister following elections in 1993, President Farooq Leghari overthrew her administration in 1996.

Indo-Pakistani relations have floundered over Kashmir. In May 1998 Pakistan carried out five nuclear tests in the deserts of Balochistan in response to India's tests earlier in the month. US President Bill Clinton invoked sanctions but Pakistan carried out

a sixth test. On 11 June, following India's example, Pakistan announced a unilateral moratorium on nuclear tests. On 12 Oct. 1999 Gen. Pervez Musharraf seized power in a coup, overthrowing the democratically-elected government of Nawaz Sharif after Sharif tried to dismiss Musharraf as army chief of staff. Sharif was convicted of corruption and sentenced to life imprisonment.

Negotiations with India over Kashmir began in July 1999. In May 2001 India ended its six-month long ceasefire but invited Pakistan for further talks, prompting hopes of avoiding more violence. Following the attacks on New York and Washington of 11 Sept. 2001 Pakistan found itself central to the war against terrorism. Neighbouring Afghanistan was believed to be sheltering Osama bin Laden and the USA persuaded Musharraf to allow its forces to use Pakistani air bases. In return the USA lifted its remaining sanctions. In Dec. 2001 suicide bombers attacked the Indian parliament. Although no-one claimed responsibility, the Indian authorities suspected Kashmiri separatists, heightening Indo-Pakistani tensions. Musharraf's subsequent crackdown on militants helped to reduce tension between the two countries.

An attack on an Indian army base in Indian-occupied Kashmir in May 2002, killing 31, was linked to terrorists infiltrating from Pakistan. Musharraf drew widespread criticism for failing to combat terrorism in the region. In Nov. 2003 Pakistan and India agreed to another ceasefire along Kashmir's Line of Control. Relations gradually improved and in April 2005 bus services resumed across the divided territory for the first time in 60 years.

In Oct. 2005 Pakistan-administered Kashmir was struck by an earthquake which killed 73,300 people and left 3m. homeless. In 2006 there was an upsurge in violence by tribal groups in Balochistan demanding greater autonomy. Bomb blasts rocked Karachi and Islamabad in early 2007 and 68 passengers were killed in an explosion on a train travelling between Lahore and New Delhi. Musharraf's decision to suspend the chief justice of the Supreme Court, Iftikhar Mohammad Chaudhry, for alleged abuse of power in March 2007 sparked riots in Karachi.

In July 2007 security forces stormed Islamabad's Red Mosque, considered to have close links with militant groups. At the end of a week-long siege, over 100 people were killed and 250 injured. In Oct. 2007 Musharraf won the presidential election, though the Supreme Court refused to confirm the result until it had ruled on Musharraf's eligibility to stand while still head of the army. The court dismissed challenges to the result the following month. Meanwhile, fighting intensified in Waziristan, a stronghold of Islamic militant groups.

The assassination of Benazir Bhutto in Dec. 2007 ahead of elections in Jan. 2008 threw the already fragile political climate into turmoil. The election was rescheduled for Feb. when the leading opposition parties, including Bhutto's, won a resounding victory against pro-Musharraf parties and formed a coalition government. Musharraf's presidency was severely weakened as a result and he eventually resigned in Aug. 2008. In Sept. 2008 Asif Ali Zardari was elected his successor. His term in office has seen continued fighting between government forces and Islamic militant groups linked with several high-profile attacks including the Mumbai bombings of Nov. 2008 and an assault on the visiting Sri Lankan cricket team in March 2009. In Oct. 2009 the military launched an offensive against Taliban forces in the South Waziristan region. Since then more than 500 civilians have been killed in terrorist attacks throughout the country.

## TERRITORY AND POPULATION

Pakistan is bounded in the west by Iran, northwest by Afghanistan, north by China, east by India and south by the Arabian Sea. The area (excluding the disputed area of Kashmir) is 796,100 sq. km (307,380 sq. miles), including 25,220 sq. km (9,740 sq. miles) of inland water. 2011 provisional census population (excluding three districts of Balochistan, the agency of South Waziristan in the Federally Administered Tribal Areas, and the autonomous states Azad-Kashmir and Gilgit-Baltistan),

192,288,944. In 2011, 36.2% lived in urban areas. There were 1.7m. refugees in 2011, mostly from Afghanistan, the highest number in any country and 17% of the global total.

The UN gives a projected population for 2015 of 189.65m.

The population of the principal cities is as follows:

## SOCIAL STATISTICS

Estimates, 2008: births, 5,324,000; deaths, 1,224,000. Estimated birth rate in 2008 was 30.1 per 1,000 population; estimated death rate, 6.9. Infant mortality (per 1,000 live births), 70 (2010). Formal registration of marriages and divorces has not been required since 1992. Expectation of life in 2007 was 65.9 years for men and 66.5 years for women. Annual population growth rate, 2000–08, 2.2%. Fertility rate, 2008, 4.0 births per woman.

## CLIMATE

A weak form of tropical monsoon climate occurs over much of the country, with arid conditions in the north and west, where the wet season is only from Dec. to March. Elsewhere, rain comes mainly in the summer. Summer temperatures are high everywhere, but winters can be cold in the mountainous north. Islamabad, Jan. 50°F (10°C), July 90°F (32.2°C). Annual rainfall 36" (900 mm). Karachi, Jan. 61°F (16.1°C), July 86°F (30°C). Annual rainfall 8" (196 mm). Lahore, Jan. 53°F (11.7°C), July 89°F (31.7°C). Annual rainfall 18" (452 mm). Multan, Jan. 51°F (10.6°C), July 93°F (33.9°C). Annual rainfall 7" (170 mm). Quetta, Jan. 38°F (3.3°C), July 80°F (26.7°C). Annual rainfall 10" (239 mm).

## CONSTITUTION AND GOVERNMENT

Under the 1973 constitution, the *President* was elected for a five-year term by a college of parliamentary deputies, senators and members of the Provincial Assemblies. Parliament is bicameral, comprising a *Senate* of 104 members and a *National Assembly* of 342. In the *Senate*, each of the four provinces is allocated 14 seats, while the federally administered tribal areas and the federal capital are assigned eight and two seats respectively. In addition, each province is conferred four seats for technocrats and four for women. Two seats, one for technocrats and another for women, are reserved for the federal capital. The *National Assembly* is directly elected for five-year terms. 272 members are elected in

single-seat constituencies, there are ten seats for non-Muslim minorities and 60 seats for women.

Following the 1999 coup Gen. Musharraf announced that the Constitution was to be held 'in abeyance' and issued a 'Provisional Constitution Order No. 1' in its place. In Aug. 2002 he unilaterally amended the constitution to grant himself the right to dissolve parliament.

During the period of martial law from 1977–85 the Constitution was also in abeyance, but not abrogated. In 1985 it was amended to extend the powers of the President, including those of appointing and dismissing ministers and vetoing new legislation until 1990. Legislation of 1 April 1997 abolished the President's right to dissolve parliament, appoint provincial governors and nominate the heads of the armed services.

Gen. Pervez Musharraf, Chief of the Army Staff, assumed the responsibilities of the chief executive of the country following the removal of Prime Minister Nawaz Sharif on 12 Oct. 1999. He formed a National Security Council consisting of six members belonging to the armed forces and a number of civilians with expertise in various fields. A Federal Cabinet of Ministers was also installed working under the guidance of the National Security Council. Also formed was the National Reconstruction Bureau, a think tank providing institutional advice and input on economic, social and institutional matters. The administration declared that it intended to first restore economic order before holding general elections to install a civilian government. The Supreme Court of Pakistan allowed the administration a three-year period, which expired on 12 Oct. 2002, to accomplish this task. Elections were held on 10 Oct. 2002. On 30 April 2002 a referendum was held in which 97.7% voted in favour of extending Musharraf's rule by a further five years. Turnout was around 50%. He amended the constitution in Aug. 2002 to formally extend his mandate by five years. The constitution was further amended in Dec. 2003 to enhance Musharraf's power and allow a vote of confidence in his presidency.

In March 2007 Musharraf announced his intention to stand for a five-year presidential term. The Supreme Court rejected his candidacy while opposition parties challenged his constitutional right to hold the presidency and head the military. In Sept. 2007 the Supreme Court's earlier judgement was overturned and the following month Musharraf was granted a further term of office by the national parliament and provincial assemblies. However, the Supreme Court refused to sanction the appointment until the surrounding legal questions had been resolved. In Nov. 2007 Musharraf suspended the constitution and imposed martial rule. Several prominent members of the judiciary and opposition leaders, including Benazir Bhutto and Imran Khan, were arrested or jailed. The Constitution was reinstated in Dec. but judicial freedom was severely compromised by the dismissal of senior court officials. Amendments were introduced to extend the military's power to try citizens and facilitate the arrest of political opponents. Following Musharraf's resignation in Aug. 2008, ousted Chief Justice Iftikhar Chaudry was reinstated in March 2009. The 2007 amendments to the constitution were subsequently revoked in July 2009 and in Aug. the Supreme Court ruled that Musharraf's actions had been illegal.

### RECENT ELECTIONS

Parliamentary elections were held on 18 Feb. 2008 having been delayed following the assassination of Benazir Bhutto, the leader of the Pakistan People's Party (PPP), in Dec. 2007. Turnout was 44.5%. The PPP gained 87 of the National Assembly's 272 elected seats and received 30.6% of votes cast; the Pakistan Muslim League-N (PML-N, led by ex-prime minister Nawaz Sharif) won 67 seats and received 19.6% of the vote; the pro-Musharraf Pakistan Muslim League (Quaid-e-Azam) (PML-Q) gained 42 seats and 23.0% of the vote; and the United National Movement (MQM) 19 seats with 7.4% of the vote. The remaining seats went to smaller parties and non-partisans. After the election, allocation of seats to women and minority representatives was carried out in accordance with the constitution resulting in the PPP having 121 seats, the PML-N 91 seats, the PML-Q 54 and the MQM 25. On 21 Feb. 2008 the PPP, the PML-N and the Awami National Party agreed to form a coalition government; the PPP's Yousaf Raza Gilani was elected prime minister on 24 March 2008.

In indirect elections held on 6 Sept. 2008 Asif Ali Zardari (PPP) was elected president by federal and provincial lawmakers, winning 481 votes against 153 for Saeeduz Zaman Siddique (PML-N) and 44 for Mushahid Hussain Syed (PML-Q).

Parliamentary elections were scheduled to take place on 11 May 2013.

## CURRENT LEADERS

### Asif Ali Zardari

#### Position

President

#### Introduction

Asif Ali Zardari became Pakistan's president in Sept. 2008 following the resignation of Pervez Musharraf. He has been co-chairman of the Pakistan's People's Party (PPP), the largest grouping in the National Assembly, since the assassination of his wife, Benazir Bhutto, in Dec. 2007. A controversial figure, he has struggled to maintain a stable coalition government.

#### Early Life

Born on 26 July 1955 in Nawabshah, Zardari was brought up and educated in Karachi. He established a career in business and property and in 1983 unsuccessfully contested local elections in Nawabshah. In 1987 Zardari married Benazir Bhutto, then leader-in-exile of the PPP in London. The following year Bhutto became prime minister when the PPP won the general election.

During Bhutto's first term of office Zardari prospered amid rumours of corruption. In 1990 Bhutto was ousted by President Ghulam Ishaq Khan, and Zardari was arrested and jailed on corruption and blackmail charges although never brought to trial. He claimed the action was politically motivated. While in prison Zardari was elected to the National Assembly and in 1993, when Bhutto won a second term as prime minister, the charges against him were dropped. He then served as minister for the environment from 1993–96 and as minister for investment from 1995–96.

In 1996 Bhutto was again removed from office and Zardari was arrested on charges of murder and corruption. He was detained for eight years, during which time he and Bhutto appealed against a Swiss court conviction for money laundering. With Bhutto in exile in Dubai, Zardari continued to deny all charges and claimed political persecution. In 2004 he was freed and the charges against him in Pakistan were dropped. From 2004–07 he lived primarily in the USA, where he received medical treatment for several conditions.

In Nov. 2007 President Musharraf introduced a measure to cancel criminal charges against National Assembly members, clearing the way for Zardari and Bhutto to return to Pakistan. Following Bhutto's assassination during a PPP rally on 27 Dec. 2007, Zardari assumed joint chairmanship of the party with his 19-year-old son, Bilawal. In Feb. 2008 the PPP won the general election in coalition with the Pakistan Muslim League-Nawaz Sharif (PML-N). Zardari and Sharif sought to establish a coalition government and made preparations to impeach Musharraf, who was refusing to relinquish power. Musharraf finally resigned on 18 Aug. 2008 and four days later the PPP nominated Zardari as their presidential candidate. However, on 25 Aug. Sharif took his party out of the coalition, protesting at the concentration of executive power in Zardari's hands and claiming that he had reneged on a promise to reinstate 60 Supreme Court judges. Zardari was elected president on 6 Sept. 2008.

#### Career in Office

Zardari's tenure has been marked by political tensions, both domestic and with neighbouring states. In March 2009 he defused mounting friction with the Pakistani judiciary and the PML-N by announcing the reinstatement of former chief justice Iftikhar Chaudhry—sacked by Musharraf in 2007 and since championed by Sharif—in response to widespread popular protests. Zardari also pledged to reduce some of the powers invested in the presidency (under constitutional changes which were later approved by parliament in April 2010), and in Nov. 2009 relinquished control of the country's nuclear weapons to the prime minister in an apparent effort to deflect growing

opposition. This gesture, however, was overshadowed the following month as the Supreme Court quashed an earlier legal amnesty protecting Zardari and several political allies from corruption charges. Zardari's opponents renewed calls for his resignation. Prime Minister Gilani's failure to pursue further investigations into Zardari prompted the Court to charge the premier with contempt in Feb. 2012. In June it disqualified Gilani from holding office and he was succeeded by Raja Pervez Ashraf.

Zardari's attempts to improve relations with India have been hampered by allegations of Pakistani involvement in the major terrorist attack in Mumbai in 2008 and further attacks in Mumbai and Delhi in July and Sept. 2011. Furthermore, longstanding tensions over the disputed territory of Kashmir led to border clashes in Jan. 2013. Zardari has also faced an increasing domestic security threat from Islamic extremists, especially in the volatile northwest region of the country. In response to a series of attacks, government forces launched major military offensives against Taliban militants from April 2009 in the Swat valley and from Oct. 2009 in the tribal area of South Waziristan. However, suicide bombings by militants continued unabated in many of Pakistan's major cities, further undermining Zardari's authority.

In July–Aug. 2010 Zardari was criticized for his government's response to a humanitarian crisis following flooding that devastated large areas of the country. More than 1,600 people were killed and 20m. displaced by the deluge.

Relations with the USA became increasingly strained in 2010 and 2011. Cross-border US air strikes in anti-Taliban operations led Pakistan to temporarily suspend NATO's supply routes into Afghanistan in Sept. 2010 and again in Nov. 2011. Meanwhile, Osama bin Laden, founder of the al-Qaeda militant network, was killed by US special forces in Abbottabad in Pakistan in May 2011. The Pakistani security establishment's apparent ignorance about Bin Laden's presence in the city, and the US government's failure to notify the Pakistani authorities about its military intentions, caused further friction between the two uneasy allies.

Concurrently, there were increasing tensions between the Zardari government and Pakistan's powerful military leadership. In Dec. 2011 Zardari underwent hospital treatment in Dubai, triggering rumours of his resignation under coercion from the army, and in Jan. 2012 a scandal over a leaked memo alleging that senior government officials had sought US aid against a possible military coup further soured the political atmosphere.

In March 2013 parliament dissolved itself ahead of elections scheduled for 11 May. In so doing, it became the first parliament in Pakistan's history to complete a full five-year term.

## DEFENCE

A *Council for Defence and National Security* was set up in Jan. 1997, comprising the President, the Prime Minister, the Ministers of Defence, Foreign Affairs, Interior, Finance and the military chiefs of staff. The Council advised the government on the determination of national strategy and security priorities, but was disbanded in Feb. 1997. The Council was revived in Oct. 1999 following the change of government but was to have a wider scope and not restrict itself to defence matters.

Defence expenditure in 2008 totalled US\$4,442m. (US\$26 per capita), representing 3.0% of GDP. However, following the return of civilian government in March 2008, the 2008–09 defence budget was reduced. Expenditure is also increasingly targeted at developing counter-insurgency capabilities as a result of the threat from Taliban forces along the border with Afghanistan.

As at 31 Jan. 2013 Pakistan had 8,216 personnel serving in UN peacekeeping operations (the second largest contingent of any country, after Bangladesh).

#### Nuclear Weapons

Pakistan began a secret weapons programme in 1972 to reach parity with India, but was restricted for some years by US sanctions. The Stockholm International Peace Research Institute

estimates that Pakistan possesses 90–110 nuclear warheads. In May 1998 Pakistan carried out six nuclear tests in response to India's tests earlier in the month. Pakistan, known to have a nuclear weapons programme, has not signed the Comprehensive Nuclear-Test-Ban-Treaty, which is intended to bring about a ban on any nuclear explosions. According to *Deadly Arsenals*, published by the Carnegie Endowment for International Peace, Pakistan has both chemical and biological weapon research programmes.

### Army

Strength (2007) 550,000. There were also about 304,000 personnel in paramilitary units: National Guard, Frontier Corps and Pakistan Rangers.

Most armoured equipment is of Chinese origin including over 2,450 main battle tanks. There is an air wing with fixed-wing aircraft and 26 attack helicopters.

### Navy

The combatant fleet includes five French-built diesel submarines, three midget submarines for swimmer delivery and six ex-British frigates. The Naval Air wing operates 16 combat-capable aircraft.

The principal naval base and dockyard are at Karachi. There are secondary bases at Gwadar and Ormara. Naval personnel in 2007 totalled 24,000 (including an estimated 1,400 marines and some 2,000 Marine Security Agency personnel).

### Air Force

The Pakistan Air Force came into being on 14 Aug. 1947. It has its headquarters at Peshawar and is organized within three air defence sectors, in the northern, central and southern areas of the country. There is an Air Force Academy at Risalpur, which includes a College of Aeronautical Engineering.

Total strength in 2007 was 360 combat-capable aircraft and 45,000 personnel. Equipment included Mirage IIIs, Mirage 5s, F-16s, Q-5s and J-7s.

## INTERNATIONAL RELATIONS

Following Gen. Musharraf's coup in Oct. 1999, Pakistan was suspended from the Commonwealth's councils although the suspension was ended in May 2004. Pakistan was again suspended in Nov. 2007 after then President Musharraf declared emergency rule but it was readmitted in May 2008.

## ECONOMY

Agriculture accounted for 21.2% of GDP in 2010, industry 25.4% and services 53.4%.

### Overview

Though growth in the agricultural sector has been falling since the 1980s, it contributes over 21% of GDP and employs 45% of the labour force. Pakistan is one of the world's largest producers of raw cotton but historically textile exports have added little value. Cotton accounted for 8.6% of the value added in agriculture and about 1.8% of GDP in 2009. Chiefly grown in Punjab province, cotton is crucial to the success of the yarn-spinning industry concentrated around Karachi.

From 2004–07 the economy grew by over 5% per year, driven by the industrial and service sectors. Broad-based growth was supported by sound macroeconomic management and progress in implementing structural reforms and privatization. The Oct. 2005 earthquake in northern Pakistan had little impact on Pakistan's total production. However, the cost of reconstruction put major strain on the public finances and the current account balance.

In 2007–08 international oil and food prices rose sharply, with negative effects. A stabilization programme supported by the IMF was initiated in Nov. 2008 to avoid default on debt payments. Severe flooding in July 2010 affected more than 20m. people and disrupted 500,000 ha. of cropped land. A US\$451m. emergency assistance package was provided by the IMF. The World Bank

estimated the damage at US\$9.7bn. and committed US\$1bn. towards recovery. In 2011 more floods affected over 6m. people.

Public debt was reduced from 75.1% of GDP in 2001 to 60.1% in 2011. Poverty levels fell from 34.5% in 2002 to 22.3% in 2006. Inflation is persistently high, averaging 10.6% between 2003 and 2012. Pakistan requires an annual average growth rate of 7% to absorb new entrants into the labour force, more than double the growth achieved in 2011.

Political instability, structural problems in the energy sector, poor infrastructure and a volatile security situation pose additional challenges.

### Currency

The monetary unit is the *Pakistan rupee* (PKR) of 100 *paisas*. Gold reserves in Sept. 2009 were 2.10m. troy oz; foreign exchange reserves, US\$10,418m. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008  | 2009  | 2010  | 2011  |
|------|------|------|------|------|------|-------|-------|-------|-------|
| 2.4% | 3.2% | 4.0% | 9.3% | 8.0% | 7.8% | 10.8% | 17.6% | 10.1% | 13.6% |

The rupee was devalued by 3.65% in Sept. 1996, 8.5% in Oct. 1996 and 8.7% in Oct. 1997, and by 4.2% in June 1998 in response to the financial problems in Asia. In June 2008 total money supply was Rs3,359.3bn.

### Budget

The financial year ends on 30 June. Budgetary central government revenues totalled Rs1,803.2bn. in 2008–09; expenditures totalled Rs2,137.4bn. in 2008–09. Taxes accounted for 65.5% of revenues in 2008–09; interest accounted for 35.2% of expenditures, and goods and services 21.8%.

There is a general sales tax of 16%.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 3.1% | 4.7% | 7.5% | 9.0% | 5.8% | 6.8% | 3.7% | 1.7% | 3.1% | 3.0% |

Pakistan's total GDP in 2011 was US\$210.2bn.

### Banking and Finance

The State Bank of Pakistan is the central bank (*Governor*, Yaseen Anwar); it came into operation as the Central Bank on 1 July 1948 and was nationalized in 1974 with other banks. Private commercial bank licences were reintroduced in 1991.

The State Bank of Pakistan is the issuing authority of domestic currency, custodian of foreign exchange reserves and bankers for the federal and provincial governments and for scheduled banks. It also manages the rupee public debt of the federal and provincial governments. The National Bank of Pakistan acts as an agent of the State Bank where the State Bank has no offices of its own.

In Feb. 1994 the State Bank of Pakistan was granted more autonomy to regulate the monetary sector of the economy.

In Dec. 1999 the Supreme Court ruled that Islamic banking methods, whereby interest is not permitted, had to be used from 1 July 2001. However, the decision was rescinded in June 2002. The State Bank offered three options for the implementation of Islamic banking practices: i) banks to establish an independent Islamic bank; ii) the opening of subsidiaries of existing commercial banks; iii) the establishment of new branches to execute Islamic banking procedures.

In Sept. 2003 total assets of public sector commercial banks amounted to Rs980,300m., total assets of local private banks to Rs1,122,400m., total assets of foreign banks to Rs276,900m. and total assets of all commercial banks amounted to Rs2,379,600m. In Dec. 2005 total deposits of scheduled banks (stocks) equalled Rs2,661,697m. and net foreign assets amounted to Rs523,044m.

There were 37 commercial banks in Sept. 2003 (five state-owned and 15 foreign) with assets Rs2,380bn. In 2002 there were 45 leasing banks, operating in accordance with Sharia demands. There is a Federal Bank for Co-operatives.

In 2010 external debt totalled US\$1,127m., equivalent to 31.3% of GNI.

Foreign direct investment was US\$56,773m. in 2010, down from US\$2,338m. in 2009 and US\$5,438m. in 2008. The total stock of FDI at the end of 2010 was US\$21.49bn.

There are stock exchanges in Islamabad, Karachi and Lahore.

## ENERGY AND NATURAL RESOURCES

### Environment

Pakistan's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.9 tonnes per capita in 2008.

### Electricity

Installed capacity in 2006–07 was 19.42m. kW, of which 12.48m. kW was thermal, 6.48m. kW was hydro-electric and 0.46m. kW was nuclear. In 2010 there were two nuclear reactors in use. Production in 2006–07 was 95.66bn. kWh, of which 68% was thermal and 14% was hydro-electric. Power shortages are frequent. Consumption per capita in 2006–07 was 601 kWh.

### Oil and Gas

Crude petroleum production in 2006–07 was 3.4m. tonnes. Reserves in 2007 were 289m. bbls. Exploitation is mainly through government incentives and concessions to foreign private sector companies. Natural gas production in 2008 was 37.5bn. cu. metres with 850bn. cu. metres of proven reserves. The French oil company Total agreed a US\$3bn. deal with the government in July 2003 for exploration in the Arabian Sea.

### Water

Pakistan's Indus Basin irrigation system is the largest and oldest in the world. It includes a network of 43 independent canal systems and two storage reservoirs. Total length of main canals is 58,000 km which serve 35m. acres of cultivatable land.

Currently three major surface water projects are under way, as are flood control schemes and programmes to check the problems of waterlogging and salinity.

### Minerals

Production (tonnes, 2005): limestone, 14.86m.; coal, 3.37m.; rock salt, 1.65m.; gypsum, 552,496; fire clay, 253,501; dolomite, 199,653; chromite, 46,359; barytes, 42,087; china clay, 37,732; fuller's earth, 17,001; bauxite, 6,504. Other minerals of which useful deposits have been found are copper, magnesite, sulphur, marble, antimony ore, bentonite, celestite, fluorite, phosphate rock, silica sand and soapstone.

### Agriculture

The north and west are covered by mountain ranges. The rest of the country consists of a fertile plain watered by five big rivers and their tributaries. Agriculture is dependent almost entirely on the irrigation system based on these rivers. Area irrigated, 2002, about 17.80m. ha. Agriculture employs around half of the workforce. In 2002 there were an estimated 21.45m. ha. of arable land and 672,000 ha. of permanent crops.

Pakistan is self-sufficient in wheat, rice and sugar. Areas harvested, 2003: wheat, 8.07m. ha.; seed cotton, 3.00m. ha.; rice, 2.21m. ha.; chick-peas, 1.68m. ha.; sugarcane, 1.09m. ha.; maize, 0.88m. ha. Production, 2003 (1,000 tonnes): sugarcane, 52,056; wheat, 19,210; rice, 6,751; seed cotton, 5,071; cottonseed, 3,337; potatoes, 1,946; cotton lint, 1,690; onions, 1,400; oranges, 1,400; maize, 1,275; mangoes, 1,036; chick-peas, 672; dates, 650.

A Land Reforms Act of 1977 reduced the upper limit of land holding to 100 irrigated or 200 non-irrigated acres. A new agricultural income tax was introduced in 1995, from which

holders of up to 25 irrigated or 50 unirrigated acres are exempt. Of about 5m. farms, 12% are of less than 10 ha.

Livestock, 2003 (in 1m.): goats, 52.8; buffaloes, 24.8; sheep, 24.6; cattle, 23.3; asses, 4.1; camels, 0.8; chickens, 155.0.

Livestock products, 2003 (in 1,000 tonnes): beef and veal, 445; poultry meat, 375; goat meat, 373; mutton and lamb, 174; buffalo's milk, 18,520; cow's milk, 8,620; goat's milk, 640; eggs, 354; wool, 40.

### Forestry

The area under forests in 2010 was 1.69m. ha., some 2% of the total land area. Timber production in 2007 totalled 29.22m. cu. metres.

### Fisheries

In 2010 the catch totalled 453,264 tonnes, mainly from marine waters. Exports of fishery commodities were valued at US\$193m. in 2008.

## INDUSTRY

The leading company by market capitalization in March 2012 was Oil & Gas Development (US\$8.0bn.).

Industry is based largely on agricultural processing, with engineering and electronics. Government policy is to encourage private industry, particularly small businesses. The public sector, however, is still dominant in large industries. Steel, cement, fertilizer and vegetable ghee are the most valuable public sector industries.

Production in 1,000 tonnes (in 2006–07 unless otherwise stated): cement (2007 estimate), 21,000; raw sugar (2007), 4,355; distillate fuel oil, 3,697; residual fuel oil, 3,324; cotton yarn (2005–06), 2,547; petrol, 1,337; paper and paperboard (2007), 1,010; pig iron (2005–06), 768; clays, 358; coke, 326; soda ash (2005), 260; caustic soda, 242; woven cotton fabrics, 965m. sq. metres; bicycles, 486,350 items; tractors (2007), 54,610 items.

### Labour

Out of 45.29m. economically active people in 2005, 37.81m. were males. The rate of unemployment in 2005 was 6.8%. In 2005 a total of 17.18m. persons were engaged in agriculture, forestry and fishing, 6.67m. in manufacturing, 6.50m. in community, social and personal services and 6.29m. in wholesale and retail trade, restaurants and hotels.

In 2001 there were four industrial disputes and 7,078 working days were lost.

## INTERNATIONAL TRADE

Most foreign exchange controls were removed in Feb. 1991. Tax exemptions are available for companies set up before 30 June 1995.

### Imports and Exports

Trade in US\$1m.:

|                | 2005   | 2006   | 2007   | 2008   | 2009   |

| Imports c.i.f. | 25,097 | 29,826 | 32,594 | 42,327 | 31,584 |
| Exports f.o.b. | 16,050 | 16,933 | 17,838 | 20,279 | 17,555 |

Major imports in 2009 (as % of total value): petroleum and petroleum products, 26.2; machinery and transport equipment, 22.9; chemicals and related products, 16.9; manufactured goods, 10.6. Major exports in 2009: textile yarn, fabrics and finished articles, 37.1; clothing and apparel, 19.1; rice, 10.1; petroleum and petroleum products, 4.1.

Major import suppliers in 2009 (as % of total): China, 12.0; Saudi Arabia, 11.1; UAE, 10.6; Kuwait 5.7; USA, 5.7. Major export markets in 2009: USA, 18.3; UAE, 8.8; Afghanistan; 7.8; China, 5.7; UK, 5.4.

## COMMUNICATIONS

### Roads

In 2006 there were 260,420 km of roads, of which 65.4% were paved. There are ten motorways providing links between Pakistan's major cities. These include the M-1 from Islamabad to Peshawar, the M-2 from Islamabad to Lahore, the M-4 from Faisalabad to Multan and the M-9 from Karachi to Hyderabad. In 2007 there were 1,440,100 passenger cars in use, 187,100 vans and lorries, 170,400 buses and coaches and 2,684,300 motorcycles. There were 10,466 road accidents involving injury in 2007, with 5,465 fatalities.

All traffic in Pakistan drives on the left. All cars must be insured and registered. Minimum age for driving: 18 years.

### Rail

In 2005 Pakistan Railways had a route length of 7,791 km (of which 305 km electrified) mainly on 1,676 mm gauge, with some metre gauge line. Passenger-km travelled in 2004–05 came to 24.2bn. and freight tonne-km to 5.0bn.

### Civil Aviation

There are international airports at Karachi, Islamabad, Lahore, Peshawar and Quetta.

The national carrier is the state-owned Pakistan International Airlines, or PIA. It operates scheduled services to 46 international and 24 domestic destinations. In 2006, 88,302,000 revenue-km were flown. The revenue passengers carried totalled 5.73m. In 2006 and revenue tonne-km came to 1,801m. Operating revenues of the corporation stood at Rs70,587m. in 2006 and operating expenditure at Rs79,164m.

### Shipping

In Jan. 2009 there were 16 ships of 300 GT or over registered, totalling 384,000 GT. The busiest port is Karachi. In 2008–09 cargo traffic totalled a record 38,732,000 tonnes (13,364,000 tonnes loaded and 25,368,000 tonnes discharged). In 2008–09, 2,386 vessels were handled at the port of Karachi. There are also ports at Port Qasim, which handled 25,023,000 tonnes in 2008–09, and Gwadar.

### Telecommunications

The telephone system is government-owned. In 2008 there were 4,416,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 88,020,000 (497.4 per 1,000 persons). There were 18.5m. internet users in 2008. In March 2012 there were 6.4m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The Federal Judiciary consists of the Supreme Court of Pakistan, which is a court of record and has three-fold jurisdiction; original, appellate and advisory. There are four High Courts in Lahore, Peshawar, Quetta and Karachi. Under the Constitution, each has power to issue directions of writs of *Habeas Corpus*, *Mandamus*, *Certiorari* and others. Under them are district and sessions courts of first instance in each district; they have also some appellate jurisdiction. Below these are subordinate courts and village courts for civil matters and magistrates for criminal matters.

The Constitution provides for an independent judiciary, as the greatest safeguard of citizens' rights. There is an Attorney-General, appointed by the President, who has right of audience in all courts and the Parliament, and a Federal Ombudsman.

A Federal Sharia Court at the High Court level has been established to decide whether any law is wholly or partially un-Islamic. In Aug. 1990 a presidential ordinance decreed that the criminal code must conform to Islamic law (Sharia), and in May 1991 parliament passed a law incorporating it into the legal system.

538,048 crimes were reported in 2007 (399,558 in 2002). Execution of the death penalty for murder, in abeyance since

1986, was resumed in 1992. The first judicial execution in four years was carried out in Nov. 2012, although there have been frequent reports of extrajudicial executions since 2008. There were 10,556 murders in 2007 (9,396 in 2002). The population in penal institutions in 2007 was 90,000 (55 per 100,000 of national population).

### Education

In 1998 the landmark National Education Policy (1998–2010) was launched with the aim of eradicating illiteracy and spreading basic education. The policy stressed vocational and technical education, disseminating a common culture based on Islamic ideology. The follow-up National Education Policy 2009 reinforced the position that education and training 'should enable the citizens of Pakistan to lead their lives according to the teachings of Islam'. In 2010 the constitution was amended by the addition of an article declaring: 'The state shall provide free and compulsory education to all children of the age of five to sixteen in such a manner as may be determined by law.' The adult literacy rate in 2008 was 54%. Adult literacy programmes are being strengthened.

In 2007 there were 17.98m. primary school pupils (450,027 teaching staff), 9.15m. secondary school pupils (197,082 teaching staff in 2004) and 955,000 students in tertiary education (52,245 academic staff). There are 70 public and 58 private universities of which Quaid-i-Azam University in Islamabad and the University of the Punjab in Lahore are considered to be the most prestigious.

Public expenditure on education came to 2.8% of GNI and 11.2% of total government spending in 2007.

### Health

In 2002 there were 906 hospitals and 4,590 dispensaries (with a total of 98,264 beds) and 862 maternity and child welfare centres. There were 126,350 doctors, 70,698 nurses and midwives and 15,790 dentists in 2005.

### Welfare

The official retirement age is 60 (men), 55 (women) or 50 (miners). To qualify for a pension, 15 years of contributions are needed. The minimum old age and survivor pension is Rs3,000 per month (as of 2010).

Medical services, provided mainly through social security facilities, cover cash and medical benefits such as general medical care, specialist care, medicines, hospitalization, maternity care and transportation.

## RELIGION

Pakistan was created as a Muslim state. The Muslims are mainly Sunni, with an admixture of 15–20% Shia. Religious groups: Muslims, 93%; Christians, 2%; Hindus, Parsees, Buddhists, Qadianis and others. Pakistan has the second highest number of Muslims, after Indonesia. There is a Minorities Wing at the Religious Affairs Ministry to safeguard the constitutional rights of religious minorities.

## CULTURE

There is a Pakistan National Council of the Arts, a cultural organization to promote art and culture in Pakistan and abroad.

### World Heritage Sites

There are six sites under Pakistani jurisdiction which appear on the UNESCO World Heritage List. They are (with year entered on list): the archaeological ruins at Moenjodaro (1980), Taxila (1980), the Buddhist ruins at Takht-i-Bahi and the neighbouring city remains at Sahr-i-Bahlol (1980), Thatta (1981), the Fort and Shalamar Gardens in Lahore (1981) and Rohtas Fort (1997).

### Press

In 2007 there were 400 paid-for dailies and 1,200 paid-for non-daily periodicals. Average combined circulation of all dailies in 2007 was 9,935,000. The most popular daily papers in 2008 were

*Jang*, with a circulation of 450,000, and *Express*, with a circulation of 375,000. The most widely read English-language paper is *Dawn*, with an average daily circulation of 225,000 copies in 2008.

#### Tourism

In 2010 there were 906,800 non-resident tourists including 288,200 from the UK, 120,400 from the USA, 110,900 from Afghanistan, 46,200 from Canada and 43,700 from India. 54% of tourists in 2010 visited Punjab and 29% Sindh.

#### Festivals

Pakistan is rich in culture. Famous festivals include the Eid Festival, Eid-e-Milad un Nabi (Birthday of Prophet Muhammad), the Basnat Festival, Shab-e-Baraat Festival and the Independence Day Festival.

## KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Palau Islands in 1886 but sold the archipelago to Germany in 1899. Japan occupied the islands in 1914 and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in 1944, the islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. Following a referendum in July 1978 in which Palauans voted against joining the new Federated States of Micronesia, the islands became autonomous from 1 Jan. 1981. A referendum in Nov. 1993 favoured a Compact of Free Association with the USA. Palau became an independent republic on 1 Oct. 1994.

## TERRITORY AND POPULATION

The archipelago lies in the western Pacific and has a total land area of 488 sq. km (188 sq. miles). It comprises 26 islands and over 300 islets. Only nine of the islands are inhabited, the largest being Babelthuap (396 sq. km), but most inhabitants live on the small island of Koror (18 sq. km) to the south. In Oct. 2006 the capital moved from Koror to Melekeok, a newly-built town in eastern Babelthuap. The total population of Palau at the time of the 2005 census was 19,907 (10,699 males and 9,208 females), giving a density of 40.8 per sq. km. 2006 estimate: 21,669. Koror's population according to the 2005 census was 12,676. In 2000 approximately 70% of the population were Palauans.

In 2011, 84.3% of the population lived in urban areas. Some 6,000 Palauans live abroad. The local language is Palauan; both Palauan and English are official languages.

## SOCIAL STATISTICS

2006 births, 259; deaths, 144. Rates, 2006 (per 1,000 population): births, 12.0; deaths, 6.6; infant mortality (2010), 15 per 1,000 live births. Annual population growth rate, 1998–2008, 1.0%. Expectation of life: males, 69 years; females, 73. Fertility rate, 2008, 1.9 births per woman.

## CLIMATE

Palau has a pleasantly warm climate throughout the year with temperatures averaging 81°F (27°C). The heaviest rainfall is between July and Oct.

## CONSTITUTION AND GOVERNMENT

The Constitution was adopted on 2 April 1979 and took effect from 1 Jan. 1981. The Republic has a bicameral legislature, the *Olbiil Era Kelulau* (National Congress), comprising a 13-member *Senate* and a 16-member *House of Delegates* (one from each of the Republic's 16 states), both elected for a term of four years as are the *President* and *Vice-President*. Customary social roles and land and sea rights are allocated by a matriarchal 16-clan system.

## National Anthem

'Belau loba klisiich er a kelulul' ('Palau is coming forth with strength and power'); words anonymous, tune Y. O. Ezekiel.

## RECENT ELECTIONS

At the elections on 6 Nov. 2012 Tommy Remengesau, Jr was elected president with 58.0% of votes cast against 42.0% for incumbent president Johnson Toribiong. At the legislative elections that were also held on 6 Nov. 2012 only non-partisans were elected.

## CURRENT GOVERNMENT

*President:* Tommy Remengesau, Jr; b. 1956 (in office since 17 Jan. 2013, having previously been president from Jan. 2001–Jan. 2009).

*Vice-President and Minister of Finance:* Kerai Mariur.

In March 2013 the cabinet consisted of:

*Minister of Community and Cultural Affairs:* Faustina Rehuher-Marugg. *Education:* Masa-Aki Emesiochl. *Health:* Dr Stevenson Kuartei. *Justice:* Johnny Gibbons. *Natural Resources, Environment and Tourism:* Harry Fritz. *Public Infrastructure, Industries and Commerce:* Jackson Ngiraingas. *Minister of State for Foreign Affairs:* Dr Victor Yano.

## CURRENT LEADERS

### Tommy Remengesau, Jr

#### *Position*

President

#### *Introduction*

Tommy Remengesau, Jr first became president in Jan. 2001 and was re-elected in Nov. 2004. Out of office from 2009, he won a third term in Nov. 2012. The US-educated career politician has prioritized improvements in basic services and is expected to seek higher levels of foreign investment.

#### *Early Life*

Tommy Esang Remengesau, Jr was born on 28 Feb. 1956 on the island of Koror, Palau, in the US-administered Trust Territory of the Pacific Islands (TTPI). The eldest son of Thomas O. Remengesau, Sr (who served as president from 1988–89), he graduated in criminal justice from Grand Valley State College in Michigan, USA in 1978. On his return to Palau, Remengesau

began work at the *Olbiil Era Kelulau* (OEK), Palau's National Congress. In 1984 he became the youngest Palauan to be elected a senator in the OEK. Re-elected in 1988, he served on the committee on ways and means, playing a key role in reducing Palau's budget deficit and securing financial stability.

In 1992 Remengesau was elected vice-president and the following year Palauan voters approved a Compact of Free Association with the USA. With responsibility for the finance portfolio, Remengesau was credited with reforming the financial system and preparing the new sovereign state (established in 1994) for membership of the IMF and the World Bank Group. He won the 2000 presidential elections, claiming 52% of the vote against Peter Sugiyama.

#### *Career in Office*

Remengesau set out to reduce his country's dependence on the USA and announced plans to increase revenue from tourism. He pledged to achieve these aims while protecting the country's natural environment, particularly the coral reef, and preserving the island's resources. In 2006 he launched the Micronesia Challenge, which encouraged neighbouring countries to follow Palau's conservation commitments.

Remengesau began a new four-year term following the election of Nov. 2004, in which he claimed 66.5% of the vote against Polycarp Basilius. In Oct. 2006 the institutions of government began relocating to a new capital, Melekeok, in eastern Babelthuap. In 2008 Remengesau announced he would seek a seat in the Senate, having held the presidency for the maximum two consecutive terms allowed by the constitution. However, his campaign was unsuccessful and he came 11th in the election. He was succeeded as president by Johnson Toribiong in Jan. 2009.

In April 2009 an investigation found that Remengesau was guilty of incorrectly filing the financial details of properties in which he had an interest. He was charged with 19 counts of violating Palau's code of ethics in 2002 and 2003, accusations he described as 'selective persecution'. In April 2010 Associate Justice Kathleen Salii fined Remengesau US\$156,400, equivalent to an eighth of the amount initially recommended by prosecutor Michael Copeland.

Remengesau was elected to a further four-year term as president in Nov. 2012, having defeated Toribiong on a platform of encouraging foreign investment and improving services for grassroots communities. He took office on 17 Jan. 2013.

## **ECONOMY**

### **Overview**

Following independence in 1994, Palau has been highly dependent on foreign aid. The USA provides assistance under a Compact of Free Association, giving Washington responsibility for Palau's defence and security matters. Grant assistance under the Compact, guaranteed until 2024, increased in 2010 ahead of a gradual decline.

Tourism, which accounts for nearly half of GDP, has been hit by the global downturn and, specifically, financial difficulties in the Taiwanese air industry (with Taipei being a key hub for incoming tourists). In the medium term the government looks to reduce dependence on foreign grants and to fund current fiscal spending from domestic revenues. Such adjustment will require comprehensive tax and fiscal reforms, while authorities are looking to generate new sources of revenue through liberalization of the FDI regime and offshore exploration of oil and gas.

### **Currency**

US currency is used.

### **Budget**

The fiscal year begins on 1 Oct. Revenues for 2008–09 were US\$81.3m. and expenditures US\$95.0m. Grants accounted for 53.5% of revenues in 2008–09 and tax revenue 36.5%; current expenditure accounted for 77.6% of expenditures in 2008–09.

### **Performance**

Total GDP in 2011 was US\$166m. The economy contracted by 4.9% in 2008 and by 2.1% in 2009.

### **Banking and Finance**

The National Development Bank of Palau is situated in Koror. Other banks include the Bank of Guam, the Bank of Hawaii, Bank Pacific, Melekeok Government Bank and the Pacific Savings Bank.

## **ENERGY AND NATURAL RESOURCES**

### **Electricity**

Electricity production was approximately 154m. kWh in 2007; installed capacity was about 52,000 kW in 2007.

### **Agriculture**

Subsistence farming is one of the major economic activities. In 2007 approximately 2,000 people were economically active in agriculture. The main agricultural products are bananas, coconuts, copra, cassava and sweet potatoes. There were about 1,000 ha. of arable land in 2007 and 2,000 ha. of permanent crop land.

### **Forestry**

Forests covered 0.04m. ha. in 2010, or 88% of the land area.

### **Fisheries**

In 2008 the catch totalled 1,007 tonnes, mainly tuna.

## **INDUSTRY**

There is little industry, but the principal activities are food-processing and boat-building.

### **Labour**

In 2005 the total labour force numbered 10,203 (6,214 males and 3,989 females), of whom 9,777 were employed (5,982 males and 3,795 females).

## **INTERNATIONAL TRADE**

### **Imports and Exports**

Imports (2006–07) US\$91.3m.; exports (2006–07) US\$10.1m. The main trading partner is Japan for exports and the USA for imports.

## **COMMUNICATIONS**

### **Roads**

There were 146 km of roads in 2007 including the 85-km US-funded two-lane highway around Babelthuap, providing a link between the old capital of Koror and the new capital of Melekeok.

### **Civil Aviation**

The main airport is on Koror (Roman Tmetuchl International Airport, near Airai). In 2010 there were scheduled flights to Guam, Manila, Seoul, Taipei and Yap (Micronesia). A new Palau-based carrier, Palau Airways, was founded in 2011 and launched scheduled passenger services between Koror and Taipei in May 2012.

### **Shipping**

There is a port at Malakal.

### **Telecommunications**

In 2008 there were 7,400 main (fixed) telephone lines and 12,200 mobile phone subscribers.

## **SOCIAL INSTITUTIONS**

### **Justice**

There is a Supreme Court and various subsidiary courts. The population in penal institutions in 2010 was 79 (378 per 100,000 national population).

### **Education**

In 2007 there were 1,544 pupils at primary schools and 2,448 at secondary schools. In 2006 there were 21 primary schools (19

public and two private) and six secondary schools (one public and five private). There were 727 students at Palau Community College in 2002–03. The adult literacy rate is 92%.

In 2002 government expenditure on education came to an estimated 10.3% of GDP.

#### **Health**

There were 26 doctors, 117 nurses and one midwife in 2006 and five dentists and one pharmacist in 2007.

#### **RELIGION**

The majority of the population is Roman Catholic.

#### **CULTURE**

##### **World Heritage Sites**

Rock Islands Southern Lagoon was added to the UNESCO World Heritage List in 2012. It covers hundreds of large and small forested limestone islands, channels, tunnels, caves, arches and coves scattered within a marine lagoon protected by a barrier reef. The site is of exceptional aesthetic beauty and home to diverse and abundant marine life.

##### **Press**

There are no daily newspapers published in Palau. In 2008 there were three weekly newspapers: *Tia Belau* and *Palau Horizon*, published in English, and *Roureur Belau*, published in Palauan.

#### **Tourism**

Tourism is a major industry, particularly marine-based. There were 83,795 visitor arrivals in 2009 (down from a record 94,895 in 2004). Of the visitor arrivals in 2009, 68,329 were for tourist purposes. Visitors to Palau in 2009 included: 27,180 from Japan; 16,571 from the Republic of China; 13,193 from the Republic of Korea.

## KEY HISTORICAL EVENTS

Ceramic objects unearthed on Panama's Pacific coast suggest the area was settled from 2,500 BC. Maize cultivation began in southern Panama around 1,500 BC and by 300 BC it supported numerous large, permanent villages. Public architecture was in evidence by AD 500, along with pottery (Gran Cocle), gold ornaments and elaborate burial chambers. From AD 750 present-day Panama was widely settled by Chibchan, Chococo and Cueva peoples, and there was trade with other groups across central America.

A Spanish adventurer, Rodrigo de Bastidas, explored the isthmus of Panama in 1501, followed by Christopher Columbus the following year. Nuestra Señora de la Asunción de Panamá (present-day Panama City) was founded in 1519. The first European settlement on the Pacific Ocean, it was a staging post for later Spanish conquests across central and south America. A part of the New Kingdom of Granada, from 1549 Panama was ruled by the *Audiencia* of Bogotá. It was a key port for shipping gold, silver and other treasures from the western fringe of South America to Spain.

In the late 1690s the isthmus saw an ill-fated attempt by the Kingdom of Scotland to establish a colony called New Caledonia. Poor planning, insufficient resources, a lack of opportunities for trade and crippling diseases led to the scheme's demise at the hands of Spanish forces in 1700. Panama was formally incorporated into the Viceroyalty of New Granada in 1739, which encompassed present-day Colombia, Ecuador and Venezuela.

An independence movement for New Granada was precipitated by the Napoleonic invasion of Spain in 1808. Antonio Nariño, who took part in an uprising at Bogotá in 1810, and Simón Bolívar became leading revolutionary figures. Bolívar's victory at Boyacá in 1819 was followed by the Spanish surrender of Cartagena in 1821. Panama was incorporated into the new independent Republic of Colombia, which included Venezuela and (from 1822) Ecuador under Bolívar's leadership. Rebellions against rule from Bogotá took place in 1830 and 1840, before the

Bidlack-Mallarino Treaty of 1846 granted the USA rights to both build a railway across Panama (completed in 1855) and intervene militarily in the event of disturbances.

While Colombia was embroiled in the Thousand Day War (1899–1902) Panama again sought independence, with separatists such as José Agustín Arango favouring direct negotiation with the USA over plans for a Panama Canal. The USA chose to back the revolution and Panama declared independence on 3 Nov. 1903. A subsequent treaty granted the USA the use, occupation and control of a Canal Zone, with full sovereign rights in perpetuity. In return the USA guaranteed the independence of the republic. The Canal was opened on 15 Aug. 1914.

US domination of Panama provoked frequent anti-American protests. In 1968 Col. Omar Torrijos Herrera took power in a coup and attempted to negotiate a more advantageous treaty with the USA. Two new treaties between Panama and the USA were agreed in Aug. 1977 and signed in Sept. of the same year. One dealt with the operation and defence of the Canal until the end of 1999 and the other guaranteed permanent neutrality.

Torrijos vacated his position as chief of government in 1978 but remained head of the National Guard until his death in an air crash in 1981. Subsequently, Gen. Manuel Noriega, Torrijos' successor as head of the National Guard, became the strong man of the regime. His position was threatened by internal political opposition and economic pressure applied by the USA but in Oct. 1989 a US-backed coup attempt failed. On 15 Dec. Gen. Noriega declared a 'state of war' with the USA. On 20 Dec. the USA invaded. Gen. Noriega surrendered on 3 Jan. 1990. Accused of drug dealing, he was convicted by a court in Miami. All remaining US troops left the country when the Panama Canal was handed back to Panama at the end of 1999.

In a referendum in 2006, voters backed a US\$5-2bn. plan to widen the Panama Canal, potentially doubling its capacity. The conservative retail tycoon Ricardo Martinelli won a landslide victory in the April 2009 presidential election, promising to take a tough stance on crime and rising prices.

## TERRITORY AND POPULATION

Panama is bounded in the north by the Caribbean Sea, east by Colombia, south by the Pacific Ocean and west by Costa Rica. The area is 75,001 sq. km. Population at the census of 2010 was 3,405,813 (1,693,229 females); density, 44.9 per sq. km. The population was 75.5% urban in 2011.

The UN gives a projected population for 2015 of 3-78m.

The largest towns (2010) are Panama City, the capital, on the Pacific coast (430,299) and its suburb San Miguelito (315,019). Other large towns are Las Cumbres, Tocumen, David, Arraiján and Colón.

The areas and populations of the nine provinces and the three province-level indigenous districts, plus their capitals, are:

### SOCIAL STATISTICS

2006 births, 65,764; deaths, 14,358; marriages, 10,747; divorces, 2,866. Birth rate, 2006 (per 1,000 population), 20.0; death rate, 4.4. Annual population growth rate, 2000–05, 2.5%. Expectation of life at birth, 2007, was 73.0 years for males and 78.2 years for females. In 2006 the most popular age range for marrying was 25–29 for both males and females. Infant mortality, 2010, 17 per 1,000 live births; fertility rate, 2006, 2.4 births per woman.

### CLIMATE

Panama has a tropical climate, unvaryingly with high temperatures and only a short dry season from Jan. to April. Rainfall amounts are much higher on the north side of the isthmus. Panama City, Jan. 79°F (26.1°C), July 81°F (27.2°C). Annual rainfall 70" (1,770 mm). Colón, Jan. 80°F (26.7°C), July 80°F (26.7°C). Annual rainfall 127" (3,175 mm). Balboa Heights, Jan. 80°F (26.7°C), July 81°F (27.2°C). Annual rainfall 70" (1,759 mm). Cristóbal, Jan. 80°F (26.7°C), July 81°F (27.2°C). Annual rainfall 130" (3,255 mm).

### CONSTITUTION AND GOVERNMENT

The 1972 constitution, as amended in 1978, 1983, 1994 and 2004, provides for a *President*, elected for five years, two *Vice-Presidents* and a 72-seat *Legislative Assembly* (since reduced to 71 seats) to be elected for five-year terms by a direct vote. As a result of the amendment of 2004 there has only been one *Vice-President* since the election of May 2009. To remain registered, parties must have attained at least 50,000 votes at the last election. A referendum held on 15 Nov. 1992 rejected constitutional reforms by 64% of votes cast. Turnout was 40%. In a referendum on 30 Aug. 1998 voters rejected proposed changes to the constitution which would allow for a President to serve a second consecutive term.

### CURRENT LEADERS

#### Ricardo Martinelli Berrocal

##### Position

President

##### Introduction

Businessman Ricardo Martinelli became president in May 2009. He led the Democratic Change party to a landslide victory, ending 40 years of bipartisan government.

##### Early Life

Ricardo Martinelli was born in March 1952 in Panama City to parents of Italian and Spanish descent. He was schooled in Panama City before attending Staunton Military Academy in Virginia, USA. In 1973 he graduated in business administration from Arkansas University and subsequently obtained a masters degree in the same subject from the Central American Institute of Business Administration in Costa Rica.

He returned to Panama to embark on a business career, first at Citibank before joining the retail company Almacén 99 in 1981. By 1985 he had set up the Super 99 supermarket chain and variously headed the Panamanian Chamber of Commerce, the Italian-Panamanian Chamber of Commerce and the governing association of retail companies. In 1991 he set up the Ricardo

Martinelli Foundation, which grants scholarships to several thousand poor students each year. From 1993–96 Martinelli was involved with the Revolutionary Democratic Party (PRD) and was briefly head of the National Social Security Institute (CSS).

After two years out of the political spotlight, Martinelli established his own party in 1998, called Democratic Change (CD). In 1999 he allied himself with Mireya Moscoso in a conservative coalition against the PRD. When Moscoso went on to win the presidency, CD was rewarded with the ministry for the Panama Canal, just as management of the Canal was being handed over to Panama by the USA. Martinelli was a strong advocate for expansion of the Canal but progress was slow and in 2003 he resigned to stand for the presidency in 2004. Martinelli started with a strong base in local and international commerce, insurance, banking, food, the agricultural and chemical industries, and the media.

Although his 2004 campaign was unsuccessful, it positioned him in the public eye ahead of his second run in 2009. He stood as the candidate for the CD-led Alliance for Change coalition campaigning on a platform of change and fighting corruption. He won with over 60% of the vote.

#### Career in Office

Martinelli's election bucked the left-leaning trend in neighbouring El Salvador and Nicaragua. Among the policies he advocated were Panama's exit from the Central American Parliament (Parlacen), increased police wages, a monthly stipend of 100 balboas for the un pensioned elderly and the eradication of corruption. In 2009 he appointed the ex-military Gustavo Pérez as head of police and pledged to tackle the 'wild capitalism' of Panama. Martinelli also planned to reform the tax system and to overhaul Panama City's transport system with the construction of a metro network, which is scheduled to open in 2014.

Panama has maintained an impressive annual rate of economic growth during Martinelli's premiership. However, much of the country's wealth continues to stem from the nationally-administered Canal, ports and Colón free trade zone, while extreme poverty, although reduced, remains a problem. In Oct. 2011 Martinelli welcomed the ratification of a free trade agreement with the USA, which had been stalled since 2007.

Martinelli has been criticized for political bullying and remains at loggerheads with his vice-president, who has levelled accusations of corruption against him.

#### DEFENCE

The armed forces were disbanded in 1990 and constitutionally abolished in 1994. Divided between both coasts, the National Maritime Service, a coast guard rather than a navy, numbered around 600 personnel in 2007. In addition there is a paramilitary police force of 11,000 and a paramilitary national air service of 400 with no combat capable aircraft. In 2008 defence expenditure totalled US\$226m. (US\$68 per capita), representing 1.0% of GDP. For Police see JUSTICE below.

#### ECONOMY

Agriculture accounted for 5.3% of GDP in 2010, industry 16.8% and services 77.9%.

#### Overview

Panama boasts one of the fastest-growing GDP rates in Latin America, averaging over 9.5% between 2006–08 before slowing to 3.9% in 2009. In 2011 real GDP growth rebounded to 10.6%, driven by buoyant transportation, commerce and tourism sectors, as well as a developed financial sector. However, income inequality is high. The poverty rate was 29% in 2011.

As the link between North and South America, Panama is strategically important for shipping and trade. Much of the country's economic activity is centred on its Canal and the Colón Free Zone, at the Canal's Atlantic entrance. 80% of GDP is

derived from related sectors including transportation, packaging, shipping, importing and exporting. It is hoped that a widening and deepening of the Canal, begun in 2007 and scheduled for completion in 2014, will further boost the economy and reduce poverty by 30%.

The banking system is highly integrated with international markets. The national currency is pegged to the US dollar, making it vulnerable to global trends. Panama and the USA entered a Free Trade Agreement in June 2007. This was approved by the Panamanian National Assembly the following month and by the US Congress in Oct. 2011.

#### Currency

The monetary unit is the *balboa* (PAB) of 100 *centésimos*, at parity with the US dollar. The only paper currency used is that of the USA. US coinage is also legal tender. Inflation was 3.5% in 2010 and 5.9% in 2011. In July 2005 foreign exchange reserves were US\$1,018m. and total money supply was 1,587m. balboas.

#### Budget

Revenues in 2007 were 4,433m. balboas (tax revenue, 48.1%) and expenditures 4,432m. balboas (current expenditure, 78.1%).

VAT is 7%.

#### Performance

Real GDP growth was 10.1% in 2008, 3.9% in 2009, 7.6% in 2010 and 10.6% in 2011. Total GDP in 2011 was US\$26.8bn.

#### Banking and Finance

There is no statutory central bank. Banking is supervised and promoted by the Superintendency of Banks (formerly the National Banking Commission); the *Superintendent* is Alberto Diamond. Government accounts are handled through the state-owned Banco Nacional de Panama. In 2007 there were two other state banks, 39 banks operating under general licence, 34 under international licence and 11 as representative offices. In Aug. 2007 the combined assets of those banks operating under general and international licences totalled US\$50,500m.; their combined deposits were US\$36,500m.

Foreign debt was US\$11,412m. in 2010, representing 45.8% of GNI.

There is a stock exchange in Panama City.

#### ENERGY AND NATURAL RESOURCES

##### Environment

Panama's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.6 tonnes per capita.

##### Electricity

In 2007 capacity was 1.5m. kW. Production was 6.5bn. kWh in 2007 (57% hydro-electric and 43% thermal), with consumption per capita 1,904 kWh.

##### Minerals

Limestone, clay and salt are produced. There are known to be copper deposits.

##### Agriculture

In 2002, 19.3% of the economically active population were engaged in agriculture. In 2002 there were approximately 548,000 ha. of arable land and 147,000 ha. of permanent crops. Production in 2002 (in 1,000 tonnes): sugarcane, 1,441; bananas, 500; rice, 245; plantains, 105; maize, 76; melons and watermelons, 63; oranges, 47; potatoes, 26; yams, 26; pineapples, 23; tomatoes, 21; cassava, 20.

Livestock (2003 estimates): 1,550,000 cattle, 305,000 pigs, 175,000 horses and 14m. chickens.

Livestock products (2002, in 1,000 tonnes): beef and veal, 54; pork, bacon and ham, 18; poultry meat, 89; milk, 178; eggs, 26.

### Forestry

Forests covered 3-25m. ha. in 2010 (44% of the land area). There are great timber resources, notably mahogany. Production in 2007 totalled 1-35m. cu. metres.

### Fisheries

In 2010 the catch totalled 163,488 tonnes (mainly shrimp), almost entirely from sea fishing. Exports of fishery commodities were valued at US\$442m. in 2008.

### INDUSTRY

The main industry is agricultural produce processing. Other areas include chemicals and paper-making. Cement production (2008 estimate), 1,843,000 tonnes; sugar (2005), 157,280 tonnes.

### Labour

In Aug. 2003 a total of 1,145,982 persons were in employment, with principal areas of activity as follows: agriculture, hunting and forestry, 228,305; wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 196,418; manufacturing, 105,830; transport, storage and communications, 85,883. In Aug. 2003 the unemployment rate was 13.1%.

### INTERNATIONAL TRADE

The Colón Free Zone, the largest free zone in the Americas, is an autonomous institution set up in 1953. More than 2,500 companies were operating there in 2007.

### Imports and Exports

Imports and exports in US\$1m.:

|                | 2002    | 2003    | 2004    | 2005    | 2006    |
|----------------|---------|---------|---------|---------|---------|
| Imports f.o.b. | 3,035.3 | 3,122.3 | 3,592.2 | 4,152.8 | 4,817.7 |
| Exports f.o.b. | 759.6   | 805.0   | 891.1   | 963.2   | 1,021.8 |

Main imports: machinery and apparatus, mineral fuels, chemicals and chemical products. Main exports: marine products, bananas, melons.

Chief import suppliers, 2006: USA, 27%; Curaçao, 10%; Costa Rica, 5%; Japan, 5%. Principal export markets, 2006: USA, 39%; Spain, 8%; Netherlands, 7%; Sweden, 6%.

### COMMUNICATIONS

#### Roads

In 2006 there were 13,365 km of roads, of which 34.1% were paved. The road from Panama City westward to the cities of David and Concepción and to the Costa Rican frontier, with several branches, is part of the Pan-American Highway. The Trans-Isthmian Highway connects Panama City and Colón. In 2007 there were 436,200 passenger cars, 174,500 lorries and vans and 20,100 buses and coaches. There were 425 road accident fatalities in 2007.

#### Rail

The 1,435 mm gauge Ferrocarril de Panama, which connects Ancón on the Pacific with Cristóbal on the Atlantic along the bank of the Panama Canal, is the principal railway. Traffic in 2004 amounted to 77,000 passengers and 700,000 tonnes of freight. The United Brands Company runs 376 km of railway, and the Chiriquí National Railroad 171 km.

#### Civil Aviation

There is an international airport at Panama City (Tocumén International). The national carrier is COPA, which flew to 15 different countries in 2003. In 2003 scheduled airline traffic of Panama-based carriers flew 43m. km and carried 1,313,000 passengers (all on international flights). In 2005 Tocumén International handled 2,710,857 passengers and 100,063 tonnes of freight.

### Shipping

Panama, a nation with a transcendental maritime career and a strategic geographic position, is the shipping world's preferred flag for ship registry. The Ship Registry System equally accepts vessels of local or international ownership, as long as they comply with all legal parameters. Ship owners also favour Panamanian registry because fees are low. The Panamanian merchant fleet is the largest in the world. In Jan. 2009 there were 6,842 ships of 300 GT or over registered, totalling 180-87m. GT (representing 22.9% of the world total). Of the 6,842 vessels registered, 2,198 were bulk carriers, 2,174 general cargo ships, 1,078 oil tankers, 798 container ships, 221 chemical tankers, 201 liquid gas tankers and 172 passenger ships.

All the international maritime traffic for Colón and Panama runs through the Canal ports of Cristóbal, Balboa and Manzanillo International.

### Panama Canal

The Panama Canal Commission is concerned primarily with the operation of the Canal. In Oct. 2002 a new toll structure was adopted based on ship size and type.

Although most of the world's shipping fleet can use the Canal the percentage that is able to is gradually declining as many new ships are too wide for the Canal. A referendum was held in Oct. 2006 on whether to expand the canal and double its capacity. The US\$5-25bn. plan was approved by 78% of voters. The expansion work began in Sept. 2007 and is expected to be completed in 2014.

*Administrator of the Panama Canal Authority: Jorge Quijano.*

Particulars of the ocean-going commercial traffic through the Canal are given as follows:

| Fiscal year ending | No. of vessels transiting | Cargo in long tons | Tolls revenue (in US\$1) |
|--------------------|---------------------------|--------------------|--------------------------|
| 30 Sept.           |                           |                    |                          |
| 2008               | 13,138                    | 209,705,000        | 1,316,031,000            |
| 2009               | 12,849                    | 197,896,000        | 1,436,810,000            |
| 2010               | 12,582                    | 204,816,000        | 1,480,554,000            |

Most numerous transits by flag (fiscal year 2010): Panama, 2,636; Liberia, 1,989; Bahamas, 849; Marshall Islands, 703; Hong Kong, 646.

### Telecommunications

Panama had 3,505,900 telephone subscribers in 2007, or 1,048-6 per 1,000 persons, including 3,010,600 mobile phone subscribers. There were 745,300 internet users in 2007, including 143,900 broadband subscribers. In Dec. 2011 there were 896,000 Facebook users.

### SOCIAL INSTITUTIONS

#### Justice

The Supreme Court consists of nine justices appointed by the executive. There is no death penalty. The police force numbered 11,000 in 2007, and includes a Presidential Guard.

The population in penal institutions in Nov. 2008 was 10,036 (295 per 100,000 of national population).

#### Education

Adult literacy was 94% in 2008. Elementary education is compulsory for all children from six to 14 years of age. In 2007 there were 446,176 pupils with 18,183 teaching staff at primary schools and 260,694 pupils with 16,847 teaching staff at secondary schools. In 2006 there were 130,838 students and 11,528 academic staff in tertiary education. The University of Panama (Universidad

de Panamá), founded in 1935 in Panama City, is the leading higher education institution.

In 2008 public expenditure on education came to 3.8% of GDP.

### Health

In 2002 there were 61 hospitals with a provision of 25 beds per 10,000 persons. There were 4,203 physicians, 897 dentists, 3,451 nurses and 612 pharmacists.

### RELIGION

80% of the population is Roman Catholic, 14% Protestant. The remainder of the population follow other religions (notably Islam). There is freedom of religious worship and separation of Church and State. Clergymen may teach in schools but may not hold public office.

### CULTURE

#### World Heritage Sites

Panama has five sites on the UNESCO World Heritage List: the Fortifications on the Caribbean side of Panama: Portobelo-San Lorenzo (inscribed on the list in 1980); Darien National Park (1981); the Archaeological Site of Panamá Viejo and the Historic District of Panamá (1997 and 2003); and the Coiba National Park (2005).

Panama shares a UNESCO site with Costa Rica: the Talamanca Range-La Amistad Reserves (1983 and 1990), an important cross-breeding site for North and South American flora and fauna.

#### Press

In 2008 there were seven dailies with a combined circulation of 233,000.

#### Tourism

In 2006 there were 843,000 non-resident tourists (702,000 in 2005); spending by tourists totalled US\$1,450m. in 2006 (US\$1,108m. in 2005).

#### Festivals

Leading festivals include: the National Folkloric Festival, held annually (Sept.) in Guararé since 1949; the Panama Jazz Festival

(Jan.); the International Fair of the Sea, held in Bocas del Toro province in Sept.; and the International Fair of Changuinola, also in Bocas del Toro in Sept.

## KEY HISTORICAL EVENTS

The region was settled by Asian peoples around 50,000 years ago, when New Guinea was still part of the main Australian landmass. 10,000 years ago, at the end of the last ice age, the waters of the Torres Strait cut off New Guinea from Australia, giving rise to separate development of the indigenous peoples. Plant-based agriculture developed about 9,000 years ago in the New Guinea highlands. 2,500 years ago a large migration of Austronesian-speaking peoples settled the coastal areas. These communities developed animal husbandry, pottery and fishing and there is evidence of trade with the southeast Asian mainland. The rugged topography meant that contact between communities was limited and they retained their separate languages and customs. This heterogeneity continued down the centuries, so that today Papua New Guinea has an estimated 1,000 different cultural groups. Spanish and Portuguese explorers reached the island in the early 16th century and the Portuguese are thought to have introduced the kaukau (sweet potato), which became a staple crop. Spain laid claim to the western half of the island in 1545, naming it 'New Guinea' because of the supposed resemblance of its inhabitants to the people of Africa's Guinea coast.

From the late 18th century the British and Dutch competed for control of the island. In 1828 the Dutch claimed the western half as part of the Dutch East Indies, while the eastern half came under British influence. Following an abortive annexation attempt by Australian colonists, Britain declared a protectorate over the southern coast and islands adjacent to the eastern half of New Guinea on 6 Nov. 1884. Germany colonized the northern portion of the eastern half, along with New Britain, New Ireland and Bougainville, an arrangement formalized by the 1885 Anglo-German Agreement.

In 1888 Britain formally annexed the area under its control as British New Guinea and passed its administration to Australia in 1902. On 1 Sept. 1906 the Australian administration renamed it the Territory of Papua, Papua being a Malay word used to

describe the Melanesian inhabitants' curly hair. The northeastern section of the island remained a German colony until the outbreak of the First World War in 1914, when Australian armed forces occupied it. For the next seven years it was under their administration and remained so after 1921, when it became a League of Nations mandated territory. In the Second World War, Allied and Japanese forces fought a prolonged military campaign on the island. It began with a Japanese victory at the Battle of Rabaul, New Britain in Feb. 1942 and continued throughout the war, with Japanese troops in occupation for much of the time until the Allies' victory in Aug. 1945.

In 1947 the northeastern part of the island became the UN Trust Territory of New Guinea, before merging in 1949 with the Territory of Papua to become the Territory of Papua New Guinea. A legislative council was established in 1953, succeeded by a house of assembly in 1964. On 1 Dec. 1973 Australia granted Papua New Guinea self-government. After a vigorous debate over questions of land-reform and citizenship, a constitution was passed and on 16 Sept. 1975 Papua New Guinea became fully independent. It also became a member of the Commonwealth, recognizing the British monarch as its own. In the same year the new state ignored a unilateral declaration of independence by the island of Bougainville and suppressed its campaign of civil disobedience. In 1988 an armed campaign by tribes claiming traditional land rights against the Australian owner of the massive Panguna copper field escalated into a civil war for Bougainville's secession. Fighting lasted nine years and cost an estimated 20,000 lives before a permanent truce was signed in April 1998. Bougainville gained autonomy in 2005 and is expected to hold a referendum on full independence in the future.

Political volatility caused frequent changes of government in Papua New Guinea during its first three decades of independence. In 2002, following violence in the general election, the electoral system was changed to encourage stable government. The deployment of Australian police on the island in 2003 caused resentment and from 2005, under a new agreement between the two governments, they operated in smaller numbers and with reduced powers. Despite its considerable mineral resources, the country's economy has stagnated in recent years; the difficulty of establishing land ownership has contributed to this, as has the need to protect the environment in what remains a largely subsistence culture. In 2006 the United Nations downgraded Papua New Guinea's status to least developed nation.

In 2011–12 Papua New Guinea experienced a leadership crisis between Sir Michael Somare and Peter O'Neill. In Aug. 2011, with Prime Minister Somare having been out of the country for five months on medical leave, the government declared the post vacant and O'Neill was elected by parliament, replacing acting prime minister Sam Abal. However, in Dec. the Supreme Court ruled the declaration and the election of O'Neill illegal. It also ordered the reinstatement of Somare. Although Somare and a new cabinet were sworn in, O'Neill refused to step down and the power struggle triggered a failed mutiny by rebel soldiers in Jan. 2012. Having the support of the civil service, the police, the defence force and most MPs, O'Neill remained effectively in control of the country. In May 2012 the Supreme Court once again ruled that Somare should be recognized as the legitimate prime minister. O'Neill's government subsequently ordered the arrest of the chief justice on charges of sedition. The prime minister's office was again declared vacant owing to Somare's continued absence. At the end of the month O'Neill was re-elected unopposed and sworn in as prime minister for the third time.

## TERRITORY AND POPULATION

Papua New Guinea extends from the equator to Cape Baganowa in the Louisiade Archipelago to 11° 40' S. lat. and from the border of West Irian to 160° E. long. with a total area of 462,840 sq. km. According to the 2011 census the provisional population was 7,059,653 (3,663,249 males); density, 15.3 per sq. km.

The UN gives a projected population for 2015 of 7.65m.

In 2011, 12.6% of the population lived in urban areas (the second lowest percentage in the world). In 2000 population of Port Moresby (National Capital District) was 254,158. Population of other main towns (2000 census): Lae, 123,398; Madang, 32,318; Mount Hagen, 27,877; Wewak, 27,031; Goroka, 19,523; Kimbe, 14,184. The areas, populations and capitals of the provinces are:

| Provinces                       | Sq. km | Census 2011<br>(provisional) | Capital      |

## SOCIAL STATISTICS

Estimates, 2008: births, 207,000; deaths, 52,000. Rates, 2008 estimates (per 1,000 population): births, 31.4; deaths, 7.9. Expectation of life at birth in 2007 was 58.7 years for males and 63.0 years for females. Annual population growth rate, 2000–08, 2.5%. Infant mortality, 2010, 47 per 1,000 live births; fertility rate, 2008, 4.1 births per woman.

## CLIMATE

There is a monsoon climate, with high temperatures and humidity the year round. Port Moresby is in a rain shadow and is not typical of the rest of Papua New Guinea. Jan. 82°F (27.8°C), July 78°F (25.6°C). Annual rainfall 40" (1,011 mm).

## CONSTITUTION AND GOVERNMENT

The constitution took effect on 16 Sept. 1975. The head of state is the British sovereign, who is represented by a *Governor-General*, nominated by parliament for six-year terms. A single legislative house, known as the *National Parliament*, is made up of 111 members: 89 district representatives and 22 provincial representatives (MPs). The members are elected by universal suffrage; elections are held every five years. All citizens over the age of 18 are eligible to vote and stand for election. Voting is by secret ballot and follows the limited preferential system. The *Prime Minister*, nominated by parliament and appointed by the Governor-General, selects ministers for the National Executive Council. The government cannot be subjected to a vote of no confidence in the first 18 months of office. The 20 provincial assemblies, comprising elected national MPs, appointed members

and elected local government representatives, are headed by a Governor, normally the provincial representative in the National Parliament.

## National Anthem

'Arise, all you sons of this land'; words and tune by T. Shacklady.

## RECENT ELECTIONS

Parliamentary elections were held between 23 June and 17 July 2012. Prime Minister Peter O'Neill's People's National Congress won 27 of 111 seats; the Triumph Heritage Empowerment Party 12; PNG Party 8; the National Alliance Party 7; the United Resources Party 7; the People's Party 6; the People's Progress Party 6; and the Social Democratic Party 3. A number of smaller parties each took one or two seats, with 16 going to independents.

## CURRENT LEADERS

### Peter O'Neill

#### Position

Prime Minister

#### Introduction

Peter O'Neill was elected by MPs to succeed Sir Michael Somare in Aug. 2011. After Somare refused to acknowledge the result, there were two rival administrations in late 2011. Having been confirmed in office, O'Neill, a businessman and former treasury minister, pledged to fight corruption and develop the nation's infrastructure and services.

#### Early Life

Born on 13 Feb. 1965 in Pangia District in the Southern Highlands Province, O'Neill graduated in accountancy and commerce from the University of Papua New Guinea in 1988. He practised as a chartered accountant before going into the real estate business. From 1993–97 he was executive chairman of Pangia Enterprises and from 1997–99 served as executive chairman of Pacific Finance, which managed state-owned

enterprises including the PNG Banking Corporation and the National Provident Fund.

O'Neill came in for criticism when several of these public enterprises failed, though his supporters praised his financial management and efforts to improve transparency. In 1999 he became executive chairman of Remington Technologies and in 2002 was elected to parliament for the People's National Congress (PNC), representing the constituency of Ialibu-Pangia. From 2002–03 he served as minister for labour and industrial relations and from 2003–04 was minister for public service and leader of government business.

As head of the PNC, he led the opposition from 2004–07. In 2007 he was appointed minister for public service in Somare's National Alliance Party-led coalition government and from 2010–11 also took on the finance and treasury portfolios. In office, he supported the liquefied natural gas projects undertaken in partnership with foreign companies. On 2 Aug. 2011, during Somare's prolonged absence from government for medical treatment, MPs from across the political spectrum elected O'Neill prime minister by 70 votes to 24.

#### **Career in Office**

O'Neill's early months were dominated by political instability as Somare challenged the legality of his election. In Dec. 2011 Somare formed a rival administration after the Supreme Court found in favour of the ex-incumbent. Somare's government was initially recognized by Governor-General Sir Michael Ogio but he later reversed his decision and declared O'Neill's premiership to be legitimate. By early 2012 O'Neill had gained widespread recognition, although Somare pursued his legal challenge. In May 2012 the Supreme Court ruled that Somare was still the country's legitimate leader. The chief justice was charged with sedition and a group of police blockaded parliament. However, given that Somare had missed three consecutive sessions of parliament, the prime minister's office was again declared vacant. Having been elected unopposed by 56 of the 109 members of parliament, O'Neill was sworn in as the country's prime minister for the third time on 31 May 2012.

In parliamentary elections held from June–July 2012, the PNC was returned as the largest party, effectively ending the year-long feud with Somare and his supporters. O'Neill promised to act against corruption and to manage a natural gas and minerals boom in the national interest. He faced urgent demands to develop the education and health sectors and to improve the national infrastructure. In Nov. he proposed an amendment to the constitution to extend a ban on votes of no confidence from 18 to 30 months after a government is elected.

#### **DEFENCE**

The Papua New Guinea Defence Force had a total estimated strength of 3,100 in 2007 consisting of land, maritime and air elements. The Navy is based at Port Moresby and Manus. Personnel numbered around 400 in 2007. There is an air force, 200 strong in 2007, but it does not possess any combat capable aircraft.

Defence expenditure in 2008 totalled US\$35m. (US\$6 per capita), representing 0.6% of GDP.

#### **ECONOMY**

Agriculture accounted for 19.1% of GDP in 2006, industry 45.2% and services 35.7%.

#### **Overview**

Papua New Guinea has experienced sound growth and macroeconomic stability since 2002. The country has large deposits of oil, gas, gold, copper, timber and silver, as well as abundant fisheries. The formal economy is focused on large-scale export of natural resources, while the informal sector consists of subsistence activities by a large proportion of the rural population.

Growth has remained strong through the global economic crisis, particularly in the extractive, construction and telecommunications industries. Prudent macroeconomic management in previous years provided fiscal space to adjust to the external shock. A significant driver in the economy is the Liquefied Natural Gas NG Project, approved in Dec. 2009 with production scheduled to start in 2014. Developing infrastructure remains crucial for further private sector growth.

An estimated 40% of people live on less than US\$1 per day.

#### **Currency**

The unit of currency is the *kina* (PGK) of 100 *toea*. The kina was floated in Oct. 1994. Foreign exchange reserves were US\$543m. in July 2005, gold reserves 63,000 troy oz and total money supply was K2,765m. Inflation was 6.0% in 2010 and 8.4% in 2011.

#### **Budget**

In 2009 revenues totalled K6,651.0m. (tax revenue, 74.8%) and expenditures K6,688.0m. (current expenditure, 62.3%).

VAT is 10%.

#### **Performance**

Real GDP growth was 6.1% in 2009, 7.6% in 2010 and 8.9% in 2011. Total GDP in 2011 was US\$12.9bn.

#### **Banking and Finance**

The Bank of Papua New Guinea (*Governor*, Loi Martin Bakani) assumed the central banking functions formerly undertaken by the Reserve Bank of Australia on 1 Nov. 1973. A national banking institution, the Papua New Guinea Banking Corporation, has been established. This bank has assumed the Papua New Guinea business of the Commonwealth Trading Bank of Australia.

In 2002 there were seven commercial banks (Australia and New Zealand Banking Group; Bank of Hawaii; Bank of South Pacific; Maybank; MBf Finance; Papua New Guinea Banking Corporation; Westpac Bank) and a Rural Development Bank.

Total commercial bank deposits, 1992, K1,318.2m. Total savings account deposits, 1992, K226.8m. In addition, the Agriculture Bank of Papua New Guinea had assets of K82.6m. in 1992, and finance companies and merchant banks had total assets of K198.4m.

Foreign debt was US\$5,882m. in 2010, representing 62.9% of GNI.

There is a stock exchange in Port Moresby.

### **ENERGY AND NATURAL RESOURCES**

#### **Environment**

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita.

#### **Electricity**

Installed capacity was an estimated 0.7m. kW in 2007. Production in 2007 was estimated at 3.05bn. kWh, around 29% of it hydro-electric. Consumption per capita was an estimated 258 kWh.

#### **Oil and Gas**

Natural gas reserves in 2008 were 440bn. cu. metres; output in 2006 was 283m. cu. metres. Crude oil production (2007), 2.1m. tonnes. Oil predominantly comes from the Iagifu field in the Southern Highlands. There were 240m. bbls of proven oil reserves in 2007.

#### **Minerals**

In 2004 the mineral sector produced 20.8% of GDP. Copper is the main mineral product. Gold, copper and silver are the only minerals produced in quantity. The Misima open-pit gold mine was opened in 1989 but its resources were depleted by the end of 2001. The Porgera gold mine opened in 1990 with an expected life of 20 years. Major copper deposits in Bougainville have proven reserves of about 800m. tonnes; mining was halted by secessionist rebel activity. Copper and gold deposits in the Star Mountains of

the Western Province are being developed by Ok Tedi Mining Ltd at the Mt Fubilan mine. Production of gold commenced in 1984 and of copper concentrates in 1987. In 2005 Ok Tedi Mining Ltd produced 192,978 tonnes of copper and 16 tonnes of gold. Gold mining also began at Lihir in 1997. In 2005 total gold production was 67 tonnes; silver production in 2002 was 64 tonnes.

### Agriculture

In 2002 agriculture employed 73% of the economically active population. In 2002 there were approximately 220,000 ha. of arable land and 650,000 ha. of permanent cropland. Minor commercial crops include pyrethrum, tea, peanuts and spices. Locally consumed food crops include sweet potatoes, maize, taro, bananas, rice and sago. Tropical fruits grow abundantly. There is extensive grassland. The sugar industry has made the country self-sufficient in this commodity while a beef-cattle industry is being developed.

Production (2002, in 1,000 tonnes): bananas, 860; coconuts, 513; sweet potatoes, 490; sugarcane, 370; palm oil, 316; yams, 280; taro, 250; cassava, 130.

Livestock (2003 estimates): pigs, 1.8m.; cattle, 90,000; chickens, 4m.

### Forestry

The forest area totalled 28.73m. ha. in 2010 (63% of the land area). 91% of forest area is primary forest. Timber production is important for both local consumption and export. Timber production was 7.24m. cu. metres in 2007.

### Fisheries

Tuna is the major resource. In 2010 the fish catch was 224,507 tonnes (94% sea fish).

## INDUSTRY

Secondary and service industries are expanding for the local market. The main industries are food processing, beverages, tobacco, timber products, wood and fabricated metal products. Industry accounted for 45.2% of GDP in 2006, with manufacturing contributing 6.1%. Production (2002): palm oil, 370,000 tonnes; copra, 110,000 tonnes; wood-based panels, 79,000 cu. metres; sawnwood, 70,000 cu. metres.

### Labour

In 2000 there were 2,344,734 persons in employment (51.3% males). The rate of unemployment was 2.8%.

## INTERNATIONAL TRADE

Australian aid amounts to an annual \$A300m. The 'Pactra II' agreement of 1991 established a free trade zone with Australia and protects Australian investments.

### Imports and Exports

Imports in 2008 were US\$3,550m. (US\$2,945m. in 2007); exports were US\$5,805m. (US\$4,683m. in 2007).

The main imports in terms of value are machinery and transport equipment, manufactured goods, and food and live animals; and the main exports crude petroleum, gold and logs.

Of imports in 2001, Australia furnished 60.0%; Japan, 8.5%; Singapore, 7.8%; USA, 7.1%. Of exports in 2001, Singapore took 27.5%; Japan, 13.2%; Australia 10.6%; China, 4.4%.

## COMMUNICATIONS

### Roads

In 2002 there were 19,600 km of roads, only about 690 km of which were paved. There were 38,200 passenger cars in use in 2007 and 11,300 lorries and vans.

### Civil Aviation

Jacksons International Airport is at Port Moresby. The state-owned national carrier is Air Niugini. In 2003 there were scheduled international flights to Brisbane, Cairns, Honiara,

Manila, Singapore, Sydney and Tokyo. There are a total of 177 airports and airstrips with scheduled services.

### Shipping

There are 12 entry and four other main ports served by five major shipping lines; the Papua New Guinea Shipping Corporation is state-owned. In Jan. 2009 there were 55 ships of 300 GT or over registered, totalling 44,000 GT.

### Telecommunications

In 2007 there were 360,000 telephone subscribers, or 56.9 for every 1,000 inhabitants. There were 300,000 mobile phone subscribers in 2007 and 110,000 internet users in 2006. In Dec. 2004 the government rejected a bid by a South African joint venture to acquire a 51% stake in the state-owned telecommunications company Telikom PNG.

## SOCIAL INSTITUTIONS

### Justice

The judicial system consists of a Supreme Court, a National Court, and district and local courts. The Supreme Court sittings are usually held with three or five judges. In 2004 there were 64,709 court cases registered of which 16,459 were civil cases. The death penalty for wilful murder was abolished in 1970 but reintroduced in 1991, although there have not been any executions since 1954.

The population in penal institutions in Dec. 2010 was 4,268 (61 per 100,000 of national population).

### Education

The education system has three levels: primary, secondary and tertiary. However, there are no legal provisions regarding either free or compulsory education. In 2001 there were 3,055 elementary and primary schools with 395,129 pupils and 11,307 teachers, 77,451 pupils in secondary schools (2,187 teachers) and 14,333 students in institutes of higher education. There are six universities: the University of Papua New Guinea (UPNG), Port Moresby; the Papua New Guinea University of Technology, Lae; Divine Word University, Madang; Pacific Adventist University, Boroko; the University of Goroka; and the University of Vudal, Rabaul. UPNG, founded in 1965, has two campuses in the capital, five provincial open campuses and 13 study centres. In 2002 there were also ten colleges, eight nursing schools and three academic institutes.

Adult literacy rate was an estimated 60.1% in 2009 (63.6% among males and 56.5% among females).

In 2000-01 total expenditure on education came to 2.4% of GNP and 17.5% of total government spending.

### Health

In 2000 there were 275 physicians, 90 dentists and 2,841 nurses. Provision of hospital beds in 1993 was 34 per 10,000 persons.

## RELIGION

At the 2000 census there were 4.93m. Christians: Roman Catholics made up 27.0%; Lutherans, 19.5%; United Church, 11.5%; Anglicans, 3.2%. In 1998 the Catholic Church had four archdioceses (Madang, Mount Hagen, Port Moresby and Rabaul), 14 dioceses, 340 parishes and 540 priests.

## CULTURE

### World Heritage Sites

There is one UNESCO site in Papua New Guinea: Kuk Early Agricultural Site (inscribed on the list in 2008).

### Press

In 2008 there were two daily newspapers (the *Papua New Guinea Post-Courier* and the *National*) and a number of weeklies and monthlies. The *Papua New Guinea Post-Courier* is the oldest

(1969) and most widely read, with a daily circulation of 30,000 (2007).

#### Tourism

In 2008 there were 114,000 non-resident tourists (excluding same-day visitors), up from 104,000 in 2007 and 78,000 in 2006.

#### Festivals

Alongside the major Christian festivals several cultural shows are held, in Enga (late July), at Mount Hagen (Western Highlands; late Aug.) and at Goroka (Eastern Highlands; mid-Sept.). The Tumbuan Mask Festival takes place at Rabaul (July) and the Hiri Moale Festival in Port Moresby (Sept.) was established to preserve the trading expeditions between the Motu-Koitabu people and the Erema (Kerema). Independence Day is celebrated on 16 Sept.

## Bougainville

The region of Bougainville, as part of New Guinea, became a United Nations Trust Territory in 1947 under the jurisdiction of Australia. Bougainville declared independence in 1975 but the uprising was suppressed and the islands became part of the North Solomons Province of the newly independent Papua New Guinea. Following tensions between landowners and Rio Tinto, the owners of the Panguna copper mine, conflict between separatists and Papua New Guinea began in 1989, lasting nearly a decade. A ceasefire was agreed in 1998, overseen by the United Nations. The Bougainville Peace Agreement was signed in Aug. 2001, allowing for the creation of an autonomous government and a referendum on full independence 10–15 years later. After the promulgation of a constitution, elections were held for the autonomous government in May–June 2005. A referendum on independence is now expected to take place between 2015 and 2020.

Area, 9,300 sq. km (3,600 sq. miles); population (2000), 175,160. The autonomous region consists of the main Bougainville island, Buka island and several smaller island groups. The government is currently based at Buka but the capital city will eventually revert to the former capital, Arawa.

In presidential elections held in May 2010 John Momis was elected with 52.4% of votes cast, defeating incumbent president James Tanis who took 20.9%. There were five other candidates. Momis was sworn in on 10 June.

Agriculture is the mainstay of Bougainville's economy. Major crops include cocoa (production in 2006, 16,000 tonnes) and copra (12,472 tonnes). However, the region is still reliant on grants and donors, raising only 20% of its 2007 budget internally. New exploration for minerals is banned but the government is considering reopening Panguna. There is an airport at Buka.

## KEY HISTORICAL EVENTS

Paraguay was occupied by the Spanish in 1537 and became a Spanish colony as part of the viceroyalty of Peru. The area gained its independence, as the Republic of Paraguay, on 14 May 1811. Paraguay was then ruled by a succession of dictators. A devastating war fought from 1865 to 1870 between Paraguay and a coalition of Argentina, Brazil and Uruguay reduced Paraguay's population from about 600,000 to 233,000. Further severe losses were incurred during the war with Bolivia (1932–35) over territorial claims in the Chaco inspired by the unfounded belief that minerals existed in the territory. A peace treaty by which Paraguay obtained most of the area her troops had conquered was signed in July 1938.

A new constitution took effect in Feb. 1968 under which executive power is discharged by an executive president. Gen. Alfredo Stroessner Mattiauda was re-elected seven times between 1958 and 1988. Since then, Paraguay has had more or less democratic government. On 23 March 1999 Paraguay's vice-president Luis María Argaña was assassinated. The following day, Congress voted to impeach President Raúl Cubas who was said to be implicated in the murder. He then resigned. The victory of Fernando Lugo of the Patriotic Alliance for Change in the April 2008 presidential election brought to an end the 61-year rule of the Colorado Party, at the time the world's longest-ruling party.

## TERRITORY AND POPULATION

Paraguay is bounded in the northwest by Bolivia, northeast and east by Brazil and southeast, south and southwest by Argentina. The area is 406,752 sq. km (157,042 sq. miles).

The 2002 census population was 5,163,198 (2,603,242 males), giving a density of 12.7 per sq. km. Estimate, July 2010: 6,451,100. In 2011, 62.1% lived in urban areas.

The UN gives a projected population for 2015 of 7.03m.

In 2002 the capital, Asunción, had a population of 512,112. Other major cities (2002 census populations) are: Ciudad del Este, 222,274; San Lorenzo, 204,356; Luque, 185,127.

There are 17 departments and the capital city. Area and population (2010 estimates):

| Department                   | Area in sq. km | Population |
|------------------------------|----------------|------------|
| Asunción (city) <sup>1</sup> | 117            | 518,200    |

## CONSTITUTION AND GOVERNMENT

On 18 June 1992 a Constituent Assembly approved a new constitution. The head of state is the *President*, elected for a non-renewable five-year term. Parliament consists of an 80-member *Chamber of Deputies*, elected from departmental constituencies,

and a 45-member *Senate*, elected from a single national constituency.

### National Anthem

'Paraguayos, república o muerte!' ('Paraguayans, republic or death!'); words by F. Acuña de Figueroa, tune by F. Dupuy.

### RECENT ELECTIONS

Parliamentary and presidential elections were held on 21 April 2013. Horacio Cartes of the Colorado Party (ANR) was elected president with 45.8% of votes cast. Efraín Alegre of the Authentic Radical Liberal Party (PLRA) won 36.9% of the vote, Mario Ferreiro of Forward Country 5.9% and Aníbal Carrillo of the Guasú Front 3.3%. There were seven other candidates. Turnout was 68.6%.

In the parliamentary elections the National Republican Association–Colorado Party (ANR–PC) won 44 seats in the Chamber of Deputies, the Authentic Radical Liberal Party (PLRA) 27 seats, the National Union of Ethical Citizens (UNACE) 2, Forward Country 2 and the National Encounter Party (PEN) 2. Three smaller parties won one seat each. In the Senate the ANR–PC won 19 seats, the PLRA 12, the Guasú Front 5, the Democratic Progressive Party 3, Forward Country 2, the UNACE 2, the PEN 1 and the Beloved Fatherland Party 1.

### CURRENT LEADERS

#### Federico Franco

##### Position

President

##### Introduction

Federico Franco became president in June 2012 after the impeachment of his predecessor, Fernando Lugo. Franco had been vice-president since 2003.

##### Early Life

Luis Federico Franco Gómez was born in Asunción on 24 July 1962. The son of a physician active in the Liberal Party, he attended the San José Apostolic College before graduating in medicine from the National University of Asunción in 1986.

After postgraduate study in Cuba, he qualified as a surgeon and established a practice in Fernando de la Mora, a suburb of Asunción. A supporter of the centrist Authentic Radical Liberal Party (PLRA) since his student days, Franco was elected to represent them in the municipality of Fernando de la Mora in 1991 and became mayor in 1996.

In 2000 Franco's brother, Julio César, was elected PLRA party vice president. In the general election of April 2003, Franco was narrowly elected governor of the Central department but his brother lost the presidential race to Nicanor Duarte Frutos of the Colorado Party. As governor of Central, Paraguay's most populous and prosperous department, Franco reformed its health services.

In Jan. 2008 Franco was elected leader of the PLRA, taking it into a new 12-party coalition, the Patriotic Alliance for Change (APC). The APC leader, Fernando Lugo, won the presidency on a platform of social reform, bringing an end to 61 years of Colorado Party rule. Franco became vice-president but policy differences with Lugo soon emerged, notably over land reform. Franco accused the president of failing to respect the law in his drive to push through measures to give land to poorer farmers.

Amid growing hostility from Congress and the armed forces, Lugo's authority was further undermined by paternity claims made against him by three women in 2009. In mid-2012 there were violent clashes between police and farmers occupying land that they claimed had been taken from them during the Stroessner dictatorship. Seven police and 11 farmers were killed. Parliament launched an impeachment of the president over his handling of the crisis and a vote on 21 June ended his mandate. In accordance with the constitution, Franco took over as president until Aug. 2013.

#### Career in Office

Progress on Franco's promised land, tax and energy reforms has been undermined by weak support in Congress and a lack of recognition of his administration by regional neighbours. The governments of Venezuela and Ecuador were particularly critical, arguing that Lugo was not given sufficient time to present the case against his impeachment and that his removal was tantamount to a coup.

Following the presidential election of April 2013, Franco was scheduled to be succeeded as president by Horacio Cartes on 15 Aug. 2013.

### DEFENCE

The army, navy and air forces are separate services under a single command. The President of the Republic is the active C.-in-C. Conscription is for 12 months (two years in the navy).

In 2008 defence expenditure totalled US\$132m. (US\$19 per capita), representing 0.8% of GDP.

#### Army

Strength (2007) 7,600 (1,500 conscripts). In addition there is a paramilitary Special Police Force numbering 14,800 (4,000 conscripts).

#### Navy

Personnel in 2007 totalled 1,950 (of which 850 conscripts) including 900 marines (of which 200 conscripts) and 100 naval aviation.

#### Air Force

The air force had a strength of 1,100 in 2007 (200 conscripts). There are ten combat-capable aircraft including Lockheed T-33s.

### ECONOMY

In 2006 agriculture accounted for 21.0% of GDP, industry 18.3% and services 60.7%.

#### Overview

Paraguay has few mineral resources and the economy is focused on agriculture. The country is the world's fourth largest exporter of soybean and the largest exporter of organic sugar, as well as a major exporter of hydro-electric power.

In the 1990s growth was slow but steady until 1998 when the economy stagnated. In 2002 performance slumped again, partly as a knock-on from the recession in Argentina, resulting in a request for IMF help. There was a return to growth from 2003–08, with restored confidence in public institutions, structural reform and debt reduction leading to fiscal account stability. Economic growth was at its highest level since the 1970s, boosted by strong exports, before a contraction in 2009. However, the economy rebounded the following year, achieving record growth of 13.1%.

Foreign direct investment increased by 46% between 2010 and 2011, but a severe drought in the first quarter of 2012 stifled the agricultural sector and held back further growth.

There is a large informal component of the economy and most enterprises are small. The lack of infrastructure to serve basic needs is a growing concern. 34.7% of the population live in poverty and only 35% of the rural population has access to drinking water. Unemployment was close to 6% in 2011, while underemployment stood at over 20%. Other problems include endemic corruption and Paraguay's reputation as a centre for smuggling, organized crime and money laundering.

### Currency

The unit of currency is the *guaraní* (PYG), notionally divided into 100 *céntimos*. In July 2005 total money supply was 4,733.6bn. guaraníes and foreign exchange reserves were US\$1,109m. Inflation was 4.7% in 2010 and 6.6% in 2011.

### Budget

Budgetary central government revenue and expenditure in 1bn. guaraníes:

|             | 2005    | 2006    | 2007     |
|-------------|---------|---------|----------|
| Revenue     | 8,430.0 | 9,556.5 | 10,812.4 |
| Expenditure | 7,157.4 | 8,175.6 | 8,975.2  |

Main sources of revenue in 2007: taxes on goods and services, 4,835.4bn. guaraníes; taxes on income, profits and capital gains, 1,228.5bn. guaraníes; taxes on international trade and transactions, 837.6bn. guaraníes. Leading items of expenditure by economic type in 2007: compensation of employees, 4,456.1bn. guaraníes; social benefits, 1,442.6bn. guaraníes; grants, 1,218.2bn. guaraníes.

VAT is 10% (reduced rate, 5%).

### Performance

The economy contracted by 4.0% in 2009 but there was growth of 13.1% in 2010, among the highest rates in the world. In 2011 the economy grew by 4.3%; total GDP was US\$23.8bn.

### Banking and Finance

The Central Bank is a state-owned autonomous agency with the sole right of note issue, control over foreign exchange and the supervision of commercial banks (*Governor*, Jorge Raúl Corvalán Mendoza). There is a Superintendencia de Bancos under Edgar Virgilio Paredes Álvarez. In 2002 there were five commercial banks and 11 foreign banks.

Foreign debt was US\$4,938m. in 2010, representing 25.3% of GNI.

There is a stock exchange in Asunción.

## ENERGY AND NATURAL RESOURCES

### Environment

Paraguay's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.6 tonnes per capita in 2008.

### Electricity

Installed capacity was 8.1m. kW in 2007. Output (2007), 53.71bn. kWh (almost exclusively hydro-electric); consumption per capita in 2007 was 1,402 kWh. Paraguay is the third largest exporter of electricity (after France and Germany), with 45.1bn. kWh in 2007.

### Minerals

The country is poor in minerals. Limestone, gypsum, kaolin and salt are extracted. 2006 estimated output: kaolin, 66,000 tonnes; limestone, 16,000 tonnes.

### Agriculture

In 2002, 33.4% of the economically active population were engaged in agriculture. In 2002 there were approximately 3.02m. ha. of arable land and 95,000 ha. of permanent crops.

Output (in 1,000 tonnes), 2002: cassava, 4,430; soybeans, 3,300; sugarcane, 3,210; maize, 867; wheat, 359; oranges, 207; seed cotton, 124; sweet potatoes, 124; watermelons, 115; rice, 105. *Yerba maté*, or strongly flavoured Paraguayan tea, continues to be produced but is declining in importance.

Livestock (2003 estimates): 8.81m. cattle, 3.25m. pigs, 410,000 sheep, 360,000 horses and 16m. chickens.

### Forestry

The area under forests in 2010 was 17.58m. ha., or 44% of the total land area. Timber production was 10.30m. cu. metres in 2007.

### Fisheries

In 2008 the catch totalled 1,708 tonnes, exclusively from inland waters.

## INDUSTRY

Paraguay is one of the least industrialized countries in Latin America. Industries include meat packing, sugar processing, cement, textiles, brewing, wood products and consumer goods. In 2006 industry accounted for 18.3% of GDP, with manufacturing contributing 11.8%.

### Labour

The labour force in 2002 totalled 1,980,492 (67.9% males). In 2002, 27% of the economically active population were engaged in agriculture, fisheries, hunting and forestry.

## INTERNATIONAL TRADE

### Imports and Exports

Trade in US\$1m.:

|----------------|---------|---------|---------|---------|---------|
| Imports c.i.f. | 2,227.5 | 3,097.4 | 3,714.9 | 5,878.8 | 5,844.7 |
| Exports f.o.b. | 1,241.5 | 1,625.7 | 1,687.8 | 1,906.4 | 2,784.7 |

Main imports in 2006: machinery and transport equipment, 46.9%; chemicals and chemical products, 12.2%; petroleum oils, 11.8%; metal tools, 2.6%. Main exports, 2006: soybeans, 23.0%; beef, 21.5%; maize, 8.7%; oilcake and other solid residues, 7.2%. Main import suppliers in 2006: China, 25.1%; Brazil, 19.0%; Argentina, 13.0%; USA, 6.0%. Main export markets, 2006: Uruguay, 22.0%; Brazil, 17.2%; Russia, 11.9%; Cayman Islands, 9.5%.

## COMMUNICATIONS

### Roads

In 2002 there were around 29,500 km of roads, of which 53.9% were paved. Passenger cars numbered 240,700 in 2007, there were 248,100 lorries and vans, 12,800 buses and coaches, and 134,900 motorcycles and mopeds. There were 845 fatalities as a result of road accidents in 2007.

### Rail

The President Carlos Antonio López (formerly Paraguay Central) Railway runs from Asunción to Encarnación, on the Rio Alto Paraná, with a length of 441 km (1,435 mm gauge), and connects with Argentine Railways over the Encarnación-Posadas bridge opened in 1989. In 2003 freight carried came to 210,000 tonnes.

### Civil Aviation

There is an international airport at Asunción (Silvio Pettrossi). The main Paraguay-based carrier is TAM Airlines (formerly TAM Mercosur). In 2003 scheduled airline traffic of Paraguay-based carriers flew 6m. km, carrying 299,000 passengers (288,000 on international flights). In 2000 Asunción handled 466,000 passengers (422,000 on international flights) and 6,600 tonnes of freight.

### Shipping

Asunción, the chief port, is 1,500 km from the sea. In Jan. 2009 there were 32 ships of 300 GT or over registered, totalling 44,000 GT.

### Telecommunications

In 2008 there were 491,000 main (fixed) telephone lines; mobile phone subscribers numbered 5,954,400 in 2008 (95.5 per 100 persons). There were 894,200 internet users in 2008. In March 2012 there were 1.0m. Facebook users.

### SOCIAL INSTITUTIONS

#### Justice

The 1992 constitution confers a large measure of judicial autonomy. The highest court is the Supreme Court with nine members. Nominations for membership must be backed by six of the eight members of the Magistracy Council, which appoints all judges, magistrates and the electoral tribunal. The Council comprises elected representatives of the Presidency, Congress and the bar. There are special Chambers of Appeal for civil and commercial cases, and criminal cases. Judges of first instance deal with civil, commercial and criminal cases in six departments. Minor cases are dealt with by Justices of the Peace.

The Attorney-General represents the State in all jurisdictions, with representatives in each judicial department and in every jurisdiction.

The population in penal institutions in Nov. 2008 was 6,031 (97 per 100,000 of national population). The death penalty was abolished for all crimes in 1992.

#### Education

Adult literacy was 95% in 2007. Education is free and nominally compulsory. In 2005 there were 933,995 pupils at primary schools (with 33,434 teaching staff in 2004) and 529,309 at secondary level (with 44,440 teaching staff in 2004). There were 156,167 students in tertiary education in 2005. Paraguay's leading institute of higher education is the National University of Asunción (Universidad Nacional de Asunción), the country's oldest university, founded in 1889.

In 2007 public expenditure on education came to 4.0% of GDP and 11.9% of total government spending.

#### Health

In 2003 there were 1,117 health establishments (including 84 hospitals) with 7,167 beds. There were 6,400 physicians, 1,947 dentists and 1,089 nurses in 2000.

### RELIGION

Religious liberty was guaranteed by the 1967 constitution. Article 6 recognized Roman Catholicism as the official religion of the

country. It had 3.5m. adherents in 2002. There are Mennonite, Anglican and other communities as well. In 2002 followers of other religions (mostly Protestants) totalled 322,000.

### CULTURE

#### World Heritage Sites

Paraguay has one site on the UNESCO World Heritage List: the Jesuit Missions of La Santísima Trinidad de Paraná and Jesús de Tavarangue (inscribed on the list in 1993).

#### Press

In 2008 there were eight daily newspapers with a combined circulation of 135,000.

#### Tourism

In 2005 there were 341,000 foreign tourists, spending US\$96m.

## KEY HISTORICAL EVENTS

Hunter-gatherers lived in Peru from at least 9000 BC. Irrigation canals discovered recently in the Andean foothills of northern Peru date farming from around 3400 BC. The Chavin culture in central and northern Peru between 900 BC and 200 BC left monumental temples and intricate artwork across a wide area. The Paracas culture emerged on the southern coast in around 300 BC and evolved into the Nazca culture, famed for its exquisite textiles. Further north, the coastal Moche culture flourished between around 100 BC and AD 700, producing distinctive metalwork and pottery. The following centuries saw the rise of inland, Andean cultures and powerful city states such as Chancay, Sipan and Cajamarca.

The Inca civilization is thought to have its origins in a Quechua-speaking tribe that settled in the Cusco Valley from about 1200. By the mid-15th century, under Emperor Tupac Yupanqui (1471–93) and subsequently under Huayna Capac, the empire stretched along the Andes from Ecuador to Chile. The Inca's road network was an engineering masterpiece, as were the terraced fields and cities such as the famed Machu Picchu.

The Spanish adventurer, Francisco Pizarro, landed on the Ecuadorian coast in 1532 and moved south. Relations between the Spanish and the Incas quickly soured and Emperor Atahualpa was captured following the battle of Cajamarca. He was executed in 1533 and a year later Pizarro conquered the city of Cusco. Lima was founded in 1535 and in 1542 it became the seat of the Viceroyalty of Peru, which for a time had jurisdiction over all the Spanish colonies in South America. The Spanish conquistadors amassed vast wealth and power by controlling the trade in Andean gold and silver, while the Incas became increasingly marginalized. Revolts against Spanish rule occurred in the 1780s but concerted demands for independence came only after the French Revolution and Napoleon's conquest of Spain in 1808.

José de San Martín of Argentina (who had ended Spanish rule in Chile in 1818) and Simón Bolívar of Venezuela proclaimed Peruvian independence on 28 July 1821 but it was only confirmed in Dec. 1824, when Antonio José de Sucre defeated Spanish troops at Ayacucho. After independence Peru and its neighbours engaged in various territorial disputes. Chile's victory over Peru and Bolivia in the War of the Pacific (1879–83) resulted in Peru ceding the department of Tarapaca and the provinces of Tacna and Arica to Chile. Gen. Andrés Bello Cáceres became president in 1885 and tried to breathe life into the crippled economy by encouraging foreign management of the railways and guano (fertilizer) exports.

A businessman, Augusto Leguía, who became president for four years in 1908, pushed through economic reforms. He became increasingly authoritarian during his second term of office (1919–30), and in 1924 Dr Victor Raúl Haya de la Torre founded the Alianza Popular Revolucionaria Americana (APRA), which called for radical reform. The party was banned by Leguía and then outlawed by his successor, Sánchez Cerro, during the 1930s. Peru sided with the Allies during the Second World War and in 1945 Luis Bustamante y Rivero was elected president, with APRA backing. Splits soon emerged and Manuel Odría led a military coup three years later. An inconclusive election in 1962 enabled Gen. Ricardo Pérez Godoy to seize power, although he was deposed in a coup led by Gen. Nicolás Lindley López a year later. There followed a period of civilian rule but the military staged yet another coup in 1968. In 1978–79 a constituent assembly drew up a new constitution, after which a civilian government was installed.

Peru was plagued by political violence between the early 1980s and the late 1990s with 69,000 people killed by Maoist Shining Path insurgents, the smaller Tupac Amaru Revolutionary Movement and government forces. On 5 April 1992 President Alberto Fujimori suspended the constitution, dissolved parliament and implemented drastic economic reforms to tackle rampant inflation. A new constitution was promulgated on 29 Dec. 1993. But while Peru enjoyed stability and economic growth, continuing autocratic rule put some politicians above the law. Embroiled in a bribery and corruption scandal, President Fujimori's discredited administration came to an end in Nov. 2000 when he resigned while out of the country.

A caretaker government under Valentín Paniagua presided over new presidential and congressional elections in April 2001. A new government led by President Alejandro Toledo took office in July 2001. The Toledo government consolidated Peru's return to democracy and presided over a period of strong economic growth, although great inequalities persisted. Alan García, who had been president for five years in the second half of the 1980s, narrowly won a run-off election in April 2006 and was sworn in as president for a second term in July 2006.

## TERRITORY AND POPULATION

Peru is bounded in the north by Ecuador and Colombia, east by Brazil and Bolivia, south by Chile and west by the Pacific Ocean. Area, 1,285,216 sq. km (including the area of the Peruvian part of Lake Titicaca).

For an account of the border dispute with Ecuador, *see* ECUADOR: Territory and Population.

Census population, 2007, 27,412,157; density, 21.3 per sq. km. In 2011 the population was 77.3% urban.

The UN gives a projected population for 2015 of 30.76m.

The country is administratively divided into 25 regions and an autonomous province of Lima (with capitals): Amazonas (Chachapoyas), Ancash (Huaráz), Apurímac (Abancay), Arequipa (Arequipa), Ayacucho (Ayacucho), Cajamarca (Cajamarca), Callao (Callao), Cusco (Cusco), Huancavelica (Huancavelica), Huánuco (Huánuco), Ica (Ica), Junín (Huancayo), La Libertad (Trujillo), Lambayeque (Chiclayo), Lima (Huacho), Lima province (Lima), Loreto (Iquitos), Madre de Dios (Puerto Maldonado), Moquegua (Moquegua), Pasco (Cerro de Pasco), Piura (Piura), Puno (Puno), San Martín (Moyobamba), Tacna (Tacna), Tumbes (Tumbes), Ucayali (Pucallpa).

The largest cities (with 2007 census populations) are: Lima, 8,472,935; Arequipa, 784,651; Trujillo, 682,834; Chiclayo, 524,442; Piura, 377,496; Iquitos, 370,962.

In 1991 there were some 100,000 Peruvians of Japanese origin. Indigenous peoples account for 47% of the population.

The official languages are Spanish (spoken by 83.9% of the population in 2007), Quechua (13.2%) and Aymara (1.8%).

## SOCIAL STATISTICS

2009 births (estimate), 604,000; 2009 deaths (estimate), 144,000. Rates per 1,000 population (2009): birth, 21; death, 5. Annual population growth rate, 2000–05, 1.5%; infant mortality, 2010, 15 per 1,000 live births. Life expectancy, 2007: males, 70.4 years; females, 75.8. Fertility rate, 2008, 2.6 births per woman.

## CLIMATE

There is a very wide variety of climates, ranging from tropical in the east to desert in the west, with perpetual snow in the Andes. In coastal areas, temperatures vary very little, either daily or annually, though humidity and cloudiness show considerable variation, with highest humidity from May to Sept. Little rain is experienced in that period. In the Sierra, temperatures remain fairly constant over the year, but the daily range is considerable. There the dry season is from April to Nov. Desert conditions occur in the extreme south, where the climate is uniformly dry, with a few heavy showers falling between Jan. and March. Lima, Jan. 74°F (23.3°C), July 62°F (16.7°C). Annual rainfall 2" (48 mm). Cusco, Jan. 56°F (13.3°C), July 50°F (10°C). Annual rainfall 32" (804 mm). El Niño is the annual warm Pacific current that develops along the coasts of Peru and Ecuador. El Niño in 1982–83 resulted in agricultural production down by 8.5% and fishing output down by 40%. El Niño in 1991–94 was unusually long. El Niño in 1997–98 resulted in a sudden rise in the surface temperature of the Pacific by 9°F (5°C) and caused widespread damage and loss of life.

## CONSTITUTION AND GOVERNMENT

The 1980 constitution provided for a legislative *Congress* consisting of a *Senate* and a *Chamber of Deputies*, and an Executive formed of the President and a Council of Ministers appointed by him. Elections were to be every five years with the President and Congress elected, at the same time, by separate ballots.

On 5 April 1992 President Fujimori suspended the 1980 constitution and dissolved Congress.

A referendum was held on 31 Oct. 1993 to approve the twelfth constitution, including a provision for the president to serve a

consecutive second term. 52.24% of votes cast were in favour. The constitution was promulgated on 29 Dec. 1993. In Aug. 1996 Congress voted for the eligibility of the President to serve a third consecutive term of office.

Congress has 130 members, elected for a five-year term by proportional representation. All citizens over the age of 18 are eligible to vote. Voting is compulsory.

## CURRENT LEADERS

### Ollanta Moisés Humala Tasso

*Position*  
President

#### Introduction

Ollanta Humala became president in July 2011. Leader of the Peruvian Nationalist Party, he was elected after two rounds of voting, defeating Keiko Fujimori, daughter of former president Alberto Fujimori. Humala was backed by the Gana Perú coalition and succeeded Alan García.

#### Early Life

Born in Lima in June 1962, Humala is the son of Isaac Humala who developed the ethno-nationalist ideology called 'ethnocacerism'. Ollanta Humala studied in Lima before joining the military. He trained initially as a paratrooper and amphibious combatant at the School of the Americas in Panama. In 1992, as head of a detachment in Tingo María, he was involved in operations against the rebel group Shining Path, for which he was later accused of human rights abuses. By 2000 he had been promoted to lieutenant-colonel.

Also in 2000, he led an uprising (along with his brother) in a bid to force out President Alberto Fujimori and leading military commanders. Following Fujimori's resignation the interim government pardoned Humala and awarded him the Peru Cross for Military Merit.

From 2000–04 Humala worked for the ministry of defence and in 2001 completed a masters degree in political sciences from the Pontifical Catholic University of Peru. He became the military attaché to the Peruvian embassy in Paris in 2003 and studied for a doctorate in international law at the Sorbonne. In 2004 he was posted to South Korea. While there his name was linked to an uprising in Peru against President Alejandro Toledo.

In 2005 Humala founded the Peruvian Nationalist Party (PNP). With support from the Union for Peru (UPP), he ran for the presidency in 2006 but lost support over questions about his past and his left-wing sympathies. From 2006–11 he fought off several legal cases related to previous coups. In 2011, backed by the Gana Perú coalition, he ran for the presidency again, defeating Keiko Fujimori.

#### Career in Office

In 2006 Humala had defined himself as 'anti-neoliberal' and 'anti-global capitalist' but in 2011 he adopted a more moderate profile. He distanced himself from associations with Venezuela's Hugo

Chávez and stood on a platform of energy self-sufficiency, a more equitable distribution of wealth and increased taxes on mining. On coming to power, he chose a moderate cabinet, quelling worries in business circles and cutting short an initial shock in the Lima stock market. He increased taxes on mining, and announced social programmes including a non-contributory basic pension for the elderly, a public childcare programme and more scholarships to promote university education. The minimum wage was also increased.

Large-scale mining projects, such as the Conga copper and gold mine, offer potentially lucrative future revenue sources. However, popular opposition to mining schemes is widespread in the country and protests led in Dec. 2011 to the resignation of Prime Minister Salomon Lerner, his replacement by Óscar Valdés and a major cabinet reshuffle. There were further violent anti-mining clashes in the southern Cusco region in May 2012 and in northern provinces in July, prompting the government to declare temporary states of emergency. Also in July, following the resignation of the unpopular Óscar Valdés and his administration in response to the unrest, Humala appointed Juan Jiménez Mayor as the new premier.

## DEFENCE

Conscription was abolished in 1999. In 2008 defence expenditure totalled US\$1,424m. (US\$49 per capita), representing 1.1% of GDP.

### Army

There are four military regions. In 2007 the Army comprised 74,000 personnel and 188,000 reserves. In addition there is a paramilitary national police force of 77,000 personnel.

### Navy

The principal ship of the Navy is the former Netherlands cruiser *Almirante Grau*, built in 1953. Other combatants include six diesel submarines (two in refit) and eight Italian-built frigates.

Callao is the main base, where the dockyard is located and most training takes place. Smaller bases exist at Iquitos, Paita, Puerto Maldonado, Puno, San Lorenzo Island and Talara.

Naval personnel in 2007 totalled 23,000 including 1,000 Coast Guards, about 800 Naval Air Arm and 4,000 Marines.

### Air Force

The operational force is divided into five regions—North, Lima, South, Central and Amazon.

In 2007 there were some 17,000 personnel and 60 combat-capable aircraft (including Su-25s, Mirage 2000s and MiG-29s) and 16 attack helicopters.

## ECONOMY

Agriculture produced 6.8% of GDP in 2006, industry 37.5% and services 55.7%.

### Overview

From 1990 the economy underwent a transformation, with the ending of a debt crisis and hyperinflation, the implementation of tax and pension reforms, and a programme of liberalization and privatization.

Recession between 1997 and 2001 was caused by a spillover from emerging market crises and commodity price weaknesses. The economy then responded well to a policy of fiscal responsibility, job creation programmes and rising commodity prices. The government oversaw reforms to open the economy, reduce labour costs in the formal sector, and attract private investment.

Following the 1997–2001 dip, the economy grew at its most sustained pace since the 1950s spurred by elevated commodity prices (particularly for minerals and metals) as well as growth in the agriculture, textiles, manufacturing and construction sectors. Per capita income almost tripled between 2001 and 2011. With an

expanded middle class, income inequality decreased and the poverty rate fell from 44.5% in 2006 to 30.8% in 2010. The government aims to further reduce the rate to 20% by 2016.

The economy recovered quickly from the global economic crisis. In 2010 real GDP expanded by nearly 9%, driven by private domestic demand, while the annual inflation rate was the lowest in Latin America.

Private investment has been concentrated in the natural resources sector while employment creation has been predominantly in the capital, Lima (home to roughly a third of the population), and the mining-intensive north coast region. The impoverished rural highlands have benefited little and remain without proper access to basic infrastructure and running water. 54% of Peruvians in rural areas were living in poverty in 2010.

Key challenges include improving the investment climate and achieving more inclusive growth. The economy remains vulnerable to fluctuations in world commodity prices and over-reliance on non-renewable natural resources.

### Currency

The monetary unit is the *nuevo sol* (PEN), of 100 *céntimos*, which replaced the *inti* in 1991 at a rate of 1m. intis = 1 nuevo sol. Inflation, which had been over 7,000% in 1990, was 1.5% in 2010 and 3.4% in 2011. Foreign exchange reserves were US\$14,773m. in July 2005, gold reserves totalled 1.12m. troy oz and total money supply was 24,565m. nuevos soles.

### Budget

Central government revenue and expenditure (in 1m. sols), year ending 31 Dec.:

|             | 2007   | 2008   | 2009   |
|-------------|--------|--------|--------|
| Revenue     | 67,324 | 74,356 | 67,932 |
| Expenditure | 57,165 | 62,424 | 67,245 |

Principal sources of revenue in 2009 were: taxes on goods and services, 26,325m. sols; taxes on income, profits and capital gains, 20,352m. sols; social security contributions, 6,659m. sols. Main items of expenditure by economic type in 2009 were: grants, 24,157m. sols; use of goods and services, 13,727m. sols; compensation of employees, 12,233m. sols.

In Dec. 2005 the World Bank approved a US\$150m. loan to assist with the government decentralization process and enhance competitiveness.

VAT is 18%.

### Performance

Real GDP growth was 0.9% in 2009, rising to 8.8% in 2010. Peru's real GDP growth was above average for Latin America every year between 2002 and 2009 apart from 2004. In 2011 the economy grew by 6.9%; total GDP was US\$176.9bn.

### Banking and Finance

The bank of issue is the Banco Central de Reserva (*President*, Julio Velarde Flores), which was established in 1922. The government's fiscal agent is the Banco de la Nación. In 2002 there were three other government banks (Banco Central Hipotecario del Perú, Banco de la Nación and Corporación Financiera de Desarrollo), ten commercial banks, one regional bank and three foreign banks. Legislation of April 1991 permitted financial institutions to fix their own interest rates and reopened the country to foreign banks. The Central Reserve Bank sets the upper limit.

External debt in 2010 totalled US\$36,271m., equivalent to 24.6% of GNI.

In 2010 Peru received US\$7,328m. of foreign direct investment, up from US\$5,576m. in 2009. The total stock of FDI at the end of 2010 was US\$41.8bn.

There are stock exchanges in Lima and Arequipa.

## ENERGY AND NATURAL RESOURCES

Peru lays claim to 84 of the world's 114 ecosystems; 28 of its climate types; 19% of all bird species; 20% of all plant species; and 25 conservation areas (seven national parks, eight national reserves, seven national sanctuaries and three historic sanctuaries).

### Environment

Peru's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.2 tonnes per capita.

### Electricity

In 2007 output was 29.93bn. kWh (19.55bn. kWh hydro-electric and 10.38bn. kWh thermal). Total generating capacity was 7.0m. kW in 2007. Consumption per capita in 2007 was 1,092 kWh.

### Oil and Gas

Proven oil reserves at the end of 2008 amounted to 1.1bn. bbls. Output, 2008, 5.3m. tonnes. Natural gas reserves in 2008 were 330bn. cu. metres; output in 2007 was 2,831m. cu. metres. Commercial development of the huge Camisea gas field began in late 2004. In June 2010 Peru became a net gas exporter.

### Minerals

The mining and fuel sectors accounted for some 8.1% of GDP in 2005. Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Mineral production, 2004 (in 1,000 tonnes): iron, 4,315; zinc, 1,209; copper, 1,036; lead, 306; silver, 3.1; gold, 0.17. 16,000 tonnes of coal were produced in 2004. Early in 1998 Southern Peru Copper, the country's largest mining company, estimated that 3,000 tonnes of copper production had been lost as a result of flooding caused by El Niño.

### Agriculture

There are four natural zones: the Coast strip, with an average width of 80 km; the Sierra or Uplands, formed by the coast range of mountains and the Andes proper; the Montaña or high wooded region which lies on the eastern slopes of the Andes; and the jungle in the Amazon Basin, known as the Selva. Legislation of 1991 permits the unrestricted sale of agricultural land. Workers in co-operatives may elect to form limited liability companies and become shareholders.

Production in 2003 (in 1,000 tonnes): sugarcane, 9,550; potatoes, 3,300; rice, 2,139; bananas and plantains, 1,600; maize, 1,471; cassava, 890; onions, 450; oranges, 295; lemons and limes, 255; sweet potatoes, 225.

Livestock, 2003 estimates: sheep, 14.1m.; cattle, 5.0m.; pigs, 2.9m.; alpacas, 2.5m.; goats, 2.0m.; poultry, 95m. Livestock products (in 1,000 tonnes), 2003 estimates: poultry meat, 635; beef and veal, 146; pork, bacon and ham, 85; mutton and lamb, 32; milk, 1,220.

In 2002 there were approximately 3.70m. ha. of arable land and 0.61m. ha. of permanent crops. About 1.2m. ha. were irrigated in 2002.

Coca was cultivated in 2005 on approximately 38,000 ha., down from 115,000 ha. in 1995.

### Forestry

In 2010 the area covered by forests was 67.99m. ha., or 53% of the total land area. The forests contain valuable hardwoods; oak and cedar account for about 40%. In 2007 timber production was 9.45m. cu. metres.

### Fisheries

Sardines and anchovies are caught offshore to be processed into fishmeal, of which Peru is the world's largest producer (with a 2009 output of 1,346,900 tonnes or 28% of world production). Total catch in 2010 was 4,261,091 tonnes, of which 99% was from sea fishing. In 2009 total exports of fishery commodities came to a value of US\$2.21bn.

## INDUSTRY

The leading companies by market capitalization in Peru in April 2012 were: Credicorp, a financial holding company (US\$12.0bn.); and Buenaventura, a mining company (US\$10.7bn.).

About 70% of industries are located in the Lima/Callao metropolitan area. Industry accounted for 29.7% of GDP in 2001, with manufacturing contributing 15.3%. Production (2007 unless otherwise indicated, in 1,000 tonnes): cement (2002), 4,120; distillate fuel oil, 3,063; residual fuel oil, 2,693; petrol, 2,356; prepared animal feeds (2001), 1,508; sugar (2001), 755; soft drinks (2002), 1,179.7m. litres; beer (2005), 797.0m. litres; cigarettes (2002), 3.8bn. units.

### Labour

The labour force in 1996 totalled 8,652,000 (71% males). In 1993, 1,852,800 people worked in agriculture, 1,167,000 in commerce, 783,900 in manufacturing, 599,700 in services, 347,500 in transport, 255,000 in building and 72,200 in mining. In 2002 an estimated 8.4% of the workforce was unemployed, up from 5.9% in 1991. On taking office in July 2011 the new president, Ollanta Humala, announced an immediate rise in the monthly minimum wage from 600 to 675 nuevos soles, with a further increase to 750 nuevos soles from Jan. 2012 (although this was subsequently postponed but did take effect from June 2012).

## INTERNATIONAL TRADE

An agreement of 1992 gives Bolivia duty-free transit for imports and exports through a corridor leading to the Peruvian Pacific port of Ilo from the Bolivian frontier town of Desaguadero, in return for Peruvian access to the Atlantic via Bolivia's roads and railways. In April 2006 Peru and the USA signed a free trade agreement that eliminates tariffs on each other's goods; it took effect in Jan. 2009.

### Imports and Exports

The following table shows the value of Peru's foreign trade (in US\$1m.):

|                | 2007     | 2008     | 2009     | 2010     |
|----------------|----------|----------|----------|----------|
| Imports c.i.f. | 20,368.3 | 29,952.8 | 21,869.7 | 29,879.5 |
| Exports f.o.b. | 28,084.6 | 31,288.2 | 26,738.3 | 35,073.2 |

The principal import suppliers in 2009 were: USA, 19.8%; China, 14.9%; Brazil, 7.7%; Ecuador, 4.7%. The principal export markets in 2009 were: USA, 17.2%; China, 15.3%; Switzerland, 14.8%; Canada, 8.6%.

The leading imports in 2009 were machinery and transport equipment (34.8%), manufactured goods (15.9%), chemicals and related products (15.0%), and petroleum and petroleum products (13.6%). Leading exports in 2009 were gold (25.2%), copper, copper ores and concentrates (22.9%), petroleum and petroleum products (7.2%), and animal feeds (5.7%).

## COMMUNICATIONS

### Roads

In 2006 there were 78,986 km of roads, of which 13.9% were paved. In 2007 there were 917,100 passenger cars, 480,900 lorries and vans and 44,400 buses and coaches. There were 67,155 road accidents involving injury in 2006 with 3,481 fatalities.

### Rail

Total length (2002), 2,121 km on 1,435- and 914-mm gauges. Passenger-km travelled in 2005 came to 126m. and freight tonne-km to 1,101m. A mass transit system opened in Lima in 2003. Peru's first metro, also in Lima, opened in Jan. 2012.

### Civil Aviation

There is an international airport at Lima (Jorge Chávez International). The main airline is the Chilean-owned Lan Perú. In 2003 services were also provided by the domestic airlines Aero

Cóndor, AVIANDINA and Transportes Aéreos Nacionales de Selva, and by more than 20 international carriers. In 2003 scheduled airline traffic of Peruvian-based carriers flew 44m. km, carrying 2,226,000 passengers (547,000 on international flights). In 2001 Jorge Chávez International handled 4,089,914 passengers (2,128,872 on international flights) and 112,709 tonnes of freight.

### Shipping

In 2004 there were 46 sea-going vessels and 651 lake and river craft. In Jan. 2009 there were nine ships of 300 GT or over registered, totalling 87,000 GT. Callao is the busiest port, handling 18,191,000 tonnes of cargo in 2008. There are also ports at Chimbote, Paita and Talara.

### Telecommunications

In 2008 there were 2,878,200 main (fixed) telephone lines; mobile phone subscribers numbered 20,951,800 in 2008 (72.7 per 100 persons). In 2011, 36.5% of the population were internet users. In March 2012 there were 8.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The judicial system is a pyramid at the base of which are the justices of the peace who decide minor criminal cases and civil cases involving small sums of money. The apex is the Supreme Court with a president and 12 members; in between are the judges of first instance, who usually sit in the provincial capitals, and the superior courts.

The police had 95,789 personnel in 2008. The population in penal institutions in Oct. 2004 was 32,129 (114 per 100,000 of national population).

### Education

Adult literacy was 90% in 2007. Elementary education is compulsory and free between the ages of six and 16; secondary education is also free. In 2007 there were 1,204,022 children in pre-school education with 58,177 teaching staff, 3,993,965 pupils in primary schools with 179,743 teaching staff and 2,861,313 pupils in secondary schools with 158,890 teaching staff. There were 952,437 students in tertiary education in 2006. The leading higher education institute is the National University of San Marcos (Universidad Nacional Mayor de San Marcos), founded in 1551, making it the oldest both in the country and in South America.

In 2007 public expenditure on education came to 2.7% of GNI and 16.4% of total government spending.

### Health

There were 483 hospitals with 43,074 beds (provision of 16 beds per 10,000 inhabitants) in 2002. There were 29,138 physicians, 3,190 dentists and 21,351 nurses in 2002.

Peru has been one of the most successful countries in reducing undernourishment in the past 20 years. Between 1990-92 and 2001-03 the proportion of undernourished people declined from 42% of the population to 12%.

### Welfare

An option to transfer from state social security (IPSS) to privately-managed funds was introduced in 1993.

## RELIGION

Religious liberty exists, but the Roman Catholic religion is protected by the State, and since 1929 only Roman Catholic religious instruction is permitted in schools, state or private. There were 17.0m. Catholics in 2007 as well as 2.6m. Protestants and 1.3m. with other beliefs (including non-religious). In Feb. 2013 there was one cardinal.

## CULTURE

### World Heritage Sites

There are 11 sites under Peruvian jurisdiction that appear on the UNESCO World Heritage List. They are (with the year entered on the list): the City of Cusco (1983), the Historic Sanctuary of Machu Picchu (1983), Chavin Archaeological Site (1985), Huascarán National Park (1985), Chan Chan Archaeological Zone (1986), Manú National Park (1987), Historic Centre of Lima (1988 and 1991), Río Abiseo National Park (1990 and 1992), Lines and Geoglyphs of Nasca and Pampas de Jumana (1994), the Historical Centre of the City of Arequipa (2000) and the Sacred City of Caral-Supe (2009).

### Press

In 2008 there were 89 paid-for daily newspapers, of which 23 were national and 66 regional and local. The leading dailies are *Líbero* (with an average daily circulation in 2008 of 214,000), *Trome* (average daily circulation in 2008 of 213,000) and *El Comercio* (average daily circulation in 2008 of 199,000).

### Tourism

There were 1,916,000 non-resident tourists in 2007, up from 1,064,000 in 2002; tourist spending in 2007 totalled US\$2,222m., compared to US\$836m. in 2002.

### Festivals

The Lord of Tremors festival (the second part of March and the first week of April) renders homage to the image of Taitacha Temblores, the Lord of the Earthquakes, and demonstrates the fusion of Andean religions and Christianity; Fiesta de las Cruces (3 May) is celebrated across Peru as well as Spain and other parts of Hispanic America, and includes processions, folk music and dance; Inti Raymi (24 June), one of the biggest celebrations in Peru, celebrates the winter solstice and the Inca sun god; Corpus Christi (June) includes a traditional and colourful procession of saints and virgins; Virgin of the Carmen (second week of July) takes place in the small town of Paucartambo and includes a series of processions in honour of Mamacha Carmen, the patron saint of the mestizo population; All Saints Day (1–2 Nov.) is dedicated to the memory of the dead.

## KEY HISTORICAL EVENTS

Pottery was being made on the Philippine archipelago from at least 3000 BC, probably by people of Malay origin, and metals were being worked by the first millennium BC. Merchants from south China reached the islands during the 10th century AD (T'ang Dynasty), heralding centuries of Chinese trade with the region. Arab traders brought Islam from the Malay peninsula via Borneo and the Sulu archipelago in the late 13th century, and by the 15th century Islamic influence had spread as far north as Luzon. Most islanders lived in barangays, communities of 30–100 households based largely on kinship.

The Portuguese explorer, Ferdinand Magellan, landed at Samar on 16 April 1521 during his Spanish-financed expedition round the world. Subsequent expeditions consolidated Spanish control

over the islands, which were named after Philip II of Spain in 1542. Manila was established by Miguel Lopez de Legaspi in 1571 on the site of an existing Moro (Muslim Filipinos) settlement. By the end of the 16th century the Philippines had become a major trading centre with India, China and the East Indies. The islands came under Dutch control from around 1600.

The waning of the Spanish Empire during the 18th century saw a rise in the power base of the Jesuit orders, which caused resentment and stoked demands for independence. In 1896 revolution in the province of Cavite, led by Emilio Aguinaldo among others, spread through the major islands. However, in Dec. 1898, following the Spanish-American War, the Philippines were ceded to the United States. Aguinaldo fought a guerrilla campaign but was captured in 1901. The US granted the Philippines partial autonomy in 1916 and the Hare-Hawes-Cutting Act of 1932 set a timetable for full independence after a ten-year period of self-governance as a Commonwealth of the USA. Manuel Quezon was elected the first president in Sept. 1935.

In Dec. 1941 the islands were invaded by Japanese troops, who went on to take complete control in 1942. Quezon escaped to the USA and established a government-in-exile in Washington, D.C. Sergio Osmena succeeded Quezon in 1944 and returned to the Philippines with a US-backed liberation force in Oct. 1944. Manuel Roxas defeated Osmena in the election of April 1946, becoming president of the Republic of the Philippines when independence was achieved on 4 July 1946. The USA continued to play a key role in its former colony, particularly in economic policy. In return for assistance in rebuilding the country's war-torn infrastructure, the USA secured 99-year leases over several air and naval bases. Relations with neighbouring countries improved and in 1954 the Philippines joined the Southeast Asia Treaty Organization, precursor to the Association of South East Asian Nations (ASEAN).

Ferdinand Marcos was elected president in 1965 and re-elected four years later, although his rule became increasingly unpopular. In Sept. 1972 Marcos declared martial law and thousands of political opponents were arrested. In May 1980 Benigno Aquino, Jr, the leading opponent of Marcos, was released from prison to go to the USA for medical treatment. His assassination, on his return to the Philippines in 1983, led to growing US pressure for Marcos to restore democracy. In late 1985 he announced a snap presidential election. He was challenged by Aquino's widow, Corazón, who eventually emerged victorious from a controversial poll and was installed as president on 25 Feb. 1986. Marcos fled the country and a new constitution limiting the president to a single, six-year term in office was ratified in Feb. 1987.

More than twenty years of insurgency by the Moro National Liberation Front were ended by a peace agreement of 2 Sept. 1996, providing for a Muslim autonomous region in an area of Mindanao island. The rebellion left more than 120,000 people dead. In Oct. 2000 impeachment proceedings began against President Estrada who was alleged to have received more than US\$10.8m. from gambling kickbacks. His impeachment trial collapsed in Jan. 2001 when he was forced from office by mass protests. Subsequently Estrada's supporters tried to overthrow his successor, Gloria Macapagal-Arroyo.

In Nov. 2001 the fragile peace between the government and Islamic militants was shattered. Since then violence has frequently erupted, notably in early 2005, when fighting on the southern island of Jolo left 90 dead and caused 12,000 people to flee. On 14 Feb. 2005 three bombs were detonated killing nine and injuring 130. In Feb. 2006 President Arroyo declared a week-long state of emergency after the military declared it had discovered a coup plot.

## TERRITORY AND POPULATION

The Philippines is situated between 21° 25' and 4° 23' N. lat. and between 116° and 127° E. long. It is composed of 7,100 islands and islets, 3,144 of which are named. Approximate land area, 300,076 sq. km (115,859 sq. miles). The largest islands (in sq. km) are Luzon (104,688), Mindanao (94,630), Samar (13,080), Negros (12,710), Palawan (11,785), Panay (11,515), Mindoro (9,735), Leyte (7,214), Cebu (4,422), Bohol (3,865) and Masbate (3,269). The census population in May 2010 was 92,337,852; density, 307.7 per sq. km. In 2011, 49.1% of the population lived in urban areas.

The UN gives a projected population for 2015 of 101.42m.

## CLIMATE

Some areas have an equatorial climate while others experience tropical monsoon conditions, with a wet season extending from June to Nov. Mean temperatures are high all year, with very little variation. Manila, Jan. 77°F (25°C), July 82°F (27.8°C). Annual rainfall 83.3" (2,115.9 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was ratified by referendum in Feb. 1987 with the approval of 78.5% of voters. The head of state is the *President*, directly elected for a non-renewable six-year term.

Congress consists of a 24-member upper house, the *Senate* (elected for a six-year term from 'at large' seats covering the country as a whole, half of them renewed every three years), and a *House of Representatives* of 287 members. In the *House of Representatives* 230 members are directly elected for a three-year term and the rest are chosen from party and minority-group lists.

A campaign led by the president at the time, Fidel Ramos, to amend the constitution to allow him to stand for a second term was voted down by the Senate by 23 to one in Dec. 1996.

## CURRENT LEADERS

### Benigno Aquino III

#### *Position*

President

#### *Introduction*

Benigno Simeon Cojuangco Aquino III was sworn in as president in June 2010 after a landslide victory at the election in May. He campaigned on a platform of tackling corruption and eradicating poverty.

#### *Early Life*

Aquino, popularly known as Noynoy, was born on 8 Feb. 1960 in Manila into the influential Aquino political family. His father, Benigno Simeon 'Ninoy' Aquino, Jr, was a prominent opposition leader who was assassinated by Ferdinand Marcos' regime. His mother, Corazón Aquino, led a non-violent people's revolution following her husband's death that brought about an end to the Marcos dictatorship and secured her the presidency. Benigno Aquino III graduated in economics from Ateneo de Manila University in 1981 before joining his family in exile in the USA. On his father's death in 1983, he returned to the Philippines.

From 1983–98 Aquino worked in business for companies including Nike, Intra-Strata Assurance Corp., Best Security Agency Corporation and Central Azucarera Tarlac, an organization owned by the Cojuangco clan. In 1989 in an attempted coup led by Gregorio Honasan against his mother's administration Aquino narrowly escaped assassination.

Joining the Liberal Party in 1998, he was elected to the House of Representatives to represent the 2nd District of Tarlac, a seat he held until 2007. He served as deputy speaker of the House from Nov. 2004–Feb. 2006, resigning when he joined other Liberal leaders in calling for the resignation of President Macapagal-Arroyo at the height of the 'Hello Garci' vote-rigging scandal. On 17 March 2006 Aquino was appointed vice chairman of the Liberal Party. Constitutionally unable to seek a fourth term in the House of Representatives, he won a Senate seat in the May 2007 elections.

After the death of his mother in Aug. 2009, there was a swell of public support for Aquino to stand for the presidency. Announcing his candidacy on 9 Sept. 2009 his subsequent campaign used the colour yellow to evoke his mother's 'people power' movement. The front runner leading up to the election, Aquino won with 42% of the vote.

#### *Career in Office*

On assuming office, Aquino announced the creation of an independent commission to investigate the alleged corruption of the Arroyo administration (which led to the former president's arrest in Oct. 2012) and appointed a new justice secretary, Leila de Lima, the former head of the commission on human rights. In education, he pushed for the extension of the basic education system from a ten-year programme to 12 years. He also came out in support of a controversial family planning bill which, despite strong opposition from the Catholic Church, was eventually approved by parliament in Dec. 2012. Critics have nevertheless questioned Aquino's ability to introduce reforms that act against the interests of the Philippines' powerful clans, of which he himself is a member.

In Oct. 2012 Aquino signed a framework agreement on peace and autonomy between the government and the Moro Islamic Liberation Front, the Muslim separatist movement operating in the Mindanao region, with the aim of ending years of armed conflict.

At the international level, there were territorial tensions with China in mid-2012 over a disputed area of the South China Sea around the Scarborough Shoal.

## DEFENCE

An extension of the 1947 agreement granting the USA the use of several Army, Navy and Air Force bases was rejected by the Senate in Sept. 1991. An agreement of Dec. 1994 authorizes US naval vessels to be repaired in Philippine ports. The Philippines is a signatory of the South-East Asia Collective Defence Treaty.

Defence expenditure in 2008 totalled US\$1,427m. (US\$15 per capita), representing 0.9% of GDP.

#### **Army**

The Army is organized into five area joint-service commands.

Strength (2007) 66,000, with reserves totalling 100,000. The paramilitary Philippines National Police numbered 40,500 in 2007 with 40,000 reservists.

#### **Navy**

The Navy consists principally of ex-US ships completed in 1944 and 1945, and serviceability and spares are a problem. The modernization programme in progress has been revised and delayed, but the first 30 inshore patrol craft of US and Korean design have been delivered. The present fleet includes one ex-US frigate.

Navy personnel in 2007 was estimated at 24,000 including 7,500 marines.

#### **Air Force**

The Air Force had an estimated strength of 16,000 in 2007, with 30 combat-capable aircraft. There was one fighter squadron of Agusta S-211s.

## ECONOMY

Agriculture accounted for 14.2% of GDP in 2006, industry 31.6% and services 54.2%.

#### **Overview**

Market-oriented reforms have been implemented over the last two decades. Foreign investment and trade barriers have been dismantled and many industries deregulated. Most state industrial assets were privatized between 1992 and 1995 and monopolies were ended in the telecommunications, oil, civil aviation, shipping, water and power industries.

In 2004 President Arroyo was re-elected to office on a platform of public debt reduction, pledging to address low government revenues (14.5% of GDP in 2004). Chronic public deficits have been reduced, while tax collection has become more aggressive and VAT reform was implemented in early 2006.

Recent growth has been robust, averaging around 5% per year, and the economy has held strong against a number of external shocks. Despite growth plunging as a result of the global economic crisis, the economy avoided a technical recession in 2009, with a combination of remittances and fiscal stimuli supporting growth. 2010 saw a continuation of the recovery with broad-based growth across private consumption, investment and exports, despite the impact of the El Niño drought during the first half of the year. The call centre industry brought in nearly US\$10bn. in 2010. There are now more call centre employees in the Philippines than in India. The handover of power following elections in May 2010 was smooth, while in Nov. 2010 Standard & Poor's upgraded the Philippines' credit rating to BB in recognition of its stronger financial position.

However, robust growth has not translated into poverty reduction, with just over a quarter of the population living below the poverty line.

### Currency

The unit of currency is the *peso* (PHP) of 100 *centavos*. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 2.7% | 2.3% | 4.8% | 6.6% | 5.5% | 2.9% | 8.2% | 4.2% | 3.8% | 4.7% |

Foreign exchange reserves were US\$35,493m. in Aug. 2009 and gold reserves 5.08m. troy oz. Total money supply in Feb. 2008 was 836,709m. pesos.

### Budget

Budgetary central government revenue and expenditure (in 1bn. pesos):

|             | 2008    | 2009    | 2010    |
|-------------|---------|---------|---------|
| Revenue     | 1,172.8 | 1,123.1 | 1,208.0 |
| Expenditure | 1,265.6 | 1,425.3 | 1,519.6 |

Taxes accounted for 90.5% of revenues in 2010; compensation of employees accounted for 30.9% of expenditures, use of goods and services 26.7% and interest 19.9%.

VAT was introduced in 1988. The standard rate was raised from 10.0% to 12.0% in 2006.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 3.6% | 5.0% | 6.7% | 4.8% | 5.2% | 6.6% | 4.2% | 1.1% | 7.6% | 3.9% |

The 2010 growth rate was the highest since democracy was restored to the Philippines in 1986 following the Marcos era. Total GDP in 2011 was US\$224.8bn.

### Banking and Finance

The Central Bank (*Governor*, Amando Tetangco, Jr) issues the currency, manages foreign exchange reserves and supervises the banking system. At 30 June 2003 there were 42 commercial banks (24 regular commercial banks and 18 universal banks), 93 thrift banks and 771 rural and co-operative banks. In June 2003 the total number of banking institutions was 6,414, with total assets of 3,529,128m. pesos.

External debt amounted to US\$72,337m. in 2010, up from US\$58,304m. in 2000—this was equivalent to 36.2% of GNI (compared to 72.0% in 2000).

Foreign direct investment was US\$1,262m. in 2011, down from a record US\$2,921m. in 2006.

The financial crisis that struck southeast Asia in 1997 led to the floating of the peso in July of that year. It subsequently lost 36% of its value against the dollar.

There is a stock exchange in Manila.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.8 tonnes per capita.

### Electricity

Total installed capacity was 16.0m. kW in 2007. Production was 59.65bn. kWh in 2007 (40.79bn. kWh thermal and 8.58bn. kWh hydro-electric). Consumption per capita was 672 kWh in 2007.

### Oil and Gas

The largest natural gas field is the Camago-Malampaya gas field, discovered off the island of Palawan in 1992, with reserves initially put at 76bn. cu. metres but now increased to 85bn. cu. metres. The Philippines' total natural gas reserves in 2007 were 99bn. cu. metres.

Crude petroleum reserves were 139m. bbls in 2007.

### Water

Total freshwater withdrawal in 2006 was 78.9bn. cu. metres, equivalent to 843 cu. metres per capita. Breakdown of water use in 2006: agricultural, 83%; industrial, 9%; domestic, 7%.

### Minerals

Mineral production in 2003, unless otherwise indicated (in tonnes): coal (2004), 2,482,000; salt, 429,160; silica sand, 372,200; copper, 80,920; chromite refractory ore (chromium content), 13,220; nickel bearing ore (2002), 26,532 (nickel content); gold, 37,840 kg; silver, 9,530 kg. Other minerals include rock asphalt, sand and gravel. Total value of mineral production, 2003, 139,597m. pesos.

### Agriculture

Agriculture is a mainstay of the economy, contributing up to 30% of national output. In 2001 there were 5.65m. ha. of arable land and 5.0m. ha. of permanent crops. In 2001, 37.4% of the working population was employed in agriculture. In 2002 agricultural production grew by 2.6% (7.4% in 2001).

Output (in 1,000 tonnes) in 2002: sugarcane, 21,417; coconuts, 13,683; rice, 13,271; bananas, 5,275; maize, 4,319; copra, 2,010; pineapples, 1,639; cassava, 1,626. The Philippines is the second largest producer of both coconuts and pineapples. Minor crops are fruits, nuts, vegetables, coffee, cacao, peanuts, ramie, rubber, maguey, kapok, abaca and tobacco.

Livestock, 2003: pigs, 12.36m.; goats, 3.27m.; buffaloes, 3.18m.; cattle, 2.56m.; chickens, 128.51m.; ducks, 9.81m.

### Forestry

Forests covered 7.67m. ha. (26% of the land area) in 2010, up from 6.57m. ha. in 1990 and 7.12m. ha. in 2000. Of the total area under forests 11% was primary forest in 2010, 84% other naturally regenerated forest and 5% planted forest. Timber production was 15.79m. cu. metres in 2007.

### Fisheries

The catch in 2010 was 2,611,720 tonnes (2,426,314 tonnes from marine waters). Imports of fishery commodities were valued at US\$147m. in 2008 and exports at US\$645m.

## INDUSTRY

The leading companies by market capitalization in the Philippines in March 2012 were: Philippine Long Distance Telephone (US\$13.6bn.); San Miguel Brewery (US\$10.8bn.); and SM Investments, a shopping mall developer and operator (US\$9.4bn.).

Leading sectors are foodstuffs, oil refining and chemicals. Production, 2002 (in 1,000 tonnes): cement, 11,396; residual fuel oil, 3,537; distillate fuel oil, 3,004; sugar, 1,988; petrol, 1,501; paper and paperboard, 1,056; plywood, 409,000 cu. metres.

### Labour

In 2003 the total workforce was 34,635,000, of whom 30,418,000 were employed (19,263,000 in non-agricultural work). Employees by sector, 2003: 14.4m. in services; 11.2m. in agriculture, hunting,

forestry and fisheries; 4.9m. in industry. 3.9m. persons were registered unemployed in 2004. 868,000 persons worked overseas in 2003 (652,000 land-based).

The unemployment rate in Oct. 2001 was 9.8%.

## INTERNATIONAL TRADE

A law of June 1991 gave foreign nationals the right to full ownership of export and other firms considered strategic for the economy.

### Imports and Exports

Imports (c.i.f.) in 2007 totalled US\$57,995.7m. (US\$54,078.0m. in 2006) and exports (f.o.b.) US\$50,465.7m. (US\$47,410.1m. in 2006).

Main imports: electronics and components, mineral fuels, lubricants and related materials, industrial machinery and equipment, telecommunications equipment and transport equipment. Principal exports: electronics, garments, machinery, transport equipment and apparatus, and processed foods. In 2001 electronics exports were worth US\$21.4bn. and constituted 67% of all exports although this had shrunk to US\$16.3bn. and 32% by 2007. In 1992 they had been worth just US\$3bn.

Main sources of imports in 2007: USA, 14.0%; Japan, 12.4%; Singapore, 11.1%; China, 7.3%. Main export markets, 2007: USA, 17.0%; Japan, 14.5%; Hong Kong, 11.5%; China, 11.4%.

## COMMUNICATIONS

### Roads

In 2003 roads totalled 200,037 km; of these, 28,266 km were national roads and 49,782 km were regional roads. In 2007 there were 937,600 passenger cars in use, 55,200 buses and coaches, 1,875,300 vans and lorries, and 2,647,500 motorcycles and mopeds. There were 6,240 road accidents involving injury in 2006 with 961 fatalities.

### Rail

In 2005 the National Railways totalled 419 km (1,067 mm gauge). In 2004 passenger-km totalled 83m. There is a light metro railway in Manila.

### Civil Aviation

There are international airports at Manila (Ninoy Aquino) and Cebu (Mactan International). In Sept. 1998 the Asian economic crisis that had started more than a year earlier forced the closure of the national carrier, Philippine Airlines, after it had suffered huge losses. However, it has since resumed its operations both internally and externally. In 2005 scheduled airline traffic of Philippine-based carriers flew 28.4m. km, carrying 6,610,400 passengers. In 2001 Manila handled 12,545,000 passengers (7,144,000 on international flights) and 356,700 tonnes of freight.

### Shipping

The main ports are Cagayan de Oro, Cebu, Davao, Iloilo, Manila and Zamboanga. Manila, the leading port, handled 45,230,000 tonnes of cargo in 2008. In Jan. 2009 there were 838 ships of 300 GT or over registered, totalling 4,771,000 GT. Of the 838 vessels registered, 415 were general cargo ships, 168 passenger ships, 128 oil tankers, 83 bulk carriers, 21 chemical tankers, 15 liquid gas tankers and eight container ships.

### Telecommunications

In 2008 there were 4,076,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 68,117,000 (753.9 per 1,000 persons). There were 5.6m. internet users in 2008. In March 2012 there were 27.7m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

There is a Supreme Court which is composed of a chief justice and 14 associate justices; it can declare a law or treaty

unconstitutional by the concurrent votes of the majority sitting. There is a Court of Appeals, which consists of a presiding justice and 50 associate justices. There are 15 regional trial courts, one for each judicial region, with a presiding regional trial judge in each of its 720 branches. Municipal trial courts and municipal circuit trial courts are found in the municipalities of the Philippines. If the court covers one municipality it is a municipal trial court; if it covers two or more municipalities it is a municipal circuit trial court. In Metropolitan Manila the equivalents are metropolitan trial courts, and in the cities outside Metropolitan Manila the courts are known as municipal trial courts in cities.

The Supreme Court may designate certain branches of the regional trial courts to handle exclusively criminal cases, juvenile and domestic relations cases, agrarian cases, urban land reform cases which do not fall under the jurisdiction of quasijudicial bodies and agencies and/or such other special cases as the Supreme Court may determine. The death penalty, abolished in 1987, was officially restored in Dec. 1993 as punishment for 'heinous crimes'. In Feb. 1999 a rapist was executed, the first incident of capital punishment in the Philippines since 1976. The death penalty was abolished again for all crimes in 2006.

In Oct. 2011 there were 140,000 police officers. Local police forces are supplemented by the Philippine Constabulary, which is part of the armed forces.

In 2009 the prison population was 102,267 (111 per 100,000 of national population).

### Constabulary

Since 1990 public order has been maintained completely by the Philippine National Police. Qualified Philippine Constabulary personnel were absorbed by the PNP or were transferred to branches or services of the Armed Forces of the Philippines.

### Education

Public elementary education is free and schools are established in virtually all parts of the country. The majority of secondary and post-secondary schools are private. Formal education consists of an optional one to two years of pre-school education; six years of elementary education; four years of secondary education; and four to five years of tertiary or college education leading to academic degrees. Three-year post-secondary non-degree technical/vocational education is also considered formal education. In 2007 there were 961,397 children in pre-school institutions with (2006) 27,742 teaching staff; 13,145,210 pupils in primary schools with 390,432 teaching staff; and 6,365,985 pupils in secondary schools with 181,193 teaching staff. In 2005 there were 2,402,649 students in tertiary education with 112,941 academic staff.

Non-formal education consists of adult literacy classes, agricultural and farming training programmes, occupation skills training, youth clubs, and community programmes of instructions in health, nutrition, family planning and co-operatives.

In 2004–05 there were 176 public higher education institutions including 111 state and 50 local universities and colleges, and 1,443 private higher education institutions including 340 religious institutions. The adult literacy rate in 2008 was 94%.

Public expenditure on education in 2005 came to 2.3% of GNI and was equivalent to 15.2% of total government spending.

### Health

In 2003 there were 1,723 hospitals (1,061 private) with 85,040 beds (1.1 beds per 1,000 inhabitants). In 2002 there were 91,408 physicians, 44,129 dentists, 347,349 nurses, 140,675 midwives and 47,463 pharmacists.

### Welfare

The Social Security System (SSS) is a contributory scheme for employees. Disbursements in 2001 (in 1m. pesos): social security, 37,813 (1,775,996 recipients); employees' compensation, 1,201 (90,356 recipients).

**RELIGION**

82% of the population are Roman Catholics, 5% Protestants, 5% Muslims and 7% Buddhists or other religions. There were 181,500 Latter-day Saints (Mormons) in 2000.

The Roman Catholic Church has three cardinals, 23 archbishoprics, 91 bishoprics, 79 dioceses, 2,328 parishes and some 20,873 chapels or missions.

**CULTURE****World Heritage Sites**

The Philippines has five sites on the UNESCO World Heritage List: Tubbataha Reefs Natural Park (inscribed on the list in 1993 and 2009); the Baroque Churches of the Philippines (1993); the Rice Terraces of the Philippine Cordilleras (1995); the Historic Town of Vigan (1999); and Puerto-Princesa Subterranean River National Park (1999).

**Press**

There were 28 daily newspapers in 2008, with a combined circulation of 3,870,000. The leading daily is *Remate*, with an average daily circulation of 620,000 in 2008.

**Tourism**

In 2007, 3,092,000 foreign tourists brought revenue of US\$5,518m.

## KEY HISTORICAL EVENTS

In the 7th and 8th centuries Slavic peoples first settled on the forest covered plains between the Odra and Vistula rivers. Poland takes its name from the Polanie ('plain dwellers'), whose ruler Mieszko I, first in line of the Piast dynasty, founded the Polish state in 966. Christianity came via Bohemia and Moravia to the Kraków region, and in 991 Mieszko I placed Poland under the Holy Roman See. His son and heir, Bolesław I the Brave (ruled 992–1025) continued his father's territorial expansionism until Poland's boundaries were much as they are today. He established an independent Polish Catholic Church in the year 1000 and was officially crowned the first king of Poland in 1024 with the support of Holy Roman Emperor Otto III. The growing power of the church stimulated economic activity ranging from the manufacture of parchment and glass to building and painting.

In the twelfth century, under the rule of Bolesław III, German infiltration and internecine struggles led to Bolesław's 1138 Testament which divided the kingdom between his three sons. Around this time, many Jewish immigrants from Western Europe were attracted by the offer of asylum. The General Charter of

Jewish Liberties was published in 1264 by Bolesław V, the Duke of Kraków.

A series of Mongol invasions in 1241–42 laid waste much of Poland, and in 1308 the crusades of the Teutonic Knights captured Gdańsk, cutting off Poland's access to the sea. In 1320 Władysław I Łokietek (the Short) of Kraków reunited the majority of the Polish lands that had been divided in 1138 and was crowned king of a united Poland. His son Casimir III the Great (Kasimierz, ruled 1333–70) continued this work, and his reign brought prosperity and administrative efficiency. He negotiated a truce with the Teutonic Knights and fostered closer diplomatic relations with the neighbouring kingdoms of Bohemia and Hungary.

Casimir III was the last monarch in the Piast line, and when he died his nephew Louis of Anjou, simultaneously King Lajos I of Hungary, donned the Polish crown. His death led to a disjointed succession. After a brief civil war his eleven-year-old daughter Jadwiga married Jagiełło, the pagan Grand Duke of Lithuania, who converted to Catholicism. Their marital union in 1386 signalled the beginning of the Jagiełlonian dynasty which ruled over Lithuania and Poland, at the time the largest state in Europe. The Jagiełlonian period to 1572 is regarded as an economic and cultural 'golden age'. This joint, multi-ethnic power managed to quell opposition on its eastern and western fronts. Poland-Lithuania crushed the Tatars and in 1410 defeated an army of 27,000 Teutonic Knights at the Battle of Tannenberg. In 1454 the Polish-Teutonic war broke out. King Casimir IV (1427–92) led a successful campaign, taking control of Western Prussia. At the Peace of Toruń in 1466 Gdańsk was returned to the Polish crown. The city, granted autonomy in exchange for its efforts in the war, thrived on shipping trade with the Netherlands, Spain and England among others while the population outgrew that of Warsaw.

The link between Poland and Lithuania was further strengthened by the Union of Lublin in 1569, which was primarily signed to protect both parties from expansionist threats on the Eastern front from Russia's Tsar Ivan IV (the Terrible). Warsaw became the capital of the two kingdoms which were henceforth known as the Commonwealth of Poland-Lithuania.

The last Jagiełlonian, Zygmunt II, died in 1572, after which the nobility introduced an elective monarchy with powers limited by the Acta Henriciana, so called because the first elected king to whom it applied was Henri III de Valois. He was obliged to swear his allegiance to maintaining the elective monarchy, which consulted the nobles on tax and warfare, respected religious tolerance and held a bi-annual meeting of the Sejm, the bicameral assembly dating from 1493. In contrast to many other countries in Europe, the Commonwealth was sufficiently broadminded on religious issues to abide by the Statute of Toleration (1573), although Catholicism was still the official religion.

## Polish Wars

During this period, many foreign leaders were elected, partly to neutralize external interests. In 1573 Catherine de Médicis of France organized the election of her third son, Henry, duke of Anjou, to the Polish crown. When he returned to France as king on his brother's death, he was succeeded by a Transylvanian, Prince István Bathory. He increased Poland-Lithuania's military strength—a necessity given Ivan the Terrible's bellicose claims. In campaigns throughout 1578–81 the latter was beaten with a huge loss of Russian lives, and the territories he had encroached upon were restored.

1587 marked the beginning of Vasa rule, with Swedish-born Sigismund III taking the throne. But his succession led to

territorial claims from his native land. Disapproving of Sigismund's Catholic persuasion, Calvinist Sweden occupied Livonia and Pomerania. In alliance with Russia, King Karl X of Sweden mounted a full invasion of Poland-Lithuania, devastating Warsaw and Kraków. During the ensuing Polish-Swedish war of 1655-60, support for Poland-Lithuania came from the Netherlands and Denmark. The Poles fought back against the invaders, winning a major battle at Częstochowa, but were eventually defeated. King Jan Kazimierz (John Casimir), the last in line of the Vasa dynasty, abdicated in 1668.

Hopes of salvation for the Commonwealth came with Jan III Sobieski's election to the throne in 1674. He fought off the Ottomans who were advancing onto Polish territory. But further invasions and wars weakened Poland. The Great Northern War of 1700-21 had Poland as the battleground for fierce fighting between Russia, Denmark-Norway and Saxony-Poland (also Prussia from 1715) on one side against Sweden on the other. Each of the warring factions occupied parts of Poland, which was also subject to internecine fighting. Russia played the dominant role in Polish affairs until Frederick II, king of an increasingly powerful Prussia, proposed the division of Poland between Russia, Prussia and Austria. The outcome was the first Partition of Poland, in 1772. Austria was awarded the Kingdom of Galicia-Lodomeria, with 2.5m. inhabitants. Russia took over an area with a population of over 1m. Prussia contented itself with 0.5m. new citizens, and the long-desired connection between Western Pomerania and East Prussia.

In 1791 Stanisław II, the last king of the remaining Poland-Lithuania, introduced a constitution which amounted to a bid for independence. The three surrounding superpowers nonetheless engaged in a second partition in 1793. A peasant uprising against Russian rule, led by Tadeusz Kościuszko, was crushed, along with Poland itself which lost control of all its territory to Austria, Prussia and Russia in the third partition (1795).

The territory remained a battleground, particularly during the Napoleonic wars. Napoleon established the Grand Duchy of Warsaw in 1807, which had a French-style constitution, but came under Saxon, and later Russian, administration. Polish legions, which fought on the French side against Prussia, incurred heavy losses. In 1815, when the victorious Allies redistributed the territory Napoleon had won, the 'Congress' Kingdom of Poland reappeared, this time under Russian rule, with the Tsar as its hereditary king.

Thereafter the Poles suffered by their colonizers' attempts to assimilate their culture. A series of uprisings against the Russians took place throughout the century. In the November Revolution of 1830 inexperienced military cadets were suppressed by Tsar Nicholas, who led a campaign of bloody reprisals. Around 8,000 Poles emigrated after this defeat—many of them intellectuals, and most headed for France. During the peasants' revolt in Galicia in 1846 up to 2,000 nobles were murdered and their land ravaged. There was a strong insurgent movement among the peasants, but in 1848 they failed once more to topple their oppressors, this time the Prussians.

The January Uprising against the Russians which began in 1863-64 and ended in the spring of 1865 again led to defeat. Wide-scale Russification followed, though the abolition of serfdom marked a significant concession. As part of Bismarck's 'Kulturkampf'—the Germanization of the Prussian zones—German was introduced as the official language and Polish began to be taught in schools as a foreign language. Anti-Semitism became rife, and pogroms were not unusual. Many Jewish and Gentile Poles fled.

The Habsburg-dominated part of Poland, Galicia, was more tolerant of Polish nationalism which centred on Kraków. At one point the Austrian prime minister, finance minister and foreign minister were all Polish. Newly-formed parties began to gain ground, with the National Democrats under Roman Dmowski

campaigning for autonomy and Józef Piłsudski's Socialists engaging in an underground struggle for independence. Piłsudski led an anti-Russian uprising in 1905, and was to take up arms against Russia in the First World War when Poland's territory again bore the brunt of much of the fighting between its three partitioners.

In 1917 a Polish National Committee, formed by Roman Dmowski in Paris, was recognized by the Allies. One of its members and US representative was the pianist Ignacy Jan Paderewski, who urged the Americans to support the cause for Polish independence. President Woodrow Wilson's 'Fourteen Points' for peace addressed the Polish issue, guaranteeing independence and access to the sea under point thirteen. A Polish army was formed in France in 1918. In Poland, Piłsudski set up the Polish legions and a rival government. Poland regained its independence under Piłsudski's leadership on 11 Nov. 1918.

But while the Paris Peace Conference recognized the republic, the question of its borders was highly contentious. Poland challenged Lithuania over Vilnius, the city changing hands more than once before the Second World War. Fighting also took place against Ukraine over the issue of Galicia. A war with Russia followed over the next two years, which Poland narrowly managed to win before signing the Soviet-Polish Peace Treaty in Riga in 1921. The Treaty established the borders between Russia, Ukraine and Belarus, the last two being swallowed up by the USSR the following year. Gdańsk was awarded the status of a free city, and the Polish Corridor was formed between German West and East Prussia and the rest of Germany.

Between the wars there were 16 palatinates, all centrally governed from Warsaw. The new republic was first headed by President Narutowicz, the representative of the left and centre parties, who served for only days before being assassinated by a right-wing fanatic, and replaced in 1922 by Stanisław Wojciechowski. A series of intra-party disputes and factionalisms led the way for Józef Piłsudski to mount a coup in May 1926, seizing the power he maintained under a dictatorship until his death in 1935.

### *Second World War*

In foreign affairs Poland managed to maintain a balance between its two most intimidating neighbours, Germany and the USSR, signing a non-aggression pact with Germany in 1934. However, the Molotov-Ribbentrop non-aggression pact of Aug. 1939 secretly agreed to partition Poland between Germany and the Soviet Union in the event of war. British and French guarantees of Polish independence that had been agreed in April of the same year obliged them to declare war on Nazi Germany two days after Hitler's troops marched into Poland on 1 Sept. 1939.

The response of Britain and France signalled the start of the Second World War. The German army invaded Poland along the entire front from the Baltic Sea to Slovakia, annexing over half of the country within three weeks. Stalin's troops marched into Poland from the Eastern Front on 17 Sept., leaving the country occupied for most of the duration of the war. The Nazis undertook a policy of liquidation—not only of Jews and ethnic 'undesirables' but also of the intelligentsia, so as to avoid any possibility of a Polish leadership class. Many Polish children seen as racially pure were taken away from their parents to be brought up as Germans, while others were deported. A total of over 6m. Polish nationals, or 17% of the population, were killed in the war, half of them Jewish. Not all of the murders were attributable to the Nazis, however. In 1989 Soviet authorities finally admitted to having murdered 15,000 Polish officers who went missing in May 1940. The Soviet secret service had been equally keen to obliterate potential opposition leaders.

Polish forces regrouped on Allied soil under a government-in-exile headed by Gen. Władysław Sikorski, first in Paris and then, after 1940, in London. In Poland an underground national army, the AK, was formed under Gen. Komorowski to fight against the

occupiers and to organize resistance. After Germany's invasion of the USSR in 1941, Poland was occupied solely by Nazi forces. Many of the largest concentration camps were built on Polish soil, including Auschwitz near Kraków.

In 1943 the exiled prime minister Gen. Sikorski was killed in a plane crash. He was replaced by Stanisław Mikołajczyk of the Polish Peasants' Party. The same year saw a Jewish uprising in the Warsaw ghetto, and in 1944 there was a second rebellion against the Nazi occupation which lasted for two months. The Red Army was on the threshold of Warsaw throughout the two month revolt, but did not intervene. 150,000 civilians and 18,000 members of the AK lost their lives with virtually the whole of the remaining urban population deported and 85% of the city destroyed. By the time of Warsaw's liberation in Jan. 1945, the Jewish population numbered 200. The decimated underground movement was forced to seek assistance from Moscow, and after a number of compromises the Soviets recognized the Polish Committee of National Liberation, or the 'Lublin Committee', which proclaimed itself the sole legal government when Lublin was liberated in July 1944.

Poland's post-war fate was decided by the Allies at the Yalta and Potsdam conferences. At Yalta, Stalin agreed that the Lublin government should be extended to include non-Communists from the exile government, a promise that he failed to keep. Stanisław Mikołajczyk and three other members joined the provisional cabinet in July 1945. Nonetheless, many Polish politicians left the country. The Potsdam conference set Poland's Western border along the Oder-Neisse line, with all former German territories east of these rivers handed to Poland. As a result, Poles and Germans had to be resettled.

The first post-war elections were held in Jan. 1947. The Stalinist Polish Workers' Party (PPR) managed to crush both official and underground opposition. A Communist-dominated coalition under the leadership of Władysław Gomułka, the 'Democratic Bloc', won over three-quarters of the votes. Bolesław Bierut, leader of the USSR-backed Polish Communist Party, was named president. Defeated, Stanisław Mikołajczyk fled the country. An independently minded politician, Gomułka entered into conflict with Stalin by opposing agricultural collectivization and by speaking out against the formation of Cominform (Communist Information Bureau) in 1947. As a result he was removed as Secretary General of the PPR in Sept. 1948. Expelled from the party in late 1949, he was put under house arrest in July 1951. In 1948 the Polish United Workers' Party (PZPR) was formed, with Bierut as first party secretary. The nationalization of industry, land expropriation and the restructuring of the economy to favour heavy industry, including arms production, were accompanied in 1952 by a Soviet-style constitution and the renaming of the country as the People's Republic of Poland. This 'Stalinization' also included political and religious suppression and persecution, which targeted the Catholic church in particular.

### *Post-War Reform*

In 1955 Poland joined other Eastern bloc countries in signing the Warsaw Pact military treaty. Meanwhile, the planned economy was failing, leading to widespread public unrest as food prices spiralled. Workers' strikes and riots in Poznań in 1956 were brutally suppressed by the authorities resulting in the death of 53 people. At this time Gomułka, the opponent of Stalinism, gained popularity. Readmitted to the party in 1956, Gomułka was reinstated as first secretary of the Party.

He attempted to introduce reforms, winning public support for his pledges of a 'Polish way' to socialism. Gomułka cut the power of the secret police, halted agricultural collectivization and brought an end to attacks on the Catholic Church. However, the suppression of freedom of expression continued and the economy did not improve. Gomułka's popular appeal began to falter. Student riots sprang up throughout the 1960s. In the 'March events' of 1968, the campaign for intellectual freedom led to

widespread student riots and a reactive Party campaign against intellectuals and Jews, many of whom were forced to flee abroad.

Unrest and dissatisfaction with the party remained. Increased food prices in Dec. 1970 resulted in riots and strikes in the shipyards of Gdańsk, Szczecin and Gdynia. These were met with armed opposition, the authorities firing into the masses and killing several demonstrators. Gomułka and other leaders subsequently resigned, although Gomułka at least had the satisfaction of procuring West Germany's recognition of the Oder-Neisse line as the official Western border of Poland in Dec. 1970.

### *Solidarity*

Edward Gierek succeeded Gomułka as first secretary, and in the following years launched a reform programme which was chiefly financed by loans from Western banks. He was hoping for a Polish economic miracle, but lacked the will to push through the necessary reforms. Short term rewards were not enough to overcome the problems of a failing infrastructure, economic mismanagement of successive governments and a faltering world economy following the 1973-74 world oil crisis. Further demonstrations took place in several cities in 1976 to protest at more food price increases, and in Radom a Workers' Defence Committee was founded. While the government expressed disapproval, it did not act against the Committee.

In 1978 the election of Karol Wojtyła, Cardinal of Kraków, as Pope John Paul II boosted Poland's national self-esteem, celebrated in his trip to his native country the following year. Nonetheless, increased meat prices in July 1980 led to more waves of strikes, rippling out from the Ursus tractor plant near Warsaw across the country, and culminating in the Lenin shipyards in Gdańsk, where the Solidarity movement was born. The first independent trade union to be established in a communist country soon boasted a membership of 10m. Its leader, Lech Wałęsa, a shipyard electrician, set up a strike committee, the first of a succession across the country, and drew up a 21-point accord, demanding the right to strike and to form independent trade unions, the abolition of censorship, freedom of expression, the release of political prisoners and access to the media. Soviet and Polish communist efforts to curb Solidarity's popularity failed and the group was officially recognized after some government resistance.

The social unrest, coupled with failing health, led to Gierek's resignation in Sept. 1980. In Feb. 1981 Gen. Wojciech Jaruzelski, the defence minister, became prime minister. This brought the military into the political front line and in Dec. 1981 Jaruzelski imposed martial law. A Military Council of National Salvation was established and Solidarity was proscribed. Wałęsa was among the thousands of members who were arrested and imprisoned. Demonstrations and strikes provoked the government into even stricter controls with the banning of all independent trade unions, although martial law was dropped a year later.

New hope was given to Poland in 1983, by the Pope's second visit, and by the award of the Nobel Peace Prize to Lech Wałęsa. Economic difficulties continued throughout the 1980s, and when the government proposed unpopular economic reforms in 1987, support for Solidarity led to nationwide strikes during 1988. Jaruzelski was forced to embark on negotiations with Wałęsa and the Catholic Church. Agreement was reached in April 1989 and Solidarity was given legal status and freedom to fight the upcoming elections, whilst the previously ceremonial post of Presidency was vested with new legislative powers. In return, Solidarity agreed to compete for only 35% of the seats in the Sejm.

At the July 1989 elections Solidarity won virtually all the seats they contested but because of the 35% rule Jaruzelski was voted in as president. However, Solidarity refused to join the communists in a grand coalition and Jaruzelski had to appoint Tadeusz Mazowiecki, an official of Solidarity, to be Poland's first non-communist premier in over 40 years. Jaruzelski subsequently resigned.

The first round of presidential elections in Nov. 1990 pitted Lech Wałęsa against Tadeusz Mazowiecki. Wałęsa won 43% of the votes in the first round and 74% in the second round in Dec., when he was inaugurated. Mazowiecki resigned his premiership and was replaced by Jan Bielcki, whose government held office until Aug. 1991. Genuinely free parliamentary elections did not take place until Oct. 1991, when there was a surprisingly low electoral turnout. In the absence of a clear-cut winner, several parties combined to form a centre-right coalition headed by Jan Olszewski. Owing to disputes both within the party and with President Wałęsa, however, the government lasted only seven months. This factionalism and inability to make compromises was typical of Poland's early post-Communist years. The government formed under Hanna Suchocka, Poland's first female prime minister, fared no better.

As in other post-Communist states, the economic measures necessary for the transition to a profitable market economy were highly unpopular with the electorate, not least when industrial modernization led to unemployment. In 1990 the finance minister, Leszek Balcerowicz, had introduced a range of tight austerity measures, including price rises and currency devaluation in an attempt to stabilize the economy before opening it to market forces. The Polish economy prospered but Wałęsa's popular appeal diminished as his tenure progressed. His skills as Solidarity's leader revolved around his ability to speak for the common people, but in government his tone was often regarded as aggressive and his style of leadership autocratic. Solidarity's loyalties as a trade union were often incompatible with its responsibilities as a political party. The elections of 1993 saw the return of the left under Waldemar Pawlak of the Polish Peasants' Party. After a series of intra-party quarrels and accusations of corruption, Pawlak's premiership ended in Feb. 1995.

Pawlak was replaced by the Communist Józef Oleksy of the Democratic Left Alliance. The left gained further political clout when Wałęsa was ousted in the presidential elections of 1995 by Aleksander Kwaśniewski. Redundancies in the Gdańsk shipyards in 1997 saw a renewed outbreak of nationwide strikes. Revising its political agenda, Solidarity forged a coalition of 25 centre-right parties to create Solidarity Electoral Action. This party emerged as the strongest in the 1997 general election when Jerzy Buzek, a member of Solidarity since its inception, became prime minister. A new constitution came into effect, reducing the powers of the president and committing the country to a social market economy.

Kwaśniewski's communist heritage caused concern among many Western leaders, but he confirmed his intention to press for EU and NATO membership. Market reforms and privatization continued apace. In 1999, at a joint ceremony with Czech president Vaclav Havel, Kwaśniewski signed Poland into NATO. The following year Kwaśniewski secured a second term and in 2001 Buzek was succeeded by Leszek Miller. A former communist turned social democrat, Miller's key aim was to prepare Poland for entry into the EU. Facing a deteriorating economy, he cut the national debt by increases in taxation and spending cuts. On 1 May 2004 Poland became a member of the EU.

Lech Kaczyński succeeded Kwaśniewski in 2005, with his twin brother Jarosław Kaczyński, serving as prime minister in 2006–07. President Kaczyński was killed in April 2010 when his plane crashed over Russia on its way to a war memorial service. The head of the national bank, the entire command of the armed services and several senior government figures, MPs, clergy and academics also perished in the accident.

## TERRITORY AND POPULATION

Poland is bounded in the north by the Baltic Sea and Russia, east by Lithuania, Belarus and Ukraine, south by the Czech Republic and Slovakia and west by Germany. Poland comprises an area of 312,685 sq. km (120,728 sq. miles).

At the census of 31 March 2011 the population was 38,511,824, giving a density of 123.2 per sq. km. In 2009, 61.0% of the population lived in urban areas.

The UN gives a projected population for 2015 of 38.36m.

The country is divided into 16 regions or voivodships (*województwo*), created from the previous 49 on 1 Jan. 1999 following administrative reform. Area (in sq. km) and census population (in 1,000) in 2011 (density per sq. km in brackets).

The population is 96.7% Polish. Minorities at the 2002 census included 173,153 Silesians, 152,987 Germans, 48,737 Belarusians and 30,957 Ukrainians. There are an estimated 300,000 people in Poland of Kashubian ethnicity (direct descendants of an early Slavic tribe of Pomeranians). They generally declare Polish nationality and consider themselves both Poles and Kashubians.

A movement for Silesian autonomy has attracted sufficient support to suggest that further moves towards decentralization may soon be considered. A Council of National Minorities was set up in March 1991. There is a large Polish diaspora, some 53% in the USA.

The official language is Polish.

## SOCIAL STATISTICS

2010 (in 1,000): births, 415.0; deaths, 378.5; marriages, 228.3; divorces, 61.3; infant deaths, 2.1. Rates (per 1,000 population): birth, 10.8; death, 9.9; marriage, 6.0; divorce, 1.6; infant mortality (per 1,000 live births), 5.0. A law prohibiting abortion was passed in 1993, but an amendment of Aug. 1996 permits it in cases of hardship or difficult personal situation. The most popular age range for marrying in 2010 was 25–29 for both males and females. Expectation of life at birth, 2007, was 71.3 years for males and 79.7 years for females. In 2010 there were 17,360 emigrants (including 6,818 to Germany) and 15,246 immigrants. 70% of Polish emigrants between 2000 and 2005 settled in Germany. Number of suicides, 2008, 5,681; the suicide rate per 100,000 population was 26.4 among males and 4.1 among females in 2008. Population growth rate, 2010, 0.1%; fertility rate, 2008, 1.3 births per woman (one of the lowest rates in the world).

## CLIMATE

Climate is continental, marked by long and severe winters. Rainfall amounts are moderate, with a marked summer maximum. Warsaw, Jan. 24°F (-4.3°C), July 64°F (17.9°C). Annual rainfall 18.3" (465 mm). Gdańsk, Jan. 29°F (-1.7°C), July 63°F (17.2°C). Annual rainfall 22.0" (559 mm). Kraków, Jan. 27°F (-2.8°C), July 67°F (19.4°C). Annual rainfall 28.7" (729 mm). Poznań, Jan. 26°F (-3.3°C), July 64°F (17.9°C). Annual rainfall 21.0" (534 mm). Szczecin, Jan. 27°F (-3.0°C), July 64°F (17.7°C). Annual rainfall 18.4" (467 mm). Wrocław, Jan. 24°F (-4.3°C), July 64°F (17.9°C). Annual rainfall 20.7" (525 mm).

## CONSTITUTION AND GOVERNMENT

The present Constitution was passed by national referendum on 25 May 1997 and became effective on 17 Oct. 1997. The head of state is the *President*, who is directly elected for a five-year term (renewable once). The President may appoint, but may not dismiss, cabinets.

The authority of the republic is vested in the *Sejm* (Parliament of 460 members), elected by proportional representation for four years by all citizens over 18. There is a 5% threshold for parties and 8% for coalitions, but seats are reserved for representatives of ethnic minorities even if their vote falls below 5%. 69 of the Sejm seats are awarded from the national lists of parties polling more than 7% of the vote. The Sejm elects a *Council of State* and a *Council of Ministers*. There is also an elected 100-member upper house, the *Senate*. The President and the Senate each has a power of veto which only a two-thirds majority of the Sejm can override. The President does not, however, have a veto over the annual budget. The *Prime Minister* is chosen by the President with the approval of the Sejm.

A *Political Council* consultative to the presidency consisting of representatives of all the major political tendencies was set up in Jan. 1991.

## RECENT ELECTIONS

Parliamentary elections were held on 9 Oct. 2011. The ruling Civic Platform (PO) won 207 of 460 seats with 39.2% of the votes, ahead of the Law and Justice Party (PiS), with 157 seats and 29.9%; the Palikot Movement won 40 seats with 10.0%; Polish Peasants' Party (PSL) won 28 with 8.4%; the Democratic Left Alliance won 27 with 8.2%; German Minority (MN) won one seat with 0.2%. In the Senate elections on the same day, the Civic Platform won 63 of 100 seats, the Law and Justice Party 31 and the Polish Peasants' Party 2; four seats went to independents. Turnout was 48.9%.

Presidential elections were held in two rounds on 20 June and 4 July 2010. In the first round ten candidates stood; turnout was 54.9%. Bronisław Komorowski of the PO gained 41.5% of votes cast, Jarosław Kaczyński of the PiS 36.5%, Grzegorz Napieralski of the Democratic Left Alliance 13.7% and Janusz Korwin-Mikke of the Liberty and Rule Party 2.5%. Other candidates obtained less than 2%. In the second round run-off Bronisław Komorowski was elected president with 53.0% of the vote against 47.0% for Jarosław Kaczyński.

### European Parliament

Poland has 51 (54 in 2004) representatives. At the June 2009 elections turnout was 24.5% (20.9% in 2004). The PO won 25 seats with 44.4% of votes cast (political affiliation in European Parliament: European People's Party); the PiS, 15 with 27.4% (European Conservatives and Reformists); the Democratic Left Alliance–Union of Labour, 7 with 12.3% (Progressive Alliance of Socialists and Democrats); the PSL, 3 with 7.0% (European People's Party).

## CURRENT GOVERNMENT

## CURRENT LEADERS

### Bronisław Komorowski

#### *Position*

President

#### *Introduction*

Bronisław Komorowski was elected president in June 2010, having served as acting president following the death of incumbent Lech Kaczyński in an air crash in April 2010. A member of the governing Civic Platform (PO) party, he supports pro-market economic reforms and favours a more active role in the European Union.

#### *Early Life*

Bronisław Komorowski was born on 4 June 1952 in Oborniki Śląskie to an aristocratic family whose lands were confiscated by the Communist government. In 1977 he graduated in history from the University of Warsaw, where he had become politically active. He completed his masters degree the same year and from 1977–80 was editor of a Catholic journal. From 1980–81 he worked at the centre for social research of the trade union Solidarność (Solidarity), campaigning for democracy and against the existing communist regime.

After being interned for four months in 1981 when Poland came under martial law, he spent the next eight years working as a teacher in Niepokalanów. Following the collapse of communism and the election of a Solidarity-led government in 1989, he was deputy minister for defence from 1990–93. At the 1991 general election he was elected as an MP for the Freedom Union party (UW), serving as its general secretary from 1993–95. In 1997 he co-founded a new party which allied itself with the Conservative People's Party to become part of the Solidarity Electoral Action (AWS) grouping.

Following the formation of an AWS–UW government in 1997, Komorowski was appointed head of the parliamentary national defence committee. As a member of Jerzy Buzek's government, he helped oversee Poland's entry into EU and NATO, and from 2000–01 served as defence minister. In 2001 Komorowski joined the new, reformist PO, led by Donald Tusk, and was elected to parliament at the 2001 general election, in which the AWS–UW lost power. Subsequently he served as deputy chairman of the parliamentary national defence committee and as a member of the parliamentary committee for foreign affairs.

In Oct. 2005 he was elected deputy speaker of the Sejm, becoming speaker in Nov. 2007. On 10 April 2010 President Lech Kaczyński died in an air crash. Under the constitution, Komorowski became acting president until presidential elections took place on 20 June 2010. Initially campaigning as a loyal

supporter of Prime Minister Tusk's programme of economic reforms and public spending cuts, he promised not to use the presidential veto to block progress in these areas. However, during a closely fought contest he moderated his stance, softening his line on the need for reform of farmers' pensions and abandoning plans to raise the retirement age. Voting went to two rounds and in the run-off on 4 July 2010 he narrowly defeated the late president's twin brother, Jarosław Kaczyński, with 53.0% of the vote.

#### *Career in Office*

Komorowski has sought to raise Poland's profile within the EU and to increase economic, defensive and diplomatic ties with key international partners, including the USA. However, in Aug. 2012 he accused US President Barack Obama of betraying Poland's national security over the 2009 cancellation of a controversial anti-ballistic missile system, and he called for Poland to build its own missile shield to ensure the country's defence.

### Donald Tusk

#### *Position*

Prime Minister

#### *Introduction*

Donald Tusk became prime minister on 9 Nov. 2007 following his party's resounding victory in parliamentary elections. The former Solidarity activist has taken a pro-business stance and has been keen to establish closer relations with EU neighbours. He began a second term following elections in Oct. 2011.

#### *Early Life*

Donald Franciszek Tusk was born on 22 April 1957 in Gdańsk. His family is part of the city's long-established minority Kashubian community. Following his secondary education he attended the University of Gdańsk where he studied history. A long-time critic of the communist administration, Tusk helped to establish the student committee of the Solidarity movement, which grew out of the nationwide industrial unrest centred on the Gdańsk shipyard during the summer of 1980. He subsequently co-founded the Independent Polish Students' Association (NZS). Following the authorities' crackdown on Solidarity in 1981, Tusk and other activists were forced into the shadows. He earned a living as a builder, an experience subsequently presented as evidence of his empathy with 'ordinary people'.

In the late 1980s Tusk left Solidarity to join the nascent liberal movement and in 1991 joined the Liberal Democratic Congress (KLD), which contested the first multi-party elections in Oct. 1991 on a free-market platform calling for privatization, freedom of movement and accession to the EU. Tusk took one of the KLD's 37 seats in the Sejm. Although he was re-elected as a deputy in the 1993 elections, the KLD fared poorly and in March 1994 merged with the Democratic Union to form a new centre-right party, Freedom Union (UW). The party secured 13.4% of the vote in the 1997 elections, becoming the junior partner in Jerzy Buzek's coalition government. Tusk was elected to the Senate, where from 1998–2001 he served as vice-speaker.

Having failed to win the chairmanship of the UW in 2000, Tusk resigned from the party. He joined Andrzej Olechowski (who had performed creditably in the 2000 presidential contest) and Maciej Płażyński in establishing the secular, liberal Civic Platform (PO) in early 2001, with Płażyński at the helm. The PO performed strongly in the 2001 elections, taking 65 seats in the Sejm and becoming the largest opposition party to Leszek Miller's government. In June 2003 Tusk became the PO's chairman. He was a vocal critic of the left-leaning SLD government, particularly its economic policies. His standing improved as the SLD became mired in corruption scandals but he failed in his 2005 bid for the presidency, losing to Lech Kaczyński of the socially conservative, nationalist Law and Justice Party. Later in 2005 the PO suffered

further electoral defeat to Law and Justice, led by Jarosław Kaczyński (Lech's twin brother), who became prime minister.

Tusk remained leader of the PO and took a more aggressive approach in the run-up to the early election called for Oct. 2007. The election followed the collapse of the Law and Justice-led coalition amid allegations of corruption. Tusk accused Kaczyński of incompetence on international relations—notably deteriorating relations with Germany—and of failing to prevent the mass movement of Poles to Britain and Ireland in search of work. Tusk campaigned on a platform to speed up privatization, lower taxes and reduce business bureaucracy to encourage investors.

In parliamentary elections on 21 Oct. 2007 the PO emerged victorious, taking around 41% of the vote against 32% for Law and Justice. Tusk took office as prime minister on 16 Nov. and his cabinet won a confidence vote in the Sejm on 24 Nov. 2007.

#### **Career in Office**

Tusk pledged to create jobs and promote economic development by cutting bureaucracy and regulation. However, the global financial downturn in 2008 undermined Poland's growth prospects, prompting the government to launch an economic stimulus programme in Dec. that year and to negotiate a one-year US\$20.6bn. credit line with the International Monetary Fund which was approved in May 2009. In July 2010 Tusk's political position was strengthened by the election of the PO's candidate, Bronisław Komorowski, as state president in place of Lech Kaczyński, who had been killed in an air crash the previous April.

On the international stage, Tusk oversaw the withdrawal in Oct. 2008 of Poland's last troops stationed in Iraq, fulfilling a key electoral pledge. However, plans agreed in 2008 for Poland to host a controversial missile defence shield for the USA were effectively abandoned in Sept. 2009 when the US president announced the scrapping of key elements of the system. Despite the Polish government's disappointment at the decision, Tusk insisted that the USA and Poland would remain close allies. In July 2011 Poland assumed the EU's six-month rotating presidency for the first time since the country's accession to the organization in 2004.

In Oct. 2011 Tusk's PO was returned to power as the largest party in national parliamentary elections. However, having introduced unpopular fiscal measures in May 2012—including increasing the retirement age—his administration lost ground in opinion polls to the opposition Law and Justice Party. In Oct. the government narrowly won a parliamentary vote of confidence after pledging US\$95bn. in infrastructure and other investments to boost economic growth.

#### **DEFENCE**

Poland is divided into two military districts: Pomeranian (North) and Silesian (South). In 2008 military expenditure totalled US\$10,176m. (US\$264 per capita), representing 1.9% of GDP.

Conscription ended on 1 Jan. 2010.

#### **Army**

Strength (2007) 79,000 (including 39,000 conscripts). In accordance with a programme of modernization of the armed forces, the strength has been gradually declining, from 230,000 in the socialist era in 1988 to 186,000 in 1995 and further to the current figure of under 80,000. In addition there were 188,000 Army reservists in 2007 and 14,100 border guards.

#### **Navy**

The fleet comprises four ex-Soviet and one ex-Norwegian diesel submarines, three frigates and five corvettes. There is a small Naval Aviation force.

Personnel in 2007 totalled 11,600 including 600 conscripts and 1,900 in Naval Aviation. Bases are at Gdynia, Hel, Świnoujście and Kolobrzeg.

#### **Air Force**

The Air Force had a strength (2007) of 28,466 (466 conscripts). There are two air defence corps (North and South) with 103 combat-capable aircraft (including MiG-29s and Su-22s).

#### **INTERNATIONAL RELATIONS**

A treaty of friendship with Germany signed on 17 June 1991 renounced the use of force, recognized Poland's western border as laid down at the Potsdam conference of 1945 (the 'Oder-Neisse line') and guaranteed minority rights in both countries.

A referendum held on 8 June 2003 approved accession to the EU, with 77.4% of votes cast for membership and 22.6% against. Poland became a member of the EU on 1 May 2004.

Poland's Senate approved the European Union's Treaty of Lisbon on 2 April 2008, the day after the *Sejm* had done so. However, then President Lech Kaczyński did not ratify it until 12 Oct. 2009, following acceptance of the Treaty by Ireland in a referendum ten days earlier.

#### **ECONOMY**

Agriculture accounted for 4.4% of GDP in 2006, industry 31.7% and services 63.9%.

#### **Overview**

Under communism the economy was skewed towards heavy industry to the neglect of services. Since the collapse of the old regime in 1990, the service sector has gained, contributing 63% of GDP in 2011 compared to 33% by the industrial sector. Most of the banking sector has been privatized, as have many large industries. The private sector now accounts for around three-quarters of GDP and 63.4% of employment. In 1990 and 1991 the economy shrank by 11.5% and 7.0% respectively but subsequent economic restructuring helped to achieve productivity gains.

The Economist Intelligence Unit estimates that from 1994–2003 total factor productivity grew at an annual average of over 3%. This resulted from sound macroeconomic management combined with a raft of transition policies, including price liberalization and lower import barriers. After accession to the EU in May 2004 growth was buoyant following half a decade of below-par expansion, with exporters benefiting from EU market integration. An unspectacular yet solid growth performance since the initial transition shock has helped raise living standards, with per capita income levels increasing by 250% between 1993 and 2010. The economic environment is friendly with transparent investment rules and equality for domestic and foreign firms.

Unemployment declined steadily (from 19.8% in 2002 to 7.1% in 2008) until the effects of the global financial crisis began to be felt, with unemployment reaching 10.6% in Dec. 2012. Unemployment is highest where state farms were once the rule (primarily in the northeast), while former industrial areas have proved more dynamic. Though accounting for only 3.6% of GDP in 2011, agriculture makes up a large share of total employment and is politically powerful. In 2012 the highest growth in average gross monthly wages (14.9%) was observed in agriculture, forestry and fishing.

Despite suffering during the financial crisis, Poland fared better than many of its neighbours. Real GDP growth fell to 5.0% in 2008, down from 6.8% in 2007. In response the central bank cut the seven-day reference interest rate from 5% to 4.25%. Output in the industrial sector fell by 4.4% year-on-year in Dec. 2008 and manufacturing output, which makes the largest contribution to industrial output, fell by 3.9%, mirroring a slowdown in the export market. Exports contracted by 30% year-on-year in the first quarter of 2009 and FDI fell by 50%.

In April 2009 the Polish government approached the IMF for US\$20.5bn. from its flexible credit line to shore up borrowing needs in the face of the crisis. This helped Poland become the only EU country to avoid recession in 2009, with real GDP growth of 1.7% aided by the economy's large domestic market,

stable private consumption and limited reliance on exports. Tax cuts enacted in 2006 and 2007 combined with government counter-cyclical fiscal stimulus during the crisis led to a rise in the government deficit from 2% of GDP in 2007 to 7% in 2009.

Eurozone countries accounted for 54.2% of exports and 46.6% of imports in 2011. About 66% of assets in the Polish banking sector belong to foreign financial institutions, mainly from the EU. Reduced export demand and lower public investment as a result of the eurozone crisis has caused growth to moderate. As a result, in Sept. 2012 the government stated it would not meet its deficit target of 3% of GDP in 2012.

The IMF has stressed the need for continuing privatization and structural reforms to strengthen the labour market and improve the business climate. Another priority is to reduce public debt, which stood at 56.3% of GDP in 2011.

### Currency

The currency unit is the *złoty* (PLN) of 100 *groszy*. A new zloty was introduced on 1 Jan. 1995 at 1 new zloty = 10,000 old zlotys. Inflation rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 1.9% | 0.7% | 3.4% | 2.2% | 1.3% | 2.4% | 4.2% | 3.8% | 2.6% | 4.2% |

Inflation, in single figures since 1999, had been nearly 250% in 1990. The zloty became convertible on 1 Jan. 1990. In 1995 the zloty was subject to a creeping devaluation of 1.2% per month; it was allowed to float in a 14% (+/-7%) band from 16 May 1995. In April 2000 Poland introduced a floating exchange rate. Foreign exchange reserves were US\$72,280m. and gold reserves 3.31m. troy oz in Sept. 2009. In July 2009 total money supply was 363,655m. zlotys.

### Budget

Central government revenue and expenditure (in 1bn. zlotys):

|             | 2007  | 2008  | 2009  |
|-------------|-------|-------|-------|
| Revenue     | 389.4 | 414.6 | 412.8 |
| Expenditure | 402.8 | 449.3 | 480.2 |

Poland's budget deficit in 2011 was 5.1% of GDP (2010, 7.8%; 2009, 7.4%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 23.0% (reduced rates, 8% and 5%). Taxes accounted for 53.2% of revenues in 2009; social benefits accounted for 44.5% of expenditures.

### Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 1.5% | 3.9% | 5.2% | 3.6% | 6.2% | 6.8% | 5.0% | 1.7% | 3.9% | 4.3% |

Poland was the only EU member country not to experience a recession in 2009 and the only one with positive growth. Total GDP in 2011 was US\$514.5bn. The private sector accounts for more than 70% of GDP.

### Banking and Finance

The National Bank of Poland (established 1945) is the central bank and bank of issue (*President*, Marek Belka). There were 73 banks operating at the end of 2000, of which only seven were controlled—directly or indirectly—by the Polish government through its state treasury. Poland's leading banks are PKO Bank Polski with assets of 156.5bn. zlotys in Dec. 2009 and Bank Pekao (assets of 130.6bn. zlotys in Dec. 2009).

Gross external debt amounted to US\$331,790m. in June 2012.

In 2010 Poland received US\$9,681m. of foreign direct investment, down from US\$13,698m. in 2009 and US\$23,561m. in 2007. It receives the most foreign direct investment of any of the

former socialist countries of central and eastern Europe. The total stock of FDI at the end of 2010 was US\$193.1bn.

There is a stock exchange in Warsaw.

### ENERGY AND NATURAL RESOURCES

In 2008, 7.9% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 15% has been set by the EU for 2020.

### Environment

Poland's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 7.8 tonnes per capita.

### Electricity

Installed capacity was 32.5m. kW in 2007. Production (2007) 159.35bn. kWh; consumption per capita was 4,040 kWh in 2007. Poland is a net exporter of electricity.

### Oil and Gas

Total oil reserves (2007) amount to some 96m. bbls; natural gas reserves (2008), 110bn. cu. metres. Crude oil production was 721,000 tonnes in 2007; natural gas (2008), 4.1m. cu. metres. The largest oil distributor is Polski Koncern Naftowy ORLEN SA, created by the merger of Petrochemia Płock and Centrala Produktów Naftowych.

### Minerals

Poland is a major producer of coal (reserves of some 7,500m. tonnes), copper (56m. tonnes) and sulphur. Production (in tonnes): coal (2007), 88.3m.; brown coal (2007), 57.5m.; salt (2006), 4.0m.; copper (2006), 497,000; silver (2006), 1,265.

### Agriculture

In 2007, 15.2% of the economically active population were engaged in agriculture. In 2007 there were 11.87m. ha. of arable land. There were 2.6m. farms in 2007; private farms accounted for 89.1% of the total area of agricultural land and state-owned farms for 10.9%. In 2007 agriculture, hunting and forestry contributed 3.8% of GDP.

Output in 2007 (in 1,000 tonnes): sugar beets, 12,682; potatoes, 11,791; wheat, 8,317; barley, 4,008; rye, 3,126; rapeseed, 2,130; maize, 1,722; oats, 1,462; cabbage, 1,325; apples, 1,040; carrots, 938; onions, 752. Poland is the third largest producer of rye, after Russia and Germany.

Livestock, 2007: pigs, 18.13m.; cattle, 5.70m. (including cows, 2.79m.); sheep, 332,000; horses, 329,000; chickens, 124m.

Livestock products, 2007: pork, bacon and ham, 2,150,700 tonnes; beef and veal, 379,500 tonnes; poultry meat, 1,139,600 tonnes; milk, 12,096,000 tonnes; cheese (including soft cheese), 670,000 tonnes; eggs, 547,000 tonnes.

In 2007 there were 1,553,400 tractors in use.

### Forestry

In 2010 forest area was 9.34m. ha. (predominantly coniferous), or 30% of the land area. Timber production in 2007 was 35.93m. cu. metres.

### Fisheries

The catch was 185,179 tonnes in 2007, of which 72% were sea fish. In 2007 there were 4,500 people employed in the fishing industry. Imports of fishery commodities were valued at US\$1,255m. in 2008 and exports at US\$1,174m.

### INDUSTRY

The leading companies by market capitalization in Poland in March 2012 were: PKO Bank (US\$13.5bn.); Bank Pekao (US\$13.0bn.); and Polska Grupa Energetyczna (US\$11.6bn.).

In 2007 there were 572 state firms, 216,887 limited liability companies, 324,246 other companies and 18,128 co-operatives. Production in 2007 unless otherwise indicated (in 1,000 tonnes): cement, 17,000; crude steel, 10,631; distillate fuel oil, 8,787; pig iron, 5,804; petrol, 3,867; paper and paperboard, 2,992; fertilizers, 2,835; residual fuel oil, 2,831; plastics in primary forms, 2,778; ammonia, 2,417; nitric acid, 2,270; sulphuric acid, 2,010; sugar, 1,857; soda ash, 1,215; paints and lacquers, 1,117; sulphur, 834; beer, 3,690m. litres; mineral water, 2,708m. litres; fruit and vegetable juice, 664m. litres; vodka, 93m. litres; cigarettes, 124bn. units; bricks, 839m. units; television receivers, 14,929,000 units; refrigerators and freezers, 2,305,000 units; washing machines, 1,938,000 units; telephone sets, 797,000 units; cars, 698,000 units; tractors, 7,400 units; public transport vehicles, 3,600 units.

Output of light industry in 2007: cotton woven fabrics, 142.9m. sq. metres; silk fabrics, 18.1m. sq. metres; woollen woven fabrics, 5.6m. sq. metres; shoes, 43.6m. pairs.

Between 1990 and 2006 employment in the Polish mining industry fell from 388,000 to 119,000 and more than 30 mines closed. For some time the Polish government had been trying to reduce employment further, but in 2006 a mining strategy suggested that the industry may face serious labour shortages by 2015. More than 125,000 jobs have been lost in the steel industry since the early 1990s; by 2009 it employed just 19,400 people. In 2002 the four largest state-owned steel enterprises were regrouped into one company, Polskie Huty Stali SA, which was privatized in 2003. It was bought by Mittal Steel (now ArcelorMittal) in 2004.

### Labour

In 2008 a total of 14,037,000 persons were in employment. In Dec. 2008, 3,103,000 persons worked in industry, 2,269,000 in trade and repairs, 1,133,000 in property, renting and business activities, 1,039,000 in education, 840,000 in construction, 809,000 in transport, storage and communications, and 748,000 in health and social services. There were a total of 176,300 working days lost to strike action in 2008. The unemployment rate increased steadily for several years peaking at 20.0% in 2002, compared to the EU average of 7.7%. It has declined considerably since then, and in Dec. 2012 stood at 10.6%. Unemployment among the under 25s was 26.0% in the third quarter of 2011. Workers made redundant are entitled to one month's wages after one year's service, two months after two years' service and three months after three or more years' service. A five-day working week was introduced in May 2001. The number of hours worked was reduced to 40 in 2003. Despite strong public opposition an amendment to the Act on Pensions was passed in 2012 increasing the retirement age to 67 for both men and women (having previously been 65 for men and 60 for women). Starting from Jan. 2013 the retirement age is increasing by three months every year and is set to reach 67 for men in 2020 and for women in 2040.

## INTERNATIONAL TRADE

### Imports and Exports

In 2007 imports (c.i.f.) totalled US\$161.94bn. (US\$124.73bn. in 2006); exports (f.o.b.), US\$137.83bn. (US\$109.33bn. in 2006). The main imports in 2005 were electrical equipment (14.4%); chemicals and chemical products (13.3%); transportation equipment (12.4%); mineral fuels (11.3%); machinery and apparatus (11.2%). Leading exports were transportation equipment (21.1%); base and fabricated metals (12.4%); electrical equipment (11.0%); food (8.4%); machinery and apparatus (8.4%).

Main import suppliers, 2006: Germany, 24.0%; Russia, 9.7%; Italy, 6.8%; China, 6.1%; France, 5.5%. Main export markets, 2006: Germany, 27.2%; Italy, 6.5%; France, 6.2%; United Kingdom, 5.7%; Czech Republic, 5.5%. In 2006 trade with the European Union accounted for 63.2% of Polish imports and 77.4% of Polish exports.

## COMMUNICATIONS

### Roads

In 2007 there were 258,910 km of roads, including 663 km of motorways; 67.6% of roads were paved. In 2006 there were 13,384,000 passenger cars, 2,393,000 lorries and vans, 84,000 buses and 784,000 motorcycles and mopeds. In 2006 public transport totalled 28,148m. passenger-km and freight 136,490m. tonne-km. There were 5,583 road accident fatalities in 2007. With 14.7 deaths per 100,000 population in 2007, Poland has among the highest death rates in road accidents of any industrialized country.

### Rail

In 2007 there were 20,107 km of railways in use managed by Polish State Railways (11,898 km electrified). Over 98% is standard 1,435 mm gauge with the rest broad gauge (1,520 mm). All narrow gauge lines (511 km in 2001) have been closed or sold to private or local authorities. In 2007 railways carried 279.7m. passengers and 245.3m. tonnes of freight. Passenger-km travelled in 2007 came to 19.9bn. and freight tonne-km to 54.3bn. Some regional railways are operated by local authorities. An 11 km metro opened in Warsaw in 1995, extended by 2007 to 18 km, and there are 14 tram/light rail networks with a total length of 930 km.

### Civil Aviation

The main international airport is at Warsaw (Frederic Chopin), with some international flights from Kraków (John Paul II Balice International), Bydgoszcz, Gdańsk, Katowice, Łódź, Poznań, Rzeszów, Szczecin and Wrocław. The national carrier is LOT-Polish Airlines (68.0% state-owned). It flew 107.7m. km in 2011, carrying 6,491,199 passengers (5,377,869 on international flights). In 2011 Warsaw handled 9,324,635 passengers (8,253,153 on international flights) and 60,625 tonnes of freight.

### Shipping

The principal ports are Gdańsk, Szczecin, Świnoujście and Gdynia. 59.48 tonnes of cargo were handled at Polish ports in 2005. In 2005, 9.36m. tonnes of freight and 714,133 passengers were carried by the maritime transport fleet. In 2005 the merchant marine totalled 1,862,265 GRT. Ships with a capacity of 739,686 GRT were built in 2005. Vessels totalling 52,004,843 NRT entered ports in 2005 and vessels totalling 52,199,635 NRT cleared. In 2005 there were 3,638 km of navigable inland waterways; 3.4m. tonnes of freight were carried on inland waterways in 2009.

### Telecommunications

In 2008 there were 9,711,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 43,926,000 (1,152.8 per 1,000 persons). The privatization of Telekomunikacja Polska (TP SA), the former state telecom operator, was completed in 2001. In April 2012 it was rebranded as Orange. France Télécom, the biggest foreign investor in Poland, now owns a 49.8% stake in the company. There were 18.7m. internet users in 2008. There were 14.2 fixed broadband subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 7.5m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The penal code was adopted in 1969. Espionage and treason carry the severest penalties. For minor crimes there is provision for probation sentences and fines. In 1995 the death penalty was suspended for five years; it had not been applied since 1988. A new penal code abolishing the death penalty was adopted in June 1997.

In 2009 there were the following courts: one Supreme Court, one Supreme Administrative Court, 16 administrative courts of first instance, 11 appeal courts, 45 regional courts, 320 district courts, 68 family consultative centres and 35 juvenile institutions.

Judges are appointed by the President of the Republic from candidatures proposed by the National Council of the Judiciary and have life tenure. An ombudsman's office was established in 1987.

Family consultative centres were established in 1977 for cases involving divorce and domestic relations, but in 1990 divorce suits were transferred to ordinary courts. In 2008, 420,729 criminal sentences were passed. There were 763 ascertained homicides in 2009. The population in penal institutions in Dec. 2009 was 84,003 (220 per 100,000 of national population).

### Education

Education from six to 18 is free and compulsory, although from 16 to 18 it may be part-time. Secondary education is then optional in general or vocational schools. In the 2009–10 school year there were: pre-primary schools, 17,444 with 994,138 pupils and 53,103 full-time equivalent teachers; primary schools, 13,972 with 2,235,018 pupils and 224,351 full-time equivalent teachers; lower secondary schools, 7,810 with 1,346,112 pupils and 104,755 full-time equivalent teachers; upper secondary schools, 10,709 with 1,770,013 pupils and 134,573 full-time equivalent teachers; post-secondary schools, 3,108 with 266,057 pupils and 8,210 full-time equivalent teachers; tertiary institutions, 563 with 1,918,793 students and 105,309 academic staff (excluding postgraduate and doctoral courses). In 2009 institutions of higher education included 19 universities, 23 technical universities, seven agricultural schools, 80 schools of economics, 15 theological schools, nine medical schools and 102 teacher training colleges. Since the early 1990s there has been a boom in private higher education—in 2009–10 more than 30% of all students in higher education were at private colleges.

The adult literacy rate in 2008 was over 99%.

Religious (Catholic) instruction was introduced in all schools in 1990; for children of dissenting parents there are classes in ethics.

In 2009 total expenditure on education came to 5.8% of GDP and 11.5% of total government spending.

### Health

Medical treatment is free and funded from public sources. Medical care is also available in private clinics. In 2009 there were 795 general hospitals with a total of 193,400 beds (including beds and incubators for newborn babies). 82,700 physicians, 12,100 dentists, 193,100 nurses, 24,200 pharmacists and 22,400 thousand midwives worked directly with patients within hospital and outpatient care in 2009. In Jan. 1999 reform of the health care system was inaugurated. All citizens can now choose their own doctor, who is paid by the public sector under the social security system. The share of health insurance paid mainly by employees, equalling 7.5% of the amount earned by them, is assigned for the financing of the health care system. In 2008 Poland spent 7.0% of its GDP on health, with 27.8% of health expenditure coming from private sources.

### Welfare

All social security benefits are administered by the State Insurance Office and funded 45% by a payroll tax and 55% from the state budget. Pensions, disability payments, child allowances, survivor benefits, maternity benefits, funeral subsidies, sickness compensation and alimony supplements are provided. In 2010 social benefits totalling 198,479.6m. zlotys were paid (including 170,879.5m. zlotys for retirement pay and pensions, 7,830.1m. zlotys for family benefits and supplements to the family benefits, nursing benefits and allowances, 7,213.9m. zlotys for sick benefits, 3,038.2m. zlotys for maternity benefits, 2,622.9m. zlotys for unemployment benefits and 2,435.5m. zlotys for funeral benefits). There were a total of 9,243,427 pensioners in 2010. Unemployment benefits are paid from a fund financed by a 3% payroll tax. It is indexed in various categories to the average wage and payable for 12 months.

A retirement pension is available to an insured person who fulfils the following conditions: has attained the retirement age dependent on gender, specific employment conditions or functions, and an appropriate contributory and non-contributory period. The basic retirement pay for people born before 1949 is defined by job seniority and wages in chosen work periods. For people who were born after 31 Dec. 1948 and who joined the Open Pension Fund (OPF), or who are not members of the OPF and who did not fulfil the requirements needed to obtain retirement pay under the previous rules, basic retirement pay depends on the capital that was built up in individual insurance accounts.

On 1 Jan. 2009 a law on bridging pensions came into force entitling men and women who had not attained the age of 60 and 65 respectively to obtain a retirement pension. The retirement age is being raised gradually from 60 for men and 65 for women to 67 for both men and women, by 2020 and 2040 respectively.

### RELIGION

State relations are regulated by laws of 1989 which guarantee religious freedom, grant the Church radio and TV programmes and permit it to run schools, hospitals and old age homes. The Church has a university (Lublin) and seminaries. On 28 July 1993 the government signed a Concordat with the Vatican regulating mutual relations. The religious capital is Gniezno. Its archbishop, Henryk Muszyński (b. 1933) is the primate of Poland. Kazimierz Nycz was appointed archbishop of Warsaw on 1 April 2007. In Oct. 1978 Cardinal Karol Wojtyła, archbishop of Kraków, was elected Pope as John Paul II. In Feb. 2013 there were seven cardinals.

Statistics of major churches as at Dec. 2009:

| Church                   | Congregations | Places of Worship   | Clergy | Adherents  |

### CULTURE

#### World Heritage Sites

There are 13 UNESCO World Heritage sites in Poland. They are: Kraków's Historic Centre (inscribed on the list in 1978), Poland's former capital; Wieliczka Salt Mine (1978 and 2008), a mine since the 13th century; Auschwitz Concentration Camp (1979), the German concentration camp and nearby Birkenau death camp; Historic Centre of Warsaw (1980), celebrating the 20th century reconstruction of the city's 18th century heart decimated during World War II; Old City of Zamość (1992), a 16th century town; Medieval Town of Toruń (1997); Castle of the Teutonic Order in Malbork (1997), a medieval brick castle; Kalwaria Zebrzydowska: the Mannerist Architectural and Park Landscape Complex and Pilgrimage Park (1999); Churches of Peace in Jawor and Świdnica (2001), Europe's biggest timber-framed religious buildings; Wooden Churches of Southern Little Poland (2003); the Centennial Hall in Wrocław (2006).

Poland and Belarus are jointly responsible for Belovezhskaya Pushcha/Białowieża Forest (1979 and 1992), in the Baltic/Black Sea region; and Poland and Germany are jointly responsible for Muskauer Park/Park Mużakowski (2004), a landscaped park astride the Neisse river.

#### Press

In 2011 there were 32 daily newspapers with a combined daily circulation of 3,108,400 (81 per 1,000 inhabitants). The most

popular newspapers are *Fakt*, *Gazeta Wyborcza*, *Super Express* and *Rzeczpospolita*. 7,713 magazine titles were published in 2011 with a combined total of 1,437m. copies. In 2011, 31,515 book titles were published.

#### Tourism

In 2011 there were 13,350,000 tourist arrivals, up from 12,470,000 in 2010 and 11,890,000 in 2009. The main countries of origin of non-resident tourists in 2011 were Germany (4,590,000), Ukraine (1,580,000), Belarus (1,220,000) and Lithuania (630,000).

#### Festivals

The International Chopin Festival at Duszniki Zdrój is held in Aug. and the Warsaw Autumn Festival takes place in Sept. Kraków Film Festival runs from May–June. Popular music festivals include Metalmania in Katowice (March), Open'er Festival in Gdynia (July), Przystanek Woodstock at Kostrzyn nad Odrą (July–Aug.), Off Festival at Myslowice (Aug.) and Zaduszki Jazzowe (All Soul's Day Jazz Festival) in Kraków (Nov.).

## KEY HISTORICAL EVENTS

The western fringe of the Iberian peninsula was inhabited from 8000 BC by Neolithic peoples known as Iberians. Celtic tribes settled in the north and west of the peninsula in the first millennium BC with Phoenician settlements in the southwest around Cádiz from around 800 BC. From 241 BC the Iberian peninsula came under the influence of Carthage, and then Rome after 206 BC. The Romans made their way north to what is now central Portugal and clashed with a Celtic federation, the Lusitanians. They resisted the Roman advance under their leader Viriathus until he was killed in 140 BC, after which the Romans were able to move north across the Douro river. In 25 BC

Augustus founded Augustus Emirita (now Mérida) as the capital of Lusitania.

From AD 409, with the Roman Empire in decline, the Iberian Peninsula was invaded by Germanic tribes from central Europe, including the Suevi and Visigoths, who established Christian kingdoms. Southern Galicia was settled by the Suevi, who were converted to Christianity by St Martin of Braga in around AD 550. Following the arrival of Muslim armies in Iberia in 711, the southern part of what is now Portugal became part of the Muslim dominion of al-Andalus. The northern and western fringes of Iberia remained largely agrarian, poor and Christian.

From 850 the Christians began to push southward: the region between the rivers Minho and Douro became known as Territorium Portugalense and was ruled by Mumadona Dias after 931. Fernando I, King of Castile, drove the Muslims from the city of Viseu in 1058 and reconquered Coimbra in 1064. Fernando's successor, Afonso VI of Leon, set up his power base in the town of Braga. His daughter, Teresa, who was married to Henry of Burgundy, then governed Portugal as regent for their son, Afonso Henriques. Teresa eventually lost the support of many of the powerful local barons, who united behind Afonso and made him the first king of Portugal in 1139.

Muslim chroniclers refer to Afonso I as 'the cursed of Allah'. He crusaded southwards through the Muslim strongholds, capturing Lisbon in 1147. However, the Portuguese reconquest was not completed for 150 years, when Afonso III finally took Algarve in the far south. Afonso III established the first Cortes (government) at Leiria in 1254. Large swathes of the newly conquered lands were given over to the army and monastic orders to ensure their protection. Afonso's son, Dinis (1279–1325), became one of the most celebrated of the Burgundian dynasty. He established trade links with other European powers and in 1317 worked with a Genoese admiral to establish a navy. Dinis made the vernacular, rather than Latin, the official language and founded the first university in Lisbon in 1290.

The later kings of the House of Burgundy were entangled in various marriage alliances with neighbouring Castile. Fernando I (1367–83) inherited the Portuguese crown as a battle raged in Castile between King Pedro 'the Cruel' and his half-brother Enrique de Trastámara. Both sides attempted to garner support from outside the kingdom, with the English supporting Pedro (Peter) and his heirs and the French backing Enrique (Henry) and his supporters. Enrique eventually prevailed, being crowned Enrique II of Castile in 1369. The new king offered his support to Fernando, who accepted, and Castilian rule was duly established in Portugal.

After Fernando's heiress, Beatriz, married Juan I of Castile the nobility broadly supported Castilian rule but Portugal's coastal towns wanted independence and rebelled. Their choice for ruler was João of Avis, half brother of Fernando, who was declared King João I in 1384. A year later, with English support, the Portuguese defeated Juan I and his Castilian army at the battle of Aljubarrota. The Anglo-Portuguese alliance was cemented by King João's marriage in 1387 to Philippa of Lancaster, sister of England's future King Henry IV.

## Empire Building

Having made peace with Spain, João turned his attention overseas. The capture of the town of Ceuta on the north African coast in 1415 was the beginning of an era of discovery by Portuguese mariners, spearheaded by João's third son Henry who became known as Henry the Navigator. He founded a school of navigation at Sagres and organized numerous expeditions along

the west coast of Africa. Madeira and the Azores were also discovered and settled during this period.

Relations with Castile deteriorated in the reign of Afonso V (1438–81). Afonso married Juana, daughter of Enrique IV of Castile, and laid claim to the Castilian throne. The marriage of Fernando II and Isabella I of Castile and the merging of the powerful kingdoms of Aragon and Castile, weakened Afonso's claim. There were lengthy battles in the Zamora and Toro regions, which Afonso lost in 1476. Peace was made three years later by Afonso's heir, João II. Overseas explorations were resumed, and Portugal became a haven for tens of thousands of Jews fleeing persecution in Spain.

In 1487 Bartolomeu Dias rounded the southern cape of Africa, but the Portuguese crown rejected Christopher Columbus' proposal for finding a new westward route to the Indies. Backed instead by Fernando II and Isabella I of Castile, he reached the New World in 1492. The 1493 Treaty of Tordesillas gave the newly-unified Spain all lands west of a vertical line drawn 370 degrees west of the Cape Verde Islands. Land to the east, including Brazil, went to Portugal. In 1497, with backing from King Manuel I, Vasco da Gama set out to map a sea route to India. Indian spices were used for preserving food, in the preparation of medicines and in glues, perfumes, dyes and varnishes. The Portuguese built an administrative capital at Goa and by 1550 it was considered Portugal's second city.

Fortified trading posts were later established along the coast of East Africa and India, and commercial centres set up further east. The profits generated by the spice trade made Manuel I 'the Fortunate' one of the wealthiest rulers in Europe. No longer dependent on taxes, Manuel was able to rule independently. The Cortes did not meet between 1502–25 and the expulsion of the Jews in 1496 (a condition of Manuel's marriage to Princess Isabella of Castile, daughter of Isabella I) dealt a heavy blow to the economy.

In 1568 King Sebastião launched a disastrous crusade to eradicate Islam in the Maghreb. More than 10,000 Portuguese troops, including Sebastião, were killed by superior Moroccan forces. After the elderly and childless Cardinal Henrique, the line of succession passed to the cardinal's nephew, Felipe II of Spain.

### *Spanish Rule*

Felipe II annexed Portugal in 1580. The Spanish empire was at its height and Portuguese merchants saw commercial advantages in forming an alliance with Spain. Portugal was granted autonomy but this was gradually eroded. The Inquisition was established in Portugal and the ports of Lisbon and Porto (Oporto) were closed to English and Dutch ships, which then made their own way to the east and snatched control of the spice trade. The 'Spanish domination' of Portugal lasted for 60 years, though after 1621 Spain was considerably weakened by the cost of defending its empire against France and England. A rebellion in Catalonia spurred the Portuguese to stage their own revolution. They rallied round the duke of Bragança, who was crowned King João IV in 1640.

João IV was anxious to formalize new alliances with the other European powers. Spain's peace with France, set out in the 1659 Treaty of the Pyrenees, made João's successor, Afonso VI, anxious to strengthen Portugal's alliance with England. Thus, Catherine of Bragança was married to King Charles II in 1662. Her dowry included the right to trade with the Portuguese colonies and the cession of Bombay and Tangier. In return, England agreed to defend Portugal and its colonies. In the late 1600s gold and then diamonds were discovered in Brazil. Money poured into the Portuguese court, but the crown's wealth did little to enrich the nation. João V (1706–50) aped Louis XIV of France, lavishing money on ambitious building projects, including a gigantic convent-palace at Mafra.

Portuguese political development lagged behind that of many European states and it remained comparatively untouched by the

Enlightenment until the Marquess of Pombal was made chief minister shortly after the great Lisbon earthquake in 1755. His methods were harsh and he made enemies quickly. His principal victims were the conservative Jesuits and the nobility with their vast array of privileges. Pombal is also credited with reforming the education system but ultimately his legacy was limited. When Maria I came to the throne in 1777, she immediately banished Pombal to his estates and rescinded many of his reforms.

After Louis XVI of France was guillotined in 1793, the new French Republic invaded Catalonia and the Basque provinces. Following these defeats, King Charles IV of Spain formed an alliance with Napoleon. In 1801 France and Spain demanded that Portugal abandon its alliance with Britain, open its ports to French and Spanish shipping and hand over some of its colonies to Spain. Portugal refused and a French army marched into Lisbon in 1807. King João VI and his family escaped to Brazil with the help of the British navy and the defence of Portugal was left in the hands of British Generals Wellesley and Beresford. The French were finally driven out of Portugal in 1811 and the British, as a reward, were granted free access to the Brazilian ports, a concession which damaged the Portuguese economy and stoked-up popular resentment.

After an army-backed revolution in Porto in 1820, an unofficial Cortes was set up to devise a new liberal constitution. The Cortes was to be a single chamber parliament elected by universal male suffrage, and feudal and clerical rights would be abolished. Returning from Brazil the following year, João VI accepted the new constitution. Brazil declared its independence, with Pedro IV (João's elder son) as emperor.

Following João's death in 1826, Pedro became king of Portugal in defiance of the Brazilian constitution. Forced to abdicate in favour of his daughter, Maria II, then aged seven, he chose his brother Miguel as her steward. Miguel seized the throne in 1828, defeating the liberals and repealing Pedro's constitution. Pedro IV returned to Portugal in 1832 to lead the liberals in the Miguelist Wars. Maria was eventually restored to the throne. The late 1850s saw improvements in the nation's infrastructure but by the start of the reign of Carlos I in 1889, Portugal's economy was in a poor way. Explorations in Africa strengthened Portugal's hold on Angola and Mozambique but the British refused to give up territory which would have linked the two colonies. Carlos attempted to end inefficiency and corruption, establishing a dictatorship in 1906 under the conservative João Franco. Amidst growing public discontent, Carlos and his eldest son Prince Luís Filipe were assassinated in 1908. Manuel II succeeded to the throne but in 1910 a republican revolution forced his abdication and flight to Britain.

In the First World War Portugal was at first neutral, then joined the Allies in 1916. The economy deteriorated further and in 1926 there was a military coup. Gen. Carmona became president. António de Oliveira Salazar was made finance minister in 1928 with a brief to reform the economy.

### *Dictatorship to Democracy*

Salazar became prime minister in 1932. His *Estado Novo* (New State) had a strongly nationalist and dictatorial flavour. Political parties, unions and strikes were abolished and dissent was crushed by the notorious PIDE (Policia Internacional e de Defesa do Estado) secret police force. Portugal was neutral in the Second World War but allowed the Allies to establish naval and air bases. After Goa was seized by India in 1961, Salazar was determined to cling on to the African territories. By 1968, over 100,000 Portuguese were fighting independence movements in Angola, Guinea-Bissau and Mozambique.

In 1968 Salazar suffered a stroke and was replaced by Marcello Caetano. Under Caetano repression was eased but the unpopular wars in Africa continued. In 1974, amid mounting public discontent, a group of officers formed the Movement of Armed Forces and toppled the government in a bloodless coup known as

'the Revolution of the Carnations'. Gen. António de Spínola was appointed head of the ruling military junta. The secret police force was abolished. All political prisoners were released; full civil liberties, including freedom of the press and of all political parties, were restored and, in 1975, Angola, Mozambique, São Tomé e Príncipe and Cape Verde were granted independence. Timor-Leste was forcibly taken by Indonesia. Following an attempted revolt in late 1975, the military junta was dissolved and a Supreme Revolutionary Council ruled until a new constitutional government resumed the following year. During the late 1970s several moderate, Socialist-dominated governments tried unsuccessfully to stabilize the country. In 1982 a centre-right coalition revised the constitution, reducing presidential power and the right of the military to intervene in politics. From 1983 to 1985 a coalition government under Socialist leader Mário Soares made progress in reducing the chaos and poverty that were the legacy of Salazar's long dictatorship.

In 1985 the centrist Social Democratic party under Aníbal Cavaco Silva won an undisputed majority in parliament. In 1986 Soares was elected to the presidency, and Portugal was admitted to the European Community. Political stability and economic reforms created a favourable business climate, especially for renewed foreign investment, and Portugal became one of the fastest-growing economies in Europe. The Socialists returned to power as a minority government after the 1995 parliamentary elections. Macao, Portugal's colony on the south coast of China, was handed back to China in 1999. Portugal joined the single European currency in 2001. In Jan. 2006 the centre-right candidate Aníbal Cavaco Silva was elected president, beginning a period of political 'cohabitation' alongside the Socialist prime minister, José Sócrates. In March 2011, following an appeal to the EU for assistance to avoid a debt default, the government resigned.

### TERRITORY AND POPULATION

Mainland Portugal is bounded in the north and east by Spain and south and west by the Atlantic Ocean. The Atlantic archipelagoes of the Azores and of Madeira form autonomous but integral parts of the republic, which has a total area of 92,207 sq. km. Population (2011 census), 10,562,178 (5,515,578 females).

Mainland Portugal is divided into five regions. At the 2011 census the regions, with their populations, were: North (3,689,682); Central (2,327,755); Lisbon (2,821,876); Alentejo (757,302); Algarve (451,006). Population of the Azores, 246,772; Madeira, 267,785. Density (2011), 114.5 per sq. km (North, 173; Central, 83; Lisbon, 940; Alentejo, 24; Algarve, 90; Azores, 106; Madeira, 334).

The UN gives a projected population for 2015 of 10.70m.

In 2011, 61.3% of the population lived in urban areas. The populations of the districts and Autonomous Regions (2011 census):

| Areas                | Population | Areas                 | Population |

In 2010 there were 443,055 foreign citizens with legal residency status, with the leading nationalities as follows: Brazil, 119,195;

Ukraine, 49,487; Cape Verde, 43,510; Romania, 36,830; Angola, 23,233; Guinea-Bissau, 19,304. Large numbers of immigrants have come to Portugal from eastern Europe since 1999, mainly from Ukraine, Romania and Moldova.

The capital is Lisbon (Lisboa), with a population of 547,733 in 2011 (metropolitan area population, 2,821,876 in 2011). Other major cities are Porto, 237,591 in 2011 (metropolitan area population, 1,672,670 in 2011), Almada, Amadora, Braga, Funchal (in Madeira) and Vila Nova de Gaia.

The official language is Portuguese.

The Azores islands lie in the mid-Atlantic Ocean, between 1,200 and 1,600 km west of Lisbon. They are divided into three widely separated groups with clear channels between, São Miguel (759 sq. km) together with Santa Maria (97 sq. km) being the most easterly; about 160 km northwest of them lies the central cluster of Terceira (382 sq. km), Graciosa (62 sq. km), São Jorge (246 sq. km), Pico (446 sq. km) and Faial (173 sq. km); still another 240 km to the northwest are Flores (143 sq. km) and Corvo (17 sq. km), the latter being the most isolated and undeveloped of the islands. São Miguel contains over half the total population of the archipelago.

Madeira comprises the island of Madeira (745 sq. km), containing the capital, Funchal; the smaller island of Porto Santo (40 sq. km), lying 46 km to the northeast of Madeira; and two groups of uninhabited islets, Ilhas Desertas (15 sq. km), being 20 km southeast of Funchal, and Ilhas Selvagens (4 sq. km), near the Canaries.

### SOCIAL STATISTICS

2006: births, 105,449; deaths, 101,990; marriages, 47,857; divorces, 22,881. Rates per 1,000 population in 2006: birth, 9.9; death, 9.6; marriage, 4.5; divorce, 2.2. Annual population growth rate, 2000–05, 0.6%. Expectation of life at birth, 2007, was 75.3 years for males and 81.8 years for females. Infant mortality in 2010 was three per 1,000 live births, down from 77 per 1,000 live births in 1960, representing the greatest reduction in infant mortality rates in Europe over the past half century. Fertility rate, 2008, 1.4 births per woman. Around one in five babies are born outside marriage, up from one in 14 in 1970. In 2005 the most popular age range for marrying was 25–29 for both males and females. Portugal legalized same-sex marriage in June 2010.

On 11 Feb. 2007 a national referendum was held on whether to decriminalize abortion up until the 10th week of pregnancy. Turnout was low at 44%; 59.3% of voters approved the motion. Despite results only having to be legally binding if the turnout exceeded 50%, parliament voted overwhelmingly in favour on 9 March 2007. In 1998 the same question had been put in another referendum. 51% voted against the motion; turnout was 32%.

In 2010 Portugal received 160 asylum applications.

### CLIMATE

Because of westerly winds and the effect of the Gulf Stream, the climate ranges from the cool, damp Atlantic type in the north to a warmer and drier Mediterranean type in the south. July and Aug. are virtually rainless everywhere. Inland areas in the north have greater temperature variation, with continental winds blowing from the interior. Lisbon, Jan. 52°F (11°C), July 72°F (22°C). Annual rainfall 27.4" (686 mm). Porto, Jan. 48°F (8.9°C), July 67°F (19.4°C). Annual rainfall 46" (1,151 mm).

### CONSTITUTION AND GOVERNMENT

Portugal is governed under the constitution of April 1976, amended in 1982, 1989, 1992, 1997, 2001, 2004 and 2005. The 1982 revision abolished the (military) Council of the Revolution and reduced the role of the President under it. Portugal is a sovereign, unitary republic. Executive power is vested in the *President*, directly elected for a five-year term (for a maximum of two consecutive terms). Political parties may support a candidate in presidential elections but not actually field a candidate.

The President appoints a Prime Minister and, upon the latter's nomination, other members of the Council of Ministers.

The 230-member *National Assembly* is a unicameral legislature elected for four-year terms by universal adult suffrage under a system of proportional representation. Women did not have the vote until 1976.

### National Anthem

'Heróis do mar, nobre povo' ('Heroes of the sea, noble breed'); words by Lopes de Mendonça, tune by Alfredo Keil.

### CURRENT LEADERS

#### Aníbal Cavaco Silva

#### Position

President

#### Introduction

Aníbal Cavaco Silva was elected president on 22 Jan. 2006, the first centre-right politician to fill the largely ceremonial post since the 1974 revolution. The free-market economist played a key role in preparing Portugal's entry in 1986 to the European Economic Community (EEC; later the European Union) and served as prime minister from 1985–95. He was re-elected president in Jan. 2011.

#### Early Life

Aníbal António Cavaco Silva was born in Boliqueime, Algarve on 15 July 1939. Educated in Faro and Lisbon, he graduated in finance in 1964. He worked as a researcher for the Calouste Gulbenkian Foundation in Lisbon from 1967 to 1971 before studying for a PhD in economics at the University of York in the UK.

Returning to Portugal in 1974, the year when the socialist Armed Forces Movement toppled the Caetano dictatorship, Cavaco Silva taught economics at the Catholic University of Portugal. He joined the newly formed centre-right Popular Democratic Party, which became the Social Democratic Party (PSD) in 1976. From 1977 he worked as director of the research and statistics department of the Bank of Portugal. Elected to parliament for the PSD in Oct. 1980, he served as minister of finance and planning, initially under PSD leader and prime minister, Francisco Sá Carneiro, and then under Francisco Balsemão.

An advocate of free-market economics, Cavaco Silva's reforms, combined with a constitutional reduction in presidential power, paved the way for Portugal's entry into the EEC in 1986. Elected head of the PSD in June 1985, he led the party to victory in elections the following Oct. He retained the position for ten years, the longest tenure of any democratically elected prime minister in Portuguese history. The PSD won a clear majority of seats in legislative elections in both 1987 and 1991, with analysts attributing Cavaco Silva's success to economic liberalization, tax cuts and the flow of funds from the EEC.

Cavaco Silva stepped down as leader of the PSD prior to the 1995 elections, which were won by the Socialist Party (PS). He contested the 1996 presidential election but, after losing to the

Socialist candidate, retired from politics to advise at the Bank of Portugal and teach economics at the Catholic University of Portugal. In Oct. 2005 he returned to the political fray and announced his candidacy for the forthcoming presidential election. He received 50.5% of the votes cast on 22 Jan. 2006 and was sworn in on 9 March 2006.

#### *Career in Office*

Cavaco Silva's victory over the two Socialist candidates was a setback for the Socialist prime minister, José Sócrates, who had presided over a period of economic stagnation. However, the result ushered in a new era of 'cohabitation' in Portuguese politics, with analysts predicting that the two leaders would find common ground to implement economic reform. Although a Roman Catholic, Cavaco Silva endorsed legislation in April 2007 liberalizing abortion and aligning Portuguese law with that of most other EU countries. In Oct. 2009, following parliamentary elections the previous month, he invited Sócrates to form a new PS government.

In Jan. 2011 Cavaco Silva's re-election as president heralded a turbulent economic period. High debt levels and flat growth forced the negotiation in May of a financial rescue package with stringent deficit reduction conditions from the European Union and International Monetary Fund. Parliamentary elections in June 2011 saw the PS government replaced by a centre-right PSD/Democratic and Social Centre–People's Party coalition. Continuing austerity prompted social and labour unrest in 2012.

#### **Pedro Passos Coelho**

##### *Position*

Prime Minister

##### *Introduction*

Pedro Passos Coelho became prime minister in June 2011 when Portugal was suffering a severe sovereign debt crisis. A centre-right politician, he has advocated cutting government expenditure and privatizing many of Portugal's state-owned businesses to improve efficiency and to restore the confidence of international investors.

##### *Early Life*

Born in Coimbra on 24 July 1964, Pedro Passos Coelho was educated in Silva Porto, Portugal and Luanda, Angola, where his family lived from 1969–74. He joined the Social Democratic Party (PSD) and served on the national council of its junior wing from 1980–82.

In 1982 he began studying mathematics at Lisbon University but left before graduating to work in private enterprise and to pursue his political career. Leader of the junior PSD from 1990–95, he was elected to parliament in 1991, representing a Lisbon constituency. He served as vice-chairman of the PSD parliamentary group from 1996–99 and, after standing unsuccessfully for mayor of Amadora in 1997, served as a municipal councillor from 1997–2001.

He left parliament in 1999 following the PSD general election defeat and studied economics at Lusíada University, Lisbon, graduating in 2001. After working in consultancy firms, he joined the Fomentinvest investment holding company in 2004 and became finance director under chairman Ângelo Correia, a founder of the PSD. Coelho also served as vice president of the PSD from 2005–06, gaining a business-friendly and pragmatic reputation.

In 2008 he unsuccessfully contested the party leadership, and also established a think tank to develop policies based on economic liberalization and partial privatization. In May 2010 he again contested the leadership and won with 61% of the vote.

As leader of the opposition, Coelho helped vote down the government budget in March 2011, arguing it relied too heavily on tax increases rather than spending cuts. The government

collapsed and a caretaker administration then agreed a €78bn. IMF–EU bailout, with stringent austerity conditions attached.

Coelho campaigned at the June 2011 parliamentary election on a platform of economic reform. The PSD won the most votes and formed a coalition with the centre-right Democratic and Social Centre–People's Party.

#### *Career in Office*

In its early months Coelho's government increased taxes, cut state spending and announced a privatization programme. However, after discovering further debt, he announced the transfer of €6bn. of banks' pension funds to the state in order to reduce the short-term deficit and boost liquidity. To comply with the terms of the financial bailout, the government was required to implement labour law reform. Its reform proposals and the austerity measures, however, provoked strike action and street protests in 2012. Having been granted an additional year by the IMF and EU to meet deficit targets, Coelho's government presented a draft budget in Oct. providing for further retrenchment, which was passed by parliament the following month.

#### **DEFENCE**

Conscription was abolished in Nov. 2004. Portugal now has a purely professional army.

In 2008 defence expenditure totalled US\$3,729m. (US\$349 per capita), representing 1.5% of GDP.

#### **Army**

Strength (2007) 26,700. There are Army reserves totalling 210,000. Paramilitary forces include the National Republican Guard (26,100) and the Public Security Police (21,600).

#### **Navy**

In 2007 the combatant fleet comprised one French-built diesel submarine, 12 frigates and seven corvettes. Naval personnel in 2007 totalled 9,110 including 335 recalled reservists and 1,725 marines. There were 900 naval reserves.

#### **Air Force**

The Air Force in 2007 had a strength of 7,100. There were 25 combat-capable aircraft (mainly F-16s).

#### **ECONOMY**

Services accounted for about 73% of GDP in 2007, industry 24% and agriculture 3%.

#### **Overview**

The economy has suffered badly as a result of the global financial downturn and the eurozone crisis. The economy grew by only 1% between 2003 and 2012 and entered its eighth quarter of recession at the start of 2013. Unemployment in 2010 stood at 15.5%.

Since the 1980s the economy has become increasingly dependent on services, which accounted for 74.5% of GDP in 2011. Low productivity, weak competitiveness and high debt have hindered growth and led to high fiscal imbalances. The deficit was set to reach 120% of GDP by the end of 2013.

In April 2011 the government applied to the European Commission for financial assistance to avoid a debt default. The Extended Fund Facility for Portugal was agreed in May 2011, providing €78bn. (US\$116bn.) over three years, funded by the European Union, the European Central Bank and the IMF. Income tax rose from 24.5% to 28.5% with effect from Jan. 2013 to meet the terms of the bailout, with a resulting squeeze on living standards and reduced consumer spending. Poor employment prospects and lower living standards have resulted in increased emigration rates—including to the oil-rich former Portuguese colony of Angola—prompting fears of a brain drain.

Required by the bailout to sell €5bn. worth of state assets, the government has undertaken a 'fire sale' of publicly owned companies to foreign investors. This resulted, for instance, in 21%

of the utility company Energias de Portugal being bought by the Chinese Three Gorges firm and 25% of the state electric grid being sold to the Chinese State Grid.

The sovereign debt crisis in the eurozone threatens recovery and with Spain accounting for a fifth of Portuguese exports, instability in the Spanish economy has knock-on effects in Portugal. However, Portugal re-entered the bond market in Jan. 2013 (owing to lower borrowing costs and the ten-year bond yield falling back to pre-recession levels of 7%) with the hope of increasing confidence in the wider economy.

### Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Portugal at the irrevocable conversion rate of 200:482 escudos to 1 euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the escudo ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €10.6bn.

Inflation rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 3.7% | 3.3% | 2.5% | 2.1% | 3.0% | 2.4% | 2.7% | -0.9% | 1.4% | 3.6% |

Gold reserves were 12.30m. troy oz in Sept. 2009 and foreign exchange reserves US\$774m. Total money supply was €52,659m. in Aug. 2009.

### Budget

In 2008 central government revenues totalled €62,321m. and expenditures €68,413m. Taxes accounted for 59.4% of revenues in 2008 and social contributions 31.1%; social benefits accounted for 46.3% of expenditures and compensation of employees 24.6%.

Portugal's budget deficit in 2011 was 4.2% of GDP (2010, 9.8%; 2009, 10.2%). The required target set by the EU is a budget deficit of no more than 3%.

The standard rate of VAT is 23.0% (reduced rates, 13% and 6%).

### Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003  | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011  |
|------|-------|------|------|------|------|------|-------|------|-------|
| 0.8% | -0.9% | 1.6% | 0.8% | 1.4% | 2.4% | 0.0% | -2.9% | 1.4% | -1.7% |

In the years since Portugal joined the European Union its GDP per head has risen from being 53% of the EU average to 80% in 2010. Portugal's total GDP in 2011 was US\$237.4bn.

### Banking and Finance

The central bank and bank of issue is the Bank of Portugal, founded in 1846 and nationalized in 1974. Its *Governor* is Carlos Costa.

In 2006 there were 5,039 branches of banks and savings banks and 676 branches of agricultural credit co-operatives. Deposits in all monetary establishments totalled €146.7bn. in 2006. The largest Portuguese bank is the state-owned Caixa Geral de Depósitos, with assets of €111.1bn. in 2008. Other major banks are Banco Comercial Português, Banco Espírito Santo and Banco Português de Investimento.

Gross external debt amounted to US\$485,816m. in June 2012.

There are stock exchanges in Lisbon and Porto.

### ENERGY AND NATURAL RESOURCES

In 2008, 23.2% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 31% has been set by the EU for 2020.

### Environment

Portugal's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 5.4 tonnes per capita.

### Electricity

Installed capacity was 15m. kW in 2007. Production in 2007 was 47.25bn. kWh; consumption per capita was 5,160 kWh.

### Minerals

Portugal possesses considerable mineral wealth. Production in tonnes (2005): limestone, marl and calcite, 51,025,000; granite (2006), 27,489,000; marble, 752,000; salt, 597,945; kaolin, 164,072; copper, 89,541; tungsten, 816.

### Agriculture

There were 274,563 agricultural holdings in 2007. The agricultural sector employs 11.6% of the workforce. In 2007 there were 1.08m. ha. of arable land and 796,000 ha. of permanent crops.

The following figures show the production (in 1,000 tonnes) of the chief crops:

Animal products in 2007 (1,000 tonnes): meat, 844.8; eggs, 121.6; cheese, 79.5; milk, 2,029m. litres.

### Forestry

Forests covered 3.46m. ha. (38% of the land area) in 2010. Portugal is the world's largest producer of cork, averaging 157,000 tonnes annually. Timber production was 10.80m. cu. metres in 2007.

### Fisheries

The fishing industry is important, although much less so than in the past, and the Portuguese eat more fish per person than in any other European Union member country (more than twice the EU average). In 2006 there were 8,754 registered fishing vessels (7,153 with motors) and 17,261 registered fishermen. The catch was 141,683 tonnes in 2006 (almost exclusively from marine waters).

The 2006 fishing catch consisted of:

| Species   | Tonnes  | Value (in €1m.) |
|-----------|---------|-----------------|
| Sardine   | 48,096  | 26,334          |
| Mackerel  | 30,486  | 23,235          |

In 2006 the number of vehicles registered included 5,234,500 passenger cars, 535,300 motorcycles and mopeds, 119,000 lorries and vans and 29,700 buses and coaches. In 2007 there were 854 deaths in road accidents.

### Rail

In 2008 total railway length was 2,842 km. Passenger-km travelled in 2008 came to 3.81bn. and freight tonne-km to 2.55bn. There is a metro (19 km) and tramway (94 km) in Lisbon. New light rail systems were opened in Porto in 2002 and Almada in 2007.

## Civil Aviation

There are international airports at Portela (Lisbon), Pedras Rubras (Porto), Faro (Algarve) and Funchal (Madeira). The national carrier is the state-owned TAP-Air Portugal, with some domestic and international flights being provided by Portugália. In 2006 scheduled airline traffic of Portuguese-based carriers flew 171m. km, carrying 9,449,000 passengers (6,449,000 on international flights). In 2007 Lisbon handled 13,393,000 passengers (11,249,000 on international flights) and 82,645 tonnes of freight. Faro was the second busiest in terms of passenger traffic, with 5,471,000 passengers, and Porto was the second busiest for freight, with 31,991 tonnes.

## Shipping

In 2007, 15,226 vessels of 151.82m. tonnes entered all Portuguese ports; 367,391 passengers embarked and 368,095 disembarked during 2007. 21.17m. tonnes of cargo were loaded in 2007 and 47.05m. tonnes unloaded. In Jan. 2009 there were 154 ships of 300 GT or over registered, totalling 981,000 GT.

## Telecommunications

Portugal Telecom (PT) was formed from a merger of three state-owned utilities in 1994. It is now fully privatized. In 2008 there were 4,111,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 14,910,000 (1,396.4 per 1,000 persons). There were 4.5m. internet users in 2008. There were 19.8 broadband subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 4.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

There are four judicial districts (Lisbon, Porto, Coimbra and Évora) divided into 58 circuits. In 2007 there were 335 courts, including 329 common courts of first instance. There are also six higher courts (five courts of appeal and a Supreme Court in Lisbon).

Capital punishment was abolished completely in the constitution of 1976.

In 2006 there were 54 prisons with an inmate capacity of 12,115. The population in penal institutions in Nov. 2008 was 11,017 (104 per 100,000 of national population).

### Education

Adult literacy rate was an estimated 94.9% in 2009. Compulsory education has been in force since 1911.

In 2007 there were 263,887 children in pre-school establishments with 16,599 teaching staff, 753,646 pupils in primary schools with 64,274 teaching staff and 680,338 pupils in secondary schools with 92,965 teaching staff.

In 2006 public tertiary education institutions included 14 universities and a non-integrated university institution; 15 polytechnics and a number of polytechnic schools integrated in universities; 9 non-integrated nursing schools; 4 university-level military schools; and 5 polytechnic military schools. In the private sector there were 34 university level institutions and 66 polytechnics as well as a Catholic university. Portugal's oldest university is the University of Coimbra (Universidade de Coimbra), initially established in Lisbon in 1290; its largest is the University of Porto (Universidade do Porto), with 27,184 students in 2007–08. In 2007 there were 366,729 students in higher education with 36,069 academic staff.

### World Heritage Sites

(With year entered on list). In the Central Zone of the Town of Angra do Heroísmo in the Azores (1983) are the fortresses of San Sebastião and San Filipe, the latter built around 1590 on the orders of King Phillip II of Spain. The Monastery of the Hieronymites was built at the turn of the 16th century in Belém, Lisbon, while the capital's Tower of Belém was constructed as a monument to Vasco da Gama's explorations (1983 and 2008). The Monastery of Batalha (1983) near Leiria was built from 1388. The Convent of Christ in Tomar (1983) was originally built in 1160 as the centre of the Templar order. It was taken over by the Order of Christ in 1360 of which Henry the Navigator was made governor in 1418, and was greatly enriched in the 16th century. Other sites are the medieval walled Historic Centre of Évora (1988), the Gothic Cistercian 12th century Monastery of Alcobaça, north of Lisbon (1989), the Cultural Landscape of Sintra (1995), the Historic Centre of Porto (1996) and the Laurisilva of Madeira (1999), an area of biodiverse laurel forest. In 2001 two more sites were added: the Alto Douro Wine Region, famous for its port wine since the 18th century, and the Historic Centre of Guimarães, a town closely associated with the formation of Portuguese identity. The Landscape of the Pico Island Vineyard Culture followed in 2004. The Garrison Border Town of Elvas and its Fortifications (2012) houses the remains of an enormous war fortress, extensively fortified from the 17th to 19th centuries. It is the largest bulwarked dry ditch system in the world.

The Prehistoric Rock Art Sites in the Côa Valley and Siega Verde (1998) is shared with Spain.

### Press

## KEY HISTORICAL EVENTS

Qatar has rock carvings, inscriptions and fragments of pottery dating from 4000 BC. The early population was swelled by seasonal migration of Arab tribes and the peninsula became a centre for fishing and pearls. Commercial activity declined in the Roman era, when trade was concentrated in the Red Sea, but recovered in the 3rd century AD.

Islam was established in Qatar in the mid-7th century AD. During the Abbasid period (750–1258) Qatar enjoyed strong relations with the Caliphs in Baghdad. After briefly coming under Portuguese influence in the early 16th century, Qatar fell under Ottoman sovereignty. For the next four centuries it was nominally part of the Ottoman Empire, though considerable power remained with local tribal sheikhs.

Pearling and trading settlements were established along the coast in the 18th century, which also saw the rise of the Al Thani family who were originally from Saudi Arabia. In the mid-19th century Sheikh Mohammed bin Thani moved the family to the

growing coastal town of Doha and established control of the surrounding region. Territorial disputes with the Al Khalifa family in neighbouring Bahrain led to a war in 1867 in which Doha was almost destroyed. The British intervened to recognize the Al Thani family as rulers of Qatar and in 1878 Sheikh Mohammed was succeeded by his son, Sheikh Qassim, who became the first Amir. With the collapse of the Ottoman Empire during the First World War, Qatar came under British rule. Under the treaties of 1916 and 1934 Qatar ceded Britain control over its external affairs in return for British military protection.

Oil was discovered in 1939 and, after a delay caused by the Second World War, exports began in 1949. In Dec. 1961 Qatar joined the Organization of the Petroleum Exporting Countries (OPEC). In 1968 British troops left Qatar and in 1970 Qatar adopted a constitution confirming the emirate as an absolute monarchy. It led negotiations to establish a union of Arab emirates but terms could not be agreed. On 3 Sept. 1971 Qatar assumed full independence under the rule of Sheikh Ahmad and joined the Arab League and the United Nations. In 1972 Sheikh Ahmad was ousted in a coup and chief minister Sheikh Khalifa bin Hamad Al Thani assumed power.

The discovery in 1971 of a large offshore oil field gave further impetus to the economy and Qatar rapidly developed a modern infrastructure, building up its health and education services. In 1981 it was a founder member of the Gulf Co-operation Council (GCC) and in 1988 established diplomatic relations with the USSR and the People's Republic of China. Qatar allied itself with Saudi Arabia on many regional and international issues and in 1991 joined the US-led international alliance against Iraq following the invasion of Kuwait.

In Jan. 1992 pressure for political reform culminated in demands from 50 prominent Qataris for a consultative assembly. On 27 June 1995 Amir Sheikh Khalifa was ousted by his son, Sheikh Hamad, who announced plans to introduce democratic reforms. In 1996 he survived an assassination attempt, part of an abortive attempt to restore his father to power. In 1996 the Arabic-language news agency Al-Jazeera was established in Doha, with the Amir's personal support and state financial backing. The station has won widespread respect and influence, despite pressure from some powers to tone down what is seen as an anti-West bias.

In 2001 a long-standing territorial dispute between Qatar and Bahrain was settled by the International Court of Justice, with Qatar recognizing Bahrain's sovereignty over the Hamar Islands in return for Bahrain renouncing claims on parts of mainland Qatar. In 2003 Qatar supported the UN-backed, American- and British-led invasion of Iraq, with Doha hosting the coalition headquarters.

In recent years Qatar's economy has grown rapidly. In 2003 a referendum was held to approve the country's constitution, which provides for a parliament with 30 elected and 15 appointed members. In the same year Qatar's first female minister, Sheikha Ahmad Al Mahmoud, was appointed.

## TERRITORY AND POPULATION

Qatar is a peninsula running north into the Persian Gulf. It is bounded in the south by Saudi Arabia. The territory includes a number of islands in the coastal waters of the peninsula, the most important of which is Halul, the storage and export terminal for the offshore oilfields. The area of Qatar is 11,571 sq. km. Population at the census of April 2010, 1,699,435; density 146.9 per sq. km. In 2011, 95.9% of the population lived in urban areas.

The UN gives a projected population for 2015 of 2.03m.

Areas and populations of the seven municipalities:

| Municipalities | Sq. km | 2010 census population |
|----------------|--------|------------------------|
| Doha           | 234    | 796,947                |
| Al Rayyan      | 5,818  | 445,623                |
| Al Khour       | 1,551  | 193,983                |
| Al Wakra       | 2,520  | 141,222                |
| Umm Salal      | 310    | 60,509                 |
| Al Daayen      | 236    | 43,176                 |
| Al Shamal      | 902    | 7,975                  |

The capital is Doha, which is the main port, and had a census population in 2010 of 521,283. Other towns are Dukhan (the centre of oil production), Umm Said (the oil terminal of Qatar), Ruwais, Wakra, Al Khour, Umm Salal Mohammad and Umm Bab.

About 40% of the population are Arabs, 18% Indian, 18% Pakistani and 10% Iranian. Other nationalities make up the remaining 14%. Only about 20% of the population are Qatari citizens.

The official language is Arabic.

### CONSTITUTION AND GOVERNMENT

Qatar is ruled by an *Amir*. HH Sheikh Hamad bin Khalifa Al Thani, KCMG (b. 1952) assumed power after deposing his father on 27 June 1995. The heir apparent was Sheikh Hamad's third son, Sheikh Jasim bin Hamad Al Thani (b. 1978), but in Aug. 2003 he named his fourth son, Sheikh Tamim bin Hamad Al Thani (b. 1979), as heir apparent instead.

Qatar's first written constitution was approved in June 2004 and came into force on 9 June 2005. It allows for a 45-member *Consultative Assembly* or *Majlis al-Shura*, with 30 members directly elected and 15 appointed by the Amir.

A *Council of Ministers* is assisted by a 35-member nominated Advisory Council.

### National Anthem

'As-Salam Al-Amiri' ('Peace for the Amir'); words by Sheikh Mubarak bin Saif al-Thani, tune by Abdul Aziz Nasser Obaidan.

### GOVERNMENT CHRONOLOGY

Amirs since 1971.

### CURRENT LEADERS

#### Sheikh Hamad bin Khalifa Al Thani

#### Position

Amir

#### Introduction

Sheikh Hamad is the eighth member of the Al Thani family to rule Qatar, having seized power from his father, Sheikh Khalifa, on 27 June 1995.

#### Early Life

Born in Doha in 1952, Hamad graduated from the Royal Military Academy, Sandhurst in 1971. He then joined the Qatari military with the rank of major. In 1975 he was promoted to major-general and commander-in-chief of the armed forces. On his appointment as Crown Prince and heir apparent in May 1977, he also became minister of defence.

#### Career in Office

Having ousted his father in 1995, Hamad appointed himself prime minister. However, in Oct. 1996 he relinquished the premiership to his younger brother, Sheikh Abdallah. The Amir is credited with initiating plans for an elected consultative council (through the new constitution which he approved in 2004 and which took effect in June 2005), giving women the right to vote in municipal elections (from 1999) and ending official media censorship. He has also encouraged foreign investment in Qatar's oil and natural gas industries.

In Aug. 2003 he named his fourth son as his heir apparent, and in April 2007 appointed his foreign minister and cousin, Sheikh Hamad bin Jasim bin Jabir Al Thani, prime minister. To pre-empt pressure for political liberalization in the wake of the discontent that spread across much of the Arab world from early 2011, Hamad announced in Nov. that year that elections to Qatar's Advisory Council would be held in 2013 although by April 2013 no fixed date had been set.

In foreign relations he has overseen the resolution of long-standing border disputes with Bahrain and Saudi Arabia. In 2011 Qatar was involved in international military operations against the Gaddafi regime in Libya, a fellow Arab state. The country's profile on the world stage was raised in Dec. 2010 when it successfully bid to host the football World Cup finals in 2022. In Sept. 2012 Hamad called on Arab nations to form a coalition to intervene in the Syrian conflict, and in Oct. he made the first visit to Gaza by a head of state since the Hamas government took control of the Palestinian territory.

### DEFENCE

Defence expenditure in 2008 totalled US\$1,756m. (US\$2,129 per capita), representing 1.8% of GDP. The expenditure per capita in

2008 was the fourth highest in the world after that of the United Arab Emirates, Kuwait and the USA.

#### Army

Personnel (2007) 8,500.

#### Navy

Personnel in 2007 totalled 1,800 including Marine Police; the base is at Doha.

#### Air Force

The Air Force operates 18 combat-capable aircraft (including Mirage 2000 fighters), 11 attack helicopters and 14 other helicopters. Personnel (2007) 1,500.

### INTERNATIONAL RELATIONS

In March 2001 the International Court of Justice ruled on a long-standing dispute between Bahrain and Qatar over the boundary between the two countries and ownership of certain islands. Both countries accepted the decision.

### ECONOMY

Oil, natural gas and other mining accounted for 62% of GDP in 2006, public administration and defence 9%, finance and real estate 8% and manufacturing 7%.

#### Overview

Qatar is an oil and natural gas exporter; with 13% of world supply and an oil production capacity of 800,000 bbls a day. Qatar has welcomed foreign investment in the development of its gas fields over the last decade and became the world's leading liquefied natural gas exporter in 2007. Oil and gas contribute 50% of GDP, 85% of export earnings and 70% of government revenues.

Considered to be one of the most competitive economies in the world, Qatar is highly rated by credit agencies. The economy is open, barriers to trade are low and no income taxes are levied. There has been double-digit growth every year since 2006. Japan is the main export market accounting for 25.7%, followed by South Korea (17.7%) and India (9.6%). Manufacturing, construction, commercial ship repairs, the air industry and financial services are leading non-energy sector industries.

Tourism has also thrived, with the country aiming to rival Dubai as a regional destination. Construction has boomed on the back of the expansion of Doha International Airport, while preparations for the 2022 football World Cup include infrastructural spending on a Metro system and the Qatar-Bahrain Causeway.

Qatar also aims to compete with Bahrain and Dubai in establishing itself as a regional financial centre, and is home to branches of leading universities including Georgetown, Carnegie Mellon and Weill Cornell Medical College.

#### Currency

The unit of currency is the *Qatari riyal* (QAR) of 100 *dirhams*, introduced in 1973. Foreign exchange reserves were US\$4,370m. In July 2005, gold reserves were 19,000 troy oz and total money supply was 19,159m. riyals. There was deflation of 2.4% in 2010 but inflation of 1.9% in 2011.

In 2001 the six Gulf Arab states—Qatar, along with Bahrain, Kuwait, Oman, Saudi Arabia and the United Arab Emirates—signed an agreement to establish a single currency by 2010. In June 2009 it was agreed to postpone the implementation of the new currency, the *khaleeji*, until 2013. It has since been put back further still. Both Oman and the United Arab Emirates have now withdrawn from the scheme, in 2007 and 2009 respectively.

#### Budget

The fiscal year is 1 April–31 March. Revenue (2009–10) 154,674m. riyals; expenditure, 108,085m. riyals. Oil and natural gas account for about 45% of revenues.

### Performance

In terms of GDP per head, Qatar ranks among the richest countries in the world with a purchasing power parity (PPP) per capita GDP of 77,568 current international dollars in 2009. Qatar has been experiencing a period of rapid economic expansion, driven by rising oil prices and the increased exploitation of its natural gas reserves, the third largest in the world. Real GDP growth was 12.0% in 2009 and 16.7% in 2010—the highest rate of any country. Total GDP was US\$173.0bn. in 2011, when the economy grew by 14.1%.

### Banking and Finance

The Qatar Monetary Agency, which functioned as a bank of issue, became the Central Bank in 1995 (*Governor*, Abdullah bin Saud Al-Thani). In 2003 there were eight commercial domestic banks and seven foreign banks. The largest bank is the Qatar National Bank, with assets in 2008 of US\$41.8bn.

A stock exchange was established in Doha by the Amir's decree in 1995.

### ENERGY AND NATURAL RESOURCES

#### Environment

Qatar's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 74.1 tonnes per capita, the highest of any sovereign country.

#### Electricity

Installed capacity was an estimated 3.2m. kW in 2007. Production was 16.08bn. kWh in 2007; consumption per capita was 13,113 kWh.

#### Oil and Gas

Proven reserves of oil (2008) 27.3bn. bbls. Output, 2008, 60.8m. tonnes. Production rose by 13.2% in 2008 compared to 2007—the largest increase of any oil producing country.

The North Field, the world's biggest single reservoir of gas and containing 12% of the known world gas reserves, is half the size of Qatar itself. Development cost is estimated at US\$25bn. In 2008 natural gas reserves were 25,460bn. cu. metres (the third largest after Russia and Iran); output in 2008 was 76.6bn. cu. metres.

#### Agriculture

In 2002, 1.2% of the economically active population were engaged in agriculture. An estimated 13,000 ha. were irrigated in 2002. There were approximately 18,000 ha. of arable land in 2002 and 3,000 ha. of permanent crops. Production (2002) in 1,000 tonnes: dates, 16; tomatoes, 11; pumpkins and squash, 8; aubergines, 5; barley, 5; cucumbers and gherkins, 5; melons and watermelons, 5; onions, 4.

Livestock (2003 estimates): sheep, 200,000; goats, 180,000; camels, 51,000; cattle, 15,000; chickens, 4m. Livestock products, 2003 estimates (in 1,000 tonnes): meat, 15; milk, 22; eggs, 4.

#### Fisheries

The catch in 2010 totalled 13,760 tonnes, entirely from sea fishing—down from 17,688 tonnes in 2008 although up from 7,140 tonnes in 2000.

### INDUSTRY

The leading companies by market capitalization in Qatar in March 2012 were Qatar National Bank (US\$26.3bn.); and Industries Qatar, a producer of petrochemicals, fertilizer and steel (US\$21.4bn.).

Production (2005, in 1,000 tonnes): urea, 2,979; ammonia, 2,134; petrol, 1,656; butane, 1,075; cement, 1,049; distillate fuel oil, 926; jet fuel, 905; steel bars, 791; ethylene, 544; residual fuel oil, 418; polyethylene, 415. There is an industrial zone at Umm Said.

#### Labour

In 2011 the economically active population totalled 1,271,100. Males constituted 88% of the labour force in 2011; foreigners

make up 94% of the workforce. Qatar has the lowest percentages of females in the workforce of any country.

### INTERNATIONAL TRADE

Qatar, along with Bahrain, Kuwait, Oman, Saudi Arabia and the United Arab Emirates entered into a customs union in Jan. 2003.

### Imports and Exports

Total imports and exports in calendar years (in US\$1m.):

|         | 2003     | 2004     | 2005     | 2006     |
|---------|----------|----------|----------|----------|
| Imports | 4,897.4  | 6,004.6  | 10,060.9 | 16,440.1 |
| Exports | 13,382.6 | 18,685.1 | 25,762.5 | 34,051.3 |

The main imports are machinery and equipment, consumer goods, food and chemicals. Main exports are petroleum and petroleum products (52%) and liquefied natural gas (35%). Qatar is by far the world's largest exporter of liquefied natural gas. Principal import suppliers in 2004: France, 26.7%; USA, 9.6%; Saudi Arabia, 9.5%. Leading export markets, 2004: Japan, 41.6%; South Korea, 15.7%; Singapore, 9.1%.

### COMMUNICATIONS

#### Roads

In 2007 there were about 7,790 km of roads. Vehicles in use in 2007 totalled 605,700. In 2007 there were 199 fatalities as a result of road accidents.

#### Civil Aviation

Gulf Air was formed as a partnership between Qatar, Bahrain, Oman and Abu Dhabi, but Qatar withdrew in 2002 (and Abu Dhabi and Oman have withdrawn in the meantime). In 2003 it operated services from Doha International to Abu Dhabi and Bahrain. A Qatari airline, Qatar Airways, operates on the same routes, and in 2003 additionally flew to Amman, Bangkok, Beirut, Cairo, Casablanca, Colombo, Damascus, Dammam, Dhaka, Dubai, Frankfurt, Hyderabad, Islamabad, Jakarta, Jeddah, Karachi, Kathmandu, Khartoum, Kochi, Kuala Lumpur, Kuwait, Lahore, London, Malé, Manchester, Manila, Milan, Mumbai, Munich, Muscat, Paris, Peshawar, Riyadh, Salalah, Sana'a, Sharjah and Thiruvananthapuram. In June 2003 Qatar Airways commissioned 32 aircraft worth US\$5.1bn. from Airbus SAS. Doha handled 2,759,000 passengers (all on international flights) and 64,000 tonnes of freight in 2001.

#### Telecommunications

In 2008 there were 263,400 main (fixed) telephone lines; mobile phone subscribers numbered 1,683,000 in 2008 (131.4 per 100 persons). There were 436,000 internet users in 2008. In March 2012 there were 481,000 Facebook users.

### SOCIAL INSTITUTIONS

#### Justice

The Judiciary System is administered by the Ministry of Justice which comprises three main departments: legal affairs, courts of justice and land and real estate register. In 2004 a High Judicial Council was established to oversee the court system, which as a result of a new Judicial Authority Law that took effect at the same time comprises the Court of Cassation, the Court of Appeal and the Court of First Instance. The courts proclaim sentences in the name of HH the Amir. The death penalty is in force. There was one execution in 2003, but none since. The population in penal institutions in Dec. 2008 was 551 (43 per 100,000 of national population).

All issues related to personal affairs of Muslims under Islamic Law embodied in the Holy Koran and Sunna are decided by Sharia Courts.

### Education

Adult literacy rate was 94.7% in 2009. There were, in 2007, 75,451 pupils at primary schools (with 6,639 teaching staff in 2006), 61,226 pupils at secondary schools (6,200 teaching staff in 2006) and 8,881 students with 1,153 academic staff in higher education. There were 265 Arab and foreign private schools with 56,183 pupils and 4,092 teachers in 2002–03. The University of Qatar had 8,801 students in 2008 and 637 full-time academic staff in 2007–08. Education City, a campus built in the outskirts of Doha, houses branches of eight prestigious international universities along with the Qatar Faculty of Islamic Studies.

Students abroad (2003–04) numbered 374. In 2002–03, 2,009 men and 940 women attended night schools and literacy centres.

In 2005 public expenditure on education accounted for 19.6% of total government spending.

### Health

There were three government and two private hospitals in 2002. In 2005 there were 2,150 physicians, 1,100 pharmacists, 690 dentists and 4,880 nursing and midwifery personnel.

### RELIGION

The population is predominantly Muslim, although there is a small Christian minority among expatriates.

### CULTURE

#### Press

There are three Arabic language daily newspapers—*Al-Rayah*, *Al-Sharq* and *Al-Watan*. *The Gulf Times* and *Al-Jazeera* (The Peninsula) are English dailies. In 2006 the combined circulation was 81,000.

#### Tourism

In 2008, 1,405,000 non-resident tourists stayed in hotels (964,000 in 2007).

## KEY HISTORICAL EVENTS

Neolithic peoples with links to Anatolia settled from 5000 BC at Lake Golovita, close to Romania's Black Sea coast. The subsequent Boian culture spread across the lower Danube valley by 3500 BC. Later, Indo European peoples, collectively known as the Thracians, entered the Carpathian-Balkan region. The Dacii (or Getae to the Greeks, who had established colonies on the western Black Sea coast by the 7th century BC) occupied much of present-day Romania. Dacian power grew under King Burebista (82–44 BC), attracting Roman attention. In AD 106 the Roman emperor Trajan succeeded in making the kingdom a frontier province.

Under Barbarian attack, in 271 Emperor Aurelian withdrew the Roman Army and administration south of the Danube to Dobrogea (Constanța), although much of Dacia remained in the Roman-Byzantine sphere through trade along the Danube. As Rome's influence waned, Dacia was populated between the 3rd and 9th centuries by tribes from the Steppes to the east, including Goths, Huns, Avars, Bulgars and Magyars. Magyar power was centred on Transylvania and for most of the 10th–13th centuries it was a Hungarian dependency. Mongol Invasion in 1241 was followed by the foundation of the feudal 'Danubian Principalities' of Wallachia and Moldavia in the late 13th and early 14th centuries. In 1415, under Prince Mircea, Wallachia became a vassal of the Ottoman Empire, although retaining some independence. Prince Vlad Țepeș (known as Dracula) ruled Wallachia from 1456–62 and Stephen the Great reigned in Moldavia from 1457–1504.

Following the Magyar defeat at the battle of Mohács in 1526, Transylvania came under Ottoman vassalage. Moldavia succumbed to Ottoman domination in 1538. Michael the Brave,

ruler of Wallachia from 1593, defeated an Ottoman invasion in 1595 and conquered Transylvania four years later. In 1600 he briefly unified the three Romanian provinces. Several independent princes then ruled Transylvania in the 17th century until the Habsburgs expanded eastward in the 1680s. In 1686, through the Treaty of Vienna, Transylvania accepted Habsburg protection under Leopold I. In Wallachia, the late 17th century saw prolonged struggle against Ottoman rule, with Princes Cantacuzino and Brâncoveanu even negotiating with the Austrian and Russian Empires. The Ottomans responded by backing the suzerainty of the Istanbul-based Phanariots, whose rule included phases of corruption and enlightened reform. Prince Mavrocordat abolished serfdom in 1746. The treaty of Kuchuk Kainarji (1774) boosted Russian influence in Wallachia and Moldavia.

Phanariot rule ended in 1821, following a revolt led by Tudor Vladimirescu and the outbreak of the Greek War of Independence. Local princes were reinstated in Wallachia and Moldavia. The 1829 Treaty of Adrianople that concluded the Russo-Turkish war prompted Russian repression in the principalities. Transylvania remained under Habsburg influence until revolution in all three provinces in 1848, sparked by opposition to foreign rule and the power of local landowners (*boyars*). That year the Diet of Cluj voted for union between Transylvania and the other three provinces of Hungary. Support grew for the union of Moldavia and Wallachia. The election of Alexander Cuza as prince of both territories in 1859 paved the way for union as Romania in 1862, with Bucharest as its capital. In 1866 Carol of Hohenzollern was crowned and adopted a constitution based on that of Belgium. Romania was declared independent by the Treaty of Berlin of 1878.

Despite economic expansion, the peasantry remained downtrodden and rebelled in 1907. Romania joined the First World War on the allied side in 1916. Victory brought Transylvania (with large Hungarian and German populations), Bessarabia, Bucovina and Dobruja into the union with the 'Old Kingdom'. The world recession then drew Romania into Germany's economic orbit. The fascist Iron Guard assassinated Liberal leader Ion G. Duca in 1933 and King Carol II became increasingly totalitarian. Following Nazi and Soviet annexations of Romanian territory in 1940, he abdicated in favour of his son Mihai. The fascist government of Ion Antonescu declared war on the USSR on 22 June 1941 but on 23 Aug. 1944 Mihai, with the backing of opposition parties, deposed Antonescu and switched sides.

The armistice of Sept. 1944 gave the Soviet army control of Romania. This, and the 'spheres of influence' diplomacy of the Allies, ensured Romania's communist future. Transylvania was restored to Romania (although it lost Bessarabia and Northern Bucovina), and large estates were broken up for the benefit of the peasantry. Following elections in Nov. 1946, marred by intimidation and fraud, Mihai was forced to abdicate and a People's Republic proclaimed. The communist leader, Gheorghe Gheorghiu-Dej, purged his fellow leaders in the early 1950s. Under Nicolae Ceaușescu, who became the centre of power in 1965, Romania took a relatively independent stand in foreign affairs while domestic repression and impoverishment increased.

In Dec. 1989 there were mass demonstrations, backed by the army, against the government. Ceaușescu fled the capital and the National Salvation Front (FSN) proclaimed itself the provisional government. Ceaușescu and his family were captured, secretly tried and, on 25 Dec., executed. A day later the FSN's Ion Iliescu became president, overseeing a reformist administration inhibited by its communist origins.

With the economy stalled, a four-party coalition led by Emil Constantinescu came to power in 1996. Iliescu returned as

president in 2000 and in 2004 was replaced by Traian Băsescu. On 1 Jan. 2007 Romania joined the EU. An IMF-led bail-out followed the global economic crisis of late 2008. In Dec. 2009 Băsescu was re-elected president and Emil Boc formed a new coalition government. However, Boc resigned in Feb. 2012 amid widespread protests against austerity measures. Mihai-Răzvan Ungureanu replaced him as premier but left office in May 2012 after losing a confidence vote. Victor Ponta of the Social Democratic Party succeeded him as prime minister.

## TERRITORY AND POPULATION

Romania is bounded in the north by Ukraine, in the east by Moldova, Ukraine and the Black Sea, south by Bulgaria, southwest by Serbia and northwest by Hungary. The area is 238,391 sq. km. Population (2011 census, provisional), 19,042,936; density, 79.9 per sq. km. The United Nations estimate for 2011 was 21,436,000. In 2011, 58.0% of the population lived in urban areas. Romania's population has been falling at such a steady rate since 1990 that its population at the time of the 2002 census was the same as that in the late 1970s.

The UN gives a projected population for 2015 of 21.24m.

Romania is divided into 41 counties (*județ*) and the municipality of Bucharest (București).

## CONSTITUTION AND GOVERNMENT

A new constitution was approved by a referendum on 18–19 Oct. 2003. Turnout was 55.7%, and 89.7% of votes cast were in favour. The Constitution, which replaces the previous one from 1991, defines Romania as a republic where the rule of law prevails in a social and democratic state. Private property rights and a market economy are guaranteed. The new pro-European constitution was aimed at helping Romania achieve EU membership.

The head of state is the *President*, elected by direct vote for a maximum of two five-year terms. The president is not allowed to be affiliated with any political party while in office. The President appoints the *Prime Minister*, who then has to be approved by a vote in parliament. The President is empowered to veto legislation unless it is upheld by a two-thirds parliamentary majority. The National Assembly consists of a 412-member *Chamber of Deputies* and a 176-member *Senate*; both are elected for four-year terms from 43 constituencies through a proportional mixed member system. 18 seats in the Chamber of Deputies are reserved for ethnic minorities. There is a 3% threshold for admission to either house. Votes for parties not reaching this threshold are redistributed.

There is a *Constitutional Court*.

## National Anthem

'Desteaptăte, Române, din somnul cel de moarte' ('Wake up, Romanians, from your deadly slumber'); words by A. Muresianu, tune by A. Pann.

In the first round President Traian Băsescu of the Democratic Liberal Party (PD-L) received 32.4% of votes cast, Mircea Geoană of the Social Democratic Party (in alliance with the Conservative Party) (PSD-PC) 31.2%, Crin Antonescu of the National Liberal Party (PNL) 20.0% and Corneliu Vadim Tudor of the Greater Romania Party 5.6%. There were eight other candidates. In the second round run-off Băsescu retained the presidency with 50.3% of the vote against 49.7% for Geoană. However, the opposition contested the results and accused Băsescu of ballot-rigging.

In parliamentary elections held on 9 Dec. 2012 the Social Liberal Union (USL) alliance—including the Social Democratic Party and the National Liberal Party—took 273 seats (58.6% of the vote) in the lower house and 122 (60.1% of the vote) in the Senate, the Right Romania Alliance—including the Democratic Liberal Party—56 seats (16.5%) and 24 (16.7%), the People's Party–Dan Diaconescu 47 seats (14.0%) and 21 (14.6%), and the Democratic Union of Hungarians in Romania (UDMR) 18 seats (5.2%) and 9 (5.3%). Turnout was 41.7%.

**European Parliament**

Romania has 33 (35 in 2007) representatives. In June 2009 elections, turnout was 27.7% (29.5% in 2007). The PSD-PC won 11 seats with 31.1% of the vote (political affiliation in European Parliament: Progressive Alliance of Socialists and Democrats), the PD-L 10 seats with 29.7% (European People's Party), the PNL 5 seats with 14.5% (Alliance of Liberals and Democrats for Europe), the UDMR 3 seats with 8.9% (European People's Party), Greater Romania Party 3 seats with 8.7% (non-attached) and independents 1 seat with 4.2% (European People's Party).

President

*Introduction*

Traian Băsescu, a former ship's captain and mayor of Bucharest, successfully fought the country's 2004 presidential elections on an anti-corruption platform. He took over from Ion Iliescu, who had served as president for much of the post-communist period. Băsescu was suspended from office in April 2007 but resumed his role a month later after a national referendum supported his reinstatement. He was narrowly re-elected in Dec. 2009.

*Early Life*

Băsescu was born in the village of Basarabi near the Romanian port of Constanța on 4 Nov. 1951. He studied at the Marine Institute in Constanța, graduating in 1976. He then joined the merchant navy, controlled in Romania's communist era by NAVROM, and worked his way through the ranks, becoming a captain in 1981. He went on to captain some of the country's largest merchant ships and was promoted to Admiral of Romania's merchant fleet in the mid-1980s. In 1987 Băsescu travelled to Antwerp, Belgium, to work as head of the NAVROM Agency. Two years later he returned to Bucharest and entered the political scene as general director of the State Inspectorate of Civic Navigation in the ministry of transport, in what turned out to be the final months of Nicolae Ceaușescu's 24-year grip on power. After the dramatic collapse of Ceaușescu's regime in Dec. 1989, Băsescu was promoted to deputy minister of transport. He became minister of transport in 1991 in the government dominated by the National Salvation Front (FSN), which had

received mass support in the first post-communist elections on 20 May 1990.

Following a split in the FSN in 1992, Băsescu joined Petre Roman in the newly-established centre-left Democratic Party and, in 1996, he co-ordinated Roman's unsuccessful presidential campaign. Băsescu was re-elected as a Democratic Party MP in 1996 and served as minister of transport until 2000, when he stood as the Democratic Party candidate in the Bucharest mayoral election. He won and began co-ordinating the regeneration of large areas of the city, gaining praise for his direct approach to addressing problems—from cracking down on the notorious packs of stray dogs to improving traffic flow and municipal central heating systems.

Following disagreements with Petre Roman, Băsescu replaced him as leader of the (opposition) Democratic Party in 2001. Two years later, in Sept. 2003, Băsescu became a co-chairman of the centre-right Justice and Truth Alliance (DA), forged between his Democratic Party and the National Liberal Party (PNL). Băsescu's energetic rule as mayor of Bucharest proved popular and he was re-elected to the post in June 2004. Three months later he decided to contest the 2004 presidential election as the DA candidate. Campaigning on an anti-corruption and pro-Western platform, he defeated the PSD candidate in the second round run-off in Dec.

#### *Career in Office*

Băsescu's first task as president was the formation of a new DA government, which became possible when the small Humanist Party (since renamed the Conservative Party) pledged its support, in addition to the backing of the ethnic Hungarian Democratic Federation of Romania. Băsescu appointed the PNL leader and former minister of the economy Călin Popescu-Tăriceanu to the post of prime minister. In his inaugural address Băsescu said that fighting corruption would remain his priority and that he intended to steer Romania towards membership of the European Union. This was achieved on 1 Jan. 2007 as Romania and Bulgaria became the EU's 26th and 27th member states. He also stressed the need to strengthen strategic partnerships with the USA and the UK, as well as to improve relations with Russia and the former Soviet states.

Although allied within the ruling DA, Băsescu's relations with his then prime minister, Călin Popescu-Tăriceanu, deteriorated to the point where, in April 2007, Popescu-Tăriceanu won a vote in parliament to suspend Băsescu for 'grave infringements of the constitution' and the Democratic Party was excluded from the government. Former prime minister Nicolae Văcăroiu was appointed interim president. However, Băsescu returned to office on 23 May 2007 after he was backed by 74.5% of voters in a referendum on his leadership. He then promised to campaign for electoral reform to increase MPs' accountability to the electorate and for a law that could be used to remove former senior officials of the Ceaușescu regime from their offices. In Dec. 2007 he called on Popescu-Tăriceanu to dismiss his justice minister because of corruption allegations. Also in Dec. 2007 the Democratic Party (PD) merged with the Liberal Democratic Party (PLD) to form the Democratic Liberal Party (PD-L). Concerns over high-level corruption also prompted the EU in Feb. 2008 to threaten sanctions against Romania if serious failings were not corrected. In April 2008 Băsescu hosted a summit meeting of NATO leaders in Bucharest.

Following inconclusive parliamentary elections in Nov. 2008, Băsescu nominated Theodor Stolojan, an economist and former prime minister, to head a new government. Stolojan soon withdrew his acceptance and Băsescu then asked Emil Boc, the leader of the Democratic Liberal Party, to form the new administration, which was approved by parliament in Dec. 2008. However, in Oct. 2009 this government lost a confidence vote, although Boc carried on in a caretaker capacity until the pending presidential elections as Băsescu's subsequent nominees for prime minister-designate were not acceptable to parliament.

In 2009 Băsescu stood for presidential re-election. Following a close first round of voting, a run-off between Băsescu and Geană of the PSD-PC alliance was held on 6 Dec. Băsescu's narrow win with 50.3% of the vote was challenged by his opponent who claimed electoral fraud. Băsescu then turned again to Boc to form a new government, which was approved by parliament but which laboured with economic recession and austerity. With his government having become increasingly unpopular, Boc resigned in Feb. 2012. Mihai-Răzvan Ungureanu succeeded him as prime minister but his government fell after only two months when it received a vote of no confidence in parliament. Victor Ponta of the Social Liberal Union then established a new administration to govern until elections later in the year.

In July 2012 Băsescu faced a further challenge to his authority, this time from his new prime minister, and was suspended from office following a parliamentary vote pending efforts to impeach him. However, he survived an impeachment referendum as the majority vote to remove him failed to meet the required minimum turnout of the electorate and he resumed office in Aug. In the Dec. 2012 parliamentary elections Ponta's government won a clear majority against parties backed by Băsescu, after which the president and prime minister signed an agreement guaranteeing their institutional co-operation and respect for the constitution.

##### *Position*

Prime Minister

##### *Introduction*

Victor Ponta became prime minister in May 2012 following the collapse of the short-lived administration led by Mihai-Răzvan Ungureanu. Ponta's Social Liberal Union administration (USL, including the Social Democratic Party and the National Liberal Party) secured a parliamentary mandate following elections in Dec. 2012.

##### *Early Life*

Victor Ponta was born on 20 Sept. 1972 in Bucharest. He graduated in law from the University of Bucharest in 1995 and worked as a prosecutor specializing in corruption cases. Employed in the Supreme Court of Justice from 1998–2001, he was also an assistant professor in public law at the Romanian-American University (RAU) in Bucharest. He received his masters degree from Italy's University of Catania in 2000 and graduated from the National Defence College in 2002. That same year he began lecturing at the RAU, receiving his PhD from the University of Bucharest in 2003 and becoming an associate professor at RAU in 2007.

A prominent member of the youth wing of the Social Democratic Party (PSD), in 2002 Ponta joined the party's national council and was appointed chairman of Social Democratic Youth, a post he held until 2006. In 2004 he entered the chamber of deputies, securing re-election four years later. In Dec. 2006 he was elected PSD vice-president and became party president in 2010.

In 2008 Ponta was named minister responsible for liaison with parliament in the coalition of Emil Boc of the Democratic Liberal Party. Ponta was instrumental in controversial legislation that widened the criminal definition of self-defence and banned therapeutic abortions after the 24th week of pregnancy. He and his PSD colleagues resigned from the cabinet in Oct. 2009 in protest at the sacking of the interior minister, Dan Nica.

The government collapsed, but Boc formed a new coalition that brought in austerity measures to meet IMF conditions. In 2011 Ponta led the PSD into an alliance with the National Liberal Party, forming the USL. Amid growing popular discontent, Boc resigned from office in Feb. 2012 and Mihai-Răzvan Ungureanu replaced him. However, that government fell two months later when it lost a confidence vote. President Băsescu then invited Ponta to form a new administration.

### Career in Office

On 1 May 2012 Ponta announced his cabinet, with the USL's constituent parties sharing portfolios equally. His initial mandate lasted only until elections scheduled for late 2012. Ponta pledged to create jobs and 'right the social injustices' caused by his predecessors' austerity measures. As his relationship with Basescu quickly deteriorated, Ponta launched an unsuccessful attempt to impeach the president in July. Their mutual hostility persisted until Ponta's USL won a comfortable victory in parliamentary elections in Dec., after which they signed an agreement to set aside their differences to end the political turmoil.

### DEFENCE

Compulsory national military service was abolished in 2006.

In 2008 military expenditure totalled US\$3,005m. (US\$135 per capita), representing 1.5% of GDP.

### Army

Strength (2007) 42,200. There is a joint reserve of 45,000. The Ministry of the Interior operates a paramilitary Border Guard (22,900 strong in 2007) and a Gendarmerie (around 57,000).

### Navy

The fleet includes three frigates and four corvettes. There is also a naval infantry force.

The headquarters of the Navy is at Mangalia with the main base at Constanța. The Danube flotilla is based at Brăila. Personnel in 2007 totalled 8,067.

### Air Force

The Air Force numbered some 10,500 in 2007, with 74 combat-capable aircraft (MiG-21s).

### INTERNATIONAL RELATIONS

At the European Union's Helsinki Summit in Dec. 1999 Romania, along with five other countries, was invited to begin full negotiations for membership in Feb. 2000. Romania joined the EU on 1 Jan. 2007. Romania became a member of NATO on 29 March 2004.

### ECONOMY

Agriculture accounted for 10.5% of GDP in 2006, industry 37.9% and services 51.5%. The percentage of Romania's GDP coming from agriculture is the highest of any EU member country.

### Overview

Economic growth averaged 6.2% annually in the period 2002–06. Having signed an accession treaty in 2005, Romania joined the EU in Jan. 2007, with the aim of adopting the euro by 2014 (although the target is now 2015).

The economy was on the brink of collapse in the late 1980s as the Soviet Union disintegrated. When Romania made the transition to a market economy in 1990 it failed to introduce the structural reforms necessary for macroeconomic stability. Negative economic growth followed and poverty doubled. In 2000 a reform programme was belatedly initiated, including tight monetary and fiscal policies leading to greater stability and a fall in inflation.

After seven years of strong growth, economic activity declined in the last quarter of 2008 and continued to fall in 2009, with real GDP contracting by 7.6% in the first half of the year. In March 2009 Romania secured a €20bn. (US\$27bn.) loan from the IMF, European Union and other lenders to stabilize the economy in the wake of the global financial crisis. Growth returned in 2011 and the trade balance improved thanks to strong exports, especially in the machinery and automotive sectors.

However, the recovery remains fragile. The economy is overly dependent on the export and banking sectors, the latter of which is largely foreign-owned. Reform of state-owned enterprises remains an important goal in securing long-term growth.

### Currency

The monetary unit has since 1 July 2005 been the *new leu*, pl. *new lei* (RON) notionally of 100 *bani*, which replaced the *leu* (ROL) at a rate of one new leu = 10,000 lei. Foreign exchange reserves were US\$41,571m. and gold reserves 3.34m. troy oz in Sept. 2009. Inflation rates (based on IMF statistics):

| 2002  | 2003  | 2004  | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|-------|-------|-------|------|------|------|------|------|------|------|
| 22.5% | 15.4% | 11.9% | 9.0% | 6.6% | 4.8% | 7.8% | 5.6% | 6.1% | 5.8% |

Total money supply was 64,201m. new lei in Aug. 2009.

### Budget

Central government revenue and expenditure (in 1m. new lei) for calendar years:

|             | 2006   | 2007    | 2008    |
|-------------|--------|---------|---------|
| Revenue     | 86,225 | 106,905 | 158,032 |
| Expenditure | 87,189 | 108,621 | 107,195 |

Romania's budget deficit in 2011 was 5.2% of GDP (2010, 6.8%; 2009, 9.0%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 24% (reduced rates, 9% and 5%). There is a flat income tax rate of 16%.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010  | 2011 |
|------|------|------|------|------|-------|-------|------|
| 8.5% | 4.2% | 7.9% | 6.3% | 7.3% | -6.6% | -1.6% | 2.5% |

Total GDP in 2011 was US\$179.8bn.

### Banking and Finance

The National Bank of Romania (founded 1880; nationalized 1946) is the central bank and bank of issue under the Minister of Finance. Its *Governor* is Dr Mugur Isărescu. In 2002 there were 31 banks, plus eight branches of foreign banks. Only one bank remains state-owned. The largest bank is Romanian Commercial Bank (Banca Comercială Română), with a market share of 20% and assets in 2008 of US\$24.7bn.; Austria's Erste Bank AG had a 93.6% stake in Feb. 2013. The size of the government's share in the banking sector fell from over 80% in the mid-1990s to just over 40% in 2002.

Foreign debt was US\$121,505m. in 2010, representing 76.4% of GNI.

A stock exchange reopened in Bucharest in 1995.

### ENERGY AND NATURAL RESOURCES

In 2008, 20.4% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 24% has been set by the EU for 2020.

### Environment

Romania's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 4.6 tonnes per capita in 2008.

### Electricity

In 2007 installed capacity was approximately 19.9m. kW; output in 2007 was 61.67bn. kWh (26% hydro-electric and 12% nuclear). Consumption per capita in 2007 was 2,766 kWh. A nuclear power plant at Cernavodă began working in 1996. A second reactor became operational there in 2007.

### Oil and Gas

Oil production in 2008 was 4.7m. tonnes, but with annual consumption of more than twice as much a large amount has to be imported. There were 0.5bn. bbls of proven oil reserves in 2008.

Romania was the first country to start oil exploration, and in the late 1850s was the world's leading oil producer, with an output of 200 tonnes a year. Natural gas production in 2008 totalled 11.5bn. cu. metres with 630bn. cu. metres in proven reserves.

The oil company Petrom, Romania's largest company, was privatized in 2004 when the government sold a 51% stake to the Austrian oil and gas group ÖMV.

### Minerals

The principal minerals are oil and natural gas, salt, lignite, iron and copper ores, bauxite, chromium, manganese and uranium. Output, 2005 (in 1,000 tonnes): lignite, 31,070; salt, 2,420; iron ore, 265; zinc, 14.

### Agriculture

Romania has the biggest agricultural area in eastern Europe after Poland. In 2002, 13.7% of the economically active population were engaged in agriculture. There were 13.94m. ha. of agricultural land in 2002 including 8.96m. ha. of arable land and 4.63m. ha. of permanent pasture. There were 3,081,000 ha. of irrigated land in 2001. There were 164,221 tractors and 27,051 harvester-threshers in 2001.

Production (2003, in 1,000 tonnes): maize, 9,577; potatoes, 3,947; wheat, 2,479; sunflower seeds, 1,506; grapes, 1,078; cabbage, 1,019; melons and watermelons, 1,000; tomatoes, 819; sugar beets, 764; wine, 546; barley, 541.

Livestock, 2002 (in 1,000): pigs, 8,229; sheep, 7,221; cattle, 2,865; horses, 909; goats, 737; poultry, 82,000.

A law of Feb. 1991 provided for the restitution of collectivized land to its former owners or their heirs up to a limit of 10 ha. Land could be resold, but there was a limit of 100 ha. on total holdings. In 2000 a law was passed allowing the restitution of state farm land for the first time (up to 50 ha. of farmland and 10 ha. of forest land per family).

### Forestry

Total forest area was 6.57m. ha. in 2010 (29% of the land area). Timber production in 2007 was 15.34m. cu. metres.

### Fisheries

The catch in 2010 totalled 2,688 tonnes (6,053 tonnes in 2005 and 216,938 tonnes in 1988), of which 2,457 tonnes were from inland waters.

## INDUSTRY

In 2001 industry accounted for 37.0% of GDP. Industrial output grew by 7.5% in 2001.

Output of main products (in 1,000 tonnes): cement (2006 estimate), 8,253; rolled steel (2007), 5,589; crude steel (2008), 5,035; distillate fuel oil (2007), 4,660; petrol (2007), 3,799; pig iron (2008), 2,945; lime (2006 estimate), 1,942; fertilizers (2000), 1,931; wheat flour (2001), 1,597; residual fuel oil (2007), 1,186; ammonia (2001), 1,155; steel tubes (2001), 665; caustic soda (2001), 661; soda ash (2001), 451; paper and paperboard (2002), 370.

### Labour

The labour force in 2006 totalled 10.04m.; the employed population was 9.31m. In the civilian labour force 29.7% worked in agriculture and 26.7% in manufacturing and construction. In 2006, 46% of the employed workforce were women. The standard retirement age is 65 years for men and 60 for women. A minimum monthly wage was set in 1993; it is 670 new lei for full-time adult employees from 1 Jan. 2011. The average gross monthly wage was 1,845 new lei in 2009. Unemployment was 7.2% in Jan. 2012 (7.3% in Jan. 2011).

## INTERNATIONAL TRADE

### Imports and Exports

Imports in 2007 were valued at US\$69,946m. (US\$24,003m. in 2003) and exports US\$40,247m. (US\$17,618m. in 2003). Principal

imports are mineral fuels, machinery and transport equipment, and textiles; main export commodities are textiles, mineral products and chemicals.

Romania's main import sources in 2007 were: Germany (17.2%); Italy (12.8%); Hungary (6.9%); Russia (6.3%); France (6.3%). In 2007 Romania's main export markets were: Italy (17.2%); Germany (17.0%); France (7.7%); Turkey (7.0%).

## COMMUNICATIONS

### Roads

There were 198,817 km of roads in 2004, including 228 km of motorways, 14,809 km of highways, main and national roads and 36,010 km of secondary roads. Passenger cars in 2005 numbered 3,363,800 (156 per 1,000 inhabitants). In 2007 there were 2,712 fatalities as a result of road accidents.

### Rail

Length of standard-gauge route in 2005 was 10,882 km, of which 3,929 km were electrified; there were 425 km of narrow-gauge lines and 57 km of 1,524 mm gauge. Freight carried in 2005, 55.3m. tonnes; passengers, 98.6m. There is a metro (62.4 km) and tram/light rail network (338 km) in Bucharest, and tramways in 13 other cities.

### Civil Aviation

Tarom (*Transporturi Aeriene Române*) is the 95.0% state-owned airline. In 2002 it provided domestic services and international flights to Amman, Amsterdam, Ancona, Athens, Beijing, Beirut, Berlin, Bologna, Brussels, Budapest, Cairo, Chişinău, Copenhagen, Damascus, Dubai, Düsseldorf, Frankfurt, İstanbul, Larnaca, London, Luxembourg, Madrid, Milan, Moscow, Munich, New York, Paris, Prague, Rome, Sofia, Stuttgart, Tel Aviv, Thessaloniki, Treviso, Verona, Vienna, Warsaw and Zürich. Other Romanian airlines which operated international flights in 2007 were Blue Air, Carpatair, Chris Air, Ion Țiriac Air, Jet Tran Air and Romavia. In 2003 scheduled airline traffic of Romanian-based carriers flew 26m. km, carrying 1,255,000 passengers (1,034,000 on international flights).

Bucharest's airports are at Băneasa (mainly domestic flights) and Otopeni (international flights). Constanța, Cluj-Napoca, Oradea, Arad, Sibiu and Timișoara also have some international flights. Otopeni handled 1,981,508 passengers in 2001 and 11,410 tonnes of freight; Timișoara handled 161,000 passengers in 2001 and Băneasa 74,000.

### Shipping

In Jan. 2009 there were 35 ships of 300 GT or over registered, totalling 150,000 GT. The Romanian-controlled fleet comprised 57 vessels of 1,000 GT or over in Jan. 2009, of which 11 were under the Romanian flag and 46 under foreign flags. The main ports are Constanța and Constanța South Agigea on the Black Sea and Galați, Brăila and Tulcea on the Danube. In 2009 the length of navigable inland waterways was around 1,730 km including 1,075 km on the Danube River.

### Telecommunications

In 2008 there were 5,036,000 main (fixed) telephone lines. In the same year active mobile phone subscribers numbered 24,467,000 (1,145.4 per 1,000 persons). The telecommunications sector was fully liberalized on 1 Jan. 2003, ending the monopoly of the Greek-controlled operator Romtelecom. OTE, the major shareholder, increased its stake in Romtelecom to 54% in Jan. 2003, with the government retaining 46% of shares. There were 6.2m. internet users in 2008. In March 2012 there were 4.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The legal system is based on the Napoleonic code and the judiciary is constitutionally independent. The High Court of

Cassation and Justice is the highest judicial authority, with its judges appointed by the president after consultation with the Superior Council of the Magistracy (an elected professional body). There is also a Constitutional Court.

Day-to-day hearings are administered through a system of local courts and 40 county courts (and the Bucharest Municipal Court), whose judgements may be challenged in any one of 15 courts of appeal. In 2006 there were 3,799 judges.

As a condition of EU accession and World Bank financing, Romania has been subject to a Judicial Reform Project aimed at increasing the efficiency of the court system, improving transparency and reducing corruption. This has included the implementation of four revised codes (the criminal code, civil code, criminal procedures code and civil procedures code).

The death penalty was abolished in Jan. 1990 and is forbidden by the 1991 constitution. The population in penal institutions in Sept. 2006 was 35,429 (164 per 100,000 of national population).

### Education

Education is free and compulsory from the age of six. There is compulsory school attendance for ten years. Primary education comprises four years of study, secondary education comprises lower secondary education (organized in two cycles: grades 5th–8th in elementary schools and grades 9th–10th in high schools or vocational schools) and upper secondary education includes further education in high schools. Further secondary education is also available at *lycées*, professional schools or advanced technical schools.

In 2007 there were 648,862 children and 36,555 teaching staff in pre-primary schools; 917,829 pupils and 55,487 teaching staff in primary schools; and 1,954,077 pupils and 153,805 teaching staff in secondary schools. In 2002–03 primary and secondary education in Hungarian was given to 106,515 pupils, in German to 10,019 pupils and in other national minority languages to 1,536 pupils.

In 2007 there were 928,175 students in tertiary education and 30,583 academic staff. In 2002–03 there were 125 higher education institutions with 742 faculties, 30,000 teaching staff and 596,297 students (545,405 for long-term studies and 50,892 for short-term studies). The distribution of pupils and subjects studied was as follows: pedagogy, 30.3%; economics, 26.5%; technical subjects, 25.6%; law, 10.6%; medicine and pharmacy, 5.4%; arts, 1.5%.

Adult literacy rate in 2009 was estimated at 97.7% (male 98.3%; female 97.0%).

In 2005 public expenditure on education came to 3.6% of GNI and 14.3% of total government spending.

### Health

In 2006 there were 419 public hospitals with 141,225 beds; there were 45,815 physicians and 4,360 dentists in the public sector in 2006.

### Welfare

In Dec. 2004 pensioners comprised 3,050,500 old age and retirement, 1,441,800 retired farmers, 798,200 disability, 639,500 survivor allowance and 418,000 social assistance. These drew average monthly pensions ranging from 792,698 lei to 3,504,205 lei. The social security spending in 2002 was 10.4% of GDP.

### RELIGION

The government officially recognizes 17 religions (which receive various forms of state support); the predominant one is the Romanian Orthodox Church. It is autocephalous, but retains dogmatic unity with the Eastern Orthodox Church. Its *Patriarch* is Daniel (enthroned 30 Sept. 2007). It is made up of five metropolitan sees, with ten archdioceses and 13 dioceses, 158 deaneries and 10,987 parishes. There were 12,320 priests and deacons in 2003. In Feb. 2013 there was one cardinal.

Religious affiliation at the 2002 census included: Romanian Orthodox, 18,817,975 (about 87% of the population); Roman Catholic, 1,026,429; Protestant Reformed Church, 701,077; Pentecostal, 324,462; Greek Catholics or Uniates, 191,556; Baptist, 126,639; Seventh Day Adventist, 93,670; Muslim, 67,257.

### CULTURE

#### World Heritage Sites

Romania has seven sites on the UNESCO World Heritage List: the Danube Delta (inscribed on the list in 1991); the Villages with Fortified Churches in Transylvania (1993 and 1999); the Monastery of Horezu (1993); the Churches of Moldavia (1993); the Historic Centre of Sighişoara (1999); the Dacian Fortresses of the Orastie Mountains (1999); and the Wooden Churches of Maramureş (1999).

#### Press

In 2008 there were 80 daily papers (75 paid-for and five free) with a combined circulation of 1,634,000. In 2007 there were 2,320 periodicals, including 119 periodicals in minority languages. 15,566 book titles were published in 2007.

#### Tourism

In 2009, 1,275,600 non-resident tourists stayed in holiday accommodation (down from 1,465,900 in 2008) including: 181,100 from Germany; 141,600 from Italy; 100,300 from France; 76,900 from Hungary.

#### Festivals

The George Enescu Festival of classical music is held every two years in Aug.–Sept. with concerts across Bucharest, Iaşi and Sibiu. The Peninsula/Félsziget rock festival takes place annually in July or Aug. in Târgu Mureş in Transylvania. Other notable events are the EUROPAfest of music in Bucharest (May), the International Romani Art Festival in Timişoara (July), Garana Jazz Festival at Poiana Lupului (July) and the Romanian National Theatre Festival in Bucharest (Oct.–Nov.).

## KEY HISTORICAL EVENTS

Archaeological evidence points to the influence of Arabic and Turkic cultures prior to the 4th century AD. Avar, Goth, Hun and Magyar invasions punctuated the development of the East Slavs over the next five centuries, while trade with Germanic, Scandinavian and Middle Eastern regions began in the 8th century.

In 882 the Varangian prince Oleg of Novgorod took Kyiv and made it the capital of Kievan Rus, the first unified state of the East Slavs, uniting Finnish and Slavic tribes. During the 10th century, trade was extended between the Baltic and Black Seas, forming Kyiv's main economy. The Varangians, led by Rurik of Jutland, led attacks on Baghdad and Constantinople, subsequently establishing a trade link with the latter.

During the 13th century the area was invaded from the west by Teutonic Knights, Lithuanians and Swedes, and from the south by Mongol and Tatar tribes. In 1223 Genghis Khan's grandson, Batu Khan, conquered Kievan Rus. Despite the ruthless reign of the Mongols, trade flourished during the period and many cities were reinvigorated. The Mongols and Tatars created an ascendency known as the 'Golden Horde' around most of Western Russia and

Central Asia and made Itil (near modern Astrakhan) the capital. Its dominance lasted until the 15th century when internal struggles finally forced the break-up of the empire.

Co-operation between Moscow's leader Ivan and the Mongol Öz Beg (ruled 1312–41), in addition to geographical advantages and natural resources, allowed Moscow to develop and prosper. The city was first consolidated under the Muscovite Grand Duke Ivan III (ruled 1462–1505), who adopted the Roman title of tsar and Byzantine ritual after marrying into Byzantine royalty. Ivan annexed the East Slavic regions, as well as Belarus and the Ukraine, conquered Novgorod in 1478 and opened up contacts with Western Europe.

The empire was strengthened and further expanded by his son Vasily III and reformed by Vasily's successor Ivan IV, a sickly and volatile ruler known as Ivan the Terrible (or 'Awesome', *Grozny*) who came to the throne at the age of 16 in 1547. Ivan's divisive and suppressive administration, *oprichnina*, led a reign of terror from 1566–72 in which thousands were executed (although it is believed that initially the Russian nobles, or boyars, had strong control over the throne and its direction, including local government reforms, a new law code and restrictions of hereditary rights). Ivan bolstered the military and led campaigns against the khanates of Kazan (1552), Astrakhan (1556) and the Crimea, extending Russia's territory towards Siberia and down to the Caspian Sea. But the costly war with Livonia (1558–82) drained Russia's resources. Ivan murdered his son in 1581 leaving a hereditary gap and a struggle for succession.

Russia was ruled nominally by Ivan's mentally subnormal brother Fyodor I—in actuality by Fyodor's brother-in-law Boris Godunov, who succeeded Fyodor in 1598. But in 1601 False

Dmitri claimed to be Ivan IV's son (Dmitri had died in 1591) and challenged Boris for the throne. With the backing of the boyars, the Cossacks and the Polish nobility, Dmitri succeeded Boris as tsar on the latter's death in 1605. There followed a chaotic period of instability as differing sides fought for control of the realm. The following year Dmitri was assassinated and the boyars crowned the rebel leader Vasily Shuysky in return for privileges. But soon a subgroup of boyars led by the Romanovs gave support to a second False Dmitri in 1608, establishing a shadow government just outside Moscow. Shuysky turned to Sweden for help, bargaining away territory and triggering Poland's invasion of Muscovy and the siege of Smolensk (1609). Both governments collapsed and a coalition government was formed. A peace treaty signed with Sweden in 1617 lost Russia Novgorod in exchange for Baltic control, while an armistice with Poland began the following year.

### *Romanovs*

With the Polish occupiers ejected from Moscow, Mikhail Fyodorovich Romanov, the first of a dynasty that would rule until 1917, became tsar of a country ruined by war and with regions occupied by Swedish, Polish or rebel forces. But by avoiding involvement in the Thirty Years' War, in which Sweden and Poland were embroiled, he managed to restore some stability and to strengthen Russia's holdings in the southern regions. His son Aleksey inherited the throne as a child. Unpopular measures implemented by Aleksey's adviser, Boris Ivanovich Morozov, including a crippling salt tax, led to a riot in 1648 and rebellion in Novgorod and Pskov. Eastern Ukraine was annexed, while the support of a Cossack rebellion against Polish rule in the Ukraine degenerated into a costly war with Sweden and Poland over Ukrainian, Baltic and Belorussian territory. Russia consequently lost the Baltic coast to Sweden in 1661 and later Belarus and parts of the Ukraine to Poland. Sophia succeeded Aleksey to the disputed throne in 1682, followed seven years later by her half brother Peter the Great.

The reign of Peter I (1689–1725) signalled a new era for Russia that broke so far with Muscovy tradition as to be seen as the birth of modern Russia. The empire was expanded and strengthened and there was increased trade with Western Europe. His modest upbringing and travels to the West gave Peter a novel pro-European stance. The capital was transferred from Moscow to the newly built St Petersburg (1712), as part of a Europeanization programme. Peter introduced radical structural changes to the Russian body politic, converting it into the Western European mould. The tsardom of Muscovy became the Empire of All Russias and Peter became head of state as opposed to ruling patriarch. Administrative reforms divided Russia into eight main provinces, put the church under state control and introduced compulsory secular education for the nobility, although the rights of the peasantry were abolished and they were forced into serfdom. Peter expanded industry, created the navy, introduced army conscription and strengthened the southern border against the Crimean Tatars. He formed an alliance with Denmark, Poland and Saxony against Sweden, resulting in the Great Northern War (1700–21), which ended with Russia claiming Livonia in the Treaty of Nystad (1721). The expanded empire made Russia the leading Baltic power.

### *Catherine the Great*

Despite Peter's rejection of hereditary rule in favour of appointing a successor, his choice was never named before his sudden death. The rest of the 18th century was marked by disputed succession. After Peter's death, his widow Catherine I was declared empress, though Peter's collaborator Prince Menshikov ruled in her name. A supreme privy council was established to distribute power; Peter's grandson, Peter II, ruled briefly before dying of smallpox. He was succeeded by Peter I's niece, Anna, the duchess of Courland (1730), then by her niece Anna Leopoldovna, before Peter I's daughter, Elizabeth, came to power in 1741 in a bloodless

coup. During her 21-year reign, her father's reforms were consolidated and Western culture and literature flourished. She founded the University of Moscow and established the St Petersburg Academy of Arts. At the end of her reign Russia was involved in the Seven Years' War, occupying Berlin for a short time before Elizabeth's death in 1762. Russia's subsequent withdrawal saved Frederick the Great's Prussia from destruction.

Elizabeth's nephew, Peter III, proved an unpopular ruler. Childless, his politically ambitious wife, Catherine the Great, plotted to depose him, claiming the throne for herself soon after. Influenced by the Enlightenment, she attempted to implement legislative, educative and administrative reforms. But many of these, as well as the emancipation of the serfs, were blocked by the nobility. The imposed Russification of the Ukrainian, Polish and Baltic regions proved unpopular, while civil unrest led to the Pugachev Revolt (1773–75), in which peasants, Cossacks and workers rebelled against the aristocracy. Catherine's foreign policy was an aggressive expansion plan to the south and east to make Russia the leading European power at the expense of the Turks and Tatars. She forged a path through to the Mediterranean Sea to maximize maritime trade routes and developed close relations with Prussia and Austria with whom Poland was shared. But despite two wars with Turkey she failed to take Constantinople, as much an emotional as a political prize.

After Catherine's death in 1796, her son Paul's tyrannical rule led to his murder in 1801. His son Alexander I adopted more liberal policies in administration, science and education. War with France in 1805 led to a crushing defeat at Austerlitz, but when Napoleon invaded Russia in 1812 his army fell victim to the Russian winter. Alexander's death in 1825 provoked instability and uprisings which were quashed by military force. Russia was defeated by Britain, France and Turkey in the Crimean War (1853–56). Alexander II (ruled 1855–81), who followed Nicholas I (ruled 1825–55), implemented reforms, the most important of which was the partial emancipation of the serfs in 1861. Major judicial reform followed three years later and universal military service in 1874. But towards the end of his reign Alexander's increasingly conservative measures exacerbated the revolutionary mood of socialist-influenced university students and the peasantry. He was assassinated in 1881 and was succeeded by Alexander III (1881–94). Labour reforms introduced by Alexander III were harsh and restrictive and the peasants' lot failed to improve. The government's neglect of agricultural policy resulted in crop failure and widespread famine in 1891.

The Russian empire had expanded to the far reaches of Asia, to Afghanistan and into Central Europe. By the end of Alexander III's reign, only half the population spoke Russian or were members of the Orthodox Church.

### *Revolution*

Nicholas II's reign (1894–1917) marked the end of Tsarist Russia. Like his father, he did little to improve social conditions for the masses, concentrating instead on military power. Industrial growth produced an unskilled urban working class whose living conditions fuelled revolutionary feeling. Socialism and Liberalism were also taking hold of the educated middle classes—doctors, teachers and engineers—as well as disaffected civil servants. In 1904 Nicholas embarked on and lost an unpopular war with Japan. The middle classes campaigned for a legislative assembly. In Jan. 1905 the priest, Georgy Gapon, led a protest of factory workers to St Petersburg's Winter Palace. Tsarist troops opened fire on the crowds killing over 100 people. Public outrage to 'Bloody Sunday' soon spread throughout the country. A general strike, paralysing most of Russia, led to violence between monarchists and insurgents well into 1907, while factions in the armed forces rebelled. Yielding to the pressure of the 1905 revolution, the tsar permitted the establishment of the first *Duma* (parliament), which convened in St Petersburg in 1906. But it lasted only 70 days. Violence continued into 1907.

In 1912 the two strands of the Social Democratic Workers' Party—the Bolsheviks (or majority) led by Vladimir Ilyich Ulianov (Lenin), and the Mensheviks (or minority)—split, the Bolsheviks pursuing revolution, the Mensheviks evolutionary change. The outbreak of the First World War in 1914 temporarily unified Russians in the war effort. The tsar took command of the armed forces in 1915, leaving an authoritarian vacuum that allowed the tsarina and the influential adviser Grigori Rasputin to implement various unpopular ministerial changes. Rasputin was assassinated by disgruntled nobles in 1916. Depleting military resources and social unrest caused by hardship forced the end of the tsar's reign. A succession of anti-tsar demonstrations culminated in a mass protest in St Petersburg. Soldiers deserted, allying themselves with the workers, a pattern repeated throughout the country. A provisional government comprising Menshevik and Bolshevik elements was established and Tsar Nicholas abdicated on 2 March 1917. The Royal Family was executed in July 1918.

Tension between moderate Mensheviks and radical Bolsheviks intensified and in Oct. 1917 the Bolsheviks led by Lenin, newly returned from exile, seized control. The new government headed by Lenin, the Council of People's Commissars, created the Soviet constitution the following year. Russia was declared the Soviet Republic of Workers, Soldiers and Peasants and the capital was moved back to Moscow. Russia eventually withdrew from the First World War in 1918 but its forced acceptance of the unfavourable Brest-Litovsk treaty led many to abandon the government. Between 1918–21 a civil war raged between the Bolshevik Red Army, led by Lenin's ally Leon Trotsky, and the White Army, formed by former imperial officers, Cossacks, anti-communists and anarchists. The government imposed 'war communism'—forced labour and expropriation of business and food supplies—to support its cause, and eventually overcame the White Army. Lenin instituted the New Economic Policy (NEP) in 1921 to replace War Communism, reintroducing a monetary system and private ownership of small-scale industry and agriculture. In 1922 the Union of Soviet Socialist Republics was established comprising Russia, the Ukraine, Belarus and Transcaucasia. The Turkmen and Uzbek republics were added two years later, and the Tadzhik republic joined in 1929.

### Stalin

On Lenin's death in 1924, Joseph Stalin (Ioseb Dzhughashvili) became general secretary of the Communist Party. Stalin rejected the 'state capitalism' of the NEP, which had failed to provide enough food for the urban workforce. From 1928 Stalin pursued a programme of industrialization and from 1933 agricultural collectivization, which cost the lives of 10m. peasants through famine or persecution. Constructing a personality cult for Lenin and himself, Stalin reasserted his absolute authority in massive purges; in 1934 and 1937 the NKVD (political police) eliminated millions of political dissidents.

Despite a non-aggression pact signed with Germany in Aug. 1939, the USSR was forced into the Second World War (termed the Great Patriotic War) in 1941 when the Nazi's Plan Barbarossa targeted Kyiv, Moscow and Leningrad for invasion. Up to 20m. Soviet lives were lost, almost 1m. in the battle of Stalingrad alone (1942–43). Expansion before and during the war created 15 aligned republics. Transcaucasia was divided into Armenia, Georgia and Azerbaijan, Kazakh and Kirghiz Soviet Socialist Republics were formed, and, along with Latvia, Lithuania, Estonia and Moldavia, were incorporated into the USSR. Following the war, Stalin managed to gain Western acceptance of a Soviet sphere of influence in Eastern Europe. The Baltic States and large tracts of land from neighbouring countries were annexed, while puppet regimes established Poland, Czechoslovakia, East Germany, Hungary, Bulgaria and Romania as satellites of Moscow.

The blockade of West Berlin (1948–49) and the Soviet detonation of an atomic bomb in Aug. 1949 were major factors in the escalation of the Cold War, waged indirectly in the Korean War (1950–53). On Stalin's death, Nikita Khrushchev reversed many of Stalin's policies and condemned his predecessor. In reaction to the famine in his native Ukraine, he developed the vast wheatfields in Kazakhstan. Relaxing control in the Eastern Bloc allowed for some liberalization although the Hungarian Uprising and the Poznań Riots in Poland (both 1956) were brutally suppressed and the Berlin Wall built in 1961. Relations with the Soviet Union's great ideological ally, China, collapsed over differences in interpretation of Marxist doctrine and Chinese opposition to Khrushchev's attempts at détente with the West (which came to be known as 'peaceful co-existence'). The Cuban Missile Crisis of 1962 intensified hostilities with the West and led the world to the brink of nuclear war. Khrushchev's perceived failure in the crisis, coupled with food shortages, led to widespread discontent. He was forced out of office in a 1964 coup led by Leonid Brezhnev, who ruled until 1982.

### Soviet Reform

By the 1970s, Russia's international status had reached its zenith. Along with the USA, it was perceived as one of two global superpowers, despite relative economic stagnation. But Brezhnev kept a tight grip on the Eastern Bloc, introducing his 'Brezhnev Doctrine' which permitted the Soviet Union to intervene in the Eastern Bloc countries if Communist rule was ever threatened. In Aug. 1968 the USSR invaded Czechoslovakia to suppress an increasingly liberal regime. Relations with the West were further strained when the Soviets invaded Afghanistan in 1979. By the end of his tenure Brezhnev's failing health mirrored the country's economic decline. The domestic price of Brezhnev's obsessive pursuit of prominence in the space race was the failure of the agricultural and consumer-goods sectors and the decline of living standards. From his death in 1982, the country was led by his aides Yuri Andropov, a short-lived reformer, then Konstantin Chernenko.

When the latter died in 1985, Mikhail Gorbachev became general secretary of the Communist Party. He launched *perestroika*, a policy of economic and structural reform.  *Glasnost* ('openness') extended civil liberties, including freedom of the press, and led to official rejection of Stalinist-style totalitarianism. The political system was overhauled, with electoral processes made more democratic and some free-market principles introduced. Gorbachev sought warmer relations with both Communist and Western governments and withdrew troops from Afghanistan in 1989. In a rejection of the 'Brezhnev Doctrine', throughout 1989 and 1990 Gorbachev refused to intervene as one Communist regime after another fell in the Eastern Bloc. Within the USSR, the republics demanded independence. Initially rejected, ethnic tensions arose between and within the republics, with heavy fighting in the Caucasus. Suppressed for so long, the newfound freedom also brought chaos and Gorbachev was blamed. Nonetheless, he won the first USSR presidential elections. Opposition parties were legalized soon after, although he was reluctant to open up the economy to privatization. An attempted coup in Aug. 1991 led to Gorbachev's house arrest for three days and though the coup failed, largely owing to Russian president Boris Yeltsin's intervention (elected June 1991), Gorbachev's leadership was existing on borrowed time. In quick succession Gorbachev resigned his party membership, dismantled the central committee and took KGB and military control away from the Communists. On Christmas Day 1991 Gorbachev resigned as Soviet president and the Soviet Union was dissolved.

### Yeltsin

A period of confrontation in 1992–93 between President Yeltsin and parliament climaxed when thousands of armed anti-Yeltsin demonstrators assembled on 3 Oct. 1993 and were urged to seize

the Kremlin and television centre. On 4 Oct. troops took the parliament building by storm after a ten-hour assault in which 140 people died. Vice-President Rutskoi and Speaker Khasbulatov were arrested.

Boris Yeltsin was re-elected president in 1996. Many took this as a signal of confidence in the new, democratic Russia. But the reality was a state in which democratic institutions were weakened to the point of impotence by racketeering and bureaucratic dead-weight. Russia defaulted on its debt, the rouble halved in value, imports fell by 45% and oil revenues slumped. On 17 Aug. 1998 the government freed the rouble, in effect devaluing it, imposed currency controls and froze the domestic debt market.

In Aug. 1999 Boris Yeltsin appointed as prime minister Vladimir Putin, a former KGB colonel and director of the KGB's successor organization, the FSB. On 31 Dec. 1999, Yeltsin resigned the presidency, nominating Putin as his interim successor, a job he retained after a clear-cut victory in the presidential election of March 2000. Under Putin, Russia continued the war with separatist Chechnya that began in Dec. 1994. One of his primary aims has been to reduce the power of the business oligarchs and to fight corruption. Tax cuts have been introduced and in 2000 a programme of regional reform divided Russia's 89 regions into seven new districts run by Kremlin representatives.

Following the attacks on the USA in Sept. 2001, Putin made clear his support for the war on terrorism. In Oct. 2002 a group of Chechen rebels took control of a Moscow theatre and held hostage 800 people for three days before Russian troops stormed the building. An anaesthetic gas, used to combat the rebels, killed many of the hostages. The rebels had been demanding that Russia end the war in Chechnya. The new relationship with the USA faltered as a result of the war with Iraq, which Russia opposed. Russia's vulnerability to terrorism was highlighted in Sept. 2004 when hostage takers seized a school in Beslan, in the Russian republic of North Ossetia. A three-day standoff ended with more than 350 people killed, nearly half of them children. Chechen rebels claimed responsibility for the siege.

In 2006 Russia temporarily cut off oil and gas links to Ukraine, Georgia and Belarus ostensibly over pricing disputes. As well as incurring the wrath of those governments immediately involved, the knock-on effects to pipeline flows throughout Europe prompted official protests. The future of Chechnya continues to be a thorn in Moscow's side. Relations with Georgia took a downturn in 2006 over Russia's implicit support for the break-away Georgian region of South Ossetia. They reached a new low in Aug. 2008 when Russian and Georgian troops fought each other for a week following the Georgian government's military attack on separatist forces in the region.

Putin's human and civil rights records have come under increasing international scrutiny. In the aftermath of the Beslan siege, Putin assumed responsibility for nominating regional governors who had previously been directly elected. Restrictions on press freedom have been criticized as has the absence of a credible opposition and an independent judiciary. Particularly controversial was the imprisonment of Mikhail Khodorkovsky, a multibillion dollar businessman and Putin critic who was sentenced to nine years in 2005 amid claims that the prosecution was politically motivated. In 2006 there was widespread concern at Putin's new powers to monitor non-governmental organizations and potentially expel foreign-based groups, some of which Putin accused of being 'led by puppeteers from abroad'.

In March 2008 Dmitry Medvedev won the presidential election, from which Putin was constitutionally barred. Medvedev named Putin his prime minister in May 2008. At parliamentary elections in Dec. 2011 international observers recorded widespread abuses at the polls and Putin faced popular protests in several cities across the country. In March 2012 he regained the presidency for an extended six-year term and appointed Medvedev as premier.

## TERRITORY AND POPULATION

Russia is bounded in the north by various seas (Barents, Kara, Laptev, East Siberian) which join the Arctic Ocean, and in which is a fringe of islands, some of them large. In the east Russia is separated from the USA (Alaska) by the Bering Strait; the Kamchatka peninsula separates the coastal Bering and Okhotsk Seas. Sakhalin Island, north of Japan, is Russian territory. Russia is bounded in the south by North Korea, China, Mongolia, Kazakhstan, the Caspian Sea, Azerbaijan, Georgia, the Black Sea and Ukraine, and in the west by Belarus, Latvia, Estonia, the Baltic Sea and Finland. Kaliningrad (the former East Prussia) is an exclave on the Baltic Sea between Lithuania and Poland in the west. Russia's area is 17,075,400 sq. km and it has nine time zones (11 until March 2010). In 2007 Russia claimed control over 1.2m. sq. km of the Arctic Ocean bed, known to be rich in energy sources. Immediately disputed by the international community, the claim would require validation by the UN Commission on the Limits of the Continental Shelf. The 2010 census population was 142,856,536 density, 8.4 per sq. km. Ethnicity in 2002 showed 79.8% were Russians, 3.8% Tatars, 2.0% Ukrainians, 1.1% Bashkir and 1.1% Chuvash. There are also small numbers of Armenians, Avars, Belarusians, Chechens, Germans, Jews, Kazakhs, Mari, Mordovians and Udmurts.

In 2011, 73.2% of the population lived in urban areas.

The UN gives a projected population for 2015 of 142.23m.

Russia's population has been declining since the break-up of the Soviet Union and will continue to do so in the future. By 2050 its population is projected to be the same as it was in the early 1950s.

The two principal cities are Moscow (Moskva), the capital, with a 2010 census population of 11.50m. and St Petersburg (formerly Leningrad), with 4.88m. Other major cities (with 2010 populations) are: Novosibirsk (1.47m.), Ekaterinburg (1.35m.), Nizhny Novgorod (1.25m.), Samara (1.16m.) and Omsk (1.15m.). In May 2000 President Putin signed a decree dividing Russia into seven federal districts (*okrug*), in the process creating a layer above the various federal subjects (see CONSTITUTION AND GOVERNMENT *below*). These, with their administrative centres and 2010 populations in brackets, are: Central (Moscow, 38.43m.), North-Western (St Petersburg, 13.62m.), Southern (Rostov-on-Don, 13.85m.), Volga (Nizhny Novgorod, 29.90m.), Ural (Ekaterinburg, 12.08m.), Siberian (Novosibirsk, 19.26m.) and Far-Eastern (Khabarovsk, 6.29m.). In Jan. 2010 President Medvedev created a new North Caucasus federal district (making eight now in total) by splitting the Southern federal district in two. The 2010 population in the area that constitutes the North Caucasus federal district was 9.43m. Its administrative centre is Pyatigorsk.

The official federal language is Russian, although there are several other officially-recognized languages within individual administrative units.

## SOCIAL STATISTICS

2008 births, 1,717,500; deaths, 2,081,000; marriages, 1,178,700; divorces, 703,400. Rates, 2008 (per 1,000 population): birth, 12.1; death, 14.7; marriage, 8.3; divorce, 5.0. At the beginning of the 1970s the death rate had been just 9.4 per 1,000 population. Infant mortality, 2010 (per 1,000 live births), 9. There were 1,582,400 legal abortions in 2006. The annual abortion rate, at approximately 52 per 1,000 women, ranks among the highest in the world. The divorce rate is also among the highest in the world. The most popular age range for marrying in 2008 was 25–34 for males and 18–24 for females. Expectation of life at birth, 2007, was 59.9 years for males and 72.9 years for females. With a difference of 13.0 years, no other country has a life expectancy for females so high compared to that for males. The low life expectancy (down from 64.6 years for males and 74.0 years for females in the USSR as a whole in 1989) and the low birth rate (down from 17.6 per 1,000 population in the USSR in 1989) is

causing a demographic crisis. Disease, pollution, poor health care and alcoholism are all contributing to a steady decline in the population. More than 35,000 Russians died of alcohol poisoning in 2005. In 2005, 16% of Russians were living below the subsistence level (down from 27% in 2001). Annual population growth rate, 2000–05, –0.5%; fertility rate, 2008, 1.4 births per woman. The suicide rate, at 30.1 per 100,000 population in 2006, is one of the highest in the world. Among males it was 53.9 per 100,000 population in 2006.

## CONSTITUTION AND GOVERNMENT

The Russian Soviet Federative Socialist Republic (RSFSR) adopted a declaration of republican sovereignty by 544 votes to 271 in June 1990. It became a founding member of the Commonwealth of Independent States (CIS) in Dec. 1991, and adopted the name 'Russian Federation'. A law of Nov. 1991 extended citizenship to all who lived in Russia at the time of its adoption and to those in other Soviet republics who requested it.

According to the 1993 constitution the Russian Federation is a 'democratic federal legally-based state with a republican form of government'. The Federation consists of 83 federal subjects (administrative units), of which 21 are republics, one autonomous region, four autonomous districts, nine territories, 46 regions and two federal cities. The state is secular. Individuals have freedom of movement within or across the boundaries of the Federation; there is freedom of assembly and association, and freedom to engage in any entrepreneurial activity not forbidden by law. The state itself is based upon a separation of powers and upon federal principles, including a Constitutional Court. The most important matters of state are reserved for the federal government, including socio-economic policy, the budget, taxation, energy, foreign affairs and defence. Other matters, including the use of land and water, education and culture, health and social security, are for the joint management of the federal and local governments, which also have the right to legislate within their spheres of competence. A central role is accorded to the *President*, who defines the 'basic directions of domestic and foreign policy' and represents the state internationally. The President is directly elected for a six-year term (since Dec. 2008—previously a four-year term), and for not more than two consecutive terms; he must be at least 35 years old, a Russian citizen, and a resident in Russia for the previous ten years. 2m. signatures are needed to validate a presidential candidate not affiliated to a party represented in the State Duma, no more than 2.5% of which may come from any one region or republic. The President has the right to appoint the prime minister, and (on his nomination) to appoint and dismiss deputy prime ministers and ministers, and may dismiss the government as a whole. In the event of the death or incapacity of the President, the Prime Minister becomes head of state.

Parliament is known as the *Federal Assembly* (Federalnoe Sobranie). The 'representative and legislative organ of the Russian Federation', it consists of two chambers: the *Federation Council* (Sovet Federatsii) and the *State Duma* (Gosudarstvennaya Duma). The Federation Council, or upper house, consists of 166 deputies. The State Duma, or lower house, consists of 450 deputies elected for a four-year term. Starting with the elections in Dec. 2007 all deputies to the State Duma are elected from party lists by proportional representation. There is a 7% threshold for the party-list seats. To qualify for candidacy an individual must be nominated by a registered political party. Incumbent parties are automatically included in the ballot; others must obtain a minimum of 200,000 supporting signatures of which no more than 5% may come from any one region. Alternatively, non-

incumbent parties may put forward a deposit of 60m. roubles, which is returned if the party manages to win at least 4% of the popular vote. Parties which gain at least 35 seats may register as a faction, which gives them the right to join the Duma Council and chair committees. Any citizen aged over 21 may be elected to the State Duma, but may not at the same time be a member of the upper house or of other representative bodies. The Federation Council considers all matters that apply to the Federation as a whole, including state boundaries, martial law, and the deployment of Russian forces elsewhere. The Duma approves nominations for Prime Minister, and adopts federal laws (they are also considered by the Federation Council but any objection may be overridden by a two-thirds majority; objections on the part of the President may be overridden by both houses on the same basis). The Duma can reject nominations for Prime Minister but after the third rejection it is automatically dissolved. It is also dissolved if it twice votes a lack of confidence in the government, or if it refuses to express confidence in the government when the matter is raised by the Prime Minister.

A law was approved in June 2001 to reduce the proliferation of political parties (numbering some 200 in 2001). It took effect in July 2003. The new law introduced stricter registration criteria and obliging existing parties to reregister within two years. In order to register, political parties are required to have at least 50,000 members and (since Jan. 2006) more than 45 regional branches with a minimum membership of 500 each. Multiple party membership is banned.

There is a 19-member *Constitutional Court*, whose functions under the 1993 constitution include making decisions on the constitutionality of federal laws, presidential and government decrees, and the constitutions and laws of the subjects of the Federation. It is governed by a Law on the Constitutional Court, adopted in July 1994. Judges are elected for non-renewable 12-year terms.

## National Anthem

In Dec. 2000 the Russian parliament, on President Putin's initiative, decided that the tune of the anthem of the former Soviet Union should be reintroduced as the Russian national anthem. Written by Alexander Alexandrov in 1943, the anthem was composed for Stalin. New words were written by Sergei Mikhalkov, who had written the original words for the Soviet anthem in 1943. The new anthem is 'Rossiya—svyashennaya nasha derzhava, Rossiya—lyubimaya nasha strana' ('Russia—our holy country, Russia—our beloved country'). Boris Yeltsin had introduced a new anthem during his presidency—'Patriotic Song', from an opera by Mikhail Glinka and arranged by Andrei Petrov.

## RECENT ELECTIONS

In the presidential elections held on 4 March 2012 prime minister Vladimir Putin (United Russia) won 63.6% of the votes cast. Gennady Zyuganov (Communist Party of the Russian Federation; KPRF) took 17.2% of the vote; Mikhail Prokhorov (ind.) 7.9%; Vladimir Zhirinovskiy (Liberal Democratic Party; LDPR) 6.2%;

and Sergey Mironov (A Just Russia; SR) 3.9%. Turnout was 65.3%. The OSCE reported 'procedural irregularities' and the Communist Party of the Russian Federation refused to recognize the result.

Elections for the State Duma were held on 4 Dec. 2011. United Russia won 238 seats with 49.5% of the vote (down from 315 seats and 64.3% at the 2007 elections); the KPRF 92 seats with 19.2% (up from 57 and 11.6% in 2007); A Just Russia 64 with 13.2% (up from 38 and 7.7% in 2007); and the LDPR 56 and 11.7% (up from 40 and 8.1% in 2007). Turnout was 60.2%. There were reports of election fraud, leading to major protests.

## CURRENT LEADERS

### Vladimir Vladimirovich Putin

#### *Position*

President

#### *Introduction*

Vladimir Putin became president again in March 2012, having previously served two presidential terms from 1999–2008 and one term as prime minister since 2008. His initial appointment as president at the end of 1999 had been the culmination of a rapid political rise in the post-Communist era. Little known internationally, his KGB past aroused early concerns but he quickly gained respect within Russia as a modernizer and efficient administrator. He also made a determined effort to re-establish a more influential world role for his country. However, his handling of the Chechen war led to international criticism, while his opposition to the US war in Iraq from 2003 and to US plans to expand its missile defence systems into Eastern Europe strained relations with Washington. He nevertheless maintained a high approval rating among most Russian voters, although his style of government was perceived as authoritarian and imperial. Precluded from serving a third term under the constitution, he oversaw the election of his chosen successor, Dmitry Medvedev, to the presidency in March 2008 and he assumed the post of prime minister in May. In Sept. 2011 Putin was confirmed as United Russia's candidate for the presidential election scheduled for March 2012. Despite a significant fall in support for his United Russia party in parliamentary polls at the end of 2011, he regained the presidency and in May 2012 replaced Medvedev who in turn took over the premiership.

#### *Early Life*

Vladimir Putin was born in St Petersburg (then called Leningrad) on 7 Oct. 1952, the son of a war veteran who, with his wife, had survived the siege of Leningrad. Baptized into Russian Orthodoxy, he was an accomplished athlete. After graduating from law school in 1975, he began a 15-year career with the KGB's foreign intelligence arm, stationed in Leningrad and East Germany. When collapse threatened the Soviet Union, he retired as a colonel and embarked on a political career.

In the early 1990s Putin worked in local government in St Petersburg, becoming deputy mayor in 1994. In 1996 President Yeltsin brought him to Moscow and appointed him deputy chief Kremlin administrator. He took charge of relations with Russia's diverse regions and in 1998 became head of the Federal Security Service (successor of the KGB) and secretary of the presidential Security Council. In Aug. 1999 he was named acting prime minister.

#### *Career in Office*

Putin became the acting president of Russia after Yeltsin's resignation on 31 Dec. 1999 and was officially elected president on 26 March 2000, taking 53% of the vote. His election programme prioritized a 'dictatorship of law' to combat high crime rates, as well as pledging to tackle poverty and promote family values, patriotism and fair business conditions.

He quickly set about exercising firm control over local government and the economy, with a stated aim of reducing corruption. In a bid to centralize power in Moscow, he restructured 89 legislative regions into seven districts, each with a government-approved leader (the majority of whom had military or security backgrounds). He reversed tax concessions that Yeltsin had brought in to assist the regions and reserved the right to dismiss any democratically-elected politician found to have broken the law.

Putin also removed several high-profile business and media figures from official positions. Yeltsin's daughter was dismissed as a Kremlin adviser but immunity was granted to Yeltsin himself. Putin appointed former finance minister and Yeltsin ally Mikhail Kasyanov as prime minister while placing other supporters in key Kremlin positions. Putin's economic policy was influenced by his allegiance to Anatoly Chubais, who led the wave of privatization in Russia in the early 1990s.

In April 2001 Putin's Unity party merged with the opposition Fatherland bloc, led by the mayor of Moscow, Yury Luzhkov. To pass legislation the president needed a simple majority of 226, with the merger giving him at least 132. In the summer of 2001 new laws on land, labour and pensions were proposed. These were opposed by the Communists whose leader Gennady Zyuganov called for a national demonstration against the reforms.

After Oct. 2001 Russians were free to buy residential and commercial land for the first time since the Bolsheviks took power in 1917. Farm land, making up 98% of the total, was not covered by the law. Critics feared that a privileged few would buy up the land much as they bought privatized businesses in the 1990s. Supporters maintained that it would attract foreign investment, speed up economic reform and stop the illegal sale of land.

Putin's image was dented by the sinking of the Kursk nuclear submarine in Aug. 2000 when all 118 Russian sailors on board died. He was widely condemned for inaction, refusing to return from his holiday and turning down offers of help from Norway and the UK. He was subsequently dogged by allegations of an official cover-up.

Putin meanwhile used the war with Chechnya to establish his 'strong man' credentials, although heavy Russian losses cost him some support and alleged human rights abuses led to a suspension of Russia's voting rights in the Council of Europe. In Oct. 2002 Chechen rebels took 800 people hostage inside a Moscow theatre, demanding the immediate withdrawal of Russian troops from

Chechnya. The siege lasted three days before the Russian military stormed the building using an anaesthetic gas which killed the rebels but also over 100 hostages. In March 2003 Putin promised greater autonomy for Chechnya. This followed a referendum in the republic supporting a new constitution that would keep Chechnya within Russia but provide for a president and parliament. Moscow claimed 96% support for the proposals although no international observers were present and the referendum was opposed by separatist groups. In May 2003, following two suicide bomb attacks, Putin reaffirmed his determination to defeat Chechnya's rebel forces. He offered an amnesty for rebels who handed over their weapons by 1 Aug. 2003 and for Russian troops accused of human rights violations.

Following the 11 Sept. attacks on New York and Washington, D.C. there was a rapprochement between Russia and the USA. In 2001 Putin gave unprecedented support for UN military action in Afghanistan. His offers of military assistance to the Afghan Northern Alliance, the use of Russian airspace for humanitarian aid and his role in persuading Tajikistan and Uzbekistan to support the campaign were well received in the West where leaders were quick to downplay Russia's role in Chechnya. In May 2002 Putin and US President George W. Bush signed an anti-nuclear deal agreeing to reduce their respective strategic nuclear warheads by two-thirds over the next ten years.

However, tension between the two countries increased over the question of Iraq in late 2002. While President Bush attempted to garner support for military action in Iraq—with Russia holding a power of veto within the UN Security Council—he warned Putin at the same time that he would not support Russian military incursions into Georgia, which Russia claimed was tolerating hostile Chechen activity. Putin's political dealings with 'rogue' nations, including North Korea and Cuba, were also criticized, as was Russia's trading of nuclear fuel and weapons with India, Iran, Iraq and Syria.

When US-led forces began attacking Iraq in March 2003 Russia condemned the action and delayed ratifying the US-Russian strategic arms control treaty (*see above*) until the war was over. Putin refuted US accusations that Russia had breached UN sanctions by selling armaments, including anti-tank missiles and jamming equipment, to Iraq. In May 2003 Russia nevertheless voted to accept a UN resolution on Iraq's future jointly proposed by the USA, UK and Spain. In return for the immediate ending of sanctions, the UN was to co-operate with the occupying forces to form a new government. In addition Russia would be able to complete long-standing contracts with Iraq. Despite tension in Russia's relationship with the UK as a result of differences over Iraq, Putin made an official state visit to Britain, the first by a Russian leader for over a century.

Having previously avoided party politics, Putin publicly endorsed a pro-government party—United Russia—in the Dec. 2003 parliamentary elections. In the March 2004 presidential elections, he was criticized by the international press and by OSCE monitors for manipulating the Russian media to influence voting in his favour. He was re-elected in the poll, claiming 71% of the vote and leaving his closest rival, the Communist Nikolai Kharitonov, with less than 14%. In May 2004 Putin set out his goals for his second term—modernizing Russia and raising living standards while aiming for a more stable democracy able to pursue strategic interests abroad.

Chechen violence had continued in 2003. Following a referendum in which Chechens agreed to a Moscow-approved constitution, Putin announced that a presidential vote would go ahead. In Oct. 2003, with a turnout of 85%, the pro-Moscow leader Akhmad Kadyrov was elected. However, he was then killed in a bomb attack in Chechnya's capital in May 2004 and Putin pledged to send extra troops in response. Alu Alkhanov was elected president of Chechnya on 29 Aug. 2004, and in Chechen parliamentary elections in Nov. 2005 the pro-Moscow United Russia party claimed about 60% of the popular vote.

In the aftermath of the bloodbath that ended the Beslan school siege by Chechen militants in Sept. 2004 in which more than 350 people were killed, Putin controversially took control of the appointment of regional governors who had been directly elected for the previous decade. Critics saw the move as undermining democracy.

In May 2005 Mikhail Khodorkovsky, a billionaire former head of oil-exporting company Yukos, was sentenced to nine years' imprisonment for tax evasion and fraud. His conviction, following the effective renationalization of Yukos in 2004, was widely viewed as politically motivated, owing to his criticism of Putin's regime.

High oil and gas prices continued to underpin Russia's strong economic growth during Putin's presidency. There was increasing state influence over the energy industry, exercised through the giant gas monopoly Gazprom and through Rosneft (another state-run company that acquired the prime assets of Yukos in 2004). However, Russia's reputation as a reliable international energy trader was tarnished. Several cuts in Russian oil and gas supplies to neighbouring countries—particularly Ukraine and Belarus—from 2006, purportedly over pricing disputes but with suspected political overtones, in turn disrupted pipeline flows to EU countries and prompted high-level protests.

There was meanwhile growing concern for civil and political freedoms in Putin's Russia, with foreign commentators citing increasing authoritarianism, the lack of a genuine opposition or independent judiciary and more general lawlessness, including violent xenophobia. The deaths in late 2006 of two prominent government critics—campaigning journalist Anna Politkovskaya and former intelligence officer Alexander Litvinenko—fuelled widespread suspicions of official involvement. Litvinenko's poisoning in London in particular led to a sharp deterioration in Russian-UK relations. Putin's refusal to extradite a prime suspect in the affair to Britain resulted in the mutual imposition of diplomatic sanctions in July 2007.

Plans by the USA to expand its missile defences into the Eastern European member countries of NATO (which have since been scaled back) further soured Russian-US relations in Putin's second term of office. In Nov. 2007 he approved a law suspending Russia's participation in the 1990 Conventional Armed Forces in Europe (CFE) Treaty limiting military deployments.

In Dec. 2007 the United Russia party won a landslide victory in parliamentary elections. With his second term set to expire in 2008, Putin announced that he would nevertheless continue in politics as the next prime minister and that Dmitry Medvedev (the chair of Gazprom) would be his preferred successor as president after elections scheduled for March. Russian voters duly endorsed this political continuity at the polls and Putin and Medvedev were sworn into their respective posts in May 2008. Putin therefore remained a pivotal figure in the Russian leadership, having an increasingly centralized grip on power and policy with President Medvedev.

In Oct. 2009 Putin's ruling United Russia party won a sweeping victory in nationwide regional and local elections. Opposition parties walked out of parliament, claiming that the vote had been rigged, and they threatened to demonstrate in protest. Also in Oct., Putin visited China to conclude trade deals worth US\$3.5bn.

Significant issues confronting the Putin administration in mid-2010 included an espionage controversy, as a number of alleged undercover Russian agents posing as ordinary citizens were arrested in the USA and subsequently deported under a prisoner exchange deal, and the environmental consequences of unprecedented wildfires across central and western Russia amid the hottest temperatures in over a century. There were also further acts of terrorism in 2010 and early 2011, including suicide bombings on the Moscow Metro and at Moscow's Domodedovo airport and an attack on the regional parliament building in Chechnya.

In Dec. 2011 Putin's dominant United Russia won the parliamentary elections, although with a reduced majority of seats and slightly less than 50% of the vote. Reports of electoral fraud prompted unprecedented opposition protests on the streets of Moscow. Despite the apparent decline in his personal support, Putin stood successfully as United Russia's candidate for the presidential election in March 2012 and once more took over the office that he had vacated in 2008. He stepped down as leader of United Russia ahead of being sworn in as president in May 2012.

In Aug. 2012 the Russian government was condemned by human rights groups and large parts of the international community for imposing prison sentences on three female members of a punk band that staged an anti-Putin protest in Moscow's cathedral. In foreign affairs Putin maintained his opposition to outside intervention in the civil war in Syria, Russia's long-standing ally in the Middle East.

### **Dmitry Anatolyevich Medvedev**

#### *Position*

Prime Minister

#### *Introduction*

Dmitry Medvedev's political career has been closely associated with Vladimir Putin's since the mid-1990s and he has been viewed as a fellow modernizer. In March 2008 Medvedev was elected by a landslide vote to the presidency as Putin's preferred successor after the latter had completed the two consecutive presidential terms allowed under the constitution. In 2012, after four years in office, Medvedev stood down as Putin ran successfully again for the presidency, and he was subsequently appointed by Putin as prime minister in May.

#### *Early Life*

Medvedev was born in St Petersburg (then called Leningrad) on 14 Sept. 1965. Both his parents were university teachers. He studied law at Leningrad State University, graduating in 1987. After obtaining a PhD in private law in 1990, he worked as an assistant professor at the university until 1999. In 1990 he also worked at the Leningrad Soviet of People's Deputies. From 1991-95 he served as legal adviser to the chairman of Leningrad city council and to the committee for external relations of the St Petersburg mayor's office, headed by Vladimir Putin. In Nov. 1993 he became legal affairs director of Ilim Pulp Enterprise and in 1998 he was elected to the board of governors of Bratskiy LPK paper mill.

Medvedev was appointed deputy head of the presidential administration by Putin in Dec. 1999. In 2000 he was promoted to the rank of first deputy chief of staff and during the 2000 election was in charge of the presidential campaign headquarters. In the same year Medvedev became chairman of the board of directors of Gazprom, Russia's largest company. From 2001 he served as deputy chairman until, in June 2002, he became chairman again. Under Medvedev, Gazprom acquired other energy companies and expanded overseas, increasing its significance both within the Russian economy and as an international supplier.

In 2003 Medvedev was appointed chief of staff of the presidential executive office and in Nov. 2005 Putin made him first deputy prime minister, giving him control of four national infrastructure projects: health care, education, housing and agriculture. Medvedev's initiatives included supporting foster families and developing pre-school education; he also attempted to reshape relationships between the Kremlin and Russia's billionaire oligarchs. In Dec. 2007, having served the constitutional maximum of two terms, Putin named Medvedev as his chosen successor. This was interpreted by many as an arrangement by which the two could continue to govern in partnership. Medvedev was elected president with 70% of the vote on 2 March 2008 and was sworn in on 7 May 2008.

#### *Career in Office*

As expected, Medvedev appointed Putin prime minister. Medvedev pledged to continue Putin's policies, indicating that he would encourage a diversification of the economy to reduce reliance on gas revenues. He also signalled his support for a free press and free judiciary and spoke of limiting the influence of the security services.

Early challenges internationally included a deterioration in relations with NATO and Russia's western neighbours. In Aug. 2008 he sent troops to South Ossetia and Abkhazia in Georgia, in response to Tbilisi's military attacks on separatist forces within the breakaway regions. A week of fierce fighting ended with a French-brokered peace deal. Russia's intervention received widespread international criticism, as did Medvedev's announcement of Russia's unilateral recognition of the independence of the two territories.

In his first state-of-the-nation address in Nov. 2008, Medvedev proposed a constitutional change to extend the presidential term of office from four to six years and that of parliament from four to five years, arguing that it was necessary to guarantee effective government. However, critics considered the move undemocratic and designed to perpetuate authoritarian rule from the Kremlin. In the same speech Medvedev threatened to deploy short-range missiles in Kaliningrad to counter the USA's proposed missile shield in central Europe (although a more conciliatory approach followed Barack Obama's assumption of the US presidency in Jan. 2009). He meanwhile claimed that the USA bore responsibility for the global financial crisis that had undermined the Russian banking system and destabilized markets. Also in Nov. 2008 Medvedev undertook an overseas tour of Latin America and Cuba.

Russia's relations with the USA improved from 2009 following the installation of a new US administration under President Obama. Medvedev met Obama in July as the latter made his first official visit to Moscow and they agreed to negotiate cuts in their countries' nuclear weapons arsenals in a new initiative to supersede the 1991 Strategic Arms Reduction Treaty. (A 30% cut was subsequently concluded under an agreement signed in April 2010.) In Sept. 2009 Medvedev welcomed the US decision not to site missile defence bases in Poland and the Czech Republic, the Russian military having earlier confirmed that plans to deploy short-range missiles in the Kaliningrad enclave were being shelved. Nevertheless, in Nov. 2010 he warned of the dangers of a new arms race unless NATO and Russia reached a co-operative accord within a decade on a joint missile-defence mechanism.

Medvedev had meanwhile called in Nov. 2009 for reform of the economy and re-emphasized the need for Russia to end its dependency on gas and oil exports. He also said that Russia's survival depended on rapid modernization, based on democratic institutions and an end to corruption.

In Nov. 2010 Medvedev became the first Russian leader to visit the Russian-occupied Kurile Islands, which have been the subject of a territorial dispute with Japan since the end of World War II.

In Sept. 2011 Vladimir Putin was confirmed as United Russia's candidate for the presidential election scheduled for March 2012. Following his expected victory, he succeeded Medvedev in May as the latter assumed the premiership at the head of the United Russia-dominated government.

In Nov. 2012 the government introduced legislation broadening the definition of treason in what was widely viewed as an attempt to stop Russians working with Western non-governmental organizations and to stifle domestic dissent.

#### **DEFENCE**

The President of the Republic is C.-in-C. of the armed forces. Conscription was reduced to 18 months for those drafted in 2007 and was further reduced to one year for those drafted from 1 Jan. 2008.

A presidential decree of Feb. 1997 ordered a cut in the armed forces of 200,000 men, reducing them to an authorized strength of 1,004,000 in 1999. In 2007 armed forces totalled 1,027,000, plus 418,000 personnel in paramilitary forces. There were estimated to be around 20,000,000 reserves (all armed forces) in 2006 of whom 2,000,000 had seen service within the previous five years.

Military expenditure totalled an estimated US\$58,600m. in 2008 (less than a tenth of that of the USA), equivalent to US\$413 per capita. This made Russia the world's fifth biggest military spender. In the period 1999–2008 military expenditure rose by 173% in real terms. In 2007 defence spending represented 3.5% of GDP.

#### **Nuclear Weapons**

Russia's strategic warhead count is now shrinking and stood at an estimated 1,800 in Jan. 2012 according to the Stockholm International Peace Research Institute. There are about a further 8,200 warheads held in reserve or scheduled to be dismantled, giving a total stockpile of around 10,000 warheads. Shortfalls in planned investments to replace current systems as they reach the end of their service lives means the number of strategic warheads will continue to decline.

At the height of the Cold War each side possessed over 10,000 nuclear warheads. The START I arms-control treaty, signed in 1991, limited to approximately 6,000 the number of nuclear warheads that Russia and the USA may each deploy on long-range, or 'strategic', land-based missiles, submarine-launched missiles and bombers. The 1993 START II treaty would have obliged both sides to reduce their stocks of strategic weapons to 3,500 nuclear warheads. However, instruments of ratification were never exchanged and the treaty lapsed. Russia retracted acceptance in June 2002 after the USA withdrew from the Anti-Ballistic Missile treaty. START I expired on 5 Dec. 2009. On 24 May 2002 the USA and Russia signed the Strategic Offensive Reductions Treaty (or Moscow Treaty) to reduce the number of US and Russian warheads to between 1,700 and 2,200 each. The treaty was in force from June 2003 until Feb. 2011. It was then superseded by the Measures to Further Reduction and Limitation of Strategic Offensive Arms (known as New START), signed by the Russian and US presidents in April 2010 and ratified by the US Senate in Dec. 2010 and the Russian Federal Assembly in Jan. 2011. Under its terms, both Russia and the USA were limited to 1,550 warheads, a 30% drop on previous levels, to be implemented within seven years.

#### **Chemical and Biological Weapons**

Russia has converted or destroyed its former chemical weapon production facilities and is currently working to complete destruction of its chemical weapon stockpile in accordance with the provisions of the 1993 Chemical Weapons Convention. Russia has the largest declared stockpile of chemical weapons, originally totalling 40,000 tonnes.

The Soviet Union had perhaps the world's largest biological weapon programme until at least the 1980s. Russia has reiterated its commitment to the 1972 Biological and Toxin Weapons Convention.

#### **Arms Trade**

Russia was the world's second largest exporter after the USA in 2008, with sales worth US\$5,400m. or 17.0% of the world total.

#### **Army**

In 2006 Army personnel numbered around 395,000 (including about 190,000 conscripts). There were around 17,000 Russian troops stationed outside Russia in 2006, the majority in various states of the former USSR (including 7,800 in Tajikistan and 3,000 in the Caucasus).

The Army is deployed in six military districts and one Operational Strategic Group. Equipment includes some 23,000 main battle tanks (including T-55s, T-62s, T-64A/-Bs, T-72L/-Ms, T-80/-U/UD/UMs and T-90s) plus 150 light tanks (PT-76s).

#### **Strategic Nuclear Ground Forces**

In 2008 there were three rocket armies, which will fall to two by 2016. Each rocket army is divided into launcher groups with ten silos and one control centre. Inter-continental ballistic missiles numbered 506. Personnel, 40,000.

#### **Navy**

The Russian Navy continues to reduce steadily and levels of sea-going activity remain very low with activity concentrated on a few operational units in each fleet. The safe deployment and protection of the reduced force of ballistic missile submarines remains its first priority; and the defence of the Russian homeland its second. The strategic missile submarine force operates under command of the Strategic Nuclear Force commander whilst the remainder come under the Main Naval Staff in Moscow, through the Commanders of the fleets.

The Northern and Pacific fleets count the entirety of the ballistic missile submarine force, all nuclear-powered submarines, the sole operational aircraft carrier (the *Admiral Kuznetsov*) and most major surface warships. The Baltic Fleet organization is based in the St Petersburg area and in the Kaliningrad exclave. The Black Sea Fleet is based at facilities in the Crimea, Ukraine. Ukraine had stated that the lease on these three harbours for warships and two airfields would not be extended and that the fleet must leave the main base of Sevastopol by 2017. However, since being elected in Feb. 2010 Ukraine's president Viktor Yanukovich has suggested that he would allow Russia's fleet to remain in his country beyond 2017. There is a small Caspian Sea flotilla. In Nov. 2008 Russia held joint exercises with the Venezuelan Navy in the Caribbean Sea in what was widely perceived as an attempt to provoke the USA.

The material state of all the fleets is suffering from continued inactivity and lack of spares and fuel. The nuclear submarine refitting and refuelling operations in the Northern and Pacific Fleets remain in disarray, given the large numbers of nuclear submarines awaiting defuelling and disposal. The strength of the submarine force has now essentially stabilized, but there are still large numbers of decommissioned vessels awaiting their turn for scrapping in a steadily deteriorating state. In Jan. 2003 it was announced that up to a fifth of the fleet was to be scrapped.

In Jan. 2011 there were 11 operational nuclear-fuelled ballistic-missile submarines (four of Delta-III class, six Delta-IV and one unarmed Typhoon used as a test platform). There was a total of 276 sea-launched SS-N-9, -12, -19, -21 and -22s in Jan. 2009. After a series of test launches, a new submarine-launched ballistic missile 'Bulava' (SS-NX-30) was officially approved for service in Dec. 2011. It is set to be deployed on the new 'Borei'-class nuclear submarines.

The attack submarine fleet comprises a wide range of classes, from the enormous 16,250 tonne 'Oscar' nuclear-powered missile submarine to diesel boats of around 2,000 tonnes. The inventory of tactical nuclear-fuelled submarines comprises five 'Oscar'-class, nine 'Akula'-class, three 'Sierra'-class and four 'Victor III'-class submarines.

The diesel-powered 'Kilo' class, of which the Navy operates 15, is still building at a reduced rate mostly for export.

Cruisers are divided into two categories; those optimized for anti-submarine warfare (ASW) are classified as 'Large Anti-Submarine Ships' and those primarily configured for anti-surface ship operations are classified 'Rocket Cruisers'. The principal surface ships of the Russian Navy include the following classes:

*Aircraft Carrier.* The *Admiral Kuznetsov* of 67,500 tonnes was completed in 1989. It is capable of embarking 20 aircraft and 15–17 helicopters. All other aircraft carriers have been decommissioned or scrapped.

*Cruisers.* The ships of this classification are headed by the one ship of the Kirov-class, the largest combatant warships, apart from aircraft carriers, to be built since the Second World War. There

are, in addition, three Slava-class and one of the Nikolaev ('Kara') class in operation.

**Destroyers.** There are seven Udaloy I-class, the first of which entered service in 1981, one Udaloy II-class and five Sovremenny-class guided missile destroyers in operation. In addition there is a single remaining 'modified Kashin'-class ship in operation.

**Frigates.** There are six frigates in operation including the first of a new class, the 'Gepard', two Neustrashimy-class, two Krivak I-class and one Krivak II-class ships.

The Russian Naval Air Force operates some 266 combat aircraft including 58 Tu-22M bombers and 58 Su-24, 10 Su-25 and 49 Su-27 fighters. In 2006 there were an additional 161 armed helicopters in operation.

Total Naval personnel in 2006 numbered 142,000. Some 11,000 serve in the strategic submarine force, 35,000 in naval aviation and 9,500 naval infantry/coastal defence troops.

### Air Force

Air Force personnel is estimated at 160,600 and equipment includes some 1,850 combat aircraft and about 2,000 helicopters.

The Air Force was reorganized in 2009 and now consists of: Operational Strategic Command for Air-Space Defence; First Air Force and Air Defence Command; Second Air Force and Air Defence Command; Third Air Force and Air Defence Command; Fourth Air Force and Air Defence Command; Military Transport Aviation Command; and Long Range Aviation Command. An air force base opened in Kyrgyzstan in Oct. 2003.

Prior to the restructuring equipment of the 37th Air Army included 124 Tu-22Ms plus Tu-95s and Tu-160s.

Tactical Aviation comprised in 2006 (numbers in brackets) Su-24 (400) and Su-25 (275) fighter-bombers and MiG-29 (314), MiG-31 (279) and Su-27 (390) fighters. In addition MiG-25 and Su-24s are used for reconnaissance missions.

Military Transport Aviation Command comprised nine regiments in 2006 and has some 293 aircraft. Funding shortages have reduced serviceability drastically.

### ECONOMY

Agriculture accounted for 5-1% of GDP in 2006, industry 38-0% and services 57-0%.

In Oct. 1991 a programme was launched to create a 'healthy mixed economy with a powerful private sector'. The prices of most commodities were freed on 2 Jan. 1992.

Privatization, which is overseen by the State Committee on the Management of State Property, began with small and medium-sized enterprises. A state programme of privatization of state and municipal enterprises was approved by parliament in June 1992, and vouchers worth 10,000 roubles each began to be distributed to all citizens in Oct. 1992. These could be sold or exchanged for shares. Employees had the right to purchase 51% of the equity of their enterprises. 25 categories of industry (including raw materials and arms) remained in state ownership. The voucher phase of privatization ended on 30 June 1994. A post-voucher stage authorized by presidential decree of 22 July 1994 provides for firms to be auctioned for cash following the completion of the sale of up to 70% of manufacturing industry for vouchers. The Ministry of Property Relations was established in 2000 with the mandate of overall federal policies on property issues and the management of state property, and in Dec. 2001 a new Federal Law on Privatization of State and Municipal Property was adopted. By that time a total of 129,811 enterprises had been sold. In 2010 only 30-9% of total employment was still in the public sector, down from 69-1% in 1992 and 37-8% in 2000.

### Overview

The economy is based around the energy industry, with natural gas and oil accounting for 70% of revenues. With Russia the largest energy exporter in the world, economic growth averaged

7% per year from 2000 to 2008, largely driven by high energy prices. Although exact figures are unavailable, reserves of oil are estimated to be sufficient to last 20 years at present production levels.

With the economy reliant on energy prices, the global economic crisis saw the Russian economy contract by nearly 8% in 2009. It then recovered well, expanding by over 4% in both 2010 and 2011. Growth has also benefited from low unemployment and high domestic consumption. The government has recognised the need for a more diversified economy and provides 75% of research and development funding, with a particular focus on high-tech products in the automobile and aviation industries.

Obstacles to growth include a shortage of skilled workers, lack of competitiveness and an underdeveloped infrastructure. Foreign and domestic private investment is restricted by corruption, organized crime, problems with the judicial system and a perceived excess of government intervention. The European Bank for Reconstruction and Development and the World Bank rated Russia 120th out of 183 countries for the ease of doing business in 2012.

Russia became a member of the World Trade Organization in 2012 after 18 years of negotiations. GNI per capita is \$10,730, but there is a significant wealth gap. In 2008 the richest 10% of the population accounted for 33-5% of wealth while the poorest 10% accounted for 2-6%. In 2006 the poverty rate stood at 11-6%. An ageing population, shrinking workforce and lack of immigration present further long-term challenges.

### Currency

The unit of currency is the *rouble* (RUB), of 100 *kopeks*. In Jan. 1998 the rouble was redenominated by a factor of a thousand. Foreign exchange reserves were US\$383,664m. In Sept. 2009 and gold reserves 19-00m. troy oz. In Feb. 2005 Russia abandoned its *de facto* dollar peg and switched to a euro-dollar basket. Inflation rates (based on IMF statistics):

| 2002  | 2003  | 2004  | 2005  | 2006 | 2007 | 2008  | 2009  | 2010 | 2011 |
|-------|-------|-------|-------|------|------|-------|-------|------|------|
| 15-8% | 13-7% | 10-9% | 12-7% | 9-7% | 9-0% | 14-1% | 11-7% | 6-9% | 8-4% |

Inflation had been 2,510% in 1992. Total money supply in Dec. 2008 was 7,419-7bn. roubles. In Nov. 2000 then President Putin and President Lukashenka of Belarus agreed the introduction of a single currency, but plans to introduce the Russian rouble to Belarus have since been postponed indefinitely.

### Budget

Central government revenue totalled 14,151-8bn. roubles in 2009 (14,127-3bn. roubles in 2008) and expenditure 12,063-3bn. roubles (8,887-8bn. roubles in 2008). Principal sources of revenue in 2009: taxes on international trade and transactions, 2,599-2bn. roubles; social security contributions, 2,354-7bn. roubles; taxes on goods and services, 2,288-9bn. roubles. Main items of expenditure by economic type in 2009: social benefits, 4,146-3bn. roubles; compensation of employees, 1,982-8bn. roubles; grants, 1,693-9bn. roubles.

VAT is 18% (reduced rate, 10%).

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 4-7% | 7-3% | 7-2% | 6-4% | 8-2% | 8-5% | 5-2% | -7-8% | 4-3% | 4-3% |

GDP growth in 2012 was 3-4% according to the Federal Statistics Service. Total GDP was US\$1,857-8bn. in 2011. In June 2002 Russia was acknowledged as a market economy under United States trade law, symbolically underscoring the country's transformation from a state-planned economy.

### Banking and Finance

The central bank and bank of issue is the State Bank of Russia (*Chairman*, Sergey Mikhailovich Ignatiev). The Russian Bank for Reconstruction and Development and the State Investment Company were created in 1993 to channel foreign and domestic investment. Foreign bank branches have been operating since Nov. 1992.

By 1995 the number of registered commercial banks had increased to around 5,000 but following the Aug. 1997 liquidity crisis, owing to the ensuing bankruptcies, mergers and the Central Bank's revoking of licences, the number fell to 2,500. This has since fallen to 1,300. Approximately 80% of the commercial banks were state-owned through ministries or state enterprises. Sberbank is the leading bank with assets of US\$335.0bn. in Dec. 2011, followed by VTB Bank (formerly Vneshtorgbank) with assets of US\$127.3bn. and Gazprombank with assets of US\$75.5bn. In Sept. 2011 there were 991 credit institutions with 2,825 branches.

In the wake of one of the worst financial crises that Russia's market economy had experienced, the central bank tripled interest rates to 150% in May 1998 in an effort to restore stability to the financial system. In 2002 the banking sector in Russia was healthier than at any time since the collapse of the former Soviet Union.

External debt was US\$384,740m. in 2010, representing 26.9% of GNI.

In 2010 Russia received US\$41.2bn. worth of foreign direct investment, up from US\$36.5bn. in 2009 but down from the record US\$75.0bn. of 2008.

There are stock exchanges in Moscow, Novosibirsk, St Petersburg and Vladivostok.

## ENERGY AND NATURAL RESOURCES

### Environment

Russia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 accounted for 5.7% of the world total (the third highest after China and the USA), and were equivalent to 12.3 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Russia 28th in the world, with 86.3%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

In 2007 installed capacity was an estimated 224m. kW and electricity production 1,015.33bn. kWh (675.82bn. kWh thermal, 178.98bn. kWh hydro-electric and 160.04bn. kWh nuclear). Consumption per capita was 7,054 kWh in 2007. There were 31 nuclear reactors in use in 2009.

### Oil and Gas

Russia was the largest oil producer in 2009 (overtaking Saudi Arabia's output for the first time) and the second largest exporter in 2008 (after Saudi Arabia). Russia consumes less than a third of the oil that it produces. Oil and gas account for 50% of Russia's export revenues. In 2008 there were proven crude petroleum reserves of 79.0bn. bbls, but they are expected to be exhausted by 2030. 2009 production of oil was 494.2m. tonnes (12.9% of the world total). Oil production rose every year between 1998 and 2007 but fell slightly in 2008 before increasing again in 2009. There is an extensive domestic oil pipeline system. The main export pipeline to Europe is the Druzhba pipeline (crossing Belarus before splitting into northern and southern routes). The main export terminal is at Novorossiisk on the Black Sea. A 964-km pipeline from Skovorodino in Russia to Daqing in China was inaugurated in Jan. 2011, allowing Russia—as the world's largest oil producer—to increase significantly its exports to China. Other export pipeline developments include the Baltic Pipeline System I and II (the first system became operational in Dec. 2001 and the

second in March 2012) and the Caspian Pipeline Consortium's pipeline from Tengiz (Kazakhstan) to Novorossiisk, which was commissioned in March 2001. Construction of a second stage is expected to be completed in the course of 2013.

Output of natural gas in 2011 was a record 607.0bn. cu. metres. Russia is the world's second largest producer but was surpassed as the largest producer by the USA in 2010. It also has the largest reserves of natural gas—in 2008 it had proven reserves of 43,300bn. cu. metres (23% of the world total). There is a comprehensive domestic distribution system (run by state-owned Gazprom, in which the government has a 50.002% stake), as well as gas pipelines linking Russia with former Soviet republics. In Russia's biggest-ever takeover Gazprom agreed in Sept. 2005 to buy a 72.7% stake in Sibneft, a leading oil company. The main export pipelines run from western Siberia through Ukraine and Belarus to European markets. Russia is seeking to diversify its gas export routes and a number of pipeline projects are under development. Russia is also looking to export its natural gas to Asian markets.

The oil and gas boom has meant that the sector's share in Russia's total GDP has risen from 12.7% in 1999 to 31.6% in 2007.

### Minerals

Russia contains great mineral resources: coal (17% of the world's total reserves), iron ore, gold, platinum, copper, zinc, lead, tin and rare metals. Output in 2006, unless otherwise indicated (in tonnes): coal (2007), 217.9m.; iron ore (2005), 96.8m.; lignite (2007), 71.1m.; potash (2008), 6.7m.; bauxite, 6.4m.; aluminium, 3.7m.; alumina, 3.3m.; salt, 2.8m.; chrome ore, 966,065; copper (estimate), 739,000; nickel (estimate), 327,000; zinc, 178,000; molybdenum (estimate), 3,100; tin (estimate), 3,000; gold (2007), 157. Diamond production, 2005 estimate: 38.0m. carats. Only Australia produces more diamonds. Annual uranium production is more than 3,000 tonnes.

### Agriculture

A presidential decree of Dec. 1991 authorized the private ownership of land on a general basis, but excluded farmland. Nevertheless, large state and collective farms, inherited from the Soviet era, were forced officially to reorganize, with most becoming joint-stock companies. Farm workers could branch off as private farmers by obtaining a grant of land from their parent farm, although they lacked full ownership rights. In 2002 over 90% of Russia's 400m. ha. of farmland remained under the control of the state or former collectives. In Jan. 2003 a new law came into force regulating the possession, use and disposal of land plots designated as agricultural land. The law provides that: the authorities may confiscate farmland if its owners are using it for non-agricultural purposes; regional authorities will have the first option to purchase farmland from its owners; and farmland can only be sold to third parties if authorities refuse their option to buy. The law also deprives foreigners of the right to own agricultural land, although they may lease it for up to 49 years. In 2007 there were 121.57m. ha. of arable land and 1.79m. ha. of permanent crops. There were 4.4m. ha. of irrigated land in 2007.

Output in 2009 (in 1,000 tonnes) included: wheat, 61,740; potatoes, 31,134; sugar beets, 24,892; barley, 17,881; sunflower seeds, 6,454; oats, 5,401; rye, 4,333; maize, 3,963; cabbage, broccoli, etc., 3,312; tomatoes, 2,170; onions, 1,602; apples, 1,596; carrots and turnips, 1,519. Russia was the world's largest producer of barley, oats, rye and sunflower seeds in 2009.

Livestock, 2009: cattle, 21.04m.; sheep, 19.60m.; pigs, 16.16m.; chickens, 366m.

Livestock products in 2009 (in tonnes): poultry meat, 2.3m.; pork, bacon and ham, 2.2m.; beef and veal, 1.7m.; cow's milk, 32.3m.; goat's milk, 0.2m.; eggs, 2.2m.; cheese, 0.6m.

### Forestry

Russia has the largest area covered by forests of any country in the world, with 809.1m. ha. in 2010 (49% of the land area). In 2007 timber production was 207.0m. cu. metres. Russia was the world's largest exporter of roundwood in 2007, with 36.2% of the world total.

### Fisheries

Total catch in 2010 was 4,069,624 tonnes (down from 8,211,516 tonnes in 1989). Approximately 94% of the fish caught are from marine waters.

### INDUSTRY

As a result of Soviet central planning, Russian industry remains dominated by heavy industries, such as energy and metals. As of 1 Jan. 2010 there were 418,600 manufacturing enterprises and organizations (of which 383,300 were private) and 433,700 construction enterprises and organizations (413,400 private). Manufacturing accounted for 13.1% of GDP in 2009 and construction 4.8%.

The leading companies by market capitalization in Russia in March 2012 were: Gazprom, a gas company (US\$145.8bn.); Rosneft, an oil and gas company (US\$75.7bn.); and Sberbank of Russia (US\$72.2bn.)

Output in 2007 (unless otherwise indicated) includes: (in tonnes) crude steel, 72.4m.; residual fuel oil, 67.7m.; distillate fuel oil, 66.3m.; cement, 59.9m.; rolled steel, 59.7m.; pig iron, 51.5m.; petrol, 35.1m.; coke, 32.3m.; jet fuel, 10.7m.; sulphuric acid (2006), 9.5m.; steel pipe, 8.7m.; bread, 7.9m.; paper and paperboard, 7.6m.; raw sugar, 6.1m.; clays, 2.2m.; caustic soda, 1.3m.; (in cu. metres) sawnwood, 22.1m.; plywood, 2.8m.; (in sq. metres) cotton fabrics, 2,108m.; woollen fabrics, 28.7m.; (in units) cigarettes, 397bn.; bricks, 13,090m.; televisions, 6.8m.; refrigerators and freezers, 3.5m.; washing and drying machines, 2.7m.; microwaves, 2.5m.; bicycles, 1.5m.; passenger cars, 1.3m.; trucks, 285,030; combine harvesters, 8,060; tractors, 7,500; (in litres) beer, 11,472m.; soft drinks, 5,982m.; mineral water, 3,632m.; spirits and liqueurs, 1,315m.

### Labour

In 2010 the economically active population numbered 75.45m. (38.58m. males and 36.87m. females). Of those in employment in 2010, 18.1% worked in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 15.4% in manufacturing, 9.6% in agriculture and forestry, 8.8% in education, 7.9% in transport, 7.8% in construction and 7.0% in health and social work. The unemployment rate was 9.9% in May 2009—with 7.5m. people unemployed using ILO methodology—down from 10.2% in April 2009 although up from 6.1% in Oct. 2008. Average monthly wages were 20,952.2 roubles in 2010 (compared to 8,554.9 roubles in 2005); the monthly minimum wage in 2010 was 4,330 roubles (up from 132 roubles in 2000). In 2010, 18.5m. people, or 13.1% of the population, had an average per capita money income lower than the subsistence minimum (down from 29.0% of the population in 2000). The state Federal Employment Service was set up in 1992. Unemployment benefits are paid by the Service for 12 months, payable at: 75% of the average monthly wage during the last two months preceding unemployment for the first three months; 60% for the next four months; and 45% for the last five months. Annual paid leave is 24 working days. In 2005, 85,900 working days were lost through strikes (6,000,500 in 1996). Retirement age is 55 years for women, 60 for men.

### INTERNATIONAL TRADE

In Jan. 2010 Russia joined the newly established Customs Union, together with Belarus and Kazakhstan.

### Imports and Exports

The following table shows the value of Russia's foreign trade (in US\$1bn.):

|                | 2006  | 2007  | 2008  | 2009  | 2010  |
|----------------|-------|-------|-------|-------|-------|
| Imports c.i.f. | 137.8 | 199.8 | 267.1 | 167.3 | 229.1 |
| Exports f.o.b. | 301.2 | 351.9 | 467.6 | 301.7 | 396.6 |

Of imports in 2010, 44.4% by value was machinery and transport equipment, 16.1% chemicals products and rubber, 15.9% foodstuffs and agricultural raw materials, and 7.4% metals and precious stones. Of exports, 68.4% by value was mineral products, 12.8% metals and precious stones, 6.2% chemical products and rubber, and 5.4% machinery and transport equipment. China provided 13.4% of imports in 2009, Germany 12.4%, USA 5.4%, Ukraine 5.3% and France 4.9%. In 2009 the Netherlands accounted for 12.0% of exports, Italy 8.3%, Germany 6.2%, Belarus 5.5% and China 5.5%.

### COMMUNICATIONS

#### Roads

There were 933,000 km of roads in 2006, of which 80.9% were hard surfaced. In 2007, 78bn. passenger-km were travelled by road. There were 29,249,000 passenger cars in use in 2007 plus 4,730,000 lorries and vans and 861,000 buses and coaches. In 2007 there were 33,300 road deaths.

#### Rail

Length of railways in 2010 was 86,000 km, of which about half is electrified. In 2008, 1,295.6m. passengers and 1,304.7m. tonnes of freight were carried by rail; passenger-km travelled came to 176bn. and freight tonne-km to 2,116bn. There are metro services in Moscow (309 km), St Petersburg (105 km), Nizhny Novgorod (15 km), Novosibirsk (14 km), Samara (10 km), Ekaterinburg (9 km) and Kazan (7 km). Kazan's metro opened in 2005, making it the first metro to be opened in Russia since the breakup of the Soviet Union.

#### Civil Aviation

The main international airports are at Moscow (Domodedovo, Sheremetyevo and Vnukovo) and St Petersburg (Pulkovo). The national carrier is Aeroflot International Russian Airlines (51.2% state-owned), which carried 11.3m. scheduled passengers in 2010. Rossiya, S7 Airlines, Transaero and UTair also operate internationally.

In 2009 scheduled airline traffic of Russian-based carriers flew 836m. km, carrying 34,403,000 passengers (11,992,000 on international flights). The three busiest airports all serve Moscow. Domodedovo is Russia's busiest airport in terms of passenger traffic (22,255,000 in 2010, a 19% increase on 2009). Sheremetyevo handled 19,329,000 passengers in 2010 (up 31% on 2009), and Vnukovo handled 9,460,000 in 2010 (up 22% on 2009). The fourth busiest airport is Pulkovo, which serves St Petersburg and handled 8,444,000 passengers in 2010 (up 25% on 2009).

#### Shipping

In Jan. 2009 there were 1,272 ships of 300 GT or over registered, totalling 4.90m. GT. Of the 1,272 vessels registered, 857 were general cargo ships, 296 oil tankers, 58 bulk carriers, 24 chemical tankers, 24 passenger ships, 12 container ships and one liquid gas tanker. The Russian-controlled fleet comprised 1,418 vessels of 1,000 GT or over in Jan. 2009, of which 945 were under the Russian flag and 473 under foreign flags. In 2010, 16m. passengers and 102m. tonnes of freight were carried on 101,000 km of inland waterways. The busiest ports are Novorossiisk (which handled 81,633,000 tonnes in 2008), Primorsk (75,582,000 tonnes in 2008) and St Petersburg (59,945,000 tonnes in 2008).

#### Telecommunications

In 2008 there were 44,897,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 199,522,000

(1,411.1 per 1,000 persons). There were 61.5m. internet users in 2011. In March 2012 there were 5.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The Supreme Court is the highest judicial body on civil, criminal and administrative law. The Supreme Arbitration Court deals with economic cases. The KGB, and the Federal Security Bureau which succeeded it, were replaced in Dec. 1992 by the Federal Counter-Intelligence Service. The legal system is, however, crippled by corruption.

A new civil code was introduced in 1993 to replace the former Soviet code. It guarantees the inviolability of private property and includes provisions for the freedom of movement of capital and goods.

12-member juries were introduced in a number of courts after Nov. 1993, but in the years that followed jury trials were not widely used. However, on 1 Jan. 2003 jury trials began to be phased in nationwide. A new criminal code came into force on 1 Jan. 1997, based on respect for the rights and freedoms of the individual and the sanctity of private property. A further new code that entered force on 1 July 2002 introduced new levels of protection for defendants and restrictions on law enforcement officials. The death penalty is retained for five crimes against the person. It is not applied to minors, women or men over 65.

In 2010, 2,629,000 crimes were recorded, including 15,600 murders and attempted murders (down from 31,800 in 2000), 1,108,000 thefts and 4,900 rapes and attempted rapes. In 1996 there were 140 executions (86 in 1995; 1 in 1992). President Yeltsin placed a moratorium on capital punishment in 1996 when Russia joined the Council of Europe, but parliament has refused to abolish the death penalty. The last execution was in Aug. 1996. The prison population in May 2011 was 806,100 (568 per 100,000 population—the second highest rate in the world after the USA). In 2010 there were 1,052 prison establishments and institutions.

### Education

Adult literacy rate in 2008 was over 99%. In 2007 there were 5.01m. pupils in primary schools, 10.80m. in secondary schools and 9.37m. students in tertiary education (56.8% of whom were females). There were 5.23m. children in 45,300 pre-school establishments in 2009.

In 2006 public expenditure on education came to 4.0% of GNI.

Russia's largest university is the M. V. Lomonosov Moscow State University. Founded in 1755, it now has 30 faculties and 15 research centres. It has an annual enrolment of 31,000 students. The Russian Academy of Sciences, founded in 1724 and reorganized in 1925 as the Academy of Sciences of the Union of Soviet Socialist Republics, was restored under its present name in 1991. It is the highest scientific self-governing institution in Russia and has 18 divisions on particular areas of science. The Academy also has three regional branches: the Urals Branch, the Siberian Branch and the Far East Branch.

### Health

Doctors in 2006 numbered 614,183. In 2006 Russia had 43 doctors per 10,000 people and 97 hospital beds per 10,000 persons. There were 45,628 dentists, 1,214,292 nurses and midwives and 11,521 pharmacists in 2006. Expenditure on health in 2009 was 5.4% of GDP. Russia has among the highest rates of growth of HIV cases in the world; by 31 Dec. 2007 there were 416,113 registered cases. In 2005 there were 150 cases of tuberculosis per 100,000 people. In 2009, 39.1% of Russian adults smoked (males, 60.2%; females, 21.7%).

### Welfare

Russia is in the process of implementing a reform of its pensions system, the focus of which is to move away from a distributive system to an accumulating (funded) scheme. Instead of citizens paying 28% of their monthly salary into the state pension fund,

since 2004 it has been possible to pay between 2% and 6% to private asset managers.

State welfare provision includes: old age, disability and survivor pensions; sickness and maternity benefits; work injury payments; unemployment benefits; and family allowances. The basic pension is a flat amount provided to all those reaching retirement age (60 for males and 55 for females) with a minimum contribution record of five years. The old-age pension is calculated as the sum of three components. In 2010 the basic monthly flat-rate amount for pensioners under the age of 80 varied from 2,622 roubles to 5,124 roubles according to the number of dependents; the basic monthly flat-rate amount for a pensioner age 80 or older varied from 5,124 roubles to 7,686 roubles according to the number of dependents.

## RELIGION

The Russian Orthodox Church is the largest religious association in the country. In early 2003 it had 128 dioceses (compared with 67 in 1989), over 19,000 parishes (6,893 in 1988) and about 480 monasteries (18 in 1980). There were also five theological academies, 26 seminaries, 29 pre-seminaries, two Orthodox universities, a theological institute, a women's pre-seminary and 28 icon-painting schools. In 2001 there were 23.6m. adherents. The total number of theological students was around 6,000. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia (Patriarch Kirill I—Metropolitan Kirill of Smolensk and Kaliningrad, b. 1946; elected Jan. 2009), assisted by the Holy Synod, which has seven members—the Patriarch himself and the Metropolitans of Krutitsy and Kolomna (Moscow), St Petersburg and Kyiv *ex officio*, and three bishops alternating for six months in order of seniority from the three regions forming the Moscow Patriarchate. The Patriarchate of Moscow maintains jurisdiction over 119 eparchies, of which 59 are in Russia; there are parishes of Russian Orthodox abroad, in Belarus, Ukraine, Kazakhstan, Moldova, Uzbekistan, the Baltic states, and in Damascus, Geneva, Prague, New York and Japan. There is a spiritual mission in Jerusalem, and a monastery at Mt Athos in Greece. A Russian Orthodox church was consecrated in Dublin in Ireland in Feb. 2003. Muslims represent the second largest religious community in Russia, numbering 19m. In Feb. 2010 the Supreme Co-ordinating Council of Russian Muslims was established to be co-chaired by the heads of the three major organizations—Talgat Tajuddin of the Central Spiritual Board of Muslims, Ravil Gainutdin of the Council of Muftis of Russia and Ismail Berdiyev of the Co-ordinating Muslim Council of the North Caucasus. There are 1,150 Protestant and 42 Jewish communities.

## CULTURE

### World Heritage Sites

Russia's World Heritage sites as classified by UNESCO (with year entered on list) are: the Historic Centre of St Petersburg (1990); the Kremlin and Red Square in Moscow (1990); Khizi Pogost (1990); the Historic Monuments of Novgorod and surroundings (1992); Cultural and Historic Ensemble of the Solovetsky Islands (1992); the White Monuments of Vladimir and Suzdal (1992); Architectural Ensemble of the Trinity Sergius Lavra in Sergiev Posad (1993); the Church of the Ascension, Kolomenskoye (1994); Virgin Komi Forests (1995); Lake Baikal (1996); Volcanoes of Kamchatka (1996, 2001); Golden Mountains of Altai (1998); Western Caucasus (1999); the Ensemble of Ferapontov Monastery (2000); Historic and Architectural Complex of the Kazan Kremlin (2000); Central Sikhote-Alin (2001); the Citadel, Ancient City and Fortress Buildings of Derbent (2003); Ensemble of the Novodevichy Convent in southwest Moscow (2004); Natural System of Wrangel Island Reserve (2004); the historical centre of the city of Yaroslavl (2005); the Putorana Plateau (2010); and the Lena Pillars Nature Park (2012).

The Russian Federation also shares three UNESCO sites: the Curonian Spit with Lithuania (2000); Uvs Nuur Basin with Mongolia (2003); and the Struve Geodetic Arc (2005), a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth, with nine other countries.

### Press

In 2008 there were 533 daily newspapers. There were 27,510 non-daily newspapers in 2008. The most popular daily newspaper in 2008 was *Moskovsky Komsomolets*, with an average daily circulation of 750,000, followed by *Komsomolskaya Pravda*, with a circulation of 716,000. A presidential decree of 22 Dec. 1993 brought the press agencies ITAR-TASS and RIA-Novosti under state control. In 2008, 123,336 new or revised books were published, a figure exceeded only by China, the UK and the USA.

### Tourism

In 2011 arrivals of non-resident visitors—including Russians living abroad—totalled 24,932,000 (22,281,000 in 2010), of which 2,336,000 were tourists (2,134,000 in 2010). There were 7,866 hotels and similar establishments in 2011, with 537,000 beds.

### Festivals

One of the most popular festivals is the White Nights Festival, which is held from May to July in St Petersburg and combines ballet, opera and music performances. The Annual Summer Ballet Festival runs from June to Sept. in Moscow while the Moscow International Film Festival takes place in June. The biggest rock and pop festival is Nashestvie, which is held annually near Moscow in Aug.

## THE REPUBLICS

### Status

The 21 republics that with Russia itself constitute the Russian Federation were part of the RSFSR in the Soviet period. On 31 March 1992 the federal government concluded treaties with the then 20 republics, except Checheno-Ingushetia and Tatarstan, defining their mutual responsibilities. The *Council of the Heads of the Republics* is chaired by the Russian President and includes the

Russian Prime Minister. Its function is to provide an interaction between the federal government and the republican authorities.

### Adygeya

Part of Krasnodar Territory. Area, 7,600 sq. km (2,950 sq. miles); population (2002 census), 477,109. Estimated population, 1 Jan.

2010, 443,200. Capital, Maikop (2002 census, 156,931). Established 27 July 1922; granted republican status in 1991.

*President:* Aslan Tkhakushinov, b. 1947 (in office since 13 Jan. 2007).

*Prime Minister:* Murat Kumpilov, b. 1973 (in office since 12 May 2008—acting until 28 May 2008).

Chief industries are timber, woodworking and food processing; there is some engineering and gas production. Agriculture consists primarily of crops (beets, wheat, maize), on partly irrigated land. Industry accounted for 15.2% of gross regional product in 2003 and agriculture 13.6%.

In 2004 there were 12,400 pupils in 126 pre-school institutions and 50,700 pupils in 175 primary and secondary day schools. There were 20,000 students at the two institutions of higher education, Adygeya State University and Maikop State Technological Institute.

In 2004 the rates of doctors and hospital beds per 10,000 population were 37.2 and 110 respectively.

## Altai

Part of Altai Territory. Area, 92,600 sq. km (35,750 sq. miles); population (2002 census), 202,947. Estimated population, 1 Jan. 2010, 210,700. Capital, Gorno-Altaysk (2002 census, 53,538). Established 1 June 1922 as Oirot Autonomous Region; renamed 7 Jan. 1948; granted republican status in 1991 and renamed in 1992.

*Chairman of the Government:* Aleksandr Berdnikov (since 20 Jan. 2006).

Cattle breeding predominates. Chief industries are clothing and footwear, foodstuffs, gold mining, timber, chemicals and dairying. Industrial output was valued at 838m. roubles in 2004 and agricultural output at 2,972m. roubles. In 2000, 91,200 people were economically active, of whom 72,000 were in employment.

In 2004 there were 6,600 pupils in 130 pre-school institutions and 32,300 pupils in 202 primary and secondary day schools. There were 6,000 students at Gorno-Altaysk State University.

The rates of doctors and hospital beds per 10,000 population in 2004 were 38.0 and 123 respectively.

## Bashkortostan

Area 143,600 sq. km (55,450 sq. miles), population (2002 census), 4,104,336. Estimated population, 1 Jan. 2010, 4,066,000. Capital, Ufa (2002 census population, 1,042,437). Bashkiria was annexed to Russia in 1557. It was constituted as an Autonomous Soviet Republic on 23 March 1919. A declaration of republican sovereignty was adopted in 1990, and a declaration of independence on 28 March 1992. A treaty of Aug. 1994 with Russia preserves the common legislative framework of the Russian Federation while defining mutual areas of competence. The main ethnic groups are Russians, Tatars and Bashkirs. There are also Chuvash and Mari minorities.

A constitution was adopted on 24 Dec. 1993. It states that Bashkiria conducts its own domestic and foreign policy, that its laws take precedence in Bashkiria, and that it forms part of the Russian Federation on a voluntary and equal basis.

*President:* Rustem Khamitov (in office since 15 July 2010—acting until 19 July 2010).

Industrial production was valued at 354,000m. roubles in 2004 and agricultural output at 57,160m. roubles. The most important industries are oil and oil products; there are also engineering, glass

and building materials enterprises. Agriculture specializes in wheat, barley, oats and livestock.

In 2004 there were 144,600 pupils in 1,904 pre-school institutions and 583,300 pupils in 3,187 primary and secondary day schools. There were 150,200 students in 17 institutions of higher education. There is a state university and a branch of the Academy of Sciences with eight learned institutions.

In 2004 the rates of doctors and hospital beds per 10,000 population were 41.9 and 104 respectively.

## Buryatia

Area is 351,300 sq. km (135,650 sq. miles). The Buryat Republic, situated to the south of Sakha, adopted the Soviet system on 1 March 1920. This area was penetrated by the Russians in the 17th century and finally annexed from China by the treaties of Nerchinsk (1689) and Kyakhta (1727). Population (2002 census), 981,238. Estimated population, 1 Jan. 2010, 963,500. Capital, Ulan-Ude (2002 census population, 359,391). The main ethnic groups are Russians, followed by Buryats. There are also Ukrainian, Tatar and Belarusian minorities.

There is a 65-member parliament, the *People's Hural*.

*Head of the Republic:* Vyacheslav Nagovitsyn (since 12 May 2012; previously president from 10 July 2007–12 May 2012).

The main industries are engineering, brown coal and graphite, timber, building materials, sheep and cattle farming. Industrial production was valued at 32,161m. roubles in 2004 and agricultural output at 8,352m. roubles.

In 2004 there were 30,100 pupils in 423 pre-school institutions and 139,000 pupils in 572 primary and secondary day schools. There were 31,900 pupils in five institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 38.3 and 109 respectively. The level of poverty in Buryatia was 38.2% in 2003.

## Chechnya

### GENERAL DETAILS

The area of the Republic of Chechnya is 15,000 sq. km (5,800 sq. miles). The population at the 2002 census was 1,103,686. The estimated population at 1 Jan. 2010 was 1,268,000. Capital, Dzhohar (since March 1998; previously known as Grozny; 2002 census population, 210,720). The Chechens and Ingushes were conquered by Russia in the late 1850s. In 1920 each nationality were constituted areas within the Soviet Mountain Republic and the Chechens became an Autonomous Region on 30 Nov. 1922. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as the Checheno-Ingush Autonomous Republic. This was dissolved in 1944 and the population was deported en masse, allegedly for collaboration with the German occupation forces. It was reconstituted on 9 Jan. 1957: 232,000 Chechens and Ingushes returned to their homes in the next two years.

In 1991 rebel leader Jokhar Dudayev seized control of Chechnya and won elections. In Nov. he declared an independent Chechen Republic. Ingush desire to separate from Chechnya led to fighting along the Chechen-Ingush border and a deployment of Russian troops. An agreement to withdraw was reached between Russia and Chechnya on 15 Nov. 1992. The separation of Chechnya and Ingushetia was formalized in Dec. 1992. In April 1993 President Dudayev dissolved parliament. Hostilities

continued throughout 1994 between the government and forces loosely grouped under the 'Provisional Chechen Council'. The Russian government, which had never recognized the Chechen declaration of independence of Nov. 1991, moved troops and armour into Chechnya on 11 Dec. 1994. Grozny was bombed and attacked by Russian ground forces at the end of Dec. 1994 and the presidential palace was captured on 19 Jan. 1995, but fighting continued. On 30 July 1995 the Russian and Chechen authorities signed a ceasefire. However, hostilities, raids and hostage-taking continued; Dudayev was killed in April 1996 and a ceasefire was agreed on 30 Aug. 1996.

Fighting broke out again, however, in Sept. 1999 as Russian forces launched attacks on 'rebel bases'. Fighting intensified and more than 200,000 civilians were forced to flee, mostly to neighbouring Ingushetia. By Feb. 2000 much of Grozny had been destroyed and was closed by the Russians. In June 2000 Vladimir Putin declared direct rule. The conflict continues, with estimates of the number of deaths varying from 6,500 to 15,000. Over 4,000 Russian soldiers have been killed. However, on 18 Nov. 2001 the first official meeting between negotiators for the Russian government and Chechen separatists took place. In Oct. 2002 a group of Chechen rebels took control of a Moscow theatre and held hostage 800 people for three days, before Russian troops stormed the building. An anaesthetic gas, used to combat the rebels, also killed many of the hostages.

On 23 March 2003 a referendum was held on a new constitution that would keep Chechnya within Russia but give it greater autonomy, and provide a new president and parliament for the republic. Although 96% of votes cast were in favour of the new constitution there was criticism of the conduct of the referendum. Presidential elections held on 5 Oct. 2003 were won by the Kremlin-backed candidate Akhmad Kadyrov, with 80.8% of the vote, but there was widespread condemnation of the electoral process. President Kadyrov was assassinated on 9 May 2004. Presidential elections held on 29 Aug. 2004, widely seen as rigged, were won by the Kremlin-backed Alu Alkhanov with 73.5% of the vote, against 5.9% for Movsur Khamidov, head of the Chechen department of the Federal Security Service. There were five other candidates. Turnout was 85.2%. On 27 Nov. 2005 the first parliamentary elections took place since Russian troops restored Moscow's control over Chechnya in 1999. In the elections to the People's Assembly (lower chamber) the United Russia party won 19 of 38 seats with 60.7% of the vote, the Communist Party 3 with 12.2%, the Union of Rightist Forces 1 with 12.4%, the Eurasian Union 1 with 3.9%; independents won 14 seats. In the Council of the Republic (upper chamber), United Russia won 14 of 20 seats, the Communist Party 3 and the Union of Rightist Forces 3.

Separatist President Aslan Maskhadov was killed by Russian troops on 8 March 2005, as was his successor Abdul-Khalim Sadulayev on 17 June 2006.

*Moscow-backed Head of the Republic:* Ramzan Kadyrov; b. 1976.

*Prime Minister:* Abubakar Edelgeriyev; b. 1974.

*Amir of the Caucasus Emirate (self-proclaimed):* Doku Umarov; b. 1964.

Checheno-Ingushetia had a major oilfield, and a number of engineering works, chemical factories, building materials works and food canneries. There was a timber, woodworking and furniture industry. In 2003 oil production was 1.8m. tonnes. Chechnya's oil reserves are estimated at some 220m. bbls. Industrial output in the two republics was valued at 213,000m. roubles in 1993, agricultural output at 79,000m. roubles.

In 2004 there were 212,300 pupils in 460 primary and secondary day schools. There were 23,500 students in three institutions of higher education. In 1995 the rates of doctors and hospital beds per 10,000 population were 21.1 and 91 respectively.

## Chuvashia

Area, 18,300 sq. km (7,050 sq. miles); population (2002 census), 1,313,754. Estimated population, 1 Jan. 2010, 1,278,400. Capital, Cheboksary (2002 census population, 440,621). The territory was annexed by Russia in the middle of the 16th century. On 24 June 1920 it was constituted as an Autonomous Region, and on 21 April 1925 as an Autonomous Republic. The main ethnic groups are Chuvash, followed by Russians. There are also Tatar and Mordovian minorities. Republican sovereignty was declared in Sept. 1990.

*President:* Mikhail Ignatyev (in office since 29 Aug. 2010).

*Prime Minister:* Ivan Motorin (in office since 23 Dec. 2011).

The timber industry antedates the Soviet period. Other industries include railway repair works, electrical and other engineering industries, building materials, chemicals, textiles and food industries. Grain crops account for nearly two-thirds of all sowings and fodder crops for nearly a quarter. Chuvashia is Russia's main producer of hops and the republic has a significant brewing industry. Industrial output was valued at 49,826m. roubles in 2004 and agricultural output at 12,722m. roubles.

In 2004 there were 47,100 pupils at 433 pre-school institutions and 166,200 pupils in 619 primary and secondary day schools. There were 63,900 students in seven higher educational establishments.

In 2004 the rates of doctors and hospital beds per 10,000 population were 46.8 and 116 respectively.

## Dagestan

Area, 50,300 sq. km (19,400 sq. miles); population (2002 census), 2,576,531. Estimated population, 1 Jan. 2010, 2,737,300. Capital, Makhachkala (2002 census population, 462,412). Over 30 nationalities inhabit this republic apart from Russians; the most numerous are Dagestanis and there are also Azerbaijani, Chechen and Jewish minorities. Annexed from Persia in 1723, Dagestan was constituted an Autonomous Republic on 20 Jan. 1921. In 1991 the Supreme Soviet declared the area of republican, rather than autonomous republican, status. Many of the nationalities who live in Dagestan have organized armed militias, and in May 1998 rebels stormed the government building in Makhachkala. In Aug. 1999 Dagestan faced attacks from Islamic militants who invaded from Chechnya. Although Russian troops tried to restore order and discipline, the guerrilla campaign has continued with a series of bombings targeting Russian military personnel.

*Acting President:* Ramazan Abdulatipov (since 28 Jan. 2013).

*Prime Minister:* Mukhtar Medzhidov (in office since 31 Jan. 2013).

There are engineering, oil, chemical, woodworking, textile, food and other light industries. Agriculture is varied, ranging from wheat to grapes, with sheep farming and cattle breeding. Industrial output was valued at 6,568m. roubles in 2001 and agricultural output at 13,162m. roubles.

In 2004 there were 55,900 pupils in 593 pre-schools and 443,300 pupils in 1,683 primary and secondary day schools. There were 105,500 students in 15 institutions of higher education. There is a branch of the Russian Academy of Sciences with ten learned institutions.

In 2004 the rates of doctors and hospital beds per 10,000 population were 38.2 and 70 respectively.

## Ingushetia

The history of Ingushetia is interwoven with that of Chechnya (*see above*). Ingush desire to separate from Chechnya led to fighting along the Chechen-Ingush border and a deployment of Russian troops. The separation of Ingushetia from Chechnya was formalized by an amendment of Dec. 1992 to the Russian Constitution. On 15 May 1993 an extraordinary congress of the peoples of Ingushetia adopted a declaration of state sovereignty within the Russian Federation. Skirmishes between Ingush refugees and local police broke out in Aug. 1999 and tensions remained high with the danger of further outbreaks of fighting. The Russian attacks on neighbouring Chechnya in Sept. 1999 led to thousands of Chechen refugees fleeing to Ingushetia. In April 2004 President Murat Zyazikov survived an assassination attempt, as did Prime Minister Ibragim Malsagov in Aug. 2005.

The capital is Magas (since 1999; formerly Nazran; 2002 census population, 125,066).

Area, 4,300 sq. km (1,700 sq. miles); population (2002 census), 467,294. Estimated population, 1 Jan. 2010, 516,700.

There is a 27-member parliament. On 27 Feb. 1994 presidential elections and a constitutional referendum were held. Turnout was 70%. At the referendum 97% of votes cast approved a new constitution stating that Ingushetia is a democratic law-based secular republic forming part of the Russian Federation on a treaty basis.

*President:* Yunus-bek Yevkurov.

*Prime Minister:* Musa Chiliev.

Industry accounted for 14.6% of gross regional product in 2003 and agriculture 14.1%. A special economic zone for Russian residents was set up in 1994, and an 'offshore' banking tax haven in 1996.

In 2004 there were 2,500 pupils in 20 pre-school institutions and 64,600 pupils in 113 primary and secondary day schools. There were 9,400 students in five institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 22.8 and 41 respectively.

## Kabardino-Balkaria

Area, 12,500 sq. km (4,850 sq. miles); population (2002 census), 901,494. Estimated population, 1 Jan. 2010, 893,800. Capital, Nalchik (2002 census population, 274,974). Kabarda was annexed to Russia in 1557. The republic was constituted on 5 Dec. 1936. The main ethnic groups are Kabardinians, followed by Russians and Balkars. There are also Ukrainian, Ossetian and German minorities.

A treaty with Russia of 1 July 1994 defines their mutual areas of competence within the legislative framework of the Russian Federation. The recent history of Kabardino-Balkaria has been marked by the instability that has plagued the whole of the north Caucasus. In Oct. 2005 militants staged a large-scale assault on government buildings in Nalchik, an act for which Chechen rebel leader Shamil Besayev claimed responsibility. All mosques in the capital have been closed.

*President:* Arsen Kanokov (since 28 Sept. 2005).

*Prime Minister:* Ruslan Khasanov (since 1 Nov. 2012).

Main industries are ore-mining, timber, engineering, coal, food processing, timber and light industries, building materials. Grain,

livestock breeding, dairy farming and wine-growing are the principal branches of agriculture. Agriculture accounted for 31.9% of gross regional product in 2003 and industry 14.2%.

In 2004 there were 26,100 pupils in 102 pre-school institutions and 123,400 pupils in 371 primary and secondary day schools. There were 28,500 students in four institutions of higher education. There is a branch of the Academy of Sciences with five learned institutions.

In 2004 the rates of doctors and hospital beds per 10,000 population were 41.3 and 101 respectively.

## Kalmykia

Area, 76,100 sq. km (29,400 sq. miles); population (2002 census), 292,410. Estimated population, 1 Jan. 2010, 283,200. Capital, Elista (2002 census population, 104,254). The population is mainly Kalmyk and Russian, with small Chechen, Kazakh and German minorities.

The Kalmyks migrated from western China to Russia (Nogai Steppe) in the early 17th century. The territory was constituted an Autonomous Region on 4 Nov. 1920, and an Autonomous Republic on 22 Oct. 1935; this was dissolved in 1943. On 9 Jan. 1957 it was reconstituted as an Autonomous Region and on 29 July 1958 as an Autonomous Republic once more. In Oct. 1990 the republic was renamed the Kalmyk Soviet Socialist Republic; it was given its present name in Feb. 1992.

*President:* Aleksey Orlov (in office since 24 Oct. 2010).

*Prime Minister:* Lyudmila Ivanova (in office since 8 Feb. 2011—acting until 15 Feb. 2011).

In April 1993 the Supreme Soviet was dissolved and replaced by a professional parliament consisting of 25 of the former deputies. On 5 April 1994 a specially-constituted 300-member constituent assembly adopted a 'Steppe Code' as Kalmykia's basic law. This is not a constitution and renounces the declaration of republican sovereignty of 18 Oct. 1990. It provides for a *President* elected for five-year terms with the power to dissolve parliament, and a 27-member parliament, the *People's Hural*, elected every four years. It stipulates that Kalmykia is an equal member and integral part of the Russian Federation, functioning in accordance with the Russian constitution.

Main industries are oil and gas production, canning and building materials. Cattle breeding and irrigated farming (mainly fodder crops) are the principal branches of agriculture. Overgrazing during the Soviet period has led to the desertification of Kalmykia's pastures and agricultural output has declined substantially in recent years. Agriculture accounted for 10.4% of gross regional product in 2003 and industry 6.4%.

In 2004 there were 9,500 pupils in 119 pre-school institutions and 44,900 pupils in 213 primary and secondary day schools. There were 10,000 students in two institutions of higher education. In 2004 the rates of doctors and hospital beds per 10,000 population were 51.0 and 136 respectively. The main religion is Buddhism.

## Karachai-Cherkessia

Area, 14,300 sq. km (5,500 sq. miles); population (2002 census), 439,470. Estimated population, 1 Jan. 2010, 427,000. Capital, Cherkessk (2002 census population, 116,244). A Karachai Autonomous Region was established on 26 April 1926 (out of a previously united Karachaevo-Cherkess Autonomous Region created in 1922), and dissolved in 1943. A Cherkess Autonomous

Region was established on 30 April 1928. The present Autonomous Region was re-established on 9 Jan. 1957. The Region declared itself a Soviet Socialist Republic in Dec. 1990. Tension between the two ethnic groups increased after the first free presidential election in April 1999 was won by Vladimir Semyonov, an ethnic Karchayev. Despite numerous allegations of fraud the result was upheld by the Supreme Court. There were subsequently fears that the ethnic Cherkess opposition would attempt to set up breakaway government bodies.

*President:* Rashid Temrezov (in office since 26 Feb. 2011—acting until 1 March 2011).

*Prime Minister:* Indris Kyabishev (in office since 11 March 2011).

There are ore-mining, engineering, chemical and woodworking industries. The Kuban-Kalaussi irrigation scheme irrigates 200,000 ha. Livestock breeding and grain growing predominate in agriculture. Conflict in the north Caucasus has had a serious impact on the economy and the agricultural sector is supported by central government. Agriculture accounted for 19.4% of gross regional product in 2003 and industry 18.7%.

In 2004 there were 10,900 pupils in 99 pre-school institutions and 60,000 pupils in 190 primary and secondary day schools. There were 16,200 students in two institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 33.9 and 101 respectively.

## Karelia

The Karelian Republic, capital Petrozavodsk (2002 census population, 266,160), covers an area of 172,400 sq. km, with a 2002 census population of 716,281. Estimated population, 1 Jan. 2010, 684,200. Russians constitute the majority of the population, with some Karelians, Belarusians and Ukrainians.

Karelia (formerly Olonets Province) became part of the RSFSR after 1917. In June 1920 a Karelian Labour Commune was formed and in July 1923 this was transformed into the Karelian Autonomous Soviet Socialist Republic (one of the autonomous republics of the RSFSR). On 31 March 1940, after the Soviet-Finnish war, practically all the territory (with the exception of a small section in the neighbourhood of the Leningrad area) which had been ceded by Finland to the USSR was added to Karelia, and the Karelian Autonomous Republic was transformed into the Karelo-Finnish Soviet Socialist Republic as the 12th republic of the USSR. In 1946, however, the southern part of the republic, including its whole seaboard and the towns of Viipuri (Vyborg) and Keksholm, was attached to the RSFSR, reverting in 1956 to autonomous republican status within the RSFSR. In Nov. 1991 it declared itself the 'Republic of Karelia'.

*Head of the Republic:* Aleksandr Khudilainen (in office since 22 May 2012—acting until 24 May 2012).

Karelia has a wealth of timber, some 70% of its territory being forest land. It is also rich in other natural resources, having large deposits of mica, diabase, spar, quartz, marble, granite, zinc, lead, silver, copper, molybdenum, tin, baryta and iron ore. Its lakes and rivers are rich in fish.

There are timber mills, paper-cellulose works, mica, chemical plants, power stations and furniture factories. Industrial output was valued at 512,000m. roubles in 2004. Over half of Karelia's production output is exported annually, principally to EU countries. Exports totalled US\$842m. in 2004.

In 2004 there were 28,800 pupils in 496 pre-schools and 81,100 pupils in 293 primary and secondary day schools. There were 21,900 students in three institutions of higher education. There is

a branch of the Russian Academy of Sciences with seven learned institutions.

In 2004 the rates of doctors and hospital beds per 10,000 population were 49.4 and 123 respectively.

---

## Khakassia

Area, 61,900 sq. km (23,900 sq. miles); population (2002 census), 546,072. Estimated population, 1 Jan. 2010, 539,200. Capital, Abakan (2002 census population, 165,197). Established 20 Oct. 1930; granted republican status in 1991.

*Acting Head of the Republic:* Viktor Zimin.

There are coal- and ore-mining, timber and woodworking industries. The region is linked by rail with the Trans-Siberian line. Industrial output was valued at 25,651m. roubles in 2004 and agricultural output at 3,807m. roubles.

In 2004 there were 16,500 pupils in 157 pre-school institutions and 69,200 pupils in 289 primary and secondary day schools. There were 20,400 students in three higher education institutions.

In 2004 the rates of doctors and hospital beds per 10,000 population were 37.3 and 110 respectively.

---

## Komi

Area, 415,900 sq. km (160,550 sq. miles); population (2002 census), 1,018,674. Estimated population, 1 Jan. 2010, 951,200. Capital, Syktyvkar (2002 census population, 230,011). Annexed by the princes of Moscow in the 14th century, the territory was constituted as an Autonomous Region on 22 Aug. 1921 and as an Autonomous Republic on 5 Dec. 1936. The largest ethnic group are Russians, followed by Komis, with Ukrainian and Belarusian minorities.

A declaration of sovereignty was adopted by the republican parliament in Sept. 1990, and the designation 'Autonomous' dropped from the republic's official name.

*Head of the Republic:* Vyacheslav Gayzer (since 15 Jan. 2010).

There are coal, oil, timber, gas, asphalt and building materials industries, and light industry is expanding. Livestock breeding (including dairy farming) is the main branch of agriculture. Industrial output was valued at 87.5bn. roubles in 2004 and agricultural output at 4.3bn. roubles.

In 2004 there were 47,700 pupils in 412 pre-schools and 128,300 pupils in 531 primary and secondary day schools. There were 35,400 students in seven institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 43.9 and 116 respectively.

## Mari-El

Area, 23,200 sq. km (8,950 sq. miles); population (2002 census), 727,979. Estimated population, 1 Jan. 2010, 698,200. Capital, Yoshkar-Ola (2002 census population, 256,719). The Mari people were annexed to Russia, with other peoples of the Kazan Tatar Khanate, when the latter was overthrown in 1552. On 4 Nov. 1920 the territory was constituted as an Autonomous Region, and on 5 Dec. 1936 as an Autonomous Republic. The republic renamed itself the Mari Soviet Socialist Republic in Oct. 1990, and adopted a new constitution in June 1995. In Dec. 1991 Vladislav Zotin was

elected the first president. The main ethnic groups are Russians, followed by Maris, with some Tatars.

*President:* Leonid Markelov (since 14 Jan. 2001).

Coal is mined. The main industries are metalworking, timber, paper, woodworking and food processing. Crops include grain, flax, potatoes, fruit and vegetables. Industry accounted for 24.4% of gross regional product in 2003 and agriculture 16.5%.

In 2004 there were 25,700 pupils in 265 pre-school institutions and 88,600 pupils in 382 primary and secondary day schools. There were 28,500 students in five institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 35.2 and 125 respectively.

---

## Mordovia

Area, 26,200 sq. km (10,100 sq. miles); population (2002 census), 888,766. Estimated population, 1 Jan. 2010, 826,500. Capital, Saransk (2002 census population, 304,866). By the 13th century the Mordovian tribes had been subjugated by Russian princes. In 1928 the territory was constituted as a Mordovian Area within the Middle-Volga Territory, on 10 Jan. 1930 as an Autonomous Region and on 20 Dec. 1934 as an Autonomous Republic. The main ethnic groups are Russians, followed by Mordovians, with some Tatars.

*Head of the Republic:* Vladimir Volkov (since May 2012).

*Prime Minister:* Vladimir Sushkov (since May 2012).

Industries include wood-processing and the production of building materials, furniture, textiles and leather goods. Agriculture is devoted chiefly to grain, sugar beet, sheep and dairy farming. Industrial output was valued at 29,117m. roubles in 2002.

In 2004 there were 23,900 pupils in 241 pre-school institutions and 97,300 students in 713 primary and secondary day schools. There were 42,900 students in four institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 51.4 and 134 respectively.

## North Ossetia (Alania)

Area, 8,000 sq. km (3,100 sq. miles); population (2002 census), 710,275. Estimated population, 1 Jan. 2010, 700,900. Capital, Vladikavkaz (2002 census population, 315,608). North Ossetia was annexed by Russia from Turkey and named the Terek region in 1861. On 4 March 1918 it was proclaimed an Autonomous Soviet Republic, and on 20 Jan. 1921 set up with others as the Mountain Autonomous Republic, with North Ossetia as the Ossetian (Vladikavkaz) Area within it. On 7 July 1924 the latter was constituted as an Autonomous Region and on 5 Dec. 1936 as an Autonomous Republic. In the early 1990s there was a conflict with neighbouring Ingushetia to the east, and to the south the decision of the Georgian government to disband the republic of South Ossetia led to ethnic war, with North Ossetia supporting the South Ossetians. Pressure for Ossetian reunification continues. In Sept. 2004 hostage takers seized a school in the town of Beslan. A three-day standoff ended with more than 350 people killed, nearly half of them children. Chechen rebels claimed responsibility for the siege.

A new constitution was adopted on 12 Nov. 1994 under which the republic reverted to its former name, Alania. Ossetians are the

largest ethnic group, followed by Russians, with some Chechens, Armenians and Ukrainians.

*Head of the Republic:* Taimuraz Mamsurov.

*Prime Minister:* Sergey Takoyev.

The main industries are non-ferrous metals (mining and metallurgy), maize processing, timber and woodworking, textiles, building materials, distilleries and food processing. There is also a varied agriculture. Agriculture accounted for 16.8% of gross regional product in 2003 and industry 13.0%.

In 2004 there were 22,000 pupils in 216 pre-school institutions and 95,200 pupils in 218 primary and secondary day schools. There were 32,200 students in nine institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 68.0 and 115 respectively.

## Sakha

The area is 3,103,200 sq. km (1,197,750 sq. miles), making Sakha the largest republic in the Russian Federation; population (2002 census), 949,280. Estimated population, 1 Jan. 2010, 949,300. Capital, Yakutsk (2002 census population, 210,642). The Yakuts were subjugated by the Russians in the 17th century. The territory was constituted an Autonomous Republic on 27 April 1922. The largest ethnic group are Russians, followed by Yakuts, with Ukrainian and Tatar minorities.

*President:* Yegor Borisov (in office since 31 May 2010—acting until 17 June 2010).

*Prime Minister:* Galina Danchikova (in office since 18 June 2010).

The principal industries are mining (gold, tin, mica, coal) and livestock-breeding. Silver- and lead-bearing ores and coal are worked. Large diamond fields have been opened up; Sakha produces most of the Russian Federation's output. Timber and food industries are developing. Trapping and breeding of fur-bearing animals (sable, squirrel, silver fox) are an important source of income. Industry accounted for 41.1% of gross regional product in 2003 and agriculture 3.6%.

In 2004 there were 51,900 pupils in 697 pre-school institutions and 168,400 pupils in 692 primary and secondary day schools. There were 43,700 students in eight institutions of higher education.

In 2004 the rates of doctors and hospital beds per 10,000 population were 49.5 and 147 respectively.

## Tatarstan

Area, 68,000 sq. km (26,250 sq. miles); population (2002 census), 3,779,265. Estimated population, 1 Jan. 2010, 3,778,500. Capital, Kazan (2002 census population, 1,105,289). From the 10th to the 13th centuries this was the territory of the Volga-Kama Bulgar State; conquered by the Mongols, it became the seat of the Kazan (Tatar) Khans when the Mongol Empire broke up in the 15th century, and in 1552 was conquered again by Russia. On 27 May 1920 it was constituted as an Autonomous Republic. The main ethnic groups are Tatars and Russians, with Chuvash, Ukrainian and Mordovian minorities.

In Oct. 1991 the Supreme Soviet adopted a declaration of independence. At a referendum in March 1992, 61.4% of votes cast were in favour of increased autonomy. A constitution was adopted in April 1992, which proclaims Tatarstan a sovereign state which conducts its relations with the Russian Federation on

an equal basis. On 15 Feb. 1994 the Russian and Tatar presidents signed a treaty defining Tatarstan as a state united with Russia on the basis of the constitutions of both, but the Russian parliament has not ratified it.

*President:* Rustam Minnikhanov (since March 2010).

*Prime Minister:* Ildar Khalikov (since April 2010).

The republic has engineering, oil and chemical, timber, building materials, textiles, clothing and food industries. Industrial production was valued at 252,037m. roubles in 2003 and agricultural output at 43,639m. roubles. Tatarstan is one of the fastest-growing Russian republics.

In 2004 there were 149,900 pupils in 1,982 pre-school institutions and 472,900 pupils in 2,448 primary and secondary day schools. There were 207,100 students in 35 institutions of higher education. ## Tuva

Area, 170,500 sq. km (65,800 sq. miles); population (2002 census), 305,510. Estimated population, 1 Jan. 2010, 317,100. Capital, Kyzyl (2002 census population, 104,105). Tuva was incorporated in the USSR as an autonomous region on 11 Oct. 1944 and elevated to an Autonomous Republic on 10 Oct. 1961. The largest ethnic group are Tuvans, followed by Russians. Tuva renamed itself the 'Republic of Tuva' in Oct. 1991.

A new constitution was promulgated on 22 Oct. 1993 which adopts the name 'Tyva' for the republic. This constitution provides for a 32-member parliament (*Supreme Hural*), and a *Grand Hural* alone empowered to change the constitution, asserts the precedence of Tuvan law and adopts powers to conduct foreign policy. It was approved by 62.2% of votes cast at a referendum on 12 Dec. 1993.

*Chairman of the Government:* Sholban Kara-ool.

Tuva is well-watered and hydro-electric resources are important. The Tuvans are mainly herdsmen and cattle farmers and there is much good pastoral land. There are deposits of gold, cobalt and asbestos. The main exports are hair, hides and wool. There are mining, woodworking, garment, leather, food and other industries. Industrial production was valued at 1,700m. roubles in 2003 and agricultural output at 1,994m. roubles.

In 2004 there were 14,700 pupils in 217 pre-school institutions and 64,400 pupils in 176 primary and secondary day schools. There were 5,800 students at Tuva State University.

In 2004 the rates of doctors and hospital beds per 10,000 population were 42.7 and 178 respectively.

## Udmurtia

Area, 42,100 sq. km (16,250 sq. miles); population (2002 census), 1,570,316. Estimated population, 1 Jan. 2010, 1,526,300. Capital, Izhevsk (2002 census population, 632,140). The Udmurts

(formerly known as 'Votyaks') were annexed by the Russians in the 15th and 16th centuries. On 4 Nov. 1920 the Votyak Autonomous Region was constituted (the name was changed to Udmurt in 1932), and on 28 Dec. 1934 was raised to the status of an Autonomous Republic. The main ethnic group are Russians, followed by Udmurts, with Tatar, Ukrainian and Mari minorities. A declaration of sovereignty and the present state title were adopted in Sept. 1990.

A new parliament was established in Dec. 1993 consisting of a 50-member upper house, the *Council of Representatives*, and a full-time 35-member lower house.

*President:* Alexander Alexandrovich Volkov (since April 1995).

*Prime Minister:* Yury Pitkevich (since Oct. 2000).

Heavy industry includes the manufacture of locomotives, machine tools and other engineering products, most of them for the defence industries, as well as timber and building materials. There are also light industries: clothing, leather, furniture and food. Industrial production was valued at 82,405m. roubles in 2004 and agricultural output at 16,662m. roubles.

In 2004 there were 73,900 pupils in 806 pre-school institutions and 185,400 pupils in 849 primary and secondary day schools. There were 73,300 students in eight institutions of higher education.

## KEY HISTORICAL EVENTS

The Twa—hunter-gatherer pygmies—were the first people to inhabit Rwanda. They now comprise 1% of the population. The Hutu were the next group to settle in Rwanda. They arrived at some point between AD 500 and 1100. They were small-scale agriculturalists, led by a king who ruled over clan groups. The final group to migrate to Rwanda was the Tutsi around 1400. Their ownership of cattle and their combat skills allowed them to gain economic and political control of the country. A feudalistic system developed where the Tutsi lent cows to the Hutu in return for labour and military service. At the apex was the Tutsi king, the *mwami* (pl., *abami*), who was believed to be of divine origin. The *abami* consolidated their power by centralizing the monarchy and reducing the power of neighbouring chiefs. Mwami Kigeri IV (reigned 1853–95) established the borders of Rwanda in the 19th century.

The Conference of Berlin in 1885 placed Rwanda under German control. However, no German actually reached the area until 1894 when Count von Götzen became the governor of German East Africa. The Belgians and British had ambitions in the area owing to its strategic position at the juncture of their separate empires. However, by 1910 German rule was accepted.

A consequence of German influence was the arrival of the Catholic Church through the mission of the White Fathers, who established schools and missions from 1899. Germany did not change the political structure of the country but made use of the *mwami*, Yuhi V (reigned 1896–1931), who accepted German overlordship. The victors of the First World War disrupted this relationship by stripping Germany of all her colonies. Rwanda was

occupied by Belgian forces in 1916 and was declared a Belgian mandate in Aug. 1923 by the League of Nations. The Belgians ruled more directly than the Germans, curtailing the *mwami*'s power and favouring the Tutsi minority on more explicitly racial grounds. From 1952 the UN ordered Belgium to integrate Rwandans into the political system. The Belgians continued their policy of favouring the fairer skinned Tutsi and placed them in a position of domination over the Hutu majority. Increasing civil unrest erupted into a civil war by 1959. A state of Ruanda-Urundi was established in 1960, under Belgian trusteeship, following an election. In 1961, while abroad, Mwami Kigeli V was exiled by the Belgians, who refused to allow him to return despite pressure from the UN. On 27 June 1962 the parliament voted to terminate the trusteeship and on 1 July 1962 Rwanda became independent.

## Independence

The independent state of Rwanda was first governed by the Parmehutu party (a Hutu party representing the 85% Hutu population), led by Grégoire Kayibanda, but this was not accepted by some Tutsis. An attempted invasion in 1963 by Tutsis who had fled to Uganda and Burundi was repelled. In retaliation over 12,000 Tutsis in Rwanda were massacred by the Hutu. The next massacre in 1972–73 was partly in response to the persecution of Hutus in neighbouring Tutsi-dominated Burundi. An attempt by Kayibanda to revive his waning popularity, the violence instead spurred Maj.-Gen. Juvénal Habyarimana, a senior army commander, to launch a bloodless coup and take over government. In 1975 Habyarimana formed *le Mouvement Révolutionnaire National pour le Développement* (MRND), and turned Rwanda into a one-party and tightly controlled police state, discriminating against the Tutsi in favour of the Hutu.

In 1990 the Rwandan Patriotic Front (RPF), of between 5,000 and 10,000 Tutsis, invaded Rwanda from Uganda, starting a civil war. A ceasefire was agreed on 29 March 1991 and on 14 July 1992 the Arusha Accords were signed. These allowed other political parties to stand for election and share power.

Many Hutus opposed Arusha. Multi-partyism led to the rise of far-right Hutu power groups who believed that the only solution to Hutu-Tutsi problems was the extermination of the Tutsi. The assassination of the first legitimately elected Hutu president of Burundi (21 Oct. 1993) by Tutsi army officers and the massacre of over 150,000 Hutus in Burundi served to further destabilize Rwanda. The assassination of Habyarimana in a plane crash on 6 April 1994, probably shot down by Hutu extremists, was the first step in a carefully premeditated genocide which killed around 1m. Rwandans in three months and forced over 2m. to flee to neighbouring countries.

Among the victims was the moderate Hutu prime minister, Agathe Uwilingiyimana. Gangs of *interahamwe* (civilian death squads) roamed the capital, Kigali, killing, looting and raping Tutsis and politically-moderate Hutus. When the RPF, led by Paul Kagame, reached Kigali the killings spread to other parts of the country. The UN sent a peacekeeping force (the United Nations Assistance Mission for Rwanda; UNAMIR) but a lack of resources, an unclear mandate and international apathy made it impotent as the genocide took hold. Eventually France dispatched 2,000 troops on a humanitarian mission on 22 June 1994 to maintain a 'safe zone'. Owing to France's affinity with the French-speaking Hutu former government, this zone served as an escape route for Hutu extremists to flee to Zaïre (now the Democratic Republic of the Congo).

The RPF declared the war over on 17 July 1994 and was quickly recognized as the new government. Genocide trials began in Arusha, Tanzania in Dec. 1996. In Sept. 1998 Jean Kambanda, the

former prime minister (April–July 1994), was sentenced to life imprisonment.

Rwanda was destabilized by the presence of Hutu refugee camps on the Zaïre borders. Amongst the 1.1m. refugees were *interahamwe* who used the camps as bases for attacks on Rwanda. These were broken up by Laurent Kabila in May 1997, before he assumed power in Zaïre (later renamed the Democratic Republic of the Congo).

In April 2000 Paul Kagame (the Tutsi vice-president and defence minister) was elected president by parliament, replacing Pasteur Bizimungu, a Hutu who had been appointed by the RPF, in July 1994. Kagame was re-elected president in Aug. 2003 in Rwanda's first democratic elections since the atrocities.

### TERRITORY AND POPULATION

Rwanda is bounded south by Burundi, west by the Democratic Republic of the Congo, north by Uganda and east by Tanzania. A mountainous state of 25,314 sq. km (9,774 sq. miles), its western third drains to Lake Kivu on the border with the Democratic Republic of the Congo and thence to the Congo river, while the rest is drained by the Kagera river into the Nile system.

The population was 7,164,994 at the 1991 census, of whom over 90% were Hutu, 9% Tutsi and 1% Twa (pygmy). Following the genocide of 1994 ethnicity was not enumerated at the 2002 census, when the population was 8,128,553. Provisional population at the 2012 census, 10,537,222; density, 416.3 per sq. km.

The UN gives a projected population for 2015 of 12.30m.

In 2011 the population was 19.2% urban.

At the time of the 2002 census there were 12 administrative divisions (11 provinces and Kigali City). Areas and populations were:

| Province     | Area (in sq. km) | Population (2002 census) |
|--------------|------------------|--------------------------|
| Butare       | 1,872            | 725,914                  |
| Byumba       | 1,694            | 707,786                  |
| Cyangugu     | 1,894            | 607,495                  |
| Gikongoro    | 1,974            | 489,729                  |
| Gisenyi      | 2,047            | 864,377                  |
| Gitarama     | 2,141            | 856,488                  |
| Kibungo      | 2,964            | 702,248                  |
| Kibuye       | 1,748            | 469,016                  |
| Kigali City  | 313              | 603,049                  |
| Kigali-Ngali | 2,780            | 789,330                  |
| Ruhengeri    | 1,657            | 891,498                  |
| Umutara      | 4,230            | 421,623                  |

Since Jan. 2006 Rwanda has been reorganized into five provinces (*intara*) as follows (with 2012 provisional census populations): Eastern (2,600,814), Northern (1,729,927), Southern (2,594,110), Western (2,476,943) and Kigali City (1,135,428). Among the reasons given for the change were the reduction of ethnic divisions and the suppression of reminders of the 1994 genocide.

Kigali, the capital, had a provisional population of 1,135,428 in 2012 (603,049 in 2002); other towns are Butare, Gisenyi, Gitarama and Ruhengeri.

Kinyarwanda, the language of the entire population, and English are the official languages (French having ceased to be an official language in Oct. 2008). Swahili is spoken in the commercial centres.

### SOCIAL STATISTICS

2008 estimates: births, 400,000; deaths, 141,000. Estimated birth rate in 2008 was 41.1 per 1,000 population; estimated death rate, 14.5. Annual population growth rate, 2000–08, 2.5%. Life expectancy at birth in 2007 was 51.4 years for females and 47.9 for males, up from 23.1 years for females and 22.1 years for males during the period 1990–95 (at the height of the civil war). Infant mortality, 2010, 44 per 1,000 live births; fertility rate, 2008, 5.4 births per woman.

### CLIMATE

Despite the equatorial situation, there is a highland tropical climate. The wet seasons are from Oct. to Dec. and March to May. Highest rainfall occurs in the west, at around 70" (1,770 mm), decreasing to 40–55" (1,020–1,400 mm) in the central uplands and to 30" (760 mm) in the north and east. Kigali, Jan. 67°F (19.4°C), July 70°F (21.1°C). Annual rainfall 40" (1,000 mm).

### CONSTITUTION AND GOVERNMENT

Under the 1978 constitution the MRND was the sole political organization.

A new constitution was promulgated in June 1991 permitting multi-party democracy.

The Arusha Agreement of Aug. 1994 provided for a transitional 70-member National Assembly, which began functioning in Nov. 1994. The seats won by the MRNDD (formerly MRND) were taken over by other parties on the grounds that the MRNDD was culpable of genocide.

A referendum was held on 26 May 2003 which approved a draft constitution by 93.4% (turnout was 87%). The new constitution, subsequently approved by the Supreme Court, provides for an 80-member *Chamber of Deputies* and a 26-member *Senate*, with the provision that no party may hold more than half of cabinet positions. 53 members of the Chamber of Deputies are directly elected, 24 women are elected by provincial councils, two members are elected by the National Youth Council and one is elected by a disabilities organization.

### National Anthem

'Rwanda Nziza' ('Beautiful Rwanda'); words by F. Murigo, tune by Capt. J.-B. Hashakaimana.

### RECENT ELECTIONS

In a popular election on 9 Aug. 2010 Paul Kagame was re-elected president for a seven-year term with 93.1% of the vote. Jean Damascene Ntawukuriryayo won 5.1%, Prosper Higiro 1.4% and Alvera Mukabaramba 0.4%. Turnout was 97.5%.

In parliamentary elections held on 15 Sept. 2008, President Kagame's Rwandan Patriotic Front (RPF) and its coalition won 78.8% of the vote. The RPF took 42 of the 53 directly elected seats, the Social Democratic Party 7 and the Liberal Party 4. Following the Sept. 2008 election, of the 80 Members of Parliament there were 45 women (56.25%) and 35 men (43.75%), making Rwanda the first country in the world—and currently the only one—to have a female majority in parliament (in part as a consequence of the adoption of quotas, which stipulate that at least 24 of the 80 seats must be filled by women). In Feb. 2013 there were still 45 female MPs.

## CURRENT LEADERS

### Paul Kagame

#### Position

President

#### Introduction

Paul Kagame was elected president by the transitional National Assembly in April 2000 and democratic elections in 2003 cemented his mandate. He is leader of the ruling Rwandan Patriotic Front (RPF) and the first member of the Tutsi minority to be president since Rwanda gained independence in 1962. Although a leading force in the country, he is a low-key public figure. He has openly criticized the United Nations, arguing it could have done more to avoid the genocide of 1994 when around 1m. Rwandans were killed, and also accused France of complicity. He was re-elected president for another seven-year term by an overwhelming margin in Aug. 2010.

#### Early Life

Kagame was born in Oct. 1957 in the Gitarama prefecture. Following ethnic violence in Rwanda, his family fled to Uganda in 1960 where he grew up in a refugee camp and then studied at Makerere University in Kampala. In 1979 Kagame joined the National Salvation Front (FRONASA), led by Yoweri Museveni, which took part in the Tanzanian removal of Idi Amin's regime in 1979. In 1980 he became a founding member of Museveni's National Resistance Army (NRA) and fought against the dictatorship of Milton Obote in Uganda. He became head of intelligence of the NRA in 1986 and the following year established the Rwandan Patriotic Front (RPF), with support from Museveni, which launched a guerrilla war against President Juvénal Habyarimana and his Hutu government. In 1993 a peace agreement was signed, but the death of Habyarimana in 1994 triggered the Hutu massacres of the Tutsi. The RPF resumed the civil war and soon gained control over the country. The new government of national unity, formed in July 1994, was led by Pasteur Bizimungu, a Hutu, with Kagame as vice president and defence minister.

#### Career in Office

Rwanda's involvement in the Democratic Republic of the Congo (DRC; known as Zaïre until 1997) began covertly in 1996 with an agreement with Uganda to oust the Zaïrean president Mobutu Sese Seko. Kagame and Museveni sent troops back into the east of the DRC in 1998 to assist rebel groups against President Laurent Kabila and to eliminate the *interahamwe* (death squads from the 1994 genocide in Rwanda). In Nov. 1998 Kagame publicly admitted that Rwandan forces were active in the DRC for reasons of national security. However, divisions began to appear between Kagame and Museveni, as the enlargement and reorganization of the Rwandan forces was interpreted as a direct threat by Museveni.

In March 2000 President Bizimungu resigned, claiming that he and the prime minister, Pierre-Celéstine Rwigema, were hounded from office for being Hutus. Elected president by the transitional National Assembly in April 2000, Kagame relinquished the defence ministry to Col. Emmanuel Habyarimana, a Hutu, and promoted Nyamuusa Kayumba, the army chief, to Major-General, a rank only Kagame himself had held previously. Kagame attempted to portray himself as a civilian and neutral president, calling for ethnic peace and reconciliation.

Following the assassination of Laurent Kabila (president of the DRC) in Jan. 2001, his son and successor, Joseph Kabila, met Kagame who accused the DRC of harbouring Hutu militias. Kabila blamed Rwanda for killing more than 3.5m. inhabitants of the DRC and refused to co-operate until Rwandan troops were withdrawn. However, on 30 July 2002 the two nations signed a peace deal in South Africa under which the DRC agreed to disarm and arrest Hutu rebels and Rwanda withdrew its troops from the DRC in Oct. 2002.

Kagame was elected president by a popular democratic vote on 25 Aug. 2003. His win—with 95% of the vote—prompted allegations of irregularities from his main rival, Faustin Twagiramungu, although he accepted the win in Sept. Museveni's attendance at Kagame's inauguration ceremony demonstrated the easing of tensions between the two men. In 2007 Kagame authorized the release of several thousand prisoners accused of genocide. He also awarded a presidential pardon to Pasteur Bizimungu, who had served three years of a 15-year prison sentence for attempting to form a militia and for embezzlement. Parliamentary elections in Sept. 2008 returned the ruling coalition led by Kagame's RPF to power with almost 79% of the vote.

In Nov. 2006 a French investigative judge had accused Kagame of ordering the assassination of President Habyarimana in 1994. Kagame responded by cutting diplomatic links with France. Then, in Aug. 2008, a Rwandan report commissioned by Kagame made a counter-accusation of complicity by French politicians (including former president François Mitterrand) and army officers in the genocide. However, diplomatic ties were eventually restored in Nov. 2009 and French President Nicolas Sarkozy paid an official visit to Rwanda in Feb. 2010. The two leaders met again in Paris in Sept. 2011 in a further bid to restore trust.

From Aug. 2008 fighting in the DRC intensified between the army and the mainly Tutsi insurgents loyal to Laurent Nkunda. Kabila's government had for some time claimed that Kagame was giving Rwandan support to Nkunda. However, in an apparent reversal of Rwandan policy, troops from both countries launched a joint offensive in Jan. 2009 against Nkunda's headquarters in the DRC and the rebel leader was arrested when he fled into Rwanda. Following the operation, relations between Rwanda and the DRC stabilized, but in 2012 there were further allegations of Rwandan support for rebel forces opposed to the Kabila regime, prompting the USA, UK and the Netherlands to suspend aid contributions.

In Nov. 2009 Rwanda was admitted to the Commonwealth despite (like Mozambique) not having had colonial or constitutional ties to the United Kingdom. In Aug. 2010 Kagame was re-elected as president with another landslide share of the vote, although the opposition claimed that the election was not free and fair.

### Pierre Damien Habumuremyi

#### Position

Prime Minister

#### Introduction

Pierre Damien Habumuremyi was sworn in as prime minister in Oct. 2011, succeeding Bernard Makuza. Makuza had served for 11 years, the longest serving head of government in Rwanda's post-genocide era, and was credited with bringing a degree of stability

to the country. A technocrat, Habumuremyi was previously the minister of education.

#### Early Life

Habumuremyi was born in 1961 in Ruhondo, in Musanze District. He graduated in sociology from Lubumbashi University in the Democratic Republic of the Congo, before gaining post-graduate qualifications in education and political science.

He served from 2000–08 on the National Electoral Commission, including five years as executive secretary. In 2008 he was elected to represent the country at the East African Community legislative assembly.

In 2011 Habumuremyi was appointed Rwanda's minister of education, serving five months before being appointed prime minister. His promotion to the premiership surprised many commentators, given his relatively low profile and lack of government experience.

#### Career in Office

Habumuremyi pledged to rejuvenate the economy and develop its information and communications base. He also promised to fight corruption and has refuted suggestions that he is a puppet of the president.

#### DEFENCE

In 2008 defence expenditure totalled US\$71m. (US\$7 per capita), representing 1.8% of GDP.

#### Army

Strength (2007) about 32,000. There were local defence forces of some 2,000 in 2007.

#### ECONOMY

Agriculture accounted for 41.3% of GDP in 2006, industry 13.3% and services 45.4%.

#### Overview

Since the 1994 genocide and civil war, Rwanda has registered strong economic growth and macroeconomic stability. The economy is dominated by subsistence agriculture, which accounts for 36% of GDP, 80% of employment and 45% of exports. Real GDP growth peaked at 11.2% in 2008 before the effects of the global financial crisis slowed growth to 4.1% in 2009. However, a recovery was under way in 2010, driven by growth in agriculture and the resurgent services and construction sectors.

According to the World Bank, 50% of Rwanda's budget is financed by international aid, encompassing around 12% of GDP. Poverty remains high, with nearly 57% of the population living below the national poverty line according to a 2006 household survey. With Rwanda aiming to become a lower-middle income economy by 2020, the Economic Development and Poverty Reduction Strategy (EDPRS) is set to stimulate broad-based economic growth and employment through better economic infrastructure, higher agricultural productivity and stronger political and economic governance. In the World Bank's 2010 'Doing Business' survey Rwanda was ranked as the world's number one business reformer for 2008–09.

#### Currency

The unit of currency is the *Rwanda franc* (RWF) notionally of 100 centimes. On 3 Jan. 1995, 500-, 1,000- and 5,000-Rwanda franc notes were replaced by new issues, demonetizing the currency taken abroad by exiles. The currency is not convertible. Foreign exchange reserves were US\$312m. in July 2005. Total money supply in Dec. 2003 was 82,305m. Rwanda francs. Inflation was 15.4% in 2008, falling to 2.3% in 2010. It stood at 5.7% in 2011.

#### Budget

In 2007 revenues were 472.3bn. Rwanda francs and expenditures 491.4bn. Rwanda francs.

VAT is 18%.

#### Performance

Real GDP growth was 24.5% in 1995, following two years of negative growth including a rate of -41.9% in 1994 at the height of the civil war. From 2000–08 growth averaged 8.1%. Real GDP growth was 4.1% in 2009, 7.2% in 2010 and 8.6% in 2011. Total GDP in 2011 was US\$6.4bn.

#### Banking and Finance

The central bank is the National Bank of Rwanda (founded 1960; *Governor*, John Rwangombwa), the bank of issue since 1964. There are seven commercial banks (Banque de Kigali, Banque de Commerce et de Développement Industriel, Banque Continentale Africaine au Rwanda, Banque à la Confiance d'Or, Banque Commerciale du Rwanda, Caisse Hypothécaire du Rwanda and Compagnie Générale de Banque), one development bank (Rwandan Development Bank) and one credit union system (Rwandan Union of Popular Banks).

Foreign debt totalled US\$795m. in 2010, representing 14.2% of GNI.

A stock exchange opened in Kigali in Jan. 2011.

#### ENERGY AND NATURAL RESOURCES

##### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

##### Electricity

Installed capacity was 57,000 kW in 2007. Production was estimated at 169m. kWh in 2007 and consumption per capita an estimated 27 kWh.

##### Oil and Gas

In 2007 proven natural gas reserves were 57bn. cu. metres.

##### Minerals

Production (2002): cassiterite, 197 tonnes; wolfram, 153 tonnes.

##### Agriculture

There were an estimated 1.2m. ha. of arable land in 2007 and 275,000 ha. of permanent crops. Production (2003, in 1,000 tonnes): bananas and plantains, 2,408; potatoes, 1,110; cassava, 1,003; sweet potatoes, 868; dry beans, 239; pumpkins and squash, 210; sorghum, 172; taro, 139; maize, 79; sugarcane, 40; rice, 28; dry peas, 18; tea, 15; wheat, 15.

In 2006 there were 1,330,000 goats, 997,000 cattle, 473,000 sheep, 327,000 pigs and 2m. chickens.

##### Forestry

Forests covered 0.44m. ha. (18% of the land area) in 2010. Timber production in 2007 was 10.0m. cu. metres.

##### Fisheries

The catch in 2007 totalled 9,050 tonnes, entirely from inland waters.

#### INDUSTRY

There are about 100 small-sized modern manufacturing enterprises in the country. Food manufacturing is the dominant industrial activity (64%) followed by construction (15.3%) and mining (9%). There is a large modern brewery.

#### Labour

In 2005–06 there were 4,377,000 employed persons, with 79% of the economically active population engaged in agriculture, fisheries and forestry.

## KEY HISTORICAL EVENTS

The islands of St Kitts (formerly St Christopher) and Nevis were discovered and named by Columbus in 1493. They were settled by Britain in 1623 and 1628, but ownership was disputed with France until 1783. In Feb. 1967 colonial status was replaced by an 'association' with Britain, giving the islands full internal self-government. St Kitts and Nevis became fully independent on 19 Sept. 1983. In Oct. 1997 the five-person Nevis legislature voted to end the federation with St Kitts. However, in a referendum held on 10 Aug. 1998 voters rejected independence, only 62% voting for secession when a two-thirds vote in favour was needed. In Sept. 1998 Hurricane Georges caused devastation, leaving 25,000 people homeless, with some 80% of the houses in the islands damaged.

## TERRITORY AND POPULATION

The two islands of St Kitts and Nevis are situated at the northern end of the Leeward Islands in the eastern Caribbean. Nevis lies 3 km to the southeast of St Kitts. Population, 2001 census, 46,325. In 2011, 32.6% of the population were urban.

|          | Sq. km | Census 1991 | Census 2001 | Chief town  | Census 2001 |
|----------|--------|-------------|-------------|-------------|-------------|
| St Kitts | 168.0  | 31,824      | 35,217      | Basseterre  | 13,251      |

In 2001, 92.4% of the population were of African origin. English is the official and spoken language.

## SOCIAL STATISTICS

Births, 2008, 709; deaths, 357. Rates, 2008 (per 1,000 population): births, 13.8; deaths, 7.0. Infant mortality, 2010 (per 1,000 live births), 7. Life expectancy in 2006 was 73 years. Annual population growth rate, 2000–08, 1.3%; fertility rate, 2008, 1.8 births per woman.

## CLIMATE

Temperature varies between 21.4–30.7°C, with a sea breeze throughout the year and low humidity. Average annual rainfall is between 1,270 mm and 1,905 mm.

## CONSTITUTION AND GOVERNMENT

The British sovereign is the head of state, represented by a Governor-General. The 1983 constitution described the country as 'a sovereign democratic federal state'. It allowed for a unicameral Parliament consisting of 11 elected Members (eight from St Kitts and three from Nevis), three appointed Senators and one *ex officio* member. Nevis was given its own Island Assembly and the right to secession from St Kitts.

## National Anthem

'O Land of beauty! Our country where peace abounds'; words and tune by K. A. Georges.

## RECENT ELECTIONS

At the National Assembly elections on 25 Jan. 2010 the Labour Party gained 6 seats, the People's Action Movement 2, the Concerned Citizens' Movement 2 and the Nevis Reformation Party 1. Turnout was 79.8%.

## CURRENT GOVERNMENT

*Governor-General:* Sir Edmund Wickham Lawrence, KCMG, OBE, CSM, JP (since 2 Jan. 2013).

In March 2013 the government comprised:

*Prime Minister, Minister of Finance, Sustainable Development, National Security and Constituency Empowerment:* Dr Denzil L. Douglas; b. 1953 (Labour Party; sworn in 7 July 1995 and re-elected in 2000, 2004 and 2010).

## CURRENT LEADERS

**Dr Denzil L. Douglas**

### Position

Prime Minister

### Introduction

Denzil Douglas has been prime minister of St Kitts and Nevis since 1995. In Jan. 2010 he was re-elected for his fourth

consecutive term after his Labour Party secured six out of a possible 11 seats.

#### *Early Life*

Born in 1953, Denzil Llewellyn Douglas is a graduate of the University of the West Indies. He worked as a family physician before embarking on a career in politics. A Labour party activist from an early age, he became leader of the St Kitts and Nevis Labour Party in 1989. The 1995 election was called following drug smuggling allegations brought against the prime minister at the time, Kennedy Simmonds.

#### *Career in Office*

On becoming prime minister, Douglas sought to mend relations between the islands of St Kitts and Nevis. Nevertheless, in 1998 a referendum on secession was held after occupants of Nevis complained that the federal government in St Kitts was ignoring their needs. Although they failed to gain the two-thirds vote needed to break away, unrest remained. Douglas has since tried to tackle the differences through constitutional reform.

In Nov. 2004 Douglas chaired a CARICOM–UK conference aimed at reducing stigma and discrimination against those living with HIV and AIDS in the Caribbean. In May 2005 he chaired the first Caribbean Forum of Development, aimed at transforming the regional economy, and achieving international competitiveness and sustainable growth. He has also called for the cancellation of international debt, which has been crippling many Caribbean Islands.

While he has been widely praised for promoting poverty reduction and combating crime, he has been criticized for not reviving the islands' ailing sugar industry. In March 2005 the government effectively closed the 300 year-old industry after another loss-making harvest. Although the closure has had an adverse impact on government debt, economic activity was buoyed in 2006 and early 2007 by an expansion in tourism and construction spending related to the 2007 Cricket World Cup.

Re-elected for the third time in Jan. 2010, Douglas holds a number of ministerial posts in addition to the premiership. In July 2012 he announced the completion of a major public debt restructuring programme agreed with the Paris Club of creditor nations.

## **ECONOMY**

Agriculture accounted for 1.5% of GDP in 2009, industry 20.0% and services 78.5%.

### **Overview**

The economy is in transition following the government's closure of the sugar industry in 2005, a move encouraged by the EU and WTO after years of heavy losses. The most important sources of revenue are service industries, offshore finance and tourism but the country is vulnerable to external shocks, such as natural disasters and shifts in the tourist market.

The economy contracted in 2009, 2010 and 2011 following a fall in tourism receipts and FDI-related construction activity, but a slow recovery is under way driven by stronger performance in the USA, the Islands' primary export market. An increasing fiscal deficit led to the implementation of revenue reforms, including the introduction of VAT and excise tax reforms in 2010, as well as expenditure cuts including a freeze on public wages. Inflationary pressures intensified as a result of the VAT introduction and rising oil and food prices, while the public debt-to-GDP ratio increased to 200% in 2010. The Islands have requested financial assistance from the IMF to reduce public debt.

### **Currency**

The *East Caribbean dollar* (XCD) (of 100 cents) is in use. Inflation was 0.6% in 2010 but increased to 7.1% in 2011. In July 2005 foreign exchange reserves were US\$75m. Total money supply was EC\$200m. in June 2005.

### **Budget**

Total revenues in 2008 were EC\$641.2m. and expenditures EC\$634.4m. Tax revenue accounted for 64.9% of revenues in 2008; current expenditure accounted for 87.8% of expenditures.

### **Performance**

The economy contracted by 5.6% in 2009, 2.7% in 2010 and 2.0% in 2011. Total GDP was US\$0.7bn. in 2011.

### **Banking and Finance**

The East Caribbean Central Bank (*Governor*, Sir Dwight Venner) is located in St Kitts. It is a regional bank that serves the OECS countries. In 2002 there were four domestic commercial banks (Bank of Nevis, Caribbean Banking Corporation, Nevis Co-operative Bank and St Kitts-Nevis-Anguilla National Bank), three foreign banks and one development bank. Nevis has some 9,000 offshore businesses registered.

Foreign debt in 2007 amounted to US\$274m.

St Kitts and Nevis is a member of the Eastern Caribbean Securities Exchange, based in Basseterre.

## **ENERGY AND NATURAL RESOURCES**

### **Environment**

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.9 tonnes per capita.

### **Electricity**

Installed capacity was an estimated 22,000 kW in 2007. Production in 2007 was an estimated 137m. kWh.

### **Minerals**

In 2007 an estimated 223,000 tonnes of sand and gravel and 131,000 tonnes of crushed stone were produced.

### **Agriculture**

Main crops are coconuts, cotton, bananas, yams and molasses, and until 2005 sugarcane. The sugar industry was closed down following the 2005 harvest after years of losses at the state-run sugar company. In 2007 there were an estimated 4,000 ha. of arable land. Most of the farms are small-holdings and there are a number of coconut estates amounting to some 400 ha. under public and private ownership. Production, 2003 estimates (in 1,000 tonnes): sugarcane, 193; coconuts, 1.

Livestock (2003 estimates): goats, 14,000; sheep, 14,000; cattle, 4,000; pigs, 4,000.

### **Forestry**

The area under forests in 2010 was 11,000 ha., or 42% of the total land area.

### **Fisheries**

The estimated catch in 2008 was 450 tonnes.

## **INDUSTRY**

There are three industrial estates on St Kitts and one on Nevis. Export products include electronics and data processing equipment, and garments for the US market. Other small enterprises include food and drink processing, and construction.

### **Labour**

Of 24,778 persons on St Kitts aged 15 or over in 2001, 17,044 were economically active of whom 16,171 were employed and 873 were unemployed. The country has a phenomenon of the working poor—the unemployment rate among the poor in 2001 was very low at 5.3% on St Kitts and 5.0% on Nevis.

## INTERNATIONAL TRADE

### Imports and Exports

Imports (c.i.f.), 2008, US\$324.8m.; exports (f.o.b.), US\$51.2m. The USA is by far the biggest trading partner. In 2008, 60.1% of imports were from the USA and 84.6% of exports went to the USA. Trinidad and Tobago is the second largest import supplier and the United Kingdom the second largest export destination. Main imports include machinery, manufactures, food and precious jewellery. Major exports are machinery, transport equipment, printed matter and beer.

## COMMUNICATIONS

### Roads

In 2002 there were about 383 km of roads, of which 42.5% were paved; and 6,900 passenger cars and 2,500 commercial vehicles.

### Rail

In 2005 there were 50 km of railway, formerly operated by the sugar industry but now used for tourist purposes.

### Civil Aviation

The main airport is the Robert Llewelyn Bradshaw International Airport (just over 3 km from Basseterre). In 2003 there were flights to Anguilla, Antigua, Barbados, British Virgin Islands, Dominica, Grenada, Jamaica, Netherlands Antilles, Nevis (Newcastle), Philadelphia, Puerto Rico, St Lucia, St Vincent, Trinidad and the US Virgin Islands.

### Shipping

There is a deep-water port at Bird Rock (Basseterre). In Jan. 2009 there were 200 ships of 300 GT or over registered, totalling 892,000 GT. Among the 200 vessels registered were 132 general cargo ships and 47 oil tankers. The government maintains a commercial motor boat service between the islands.

### Telecommunications

In 2008 there were 20,400 main (fixed) telephone lines; mobile phone subscribers numbered 80,000 in 2008 (156.7 per 100 persons). There were 16,000 internet users in 2008 (31.3 per 100 persons).

## SOCIAL INSTITUTIONS

### Justice

Justice is administered by the Supreme Court and by Magistrates' Courts. They have both civil and criminal jurisdiction. St Kitts and Nevis was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port-of-Spain, Trinidad on 16 April 2005 but has not yet been accepted as St Kitts and Nevis' final court of appeal.

The death penalty is in force and was used in 2008 for the first time since 1998.

The population in penal institutions in Nov. 2007 was 232 (equivalent to 588 per 100,000 of national population, the fourth highest rate in the world).

### Education

Adult literacy was 98% in 1998–99. Education is compulsory between the ages of 5 and 16. In 2007 there were 2,360 pupils in pre-primary schools with 357 teaching staff, 6,172 pupils with 372 teaching staff in primary schools and 4,522 pupils with 447 teaching staff in secondary schools.

The main post-secondary institution is the Clarence Fitzroy Bryant College (formerly the St Kitts and Nevis College of Further Education). There are six divisions: Adult and Continuing Education; Arts, Sciences and General Studies; Health Science; Hospitality Studies; Teacher Education; and Technical and Vocational Education and Management Studies.

In 2005 public expenditure on education came to 10.9% of GNI.

### Health

In 2005 there were 68 physicians; there were 37.9 registered nurses per 10,000 inhabitants in 2005. In 2008 there were four hospitals and 17 health centres. In 2005 there were 55 hospital beds per 10,000 population.

## RELIGION

In 2001, 25.6% of the population were Anglican, 25.6% Methodist and 17.9% Pentecostal. There are also followers of other beliefs, including Roman Catholics, Baptists and Church of God.

## CULTURE

### World Heritage Sites

There is one site on the UNESCO World Heritage List: Brimstone Hill Fortress National Park (inscribed on the list in 1999), a well-preserved example of 17th and 18th century British military architecture.

### Press

In 2006 there was one daily newspaper with a circulation of 3,000. There were also four non-dailies.

### Tourism

In 2008 there were 533,353 visitors in total including 400,916 cruise ship passengers and 127,705 staying visitors. Receipts from tourism in 2007 (excluding passenger transport) totalled US\$106m.

## KEY HISTORICAL EVENTS

The island was probably discovered by Columbus in 1502. An unsuccessful attempt to colonize by the British took place in 1605 and again in 1638 when settlers were soon murdered by the Caribs who inhabited the island. France claimed the right of sovereignty and ceded it to the French West India Company in 1642. St Lucia regularly and constantly changed hands between Britain and France, until it was finally ceded to Britain in 1814 by the Treaty of Paris. Since 1924 the island has had representative government. In March 1967 St Lucia gained full control of its internal affairs while Britain remained responsible for foreign affairs and defence. On 22 Feb. 1979 St Lucia achieved independence, opting to remain in the British Commonwealth.

## TERRITORY AND POPULATION

St Lucia is an island of the Lesser Antilles in the eastern Caribbean between Martinique and St Vincent, with an area of 617 sq. km (238 sq. miles). Population (2010 census, provisional) 165,595; density, 268.4 per sq. km. In 2011 the population was 28.1% urban.

## CURRENT LEADERS

### Dr Kenny Anthony

#### Position

Prime Minister

#### Introduction

Dr Kenny Anthony returned to office as prime minister on 30 Nov. 2011, having previously served two consecutive terms from 1997 to 2006. After electoral defeat in Dec. 2006, he remained leader of the Saint Lucia Labour Party (SLP) in opposition before returning to power.

#### Early Life

Kenny Davis Anthony was born on 8 Jan. 1951. He studied law at the University of the West Indies before studying for a PhD at Birmingham University in the United Kingdom.

He joined the SLP on his return to St Lucia, serving as minister of education from 1980–81. A former consultant to the United Nations on its development programmes, Anthony was also a member of the Caribbean Community secretariat from 1995–97 and served as chairman of the Organisation of Eastern Caribbean States. He became SLP leader in 1996 and was sworn in as prime minister for the first time in May 1997.

In his first term Anthony was at the centre of a dispute with the USA and World Trade Organization over alleged preferential treatment for former colonial banana suppliers to the European Union. In Sept. 2002 tropical storm Lili hit the island, devastating the banana crop and exacerbating economic problems. The government sought to diversify the economy, with a focus on increasing investment in tourism. Anthony also oversaw extensive domestic infrastructure development, while education spending rose significantly.

However, he was criticized for St Lucia's high levels of borrowing, with the debt-to-GDP ratio standing at around 63% in 2005. Meanwhile, the crime rate remained stubbornly high, despite the passage of a new criminal code. In July 2003 parliament amended the constitution to replace the oath of allegiance to the British monarch with a pledge of loyalty to the St Lucian people (although Queen Elizabeth II remained head of state).

At the general election of 11 Dec. 2006, the SLP won only six seats against 11 for the United Workers Party, headed by Sir John Compton. Anthony nonetheless retained his own constituency and continued as leader of the SLP. Compton died in Sept. 2007 and was succeeded as prime minister by Stephenson King. During his time in opposition, Anthony visited Cuba, where he thanked the Cuban administration for its aid to St Lucia and other Caribbean nations. In the general election held in Nov. 2011 the SLP were returned to power, taking 11 of the available 17 seats.

#### Career in Office

With the economy in need of urgent attention, Anthony warned the island's population that 'difficult times lie ahead'. He also faced a strained relationship with Taiwan following St Lucia's establishment of diplomatic ties with China during his previous tenure.

## ECONOMY

In 2007 agriculture, forestry, hunting and fishing contributed 6.4% of GDP, industry 19.6% and services 76.8%.

### Overview

High levels of public debt and unemployment are ongoing problems. The principal source of revenue and employment is tourism. The government is trying to boost banana production,

which accounts for 41% of commodities exports. The economy is vulnerable to natural disasters, fluctuating tourist arrivals and oil prices.

Following the 2008 economic crisis, the financial system experienced knock-on effects from the collapse of the Trinidad and Tobago-based CL-Financial Group, which had operations in the country. A sharp decline in tourist arrivals and construction projects resulted in GDP contracting in 2009.

St Lucia, Antigua and Barbuda, Dominica, Grenada, St Kitts and Nevis, and St Vincent and the Grenadines comprise the Organization of Eastern Caribbean States (OECs), which aims at economic and political integration. The Treaty establishing the OECs Economic Union was signed on 18 June 2010. Tourism makes up more than 23% of GDP for the OECs region as a whole and will be an important factor in regional economic recovery.

### Currency

The *East Caribbean dollar* (XCD) (of 100 cents) is in use. US dollars are also normally accepted. There was deflation of 0.2% in 2009 but inflation of 3.3% in 2010 and 2.8% in 2011. Foreign exchange reserves were US\$109m. in July 2005 and total money supply was EC\$542m.

### Budget

The fiscal year ends on 31 March. Revenues were EC\$816.0m. in the fiscal year 2008–09 and expenditures EC\$959.1m.

### Performance

The economy grew by 0.4% in 2010 and 1.3% in 2011. Total GDP in 2011 was US\$1.3bn.

### Banking and Finance

The East Caribbean Central Bank based in St Kitts and Nevis functions as a central bank. The *Governor* is Sir Dwight Venner. There are three domestic banks (Caribbean Banking Corporation, St Lucia Co-operative Bank, East Caribbean Financial Holding Company) and three foreign banks.

Foreign debt in 2007 amounted to US\$441m.

St Lucia is a member of the Eastern Caribbean Securities Exchange, based in Basseterre.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 2.6 tonnes per capita.

### Electricity

Installed capacity in 2007 was 76,000 kW. Production in 2007 was 346m. kWh; consumption per capita in 2007 was 2,046 kWh.

### Agriculture

In 2007 St Lucia had approximately 3,000 ha. of arable land and 7,000 ha. of permanent crops. Bananas, cocoa, breadfruit and mango are the principal crops, but changes in the world's trading rules and changes in taste are combining to depress the banana trade. Farmers are experimenting with okra, tomatoes and avocados to help make up for the loss. Production, 2003 estimates (in 1,000 tonnes): bananas, 120; mangoes, 28; coconuts, 14; yams, 4; grapefruit and pomelos, 3.

Livestock (2003 estimates): pigs, 15,000; cattle, 12,000; sheep, 12,000; goats, 10,000.

### Forestry

In 2010 the area under forests was 47,000 ha. (77% of the total land area).

### Fisheries

In 2010 the total catch was 1,844 tonnes.

## INDUSTRY

The main areas of activity are clothing, assembly of electronic components, beverages, corrugated cardboard boxes, tourism, lime processing and coconut processing.

### Labour

In the period April–June 2004 the labour force totalled 78,210. The unemployment rate was 21.0% in 2004.

## INTERNATIONAL TRADE

### Imports and Exports

Imports and exports for calendar years in US\$1m.:

|                | 2003  | 2004  | 2005  | 2006  |
|----------------|-------|-------|-------|-------|
| Imports c.i.f. | 407.7 | 421.6 | 485.8 | 592.4 |
| Exports f.o.b. | 62.5  | 79.8  | 64.2  | 93.7  |

Main imports in 2006: machinery and transport equipment, 25.8%; food and live animals, 15.9%; petroleum and petroleum products, 12.1%; chemicals and related products, 6.9%. Main exports, 2006: petroleum and petroleum products, 21.7%; bananas, 19.0%; machinery and transport equipment, 18.2%; beer, 14.0%. Main import suppliers, 2006: USA, 39.2%; Trinidad and Tobago, 16.9%; UK, 6.9%; Japan, 6.3%. Main export markets, 2006: Trinidad and Tobago, 30.1%; UK, 20.7%; USA, 20.6%; Barbados, 6.6%.

## COMMUNICATIONS

### Roads

The island had about 1,210 km of roads in 2002, of which 150 km were main roads and a further 150 km secondary roads. Passenger cars numbered 13,100 in 2002.

### Civil Aviation

There are two international airports: Hewanorra International (near Vieux-Fort) and George F. L. Charles (near Castries). In 2009 Hewanorra handled 513,959 passengers (483,632 in 2008) and George F. L. Charles—which handles inter-Caribbean flights—309,132 passengers (358,313 in 2008).

### Shipping

There are two ports, Castries and Vieux Fort.

### Telecommunications

Fixed telephone lines numbered 40,900 in 2008 (240.2 per 1,000 persons) and there were 216,500 mobile phone subscriptions in 2011 (or 1,230.0 per 1,000 inhabitants). Fixed internet subscriptions totalled 20,800 in 2010 (119.4 per 1,000 inhabitants).

## SOCIAL INSTITUTIONS

### Justice

The island is divided into two judicial districts, and there are nine magistrates' courts. Appeals lie to the Eastern Caribbean Supreme Court of Appeal. St Lucia was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port-of-Spain, Trinidad on 16 April 2005. It has not yet replaced the Privy Council as St Lucia's final court of appeal.

The population in penal institutions in Dec. 2010 was 551 (315 per 100,000 of national population).

### Education

Primary education is free and compulsory. In 2008–09 there were 1,000 teachers for 20,000 pupils at primary school level; and 16,000 pupils and an estimated 1,000 teachers at secondary level. There is a community college. The adult literacy rate was 90.1% in 2003 (89.5% among males and 90.6% among females).

In 2006 public expenditure on education came to 6.9% of GNI and 19.1% of total government spending.

### Health

In 2002 there were five hospitals (with 305 beds) and 35 health centres. There were 70 physicians, seven dentists and 302 nurses.

## RELIGION

In 2001, 79% of the population was Roman Catholic.

## CULTURE

### World Heritage Sites

There is one UNESCO World Heritage site in St Lucia: Pitons Management Area (inscribed on the list in 2004). The site near the town of Soufrière includes the Pitons, two volcanic spires rising side by side from the sea, linked by the Piton Mitan ridge.

### Press

There are no daily newspapers. In 2008 there were six paid-for non-daily newspapers: the thrice-weekly *The Voice* and *The Star*; and the weekly *The Mirror*, *The Crusader*, *The Vanguard* and *One Caribbean*.

### Tourism

The number of foreign tourists in 2005 was 318,000. Receipts in 2005 totalled US\$345m. (excluding passenger transport).

## KEY HISTORICAL EVENTS

St Vincent was discovered by Columbus on 22 Jan. (St Vincent's Day) 1498. British and French settlers occupied parts of the islands after 1627. In 1773 the Caribs recognized British sovereignty and agreed to a division of territory between themselves and the British. Resentful of British rule, the Caribs rebelled in 1795, aided by the French, but the revolt was subdued within a year. On 27 Oct. 1969 St Vincent became an Associated State with the UK responsible for foreign policy and defence. On 27 Oct. 1979 the colony gained full independence as St Vincent and the Grenadines.

## TERRITORY AND POPULATION

St Vincent is an island of the Lesser Antilles, situated in the eastern Caribbean between St Lucia and Grenada, from which latter it is separated by a chain of small islands known as the Grenadines. The total area of 389 sq. km (150 sq. miles) comprises the island of St Vincent itself (345 sq. km) and those of the Grenadines attached to it, of which the largest are Bequia, Mustique, Canouan, Mayreau and Union.

The population at the 2001 census was 106,253, of whom 97,638 lived on St Vincent; density, 273 per sq. km. In 2011, 49.8% of the population lived in urban areas.

The UN gives a projected population for 2015 of 109,000.

The capital, Kingstown, had 25,307 inhabitants in 2004 (including suburbs). The population is mainly of Black (65.5%) and mixed (23.5%) origin, with small White, Asian and American minorities.

English is the official language, although French patois is widely spoken.

## SOCIAL STATISTICS

Births, 2008 estimate, 1,900; deaths, 800. 2008 estimated rates (per 1,000 population): births, 17.6; deaths, 7.5. Infant mortality, 2010, 19 per 1,000 live births. Life expectancy, 2007, was 69.4 years for males and 73.6 years for females. Annual population growth rate, 2000–08, 0.1%; fertility rate, 2008, 2.1 births per woman.

## CLIMATE

The climate is tropical marine, with northeast trades predominating and rainfall ranging from 150" (3,750 mm) a year in the mountains to 60" (1,500 mm) on the southeast coast. The rainy season is from June to Dec., and temperatures are equable throughout the year.

## CONSTITUTION AND GOVERNMENT

The head of state is Queen Elizabeth II, represented by a Governor-General. Parliament is unicameral with a 23-member *House of Assembly* consisting of 15 members directly elected for a five-year term from single-member constituencies, six senators appointed by the Governor-General (four on the advice of the Prime Minister and two on the advice of the Leader of the Opposition) and two *ex officio* members.

## National Anthem

'St Vincent, land so beautiful'; words by Phyllis Punnett, tune by J. B. Miguel.

## RECENT ELECTIONS

At the elections to the House of Assembly on 13 Dec. 2010 the ruling Unity Labour Party (ULP, social democratic) won 8 of the 15 elected seats with 51.1% of the vote, against 7 (48.7%) for the opposition New Democratic Party (NDP, conservative).

## CURRENT GOVERNMENT

*Governor-General:* Sir Frederick Ballantyne (since 2 Sept. 2002).

In March 2013 the government comprised:

*Prime Minister and Minister of Finance, National Security, Grenadine Affairs and Telecommunications:* Dr Ralph E. Gonsalves; b. 1946 (ULP; sworn in 29 March 2001 and re-elected in Dec. 2005 and Dec. 2010).

*Deputy Prime Minister and Minister of Education:* Girlynn Miguel.

*Minister of National Mobilization, Social Development, Family, Gender Affairs, Persons with Disabilities and Youth:* Frederick Stevenson. *National Reconciliation, Public Service, Labour, Information and Ecclesiastical Affairs:* Maxwell Charles. *Health, Wellness and the Environment:* Clayton Burgin. *Foreign Affairs, Foreign Trade and Consumer Affairs:* Douglas Slater. *Transportation and Works, and Urban Development and Local Government:* Julian Francis. *Agriculture, Industry, Forestry, Fisheries and Rural Transformation:* Saboto Caesar. *Tourism, Sports and Culture:* Cecil McKie. *Housing, Informal Human Settlements, Lands and Surveys, and Physical Planning:* Montgomery Daniel.

## CURRENT LEADERS

### Dr Ralph E. Gonsalves

#### Position

Prime Minister

#### Introduction

Dr Ralph E. Gonsalves became prime minister in 2001 after his Unity Labour Party (ULP) won an election brought forward from 2003 following anti-government protests in 2000. He won further terms in 2005 and 2010.

#### Early Life

'Comrade Ralph' was born in 1946. He studied at the University of the West Indies in Jamaica, gaining a PhD in political science. He later graduated in law from the University of the West Indies in Barbados, before returning home. In 1982 he founded the left-wing Movement for National Unity, which in 1994 amalgamated with the St Vincent Labour Party to form the ULP. Gonsalves succeeded the ULP's first leader, Vincent Beache, in 1998 and led the party to electoral victory in 2001, ending 15 years of New Democratic Party rule.

#### Career in Office

Gonsalves has sought to tackle the problems of money laundering, gun violence and drug-related crime. In June 2003 St Vincent and Grenadines was removed from a list of uncooperative countries in the fight against money laundering throughout the Caribbean islands.

The country's economy is reliant on the banana trade and the government continues to pay large subsidies to farmers. However, a decline in banana prices and demand has led to some diversification. In June 2004 Gonsalves announced the launch of National Investments Promotions Incorporated to attract investment and boost exports, and the tourism sector has seen significant growth.

Gonsalves has maintained close ties with Taiwan and Cuba. In May 2005 Taiwan made a gift of computer equipment to his government to enhance efficiency. It also helped to build facilities for the 2007 Cricket World Cup. In Jan. 2005 Gonsalves met with Fidel Castro to announce that new diplomatic missions would be established in their respective countries. Castro promised Cuban assistance to Gonsalves' campaign to increase national literacy rates.

Feb. 2005 saw the launch of the World Bank-assisted HIV/AIDS prevention and control project, with the St Vincent government expected to invest at least US\$1.7m. over five years. In April 2005 Gonsalves signed agreements with St Lucia and Dominica to introduce measures to combat climate change in the coastal areas of the three Windward Islands (with substantial funding from the USA and Japan). In May 2005 his government ratified the Kyoto protocol.

In parliamentary elections in Dec. 2005 the ULP retained their 12 seats. Gonsalves was sworn in for a new term and took over the national security portfolio. In May 2007 his government introduced VAT to increase public revenue (with a reduced rate for hotel accommodation to help protect the tourist industry). Plans for a new constitution and the establishment of a republic, for which Gonsalves campaigned for acceptance, were rejected by 55% of voters in a referendum in Nov. 2009. The ULP only narrowly retained its parliamentary majority in elections in Dec. 2010, taking eight of the 15 seats.

In 2008 diplomatic relations were established with Iran.

## ECONOMY

Agriculture accounted for 6.9% of GDP in 2009, industry 18.9% and services 74.2%.

## Overview

With the banana crop accounting for around a third of export earnings, the economy enjoyed vigorous growth in 2006 and 2007 at around 7% per annum, boosted by healthy construction activity and government services. In Oct. 2007 an agreement was made with Italy to write off a debt obligation, reducing the public debt by around 10% of GDP. In May 2007 the authorities introduced VAT, contributing to higher inflation for the year.

Growth was affected by the global economic slowdown through reduced levels of tourism and foreign direct investment. In addition, Hurricane Tomas in Oct. 2010 was followed by flooding in April 2011, causing a further decline in economic activity. Increased expenditure and falling GDP in the wake of the slowdown resulted in public debt increasing to 66.8%.

## Currency

The currency in use is the *East Caribbean dollar* (XCD). Inflation was 10.1% in 2008, falling to 0.8% in 2010. It stood at 3.2% in 2011. Foreign exchange reserves were US\$66m. in July 2005. Total money supply was EC\$319m. in June 2005.

## Budget

In 2009 revenues totalled EC\$522.5m. and expenditures EC\$571.5m.

VAT is 15% (reduced rate, 10%).

## Performance

The economy contracted by 2.3% in 2009 and 1.8% in 2010. There was then zero growth in 2011. In 2011 total GDP was US\$0.7bn.

## Banking and Finance

The East Caribbean Central Bank is the bank of issue. The *Governor* is Sir Dwight Venner. There are branches of Barclays Bank PLC, the Caribbean Banking Corporation, FirstCaribbean International, the Canadian Imperial Bank of Commerce and the Bank of Nova Scotia. Locally-owned banks: First St Vincent Bank, Owens Bank, New Bank, the National Commercial Bank and St Vincent Co-operative Bank. The 'offshore' sector numbered over 11,000 organizations in 2001.

Foreign debt was US\$253m. in 2007.

St Vincent and the Grenadines is a member of the Eastern Caribbean Securities Exchange, based in Basseterre.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 2.1 tonnes per capita in 2008.

### Electricity

Installed capacity was approximately 34,000 kW in 2007. Production in 2007 was an estimated 135m. kWh; consumption per capita in 2007 was around 1,309 kWh.

### Agriculture

In 2007 the agricultural population was an estimated 23,000, of which 11,000 were economically active. There were an estimated 7,000 ha. of arable land and 5,000 ha. of permanent crops in 2007. The sugar industry was closed down in 1985 although some sugarcane is grown for rum production. Production (2003, in 1,000 tonnes): bananas, 50; coconuts, 3; copra, 2; maize, 2; oranges, 2; plantains, 2; sugarcane, 2; sweet potatoes, 2; yams, 2.

Livestock (2003, in 1,000): sheep, 12; pigs, 9; goats, 7; cattle, 5.

### Forestry

Forests covered 27,000 ha. in 2010, or 68% of the land area.

### Fisheries

Total catch, 2009, 4,058 tonnes (all from sea fishing).

## INDUSTRY

Industries include assembly of electronic equipment, manufacture of garments, electrical products, animal feeds and flour, corrugated galvanized sheets, exhaust systems, industrial gases, concrete blocks, plastics, soft drinks, beer and rum, wood products and furniture, and processing of milk, fruit juices and food items.

### Labour

The Department of Labour is charged with looking after the interest and welfare of all categories of workers, including providing advice and guidance to employers and employees and their organizations and enforcing the labour laws. In 2001 the total labour force was 43,779, of whom 34,521 (21,274 males and 13,247 females) were employed.

## INTERNATIONAL TRADE

### Imports and Exports

Imports (c.i.f.) in 2010 totalled US\$379.5m. and exports (f.o.b.) US\$41.5m. Principal imports are basic manufactures, machinery and transport equipment, and food products. Principal exports are bananas, packaged flour and packaged rice. Main import suppliers, 2005: USA, 33.3%; Trinidad and Tobago, 23.6%; UK, 9.4%. Main export markets, 2005: UK, 26.8%; Barbados, 12.8%; Trinidad and Tobago, 12.3%.

## COMMUNICATIONS

### Roads

In 2002 there were 829 km of roads, of which 70% were paved. Vehicles in use (2008): 9,250 passenger cars, 12,900 vans and lorries, and 1,220 motorcycles and mopeds.

### Civil Aviation

There is an airport (E. T. Joshua) on mainland St Vincent at Arnos Vale. An airport on Union also has regular scheduled services. In 2003 E. T. Joshua handled 273,000 passengers; 29,000 aircraft passed through or landed. A new airport is under construction at Argyle and is scheduled to open in late 2013.

### Shipping

In Jan. 2009 there were 580 ships of 300 GT or over registered, totalling 5.10m. GT. Among the 580 vessels registered were 413 general cargo ships, 80 bulk carriers and 31 passenger ships.

### Telecommunications

There were 133,400 telephone subscribers in 2007, equivalent to 1,108.1 for every 1,000 inhabitants, including 110,500 mobile phone subscribers. The telephone network has almost 100% geographical coverage. In 2007 there were 57,000 internet users.

## SOCIAL INSTITUTIONS

### Justice

Law is based on UK common law as exercised by the Eastern Caribbean Supreme Court on St Lucia. Final appeal lies to the UK Privy Council. St Vincent and the Grenadines was one of 12 countries to sign an agreement establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court. The court was inaugurated at Port-of-Spain, Trinidad on 16 April 2005 but has yet to be accepted as the final

court of appeal for St Vincent and the Grenadines. Strength of police force (2009), 750.

The population in penal institutions in 2007 was 376 (317 per 100,000 of national population).

### Education

In 2007 there were 3,894 children in pre-primary schools with 340 teaching staff, 15,928 pupils in primary schools with 933 teaching staff and (2005) 9,780 pupils in secondary schools. There is a community college. Adult literacy in 2004 was 88.1%.

In 2005 public expenditure on education came to 8.6% of GNI and 16.1% of total government spending.

## KEY HISTORICAL EVENTS

Polynesians settled in the Samoan group of islands in the southern Pacific from about 1000 BC. Although probably sighted by the Dutch in 1722, the first European visitor was French in 1768. Treaties were signed between the Chiefs and European nations in 1838–39. Continuing strife among the chiefs was compounded by British, German and US rivalry for influence. In the Treaty of Berlin 1889 the three powers agreed to Western Samoa's independence and neutrality. When unrest continued, the treaty was annulled and Western Samoa became a German protectorate until in 1914 it was occupied by a New Zealand expeditionary force. The island was administered by New Zealand from 1920 to 1961. On 1 Jan. 1962 Western Samoa gained independence. In July 1997 the country renamed itself the Independent State of Samoa.

## TERRITORY AND POPULATION

Samoa lies between 13° and 15° S. lat. and 171° and 173° W. long. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 2,785 sq. km (1,075 sq. miles), of which 1,694 sq. km (654 sq. miles) are in Savai'i and 1,091 sq. km (421 sq. miles) in Upolu (including Manono and Apolima). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

The population was 187,820 at the 2011 census; density, 67 per sq. km. The population at the 2011 census was 143,418 in Upolu (including Manono and Apolima) and 44,402 in Savai'i. The capital and chief port is Apia in Upolu (population 36,735 in 2011). In 2011, 20.1% of the population lived in urban areas.

The UN gives a projected population for 2015 of 188,000.

The official languages are Samoan and English.

## SOCIAL STATISTICS

2006: births, 4,935; deaths, 728. Rates, 2006 (per 1,000 population): births, 27.3; deaths, 4.0. Expectation of life in 2007 was 68.4 years for males and 74.7 for females. Annual population growth rate, 2001–06, was 0.5%. Infant mortality, 2010, 17 per 1,000 live births; fertility rate, 2006, 4.2 births per woman.

## CLIMATE

A tropical marine climate, with cooler conditions from May to Nov. and a rainy season from Dec. to April. The rainfall is unevenly distributed, with south and east coasts having the greater quantities. Average annual rainfall is about 100" (2,500 mm) in the drier areas. ## CONSTITUTION AND GOVERNMENT

HH Malietoa Tanumafili II, who was Head of State for life, died on 11 May 2007. The Head of State is henceforth elected by the Legislative Assembly and holds office for five-year terms.

The executive power is vested in the *Head of State*, who swears in the *Prime Minister* (who is elected by the Legislative Assembly) and, on the Prime Minister's advice, the Ministers to form the Cabinet. The Constitution also provides for a *Council of Deputies* of three members, of whom the chairman is the Deputy Head of State.

The *Legislative Assembly* contains 49 members serving five-year terms. 47 are elected exclusively by *matai* (customary family heads) and the other two by non-Samoans on separate electoral rolls.

## National Anthem

'Samoa, tula'i ma sisi ia laulu'a ('Samoa, Arise and Raise your Banner'); words and tune by S. I. Kuresa.

## RECENT ELECTIONS

In elections on 4 March 2011 the Human Rights Protection Party (HRPP) won 36 seats, against 13 for the Tautua Samoa Party. Turnout was 87.1%.

Tuiatua Tupua Tamasese Efi was elected head of state unanimously by the Legislative Assembly on 16 June 2007. He was re-elected unopposed for a second term in July 2012.

## CURRENT GOVERNMENT

## CURRENT LEADERS

### Tuila'epa Sailele Malielegaoi

#### Position

Prime Minister

#### Introduction

Tuila'epa Sailele Malielegaoi became prime minister in Nov. 1998 and won further terms in March 2001, March 2006 and March 2011. He is leader of the Human Rights Protection Party (HRPP), the traditional ruling party of Samoa since 1982.

#### Early Life

Tuila'epa Sailele Malielegaoi was born on 14 April 1945 in Lepa, Samoa. He was educated in Samoa and at New Zealand's Auckland University, graduating with a masters degree (the first Samoan to do so) in commerce in 1969.

In 1978 he moved to Brussels to work for the European Economic Community. He entered Samoa's parliament two years later while working as a partner in the accounting firm Coopers and Lybrand. He was elected to the premiership after former prime minister Tofilau Eti Alesana retired in 1998.

#### Career in Office

Malielegaoi has aimed to diversify an economy dependent on fishing and agriculture and susceptible to natural disasters, focusing particularly on the tourism industry. In Aug. 2004 his government introduced internet access to assist economic development.

Malielegaoi has also been keen to promote education in Samoa. There is a scholarship scheme offering study opportunities in New Zealand, Australia and the Fiji Islands, and in Jan. 2003 a new inter-denominational Christian secondary school was opened. The police and health sectors have also received increased funding. In Jan. 2004 parliament voted to abolish the death penalty and in the same year Australia provided \$A7m. to fund training of Samoan security forces.

In foreign relations, Malielegaoi has pursued close relations with China. China agreed to help build an aquatic centre in Samoa for the 2007 South Pacific Games and has been aiding the construction of new buildings for the Samoan parliament and Justice Department. Japan has also invested in Samoa, providing funding for education and vocational training and for land redevelopment. In 2004 Samoa hosted the 35th Pacific Forum, which concentrated on regional economic and political co-operation and the Pacific-wide campaign to tackle HIV and AIDS.

Malielegaoi was re-elected for a third term when his Human Rights Protection Party won the March 2006 election. In May 2007 King Malietoa Tanumafili II died after 45 years on the throne, having been appointed king for life at independence in 1962. Under the constitution, his successor, Tuiatua Tupua Tamasese Efi, was appointed for a five-year term by the Legislative Assembly in June.

Opposition to controversial road traffic legislation by Malielegaoi (changing the driving side from right to left), which took effect in Sept. 2009, had earlier led to defections from the HRPP and to the formation in 2008 of two new political parties—the Tautua Samoa Party and the People's Party. In elections in March 2011 the HRRP won a landslide victory, heralding a fourth term for the premier.

At the end of 2011 Samoa crossed westward over the international date line for trading reasons (to align with Australia and New Zealand) and effectively erased a day from its calendar. In May 2012 Samoa acceded to the World Trade Organization as its 155th member, and in June the country celebrated 50 years of independence from New Zealand.

## ECONOMY

Agriculture accounted for 11.8% of GDP in 2006, industry 27.1% and services 61.2%.

#### Overview

Two-thirds of the population are employed in agriculture, which accounts for 90% of exports (principally coconuts and its by-products, plus coffee). Tourism contributes 25% of GDP and its importance is increasing, with aviation and infrastructural reforms and redevelopment following a tsunami in 2009 helping boost visitor numbers.

Deregulation has spurred growth in the financial sector, while the government deficit fell to 6% of GDP in 2011 as a result of improved fiscal discipline.

#### Currency

The unit of currency is the *tala* (WST) of 100 *sene*. Inflation was 14.6% in 2009 but there was deflation of 0.2% in 2010. There was then inflation of 2.9% in 2011. Foreign exchange reserves were US\$94m. in July 2005. Total money supply was 133m. tala in June 2005.

Livestock (2003 estimates): pigs, 201,000; cattle, 29,000; asses, 7,000.

#### Forestry

Forests covered 0.17m. ha. (60% of the land area) in 2010. Timber production was 131,000 cu. metres in 2007.

#### Fisheries

Fish landings in 2007 totalled 4,606 tonnes.

## INDUSTRY

Some industrial activity is being developed associated with agricultural products and forestry.

#### Labour

In 2001 the total labour force numbered 52,945 (36,739 males).

## INTERNATIONAL TRADE

### Imports and Exports

In 2005 imports were valued at 647m. tala and exports at 236m. tala. Main imports are machinery and transport equipment, foodstuffs and basic manufactures. Principal exports are coconuts, palm oil, taro and taamu, coffee and beer. New Zealand is the principal import source, accounting for 39.2% of imports in 2004. Australia was the largest export market in 2004, accounting for 71.5% of exports. Australia is the second biggest supplier of imports and the USA the second biggest export market.

## COMMUNICATIONS

### Roads

In 2002 the road network covered 790 km, of which 235 km were main roads. In 2005 there were 5,920 passenger cars plus 4,600 lorries and vans in use.

### Civil Aviation

There is an international airport at Apia (Faleolo), which handled 321,973 passengers and 1,175 tonnes of freight in 2009. The national carrier is Virgin Samoa, known until 2011 as Polynesian Blue. In 2007 it operated domestic services and international flights to Auckland, Brisbane and Sydney.

### Shipping

In Jan. 2009 there were four ships of 300 GT or over registered, totalling 9,000 GT.

### Telecommunications

There are three radio communication stations at Apia. Radio telephone service connects Samoa with American Samoa, the Fiji Islands, New Zealand, Australia, Canada, USA and UK. In 2008 there were 28,800 main (fixed) telephone lines; mobile phone subscribers numbered 124,000 in 2008 (69.3 per 100 persons). There were 9,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The population in penal institutions in Sept. 2007 was 186 (99 per 100,000 of national population). The death penalty, not used in more than 50 years, was abolished in 2004.

### Education

There were 30,000 pupils at primary schools in 2008–09 with 1,000 teaching staff and 25,000 pupils at secondary schools with 1,000 teaching staff. The University of the South Pacific has a School of Agriculture in Samoa, at Apia. A National University

was established in 1984. In 2006 it had 2,298 students and 151 academic staff. There is also a Polytechnic Institute that provides mainly vocational and training courses.

The adult literacy in 2009 was estimated at 98.8%.

In 2008 public expenditure on education came to 5.7% of GDP and 13.4% of total government spending.

# SAN MARINO

Repubblica di San Marino  
(Republic of San Marino)

*Capital:* San Marino

*Population, 2012:* 32,000

*GNI per capita, 2010:* US\$41,256

*Internet domain extension:* .sm

## KEY HISTORICAL EVENTS

San Marino is a small republic situated on the Adriatic side of central Italy. According to tradition, St Marinus and a group of Christians settled there to escape persecution. By the 12th century San Marino had developed into a commune ruled by its own statutes and consul. Unsuccessful attempts were made to annex the republic to the papal states in the 18th century and when Napoleon invaded Italy in 1797 he respected the rights of the republic and even offered to extend its territories. In 1815 the Congress of Vienna recognized the independence of the republic. On 22 March 1862 San Marino concluded a treaty of friendship and co-operation, including a *de facto* customs union, with Italy, thus preserving its independence although it is completely surrounded by Italian territory.

## TERRITORY AND POPULATION

San Marino is a land-locked state in central Italy, 20 km from the Adriatic. Area is 61.19 sq. km (23.6 sq. miles) and the population (June 2012), 32,368; population density, 529.0 per sq. km. At July 2010, 12,722 citizens lived abroad.

In 2010, 94.1% of the population were urban. The capital, San Marino, has 4,236 inhabitants (June 2012); the largest town is Serravalle (10,540 in June 2012), an industrial centre in the north. The official language is Italian.

## SOCIAL STATISTICS

Births registered in 2009, 306; deaths, 233; marriages, 238; divorces, 63. Birth rate, 2009 (per 1,000 population), 9.3; death rate, 6.9. Annual population growth rate, 2000–05, 2.7%; fertility

rate, 2008, 1.5 births per woman; infant mortality rate, 2010, two per 1,000 live births (one of the lowest rates in the world). The World Health Organization's *World Health Statistics 2009* put citizens of San Marino in equal second place in a 'healthy life expectancy' list (level with Switzerland and only behind Japan), with an expected 75 years of healthy life for babies born in 2007.

## CLIMATE

Temperate climate with cold, dry winters and warm summers.

## CONSTITUTION AND GOVERNMENT

The legislative power is vested in the *Great and General Council* of 60 members elected every five years by popular vote, two of whom are appointed every six months to act as *Captains Regent*, who are the heads of state.

Executive power is exercised by the ten-member *Congress of State*, presided over by the Captains Regent. The *Council of Twelve*, also presided over by the Captains Regent, is appointed by the Great and General Council to perform administrative functions.

## National Anthem

No words, tune monastic, transcribed by F. Consolo.

## RECENT ELECTIONS

In parliamentary elections on 11 Nov. 2012 the San Marino Common Good coalition won 35 of 60 seats with 50.7% of the vote (Sammarinese Christian Democratic Party–We Sammarinese 29.5% and 21 seats, Party of Socialists and Democrats 14.3% and 10, Popular Alliance 6.7% and 4); the Agreement for the Country coalition won 12 seats with 22.3% (Socialist Party 12.1% and 7, Union for the Republic 8.3% and 5); Active Citizenry won 9 seats with 16.1% (United Left 9.1% and 5, Civic10 6.7% and 4); Civic Movement R.E.T.E. won 4 seats with 6.3%. Turnout was 63.9%.

## CURRENT GOVERNMENT

*Captains Regent:* Antonella Mularoni (since 1 April 2013); Denis Amici (since 1 April 2013).

In March 2013 the Congress of State comprised:

*Minister of Foreign and Political Affairs, and Tourism:* Pasquale Valentini. *Internal Affairs, Public Administration and Justice:* Gian Carlo Venturini. *Finance, Budget and Post:* Claudio Felici. *Education, Culture and the University:* Giuseppe Maria Morganti. *Health, Social Security, Family, Welfare and Economic Planning:* Francesco Mussoni. *Territory, Environment, Agriculture, Telecommunications, Youth, Sport and Civil Defence:* Matteo Fiorini. *Labour, Co-operation and Information:* Iro Belluzzi. *Industry, Crafts, Trade, Transport and Technological Research:* Marco Arzilli.

*Parliament Website (Italian only):*

<http://www.consigliograndeegenerale.sm>

## CURRENT LEADERS

**Antonella Mularoni**

*Position*

Captain Regent

*Introduction*

Antonella Mularoni was sworn in for her first term as Captain Regent on 1 April 2013.

*Early Life*

Antonella Mularoni was born in San Marino on 27 Sept. 1961 and graduated in law from Bologna University. Between 1991 and

2001 she worked as a lawyer in San Marino and from 2001–07 she served as San Marino's judge at the European Court of Human Rights in Strasbourg, France.

#### **Career in Office**

A founder member of the centrist San Marino Popular Alliance of Democrats (linked to the Northern League in Italy), Mularoni was first elected to the Great and General Council (GGC) in 1993. Between then and 2001 she served on several committees and was secretary for finance, budget and economic planning.

Re-elected to the GGC in 2008 as a representative of the centrist Sammarinese Christian Democratic Party, she was appointed secretary of state for foreign and political affairs. In a speech to the United Nations in 2010 she called for the Security Council to be reformed along more democratic, transparent and efficient lines.

#### **Denis Amici**

##### *Position*

Captain Regent

##### *Introduction*

Denis Amici was sworn in for his first term as Captain Regent on 1 April 2013.

##### *Early life*

Denis Amici was born on 10 June 1972 in San Marino. A graduate in accountancy and commerce, he took over management of his father's construction company in 1999.

#### **Career in Office**

Amici was elected to the Great and General Council (GGC) in 2008, representing Arengo and Freedom (AL), a new party with links to the People of Freedom, a centre-right Italian party. AL formed part of the right-leaning Pact for San Marino, a coalition that won 54.2% of the national vote that year.

Amici served on the permanent committees for constitutional affairs and institutional relations and on the Council of 12 (Consiglio dei XII) that deals with judicial appeals. Following a political crisis in 2011 AL was disbanded and Amici successfully contested the 2012 general election as an independent candidate within the list of the centre-right Sammarinese Christian Democratic Party (PDCS). He again served on the Council of 12 and represented San Marino at the Inter-Parliamentary Union. In Feb. 2013 he joined the PDCS ahead of his inauguration as Captain Regent.

#### **DEFENCE**

Military service is not obligatory, but all citizens between the ages of 16 and 55 can be called upon to defend the State. They may also serve as volunteers in the Military Corps. There is a military Gendarmerie.

#### **ECONOMY**

##### **Overview**

The economy is integrated with that of Italy via a monetary and customs union, close trade links and labour mobility. The economy relies principally on manufacturing and financial services, while tourism draws about 2m. visitors a year.

The global financial crisis and pressure to improve banking transparency led to an economic contraction of nearly 13% in 2009. An Italian tax amnesty in 2009–10 resulted in an outflow of bank deposits. Real GDP declined by an estimated 1% in 2010. Manufacturing and commercial activity improved moderately in early 2011 but the economy remains weak. Consumption has declined and unemployment is rising.

In 2010 San Marino signed Tax Information Exchange Agreements with most major countries to promote international co-operation. Restructuring the financial sector and strengthening

economic and financial relations with Italy are key for future growth.

#### **Currency**

Since 1 Jan. 2002 San Marino has been using the euro (EUR). Italy has agreed that San Marino may mint a small part of the total Italian euro coin contingent with their own motifs. Inflation was 2.6% in 2010 and 2.0% in 2011. Total money supply in June 2005 was €906m.

#### **Budget**

Revenues totalled €547.0m. in 2006 and expenditures €457.3m. VAT accounted for 23.6% of revenue in 2005, social contributions 21.3% and income tax 20.2%; wages and salaries accounted for 35.4% of expenditure in 2005 and social contributions 30.5%.

#### **Performance**

The economy contracted by 12.8% in 2009, by 5.2% in 2010 and by 2.6% in 2011. Total GDP was US\$1.9bn. in 2008.

#### **Banking and Finance**

The Banca Centrale della Repubblica di San Marino (*President*, Renato Clarizia) was established in 2005 as an amalgamation of the Istituto di Credito Sammarinese and the Ispettorato per il Credito e le Valute (the Inspectorate for Credit and Currencies). Many of its functions have since been taken over by the European Central Bank and it has taken on a more supervisory role. Commercial banks include: Banca di San Marino, Credito Industriale Sammarinese, Cassa di Risparmio della Repubblica di San Marino and the Banca Agricola Commerciale della Repubblica di San Marino.

#### **ENERGY AND NATURAL RESOURCES**

##### **Electricity**

Electricity is supplied by Italy.

##### **Agriculture**

There were 1,000 ha. of arable land in 2006. Wheat, barley, maize and vines are grown.

#### **INDUSTRY**

##### **Labour**

Out of 20,530 people in employment in 2006, 6,247 worked in manufacturing and 2,901 in wholesale and retail trade. In 2006 there were 473 registered unemployed persons.

#### **INTERNATIONAL TRADE**

##### **Imports and Exports**

Import commodities are a wide range of consumer manufactures and foodstuffs. Export commodities are building stone, lime, wine, baked goods, textiles, varnishes and ceramics. San Marino maintains a customs union with the European Union.

#### **COMMUNICATIONS**

##### **Roads**

A bus service connects San Marino with Rimini. There are 252 km of public roads and 40 km of private roads, and (2006) 32,263 passenger cars and 5,907 commercial vehicles.

##### **Civil Aviation**

The nearest airport is Rimini, 10 km to the east in Italy, which had scheduled flights in 2003 to Berlin, Düsseldorf, Frankfurt, Hamburg, Helsinki, Munich, Naples and Rome.

##### **Telecommunications**

San Marino had 21,300 main telephone lines in 2008 and 24,000 mobile phone subscribers. Internet users numbered 17,000 in 2008.

## SOCIAL INSTITUTIONS

### Justice

Judges are appointed permanently by the Great and General Council; they may not be San Marino citizens. Petty civil cases are dealt with by a justice of the peace; legal commissioners deal with more serious civil cases, and all criminal cases and appeals lie to them from the justice of the peace. Appeals against the legal commissioners lie to two appeals judges as a court of third instance.

### Education

Education is compulsory up to 16 years of age. In 2005 there were 15 nursery schools with 1,054 pupils and 141 teachers, 14 elementary schools with 1,497 pupils and 245 teachers, three junior high schools with 805 pupils and 144 teachers, and one high school with 1,289 pupils and 77 teachers. The University of San Marino began operating in 1988.

### Health

In 2003 there were 139 hospital beds and 135 doctors. A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked San Marino in third place.

## RELIGION

The great majority of the population are Roman Catholic.

## CULTURE

### World Heritage Sites

There is one UNESCO World Heritage site in San Marino: San Marino Historic Centre and Mount Titano (inscribed on the list in 2008).

### Press

San Marino had three daily newspapers in 2006 with a combined daily circulation of 2,000.

### Tourism

In 2007, 2.16m. tourists visited San Marino (1.47m. Italians and 696,000 other foreigners).

## KEY HISTORICAL EVENTS

The islands of São Tomé and Príncipe off the west coast of Africa were colonized by Portugal in the fifteenth century. There may have been a few African inhabitants earlier but most of the population arrived during the centuries when the islands served as a slave-trading depot for South America. In the 19th century the islands became the first parts of Africa to grow cocoa. In 1876 Portugal officially abolished slavery but in practice it continued with many Angolans, Mozambicans and Cape Verdians brought in to work on the cocoa plantations. Because the slave-descended population was cut off from African culture, São Tomé had a higher proportion than other Portuguese colonies of *assimilados* (Africans acquiring full Portuguese culture and some rights). São Tomé saw serious riots against Portuguese rule in 1953. From 1960 a Movement for the Liberation of São Tomé e Príncipe operated from neighbouring African territories. In 1970 Portugal formed a 16-member legislative council and a provincial consultative council. Following the Portuguese revolution of 1974 a transitional government was formed. Independence came on 12 July 1975. Independent São Tomé e Príncipe officially proclaimed Marxist-Leninist policies but maintained a non-aligned foreign policy and has received aid from Portugal.

The government was overthrown by a coup on 16 July 2003 while President Fradique de Menezes and his foreign minister were abroad. The coup leader, Major Fernando Pereira, installed a junta but accepted a general amnesty from parliament on 24 July after agreeing to allow the ousted president to form a government of national unity.

## TERRITORY AND POPULATION

The republic, which lies about 200 km off the west coast of Gabon, in the Gulf of Guinea, comprises the main islands of São Tomé (845 sq. km) and Príncipe and several smaller islets including Pedras Tinhosas and Rolas. It has a total area of 1,001 sq. km (387 sq. miles). Population (census, 2012) 187,356; density, 187 per sq. km. In 2011, 63.0% of the population were urban.

The UN gives a projected population for 2015 of 182,000.

Areas and populations of the two provinces:

| Province | Sq. km | Census 2012 | Chief town  | Census 2001 |
|----------|--------|-------------|-------------|-------------|
| São Tomé | 859    | 179,814     | São Tomé    | 51,886      |
| Príncipe | 142    | 7,542       | São António | 1,040       |

The official language is Portuguese. Lungwa São Tomé, a Portuguese Creole, and Fang, a Bantu language, are the spoken languages.

## SOCIAL STATISTICS

2006: births, 5,072; deaths, 1,111. Rates, 2006 (per 1,000 population): birth, 33.4; death, 7.3; infant mortality (2010), 53 per 1,000 live births. Expectation of life, 2006, 63.5 years for males and 68.5 years for females. Annual population growth rate, 2000–05, 1.9%; fertility rate, 2008, 3.8 births per woman.

## CLIMATE

The tropical climate is modified by altitude and the effect of the cool Benguela current. The wet season is generally from Oct. to May, but rainfall varies considerably, from 40" (1,000 mm) in the hot and humid northeast to 150–200" (3,800–5,000 mm) on the plateau. São Tomé, Jan. 79°F (26.1°C), July 75°F (23.9°C). Annual rainfall 38" (951 mm).

## CONSTITUTION AND GOVERNMENT

The 1990 constitution was approved by 72% of votes at a referendum of March 1990 and became effective in Sept. 1990. It abolished the monopoly of the Movement for the Liberation of São Tomé e Príncipe (MLSTP). The *President* must be over 34 years old, and is elected by universal suffrage for one or two (maximum) five-year terms. He or she is also head of government and appoints a Council of Ministers. The 55-member *National Assembly* is elected for four years.

Since April 1995 **Príncipe** has enjoyed internal self-government, with a five-member regional government and an elected assembly.

## National Anthem

'Independência total, glorioso canto do povo' ('Total independence, glorious song of the people'); words by A. N. do Espírito Santo, tune by M. de Sousa e Almeida.

## RECENT ELECTIONS

At the presidential election on 17 July 2011 former president Manuel Pinto da Costa (ind.) won 35.8% of the votes cast against former prime ministers Evaristo Carvalho (Independent Democratic Action/ADI) with 21.8%, Maria das Neves (ind.) with 14.0% and Delfim Neves (Democratic Convergence Party-Reflection Group/Force for Change Democratic Movement-Liberal Party) with 13.9%. Six other candidates received less than 5% of votes cast. Turnout was 68.4%. In the run-off held on 7 Aug. 2011, Manuel Pinto da Costa won 52.9% of the vote and Evaristo Carvalho 47.1%. Turnout was 74.0%.

At the National Assembly elections on 1 Aug. 2010 ADI won 26 seats, the Liberation Movement of São Tomé e Príncipe-Social

Democratic Party (MLSTP-PSD) 21, the Democratic Convergence Party-Reflection Group 7 and the Force for Change Democratic Movement-Liberal Party 1. Turnout was 89.0%.

## CURRENT LEADERS

### Manuel Pinto da Costa

#### Position

President

#### Introduction

Manuel Pinto da Costa, a Marxist, came out of retirement to win the presidency in Aug. 2011. He promised to tackle corruption and poverty but opponents warned of a return to authoritarian rule.

#### Early Life

Manuel Pinto da Costa was born in São Tomé on 5 Aug. 1937. The son of a plantation official, he was educated in São Tomé, Angola and Portugal. He graduated from the University of Lisbon and was a founder of the Committee for the Liberation of São Tomé e Príncipe in 1960. Da Costa spent time in France and Cuba in the early part of the decade before completing a doctorate in economics at Humboldt University in East Berlin.

Elected secretary-general of the new Movement for the Liberation of São Tomé e Príncipe (MLSTP) in 1972, da Costa developed links with other independence groups in Angola, Guinea-Bissau and Mozambique. When Portugal's fascist government was overthrown in April 1974, he spearheaded negotiations that led to independence in July 1975.

As leader of the MLSTP, the sole legal party, da Costa was blamed for the economic hardships that accompanied the nationalization of plantations and the departure of skilled workers to Portugal. After an attempted coup by foreign-based mercenaries in 1978 and amid rising political tensions the following year, da Costa called upon Angolan troops to maintain the peace in a deeply unpopular move.

During the early 1980s he became increasingly authoritarian, but a new constitution ended one-party rule in 1990 and he announced that he would not contest the 1991 multi-party elections. Miguel Trovoada became president, elected unopposed as an independent candidate, and da Costa moved to Angola.

He nonetheless returned to contest the 1996 presidential election, narrowly losing to Trovoada. Re-elected leader of the MLSTP in 1998, he also contested the 2001 presidential election, this time losing to Fradique de Menezes. He remained party leader until retiring in Feb. 2004. However, he returned again to

run as an independent candidate for the presidency in July 2011, promising to overcome instability, poverty and corruption. He received sufficient support to force a run-off against the parliamentary speaker, Evaristo Carvalho, and emerged victorious with 52.9% of the vote. He was sworn in on 3 Sept. 2011.

#### Career in Office

Pinto da Costa's priority was to revitalize the struggling economy by developing tourism, the nascent oil industry and coffee exports, while working in conjunction with Patrice Trovoada, whose Independent Democratic Action party won legislative elections in 2010. In Nov. 2012, however, Trovoada lost a no-confidence vote in the National Assembly and da Costa dismissed his government the following month, appointing Gabriel Arcanjo da Costa as premier.

## ECONOMY

In 2005 agriculture accounted for 17% of GDP, industry 21% and services 63%.

#### Overview

São Tomé e Príncipe is one of the poorest countries in the world. It is heavily reliant on cocoa exports and increasingly dependent on foreign aid. It receives debt relief under the IMF Heavily Indebted Poor Countries Initiative (HIPC) and Multilateral Debt Relief initiatives. However, it remains extremely vulnerable to external shocks because of the narrow export base and reliance on external financing.

Growth averaged around 5% between 2001 and 2007 but slowed in 2009 with the global financial crisis. There were sharp declines in FDI, remittances, tourist arrivals and donor assistance. However, the potential exploitation of large oil reserves in territorial waters could transform the medium- to long-term outlook.

#### Currency

The unit of currency is the *dobra* (STD) of 100 *centimos*. Inflation was 13.3% in 2010 and 14.3% in 2011. In Dec. 2006 foreign exchange reserves were US\$34m. Total money supply in Dec. 2004 was 172,817m. *dobras* (up from 23,683m. *dobras* in Dec. 1996).

#### Budget

In 2008 revenues totalled 1,216bn. *dobras* and expenditures 841bn. *dobras*.

#### Performance

Real GDP growth was 4.5% in 2010 and 4.9% in 2011. In 2011 total GDP was US\$248m.

#### Banking and Finance

In 1991 the Banco Central de São Tomé e Príncipe (*Governor*, Maria do Carmo Trovoada) replaced the Banco Nacional as the central bank and bank of issue. A private commercial bank, the Banco Internacional de São Tomé e Príncipe, began operations in 1993. Foreign debt amounted to US\$170m. in 2010, representing 85.3% of GNI.

## ENERGY AND NATURAL RESOURCES

#### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.6 tonnes per capita.

#### Electricity

Installed capacity, 2007 estimate, 14,000 kW. Production was about 43m. kWh in 2007, with consumption per capita an estimated 272 kWh.

#### Oil and Gas

There are large oil reserves around São Tomé e Príncipe that could greatly add to the country's wealth; the Joint Development

Zone was set up with Nigeria to administer the exploitation because the reserves are located in shared waters. The first license to begin exploration was granted in April 2004.

### Agriculture

After independence all landholdings over 200 ha. were nationalized into 15 state farms. These were partially privatized in 1985 by granting management contracts to foreign companies, and distributing some state land as small private plots. There were an estimated 9,000 ha. of arable land in 2007 and 47,000 ha. of permanent crops. Production (2003 estimates in 1,000 tonnes): bananas, 27; coconuts, 27; cassava, 6; palm kernels, 4; cocoa beans, 3; maize, 2; palm oil, 2. There were an estimated 5,000 goats, 4,000 cattle, 3,000 sheep and 2,000 pigs in 2003.

### Forestry

In 2010 forests covered 27,000 ha., or 28% of the land area. In 2007, 9,000 cu. metres of timber were cut.

### Fisheries

There are rich tuna shoals. The total catch in 2007 amounted to an estimated 4,250 tonnes.

## INDUSTRY

Manufacturing contributed 6% of GDP in 2005. There are a few small factories in agricultural processing (including beer and palm oil production), timber processing, bricks, ceramics, printing, textiles and soap-making.

### Labour

In 2001 the economically active population was 52,150. The unemployment rate was 15.7% in 2001.

## INTERNATIONAL TRADE

### Imports and Exports

Trade figures for 2006: imports, US\$70.9m.; exports, US\$3.8m. Cocoa accounts for two-thirds of all exports.

In 2006 the main import suppliers were Portugal (63.6%), Angola (18.3%) and Belgium (4.6%); main export markets were Portugal (33.3%), the Netherlands (27.1%) and Belgium (14.3%).

## COMMUNICATIONS

### Roads

There were 500 km of roads in 2009, 375 km of which were paved. Approximately 4,500 passenger cars, 2,183 motorcycles and over 1,800 trucks and vans were in use in 2008.

### Civil Aviation

São Tomé airport had flights in 2010 to Cape Verde, Libreville, Lisbon, Luanda and Port-Gentil. In 2007 São Tomé handled 50,625 passengers. There is a light aircraft service to Príncipe.

### Shipping

São Tomé is the main port, but it lacks a deep water harbour. Neves handles oil imports and is the main fishing port. In Jan. 2009 there were 14 ships of 300 GT or over registered, totalling 19,000 GT.

## Telecommunications

In 2008 there were 7,700 main (fixed) telephone lines; mobile phone subscribers numbered 49,000 in 2008 (30.6 per 100 persons). In 2010, 18.8% of the population were internet users.

## SOCIAL INSTITUTIONS

### Justice

Members of the Supreme Court are appointed by the National Assembly. There is no death penalty. The population in penal institutions in July 2006 was 160 (83 per 100,000 of national population).

### Education

Adult literacy was 88% in 2008. Education is free and compulsory. In 2007–08 there were 90 primary schools and 32,616 pupils, and ten secondary schools and 8,380 pupils; 96% of primary age children were attending school in 2006. There are two institutions of higher education.

### Health

In 2004 there were 81 physicians, 11 dentists, and 308 nurses and midwives.

## RELIGION

In 2001, 81% of the population were Roman Catholic. There is a small Protestant church and a Seventh Day Adventist school.

## CULTURE

### Press

In 2006 there was one daily newspaper. Two government-owned and six independent papers were also published irregularly.

### Tourism

In 2005 there were 11,000 non-resident tourists.

## KEY HISTORICAL EVENTS

Nomadic tribes have existed across the Arabian peninsula for thousands of years. The pre-Islamic period saw the development of civilizations based on trade in frankincense and spices, notably, from about the 12th century BC, the Minaeans in the southwest of what is now Saudi Arabia and Yemen. The Sabaeans and Himyarite kingdoms flourished from around 650 BC and 115 BC respectively, their loose federations of city states lasting until the 6th century AD. Although increased trade brought these civilizations into contact with the Roman and Persian empires—the two great regional powers before the advent of Islam—they remained, for the most part, politically independent. The Nabataeans, an Aramaic people whose capital was at Petra, modern-day Jordan, spread into northern Arabia over a period covering the 1st century BC and the 1st AD before annexation of their territory by Rome. Persian influence was prevalent along Arabia's eastern coast, centred on Dilmun which covered parts of the mainland and the island of Bahrain.

By the 6th century AD the Hejaz region in northwestern Arabia was becoming increasingly powerful and an important link in the overland trade route from Egypt and the Byzantine Empire to the wider East. One of the principal cities of Hejaz was Makkah (Mecca), a staging post on the camel train routes and site of pilgrimage to numerous pre-Islamic religious shrines. The leading tribe in the city was the Quraysh, into which the Prophet Muhammad was born in 570. Muhammad and his followers (known as Muslims) took control of Makkah in 630. He had earlier declared himself a prophetic reformer, destroying the city's pagan idols and declaring it a centre of Muslim pilgrimage dedicated to the worship of Allah (God) alone. Muhammad died in AD 632, by then commanding the loyalty of almost all of Arabia.

The leaders who succeeded Muhammad, known as caliphs, spread the Islamic faith throughout and beyond the Arab world. However, Arabia itself began to fragment and by the latter part of the 7th century it had become a province of the Islamic realm, although the holy cities of Makkah and Madinah retained their spiritual focus. Meanwhile, increasingly remote from the main centres of Islamic authority under the Umayyad and Abbasid caliphate dynasties, Arabia became an arena for sectarian divisions—Shia, Sunni and Kharijite—which developed within the Islamic faith.

After 1269 most of the Hejaz region came under the suzerainty of the Egyptian Mameluks. The Ottoman Turks conquered Egypt in 1517 and, to counter the influence of the Christian Portuguese presence in the Gulf region, extended their nominal control over the whole Arabian Peninsula. Portuguese traders were followed by British, Dutch and French merchants during the 17th and 18th centuries, the British gradually securing political and commercial supremacy in the Gulf and southern Arabia through a system of protectorates and local treaties.

Saudi Arabia's origins as a political entity lay in the rise of the puritanical Wahhabi movement of the 18th century, which called for a return to the original principles of Islam and gained the allegiance of the powerful Al-Saud dynasty (founded in the 15th century) in the Nejd region of central Arabia. By 1811 the Al-Saud/Wahhabi armies controlled most of the peninsula and were seen as a threat to the Ottoman Turkish overlord. The Sultan called on his viceroy in Egypt, Mehmet Ali, to suppress the Wahhabis, who were defeated between 1811 and 1818. Nevertheless, the house of Al-Saud continued to hold sway over the interior of Arabia until 1891 when, after a long period of tribal warfare, the rival Al-Rashid family, with Ottoman support, seized control of the city of Riyadh.

The Al-Saud family was exiled to Kuwait but Abdulaziz Ibn Abdul Rahman (known to Europeans as Ibn Saud) restored Wahhabi fortunes, recapturing Riyadh in 1902 and reasserting Al-Saud control over Nejd by 1906. On the eve of the First World War Abdulaziz gained the al Hasa region east of Nejd on the Gulf from the Ottoman Turks. In 1920 he captured the Asir region and in 1921 added the Jebel Shammar territory (northwest of Nejd) of the Al-Rashid family. In 1925 Abdulaziz completed his conquest of Hejaz, overthrowing Hussein, Sharif of Makkah and a member of the Hashimi family. Abdulaziz became both Sultan of Nejd and King of the Hejaz. Britain recognized Abdulaziz as an independent ruler by the Treaty of Jeddah on 20 May 1927, and in 1932 Nejd and Hejaz were unified as the Kingdom of Saudi Arabia, ruled as an absolute monarchy under Islamic law.

Abdulaziz (died 9 Nov. 1953) concentrated on the political consolidation and modernization of the country. Oil was discovered in 1938 and its exploitation was developed with the support of the USA after the Second World War. Crown Prince Saud succeeded his father and ruled until Nov. 1964, when he was effectively deposed by his brother Faisal. During his reign Saudi relations with the pan-Arabist Nasser regime in Egypt deteriorated, most notably over the 1962 revolution in Yemen.

As king and prime minister, Faisal used oil production revenues to build up the country's economic base. In 1970 came the first of the five-year economic development programmes. Meanwhile, financial support was given to other Arab states in their conflict with Israel. Leading on from the Oct. 1973 Arab-Israeli war Arab producers, including Saudi Arabia, cut supplies to the USA and other Western countries, causing a fourfold increase in oil prices. However, Faisal subsequently adopted a more conciliatory stance than the more radical members of the Organization of Petroleum Exporting Countries (OPEC, founded

in 1960) and the close Saudi economic relationship with the USA was reinforced with a co-operation agreement in 1974. In March 1975, when Faisal was assassinated by a nephew, believed to be mentally unstable, his half-brother Khalid became king.

Khalid continued Faisal's policies promoting Islamic solidarity and Arab unity in the wake of hostilities with Israel. In practice his moderate stance was in marked contrast to the militancy of many other Arab states, particularly over oil pricing by OPEC and opposition to Egypt's 1978 peace treaty with Israel. Khalid was also involved in early efforts to stop the civil war in Lebanon and, in 1981, he inaugurated the Gulf Co-operation Council (GCC). Domestically, he maintained his family's absolute political control and the conservative Islamic character of the country. However, opposition to his regime was demonstrated in Nov. 1979 when Sunni Muslim fundamentalists occupied the Grand Mosque at Makkah. A two-week siege ended with over 200 deaths. The second and third five-year development plans (1975–79 and 1980–84), both launched by Khalid, created much of the country's current economic infrastructure. Owing to Khalid's poor health throughout his reign much of his executive responsibility was assumed by his younger half-brother, Crown Prince Fahd.

Fahd succeeded to the throne on 13 June 1982. Like his predecessors, he maintained absolute power but broadened the process of political consultation and decision-making by setting up the Consultative Council (*Majlis Al-Shura*) of royal appointees from 1993. In 1986 he assumed the title of 'Custodian of the Two Holy Mosques' but the Saudi role in protecting religious pilgrims incurred international criticism in 1987 when 400 Iranian worshippers were killed in clashes in Makkah with security forces and again in 1994 when 270 pilgrims died in a stampede. Internationally, Fahd adopted a moderate policy on regional problems and closely allied the kingdom with the USA. Fahd was a key participant in diplomatic efforts to end the Iran-Iraq war in 1988 and, in 1989, he participated in the Taif reconciliation accord ending the 14-year Lebanese civil war. His pro-Western stance and co-operation in the 1990–91 Gulf crisis were crucial to the deployment and successful military operations of the US-led multinational force raised against Iraq following its invasion of Kuwait.

However, anti-Western disaffection among Saudi nationals has become more overt in recent years. In 1996 a bomb exploded at a US military complex at Dhahran, killing 19 and wounding over 300. In 2000 a series of bomb blasts, blamed by Saudi officials on British nationals engaged in criminal activity, was widely believed abroad to be the work of Saudi dissidents. Up to 15 Saudi nationals were involved in the attacks on New York and Washington, D.C. on 11 Sept. 2001, co-ordinated by Saudi dissident Osama bin Laden. In Nov. 2002 the Saudi government refused permission for the US to use its military facilities to attack Iraq, even if sanctioned by the United Nations. In May 2003 suicide bombers killed ten US citizens and many others at housing compounds for Western expatriate workers in Riyadh. In April 2003 the US agreed to pull out most of its troops from the kingdom, while stressing that the two countries would remain allies.

As King Fahd's health declined, his half brother, Crown Prince Abdullah Ibn Abdulaziz Al-Saud, assumed responsibility for government in 1996. When King Fahd died on 1 Aug. 2005, Crown Prince Abdullah was appointed his successor.

### TERRITORY AND POPULATION

Saudi Arabia, which occupies nearly 80% of the Arabian peninsula, is bounded in the west by the Red Sea, east by the Persian Gulf, Qatar and the United Arab Emirates, north by Jordan, Iraq and Kuwait and south by Yemen and Oman. For the border dispute with Yemen see YEMEN: Territory and Population. The total area is 2,149,690 sq. km (829,995 sq. miles). Riyadh is the political, and Makkah (Mecca) the religious, capital.

Population at the census of April 2010 (provisional), 27,136,977; density, 12.6 per sq. km. Approximately 32% of the population are foreigners. In 2011, 82.3% of the population lived in urban areas.

The UN gives a projected population for 2015 of 30.54m.

Principal cities with 2004 population estimates (in 1m.): Riyadh, 4.09; Jeddah, 2.80; Makkah, 1.29; Madinah, 0.92; Damman, 0.74; Taif, 0.52.

The Neutral Zone (5,700 sq. km, 3,560 sq. miles), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two countries in 1966, but the exploitation of the oil and other natural resources continues to be shared.

The official language is Arabic.

### SOCIAL STATISTICS

2008 estimates: births, 590,000; deaths, 92,000. Birth rate (2008 estimate) was 23.4 per 1,000 population; death rate, 3.6. 75% of the population is under the age of 30. Expectation of life at birth, 2007, was 70.8 years for males and 75.1 years for females. Annual population growth rate, 2000–08, 2.4%. Infant mortality, 2010, was 15 per 1,000 live births, down from 58 in the years 1980–85. Fertility rate, 2008, 3.1 births per woman.

### CLIMATE

A desert climate, with very little rain and none at all from June to Dec. The months May to Sept. are very hot and humid, but winter temperatures are quite pleasant. Riyadh, Jan. 58°F (14.4°C), July 108°F (42°C). Annual rainfall 4" (100 mm). Jeddah, Jan. 73°F (22.8°C), July 87°F (30.6°C). Annual rainfall 3" (81 mm).

### CONSTITUTION AND GOVERNMENT

The reigning King, **Abdullah Ibn Abdulaziz Al-Saud** (b. 1924), Custodian of the two Holy Mosques, succeeded in Aug. 2005, after King Fahd's death. *Crown Prince*: Prince Salman bin Abdulaziz Al-Saud (b. 1935). The Saudi royal family is around 8,000-strong.

Constitutional practice derives from Sharia law. There is no formal constitution, but three royal decrees of 1 March 1992 established a Basic Law which defines the systems of central and municipal government, and set up a 60-man Consultative Council (*Majlis Al-Shura*) of royal nominees in Aug. 1993. The *Chairman* is Salih bin Abdullah bin Humaid. In July 1997 the King decreed an increase of the Consultative Council to a chairman plus 90 members, selected from men of science and experience; in 2001 it was increased again to a chairman plus 120 members and in 2005 further to a chairman plus 150 members. The Council does not have legislative powers.

Saudi Arabia is an absolute monarchy; executive power is discharged through a *Council of Ministers*, consisting of the King, Deputy Prime Minister, Second Deputy Prime Minister and Cabinet Ministers.

The King has the post of *Prime Minister* and can veto any decision of the Council of Ministers within 30 days.

In Oct. 2003 the government announced that municipal elections would be held in 2004 for the first time (although they were subsequently postponed until 2005), followed by city elections and partial elections to the *Majlis Al-Shura* in the following years. In March 2011 the government announced that the second municipal elections, previously scheduled for 2009, would be held on 22 Sept. 2011 (later delayed to 29 Sept.). Women were not eligible to vote, but they will be at the next elections set for 2015.

### National Anthem

'Sarei lil majd walaya' ('Onward towards the glory and the heights'); words by Ibrahim Khafaji, tune by Abdul Rahman al Katib.

## CURRENT LEADERS

### King Abdullah bin Abdulaziz Al-Saud

#### *Position*

King

#### *Introduction*

King Abdullah administered Saudi Arabia on behalf of his half-brother, King Fahd bin Abdulaziz, between 1996 and Fahd's death on 1 Aug. 2005, following which he was named as successor. Abdullah has maintained the strict Islamic code of governance associated with the Wahhabi Saudis while attempting to rein in the excesses of the princely class. He has gained respect internationally for his efforts in the Middle East peace process but at times relations with the USA administration have been strained.

#### *Early Life*

Prince Abdullah bin Abdulaziz was born in Riyadh in 1924, the only son of Fahda bint Asi bin Shurayim Shammar, the eighth wife of Abdulaziz bin Abdul Rahman Al-Saud, then Sultan of Nejd, who founded the Kingdom of Saudi Arabia in 1932. Abdulaziz, known as bin Saud by Europeans, reared his massive

family in the Bedouin tradition, educating his sons at court and instilling them with Islamic and Arab virtues.

Abdullah's career began in 1952 when he was given the command of the Saudi National Guard by his half-brother, King Saud, the first son to succeed Abdulaziz. The National Guard comprised descendants of Abdulaziz's Bedouin warriors who took part in the expansion of Saudi power. On his accession in 1975, King Khalid bin Abdulaziz appointed Abdullah second deputy prime minister. In this post Abdullah became involved in foreign policy, visiting the USA in 1976 to meet President Gerald Ford. On the accession of King Fahd in 1982, Abdullah was designated crown prince and first deputy prime minister.

#### *Career in Office*

The succession in Saudi Arabia is decided by the Saudi princes, who number over 4,000 (some sources claim an estimated 8,000). A crown prince is traditionally selected by seniority and ability. Since the death of the kingdom's founder, Abdulaziz, in 1953, only his sons have been considered suitable for the succession. Abdullah, who has no full brothers, lacks a fraternal support base and relies on alliances forged with other factions within the family, most notably the sons of King Faisal, Prince Saud (foreign minister since 1975) and Prince Turki (head of Saudi intelligence).

Known as a devout Muslim, Abdullah has 14 sons and 20 daughters by six wives. His reputation for piety has earned him support from religious leaders. Having assumed the position of regent in 1996, he was soon considered the *de facto* ruler of Saudi Arabia on account of King Fahd's recurrent illnesses and absences from the country. It was likely that Abdullah consulted and, to some extent, ruled with Fahd's Sudairi brothers, Sultan and Salman, the second deputy prime minister and the governor of Riyadh respectively.

Abdullah's foreign policy has concentrated on improving relations within the Arab world and on encouraging the peace process in the Middle East (notably putting forward settlement proposals in 2002). He has nevertheless shown support for militant Islamic groups such as Hizbollah and condemned Israeli military action in Lebanon and against the Palestinians. In March 2011 he sanctioned the deployment of Saudi troops to Bahrain in support of its fellow monarchy in response to Shia opposition demands for political reforms in the island kingdom.

Abdullah has been less overtly pro-Western than King Fahd. The attacks on New York, USA, in Sept. 2001, although condemned, created serious tensions owing to the high proportion of Saudi nationals among the perpetrators. He had declined a visit to the USA on two occasions before the attacks, complaining that then President George W. Bush was 'uninformed' about the Middle East and the plight of the Palestinians. Nevertheless, he maintained that the USA would remain a firm ally, and Saudi Arabia has itself since become the target of several suspected al-Qaeda attacks.

In Dec. 2006 the UK government controversially suspended a fraud investigation into the 1980s al-Yamamah defence contract with Saudi Arabia, stating that diplomatic co-operation between the two countries was being put at risk (a decision subsequently confirmed as lawful by the British House of Lords in July 2008). In Nov. 2007 Pope Benedict XVI greeted Abdullah at the Vatican in the first such meeting between the head of the Roman Catholic Church and a Saudi monarch.

Internal liberalization has been slow under Abdullah. He has resisted Western calls for the abolition of Sharia law and the emancipation of women, stating that it is 'absurd to impose on an individual or a society rights that are alien to its beliefs or principles'. However, some key issues have been addressed. Female education, previously the preserve of the *ulema* (religious leaders), was placed under the jurisdiction of the ministry of education in 2002 and Abdullah has supported the increase of female employment. The country's first ever elections in 2005, although with a limited franchise and only for local councils, were

a partial response to pressure for political change. A law to reform the judicial system was enacted in Oct. 2007 and provided for new specialized courts and the introduction of a supreme court as a final court of appeal. Plans were also announced to curb the powers of the religious police, which had come under increasing criticism over deaths in custody.

In Feb. 2009 Abdullah made extensive changes in government affecting top positions in the courts, the armed forces, the central bank, the health, education and information ministries, the religious police and the Consultative Council. He also appointed the country's first woman minister, Nora Al-Fayez, as deputy minister responsible for girls' education. In Sept. 2011 he announced that women would be eligible to stand and vote in local elections from 2015, and in Jan. 2013 he granted women seats on the Consultative Council for the first time. In 2011 he responded to political tensions generated by popular discontent across much of the Arab world by announcing a new welfare spending programme for the kingdom.

Abdullah's age and state of health have generated speculation about the issue of succession and internecine royal politics. In late 2006 he announced that a committee of senior princes would be formed to select the future crown prince and reduce the likelihood of family conflicts. The new committee would in theory have the power to remove a king if he was judged to be permanently incapacitated and would lead the country in a caretaker capacity until a successor was chosen. In Oct. 2011 the deputy prime minister and minister of interior, Prince Nayef bin Abdulaziz Al-Saud, was named as heir to the throne. However, he died in June 2012 and was succeeded by defence minister Prince Salman bin Abdulaziz Al-Saud.

## DEFENCE

Defence expenditure (including expenditure on public order and safety) in 2008 totalled US\$38,223m. (US\$1,511 per capita). In 2007 defence spending represented 9.3% of GDP.

5,000 US troops were stationed in Saudi Arabia after the 1991 Gulf War and were joined by a further 20,000 during the 2003 conflict. However, virtually all US troops have now been withdrawn. In March 2011 the Gulf Co-operation Council's Peninsula Shield Force, which is based in Saudi Arabia and whose mission is to protect the security of member states from any external aggression, consisted of approximately 40,000 troops.

### Army

Strength (2007) was 75,000. There is a paramilitary Border Guard (10,500) and a National Guard (*see below*).

### Navy

The Royal Saudi Naval Forces fleet includes seven frigates and four corvettes. Naval Aviation forces operate 15 armed helicopters.

The main naval bases are at Riyadh (HQ Naval Forces), Jeddah (Western Fleet) and Jubail (Eastern Fleet). Naval personnel in 2007 totalled 15,500, including 3,000 marines.

### Air Force

Current combat units include F-15s, F-5Bs, F-5Fs, Tornado strike aircraft and Tornado interceptors. The Air Force operated 278 combat-capable aircraft and numbered 20,000 personnel in 2007.

### Air Defence Force

This separate Command was formerly part of the Army. In 2007 it operated surface-to-air missile batteries and had a strength of 4,000.

### National Guard

The total strength of the National Guard amounted to 100,000 (75,000 active, 25,000 tribal levies) in 2007. The National Guard's primary role is the protection of the Royal Family and vital points in the Kingdom. It is directly under royal command. The UK

provides small advisory teams to the National Guard in the fields of general training and communications.

### Industrial Security Force

This force was established in 2007 to protect state oil facilities in response to attacks in 2006 on Abqaiq oil processing plant. Initial strength, 9,000.

## INTERNATIONAL RELATIONS

In April 2001 Saudi Arabia and Iran signed a security pact to fight drug trafficking and terrorism, 13 years after the two countries had broken off relations.

## ECONOMY

Agriculture accounted for 2% of GDP in 2008, industry 70% and services 27%.

### Overview

The economy is dominated by the oil sector, accounting for 85% of total export revenue. It is the world's second largest oil producer and the largest exporter, with one-fifth of the world's proven oil reserves and over 60% of spare capacity in global oil supply. When Libyan oil output was disrupted in 2011 Saudi Arabia was able to increase production. The industrial sector is based on hydrocarbon resources. The country also has deposits of iron ore, phosphates, bauxite and copper.

In 1998 American and European oil companies were allowed to invest in the energy sector for the first time. Structural reforms were introduced in 1999 to attract foreign investment. The stock market was opened to foreign investors and tax and customs administrations were reformed. Improvements in the investment climate paved the way for full membership of the WTO in 2005. A tourism authority was also established.

In the 1980s the economy posted negative annual growth rates over five years. Nor was its 3.1% average annual growth rate in the 1990s particularly impressive relative to other developing countries, particularly in the Asia Pacific region. In 2001 and 2002 the Saudi economy barely grew at all. However, rising oil prices lifted the economy in 2003 and annual growth accelerated to 7.7%. Per capita GDP grew more robustly after the 2003 rise in oil prices, with the IMF putting the level at nearly US\$15,500 in 2007.

Inflation remains in single figures as a result of an open and flexible labour market and an open trade system. Over half of the 2004 fiscal surplus was used to reduce central government debt by 16% to 66% of GDP, while the rest was put into a fund to finance investment in priority areas over a five-year period. In 2008 high oil prices helped ensure record surpluses, some of which was used to repay debt that then stood at 13.5% of GDP.

The global financial crisis caused the stock market to decline by 46% in the last quarter of 2008, while a reduction in oil production contributed to a significant downturn in 2009. However, higher oil prices and recovery in global demand helped the economy to rebound in 2010 and continue to strengthen in 2011.

According to the World Bank, Saudi Arabia ranks 12th out of 183 economies for the ease of doing business. High unemployment, at 10.8% in 2011, is an ongoing concern and the government is focused on improving social services. Dependency on oil must also be addressed in the mid- to long-term.

### Currency

The unit of currency is the *rial* (SAR) of 100 *halalah*. Foreign exchange reserves totalled US\$27,637m. in Sept. 2009 and gold reserves were 4.60m. troy oz. Total money supply in June 2009 was SAR474,307m. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 0.2% | 0.6% | 0.4% | 0.6% | 2.3% | 4.1% | 9.9% | 5.1% | 5.4% | 5.0% |

In 2001 the six Gulf Arab states—Saudi Arabia, along with Bahrain, Kuwait, Oman, Qatar and the United Arab

Emirates—signed an agreement to establish a single currency by 2010. In June 2009 it was agreed to postpone the implementation of the new currency, the *khaleeji*, until 2013. It has since been put back further still. Both Oman and the United Arab Emirates have now withdrawn from the scheme, in 2007 and 2009 respectively.

### Budget

In 1986 the financial year became the calendar year. 2007 budget: revenue, SAR642.8bn.; expenditure, SAR466.2bn. Oil revenues accounted for 87.5% of revenue in 2007; current expenditures accounted for 74.5% of expenditure.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 0.1% | 7.7% | 5.3% | 5.6% | 3.2% | 2.0% | 4.2% | 0.1% | 5.1% | 7.1% |

Total GDP in 2011 was US\$567.8bn. Per capita GDP is now around half the level of 1980.

### Banking and Finance

The Saudi Arabian Monetary Agency (*Governor*, Fahed Al-Mubarak), established in 1953, functions as the central bank and the government's fiscal agent. In 2002 there were three national banks (the National Commercial Bank, the Al-Rajhi Banking and Investment Corporation and the Riyad Bank), five specialist banks, eight foreign banks and three government specialized credit institutions. The leading banks are National Commercial Bank (assets in 2008 of US\$59.1bn.), Samba Financial Group (US\$47.7bn. in 2008) and Al-Rajhi Bank (US\$44.0bn. in 2008). Sharia (the religious law of Islam) forbids the charging of interest; Islamic banking is based on sharing clients' profits and losses and imposing service charges. In 2005 total assets of commercial banks were US\$202.4bn.

A number of industry sectors are closed to foreign investors, including petroleum exploration, defence-related activities and financial services.

There is a stock exchange in Riyadh.

## ENERGY AND NATURAL RESOURCES

### Environment

Saudi Arabia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 16.6 tonnes per capita.

### Electricity

Installed capacity was 36.6m. kW in 2007. All electricity is thermally generated. Production was 189.08bn. kWh in 2007; consumption per capita in 2007 was 7,661 kWh.

### Oil and Gas

Proven oil reserves in 2011 were 264.5bn. bbls, the second highest after those of Venezuela and around 16% of world resources. However, Saudi Arabia has far more reserves that are readily accessible than Venezuela. Oil production began in 1938 by Aramco, which is now 100% state-owned and accounts for about 99% of total crude oil production. Output in 2009 totalled 459.5m. tonnes (the lowest total since 2002) and accounted for 12.0% of the world total oil output. Saudi Arabia lost its status as the world's largest oil producer to Russia in 2009. In 2009 oil export revenues were US\$157bn., the highest of any country.

Production comes from 14 major oilfields, mostly in the Eastern Province and offshore, and including production from the Neutral Zone. The Ghawar oilfield, located between Riyadh and the Persian gulf, is the largest in the world, with estimated reserves of 70bn. bbls. Oil reserves are expected to run out in approximately 2075.

In 2008 natural gas reserves were 7,570bn. cu. metres; output in 2008 was 78.1bn. cu. metres. The gas sector has been opened up to foreign investment.

### Water

Efforts are under way to provide adequate supplies of water for urban, industrial, rural and agricultural use. Most investment has gone into sea-water desalination. In 2006 desalination plants produced 2.8m. cu. metres of water a day. Irrigation for agriculture consumes the largest amount, from fossil reserves (the country's principal water source) and from surface water collected during seasonal floods. In 2006 there were 230 dams with a holding capacity of 850.3m. cu. metres. Treated urban waste water is an increasing resource for both agricultural and industrial purposes.

### Minerals

Production began in 1988 at Mahd Al-Dahab gold mine, the largest in the country. In 2008 total gold production was 4,527 kg. Deposits of iron, phosphate, bauxite, uranium, silver, tin, tungsten, nickel, chrome, zinc, lead, potassium ore and copper have also been found.

### Agriculture

Land ownership is under the jurisdiction of the Ministry of Municipal and Rural Affairs.

Since 1970 the government has spent substantially on desert reclamation, irrigation schemes, drainage and control of surface water and of moving sands. Undeveloped land has been distributed to farmers and there are research and extension programmes. Large scale private investment has concentrated on wheat, poultry and dairy production.

In 2002 there were an estimated 3.60m. ha. of arable land and 194,000 ha. of permanent cropland. Approximately 1.62m. ha. were irrigated in 2002. In 2002, 8.5% of the economically active population were engaged in agriculture (19.1% in 1990).

Production of leading crops, 2002 (in 1,000 tonnes): wheat, 2,431; dates, 829; melons and watermelons, 450; tomatoes, 403; potatoes, 313; sorghum, 239; cucumbers and gherkins, 168; barley, 136; grapes, 117; pumpkins and squash, 101; onions, 80.

Livestock (2002): 8.17m. sheep, 2.50m. goats, 323,000 cattle, 260,000 camels and 130m. chickens. Livestock products (2003, in 1,000 tonnes): milk, 948; meat, 642; eggs, 130.

### Forestry

The area under forests was 0.98m. ha. (less than 0.5% of the land area) in 2010.

### Fisheries

In 2010 the total catch was 65,142 tonnes, entirely from sea fishing.

## INDUSTRY

The largest companies in Saudi Arabia by market capitalization in March 2012 were SABIC (Saudi Basic Industries), at US\$87.8bn.; Al-Rajhi Banking (US\$32.8bn.); and Saudi Telecom (US\$22.0bn.).

In 2005 manufacturing accounted for 9.5% of GDP and construction 4.7%. The government encourages the establishment of manufacturing industries. Its policy focuses on establishing industries that use petroleum products, petrochemicals and minerals. Petrochemical and oil-based industries have been concentrated at eight new industrial cities, with the two principal cities at Jubail and Yanbu. Products include chemicals, plastics, industrial gases, steel and other metals. In 2004 there were 3,657 factories employing 340,000 workers.

### Labour

The labour force in 2002 totalled 6,242,000. In 2002 females constituted 14% of the labour force—one of the lowest percentages of females in the workforce of any country. In 2001, 35.7% of the economically active population were engaged in

wholesale and retail trade, 18.7% in manufacturing, 15.7% in construction, 6.7% in research, consultancy and recruitment. There are 6m. foreign workers, including over 1m. Egyptians and over 1m. Indians. Unemployment, which was less than 8% in 1999, reached 12% in 2002. Young people in particular are affected, with nearly a third unemployed.

### INTERNATIONAL TRADE

Saudi Arabia, along with Bahrain, Kuwait, Oman, Qatar and the United Arab Emirates entered into a customs union in Jan. 2003.

#### Imports and Exports

Trade in US\$1m.

|                | 2006    | 2007    | 2008    | 2009    | 2010    |
|----------------|---------|---------|---------|---------|---------|
| Imports c.i.f. | 69,800  | 90,214  | 115,134 | 95,552  | 106,863 |
| Exports f.o.b. | 211,306 | 234,951 | 313,462 | 192,314 | 251,143 |

The principal export is crude oil; refined oil, petrochemicals, fertilizers, plastic products and wheat are other major exports. Saudi Arabia is the world's largest exporter of oil (8.7m. bbls per day), accounting for 85.4% of all the country's exports in 2006. Major import suppliers, 2006: USA, 14.5%; China, 8.6%; Germany, 8.1%; Japan, 8.1%. Main export destinations, 2006: Japan, 16.5%; USA, 15.1%; South Korea, 9.2%; China, 6.3%.

### COMMUNICATIONS

#### Roads

In 2005 there was a total road network of 221,372 km (21.5% paved), including 3,891 km of motorway. A causeway links Saudi Arabia with Bahrain. Passenger cars in use in 2005 numbered 3,206,000 (415 per 1,000 inhabitants in 2004) and there were 1,127,900 lorries and vans. Women are not allowed to drive. In 2004-05 there were 293,281 road accidents resulting in 5,168 deaths.

#### Rail

In 2005, 1,394 km of 1,435 mm gauge lines linked Riyadh and Dammam with stops at Hofuf and Abqaiq. The network is being extended, consisting of links to Jeddah, the Jordanian border, and Makkah and Madinah. The line from Makkah to Madinah via Jeddah will be Saudi Arabia's first high-speed rail link. In 2008 railways carried 1.1m. passengers and 4.6m. tonnes of freight. The first line of a metro system in Makkah opened in 2010, covering 18.1 km.

#### Civil Aviation

The national carrier is the part-privatized Saudi Arabian Airlines, which in 2006 owned 139 aircraft and served 76 destinations. In 2005 scheduled airline traffic of Saudi-based carriers flew 117.1m. km and carried 11,126,300 passengers. There are four major international airports, at Jeddah (King Abdulaziz), Dhahran, Riyadh (King Khaled), and the newly constructed King Fahd International Airport at Dammam. There are also 22 domestic airports. In 2001 Jeddah handled 10,237,161 passengers (5,413,841 on international flights) and 188,386 tonnes of freight. Riyadh was the second busiest airport in 2001, handling 8,702,697 passengers (5,428,429 on domestic flights) and 155,245 tonnes of freight.

#### Shipping

The ports of Dammam and Jubail are on the Persian Gulf and Jeddah, Yanbu and Jizan on the Red Sea. There is a deepwater oil terminal at Ras Tanura. In 2009 the major ports handled 142.3m. tonnes of cargo (84.1m. tonnes loaded and 58.2m. tonnes discharged). In Jan. 2009 there were 83 ships of 300 GT or over registered (including 38 oil tankers, 18 general cargo ships and 14 passenger ships), totalling 1.25m. GT.

#### Telecommunications

In 2008 there were 4.1m. main (fixed) telephone lines. In the same year mobile phone subscribers numbered 36.0m. (1,428.5 per

1,000 persons). The government sold a 30% stake in Saudi Telecom Company (STC) in Dec. 2002. STC lost its monopoly in the mobile phone market in 2005 and in landline services in 2007. The number of internet users in 2008 was 7.8m. In March 2012 there were 5.1m. Facebook users.

### SOCIAL INSTITUTIONS

#### Justice

The religious law of Islam (Sharia) is the common law of the land, and is administered by religious courts, at the head of which is a chief judge, who is responsible for the Department of Sharia Affairs. Sharia courts are concerned primarily with family inheritance and property matters. However, following judicial reforms of Oct. 2007 a newly-established Supreme Court replaced the Supreme Judiciary Council as the highest judicial authority. Specialized courts are also to be established to operate alongside the Sharia courts and there are plans to codify Sharia and introduce the principle of precedent into court practice. The Committee for the Settlement of Commercial Disputes is the commercial court. Other specialized courts or committees include one dealing exclusively with labour and employment matters; the Negotiable Instruments Committee, which deals with cases relating to cheques, bills of exchange and promissory notes; and the Board of Grievances, whose preserve is disputes with the government or its agencies and which also has jurisdiction in trademark-infringement cases and is the authority for enforcing foreign court judgments.

The death penalty is in force for murder, rape, sodomy, armed robbery, sabotage, drug trafficking, adultery and apostasy; executions may be held in public. There were 79 confirmed executions in 2012 (82 confirmed executions in 2011). The population in penal institutions in Jan. 2009 was 44,600 (178 per 100,000 of national population).

#### Education

The educational system provides students with free education, books and health services. General education consists of kindergarten, six years of primary school and three years each of intermediate and high school. In 2005-06 there were: 1,449 pre-primary schools with 10,150 teachers and 97,137 pupils; 13,163 primary schools with 213,355 teachers and 2,417,811 pupils; 7,086 intermediate schools with 104,675 teachers and 1,071,747 pupils; 4,215 secondary schools with 79,754 teachers and 954,141 pupils. Students can attend either high schools offering programmes in arts and sciences, or vocational schools. Girls' education has traditionally been administered separately, but in Sept. 2009 the country's first mixed-gender university was opened and in Oct. 2009 a trial of mixed-gender education in 15 private elementary schools was launched. In 2005 there were 903 institutions for special needs pupils with 18,958 students. The adult literacy rate in 2009 was an estimated 86.1% (90.0% among males and 81.1% among females). Although Saudi girls were not even allowed to attend school until 1964 women now make up nearly 60% of Saudi Arabia's higher education students.

In 2005 there were 3,775 adult education centres. In 2005-06 there were 11 universities (including two Islamic universities and one university of petroleum and minerals); there were 603,767 students in total in higher education and 26,827 teachers.

#### Health

In 2005 there were 1,848 health care centres, 1,043 private dispensaries and 364 hospitals with 51,130 beds. Health personnel, 2005: 42,975 physicians, 78,587 nurses and 49,167 technical staff. At Jeddah there is a quarantine centre for pilgrims.

#### Welfare

The retirement age is 60 (men) or 55 (women), with eligibility based on 120 months of contributions. The minimum monthly old-age pension is SAR1,500, calculated as 2.5% of the average monthly wage during the previous two years multiplied by the

number of years of contributions. A 1969 law requires employers with more than 20 employees to pay 100% of wages for the first 30 days of sick leave and 75% of wages for the next 60 days. Unemployment benefits of SAR2,000 (US\$535) a month were introduced in 2011 for applicants who proved they were looking for work or undergoing training.

Workers' medical benefits include medical, dental and diagnostic treatment, hospitalization, medicines, appliances, transportation and rehabilitation.

## RELIGION

In 2001, 90% of the total population were Sunni Muslims, 4% Shias, 4% Christians and 1% Hindus. The *Grand Mufti*, Sheikh Abdul Aziz bin Abdullah bin Mohammed Al-Sheikh, has cabinet rank. A special police force, the Mutaween, exists to enforce religious norms.

The annual *Hajj*, the pilgrimage to Makkah, takes place from the 8th to the 13th day of Dhu al Hijjah, the last month of the Islamic year. It attracts more than 1.8m. pilgrims annually. In the current Islamic year, 1434, the *Hajj* will begin on 13 Oct. 2013 in the Gregorian calendar.

## CULTURE

### World Heritage Sites

Saudi Arabia has two sites on the UNESCO World Heritage List: the archaeological site of Madain Salih (Al-Hijr) was inscribed in 2008; and the At-Turaif District in Ad-Dir'iyah, founded in the 15th century and the first capital of the Saudi dynasty, was inscribed in 2010.

### Press

In 2006 there were 13 daily newspapers with a combined circulation of 1,397,000. The most widely read newspaper is *Asharq Al-Awsat* ('Middle East'), with an average daily circulation of 272,000 in 2006.

### Tourism

There were 8,037,000 foreign tourists in 2005; spending by tourists in 2005 totalled US\$5.2bn.

### Calendar

Saudi Arabia follows the Islamic *hegira* (AD 622, when Mohammed left Makkah for Madinah), which is based upon the lunar year of 354 days. The Islamic year 1434 corresponds to 14 Nov. 2012–4 Nov. 2013, and is the current lunar year.

## KEY HISTORICAL EVENTS

For much of the 1st millennium AD Senegal was under the influence of the gold-rich Ghana Empire of the Soninke people. In western Senegal the Takrur state was established in the 9th century. Islam was introduced in the 11th century by the Zenega Berbers of southern Mauritania, who gave their name to the region. The power of the Malinke (Madingo) in present-day Mali expanded in the 13th and 14th centuries, especially under Mansa Musa, who subjugated Takrur and the Tukulor in Senegal. The west was dominated by the Jolof empire, which fragmented into four kingdoms in the 16th century.

Portuguese trading colonies were established on Gorée Island and at Rufisque in around 1444, encouraging the growth of the slave trade. The Dutch took control of Senegalese trade in the 17th century, only to be evicted in 1677 by the French, based at Saint-Louis at the mouth of the Sénégal River. Inland, the Tukulor created a Muslim theocracy in Fouta Toro, usurping the Denianké Dynasty in 1776. Tukulor power grew in the 1850s under al-Hajj Umar Tal, whose *jihad* was contained by treaty with the French in 1857. Britain accepted French hegemony in the region in 1814 after half a century of colonial rivalry, while retaining the Gambia River. Railway construction in 1879 cemented French control over western Senegal and Dakar became the capital of French West Africa in 1904. Casamance and eastern Senegal were conquered in the 1890s.

Senegalese service in the French army in the First World War secured representation in Paris and French citizenship for Africans in certain communes. The colonial administration followed a moderate liberalization programme, including the right to form political parties and trade unions. However, the decline in the groundnut trade in the 1930s increased poverty in Senegal. The expansion of the vote after the Second World War gave support to the Democratic Bloc (BDS), which joined the Socialist Party to become the Progressive Union (UPS), dominating the

1959 elections in the newly-autonomous Senegal. Membership of the French Community lasted until independence on 20 June 1960 as part of the Federation of Mali with French Sudan (Mali); the Federation was dissolved on 20 Aug. 1960.

Leopold Sédar Senghor, the BDS founder and leader of the UPS, was elected president on 5 Sept. 1960. Relations with his prime minister, Mamadou Dia, deteriorated and Senghor had him arrested in Dec. 1962 after an attempted coup. Presidential power was augmented by referendum in 1963, allowing Senghor to ban all other parties in 1966. Senghor appointed Abdou Diouf prime minister in 1973 and began relaxing political restrictions. Abdoulaye Wade founded the Democratic Party (PDS) and a Marxist-Leninist party was formed. Recession and political agitation forced Senghor's resignation in Dec. 1980; Diouf succeeded and was confirmed by elections in 1983, 1988 and 1993.

Diouf pursued a vigorous foreign policy via the Organization of African Unity and the Economic Community of West African States. He reinstated the Gambian president, Sir Dawda Jawara, in 1981, creating the Senegambian confederation, which lasted until 1989. Unrest in the southern Casamance region escalated into secessionist civil war in the early 1990s. A skirmish on the Mauritanian border in 1989 resulted in the death of Senegalese and Mauritanians expatriates and the closing of the border, a dispute not resolved until 1994. The deterioration of the economy and the Casamance crisis led to electoral defeat in 2000. He conceded peacefully, handing power to his long-term rival, PDS leader Abdoulaye Wade. Wade was re-elected in 2007 and received legal dispensation to contest a third term in 2012, despite the constitution of 2001 limiting presidents to two terms of office. The decision prompted popular protests, leading to Macky Sall defeating Wade to become the new president in April 2012.

## TERRITORY AND POPULATION

Senegal is bounded by Mauritania to the north and northeast, Mali to the east, Guinea and Guinea-Bissau to the south and the Atlantic to the west with The Gambia forming an enclave along that shore. A short section of the boundary with The Gambia is undefined. Area, 196,720 sq. km, including 4,190 sq. km of inland water. Population (2002 census), 9,858,482 (5,005,718 females). Estimate, 2010, 12.43m.; density, 65 per sq. km. In 2011 the population was 42.7% urban.

The UN gives a projected population for 2015 of 14-16m.

About 2m. Senegalese live abroad, particularly in France, Italy, Spain and the USA.

Dakar, the capital, had a provisional census population in 2002 of 1,983,093. Other large cities (with 2002 provisional census population) are: Thiès (237,849), Rufisque (179,797), Kaolack (172,305), Saint-Louis (154,555), Mbour (153,503) and Ziguinchor (153,269).

Ethnic groups are the Wolof (36% of the population), Fulani (16%), Serer (16%), Diola (9%), Tukulor (9%), Bambara (6%), Malinké (6%) and Sarakole (2%).

The official language is French; Wolof is widely spoken.

## SOCIAL STATISTICS

2005 estimates: births, 430,000; deaths, 132,000. Rates, 2005 estimates (per 1,000 population): births, 39.4; deaths, 12.1. Annual population growth rate, 2000–05, 2.8%; infant mortality, 2010, 50 per 1,000 live births. Life expectancy in 2007 was 53.9 years for men and 56.9 for women. Fertility rate, 2008, 5.0 births per woman. 51% of the population were living in poverty in 2005.

## CLIMATE

A tropical climate with wet and dry seasons. The rains fall almost exclusively in the hot season, from June to Oct., with high humidity. Dakar, Jan. 72°F (22.2°C), July 82°F (27.8°C). Annual rainfall 22" (541 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was approved by a referendum held on 7 Jan. 2001. The head of state is the *President*, elected by universal suffrage for not more than two five-year terms (previously two seven-year terms). However, in Jan. 2012 the incumbent, Abdoulaye Wade won a court ruling allowing him to run for a third term on the grounds that the constitutional provision was not enacted until a year after his first term of office had begun. The *President* has the power to dissolve the National Assembly, without the agreement, as had been the case, of a two-thirds majority. The new constitution also abolished the upper house (the Senate), confirmed the status of the prime minister and for the first time gave women the right to own land. Senegal has a bicameral legislature. For the 150-member *National Assembly*, 90 members are elected by simple majority vote in single or multi-member constituencies for five years with 60 elected by a system of party-list proportional representation. The Senate was re-established in Jan. 2007 six years after being dissolved. In Sept. 2012 parliament voted to abolish it after severe floods hit Senegal, with the money that would be saved going towards improving the country's flood defences and aid for flood victims.

## National Anthem

'Pincez tous vos koras, frappez les balafos' ('All pluck the koras, strike the balafos'); words by Léopold Sédar Senghor, tune by Herbert Pepper.

## RECENT ELECTIONS

Presidential elections took place on 26 Feb. 2012. Incumbent Abdoulaye Wade won 34.8% of the vote, ahead of former prime minister Macky Sall with 26.6%, Moustapha Niassé with 13.2% and Ousmane Tanor Dieng with 11.3%. There were ten other candidates. Turnout was 51.6%. In the run-off held on 25 March, Sall won 65.8% of the vote and Wade 34.2%. Turnout was 55.0%.

Parliamentary elections were held on 1 July 2012. Turnout was 36.8%. The United in Hope coalition backing President Macky Sall took 119 of the 150 seats in the National Assembly and the Senegalese Democratic Party 12 with smaller parties taking four seats or fewer. Of the 150 members of parliament there were 64 women (42.7%), among the highest percentages of women MPs in the world.

In indirect elections to the Senate held on 19 Aug. 2007 the Senegalese Democratic Party won 34 of the available 35 seats, with one going to And-Jéf/African Party for Democracy and Socialism. Elections were then scheduled for Sept. 2012, but shortly

beforehand the president proposed to abolish the Senate and return to a unicameral chamber. Parliament approved the abolition.

## CURRENT LEADERS

### Macky Sall

#### *Position*

President

#### *Introduction*

Macky Sall, a former prime minister under President Wade and founder of the liberal Alliance for the Republic (APR), was elected president in March 2012. Having broken with Wade's administration over issues of transparency and public spending, Sall pledged to cut the size of government and tackle Senegal's long-standing problems of unemployment, poor infrastructure and food insecurity.

#### *Early Life*

Macky Sall was born on 11 Dec. 1961 in Fatick, western Senegal. After graduating in geological engineering from Cheikh Anta Diop University, Dakar, he completed further studies in geophysics at the French Petroleum Institute in Paris from 1992–93. He worked for the state-owned oil company PETROSEN from 1994–2000.

A member of Wade's Senegalese Democratic Party (PDS), Sall became general secretary of its Fatick regional convention in 1998. Following the PDS victory at elections in 2000, he served as director general of PETROSEN from Dec. 2000 until July 2001. He was special presidential adviser on energy and mines from April 2000 to May 2001, and from 2001–03 served as minister for mines, energy and hydraulics.

Sall became mayor of Fatick in 2002 and from 2003–04 was minister of the interior and government spokesperson. In April 2004 he was appointed prime minister by President Wade. He served until June 2007, when he was elected president of the

National Assembly. In Nov. 2007, after Sall initiated an enquiry into spending by an agency headed by the president's son, the term of the National Assembly president was reduced to one year, prompting his resignation.

In Dec. 2008 Sall founded the APR and in 2009 was again elected mayor of Fatick. Against a background of rising public discontent with the government and anger at Wade's decision to circumvent constitutional limits and stand for a third term as president, Sall ran a vigorous 2012 presidential campaign. Arguing for cuts in public spending and increased transparency, he proposed halving the size of government and reducing Senegal's diplomatic representation abroad, using the savings to reduce food prices. He also promised to attract foreign investment to boost the economy and develop infrastructure.

After claiming second place in the first round of voting, Sall won the support of 12 eliminated opposition candidates and on 25 March 2012 took almost 66% of the vote in a run-off. Wade conceded defeat and Sall was sworn in on 2 April 2012.

#### **Career in Office**

Sall took office promising to tackle corruption and deliver growth, while dealing with severe food crises in the drought-stricken Sahel region. He was also expected to enter negotiations with neighbouring Gambia to end three decades of conflict in the southern Casamance region.

#### **DEFENCE**

There is selective conscription for two years. Defence expenditure totalled US\$218m. in 2008 (US\$16 per capita), representing 1.7% of GDP.

#### **Army**

There are four military zones. The Army had a strength of 11,900 (including conscripts) in 2007. There is also a paramilitary force of gendarmerie and customs of 5,000.

#### **Navy**

Personnel (2007) totalled 950, and bases are at Dakar and Casamance.

#### **Air Force**

The Air Force, formed with French assistance, has eight combat-capable aircraft. Personnel (2007) 770.

#### **ECONOMY**

Agriculture accounted for 13.4% of GDP in 2007, industry 23.6% and services 63.0%.

#### **Overview**

In contrast to many of its West African neighbours, Senegal enjoys social and political stability and is open to the outside world. Prompted by the devaluation of the CFA franc in 1994 and aggressive structural reforms, Senegal experienced steady per capita GDP growth between 1995 and 2005. Nonetheless, 34% of the population lives on less than \$1.25 a day (PPP) and the unemployment rate is estimated at 48%.

The service sector accounted for 61.0% of GDP in 2010, having grown rapidly during the 1990s (especially transportation and telecommunications). Agriculture and construction have also contributed to recent growth, although the agricultural sector is in long-term decline. In 2000 Senegal became eligible for the Heavily Indebted Poor Countries (HIPC) initiative, reaching the Completion Point of the initiative in 2004 and so earning debt relief totalling US\$850m.

In 2006–07 agricultural output decreased as a result of late but heavy rains. The increase in international food and oil prices in 2007–08 caused further deterioration in the economy, while the global financial crisis in 2008 and drought in the Sahel in 2011 were additional challenges. At best, a moderate recovery is anticipated.

The port of Dakar serves as an important centre of trade in West Africa. A 20-ha. dry port project was completed in 2009 while Jafza International of Dubai is developing a Special Economic Zone adjacent to Dakar International Airport. Oil exploration in the Casamance region offers potential for future revenue streams, although work has been hampered by weak transportation links and civil unrest.

Foreign capital enters the country via Senegalese citizens living abroad, and in 2010 remittances made up 10% of GDP.

#### **Currency**

The unit of currency is the *franc CFA* (XOF) with a parity of 655-957 francs CFA to one euro. In June 2005 total money supply was 930,246m. francs CFA and foreign exchange reserves totalled US\$1,380m. Following deflation of 1.7% in 2009, there was inflation of 1.2% in 2010 and 3.4% in 2011.

#### **Budget**

Revenues in 2008 totalled 1,350.9bn. francs CFA (tax revenue, 86.0%) and expenditures 1,678.6bn. francs CFA (current expenditure, 67.1%).

VAT is 18%.

#### **Performance**

Real GDP growth was 2.1% in 2009, 4.1% in 2010 and 2.6% in 2011. Senegal's total GDP in 2011 was US\$14.3bn.

#### **Banking and Finance**

The Banque Centrale des États de l'Afrique de l'Ouest is the bank of issue of the franc CFA for all the countries of the West African Economic and Monetary Union (Benin, Burkina Faso, Côte d'Ivoire, Mali, Niger, Senegal and Togo) but has had its headquarters in Dakar, the Senegalese capital, since 1973. Its *Governor* is Tiémoko Meyliet Koné. There are eight commercial banks, the largest including Banque Internationale pour le Commerce et l'Industrie and Banque de l'Habitat. There are also four development banks and an Islamic bank. Only about 5% of the population have bank accounts.

External debt amounted to US\$3,677m. in 2010. As a share of GNI, external debt fell from 78.7% in 2000 to 28.5% in 2010.

Senegal is affiliated to the regional BRVM stock exchange (serving the member states of the West African Economic and Monetary Union), based in Abidjan, Côte d'Ivoire.

#### **ENERGY AND NATURAL RESOURCES**

##### **Environment**

Senegal's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.5 tonnes per capita.

##### **Electricity**

In 2007 installed capacity was an estimated 0.5m. kW. Production in 2007 was 2.12bn. kWh and consumption per capita 194 kWh. Power cuts are common.

##### **Minerals**

Output, 2008, included (in tonnes): sand, 6.4m.; calcium phosphate, 645,000; salt, 241,000. Annual gold production was approximately 600 kg for many years but increased to over 5,000 tonnes in 2009 following the opening of a new mine in 2008.

##### **Agriculture**

Because of erratic rainfall 25% of agricultural land needs irrigation. Most land is owned under customary rights and holdings tend to be small. In 2007 the economically active population engaged in agriculture was an estimated 3,750,000. In 2006 approximately 2.99m. ha. were used as arable land and 52,000 ha. for permanent crops. An estimated 63,000 ha. were irrigated in 2006. There were about 700 tractors in use in 2006 and 155 harvester-threshers. Production, 2005–06 (in 1,000 tonnes): sugarcane, 829; groundnuts, 703; millet, 609; maize, 400;

rice, 289; cassava, 281; watermelons, 241; tomatoes, 161; sorghum, 144; onions, 76; mangoes, 62.

Livestock (2006): 5-00m. sheep; 4-26m. goats; 3-14m. cattle; 518,000 horses; 415,000 asses; 318,000 pigs.

Meat production (2006, in 1,000 tonnes): beef and veal, 69; lamb and mutton, 17; goat meat, 12; pork, bacon and ham, and camel, 5. Milk production (2006, in 1,000 litres): cow's milk, 135; goat's milk, 46; sheep's milk, 31.

### Forestry

Forests covered 8-47m. ha. in 2010 (44% of the land area), down from 9-35m. ha. in 1990 and 8-90m. ha. in 2000. Roundwood production in 2007 amounted to 6-13m. cu. metres.

### Fisheries

In 2007 the total catch was 412,835 tonnes, of which 347,104 tonnes came from sea fishing and 38,731 tonnes from inland fishing. Exports of fishery commodities were valued at US\$313-5m. in 2007.

## INDUSTRY

Predominantly agricultural and fish processing, phosphate mining, petroleum refining and construction materials.

### Labour

In 2002 the economically active population numbered 3,699,859, of whom 208,135 were unemployed (5-6%).

## INTERNATIONAL TRADE

### Imports and Exports

In 2007 imports (f.o.b.) totalled US\$4,871-4m. and exports (f.o.b.) US\$1,546-3m. Chief imports: petroleum and petroleum products, food and live animals, and machinery and transport equipment. Chief exports: fish, petroleum and petroleum products, and chemicals and related products. Main import suppliers, 2007: France, 22-9%; Nigeria, 8-4%; Netherlands, 7-2%; China, 5-7%; Thailand, 5-3%. Main export markets, 2007: Mali, 24-0%; France, 9-5%; India, 6-7%; Bunkers and ships' stores, 5-5%; Gambia, 5-4%.

## COMMUNICATIONS

### Roads

The length of roads in 2006 was 14,805 km, of which 29-3% were paved. In 2008 there were 205,704 passenger cars, 56,795 trucks and vans and 15,982 coaches. There were 320 deaths as a result of road accidents in 2007.

### Rail

There were previously four railway lines but the total length of the track fell from 1,034 km (metre gauge) in 1986 to 645 km in 2005. Only the Dakar–Kidira line (continuing in Mali) is still theoretically in service although traffic was suspended in 2003 and again since 2009 owing to the poor state of the track. There is also a suburban rail service linking Dakar and Rufisque, which carried 4-9m. passengers in 2009. In 2009, 364,000 tonnes of freight were carried.

### Civil Aviation

The international airport is at Dakar/Yoff (Léopold Sédar Senghor), which handled 1,882,242 passengers and 21,816 tonnes of freight in 2008. Air Sénégal International was 49% state-owned and 51% owned by Royal Air Maroc (RAM). After an attempted takeover bid by the government to gain 64% of the shares, RAM pulled out of the airline and flights were suspended on 24 April 2009 owing to financial difficulties. Sénégal Airlines was launched as a replacement national carrier in Oct. 2009 although it is 64% privately-controlled. Flights, initially only within Africa, commenced in Jan. 2011.

### Shipping

In Jan. 2009 there were three ships of 300 GT or over registered, totalling 5,000 GT. 10-6m. tonnes of freight were handled in the

port of Dakar in 2008. There is a river service on the Senegal from Saint-Louis to Podor (363 km) open throughout the year, and to Kayes (924 km) open from July to Oct. The Senegal River is closed to foreign flags. The Saloum River is navigable as far as Kaolack, the Casamance River as far as Ziguinchor.

### Telecommunications

In 2008 there were 237,800 main (fixed) telephone lines; mobile phone subscribers numbered 5,389,100 in 2008 (44-1 per 100 persons). There were 1,020,000 internet users in 2008. In June 2012 there were 666,000 Facebook users.

## SOCIAL INSTITUTIONS

### Justice

There are *juges de paix* in each *département* and a court of first instance in each region. Assize courts are situated in Dakar, Kaolack, Saint-Louis and Ziguinchor, while the Court of Appeal resides in Dakar. The death penalty, last used in 1967, was abolished in Dec. 2004.

The population in penal institutions in Dec. 2007 was 6,487 (55 per 100,00 of national population).

### Education

The adult literacy rate in 2006 was 42%. In 2007 there were 1,572,178 pupils (45,957 teaching staff) in primary schools; 505,097 pupils (20,007 teaching staff) in secondary schools; and 76,949 students in tertiary education. There are two public universities (Cheikh Anta Diop and Gaston Berger) and three private universities (Dakar Bourguiba, Sahel and Suffolk).

In 2006 public expenditure on education came to 4-9% of GNI and 26-3% of total government spending.

### Health

In 2006 there were 22 hospitals, 68 health centres and 949 health posts. In 2004–05 medical personnel in government service included: 765 doctors, 64 dentists, 54 pharmacists, 546 midwives and 874 nurses. In 2003 there were 551 doctors and 567 midwives in the private sector. Senegal has been one of the most successful countries in Africa in the prevention of AIDS. Levels of infection have remained low, with the anti-AIDS programme having started as far back as 1986. The infection rate has been kept below 2%.

## RELIGION

The population was 93% Sunni Muslim in 2001, the remainder being Christian (mainly Roman Catholic) or animist. There was one Roman Catholic cardinal in Feb. 2013.

## CULTURE

### World Heritage Sites

Gorée Island, off the coast of Senegal, was added to the UNESCO World Heritage List in 1978. It was formerly the largest slave trading centre on the African coast. The Djoudj Sanctuary in the Senegal River delta (added in 1981), protects 1-5m. birds, including the white pelican, the purple heron, the African spoonbill, the great egret and the cormorant. Niokolo-Koba National Park, along the banks of the Gambia River (added in 1981), is home to the Derby eland (largest of the antelopes), chimpanzees, lions, leopards and a large population of elephants as well as many birds, reptiles and amphibians. The Island of Saint-Louis joined the UNESCO list in 2000 (reinscribed in 2007), as a reminder of its status as the capital between 1872 and 1957. The Saloum Delta (2011) comprises brackish channels encompassing over 200 islands and islets and is marked by numerous shellfish mounds produced by its human inhabitants over 2,000 years. The Bassari Country, comprising the Bassari–Salémata area, the Bedik–Bandafassi area and the Fula–Dindéfello area, was added to the UNESCO list in 2012. The site houses original and still vibrant cultures of the Bassari, Fula and Bedik peoples, featuring their original traits of agro-pastoral, social, ritual and spiritual practices.

Senegal shares a UNESCO site with The Gambia: the Stone Circles of Senegambia (added in 2006) are a collection of 93 stone circles, tumuli and burial mounds from between the 3rd century BC and the 16th century AD.

#### Press

In 2006 there were 26 daily newspapers with a total average circulation of 120,000 copies and 30 non-dailies.

#### Tourism

In 2006, 406,000 foreign tourists visited Senegal; revenue in 2006 amounted to US\$329m.

#### Festivals

The 3rd World Festival of Black Arts was held in Dakar in Dec. 2010.

## KEY HISTORICAL EVENTS

The Serbs were converted to Orthodox Christianity by the Byzantines in 891, before becoming a prosperous independent state under Stevan Nemanja (1167–96). A Serbian Patriarchate was established at Peć during the reign of Stevan Dušan (1331–55). Dušan's attempted conquest of Constantinople failed and after he died many Serbian nobles accepted Turkish vassalage. The reduced Serbian state under Prince Lazar received the coup de grace at Kosovo on St Vitus' Day, 1389. However, Turkish preoccupations with a Mongol invasion and wars with Hungary delayed the incorporation of Serbia into the Ottoman Empire until 1459.

The Turks tolerated the Orthodox church though the Patriarchate was abolished in 1776. The native aristocracy was eliminated and replaced by a system of fiefdoms held in return for military or civil service. Local self-government based on rural extended family units (*zadruga*) continued. In its heyday the Ottoman system was no harder on the peasantry than the

Christian feudalism it had replaced, but with the gradual decline of Ottoman power, corruption, oppression and reprisals led to economic deterioration and social unrest.

In 1804, murders carried out by mutinous Turkish infantry provoked a Serbian rising under Djordje Karadjordje. By the Treaty of Bucharest (1812) Russia agreed that Serbia, known as Servia until 1918, should remain Turkish. The Turks reoccupied Serbia with ferocious reprisals. A rebellion in 1815 was led by Miloš Obrenović who, with Russian support, won autonomy for Serbia within the Ottoman empire. Obrenović had Karadjordje murdered in 1817. After he was forced to grant a constitution establishing a state council he abdicated in 1839. In 1842 a coup overthrew the Obrenovići and Alexander Karadjordjević was elected ruler. He was deposed in 1858.

During the reign of the western-educated Michael Obrenović (1860 until his assassination in 1868) the foundations of a modern centralized and militarized state were laid, and the idea of a 'Great Serbia', first enunciated in Prime Minister Garašanin's *Draft Programme* of 1844, took root. Milan Obrenović, adopting the title of king, proclaimed formal independence in 1882. He suffered defeats against Turkey (1876) and Bulgaria (1885) and abdicated in 1889. After Alexander Obrenović was assassinated in 1903 Peter Karadjordjević brought in a period of stable constitutional rule.

Serbia's aim to secure an outlet to the sea was thwarted by Austria. Annexing Bosnia in 1908, Austria forced the Serbs to withdraw from the Adriatic after the first Balkan war (1912).

The assassination of Archduke Franz Ferdinand of Austria in Sarajevo on 28 June 1914 precipitated the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government aimed at a centralized, Serb-run state. But exiles from Croatia and Slovenia wanted a South Slav federation. This was accepted by the victorious Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918. From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes.

A constitution of 1921 established an assembly but the trappings of parliamentary rule could not bridge the gulf between Serbs and Croats. The Croat peasant leader, Radić, was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. Faced with the threat of his kingdom's dissolution, on 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity and renaming the country Yugoslavia. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the regency of Prince Paul, the government pursued a pro-fascist line. On 25 March 1941 Paul was persuaded to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within ten days Yugoslavia surrendered; king and government fled to London. Resistance was led by a royalist group and the communist-dominated partisans of Josip Broz, nicknamed Tito. Having succeeded in liberating Yugoslavia, Tito set up a Soviet-type constitution but he was too independent for Stalin who sought to topple him. However, Tito made a *rapprochement* with the west and it was the Soviet Union under Khrushchev that had to extend the olive branch in 1956. Yugoslavia was permitted to evolve its 'own road to socialism'. Collectivization of agriculture was abandoned and Yugoslavia became a champion of international 'non-alignment'. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia between Serbs and Croats, reached crisis point after 1988. In 1988 the Serbian presidency fell to the nationalist Slobodan Milošević, who aimed at the creation of an enlarged Serbian state. On 25 June 1991 Croatia and Slovenia declared independence. Fighting began in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia. A three-month moratorium agreed at EU peace talks on 30 June having expired, both Slovenia and Croatia declared their independence from the Yugoslav federation on 8 Oct. After 13 ceasefires had failed, a fourteenth was signed on 23 Nov. under UN auspices. A Security Council resolution of 27 Nov. proposed the deployment of a UN peacekeeping force if the ceasefire was kept. Fighting, however, continued. On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia and Herzegovina was recognized on 7 April 1992 and Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted to send a 14,000-strong peacekeeping force to Croatia and Yugoslavia. On 27 April 1992 Serbia and Montenegro created a new federal republic of Yugoslavia.

On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted to impose sanctions. In mid-1992 NATO committed air, sea and eventually land forces to enforce sanctions and protect humanitarian relief operations in Bosnia. At a joint UN-EC peace conference on Yugoslavia held in London on 26–27 Aug. some 30 countries and all the former republics of Yugoslavia endorsed a plan to end the fighting in Croatia and Bosnia, install UN supervision of heavy weapons, recognize the borders of Bosnia and Herzegovina and return refugees. At a further conference at Geneva on 30 Sept. the Croatian and Yugoslav presidents agreed to make efforts to bring about a peaceful solution in Bosnia, but fighting continued. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all UN sanctions were lifted in Nov. 1995.

In July 1997 Slobodan Milošević switched his power base to become president of federal Yugoslavia. The former Yugoslav foreign minister, Milan Milutinović, succeeded Milošević as Serbian President. Meanwhile, in Montenegro, the pro-western Milo Đukanović succeeded a pro-Milošević president.

Following the break-up of Yugoslavia, in March 1998 a coalition government was formed between the Socialist Party of Slobodan Milošević and the ultra-nationalist Serb Radical Party.

### **Kosovo**

In 1998 unrest in Kosovo, with its largely Albanian population, led to a bid for outright independence. Violence flared resulting in what a US official described as 'horrendous human rights violations', including massive shelling of civilians and destruction of villages. A US-mediated agreement for negotiations to proceed during an interim period of autonomy allowed for food and medicine to be delivered to refugees. American support for a degree of autonomy (short of independence), accepted in principle by President Milošević, lifted the immediate threat of NATO air strikes. Further outbreaks of violence in early 1999 were followed by the departure of the 800-strong team of international 'verifiers' of the fragile peace. Peace talks in Paris broke down without a settlement though subsequently Albanian freedom fighters accepted terms allowing them broad autonomy. The sticking point on the Serbian side was the international insistence on having 28,000 NATO-led peacemakers in Kosovo to keep apart the warring factions. Meanwhile, the scale of Serbian repression in Kosovo persuaded the NATO allies to take direct action. On the night of 24 March 1999 NATO aircraft began a bombing campaign against Yugoslavian military targets. Further Serbian provocation in Kosovo caused hundreds of thousands of ethnic Albanians to seek refuge in neighbouring countries. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an

accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo.

When the general election held on 24 Sept. 2000 resulted in a victory for the opposition democratic leader Vojislav Koštunica, President Milošević demanded a second round of voting. A strike by miners at the Kolubara coal mine on 29 Sept. was followed by a mass demonstration in Belgrade on 5 Oct. when the parliament building was set on fire. On 6 Oct. Slobodan Milošević accepted defeat. He was arrested on 1 April 2001 after a 30-hour confrontation with the authorities. On 28 June he was handed over to the United Nations War Crimes Tribunal in The Hague to face charges of crimes against humanity. Prime Minister Zoran Žižić resigned the next day. On 12 Feb. 2002 the trial of Slobodan Milošević, on charges of genocide and war crimes in the Balkans over a period of nearly ten years, began at the International Criminal Tribunal in The Hague. However, Milošević's death in March 2006 from heart failure while in the custody of the Tribunal brought proceedings to a close.

On 14 March 2002 Serbia and Montenegro agreed to remain part of a single entity called Serbia and Montenegro, thus relegating the name Yugoslavia to history. The agreement was ratified in principle by the federal parliament and the republican parliaments of Serbia and Montenegro on 9 April 2002. The new union came into force on 4 Feb. 2003. The country's fragile political structures came under the spotlight on 12 March 2003 when the Serbian prime minister Zoran Đinđić, a key figure in the toppling of the Milošević regime, was shot dead on the stairway of Serbia's chief government building.

After 4 Feb. 2006 Serbia and Montenegro had the right to vote for independence. Following a referendum on 21 May 2006, Montenegro declared independence and was recognized as such by Serbia on 15 June. As a result of Montenegro's vote, Serbia's parliament formally proclaimed Serbia to be independent for the first time since 1918 on 5 June 2006.

### **TERRITORY AND POPULATION**

Serbia is bounded in the northwest by Croatia, in the north by Hungary, in the northeast by Romania, in the east by Bulgaria, in the south by Macedonia and in the west by Albania, Montenegro and Bosnia and Herzegovina. According to the constitution it includes the two provinces of Kosovo and Metohija in the south and Vojvodina in the north. With these Serbia's area is 88,361 sq. km; without, 55,968 sq. km. Population at the 2011 census was (with Vojvodina but without Kosovo and Metohija) 7,186,862; population density per sq. km, 92.8. Population at the 2011 census without both Vojvodina and Kosovo and Metohija was 5,255,053. The population was 56.4% urban in 2011.

The UN gives a projected population for 2015 of 9.81m.

The capital is Belgrade (2011 census population, 1,166,763). Populations (2011 census) of principal towns:

### **SOCIAL STATISTICS**

In 2008 there were a total of 69,083 live births in Serbia (without Kosovo and Metohija), a rate of 9.4 per 1,000 inhabitants. There were 102,711 deaths (14.0 per 1,000) and 38,285 marriages (5.2 per 1,000). Population growth rate, 2007, -0.4%. Life expectancy in 2007 was 71.6 years for men and 76.3 for women. Infant mortality was 6 per 1,000 live births in 2010.

## CLIMATE

Most parts have a central European type of climate, with cold winters and hot summers. 2000, Belgrade, Jan. -1.0°C, July 23.5°C. Annual rainfall 367.7 mm.

## CONSTITUTION AND GOVERNMENT

A new constitution was approved in a referendum held on 28–29 Oct. 2006, with 53.0% of the electorate (and 96.6% of those voting) supporting the proposed constitution. It declares the province of Kosovo and Metohija an integral part of Serbia and grants Vojvodina financial autonomy. Kosovo Albanians were not able to vote. Turnout was 54.9%. The *President* is elected by universal suffrage for not more than two five-year terms. There is a 250-member single-chamber *National Assembly*.

### National Anthem

'Bože pravde' ('God of Justice'); words by Jovan Đorđević, tune by Davorin Jenko.

## RECENT ELECTIONS

Parliamentary elections were held on 6 May 2012. The 'Let's Get Serbia Moving' coalition, led by the Serbian Progressive Party (SNS), won 73 seats (24.0% of the vote); the 'Choice for a Better Life' coalition, led by the Democratic Party (DS), 67 (22.1%); the Socialist Party of Serbia–Party of United Pensioners of Serbia–United Serbia (SPS–PUPS–JS) coalition, 44 (14.5%); the Democratic Party of Serbia (DSS), 21 (7.0%); the 'U-Turn' coalition, led by the Liberal Democratic Party (LDP), 19 (6.5%); the 'United Regions of Serbia' coalition, led by G17+, 16 (5.5%). The remaining seats went to smaller parties and independents. Turnout was 57.8%.

First round of presidential elections were also held on 6 May 2012. Boris Tadić (DS) took 25.3% of the vote, followed by Tomislav Nikolić (SNS) with 25.0%, Ivica Dačić (SPS) with 14.2% and Vojislav Koštunica (DSS) with 7.4%. There were eight other candidates. In the run-off held on 20 May 2012, Nikolić won with 49.5% of the vote against 47.3% for Tadić. Turnout was 57.8% in the first round and 46.3% in the second.

## CURRENT LEADERS

### Tomislav Nikolić

#### Position

President

#### Introduction

Tomislav Nikolić was elected president in May 2012. Once an ultra-nationalist, he reinvented himself as a moderate supporting Serbian EU membership while maintaining Serbian claims over Kosovo.

#### Early Life

Born on 15 Dec. 1952 in Kragujevac, Tomislav Nikolić was educated in Kragujevac and Novi Sad. He worked in building construction from 1971–78 before taking up an investment and management role with a company in Kragujevac.

A member of the National Radical Party, in Feb. 1991 he oversaw its merger with the Serb National Renewal Party to form the ultra-nationalist Serb Radical Party (SRS). In the same year he became party vice-president under the leadership of Vojislav Šešelj and was elected to the national assembly.

The SRS formed periodic alliances with the governments of Slobodan Milošević in the 1990s, endorsing military action in Bosnia and Kosovo and advocating the formation of a 'Greater Serbia'. Nikolić served as deputy prime minister of Serbia from March 1998–Nov. 1999 and deputy premier of the Federal Republic of Yugoslavia from 1999–2000. In 2000, 2003 and 2004 he launched unsuccessful bids for the national presidency, each time unsuccessfully.

In Feb. 2003 Nikolić took over the leadership of the SRS after Šešelj was indicted for war crimes by the International Criminal Tribunal for the Former Yugoslavia (ICTY). In 2007 he was briefly speaker of the national assembly and in 2008 again stood for the presidency, losing narrowly to the incumbent Boris Tadić. In Sept. 2008 Nikolić broke with the SRS and formed the Serbian Progressive Party (SNS) following Šešelj's accusations that he had betrayed SRS ideology by expressing pro-Western sentiment (specifically support for EU accession).

Grooming the SNS as a more moderate party than the SRS, Nikolić showed willingness to accept EU conditions for membership and sought to build ties with Western nations, rather than looking towards Russia as Šešelj advocated. Nonetheless, Nikolić did not abandon the nationalist agenda, arguing that Kosovo remained an integral part of Serbia and denying Kosovan sovereignty after its declaration of independence in Feb. 2008.

In April 2011 Nikolić led protests, including an aborted hunger strike, in an unsuccessful bid to bring about early elections amid growing public frustration at rampant corruption and the country's grave economic situation. He contested his fifth presidential election in 2012, winning despite controversy over his political and educational track records. He defeated Tadić in a second round of voting on 20 May 2012 and resigned the leadership of the SNS four days later.

#### Career in Office

Nikolić was sworn into office on 31 May 2012. Ivica Dačić, leader of the Socialist Party of Serbia, became prime minister at the head of a coalition with the Serbian Progressive Party (SNS).

At home Nikolić must contend with the struggling economy and high unemployment. On the international stage he faces opposition to Serbia's EU membership application, notably over the refusal to recognize Kosovo's independence. Relations with a number of neighbouring countries remain strained, a situation not eased by his accusations of ICTY bias against Serbia.

## DEFENCE

Conscription was abolished with effect from 1 Jan. 2011. In 2008 military expenditure totalled US\$1,034m. (US\$139 per capita), representing 2.1% of GDP.

### Army

Strength (2007) 11,180 including 1,724 conscripts. The headquarters of the Army are at Niš. Equipment includes 224 main battle tanks.

### Air Force

The Air Force and Air Defence is based at Zemun. Strength (2007) 4,155.

## ECONOMY

Agriculture accounted for 13% of GDP in 2007, industry 28% and services 59%.

### Overview

Since democratic reforms in 2000, Serbia has enjoyed strong growth and positive structural changes. GDP grew on average by 5.5% per year in the first five years after transition and remained strong prior to the global downturn that began in 2008. Inflation has fallen significantly since the 1990s. Large scale privatization, a restructuring of the banking sector and improvements in the business environment have underpinned economic progress.

FDI has been significant in bolstering the economy, averaging 6.7% of GDP in the period 2002–07 according to the World Bank. However, political uncertainty has hindered progress and reform, while high unemployment (at around 17% in 2010) is a concern. EU accession is a major objective and an application for membership was submitted in Dec. 2009.

Growth stalled with the global financial crisis and a Stand-By Arrangement with the IMF was signed in 2009. The economy began to recover in 2010 as exports rebounded. However, economic developments in the EU pose risks to the recovery. Increasing inflation and the high external deficit are other key concerns.

### Currency

The unit of currency of Serbia is the *dinar* (RSD) of 100 *paras*. On 1 Jan. 2001 Yugoslavia adopted a managed float regime. The National Bank of Yugoslavia began setting the exchange rate of the dinar daily in the foreign exchange market on the previous day. In Kosovo both the dinar and the euro are legal tender. Inflation was 12.4% in 2008, decreased to 6.2% in 2010 but went up again to 11.1% in 2011.

### Budget

(Excluding Kosovo and Metohija). Central government revenue totalled 1,049,548m. dinars in 2008 (914,361m. dinars in 2007) and expenditure 1,043,623m. dinars (867,589m. dinars in 2007).

VAT is 20% (reduced rate 8%).

### Performance

The economy contracted by 3.5% in 2009 but grew by 1.0% in 2010 and 1.6% in 2011. Total GDP was US\$45.8bn. in 2011.

### Banking and Finance

The National Bank is the bank of issue responsible for the monetary policy, stability of the currency of Serbia, the dinar, control of the money supply and prescribing the method of maintaining internal and external liquidity. The dinar became fully convertible in May 2002. The present *Governor* of the National Bank of Serbia is Jorgovanka Tabaković.

Foreign debt amounted to US\$32,222m. in 2010, representing 84.3% of GNI.

There is a stock exchange in Belgrade.

## ENERGY AND NATURAL RESOURCES

### Electricity

In 2007 installed capacity was an estimated 11.8m. kW. Production in 2007 was 36.52bn. kWh and consumption per capita 3,485 kWh.

### Minerals

(Excluding Kosovo and Metohija, in 1,000 tonnes). 2008: lignite, 38,284; copper ore, 8,680 tonnes.

### Agriculture

(Excluding Kosovo and Metohija). In 2007 the sown area was 3,095,006 ha. Yields in 2008 (in 1,000 tonnes): maize, 6,158; sugar beets, 2,300; wheat (2007), 1,864; potatoes, 844; plums, 607; sunflower seeds, 454; grapes, 373; soybeans, 351; barley (2007), 259; apples, 236. Livestock in 2009 (in 1,000): cattle, 1,002; pigs, 3,631; sheep, 1,504; poultry, 22,821.

### Forestry

Forests covered 2.71m. ha. in 2010 (31% of the land area). Timber cut in 2007: 2,981,000 cu. metres.

### Fisheries

Total catch, 2008, 3,197 tonnes (all from inland fishing).

## INDUSTRY

Production, 2008 (excluding Kosovo and Metohija, in 1,000 tonnes): cement, 2,843; crude steel, 1,662; pig iron, 1,582. 2007: cotton fabrics, 19,557,000 sq. metres; woollen fabrics, 11,000 sq. metres; passenger cars, 9,400 units; trucks, 473 units.

### Labour

In April 2010 there were 2,412,106 workers employed (without Kosovo and Metohija), including 549,816 in agriculture, forestry and water management; 405,485 in manufacturing; 346,038 in wholesale and retail trade and repair; 170,146 in health and social work; 148,943 in education; and 142,514 in transport, storage and communications. In April 2010 there were 1,582,455 employees and 641,712 self-employed persons. Average annual salary in 2009 (without Kosovo and Metohija) was 31,733 dinars. Unemployment in April 2010 (without Kosovo and Metohija) was running at 19.2%.

## Kosovo and Metohija

### KEY HISTORICAL EVENTS

Kosovo has a large ethnic Albanian majority. Following Albanian-Serb conflicts, the Kosovo and Serbian parliaments adopted constitutional amendments in March 1989 surrendering much of Kosovo's autonomy to Serbia. Renewed Albanian rioting broke out in 1990. The Prime Minister and six other ministers resigned in April 1990 over ethnic conflicts. In July 1990, 114 of the 130 Albanian members of the National Assembly voted for full republican status for Kosovo but the Serbian National Assembly declared this vote invalid and unanimously voted to dissolve the Kosovo Assembly. Direct Serbian rule was imposed causing widespread violence. Western demands for negotiations in granting Kosovo some kind of special status were rejected. Ibrahim Rugova, the leader of the main Albanian party, the Democratic League of Kosovo (LDK), declared himself 'president' demanding talks on independence. In 1998 armed conflict between Yugoslavia and the Kosovo Liberation Army led 200,000 people, or a tenth of the population of the province, to flee the fighting. Further repression by Serbian forces led to the threat of NATO direct action. Air strikes against Yugoslavian military targets began on 24 March 1999. Retaliation against Albanian Kosovars led to a massive exodus of refugees. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo. In Nov. 2001 the Organization for Security and Co-operation in Europe mounted elections for a provincial assembly that were deemed fair and democratic.

The worst fighting between Serbs and Albanians since the end of the war claimed 19 lives in March 2004. The following March President Ramush Haradinaj resigned when he was indicted to face charges of war crimes at the UN tribunal in The Hague. In 2006 the UN sponsored talks on the future status of Kosovo and ethnic Serbian and Kosovan leaders met for the first time since 1999. In Oct. 2006 Serbia held a referendum that approved a new constitution keeping Kosovo as an integral part of the country. However, the Kosovan Albanian majority rejected the poll. In Feb. 2007 the UN announced plans for Kosovo's eventual independence that were immediately rejected by Serbia and heavily revised in July 2007 after Russian protests.

In Nov. 2007 Hashim Thaçi's Democratic Party of Kosovo won elections that were boycotted by the Serb minority. On 17 Feb. 2008 Kosovo made a unilateral declaration of independence though international recognition was patchy. Independence was recognized by the USA and EU member countries including Germany, France and the UK. However, Serbia rejected the declaration as did Russia, while Spain refused to support it and China expressed 'grave concern'. As such, Kosovo lacks recognition as a sovereign country by the UN and the EU although on 22 July 2010 the UN International Court of Justice gave an advisory ruling that the independence declaration was legal.

### TERRITORY AND POPULATION

Area: 10,887 sq. km. The capital is Priština. The 1991 and 2002 censuses were not taken. According to the Statistical Office of Kosovo the population in Jan. 2008 was an estimated 2.2m., of whom 92% are Albanians; density, 202 per sq. km. About 5% of the population are Serbs, mostly in the north of the country. Population estimate of Priština, 2002, 564,800. Other major towns include Prizren, Peć and Kosovska Mitrovica.

### SOCIAL STATISTICS

Statistics for 2007: live births, 33,312; deaths, 6,681; marriages, 16,824; divorces, 1,558.

### CONSTITUTION AND GOVERNMENT

The constitution of Serbia defines the autonomous province of Kosovo and Metohija as an 'integral part' of the territory of Serbia with 'substantial autonomy'.

In April 2008 Kosovo's 120-member multi-ethnic parliamentary assembly (first convened on 10 Dec. 2001) approved a new constitution, which came into force on 15 June 2008. Its promulgation followed Kosovo's unilateral declaration of independence from Serbia in Feb. 2008 as the Republic of Kosovo. The constitution envisages a handover of executive power from the UN, which has been responsible for administration in the region since 1999, to the majority ethnic Albanian parliament, under the supervision of an EU team. It also specifies that Kosovo will 'have no territorial claim against, and shall seek no union with' any other state. However, the constitution was rejected by Serbia as it considers Kosovo to be part of its sovereign territory, while Russia claimed any EU involvement would be illegal as it had yet to be approved by the UN Security Council. In June 2008 an ethnic Serb assembly set up a rival administration in Mitrovica. The UN referred the declaration of independence to the International Court of Justice in Oct. 2008.

Kosovo came under interim international administration on 10 June 1999, in accordance with the terms of UN Security Council resolution 1244. The United Nations Interim Administration Mission in Kosovo (UNMIK) administered Kosovo following the arrival of KFOR (NATO-led peacekeeping force) and remained in place even after the Feb. 2008 declaration of independence. The unilateral declaration received a mixed response from the international community, with Serbia, Russia and Spain prominent among those nations who refused to recognize it. In Dec. 2008 EULEX, the European Union Rule of Law Mission in Kosovo, took over responsibility from the UN for policing, justice and customs services, with the agreement of Serbia.

There is a 120-member multi-ethnic parliamentary assembly, which first convened on 10 Dec. 2001. The new assembly brought together representatives of Kosovo's ethnic Albanian majority and its Serbian minority for the first time in more than a decade. Of the 120 members, 100 are directly elected with ten seats reserved for ethnic Serbs and ten for other ethnic minorities.

### RECENT ELECTIONS

Parliamentary elections held on 12 Dec. 2010; turnout was 47.5%. The Democratic Party of Kosovo won 34 seats with 32.1% of the vote, the Democratic League of Kosovo 27 with 24.7%, Self-

Determination 14 with 12.7%, the Alliance for New Kosovo 12 with 11.0%, the New Kosovo Coalition 8, Independent Liberal Party 8 and the United Serbia List 4. Ten other parties won three seats or fewer. The election was seriously hampered by a number of irregularities.

Atifete Jahjaga was elected president by parliament on 7 April 2011, receiving 80 out of a possible 120 votes.

### CURRENT GOVERNMENT

*President:* Atifete Jahjaga; b. 1975 (ind.; since 7 April 2011).

## Vojvodina

**KEY HISTORICAL EVENTS**

After the Battle of Kosovo in 1389 Turkish attacks on the Balkans led to a mass migration of Serbians to Vojvodina. Turkish rule ended after their 1716–18 war with Austria and the Požarevac peace agreement. In exchange for acting as frontier protectors, the Austrians granted the people of Vojvodina religious autonomy. However, in 1848 a short-lived revolution led to a Serbian alliance with the Croats. Vojvodina was briefly declared an independent dukedom. After the First World War Vojvodina became part of the first Yugoslav state. In 1974 President Tito granted autonomy to Vojvodina, but this status was brought into question after Vojvodina's largely anti-Milošević provincial assembly resigned in 1988. In 1989 the Serbian government, led by Slobodan Milošević, stripped Vojvodina of most of its autonomous rights and secured Serbian control. After the fall of Milošević in 2000 there was a growing demand for autonomy, which was granted by statute in Dec. 2009.

**TERRITORY AND POPULATION**

Area: 21,506 sq. km. The capital is Novi Sad. Population of Vojvodina at the 2002 census, 2,031,992 (1,321,807 Serbs, 290,207 Hungarians); density, 94.5 per sq. km. Population of Novi Sad, 2002, 191,405. There are six official languages: Serbian, Hungarian, Slovak, Romanian, Croatian and Rusyn.

**SOCIAL STATISTICS**

In 2003 there were a total of 20,381 live births in Vojvodina, a rate of 9.9 per 1,000 inhabitants. There were 29,741 deaths (14.4 per 1,000) and 11,127 marriages (5.4 per 1,000). Rate of natural increase in 2003: -4.5 per 1,000.

**CONSTITUTION AND GOVERNMENT**

Vojvodina's autonomous status, rescinded by the Yugoslav government in 1990, was restored by statute in Dec. 2009. Novi Sad was defined as the province's chief administrative centre and Vojvodina is permitted to establish representative offices in Europe with the consent of the Serbian government.

**RECENT ELECTIONS**

Parliamentary elections were held on 6 and 20 May 2012. Choice for a Better Vojvodina won 58 seats (48.3% of the vote), ahead of Let's Get Vojvodina Moving with 22 seats and 18.3%, the coalition of the Socialist Party of Serbia, the Party of United Pensioners of Serbia, United Serbia and the Social Democratic Party of Serbia with 13 seats and 10.8%, the League of Social Democrats of Vojvodina with 10 and 8.3%, the Alliance of Vojvodina Hungarians with 7 and 5.8%, the Serbian Radical Party with 5 and 4.2%, the Democratic Party of Serbia with 4 and 3.3% and Vojvodina U-Turn with 1 and 0.8%.

## KEY HISTORICAL EVENTS

The Seychelles were colonized by the French in 1756 to establish spice plantations to compete with the Dutch monopoly. The islands were captured by the English in 1794. Subsequently, Britain offered to return Mauritius and its dependencies (which included the Seychelles) to France if that country would renounce all claims in India. France refused and the Seychelles were formally ceded to Britain as a dependency of Mauritius. In Nov. 1903 the Seychelles archipelago became a separate British Crown Colony. Internal self-government was achieved on 1 Oct. 1975 and independence as a republic within the British Commonwealth on 29 June 1976.

The first president, James Mancham, was deposed in a coup on 5 June 1977. Under the new constitution, the Seychelles People's Progressive Front became the sole legal party. There were several attempts to overthrow the regime but in 1979 and 1984 Albert René was the only candidate in the presidential elections. Under the new constitution approved in June 1993, President René was re-elected against two opponents. He stood down in 2004 and was succeeded by James Michel.

## TERRITORY AND POPULATION

The Seychelles consist of 115 islands in the Indian Ocean, north of Madagascar, with a combined area of 455 sq. km (175 sq. miles) in two distinct groups and a 2010 census population of 90,945. The Granitic group of 40 islands cover 244 sq. km (94 sq. miles); the principal island is Mahé, with 160 sq. km (62 sq. miles) and 78,539 inhabitants (2010 census), the other inhabited islands of the group being Praslin, La Digue, Silhouette, Fregate, North and Denis, which together had 12,406 inhabitants in 2010.

The Outer or Coralline group comprises 75 islands spread over a wide area of ocean between the Mahé group and Madagascar, with a total land area of 211 sq. km (81 sq. miles). The main islands are the Amirante Isles (including Desroches, Poivre, Daros and Alphonse), Coetivy Island and Platte Island, all lying south of the Mahé group; the Farquhar, St Pierre and Providence Islands, north of Madagascar; and Aldabra, Astove, Assumption and the Cosmoledo Islands, about 1,000 km southwest of the Mahé

group. Aldabra (whose lagoon covers 142 sq. km), Farquhar and Desroches were transferred to the new British Indian Ocean Territory in 1965, but were returned by Britain to the Seychelles on the latter's independence in 1976.

Victoria, the chief town, had a census population of 26,450 in 2010. In 2011, 55.9% of the population were urban.

The official languages are Creole, English and French but 91% of the population speak Creole.

## SOCIAL STATISTICS

2006 births, 1,467; deaths, 664. 2006 rates per 1,000 population, birth, 17.3; death, 7.8; infant mortality (2010), 12 per 1,000 births. Annual population growth rate, 2000–05, 0.4%. Life expectancy at birth in 2008 was estimated to be 68 years for males and 79 for females. Fertility rate, 2008, 1.9 births per woman.

## CLIMATE

Though close to the equator, the climate is tropical. The hot, wet season is from Dec. to May, when conditions are humid, but southeast trades bring cooler conditions from June to Nov. Temperatures are high throughout the year. Victoria, Jan. 80°F (26.7°C), July 78°F (25.6°C). Annual rainfall 95" (2,287 mm).

## CONSTITUTION AND GOVERNMENT

Under the 1979 constitution the Seychelles People's Progressive Front (SPPF) was the sole legal Party. There is a unicameral People's Assembly consisting of 34 seats, of which 25 are directly elected and nine are allocated on a proportional basis, and an executive *President* directly elected for a five-year term (with a maximum of three successive terms). A constitutional amendment of Dec. 1991 legalized other parties. A commission was elected in July 1992 to draft a new constitution. The electorate was some 50,000; turnout was 90%. The SPPF gained 14 seats on the commission, the Democratic Party, eight; the latter, however, eventually withdrew. At a referendum in Nov. 1992 the new draft constitution failed to obtain the necessary 60% approval votes. The commission was reconvened in Jan. 1993. At a further referendum on 18 June 1993 the constitution was approved by 73.6% of votes cast. The elections of 1993 were the first multiparty ones since 1974.

## National Anthem

'Koste Seselwa' ('Come Together Seychellois'); words and tune by D. F. M. André and G. C. R. Payet.

## RECENT ELECTIONS

In parliamentary elections held on 29 Sept.–1 Oct. 2011 the ruling Seychelles People's Progressive Front (SPPF) won all 31 available seats with 88.6% of the vote. The Popular Democratic received 10.9% of the vote but failed to win any seats. The main opposition party, the Seychelles National Party, boycotted the election. Turnout was 74.3%; 31.9% of the votes cast were spoiled.

In presidential elections held on 19–21 May 2011 incumbent James Michel (People's Party) won 55.5% of the vote against Wavel Ramkalawan (Seychelles National Party) with 41.4%, Philippe Boullé (ind.) with 1.7% and Ralph Volcere (New Democratic Party) 1.4%. Turnout was 85.3%.

## CURRENT LEADERS

### James Michel

#### *Position*

President

#### *Introduction*

Former Vice-President James Michel came to power in April 2004, handpicked by then president France-Albert René to succeed to the presidency on René's retirement after 27 years in power. Michel had been vice-president since 1996 and had previously held a variety of ministerial positions. He was elected to the post in July 2006 and re-elected in May 2011.

#### *Early Life*

James Alix Michel was born in the Seychelles on 18 Aug. 1944. He was a teacher before deciding to pursue a career in politics. His profile rose in the mid-1970s because of his involvement in the country's booming tourism industry.

In 1976, just before independence, he joined René's left-of-centre Seychelles People's United Party (SPUP)—renamed the Seychelles People's Progressive Front (SPPF) in 1978. He was a member of the SPUP's central committee when the party staged a bloodless coup in 1977, overthrowing the country's first president, James Mancham, and replacing him with René. There followed a 16-year one-party socialist dictatorship, during which time Michel held a series of important ruling party and ministerial positions. For several periods he was in charge of the highly-regulated Seychellois economy. On René's retirement in April 2004, Michel was sworn in as president.

#### *Career in Office*

Despite his allegiance to René, Michel was under pressure to speed up the country's democratization process, which had begun with multi-party elections in 1993. He also pledged to introduce more open political dialogue, particularly over matters concerning the Seychellois economy, and to develop the private sector. In Jan. 2005 Michel granted the Emirates Group the rights to operate non-stop flights three times a week between the Seychelles and Dubai in order to enhance the tourism industry and to increase trade for the business and cargo communities.

In March 2005 Michel detailed his foreign policy, underpinned by a desire to cement stronger regional ties in the Indian Ocean region—particularly in light of the Seychelles' exit in July 2004 from the Southern African Development Community, ostensibly because of high membership fees. He particularly focused on strengthening relations with Mauritius, working alongside the then Mauritian prime minister, Paul Bérenger, to strengthen the Indian Ocean Commission. Michel has favoured increased promotion of the Seychelles as a high-quality and safe tourist resort, and sought to make the country a leader in environmental issues.

In June 2005 Michel announced plans for a new national pension fund and a scheme to set-up a savings account of R1,000

for every Seychellois child, both of which came into effect in Jan. 2006.

After a close electoral contest in July 2006 he retained the presidency, defeating his Seychelles National Party rival. In the May 2007 parliamentary elections the SPPF retained its majority. Michel brought the poll forward after opposition MPs had boycotted parliamentary proceedings over moves to ban political parties (and also religious groups) from owning radio stations.

Confronted by a balance of payments and public debt crisis in 2008, Michel launched an economic reform programme with the help of the International Monetary Fund, which approved a two-year US\$26m. support arrangement in Nov. As part of the programme, the government floated the currency and lifted foreign exchange controls. In Jan. 2009 he appealed for debt relief from international creditors as the Seychelles economy was hit by reduced tourist traffic and the effects of the global financial crisis. In Nov. that year the World Bank agreed a US\$9m. loan to help restore economic stability.

In response to the expansion of Somali piracy in the Indian Ocean, the Seychelles government entered into agreements with European Union countries and the USA to enhance naval and air patrol and surveillance to deter attacks on international shipping.

In Aug. 2010 the Seychelles ratified the statute establishing the International Criminal Court.

Michel was re-elected for a further term in May 2011 and his party won all 31 seats in parliamentary polling in Sept.–Oct. following an opposition boycott.

## DEFENCE

The Defence Force comprises all services. Personnel (2007) Army, 200; paramilitary national guard, 250; paramilitary coastguard, 200 including 80 marines.

Defence expenditure totalled US\$8m. in 2008 (US\$98 per capita), representing 0.9% of GDP.

## Coastguard

The Seychelles Coast Guard superseded the former navy and air force in 1992. Based at Port Victoria it operates nine patrol and coastal combatants.

## ECONOMY

Services accounted for 71.5% of GDP in 2006, industry 25.5% and agriculture 3.0%.

### Overview

Since the early 1990s the government has favoured a free market economy. Tourism forms the backbone of the economy followed by the fisheries sector, where tuna fishing dominates. More than 70% of foreign exchange earnings derive from tourism, which employs 30% of the labour force. Aware of its over-reliance on imports, the government is making efforts to diversify the economy by encouraging agriculture and domestic (small-scale) industrial production. In recent years the country has attempted to develop an offshore sector as a third pillar of the economy and to position itself as a provider of business and financial services.

The economy suffered a balance of payments and debt crisis in 2008, although strong fiscal adjustment in 2009 and 2010 as well as international assistance have helped the economy recover. Tourism, communications and construction have been the main drivers of recent growth. The debt level, as well as piracy, climate change and increasing food and energy prices, challenge longer-term recovery.

### Currency

The unit of currency is the *Seychelles rupee* (SCR) divided into 100 cents. In July 2005 foreign exchange reserves were US\$44m. and total money supply was 1,220m. rupees. Following deflation in 2010 of 2.4% there was inflation in 2011 of 2.6%. 2008 and 2009 had seen inflation of 37.0% and 31.7% respectively.

## Budget

Fiscal budget in 1m. rupees, for calendar years:

|                           | 2003    | 2004    | 2005    | 2006    |
|---------------------------|---------|---------|---------|---------|
| Total revenues and grants | 1,867.2 | 1,891.1 | 2,167.6 | 2,476.2 |
| Total expenditures        | 1,597.2 | 1,788.8 | 1,815.6 | 2,301.8 |

VAT at 15% was introduced on 1 Jan. 2013.

## Performance

There was a recession in both 2003 and 2004, with the economy contracting by 5.9% and 2.9% respectively. In 2005 the economy recovered to grow by 8.0%. Since then there has been growth of 8.9% in 2006 and 9.7% in 2007 but 2008 saw the economy shrink by 1.0%. There was then real GDP growth of 0.5% in 2009, 6.7% in 2010 and 5.1% in 2011. Total GDP was US\$1.0bn. in 2011.

## Banking and Finance

The Central Bank of Seychelles (established in 1983; *Governor*, Caroline Abel), which is the bank of issue, and the Development Bank of Seychelles provide long-term lending for development purposes. There are also six commercial banks, including two local banks (the Seychelles Savings Bank and the Seychelles International Mercantile Banking Co-operation or NOUVOBANQ), and four branches of foreign banks (Barclays Bank, Banque Française Commerciale, Habib Bank and Bank of Baroda).

Foreign debt totalled US\$1,308m. in 2007.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 12.4 tonnes per capita in 2008.

### Electricity

Installed capacity on Mahé and Praslin combined was an estimated 95,000 kW in 2007. Production in 2007 was 271m. kWh and consumption per capita 3,071 kWh.

### Water

There are two raw water reservoirs, the Rochon Dam and La Gogue Dam, which have a combined holding capacity of 1.05bn. litres.

### Agriculture

Since the rise of the tourism industry in the 1970s there has been a general decline in the production of traditional cash crops, notably cinnamon bark, of which 158 tonnes were exported in 2002 (down from 289 tonnes in 1998). 261 tonnes of tea (green leaf) were produced in 2003. Other crops grown for local consumption include bananas, oranges, cassava, sweet potatoes, paw-paw, yams and vegetables. The staple food crop, rice, is imported from Asia. Livestock, 2003 estimates: 18,000 pigs, 5,000 goats, 1,000 cattle and 1m. chickens. In 2002 there were approximately 1,000 ha. of arable land and 6,000 ha. of permanent crop land.

### Forestry

In 2010 forests covered 41,000 ha., or 88% of the total land area. The Ministry of Environment has a number of ongoing forestry projects that aim at preserving and upgrading the local system. There are also a number of terrestrial nature reserves including three national parks, four special reserves and an 'area of outstanding natural beauty'.

### Fisheries

The fisheries sector is the Seychelles' largest foreign exchange earner. In 2006 it accounted for 52% of export revenue. Total catch in 2010 was 87,108 tonnes, exclusively from sea fishing. 2006 fish production (in tonnes) included: canned tuna, 40,222; fish landed, 4,050; crustaceans, 606. Fisheries exports in 2006 amounted to 1,096.8m. rupees, of which: canned tuna, 1,030.4m.; fish meal 25.1m.; frozen prawns, 23.7m.

## INDUSTRY

Local industry is expanding, the major development in recent years being in tuna canning; in 2003 output totalled 36,436 tonnes, up from 7,500 tonnes in 1995. This is followed by brewing, with 7.1m. litres in 2003. Other main activities include production of cigarettes (50m. in 2003), dairy production, prawn production, paints and processing of cinnamon barks.

## Labour

Some 41% of employed persons work in the services sector. In 2003, 7,195 people worked in trade, restaurants and hotels. In 2003, 17,425 were formally employed in the private sector, 11,973 in the public sector and 5,463 in the parastatal sector.

## INTERNATIONAL TRADE

### Imports and Exports

In 2005 imports (c.i.f.) totalled 3,712.2m. rupees (2,731.8m. rupees in 2004); exports (f.o.b.), 1,868.6m. rupees (1,599.9m. rupees in 2004). Domestic exports constitute around two-thirds of exports and re-exports a third. Principal imports: mineral fuel; food and live animals; machinery and transport equipment; manufactured goods; chemicals. Principal origins of imports, 2005: Saudi Arabia (23.0%), Spain (7.8%), Singapore (7.6%), France (6.5%). Principal exports: canned tuna; petroleum products; medicaments and medical appliances; fish meal (animal feed); frozen prawns. Main export markets (for domestic exports), 2005: UK (45.4%), France (23.1%), Italy (12.4%), Germany (10.2%).

## COMMUNICATIONS

### Roads

In 2006 there were 502 km of roads, of which 96.0% were surfaced. There were 6,800 private cars in 2006 (80 per 1,000 inhabitants), 2,600 commercial vehicles, 300 taxis and 215 buses.

### Rail

There are no railways in the Seychelles.

### Civil Aviation

Seychelles International airport is on Mahé. In 2003 Air Seychelles flew on domestic routes and to Comoros, Dubai, Frankfurt, Johannesburg, London, Malé, Mauritius, Mumbai, Munich, Paris, Réunion, Rome, Singapore and Zürich. In 2003 scheduled airline traffic of Seychelles-based carriers flew 12m. km, carrying 413,000 passengers (187,000 on international flights). In 2001 Seychelles International handled 598,133 passengers (330,726 on international flights) and 5,607 tonnes of freight.

### Shipping

The main port is Victoria, which is also a tuna-fishing and fuel and services supply centre. In Jan. 2009 there were 12 ships of 300 GT or over registered, totalling 165,000 GT. Sea freight (2006) comprised: imports, 534,000 tonnes; exports, 4,604,000 TEUs (twenty foot equivalent units); transshipments (fish), 74,000 tonnes.

### Telecommunications

There were 100,000 telephone subscribers in 2007, or 1,154.7 per 1,000 population. Mobile phone subscribers numbered 77,300 in 2007. There were 32,000 internet users (including 3,500 broadband subscribers) in 2007.

## SOCIAL INSTITUTIONS

### Justice

The death penalty was abolished for all crimes in 1993. The population in penal institutions in 2007 was 221 (270 per 100,000 of national population).

### Education

Adult literacy was an estimated 91.8% in 2009 (91.4% among males and 92.3% among females). Education is free from five to

12 years in primary schools, and 13 to 17 in secondary schools. There are three private schools providing primary and secondary education and one dealing only with secondary learning. Education beyond 18 years of age is funded jointly by the government and parents. The University of Seychelles opened in Sept. 2009. In 2007 there were 8,864 pupils and 711 teaching staff in primary schools, 7,816 pupils and 588 teaching staff in secondary schools and (2003) 1,652 students and 193 teaching staff at polytechnic level.

Public expenditure on education came to 6.6% of GNI in 2006 or 12.6% of total government spending.

#### Health

In 2003 there were 107 doctors, 16 dentists and 422 nurses. In 2003 there were seven hospitals with 419 beds. The health service is free.

#### Welfare

Social security is provided for people of 63 years and over, for the disabled and for families needing financial assistance. There is also assistance via means testing for those medically unfit to work and for mothers who remain out of work for longer than their designated maternity leave. Orphanages are also subsidized by the government.

#### RELIGION

87% of the inhabitants are Roman Catholic, the remainder of the population being followers of other religions (mainly Anglicans, with some 7th Day Adventists, Bahais, Muslims, Hindus, Pentecostals, Jehovah's Witnesses, Buddhists and followers of the Grace and Peace church).

#### CULTURE

##### World Heritage Sites

Entered on the UNESCO World Heritage List in 1982, the four coral islands of Aldabra Atoll protect a shallow lagoon. A heritage site since 1983, the Vallée de Mai Nature Reserve is a natural palm forest on the small island of Praslin.

#### Press

In 2006 there was one daily newspaper (circulation of 3,000), as well as three weekly papers.

#### Tourism

Tourism is the main foreign exchange earner. Visitor numbers were a record 208,034 in 2012, up from 194,753 in 2011.

#### Festivals

There are numerous religious festivals including Kavadi, an annual procession organized by the Hindu Association of Seychelles. Secular festivals include the annual Youth Festival, Jazz Festival, Creole Festival, Kite Festival and the Subios Festival, a celebration of the underwater world.

### KEY HISTORICAL EVENTS

The ancestors of the Bulom, Nalou, Baga and Krim people are thought to have been the earliest settlers in coastal Sierra Leone. The Kissi and Gola lived inland to the east and the Limba inhabited the foothills of the Wara Wara mountains from at least the 10th century AD. Following the break-up of the Malian empire in the late 14th century much of Sierra Leone was settled by the Mande whose domination and interaction with the original inhabitants gave rise to new ethnic groups, including the Vai and Loko.

The Portuguese mariner Alvaro Fernandez sailed into the Rokel estuary near present-day Freetown in 1447 and located a source of fresh water. The inlet became a trading post for Portuguese, Dutch, French and British explorers on their way to and from India. Having established plantations in America and the Caribbean, European colonists sought labour from the Atlantic slave trade, much of it centred on Sierra Leone. In 1672 British traders from the Royal African Company established trading forts along the coast, although they repeatedly came under attack from European rivals.

When Britain outlawed slavery in 1772 the government established Granville Town (later Freetown) as a home for freed slaves. In 1791 the Sierra Leone Company was founded as a trading concession, with Sierra Leone becoming a British crown colony in 1808. By 1850 more than 40,000 freed slaves, many of them from Nova Scotia and Jamaica, had settled in Freetown and surrounding areas, intermarrying with natives and Europeans to

forge the 'Krio' culture. British administrators and Krio traders led expeditions inland in the late 19th century and on 21 Aug. 1896 the hinterland was declared a British protectorate, governed by Frederic Cardew. The early years of the 20th century saw the development of the country's interior while Lebanese merchants increasingly dominated business and trade.

Milton Margai became the prime minister in 1960 and led the country to independence on 27 April 1961. In 1967 Dr Siaka Stevens' All People's Congress (APC) came to power via the ballot box, despite an attempted military coup. Sierra Leone became a republic on 19 April 1971 with Stevens as executive president. Following a referendum in June 1978 a new constitution was instituted under which the ruling APC became the sole legal party.

On 28 Nov. 1985 Joseph Saidu Momoh succeeded Stevens as president. He presided over an economic collapse and the rise of the Revolutionary United Front (RUF). Under the leadership of Foday Sankoh (and with alleged links to the Liberian president, Charles Taylor), the RUF began taking control of diamond mines in the east of the country. President Momoh was overthrown in a military coup led by Valentine Strasser on 29 April 1992 and a National Provisional Ruling Council (NPRC) was set up, although it was unable to prevent the country's slide into civil war. By 1995 the RUF controlled much of the countryside and the NPRC sought assistance from foreign mercenaries.

The NPRC agreed to presidential and parliamentary elections in April 1996 to establish a civilian government. Ahmad Tejan Kabbah became president but was ousted in May 1997 by the Armed Forces Revolutionary Council, led by Maj. Johnny Paul Koroma. In Feb. 1998 a Nigerian-led intervention force (ECOMOG) launched an offensive against the military junta. On 10 March President Kabbah returned from exile in Guinea promising a 'new beginning' but in Jan. 1999 the country again erupted into civil war.

In July 1999 the government reached an agreement with the rebel movement to bring the civil war to an end. Under the terms of the accord, the RUF was to gain four key government posts along with control of the country's mineral resources in return for surrendering its weapons. However, civil war resumed in early 2000 and, responding to a government appeal, British forces were sent to back up the UN peacekeeping force (UNAMSIL). Foday Sankoh was captured and handed over to UN forces in May 2000. In July 2001 the RUF formally recognized the civil government of President Kabbah. In Jan. 2002 Kabbah declared the war over. Re-elected in May 2002, he has been at the forefront of reconstruction efforts although corruption remains an obstacle to progress. The last UN peacekeeping troops left Sierra Leone in Dec. 2005.

### TERRITORY AND POPULATION

Sierra Leone is bounded on the northwest, north and northeast by Guinea, on the southeast by Liberia and on the southwest by the Atlantic Ocean. The area is 71,740 sq. km (27,699 sq. miles). Population (census 2004), 4,976,871; density, 69-4 per sq. km. In 2011, 38-8% of the population were urban.

The UN gives a projected population for 2015 of 6-51m.

The capital is Freetown, with a 2004 census population of 772,873.

Sierra Leone is divided into three provinces and one area:

|                   | Sq. km | Census 2004 | Capital  | Census 2004 |
|-------------------|--------|-------------|----------|-------------|
| Eastern Province  | 15,553 | 1,191,539   | Kenema   | 128,402     |
| Northern Province | 35,936 | 1,745,553   | Makeni   | 82,840      |
| Southern Province | 19,694 | 1,092,657   | Bo       | 149,957     |
| Western Area      | 557    | 947,122     | Freetown | 772,873     |

The provinces are divided into districts as follows: Bo, Bonthe, Moyamba, Pujehun (Southern Province); Kailahun, Kenema, Kono (Eastern Province); Bombali, Kambia, Koinaduga, Port Loko, Toukolili (Northern Province).

The principal peoples are the Mendes (26% of the total) in the south, the Temnes (25%) in the north and centre, the Konos, Fulanis, Bulloms, Korankos, Limbas and Kissis. English is the official language; a Creole (Krio) is spoken.

## SOCIAL STATISTICS

2008 estimates: births, 224,000; deaths, 88,000. Estimated birth rate in 2008 was 40.3 per 1,000 population; estimated death rate, 15.8. Annual population growth rate, 2000–08, 3.4%. Expectation of life at birth in 2007 was 48.5 years for females and 46.0 years for males. The World Health Organization's *World Health Statistics 2009* ranked Sierra Leone in last place in a 'healthy life expectancy' list, with an expected 35 years of healthy life for babies born in 2007. Infant mortality was 114 per 1,000 live births in 2010 (the highest in the world). Fertility rate, 2008, 5.2 births per woman.

## CLIMATE

A tropical climate, with marked wet and dry seasons and high temperatures throughout the year. The rainy season lasts from about April to Nov., when humidity can be very high. Thunderstorms are common from April to June and in Sept. and Oct. Rainfall is particularly heavy in Freetown because of the effect of neighbouring relief. Freetown, Jan. 80°F (26.7°C), July 78°F (25.6°C). Annual rainfall 135" (3,434 mm).

## CONSTITUTION AND GOVERNMENT

In a referendum in Sept. 1991 some 60% of the 2.5m. electorate voted for the introduction of a new constitution instituting multi-party democracy. The constitution has been amended several times since. The president, who is both head of state and head of government, is elected by popular vote for not more than two terms of five years. There is a 124-seat *National Assembly* (112 members elected by popular vote and 12 filled by paramount chiefs).

There is a *Supreme Council of State (SCS)* and a *Council of State Secretaries*.

## National Anthem

'High We Exalt Thee, Realm of the Free'; words by C. Nelson Fyle, tune by J. J. Akar.

## RECENT ELECTIONS

Presidential and parliamentary elections were held on 17 Nov. 2012.

In the presidential elections, Ernest Bai Koroma of the All People's Congress (APC) received 58.7% of the vote, Julius Maada Bio of the Sierra Leone People's Party (SLPP) 37.4%, Charles Margai of the People's Movement for Democratic Change (PMDC) 1.3%, Joshua Albert Carew of the Citizens Democratic Party 1.0%, Eldred Collins of the Revolutionary United Front 0.6%, Gibrilla Kamara of the People's Democratic Party 0.4%, Kandeh Baba Conteh of the Peace and Liberation Party 0.3%, Mohamed Bangura of the United Democratic Movement 0.2% and James Obai Fullah of the United National People's Party 0.2%. As Ernest Bai Komora received the 55% required to win outright a potential second round run-off was not needed. Turnout was 87.3%.

In the parliamentary elections, the All People's Congress won 67 of 124 seats with 53.7% of the vote and the Sierra Leone People's Party 42 with 38.3%; 12 seats were allocated for elected chiefs and three remained vacant.

## CURRENT LEADERS

### Ernest Bai Koroma

*Position*  
President

### Introduction

Ernest Bai Koroma became president in Sept. 2007 following victory in the second round of elections. He won re-election outright in the first round of voting in Nov. 2012. He had previously run unsuccessfully for the presidency in 2002.

### Early Life

Koroma was born in 1953 in Bombali, northern Sierra Leone. Though the region is predominantly Muslim, Koroma is a Christian. After primary and secondary schooling, he graduated in 1976 from Fourah Bay College, part of the University of Sierra Leone, in Freetown. He then worked as a teacher before joining the National Insurance Company in 1978. In 1985 he moved to the Reliance Insurance Trust Corporation (Ritcorps), becoming managing director in 1988 and holding the post for 14 years.

A latecomer to politics, Koroma was chosen as the APC's presidential candidate in March 2002 but was beaten into second place by Ahmad Tejan Kabbah of the SLPP. Under Koroma's leadership the APC grew in popularity and won a landslide victory in the 2004 local government elections, winning almost all seats in the densely-populated Western Area (which includes Freetown). In June 2005 Koroma was briefly stripped of his party leadership after the Supreme Court found him guilty of illegally altering his party's constitution. However, he was unanimously re-elected leader in Sept. 2005. Having spent most of his life in Freetown, his support base was strongest in the north though he also made inroads in the south ahead of the 2007 presidential election. In a run-off in Sept. 2007 Koroma won against Solomon Berewa and was sworn in on 17 Sept.

### Career in Office

Koroma took over an almost bankrupt country, at the time ranked last out of 177 in the Human Development Index world rankings. He had to maintain the peace process that followed ten years of civil war which ended in 2001. After his inauguration, Koroma visited neighbouring Guinea and Liberia, which subsequently granted citizenship to 2,600 Sierra Leonean refugees.

Key challenges facing Koroma's presidency included promoting economic development and rejuvenating energy and public services. He pledged a zero tolerance approach to corruption and in Nov. 2007 his government published a report detailing inadequacies in tax collection, health care and security services, as well as suspect loans.

Also in Nov. 2007 Koroma signed a commercial investment deal to double the country's rutile (titanium ore) production capacity and secured China's cancellation of US\$22m. worth of debt. A large offshore oil discovery was reported in 2009 and in 2010 large iron ore extraction leases were granted to two British companies.

In April 2011 Sierra Leone marked 50 years of independence from Britain.

Koroma was re-elected president for a second term in Nov. 2012, with the APC securing a majority in parliamentary polling held at the same time.

## DEFENCE

In 2008 military expenditure totalled US\$14m. (US\$3 per capita), representing 0.6% of GDP.

The UN peacekeeping force (UNAMSIL) left Sierra Leone in Dec. 2005 after monitoring the ceasefire for six years. It was replaced in Jan. 2006 by the United Nations Integrated Office (UNIOSIL), and this in turn was replaced by the United Nations Integrated Peacebuilding Office in Sierra Leone (UNIPSIL) in Aug. 2008. UNIPSIL was appointed to help support the continuing peace process; its current mandate runs until 31 March 2014, when it is to draw down its operations.

## Army

Following the civil war, the Army has disbanded and a new National Army has been formed with a strength of 10,500.

## Navy

Based in Freetown there is a small naval force of around 200 operating four patrol and coastal combatants.

## ECONOMY

Agriculture accounted for 47.4% of GDP in 2006 (one of the highest percentages of any country), industry 25.5% and services 27.1%.

## Overview

The economy has made substantial progress since the end of civil war in 2002. Real GDP grew by just over 7% on average between 2004 and 2007, aided by remittances and investments from citizens working abroad. Agriculture, mining, construction and the services sectors make up the bulk of the economy. External assistance and foreign aid have helped finance the current account deficit, while programmes such as the Poverty Reduction and Growth Facility (2001-04) have improved public finance management.

However, growth decelerated in 2008 and 2009 as a result of the global economic downturn. In June 2010, the IMF approved a three-year Extended Credit Facility to spur growth in the medium-term. Structural reform priorities include improving tax administration, broadening the tax base, developing deeper financial services and strengthening public financial management. Social indicators remain poor, with the economy ranked 180th of 187 countries in the Human Development Index. Poverty is widespread, particularly in rural areas where 79% are estimated to live below the poverty line.

## Currency

The unit of currency is the *leone* (SLL) of 100 *cents*. Inflation was 17.8% in 2010 and 18.5% in 2011. Exchange controls were liberalized in 1993. Total money supply in July 2005 was 346,027m. leones and foreign exchange reserves were US\$94m.

## Budget

In 2007 total revenue was 1,179bn. leones (42.7% grants and 21.8% import duties) and total expenditure 1,222bn. leones (63.4% current expenditures).

## Performance

GNP per capita was US\$183 in 2000 compared to US\$536 in 1984, although it has since risen back up to US\$322 in 2007. There was positive growth in 2000 for the first time since 1994, with a rate of 3.8%, rising to 18.2% in 2001 and further to 27.4% in 2002. Real GDP growth was 3.2% in 2009, 5.3% in 2010 and 6.0% in 2011. Total GDP in 2011 was US\$2.2bn. Sierra Leone is among the world's bottom five countries in income and life expectancy.

## Banking and Finance

The bank of issue is the Bank of Sierra Leone which was established in 1964 (*Governor*, Sheku Sambadeen Sesay). There are four commercial banks (two foreign).

Foreign debt totalled US\$778m. in 2010, representing 40.8% of GNI.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.2 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Sierra Leone 147th in the world out of 149 countries analysed, with 40.0%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

Installed capacity was an estimated 52,000 kW in 2007. Production in 2007 was around 60m. kWh; consumption per capita in 2007 was an estimated 11 kWh.

### Minerals

The chief minerals mined are diamonds (estimated at 692,000 carats in 2005) and rutile (73,600 tonnes in 2006). There are also deposits of gold, iron ore and bauxite. The presence of rich diamond deposits partly explains the close interest of neighbouring countries in the politics of Sierra Leone.

### Agriculture

In 2007 the agricultural population was an estimated 3.34m., of which approximately 1.26m. were economically active. Cattle production is important in the north. Production (2003 estimates, in 1,000 tonnes): cassava, 377; rice, 250; palm oil, 36; bananas and plantains, 30; sweet potatoes, 25; sugarcane, 24. In 2007 there were an estimated 900,000 ha. of arable land and 80,000 ha. of permanent crops.

Livestock (2003 estimates): cattle, 400,000; sheep, 375,000; goats, 220,000; pigs, 52,000; chickens, 8m.

### Forestry

In 2010 forests covered 2.73m. ha., or 38% of the total land area. Timber production in 2007 was 5.60m. cu. metres.

### Fisheries

In 2008, 203,582 tonnes of fish were caught, of which marine fish 93% and freshwater fish 7%.

## INDUSTRY

There are palm oil and rice mills; sawn timber, joinery products and furniture are produced.

## Labour

The economically active workforce was 1,935,000 in 2004 (51% males). In 2004 around two-thirds of the economically active

population were engaged in agriculture, fisheries, forestry and hunting. 68,250 persons were registered unemployed in 2004.

## INTERNATIONAL TRADE

### Imports and Exports

Total trade for 2008: imports (c.i.f.), 1,590,338m. leones; exports (f.o.b.), 641,797m. leones. Main exports are bauxite, diamonds, gold, coffee and cocoa. A UN-mandated diamond export certification scheme is in force. The Security Council has commended Sierra Leone's government for its efforts in monitoring trade to prevent diamonds from becoming a future source of conflict. The main import suppliers in 2001 were the UK (25.3%), Netherlands (10.1%), USA (7.9%), Germany (6.3%). Principal export markets in 2001 were Belgium (40.6%), USA (9.1%), UK (8.5%), Germany (7.8%).

## COMMUNICATIONS

### Roads

There were 11,300 km of roads in 2007 (8% paved). Much of the damage to the road network as a result of the civil war has now been repaired. In 2007 there were 16,400 passenger cars in use and 14,100 vans and lorries. There were 71 deaths as a result of road accidents in 2007.

### Civil Aviation

Freetown Airport (Lungi) is the international airport. The national carrier is Leone Airways, operated by Arik Air (a Nigerian airline) under a joint venture agreement. In 2003 scheduled airline traffic of Sierra Leone-based carriers flew 1m. km, carrying 14,000 passengers (all on international flights).

### Shipping

The port of Freetown has one of the largest natural harbours in the world. Iron ore is exported through Pepel, and there is a small port at Bonthe. In Jan. 2009 there were 248 ships of 300 GT or over registered, totalling 547,000 GT.

### Telecommunications

In 2008 Sierra Leone had 31,500 main (fixed) telephone lines. The country's telecommunications network was virtually destroyed during the civil war, but since then the sector has been one of Sierra Leone's main successes. In 2007 internet users numbered 13,000. There were 1,009,000 mobile phone subscribers in 2008, up from 67,000 in 2002.

## SOCIAL INSTITUTIONS

### Justice

The High Court has jurisdiction in civil and criminal matters. Subordinate courts are held by magistrates in the various districts. Native Courts, headed by court Chairmen, apply native law and custom under a criminal and civil jurisdiction. Appeals from the decisions of magistrates' courts are heard by the High Court. Appeals from the decisions of the High Court are heard by the Sierra Leone Court of Appeal. Appeal lies from the Sierra Leone Court of Appeal to the Supreme Court, which is the highest court.

The death penalty is in force, but has not been used since Oct. 1998 when 24 soldiers were executed for their part in the May 1997 coup.

### Education

The adult literacy rate in 2008 was 40%. Primary education is partially free but not compulsory. In 2004-05 there were 4,295

primary schools with 1,286,074 pupils and 19,316 teachers, and 282 secondary schools with 198,827 pupils and 6,622 teachers. There were also 196 technical/vocational establishments with 18,686 pupils and 918 staff. As a result of the 2005 Universities Act there are now two universities. The University of Sierra Leone comprises Fourah Bay College, the College of Medicine and Allied Health Sciences, and the Institute of Public Administration and Management. Njala University, until 2005 a constituent college of the University of Sierra Leone, is now an autonomous institution.

In 2005 public expenditure on education came to 3.9% of GNI.

### Health

In 2000 there were 145 general practitioners, 1,331 nurses and five dentists. In 2000 there were 64 hospitals with 692 beds.

## RELIGION

There were 2.49m. Muslims in 2001 (just under half the population). Traditional animist beliefs persist; there is also a Christian minority.

## CULTURE

### Press

In 2006 there were ten paid-for dailies with an average circulation of 22,000, plus 31 non-dailies. *For di People*, the oldest independent newspaper, had the highest circulation in 2006 (5,000).

### Tourism

Tourism is in the initial stages of development. In 2007 there were 32,000 non-resident tourist arrivals by air, bringing revenue of US\$22m. (excluding passenger transport).

## KEY HISTORICAL EVENTS

The first known written account of the island of Singapore was by a Chinese explorer in the 3rd century AD. In a strategic location at the tip of the Malay peninsula, the island is likely to have been a port of call for sailors navigating the Melaka straits, although there is no evidence of settlement until the town of Temasek was described in the 13th century. Temasek was controlled by the Srivijaya Empire, centred on Palembang in Sumatra, during the 14th century, before falling to the Javanese Majapahit Empire. When Sultan Iksander Shah founded the Melaka Sultanate in the 1390s, he established a trading post on Singapore Island. After Portuguese forces sacked Melaka in 1511 the island came under the influence of the newly-created Johor Sultanate. In 1613 Singapore's main settlement was burnt down by Portuguese raiders and the island slipped into obscurity, with the ports of Melaka and Johor dominating the lucrative shipping routes that linked Europe and India with China and the East Indies.

In 1819 Sir Thomas Stamford Raffles, an administrator of the British East India Company based at the garrison of Bencoolen (Benkulu) in southwest Sumatra, established a trading settlement on Singapore Island to challenge Dutch supremacy of the region's ports. Raffles negotiated a deal with the ruling Sultan of Johor and left Col. William Farquhar in charge of the new settlement which was designated a free port. It grew rapidly, attracting Chinese, Malay, Bugis and Arab merchants who wanted to avoid the trade restrictions imposed at Dutch-controlled ports. In Aug. 1824 claims to Singapore by Britain and the East India Company were confirmed in treaties with the Dutch government and the Sultanate of Johor. Two years later Penang, Melaka and Singapore were combined as the Straits Settlements. With the opening of the Suez Canal in 1869 and the advent of ocean-going steamships, an era of prosperity began for Singapore. Growth was fuelled by the export of tin and rubber from the Malay peninsula, facilitated by the construction of a railway linking Singapore with Bangkok.

On 15 Feb. 1942, after capturing Malaya from the British in less than two months, Singapore was occupied by Japanese troops. Britain's return after Japan's surrender in 1945 was accompanied by growing nationalist sentiment. Britain formed the Federation of Malaya, administered by a high commissioner in Kuala Lumpur, and a separate Crown Colony of Singapore with a civil administration. Elections in both states in March 1948 were followed by outbreaks of anti-British violence, with the ethnic Chinese-dominated Malayan Communist Party demanding immediate independence and equality for all races. The British responded to 'the Emergency' by imposing hard-line restrictions on left-wing groups. Nevertheless, there was a gradual move towards self-government in Singapore in the 1950s and in June 1959, following the victory of the People's Action Party in the first legislative elections, Lee Kuan Yew became Singapore's first prime minister.

Singapore joined the Federation of Malaysia when it was formed in Sept. 1963 but tensions soon rose and in Aug. 1965 the Malaysian prime minister, Tunku Abdul Rahman, expelled Singapore from the Federation. It became an independent republic, which, under the authoritarian leadership of Lee Kuan Yew, saw rapid and sustained export-driven growth. Lee's resignation in Nov. 1990 saw Goh Chok Tong become prime minister. He served until Aug. 2004, when Lee Hsien Loong succeeded him.

## TERRITORY AND POPULATION

The Republic of Singapore consists of Singapore Island and some 63 smaller islands. Singapore Island is situated off the southern extremity of the Malay peninsula, to which it is joined by a 1.1 km causeway carrying a road, railway and water pipeline across the Strait of Johor and by a 1.9 km bridge at Tuas, opened on 2 Jan. 1998. The Straits of Johor between the island and the mainland are 914 metres wide. The island is 682.3 sq. km in area, including the offshore islands.

Census of population (2000): Chinese residents 2,505,379 (76.8%), Malays 453,633 (13.9%), Indians 257,791 (7.9%) and others 46,406 (1.4%); resident population, 3,263,209. Total population in June 2010 was 5,076,700. The population is 100% urban. Population density, 7,441 per sq. km.

The UN gives a projected population for 2015 of 5.38m.

Malay, Chinese (Mandarin), Tamil and English are the official languages; Malay is the national language and English is the language of administration.

## SOCIAL STATISTICS

2008 births, 39,826; deaths, 17,222. Birth rate per 1,000 population, 2008, 10.2; death rate, 4.4. Annual population growth rate, 2000–05, 1.5%; infant mortality, 2010, two per 1,000 live births (one of the lowest in the world); life expectancy, 2007, 77.8 years for males and 82.6 years for females. Fertility rate, 2008, 1.3 births per woman. In 2006 the most popular age range for marrying was 25–29 years for both males and females.

## CLIMATE

The climate is equatorial, with relatively uniform temperature, abundant rainfall and high humidity. Rain falls throughout the year but tends to be heaviest from Nov. to Jan. Average daily temperature is 26.8°C with a maximum daily average of 30.9°C and a minimum daily average of 23.9°C. Mean annual rainfall is 2,345 mm.

## CONSTITUTION AND GOVERNMENT

Singapore is a republic with a parliamentary system of government. The organs of state—the executive, the legislature and the judiciary—are provided for by a written constitution. The Constitution is the supreme law of Singapore and any law enacted after the date of its commencement, which is inconsistent with its provisions, is void. The present constitution came into force on 3 June 1959 and was amended in 1965.

The Head of State is the *President*. The administration of the government is vested in the Cabinet headed by the *Prime Minister*. The Prime Minister and the other Cabinet Members are appointed by the President from among the Members of Parliament (MPs). The Cabinet is collectively responsible to Parliament.

*Parliament* is unicameral consisting of 87 elected members and three Non-Constituency MPs (NCMPs), elected by secret ballot from single-member and group representation constituencies, as well as nine Nominated Members of Parliament (NMPs) who are appointed for a term of two and a half years on the recommendation of a Special Select Committee of Parliament. With the customary exception of those serving criminal sentences, all citizens over 21 are eligible to vote. Voting in an election is compulsory. Group representation constituencies may return up to six Members of Parliament (four before 1996), one of whom must be from the Malay community, the Indian or other minority communities. To ensure representation of parties not in the government, provision is made for the appointment of three (or up to a maximum of six) NCMPs. The number of NCMPs is reduced by one for each opposition candidate returned. There is a common roll without communal electorates.

A Presidential Council to consider and report on minorities' rights was established in 1970. The particular function of this council is to draw attention to any Bill or to any subsidiary legislation which, in its opinion, discriminates against any racial or religious community.

Salaries for leading Singaporean politicians are the highest in the world. In 2012 the prime minister's salary was S\$2.2m. (US\$1.7m.) although this represented a 36% drop from 2011. Prime Minister Lee Hsien Loong's salary is more than four times that of President Barack Obama.

## CURRENT LEADERS

### Lee Hsien Loong

#### Position

Prime Minister

#### Introduction

When Lee Hsien Loong was sworn in as prime minister of Singapore on 12 Aug. 2004, it was only the second time the southeast Asian city-state had changed its leader since independence in the 1960s. His father, Lee Kuan Yew, was the country's charismatic leader for 31 years and oversaw a transformation from a third-world colony to a prosperous export-driven economy. Lee Hsien Loong, a former military strategist-turned-politician, pledged to sustain the vibrant economy while maintaining a cohesive society. In May 2011 his People's Action Party won parliamentary elections for the 11th successive time since independence.

#### Early Life

Lee Hsien Loong was born in Singapore on 10 Feb. 1952, the eldest son of a wealthy and well-connected Hakka-Chinese family. His father, Lee Kuan Yew, was Singapore's first prime minister, and led the former British colony as head of the People's Action Party (PAP) from its first period of self-governance in 1959, through independence in 1965, until 1990. Lee Hsien Loong attended state primary and secondary schools in Singapore, and was awarded a president's scholarship to study mathematics and computer science at Cambridge University in England. He graduated in 1974 with first class honours and returned to serve in the Singapore Armed Forces, rising through the ranks to become a Brig.-Gen. He gained a reputation for his analytical and problem-solving skills. He entered politics as an MP representing the PAP in the general election of Sept. 1984. The election was the first occasion since 1963 that two opposition parties—the Workers' Party and the Singapore Democratic Party—were able to win seats from the ruling PAP. Lee was elected to the Central Executive Committee of the PAP in 1986.

Lee Kuan Yew resigned in Nov. 1990 after 31 years in power and Goh Chok Tong became prime minister, appointing Lee Hsien Loong his deputy with responsibility for economic and civil service affairs. After three decades of authoritarian rule, Singapore underwent a cautious liberalization. Lee held his parliamentary seat in the 1991 and 1997 general elections, which were landslide victories for the PAP. In Jan. 1998 he was appointed chairman of the Monetary Authority of Singapore. When, in line with other southeast Asian economies, Singapore faced an economic downturn in 1998, the government responded by cutting wages, allowing its currency to adjust downward and positioning the country as a leading international financial centre. Despite continued economic pressures, the PAP won the 2001 general election by a large majority. Lee was re-elected, and was appointed minister of finance in Nov. 2001. He pursued a tax-cutting agenda

and brought in pension reforms and policies to liberalize the financial sector.

#### Career in Office

On 12 Aug. 2004 Lee was sworn in as prime minister, handing the chairmanship of the Monetary Authority to Goh Chok Tong who became senior minister in the cabinet. Lee said his goal was to build a vibrant and competitive economy and he pledged to maintain the open, consultative style of the Goh Chok Tong era. He also signalled that social liberalization would continue, reflecting the demands of a highly-educated and increasingly less tractable population, as well as the government's realization that Singapore must move beyond manufacturing into 'knowledge-based' industries that depend more on individual creativity and entrepreneurship.

In April 2005 Lee announced his government's controversial decision to legalize gambling, paving the way for the building of two large casino resorts and perhaps hinting at a more permissive atmosphere within the country. Nevertheless, in 2007 parliament voted against a proposal to decriminalize sex between men, and international appeals for clemency failed to prevent the execution of two Nigerians for drug smuggling.

Singapore's usually fraught relations with neighbouring Malaysia improved in Jan. 2005 when the two countries settled a dispute over land reclamation work in their border waters.

In the first electoral test since his appointment in 2004, Lee's party won the May 2006 parliamentary elections overwhelmingly. In 2008 his government's budget included tax incentives to enhance business competition, but Singapore's export-led economy was one of the first in Asia to feel the impact of the global financial downturn. In Jan. 2009 the government announced a S\$20.5bn. stimulus package to bolster the economy and by July the country was emerging from its deepest recession on record.

In May 2011 the PAP was re-elected with a large majority but with a lower share of the popular vote, which opposition parties portrayed as a significant shift in the political landscape.

#### DEFENCE

Compulsory military service in peacetime for all male citizens and permanent residents was introduced in 1967. The period of service is 24 months. Reserve liability continues to age 50 for officers, 40 for other ranks. In 2006 the SAF (Singapore Armed Forces) comprised 312,500 Operationally Ready National Servicemen and an estimated 72,500 regulars and Full-Time National Servicemen.

An agreement with the USA in Nov. 1990 provided for an increase in US use of naval and air force facilities.

Singapore is a member of the Five Powers Defence Arrangement, with Australia, New Zealand, Malaysia and the UK.

In 2008 defence expenditure totalled US\$7,662m. (US\$1,663 per capita—the highest of any Asian country), representing 4.2% of GDP.

#### Army

Strength (2006) 50,000 (including 35,000 conscripts) plus 300,000 reserves. In addition there is a Civil Defence Force totalling 81,800 including 3,200 conscripts, 23,000 Operationally Ready National Servicemen and more than 54,000 civil defence volunteers.

#### Navy

The Republic of Singapore Navy comprises four commands: Fleet, Coastal Command (COSCOM), Naval Logistics Command and Training Command. The fleet includes four diesel submarines. The Navy numbers an estimated 9,000 personnel (1,800 conscripts, 2,200 regulars and 5,000 active reservists). There are two naval bases: Tuas Naval Base and Changi Naval Base, the first phase of which was completed in 2000 and replaces Brani Naval Base.

#### Air Force

The Republic of Singapore Air Force (RSAF) has fighter squadrons comprising the F16 Falcon and the F5S/F Tiger.

Personnel strength (2006) about 10,500 (3,000 conscripts). Equipment includes 111 combat-capable aircraft and eight attack helicopters.

#### ECONOMY

Services accounted for 72% of GDP in 2007 and industry 28%.

According to the anti-corruption organization *Transparency International*, Singapore ranked fifth in the world in a 2012 survey of the countries with the least corruption in business and government. It received 87 out of 100 in the annual index.

#### Overview

Singapore is credited with one of the least corrupt, most competitive and most open economies in the world. Manufacturing, particularly electronics, has been the main engine of growth. About half of Singapore's non-oil exports are electronic goods. Industry is dominated by foreign multinationals and a few large domestic enterprises with government links. However, the economy's openness leaves it vulnerable to external demand shocks.

The government is seeking to shift the economy away from manufacturing, where other Asian countries are seen as rising competitors, into knowledge-driven industries. Singapore has become an important offshore banking centre. Liberal rules on stem cell research have helped attract foreign scientists in a bid to make the country a leading biomedical centre.

Economic growth averaged 8% between 2004 and 2007 but fell to -1.0% in 2009 as a result of the global financial crisis. This represented the biggest output decline in twenty years. However, growth rebounded strongly in 2010, with electronics exports boosted by consumer demand in China and corporate IT investment in the USA.

#### Currency

The unit of currency is the *Singapore dollar* (SGD) of 100 cents. It is managed against a basket of currencies of Singapore's main trading partners. In Aug. 2009 foreign exchange reserves totalled US\$174,606m. and total money supply was S\$89,258m.

Inflation rates (based on IMF statistics):

| -0.4% | 0.5% | 1.7% | 0.5% | 1.0% | 2.1% | 6.6% | 0.6% | 2.8% | 5.2% |

#### Budget

The fiscal year begins on 1 April. In 2007–08 budgetary central government revenue totalled S\$51,007m. (S\$41,577m. in 2006–07) and expenditure S\$33,875m. (S\$31,446m. in 2006–07).

Principal sources of revenue in 2007–08 were: taxes on income, profits and capital gains, S\$14,938m.; taxes on goods and services S\$12,193m.; taxes on property, S\$2,582m. Main items of expenditure by economic type in 2007–08: use of goods and services, S\$11,663m.; compensation of employees, S\$8,575m.; social benefits, S\$7,907m.

There is a Goods and Services Tax (GST) of 7%.

Total GDP was US\$239.7bn. in 2011. Singapore was ranked second in the Global Competitiveness Index in the World Economic Forum's *Global Competitiveness Report 2012–2013*. The index analyses 12 areas of competitiveness for over 100 countries including macroeconomy, higher education and training, institutions, innovation and infrastructure. In the 2012 *World*

*Competitiveness Yearbook*, compiled by the International Institute for Management Development, Singapore came fourth in the world ranking. This annual publication ranks and analyzes how a nation's environment creates and sustains the competitiveness of enterprises.

### Banking and Finance

The Monetary Authority of Singapore (*Chairman*, Tharman Shanmugaratnam) performs the functions of a central bank, except the issuing of currency which is the responsibility of the Board of the Commissioners of Currency.

The Development Bank of Singapore and POSB (formerly the Post Office Savings Bank) were merged in 1998 to become the largest bank in southeast Asia and one of the leading banks in Asia. In 2003 the company was rebranded as DBS Bank although POSB still operates as a recognizable brand within the enterprise with a customer base of over 3.2m. in Singapore in 2009. Customer deposits at DBS Bank totalled S\$183.9bn. in the second quarter of 2010 and total assets S\$276.3bn.

In Oct. 2010 there were 120 commercial banks in Singapore, of which seven were local. There were 31 representative offices, 26 foreign banks with full licences, 49 with 'wholesale' licences and 38 with 'offshore' licences. The total assets/liabilities amounted to S\$749,703.1m. in July 2010. Total deposits of non-bank customers in July 2010 amounted to S\$408,837.5m. and loans and advances including bills financing totalled S\$298,693.2m. There were 46 merchant banks in Oct. 2010.

Gross external debt amounted to US\$1,113,298m. in June 2012.

The Singapore Exchange (SGX), a merger of the Stock Exchange of Singapore and the Singapore International Monetary Exchange, was officially launched on 1 Dec. 1999.

## ENERGY AND NATURAL RESOURCES

### Environment

Singapore's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 34.6 tonnes per capita.

### Electricity

Installed capacity was 10.9m. kW in 2007. Production (2007) 41,134m. kWh. Consumption per capita (2007) 8,964 kWh.

### Oil and Gas

Replacing the Kallang Gasworks, the Senoko Gasworks started operations in Oct. 1996. It had a total gas production capacity of 1.6m. cu. metres per day. In Jan. 2001 a 640-km gas pipeline linking Indonesia's West Natuna field with Singapore came on stream. It is expected to provide Singapore with US\$8bn. worth of natural gas over a 20-year period.

### Water

Singapore uses an average of 1.25m. cu. metres of water per day. Singapore's water supply comes from local sources and sources in Johor, Malaysia. The total water supply system comprises 19 raw water reservoirs, nine treatment works, 15 storage or service reservoirs and 5,150 km of pipelines.

### Agriculture

Only about 1.49% of the total area is used for farming. Local farms provide only about 35% of hen eggs, 1.6% of chickens and 2.4% of ducks. 18,928 tonnes of vegetables and fruits were produced for domestic consumption in 1999. In 2001 alone Singapore imported 44.1m. chickens, 7m. ducks, 722m. hen eggs, 210,077 tonnes of meat and meat products, 226,126 tonnes of fish and fish products, 352,919 tonnes of vegetables and 358,595 tonnes of fruits for local consumption.

Agro-technology parks house large-scale intensive farms to improve production of fresh food. As of the end of 2000, a total of 1,465 ha. of land in Murai, Sungei Tengah, Nee Soon, Loyang, Mandai and Lim Chu Kang had been developed into Agro-

technology Parks. Through open tenders, auctions and direct allocations, 247 farms have been allocated 777 ha. of land for the production of livestock, eggs, milk, aquarium fish, food fish (fish for consumption), fruits, vegetables, orchids and ornamental and aquatic plants, as well as for the breeding of birds and dogs.

### Forestry

In 2010 forests covered 2,000 ha., or 3% of the total land area.

### Fisheries

The total catch in 2010 amounted to 1,732 tonnes. Imports of fishery commodities were valued at US\$807.0m. in 2009.

## INDUSTRY

The leading companies by market capitalization in Singapore in March 2012 were: Singapore Telecommunications (US\$39.9bn.); Jardine Strategic, a diversified business group (US\$34.2bn.); and DBS Group Holdings, a banking group (US\$27.3bn.).

The largest industrial area is at Jurong. In 2007 there were an estimated 160,000 enterprises of which 99% were small and medium enterprises (SMEs). Only about 5% of SMEs are in the manufacturing sector but they generated 17% of SMEs' value-added in 2007.

Output, 2009 (in S\$1m.), totalled 213,699.8: including electronic products and components, 67,226.1; refined petroleum products, 31,860.3; chemicals and chemical products, 25,873.3; machinery and equipment, 18,922.7; pharmaceutical products, 18,093.9; transport equipment, 16,431.7; fabricated metal products, 8,185.8; food, beverages and tobacco, 6,637.2.

According to the World Bank's *Doing Business 2012* Singapore is the easiest country in which to do business and the fourth easiest in which to start a business.

### Labour

In June 2004 Singapore's labour force comprised 2,183,300 people, of whom 2,066,900 were employed. The principal areas of employment in June 2004 were manufacturing (356,700 people), wholesale and retail trade (319,700), business services (254,000), transport, storage and communications (212,500) and hotels and restaurants (129,300). The unemployment rate averaged 3.4% throughout 2004 (4.0% in 2003). The average worker put in 46.3 hours a week in 2004; average monthly earnings in 2004 were S\$3,329.

Legislation regulates the principal terms and conditions of employment such as hours of work, sick leave and other fringe benefits. Young people of 14–16 years may work in industrial establishments, and children of 12–14 years may be employed in approved apprenticeship schemes. A trade dispute may be referred to the Industrial Arbitration Court. Singapore does not have a minimum wage.

The Ministry of Manpower operates an employment service and provides clients with disabilities with specialized on-the-job training. The Central Provident Fund was established in 1955 to make provision for employees in their old age. At the end of 2004 there were 3,018,000 members with S\$111,874m. standing to their credit in the fund. The legal retirement age is 62.

In May 2003 the USA and Singapore signed a free trade agreement removing tariffs on trade worth an estimated US\$33bn. per annum.

#### Trade Fairs

Singapore ranked as the world's most important convention city in 2010 according to the Union des Associations Internationales (UAI). Singapore hosted 725 meetings recognized by UAI (6.5% of all meetings).

### COMMUNICATIONS

#### Roads

In 2007 there were 3,297 km of public roads (100% asphalt-paved). Singapore has one of the densest road networks in the world. In 2007 there were 517,000 passenger cars, 14,500 buses and coaches, 151,000 vans and lorries, and 144,300 motorcycles and scooters.

Singapore was the top ranked nation for road infrastructure in the World Economic Forum's *Global Competitiveness Report 2009–2010*.

#### Rail

A 25.8-km main line runs through Singapore, connecting with the States of Malaysia and as far as Bangkok. Branch lines serve the port of Singapore and the industrial estates at Jurong. The total rail length of the Mass Rapid Transit (SMRT) metro is 93.2 km. The 20 km North-East Line (operated by SBS Transit), the world's first fully automated heavy metro, became operational in 2003. In late 1999 the Light Rapid Transit System (LRT) began operations, linking the Bukit Panjang Estate with Choa Chu Kang in the North West region.

#### Civil Aviation

As of Sept. 2010, Singapore Changi Airport was served by 96 airlines with more than 5,100 weekly flights to and from some 200 cities in 60 countries and territories worldwide. A total of 37,203,978 passengers and 1,633,791 tonnes of freight were handled in 2009. The national airline is Singapore Airlines, which carried 16,480,000 passengers in 2009–10. Its subsidiary, Silk Air, serves Asian destinations. Other Singapore-based carriers include Jetstar Asia and Tiger Airways.

In the World Economic Forum's *Global Competitiveness Report 2009–2010*, Singapore ranked first for quality of air transport infrastructure.

#### Shipping

Singapore has a large container port, the world's busiest in terms of containers handled in 2006 and second only to Shanghai in

terms of shipping tonnage. The economy is dependent on shipping and entrepôt trade. A total of 146,265 vessels of 960m. gross tonnes (GT) entered Singapore during 2001. In 2001, 3,353 vessels with a total of 23.2m. GT were registered in Singapore. The Singapore merchant fleet ranked 7th among the principal merchant fleets of the world in 2001. Total cargo handled in 2006 was 448.5m. freight tons, and total container throughput in 2006 was 24,792,000 TEUs (twenty-foot equivalent units).

Singapore was ranked first in the World Economic Forum's *Global Competitiveness Report 2009–2010* for the quality of its port facilities.

#### Telecommunications

In 2008 there were 1,857,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 6,376,000 (1,381.5 per 1,000 persons). In 1997 Singapore Telecom, one of the largest companies in Asia, lost its monopoly with the entry of a new mobile phone operator. In 2007 Singapore had three mobile phone operators—SingTel Mobile (owned by Singapore Telecom), M1 and StarHub Mobile. In 2008 there were 3.4m. internet users. There were 19.9 broadband subscribers per 100 inhabitants in June 2007. In March 2012 there were 2.6m. Facebook users. The Telecommunication Authority of Singapore (TAS) is the national regulator and promoter of the telecommunication and postal industries.

According to the World Economic Forum's *Global Information Technology Report 2010–11* Singapore is ranked second in the world in exploiting global information technology developments.

### SOCIAL INSTITUTIONS

#### Justice

There is a Supreme Court in Singapore which consists of the High Court and the Court of Appeal. The Supreme Court is composed of a Chief Justice and 11 Judges. The High Court has unlimited original jurisdiction in both civil and criminal cases. The Court of Appeal is the final appellate court. It hears appeals from any judgement or order of the High Court in any civil matter. The Subordinate Courts consist of a total of 47 District and Magistrates' Courts, the Civil, the Family and Crime Registries, the Primary Dispute Resolution Centre, and the Small Claims Tribunal. The right of appeal to the UK Privy Council was abolished in 1994.

Penalties for drug trafficking and abuse are severe, including a mandatory death penalty. In 1994 there were 76 executions, although since then the average annual number has generally been declining. Amnesty International reported that there were four executions in 2011 but none in 2012.

The Technology Court was introduced in 1995 where documents were filed electronically. This process was implemented in Aug. 1998 in the Magistrates appeal and the Court of Appeal.

The average population in penal institutions in 2007 was 11,768 (267 per 100,000 of national population).

#### Education

The general literacy rate rose from 84% in 1980 to an estimated 94.7% in 2009 (male 97.5%; female 92.0%). Kindergartens are private and fee-paying. Compulsory primary state education starts at six years and culminates at 11 or 12 years with an examination which influences choice of secondary schooling. There are 17 autonomous and eight private fee-paying secondary schools. Tertiary education at 16 years is divided into three branches: junior colleges leading to university; four polytechnics; and ten technical institutes.

In 2007 there were 301,101 pupils with 14,743 teaching staff in primary schools, 232,100 pupils with 13,686 teaching staff in secondary schools and 183,627 students with 14,209 academic staff in tertiary education.

There are three universities: the National University of Singapore (established 1905) with 32,028 students in 2001–02, the Nanyang Technological University (established 1991) with 28,949 in 2007–08, and the Singapore Management University (established in 2000).

In 2009 public expenditure on education came to 3.1% of GDP and accounted for 11.6% of total government expenditure.

### Health

There are 27 hospitals (five general hospitals, one community hospital, seven specialist hospitals/centres and 14 private), with 11,897 beds in 2001. In 2001 there were 5,747 doctors, 1,087 dentists, 17,398 registered nurses and midwives and 1,141 pharmacists.

The leading causes of death are cancer (4,238 deaths in 2000), heart disease (3,940) and pneumonia (1,794).

### Welfare

The Central Provident Fund (CPF) was set up in 1955 to provide financial security for workers upon retirement or when they are no longer able to work. In 2001 there were 2,922,673 members with S\$92,221m. standing to their credit in the Fund.

### RELIGION

In 2001, 41.0% of the population were Buddhists and Taoists, 12.0% Muslims, 11.7% Christians and 3.2% Hindus; 0.5% belonged to other religions.

### CULTURE

The National Arts Council (NAC) was established in 1991 to spearhead the development of the arts.

### Press

In 2008 there were 11 daily newspapers, with a total daily circulation of 1,725,000 copies. The most popular paid-for daily is *The Straits Times*, with an average daily circulation of 389,000 in 2008.

### Tourism

There were 10.3m. visitors in 2007. Most came from Indonesia, China, Australia, India, Malaysia, Japan, the UK and South Korea. The total tourism receipts for 2007 came to S\$14.1bn. There were 98 gazetted hotels in 2007, providing 30,087 rooms.

### Festivals

Every Jan. or Feb. the Lunar New Year is celebrated. Other Chinese festivals include Qing Ming (a time for the remembrance of ancestors), Yu Lan Jie (Feast of the Hungry Ghosts) and the Mid-Autumn Festival (Mooncake or Lantern festival).

Muslims in Singapore celebrate Hari Raya Puasa (to celebrate the end of a month-long fast) and Hari Raya Haji (a day of prayer and commemoration of the annual Mecca pilgrimage). There are

also Muharram (a New Year celebration) and Maulud (Prophet Muhammad's birthday).

Hindus celebrate the Tamil New Year in mid-April. Thaipusam is a penitential Hindu festival popular with Tamils; and Diwali, the Festival of Lights, is celebrated by Hindus and Sikhs. Other festivals include Thimithi (a fire-walking ceremony) and Navarathiri (nine nights' prayer).

Buddhists observe Vesak Day, which commemorates the birth, enlightenment and Nirvana of the Buddha, and falls on the full moon day in May.

Christmas, Good Friday and Easter Sunday are also recognized.

## KEY HISTORICAL EVENTS

There is evidence of human habitation from 270,000 BC. In the Bronze Age the region was a centre for copper manufacture and was ruled by Carpathian, Celtic and Germanic tribes. The date of the Slavic arrival is contested but there is evidence of their presence from the sixth century under the Roman Empire. Waves of invasion and migration followed Roman withdrawal and control fell variously to the Avars, Franks and Magyars.

The first brief period of Slavic rule was the Samo Empire (623–658) followed by the Moravian Empire from 833–907. The region subsequently became part of the Kingdom of Hungary. In 1241 the region was invaded by Mongols and was stricken with famine but grew in prosperity through the medieval period. From the 16th–19th centuries Slovakia was at the centre of Hungary under the Habsburg dynasty. After 1867 it became part of the Austro-Hungarian Empire and underwent ‘Magyarization’, a repressive attempt to impose Magyar culture. In response, a nationalist movement at home and among immigrants in America gained momentum in the First World War.

On 28 Oct. 1918, after the dissolution of Austria-Hungary, the Czechoslovak State was founded. Two days later the Slovak National Council voted to unite with the Czechs. The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands (Bohemia, Moravia, part of Silesia) and Slovakia. The new state was numerically dominated by Czechs, giving rise to some tensions and calls for Slovakian independence. In 1939 negotiations between European powers resulted in Germany incorporating the Czech lands into the Reich as the ‘Protectorate of Bohemia and Moravia’. Meanwhile the German-sponsored Slovak government declared independence. A government-in-exile, headed by Dr Edvard Beneš, was set up in London during the war. In 1944 Slovak resistance fighters began an uprising; liberation was completed by Soviet and US forces in

May 1945. Territories taken by Germans, Poles and Hungarians were restored to Czech sovereignty.

Elections in May 1946 returned a coalition government, under communist prime minister Klement Gottwald. On 20 Feb. 1948, 12 non-communist ministers resigned in protest at the infiltration of communists into the police. Gottwald formed a predominantly communist government and in May 1948, after the government won an 89% majority in rigged parliamentary elections, President Beneš resigned. During the next two decades the government banned other parties and followed Stalinist policies. On 14 May 1955 Czechoslovakia signed the Warsaw Pact, allying itself with the Soviet Union and other Eastern Bloc countries.

In 1968 pressure for liberalization culminated in the overthrow of the Stalinist leadership and under Alexander Dubček, new first secretary of the communist party, the ‘Prague Spring’ saw sweeping reforms including the abolition of censorship. Between May and Aug. 1968 the USSR put pressure on the government to abandon reforms. Finally, Warsaw Pact troops occupied Czechoslovakia on 21 Aug. The government was forced to reverse reforms and accept the stationing of Soviet troops. In April 1969, with Soviet support, Dubček was replaced by Gustáv Husák.

Demands for reform persisted and mass demonstrations began in Nov. 1989. When authorities used violence to break up a demonstration on 17 Nov., the communist leadership resigned. On 30 Nov. the federal assembly abolished the communists’ sole right to govern. A new government was formed on 3 Dec. and another followed a week later as the protest movement grew. Gustáv Husák resigned as president and was replaced by Václav Havel by the unanimous vote of 323 members of the federal assembly on 29 Dec. This almost bloodless overthrow of communist rule became known as the ‘Velvet Revolution’.

At the June 1992 elections the Movement for Democratic Slovakia, led by Vladimír Mečiar, campaigned for Slovak independence. On 17 July the Slovak National Council adopted a declaration of sovereignty by 113 to 24 votes, the ‘Velvet Divorce’. Havel resigned as federal president on 20 July. A constitution ratified on 1 Sept. 1992 paved the way for independent Slovakia to come into being on 1 Jan. 1993. Economic property was divided between Slovakia and the Czech Republic, with government real estate remaining with the republic in which it was located. Other property was divided by special commissions in the proportion of two (Czech Republic) to one (Slovakia), on the basis of population size. Military equipment was also divided on the two-to-one principle and military personnel were invited to choose in which army to serve.

In the 1990s Slovakia resisted calls for economic reforms and closer ties with Western Europe. However, following the election of a coalition government under Mikuláš Dzurinda in Oct. 1998, the country implemented reforms and attracted foreign investment. It responded to criticism about its human rights record by improving conditions for its Romany and Hungarian minorities. Slovakia joined NATO in March 2004 and the European Union in May 2004. It elected a new coalition government under Prime Minister Robert Fico in June 2006. Fico was succeeded by Iveta Radičová in 2010 before reclaiming the premiership in March 2012.

## TERRITORY AND POPULATION

Slovakia is bounded in the northwest by the Czech Republic, north by Poland, east by Ukraine, south by Hungary and southwest by Austria. Its area is 49,034 sq. km (18,932 sq. miles). Census population in 2011 was 5,397,036 (2,769,264 females and 2,627,772 males); density, 110-1 per sq. km.

The UN gives a projected population for 2015 of 5-51m.

In 2011, 54.9% of the population lived in urban areas. There are eight administrative regions (*Kraj*), one of which is the capital, Bratislava. They have the same name as the main city of the region.

| Region          | Area in sq. km | 2011 population |
|-----------------|----------------|-----------------|
| Banská Bystrica | 9,455          | 660,563         |
| Bratislava      | 2,053          | 602,436         |
| Košice          | 6,753          | 791,723         |
| Nitra           | 6,343          | 689,867         |
| Prešov          | 8,993          | 814,527         |
| Trenčín         | 4,501          | 594,328         |
| Trnava          | 4,148          | 554,741         |
| Žilina          | 6,788          | 688,851         |

The capital, Bratislava, had a population in 2011 of 411,228. The population of other principal towns (2011, in 1,000): Košice, 240; Prešov, 92; Žilina, 81; Banská Bystrica, 80; Nitra, 79; Trnava, 66; Martin, 57; Trenčín, 56.

The population is 80.7% Slovak, 8.5% Hungarian, 2.0% Roma, 0.6% Czech and 0.6% Ruthenian, with some Germans, Moravians, Poles and Ukrainians.

A law of Nov. 1995 makes Slovak the sole official language.

## CONSTITUTION AND GOVERNMENT

The constitution became effective on 1 Jan. 1993, creating a parliamentary democracy with universal suffrage from the age of 18. Parliament is the unicameral *National Council*. It has 150 members elected by proportional representation to serve four-year terms. The constitution was amended in Sept. 1998 to allow for the direct election of the *President*, who serves for a five-year term. The President may serve a maximum of two consecutive terms.

The Judicial Branch consists of a *Supreme Court*, whose judges are elected by the National Council, and a *Constitutional Court*, whose judges are appointed by the President from a group of nominees approved by the National Council.

Citizenship belongs to all citizens of the former federal Slovak Republic; other residents of five years standing may apply for citizenship. Slovakia grants dual citizenship.

## National Anthem

‘Nad Tatrou sa blýska’ (‘Storm over the Tatras’); words by J. Matúška, tune anonymous.

## CURRENT LEADERS

### Ivan Gašparovič

#### *Position*

President

#### *Introduction*

Shortly before Slovakia became a member of the European Union on 1 May 2004, a respected lawyer, Ivan Gašparovič, was elected as the country's president. Instrumental in drawing up Slovakia's constitution prior to the dissolution of Czechoslovakia in 1993, he was also a close ally of the controversial nationalist former prime minister, Vladimír Mečiar, the man he beat in the second round of the presidential election. He was re-elected in April 2009.

#### *Early Life*

Ivan Gašparovič was born in Poltár, near Lučenec in southern Slovakia on 27 March 1941. His father, Vladimír Gašparovič, had migrated to the region from Rijeka, Croatia at the end of the First World War. The family moved to Bratislava, where Vladimír worked as a teacher in a secondary school. Having studied at the Law Faculty of the Komenský University in Bratislava from 1959–64, Ivan Gašparovič worked in the district prosecutor's office of Bratislava's Martin district (1965–66), and then became a prosecutor at the municipal prosecutor's office. In early 1968 he joined the Communist Party of Czechoslovakia and actively supported the reforms of Alexander Dubček, the party's Slovak first secretary. Under Dubček, in what became known as the Prague Spring, democratization went further than in any other Communist state—press censorship was reduced and Slovakia was granted political autonomy. However, opposition grew swiftly in the USSR and in other Warsaw Pact states which invaded Czechoslovakia on the night of 20 Aug. 1968. The following year Dubček was replaced by Gustáv Husák, who spearheaded a 'normalization' policy that turned Czechoslovakia into one of Central Europe's most repressive states.

Gašparovič left the Communist Party after the events of 1968 and began work as a teacher at the law faculty at the Komenský University. He remained there until 1990 when he became the vice chancellor in Feb. of that year, two months after the 'Velvet Revolution' had swept aside the Communists. Václav Havel, the playwright and former dissident who was elected federal president in Dec. 1989, nominated Gašparovič as prosecutor-general of Czechoslovakia. He moved to Prague and took up the post in July 1990, as the new government began to tackle the legacy of communism—a moribund economy, high unemployment and widespread social discontent. Under the 1968 constitution Czechoslovakia was a federal republic—each republic had a council and an assembly, but the federal government dealt with defence and foreign affairs. Arguments over the nature of the federation broke out and in 1991 Vladimír Mečiar formed the Movement for a Democratic Slovakia (HZDS). Gašparovič returned to Bratislava to teach at the Komenský University and joined the HZDS in 1992. Mečiar led the party to victory in the June 1992 elections, and Gašparovič became an HZDS member of the Slovak parliament. In late 1992 he was one of the authors of the constitution of Slovakia, which came into effect on 1 Jan. 1993 when the republic formally declared its independence.

Gašparovič was speaker of the Slovak parliament until Oct. 1998 and a close ally of Prime Minister Mečiar, whose controversial policies in the mid-1990s included stripping away the rights of the country's large Hungarian community and clamping down on the media. Slovakia became increasingly isolated from Western Europe until Mečiar's nationalist government was defeated in Sept. 1998 by an alliance of liberals, centrists, left-wingers and ethnic Hungarians. Mikuláš Dzurinda became prime minister and steered Slovakia through various reforms required for EU and NATO membership. From Oct. 1998–July 2002, when the HZDS was in opposition, Gašparovič

was a member of the parliamentary committee for the supervision of the SIS (the Slovak equivalent of the US Central Intelligence Agency).

In July 2002 Gašparovič and others left the HZDS after being struck off the list of candidates for the parliamentary elections in Sept. The HZDS went on to poll only 3.3% of the vote, not enough to win any seats. Gašparovič returned to Komenský University, but also established a new political party called the Movement for Democracy (HZD). In April 2004 he ran for president against Mečiar, who was attempting to make a comeback after losing the 2002 legislative elections. Although Mečiar won more votes in the first round, he failed to win a majority. In the second round, Gašparovič secured nearly 60% of the vote with the support of the eliminated candidates.

#### *Career in Office*

Ivan Gašparovič succeeded Rudolf Schuster as president of the Slovak Republic on 15 June 2004 and began a five-year term of office. Following elections to the National Council in June 2006, Gašparovič asked Robert Fico, the leader of the social democratic Direction Party, to form a new coalition government in place of Mikuláš Dzurinda's SDKÚ-led administration. Gašparovič secured a second term as president in April 2009, winning 55.5% of the vote in a second round run-off. Following further parliamentary elections in June 2010, the Direction Party remained the largest single party but Fico was unable to form a new coalition cabinet. Gašparovič instead turned to Iveta Radičová of the SDKÚ–DS, who took over as prime minister at the head of a four-party centre-right government in July.

In March 2010 Gašparovič vetoed a controversial nationalist law intended to instil patriotism by compulsory weekly national anthem-playing in state schools.

In Oct. 2011 the government was defeated in a parliamentary confidence vote but reappointed in a caretaker capacity. At elections in March 2012 the Direction–Social Democracy party won a majority and its leader, Robert Fico, became prime minister again.

### Robert Fico

#### *Position*

Prime Minister

#### *Introduction*

Robert Fico became prime minister for a second time after his Direction–Social Democracy (Smer–SD) party achieved outright victory in legislative elections held in March 2012. He has pledged to lead Slovakia into closer fiscal co-operation with the European Union.

#### *Early Life*

Robert Fico was born in Topoľčany, Czechoslovakia on 15 Sept. 1964. After studying law at Comenius University in Bratislava, he obtained a PhD in criminal law from the Slovak Academy of Sciences. On finishing military service in 1986 he worked for the law institute of the ministry of justice until 1995, holding the post of deputy director from 1992.

From 1994–2000 he represented the Slovak Republic at the European Court of Human Rights and the European Commission of Human Rights. He entered the Slovak parliament in 1992, serving on the parliamentary constitutional committee from 1992–2002, as chairman of the prison commission from 1995–2003 and on the parliamentary committee on human rights, national minorities and women's rights from 2002–06. From 1999 he was chair of Smer and has served as its parliamentary leader since 2002.

Fico took office as prime minister for the first time in July 2006, at the head of a coalition with the centre-left People's Party–Movement for a Democratic Slovakia and the right-wing Slovak National Party. As premier, he withdrew Slovakian troops from

Iraq and refused to deploy forces in southern Afghanistan. Scheduled visits to Libya and Venezuela in 2007 attracted criticism from opponents, and in Oct. 2006 the Alliance of European Socialists expelled Smer for going into coalition with the National Party.

On 1 Jan. 2009 Fico took Slovakia into the single European currency. Tensions with neighbouring Hungary rose in 2009 when Slovakia passed a law restricting the use of minority languages in government buildings. Relations worsened the following year when Fico fiercely criticized Hungarian legislation allowing dual citizenship, claiming it constituted a security threat to Slovakia.

Despite Smer winning the largest number of seats in the June 2010 election, it was unable to form a government. Fico went into opposition, against Prime Minister Iveta Radičová's centre-right coalition. In Oct. 2011, with the government divided over Slovakia's participation in the European Financial Stability Facility, Fico agreed to support the measure in return for early parliamentary elections. Initially expected to win, the ruling coalition was hit by allegations of ministerial corruption and in March 2012 Smer won 83 of 150 seats to claim an outright majority.

#### Career in Office

Fico was sworn in on 4 April 2012, promising to deliver on EU-agreed fiscal targets. He pledged to protect social benefits while reducing the budget deficit and reaffirmed his intention to raise tax rates for the wealthy. His main challenges include guiding the economy towards growth, meeting the expectations of unemployed and low-paid workers and building relations with Hungary.

#### DEFENCE

Since 1 Jan. 2006 Slovakia has had an all-volunteer professional army. In 2008 military expenditure totalled US\$1,477m. (US\$271 per capita), representing 1.6% of GDP.

#### Army

Personnel (2007), 7,324. In addition there is a national guard reserve force with an estimated strength of 20,000.

#### Air Force

There were 46 combat-capable aircraft in 2007 (Su-22, MiG-21 and MiG-29 fighters) and 16 attack helicopters. Personnel (2007), 4,280.

#### INTERNATIONAL RELATIONS

A referendum held on 16–17 May 2003 approved accession to the EU, with 92.5% of votes cast for membership and 7.5% against. Turnout was 52.2%. Slovakia became a member of NATO on 29 March 2004 and the EU on 1 May 2004.

Slovakia has had a long-standing dispute with Hungary over the Gabčíkovo-Nagymaros Project, involving the building of dam structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Czechoslovakia and Hungary. In late 1998 Slovakia and Hungary signed a protocol easing tensions between the two nations and settling differences over the dam.

#### ECONOMY

Agriculture accounted for 3% of GDP in 2008, industry 38% and services 59%.

#### Overview

Slovakia has undergone almost constant restructuring since 1998 when policy shifted from state intervention towards pro-market reforms. Following economic transition the heavy industry and agriculture sectors shrank while the service sector increased its share of GDP to 59% in 2008.

From 1998–2008 the economy enjoyed rapid growth, driven by strong exports and foreign direct investment, particularly in the automotive industry. GDP grew at approximately 4% per annum and peaked in 2007 at 10.5% on the back of strong domestic demand and buoyant exports. Slovakia entered the ERM2 in 2005 and adopted the euro in Jan. 2009. However, the global financial crisis resulted in a 4.9% contraction in GDP. In early 2009 the government introduced a range of measures to counteract the effects of the downturn. The recovery in global demand for manufactured goods and the strong macroeconomic policy response saw robust growth return in the second half of 2009. Even so, the traditionally high unemployment rate rose beyond 14%.

#### Currency

On 1 Jan. 2009 the euro (EUR) replaced the *Slovak koruna* (SKK) as the legal currency of Slovakia at the irrevocable conversion rate of 30.126 koruny to one euro. Foreign exchange reserves in Sept. 2009 were US\$54m. (US\$17,493m. in Sept. 2008) and gold reserves 1.02m. troy oz. Inflation rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|------|------|------|------|
| 3.5% | 8.4% | 7.5% | 2.8% | 4.3% | 1.9% | 3.9% | 0.9% | 0.7% | 4.1% |

Total money supply in Dec. 2008 was €545,969m.

#### Budget

In 2008 budgetary central government revenue totalled 344.24bn. koruny (341.23bn. koruny in 2007) and expenditure 401.94bn. koruny (357.98bn. koruny in 2007).

Slovakia's budget deficit in 2011 was 4.8% of GDP (2010, 7.7%; 2009, 8.0%). The required target set by the EU is a budget deficit of no more than 3%.

VAT, personal and company income tax, real estate taxes and inheritance taxes came into force in Jan. 1993. VAT is 20% (reduced rate, 10%).

#### Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007  | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|-------|------|-------|------|------|
| 4.6% | 4.8% | 5.1% | 6.7% | 8.3% | 10.5% | 5.8% | -4.9% | 4.4% | 3.2% |

Slovakia's total GDP in 2011 was US\$96.0bn.

#### Banking and Finance

The central bank and bank of issue is the Slovak National Bank, founded in 1993 (*Governor*, Jozef Makúch). It has an autonomous statute modelled on the German Bundesbank, with the duties of maintaining control over monetary policy and inflation, ensuring the stability of the currency, and supervising commercial banks. However, it is now proposed to amend the central bank law to allow the government to appoint half the members of the board and force the bank to increase its financing of the budget deficit.

In Oct. 1998 the Slovak National Bank abandoned its fixed exchange rate system, whereby the crown's value was fixed within a fluctuation band against a number of currencies, and chose to float the currency.

Decentralization of the banking system began in 1991, and private banks began to operate. The two largest Slovak banks were both privatized in 2001. The Austrian bank Erste Bank bought an 87.18% stake in Slovenská Sporiteľňa (Slovak Savings Bank) and the Italian bank IntesaBci bought a 94.47% stake in Všeobecná úverová banka (General Credit Bank). In 2006 Slovenská Sporiteľňa had assets of 298bn. koruny and Všeobecná úverová banka 241bn. koruny. In 2006 there were 24 commercial banks including three building savings banks.

Gross external debt amounted to US\$65,592m. in June 2012.

Foreign direct investment in Slovakia in 2010 amounted to US\$526m., down from US\$4,687m. in 2008.

There is a stock exchange in Bratislava.

## ENERGY AND NATURAL RESOURCES

In 2008, 8.4% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 14% has been set by the EU for 2020.

### Environment

Slovakia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 6.9 tonnes per capita.

### Electricity

Installed capacity in 2007 was 7.3m. kW, of which 2.5m. kW is hydro-electric and 2.2m. kW nuclear. Production in 2007 was 28.06bn. kWh, with consumption per capita 5,517 kWh. There were four nuclear reactors in use in 2009. In 2007 about 55% of electricity was nuclear-generated, making Slovakia one of the most nuclear-dependent nations in the world.

### Oil and Gas

In 2006 natural gas reserves were 14bn. cu. metres; oil reserves were 9m. bbls in 2007. Natural gas production in 2006 amounted to 123m. cu. metres. Slovakia relies on Russia for almost all of its oil and gas.

### Minerals

In 2009, 2.57m. tonnes of lignite were produced. 6.61m. tonnes of limestone were extracted in 2006. There are also reserves of copper, lead, zinc, iron, dolomite, rock salt and others.

### Agriculture

In 2006 there were 1.34m. ha. of arable land and 25,260 ha. of permanent crops. In 2006 agriculture employed 4.4% of the economically active population.

Production, 2006 (in 1,000 tonnes): sugar beets, 1,371; wheat, 1,343; maize, 838; barley, 642; potatoes, 263; rapeseed, 260; sunflower seeds, 229; grapes, 52; apples, 41, tomatoes, 36.

Livestock, 2006: pigs, 1.11m.; cattle, 508,000; sheep, 333,000; chickens, 13m. Livestock products (in 1,000 tonnes): meat (2006), 196; milk (2003), 1,166; cheese (2006), 72; eggs (2003), 68.

### Forestry

The area under forests in 2010 was 1.93m. ha., or 40% of the total land area. In 2007 timber production was 8.87m. cu. metres.

### Fisheries

In 2010 the total catch was 1,608 tonnes, exclusively freshwater fish.

## INDUSTRY

The main industries in Slovakia are machine engineering, chemical products, electrical apparatus, textiles, clothing and footwear, metallurgy, food and beverages, paper, wood and woodworking. Output included (in 1m. tonnes): cement (2008), 6.4; crude steel (2007), 4.8; pig iron (2007), 4.0; distillate fuel oil (2007), 2.8; coke (2006), 1.9; petrol (2007), 1.6; residual fuel oil (2007), 0.5. Motor vehicle production (2008), 524,859 units. Slovakia has the highest per capita car production of any country.

### Labour

Out of 2,351,400 people in employment in 2011, 568,000 were in manufacturing, 304,000 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods, 243,700 in construction and 164,200 in education. The average monthly salary in 2011 was €855. In Jan. 2011 the monthly minimum wage was €317. Unemployment stood at 19.2% in 2001, but then fell to 16.2% in 2005 and still further to 9.6% in 2008. It rose again to 14.5% in 2010 and was 14.7% in Dec. 2012. Youth unemployment was 33.2% in 2011. Long-term unemployment is also very high, with 63.9% of jobless Slovaks in 2011 having

been out of work for more than a year (although the rate has fallen from 73.1% in 2006). In 2011 part-time work accounted for around 4% of all employment in Slovakia.

## INTERNATIONAL TRADE

### Imports and Exports

In 2008 imports (c.i.f.) totalled US\$74,034m. (US\$62,102m. in 2007); exports (f.o.b.), US\$70,982m. (US\$57,766m. in 2007). Principal import sources in 2004 were: Germany, 23.8%; Czech Republic, 13.2%; Russia, 9.4%; Italy, 5.6%; Austria, 4.3%. The leading export markets in 2004 were: Germany, 28.6%; Czech Republic, 13.3%; Austria, 7.8%; Italy, 6.4%; Poland, 5.5%. In 2004 machinery and transport equipment accounted for 39.6% of Slovakia's imports and 45.9% of exports; chemicals, manufactured goods classified chiefly by material and miscellaneous manufactured articles 39.3% of imports and 41.4% of exports; mineral fuels, lubricants and related materials 12.5% of imports and 6.7% of exports.

## COMMUNICATIONS

### Roads

In 2006 there were 43,770 km of roads, including 328 km of motorways. In 2007 there were 1,468,600 passenger cars in use, 244,800 vans and lorries, 10,300 buses and coaches and 61,200 motorcycles and mopeds. In 2006 there were 7,988 road accidents resulting in 608 fatalities.

### Rail

In 2011 the length of railway routes was 3,624 km. Most of the network is 1,435 mm gauge with short sections on three other gauges. In 2011, 47.5m. passengers were carried and 43.7m. tonnes of freight. There are tram/light rail networks in Bratislava, Košice and Trenčianske Teplice.

### Civil Aviation

The main international airport is at Bratislava (M. R. Štefánik), which handled 2,218,545 passengers in 2008 (77% of all passengers using Slovakian airports) and 6,961 tonnes of freight. There are also some international flights from Košice (590,919 passengers in 2008). Slovak Airlines (formerly the Slovak flag carrier) ceased operations in Feb. 2007, as did Air Slovakia in March 2010. SkyEurope (central Europe's first low-cost airline), which operated domestic services and also flew to a number of destinations in Europe, ceased operations in Sept. 2009. The main airline now is Danube Wings, launched in 2008.

### Shipping

In 2006 vessels registered by Slovak enterprises numbered 261. They carried 1.7m. tonnes of goods and 111,000 passengers using inland waterway transport.

### Telecommunications

In 2008 there were 1,098,000 main (fixed) telephone lines. In 2007 mobile phone subscribers numbered 6,068,000 (112.5 per 100 persons). In 2000 Deutsche Telekom bought a 51% stake in the state-owned Slovakia Telecom. There were 3,556,500 internet users in 2008. In March 2012 there were 1.9m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The post-Communist judicial system was established by a federal law of July 1991. This provided for a unified system of four types of court: civil, criminal, commercial and administrative. Commercial courts arbitrate in disputes arising from business activities. Administrative courts examine the legality of the decisions of state institutions when appealed by citizens. In addition, there are military courts which operate under the jurisdiction of the Ministry of Defence. There is a Supreme Court, and a hierarchy of courts under the Ministry of Justice at republic, region and district level. District courts are courts of first instance.

Cases are usually decided by senates comprising a judge and two associate judges, although occasionally by a single judge. (Associate judges are citizens in good standing over the age of 25 who are elected for four-year terms). Regional courts are courts of first instance in more serious cases and also courts of appeal for district courts. Cases are usually decided by a senate of two judges and three associate judges, although again occasionally by a single judge. The Supreme Court interprets law as a guide to other courts and functions also as a court of appeal. Decisions are made by senates of three judges. The judges of the Supreme Court are nominated by the President; other judges are appointed by the National Council.

The population in penal institutions in Dec. 2007 was 7,986 (148 per 100,000 of national population).

### Education

In 2006–07 there were 2,928 pre-school institutions with 140,014 children and 13,149 teachers, 2,283 primary schools with 508,130 pupils and 33,736 teachers, 246 grammar schools with 99,931 students and 7,602 teachers, and 249 vocational schools with 80,339 pupils and 7,728 teachers. There were 210 secondary vocational apprentice training centres with 60,621 pupils and 3,223 teachers, and 376 special schools with 31,390 children and 4,299 teachers. There were 30 universities or university-type institutions with 125,213 students.

In 2006 spending on education was 15.1% of total state budget expenditure.

The adult literacy rate in 2003 was 99.6% (99.7% among males and 99.6% among females).

### Health

In 2008 there were 18,121 physicians, 2,745 dentists, 33,778 nurses and 2,777 pharmacists. There were 46,742 beds in health establishments in total in 2008, of which 33,912 were in hospitals. In 2008 Slovakia spent 7.8% of its GDP on health.

### Welfare

The age of retirement is 62 for men and is set to rise from 53–57 to 62 for women by 2015. Pensions rose by 6.95% on 1 Jan. 2009. The average monthly old-age pension at Feb. 2009 was €335.50 with approximately 925,700 beneficiaries. Maternity benefit is paid for a total of 28 weeks or 37 weeks for a single mother and for multiple births. State unemployment benefit is 50% of previous earnings during the first three months, thereafter 45% of previous earnings.

### RELIGION

A federal Czechoslovakian law of July 1991 provides the basis for church-state relations and guarantees the religious and civic rights of citizens and churches. Churches must register to become legal entities but operate independently of the state. In 2011, 62.0% of the population were Roman Catholic, 5.9% members of the Evangelical Church of the Augsburg Confession, 5.8% Greek Catholic and 1.8% Calvinist. In Feb. 2013 there were two cardinals.

### CULTURE

Košice is one of two European Capitals of Culture for 2013. The title attracts large European Union grants.

### World Heritage Sites

There are seven UNESCO sites in Slovakia: Vlkolínec (inscribed on the list in 1993), a group of 45 traditional log houses; Banská Štiavnica (1993), a medieval mining town; Levoča, Spišský and the Associated Cultural Monuments (1993 and 2009)—13th century Spiš Castle is one of the largest castle complexes in central Europe; Bardejov Town Conservation Reserve (2000), a medieval fortified town; and Wooden Churches of the Slovak part of the Carpathian Mountain Area (2008).

Slovakia shares two UNESCO sites with other countries: the Caves of Aggtelek and Slovak Karst (1995, 2000 and 2008) with Hungary and the primeval beech forests of the Carpathians (2007) with Ukraine.

### Press

Slovakia had ten daily newspapers in 2008 (nine paid-for and one free) with a combined average daily circulation of 508,000.

### Tourism

In 2010, 1,327,000 non-resident tourists stayed in holiday accommodation (1,298,000 in 2009); there were 3,126 accommodation establishments in 2010 with 57,406 rooms and 147,492 beds.

### Festivals

The Bratislava Rock Festival takes place in June and the Bratislava Music Festival and Interpodium is in Oct. The Myjava Folklore Festival is held each June, the Zvolen Castle Games in June–July, Theatrical Nitra is in Sept., and there is an annual Spring Music Festival in Košice.

## KEY HISTORICAL EVENTS

The region was settled by Celts and Illyrians in pre-Roman times and fell to Rome in the 1st century AD. In the 6th century Slavic tribes arrived and part of the territory came under the Slavic Duchy of Karantania in the 7th century. In 745 Karantania became part of the Frankish Empire as an independent country with its own laws and language. After passing under the rule of Bavarian dukes and the Republic of Venice, it joined its neighbouring Slovene-inhabited areas to become part of the Habsburg dynasty in the 14th century.

The Slovenes retained a strong national identity, aided by the printing of the first Slovenian books in 1550 and the translation of the Protestant Bible into Slovenian in 1584. A 12-day peasant revolt in 1573 was bloodily suppressed. In the 19th century a nationalist movement developed, demanding Slovenian autonomy within the Habsburg monarchy. Administrative autonomy was granted in the province of Carinthia while Slovenes in other areas gained some cultural rights. With the demise of the Habsburg monarchy, Slovenia became part of Austria-Hungary. Following Germany's defeat in the First World War, the Slovenes joined their Slav neighbours in the Kingdom of the Serbs, Croats and Slovenes on 1 Dec. 1918. The country was renamed Yugoslavia in 1929. During the Second World War Slovenian territory was divided and annexed by the Axis powers. In 1945 Slovenia became a constituent republic of the Socialist Federal Republic of Yugoslavia under Josip Tito.

In the 1980s nationalism grew stronger throughout Yugoslavia, spearheaded by the Serbs' call for Serbian unity. In Oct. 1989 the Slovene Assembly passed a constitutional amendment giving it the right to secede from Yugoslavia and in a referendum on 23 Dec. 1990, 88.5% voted for independence. Slovenia declared independence on 25 June 1991 but, at EU-sponsored peace talks, suspended the claim for three months. Fighting between Slovenia

and federal troops ended with a federal withdrawal and on 8 Oct. 1991 Slovenia again declared its independence.

In 1992 Slovenia removed more than 18,000 non-Slovene residents from its records and cancelled their rights. Under pressure from the EU, which Slovenia joined in May 2004, partial restoration of citizenship was granted to about 12,000 people, though a 2004 referendum rejected proposals to restore full retrospective rights. Slovenia joined NATO in March 2004 and became the first former communist bloc country to adopt the euro in Jan. 2007.

## TERRITORY AND POPULATION

Slovenia is bounded in the north by Austria, in the northeast by Hungary, in the southeast and south by Croatia and in the west by Italy. The length of coastline is 47 km. Its area is 20,273 sq. km. In Jan. 2011 the population at the register-based census was 2,050,189 (1,035,626 females); density per sq. km, 101.1. The capital is Ljubljana: 2011 census population, 272,220. Maribor (population of 95,171 in 2011) is the other major city. In 2011, 49.5% of the population lived in urban areas.

The UN gives a projected population for 2015 of 2.05m.

The official language is Slovene.

In April 2004 voters rejected plans to restore the civil rights of Slovenia's ethnic minorities, mainly nationals of other former Yugoslav republics, which were 'erased' in 1992.

## CONSTITUTION AND GOVERNMENT

The constitution became effective on 23 Dec. 1991. Slovenia is a parliamentary democratic republic with an executive that consists of a directly-elected president and a prime minister, aided by a council of ministers. It has a bicameral parliament (*Skupščina Slovenije*), consisting of a 90-member *National Assembly (Državni Zbor)*, 88 members elected for four-year terms by proportional representation with a 4% threshold and two members elected by ethnic minorities; and a 40-member, advisory *State Council (Državni Svet)*, elected for five-year terms by interest groups and regions. It has veto powers over the National Assembly. Administratively the country is divided into 199 municipalities and 11 urban municipalities.

The Judicial branch consists of a *Supreme Court*, whose judges are elected by the National Assembly, and a *Constitutional Court*, whose judges are elected for nine-year terms by the National Assembly and nominated by the president.

### CURRENT LEADERS

#### Borut Pahor

##### *Position*

President

##### *Introduction*

Borut Pahor of the Social Democrats was elected president in the second round of voting in Dec. 2012, defeating the incumbent Danilo Türk. He had previously served as prime minister at the head of a centre-left coalition from Nov. 2008 until Jan. 2012 when he was succeeded by Janez Janša of the Slovenian Democratic Party.

##### *Early Life*

Pahor was born in 1963 in Postojna, southeast of Ljubljana. He studied political science at the University of Ljubljana and, at the age of 26, became the youngest-ever member of the central committee of the Slovenian branch of the Communist Party, gaining a reputation as a reformist. In 1992, after the collapse of communism in eastern Europe and the fragmentation of Yugoslavia, he was elected a deputy in the National Assembly of the newly independent Slovenia.

A year later Pahor became deputy leader of the newly formed United List of Social Democrats (ZLSD). At the third ZLSD conference in March 1997 he was elected party leader on a centrist, 'third way' platform. At the 2000 elections, having led his party into a coalition with Janez Drnovšek's Liberal Democracy of Slovenia, Pahor won a third term in the National Assembly and became its president. In 2004 he was elected to the European Parliament, where he joined the Socialist Group. In the same year the centre-left coalition of which he was a member lost to the centre-right alliance led by the Slovenian Democratic Party. In 2005, on his initiative, the ZLSD was renamed the Social Democrats.

Parliamentary elections held on 21 Sept. 2008 saw the Social Democrats gain 29 of the 90 available seats to become the country's largest party. It formed a coalition government with Zares, Liberal Democracy of Slovenia and the Democratic Party of Pensioners of Slovenia. Pahor was sworn in as premier on 21 Nov. 2008.

##### *Career in Office*

Pahor promised to cut taxes, reform the national health and pension systems and increase investment incentives, but was forced to redraft the 2009 national budget in the wake of the global financial crisis, allowing for a significant increase in the budget deficit.

In Dec. 2008, owing to an unresolved border dispute, Slovenia obstructed Croatia's accession to the European Union and, in March 2009, was the last member of NATO to ratify Croatia's accession to the alliance. However, in Sept. 2009 Pahor said that the dispute would no longer prejudice Croatia's EU accession negotiations and in Nov. Slovenia lifted its embargo. In March 2010 he agreed to opposition demands for a referendum on allowing the border issue to go to international arbitration, and in June voters narrowly backed the plan.

Following a gas dispute between Russia and Ukraine in 2009, Pahor moved to diversify Slovenia's energy supply, so reducing dependence on Russia, and established the Strategic Energy Council to advise the government. He has also stated his commitment to the fight against climate change.

On 20 Sept. 2011, amid internal coalition disputes and an inability to implement economic reforms, parliament voted 51–36 against a motion of confidence. Pahor's government fell and assumed a caretaker role. Following inconclusive elections in Dec. 2011 he was succeeded as premier by former prime minister, Janez Janša.

Pahor nevertheless continued in politics and announced his candidacy for the presidential elections held in Nov. and Dec. 2012, in which he won a second round victory with 67% of the vote.

## **Alenka Bratušek**

### *Position*

Prime Minister

### *Introduction*

Alenka Bratušek, leader of the Positive Slovenia Party (PS), became prime minister in March 2013 after the previous government fell to a no confidence vote. Heading a four-party coalition covering a wide spectrum of political opinion, Bratušek has pledged to balance austerity policies with measures to boost growth.

### *Early Life*

Born on 31 March 1970 in Celje, Alenka Bratušek graduated from the faculty of natural sciences and technology at Ljubljana University in the early 1990s and earned a masters degree in management from the same institution in 2006. Entering public administration in 1995, she took a job at the ministry of the economy before moving to the ministry of finance in 1999. She became head of the ministry's budget directorate, responsible for administering the national budget, overseeing local government finances and drawing on European Union funding.

Bratušek stood unsuccessfully for parliament for the Zares party in 2008. Having joined the newly-formed PS in 2011, she was elected to parliament in the election of Dec. that year when the PS unexpectedly claimed the largest share of the vote. However, the party was unable to form a government and went into opposition to Janez Janša's centre-right administration. In this period, Bratušek chaired the commission for public finance control and served on the committee for finance and monetary policy, as well as on the committee for justice, public administration and local self-government. In line with PS policy she opposed plans for a government-subsidized 'bad bank' to deal with Slovenia's economic crisis, and advocated a relaxation of austerity together with policies to boost growth.

Following the publication of a report that alleged corruption against both Prime Minister Janša and PS leader Zoran Janković, Bratušek replaced Janković as acting party leader in Jan. 2013. When the government fell to a no confidence vote in Feb. 2013, Bratušek led all-party negotiations and emerged as leader of a broad coalition, uniting the centre-left PS and Social Democrats (SD) with the right-leaning Civic List (DL) and the Democratic Party of Pensioners of Slovenia (DeSUS).

### *Career in Office*

Bratušek was voted in as prime minister on 20 March with the backing of 52 of 90 MPs. She took office with the country facing acute economic problems. She must attempt to address the immediate financial crisis while implementing policies to secure long-term stability.

## **DEFENCE**

Compulsory military service for seven months ended in Sept. 2003. The army became fully professional in 2010 when the compulsory reserve was replaced by a new system of voluntary reserve service.

In 2008 military expenditure totalled US\$834m. (US\$415 per capita), representing 1.5% of GDP.

### **Army**

Personnel (2007), 5,973 and an army reserve of 20,000. There is a paramilitary police force of 4,500 with 5,000 reserves.

### **Navy**

There is an Army Maritime element numbering 47 personnel in 2007.

### **Air Force**

The Army Air element numbers 530 with eight combat-capable helicopters.

## **INTERNATIONAL RELATIONS**

Slovenia held a referendum on EU membership on 23 March 2003, in which 89.6% of votes cast were in favour of accession. It became a member of NATO on 29 March 2004 and the EU on 1 May 2004.

## **ECONOMY**

Agriculture accounted for 2% of GDP in 2007, industry 34% and services 63%.

### **Overview**

Slovenia was among the most developed of the ten countries that joined the EU in May 2004, benefiting from a well-educated, productive workforce, excellent infrastructure and a strategic location between Western and Eastern Europe. In Jan. 2007 it was the first of the ten to adopt the euro.

The economy enjoyed sound macroeconomic policy in the years prior to the global financial crisis, with tight monetary and fiscal policies contributing to small fiscal deficits and single-digit inflation. However, heavy dependence on exports (69% for EU markets in 2008) leaves the country vulnerable to wider economic trends. Despite its pre-2008 success, Slovenia was also criticized for having an unfriendly, inefficient business environment. The pace of privatization has been slower than in most other Central and Eastern European countries, with enterprises in key sectors remaining under state ownership. It has consequently attracted less FDI than other 2004 EU accession countries.

The economy contracted by nearly 8% in 2009, the first recession the country had experienced since independence. After growing by 1.2% in 2010, the economy recorded modest growth of just 0.6% in 2011. A government stimulus package in 2009 included subsidies for shorter working hours and R&D, as well as guarantee schemes in the financial sector. There followed a raft of austerity measures prompting popular protests that, along with a corruption scandal, led to the fall of Janez Janša's government in Feb. 2013.

Slovenia has one of the most generous welfare states in Europe and the European Commission warns of the heavy future cost of the pension system. Age-related expenditures are expected to reach 13% of GDP in the long term.

### **Currency**

On 1 Jan. 2007 the euro (EUR) replaced the *tolar* (SLT) as the legal currency of Slovenia at the irrevocable conversion rate of 239.64 tolar to one euro. Inflation was 1.8% both in 2010 and 2011. Foreign exchange reserves were US\$552m. and gold reserves 103,000 troy oz in Aug. 2010. Total money supply in July 2005 was 1,032.3bn. tolar.

### **Budget**

In 2009 general government revenues totalled €15.29bn. and expenditures €17.35bn. In 2008 tax revenue accounted for 54.2% of revenue and social security contributions 33.7%; social protection accounted for 36.0% of expenditure and education 13.9%.

Slovenia's budget deficit in 2011 was 6.4% of GDP (2010, 6.0%; 2009, 6.1%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 20.0% (reduced rate, 8.5%).

### Performance

The economy shrank by 7.8% in 2009 but grew by 1.2% in 2010 and 0.6% in 2011. Of all the central and eastern European countries that joined the European Union in May 2004, Slovenia has the highest per capita GDP at 85% of the EU average in 2010 (higher than in Portugal and only marginally lower than in Greece). Total GDP in 2011 was US\$49.5bn.

### Banking and Finance

The central bank and bank of issue, the Bank of Slovenia, was founded on 25 June 1991 upon independence. Its current *Governor* is Marko Kranjec, appointed on 3 July 2007 for a term of six years. In 2009 there were 20 commercial banks (five subsidiaries of foreign banks and one branch office of a foreign bank) and three savings banks. The largest bank is Nova Ljubljanska banka (NLB), which has a market share of around a third and had assets in 2009 of US\$22.0bn. Other large banks are Nova Kreditna Banka Maribor (NKBM) and Abanka Vipava. In 2010 Slovenia received US\$834m. of foreign direct investment, down from a high of US\$1,947m. in 2008.

In June 2012 gross external debt amounted to US\$52,416m.

Foreign debt amounted to €41,616m. at Aug. 2010. In 1997 Slovenia accepted 18% of the US\$4,400m. commercial bank debt of the former Yugoslavia, thus gaining access to international capital markets.

There is a stock exchange in Ljubljana (LjSE).

### ENERGY AND NATURAL RESOURCES

In 2008, 15.1% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 25% has been set by the EU for 2020.

### Environment

Slovenia's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 8.3 tonnes per capita in 2008. An *Environmental Performance Index* compiled in 2008 ranked Slovenia 15th in the world, with 86.3%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

Installed capacity was 3.0m. kW in 2007. There was one nuclear power station in operation. The total amount of electricity produced in 2007 was 15,043m. kWh (6,082m. kWh thermal, 5,695m. kWh nuclear and 3,266m. kWh hydro-electric). Consumption per capita in 2007 was 7,597 kWh.

### Minerals

Brown coal production was 4,535,000 tonnes in 2007.

### Agriculture

Only around 1.9% of the population worked in agriculture, forestry and fisheries in 2011. Output (in 1,000 tonnes) in 2011: maize, 349; wheat, 153; grapes, 121; apples, 105; potatoes, 96.

Livestock in 2011: cattle, 462,300; pigs, 347,310; sheep, 119,976; poultry, 4,006,718. Livestock products, 2010 (unless otherwise indicated): poultry meat, 60,700 tonnes; pork, bacon and ham, 44,100 tonnes; beef and veal, 35,800 tonnes; milk (2011), 584.1m. litres.

In 2011 there were 168,744 ha. of arable land and 26,867 ha. of permanent crops.

### Forestry

In 2010 the area under forests was 1.25m. ha., or 62% of the total land area. Timber production in 2007 was 2.88m. cu. metres.

### Fisheries

## KEY HISTORICAL EVENTS

The Solomon Islands were discovered by Europeans in 1568 but 200 years passed before contact was made again. The southern Solomon Islands were placed under British protection in 1893; the eastern and southern outliers were added in 1898 and 1899. Santa Isabel and the other islands to the north were ceded by Germany in 1900. Full internal self-government was achieved on 2 Jan. 1976 and independence on 7 July 1978.

In 1997 Bartholomew Ulufa'alu, a Malaitan, was elected prime minister. The following year, fighting broke out between the Isatabu Freedom Movement, which claimed to be representative of the native peoples of the island of Guadalcanal, and the Malaitan Eagle Force. In 2000 the Malaita Eagles led a coup which deposed Ulufa'alu, who was held at gunpoint for two days. After the failure of a 2001 peace accord, conflict between the Malaita Eagles and the Isatabu Freedom Movement escalated in 2003 and an Australian-led peacekeeping force landed to restore order. After some initial success the force was scaled back towards the end of the year.

In 2006 Manasseh Sogavare became prime minister, having previously held the office following the 2000 coup. His appointment was marked by rioting in Honiara and the destruction of the city's Chinatown as tensions rose over the political and business influence of the local Chinese population.

## TERRITORY AND POPULATION

The Solomon Islands lie within the area 5° to 12° 30' S. lat. and 155° 30' to 169° 45' E. long. The group includes the main islands of Guadalcanal, Malaita, New Georgia, San Cristobal (now Makira), Santa Isabel and Choiseul; the smaller Florida and Russell groups; the Shortland, Mono (or Treasury), Vella La Vella, Kolombangara, Ranongga, Gizo and Rendova Islands; to the east, Santa Cruz, Tikopia, the Reef and Duff groups; Rennell and Bellona in the south; Ontong Java or Lord Howe to the north; and many smaller islands. The land area is estimated at 28,370 sq. km (10,954 sq. miles). The larger islands are mountainous and forest clad, with flood-prone rivers of considerable energy potential. Guadalcanal has the largest land area and the greatest amount of flat coastal plain. Population at the census of Nov. 2009, 515,870 (251,415 females); density, 18.2 per sq. km. In 2011, 18.9% of the population lived in urban areas.

The UN gives a projected population for 2015 of 610,000. The islands are administratively divided into nine provinces plus a Capital Territory. Area, population and capital:

| Province            | Sq. km | 2009 census | Capital           |
|---------------------|--------|-------------|-------------------|
| Capital Territory   | 22     | 64,602      | —                 |
| Central Islands     | 615    | 26,051      | Tulagi            |
| Choiseul            | 3,837  | 26,379      | Taro              |
| Guadalcanal         | 5,336  | 93,613      | Honiara           |
| Isabel              | 4,136  | 26,158      | Buala             |
| Makira and Ulawa    | 3,188  | 40,419      | Kirakira          |
| Malaita             | 4,225  | 137,596     | Auki              |
| Rennell and Bellona | 671    | 3,041       | Tigoga            |
| Temotu              | 895    | 21,362      | Lata (Santa Cruz) |
| Western             | 5,475  | 76,649      | Gizo              |

The capital, Honiara, on Guadalcanal, is the largest urban area, with a population in 2009 of 64,602. 93% of the population are Melanesian; other ethnic groups include Polynesian, Micronesian, European and Chinese.

English is the official language, and is spoken by 1–2% of the population. In all 120 indigenous languages are spoken; Melanesian languages are spoken by 85% of the population.

## SOCIAL STATISTICS

2008 estimates: births, 16,000; deaths, 3,000. Estimated birth rate in 2008 was 30.4 per 1,000 population; estimated death rate, 6.2. Life expectancy, 2007, 66.7 years for women and 64.9 for men. Annual population growth rate, 2000–08, 2.6%. Infant mortality, 2010, 23 per 1,000 live births; fertility rate, 2008, 3.9 births per woman.

## CLIMATE

An equatorial climate with only small seasonal variations. Southeast winds cause cooler conditions from April to Nov., but northwest winds for the rest of the year bring higher temperatures and greater rainfall, with annual totals ranging between 80" (2,000 mm) and 120" (3,000 mm).

## CONSTITUTION AND GOVERNMENT

The Solomon Islands are a constitutional monarchy with the British Sovereign (represented locally by a Governor-General, who must be a Solomon Island citizen) as Head of State. Legislative power is vested in the single-chamber *National Parliament* composed of 50 members, elected by universal adult suffrage for four years. Parliamentary democracy is based on a multi-party system. Executive authority is effectively held by the Cabinet, led by the Prime Minister.

The *Governor-General* is appointed for up to five years, on the advice of Parliament, and acts in almost all matters on the advice of the Cabinet. The Prime Minister is elected by and from members of Parliament. Other Ministers are appointed by the Governor-General on the Prime Minister's recommendation, from members of Parliament. The Cabinet is responsible to Parliament. Emphasis is laid on the devolution of power to provincial governments, and traditional chiefs and leaders have a special role within the arrangement.

## National Anthem

'God save our Solomon Islands from shore to shore'; words and tune by P. Balekana.

## RECENT ELECTIONS

## CURRENT LEADERS

### Gordon Darcy Lilo

#### Position

Prime Minister

#### Introduction

Gordon Darcy Lilo became prime minister in Nov. 2011 following the resignation of Danny Philip amid controversy over development funding. A finance minister in previous administrations, Lilo promised increased political transparency.

#### Early Life

Born on 28 Aug. 1965 in Ghatere on Kolombangara Island, Lilo studied economics at the University of Papua New Guinea. As a civil servant he was a permanent secretary at the ministries of environment and conservation and finance. He received a masters degree in development and administration from the Crawford School of Economics and Government at the Australian National University in 2001.

Having returned to the Solomon Islands, Lilo was elected to parliament as MP for Gizo/Kolombangara in Dec. 2001, serving as leader of the independent group in parliament from Dec. 2001 until April 2006. In May 2006 he was appointed finance minister by Prime Minister Sogavare. He then served as minister for environment and conservation under Prime Minister Sikua from Dec. 2007.

In Aug. 2010 Lilo was again appointed finance minister in the National Coalition for Rural Advancement (NCRA) government led by Danny Philip. He subsequently oversaw development projects across a range of sectors including agriculture, forestry, education and infrastructure. In Nov. that year a scandal erupted over the alleged misuse of Taiwanese-provided development funds

by Philip, forcing him to resign the premiership. In the ensuing parliamentary ballot Lilo was elected his successor by 29 votes to 20.

#### Career in Office

Taking office on 16 Nov. 2011, Lilo pledged to continue the main policies of the NCRA government. These included developing the Solomon Islands' agriculture sector and diversifying the economy away from logging. In response to criticism of cronyism in government, he proposed a stronger role for the audit office and increased public consultation.

In foreign affairs, closer relations were sought with Australia, New Zealand and Papua New Guinea.

## DEFENCE

The marine wing of the Royal Solomon Islands Police operates three patrol boats and a number of fast crafts for surveillance of fisheries and maritime boundaries. There is also an RSI Police Field Force stationed at the border with Papua New Guinea.

In July 2003 an Australian-led peacekeeping force landed to restore stability after years of ethnic fighting and high-level corruption. The force included troops from the Fiji Islands, New Zealand, Papua New Guinea and Tonga.

## ECONOMY

Agriculture accounted for 35.1% of GDP in 2006, industry 9.0% and services 55.9%.

### Overview

The Solomon Islands is a small, open economy vulnerable to external shocks. Food and fuel account for about 40% of total imports. Timber is the main export, while gold mining operations were relaunched in March 2010 and began production a year later. Gold is projected to overtake logging as the main driver of growth in the medium to long term. Tourism accounts for less than 2% of GDP.

Following Australian intervention in 2003 to restore political stability after years of civil strife, economic performance proved robust with average annual growth of 7%. However, the global financial crisis led to a decline in commodity exports, a contraction in growth of nearly 5% in 2009 and a depletion of international reserves. An 18-month Standby Credit Facility arrangement with the IMF was approved in June 2010, helping to restore economic stability. Logging production surged in 2010 owing to strong demand from Asia, with growth rebounding to nearly 8%. In mid-2011 the trade balance shifted from deficit to surplus for the first time since 2004. China accounts for 50% of the country's exports.

Almost 25% of the population lives in poverty and recent growth has not yet resulted in poverty reduction. The precarious global economic outlook poses additional risks to recovery.

### Currency

The *Solomon Island dollar* (SBD) of 100 cents was introduced in 1977. It was devalued by 20% in Dec. 1997 and 25% in March 2002. Inflation was 17.3% in 2008, falling to 0.9% in 2010 but increasing to 7.4% in 2011. In July 2005 foreign exchange reserves were US\$83m. and total money supply was SI\$447m.

### Budget

In 2009 revenues totalled SI\$1,704.8m. and expenditures were SI\$1,701.6m. Tax revenue accounted for 76.7% of revenues in 2009; current expenditure accounted for 83.9% of expenditures.

### Performance

The economy shrank by 4.7% in 2009 but there was growth of 7.8% in 2010 and 10.7% in 2011. Total GDP in 2011 was US\$0.8bn.

### Banking and Finance

The Central Bank of Solomon Islands is the bank of issue; its *Governor* is Denton Rarawa. There are three commercial banks and a development bank.

Total foreign debt in 2007 was US\$178m.

### ENERGY AND NATURAL RESOURCES

#### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.4 tonnes per capita.

#### Electricity

Installed capacity in 2007 was approximately 14,000 kW. Production in 2007 was 85m. kWh and consumption per capita 172 kWh.

#### Oil and Gas

The potential for oil, petroleum and gas production has yet to be tapped.

#### Minerals

In 1999 gold output from mining totalled 3,456 kg and silver output 2,138 kg. The only mine in the Solomon Islands closed in 2000 owing to the civil unrest. However, in March 2010 the mine was revived and production began again in March 2011. The value of gold exports in 1999 was SI\$113.7m.

#### Agriculture

Land is held either as customary land (88% of holdings) or registered land. Customary land rights depend on clan membership or kinship. Only Solomon Islanders own customary land; only Islanders or government members may hold perpetual estates of registered land. Coconuts, cocoa, rice and other minor crops are grown. Production, 2003 estimates (in 1,000 tonnes): coconuts, 330; sweet potatoes, 83; taro, 38; palm oil, 34; yams, 28; copra, 30; palm kernels, 8. In 2007 there were an estimated 16,000 ha. of arable land and 60,000 ha. of permanent crops.

Livestock (2003 estimates): pigs, 68,000; cattle, 13,000.

#### Forestry

Forests covered 2.21m. ha. in 2010 (79% of the land area). Of the total area under forests 50% was primary forest in 2010, 49% other naturally regenerated forest and 1% planted forest. Timber production was 1.25m. cu. metres in 2007.

#### Fisheries

Solomon Islands' waters are among the richest in tuna. The total catch in 2010 was an estimated 35,200 tonnes.

### INDUSTRY

Industries include palm oil manufacture (35,000 tonnes in 2002), processed fish production (13,700 tonnes in 2000), rice milling, fish canning, fish freezing, saw milling, food, tobacco and soft drinks. Other products include wood and rattan furniture, fibreglass articles, boats, clothing and spices.

#### Labour

The estimated economically active population in 2010 was 123,000 (69% males), up from 105,000 in 2005.

### INTERNATIONAL TRADE

#### Imports and Exports

Imports 2007, US\$285.0m.; exports, US\$158.5m. Main imports, 2007: machinery and transport equipment, 28.4%; mineral fuels and lubricants, 24.9%; food and live animals, 17.6%. Main exports, 2007: timber, 66.6%; fish products, 13.0%; palm oil, 8.8%. Principal import suppliers (2007): Australia, 31.5%; Singapore, 27.0%; Japan, 8.2%. Principal export markets (2007): China, 46.5%; Thailand, 7.2%; South Korea, 6.1%.

### Trade Fairs

An annual National Trade and Cultural Show is held in July to coincide with the anniversary of independence.

### COMMUNICATIONS

#### Roads

In 2002 there was estimated to be a total of 1,360 km of roads, of which 34 km were paved. The unpaved roads included 800 km of private plantation roads.

#### Civil Aviation

A new terminal has been opened at Henderson International Airport in Honiara. The national carrier is Solomon Airlines. In 2006 scheduled airline traffic of Solomon Islands-based carriers flew 3m. km, carrying 101,000 passengers (32,000 on international flights).

#### Shipping

There are international ports at Honiara, Yandina in the Russell Islands and Noro in New Georgia, Western Province. In Jan. 2009 there were three ships of 300 GT or over registered, totalling 2,000 GT.

#### Telecommunications

Telecommunications are operated by Solomon Telekom, a joint venture between the government of Solomon Islands and Cable & Wireless (UK). Telecommunications between Honiara and provincial centres are facilitated by modern satellite communication systems. In 2008 there were 8,000 main (fixed) telephone lines; mobile phone subscribers numbered 30,000 (5.9 per 100 persons). In 2011 an estimated 6% of the population were internet users.

### SOCIAL INSTITUTIONS

#### Justice

Civil and criminal jurisdiction is exercised by the High Court of the Solomon Islands, constituted 1975. A Solomon Islands Court of Appeal was established in 1982. Jurisdiction is based on the principles of English law (as applying on 1 Jan. 1981). Magistrates' courts can try civil cases on claims not exceeding SI\$2,000, and criminal cases with penalties not exceeding 14 years' imprisonment. Certain crimes, such as burglary and arson, where the maximum sentence is for life, may also be tried by magistrates. There are also local courts, which decide matters concerning customary titles to land; decisions may be put to the Customary Land Appeal Court. There is no capital punishment.

The population in penal institutions in June 2007 was 211 (42 per 100,000 of national population).

#### Education

In 2005 there were 100,026 pupils at primary and 22,487 pupils at secondary level. The adult literacy rate in 1998 was 62.0%.

Training of teachers and trade and vocational training is carried out at the College of Higher Education. The University of the South Pacific Centre is at Honiara. Other rural training centres run by churches are also involved in vocational training.

In 2000-01 total expenditure on education came to 3.6% of GNP and in 1999-2000 accounted for 15.4% of total government spending.

#### Health

A free medical service is supplemented by the private sector. An international standard immunization programme is conducted in conjunction with the WHO for infants. Tuberculosis has been eradicated but malaria remains a problem. In 2003 there were 60 physicians and 653 nursing and midwifery personnel. There were 15 hospitals beds per 10,000 inhabitants in 2005.

### RELIGION

92% of the population were Christians in 2001.

**CULTURE****World Heritage Sites**

The Solomon Islands has one site on the UNESCO World Heritage List: East Rennell (inscribed on the list in 1998), the largest raised coral atoll in the world.

**Press**

There are three main newspapers in circulation. *The Solomon Star* (circulation: 5,000) is daily and the *Solomon Express* and *The Island Sun* are weekly. The Government Information Service publishes a monthly issue of the *Solomon Nius* that exclusively disseminates news of government activities. Non-government organizations such as the Solomon Islands Development Trust (SIDT) also publish monthly papers on environmental issues.

**Tourism**

Tourism in the Solomon Islands is still in a development stage. The emphasis is on establishing major hotels in the capital and provincial centres, to be supplemented by satellite eco-tourism projects in the rural areas. The Solomon Islands Visitors Bureau is the statutory institution for domestic co-ordination and international marketing. In 2007 there were 13,748 foreign tourists.

**Festivals**

Festivities and parades in the capital and provincial centres normally mark the National Day of Independence. The highlight is the annual National Trade and Cultural Show.

## KEY HISTORICAL EVENTS

The origins of the Somali people can be traced back 2,000 years when they displaced an earlier Arabic people. They converted to Islam in the 10th century and were organized in loose Islamic states by the 19th century. The northern part of Somaliland was created a British protectorate in 1884. The southern part belonged to two local rulers who, in 1889, accepted Italian protection for their lands. The Italian invasion of Ethiopia in 1935 was launched from Somaliland and in 1936 Somaliland was incorporated with Eritrea and Ethiopia to become Italian East Africa. In 1940 Italian forces invaded British Somaliland but in 1941 the British, with South African and Indian troops, recaptured this territory as well as occupying Italian Somaliland. After the Second World War British Somaliland reverted to its colonial status and ex-Italian Somaliland became the UN Trust Territory of Somaliland, administered by Italy.

The independent Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which first became independent on 26 June 1960, and the Italian Trusteeship Territory of Somaliland. On 21 Oct. 1969 Maj.-Gen. Mohammed Siyad Barre took power in a coup. Various insurgent forces combined to oppose the Barre regime in

a bloody civil war. Barre fled on 27 Jan. 1991 but interfactional fighting continued. In Aug. 1992 a new coalition government agreed a UN military presence to back up relief efforts to help the estimated 1.5–2m. victims of famine. On 11 Dec. 1992 the leaders of the two most prominent of the warring factions, Ali Mahdi Muhammad and Muhammad Farah Aidid, agreed to a peace plan under the aegis of the UN and a pact was signed on 15 Jan. 1993. At the end of March, the warring factions agreed to disarm and form a 74-member National Transitional Council. On 4 Nov. 1994 the UN Security Council unanimously decided to withdraw UN forces; the last of these left on 2 March 1995.

The principal insurgent group in the north of the country, the Somali National Movement, declared the secession of an independent 'Somaliland Republic' on 17 May 1991. The Somali government rejected the secession and Muhammad Aidid's forces launched a campaign to reoccupy the 'Republic' in Jan. 1996. Muhammad Farah Aidid was assassinated in July 1996 and succeeded by his son Hussein Aidid. In July 1998 leaders in the northeast of Somalia proclaimed an 'autonomous state' named **Puntland**.

Peace efforts in neighbouring Djibouti culminated in July 2000 in the establishment of a power-sharing agreement and a national constitution to see Somalia through a three-year transitional period. The election of members of parliament and a civilian government followed in Aug. 2000, and in Oct. the new government moved from Djibouti back to Somalia. In April 2002 'Southwestern Somalia' broke away from Mogadishu, thereby creating a third autonomous Somali state.

In June 2006 after months of fighting an Islamic militia, the Islamic Courts Union, took control of the capital, Mogadishu, and a large part of southern Somalia. In Dec. 2006, following a sustained assault by government forces backed by Ethiopian troops, the Islamist militias withdrew from Mogadishu. The southern city of Kismayo, the Islamists' last stronghold, was recaptured in Jan. 2007.

In June 2012 separatist leaders from Somaliland agreed to hold talks with the Somali government in London. In Aug. 2012 a Somali-elected parliament formally convened in Mogadishu for the first time in 20 years. It elected Hassan Sheikh Mohamud as president the following month, the first such vote undertaken on Somali territory since 1967. In Oct. 2012 a mix of government and African Union troops defeated the Al-Shabab militant Islamist group, ejecting them from Kismayo, the organization's last major urban stronghold.

## TERRITORY AND POPULATION

Somalia is bounded north by the Gulf of Aden, east and south by the Indian ocean, and west by Kenya, Ethiopia and Djibouti. Total area 637,657 sq. km (246,201 sq. miles). A census has not been held since 1987, when the population was 7,114,431. The United Nations gave an estimated population for 2012 of 9-80m.; density, 15 per sq. km. Population counting is complicated owing to large numbers of nomads and refugee movements as a result of famine and clan warfare. Up to 1.5m. Somalis are displaced within the country and in 2010 there were 770,000 Somali refugees living abroad, mainly in Kenya and Yemen.

The UN gives a projected population for 2015 of 10-61m.

In 2011, 37-9% of the population were urban.

The country is administratively divided into 18 regions (with chief cities): Awdal (Baki), Bakol (Xuddur), Bay (Baydhabo), Benadir (Mogadishu), Bari (Bosaso), Galgudug (Duusa Marreeb), Gedo (Garbahaarrey), Hiran (Beledweyne), Jubbada Dexe (Jilib), Jubbada Hoose (Kismayo), Mudug (Gaalkacyo), Nogal (Garowe), Woqooyi Galbeed (Hargeisa), Sanaag (Ceerigabo), Shabeellaha

Dhexe (Jawhar), Shabeellaha Hoose (Marka), Sol (Las Anod), Togder (Buraao). Somaliland comprises the regions of Awdal, Woqooyi Galbeed, Togder, Sanaag and Sol. Puntland consists of Bari, Nogal and northern Mudug. Southwestern Somalia consists of Bay, Bakol, Gedo, Jubbada Hoose and Shabeellaha Dhexe.

The capital is Mogadishu (2010 population estimate, 1,426,000). Other large towns are Baidoa, Bosaso, Gaalkacyo and Hargeisa.

The official language is Somali. Arabic, English and Italian are widely spoken.

## SOCIAL STATISTICS

Births, 2008 estimate, 394,000; deaths, 140,000. Rates, 2008 estimate (per 1,000 population): birth, 44.1; death, 15.7. Infant mortality, 2010, 108 per 1,000 live births. Annual population growth rate, 2000–08, 2.4%. Life expectancy at birth, 2007, was 48.3 years for men and 51.2 years for women. Fertility rate, 2008, 6.4 births per woman.

## CLIMATE

Much of the country is arid, although rainfall is more adequate towards the south. Temperatures are very high on the northern coasts. Mogadishu, Jan. 79°F (26.1°C), July 78°F (25.6°C). Annual rainfall 17" (429 mm). Berbera, Jan. 76°F (24.4°C), July 97°F (36.1°C). Annual rainfall 2" (51 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was promulgated on 1 Aug. 2012 after over 20 years of non-functioning government. It replaced the constitution of 1979 that itself had lost authority after the ousting of President Siyad Barre in 1991. The 2012 constitution was adopted by the National Constitutional Assembly with 96% backing from the 645 community leaders present at the vote (from a total of 825).

The constitution includes a bill of rights enshrining the equality of all citizens regardless of clan or religion. Islam is the single recognized state religion, with Sharia law serving as the foundation of the legal system. The right to education up to the secondary level is guaranteed for all, while female circumcision and the deployment of children in armed conflict are proscribed. Provision is included for the establishment of a Truth and Reconciliation Commission and for the implementation of a federal system of government (though details of how power and resources are to be split remains to be decided).

There is a bicameral parliament with a proposed 275 seats in the lower house and a maximum of 54 seats in the senate. Parliament elects the *President*, who in turn appoints a *Prime Minister*.

**Puntland.** Puntland, in the northeast region of Somalia, declared itself an 'autonomous state' in July 1998 under the leadership of Abdullahi Yusuf. Since its creation, Puntland has been locked in dispute with Somaliland over control of the Sanaag and Sol areas. Abdurahman Farole became *President* in Jan. 2009.

Puntland covers 300,000 sq. km and had a population in 2000 of 2m. The capital is Garowe. Somali is the official language and the Somali shilling is the official currency. Puntland has not received international recognition.

**Somaliland.** An independent 'Somaliland Republic', based on the territory of the former British protectorate which ran from 1884 until Somali independence in 1960, was established on 17 May 1991 by the principal insurgent group in the north of the country, the Somali National Movement. The Somali government rejected the secession and an unsuccessful campaign to reoccupy Somaliland was launched in Jan. 1996. Somaliland is also engaged in a long-running dispute with Puntland over control of the Sanaag and Sol regions. The Republic has failed to secure international recognition although it has in effect seceded from Somalia.

Somaliland covers 137,600 sq. km. The capital is Hargeisa and there is a port at Berbera. There is a population of around 3.5m.

Somali is the official language and Arabic and English are also widely used.

There is a bicameral government with a house of representatives and one of elected elders. Ahmed Mohamed Silanyo became *President* in July 2010. The judiciary is independent. The official currency is the Somaliland shilling. The Bank of Somaliland, the central bank, was founded in 1994. The economy is reliant on livestock farming.

**Southwestern Somalia.** In April 2002 Southwestern Somalia broke away from Mogadishu and was declared an autonomous state by the Rahanwein Resistance Army. Hassan Muhammad Nur 'Shatigadud' was named president but fighting between Shatigadud and several of his deputies ensued, notably around the capital, Baydhabo.

## National Anthem

'Qolobaa Calankeed' ('Every nation has its own flag'); words and tune by Abdullahi Qarshe.

## RECENT ELECTIONS

Somalia's parliament elected Hassan Sheikh Mohamud president on 10 Sept. 2012. In the first round Sharif Sheikh Ahmed, who had been president from Jan. 2009 until Aug. 2012, won 64 votes, followed by Hassan Sheikh Mohamud with 60 votes. Prime Minister Abdiweli Mohamed Ali placed third with 32 votes. There were 19 other candidates. All candidates apart from Sharif Ahmed and Mohamud withdrew after the first round. A subsequent run-off was held in which Mohamud won 190 votes against 79 for Sharif Ahmed.

## CURRENT LEADERS

### Hassan Sheikh Mohamud

#### Position

President

#### Introduction

Elected president by parliament in Sept. 2012, Hassan Sheikh Mohamud is a relative newcomer to frontline politics but is experienced in building civil institutions. He is a vocal critic of corruption and clan factionalism.

#### Early Life

Born on 29 Nov. 1955 in Jalalaqsi, Hassan Sheikh Mohamud graduated in technology from Somalia National University in Mogadishu in 1981. From 1981–84 he worked as a secondary school teacher and from 1984–86 as a lecturer in teacher training. In 1986 he moved to India, completing a masters degree in technical education at Bhopal University in 1988. Returning to

Somalia the same year, he worked with UNESCO on a project to expand technical and vocational training.

Following the onset of civil war, he became an education officer for UNICEF in 1993, focusing on rebuilding educational services in the central and southern regions. From 1995–97 he worked with civic organizations to establish communication between rival factions in Mogadishu. After the 1997 Cairo Agreement, he was key to negotiating the dismantling of the 'Green Line' that had divided Mogadishu since the outbreak of fighting in the early 1990s.

Mohamud co-founded the Somali Institute of Management and Administration Development in 1999, serving as its dean until 2010. He worked for the Center for Research and Development from 2001, where he oversaw the establishment of the Somalia Civil Society Forum, an umbrella group of activists and organizations engaged in rebuilding civil society. From 2007 he was consultant to a number of international and local NGOs, working on projects to rebuild different aspects of Somali society.

From 2007–09, in the period of Somalia's Transitional Federal Government (TFG), he was a consultant at the ministry of planning and international co-operation, overseeing aid management. In 2011 he co-founded the Peace and Development Party (PDP) and was elected its leader in April that year. In Sept. 2012 a presidential vote was held by parliament, with Mohamud achieving a surprise victory. He defeated the former president, Sharif Sheikh Ahmed, in a run-off, claiming 190 votes to 79.

#### Career in Office

Mohamud took office on 10 Sept. 2012, pledging to tackle corruption and combat the Islamic militia group, al-Shabab. He also promised to develop education and provide jobs for young people. In Jan. 2013 the USA recognized the Mogadishu government for the first time in over 20 years and the EU agreed to negotiate a 'New Deal' of support. Nonetheless, Mohamud faces major challenges, notably the continuing insurgency, clan rivalries, widespread poverty and piracy.

#### DEFENCE

With the breakdown of government following the 1991 revolution armed forces broke up into clan groupings, four of them in the north and six in the south.

#### Army

Following the 1991 revolution there are no national armed forces. In Northern Somalia the Somali National Movement controls an armed clan of 5–6,000 out of a total of 7,000 armed forces in the area. In the rest of the country several local groups control forces of which the Ali Mahdi Faction controls the largest, an armed clan of 10,000.

#### ECONOMY

Agriculture accounts for approximately 59% of GDP, industry 10% and services 31%.

Somalia was rated the joint most corrupt country in the world in a 2012 survey of 176 countries carried out by the anti-corruption organization *Transparency International*.

#### Overview

Somalia has been entangled in civil conflict with no effective central government since 1991. A large private sector, trading locally and with neighbouring Asian economies, has compensated for a weak public sector. Remittances, amounting to around US\$1bn. per year, have helped stimulate private investment in a number of commercial ventures, as well as partially offsetting a decline in per capita income. Social conditions have deteriorated since the onset of civil war, with an estimated 43% of the population living in extreme poverty.

Somalia is one of three member countries to remain in protracted arrears to the IMF, accounting for 17% of total arrears to the Fund. Reviews of its overdue financial obligations have

been postponed since Oct. 1990, owing to the absence of a functioning government, continuous political and security problems, and the lack of official information on economic and financial developments. Economic growth is expected to remain minimal across most of the country until peace and stability return, although the formation of a new government in Oct. 2012 offers some hope of progress.

#### Currency

The unit of currency is the *Somali shilling* (SOS) of 100 *cents*.

#### Budget

A budget for 2012 of US\$126m. was reportedly approved in Dec. 2011.

#### Performance

Real GDP growth was 3.5% in both 2002 and 2003. Total GDP in 2003 was US\$1.5bn.

#### Banking and Finance

The bank of issue is the Central Bank of Somalia (*Governor*, Abdullahi Jama Ali). The separatist Somaliland Republic has its own functioning central bank in Hargeisa, the Bank of Somaliland (*Governor*, Abdi Dirir Abdib). Remittance companies (*hawala*) took the place of banks in the 1990s, channelling approximately US\$800m. a year. Al-Barakaat, the largest *hawala*, was shut down in Nov. 2001. All national banks were bankrupted by 1990. The Universal Bank of Somalia, the first commercial bank in Mogadishu since 1990, opened with European backing in Jan. 2002.

In 2010 external debt totalled US\$2,942m.

#### ENERGY AND NATURAL RESOURCES

##### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

##### Electricity

In 2007 installed capacity was 65,000 kW. Production (2007): 326m. kWh.

##### Oil and Gas

Proven natural gas reserves were 5.7bn. cu. metres in 2007.

##### Minerals

There are deposits of chromium, coal, copper, gold, gypsum, lead, limestone, manganese, nickel, sepiolite, silver, titanium, tungsten, uranium and zinc.

##### Agriculture

Somalia is essentially a pastoral country, and about 80% of the inhabitants depend on livestock-rearing. Half the population is nomadic. In 2002 there were about 1.05m. ha. of arable land and 26,000 ha. of permanent crops. Around 200,000 ha. were irrigated in 2002. There were about 1,700 tractors in 2002. Output, 2003 estimates (in 1,000 tonnes): sugarcane, 200; maize, 164; sorghum, 121; cassava, 85; bananas, 35. Livestock (2003 estimates): 13.1m. sheep; 12.7m. goats; 7.0m. camels; 5.1m. cattle. Somalia has the greatest number of camels of any country in the world.

##### Forestry

In 2010 the area under forests was 6.75m. ha., or 11% of the total land area. In 2007, 11.57m. cu. metres of roundwood were cut. Wood and charcoal are the main energy sources. Frankincense and myrrh are produced.

##### Fisheries

An estimated 30,000 tonnes of fish were caught in 2010, almost entirely from marine waters.

## INDUSTRY

A few small industries exist including sugar refining, food processing and textiles. Raw sugar production was an estimated 15,000 tonnes in 2005.

### Labour

The estimated economically active population in 2010 was 3,627,000 (59% males), up from 3,267,000 in 2005.

## INTERNATIONAL TRADE

### Imports and Exports

Imports in 2003 were estimated at US\$397m. and exports at US\$95m. Main imports: manufactures, petroleum, foodstuffs. Main exports: livestock, hides and skins, bananas. Leading import suppliers, 2003: Djibouti, 32%; Kenya, 15%; Brazil, 11%; United Arab Emirates, 5%. Leading export markets, 2003: United Arab Emirates, 39%; Yemen, 24%; Oman, 11%; China, 6%.

## COMMUNICATIONS

### Roads

In 2002 there were an estimated 22,100 km of roads, of which 2,600 km were paved. Passenger cars numbered 12,700 in 2002, and there were 10,400 trucks and vans.

### Civil Aviation

There are international airports at Mogadishu and Hargeisa. In 2010 there were flights to Aden, Djibouti, Dubai, Jeddah, Nairobi, Sharjah and Wajir in addition to internal services.

### Shipping

The main ports are at Berbera, Bosaso, Kismayo, Marka and Mogadishu. In Jan. 2009 there were three ships of 300 GT or over registered, totalling 2,000 GT.

Piracy off the coast of Somalia was intensifying for several years with 111 attacks in the waters off Somalia recorded in 2008, 217 in 2009, 218 in 2010 and 237 in 2011. In 2012 there were only 75 recorded attacks, largely thanks to more patrolling of the waters off East Africa by international navies. There were 14 actual hijacks, down from 28 in 2011 and 49 in 2010.

### Telecommunications

Somalia had 100,000 main telephone lines in 2008 (11.2 per 1,000 persons); mobile phone subscribers numbered 627,000 (70.2 per 1,000 persons). In 2008 there were 102,000 internet users.

## SOCIAL INSTITUTIONS

### Justice

There are 84 district courts, each with a civil and a criminal section. There are eight regional courts and two Courts of Appeal (at Mogadishu and Hargeisa), each with a general section and an assize section. The Supreme Court is in Mogadishu. The death penalty is in force; Amnesty International reported that there were at least six executions in 2012.

### Education

The nomadic life of a large percentage of the population inhibits educational progress. Adult literacy was estimated at 38% in the period 2000–06 (50% among males and 26% among females). In

2004 there were an estimated 1,172 primary schools with over 285,500 children in attendance. In 2006, 23.5% of primary age children and 26.2% of secondary age children were attending school. The longest-established university was for many years the Somali National University in Mogadishu (founded 1954), but it was extensively damaged in the civil war and classes have been suspended indefinitely. A private university, Mogadishu University, was opened in 1997.

### Health

In 2006 there were 300 physicians (3.5 per 100,000 population) and 965 nursing and midwifery personnel.

Somalia has among the highest percentages of undernourished people of any country, at 62% in the period 2005–07.

## RELIGION

The population is almost entirely Sunni Muslims.

## CULTURE

### Press

The Somali press collapsed in 1991, with most of its facilities destroyed. Since 2000 several independent newspapers have emerged, including the daily *Wartire in Hargeisa* (Somaliland) and the weeklies *Yamayska* and *Bulsho* in Puntland. There were seven daily newspapers in 2008. Average daily circulation of newspapers in 2008 totalled 21,000.

### Tourism

In 1998 there were 10,000 foreign tourists.

### KEY HISTORICAL EVENTS

The San and the Khoikhoi were the indigenous peoples of southern Africa. The San were nomadic hunter-gatherers who had lived from the land at the edge of the Kalahari desert for thousands of years. The Khoikhoi shared customs with the San and spoke related languages but also herded cattle and lived in more settled communities. The Khoikhoi settlements were most numerous in the Orange River valley and around the Cape. From the 4th century AD the eastern part of southern Africa was settled by Bantu-speaking groups, moving south from the continent's

drier interior. They were mixed farmers: herding sheep and cattle, hunting game, cultivating sorghum and making tools and weapons from iron.

The hunting and herding communities of southern Africa came into contact with the wider world at the end of the fifteenth century. Portuguese mariners first rounded the Cape peninsula in 1487 and opened a trade route into the Indian Ocean. A century later the route was used by Spanish, English, Dutch and French seafarers. They landed occasionally on the Cape peninsula and bartered sheep and cattle with Khoikhoi pastoralists in return for iron and copper goods. In 1649 the Dutch East India Company, the world's most powerful trading corporation, established a trading post at the Cape. Three years later Jan van Riebeeck arrived with orders to establish a fort at Table Bay and supply passing ships with meat, fruit and vegetables. Within a decade slaves were brought in to work on building and maintaining the infrastructure, and settlers began to arrive from the Netherlands. Relations between the Dutch and the Khoikhoi soon deteriorated: quarrels over rights to graze cattle escalated into warfare as early as 1659.

Over the next century the population of the Cape Colony reached 10,000. It was a diverse community, where traders from

Europe and Asia converged and exchanged goods and news. Large farms, cultivating vines and grain, were established in the fertile valleys to the east of Cape Town. Devastated by smallpox in 1713, the Khoikhoi population was unable to prevent *trekboers* (Dutch pastoral farmers) from moving to the north and east of the Cape colony. By 1770 trekboers were grazing their cattle as far east as the Fish river, where they came into contact with Xhosa farmers. More numerous and powerful than the Khoikhoi, and with greater resistance to European diseases, the Xhosa fought the Dutch settlers in a series of 'Frontier Wars'.

By the late 18th century Dutch sea power was on the wane. Vying with France for control of the main trade routes to Asia and the Americas, the British first seized Cape Town in 1795. Following the peace treaties of 1814, which ended the Napoleonic Wars, British sovereignty over the colony was confirmed. For the British, the main purpose of their acquisition was to provide a stepping-stone to their increasingly important colonies in Asia.

In the first two decades of the 19th century the Zulu people of the northeastern region (Natal) strengthened their power-base under their leader, Shaka. In response to a prolonged drought the Zulus conquered lands from rival Nguni groups, which culminated in widespread havoc and destruction, known as the *Mfecane*. From the chaos new kingdoms emerged, notably Gaza and Swaziland, while the Sotho, under King Moshosho, formed the mountain territory now known as Lesotho.

The *Mfecane* led to the migration of thousands of Basotho and Batswana from the High Veld and Xhosa from the coastal plains into the Cape Colony. In the 1830s Boer settlers, increasingly dissatisfied with British rule and, realising that the *Mfecane* had caused the depopulation of land to the north and east, began to move there. In the 'Great Trek' that began in 1836, the Afrikaners were seeking a free and independent state which they achieved in the establishment of the Orange Free State and Transvaal in 1854.

Meanwhile, the British strengthened their hold over the Cape Colony and Natal by bringing in new settlers. Between 1860 and 1866, 6,000 Indians arrived in Natal from Madras and Calcutta to work as indentured labourers on the new sugar plantations. The population of the Cape Colony included many Afrikaners as well as the 'coloured' community (descendants of Khoikhoi, white settlers and Malay slaves). Most Coloureds spoke Afrikaans, an offshoot of Dutch.

Britain annexed the Transvaal in 1877, and in 1879 fought the Zulus. Under King Ketswayo the Zulus were victorious at Isandhlwana but were then defeated at Ulundi. Britain restored independence to the Transvaal (the South African Republic) in 1884 and annexed Zululand in 1887. Both the British and the Boers fought African resistance for many years, the last major rising being in Natal in 1906. However, the British and Boers continued to be rivals, especially after the discovery of diamonds at Kimberley in 1867 and of gold in the Transvaal in 1884. This led to an economic boom. Cecil Rhodes, owner of the De Beers company and for a time prime minister of the Cape, was the dominant entrepreneurial figure.

#### *Boer War*

In the 1890s the British, under Rhodes, sought control over the Transvaal goldfields. Despite being thwarted in their attempts to spark off rebellion amongst the Afrikaners of the South African Republic, the British continued to press for control. The Afrikaners, led by Paul Kruger, decided they would have to fight to keep their independence and declared war on Britain in late 1899. The contest appeared unequal, with the might of the British army against only 35,000 Boer soldiers. The Boers suffered a heavy defeat at Paardeberg in 1900, but then switched to guerrilla warfare. The British army, led by Gen. Kitchener, responded by setting up concentration camps and destroying crops and farmsteads. The 'scorched earth' policy was strongly criticized in Europe, but had the desired effect—in 1902 the Boer republics signed the Treaty of Vereeniging and came under British rule.

They were given self-government in 1907 and on 31 May 1910 the Cape Colony, Natal, the Transvaal and the Orange Free State combined to form the Union of South Africa, a self-governing dominion under the British Crown.

The first general election in 1910 demonstrated the power of the Afrikaners within the new union—the South African party won 67 seats compared with 39 seats for the mainly English-speaking Unionist Party. Louis Botha became prime minister and Jan Smuts was made Minister of the Interior, Mines and Defence. The Union's economy was based on gold and diamond mining, for which there was organized recruitment of migrant African labourers from Union territory and other parts of Africa. Pass Laws were in operation, controlling Africans' movements in the towns and industrial areas, where they were regarded officially as temporary residents and segregated in 'townships'. Following the Land Act of 1913, 87% of the land was reserved for white ownership while Africans farmed as tenants or squatters. White miners' annual earnings were 12 times those of their black counterparts in 1911. African protests at segregation and absence of political rights were led by the South African Native National Congress (SANNC), founded in 1912 and renamed the African National Congress (ANC) in 1923.

African rights were further suppressed after the coming to power in 1924 of the Afrikaner Nationalist Party, led by J. B. Hertzog. The government secured recognition of full independence for South Africa by the Statute of Westminster on 11 Dec. 1931. It also promoted the status of the Afrikaans language and introduced new segregation measures such as the Native Laws Amendment Act of 1937, which set limits on the numbers of blacks who could live in urban areas. Jan Smuts came to power in 1939 heading a coalition government broadly in favour of the war against Nazi Germany.

#### *Apartheid*

In 1948 Smuts' Unionist Party was sensationally defeated by the right-wing National Party which had campaigned for *apartheid*, a new policy for dealing with the 'racial problem'. After 1948 the term apartheid soon developed from a political slogan into a systematic programme of social engineering championed by Hendrik Verwoerd, who became prime minister in 1958. A plethora of new laws from the Group Areas Act to the Prohibition of Mixed Marriages Act strengthened existing segregation and increased racial inequality. Blacks were divided into one of ten tribal groups, and forced to move to so-called Homelands, which were intended to become self-sufficient, self-governing states. Chief Buthelezi was pivotal in the Inkatha movement which attempted, but ultimately failed, to unite Homeland leaders. The massacre by police of 69 protesters against the Pass Laws at Sharpeville on 21 March 1960 led to a major crisis from which, however, the government emerged even stronger. The ANC and the Pan African Congress were banned and the leaders, including Nelson Mandela, were jailed in 1964. After withdrawing from the British Commonwealth in 1961, South Africa became increasingly isolated. To the north, former European colonies were becoming independent, often socialist, republics.

On 16 June 1976 thousands of students demonstrated in Soweto, an African township outside Johannesburg, against mandatory schooling in Afrikaans. Many died when police broke up the demonstration and rioting spread throughout the country. When P. W. Botha became prime minister in 1978, elements of the apartheid system were modified. Africans were allowed to form legal trade unions and the acts banning marriage and sexual relations between people of different races were repealed.

A new constitution, approved in a referendum of white voters on 2 Nov. 1983 and in force from 3 Sept. 1984, created a three-part parliament, with a House of Assembly for the Whites, a House of Representatives for the Coloureds and a House of Delegates for the Indians; Africans remained without representation. From late 1984 blacks in the cities and industrial

areas staged large-scale protests. In June 1986 a state of emergency was imposed. Foreign condemnation led to the first economic sanctions against South Africa, imposed by a number of countries including the USA and Britain.

By 1989 a start had been made on dismantling apartheid and the government, led by F. W. de Klerk, announced its willingness to consider the extension of black South Africans' political rights. In Feb. 1990 a 30-year ban on the ANC was lifted and Nelson Mandela was released from prison on 11 Feb. 1990. In the Whites-only referendum on 17 March 1992, on the granting of constitutional equality to all races, 1,924,186 (68.7%) votes were in favour; 875,619 against.

On 22 Dec. 1993 parliament approved (by 237 votes to 45) a transitional constitution paving the way for a new multi-racial parliament which was elected on 29 April 1994. There was a decisive victory for the ANC and on 9 May 1994 Nelson Mandela was elected president. The new government included six ministers from the National Party and three from the Inkatha Freedom Party.

In 1997 the Truth and Reconciliation Commission, chaired by Archbishop Desmond Tutu, began hearings on human rights violations between 1960 and 1993. The commission promised amnesty to those who confessed their crimes under the apartheid system. Nelson Mandela, whose term as president cemented his reputation as a world statesman, retired in 1999. His deputy, Thabo Mbeki, elected president in a landslide vote, had already assumed many of Mandela's governing responsibilities. Mbeki wrestled with a developing economy, continuing inequality and a high crime rate. The nation remains in the grip of an AIDS epidemic which Mbeki was slow to acknowledge. He stood down from the presidency in Sept. 2008 after the ruling ANC called on him to resign.

## TERRITORY AND POPULATION

South Africa is bounded in the north by Namibia, Botswana and Zimbabwe, northeast by Mozambique and Swaziland, east by the Indian Ocean, and south and west by the South Atlantic, with Lesotho forming an enclave. Area: 1,219,090 sq. km. This area includes the uninhabited Prince Edward Island (41 sq. km) and Marion Island (388 sq. km), lying 1,900 km southeast of Cape Town. The islands were handed over to South Africa in Dec. 1947 to prevent their falling into hostile hands. In 1994 Walvis Bay was ceded to Namibia, and Transkei, Bophuthatswana, Venda and Ciskei were reintegrated into South Africa.

At the census of 2011 the population was 51,770,560 (26,581,769 females), consisting of: Black African, 41,000,938 (79.2% of total population); Coloured, 4,615,401 (8.9%); White, 4,586,838 (8.9%); Indian/Asian, 1,286,930 (2.5%). The United Nations population estimate for 2011 was 50,460,000. The population has increased more than would have been expected since 2001 as huge numbers of migrants have entered South Africa from Zimbabwe, many of them undocumented.

The UN gives a projected population for 2015 of 51.43m.

62.2% of the population were urban in 2011. In 2000 cities with the largest populations were (estimate in 1,000): Johannesburg (Gauteng), 2,732; Cape Town (Western Cape), 2,715; Durban (KwaZulu-Natal), 2,370; Pretoria/Tshwane (Gauteng), 1,084; Port Elizabeth (Eastern Cape), 958.

There were 10,714 immigrants in 2004 (10,578 in 2003) and 16,165 emigrants in 2003 (10,890 in 2002).

There are 11 official languages. Numbers of mother-tongue speakers at the 2011 census: isiZulu, 11,587,374 (22.7% of population); isiXhosa, 8,154,258 (16.0%); Afrikaans, 6,855,082 (13.5%); English, 4,892,623 (9.6%); Sepedi, 4,618,576 (9.1%); Setswana, 4,067,248 (8.0%); Sesotho, 3,849,563 (7.6%); Xitsonga, 2,277,148 (4.5%); SiSwati, 1,297,046 (2.5%); Tshivenda, 1,209,388 (2.4%); isiNdebele, 1,090,223 (2.1%). The use of any of these languages is a constitutional right 'wherever practicable'. Each province may adopt any of these as its official language. English is the sole language of command and instruction in the armed forces.

## SOCIAL STATISTICS

Births: total number of registered live births in 2010 was 1,294,694 (down from a high of 1,677,415 in 2003).

Deaths: the number of deaths increased from 318,287 in 1997 to 591,213 in 2005, with AIDS as the factor underlying much of the increase. In 2009, 17.8% of all adults between 15 and 49 were infected with HIV. Estimated population growth rate, 2006–07, 1.0%. Fertility rate, 2009, 2.5 births per woman. Life expectancy at birth, 2007, was 49.8 years for males and 53.2 for females. Life expectancy, which fell in the late 1990s and in the early part of the 21st century, is now starting to rise again thanks to the development and improved availability of medical treatments for HIV.

Infant mortality, 2010, 41 per 1,000 live births.

From 1998, under a new bill, customary and traditional marriages are recognized in law as registered by the civil registration system. Same-sex marriage was legalized in Nov. 2006. Marriages in 2010 totalled 170,826 (186,522 in 2008). Western Cape had the highest marriage rate in 2005 (613.8 per 100,000), Northern Cape the second highest (515.7 per 100,000) followed by Gauteng (497.1 per 100,000). Limpopo had the lowest rate (186.9 per 100,000). Of the total marriages officially recorded in 2010, 52,817 (30.9%) were solemnized in religious ceremonies and 91,250 by civil rites. 26,759 were classed under 'unspecified'. In 2010 the most popular age range for marrying was 30–34 for males and 25–29 for females. Divorces granted in 2010 totalled 22,936 (37,098 in 1999). Gauteng had the highest divorce rate in 2005 (943.5 per 100,000 married couples); Western Cape (763.8). Limpopo had the lowest rate (132.1 per 100,000).

## CLIMATE

There is abundant sunshine and relatively low rainfall. The southwest has a Mediterranean climate, with rain mainly in winter, but most of the country has a summer maximum, although quantities show a decrease from east to west. Pretoria, Jan. 73.4°F (23.0°C), July 53.6°F (12.0°C). Annual rainfall 26.5" (674 mm). Bloemfontein, Jan. 73.4°F (23.0°C), July 45.9°F (7.7°C). Annual rainfall 22" (559 mm). Cape Town, Jan. 69.6°F (20.9°C), July 54.0°F (12.2°C). Annual rainfall 20.3" (515 mm). Johannesburg, Jan. 68.2°F (20.1°C), July 50.7°F (10.4°C). Annual rainfall 28.1" (713 mm).

## CONSTITUTION AND GOVERNMENT

An Interim *Constitution* came into effect on 27 April 1994 and was in force until 3 Feb. 1997. Under it, the National Assembly and Senate formed a Constitutional Assembly, which had the task of drafting a definitive constitution. This was signed into law in Dec. 1996 and took effect on 4 Feb. 1997. The 1996 constitution defines the powers of the President, Parliament (consisting of the

National Assembly and the National Council of Provinces—NCOP), the national executive, the judiciary, public administration, the security services and the relationship between the three spheres of government. It incorporates a Bill of Rights pertaining to, *inter alia*, education, housing, food and water supply, and security, in addition to political rights. All legislation must conform to the Constitution and the Bill of Rights. The Constitution was amended in 2001 to provide that Constitutional Court judges are appointed for a non-renewable 12-year term of office, or until they reach the age of 70 years, except where an Act of Parliament extends the term of office of a Constitutional Court judge. This Constitution Amendment Act also made the head of the Constitutional Court the Chief Justice. The head of the Supreme Court of Appeal is now the President of that Court.

A *Constitutional Court*, consisting of a president, a deputy president and nine other judges, was inaugurated in Feb. 1995. The Court's judges are appointed by the President of the Republic from a list provided by the Judicial Service Commission, after consulting the President of the Constitutional Court (now the Chief Justice) and the leaders of parties represented in the National Assembly.

*Parliament* is the legislative authority and has the power to make laws for the country in accordance with the Constitution. It consists of the National Assembly and the NCOP. Parliamentary sittings are open to the public.

The *National Assembly* consists of no fewer than 350 and no more than 400 members directly elected for five years, 200 from a national list and 200 from provincial lists in the following proportions: Eastern Cape, 28; Free State, 14; Gauteng, 44; KwaZulu-Natal, 42; Limpopo, 25; Mpumalanga, 11; Northern Cape, 4; North-West, 12; Western Cape, 20. In terms of the 1993 Constitution, which still regulated the 1999 elections, the nine provincial legislatures are elected at the same time and candidates may stand for both. If elected to both, they have to choose between sitting in the national or provincial assembly. In the former case, the runner-up is elected to the Provincial Assembly.

The *National Council of Provinces* (NCOP) consists of 54 permanent members and 36 special delegates and aims to represent provincial interests in the national sphere of government. Delegations from each province consist of ten representatives. Bills (except finance bills) may be introduced in either house but must be passed by both. A finance bill may only be introduced in the National Assembly. If a bill is rejected by one house it is referred back to both after consideration by a joint National Assembly-NCOP committee called the Mediation Committee. Bills relating to the provinces must be passed by the NCOP. By Aug. 2003 more than 780 pieces of legislation had been passed since 1994.

The Constitution mandates the establishment of *Traditional Leaders* by means of either provincial or national legislation. The National House of Traditional Leaders was established in April 1997. Each provincial House of Traditional Leaders nominated three members to be represented in the National House. The National House advises national government on the role of traditional leaders and on customary law. Following a six-year study by the Commission on Traditional Leadership Disputes and Claims, in July 2010 President Jacob Zuma announced that only seven of the 13 kingships would be officially recognized and six would be abolished. Five of the seven kingships and their kings were confirmed by the commission. The remaining two were awaiting the commission's recommendation on the rightful incumbent. In terms of the commission's findings, existing kings who were found not to qualify for the status of kingship were to be allocated a principal traditional leadership.

#### National Anthem

A combination of shortened forms of 'Die Stem van Suid-Afrika'/'The Call of South Africa' (words by C. J. Langenhoven; tune by M. L. de Villiers) and the ANC anthem 'Nkosi sikelel' iAfrika'/'God bless Africa' (words and tune by Enos Santonga).

## CURRENT LEADERS

### Jacob Gedleyihlekisa Zuma

*Position*  
President

#### *Introduction*

Jacob Zuma became president of the ANC on 18 Dec. 2007 after defeating incumbent Thabo Mbeki in a leadership election. He was elected national president after the ANC won the general election of 22 April 2009.

#### *Early Life*

Zuma was born in what is now the KwaZulu-Natal Province on 12 April 1942. He had only five years of formal schooling and spent his early life travelling between Zululand and Durban. Zuma's father died in the Second World War and by the time he was 15, Zuma was taking odd jobs to supplement his mother's income. Influenced by his family's trade unionist background, he became involved in politics at the age of 17.

Zuma joined the ANC in 1959. With the party banned by the apartheid government the following year, by 1962 he was an active member of Umkhonto we Sizwe (the military wing of the ANC), which was subsequently classified as a terrorist organization. In 1963 Zuma was arrested and convicted of conspiring to overthrow the government. He was jailed for ten years, serving part of the sentence on Robben Island alongside Nelson Mandela.

After his release Zuma helped re-establish the ANC as an underground movement in Natal. In 1975 he left South Africa, living in Swaziland and then Mozambique where he dealt with thousands of exiles fleeing South Africa after the Soweto uprising. Zuma was appointed to the ANC national executive committee in 1977 and served as deputy chief representative of the ANC in Mozambique until the signing of the Nkomati Accord between South Africa and Mozambique in 1984, when he became chief representative of the ANC. Forced to leave Mozambique in 1987, Zuma was appointed head of underground structures and chief of the intelligence department, serving on the ANC's political and military council.

When the ban on the ANC was lifted in 1990 Zuma returned to South Africa and was elected ANC chairperson for the Southern Natal region. In 1991 he was elected the party's deputy secretary general, and at the 1994 general election he agreed to Thabo Mbeki running unopposed for the deputy presidency. Zuma was appointed to the executive committee of economic affairs and tourism for the ANC in the KwaZulu-Natal provincial government. In 1997 he became the ANC's deputy president and two years later was chosen as South Africa's executive deputy president.

In 2005, following the conviction of Zuma's financial adviser Schabir Shaik on charges of corruption and fraud, Zuma was dismissed as deputy president by Mbeki.

#### *Career in Office*

In Dec. 2007 Zuma was elected ANC party president standing against Mbeki. His rhetoric found favour with many disadvantaged South Africans who felt marginalized by Mbeki's business-friendly policies. Zuma was thus clear favourite to become the next president of South Africa.

On 28 Dec. 2007 the directorate of special operations (or Scorpions) indicted Zuma to stand trial on charges of racketeering, money laundering, corruption and fraud. The allegations were linked to a US\$5bn. arms procurement deal made by the government in 1999. The trial was scheduled to start on 4 Aug. 2008 but was delayed when the charges were declared unlawful because Zuma had not had a chance to make representations pre-indictment. The national directorate of public prosecutions announced an appeal.

Mbeki resigned as president of South Africa on 21 Sept. 2008 after losing the support of the ANC over claims that he had

interfered in the case against Zuma. The charges against Zuma were dropped, although prosecutors were given leave to appeal the following month. In April 2009 the National Prosecuting Authority dismissed all charges. The ANC triumphed at the general election on 22 April 2009 and Zuma was elected president by parliament. He was sworn into office on 9 May 2009, succeeding Kgalema Motlanthe, who stepped aside after having replaced Mbeki.

Also in May 2009, the South African economy officially went into recession following a sharp downturn in the manufacturing and mining sectors. Unemployment accelerated and strikes and violent protests in July–Aug. were roundly condemned by Zuma. In a speech to the ANC in Jan. 2010 he warned that recovery from the economic crisis would be slow and that there would be a lag in job creation. A national strike by public sector workers over pay, which began in Aug. and paralysed hospitals, education and other services for three weeks before the action was suspended, undermined relations between the ANC and the Congress of South African Trade Unions.

In Oct. 2010 Zuma announced major changes to the composition of his cabinet, appointing a host of new ministers and deputy ministers. However, allegations of high-level corruption continued to blight his administration and in Oct. 2011 he sacked two senior ministers and suspended the chief of police. Local elections earlier in May had maintained the ANC's political dominance, but the opposition Democratic Alliance increased its vote share to about 24%. In Nov. the ANC suspended Julius Malema, its militant youth wing leader and a prominent Zuma critic, for five years for bringing the party into disrepute.

In Jan. 2012 Zuma addressed a rally in Bloemfontein in celebration of the ANC's 100th anniversary. In Aug. 2012, 34 platinum miners in the town of Marikana were killed and around 80 more were wounded by police during an industrial dispute over wages. Public condemnation of the treatment of the miners prompted Zuma to establish a judicial commission of inquiry in Oct.

In Dec. Zuma was re-elected leader of the ANC at the party's five-yearly conference.

## DEFENCE

The South African National Defence Force (SANDF) comprises four services, namely the SA Army, the SA Air Force, the SA Navy and the SA Military Health Service (SAMHS). In 2007 the SANDF consisted of 62,334 active members (excluding 12,382 civilian employees). SAMHS personnel totalled 7,115 (including around 1,115 reservists) in 2007. South Africa ended conscription in 1994.

Defence expenditure totalled US\$3,359m. in 2008 (equivalent to US\$69 per capita), and represented 1.2% of GDP. Defence expenditure in 1985 represented 3.8% of GDP. In 2008 South Africa was responsible for 15% of Africa's total defence expenditure.

### Army

Army personnel totalled 41,350 in 2007. Regular army reserves numbered 38,545 in 2007. The army territorial reserve was disbanded in 2009.

### Navy

Navy personnel in 2007 totalled 5,801, with 861 reserves. The fleet is based at the naval bases at Simon's Town on the west coast and Durban on the east and includes three submarines and four corvettes.

### Air Force

Strength (2007) 9,183, with 831 reserves. In 2007 the Air Force had 29 combat-capable aircraft (*Cheetah* Cs and *Cheetah* Ds) and 11 combat-capable helicopters.

## ECONOMY

Agriculture accounted for 3.0% of GDP in 2009, industry 31.1% and services 65.8%.

### Overview

South Africa is one of the few African countries to have reached the upper middle-income group. Its economy is the largest in the sub-Saharan region and heavily influences trade and investment flows on the continent. South Africa was admitted as a BRIC nation in Dec. 2010, joining the other leading developing economies of Brazil, Russia, India and China.

However, despite a rising black middle class, South Africa maintains high levels of income inequality. The country also has one of the highest HIV/AIDS infection rates, with 18% of those between the ages of 15 and 49 living with HIV in 2009. The unemployment rate was over 24% in 2010.

Until recently the economy was dominated by agriculture and precious metals. South Africa is the world's largest producer of platinum and was the world's largest producer of gold until 2006 (although it is now only the fourth largest). An advanced financial sector and the growing tourism sector have helped services to become the largest contributor to total output. Manufacturing principally involves metals and engineering, especially steel-related products.

In the early 1990s the removal of international sanctions following the end of apartheid and the adoption of structural reforms opened the economy to international competition, leading to productivity gains and greater penetration of international markets. In the decade from 1994 the economy grew at an average annual rate of 2.9%, with less volatility than the previous decade when average annual growth was 1%. Performance in the post-apartheid period was fostered by trade liberalization, increased private sector participation in the economy and sound macroeconomic management.

The economy grew by around 5% for three consecutive years up to 2007 on the back of strong household demand. However, there were increased inflationary pressures and a widening of the external current account deficit. In early 2008 an electricity crisis stemming from the state-owned supplier, Eskom, resulted in widespread blackouts and disruption to mining production.

Demand for South African exports fell sharply during the international financial crisis. An estimated 500,000 workers lost their jobs in 2009 as South Africa entered recession for the first time in 17 years. However, GDP growth began to recover in 2010. The economy's key challenges include reducing unemployment and income inequality.

### Currency

The unit of currency is the *rand* (ZAR) of 100 *cents*. A single free-floating exchange rate replaced the former two-tier system on 13 March 1995. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008  | 2009 | 2010 | 2011 |
|------|------|------|------|------|------|-------|------|------|------|
| 9.2% | 5.8% | 1.4% | 3.4% | 4.7% | 7.1% | 11.5% | 7.1% | 4.3% | 5.0% |

Foreign exchange reserves were US\$32,251m. in Sept. 2009 (US\$4,171m. in 1998) and gold reserves 4.01m. troy oz. Total money supply was R419,506m. in Aug. 2009.

Income tax is the Government's main source of income. As of 2001, South Africa's source-based income tax system was replaced with a residence-based system. With effect from the years of

assessment commencing on or after 1 Jan. 2001, residents are (subject to certain exclusions) taxed on their worldwide income, irrespective of where their income is earned. Foreign taxes are credited against South African tax payable on foreign income. Foreign income and taxes are translated into the South African monetary unit, the Rand.

Value-added Tax (VAT) has remained at 14% since 1993. Corporate taxes were reduced to 28% in 2008. A tiered corporate tax was introduced in 2000 with taxes for small businesses reduced by half. Individual income tax rates range from 18% to 40%. A capital gains tax was introduced from 1 April 2001 and became effective on 1 Oct. 2001.

South Africa's fiscal year runs from 1 April to 31 March.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |

| 3.7% | 2.9% | 4.6% | 5.3% | 5.6% | 5.5% | 3.6% | -1.5% | 2.9% | 3.1% |

In 2009 South Africa experienced its first recession in 17 years. Total GDP in 2011 was US\$408.2bn.

### Banking and Finance

The central bank and bank of issue is the South African Reserve Bank (SARB; established 1920), which functions independently. Its *Governor* is Gill Marcus. The Banks Act, 1990 governs the operations and prudential requirements of banks.

At the end of Dec. 2008, 33 banks (excluding two mutual banks) were registered with the Office of the Registrar of Banks. Furthermore, 43 foreign banks had authorized representative offices in South Africa. The combined assets of the banking institutions amounted to R3,170bn. (31 Dec. 2008), total liabilities to R2,989bn. and total equity to R181bn. Total assets of the four largest commercial banks (Standard Bank, FirstRand, Absa and Nedbank) came to R2,676bn.

Foreign debt totalled US\$45,165m. in 2010, representing 12.7% of GNI.

The stock exchange, the JSE Securities Exchange, is based in Johannesburg. Foreign nationals have been eligible for membership since Nov. 1995.

## ENERGY AND NATURAL RESOURCES

### Environment

In 1998 the Committee for Environmental Co-ordination was established to harmonize the work of government departments on environmental issues, and to co-ordinate environmental implementation and national management plans at provincial level.

South Africa's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 9.2 tonnes per capita (compared to the average for Africa as a whole of 1.1 tonnes per capita).

### Electricity

South African households use over 25% of the country's energy. Coal supplies 75% of primary energy requirements, followed by oil (21%), nuclear (3%) and natural gas (1%). There is one nuclear power station (Koeberg) with two reactors, two gas turbine generators, two conventional hydroelectric plants and two pumped storage stations. Nuclear energy is being investigated as a future potential energy source and alternative to coal. Eskom, a public utility, generates 95% of the country's electricity (as well as two-thirds of the electricity for the African continent) and owns and operates the national transmission system. In 2011, 222,710 GWh of electricity were delivered throughout South Africa by Eskom.

Eskom electrified 149,914 homes in 2011, bringing the total number of homes connected since the start of the electrification

programme in 1991 to 3,901,054. The Government aims to achieve universal access to electricity by 2014. Capacity shortages from late 2007 forced Eskom into emergency reductions to protect the power system from potential failure and a national electricity crisis was declared in Jan. 2008. According to a survey of Feb. 2007, 80-0% of households used electricity for lighting.

The energy sector contributes about 15% to GDP and employs about 250,000 people. Because of South Africa's large coal deposits, the country is one of the cheapest electricity suppliers in the world.

The first wind-energy farm in Africa was opened at Klipheuwel in the Western Cape in Feb. 2003.

### Oil and Gas

South Africa has limited oil reserves and relies on coal for much of its oil production. It has a highly developed synthetic fuels industry. Sasol and PetroSA are the two major players in the synthetic fuel market. Synfuels meet approximately 40% of local demand. Natural gas production in 2007 amounted to 1.9bn. cu. metres.

PetroSA is responsible for exploration of both offshore natural gas and onshore coal-bed methane. The EM gas-field complex off Mossel Bay in the Western Cape started production in 2000, and was to ensure sufficient feedstock to PetroSA to maintain current liquid fuel production levels at 36,000 bbls of petroleum products a day until 2009 although 2008 saw a decline in production levels. Planning is under way for the construction of a new refinery near Port Elizabeth that is expected to come online in 2015. The oilfield, Sable, situated about 150 km south off the coast of Mossel Bay, is expected to produce 17% of South Africa's oil needs. Coming into operation in Aug. 2003, it was initially projected to produce 30,000 to 40,000 bbls of crude oil a day. PetroSA's gas-to-liquid plant supplies about 7% of South Africa's liquid fuel needs.

South Africa is one of the major oil refining nations in Africa with a crude refining capacity of 543,000 bbls per day.

### Minerals

Total sales of primary minerals increased to R223.9bn. in 2007; the value of exports of primary minerals increased to R161.8bn. Mining and quarrying contributed 8.2% of GDP in 2006, up from 6.9% in 1996 although down from 14.4% in 1986.

In 2007 employment in the mining sector rose by 8.6% from 456,337 in 2006 to 495,474. Over 50 different minerals were produced in 2007 from 1,414 mines and quarries.

Mineral production (in tonnes), 2005: coal, 244.9m.; iron ore (metal content), 24.9m.; limestone and dolomite, 24.8m.; chromium, 7.5m.; manganese, 4.6m.; aluminium, 846,000; copper (metal content), 97,000; nickel (metal content), 42,000; zinc (metal content), 32,000; platinum-group metals, 303; gold, 295; silver, 88. Diamond production, 2005: 15,776,000 carats. In 2007 gold production fell by 7.2% from 272 tonnes in 2006 to 253 tonnes (its lowest level in over 80 years) although sales revenue rose by 1.6% to R38bn. South Africa is the world's leading producer of platinum (and has the largest reserves of both platinum and gold). In 2007 South Africa lost its status as the world's largest gold producer to China.

### Agriculture

South Africa has a dual agricultural economy, comprising a well-developed commercial sector and a predominantly subsistence-orientated sector. Much of the land suitable for mechanized farming has unreliable rainfall. Of the total farming area, natural pasture occupies 81% (69.6m. ha.) and planted pasture 2% (2m. ha.). About 12% of South Africa's surface area can be used for crop production. High potential arable land comprises only 22% of the total arable land. Annual crops and orchards are cultivated on 9.9m. ha. of dry land and 1.3m. ha. under irrigation. In 2007 there were 39,982 commercial farming units with a gross farming income of R79.6m. Agriculture, forestry, hunting and fishing

contributed 2.9% of GDP in 2006, down from 4.2% in 1996. In 2007 there were 796,806 paid farm workers.

#### Production:

(*Field crops, 2006-07 unless otherwise indicated, in 1,000 tonnes*): sugarcane, 20,278; maize (2005-06), 6,947; wheat (2007), 1,913; lucerne hay, 1,232; sunflower seeds (2005-06), 541; soybeans (2005-06), 424; grain sorghum, 202; groundnuts, 66; seed cotton, 29; cotton seed, 18; tobacco, 14.

(*Horticulture, 2006-07, in 1,000 tonnes*): potatoes (2007), 1,917; oranges, 1,336; apples, 646; tomatoes, 453; grapefruit, 415; onions, 405; bananas, 357; pears, 337. Wine production totalled 1,012m. litres in 2006, ranking South Africa eighth in the world.

(*Animal products, 2007-08*): 5,812,000 sheep and goats slaughtered; 2,989,000 cattle and calves slaughtered; 2,579,000 pigs slaughtered; 717m. broilers slaughtered (2006); fresh milk (2007), 2,470m. litres; wool, 48.4m. kg.

Gross value of field crops in 2007 (R1,000), 25,287,668; horticulture, 25,683,799; animal products, 48,967,173.

Agricultural exports contribute about 4% of total imports and 5% of total exports. In 2007 the estimated value of agricultural imports was R19.5bn. and exports R21.9bn. Fruit and vegetables accounted for 59% of agricultural exports in 2007.

### Forestry

South Africa has developed one of the largest man-made forestry resources in the world with plantations covering an area of 1.3m. ha. Production from these plantations in 2007 amounted to 20.3m. cu. metres, valued at almost R5.2bn., the most important products by value being pulpwood (R3.6bn.) and sawlogs (R1.4bn.). In terms of volume, 13.2m. cu. metres and 5.4m. cu. metres of the aforementioned products were produced respectively. Collectively, the forestry sector employs about 170,000 people. An equivalent of about 107,000 full-time staff are employed in the primary sector (growing and harvesting), while the balance is employed in the processing industries (sawmilling, pulp and paper, mining timber and poles, and board products). In 2007 the forestry and forest products industry contributed 0.9% to South Africa's GDP.

In 2007 the area under all types of forests was 9.2m. ha. Of this, commercial plantations covered 1.3m. ha. and indigenous forests 534,000 ha. or 0.4% of the country's surface. The balance was 'woodland' forests. The private sector owned or controlled 1,051,223 ha. (83%) of the plantation area of 1,266,194 ha. as well as 174 of the 178 primary processing plants in the country. The remaining 17% (214,973 ha.) were owned by the state.

The industry was a net exporter to the value of R2.84bn. in 2007, almost 99% of which was in the form of converted value-added products. The forest-products industry contributed 2.5% of total exports and 1.7% of total imports in 2007. In that year paper exports were the most important (R5.51bn. or 45% of the total), followed by pulp (R3.52bn. or 29% of the total), solid wood products (R2.84bn. or 23% of the total) and other products (R0.32bn. or 3% of the total). Woodchip exports, mainly to Japan, accounted for 68% (R1.93bn.) of the total solid wood products exports.

### Fisheries

The commercial marine fishing industry is valued at approximately R2bn. annually and employs 27,000 people directly. In 2000 the commercial fishing fleet consisted of 4,477 vessels licensed by the department of environmental affairs and tourism.

The total number of fishing rights allocated stands at 2,200, 1,700 of which are small, medium and micro enterprises. The total catch in 2010 was 623,920 tonnes, over 99% of which came from marine fishing.

## INDUSTRY

The leading companies by market capitalization in South Africa in March 2012 were: MTN Group, a mobile telecommunications company (US\$33.2bn.); Sasol Ltd, a coal, oil and gas producer (US\$31.1bn.); and Naspers, a multinational media company (US\$23.1bn.).

Actual value of sales of the principal groups of industries (in R1m.) in 2005: coke, petroleum, chemical products, rubber and plastic, 228.0; basic metals, fabricated metal products, machinery and equipment, and office, accounting and computing machinery, 190.1; food products and beverages, 158.7; transport equipment, 149.7; wood and wood products, paper, publishing and printing, 79.8; textiles, clothing, leather and footwear, 38.6. Total actual value including other groups, R953.9m. In 2009 industry accounted for 31.1% of GDP, with manufacturing contributing 15.1%.

### Labour

The Employment Equity Act, 1998 signalled the beginning of the final phase of transformation in the job market, which began with the implementation of the Labour Relations Act. It aims to avoid all discrimination in employment. The Basic Conditions of Employment Act, 1997 applies to all workers except for the South African National Defence Force (SANDF), the South African Secret Service (SASS) and the National Intelligence Agency (NIA). The new provisions include a reduction in the maximum hours of work from 46 to 45 hours per week (however, the Act allows for the progressive reduction of working hours to 40 per week).

The labour force in South Africa numbered 17.1m. in the fourth quarter of 2009, of which 4.2m. were unemployed. In the fourth quarter of 2009 the unemployment rate was 24.3%, up from 21.9% in the fourth quarter of 2008.

The Unemployment Insurance Fund (UIF) provides benefits to workers who become unemployed. All employees who work for more than 24 hours a month contribute to the Fund. In the year ending March 2009 there were 7.6m. contributors (7.3m. in 2008). In the same period the UIF paid benefits to 627,244 beneficiaries, a total amount of R3.8bn.

### INTERNATIONAL TRADE

South Africa's four main trading partners in 2006 were Germany, USA, Japan and China. Germany is South Africa's number one trading partner in terms of total trade (the sum of exports and imports) recorded in 2006. Exports to Germany rose in nominal terms from R21.1bn. in 2005 to R24.4bn. in 2006. Imports from Germany increased in nominal terms from R49.2bn. in 2005 to R53.9bn. in 2006.

In 2005 Europe accounted for 38.9% (R116.9bn.) of South Africa's total exports and 40.3% (R140.4bn.) of total imports. Seven of South Africa's top ten trading partners are European countries. A trade, co-operation and development agreement was provisionally implemented on 1 Jan. 2000, under the terms of which South Africa will grant duty-free access to 86% of EU imports over a period of 12 years, while the EU will liberalize 95% of South Africa's imports over a ten-year period. The Agreement provides for ongoing EU financial assistance in grants and loans for development co-operation, which amounts to some R900m. per annum.

In 2010 the total value of South Africa's exports destined for Africa was R85.0bn. and imports R45.9bn. Within the Southern African Development Community (SADC), a smaller group of countries including South Africa, Botswana, Lesotho, Namibia and Swaziland have organized themselves into the Southern African Customs Union (SACU), sharing a common tariff regime without any internal barriers. Exports to SADC countries increased to R60.8bn. in 2010. Imports from within the region in 2010 totalled R23.7bn.

Japan is South Africa's largest trading partner in Asia. In 2006 total trade between the two countries amounted to R66.3bn.

## Imports and Exports

Trade in US\$1m.:

In Oct. 1998 a transshipment facility for containers opened at Kidatu, southwest of Dar es Salaam, Tanzania, providing a link between the 1,067 mm gauge railways of the southern part of Africa and the 1,000 mm gauge lines of the north. With the opening up of new markets for South Africa elsewhere in the continent, it has helped to boost trade and facilitate the shipment of cargo to countries to the north.

### COMMUNICATIONS

The public company Transnet Limited was established on 1 April 1990. It handles 176m. tonnes of rail freight per year, 2.8m. tonnes of road freight and 194m. tonnes of freight through the harbours, while 13.8m. litres are pumped through its petrol pipelines annually. For the financial year ended 31 March 2007 Transnet reported a profit of R7,404m. (R4,930m. for 2006).

The company, through South African Airways (SAA), flies 6.1m. domestic, regional and international passengers per year. In total, Transnet is worth R72bn. in fixed assets and has a workforce of some 80,000 employees.

Transnet Limited consists of nine main divisions, a number of subsidiaries and related businesses—Transnet Freight Rail, the National Ports Authority (NPA), South African Port Operations (SAPO), Petronet, Freightdynamics, Propnet, Metrorail, Transtel and Transwerk.

### Roads

In 2006 the South African road network comprised some 754,600 km of roads and streets. There is a primary roads network of 9,600 km, with plans to extend it to 20,000 km. Toll roads, which are serviced by 32 mainline toll plazas, cover about 2,400 km. The network includes 1,437 km of dual-carriage freeway, 440 km of single-carriage freeway and 56,967 km of single-carriage main road with unlimited access. South Africa has the longest road network in Africa. As at 31 Dec. 2005 there were 7,971,187 registered motor vehicles. In 2009 a total of 13,768 people were killed in traffic accidents (14,920 in 2007 and 13,875 in 2008).

### Rail

The Passenger Rail Agency of South Africa (PRASA) was formed in March 2009 as an umbrella organization to oversee the day-to-day running of rail services in South Africa. PRASA operates Metrorail, offering commuter rail services in urban areas and transporting 1.7m. passengers on weekdays to 478 stations over 2,400 km of track; and Shosholoz Meyl, providing regional and long-distance rail transport. South Africa's first high-speed rail

service, Gautrain, was inaugurated in June 2010. It links Johannesburg's O. R. Tambo International Airport and the centre of the city with Pretoria.

Freight train services are provided by Transnet Freight Rail (formerly Spoornet), a public company owned solely by the South African government. Transnet transports 17% of the nation's freight annually and employs over 25,000 people.

### Civil Aviation

Responsibility for civil aviation safety and security lies with the South African Civil Aviation Authority (SACAA). The Airports Company South Africa (ACSA) owns and operates South Africa's principal airports. The main international airports are: Johannesburg, Cape Town, Durban, Bloemfontein, Port Elizabeth, Pilanesberg, Lanseria and Upington. In April 2003 the Cabinet approved the status of the Kruger Mpumalanga Airport, near Nelspruit, as an international airport. ACSA also has a 35-year concession to operate Pilanesberg International Airport near Sun City in North-West Province.

The flag carrier South African Airways (SAA), along with Airlink, Comair, Interair and SA Express, operate scheduled international air services. Several other operators provide internal flights and cargo services.

In 2007–08 O. R. Tambo International Airport (formerly Johannesburg International) handled 19,457,498 passengers (11,009,841 on domestic flights), Cape Town handled 8,426,618 passengers (6,950,061 on domestic flights) and Durban handled 4,792,553 passengers (4,747,202 on domestic flights). O. R. Tambo Airport is also the busiest airport for freight, handling 280,095 tonnes of cargo in 2005.

### Shipping

The South African Maritime Safety Authority (SAMSA) was established on 1 April 1998 as the authority responsible for ensuring the safety of life at sea and the prevention of sea pollution from ships. Approximately 98% of South Africa's exports are conveyed by sea.

The National Ports Authority supervises South Africa's major ports. The largest ports include the deep water ports of Richards Bay, with its multi-product dry bulk handling facilities, multi-purpose terminal and the world's largest bulk coal terminal, and Saldanha featuring a bulk ore terminal adjacent to a bulk oil jetty with extensive storage facilities. Durban, Cape Town and Port Elizabeth provide large container terminals for deep-sea and coastal container traffic. The Port of Durban handles 2.5m. containers per annum. East London, the only river port, has a multi-purpose terminal and dry dock facilities. Mossel Bay is a specialized port serving the south coast fishing industry and offshore gas fields. During 2008–09 the seven major ports handled a total of 184,628,480 tonnes of cargo (Richards Bay, 82,621,766 tonnes; Saldanha, 50,282,909 tonnes; Durban, 40,118,656 tonnes).

In Jan. 2009 there were four ships of 300 GT or over registered, totalling 32,000 GT.

### Telecommunications

In 2008 there were 4.4m. main (fixed) telephone lines. In the same year mobile phone subscribers numbered 45.0m. (906.0 per 1,000 persons). The largest mobile phone networks are Vodacom and MTN.

Between 1997 and 2002 Telkom SA, for many years the national operator, concentrated on replacing analogue lines with digital technology, under the terms of its final exclusive licence; the transmission network is now almost wholly digital. Under the Telecommunications Acts of 1996 and 2001, South Africa has liberalized its telecommunications industry. Telkom lost its monopoly on the fixed-line market in 2006 with the launch of Neotel, the country's second national operator. Telkom was offered on the Johannesburg Securities Exchange and the New York Stock Exchange in March 2003, realizing R3.9bn. on the first day.

A new 14,000-km submarine cable, the West Africa Cable System, became operational in May 2012, allowing South Africa to

greatly increase the capacity of its mobile phone and internet networks.

Internet users numbered 4,187,000 in 2008. In June 2012 there were 5.0m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

All law must be consistent with the Constitution and its Bill of Rights. Judgments of courts declaring legislation, executive action, or conduct to be invalid are binding on all organs of state and all persons. The common law of the Republic is based on Roman-Dutch law—that is the uncodified law of Holland as it was at the date of the cession of the Cape to the United Kingdom in 1806. South African law has, however, developed its own unique characteristics.

Judges hold office until they attain the age of 70 or, if they have not served for 15 years, until they have completed 15 years of service or have reached the age of 75, when they are discharged from active service. A judge discharged from active service must be ready to perform service for an aggregate of three months a year until the age of 75. The Chief Justice of South Africa, the Deputy Chief Justice, the President of the Supreme Court of Appeal and the Deputy President of the Supreme Court of Appeal are appointed by the President after consulting the Judicial Service Commission. In the case of the Chief Justice and Deputy Chief Justice, the President must also consult the leaders of parties represented in the National Assembly. The President on the advice of the Judicial Service Commission (JSC) appoints all other judges. No judge may be removed from office unless the JSC finds that the judge suffers from incapacity, is grossly incompetent or is guilty of gross misconduct, and the National Assembly calls for that judge to be removed by a resolution supported by at least two thirds of its members.

The higher courts include: 1) *The Constitutional Court (CC)*, which consists of the Chief Justice of South Africa, the Deputy Chief Justice of South Africa and nine other judges. It is the highest court in all matters in which the interpretation of the Constitution or its application to any law, including the common law, is relevant; 2) *The Supreme Court of Appeal*, consisting of a President, a Deputy President and the number of judges of appeal determined by an Act of Parliament. It is the highest court of appeal in all other matters; 3) *The High Courts*, which may decide constitutional matters other than those which are within the exclusive jurisdiction of the Constitutional Court, and any other matter other than one assigned by Parliament to a court of a status similar to that of a High Court. Each High Court is presided over by a Judge President who may divide the area under his jurisdiction into circuit districts. In each such district there shall be held at least twice in every year and at such times and places determined by the Judge President, a court which shall be presided over by a judge of the High Court. Such a court is known as the circuit court for the district in question; 4) *The Land Claims Court*, established under the Restitution of Land Rights Act of 1994 deals with claims for restitution of rights in land to persons or communities dispossessed of such rights after 1913 as a result of past racially discriminatory laws or practices. It has jurisdiction throughout the Republic and the power to determine such claims and related matters such as compensation and rights of occupation; 5) *The Labour Court*, established under the Labour Relations Act, 1995 deals with labour disputes. It is a superior court that has authority, inherent powers and standing in relation to matters under its jurisdiction, equal to that the High Court has in relation to matters under its jurisdiction. Appeals from decisions of the Labour Court lie to the Labour Appeal Court which has authority in labour matters equivalent to that of the Supreme Court of Appeal in other matters.

The lower courts are called Magistrates' Courts. Magisterial districts have been grouped into 13 clusters headed by chief magistrates. From the magistrates court there is an appeal to the

High Court having jurisdiction in that area, and then to the Supreme Court of Appeal. In cases involving constitutional matters there is a further appeal to the Constitutional Court.

The death penalty was abolished in June 1995 and no executions have taken place since 1989. In 2008–09 there were 18,148 murders (down from a peak of 26,877 murders in 1995–96). Although steadily declining, South Africa's murder rate of 37 per 100,000 in 2008–09 is still one of the highest in the world. Budgeted spending on police, prisons and justice services for 2006–07 was R79.6bn. The population in penal institutions in Dec. 2006 was 189,748.

### Education

The South African Schools Act, 1996 became effective on 1 Jan. 1997 and provides for: compulsory education for students between the ages of seven and 15 years of age, or students reaching the ninth grade, whichever occurs first. Pupils normally enrol for Grade 1 education at the beginning of the year in which they turn seven years of age although earlier entry at the age of six is allowed if the child meets specified criteria indicating that they have reached a stage of school readiness.

In 2008 the South African public education system accommodated 11.9m. school pupils, 799,387 university students (of which 140,330 at universities of technology) and 2.5m. further education and training college students. There were 25,875 primary, secondary, combined and intermediate schools with 400,953 educators.

In the 2010–11 financial year R165bn. was allocated to education. In 2007 public expenditure on education came to 5.4% of GDP and 17.4% of total government spending.

As a result of a major restructure of South African higher education during 2002–04, 36 universities and technikons (non-university higher education institutions) were reduced by means of mergers and incorporations to 17 universities and six universities of technology. The University of South Africa (UNISA) is the oldest and largest university in South Africa and one of the largest distance education institutions in the world. In 2009 UNISA had a total of 263,559 students and 9,344 staff (4,286 permanent). In 2005 the Tshwane University of Technology had 60,400 students, University of Pretoria 46,400, University of Johannesburg 45,500, University of Kwazulu-Natal 40,700, North West University 38,600 and the Cape Peninsula University of Technology 29,000.

The adult literacy rate in 2007 was an estimated 88% (89% for males and 87% for females).

### Health

Some 40% of South Africans live in poverty and 75% of these live in rural areas with limited access to health services. There is an extensive network of public health clinics providing free public health services, plus mobile clinics run by the government to provide primary and preventive health care.

36,912 doctors were registered with the Health Profession Council of South Africa (HPCSA) in 2010. These include doctors working for the state, doctors in private practice and specialists. Doctors train at the medical schools of eight universities and the majority go on to practise privately. In 2010, 110,518 enrolled nurses and enrolled nursing auxiliaries were registered with the South African Nursing Council (SANC); there were 5,320 dental practitioners registered with the HPCSA. In 2010, 12,218 pharmacists were registered with the South African Pharmacy Council. Chris Hani Baragwanath Hospital, situated to the southwest of Johannesburg, with its 3,200 beds, is the largest hospital in the world.

In Oct. 1998 the first traditional hospital was opened in Mpumalanga—the Samuel Traditional Hospital. There are about 200,000 traditional healers in South Africa providing services to between 60% and 80% of their communities.

Approximately 5.5m. South Africans are HIV-infected, the highest number in the world (equivalent to nearly 12% of the population of South Africa and some 17% of global HIV/AIDS cases). Government expenditure on HIV and AIDS increased substantially from R30m. in 1994 to R3bn. in 2005–06. In Aug. 2003 the government announced plans to roll out the provision of anti-retrovirals (ARVs) in the public health sector which would see 1.4m. people on treatment. It also envisaged that there would be at least one service point in every local municipality across the country by 2008. Although the latter has been achieved, it is clear that the number of people receiving ARVs is well behind the initial target.

### Welfare

In 2008–09 the department of social development was disbursing grants through its provincial offices to 13.0m. beneficiaries. Recipients are means-tested to determine their eligibility. 8.8m. people received the child support grant (CSG) of R240 per month. The age of children eligible for the CSG has been progressively increased to cover children up to and including the age of 17 years since 1 Jan. 2012. In 2008–09, 2.4m. received old-age grants of R1,010 per month. The age for male eligibility was lowered in phases over a two-year period from 65 to 60 in April 2010, the same as for women.

Other benefits paid are the disability, foster child, care dependency and war veterans' grants as well as institutional grants and grants in aid.

The total budget allocation for the payment of social assistance was R80.4bn. in 2009–10.

### RELIGION

South Africa is a secular state and freedom of worship is guaranteed by the Constitution. Almost 80% of the population professes the Christian faith. Other major religious groups are Hindus, Muslims and Jews. A sizeable minority of the population subscribe to traditional African faiths. In 1992 the Anglican Church of Southern Africa voted by 79% of votes cast for the ordination of women. In Feb. 2013 there was one cardinal.

### CULTURE

#### World Heritage Sites

UNESCO World Heritage sites under South African jurisdiction (with year entered on list) are: Greater St Lucia Wetland Park (1999), encompassing marine, wetland and savannah environments; Robben Island (1999), used since the 17th century as a prison, hospital and military base—it was the location for Nelson Mandela's incarceration; fossil hominid sites of Sterkfontein, Swartkrans, Kromdraai and environs (1999 and 2005), offering evidence of human evolution over 3.5m. years; uKhahlamba/Drakensberg Park (2000), including caves with 4,000-year old paintings; Mapungubwe Cultural Landscape (2003), a savannah landscape at the confluence of the Limpopo and Shashe rivers and the site of the largest kingdom in Africa in the 14th century; Cape Floral Region Protected Areas (2004); Vredefort Dome (2005), part of a meteorite impact structure; and Richtersveld cultural and botanical landscape (2007), covering 160,000 ha. of mountainous desert.

#### Press

The major press groups are Independent Newspapers (Pty) Ltd, Media24 Ltd, CTP/Caxton Publishers and Printers Ltd, and Johnnic Publishing Ltd. Other important media players include Primedia, Nail (New Africa Investments Limited) and Kagiso Media. Nail has unbundled into a commercial company (New Africa Capital) and a media company (New Africa Media).

In 2006 there were nine paid-for dailies, 13 paid-for Sunday newspapers and 71 paid-for non-daily newspapers. Newspapers with the highest circulations (Jan.–March 2008): *Sunday Times* (504,193); *Daily Sun* (499,436); *Rapport* (301,827); *Soccer-Laduma* (292,701); *Sunday World* (203,460); *Sunday Sun* (202,524); *City*

*Press* (201,790); *Sowetan* (145,173). *Beeld* is the largest Afrikaans daily (105,149) and *Isolezwe* the largest isiZulu daily (99,098).

### Tourism

A record 9.59m. visitors travelled to the country in 2008, up from 9.09m. in 2007. Most visitors in 2008 came from Lesotho, Zimbabwe, Mozambique, Swaziland, Botswana, the UK, the USA and Germany. Gauteng and Western Cape were the most popular provinces visited in 2008 (with 32.3% and 26.9% of visitor nights respectively).

### Festivals

Best-known arts festivals: the Klein Karoo Festival (Oudtshoorn, Western Cape), which has a strong Afrikaans component, is held in April; the Grahamstown Arts Festival in the Eastern Cape is held in June/July; the Mangaung African Cultural Festival (Macufe) is held in Sept. in Bloemfontein; and the Aardklop Arts Festival, in Potchefstroom in the North-West province, is held in Sept. The Encounters South African International Documentary Festival has been held since 1999.

## SOUTH AFRICAN PROVINCES

In 1994 the former provinces of the Cape of Good Hope, Natal, the Orange Free State and the Transvaal, together with the former 'homelands' or 'TBVC countries' of Transkei, Bophuthatswana, Venda and Ciskei, were replaced by nine new provinces. Transkei and Ciskei were integrated into Eastern Cape, Venda into Northern Province (now Limpopo), and Bophuthatswana into Free State, Mpumalanga and North-West.

The administrative powers of the provincial governments in relation to the central government are set out in the 1999 constitution after a revision of the original text, demanded by the Constitutional Court in 1996.

the population); Coloured, 541,850 (8%); White, 310,450 (5%); Indian/Asian, 27,929 (0.4%). In 2001, 38.8% of the population lived in urban areas. Density (2011), 39 per sq. km. Life expectancy at birth, 2007 estimate, was 48.4 years. At the 2011 census 78.8% spoke isiXhosa as their first language, 10.6% Afrikaans, 5.6% English and 2.5% Sesotho.

Eastern Cape comprises 77 administrative districts (including Umzimkulu district, an enclave within KwaZulu-Natal). The provincial capital is Bhisho.

### SOCIAL STATISTICS

Registered live births in 2010 totalled 134,580; deaths in 2005 totalled 92,915. Total number of marriages officially recorded in 2010 was 22,329; divorces granted in 2005 numbered 1,928.

### CONSTITUTION AND GOVERNMENT

There is a 63-seat provincial legislature.

### RECENT ELECTIONS

At the provincial elections held on 22 April 2009, 44 seats were won by the African National Congress, nine by the Congress of the People, six by the Democratic Alliance, three by the United

## Eastern Cape

### TERRITORY AND POPULATION

The area is 169,580 sq. km and the population at the 2011 census was 6,562,053 (3,472,353 female), the third largest population in South Africa. Of that number: Black African, 5,660,230 (86% of

Democratic Movement and one by the African Independent Congress.

### CURRENT GOVERNMENT

In March 2013 the ANC Executive Council comprised:

*Premier:* Noxolo Kiviet (took office on 6 May 2009).

*Minister of Economic Development and Environmental Affairs:* Mcebisi Jonas. *Education and Training:* Mandla Makupula. *Finance and Provincial Planning:* Phumulo Masualle. *Health:* Sicelo Gqobana. *Human Settlements, Safety and Liaison:* Helen August-Sawls. *Local Government and Traditional Affairs:* Mlibo Qhoboshiane. *Public Works, Roads and Transport:* Thandiswa Marawu. *Rural Development and Agrarian Reform:* Zoleka Capa. *Social Development, Women, Children and People with Disabilities:* Pemmy Majodina. *Sport, Recreation, Arts and Culture:* Xoliswa Tom.

### ENERGY AND NATURAL RESOURCES

#### Electricity

In 2010, 9,464 GWh of electricity were delivered by Eskom to Eastern Cape. According to a survey of Feb. 2007, 65.5% of households used electricity for lighting (the lowest percentage of any of the South African provinces).

#### Oil and Gas

There are plans to build a large oil refinery at Coega near Port Elizabeth.

#### Minerals

In 2006, 964 people were employed in mining.

#### Agriculture

There are around 4,000 commercial farms with an average area of 1,500 ha. Of this area only 7% is arable land with 45% not farmed at present owing to land ownership disputes in the former homelands (Transkei and Ciskei). Livestock accounts for 77% of commercial agricultural production; 18% comprises horticulture. Gross farming income for 2007 was R5.4bn. Gross farming income of field crops (R1,000), 369,086; horticulture, 1,396,208; animal and animal products, 3,616,267. The total number of paid farm workers in 2007 was 64,818.

#### Fisheries

There is a relatively small sea-fishing industry based on squid, sardines, hake, kingklip and crayfish. Aquaculture produces abalone for export to the Far East.

### INDUSTRY

Manufacturing is based mainly in Port Elizabeth and East London with motor manufacturing as the prime industry. Wool, mohair and hides are an important area of the province's agro-industry.

#### Labour

In the fourth quarter of 2009 the labour force numbered 1,732,000, of whom 468,000 were unemployed (27.0%—the joint highest along with North-West). Eastern Cape is the centre of South Africa's motor manufacturing industry with the main production centres based at Port Elizabeth and East London.

### COMMUNICATIONS

#### Roads

Total road network in 2008 was around 78,000 km. Under the government's S'hamba Sonke programme, R1bn. was allocated in April 2011 for road construction and maintenance. In Dec. 2009 Eastern Cape had 659,829 registered vehicles. There were 1,543 fatalities as a result of road traffic accidents in 2009.

### Civil Aviation

The province has four airports: Port Elizabeth, East London, Umtata and Bulembu (Bhisho).

### Shipping

There are three deep-water ports: Port Elizabeth, East London and Coega.

### Telecommunications

According to a Statistics South Africa Community Survey of 2007, 61.2% of households had a mobile phone (21.5% at the 2001 census); landline telephone, 10.7% (15.7%); and computer, 7.5% (4.1%).

### SOCIAL INSTITUTIONS

#### Education

In 2009 there were 2,076,400 children enrolled in schools and a total of 69,620 teaching staff. Following a nationwide restructure of higher education, the Province has four universities: Walter Sisulu University for Technology and Science (formed by the merger of University of Transkei and two technikons), Rhodes University, the University of Fort Hare and Nelson Mandela Metropolitan University (formed by the merger of Port Elizabeth Technikon and the Port Elizabeth campus of Vista University). At the 2001 census more than 22.8% of people aged 20 years and above had no schooling at all, while 6.3% had completed higher education.

#### Health

In 2009 there were 90 hospitals in the public sector with 14,456 beds. In the 2006–07 financial year a total of R233.9m. was allocated to the National School Nutrition Programme (formerly known as the Primary School Nutrition Programme) although actual spending only amounted to R158.5m.

### CULTURE

#### Tourism

Overseas visitors to the province in 2008 totalled 403,000; domestic visitor trips, 5.4m.

## Free State

### TERRITORY AND POPULATION

The Free State lies in the centre of South Africa and is situated between the Vaal River in the north and the Orange River in the south. It borders on the Northern Cape, Eastern Cape, North-West, Mpumalanga, KwaZulu-Natal and Gauteng Province and shares a border with Lesotho. The area is 129,480 sq. km, 10.62% of South Africa's total surface area. The province is the third largest in South Africa but has the second smallest population and the second lowest population density. The population at the 2011 census was 2,745,590 (1,416,623 female). Of that number: Black African, 2,405,533 (87.6% of the population); White, 239,026 (8.7%); Coloured, 83,844 (3.1%); Indian/Asian, 10,398 (0.4%). In 2001, 75.8% of the population lived in urban areas. Density (2011), 21 per sq. km. Life expectancy at birth, 2007 estimate, was 46.5 years. At the 2011 census 64.2% (1,717,881) of the population spoke Sesotho as their first language, 12.7% (340,490) Afrikaans, 7.5% (201,145) isiXhosa, 5.2% (140,228) Setswana, 4.4% (118,126) isiZulu and 2.9% (78,782) English.

Free State comprises 52 administrative districts. The provincial capital is Bloemfontein (meaning 'fountain of flowers'). Bloemfontein's indigenous name is Mangaung, which means 'place of the big cats'.

## SOCIAL STATISTICS

Registered live births in 2010 totalled 58,581; deaths in 2005 totalled 50,210. The total number of marriages officially recorded in 2010 was 11,905; divorces granted in 2005 numbered 1,662.

## CLIMATE

Temperatures are mild with averages ranging from 19.5°C in the west to 15°C in the east. Maximum temperatures in the west can reach 36°C in summer. Winter temperatures in the high-lying areas of the eastern Free State can drop as low as -15°C. The western and southern areas are semi-desert.

## CONSTITUTION AND GOVERNMENT

There is a 30-seat provincial legislature. The Free State Executive Council, headed by the *Premier*, administers the province through ten Departments.

The Free State House of Traditional Leaders advises the Legislature on matters pertaining to traditional authorities and tribal matters.

## RECENT ELECTIONS

At the provincial elections held on 22 April 2009 the African National Congress retained its majority and won 22 of the 30 seats; the Congress of the People four; the Democratic Alliance three; and Freedom Front Plus one.

## CURRENT GOVERNMENT

In March 2013 the ANC Executive Council comprised:

*Premier:* Ace Magashule (took office on 6 May 2009).

*Minister of Agriculture and Rural Development:* Mamiki Qabathe. *Co-operative Governance, Traditional Affairs and Human Settlement:* Olly Mlamleli. *Economic Development, Tourism and Environmental Affairs:* Msebenzi Zwane. *Education:* Tate Makgoe. *Finance:* Elzabe Rockman. *Health:* Dr Benny Malakoane. *Police, Roads and Transport:* Butana Komphela. *Public Works:* Sisi Mabe. *Social Development:* Sisi Ntombela. *Sports, Arts, Culture and Recreation:* Dan Kgothule.

*Speaker (acting):* Ouma Tsopo. *Director-General (acting):* Kopung Ralikhontsane.

*Government Website:* <http://www.freestateonline.fs.gov.za>

## ENERGY AND NATURAL RESOURCES

### Electricity

In 2010, 8,955 GWh of electricity were delivered by Eskom to the Free State. According to a survey of Feb. 2007, 86.6% of households used electricity for lighting.

### Minerals

The province contributes about 16.5% of South Africa's total mineral output. Apart from rich gold and diamond deposits, the Free State is the source of numerous other minerals and is the founding home of South Africa's famous oil-from-coal industry centred on Sasolburg. Bentonite clays, gypsum, salt and phosphates are to be found while large concentrates of thorium-ilmenite-zircon also occur. In 2006, 46,067 people were employed in mining.

### Agriculture

Good agricultural conditions allow for a wide variety of farming industries. Of the total 12.7m. ha., 90% (11.5m. ha.) is utilized as farmland. Of this, 63.9% is natural grazing; 2.1% is for nature conservation; and 1.1% is used for other purposes. Dryland cultivation is practised on 97% of the arable land, while the remaining 3% is under irrigation.

Free State has the highest number of commercial farming units of all the provinces: 7,515 in 2007 with a gross farming income of R11.9bn. Gross farming income of field crops in 2007 (R1,000), 4,226,749; horticulture, 984,203; animal and animal products, 6,718,152. Paid farm workers in the same year numbered 99,094.

The eastern region is the major producer of small grains; the northern region, maize and beef; and the southern region, mutton and wool. The province produces about 40% of total maize and 50% of total wheat output in South Africa.

## INDUSTRY

### Labour

In the fourth quarter of 2009 the labour force numbered 1,059,000, of whom 268,000 were unemployed (25.3%).

## COMMUNICATIONS

### Roads

Total road network in 2008 was around 111,000 km. Under the government's S'hamba Sonke programme, R447m. was allocated in April 2011 for road construction and maintenance. In Dec. 2009 Free State had 539,704 registered vehicles. There were 967 fatalities as a result of road traffic accidents in 2009.

### Rail

Transnet Freight Rail is one of the biggest companies in the Free State with 4,217 employees. It transports most of the province's maize, wheat, gold ore, petroleum and fertilizer. The company's infrastructure consists of approximately 4,000 km of tracks, of which 1,300 km are electrified.

### Telecommunications

According to a Statistics South Africa Community Survey of 2007, 68.3% of households had a mobile phone (24.8% at the 2001 census); landline telephone, 13.1% (20.4%); and computer, 11.1% (4.9%).

## SOCIAL INSTITUTIONS

### Education

In 2009 there were 651,785 pupils enrolled in schools and 23,741 teachers. # SOUTH SUDAN

(Republic of South Sudan)

*Capital:* Juba

*Population estimate, 2008:* 8-3m.

## KEY HISTORICAL EVENTS

South Sudan was administered separately from the north under Egyptian and British rule until 1946 when the British unified the regions. When independence as a single state was granted in 1956 and southern autonomy was compromised, tensions between the predominantly Muslim, Arabic north and the Christian and animist south escalated into civil war. An agreement between the government and the Southern Sudan Liberation Front signed in Addis Ababa in 1972 brought a brief respite from the fighting but in 1983 hostilities recommenced. They lasted 19 years and resulted in 1-9m. civilian deaths in the south of Sudan before a ceasefire was declared in Jan. 2002. A comprehensive peace agreement was signed between the Khartoum government and the southern rebels led by the Sudan People's Liberation Movement in Jan. 2005. They entered a unity government, despite ongoing arguments over disputed areas, and a southern autonomous government was formed. In a referendum on independence for the south on 9-15 Jan. 2011, 98.8% of votes cast were in favour. South Sudan became an independent country on 9 July 2011. On 14 July 2011 it became the 193rd member of the United Nations.

## TERRITORY AND POPULATION

South Sudan is bounded in the north by Sudan, east by Ethiopia, southeast by Kenya, south by Uganda, southwest by the Democratic Republic of the Congo and west by the Central African Republic. Its area is 644,329 sq. km. In 2008 the census population was 8-26m. (disputed). More than half (51%) of the population is below the age of 18. 83% of the population is rural.

The country is composed of ten states (with capitals): Central Equatoria (Juba), East Equatoria (Kapoeta), Jungoli (Bor), Lakes (Rumbek), North Bahr Al Ghazal (Awil), Unity (Bantio), Upper Nile (Malakal), Warap (Warap), West Bahr Al Ghazal (Wau), West Equatoria (Yambio).

The capital, Juba, had a population of 230,000 in 2008. Other major cities are Wau (118,000), Malakal (115,000), Yei (111,000) and Yambio (106,000).

The official language is English.

## CLIMATE

South Sudan's climate is tropical with wet and dry seasons. The winter is relatively cool and dry while the rainy season usually takes place from April to Dec. with most rain falling in the summer months. Juba, Jan. 81°F (27.3°C), July 76°F (24.5°C). Annual rainfall 38" (965 mm). Wau, Jan. 79°F (25.9°C), July 78°F (25.3°C). Annual rainfall 44" (1,118 mm).

## CONSTITUTION AND GOVERNMENT

An interim constitution was ratified shortly before independence and came into force on 7 July 2011. Under the constitution the *President* is the Head of State, Head of Government and Commander-in-Chief of the armed forces and serves a four-year term. The National Legislature consists of two Houses: the *National Legislative Assembly*, comprising members of the former Southern Sudan Legislative Assembly and all South Sudanese who were members of the National Assembly of Sudan; and the *Council of States*, which consists of South Sudanese who had seats in the Council of States of Sudan plus 20 members appointed by the President. Members of both houses serve four-year terms.

## National Anthem

'South Sudan Oyee'; words and tune by students and teachers of Juba University.

## CURRENT GOVERNMENT

In March 2013 the government comprised:

*President:* Salva Kiir Mayardit; b. 1951 (Sudan People's Liberation Movement; sworn in 9 July 2011).

*Vice President:* Riek Machar.

*Minister of Cabinet Affairs:* Deng Alor Kuol. *Defence and Veteran Affairs:* Gen. John Kong Nyuon. *Foreign Affairs and International Co-operation:* Nhial Deng Nhial. *National Security:* Gen. ## CURRENT LEADERS

**Salva Kiir Mayardit**

*Position*  
President

## Introduction

Salva Kiir Mayardit became president of the newly independent Republic of South Sudan in July 2011. A veteran of Sudan's long

civil war, he helped establish the dominant Marxist rebel movement in southern Sudan in the 1980s, leading its military wing.

#### *Early Life*

Salva Kiir Mayardit was born into the Dinka ethnic group in Bahr Al Ghazal state in southern Sudan in 1951. He became active in the Anya-Nya southern rebel movement in the civil war in the late 1960s. Following a settlement on regional autonomy in 1972, Kiir joined the Sudanese Army, graduating from its Military College at Omdurman.

The southern rebellion reignited in 1983 after President Nimeiry imposed Sharia law. Kiir joined John Garang in defecting from the Army and co-founded the Sudanese People's Liberation Movement (SPLM) that year. The Marxist-Leninist organization became the dominant southern rebel force.

Peace talks between the SPLM and Sudan's president, Omar al-Bashir, began in 2002. They culminated in a peace agreement of 2005, ending the war that had claimed 2m. lives and recognizing southern autonomy. Kiir became vice president of the Government of Southern Sudan (GOSS) in Juba. He became president following Garang's death in a helicopter accident in July 2005 but did not appoint a new vice-president. His ability to unite rival factions was underlined when he was re-elected president of the GOSS in April 2010 with 93% support. Nearly 99% of voters in the Jan. 2011 referendum then elected to separate from Sudan and, following approval from Khartoum, the Republic of South Sudan was formally established on 9 July that year, with Kiir as president.

#### *Career in Office*

In his inaugural address Kiir said the South Sudanese would forgive but not forget past injustices. He made conciliatory gestures to southern rebel groups previously opposed to the SPLM, and asked the United Nations for help to lift South Sudan from the 'abyss of poverty and deprivation'.

However, following deepening tensions with the Bashir regime in Sudan over transit fees (for South Sudan's only export route north to the Red Sea) and oil revenue-sharing, South Sudan shut down oil exports in early 2012, seriously undermining the economies of both countries. In April 2012 Sudan's air force raided its neighbour after South Sudanese troops occupied the disputed border region of Abyei and the Heglig oilfields. The UN threatened sanctions against both countries if they did not stop the escalating violence and return to negotiations. Kiir met President Bashir in Ethiopia in Sept. in an attempt to resolve the crisis, and although they concluded agreements on trade, security and a resumption of oil exports, they failed to resolve contested border issues.

#### **DEFENCE**

On independence the former rebel Sudan People's Liberation Army changed its name to the South Sudan Armed Forces.

#### **ECONOMY**

##### **Overview**

Oil exports began in 1999 and have been essential to the fortunes of what is now South Sudan, accounting for 98% of its budget. 75% of what was formerly Sudan's oil production is located in the South.

Despite a 2005 agreement to share oil revenues equally, there have been clashes between North and South over oil-rich border regions such as Abyei. When the 2005 agreement expired, tensions escalated over how to split future earnings. Other contentious issues include border definition and servicing the region's debts.

Despite oil wealth, South Sudan is among Africa's least developed economies, civil war having left the country impoverished. Infrastructure is poor, with few paved roads. Yet there is significant growth potential, with sizeable livestock, fishery and forestry resources, while fertile conditions make agriculture a promising non-oil sector.

#### **Currency**

The official unit of currency is the *South Sudan pound* (SSP) of 100 *piastres*, introduced on 18 July 2011. Inflation was 47.3% in 2011.

#### **Performance**

Total GDP in 2011 was US\$19.2bn. Real GDP growth was 1.4% in 2011.

#### **Banking and Finance**

The Bank of South Sudan (BOSS) serves as the country's central bank. Its *Governor* is Kornelio Koriom Mayiek.

#### **COMMUNICATIONS**

##### **Roads**

Only a small proportion of South Sudan's road network is paved. It is estimated that the country has less than 100 km of paved road.

##### **Rail**

Total length of railway is 248 km, running from the Sudanese border to Wau.

##### **Civil Aviation**

There is an international airport at Juba with connections to Addis Ababa, Cairo, Entebbe, Khartoum and Nairobi. Other major airports include those at Malakal, Rumbek and Wau. Southern Sudan Airlines was established in 2005.

#### **SOCIAL INSTITUTIONS**

##### **Justice**

The Judiciary of Southern Sudan (JOSS) oversees the court systems of South Sudan. The highest court is the Supreme Court. The second tier of justice consists of three Courts of Appeal. Each state has a High Court, as well as county, town and city courts.

The death penalty is in force. There were at least five executions in 2012.

##### **Education**

Primary school enrolment in 2009 was 1,380,580. Secondary school enrolment (ages 14–17) was 44,027 in 2009. Higher education institutions include the University of Juba (founded in 1977), the University of Bahr el Ghazal (1991) in Wau and Upper Nile University (1991) in Malakal. The literacy rate for people aged 15 and above was 27% in 2009.

#### **RELIGION**

A large percentage of South Sudan's population are Christian—primarily Roman Catholic, Anglican and Presbyterian. There are also followers of African traditional animist religions as well as Muslims.

#### **DIPLOMATIC REPRESENTATIVES**

## KEY HISTORICAL EVENTS

A bridge between Europe and Africa, the Iberian peninsula has absorbed influences from both regions. The original inhabitants were Iberians, who spoke a non Indo-European language, and Celtic peoples, who were mainly to the north and west of the peninsula. From the 8th century BC the Phoenicians established trading colonies such as Gades (Cádiz), importing metalworking skills, music and literacy in the form of a semi-syllabic script. The Greeks established a trading settlement in Catalonia named Empirion (now Ampurias) around 575 BC, and there is evidence of other Greek and Phoenician settlements along the Mediterranean coast.

From 241 BC the Iberian peninsula came under the influence of Carthage in North Africa. The Carthaginians, led by Hamilcar Barca, landed at Cádiz and moved north and east. They eventually founded a new capital at Cartagena: the city grew rapidly and had a population of around 30,000 by 215 BC. A Roman presence began at this time, further north in Catalonia. The first legionnaires established their base at Tarragona, from where they waged war on the Carthaginians. Fighting between the two powers ebbed and flowed for years, until the Carthaginians were forced off the peninsula in 206 BC. Roman laws and customs were gradually adopted over the following six centuries, but there were frequent rebellions among the native peoples.

Roman rule was on the wane throughout Europe by AD 400, and Roman Hispania was no exception. In 409 Visigoths, Suevi and Vandals crossed the Pyrenees and began to establish themselves as the new rulers. By 470 most of the leading families were of Germanic origin. Toledo became the capital and seat of successive Visigothic monarchs until the early 700s. At this time, the Romans were defeated in North Africa by Muslim armies,

who began to turn their attention to the Iberian peninsula. Toledo fell to Arab and Berber forces and the death of King Roderic in 711 marked the end of Visigothic hegemony.

The Muslim conquerors brought a new language, religion and culture, which dominated large parts of the Iberian peninsula for the next five hundred years, though there were sizeable Jewish communities in the southern and eastern towns and there were some Christian principalities in the north. The Umayyad dynasty used Córdoba as the administrative centre of al-Andalus ('Land of the Vandals') until 1031. New trade links were established, connecting Córdoba with Egypt and Persia and most of the Islamic world. People and ideas flooded in and the great cities of Córdoba and Seville became beacons of modernity and creativity in fields ranging from architecture to botany, medicine, poetry and techniques for irrigation.

While al-Andalus prospered, the Christian principalities to the north in places such as Asturia, the Basque territories and northern Catalonia remained relatively poor and agrarian. However, from about 900 there was a gradual expansion southwards towards al-Andalus, described as the start of the *Reconquista*, or reconquest of Spain by the Christians. By 1000 there was considerable contact between the Christian principalities and France: Norman knights fought in Catalonia and French settlers arrived in towns along the pilgrimage route to Santiago de Compostela, bringing with them new ideas and skills.

From the 1120s the Muslim governors of al-Andalus found themselves under threat from both northern Christian rulers and native Andalusi. Alfonso VII of Leon-Castile eventually conquered Córdoba in 1146 and the strategically important Almería, on the Mediterranean coast, in 1147. Following these victories, the three most powerful Christian kingdoms of Aragon, Castile and Portugal pushed south and east and by 1300 the last remaining Islamic dominion was the amirate of Granada. Muslim inhabitants were expelled from many towns and cities, though in rural areas the Islamic faith and the Arabic language survived for centuries. While Córdoba declined, Barcelona blossomed: it emerged as a great economic success story on a par with Genoa and Venice.

Castile and Aragon were the dominant kingdoms by the early 1300s, but they were both characterized by infighting and rebellion. King Pedro the Cruel of Castile was challenged by a coalition of nobles led by his half brother Enrique de Trastámara. The English supported Pedro (Peter) and his heirs and the French backed Enrique (Henry) and his supporters. Enrique eventually prevailed, and was crowned Enrique II in 1369.

## The Modern State

The Spanish monarchy was founded in 1469 following the marriage of Isabel (Isabella), princess of Castile and Fernando (Ferdinand), heir to the throne of Aragon. Under their joint reign, they laid the foundations for a unified Spain. In 1478 they established the notorious Spanish Inquisition, expelling and executing tens of thousands of Jews and other non-Christians. Four years later the last Islamic territory of Granada was besieged. It surrendered in 1492, the year in which Christopher Columbus reached the New World.

When Fernando and Isabel's son Juan died in 1497, the succession to the Spanish crowns passed to his sister, Juana *la loca* (the Mad). Juana married Philip (Felipe) the Handsome, heir through his father, Emperor Maximilian I, to the Habsburg domains in Germany and Flanders. When Fernando died in 1516, Juana and Felipe's son, Charles of Ghent, inherited Spain, its colonies in the New World, Naples and, following the death of Maximilian I in 1519, the Habsburg territories. Shortly afterwards

he was elected Holy Roman Emperor, a title he held as Charles V (Carlos I of Spain). In the space of only a few years, Charles commanded one of the most extensive empires since Rome.

Columbus paved the way for the Spanish colonies in the New World but for 30 years after his discoveries attention focused solely on the Caribbean. It was only in 1521 that Hernando Cortés overthrew the Aztecs, with help from native Indian allies. After 1540 gold and silver began pouring into Spanish coffers from mines in Peru and Mexico. Sugar plantations were established in the Caribbean and the indigenous populations were gradually wiped out. Maintaining control of the new empire was a serious challenge and Charles V relied heavily on co-operation from Italians, Flemings and Germans. The rise of Spain as a military power began in the 1560s in the reign of Felipe II. He built a powerful navy and annexed Portugal in 1580. The new fleet patrolled the American supply routes, fended off attacks from the English and set up new colonies in the Philippines and at Buenos Aires.

Spain's Golden Age began to lose its lustre in the late 16th century, following a popular uprising in the Netherlands under William of Orange. The Dutch were beginning to establish their own colonies in Asia and started making inroads in Brazil. Spain was weakened by the cost of defending its empire against France and England and in 1640 the unity of the Iberian peninsula itself came under threat by rebellions in Catalonia and Portugal. The crowning of Carlos II, a disabled child, in 1665 symbolized Spain's growing vulnerability and isolation from the rest of Europe.

Carlos II died without issue in 1700 and left the throne to Philippe, duke of Anjou and grandson of King Louis XIV of France. Felipe (Philippe) V was the first in a line of five Bourbon monarchs, who reigned in Spain until 1833. Under Felipe V, and his successor Fernando VI, Spain restored some of its influence in Europe, particularly in Italy, where Naples and Sicily were recovered from Austria in 1734. Educational reforms led to a period of Enlightenment in the 1760s, with many universities replacing conservative Jesuit doctrines with modern physics, astronomy and political theory. The 1780s, when Spain was ruled by Carlos III, were a period of stability and prosperity. Catalonia became a centre of the early industrial revolution with its booming textile trade and Madrid saw a flowering of artistic expression encapsulated by the work of Goya.

When Louis XVI was guillotined in 1793, the new French Republic turned its attention to neighbouring Spain and Britain. In 1794–95 French forces invaded Catalonia and the Basque provinces. Following these defeats, King Carlos IV of Spain formed an alliance with France under its new emperor, Napoleon. Hostilities with Britain were resumed, though defeat for the Franco-Spanish naval forces at the Battle of Trafalgar further undermined links with the Spanish colonies and damaged the economy.

In 1808 the weak and unpopular Carlos IV abdicated and the Spanish crown passed to Fernando VII, though his right to the throne was ceded to Napoleon later that year. However, Napoleon misjudged the mood of the Spanish public who rioted in Madrid and began a five-year war of independence. In 1813 the French forces were finally expelled but ideas from revolutionary France were beginning to take root. The medieval Cortes (parliament) was revived and a Liberal reformist group secured Spain's first constitution. The following year, Fernando VII was restored to the Spanish throne, a move generally welcomed by a war-ravaged public. But Fernando's first act was to abolish the constitution, and his 20 year reign was characterized by a return to the old regime: the Inquisition was re-established, the Liberals were persecuted, free speech was repressed and Spain entered a severe economic recession.

### *End of Empire*

Queen Isabel II inherited the Spanish throne as a child in 1833. During her reign there were various attempts by the Liberals and progressives to reinstate a constitution. Her support for

neo-catholic reactionaries in her governments of the 1860s fanned the flames of revolution. In 1868 Isabel was deposed and the Cortes approved a new constitution. Amadeo I of Savoy was chosen as monarch but he was unable to adapt to Spanish politics and abdicated in 1873. The Cortes immediately proclaimed a republic but in less than a year a coup restored the Bourbon monarchy, with Alfonso XII, the son of exiled Isabel II, as king.

The disastrous Spanish-American War of 1898 marked the end of the Spanish Empire. Spain was defeated by the USA in a series of one-sided naval battles, resulting in the loss of Cuba, Puerto Rico, Guam and the Philippines. Neutral in the First World War, Spain enjoyed a trade and industry boom. Barcelona's Hispano-Suiza factories produced aircraft engines for the French air force and luxury cars. However, prosperity did not filter through society and workers demonstrated against high food prices. In 1923 Gen. Miguel Primo de Rivera, marquis of Estella, led a coup, abolished the 1876 constitution and closed down the Cortes. Primo de Rivera was determined to clear out what he saw as corrupt, self-serving politicians. His alternative to the constitutional monarchy was the National Political Union but it attracted only opportunists and right-wing enthusiasts. There were improvements in the nation's infrastructure, but de Rivera's public works programmes were hit by financial difficulties in 1929, and the dictator resigned the following year.

1931 marked the beginning of a new genuinely democratic era for Spain. Municipal elections were held and won by a republican-socialist coalition. King Alfonso XIII went into exile and the Second Republic was declared. The 1936 elections saw the country split in two, with the Republican government and its supporters on one side (an uneasy alliance of communists, socialists and anarchists) and the Nationalists (the army, the Catholic church, monarchists and the fascist-style Falange Party) on the other.

### *Civil War*

The assassination of the opposition leader José Calvo Sotelo by Republican police officers in July 1936 gave the army, led by Gen. Francisco Franco, an excuse to stage a coup. The failure of the military to overthrow the government led to a protracted civil war. The Nationalists received extensive military and financial support from fascist Germany and Italy, while the Republican government received support from the Soviet Union and, to a lesser degree, from the International Brigades, made up of foreign volunteers.

By 1939 the Nationalists, led by Franco, had prevailed. More than 350,000 Spaniards died in the fighting, but more bloodletting ensued. An estimated 100,000 Republicans were executed or died in prison after the civil war. Franco's cure for Spain's 'sick' economy was withdrawal from world markets and the establishment of a self-sufficient autarky which remained neutral in World War Two. But by the late 1940s inflation was rising steeply and Spain was losing ground to other European countries. Franco allowed a gradual liberalization of the economy, but despite this and the readmission of Spain to the UN in 1955 the economy remained in deep trouble. The desperate conditions endured by hundreds of thousands of workers led to nationwide strikes and growing opposition to the Franco regime among university students and intellectuals. In the 1960s the regime faced demands for independence in Catalonia and the Basque Country.

Franco died in 1975, having earlier named Juan Carlos, the grandson of Alfonso XIII, his successor. Under King Juan Carlos, Spain made the transition back to democracy. The first elections were held in 1977 and a new constitution was approved by referendum in 1978. In Feb. 1981 there was an attempted fascist coup, when for 18 hours the deputies of the lower house of parliament and the Cabinet were held hostage. The episode is now seen as the final, futile attempt to turn back the clock. The following year saw a spectacular victory for the socialist party which presided over a rapid expansion in the economy during its 14 years in power. In 1986 Spain joined the European Economic

Community, cementing the nation's status as a popular location for foreign investors and tourists, though its international reputation has suffered from the ongoing violent campaign waged by ETA, the separatist terrorist group attempting to secure an independent Basque homeland.

In 1996 Spaniards voted in a conservative party under the leadership of José María Aznar. In March 2000 he was re-elected with an absolute majority; his success was attributed to the buoyant state of the Spanish economy, which averaged in excess of 4% annual growth during Aznar's first term of office.

Madrid suffered Spain's worst terrorist attack on 11 March 2004 when four commuter trains were bombed, killing 191 and injuring over 1,800 people. The government initially blamed ETA but suspicion quickly moved to al-Qaeda and North African operatives. On 14 March the Socialists, led by José Luis Rodríguez Zapatero, defeated the People's Party in general elections. The last Spanish troops left Iraq in May 2004. In March 2006 ETA announced a permanent ceasefire, but the truce ended in Dec. when the group carried out a car bomb attack at Madrid's Barajas airport. ETA renounced the use of arms in Oct. 2011.

### TERRITORY AND POPULATION

Spain is bounded in the north by the Bay of Biscay, France and Andorra, east and south by the Mediterranean and the Straits of Gibraltar, southwest by the Atlantic and west by Portugal and the Atlantic. Continental Spain has an area of 493,491 sq. km, and including the Balearic and Canary Islands and the towns of Ceuta and Melilla on the northern coast of Africa, 505,693 sq. km (195,249 sq. miles). Population (census, 2011), 46,815,916 (23,711,613 females). In 2011, 77.6% of the population lived in urban areas; population density in 2011 was 93 per sq. km. In 2011 foreigners resident in Spain numbered 5,252,473 (up from 3,730,610 in 2005), including 798,104 from Romania, 773,966 from Morocco, 316,756 from Ecuador, 312,098 from the UK and 250,087 from Colombia. Foreigners constituted 11.2% of the population in 2011 (8.5% in 2005 and 2.3% in 2000).

The UN gives a projected population for 2015 of 47.53m.

The growth of the population has been as follows:

<sup>1</sup>Ceuta and Melilla gained limited autonomous status in 1994.

The capitals of the autonomous communities are: *Andalusia*: Seville (Sevilla); *Aragón*: Zaragoza (Saragossa); *Asturias*: Oviedo; *Baleares*: Palma de Mallorca; *Basque Country*: Vitoria-Gasteiz; *Canary Islands*: dual capitals, Las Palmas de Gran Canaria and Santa Cruz de Tenerife; *Cantabria*: Santander; *Castilla-La Mancha*: Toledo; *Castilla y León*: Valladolid; *Catalonia*: Barcelona; *Extremadura*: Mérida; *Galicia*: Santiago de Compostela; *Madrid*: Madrid; *Murcia*: Murcia (but regional parliament in Cartagena); *Navarra*: Pamplona; *La Rioja*: Logroño; *Valencian Community*: Valencia.

The capitals of the provinces are the towns from which they take the name, except in the cases of Álava (capital, Vitoria-Gasteiz), Guipúzcoa (San Sebastián) and Vizcaya (Bilbao).

The islands that form the Balearics include Majorca (Mallorca), Minorca (Menorca), Ibiza and Formentera. Those which form the Canary Archipelago are divided into two provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, La Palma, Gomera and Hierro; that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos.

Places under Spanish sovereignty in Africa (Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez) constitute the two provinces of Ceuta and Melilla.

### Languages

The Constitution states that 'Castilian is the Spanish official language of the State', but also that 'All other Spanish languages will also be official in the corresponding Autonomous Communities'. At the last linguistic census (2001) Catalan (an official EU language since 1990) was spoken in Catalonia by 74.5% of people and understood by 94.5%. It is also spoken in Balears, Valencian Community (where it is frequently called Valencian), and in Aragón, a narrow strip close to the Catalanian and Valencian Community boundaries. Galician, a language very close to Portuguese, was understood in 1998 by 98.4% of people in Galicia and spoken by 89.2%; Basque by a significant and increasing minority in the Basque Country, and by a small minority in northwest Navarra. It is estimated that one-third of all Spaniards speaks one of the other three official languages as well as standard Castilian. In bilingual communities, both Castilian and the regional language are taught in schools and universities.

Rate per 1,000 population, 2008: births, 11.7; deaths, 8.7; marriages, 4.3; divorces, 2.5. In 2005 the most popular age range for marrying was 25–29 for both males and females. Annual

population growth rate, 2000–05, 1.5%. Suicide rate (per 100,000 population), 2005: 7.8. Expectation of life, 2007, was 77.5 years for males and 84.0 for females. Infant mortality, 2010, four per 1,000 live births; fertility rate, 2008, 1.4 births per woman. In 2009 Spain received 3,007 asylum applications, down from 7,662 in 2007.

A UNICEF report published in 2010 showed that 17.1% of children in Spain live in relative poverty (living in a household in which disposable income—when adjusted for family size and composition—is less than 50% of the national median income), compared to just 4.7% in Iceland.

In 2007–08, 19.6% of 15 to 34-year-olds used cannabis and 5.1% cocaine. A 2009 report found that use of cocaine in Spain was the highest in the European Union.

### CLIMATE

Most of Spain has a form of Mediterranean climate with mild, moist winters and hot, dry summers, but the northern coastal region has a moist, equable climate, with rainfall well distributed throughout the year, mild winters and warm summers, and less sunshine than the rest of Spain. The south, in particular Andalusia, is dry and prone to drought.

### CONSTITUTION AND GOVERNMENT

Following the death of General Franco in 1975 and the transition to a democracy, the first democratic elections were held on 15 June 1977. A new constitution was approved by referendum on 6 Dec. 1978, and came into force 29 Dec. 1978. It has been amended twice since, in 1992 and 2011. It established a parliamentary monarchy.

The reigning king is **Juan Carlos I** (Juan Carlos de Borbón), born 5 Jan. 1938. The eldest son of Don Juan, Conde de Barcelona, Juan Carlos was given precedence over his father as pretender to the Spanish throne in an agreement in 1954 between Don Juan and General Franco. Don Juan, who resigned his claims to the throne in May 1977, died on 1 April 1993. King (then Prince) Juan Carlos married, in 1962, Princess Sophia of Greece, daughter of the late King Paul of the Hellenes and Queen Frederika. *Offspring*: Elena, born 20 Dec. 1963, married 18 March 1995 Jaime de Marichalar, divorced 25 Nov. 2009 (*offspring*: Felipe, b. 17 July 1998; Victoria, b. 9 Sept. 2000); Cristina, born 13 June 1965, married 4 Oct. 1997 Iñaki Urdangarín (*offspring*: Juan, b. 29 Sept. 1999; Pablo, b. 6 Dec. 2000; Miguel, b. 30 April 2002; Irene, b. 5 June 2005); Felipe, Prince of Asturias, heir to the throne, born 30 Jan. 1968, married 22 May 2004 Letizia Ortiz Rocasolano (*offspring*: Leonor, b. 8 Nov. 2005; Sofia, b. 29 April 2007).

The King receives an allowance, part of which is taxable, approved by parliament each year. For 2013 this is €7.9m. There is no formal court; the (private) *Diputación de la Grandeza* represents the interests of the aristocracy.

Legislative power is vested in the *Cortes Generales*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house). The *Congress of Deputies* has not less than 300 nor more than 400 members (350 in the general election of 2011) elected in a proportional system under which electors choose between party lists of candidates in multi-member constituencies.

The *Senate* has 264 members of whom 208 are elected by a majority system: the 47 mainland provinces elect four senators each, regardless of population; the larger islands (Gran Canaria,

Majorca and Tenerife) elect three senators and each of the smaller islands or groups of islands (Ibiza-Formentera, Minorca, Fuerteventura, Gomera, Hierro, Lanzarote and La Palma) elect one senator. To these each self-governing community appoints one senator, and an additional senator for every million inhabitants in their respective territories. Currently 56 senators are appointed by the self-governing communities. Deputies and senators are elected by universal secret suffrage for four-year terms. The Prime Minister is elected by the Congress of Deputies.

The *Constitutional Court* is empowered to solve conflicts between the State and the Autonomous Communities; to determine if legislation passed by the Cortes is contrary to the Constitution; and to protect the constitutional rights of individuals violated by any authority. Its 12 members are appointed by the monarch. It has a nine-year term, with a third of the membership being renewed every three years.

#### CURRENT LEADERS

##### Mariano Rajoy

##### Position

Prime Minister

##### Introduction

A veteran of the conservative Popular Party (PP), Mariano Rajoy became prime minister in 2011 during a period of economic crisis. He advocated sweeping economic reforms and has committed his government to accepting austere deficit reduction targets set by the European Union.

##### Early Life

Mariano Rajoy was born on 27 March 1955 in Santiago de Compostela, Galicia, into a political family. In 1978 he graduated in law from Santiago de Compostela University before working in the civil service as a property registrar from 1979–81. His political career began in 1981 when he won a seat in the newly inaugurated Galician parliament, representing the conservative People's Alliance (AP).

He served as regional minister of institutional relations from 1982–86 and as president of Pontevedra council from 1986–91. He was elected to Spain's national parliament in June 1986, serving briefly as a deputy before resigning to return to the Galician parliament in Nov. 1986, where he served as vice-president until Sept. 1987. In 1989 the AP merged with other parties to form the PP, with Rajoy appointed to its national executive committee.

He won re-election to parliament in 1993 and was minister of public administration in José María Aznar's government from 1996–99, before serving as minister of culture until 2000. After the PP retained power at the 2000 election, Rajoy was appointed deputy prime minister. From 2001–02 he served as minister of the interior and in 2004 fought the general election as party leader-designate. However, the PP unexpectedly lost to the Spanish Socialist Workers' Party (PSOE) in the aftermath of the train bombings in Madrid that the PP government had wrongly blamed on the Basque separatist group ETA.

Rajoy took over as party leader in Oct. 2004 and fought the 2008 election on a platform of liberal economic policies and social conservatism, including restrictions on immigration and opposition to further regional devolution. Although the DP gained seats, it narrowly failed to secure a majority.

As Spain struggled with recession and high unemployment, Rajoy adopted more moderate positions on social and cultural matters while calling for budget cuts. In the 2011 election campaign he committed his party to the ambitious deficit reduction targets set by the EU, balanced against promises to boost growth. In Nov. 2011 the PP won a decisive election victory, claiming 45% of the vote and 186 of 350 parliamentary seats.

### Career in Office

Rajoy took office on 21 Dec. 2011 and announced spending cuts of at least €16.5bn. for 2012, along with increases in income and property taxes and tax breaks for companies hiring staff. However, given the scale of Spain's public debt, further austerity was expected if deficit targets were to be achieved. While Rajoy's parliamentary majority allowed him to pass his reforms, maintaining public support proved a major challenge against a background of continuing recession and rising unemployment in 2012, which prompted strikes and mass protests. In June that year his administration had to seek approval from its eurozone partners to access emergency financial assistance in order to bail out Spain's ailing banking sector, while a number of heavily-indebted regional governments applied for rescue funds from the central government.

Rajoy also faced separatist pressure from Catalonia, although the majority vote for pro-independence parties in regional elections in Nov. 2012 proved disparate and the government said that it would not recognize a referendum vote for secession. Also in Nov., the government rejected an offer from the Basque separatist group ETA to enter talks with Spain and France on a definitive end to its operations, stating that it would not negotiate with a terrorist organization.

### DEFENCE

Conscription was abolished in 2001. The government had begun the phased abolition of conscription in 1996. In 2002 the armed forces became fully professional. However, a shortfall in recruitment in Spain meant that descendants of Spanish migrants, many of whom had never been to Europe, began to join. Since 1989 women have been accepted in all sections of the armed forces.

In 2008 defence expenditure totalled US\$19,196m. (US\$430 per capita). In 2007 defence spending represented 1.2% of GDP.

### Army

A Rapid Reaction Force is formed from the Spanish Legion and the airborne and air-portable brigades. There is also an Army Aviation Brigade consisting of 153 helicopters (28 attack).

Strength (2004) 95,600. There were 265,000 army reservists in 2004.

### Guardia Civil

The paramilitary *Guardia Civil* numbers 72,600.

### Navy

The principal ships of the Navy is the light vertical/short take-off and landing aircraft carrier *Juan Carlos I*, commissioned in 2010. It carries AV-8B Harrier combat aircraft. There are also eight French-designed submarines and 16 frigates.

The Naval Air Service operates 17 combat aircraft and 37 armed helicopters. Personnel numbered 700 in 2004. There are 5,600 marines.

Main naval bases are at Ferrol, Rota, Cádiz, Cartagena, Palma de Mallorca, Mahón and Las Palmas de Gran Canaria (Canary Islands).

In 2004 personnel totalled 22,900 including the marines and naval air arm. There were 18,500 naval reservists in 2004.

### Air Force

The Air Force is organized as an independent service, dating from 1939. It is administered through four operational commands. These are geographically oriented following a reorganization in 1991 and comprise Central Air Command, Strait Air Command, Eastern Air Command and Air Command of the Canaries.

There were 177 combat aircraft in 2004 including 91 EF/A-18s, 23 F-5Bs and 52 Mirage F-1s.

Strength (2004) 22,750. There were 45,000 air force reservists in 2004.

### ECONOMY

Agriculture accounted for 3% of GDP in 2007, industry 30% and services 67%.

Spain's 'shadow' (black market) economy is estimated to constitute approximately 22% of the country's official GDP.

In 2011 Spain gave US\$4.2bn. in international aid, equivalent to 0.29% of GNI (compared to the UN target of 0.7%).

### Overview

The eurozone's fourth largest economy, Spain made significant economic strides in the 1980s when productivity growth was at its highest and performed strongly after the Europe-wide recession of the early 1990s. Structural reforms and sound macroeconomic policies encouraged growth and employment creation from the late 1990s. The annual budget deficit fell from 6%+ of GDP in the mid-1990s to near balance from 2001–07, while GDP growth was above 3% from 2003–07.

The services share of total GDP has grown at the expense of agriculture, forestry and fishing. Banking, retailing, telecommunications and tourism are the main components. Agriculture is concentrated on wine, olive oil, fruit and vegetables. Vehicle production for export is the leading manufacturing industry. Strong demand for tourist-related buildings, foreign demand for property and high levels of investment in infrastructure combined to make the construction sector, as a share of GDP, twice as large as in other big European economies.

After 15 years of strong growth, the global financial crisis burst the housing construction bubble, resulting in slower growth, cuts in household consumption and rising unemployment. At its height, construction accounted for 13% of Spanish employment but the collapse of the housing boom led to the loss of 900,000 jobs, largely among unskilled construction workers. The economy contracted by 3.7% in 2009 and the public finances recorded a deficit of over 11% of GDP. Unemployment stood at 22.9%. Real GDP further contracted in 2010 and 2012.

A large budget deficit and weak economic growth made Spain vulnerable to contagion from other highly-indebted European countries, prompting investor confidence to decline. In 2011 the cost of government borrowing soared. In July 2012 the yield on Spanish ten-year bonds climbed to a euro-era record of 7.75%, pushing Spain close to needing a full bailout. European lenders had already committed €100bn. to rescue Spain's banks. In July 2012 the president of the European Central Bank pledged to do whatever was necessary to save the euro, prompting ten-year bond yields to improve to 5.42% by Feb. 2013.

Government debt increased from 36.3% of GDP in 2007 to 89.6% in the first quarter of 2012. At the end of 2012 unemployment stood at 26.1%, the second highest rate in the EU (compared to an EU average of 10.7%). Youth unemployment stood at 55.6%, compared to an EU average of 23.4%. A large-scale labour reform package was introduced in Feb. 2012 and the implementation of financial reforms saw the contraction of the economy slow markedly between late 2012 and early 2013.

### Currency

On 1 Jan. 1999 the euro (EUR) became the legal currency in Spain at the irrevocable conversion rate of 166.386 pesetas to one euro. The euro, which consists of 100 cents, has been in circulation since 1 Jan. 2002. On the introduction of the euro there was a 'dual circulation' period before the peseta ceased to be legal tender on 28 Feb. 2002. Euro banknotes in circulation on 1 Jan. 2002 had a total value of €68.6bn.

Foreign exchange reserves were US\$12,657m. in Sept. 2009 (US\$52,490m. in 1998) and gold reserves 9.05m. troy oz. Inflation rates (based on OECD statistics):

|      |      |      |      |      |      |      |       |      |      |

| 3.6% | 3.1% | 3.1% | 3.4% | 3.6% | 2.8% | 4.1% | -0.2% | 2.0% | 3.1% |

Total money supply was €506,714m. in Aug. 2009.

## Budget

In 2008 central government revenues totalled €272,978m. and expenditures €287,783m. Principal sources of revenue in 2008: social security contributions, €130,546m.; taxes on income, profits and capital gains, €76,877m.; taxes on goods and services, €39,501m. Main items of expenditure by economic type in 2008: social benefits, €133,819m.; grants, €81,065m.; compensation of employees, €25,764m.

Spain's budget deficit in 2011 was 8.5% of GDP (2010, 9.3%; 2009, 11.2%). The required target set by the EU is a budget deficit of no more than 3%.

VAT is 21% (since 1 Sept. 2012), with a rate of 10% on certain services (catering and hospitality) and 4% on basic foodstuffs.

## Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010  | 2011 |
|------|------|------|------|------|------|------|-------|-------|------|
| 2.7% | 3.1% | 3.3% | 3.6% | 4.1% | 3.5% | 0.9% | -3.7% | -0.3% | 0.4% |

The provisional real GDP growth rate in 2012 according to Spain's National Statistics Institute was -1.4%. Total GDP (2011): US\$1,476.9bn.

## Banking and Finance

The central bank is the Bank of Spain (*Governor*, Luis María Linde) which gained autonomy under an ordinance of 1994. Its Governor is appointed for a six-year term. The Banking Corporation of Spain, *Argentaria*, groups together the shares of all state-owned banks, and competes in the financial market with private banks. In 1993 the government sold 49.9% of the capital of Argentaria; the remainder in two flotations ending on 13 Feb. 1998.

Spanish banking is dominated by two main banks—Santander and BBVA (Banco Bilbao Vizcaya Argentaria). Santander had assets of €1,110.5bn. in Dec. 2009 and BBVA assets of €535.1bn.

Gross external debt amounted to US\$2,264,614m. in June 2012.

There are stock exchanges in Madrid, Barcelona, Bilbao and Valencia.

## ENERGY AND NATURAL RESOURCES

In 2008, 10.7% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. A target of 20% has been set by the EU for 2020.

## Environment

In 2008 Spain's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 8.9 tonnes per capita.

## Electricity

Installed capacity was 88.9m. kW in 2007. The total electricity output in 2007 amounted to 303.3bn. kWh, of which 62.4% was thermal, 18.2% nuclear, 10.2% hydro-electric and 9.2% geothermal. In 2010 there were eight nuclear reactors in operation. Consumption per capita in 2007 was 6,631 kWh.

## Oil and Gas

Spain is heavily dependent on imported oil; Mexico is its largest supplier. Crude oil production (2007), 142,000 tonnes.

The government sold its remaining stake in the oil, gas and chemicals group Repsol in 1997. Natural gas production (2007) totalled 98m. cu. metres. Ever increasing consumption means that Spain has to import large quantities of natural gas, primarily from Algeria.

## Wind

Spain is one of the world's largest wind-power producers, with an installed capacity of 20,676 MW in 2010 (the fourth highest after

China, the USA and Germany). Production of wind-generated electricity in 2010 totalled 42.7bn. kWh, a figure exceeded only by the USA.

## Minerals

Coal production (2007), 7.87m. tonnes; other principal minerals (in 1,000 tonnes): limestone (2008 estimate), 270,000; dolomite (2008 estimate), 15,000; gypsum and anhydrite (2008 estimate), 15,000; marl (2008 estimate), 10,000; lignite (2007), 9,309; salt (2008), 4,141; feldspar (2008), 690; potash (2008), 435; aluminium (2008), 408; fluorspar (2008), 149; nickel (2008), 8. Gold production, 2008, 3,400 kg; silver production, 2008, 3,400 kg.

## Agriculture

There were 1,287,000 farms in Spain in 2000. Agriculture employed about 5.9% of the workforce in 2002. It accounts for 15.8% of exports and 15.6% of imports.

There were 13.74m. ha. of arable land in 2002 and 4.98m. ha. of permanent crops. In 2002 there were 914,000 tractors, 52,000 harvester-threshers and 130,000 milking machines in use.

Spain is ranked third among wine producers (behind France and Italy). Production of wine (2006), 38,137,000 hectolitres (13.5% of the world total); of grapes (2003), 6,480,000 tonnes.

The area planted with tomatoes in 2002 was 60,000 ha., yielding 3,878,000 tonnes; with onions, 23,000 ha., yielding 992,000 tonnes; peppers, 23,000 ha., yielding 980,000 tonnes.

Fruit production (2002, in tonnes): oranges, 2,867,000; tangerines, 1,952,000; peaches, 1,247,000; lemons, 920,000; apples, 653,000; pears, 603,000.

Production of olives, 2001-02, 6,983,000 tonnes; olive oil, 1,422,000 tonnes. Spain is the world's leading producer both of olives and olive oil.

Livestock (2003): cattle, 6.48m.; sheep, 23.81m.; goats, 3.05m.; pigs, 23.52m.; chickens, 128.0m.; asses and mules, 0.26m.; horses, 0.24m. Livestock products (2003, in 1,000 tonnes): pork, bacon and ham, 3,322; beef and veal, 700; mutton and lamb, 237; poultry meat, 1,042; milk, 6,917; cheese, 198; eggs, 686.

## Forestry

In 2010 the area under forests was 18.17m. ha., or 36% of the total land area. In 2007 timber production was 14.53m. cu. metres.

## Fisheries

Spain is one of the leading fishing nations in the EU; it is also the EU's leading importer of fishery commodities. Fishing vessels had a total tonnage of 461,071 GT in 2008, the highest in the EU and representing a quarter of the total tonnage; fleets have been gradually reduced from 18,385 boats in 1995 to 11,420 in 2008. Total catch in 2010 amounted to 968,662 tonnes (the highest since 2001), almost exclusively sea fish. Imports of fishery commodities were valued at US\$7,101m. in 2008 and exports at US\$3,465m.

## INDUSTRY

The leading companies by market capitalization in Spain in March 2012 were: Telefónica SA (US\$74.7bn.); Banco Santander (US\$69.7bn.); and Inditex, a fashion distributor (US\$59.6bn.).

In 2007 industry accounted for 30% of GDP, with manufacturing contributing 15%.

Industrial products, 2007 unless otherwise indicated (in tonnes): cement (2008), 43.1m.; distillate fuel oil, 23.9m.; crude steel (2006), 18.4m.; residual fuel oil, 9.3m.; petrol, 9.2m.; paper and paperboard, 6.7m.; pig iron (2005), 4.2m.; jet fuel, 2.6m.; lime (2005), 1.8m.; nitrogenous fertilizers, 836,270; cigarettes, 41.91bn. units.

Output of other products, 2007: passenger cars, 2,385,210 units; TV receivers, 3.01m. units; washing and drying machines; 2.48m. units; fridge-freezers, 1.15m. units. In 2007, 6,765.6m. litres of mineral water, 5,888.0m. litres of soft drinks and 3,350.2m. litres of beer were produced.

### Labour

Out of 18,973,200 people in employment in 2005, 3,113,000 worked in manufacturing; 2,886,800 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods; 2,357,200 in construction; 1,678,400 in real estate, renting and business activities; 1,291,100 in hotels and restaurants; and 1,196,700 in public administration and defence/compulsory social security. The monthly minimum wage for adults was €624.00 in 2009. The average working week in 2003 was 35.4 hours. The retirement age was traditionally 65 years but in July 2011 the government agreed to raise the age to 67. The change is being phased in gradually starting on 1 Jan. 2013 in a process that is set to continue through to 2027. In 2004 part-time work accounted for less than 9% of all employment in Spain—the lowest percentage in Western Europe.

Spain's unemployment rate reached a peak of nearly 25% in 1994 but then fell steadily, declining to 8.3% in 2007. However, as a result of the global economic crisis Spain's unemployment rate rose by more than seven percentage points in the space of 12 months from March 2008. In the period Jan.–March 2009 an average of 8,600 jobs were lost every day. In Dec. 2012 the rate stood at 26.1%, giving Spain the second highest unemployment rate in the EU (just below that of Greece). Youth unemployment is particularly high, rising to 47.8% in the third quarter of 2011.

Between 2005 and 2009 strikes cost Spain an average of 60 days per 1,000 employees a year. There were 1,001 industrial disputes in 2009 involving 653,483 workers.

## INTERNATIONAL TRADE

### Imports and Exports

Trade in US\$1m.:

In 2004 chemicals, manufactured goods classified chiefly by material and miscellaneous manufactured articles accounted for 41.7% of imports and 43.4% of exports; machinery and transport equipment 37.7% of imports and 40.3% of exports; food, live animals, beverages and tobacco 8.4% of imports and 12.2% of exports; mineral fuels, lubricants and related materials 8.8% of imports and 1.1% of exports; inedible crude materials (except fuels), and animal and vegetable oil and fats 3.4% of imports and 3.0% of exports.

Leading import sources in 2004 were Germany (16.1%), France (15.2%), Italy (9.1%), United Kingdom (6.1%), Netherlands (4.1%); leading export markets in 2004 were: France (19.3%), Germany (11.7%), Portugal (9.4%), Italy (9.0%), United Kingdom (9.0%). In 2004 the EU accounted for 62.2% of Spain's imports and 70.0% of exports.

## COMMUNICATIONS

### Roads

In 2007 the total length of roads was 667,064; the network included 13,014 km of motorways, 12,832 km of highways/national roads and 140,165 km of secondary roads. In 2003 road

transport totalled 397,117m. passenger-km; freight transport totalled 132,868m. tonne-km in 2003. Number of passenger cars in use (2007), 21,760,200; lorries and vans, 5,140,600; buses and coaches, 61,000; motorcycles and mopeds, 2,311,300. In 2007, 3,823 persons were killed in road accidents (5,604 in 1997).

### Rail

The total length of the state railways in 2005 was 12,808 km, mostly broad (1,668-mm) gauge (6,942 km electrified). The state railway system was divided in two in 2005; Administrador de Infraestructuras Ferroviarias (ADIF) now manages the infrastructure and Renfe Operadora runs train operations. There is an ever-expanding high-speed standard-gauge (1,435-mm) network, totalling 2,665 km in 2010. Only China has a longer high-speed rail network. The first high-speed line, from Madrid to Seville, opened in 1992. It was extended northwards from Madrid initially to Lleida, with passenger services beginning in 2003, and further to Tarragona (2006) and Barcelona (2008). High-speed lines linking Madrid with Toledo and Valladolid were opened in 2005 and 2007 respectively, and linking Madrid with Albacete and Valencia in 2010. A high-speed link from Córdoba (on the Madrid to Seville line) to Málaga was also opened in 2007. Passenger-km travelled in 2005 came to 19.8bn. and freight tonne-km to 1.8bn. There are metros in Madrid (287 km), Valencia (152 km), Barcelona (105 km), Bilbao (38 km), Seville (18 km) and Palma de Mallorca (7 km).

In 2003 the construction of two 38 km-long rail tunnels under the Straits of Gibraltar was agreed with Morocco although there are ongoing talks as to the project's feasibility.

### Civil Aviation

There are international airports at Madrid (Barajas), Barcelona (Prat del Llobregat), Alicante, Almería, Bilbao, Girona, Las Palmas de Gran Canaria, Ibiza, Lanzarote, Málaga, Palma de Mallorca, Santiago de Compostela, Seville, Tenerife (Los Rodeos and Reina Sofía), Valencia, Valladolid and Zaragoza. There are 43 airports open to civil traffic. A small airport in Seo de Urgel operates in Andorra. The former national carrier Iberia Airlines completed its privatization process in April 2001, when shares were listed for the first time on the stock exchange. In April 2010 it signed a deal with British Airways to merge and create a new company called International Airlines Group, which was founded in Jan. 2011. However, both carriers still operate under their own brands. Of other airlines, the largest are the low-cost carrier Vueling Airlines and Air Europa. Services are also provided by about 70 foreign airlines. In 2005 Iberia carried 27.4m. passengers (12.0m. on international flights); passenger-km totalled 49.0bn. Madrid was the busiest airport in 2001, handling 33,777,862 passengers (16,718,209 on domestic flights) and 294,692 tonnes of freight. Barcelona was the second busiest in 2001, with 20,545,680 (10,075,536 on domestic flights) and 76,966 tonnes of freight. Palma de Mallorca was the third busiest for passengers, with 19,122,832 (14,317,984 on international flights). Las Palmas was the third busiest for freight, with 40,615 tonnes in 2001.

### Shipping

In Jan. 2009 there were 184 ships of 300 GT or over registered, totalling 2.39m. GT. Of the 184 vessels registered, 63 were passenger ships, 49 general cargo ships, 29 oil tankers, 20 container ships, 11 liquid gas tankers, nine bulk carriers and three chemical tankers. The Spanish-controlled fleet comprised 259 vessels of 1,000 GT or over in Jan. 2009, of which 128 were under the Spanish flag and 131 under foreign flags. The leading ports are Algeciras-La Linea (74,845,000 tonnes of cargo in 2008), Barcelona, Bilbao, Cartagena, Las Palmas de Gran Canaria, Santa Cruz de Tenerife, Tarragona and Valencia.

### Telecommunications

In 2008 there were 20,200,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 49,678,000

(1,116.7 per 1,000 persons). The government disposed of its remaining 21% stake in Telefónica in Feb. 1997, bringing 1.4m. shareholders into the company's equity base. A second operator, Retevisión, accounts for 3% of the domestic market, which was wholly deregulated in 1998. The mobile phone business was deregulated in 1995; the leading mobile network operators are Movistar, Vodafone, Orange and Yoigo.

There were 25.2m. internet users in 2008. The fixed broadband penetration rate stood at 23.4 subscribers per 100 inhabitants in Dec. 2010. In March 2012 there were 15.7m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

Justice is administered by Tribunals and Courts, which jointly form the Judicial Power. Judges and magistrates cannot be removed, suspended or transferred except as set forth by law. The constitution of 1978 established the *General Council of the Judicial Power*, consisting of a President and 20 magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the state's legislative and executive organs. Its members are appointed by the *Cortes Generales*. Its President is that of the Supreme Court (*Tribunal Supremo*), who is appointed by the monarch on the proposal of the General Council of the Judicial.

The Judicature is composed of the Supreme Court; 17 Higher Courts of Justice, one for each autonomous community; 52 Provincial High Courts; Courts of First Instance; Courts of Judicial Proceedings, not passing sentences; and Penal Courts, passing sentences.

The Supreme Court consists of a President, and various judges distributed among seven chambers: one for civil matters, three for administrative purposes, one for criminal trials, one for social matters and one for military cases. The Supreme Court has disciplinary faculties; is court of appeal in all criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State; and in social matters makes final decisions.

A new penal code came into force in May 1996, replacing the code of 1848. It provides for a maximum of 30 years imprisonment in specified exceptional cases, with a normal maximum of 20 years. Sanctions with a rehabilitative intent include fines adjusted to means, community service and weekend imprisonment. The death penalty was abolished by the 1978 constitution. The prison population in Nov. 2008 was 73,687 (160 per 100,000 of national population). In 2007, 2,310,000 crimes were recorded by the police (2,267,000 in 2006). A jury system commenced operating in Nov. 1995 in criminal cases (first trials in May 1996). Juries consist of nine members.

A juvenile criminal law of 1995 lays emphasis on rehabilitation. It raised the age of responsibility from 12 to 14 years. Criminal conduct on the part of children under 14 is a matter for legal protection and custody. 14- and 15-year-olds are classified as 'minors'; 16- and 17-year-olds as 'young persons'; and the legal majority for criminal offences is set at 18 years. Persons up to the age of 21 may, at the courts' discretion, be dealt with as juveniles.

The *Audiencia Nacional* deals with terrorism, monetary offences and drug-trafficking where more than one province is involved. Its president is appointed by the General Council of the Judicial Power.

There is an Ombudsman (*Defensor del Pueblo*), who is elected for a five-year term (currently Soledad Becerril; b. 1944).

### Education

In 1991 the General Regulation of the Educational System Act came into force. This Act gradually extends the school-leaving age to 16 years and determines the following levels of education: infants (3–5 years of age), primary (6–11), secondary (12–15) and baccalaureate or vocational and technical (16–17). Primary and

secondary levels of education are now compulsory and free. Religious instruction is optional.

In Sept. 1997 a joint declaration with trade unions, parents' and schools' associations was signed in support of a new finance law guaranteeing that spending on education will reach 6% of GDP within five years, thus protecting it from changes in the political sphere. In 2006 public expenditure on education came to 4.4% of GNI and 11.1% of total government spending.

A new compulsory secondary education programme has replaced the Basic General Education programme which was in force since 1970. In addition, university entrance exams underwent reform in 1997, resulting in greater emphasis now being placed on the teaching of Humanities at secondary level.

In 2004–05 pre-primary education (under six years) was undertaken by 1,419,000 pupils; primary or basic education (6–14 years): 2,495,000 pupils. In 2008–09 there were 153,000 teaching staff in pre-primary and 213,000 teachers in primary schools. Secondary education (14–17 years), including high schools and technical schools, was conducted at 6,276 schools, with 3,054,000 pupils and 167,000 teachers in 2004–05.

In 2011 there were 76 universities: 50 public state universities and 26 private universities (including Catholic establishments). In 2004–05 there were 1,331,000 students at state universities; 132,000 at private universities.

The adult literacy rate is at least 99%.

### Health

In 2009 there were 219,031 doctors, 63,337 pharmacists, 26,725 dentists and stomatologists, and 255,445 graduate nurses. Number of hospitals (2009), 770, with 146,310 beds. In 2008 Spain spent 9.0% of its GDP on health, with public spending accounting for 72.5% of total expenditure on health and private spending 27.5%.

### Welfare

The social security budget was €82,425,871,000 in 2004, including €66.1bn. for pensions, €5.3bn. for temporary incapacity, €1.4bn. for health and €620m. for social services. The minimum pension in 2001 was the equivalent of just over €5,000 per year, made in 14 payments.

In 2003 the system of contributions to the social security and employment scheme was: for pensions, sickness, invalidity, maternity and children, a contribution of 28.3% of the basic wage (23.6% paid by the employer, 4.7% by the employee); for unemployment benefit, a contribution of 7.55% (6.0% paid by the employer, 1.55% by the employee). There are also minor contributions for a Fund of Guaranteed Salaries, working accidents and professional sicknesses, and for vocational training.

### RELIGION

There is no official religion. Roman Catholicism is the religion of the majority. In Feb. 2013 there were ten cardinals. There are 11 metropolitan sees and 52 suffragan sees, the chief being Toledo, where the Primate resides. The archdioceses of Madrid-Alcalá and Barcelona depend directly from the Vatican. There are about 0.25m. other Christians, including several Protestant denominations, about 60,000 Jehovah's Witnesses and 29,000 Latter-day Saints (Mormons), and 0.45m. Muslims, including Spanish Muslims in Ceuta and Melilla. The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of people of Judaist faith is estimated at about 15,000.

### CULTURE

#### World Heritage Sites

There are 44 UNESCO sites in Spain: the works of Antoni Gaudí in and around Barcelona (inscribed in 1984 and 2005), Burgos Cathedral (1984), Historic Centre of Córdoba (1984 and 1994), Alhambra, Generalife and Albayzín, Granada (1984 and 1994), Monastery and site of the Escorial, Madrid (1984), Altamira Cave

(1985 and 2008), Old Town of Segovia and its Aqueduct (1985), Monuments of Oviedo and the Kingdom of the Asturias (1985 and 1998), Santiago de Compostela (Old Town) (1985), Old Town of Ávila, with its Extra-Muros churches (1985 and 2007), Mudéjar Architecture of Aragón (1986 and 2001), Historic City of Toledo (1986), Garajonay National Park (1986), Old Town of Cáceres (1986), Cathedral, Alcazar and Archivo de Indias in Seville (1987), Old City of Salamanca (1988), Poblet Monastery (1991), Archaeological Ensemble of Mérida (1993), Royal Monastery of Santa María de Guadalupe (1993), Route of Santiago de Compostela (1993), Doñana National Park (1994 and 2005), Historic Walled Town of Cuenca (1996), La Lonja de la Seda de Valencia (1996), Las Médulas (1997), the Palau de la Música Catalana and the Hospital de Sant Pau, Barcelona (1997 and 2008), San Millán Yuso and Suso Monasteries (1997), University and Historic Precinct of Alcalá de Henares (1998), Rock-Art of the Mediterranean Basin on the Iberian Peninsula (1998), Ibiza, Biodiversity and Culture (1999), San Cristóbal de La Laguna (1999), the Archaeological Ensemble of Tàrraco (2000), the Palmaral of Elche (2000), the Roman Walls of Lugo (2000), Catalan Romanesque Churches of the Vall de Boí (2000), Archaeological Site of Atapuerca (2000), Aranjuez Cultural Landscape (2001), Renaissance monumental ensembles of Úbeda and Baeza (2003), Vizcaya Bridge (2006), Teide National Park, Tenerife (2007), the Tower of Hercules, La Coruña (2009) and the Cultural Landscape of the Serra de Tramuntana (2011).

Spain shares the Pyrénées—Mount Perdu (1997 and 1999) with France, the Prehistoric Rock Art Sites in the Côa Valley and Siega Verde (1998) with Portugal and Heritage of Mercury: Almadén and Idrija (2012) with Slovenia.

#### Press

In 2008 there were 161 daily newspapers (140 paid-for and 21 free) with a total daily circulation of 8.21m. copies. The main paid-for titles are: *El País* (average daily circulation 435,000), *El Mundo* (336,000) and *As* (234,000), along with the dedicated sports paper, *Marca* (315,000). The leading free papers, notably *20 Minutos*, *Que!* and *ADN*, now have wider circulations than the paid-for dailies.

In 2009, 96,955 printed books were published.

#### Tourism

In 2010 Spain was behind only France, the USA and China in the number of foreign visitor arrivals, and behind only the USA for tourism receipts. In 2010, 52.7m. tourists visited Spain; receipts for 2010 amounted to US\$52.5bn. In 2008 most tourists were from the UK (27.6%), followed by Germany (17.6%), France (14.2%), Italy (5.9%) and the Netherlands (4.3%). Of 268,552,000 overnight stays at hotels and inns in 2008, 49,633,000 were in the Balearics, 49,400,000 in the Canary Islands and 44,172,000 in Andalusia; overnight stays by visitors from abroad numbered 155,364,000 and by residents of Spain 113,118,000.

#### Festivals

Religious Festivals: Epiphany (6 Jan.), the Feast of the Assumption (15 Aug.), All Saints Day (1 Nov.) and Immaculate Conception (8 Dec.) are all public holidays. Cultural Festivals: Day of Andalusia (28 Feb.), the Feast of San José in Valencia (19 March) is the

culmination of a 13-day festival; the Festival of the Sardine in Murcia is an end of Easter parade in which a huge papier mâché sardine is burned; Feria de Abril is a major festival in Seville at the end of April featuring flamenco dancing and bull-fighting; the San Fermín Festival, which takes place in mid-July, is most famous for the running of the bulls in the streets of Pamplona; La Tomatina, a battle of revellers armed with 50 tonnes of tomatoes, takes place on the last Wednesday in Aug. and is the highlight of the annual fiesta in Buñol, Valencia; National Day of Catalonia (11 Sept.); Spanish National Day (12 Oct.). The largest rock and pop music festivals are Festival Arte-Nativo Viña Rock in Villarrobledo (April), Primavera Sound (May) in Barcelona, Bilbao Live Festival (July) and Benicàssim International Festival (July).

## KEY HISTORICAL EVENTS

Archaeological evidence suggests Sri Lanka has been inhabited since at least the Mesolithic era 34,000 years ago, possibly by ancestors of the Vedda people, small numbers of whom live in the central highlands. The island's recorded history begins in 483 BC, when, according to the Sinhalese chronicle *Mahavamsa*, several hundred men led by Vijaya, a prince from Bengal, reached the island. Anuradhapura was founded in 377 BC, becoming the principal settlement. Introduced in 250 BC by the Indian Emperor, Ashoka, Buddhism was gradually adopted, becoming central to the developing Sinhalese culture even while its influence in India declined. Elaborate irrigation systems enabled rice cultivation and brought prosperity to the northern plain around Anuradhapura, which became a target for south Indian raiders. South Indian Chola kings controlled Anuradhapura in the second century BC until King Dutugemunu wrested control in 161 BC.

Invasions from south India continued while, at times, Sri Lankan kings seized control of parts of southern India. A spate of attacks in the 8th century AD prompted King Aggabodhi IV to move Sri Lanka's seat of government to Polonnaruwa. A Chola army under Rajarja I destroyed Anuradhapura in 993, although Sinhalese control was re-established in 1070. Trade with southeast Asia flourished in the 12th century under Parakramabahu I and Sinhalese civilization reached its height under Nissanka Mala

(1187–96), the last Polonnaruwa king to rule the whole island. During the 13th century a Tamil kingdom was established in the northeast, centred on Jaffna. The seat of Sinhalese power gradually shifted to the southwest, where coastal provinces thrived on the spice trade with Arab merchants. King Alagakkonara established a fort at Kotte in 1369.

The arrival of Portuguese mariners in 1505 heralded a new era of European influence, initially centred on Kotte and the southwest. Many coastal provinces, including Jaffna, came under Portuguese rule from 1600, with missionaries promoting Roman Catholicism. A military expedition failed to take the province of Kandy in 1594 but Portuguese naval forces seized the Kandyan ports of Trincomalee and Batticaola in the 1620s. Dutch seafarers established a presence from the 1590s, gradually taking over Portuguese-run forts and controlling Sri Lanka's maritime regions from 1658. The trade in cinnamon was particularly lucrative. In 1670 the Dutch East India Company (VOC) declared a monopoly over exports including elephants and pearls and imports such as cotton. This prompted Kandyan attacks until a truce was signed with King Rajasingha II in 1775.

As Dutch power in Asia waned, its possessions came under attack from British and French forces. In 1796 Colombo, Trincomalee, Jaffna and Kalpitya surrendered to British rule, with control initially routed through Madras in India. In 1802 a separate colony (Ceylon) under the British Crown was constituted but an attempt to capture Kandy in 1803 failed. The Kandyan Convention of 1815 annexed Kandy to British Ceylon while recognizing most of the traditional rights of the chiefs. Disillusionment culminated in a Kandyan rebellion in 1818 that was harshly suppressed and the rights established by the Convention abolished.

Ceylon was then unified under a single administration for the first time in 400 years. Becoming aware of the island's economic potential, the British established plantations, initially based on coffee until an outbreak of *Hoemilia vastatrix* fungus in 1870 destroyed much of the crop. Large-scale cultivation of spices, cocoa and rice followed but tea and rubber became the main cash crops from the 1880s. When Kandyans refused plantation work, thousands of indentured labourers were brought in from south India.

As in other British colonies, the education system created an English-speaking elite. Ethnic and caste rivalries continued, notably between Kandyan villagers who were denied the welfare benefits given to Indian Tamil labourers on the plantations. Tensions between Sinhalese and Muslim merchants spilled into violent riots in 1915. A movement for self-government gained ground after the First World War through the Ceylon National Congress, in which Sinhalese and Ceylon Tamil groups peacefully negotiated with the British authorities.

Internal self-government under a directly elected State Council was granted in 1931. Ceylon's economy was hit hard in the 1930s, prompting demands for full independence. This followed on 4 Feb. 1948 with dominion status in the British Commonwealth. D. S. Senanayake, leader of the United National Party (UNP), became the first prime minister.

In 1956 Solomon Bandaranaike became prime minister at the head of the People's United Front, advocating neutrality and the promotion of Sinhalese national culture at home. Tamil demands for official recognition of their language and a separate state under a federal system caused riots in 1958, with considerable loss of life. Bandaranaike was assassinated in Sept. 1959. His widow, Sirimavo Bandaranaike, succeeded him the following year at the head of an increasingly left-wing government. In May 1972 Ceylon became a republic and adopted the name Sri Lanka. In

July 1977 the UNP (dominant until 1956) returned to power and in 1978 a new constitution set up a presidential system. The problem of communal unrest remained unresolved and Tamil separatists were active. In 1983 Tamil United Liberation Front members of parliament were asked to renounce their objective for a separate Tamil state in the north and the east of the country. They refused and withdrew from parliament. Militant Tamils then began armed action that developed into civil war.

A state of emergency ended on 11 Jan. 1989 but violence continued. President Ranasinghe Premadasa was assassinated on 1 May 1993. A ceasefire was signed on 3 Jan. 1995 but fighting broke out again in April. The Tamil stronghold of Jaffna in the far north of the country was captured by government forces in Dec. 1995 and by mid-1997 was under government control. In April 2000 the Tamil Tigers captured a military garrison at Elephant Pass, the isthmus that links Jaffna to the rest of Sri Lanka, threatening a recapture of the Jaffna peninsula. A month-long ceasefire in Dec. 2001 led to peace negotiations. On 22 Feb. 2002 the government and Tamil Tiger leaders agreed to an internationally-monitored ceasefire, paving the way to the first full-scale peace talks for seven years. An estimated 61,000 people had died during the previous 19 years of conflict. In late 2002 the Tamil Tigers abandoned their ambitions for a separate state, settling instead for regional autonomy.

On 26 Dec. 2004 Sri Lanka, along with a number of other south Asian countries, was hit by a devastating tsunami. The death toll in Sri Lanka was put at 35,000.

A series of incidents in early 2006 brought the country back to the brink of civil war. Fighting intensified throughout the year, with the government claiming success in the east of the country. After failed peace talks in Geneva in Oct. 2006, the government withdrew from the 2002 ceasefire agreement in Jan. 2008.

In early 2009 Sri Lankan military forces launched a major offensive on the Tamil Tigers, during which the Tigers' leader, Velupillai Prabhakaran, was killed. On 19 May 2009 President Mahinda Rajapaksa formally declared an end to the civil war, stating the country had been liberated from terrorism. The UN estimated that around 7,000 Tamil civilians were killed in the 2009 military action while some 135,000 displaced people remained in camps in northern Sri Lanka in late 2009.

After a period of relative stability, in Aug. 2011 the government lifted a state of emergency in place since the assassination of the foreign minister, Lakshman Kadirgamar, in Aug. 2005.

## TERRITORY AND POPULATION

Sri Lanka is an island in the Indian Ocean, south of the Indian peninsula from which it is separated by the Palk Strait. On 28 June 1974 the frontier between India and Sri Lanka in the Palk Strait was redefined, giving to Sri Lanka the island of Kachchativu.

Of the population of 20,263,723 in 2012, 10,431,322 were females. Density, 309 per sq. km. In 2011, 14.3% of the population lived in urban areas.

The UN gives a projected population for 2015 of 21.71m.

Between the mid-1980s and the mid-1990s approximately 0.3m. Tamils left the country, one-third as refugees to India and two-thirds to seek political asylum in the West.

Colombo (the largest city) had an estimated 673,000 inhabitants in 2007. Other major towns and their populations (2007 estimates) are: Dehiwela-Mt Lavinia, 220,000; Moratuwa, 186,000; Jaffna, 152,000; Negombo, 150,000; Sri Jayawardenapura Kotte (now the administrative and legislative capital), 121,000; Kandy, 121,000; Kalmunai, 106,000; Galle, 95,000.

Sinhala and Tamil are the official languages; English is in use.

## SOCIAL STATISTICS

Statistics for 2008: births, 373,575; deaths, 123,814. 2008 rates per 1,000 population: birth, 18.5; death, 6.1; infant mortality rate, 2010 (per 1,000 live births), 14. Life expectancy, 2007, 77.9 years for females and 70.3 for males. Annual population growth rate, 2000-05, 0.3%. Fertility rate, 2008, 2.3 births per woman. Sri Lanka has the third oldest population in Asia, after Japan and Singapore, thanks largely to relatively good health and a low fertility rate.

## CLIMATE

Sri Lanka, which has an equatorial climate, is affected by the North-east Monsoon (Dec. to Feb.), the South-west Monsoon (May to July) and two inter-monsoons (March to April and Aug. to Nov.). Rainfall is heaviest in the southwest highlands while the northwest and southeast are relatively dry. Colombo, Jan. 79.9°F (26.6°C), July 81.7°F (27.6°C). Annual rainfall 95.4" (2,424 mm). Trincomalee, Jan. 78.8°F (26°C), July 86.2°F (30.1°C). Annual rainfall 62.2" (1,580 mm). Kandy, Jan. 73.9°F (23.3°C), July 76.1°F (24.5°C). Annual rainfall 72.4" (1,840 mm). Nuwara Eliya, Jan. 58.5°F (14.7°C), July 60.3°F (15.7°C). Annual rainfall 75" (1,905 mm).

On 26 Dec. 2004 an undersea earthquake centred off the Indonesian island of Sumatra caused a huge tsunami that flooded large areas along the southern and eastern coasts of Sri Lanka resulting in 35,000 deaths. In total there were more than 225,000 deaths in 14 countries.

## CONSTITUTION AND GOVERNMENT

A new constitution for the Democratic Socialist Republic of Sri Lanka was promulgated on 7 Sept. 1978.

The executive *President* is directly elected for a six-year term. Under the terms of an amendment introduced in Sept. 2010, the previous bar on a president serving more than two terms was removed.

Parliament consists of one chamber, composed of 225 members (196 elected and 29 from the National List). Election is by proportional representation by universal suffrage at 18 years. The term of Parliament is six years. The Prime Minister and other Ministers, who must be members of Parliament, are appointed by the President.

### National Anthem

'Sri Lanka Matha, Apa Sri Lanka' ('Mother Sri Lanka, thee Sri Lanka'); words and tune by A. Samarakone. There is a Tamil version, 'Sri Lanka thaaya, nam Sri Lanka'; words anonymous.

### CURRENT LEADERS

#### Mahinda Rajapaksa

*Position*  
President

#### Introduction

Mahinda Rajapaksa succeeded Chandrika Kumaratunga as the executive president of Sri Lanka in Nov. 2005. A human rights lawyer and former prime minister, he rejected outright the demands of the Liberation Tigers of Tamil Eelam (LTTE) for an ethnic homeland and sought to crush the Tamil rebellion through military force. He achieved this objective by May 2009 and was re-elected president in Jan. 2010.

#### Early Life

Mahinda Rajapaksa was born on 18 Nov. 1945 in Weeraketiya in the southern district of Hambantota. He was educated at Richmond College, Galle, followed by Nalanda and Thurston

Colleges in Colombo. While studying law at Vidyodaya University he joined the centre-left Sri Lanka Freedom Party (SLFP) and in 1970 was elected as the party's parliamentary representative for Beliatta, Hambantota (a seat held by his father for the SLFP from 1948–65). Having graduated in 1974, Rajapaksa practised as a lawyer specializing in labour law and human rights and received plaudits for his work on behalf of the underprivileged.

Rajapaksa lost his parliamentary seat in the landslide defeat of the SLFP to the United National Party (UNP) in the general election of 1977. The UNP administration liberalized the economy and reduced unemployment but was unable to stem violence. The parliamentary elections in Feb. 1989 (in which Rajapaksa regained his seat) were preceded by terror campaigns by both the LTTE and the banned People's Liberation Front (JVP) in the south. Rajapaksa joined Mangala Samaraweera's 'Mother's Front', a group representing the mothers of those who 'disappeared' in the violence of 1988–89. He served on the central committee of the SLFP from the early 1990s and became an increasingly vocal critic of President Ranasinghe Premadasa's UNP government.

Following narrow victory for the SLFP (as part of the People's Alliance coalition) in the parliamentary elections of 1994, Rajapaksa was appointed minister for labour by President Chandrika Kumaratunga. His attempts to reform labour laws and introduce a workers' charter met with resistance. He was moved to the fisheries ministry, establishing a coast guard service and a university of oceanography. Following defeat for the People's Alliance in elections in Dec. 2001, Rajapaksa became leader of the parliamentary opposition. He forged alliances including, controversially, with the Sinhala-nationalist JVP to form the United People's Freedom Alliance (UPFA). The Alliance won the parliamentary elections that followed Kumaratunga's sacking of the UNP government in Feb. 2004. Kumaratunga then appointed Rajapaksa as prime minister and he was sworn in on 6 April 2004.

#### *Career in Office*

Without a commanding parliamentary majority, Rajapaksa's UPFA government struggled to implement its promises to halt privatization, increase wages and create new jobs. It was also criticized for its handling of the aftermath of the Indian Ocean tsunami in Dec. 2004, which killed 31,000 Sri Lankans and displaced nearly half a million.

Rajapaksa was chosen as the SLFP's presidential candidate for the election of Nov. 2005 and narrowly defeated the UNP's Ranil Wickremesinghe. He vowed a tougher approach to dealings with the LTTE, arguing that the 2002 ceasefire agreement had not brought peace, and appointed Ratnasiri Wickremarajapaksa as prime minister. The security situation deteriorated seriously in 2006, and Rajapaksa reiterated his determination to defeat rebel violence as he revived draconian anti-terrorism legislation that had been suspended in 2002. Further escalation in 2007 of LTTE attacks and retaliatory offensives by state forces on LTTE positions in the north and east culminated in the government's formal abrogation of the 2002 ceasefire in Jan. 2008.

Rajapaksa intensified the military campaign against strategic LTTE positions through 2008, making significant territorial advances. In Jan. 2009 government troops captured Kilinochchi, the rebels' administrative headquarters, and also Elephant Pass linking the Jaffna peninsula with the mainland. Despite international concern over the safety of Tamil civilians trapped in the remaining LTTE-controlled enclave, government forces maintained their offensive (reportedly entering the last rebel-held town in Feb.) until Rajapaksa delivered a victory speech to parliament in May.

Meanwhile, the global financial crisis had a significant negative impact on the economy and in July 2009 the IMF approved a stand-by arrangement equivalent to US\$2.6bn. to support recovery and help rebuild after the civil war.

A bitter breakdown in the relationship between Rajapaksa and his army chief Sarath Fonseka led the latter to resign and challenge the president in the elections in Jan. 2010. Capitalizing

on his post-war popularity among the Sinhalese majority population, Rajapaksa was re-elected with almost 58% of the vote. The result was contested by Fonseka, but he was subsequently court-martialled, jailed and politically sidelined following his release in May 2012. In Sept. 2010 parliament endorsed a constitutional amendment allowing Rajapaksa to stand for an unlimited number of presidential terms.

In April 2011 Rajapaksa rejected as biased a United Nations report accusing both sides in the civil war of human rights abuses against civilians, although he did agree in Aug. to allow the expiry of long-standing and contentious state of emergency legislation. In March 2012 the UN Human Rights Council pressed the Sri Lankan government to investigate alleged serious violations committed during the final stages of the conflict.

#### **Dissanayake Mudiyanalage Jayaratne**

##### *Position*

Prime Minister

##### *Introduction*

On 21 April 2010 D. M. Jayaratne was sworn in as prime minister, a largely ceremonial position. He also serves as minister for Buddha Sasana and religious affairs. One of the country's longest serving politicians, he has headed various government ministries and is the senior member of the Sri Lanka Freedom Party (SLFP).

##### *Early Life*

D. M. Jayaratne was born on 7 June 1931 in the Central Province hill town of Gampola. The fifth child of nine, he was schooled at Doluwa Maha Vidyalaya (Gampola), Zahira College (Kandy) and Mahatma Gandhi College (Kandy). In 1951 he became a teacher at Doluwa Maha Vidyalaya and from 1960–62 he was postmaster of Gampola.

By 1950 he was politically active, working in the grassroots community centre networks where he rose through the ranks, acting as secretary in the Kandy council and then chair of the island-wide network. In 1951 he joined the newly-formed SLFP and in the 1970 general election he was elected to parliament as the representative for Gampola. In 1977 the SLFP suffered a landslide defeat and Jayaratne lost his seat. In 1989 he was elected MP for Kandy and appointed minister for agriculture, food and co-operatives.

Jyaratne was re-elected in 2000 and was reappointed to the agriculture, food and co-operatives portfolio. In 2004 he became minister of post and telecommunication and in 2007 took over at the ministry of plantation industries. He also served as chairman of the Asia-Pacific region of the Food and Agriculture Organization in 2001.

##### *Career in Office*

In April 2010 Jayaratne was appointed premier by President Mahinda Rajapaksa, heading up a seven-party United Popular Front coalition. With a coalition majority in parliament and backed by the popular president, Jayaratne began his tenure in a strong position. While his role is largely ceremonial, he is responsible for leading government business in parliament.

One of his key challenges was to oversee proposed constitutional reform, particularly the lifting of long-standing emergency powers and anti-terrorism laws. These, alongside reported human rights abuses and weak labour laws, have adversely affected the country's international trading relations, particularly with the European Union.

#### **DEFENCE**

Defence expenditure in 2008 totalled US\$1,793m. (US\$85 per capita), representing 4.2% of GDP. In 2008 Sri Lanka increased its military expenditure in real terms by 7.7%, the highest rate in South Asia.

### Army

Strength (2007), 117,900 (including 39,900 recalled reservists). In addition there were 1,100 reserves. Paramilitary forces consist of the Ministry of Defence Police (61,600, including 1,000 women and a 3,000-strong anti-guerrilla force), the Home Guard (13,000) and the National Guard (some 15,000).

### Navy

The main naval base is at Trincomalee. Personnel in 2007 numbered 15,000, including a reserve of about 2,400.

### Air Force

Main Air Force bases are at Katunayake, Minneriya, Ratmalana, Vavuniya and China Bay, Trincomalee. Total strength (2007) 18,000 with 22 combat-capable aircraft and 13 attack helicopters. Main attack aircraft types included *Kfirs*, F-7s and MiG-27s.

## ECONOMY

Agriculture accounted for 11.3% of GDP in 2006, industry 30.6% and services 58.0%.

The conflict with the minority separatists, the Tamil Tigers, which lasted 26 years, is estimated to have cost the country between 1–1.5% in growth per year.

### Overview

Three decades of civil war disrupted inter-regional commerce, damaged infrastructure and weakened public finances. Nonetheless, the economy maintained growth, generating higher per capita income than neighbouring India.

In 2001 the economy contracted for the first time since independence as a result of the global slowdown, power shortages, and security and budgetary problems. With the start of the peace process in Feb. 2002, the government embarked on reforms to revive the economy, including exchange rate and trade liberalization, privatization and the introduction of VAT. In May 2009 the civil war ended, boosting economic prospects and providing renewed opportunity for reform.

The main sources of growth are domestic consumption, tourism and textile and garment exports. Tourism arrivals increased by 46.1% year-on-year in 2010. GDP growth averaged 6.5% from 2003–12 and the poverty rate has fallen, although the economy is strained by the costs of post-conflict relief and reconstruction. In July 2009 the IMF approved a US\$2.6bn. loan to help the economy weather the effects of the financial crisis and to rebuild war-torn regions. Economic activity picked up in 2010, with real GDP growth reaching 8%.

At the end of 2011 public debt stood at 78.5% of GDP. Inflation was 9.5% in Aug. 2012, with the IMF expecting the rate to further increase in the coming years. About 60% of Sri Lankan exports go to Europe and the USA, making the economy vulnerable should there be a slow decline in demand from these regions.

### Currency

The unit of currency is the *Sri Lankan rupee* (LKR) of 100 cents. Foreign exchange reserves were US\$2,236m. and gold reserves 167,000 troy oz in June 2005. Inflation fell from 22.6% in 2008 to 3.5% in 2009 but increased to 6.2% in 2010 and 6.7% in 2011. Total money supply in March 2005 was Rs 208,095m.

### Budget

Budgetary central government revenue and expenditure (in Rs 1bn.):

|             | 2006  | 2007  | 2008  |
|-------------|-------|-------|-------|
| Revenue     | 506.9 | 595.0 | 686.5 |
| Expenditure | 621.5 | 717.4 | 847.4 |

Principal sources of revenue in 2007 were: taxes on goods and services, Rs 286.2bn.; taxes on income, profits and capital gains, Rs 107.2bn.; taxes on international trade and transactions, Rs 84.4bn. Main items of expenditure by economic type in

2007 were: compensation of employees, Rs 214.2bn.; interest, Rs 182.7bn.; social benefits, Rs 110.8bn.

VAT is 12%.

### Performance

Real GDP growth was 3.5% in 2009, 7.8% in 2010 and 8.3% in 2011. Total GDP in 2011 was US\$59.2bn.

### Banking and Finance

The Central Bank of Sri Lanka is the bank of issue (*Governor*, Ajith Nivard Cabraal). There are 23 commercial banks with a total asset base of Rs 1,774bn. This includes two state-owned banks, the Bank of Ceylon and People's Bank, which account for about 40% of assets, and 12 foreign banks. There are 14 specialized banks including the National Savings Bank, which in total have an asset base of Rs 356bn. In the period 2005–10 Sri Lanka attracted US\$2,989m. in foreign direct investment, including a record US\$752m. in 2008.

Sri Lanka's foreign debt amounted to US\$20,452m. in 2010, up from US\$11,372m. in 2005 and US\$9,087m. in 2000. However, as a proportion of GNI it declined from 56.7% in 2000 to 47.2% in 2005 and further to 41.8% in 2010.

There is a stock exchange in Colombo. In 2009 it was the best-performing stock market in the world, recording a gain of 125.2% on 2008.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.6 tonnes per capita.

### Electricity

Installed capacity (2007), 2.4m. kW. Production, 2007, 9.8bn. kWh (40% hydro-electric). Consumption per capita in 2007 was 494 kWh.

### Oil and Gas

There are plans for a huge oil refinery as part of the Hambantota port development.

### Minerals

Gems are among the chief minerals mined and exported (particularly sapphires). Output of principal products: sapphires (2003), 773,547 carats; phosphate rock (2003), 41,357 tonnes; quartzite (2004), 18,139 tonnes; ilmenite (2004), 8,115 tonnes. Salt extraction is the oldest industry; the method is the solar evaporation of sea-water. Production, 2003, 78,713 tonnes.

### Agriculture

There were approximately 970,000 ha. of arable land and 950,000 ha. of permanent crops in 2007. In 2006, 32.2% of the economically active population were engaged in agriculture. Main crops in 2003 (in 1,000 tonnes): rice, 3,071; coconuts, 1,850; sugarcane, 956; bananas and plantains, 610; tea, 303; cassava, 228; pumpkins and squash, 170. Sri Lanka ranks third in the world for tea production, behind India and China.

Livestock in 2003: 1,139,000 cattle; 635,000 buffaloes; 490,000 goats; 10m. chickens.

### Forestry

The area under forests in 2010 was 1.86m. ha., or 29% of the land area. Of the total area under forests 9% was primary forest in 2010, 81% other naturally regenerated forest and 10% planted forest. In 2007, 6.13m. cu. metres of roundwood were cut.

### Fisheries

Total catch in 2010 was 436,355 tonnes (of which 383,945 tonnes were from marine waters and 52,410 tonnes from inland waters).

## INDUSTRY

The main industries are the processing of rubber, tea, coconuts and other agricultural commodities, tobacco, textiles, clothing and leather goods, chemicals, plastics, cement and petroleum refining. Industrial production rose by 8.1% in 2006.

### Labour

The labour force in 2003 totalled 7,653,716 (67% males). In 2003 the economically active workforce numbered 7,012,755, of which 2,384,397 worked in agriculture, forestry and fishing, 1,156,682 in manufacturing and 867,131 in wholesale and retail trade, repair of motor vehicles and household goods. In 2003 the unemployment rate was 8.4%.

## INTERNATIONAL TRADE

### Imports and Exports

Trade in US\$1m.:

|                | 2005  | 2006  | 2007   | 2008   | 2009  |
|----------------|-------|-------|--------|--------|-------|
| Imports c.i.f. | 8,307 | 9,773 | 11,386 | 13,629 | 9,432 |
| Exports f.o.b. | 6,160 | 6,760 | 7,661  | 8,177  | 7,122 |

Principal imports in 2009: petroleum and petroleum products, 18.5%; machinery and transport equipment, 16.6%; textile yarn, fabrics and finished articles, 15.2%; food and livestock, 14.2%. Principal exports in 2009: clothing and apparel, 45.9%; tea, 16.5%; diamonds and other precious and semi-precious stones, 5.1%; machinery and transport equipment, 4.3%;

In 2009 the leading import suppliers were India (18.0%), Singapore (11.7%), China (9.3%), Iran (9.0%) and Hong Kong (5.5%). The leading export markets in 2009 were the USA (22.3%), UK (14.4%), Italy (6.1%), Belgium (5.2%) and Germany (4.9%).

## COMMUNICATIONS

### Roads

In 2006 the road network totalled 91,907 km in length, including 11,716 km of national roads and 15,532 km of secondary roads. Number of motor vehicles, 2006, 2,269,575, comprising 338,608 passenger cars, 77,233 buses and coaches, 431,594 trucks and vans and 1,422,140 motorcycles and mopeds. There were 2,239 fatalities in road accidents in 2006.

### Rail

In 2007 there were 1,463 km of railway (1,676 mm gauge). Passenger-km travelled in 2007 came to 4.77bn. and freight tonne-km to 135m.

### Civil Aviation

There is an international airport at Colombo (Bandaranaike). The national carrier is SriLankan Airlines, which has been part-owned and managed by Emirates since 1998. Mihin Lanka, a low-cost airline fully owned and funded by the government, was launched in 2007. In 2006 SriLankan Airlines carried 2,900,068 passengers (all on international flights). Colombo handled 4,740,187 passengers and 169,038 tonnes of freight in 2006.

### Shipping

In Jan. 2009 there were 36 ships of 300 GT or over registered, totalling 143,000 GT. Colombo is a modern container port; Galle and Trincomalee are natural harbours. The first of three phases of a new port at Hambantota was inaugurated in Nov. 2010. On completion it is set to be Sri Lanka's largest port.

### Telecommunications

In 2008 there were 3,446,400 main (fixed) telephone lines; mobile phone subscribers numbered 11,082,500 in 2008 (55.2 per 100 persons). There were 1,163,500 internet users in 2008. In March 2012 there were 1.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The systems of law which are valid are Roman-Dutch, English, Tesawalamai, Islamic and Kandyan.

Kandyan law applies in matters relating to inheritance, matrimonial rights and donations; Tesawalamai law applies in Jaffna as above and in sales of land. Islamic law is applied to all Muslims in respect of succession, donations, marriage, divorce and maintenance. These customary and religious laws have been modified by local enactments.

The courts of original jurisdiction are the High Court, Provincial Courts, District Courts, Magistrates' Courts and Primary Courts. District Courts have unlimited civil jurisdiction. The Magistrates' Courts exercise criminal jurisdiction. The Primary Courts exercise civil jurisdiction in petty disputes and criminal jurisdiction in respect of certain offences.

The Constitution of 1978 provided for the establishment of two superior courts, the Supreme Court and the Court of Appeal.

The Supreme Court is the highest and final superior court of record and exercises jurisdiction in respect of constitutional matters, jurisdiction for the protection of fundamental rights, final appellate jurisdiction in election petitions and jurisdiction in respect of any breach of the privileges of Parliament. The Court of Appeal has appellate jurisdiction to correct all errors in fact or law committed by any court, tribunal or institution.

The population in penal institutions in July 2007 was 25,537 (121 per 100,000 of national population). The death penalty, last used in 1976, was reactivated in Nov. 2004 after a 28-year moratorium.

### Police

The strength of the police service in 2003 was 39,242.

### Education

Education is free and is compulsory from age five to 14 years. The literacy rate in 2008 was 91%. Sri Lanka's rate compares very favourably with the rates of 65% in India and 54% in Pakistan.

In 2008 there were 9,335 schools with primary classes and 69,499 primary teachers for 1,626,285 pupils. The number of pupils in secondary classes in 2008 was 1,897,350, with 98,582 teachers. There were 401,666 students and 21,715 teachers in advanced level classes in 2008. There are 16 universities, including the Open University (distance) and the Buddhist and Pali University. In 2008, excluding at the two aforementioned universities, there were 66,675 undergraduates enrolled.

### Health

In 2005 there were 609 hospitals and 413 central dispensaries. The hospitals had 60,237 beds. There were 9,290 physicians and 16,517 nurses in 2002; and 954 dentists, 907 pharmacists and 7,267 midwives in 2005. Total state budget expenditure on health, 2005, Rs 29,805m.

### Welfare

To qualify for an old-age pension an individual must be above the age of 55 for men or 50 for women. However, a grant is payable at any age if the person is emigrating permanently. Old-age benefits are made up of a lump sum equal to total employee and employer contributions, plus interest.

The family allowances programme is being implemented in stages. Families earning below Rs 1,000 a month are entitled to Rs 100-Rs 1,000 a month benefit, depending on family size and income.

## RELIGION

In 2012 the population was 70% Buddhist, 13% Hindu, 10% Muslim and 6% Roman Catholic. In Feb. 2013 there was one Roman Catholic cardinal.

**CULTURE****World Heritage Sites**

Sri Lanka has eight sites on the UNESCO World Heritage List: Sacred City of Anuradhapura (inscribed on the list in 1982); Ancient City of Polonnaruwa (1982); Ancient City of Sigiriya (1982); Sinharaja Forest Reserve (1988); Sacred City of Kandy (1988); Old Town of Galle and its Fortifications (1988); the Golden Temple of Dambulla (1991); and the Central Highlands (2010).

**Press**

In 2008 there were 18 paid-for daily newspapers with a combined circulation of 588,000. The papers with the highest circulation are *Lankadeepa* and *Divaina*, and the English-language *Daily News*.

**Tourism**

In 2010 there were a record 654,000 foreign tourists, bringing revenue of US\$1,044m. The previous best year for tourist arrivals was 2004, the year of the Asian tsunami.

**Festivals**

Sri Lanka has an array of festivals principally centred on the Buddhist, Hindu, Muslim and Christian cultures. These include: Buddhist full moon celebrations (Poya Day), with the main festivals occurring in Jan., May, June, July/Aug. and Dec.; Diwali (the Hindu Festival of Lights, held in Oct./Nov.); Milad-un-Nabi (Dec.); and Christmas. New Year is also widely celebrated by both the Sinhalese and Tamil ethnic groups.

## KEY HISTORICAL EVENTS

The earliest inhabitants of Sudan were Mesolithic hunter-gatherers, who lived and travelled in the region around Khartoum from as early as 30,000 BC. They had domesticated animals by 4000 BC. Cultural influences from Egypt rippled through to Nubia in north-eastern Sudan from around 3000 BC as Egypt's first dynasty moved south along the river Nile in search of construction materials and slaves. By 2000 BC it had reached as far south as the river Nile's fourth cataract, more than 700 km beyond Aswan. Egyptian-controlled Nubia was divided into Wawat in the north—centred on Aswan—and Kush in the south—based at Napata (modern Marawi). When Egypt's power waned in the 11th century BC (the end of the New Kingdom) Kush, with its Egyptian and African influences, mineral resources and its position on trade routes linking the Nile to the Red Sea, became a powerful kingdom. At its height, under King Piantkhi in 750 BC, the whole of Egypt was brought under Kushite control. However, the invasion of Egypt by Assyrian forces in 671 BC forced a retreat to Napata. From there, the kingdom of Kush continued to exert control over the middle Nile for much of the next millennium, developing a distinctive culture and language. By AD 200 Kush was in decline and was finally overthrown in 350 by the king of Aksum from the Ethiopian highlands.

Sudan was brought back into contact with the Mediterranean world in the 6th century by the arrival of Coptic Christian missionaries. They travelled south along the Nile and established churches in the three middle-Nile kingdoms that had superseded

Kush: Nobatia in the north and Maqurrah and 'Alwah in the south, near modern Khartoum. Egypt was invaded by Arabs in 639 and came under Muslim rule. Raiding parties moved up the Nile and absorbed Nobatia. The king of Maqurrah engineered a truce at Dunqulah with an Arab military expedition, commanded by 'Abd Allah ibn Sa'd, preserving the kingdom for a further six centuries.

In 1250 Egypt came under the control of Mamluk sultans, supported by a caste of warrior slaves. They pushed south into Nubia, bringing chaos and devastation to Maqurrah and opening it up to waves of Arab immigrants, particularly the Juhaynah people. They intermarried with the Nubians and introduced Arab Muslim culture. Alwah, to the south, retained its Christian traditions until 1500 when, weakened by Bedouin raids, it collapsed under an Arab confederation led by Abd Allah Jamma. The Arabs themselves came under attack in the region around modern Khartoum from warriors of the Funj dynasty, a kingdom that had its origins in the Blue Nile's upper reaches. The Funj established their supremacy in the Al Jazirah region by 1607 and expanded northwards under Badi II Abu Daqn later in the 17th century. It was a relatively peaceful and stable period and the teaching of Islam flourished in schools and mosques along the Nile. The Funj themselves adopted Islam but retained a number of traditional African customs and beliefs.

## *Egyptian Ascendancy*

In 1820 Muhammad Ali, viceroy of Egypt under the Ottoman Turks, sent an army southward to conquer Sudan. The Funj kingdom collapsed and within a year Ali's forces had taken control of the Nile valley from Nubia to the Ethiopian foothills. There was initial resistance but the appointment of Ali Kurshid Agha as governor general in 1826 led to the establishment of Khartoum as the administrative capital, improvements to agriculture and the development of the trade in slaves and ivory. Ismail Pasha became viceroy of Egypt in 1863 and announced a grand scheme to modernize and control the entire Nile river system from the Mediterranean to the Great Lakes of East Africa. Ismail needed the financial help of the European powers who, in return, demanded an end to the slave trade. The British had a particular interest in Egyptian affairs following the opening of the Suez Canal in 1869. Ismail commissioned the Englishmen Samuel Baker and, later, Charles Gordon to establish Egyptian control in southern Sudan and Central Africa and to crush slavery. The controllers of the slave trade were powerful and proved hard to defeat, especially away from the Nile. In addition, there was unease among Muslims over the crusading style of the English anti-slavers. In 1879, amid rising discontent, Ismail's financial backing collapsed and his grand project was abandoned. Ismail was exiled and Gordon resigned.

## *Rise of the Mahdi*

The power vacuum was filled by Muhammad Ahmad in 1881; he declared himself the Mahdi ('divinely guided one') and led a movement that sought an end to Egyptian (Ottoman) influence and a return to the simplicity of early Islam. By 1882 the Mahdi had garnered the support of a least 30,000 armed followers (the Ansar). They captured the town of Al Abayyid, which led to a British order for the evacuation of Egyptians and foreigners from Khartoum, where the military commander was Charles Gordon. The campaign failed disastrously: Gordon was killed by Mahdists in early 1885. The Mahdi died in the same year, but his successor, the Khalifa Abdallahi, continued to build up the Mahdist state.

In the 1890s the European powers were vying for control of Africa and the British made plans for the control of the Nile valley and the reconquest of Sudan. In a series of attacks between 1896 and 1898, an Anglo-Egyptian force of 25,800 men under Herbert (later Lord) Kitchener destroyed the Mahdist

state. Anglo-Egyptian agreements in 1899 established a joint (condominium) government of Sudan: in theory it was administered by a governor-general, appointed by Egypt with the consent of Great Britain. In practice the governor-general, Sir Reginald Wingate, controlled the condominium government from Khartoum. Sudanese resentment over colonial rule erupted in various Mahdist uprisings but with insufficient support to pose a threat to the government. In 1911 the Sudan Plantations syndicate launched a scheme to irrigate the Al Jazirah region and establish a large cotton plantation for Britain's textile industry. The cotton crop became the mainstay of the economy.

Sudanese nationalist sentiment grew in the early 1920s when 'Ali 'Abd al Latif, inspired by Egyptian nationalists, founded the White Flag League. When Governor-General Sir Lee Stack was assassinated in 1924 in Cairo (capital of newly-independent Egypt), the British ordered all Egyptian troops out of Sudan. British rule continued unchallenged until after the Second World War. The broad policy was to treat Sudan as two countries with the aim of integrating the southern provinces with their largely Christian and animist peoples with British East Africa. However, in 1948 a predominantly elective legislative assembly was convened for the whole territory. In the 1948 elections the Independence Front, which favoured the creation of an independent republic, gained a majority over the National Front, which aimed for union with Egypt.

### *Independence*

Following the 1952 revolution in Egypt, Sudan became a parliamentary republic in 1956.

Sudan's democracy proved to be short-lived as the political parties became mired in internecine fighting. At the same time, a revolt raged in the south over Islamic domination. In 1958 Gen. Ibrahim Abboud led a military coup that ended the parliamentary system. In 1964, unable to improve Sudan's poor economic performance or to end the southern revolt, Abboud agreed to the re-establishment of civilian government. A coalition, headed by Muhammad Ahmad Mahjub, was weakened by factional disputes and little progress was made in solving the country's economic and social problems.

In 1969 Col. Muhammad Gaafur al-Nimeiry staged a successful coup. He banned all political parties and nationalized banks and numerous industries. The civil war was ended by an agreement between the government and the Southern Sudan Liberation Front signed in Addis Ababa in 1972. In the same year the Sudanese Socialist Union, the country's only political organization, elected a 'people's assembly' to draw up a new constitution, adopted in 1973. Nimeiry's regime was blamed for worsening economic conditions and came under Islamist attack for its support for Egypt's role in the Camp David Accords with Israel; in the late 1970s Nimeiry dismissed his cabinet and closed universities in an attempt to quell opposition.

### *Accelerating Violence*

From the early 1980s political instability in southern Sudan worsened. Nimeiry responded by imposing Sharia law in 1983, inflaming a renewed civil war with the largely Christian and animist Sudan People's Liberation Movement (SPLM) led by John Garang. Having survived numerous earlier coup attempts, Nimeiry was overthrown in 1985. Following elections in 1986 a civilian government led by Sadiq al-Mahdi ruled until he was ousted three years later in a bloodless military coup. The new regime of Lieut.-Gen. Omar Ahmed al-Bashir strengthened ties with Libya, Iran, and Iraq, reinforced Islamic law, banned opposition parties and continued to pursue the war with the south against the backdrop of a stagnant economy and a catastrophic famine. Bashir officially became president in 1993 but significant political power was held by the National Islamic Front, a fundamentalist political organization led by Hassan al-Turabi, who became speaker of parliament. In 1999 Bashir declared a

state of emergency during a power struggle with Turabi, who was eventually toppled and parliament dissolved. Turabi subsequently formed his own opposition party, the Popular National Congress, although he and other party members were arrested in early 2001. He was released in Oct. 2003, only to be rearrested in March 2004 over an alleged coup plot. He was freed again in June 2005.

In Jan. 2002 a ceasefire was declared to allow relief aid to be distributed in the drought-stricken south-central region. In July 2002 the government and the SPLM agreed to a framework for peace providing for autonomy for the south and a referendum on independence after six years. Nevertheless, hostilities continued, particularly in the Darfur region of western Sudan where conflict between local African rebels and the army and government-backed Arab militias intensified from early 2003.

Having agreed on the division of oil wealth in post-war Sudan and on further power-sharing protocols, the government and the SPLM finally signed a comprehensive peace agreement on 9 Jan. 2005. It provided for a government of national unity (headed by Bashir but including northern and southern political groups) during a six-year transition period; self-determination for the South, with a referendum on secession at the end of the transition period; a permanent ceasefire; and the disengagement of forces. In more than 20 years of civil war, over 2m. people were thought to have died and more than 4m. made refugees. The agreement was briefly undermined in July 2005 when John Garang, SPLM leader and first vice-president in the power-sharing government, was killed in an air crash, provoking clashes between southern Sudanese and northern Arabs in Khartoum. His SPLM deputy, Salva Kiir Mayardit, took over as first vice-president in Aug. The power-sharing government was formed officially in Sept. 2005 and a devolved government of southern Sudan was established in Oct.

Although the comprehensive peace agreement focused mainly on the north-south civil war, some of its provisions for power-sharing and decentralization are applicable to Darfur. However, despite ongoing peace talks and UN and other international intervention to stop the violence, the conflict has continued. The government and Arab militias have been accused of systematic abuses of human rights, crimes that the UN Security Council referred to the International Criminal Court in March 2005. The targeting of civilians in the conflict has resulted in up to 300,000 deaths and the displacement of some 2.7m. people since 2003.

A referendum on full independence for the South took place on 9-15 Jan. 2011; 98.8% of votes were cast in favour of secession. South Sudan became an independent country on 9 July 2011.

### **TERRITORY AND POPULATION**

Sudan is bounded in the north by Egypt, northeast by the Red Sea, east by Eritrea and Ethiopia, south by South Sudan, southwest by the Central African Republic, west by Chad and northwest by Libya. Its area is 1,881,000 sq. km. In 2008 the census population (provisional) was 39,154,490. In 2011, 40.8% of the population were urban.

The UN gives a projected population for 2015 of 49.07m.

The country is administratively divided into 17 states (with capitals): Al Qadarif (Al Qadarif), Blue Nile (Al Damazin), Central Darfur (Zalingei), East Darfur (Ed Daein), Gezira (Wadi Medani), Kassala (Kassala), Khartoum (Khartoum), North Darfur (Al Fashir), North Kordufan (Al Obeid), Northern (Dongula), Red Sea (Port Sudan), River Nile (Al Damar), Sennar (Singa), South Darfur (Nyala), South Kordufan (Kadugli), West Darfur (Geneina), White Nile (Rabak).

The capital, Khartoum, had a provisional census population of 1,410,858 in 2008. Other major cities, with 2008 provisional population, are Omdurman (1,849,659), Khartoum North (1,012,211), Nyala (492,984), Port Sudan (394,561), Al Obeid (345,126), Kassala (298,529), Wadi Medani (289,482) and Al Qadarif (269,395).

The country is mainly populated by Arab and Nubian peoples. Arabic and English are both official languages.

## SOCIAL STATISTICS

2009 estimates: births, 1,402,000; deaths, 382,000. Rates, 2009 estimates (per 1,000 population): birth, 9; death, 33. Infant mortality, 2010 (per 1,000 live births), 66. Expectation of life in 2007 was 59.4 years for females and 56.3 for males. Annual population growth rate, 2000–05, 2.6%. Fertility rate, 2008, 4.2 births per woman.

## CLIMATE

Lying wholly within the tropics, the country has a continental climate and only the Red Sea coast experiences maritime influences. Temperatures are generally high for most of the year, with May and June the hottest months. Winters are virtually cloudless and night temperatures are consequently cool. Summer is the rainy season inland, with amounts increasing from north to south, but the northern areas are virtually a desert region. On the Red Sea coast, most rain falls in winter. Khartoum, Jan. 64°F (18.0°C), July 89°F (31.7°C). Annual rainfall 6" (157 mm). Annual rainfall 39" (968 mm). Port Sudan, Jan. 74°F (23.3°C), July 94°F (34.4°C). Annual rainfall 4" (94 mm). Wadi Halfa, Jan. 50°F (10.0°C), July 90°F (32.2°C). Annual rainfall 0.1" (2.5 mm).

## CONSTITUTION AND GOVERNMENT

The constitution was suspended after the 1989 coup and a 12-member Revolutionary Council then ruled. A 300-member Provisional National Assembly was appointed in Feb. 1992 as a transitional legislature pending elections. These were held in March 1996. On 26 May 1998 President Omar Hassan Ahmed al-Bashir approved a new constitution. Notably this lifted the ban on opposition political parties, although the government continued to monitor and control criticism until the constitution came legally into effect. The constitution was partially suspended in Dec. 1999.

In accordance with the peace deal agreed in Dec. 2004 to bring an end to the civil war and signed in Jan. 2005 there is a lower house, the 354-seat *National Assembly* (reduced from 450 following the independence of South Sudan), with members appointed by decree by the president, and an upper house, the *Council of States*, consisting of a maximum of 32 members (reduced from 52), of whom 30 are indirectly elected. The peace deal specified that 52% of National Assembly seats should go to the ruling National Congress Party, 28% to the former southern rebel Sudan People's Liberation Movement (the political wing of the Sudan People's Liberation Army), 14% to the northern opposition parties and 6% to their counterparts in the south. The agreement also allowed a referendum to be carried out in the south in 2011 to decide whether to become independent or maintain the unity of Sudan. This happened from 9–15 Jan. 2011, with 98.8% of votes cast in favour of independence. A new interim power-sharing constitution was adopted on 6 July 2005 giving the south some autonomy and allowing former rebels to take up seats in the country's government.

## RECENT ELECTIONS

The first multi-party elections in 24 years were held from 11–15 April 2010 although they were boycotted by several of the main opposition parties. In presidential elections, incumbent Omar Hassan Ahmed al-Bashir was re-elected with 68.2% of votes cast. His nearest rival, Yasir Arman of the Sudan People's Liberation Movement (SPLM), gained 21.7% despite having withdrawn his candidature in late March owing to electoral irregularities and violence in Darfur. Abdullah Deng Nhial of the Popular Congress Party won 3.9% of the vote and Hatim Al-Sir of the Democratic Unionist Party 1.9%. There were eight other candidates who all gained less than 1% of the vote.

In concurrent National Assembly elections the National Congress Party of President Bashir won 323 of 450 seats, the SPLM 99, the Popular Congress Party 4, the Democratic Unionist Party 4 and the Federal Umma Party 3. Seven other parties received two seats or fewer with three seats going to independents. Four seats remained vacant.

## CURRENT LEADERS

### Field Marshal Omar Hassan Ahmed al-Bashir

#### *Position*

President

#### *Introduction*

Omar al-Bashir is one of Africa's longest-serving presidents, having seized power in 1989. He has since been re-elected three times—in 1996, 2000 and 2010—although the polls were boycotted by the main opposition groups. His rule has been characterized by civil war and genocide, particularly in the western province of Darfur. He nevertheless signed a significant peace agreement in Jan. 2005 to end the long-running insurrection in South Sudan, which heralded the territory's drive to national independence in 2011.

#### *Early Life*

Bashir was born to a family of Sudanese peasants in 1944. He went to primary school in his home village before his family moved to Khartoum, where he completed secondary education. Having joined the Sudanese air force as a teenager, he soon made the grade as an officer and was sent to a military college in Egypt. He later served with a Sudanese unit that fought against Israel alongside Egyptian forces in the 1973 war. Promotions followed quickly and by the early 1980s he was a general. His political life began with the military coup of 1989 when, together with a group of middle-ranking officers, he overthrew the elected government of Sadiq al-Mahdi and installed a Revolutionary Command Council.

#### *Career in Office*

The National Islamic Front (later renamed the National Congress Party), led by Hassan al-Turabi, supported Bashir's new regime. Influenced by Turabi, and by the campaigns in South Sudan against animist and Christian secessionist rebels, Bashir began the Islamization of Sudan and introduced Sharia law. He moved Sudan into the radical Arab camp, inviting political and economic isolation and aggravating the distress caused by instability and civil war.

In 1993 Bashir declared himself president. Long-promised elections were held in March 1996, when Bashir was elected head of state in a poll that was regarded internationally as deeply flawed. For a time Sudan provided a haven for radical Islamic refugees who included al-Qaeda's Osama bin Laden. By 1998 Sudan was regarded as a pariah state by the USA. In that year, US missiles destroyed a pharmaceutical factory in Khartoum that was suspected, wrongly as it turned out, of producing chemical weapons.

In 1999 Bashir declared a state of emergency during a power struggle with Turabi, then the speaker of parliament, who had moved to reduce the president's powers. Turabi was toppled and parliament dissolved. In Dec. 2000 Bashir was re-elected as president, although the main opposition parties again boycotted the poll.

In the wake of the 11 Sept. 2001 attacks in the USA, Bashir made an effort to gain international acceptability. However, Sudan continued to be regarded by many in the West as a rogue state, crippled by poverty and conflict, and was also cited by the United Nations for gross human rights violations.

Meanwhile, the civil war in the South continued, by this time having claimed over 2m. lives and displaced more than 4m. refugees. In Jan. 2005, after three years of talks, Bashir's government and the Sudan People's Liberation Movement (SPLM) finally signed a comprehensive peace agreement. It provided for a government of national unity (headed by Bashir but also comprising members of the National Congress Party, the SPLM and other northern and southern political forces), self-determination for the South, a permanent ceasefire and the disengagement of forces. In July 2005 the agreement was briefly threatened when John Garang, the leader of the SPLM and first vice-president in the power-sharing government, was killed in a helicopter accident, provoking clashes between Sudanese in the south and Arab northerners. Garang was replaced as first vice-president by his deputy, Salva Kiir Mayardit, in Aug.

The formation of the national unity government was announced in Sept. 2005 and a devolved government in south Sudan was established in Oct. In Oct. 2007 the SPLM suspended its participation in the national unity administration, accusing the northern Sudanese of failing to honour the 2005 accord, but rejoined in Dec. In Jan. 2011 the results of a referendum in South Sudan on secession from the North showed an overwhelming vote in favour of self-determination. Bashir had earlier confirmed that he would accept the result, but the countdown to actual independence in July that year was marred by mutual recriminations between the North and South and violent clashes between their respective forces, particularly around the disputed oil-rich border area of Abyei. Post-independence, both sides agreed in Oct. to establish joint committees in an attempt to resolve outstanding flashpoints. However, in April 2012 Sudan's air force raided its neighbour after South Sudanese troops occupied the Abyei region and the Heglig oilfields. The United Nations threatened sanctions against both countries if they did not stop the escalating violence and return to negotiations. Bashir met the South Sudan president in Ethiopia in Sept. in an attempt to resolve the crisis, and although they concluded agreements on trade, security and a resumption of oil exports, they failed to resolve contested border issues.

In addition to the civil war in the South, Bashir's regime has overseen fierce fighting in the western province of Darfur between government-backed Arab militias and local black rebel forces. Since 2003 the conflict has escalated despite international attempts to stop the violence, the targeting of civilians having led to a refugee crisis and a humanitarian catastrophe. A UN report in March 2007 accused the government of orchestrating 'gross and systematic' human rights abuses in Darfur and complained that the response of the international community had been 'inadequate and ineffective'. After months of negotiations Bashir finally agreed on 31 Dec. 2007 to the deployment of a hybrid African Union-UN peacekeeping force (UNAMID, under UN control) in Darfur to replace an existing smaller African Union

mission. The Darfur conflict also undermined Sudan's already fractious relations with neighbouring Chad until Jan. 2010, when both sides stated their readiness to normalize relations.

The International Criminal Court (ICC) has indicted Bashir for alleged genocide and war crimes in Darfur. Although the Sudanese government has rejected the accusation, violence across the region has continued to generate further casualties and internal displacement.

In April 2010 Bashir won another presidential term and the National Congress Party won a comfortable parliamentary majority in the country's first multi-party elections in 24 years, but the poll was criticized by international monitors.

In Oct. 2012 Sudan accused Israel of launching an attack on a munitions plant in Khartoum and complained to the UN Security Council.

## DEFENCE

There is conscription for one to two years. Defence expenditure totalled US\$524m. in 2006 (US\$13 per capita), representing 1.5% of GDP. According to *Deadly Arsenals*, published by the Carnegie Endowment for International Peace, Sudan has both biological and chemical weapons research programmes.

In Aug. 2007 the Sudanese government agreed to a joint African Union/United Nations peacekeeping force being deployed in Darfur. The mission, known as UNAMID or UN-AU Mission in Darfur, began operations on 31 Dec. 2007 and had 20,852 uniformed personnel in Feb. 2013, making it the largest UN peacekeeping force in the world.

### Army

Strength (2007) 105,000 (around 20,000 conscripts). There is a paramilitary People's Defence Force of 17,500 and an additional 102,500 reservists.

### Navy

The navy operates in the Red Sea and also on the River Nile. The flotilla suffers from lack of maintenance and spares. Personnel in 2007 numbered 1,300. Major bases are at Port Sudan (HQ), Flamingo Bay and Khartoum.

### Air Force

Personnel totalled (2007) 3,000, with 51 combat-capable aircraft, including A-5s (Chinese-built versions of MiG-19s), F-7s (Chinese-built versions of MiG-21s), MiG-23s and MiG-29s, and 23 attack helicopters.

## ECONOMY

Agriculture accounted for 30.1% of GDP, industry 29.2% and services 40.8% in 2006.

Sudan featured among the ten most corrupt countries in the world in a 2012 survey of 176 countries carried out by the anti-corruption organization *Transparency International*.

### Overview

In the 1990s the economy was near collapse. Greater stability came after 1997 with IMF-supported macroeconomic reforms. Until the turn of the century the economy was almost entirely agrarian. In 1999 a pipeline from the Muglad Basin to a Red Sea export terminal was opened and Sudan began exporting crude oil, recording its first trade surplus. Most oil is produced for export, with 65% going to China. 75% of oil production is now within the newly independent state of South Sudan.

When South Sudan became independent in July 2011, several key economic issues remain unresolved, including oil pricing. South Sudan needs pipelines in the north to distribute globally. Other key issues include external debt and water rights. With oil revenues set for a major decline, significant adjustments to a more diversified economy will be necessary to support Sudan's transition.

Oil production, infrastructure improvements, the development of export processing zones and increasing investment from Gulf

states have helped transform the economy. However, agriculture remains the leading sector, employing 80% of the population and accounting for a third of GDP.

Following the 2008 global financial crisis, GDP growth went into steep decline after a period of robust expansion. A high level of poverty and inequality remain, while Sudan's external position is vulnerable to fluctuations in oil prices and remittances from expatriates working in Gulf countries. The conflict in Darfur and tense relations with South Sudan are obstacles to economic development.

### Currency

The unit of currency is the *Sudanese pound* (SDG) of 100 *piastres*, introduced in Jan. 2007 to replace the *Sudanese dinar* (SDD) at a rate of 1 Sudanese pound = 100 Sudanese dinars. The dinar ceased to be legal tender on 30 June 2007. Inflation, which has been in double figures every year since 2008, was 13.0% in 2010 and 18.3% in 2011. Foreign exchange reserves were US\$2,107m. in July 2005 and total money supply was 705,505m. dinars.

### Budget

In 2008 revenues totalled 26,424m. Sudanese pounds and expenditures 24,331m. Sudanese pounds.

VAT is 10%.

### Performance

GDP growth was 4.6% in 2009 and 6.5% in 2010 but the economy contracted by 4.5% in 2011. Sudan's total GDP in 2011 was US\$64.1bn.

### Banking and Finance

The Bank of Sudan (*Governor*, Mohamed Khair Elzubair) opened in Feb. 1960 with an authorized capital of £S1.5m. as the central bank and bank of issue. Banks were nationalized in 1970 but in 1974 foreign banks were allowed to open branches. The application of Islamic law from 1 Jan. 1991 put an end to the charging of interest in official banking transactions, and seven banks are run on Islamic principles. Mergers of seven local banks in 1993 resulted in the formation of the Khartoum Bank, the Industrial Development Bank and the Savings Bank.

Sudan's external debt totalled US\$21,846m. in 2010, up from US\$17,474m. in 2005 and US\$15,983m. in 2000. However, as a share of GNI it fell from 141.4% in 2000 to 67.1% in 2005 and further to 39.1% in 2010.

A stock exchange opened in Khartoum in 1995.

## ENERGY AND NATURAL RESOURCES

### Environment

Sudan's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.3 tonnes per capita.

### Electricity

Installed capacity was 1.1m. kW in 2007. Production in 2007 was 4.54bn. kWh, with consumption per capita 118 kWh.

### Oil and Gas

In 2008 oil reserves totalled 6.7bn. bbls. In June 1998 Sudan began exploiting its reserves and on 31 Aug. 1999 it officially became an oil producing country; production in 2008 totalled 23.7m. tonnes. An oil refinery at Al-Jayli, with a capacity of 2.5m. tonnes, opened in 2000. Natural gas reserves in 2007 were 85bn. cu. metres.

### Minerals

Mineral deposits include graphite, sulphur, chromium, iron, manganese, copper, zinc, fluorspar, natron, gypsum and anhydrite, magnesite, asbestos, talc, halite, kaolin, white mica, coal, diatomite (*kieselguhr*), limestone and dolomite, pumice, lead, wollastonite, black sands and vermiculite pyrites. Chromite and gold are mined. Production of salt, 2009: 35,793 tonnes; chromite, 2005: 21,654 tonnes; gold, 2005: 3,625 kg.

### Agriculture

80% of the population depends on agriculture. Land tenure is based on customary rights; land is ultimately owned by the government. There were about 19.32m. ha. of arable land in 2007 and 225,000 ha. of permanent crops. 1.15m. ha. were irrigated in 2007. There were ten tractors and one harvester-thresher per 10,000 ha. in 2006.

Production (2003 estimates) in 1,000 tonnes: sugarcane, 5,500; sorghum, 5,188; groundnuts, 1,200; millet, 784; tomatoes, 700; wheat, 363; dates, 330; seed cotton, 315; cottonseed, 200.

Livestock (2003 estimates): sheep, 47.0m.; goats, 40.0m.; cattle, 38.3m.; camels, 3.2m.; chickens, 38m.

Livestock products (2003 estimates) in 1,000 tonnes: beef and veal, 325; lamb and mutton, 144; goat meat, 119; poultry meat, 30; cow's milk, 3,264; goat's milk, 1,295; sheep's milk, 463; cheese, 152; eggs, 47.

### Forestry

Forests covered 69.95m. ha. in 2010, or 29% of the total land area. The annual loss of 589,000 ha. of forests between 1990 and 2000 was exceeded only in Brazil and Indonesia, although between 2000 and 2010 the pace of deforestation decreased significantly to 54,000 ha. annually. Of the total area under forests 20% was primary forest in 2010, 71% other naturally regenerated forest and 9% planted forest. In 2007, 20.28m. cu. metres of roundwood were cut.

### Fisheries

In 2009 the total catch was 71,690 tonnes, of which approximately 92% were freshwater fish.

### INDUSTRY

Production figures (2007 unless otherwise indicated, in 1,000 tonnes): distillate fuel oil, 1,873; petrol, 1,639; wheat and blended flour (2006), 1,200; raw sugar, 743; residual fuel oil, 677; cement, 326; jet fuel, 303; soap, 80. In 2000 an industrial complex assembling 12,000 vehicles a year opened.

### Labour

The estimated total workforce in 2010 was 13,885,000 (70% males), up from 11,997,000 in 2005.

### INTERNATIONAL TRADE

#### Imports and Exports

In 2009 imports (c.i.f.) amounted to US\$8,589.9m. and exports (f.o.b.) to US\$9,079.5m. The main imports are petroleum products, machinery and equipment, foodstuffs, manufactured goods, medicines and chemicals. Main exports are oil (which accounts for about 87% of export revenues), cotton, gum arabic, oil seeds, sorghum, livestock, sesame, gold and sugar. The main import sources in 2006 were China (18.8%), Saudi Arabia (8.9%), Japan (8.1%), India (6.7%) and United Arab Emirates (5.6%). Principal export markets in 2006 were China (78.9%), Japan (5.5%), United Arab Emirates (5.1%), Saudi Arabia (2.8%) and Egypt (1.3%).

### COMMUNICATIONS

#### Roads

In 2002 there were estimated to be 11,900 km of roads, of which 4,320 km were paved. There were an estimated 768,000 passenger cars and 300,000 trucks and vans in 2007.

#### Rail

Total length in 2005 was 4,578 km. In 2008 the railways carried 100,000 passengers and 1.1m. tonnes of freight.

#### Civil Aviation

There is an international airport at Khartoum, which handled 2,178,097 passengers and 59,299 tonnes of freight in 2009. The national carrier is the government-owned Sudan Airways, which operates domestic and international services. In 2006 scheduled

airline traffic of Sudan-based carriers flew 9m. km, carrying 563,000 passengers (365,000 on international flights).

### Shipping

Supplementing the railways are regular steamer services of the Sudan Railways. Port Sudan is the major seaport; Suakin port opened in 1991. In Jan. 2009 there were five ships of 300 GT or over registered, totalling 23,000 GT.

### Telecommunications

In 2008 there were 366,200 main (fixed) telephone lines; mobile phone subscribers numbered 11,991,500 in 2008 (29.0 per 100 persons). There were 4.2m. internet users in 2008.

### SOCIAL INSTITUTIONS

#### Justice

The judiciary is a separate independent department of state, directly and solely responsible to the President of the Republic. The general administrative supervision and control of the judiciary is vested in the High Judicial Council.

Civil Justice is administered by the courts constituted under the Civil Justice Ordinance, namely the High Court of Justice—consisting of the Court of Appeal and Judges of the High Court, sitting as courts of original jurisdiction—and Province Courts—consisting of the Courts of Province and District Judges. The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice for the Muslim population is administered by the Islamic law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts; President of the Sharia Division is the Grand Kadi. In Dec. 1990 the government announced that Sharia would be applied in the non-Muslim southern parts of the country as well.

Criminal Justice is administered by the courts constituted under the Code of Criminal Procedure, namely major courts, minor courts and magistrates' courts. Serious crimes are tried by major courts, which are composed of a President and two members and have the power to pass the death sentence. There were at least seven executions in 2011 and at least 19 in 2012. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

Lesser crimes are tried by Minor Courts consisting of three Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts.

The population in penal institutions in mid-2009 was 19,144 (45 per 100,000 of national population).

#### Education

In 2007 there were 28,185 teaching staff for 490,808 pupils at pre-primary schools; 107,933 teaching staff for 3.96m. pupils at primary schools; and 79,122 secondary school teaching staff for 1.46m. pupils. In 2006 there were 29 public higher education institutions (including two Islamic universities, one university of science and technology, and an institute of advanced banking) and eight private higher education institutions. Adult literacy rate was 69% in 2008.

#### Health

In 2006 there were 11,083 physicians, 944 dentists, 33,354 nurses and midwives and 1,531 pharmacists. Hospital bed provision in 2006 was seven per 10,000 population.

### RELIGION

Islam is the state religion. In 2001, 70% of the population were Sunni Muslims. There are also some Christians and traditional

animists. In Feb. 2013 the Roman Catholic church had one cardinal.

## CULTURE

### World Heritage Sites

Sudan has two sites on the UNESCO World Heritage List: Gebel Barkal and the Sites of the Napatan Region (inscribed on the list in 2003), a collection of tombs, pyramids and palaces of the Second Kingdom of Kush (900 BC to AD 350); and the Archaeological Sites of the Island of Meroe (2011), once the heartland of the Kingdom of Kush that includes the royal city of the Kushite kings at Meroe.

### Press

In 2008 there were 29 paid-for daily newspapers with a combined circulation of 90,000. Opposition newspapers are permitted although they are vetted by an official censor.

### Tourism

In 2005 there were 246,000 foreign tourists, spending a total of US\$89m.

## KEY HISTORICAL EVENTS

The first Europeans to reach the area were the Spanish in 1499 but it was the British who established a colony in 1650. At the peace of Breda (1667), Suriname was assigned to the Netherlands in exchange for the colony of New Netherland in North America. Suriname was twice in British possession during the Napoleonic Wars, in 1799–1802 and 1804–16, when it was returned to the Netherlands.

On 25 Nov. 1975 Suriname gained full independence. On 25 Feb. 1980 the government was ousted in a coup and a National Military Council (NMC) established. A further coup on 13 Aug. replaced several members of the NMC and the State President. Other attempted coups took place in 1981 and 1982, with the NMC retaining control. In Oct. 1987 a new constitution was approved by referendum. Following elections in Nov. Suriname returned to democracy in Jan. 1988 but on 24 Dec. 1990 a further military coup deposed the government. There was a peace agreement with rebel groups in Aug. 1992 and elections were held in May 1996.

## TERRITORY AND POPULATION

Suriname is located on the northern coast of South America between 2–6° North latitude and 54–59° West longitude. It is

bounded in the north by the Atlantic Ocean, east by French Guiana, west by Guyana, and south by Brazil. Area, 163,820 sq. km. Census population, 2004, 492,829; density, 3.0 per sq. km.

The UN gives a projected population for 2015 of 548,000.

The capital, Paramaribo, had (2004 census) 242,946 inhabitants.

Suriname is divided into ten districts. They are (with 2004 census population and chief town): Brokopondo, population 14,215 (Brokopondo); Commewijne, 24,649 (Nieuw Amsterdam); Coronie, 2,887 (Totness); Marowijne, 16,642 (Albina); Nickerie, 36,639 (Nieuw Nickerie); Para, 18,749 (Onverwacht); Paramaribo, 242,946—representing 49% of Suriname's total population (Paramaribo); Saramacca, 15,980 (Groningen); Sipaliwini, 34,136 (local authority in Paramaribo); Wanica, 85,986 (Lelydorp).

There is an ongoing unresolved dispute between Suriname and Guyana for the return of a triangle of uninhabited rainforest in Guyana between the New River and the Courantyne River, near the Brazilian border. In Sept. 2007 the UN settled a long-standing maritime boundary dispute between the two countries. The coastal area off both countries is believed to hold significant oil and gas deposits.

Major ethnic groups in percentages of the population in 2004: Indo-Pakistani, 26%; Creole, 18%; Javanese, 15%; Bushnegroes (Blacks), 15%; Amerindian, 4%. 69.8% of the population lived in urban areas in 2011.

The official language is Dutch. English is widely spoken next to Hindi, Javanese and Chinese as inter-group communication. A vernacular, called 'Sranan' or 'Surinamese', is used as a *lingua franca*. In 1976 it was decided that Spanish was to become the nation's principal working language.

## SOCIAL STATISTICS

2007: births, 9,769; deaths, 3,374. Rates per 1,000 population: birth rate, 19.2; death rate, 6.6. Expectation of life, 2007, was 65.3 years for males and 72.5 for females. Annual population growth rate, 2000–05, 1.5%. Infant mortality, 2010, 27 per 1,000 live births; fertility rate, 2008, 2.4 births per woman. Abortion is illegal.

## CLIMATE

The climate is equatorial, with uniformly high temperatures and rainfall. The temperature is an average of 27°C throughout the year; there are two rainy seasons (May–July and Nov.–Jan.) and two dry seasons (Aug.–Oct. and Feb.–April). Paramaribo, Jan. 21°C, July 32.4°C. Average rainfall 182.3 mm.

## CONSTITUTION AND GOVERNMENT

The current constitution was ratified on 30 Sept. 1987. Parliament is a 51-member *National Assembly*. The head of state is the *President*, elected for a five-year term by a two-thirds majority by the National Assembly, or, failing that, by an electoral college, the United People's Assembly, enlarged by the inclusion of regional and local councillors, by a simple majority.

## National Anthem

'God zij met ons Suriname' ('God be with our Suriname'); words by C. A. Hoekstra, tune by J. C. de Puy. There is a Sranan version, 'Opo kondreman oen opo'; words by H. de Ziel.

## RECENT ELECTIONS

Parliamentary elections were held on 25 May 2010. The Mega Combination coalition (including the National Democratic Party) won 23 of the available 51 seats (40.2% of the vote), the New Front for Democracy and Development won 14 with 31.6%,

A-Combination took 7 (4.7%), the People's Alliance took 6 (13.0%) and the Party for Democracy and Development through Unity took 1 (5.1%).

On 19 July 2010 former dictator Dési Bouterse was elected president by the National Assembly, gaining 36 out of 50 votes against 13 for Chandrikapersad Santokhi with one abstention.

## CURRENT LEADERS

### Desiré Delano 'Dési' Bouterse

#### *Position*

President

#### *Introduction*

Former military dictator Dési Bouterse was sworn in as president in Aug. 2010 following his election by the National Assembly in July. He had earlier led the National Democratic Party to victory within the Mega Combination coalition at parliamentary elections in May that year. He succeeded Ronald Venetiaan.

#### *Early Life*

Bouterse was born on 13 Oct. 1945 in Domburg, Suriname. After attending the Middelbare Handelsschool, he moved to the Netherlands for military training.

On 25 Feb. 1980 a group of Surinamese army sergeants, including Bouterse, led a coup. By Aug. they had forced out President Johan Ferrier, who had overseen the nation's transition to independence from Dutch rule five years earlier. The military took over the government and declared a socialist republic, with Bouterse named chairman of the National Military Council. Over the next seven years he appointed puppet presidents while ruling as *de facto* leader.

Democratic elections in 1988 stripped Bouterse of much of his power, though a new constitution in 1987 confirmed his control of the military. In Dec. 1990 he dismissed the government, holding power until elections the following year. His position weakened as civil war took hold and a strong ethnic Maroon rebel movement developed under Ronnie Brunswijk, a former bodyguard of Bouterse.

Bouterse gradually entered into mainstream politics as leader of the National Democratic Party, which he had established in 1987. However, he was dogged by allegations of extra judicial murders following the 1980 coup. Convicted in absentia in the Netherlands for drug trafficking offences, he was sentenced in 1999 to 11 years imprisonment.

Campaigning on a populist platform, he secured the support of several small parties and formed the Mega Combination coalition to contest the general election of May 2010, winning 23 of a possible 51 seats. In the presidential election of July 2010, Bouterse secured 36 parliamentary votes, exceeding the two-thirds

majority needed to defeat the minister of justice, Chandrikapersad Santokhi.

#### *Career in Office*

Bouterse's election was widely criticized, with the suggestion that his run for the presidency was motivated by a desire to secure immunity from criminal prosecution. In April 2012 the National Assembly passed an amnesty law covering alleged violations under his earlier military rule. He has appealed to the nation's poor, blaming their plight on the austerity measures of previous governments.

## DEFENCE

In 2008 defence expenditure totalled US\$31m. (US\$65 per capita), representing 1.3% of GDP.

#### **Army**

Total strength was 1,400 in 2007.

#### **Navy**

In 2007 personnel, based at Paramaribo, totalled around 240.

#### **Air Force**

Estimated personnel (2007): 200. There were four combat-capable aircraft.

## ECONOMY

In 2006 agriculture contributed 5.2% of GDP, industry 35.7% and services 59.1%.

### **Overview**

The economy is heavily dependent on the export of oil, gold and alumina, which jointly account for over 50% of GDP and about 85% of exports.

After a slowdown in 2008–09, growth picked up in 2010 thanks largely to the mineral sector. Rising food and fuel prices combined with civil service wage increases contributed to a rise in inflation from 1.3% at the end of 2009 to 10.3% at the end of 2010. Public debt increased from 18.0% of GDP in 2008 to 21.6% in 2010, while the fiscal account went from a surplus in 2007–08 to a deficit in 2009–10. In Jan. 2011 the government devalued the currency by 20%, raised fuel taxes by 40% and introduced other deficit-reduction measures.

The IMF projects a favourable economic outlook with strong investment in the mineral and energy sectors as well as high commodity prices. Containing rising inflation is a priority.

### **Currency**

The unit of currency is the *Suriname dollar* (SRD) of 100 *cents*, introduced on 1 Jan. 2004 to replace the *Suriname guilder* (SRG) at a rate of one Suriname dollar = 1,000 Suriname guilders. Foreign exchange reserves totalled US\$140m. and gold reserves were 29,000 troy oz in July 2005. Total money supply in June 2005 was 777m. Suriname dollars. The rate of inflation—which had been 98.7% in 1999—was 15.0% in 2008, falling to 0.0% in 2009. In 2010 the rate increased to 6.9% and in 2011 to 17.7%.

### **Budget**

2007 revenue was 2,002m. Suriname dollars and expenditure 1,806.5m. Suriname dollars. Tax revenue accounted for 79.1% of revenues in 2007; current expenditure accounted for 87.5% of expenditures.

VAT is 10% for goods and 8% for services.

### **Performance**

After two years of recession in 1999 and 2000 the economy has enjoyed steady growth. Real GDP growth was 4.1% in 2010 and 4.2% in 2011. In 2010 total GDP was US\$4.4bn.

### **Banking and Finance**

The Central Bank of Suriname (*Governor*, Gilmore Hoefdraad) is a bankers' bank and also the bank of issue. There are three

commercial banks; the Suriname People's Credit Bank operates under the auspices of the government. There is a post office savings bank, a mortgage bank, an investment bank, a long-term investments agency, a National Development Bank and an Agrarian Bank.

## ENERGY AND NATURAL RESOURCES

### Environment

Suriname's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 4.5 tonnes per capita.

### Electricity

Installed capacity in 2007 was 0.4m. kW. Production (2007) 1.62bn. kWh; consumption per capita in 2007 was 3,173 kWh.

### Oil and Gas

Crude oil production (2007), 656,000 tonnes. Reserves in 2007 were 111m. bbls.

### Minerals

Bauxite is the most important mineral. Suriname is the seventh largest bauxite producer in the world. Production (2007), 5,054,000 tonnes.

### Agriculture

Agriculture is restricted to the alluvial coastal zone; in 2002 there were an estimated 57,000 ha. of arable land and 10,000 ha. of permanent crops. The staple food crop is rice; production, 163,000 tonnes in 2003. Other crops (2002 in 1,000 tonnes): sugarcane, 120; oranges, 11; plantains, 11; coconuts, 10; cassava, 4. Livestock in 2003 (estimates): cattle, 137,000; pigs, 24,000; sheep, 8,000; goats, 7,000; chickens, 4m.

### Forestry

Forests covered 14.76m. ha. in 2010, or 95% of the land area. In terms of percentage coverage, Suriname was the world's most heavily forested country in 2010. Of the total area under forests 95% in 2010 was primary forest and 5% other naturally regenerated forest. Production of roundwood in 2007 was 214,000 cu. metres.

### Fisheries

The catch in 2010 amounted to 34,402 tonnes, almost entirely from marine waters.

## INDUSTRY

There is no longer any aluminium smelting, but there are food-processing and wood-using industries. Production: alumina (2007), 2,181,000 tonnes; residual fuel oil (2007), 360,000 tonnes; cement (2008 estimate), 65,000 tonnes; distillate fuel oil (2007), 41,000 tonnes; sawnwood (2007), 57,000 cu. metres.

### Labour

Out of 156,705 people in employment in 2004, 27,995 were in public administration and defence; 25,012 in wholesale and retail trade; 14,031 in construction; 12,593 in agriculture, fishing, hunting and forestry; and 10,971 in manufacturing. In 2004 there were 16,425 unemployed persons, or 9.5% of the workforce.

## INTERNATIONAL TRADE

### Imports and Exports

Trade in US\$1m.:

|                | 2007    | 2008    | 2009    | 2010    |
|----------------|---------|---------|---------|---------|
| Imports c.i.f. | 1,044.3 | 1,304.3 | 1,390.1 | 1,397.5 |
| Exports f.o.b. | 1,359.1 | 1,743.4 | 1,401.8 | 2,025.6 |

Principal imports, 2004: nonelectrical machinery, 14.4%; food products, 11.9%; road vehicles, 9.5%. Principal exports, 2004: alumina, 40.8%; gold, 29.3%; crustaceans and molluscs, 3.6%.

In 2004 imports (in US\$1m.) were mainly from the USA (165.2), Netherlands (147.8), Trinidad and Tobago (131.4), Japan (96.6) and the Netherlands Antilles (20.8); exports were mainly to

Norway (173.0), USA (138.0), Canada (73.3), France (60.0) and the Netherlands (14.5).

## COMMUNICATIONS

### Roads

The road network covered 4,304 km in 2003, of which 26.2% were paved. In 2006 there were 81,778 passenger cars, 25,745 trucks and vans, 3,029 buses and coaches and 40,889 motorcycles and mopeds. There were 69 fatalities in road accidents in 2004.

### Rail

There are two single-track railways.

### Civil Aviation

There is an international airport at Paramaribo (Johan Adolf Pengel). The national carrier is Surinam Airways, which in 2003 had flights to Amsterdam, Belem, Cayenne, Curaçao, Georgetown, Haiti, Miami and Port of Spain. In 2003 scheduled airline traffic of Suriname-based carriers flew 5m. km, carrying 258,000 passengers (253,000 on international flights). In 2004 there were 149,589 passenger arrivals and 148,353 departures.

### Shipping

In Jan. 2009 there were four ships of 300 GT or over registered, totalling 4,000 GT. In 2004 vessels totalling 1,518,000 NRT entered ports and vessels totalling 2,142,000 NRT cleared.

### Telecommunications

Telephone subscribers numbered 401,500 in 2006, equivalent to 888.3 for every 1,000 persons. There were 320,000 mobile phone subscribers in 2006 and 38,000 internet users.

## SOCIAL INSTITUTIONS

### Justice

Members of the court of justice are nominated by the President. There are three cantonal courts. Suriname was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice to replace the British Privy Council as the highest civil and criminal court. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port-of-Spain, Trinidad on 16 April 2005 but it has not yet been accepted as Suriname's final court of appeal.

The estimated population in penal institutions in Dec. 2009 was 915 (175 per 100,000 of national population).

### Education

Adult literacy was 94.6% in 2008 (95.5% among males and 93.8% among females). In 2003-04, 298 primary schools out of a total of 312 had 3,096 teachers and 62,086 pupils; 124 secondary schools had 41,904 pupils. In 2000-01 the university had 2,745 students. There is a teacher training college with (2000-01) 1,942 students.

### Health

In 2004 there were 1,611 general hospital beds. In 2003 there were 295 physicians.

## RELIGION

At the 2004 census there were 200,744 Christians of varying denominations, 98,240 Hindus and 66,307 Muslims.

## CULTURE

### World Heritage Sites

Suriname has two sites on the UNESCO World Heritage List: Central Suriname Nature Reserve (inscribed on the list in 2000); and the Historic Inner City of Paramaribo (2002).

### Press

There were four daily newspapers in 2008 with a combined circulation of 55,000.

**Tourism**

In 2005 there were 160,000 non-resident tourist arrivals; tourist receipts totalled US\$96m.

**Festivals**

The people of Suriname celebrate Chinese New Year (Jan.); Phagwa, a Hindu celebration (March–April); Id-Ul-Fitre, the sugar feast at the end of Ramadan (May); Avondvierdaagse, a carnival (during the Easter holidays); Suriflora, a celebration of plants and flowers (April–May); Keti koti, an Afro-Surinamese holiday to commemorate the abolition of slavery (1 July); Suri-pop, a popular music festival (July); Nationale Kunstbeurs, arts and crafts (Oct.–Nov.); Diwali, the Hindu ceremony of light (Nov.); Djaran Kepang, a Javanese dance held on feast days; Winti-prey, a ceremony for the Winti gods.

## KEY HISTORICAL EVENTS

The Swazi migrated into the country to which they have given their name in the last half of the 18th century. The independence of the Swazis was guaranteed in the conventions of 1881 and 1884 between the British Government and the Government of the South African Republic. In 1894 the South African Republic was given powers of protection and administration. In 1902, after the conclusion of the Boer War, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory. Swaziland became independent on 6 Sept. 1968. A state of emergency imposed in 1973 is still in force. On 25 April 1986 King Mswati III was installed as King of Swaziland.

## TERRITORY AND POPULATION

Swaziland is bounded in the north, west and south by South Africa, and in the east by Mozambique. The area is 17,364 sq. km (6,704 sq. miles). Population (2007 census), 1,018,449 (537,021 females); density, 58.7 per sq. km.

The UN gives a projected population for 2015 of 1.27m.

In 2011, 21.3% of the population were urban. The country is divided into four regions: Hhohho, Lubombo, Manzini and Shiselweni.

Main urban areas: Mbabane, the administrative capital (60,281 inhabitants in 2007); Manzini; Big Bend; Mhlume; Nhlangano.

The population is 84% Swazi and 10% Zulu. The official languages are Swazi and English.

## SOCIAL STATISTICS

2008 estimates: births, 35,000; deaths, 18,000. Estimated rates, 2008 (per 1,000 population): births, 29.9; deaths, 15.6. As a result of the impact of AIDS, expectation of life declined sharply. It was 59 years in 1990–95, but by 2000–05 was down to 45.9 years for females and 45.6 years for males. However, it has now started to rise again and in the period 2005–10 was 47.0 years for females and 47.6 years for males. In 2009, 25.9% of all adults between 15 and 49 were infected with HIV—the highest rate in any country. In 2010, 23% of Swazi children were orphans. In Sept. 2001 King Mswati III told the teenage girls of the country to stop having sex for five years as part of the country's drive to reduce the spread of HIV. Annual population growth rate, 2000–08, 1.0%. Infant mortality, 2010, 55 per 1,000 live births; fertility rate, 2008, 3.5 births per woman.

## CLIMATE

A temperate climate with two seasons. Nov. to March is the wet season, when temperatures range from mild to hot, with frequent thunderstorms. The cool, dry season from May to Sept. is characterized by clear, bright sunny days. Mbabane, Jan. 68°F (20°C), July 54°F (12.2°C). Annual rainfall 56" (1,402 mm).

## CONSTITUTION AND GOVERNMENT

The reigning King is **Mswati III** (b. 1968; crowned 25 April 1986), who succeeded his father, King Sobhuza II (reigned 1921–82). The King rules in conjunction with the Queen Mother (his mother, or a senior wife). Critics of the King or his mother run the risk of arrest.

A new constitution was signed into law on 26 July 2005 and came into force in Jan. 2006. There is a *House of Assembly* of 66 members, 55 of whom are elected each from one constituency (*inkhundla*) and ten appointed by the King plus the Speaker; and a *House of Senators* of 30 members, ten of whom are elected by the House of Assembly and 20 appointed by the King. Elections are held in two rounds, the second being a run-off between the five candidates who come first in each constituency.

There is also a traditional *Swazi National Council* headed by the King and Queen Mother at which all Swazi men are entitled to be heard.

## National Anthem

'Nkulunkulu mnikati wetibusiso temaSwati' ('O Lord our God bestower of blessings upon the Swazi'); words by A. E. Simelane, tune by D. K. Rycroft.

## RECENT ELECTIONS

At the elections of 19 Sept. 2008 only non-partisans were elected. Political parties are illegal and advocates of multi-party politics are considered to be troublemakers.

## CURRENT GOVERNMENT

In March 2013 the cabinet comprised:

*Prime Minister:* Barnabas Sibusiso Dlamini; b. 1942 (sworn in 23 Oct. 2008).

*Deputy Prime Minister:* Themba Masuku.

*Minister for Agriculture:* Clement Dlamini. *Commerce, Industry and Trade:* Jabulile Mashwama. *Economic Planning and Development:* Prince Hlangusemphi. *Education and Training:* Wilson Future Ntshangase. *Finance:* Majozi Sithole. *Foreign Affairs and International Co-operation:* Mtiti Fakudze. *Health:*

Benedict Xaba. *Home Affairs*: Prince Gcokoma. *Information, Communications and Technology*: Winnie Magagula. *Justice and Constitutional Affairs*: Chief Mgwagwa Gamedze. *Labour and Social Security*: Lutfo Dlamini. *Local Government and Housing*: Pastor Lindiwe Gwebu. *Natural Resources and Energy*: Princess Tsandzile. *Public Service*: Patrick Mamba. *Public Works and Transport*: Ntuthuko Dlamini. *Sports, Culture and Youth*: Hlobisile Ndlovu. *Tinkhundla Administration and Development*: Rogers Mamba. *Tourism and Environmental Affairs*: Macford Nsibandze. *Government Website*: <http://www.gov.sz>

## CURRENT LEADERS

### Mswati III

*Position*  
King

#### *Introduction*

Mswati came to the throne in 1986. Effectively an absolute monarchy, he has received domestic and international criticism for his suppression of political opposition and for economic mismanagement. Among the greatest challenges of Mswati's reign has been containing the rapid increase in cases of HIV and AIDS in Swaziland.

#### *Early Life*

Mswati was born on 19 April 1968 in Manzini to one of the wives of King Sobhuza II and given the name Makhosetive (King of All Nations). Sobhuza's death in 1982 left a power vacuum that led to several years of infighting between various queens regent, crown princes and members of Liqoqo (the traditional advisory body which wielded significant power over the crown). In Oct. 1985 Makhosetive's mother dismissed several leading Liqoqo figures and recalled her son from his schooling in England. Makhosetive was crowned as Mswati III in April 1986.

#### *Career in Office*

Among Mswati's first acts as King was to dissolve the Liqoqo. Popular discontent grew at the prohibition on opposition political parties and Mswati's increasingly autocratic rule, leading to the establishment of the illegal People's United Democratic Movement (Pudemo). In 1990 Mswati agreed to open dialogue on the nation's political future. The national assembly was directly elected for the first time in 1993 and Mswati announced plans for a new constitution the following year.

With little progress having been made by 1996, Mswati established a constitutional commission. Pudemo continued to coordinate opposition, criticizing the King for filling the commission with his conservative supporters and boycotting the national assembly elections of Oct. 1998. In 2000 Pudemo leader Mario Masuku demanded an end to the state of emergency called 27 years earlier and was arrested for sedition. He was imprisoned pending his trial which collapsed in 2002. On his release he stated his belief that government could only be reformed when the monarchy was 'wiped out'.

In 2001 the constitutional commission reported back, providing the framework for the writing of a new constitution but asserting that the majority of the population did not favour the formation of new parties. In Dec. 2002, amid declining relations with the judiciary, six court of appeal judges resigned in protest at the King's use of rule by decree. The judges claimed that Mswati's repeal of several court decisions was unconstitutional. The crisis gave renewed impetus to the opposition alliance who called for a series of mass strikes. A new draft constitution was presented to the King in 2003, introducing a bill of rights but maintaining the executive role of the monarchy and the ban on political parties. Having been adopted by parliament and signed by the King in 2005, the constitution came into force in Jan. 2006.

Swaziland has one of the highest AIDS rates in the world. In Oct. 2001 Mswati ordered that all virgins should abstain from sex for five years or face a fine. The following month Mswati made a gift of a cow in recompense for taking an 18 year-old bride, Zena Mahlangu. Mahlangu's mother accused aides of the King of kidnapping her daughter and undertook legal proceedings to secure her return. Although the case collapsed, it received international attention and highlighted the growing challenges to Mswati's autocratic style.

Opposition groups boycotted the Sept. 2008 elections and were critical of the lavish celebrations of Mswati's 40th birthday, coupled with the 40th anniversary of Swaziland's independence.

Pudemo leader Masuku, who had again been detained under anti-terror laws in Nov. 2008, was released in Sept. 2009 vowing to continue campaigning for democracy. In Sept. 2010 around 50 pro-democracy activists, including Masuku, were arrested by police as they prepared for a protest march through the capital, Mbabane.

In 2011, despite a rapidly deteriorating economic situation and declining public revenues, the government continued to resist popular and international demands for reforms. In 2012 the International Monetary Fund reiterated its warnings that Swaziland's budget problems were reaching crisis point.

## DEFENCE

### **Army Air Wing**

There are two Israeli-built Arava transports with weapon attachments for light attack duties.

## ECONOMY

Agriculture accounted for 8.1% of GDP in 2006, industry 46.4% and services 45.5%.

At the core of Swazi society is Tibiyi Taka Ngwane. Created in 1968 by Royal Charter, Tibiyi is a national development fund that operates outside the government and falls directly under the King, who holds it in trust for the nation. Its money derives from its stake in virtually every sector of Swazi commerce and industry.

### **Overview**

Despite strong ties with the South African economy—accounting for 90% of imports and 70% of exports—Swaziland's economic growth has lagged behind that of its neighbours. Real GDP growth has averaged about 2% per year since the late 1990s, lower than other members of the South African Customs Union (SACU). Contributing factors include the slow pace of economic reform, the loss of preferential trade agreements for exports of textiles and sugar, repeated droughts and declining competitiveness.

SACU revenues accounted for around 60% of total government income and 25% of GDP in 2008–09 but collapsed in 2010–11 when economic contraction in South Africa led to a sharp decline in SACU imports. The drop in SACU revenues and an unbudgeted wage increase granted to civil servants and politicians in 2010 caused a fiscal crisis, with the central bank reporting a fall in national reserves to US\$666m. In 2011, the government failed to satisfy the criteria for IMF or African Development Bank loans. In Aug. 2011 South Africa made an emergency loan of R2.4bn. (US\$350m.), in return demanding that the Swazi lilangeni be pegged to the rand.

About 75% of the population is employed in subsistence agriculture. According to the 2010 Human Development Report, 21% of the population live below the international poverty line. The country has the world's highest HIV prevalence rate and the highest death rate, while nearly a quarter of Swazi children are orphans. Low levels of economic growth, a poor business environment, high income inequality and persistent unemployment are major hurdles to development.

### Currency

The unit of currency is the *lilangeni* (plural *emalangeni*) (SZL) of 100 *cents* but Swaziland remains in the Common Monetary Area and the South African rand is legal tender. Inflation was 4.5% in 2010 and 6.1% in 2011. In July 2005 foreign exchange reserves were US\$291m. and total money supply was 1,229m. emalangeni.

### Budget

The fiscal year begins on 1 April. Total revenue in 2008–09 came to 9,208m. emalangeni and total expenditure to 9,538m. emalangeni.

There is a sales tax of 14%.

### Performance

Real GDP growth was 1.2% in 2009, 2.0% in 2010 and 0.3% in 2011. Total GDP in 2011 was US\$4.0bn.

### Banking and Finance

The central bank and bank of issue is the Central Bank of Swaziland (*Governor*, Martin Dlamini), established in 1974. In 2004 there were four banking institutions, three foreign (South African-owned) private banks, Swazibank (state-owned) and a housing bank. In 2003 there were 178 credit and saving unions.

Foreign debt totalled US\$616m. in 2010, representing 17.2% of GNI.

In 1990 Swaziland Stock Brokers was established to trade in stocks and shares for institutional and private clients. A fully-fledged stock exchange, the Swaziland Stock Exchange, was inaugurated in 1999.

## ENERGY AND NATURAL RESOURCES

### Environment

Swaziland's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.8 tonnes per capita in 2008.

### Electricity

Installed capacity was an estimated 0.1m. kW in 2007. Production was about 454m. kWh in 2007; total consumption was an estimated 1,389m. kWh. Swaziland imports about two-thirds of its electricity needs from South Africa.

### Minerals

Output (in tonnes): coal (2007 estimate), 462,000; quarry stone (2008), 240,997 cu. metres. Swaziland's diamond mine closed down in 1996 (1996 production, 75,000 carats) and its asbestos mine in 2000 (2000 production, 12,690 tonnes).

The oldest known mine (iron ore) in the world, dating back to 41,000 BC, was located at the Lion Cavern Site on Ngwenya Mountain.

### Agriculture

In 2007 the agricultural population was around 354,000, of which about 141,000 were economically active. There were approximately 178,000 ha. of arable land and 14,000 ha. of permanent cropland in 2007. Production of principal crops (2003 estimates, in 1,000 tonnes): sugarcane, 4,000; maize, 70; grapefruit and pomelos, 37; oranges, 36; pineapples, 32; potatoes, 6; seed cotton, 6; cottonseed, 4; groundnuts, 4.

Livestock (2003 estimates): cattle, 580,000; goats, 422,000; pigs, 30,000; sheep, 27,000; chickens, 3m.

Livestock products, 2003 estimates (in 1,000 tonnes): milk, 38; meat, 22.

### Forestry

Forests covered 0.56m. ha. in 2010, or 33% of the land area. In 2007 timber production was 1.34m. cu. metres.

### Fisheries

Estimated total catch, 2010, 70 tonnes, exclusively from inland waters.

## INDUSTRY

Most industries are based on processing agricultural products and timber. Footwear and textiles are also manufactured, and some engineering products.

### Labour

In 2002, 92,654 persons were in formal employment; 5,714 Swazis worked in gold mines in South Africa in 2002. Unemployment was about 40% in 2003.

## INTERNATIONAL TRADE

Swaziland has a customs union with South Africa and receives a pro rata share of the dues collected.

### Imports and Exports

Trade in US\$1m.:

|                | 2002    | 2003    | 2004    | 2005    | 2006    |
|----------------|---------|---------|---------|---------|---------|
| Imports f.o.b. | 1,027.0 | 1,540.2 | 1,715.3 | 1,949.4 | 1,960.7 |
| Exports f.o.b. | 1,078.5 | 1,666.8 | 1,806.2 | 1,965.5 | 1,975.7 |

Main import products are motor vehicles, machinery, transport equipment, foodstuffs, petroleum products and chemicals; main export commodities are soft drink concentrates, sugar, wood pulp and cotton yarn. By far the most significant trading partner is South Africa. In 2005, 88.3% of imports came from South Africa; 74.6% of exports went to South Africa in 2005.

## COMMUNICATIONS

### Roads

The total length of roads in 2002 was 3,594 km, of which 1,465 km were main roads. There were 52,200 passenger cars in use in 2007 plus 41,800 lorries and vans and 8,100 buses and coaches. There were 235 fatalities in road accidents in 2007.

### Rail

In 2005 the system comprised 301 km of route (1,067 mm gauge). There are north and south connections to South Africa's rail system, and a link in the northeast with Mozambique and the port of Maputo. In 2009, 4m. tonnes of freight were transported.

### Civil Aviation

There is an international airport at Manzini (Matsapha). The national carrier is Swaziland Airlink, which had direct flights from Manzini to Johannesburg in 2012. The unrelated Airlink also operated on the same route in 2012.

### Telecommunications

In 2008 there were 44,000 main (fixed) telephone lines; mobile phone subscribers numbered 531,600 in 2008 (45.5 per 100 persons). There were 80,000 internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

The constitutional courts practice Roman-Dutch law. The judiciary is headed by the Chief Justice. There is a High Court and various Magistrates and Courts. A Court of Appeal with a President and three Judges deals with appeals from the High Court. There are 16 courts of first instance. There are also traditional Swazi National Courts.

The population in penal institutions in June 2008 was 2,546 (231 per 100,000 of national population).

### Education

In 2007 there were 232,572 primary school pupils with 7,169 teaching staff. The teacher/pupil ratio has decreased from 40/1 in the 1970s to 32/1. About half the children of secondary school age

attend school. There are also private schools. In 2007 there were 83,049 pupils in secondary schools with 4,358 teaching staff. Many secondary and high schools teach agricultural activities.

There were 5,692 students in higher education in 2006 with 462 academic staff. The University of Swaziland (UNISWA), with its main campus at Kwaluseni, was founded in 1982 and has an enrolment of over 5,000 students.

Rural education centres offer formal education for children and adult education geared towards vocational training. The adult literacy rate in 2008 was 87%.

In 2006 public expenditure on education came to 7.9% of GNI and 24.4% of total government spending.

### Health

In 2005 there were 400 health institutions, of which nine were hospitals and 19 were health centres. There were 184 physicians, 3,345 nurses, 20 dentists and 46 pharmacists in 2000.

### RELIGION

In 2001 there were 480,000 African Christians, 160,000 Protestants and the remainder of the population followed other religions (including traditional beliefs).

### CULTURE

#### Press

In 2008 there were two daily newspapers: *The Times of Swaziland* (English-language with a circulation of 22,000 in 2008), founded in 1897, and *The Swazi Observer* (English, 15,000).

#### Tourism

There were 870,000 non-resident tourists staying at hotels and similar establishments in 2007 (up from 461,000 in 2003), bringing revenue of US\$32m.

### Festivals

The annual Umhlanga (Reed Dance) takes place in Aug. or early Sept. in honour of the Queen Mother. Bush Fire is a festival of music and performing arts held in the Malkerns Valley south of Mbabane in May.

## KEY HISTORICAL EVENTS

Sweden was covered by a thick ice cap until 14,000 years ago, when the ice began to retreat. The first human traces, in southern Sweden, date from 10,000 BC. Between 8000 and 6000 BC the country was populated by hunters and fishermen, using simple stone tools. Artefacts found in graves show that the Bronze Age was marked by a relatively advanced culture. From 500 BC to AD 800 agriculture became the basis for society and the economy. The Viking Age (800–1050) took expansion eastwards. Swedish Vikings reached into today's Russia, where they set up trading stations and principalities, such as Novgorod and Rurik. The Vikings also travelled to the Black and Caspian Seas and developed trading links with the Byzantine Empire and the Arabs.

In 830 the Frankish monk Ansgar introduced Christianity to Sweden but made few converts. In the 11th century, English missionaries had greater success and by the end of the century the country was fully Christianized. Olof Skötkonung, who proclaimed himself ruler of Sweden, supported the new religion.

By 1200 Sweden had become a united kingdom with largely the same borders as it has today, except that Skåne, Halland and Blekinge in the south of Sweden formed part of Denmark, and

Jämtland, Härjedalen and Bohuslän in the west belonged to Norway. There was a struggle for power between the Sverker and Erik families, who ruled alternately in 1160–1250. However, by the middle of the 13th century with the building of royal castles and introduction of provincial administration, the crown was able to assert the authority of the central government and impose laws valid for the whole kingdom. Among the most important figures of the 13th century was Birger Jarl, who promoted the newly founded city of Stockholm. At a time when Hanseatic merchants traded in Sweden, Stockholm contained a large German population while, on the southeast coast, Kalmar and Gotland were controlled by German immigrants. The Hanseatic trading posts to the east included Finland, which was brought into the Swedish kingdom. A new code of law, for the entire country, was introduced in 1350 by King Magnus Eriksson. In 1340 Valdemar Atterdag, King of Denmark, went to war with Sweden over the southern provinces of Skåne, Halland and Blekinge. He attacked Gotland in 1361 in one of the bloodiest battles in Nordic history, to secure a base for further assaults on Sweden and to overthrow the Hanseatic League.

In the 14th century trade increased and until the mid-16th century the Hanseatic League dominated Sweden's trade. In 1350 the Black Death decimated the population. Inheritance and marriage ties united the crowns of Denmark, Norway and Sweden in 1389, under the rule of Queen Margaret of Denmark. In 1397 the loose association known as the Union of Kalmar confirmed her five-year old nephew, Erik of Pomerania, as ruler of the three countries. The Swedish nationalist Sten Sture, who was made king of Sweden in 1470, defeated the Danes at the Battle of Brunkeberg in Stockholm. Following this success, Sten Sture promoted nationalistic sentiment by the public display of a great wood carving of St George slaying the dragon (now placed in Stockholm cathedral) and the setting up of the first Swedish university at Uppsala. The union period (1397–1521) was characterized by a struggle for power between the king, the nobility and the burghers and peasants. These conflicts culminated in the Stockholm Bloodbath in 1520, when eighty leading men in Sweden were executed on orders of the Danish king, Christian II. In 1521 Christian II was overthrown by Gustav Vasa, a Swedish nobleman, who was elected king in 1523.

## Empire Building

Gustav Vasa (ruled 1523–60) laid the foundations of the Swedish national state. With the Reformation, Sweden was converted to Lutheranism and the church became a national institution. At the same time power was concentrated in the hands of the king and in 1544 a hereditary monarchy was established. By the 16th century Scandinavia was divided into two states, Sweden-Finland and Denmark-Norway. Since the dissolution of the union with Denmark and Norway, Swedish foreign policy focused on dominating the Baltic Sea, and this led to wars with Denmark from the 1560s.

In 1611 Gustavus Adolphus (Gustaf II Adolf) consolidated Sweden's position on the Russian side of the Baltic Sea. Sweden defeated Denmark in two wars (1643 and 1657) to take control of the previously Danish provinces of Skåne, Halland, Blekinge and Gotland and the Norwegian provinces of Bohuslän, Jämtland and Härjedalen. Gustavus Adolphus gave his support to the Protestant alliance in the Thirty Years War. This cost him his life but earned Sweden territory in the north of Germany. Finland and the present-day Baltic republics also belonged to Sweden making it a great power in northern Europe.

Following the death of King Karl XII in 1718 the Swedish Parliament (Riksdag) introduced a constitution that abolished

royal absolutism. But royal authority was soon reasserted. After defeat in the Great Northern War (1700–21) against Denmark, Poland and Russia, Sweden lost most of its Baltic territories, including a part of Finland and all its north-German possessions except west Pomerania. During the Napoleonic Wars, Sweden lost Finland to Russia and withdrew from its remaining German provinces. In 1810 Napoleon's marshal Jean-Baptiste Bernadotte assumed power as Karl XIV Johan. He tried to win back Finland from Russia, but had to make do with a union of Sweden and Norway, confirmed by the treaty of Kiel in 1814.

The short war against Norway in 1814 was Sweden's last military adventure. Since then Sweden has favoured neutrality. For this reason, there was no early application to join the EEC (European Economic Community). But in line with a commitment to liberalize trade, Sweden was a founder member of EFTA (European Free Trade Agreement) in 1959. After the Cold War and the collapse of the Soviet Union, the policy of neutrality was seen by many as obsolete. Sweden became a member of the EU (European Union) in 1995.

Following constitutional reforms in 1974 the remaining powers of the king were reduced to purely ceremonial functions. Carl XVI Gustaf, who succeeded the throne in 1973, is the first Swedish king to be bound by the new constitution. In 1980 the order of succession was amended to allow for a female member of the royal family to inherit the crown. Consequently, Princess Victoria is the heir apparent rather than her younger brother Prince Carl Philip.

#### Modern Economy

After the Napoleonic Wars, Sweden suffered economic stagnation. The country was poor with 90% of the population living off the land. Out of a population of five million, over one million emigrated between 1866 and 1914, mostly to North America. Industry did not start to grow until the 1890s. However, it then developed rapidly and after the Second World War Sweden was transformed into one of the leading industrial nations in Europe. In the six years to 1951 the country's GNP rose by 20%. Economic success was partly thanks to the early utilization of hydro-electric power which supported the pulp and paper industries of the northern forests. Swedish inventors created the ball-bearing, the adjustable spanner, the primus stove and the cream separator, as well as the safety match and dynamite. By 1956 the economy was booming, poverty had almost disappeared and unemployment was at a minimum. Sweden was one of the richest countries in Europe.

Social democracy began as the political offshoot of the trade unions. The working class was supported by intellectuals, such as the scientist Hjalmar Branting, who was the first Scandinavian socialist prime minister. The first representative of social democracy entered the government in 1917. Universal suffrage was introduced for men in 1909 and for women in 1921. In the 1930s, when the Social Democrats had become the governing party, plans for the welfare society were laid. Reforms included restrictions on child and female labour, free elementary education and old-age pensions. A four-party coalition for the duration of the Second World War was succeeded by a Social Democrat government with Per Albin Hansson as prime minister. Following his death in 1946, Tage Erlander became prime minister and stayed in office until 1969. He was succeeded by Olof Palme who was prime minister between 1969 and 1976. Owing to the rise in oil prices in 1973, unemployment increased. From the mid-1970s, improvements in living standards slowed. Economic crisis drove the Social Democrats out of government and in 1976 a non-socialist coalition was formed under Centre Party chairman, Thorbjörn Fälldin. Conflicts over the expansion of nuclear power led to several government reshuffles. In 1982 the Social Democrats resumed office with Olof Palme as prime minister. The assassination of Palme in 1986 shook the country which had been spared political violence for nearly 200 years. Ingvar Carlsson

took over as head of government. In the 1990s industrial production fell and unemployment rose, which led to a high budget deficit and increased national debt. Popular dissatisfaction showed in the 1991 election, when a non-socialist coalition government was formed with Carl Bildt as prime minister. Launching a programme of deregulation and privatization, Bildt did much to prepare the economy for closer involvement with Europe. Capital gains taxes were reduced, as too were social benefits. But the government failed to reduce unemployment, the budget deficit or the national debt. Hence, the 1994 election put the Social Democrats back in power, with Ingvar Carlsson again as prime minister. In 1996 he stepped down to be replaced by Göran Persson. Persson led a series of minority governments. His third term, which began in 2002, was marked by the murder of his foreign minister, Anna Lindh, in 2003 and the rejection by referendum of Sweden's entry into the single European currency. In Sept. 2006 the Social Democrats emerged from elections as the single biggest party but Fredrik Reinfeldt of the Moderate Party was able to form a centre-right 'Alliance for Sweden' coalition to end 12 years of Social Democratic government. Despite economic problems, the country still boasts one of the highest standards of living and one of the most advanced welfare systems.

#### TERRITORY AND POPULATION

Sweden is bounded in the west and northwest by Norway, east by Finland and the Gulf of Bothnia, southeast by the Baltic Sea and southwest by the Kattegat. The area is 450,295 sq. km, including water (96,000 lakes) totalling 39,960 sq. km. At the last census, in 1990, the population was 8,587,353. Parliament decided in 1995 to change to a register-based method of calculating the population. The recorded population at 31 Dec. 2009 was 9,340,682; density 23 per sq. km. In 2011, 84-8% of the population lived in urban areas.

The UN gives a projected population for 2015 of 9.65m.

**CONSTITUTION AND GOVERNMENT**

The reigning King is **Carl XVI Gustaf**, b. 30 April 1946, succeeded on the death of his grandfather Gustaf VI Adolf, 15 Sept. 1973, married 19 June 1976 to Silvia Renate Sommerlath, b. 23 Dec. 1943 (Queen of Sweden). *Daughter and Heir Apparent*: Crown Princess Victoria Ingrid Alice Désirée, Duchess of Västergötland, b. 14 July 1977, married 19 June 2010 Daniel Westling, b. 15 Sept. 1973 (*offspring*: Princess Estelle Silvia Ewa

Mary, b. 23 Feb. 2012); *son*: Prince Carl Philip Edmund Bertil, Duke of Värmland, b. 13 May 1979; *daughter*: Princess Madeleine Thérèse Amélie Josephine, Duchess of Hälsingland and Gästrikland, b. 10 June 1982. *Sisters of the King*. Princess Margaretha, b. 31 Oct. 1934, married 30 June 1964 to John Ambler, died 31 May 2008; Princess Birgitta (Princess of Sweden), b. 19 Jan. 1937, married 25 May 1961 (civil marriage) and 30 May 1961 (religious ceremony) to Johann Georg, Prince of Hohenzollern; Princess Désirée, b. 2 June 1938, married 5 June 1964 to Baron Niclas Silfverschiöld; Princess Christina, b. 3 Aug. 1943, married 15 June 1974 to Tord Magnuson. *Uncles of the King*. Count Sigvard Bernadotte of Wisborg, b. 7 June 1907, died 4 Feb. 2002; Count Carl Johan Bernadotte of Wisborg, b. 31 Oct. 1916, died 5 May 2012.

Under the 1975 constitution Sweden is a representative and parliamentary democracy. The King is Head of State, but does not participate in government. Parliament is the single-chamber *Riksdag* of 349 members elected for a period of four years in direct, general elections.

The manner of election to the *Riksdag* is proportional. The country is divided into 29 constituencies. In these constituencies 310 members are elected. The remaining 39 seats constitute a nationwide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency if it has obtained at least 12% of the votes cast there.

A parliament, the *Sameting*, was instituted for the Sami (Lapps) in 1993.

## CURRENT LEADERS

### Fredrik Reinfeldt

#### *Position*

Prime Minister

#### *Introduction*

Fredrik Reinfeldt led a centre-right alliance to victory in the legislative elections of Sept. 2006, ousting the Social Democrats (SAP) from over a decade in power. After taking over the leadership of the Moderate Party in 2003, Reinfeldt rebranded it as a centrist party advocating entrepreneurship and job creation coupled with reform of Sweden's cherished welfare system. He retained the premiership following the Sept. 2010 elections.

#### *Early Life*

John Fredrik Reinfeldt was born in Stockholm on 4 Aug. 1965. He joined the youth wing of the conservative Moderate Party in 1983. Having completed military service, in 1990 he graduated in business and economics from Stockholm University, where he was active in student politics. He embarked on a political career, becoming chairman of the Moderate Youth League and standing in the legislative elections of Sept. 1991. He won a seat in parliament as the Moderate Party emerged as the leading non-socialist party. The SAP remained the largest single party, but without an overall majority, and Moderate leader Carl Bildt became the first Conservative prime minister since 1930, heading a four-party coalition. The government attempted to tackle the economic crisis that gripped Sweden in 1992 by introducing market reforms, imposing spending cuts and privatizing publicly-owned enterprises. It also sought accession to the European Union.

In the Sept. 1994 elections the Moderates held on to the 80 seats they had won in 1991, but some of their centre-right

coalition partners fared badly and the Social Democrats were returned to power. After Bo Lundgren succeeded Bildt as Moderate leader in 1999, Reinfeldt was promoted to chairman of the parliamentary justice committee in 2001–02.

The Moderate Party's poor performance in the 2002 elections was compounded by a scandal in 2003 in which some members were accused of racism. Lundgren was forced to resign as leader in Oct. 2003 and Reinfeldt was elected unanimously to succeed him. Reinfeldt rebranded the party as the New Moderates and shifted the focus to the centre ground. In the run-up to the Sept. 2006 legislative elections, he formed the Alliance for Sweden, aiming to unite a four-party centre-right coalition (New Moderates plus the Centre Party, Liberal Party and Christian Democrats). Presenting a joint manifesto, the alliance narrowly beat the SAP. The New Moderates took 26.1% of the vote, a record for the party, and Reinfeldt was nominated prime minister on 5 Oct. 2006.

#### *Career in Office*

On taking office, Reinfeldt initiated a programme of reforms aimed at strengthening incentives to work, reducing welfare dependency and streamlining the state's role in the economy. However, in the wake of the global financial crisis, Sweden slipped into recession in 2008, and in Dec. Reinfeldt proposed a stimulus package to boost the economy. The downturn nevertheless had a significant impact on Sweden's trade-oriented economy in 2009 as exports declined and job losses mounted.

Reinfeldt's own party has favoured joining the single European currency and, in principle, supports membership of NATO. In 2008 the Alliance, supported by the SAP, ratified the Lisbon Treaty (signed in Dec. 2007) on EU institutional and administrative reform. From July–Dec. 2009 Sweden held the rotating EU presidency and oversaw the treaty's implementation. The Swedish presidency also pressed the EU to take the lead in fighting climate change. In Feb. 2009 Reinfeldt's government announced its intention to lift a 30-year-old ban on building new nuclear energy capacity.

In the Sept. 2010 legislative elections the Alliance fell narrowly short of a parliamentary majority but Reinfeldt formed a new minority government the following month with no changes in key ministerial portfolios.

## DEFENCE

The Supreme Commander is, under the government, in command of the three services. The Supreme Commander is assisted by the Swedish Armed Forces HQ. There is also a Swedish Armed Forces Logistics Organization.

Conscripted military service has been phased out and ended officially on 1 July 2010. 'Required military service' will only be enacted if the country feels threatened.

In 2008 military expenditure totalled US\$6,659m. (US\$736 per capita), representing 1.4% of GDP. Sweden's national security policy is currently undergoing a shift in emphasis. Beginning with the decommissioning of obsolete units and structures, the main thrust of policy is the creation of contingency forces adaptable to a variety of situations.

When Sweden joined the European Union in 1995 the government stressed that membership did not imply any change in the country's traditional policy of non-participation in military alliances, with the option of staying neutral in the event of war in its vicinity.

Sweden has modern air raid shelters with capacity for some 7m. people. Since this falls short of providing protection for the whole population, evacuation and relocation operations would be necessary in the event of war.

The Swedish Civil Contingencies Agency is responsible for civil protection and emergency preparedness and has a mandate spanning the entire spectrum of threats and risks, including wartime defence.

### Army

The Army consists of one division HQ and divisional units and three army brigade command and control elements. Army strength, 2007, 10,200 (4,300 conscripts). The Army can mobilize a reserve of 225,000. Voluntary auxiliary organizations numbered 42,000.

### Navy

The Navy has two naval warfare flotillas and one submarine flotilla.

The personnel of the Navy in 2007 totalled 7,900 (active manpower, including 2,000 conscripts, 1,300 coastal defence and 320 naval aviation). Reserve strength, 20,000. In addition there is a paramilitary coast guard numbering 600.

### Air Force

The Air Force consists of eight air-base battalions, four fighter squadrons, four air transport squadrons, one fighter control and air surveillance battalion, one anti-submarine warfare squadron, one signal intelligence squadron, one airborne early warning squadron and a training school.

Strength (2007) 5,900 (1,500 conscripts), plus 17,000 reserves. There were 130 combat-capable aircraft in 2007 (JAS 39 *Gripens*).

In 1998 the helicopter units of the Swedish Army and Navy were merged with those of the Air Force to form a single helicopter wing, consisting of four squadrons and an independent unit, which since 2003 has fallen under the direct authority of the Air Force. Strength (2007), 1,050 (250 conscripts).

## INTERNATIONAL RELATIONS

In a referendum held on 14 Sept. 2003 Swedish voters rejected their country's entry into the common European currency, 56.1% opposing membership of the euro against 41.8% voting in favour. Turnout was 81.2%.

## ECONOMY

Services accounted for 70% of GDP in 2007, industry 29% and agriculture 2%.

According to the anti-corruption organization *Transparency International*, Sweden ranked fourth in the world in a 2012 survey of the countries with the least corruption in business and government. It received 88 out of 100 in the annual index.

Sweden gave US\$5.6bn. in international aid in 2011, which at 1.02% of GNI made it the world's most generous developed country as a percentage of its gross national income.

### Overview

Sweden combines an extensive welfare state with a market economy. Tax revenue as a percentage of GDP is among the highest in the world. Monetary policy has targeted a 2% inflation rate since 1993 and the IMF has praised the design and operation of the inflation-targeting framework implemented by the Riksbank. In Sept. 2003 a referendum rejected adoption of the euro.

After the 2001 global technology crash that damaged Ericsson, one of Sweden's largest companies, the economy experienced an upswing until 2008, with strong recovery in the telecommunications and automobile sectors fuelling export growth from 2003–07. Growing exports combined with rising production and low interest rates prompted a revival in business investment. Growth was further buoyed by gains in consumer wealth. However, the economy was hit hard by the global financial crisis, with exports significantly reduced and recession hitting in 2008. A rescue package for the banking sector was announced in early 2009 and Sweden enjoyed a stronger recovery than many other advanced countries. The employment rate was 65.7% in Oct. 2011. Effective employment is lower than that portrayed because of large numbers of employees benefiting from sick leave, social assistance, labour market programmes and mid-life sabbaticals. So far Sweden's strong growth has failed to make an impact on unemployment, as increased employment has been

offset by new entrants into the labour market. The unemployment rate, at 8.4% in 2010, has remained above 6%. The youth unemployment rate is particularly high, at over 22% for those aged 15–24 in the period July–Sept. 2011.

26.2% of the labour force was employed by government in 2008, down 1.5% since 2000. General government expenditure as a percentage of GDP was the fourth highest in the OECD in 2009. Sweden had the EU's third highest level of expenditure on social protection per inhabitant in 2007.

A number of sectors, including electricity, telecommunications and parts of transport, have been deregulated. Sweden is facing pressure from the EU to privatize its state monopolies in the pharmaceutical, construction and alcoholic beverage sectors.

Reducing unemployment remains a priority. The turbulence in the euro is a risk to economic recovery. The IMF warns that Swedish house prices are over-inflated.

### Currency

The unit of currency is the *krona* (SEK), of 100 *öre*. Inflation rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |

Sweden's total GDP in 2011 was US\$539.7bn.

Sweden was ranked fourth in the Global Competitiveness Index in the World Economic Forum's *Global Competitiveness Report 2012–2013*. The index analyses 12 areas of competitiveness for over 100 countries including macroeconomy, higher education and training, institutions, innovation and infrastructure.

In 2008 the state debt amounted to 1,119bn. kr.

### Banking and Finance

The central bank and bank of issue is the Sveriges Riksbank. The bank has 11 trustees, elected by parliament, and is managed by a directorate, including the governor, appointed by the trustees. The *Governor* is Stefan Ingves, appointed for a six-year term. In 2008 there were 118 banks (30 Swedish commercial banks, 33 foreign banks, 53 savings banks and two co-operative banks). Bank deposits from the public in 2008 amounted to 2,201bn. kr.; lending to the public in 2008 amounted to 3,033bn. kr. The largest banks are Nordea Bank AB (generally known as Nordea; previously MeritaNorbanken, formed in 1997 when Nordbanken of Sweden merged with Merita of Finland), Handelsbanken, Skandinaviska Enskilda Banken (generally known as SEB) and Swedbank (formerly FöreningsSparbanken). In April 2000 MeritaNorbanken acquired Denmark's Unidanmark, thereby becoming the Nordic region's biggest bank in terms of assets. It became Nordea Bank AB in Dec. 2001. By 2009 approximately 71% of the Swedish population were using e-banking.

In June 2012 Sweden's gross external debt totalled US\$1,006,665m.

There is a stock exchange in Stockholm.

### ENERGY AND NATURAL RESOURCES

In 2007 Sweden obtained 31% of its energy from oil, down from 77% in 1970. It aims to end fossil fuel dependency completely by 2020. In 2008, 44.4% of energy consumption came from renewables (wind power, solar power, hydro-electric power, tidal power, geothermal energy and biomass), compared to the European Union average of 10.3%. Sweden has by some margin the highest proportion of its energy consumption coming from renewables of any EU member country. A target of 49% has been set by the EU for 2020.

### Environment

Sweden's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 6.2 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Sweden second in the world behind Switzerland, with 93.1%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

### Electricity

Sweden is rich in hydro-power resources. Installed capacity was 34,199 MW in 2007, of which 16,505 MW was in hydro-electric plants, 8,975 MW in nuclear plants and 7,890 MW in thermal plants. Electricity production in 2007 was 148,557m. kWh; consumption was 160,759 kWh. In 2007 consumption per capita was 16,478 kWh. A referendum of 1980 called for the phasing out of nuclear power by 2010. In Feb. 1997 the government began

denuclearization by designating one of the 12 reactors for decommissioning. However, in Feb. 2009 the government announced an end to the 30-year ban on nuclear plant construction. In 2010 there were ten nuclear reactors in operation.

### Minerals

Sweden is a leading producer of iron ore with around 2% of the world's total output. It is the largest iron ore exporter in Europe. There are also deposits of copper, gold, lead, zinc and alum shale containing oil and uranium. Iron ore produced, 2005, 23.3m. tonnes; zinc (mine output, zinc content), 214,600 tonnes; copper (mine output, copper content), 97,800 tonnes.

### Agriculture

In 2005 agricultural land totalled 3,216,839 ha. There were 2,703,333 ha. of arable land in 2005 and 513,505 ha. of natural pasture on agricultural holdings of more than 2 ha. Of the land used for arable farming in 2007, 2–5 ha. holdings covered a total area of 49,162 ha.; 5.1–10 ha. holdings covered 99,272 ha.; 10.1–20 ha., 194,006; 20.1–30 ha., 175,331; 30.1–50 ha., 322,764; 50.1–100 ha., 629,899 and holdings larger than 100 ha. covered 1,177,258 ha. There were 72,609 agricultural enterprises in 2007 compared to 150,014 in 1971 and 282,187 in 1951. Around 37% of the enterprises were between 5 and 20 ha. In 2005 Sweden set aside 222,268 ha. (7.3% of its agricultural land—one of the highest proportions in the world) for the growth of organic crops.

Agriculture accounts for 5.8% of exports and 7.9% of imports. The agricultural sector employs 3% of the workforce.

Production (in 1,000 tonnes) in 2008: milk, 3,019; meat, 406; cheese, 114; butter, 39.

Livestock, 2008: pigs, 1,609,289; cattle, 1,558,381; sheep and lambs, 524,780; poultry, 7,194,759. There were 249,191 reindeer in Sami villages in 2007. Harvest of moose during open season 2008: 83,554.

### Forestry

Forests form one of the country's greatest natural assets. The growing stock includes 42% spruce, 39% pine and 16% broad-leaved. In 2010 forests covered 28.20m. ha. (69% of the land area). Sweden's largest forest owner is Sveaskog, with holdings of 4.3m. ha. Since 2001 the company has been completely state-owned after taking over the part-privatized AssiDomän corporation. Public ownership (including the state) accounts for 19% of the forests, limited companies own 25% and the remaining 56% is in private hands. Of the 78.2m. cu. metres of wood felled in 2007, 40.1m. cu. metres were sawlogs, 31.7m. cu. metres pulpwood, 5.9m. cu. metres fuelwood and 0.5m. cu. metres other.

### Fisheries

In 2008 the total saltwater catch was 218,955 tonnes, worth 968.4m. kr. In 2008 the saltwater fishing fleet comprised 1,464 vessels and there were 1,599 professional fishermen.

### INDUSTRY

The leading companies by market capitalization in Sweden in March 2012 were: Hennes & Mauritz (H&M), a clothing company (US\$52.7bn.); Nordea Bank AB (US\$36.7bn.); and Ericsson, a technology hardware and equipment company (US\$33.8bn.).

Manufacturing is mainly based on metals and forest resources. Chemicals (especially petrochemicals), building materials and decorative glass and china are also important.

| Industry groups   | Sales value of production (gross) in 1m. kr. 2007 |

### Labour

In 2008 there were 4,898,000 persons in the labour force, of which 93.8% were employed. The main areas of employment were as follows: trade and communication (838,000); financial services and business activities (739,000); health and social work (721,000); manufacturing, mining, quarrying, electricity and water supply (689,000); education, research and development (537,000); personal services and cultural activities, and sanitation (397,000); construction (306,000); public administration (261,000); agriculture, forestry and fishing (101,000). The unemployment rate in Dec. 2012 was 7.8%, but with youth unemployment of 24.0% in the third quarter of 2012. In 2008, 69.6% of men and 63.8% of women were in employment. The average monthly salary in 2008 was 27,100 kr. (29,400 kr. for men and 24,700 kr. for women).

In 2008 a total of 106,801 working days were lost through strikes, compared to 1,971 in 2006.

### COMMUNICATIONS

#### Roads

In 2009 there were 215,597 km of roads open to the public of which 98,467 km were state-administered roads (main roads, 15,329 km; secondary roads, 83,138 km). There were also 1,855 km of motorway. 79% of all roads in 2005 were surfaced. Motor vehicles in 2008 included 4,279,000 passenger cars, 510,000 lorries, 13,000 buses and 489,000 motorcycles and mopeds. There were 1,015,997 Volvos, 434,757 Saabs, 343,060 Fords and 327,379 Volkswagens registered in 2006. Sweden has one of the lowest death rates in road accidents of any industrialized country, at 5.1 deaths per 100,000 people in 2007. 397 people were killed in traffic accidents in 2008.

#### Rail

Total length of railways at 31 Dec. 2008 was 11,022 km (7,866 km electrified). In 2008, 179m. passengers and 67m. tonnes of freight were carried. There is a metro in Stockholm (110 km), and tram/light rail networks in Stockholm (8 km), Gothenburg (118 km) and Norrköping (13 km).

#### Civil Aviation

The main international airports are at Stockholm (Arlanda), Gothenburg (Landvetter), Stockholm (Skavsta) and Malmö (Sturup). The principal carrier is Scandinavian Airlines System (SAS), which resulted from the 1950 merger of the three former Scandinavian airlines. SAS Sverige AB is the Swedish partner (SAS Denmark A/S and SAS Norge ASA being the other two). The Swedish government is the principal shareholder of SAS with a 21.4% share. The governments of Denmark and Norway each own 14.3%. Since 2001, 50% of SAS shares have been listed on the stock exchanges of Stockholm, Copenhagen and Oslo. SAS had a market capitalization in Oct. 2009 of 11,918m. kr. and an operating revenue in 2008 of 53,195m. kr.

Malmö Aviation, a Sweden-based carrier, operates some international as well as domestic flights.

In 2008 Stockholm (Arlanda) handled 18,136,165 passengers (13,281,466 on international flights) and 187,000 tonnes of freight. Gothenburg (Landvetter) was the second busiest airport, handling 4,303,722 passengers (3,158,822 on international flights) and 100,000 tonnes of freight. Malmö handled 1,882,428 passengers in 2006 (1,181,970 on domestic flights).

#### Shipping

The mercantile marine consisted on 31 Dec. 2008 of 1,036 vessels of 4.53m. GT. Cargo vessels entering Swedish ports in 2008 numbered 19,396 (125.74m. GT) while there were 75,343

passenger ferries (1,011.83m. GT). The number of cargo vessels leaving Swedish ports in 2008 totalled 19,389 (125.47m. GT) and the number of passenger ferries leaving was 75,636 (1,015.82m. GT).

The busiest port is Gothenburg. In 2007 a total of 42.33m. tonnes of goods were loaded and unloaded there (39.46m. tonnes unloaded from and loaded to foreign ports). Other major ports are Brofjorden, Trelleborg, Malmö and Luleå.

### Telecommunications

In 2008 there were 5,323,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 10,892,000 (1,183.3 per 1,000 persons). In June 2000 the state sold off a 30% stake in the Swedish telecommunications operator Telia. In Dec. 2002 Telia and the Finnish telecommunications operator Sonera merged to become TeliaSonera. The Swedish state owns 37.3% and the Finnish state 11.7%. Internet users numbered 8.1m. in 2008, or 87.8% of the total population (the second highest percentage in the world, after Iceland). In Dec. 2010 there were 82.9 wireless broadband subscribers per 100 inhabitants and 31.8 fixed broadband subscribers per 100. In March 2012 there were 4.5m. Facebook users.

According to the World Economic Forum's *Global Information Technology Report 2010–11* Sweden is ranked first in the world in exploiting global information technology developments.

## SOCIAL INSTITUTIONS

### Justice

Sweden has two parallel types of courts—general courts that deal with criminal and civil cases and general administrative courts that deal with cases related to public administration. The general courts have three instances: district courts, courts of appeal and the Supreme Court. There are 60 district courts, of which 23 also serve as real estate courts and four courts of appeal. The administrative courts also have three instances: 23 county administrative courts, four administrative courts of appeal and the Supreme Administrative Court. In addition, a number of special courts and tribunals have been established to hear specific kinds of cases and matters.

Every district court, court of appeal, county administrative court and administrative court of appeal has a number of lay judges. These take part in the adjudication of both specific concrete issues and matters of law; each has the right to vote.

Criminal cases are normally tried by one judge and three lay judges. Civil disputes are normally heard by a single judge or three judges. In the courts of appeal, criminal cases are determined by three judges and two lay judges. Civil cases are tried by three or four judges. In the settlement of family cases, lay judges take part in the proceedings in both the district court and in the court of appeal. Proceedings in the general administrative courts are in writing; i.e. the court determines the case on the basis of correspondences between the parties. Nevertheless, it is also possible to hold a hearing. The cases are determined by a single judge or one judge and three lay judges. In the administrative court of appeal, cases are normally heard by three judges or three judges and two lay judges.

Those who lack the means to take advantage of their rights are entitled to legal aid. Everyone suspected of a serious crime or taken into custody has the right to a public counsel (advocate). The title advocate can only be used by accredited members of the Swedish Bar Association. Qualifying as an advocate requires extensive theoretical and practical training. All advocates in Sweden are employed in the private sector.

The control over the way in which public authorities fulfil their commitments is exercised by the Parliamentary Ombudsmen and the Chancellor of Justice. In 2008–09 the Ombudsmen received 6,918 cases altogether, of which 68 were instituted on their own initiative. Sweden has no constitutional court. However, in each particular case the courts do have a certain right to ascertain

whether a statute meets the standards set out by superordinate provisions.

The population in penal institutions in April 2006 was 7,450 (82 per 100,000 of national population). There are 56 prisons spread throughout the country.

There were 209 incidents of murder, manslaughter and assault resulting in death in 2008 (121 in 1990 and 258 in 2007).

### Education

In 2008–09 there were 906,189 pupils in 4,755 compulsory schools. In secondary education at the higher stage (the integrated upper secondary school) there were 396,336 pupils in Oct. 2008 (excluding pupils in the fourth year of the technical course regarded as third-level education). The folk high schools, 'people's colleges', had 27,508 pupils on courses of more than 15 weeks in the autumn of 2008.

In municipal adult education there were 170,318 students in 2007–08.

There are also special schools for pupils with visual and hearing impairments (516 pupils in 2008) and for those who are intellectually disabled (22,595 pupils).

In 2007–08 there were 384,733 students enrolled for undergraduate studies in integrated institutions for higher education. The number of students enrolled for postgraduate studies in 2008 was 16,922.

In 2007 public expenditure on education came to 6.6% of GDP (and accounted for 12.7% of total government expenditure). The adult literacy rate is at least 99%.

### Health

In 2008 there were 29,100 doctors, 4,100 dentists, 71,400 nurses and midwives and 25,899 hospital beds. In 2008 Sweden spent 9.4% of its GDP on health.

In 2007, 14.5% of Swedes aged 15 and over smoked on a daily basis (males, 12%; females, 17%), the lowest percentage of any major industrialized country.

### Welfare

Social insurance benefits are granted mainly according to uniform statutory principles. All persons resident in Sweden are covered, regardless of citizenship. All schemes are compulsory, except for unemployment insurance. Benefits are usually income-related. Most social security schemes are at present undergoing extensive discussion and changes.

| Type of social insurance scheme | Payments 2008 (in 1m. kr.) |
|---------------------------------|----------------------------|
| Old-age pension                 | 219,376                    |

Under a Pension Reform Plan Sweden is one of the world's leaders in the shift to private pension systems. In the new system each worker's future pension will be based on the amount of money accumulated in two separate individual accounts. The bulk of retirement income will come from a notional account maintained by the government on behalf of the individual, but a significant portion of retirement income will come from a private individual account. There are two types of pension—the income pension and the premium pension. The income pension comes under a pay-as-you-go system, with the premium pension based on contributions invested in a fund chosen by the insured person.

There is also a guarantee pension for those aged 65 and resident in Sweden for the last three years but without an earnings-related pension. Its value in 2010 was 90,312 kr. for a single pensioner and 80,560 kr. for a married pensioner.

## RELIGION

The Swedish Lutheran Church was disestablished in 2000. It is headed by Archbishop Anders Wejryd (b. 1948) and has its metropolitan see at Uppsala. In 2008 there were 13 bishoprics and 1,802 parishes. The clergy are chiefly supported from the parishes and the proceeds of the church lands. Around 70% of the population, equivalent to 6.6m. people, belong to the Church of Sweden. Other denominations, in 2010: Pentecostal Movement, 82,769 members; The Mission Covenant Church of Sweden, 60,445; InterAct, 32,138; Salvation Army, 5,159 soldiers; The Baptist Union of Sweden, 17,441; Swedish Alliance Mission, 13,687. There were also 96,950 Roman Catholics (under a Bishop resident at Stockholm). The Orthodox and Oriental churches number around 120,000 members.

Although there are no official statistics on the number of Muslims, their numbers were estimated at 450,000–500,000 in 2010. An estimated 20,000 Jews lived in Sweden in 2010.

## CULTURE

Umeå will be one of two European Capitals of Culture for 2014. The title attracts large European Union grants.

### World Heritage Sites

There are 15 sites under Swedish jurisdiction that appear on the UNESCO World Heritage List: the royal palace of Drottningholm (1991); the Viking settlements of Birka and Hovgården (1993); the Engelsberg ironworks (1993); the Bronze Age rock carvings in Tanum (1994); Skogskyrkogården cemetery (1994); the Hanseatic town of Visby (1995); the Laponian area (home of the Sami people in the Arctic circle) (1996); the church town of Gammelstad in Luleå (1996); the naval port of Karlskrona (1998); the Kvarken Archipelago and High Coast (2000 and 2006), shared with Finland; the agricultural landscape of Southern Öland (2000); the Mining Area of the Great Copper Mountain in Falun (2001); the Varberg Radio Station (2004) at Grimeton in southern Sweden; the Struve Geodetic Arc (2005), a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth and is shared with nine other countries; and the Decorated Farmhouses of Hälsingland (2012), an ensemble of timber buildings in northeastern Sweden, a fusion of local building and folk art traditions.

### Press

In 2008 there were 168 daily newspapers with an average weekday net circulation of 3.7m. The leading papers in terms of circulation in 2008 were the free *Metro*, with an average daily circulation of 634,000 copies; the Social Democratic *Aftonbladet*, with an average daily circulation of 378,000; the independent *Dagens Nyheter*, with an average daily circulation of 340,000; and the liberal tabloid *Expressen*, with an average daily circulation of 304,000. In 2008 a total of 26,182 book titles were published.

## Tourism

In 2008 Swedes stayed 20,042,193 nights in hotels in Sweden and 4,770,359 in holiday villages and youth hostels; and foreign visitors stayed 5,830,414 nights in hotels and 1,559,688 in holiday villages and youth hostels. There were 2,976 accommodation establishments in 2008 with 299,875 beds. Of 12.5m. trips abroad with an overnight stay undertaken by Swedes in 2006, 2.5m. were for business purposes and 10.0m. were leisure trips.

## Festivals

Important traditional festivals include Lucia, held in Dec, and Walpurgis Night, a spring celebration held in April. The eight-day Malmö Festival includes live music and other cultural events and is held annually in Aug.

## KEY HISTORICAL EVENTS

Neolithic settlements from around 3000 BC have been found. Celtic clans settled in fertile valleys in parts of present-day Switzerland from around 1500 BC, with the Raetians in the east and the Helvetii to the west. A Bronze Age Celtic civilization reached its height around 100 BC. An attempt by the Helvetii to spread west into Gaul was quashed by Julius Caesar in 58 BC. As the Roman Empire expanded northward and westward, Switzerland came under its domain, centred on Aventicum (Avenches). The Romans constructed a road network from the strategically important Alpine passes but attempts to conquer Germanic tribes to the north and east of the Rhine were thwarted in AD 9. Garrisons along the Rhine from Lake Constance to Basle were maintained until Roman forces withdrew in 401.

The Germanic Alemanni tribe became dominant in northern and central Switzerland as Rome's influence declined, while Latin-speaking Burgundians held sway in the Jura mountains. Celtic tribes were gradually subsumed over the following centuries. Frankish rulers established monasteries, enabling the spread of Christianity and feudalism throughout west-central Europe in the seventh and eighth centuries. Following the signing of the Treaty of Verdun in 840 western and southwest Switzerland came under the jurisdiction of the Burgundian king, Lothair I, and the north and east formed part of the domain of Louis the German. The Burgundian lands became part of the Holy Roman Empire in 1033, while various independent dukedoms emerged in the north and east, notably Swabia, Zähringen, Savoy and Kyberg. The Kyberg domains of central Switzerland passed to the Habsburgs in 1264. The expansion of this dynasty led to three mountain-based clans—the Uri, the Schwyz and the Unterwalden—forming a

defensive league. Their agreement, renewed in 1291, is considered the founding document of the Swiss nation. The league defeated the Habsburgs at Morgarten in 1315 and by 1353 the confederation had added the cantons of Glarus and Zug and the city states of Lucerne, Zürich and Bern, forming the 'Old Federation' of eight states within the Holy Roman Empire.

Defeat at the hands of French forces at Marignano in 1515 led the Swiss confederation to form a 'perpetual alliance' with France and marked the start of a neutral stance. Relations between the cantons deteriorated in the 16th century and during the Reformation, when the city-states of Zürich, Bern, Basle and St Gallen adopted Protestantism while Catholicism was retained in the four forest cantons. The 1531 Treaty of Kappel ended the civil war and preserved Catholicism in the rural south, though religious tensions continued in the late 16th century with the rural cantons and city states linked only by neutrality in the Thirty Years War. The War's end in 1648 and the subsequent Peace of Westphalia saw Switzerland declared independent of the Holy Roman Empire.

Geneva, Basle, Bern and Zürich grew prosperous in the 18th century, becoming Enlightenment centres of intellectual and cultural achievement. Power remained with the oligarchs until the arrival of French Revolutionary troops in their offensive against Austrian and Russian forces in 1798. Napoleon's Act of Mediation in 1803 partially restored political power to the cantons but it was not until 1815 that the Congress of Vienna re-established Switzerland's independence, its perpetual neutrality guaranteed by Austria, France, Great Britain, Portugal, Prussia, Spain and Sweden.

In 1848 a new constitution was approved following disputes between Protestant and Catholic cantons. The 22 cantons were linked by a federal government (consisting of a bicameral parliament that elected a seven-member governing council) and a federal tribunal to rule on intra-cantonal disputes. This constitution was revised in 1874 to allow for national and local referenda on a range of issues.

Switzerland maintained its status of armed neutrality in the First World War but was unable to avoid mass unemployment, leading to a national strike in 1918 and demands for social security. The 1919 Treaty of Versailles reaffirmed Switzerland's neutrality and a year later it joined the League of Nations (based in Geneva). The Federal Council issued a declaration of neutrality at the start of the Second World War and much effort went in to shoring up defences and remaining self-sufficient while surrounded by the Axis powers. The Swiss government subsequently expressed regrets about the country's behaviour in the Second World War following a report by an independent panel of historians on relations with the Nazis.

In 1959 Switzerland became a founding member of the European Free Trade Association but has remained outside the European Union. It joined the UN by a narrow majority in a referendum in 2002. In 2005 Switzerland signed up to the Schengen accord.

## TERRITORY AND POPULATION

In Dec. 2011 there were 4,032,400 females and 1,816,000 resident foreign nationals out of a total population of 7,954,700. In 2011 foreign nationals made up 22.8% of the population, one of the highest proportions in western Europe. In 2011, 73.7% of the population lived in urban areas. Population density in 2010 was 189 per sq. km.

The UN gives a projected population for 2015 of 7.81m.

German, French, Italian and Romansch (which is spoken mostly in Graubünden) are the official languages. German is spoken by the majority of inhabitants in 19 of the 26 cantons, French in Fribourg, Vaud, Valais, Neuchâtel, Jura and Geneva, and Italian in Ticino. At the 2000 census 63.7% of the population gave German as their mother tongue, 20.4% French, 6.5% Italian, 0.5% Romansch and 9.0% other languages.

At the end of 2011 the five largest cities were Zürich (377,000); Geneva (188,200); Basle (164,500); Lausanne (129,400); Berne (125,700). In 2011 the population figures of conurbations were: Zürich, 1,204,000; Geneva, 530,700; Basle, 500,600; Berne, 355,600; Lausanne, 342,200; other towns, 2008 (and their conurbations), Winterthur, 98,200 (135,000); St Gallen, 72,000 (148,500); Lucerne, 59,200 (205,400); Lugano, 54,400 (133,400); Biel, 50,000 (92,300).

The World Health Organization's *World Health Statistics 2009* put citizens of Switzerland in equal second

place in a 'healthy life expectancy' list (level with San Marino and only behind Japan), with an expected 75 years of healthy life for babies born in 2007.

## CLIMATE

The climate is largely dictated by relief and altitude, and includes continental and mountain types. Summers are generally warm, with quite considerable rainfall; winters are fine, with clear, cold air. Berne, Jan. 32°F (0°C), July, 65°F (18.5°C). Annual rainfall 39.4" (986 mm).

## CONSTITUTION AND GOVERNMENT

A new constitution was accepted on 18 April 1999 in a popular vote and came into effect on 1 Jan. 2000, replacing the constitution dating from 1874. Switzerland is a republic. The highest authority is vested in the electorate, i.e. all Swiss citizens over 18. This electorate, besides electing its representatives to the Parliament, has the voting power on amendments to, or on the revision of, the Constitution as well as on Switzerland joining international organizations for collective security or supranational communities (mandatory referendum). It also takes decisions on laws and certain international treaties if requested by 50,000 voters or eight cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support required for such demands being 100,000 voters (popular initiative). The Swiss vote in more referendums—three or four a year—than any other nation. A mandatory referendum and a constitutional amendment demanded by popular initiative require a double majority (a majority of the voters and a majority of the cantons voting in favour of the proposal) to be accepted while a facultative referendum is accepted if a majority of the voters vote in favour of the proposal. Between 1893 and March 2013, 183 initiatives were put to the vote but only 20 were adopted. The highest turnout for a popular initiative has been 80.5% and the lowest 32.1%.

The Federal government is responsible for legislating matters of foreign relations, defence (within the framework of its powers), professional education and technical universities, protection of the environment, water, public works, road traffic, nuclear energy, foreign trade, social security, residence and domicile of foreigners, civil law, banking and insurance, monetary policy and economic development. It is also responsible for formulating policy concerning statistics gathering, sport, forests, fishery and hunting, post and telecommunications, radio and television, private economic activity, competition policy, alcohol and gambling.

The legislative authority is vested in a parliament of two chambers: the Council of States (*Ständerat/Conseil des États*) and the National Council (*Nationalrat/Conseil National*). The Council of States is composed of 46 members, chosen and paid by the 23 cantons of the Confederation, two for each canton. The mode of their election and the term of membership depend on the canton. Three of the cantons are politically divided—Basle into Town and Country, Appenzell into Outer-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden. Each of these 'half-cantons' sends one member to the State Council. The Swiss parliament is a militia/semi-professional parliament.

The National Council has 200 members directly elected for four years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least one member. The members are paid from federal funds. The parliament sits for at least four ordinary three-week sessions annually. Extraordinary sessions can be held if necessary and if demanded by the Federal Council, 25% of the National Council or five cantons.

The 200 seats are distributed among the cantons according to population size:

A general election takes place by ballot every four years. Every citizen of the republic who has entered on his 18th year is entitled to a vote, and any voter may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 50,000 citizens or eight cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of seven members, elected for four years by the *United Federal Assembly*, i.e. joint sessions of both chambers, such as to represent both the different geographical regions and language communities. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either chamber, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible to become a member of the executive.

The *President* of the Federal Council (called President of the Confederation) and the *Vice-President* are the first magistrates of the Confederation. Both are elected by the United Federal Assembly for one calendar year from among the Federal Councillors, and are not immediately re-eligible to the same offices. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

The seven members of the Federal Council act as ministers, or chiefs of the seven administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

### National Anthem

'Trittst im Morgenrot daher'/'Sur nos monts quand le soleil'  
'Quando il ciel' di porpora' ('When the morning skies grow red'); German words by Leonard Widmer, French by C. Chatelanat, Italian by C. Valsangiacomo, tune by Alberik Zwyssig.

## CURRENT LEADERS

### Ueli Maurer

#### Position

President

#### Introduction

Ueli Maurer joined the Swiss Federal Council on 1 Jan. 2009 and assumed the rotating one-year presidency on 1 Jan. 2013. A member of the Swiss People's Party (SVP), he also serves as defence minister on the seven-member council.

#### Early Life

Maurer was born on 1 Dec. 1950 in Wetzikon, in the canton of Zürich. He served a commercial apprenticeship and managed a farmers' co-operative from 1974 to 1994. He was elected to the council of his home town, Hinwil, in 1978 and five years later entered the cantonal parliament of Zürich. In 1991 he became president of the cantonal parliament and was elected to the National Council. He was manager of the Zürich Farmers' Association from 1994–2008, leaving to become president of the Swiss Vegetable Producers' Association (a role he relinquished on nomination to the Federal Council).

In 1996 Maurer was chosen as president of the SVP. Initially regarded as an acolyte of Christoph Blocher, the figurehead of the party's nationalist wing, Maurer proved himself an effective political operator. Under his sometimes controversial leadership—which included bullish stances on Europe, immigration and women's rights—the party became the country's most popular, doubling its share of the vote.

In Oct. 2007 Maurer resigned the SVP leadership after taking the party to its largest ever electoral victory. After narrowly failing to win a seat in the Council of States (the Federal Assembly's upper house), he took on the presidency of the SVP's Zürich division. Elected to the Federal Council in Dec. 2008 he assumed responsibility for defence, civil protection and sports.

In the parliamentary vote to decide the new president held on 5 Dec. 2012, Maurer received 148 of a possible 202 votes and received backing from all parliamentary groups bar the Green Party.

#### Career in Office

Maurer has pledged to use his presidency to focus on domestic issues, delegating international matters to his deputy, the foreign affairs minister, Didier Burkhalter.

## DEFENCE

There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destruction of bridges, tunnels and defiles are prepared for an emergency.

Conscripts complete 18–21 weeks of basic training and then regular annual refresher training up to a set number of service days. In 2008 military expenditure totalled US\$4,110m. (US\$542 per capita), representing 0.8% of GDP.

### Army

There are about 4,000 regular soldiers, but some 220,000 conscripts undergo training annually (18 or 21 weeks recruit training at 20; six or seven refresher courses of 19 days every year between 21 and 30). Proposals ('Army XXI' implemented in 2004 envisaged an Armed Forces based on the three areas of promoting peace, defence and general civil affairs support. Troop levels were cut to 220,000 (120,000 conscripts, 20,000 recruits, 80,000 reservists).

Since 2004 Switzerland has a Chief of the Armed Forces in the rank of a lieutenant-general. In peacetime the Army has no general; in time of war the Federal Assembly in joint session of both Houses appoints a general.

In 1999 for the first time a small Swiss contingent was deployed outside the country, in Kosovo.

### Navy

There is no Navy in the Swiss Armed Forces but the Land Forces include a small Marine component with patrol boats.

### Air Force

The Air Force has five air base commands. The fighter squadrons are equipped with Swiss-built F-5E Tiger IIs and F/A-18s. Personnel (2005), 19,000 on mobilization, with 85 combat aircraft.

## INTERNATIONAL RELATIONS

In a referendum in 1986 the electorate voted against UN membership, but in a further referendum on 4 March 2002, 54.6% of votes cast were in favour of joining. Switzerland officially became a member at the UN's General Assembly in Sept. 2002. An official application for membership of the EU was made in May 1992, but in Dec. 1992 the electorate voted against joining the European Economic Area. At a referendum in March 2001, 76.7% of voters rejected membership talks with the EU, with just 23.3% in favour; turnout was 55.1%.

## ECONOMY

Services accounted for 71.2% of GDP in 2006, industry 27.5% and agriculture 1.2%.

According to the anti-corruption organization *Transparency International*, Switzerland ranked sixth in the world in a 2012 survey of the countries with the least corruption in business and government. It received 86 out of 100 in the annual index.

### Overview

Switzerland is a small economy with one of the highest living standards in the world. Owing to a lack of raw materials, prosperity is built on labour skills, a business-friendly environment and technological expertise. As well as banking and insurance, the economy is particularly focused on microtechnology, hi-tech industry, biotechnology and pharmaceuticals. Small- and medium-sized businesses dominate. According to a 2008 business census, more than 99% of enterprises had fewer than 250 full-time workers, employing about two-thirds of the total workforce.

The central government carries the responsibility for foreign policy, defence, pensions, postal services, telecommunications, railway services and currency. All other responsibilities are dealt with at the canton level, notably economic regulation, education, healthcare and the judiciary. This system has led to large income disparities across cantons, with tax revenue per capita differing by as much as a factor of two. In 2004 a referendum approved the New Financial Equalization System, which provided a clearer division between federal and local responsibilities.

In 2000 the National Bank introduced a monetary policy framework aimed at keeping inflation below 2%. Inflation has

remained low for many years, contained primarily by strong retail competition and a flexible labour market. In 2004 the authorities launched a reform agenda to open sheltered sectors, reduce the role of the state, encourage external economic relations and improve the education system in a bid to boost competition and growth. Following these reforms growth performed above trend and became broad-based, benefiting from buoyant global markets and supported by strong investment and private consumption.

With Switzerland home to the world's third largest financial market, the financial sector accounts for over 11% of GDP. At the end of 2009, 6% of the total working population was directly employed by banks, insurance companies and other financial institutions. As a result, Switzerland suffered in the global financial crisis. Banks made large losses in 2008–09 and the country's largest bank, UBS, had to be rescued by the government in late 2008. The economy went into recession in 2009, although economic activity picked up in 2010 as the global economy began to recover and domestic demand grew. Reforms to strengthen the stability of the financial system have since been initiated. A countercyclical capital buffer, which requires banks to build up capital gradually as imbalances in the credit market develop, was implemented in July 2012. The eurozone debt crisis has driven up demand for the Swiss franc as a safe haven currency. Growth stood at 1.9% in 2011, down from 3.0% the previous year.

Pressures on the pension and health care systems are building in the face of a projected 16% increase in the old-age dependency ratio by 2035. A lack of consensus on the solution to long-term fiscal challenges has led to the rejection of proposals to raise the retirement age and increase the VAT rate to finance social security.

### Currency

The unit of currency is the *Swiss franc* (CHF) of 100 *centimes* or *Rappen*. Foreign exchange reserves were US\$78,864m. in Sept. 2009 and gold reserves were 33.44m. troy oz (77.79m. troy oz in 2000). Inflation rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 0.6% | 0.6% | 0.8% | 1.2% | 1.1% | 0.7% | 2.4% | -0.5% | 0.7% | 0.2% |

Total money supply in July 2009 was 339,809m. Swiss francs.

### Budget

Revenue and expenditure of the Confederation, in 1m. Swiss francs, for calendar years:

|             | 2005   | 2006   | 2007   | 2008   | 2009   |
|-------------|--------|--------|--------|--------|--------|
| Revenue     | 52,985 | 58,506 | 58,739 | 64,243 | 68,082 |
| Expenditure | 52,607 | 53,096 | 62,178 | 64,189 | 58,704 |

VAT is 8%, with reduced rates of 3.8% and 2.5%.

### Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 0.2% | 0.0% | 2.4% | 2.7% | 3.8% | 3.8% | 2.2% | -1.9% | 3.0% | 1.9% |

Total GDP was US\$659.3bn. in 2011.

Switzerland was ranked first in the Global Competitiveness Index in the World Economic Forum's *Global Competitiveness Report 2012–2013*. The index analyses 12 areas of competitiveness for over 100 countries including macroeconomy, higher education and training, institutions, innovation and infrastructure. In the 2012 *World Competitiveness Yearbook*, compiled by the International Institute for Management Development, Switzerland came third in the world ranking. This annual publication ranks and analyzes how a nation's environment creates and sustains the competitiveness of enterprises.

### Banking and Finance

The National Bank, with headquarters divided between Berne and Zürich, opened on 20 June 1907. It has the exclusive right to issue banknotes. The *Chairman* is Thomas Jordan.

On 31 Dec. 2004 there were 338 banks with total assets of 2,490,768m. Swiss francs. They included 24 cantonal banks, three big banks, 83 regional and saving banks, one Raiffeisen (consisting of around 420 member banks) and 277 other banks. The number of banks has come down from over 495 in 1990. In 2012 the largest banks in order of market capitalization were UBS (US\$54.2bn.) and Cr dit Suisse Groupe (US\$36.2bn.). UBS ranks sixth in Europe by market capitalization and is Europe's ninth largest bank by assets, which totalled US\$1,509,000m. in 2012. Banking, insurance and other finance activities is one of Switzerland's most successful industries, and contributed 10.3% of the country's GDP in 2011. Switzerland is the capital of the offshore private banking industry. It is reckoned that a third of the internationally invested private assets worldwide are managed by Swiss banks.

In June 2012 Switzerland's gross external debt totalled US\$1,440,975m.

Money laundering was made a criminal offence in Aug. 1990. Complete secrecy about clients' accounts remains intact, but anonymity is lifted in cases of criminal offences such as money laundering, corruption and terrorism.

The stock exchange system has been reformed under federal legislation of 1990 on securities trading and capital market services. The four smaller exchanges have been closed and activity concentrated on the major exchanges of Z rich, Basle and Geneva, which harmonized their operations with the introduction of the Swiss Electronic Exchange (EBS) in Dec. 1995. Z rich is a major international insurance centre.

In Aug. 1998 Cr dit Suisse and UBS AG agreed a deal to pay US\$1.25bn. (£750m.) to Holocaust survivors over a three-year-period in an out-of-court settlement. The deal brought to an end the issue of money left in Holocaust victims' Swiss Bank accounts which were allowed to remain dormant after the war.

### ENERGY AND NATURAL RESOURCES

#### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 6.1 tonnes per capita. An *Environmental Performance Index* compiled in 2008 ranked Switzerland first in the world, with 95.5%. The index examined various factors in six areas—air pollution, biodiversity and habitat, climate change, environmental health, productive natural resources and water resources.

Switzerland is one of the world leaders in recycling. In 2005, 51% of all household waste was recycled, including 95% of glass and 90% of aluminium cans

#### Electricity

Installed capacity was 19.2m. kW in 2007. Production was 67.9bn. kWh in 2007. 54.1% of electricity produced in 2007 was hydro-electric, 41.1% nuclear and 4.8% from conventional thermal. In 1990, 54% of citizens voted for a ten-year moratorium on the construction of new nuclear plants. A referendum was held in 2003 on proposals to write a commitment to phase out nuclear power altogether into the constitution. However, the proposal was rejected. In May 2011 the government decided to abandon plans to build any further nuclear reactors in the wake of the Fukushima disaster in Japan. There are currently five nuclear reactors in use. Consumption per capita in 2007 was 8,726 kWh.

#### Minerals

In 2008, 4,832 people were employed in mining and quarrying. Production estimates in 2006 (in 1,000 tonnes): salt, 560; gypsum, 300; lime, 75.

## Agriculture

The country is self-sufficient in milk. Agriculture is protected by subsidies and import controls. Farmers are guaranteed an income equal to industrial workers. In 2005 agriculture occupied 3-6% of the total workforce. There were 286,300 ha. of open arable land in 2005, 119,100 ha. of cultivated grassland and 625,100 ha. of natural grassland and pastures. In 2005 there were 12,900 ha. of vineyards. There were 63,300 farms in 2005 (41% in mountain or hill regions), of which 2,800 were under 1 ha., 19,900 over 20 ha. and 17,700 in part-time use. In 2005 there were 405,400 ha. of arable land and 22,900 ha. of permanent crops. Approximately 11-0% of all agricultural land is used for organic farming—one of the highest proportions in the world.

Area harvested, 2005 (in 1,000 ha.): cereals, 168; sugar beets, 18; potatoes, 13. Production, 2005 (in 1,000 tonnes): sugar beets, 1,409; wheat, 539; potatoes, 468; barley, 231; maize, 199; rapeseed, 56; carrots, 36. Fruit production (in 1,000 tonnes) in 2005 was: apples, 204; grapes, 127; pears, 65. Wine is produced in 25 of the cantons. In 2007 vineyards produced 104m. litres of wine.

Livestock, 2005 (in 1,000): pigs, 1,609; cattle, 1,554; sheep, 446; goats, 74; horses, 55; chickens, 8,117. Livestock products, 2005 (in 1,000 tonnes): meat, 450; milk, 3,934; cheese, 168.

## Forestry

In 2010 the area under forests was 1-24m. ha., or 31% of the total land area. In 2007, 5-69m. cu. metres of roundwood were cut.

## Fisheries

Total catch, 2010, 1,653 tonnes, exclusively freshwater fish.

## INDUSTRY

The leading companies by market capitalization in Switzerland in March 2012 were: Nestlé SA, a world leader in food and beverages (US\$207-4bn.); Novartis AG, a pharmaceuticals company (US\$151-8bn.); and Roche AG, a health care company (US\$151-5bn.).

The chief food producing industries, based on Swiss agriculture, are the manufacture of cheese, butter, sugar and meat. Among the other industries, the manufacture of textiles, clothing and footwear, chemicals and pharmaceutical products, the production of machinery (including electrical machinery and scientific and optical instruments) and watch and clock making are the most important. The leading industries in 2007 in terms of value added (in 1m. Swiss francs) were: construction, 26,516 (5-1% of GDP); chemical industry and oil processing, 20,394 (3-9%); medical and optical instruments and watches, 14,802 (2-8%); machinery and equipment, 13,723 (2-6%); electricity, gas, steam and distribution of water, 9,702 (1-9%).

## Labour

In 2011 the total working population was 4,366,000, of whom 670,000 people were in manufacturing, 615,000 in trade and 566,000 in health. The unemployment rate in the second quarter of 2012 was 3-7%. In 2011, 85-4% of men and 73-3% of women between the ages of 15 and 64 were in employment. The percentage of men in employment is one of the highest among the major industrialized nations.

The foreign labour force was 1,014,000 in 2011 (410,000 women). Of these 187,000 were German, 158,000 Italian, 143,000 Portuguese and 60,000 French. In 2011 approximately 698,000 EU citizens worked in Switzerland.

## INTERNATIONAL TRADE

Legislation of 1991 increased the possibilities of foreign ownership of domestic companies.

### Imports and Exports

Imports and exports, excluding gold (bullion and coins) and silver (coins), were (in 1m. Swiss francs):

|         | 2006    | 2007    | 2008    | 2009    | 2010    |
|---------|---------|---------|---------|---------|---------|
| Imports | 177,148 | 193,216 | 197,521 | 168,998 | 183,436 |
| Exports | 185,216 | 206,252 | 215,984 | 187,448 | 203,484 |

In 2004 the EU accounted for 81-4% of imports (112-9bn. Swiss francs) and 61-9% of exports (91-3bn. Swiss francs). Main import suppliers in 2004 (share of total trade): Germany, 32-8%; Italy, 11-3%; France, 9-9%; Netherlands, 5-0%; USA, 4-7%. Main export markets: Germany, 20-2%; USA, 10-4%; France, 8-7%; Italy, 8-3%; UK, 5-1%.

Main imports in 2004 (in 1m. Swiss francs): consumer goods, 55,318; raw materials and semi-manufactures, 35,680; equipment goods, 34,946.

Main exports in 2004 (in 1m. Swiss francs): chemicals, 49,445; machinery and electronics, 33,479; precision instruments, clocks and watches and jewellery, 24,195.

## COMMUNICATIONS

### Roads

In 2011 there were 71,452 km of roads, comprising 1,415 km of motorways, 18,411 km of highways and national roads and 51,638 km of secondary and local roads. Motor vehicles in 2011 (in 1,000): passenger cars, 4,163; motorcycles and mopeds, 834; vans and lorries, 349; buses and coaches, 16. Freight transported by road in 2010 totalled 17-1bn. tonne-km. Switzerland has one of the lowest death rates in road accidents of any industrialized country, at 4-1 deaths per 100,000 people in 2011. Road accidents injured 23,242 people in 2011 and killed 320 (down from 954 in 1990).

Switzerland was ranked fourth for its road infrastructure in the World Economic Forum's *Global Competitiveness Report 2009-2010*.

### Rail

In 2007 the length of the general traffic railways was 5,021 km, of which the Swiss Federal Railways (SBB) 3,011 km. In 2009 Swiss railway companies carried 437m. passengers and 61m. tonnes of freight. In Oct. 2010 the world's longest rail tunnel was created—the 57-km long tunnel under the Gotthard mountain range in the Alps linking Erstfeld and Bodio. The tunnel is scheduled to open in 2017. There is a metro in Lausanne and a number of tram/light rail networks, notably in Basle, Berne, Geneva, Lausanne, Neuchâtel and Zürich. There are many other lines, the most important of which are the Berne-Lötschberg-Simplon (114 km from Berne to Brig) and Rhaetian (397 km) networks.

Switzerland was ranked first for rail infrastructure in the World Economic Forum's *Global Competitiveness Report 2009-2010*.

### Civil Aviation

Switzerland owns seven airports with international scheduled and charter traffic: Basle (the binational Euroairport, which also serves Mulhouse in France), Berne (Belp), Geneva (Cointrin), Lugano (Agno), Sion, St Gallen (Altenrhein) and Zürich (Kloten). In 2010 these airports handled 39,009,046 passengers and 379,389 tonnes of freight and mail. Swissair, the former national carrier, faced collapse and grounded flights in Oct. 2001. In April 2002 a successor airline, Swiss International Air Lines (Swiss), took over as the national carrier. Services were also provided in 2003 by over 80 foreign airlines. Zürich is the busiest airport, handling 22,854,358 passengers in 2010 and 304,166 tonnes of freight. Geneva handled 11,748,972 passengers and 31,405 tonnes of freight in 2010. Together these two airports accounted for 89% of Swiss passenger traffic in 2010.

In the World Economic Forum's *Global Competitiveness Report 2009-2010* Switzerland ranked fifth for quality of air transport infrastructure.

### Shipping

In 2010 there were 1,226 km of navigable waterways. 5-5m. tonnes of freight were transported on the Rhine and Swiss lakes in 2011. A merchant marine was created in 1941, the place of registry of its vessels being Basle. In 2007 it totalled 581,683 GRT.

### Telecommunications

In 2008 there were 4-8m. main (fixed) telephone lines. In the same year mobile phone subscribers numbered 8-9m. (1,179-7 per 1,000 persons). There were 5-8m. internet users in 2008. The fixed broadband penetration rate in Dec. 2010 was 38-1 subscribers per 100 inhabitants. In March 2012 there were 2-7m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The Federal Court, which sits at Lausanne, consists of 30 judges and 30 supplementary judges, elected by the Federal Assembly for six years and eligible for re-election; the President and Vice-President serve for two years and re-election is not practised. The Tribunal has original and final jurisdiction in suits between the Confederation and cantons; between different cantons; between the Confederation or cantons and corporations or individuals; between parties who refer their case to it; or in suits which the constitution or legislation of cantons places within its authority. It is a court of appeal against decisions of other federal authorities, and of cantonal authorities applying federal laws. The Tribunal comprises two courts of public law, two civil courts, a chamber of bankruptcy, a chamber of prosecution, a court of criminal appeal, a court of extraordinary appeal and a Federal Criminal Court.

A Federal Insurance Court sits in Lucerne, and comprises 11 judges and 11 supplementary judges elected for six years by the Federal Assembly.

A federal penal code replaced cantonal codes in 1942. It abolished capital punishment except for offences in wartime; this latter proviso was abolished in 1992.

The population in penal institutions in 2008 was 5,780 (75 per 100,000 population), of which 69-7% were non-nationals.

### Education

Education is administered by the confederation, cantons and communes and is free and compulsory for nine years. Compulsory education consists of four years (Basel-Town and Vaud), five years (Aargau, Basel-Country, Neuchâtel and Ticino) or six years (other cantons) of primary education, and the balance in Stage I secondary education. This is followed by three to five years of Stage II secondary education in general or vocational schools. Tertiary education is at universities, universities of applied science, higher vocational schools and advanced vocational training institutes.

In 2009-10 there were 147,200 children in pre-primary schools. There were 769,314 pupils in compulsory education (436,111 at primary, 294,405 at lower secondary and 38,798 at special schools), 343,297 in Stage II secondary education and 250,073 students in higher education, including 126,940 students at universities and 69,676 at universities of applied sciences.

There are ten universities (date of foundation and students in 2010-11): Basle (1460, 12,367), Berne (1528, 14,442), Fribourg (1889, 9,651), Geneva (1559, 15,666), Lausanne (1537, 12,066), Lucerne (16th century, 2,450), Neuchâtel (1866, 4,215), St Gallen (1899, 6,996), Svizzera italiana (1996, 2,848), Zürich (1523, 26,134); and two institutions of equivalent status: Federal Institute of Technology Lausanne (1853, 8,009); Federal Institute of Technology Zürich (1854, 15,984). There are nine universities of applied sciences (date of foundation and enrolment figures for 2010-11): Berne (1997, 6,369); Central Switzerland (1997, 5,823); Eastern Switzerland (1997, 4,818); Kalaidos (2005, 1,664); Les Roches-Gruyère (2008, 117); Northwestern Switzerland (1997, 9,938); Southern Switzerland (1997, 3,661); Western Switzerland

(1997, 16,208); Zürich (2007, 16,727). 17% of university students in 2007 were foreign.

In 2006 public expenditure on education came to 5-1% of GNI and accounted for 16-3% of total government expenditure. The adult literacy rate is at least 99%.

### Health

In 2011 there were 30,849 doctors, 4,123 dentists and 4,284 pharmacists. There were 300 hospitals with 38,373 beds in 2011. In 2007, 27-9% of the population were smokers. In 2011 Switzerland spent 8-1% of its GDP on health. Although active euthanasia is illegal in Switzerland, doctors may help patients die if they have given specific consent.

### Welfare

The Federal Insurance Law against accident and illness, of 13 June 1911, entitled all citizens to insurance against illness; foreigners could also be admitted to the benefits. Major reform of the law was ratified in 1994 and came into effect in 1996, making it compulsory for all citizens. Subsidies are paid by the Confederation and the Cantons only for insured persons with low incomes. Also compulsory are the Old-Age and Survivors' Insurance (OASI, since 1948), Invalidity Insurance (II, since 1960) and Accident Insurance (1984/1996). Unemployment Insurance (1984) and Occupational benefit plans (Second Pillar, 1985) are compulsory for employees only.

The following amounts (in 1m. Swiss francs) were paid in social security benefits:

|   | 2006           | 2007           |
|---|----------------|----------------|
| Occupational pension plans              | 36,944         | 39,089         |
| Old-age and survivors' insurance        | 31,559         | 33,171         |
| Mandatory health insurance              | 19,095         | 19,897         |
| Disability insurance                    | 11,292         | 11,736         |
| Accident insurance for employees        | 6,514          | 6,477          |
| Family allowances                       | 4,860          | 4,973          |
| Unemployment insurance                  | 5,080          | 4,311          |
| Supplementary benefits (OASI/II)        | 3,080          | 3,246          |
| <b>Total (including other benefits)</b> | <b>127,496</b> | <b>132,364</b> |

## RELIGION

There is liberty of conscience and of creed. At the 2000 census 41-8% of the population were Roman Catholic, 35-3% Protestant and 11-1% without religion. In 2000 the figures were estimated to be: Roman Catholics, 3,048,000; Protestants, 2,569,000; other, 1,671,000. In Feb. 2013 the Roman Catholic church had four cardinals with Swiss nationality.

## CULTURE

### World Heritage Sites

There are 11 sites in Switzerland that appear on the UNESCO World Heritage List. They are (with the year entered on list): the Abbey-Cathedral of St Gallen (1983), the 9th-century Benedictine convent of St John at Mûstair (1983), the Old City of Berne (1983), the three castles and city walls of Bellinzona (2000), the Jungfrau-Aletsch-Bietschhorn mountain region (2001 and 2007), Monte San Giorgio (2003), the Lavaux vineyard terraces (2007), the Swiss Tectonic Arena Sardona (2008) and La Chaux-de-Fonds/Le Locle watchmaking town-planning (2009). The Rhaetian Railway in the Albula/Bernina Landscapes (2008) is shared with Italy and the Prehistoric Pile dwellings around the Alps (2011) is shared with Austria, France, Germany, Italy and Slovenia.

### Press

There were 95 daily newspapers in 2008 (87 paid-for) and 101 paid-for non-daily papers; the combined circulation of paid-for papers was 2,650,000 in 2008. The average circulation of free dailies rose from 619,000 in 2004 to 1,886,000 in 2008.

**Tourism**

Tourism is an important industry. In 2008 there were 8.61m. non-resident tourists staying at hotels and similar establishments, bringing revenue of US\$17,567m. Overnight stays by tourists in hotels and health establishments totalled 37,334,000 in 2008 (21,508,000 by foreigners). The main countries of origin of foreign tourists were Germany (6,313,000 overnight stays in 2008), the UK (2,282,000) and the USA (1,518,000). 11.15m. Swiss citizens travelled abroad in 2008.

**Festivals**

The Lucerne Festival is one of Europe's leading cultural events and since 2001 has been split into three festivals: Ostern during Lent, Sommer in Aug.–Sept. and Piano in Nov. The 2008 summer festival was attended by 108,200 people. The Montreux Jazz Festival is held annually in July. The 2007 festival attracted 220,000 people. The biggest rock and pop festivals are OpenAir St Gallen (June), Paléo Festival in Nyon (July), Gurtenfestival in Berne (July) and Rock Oz'Arènes in Avenches (Aug.).

## KEY HISTORICAL EVENTS

Ancient Syria, a region encompassing modern Israel, Palestine, Lebanon and Jordan, was home to some of the world's earliest civilizations. From the city of Ebla, founded around 3000 BC, the Semitic empire developed. This was succeeded around 2260 BC by the Akkadian empire, then by the Amorites whose cities fell to the Hittites in the mid-2nd millennium BC. During the next 500 years Canaanites, Phoenicians, Aryans, Aramaeans and Hebrews settled different parts of the region. From the 9th–7th centuries BC the Assyrian empire dominated until, weakened by Cimmerian and Scythian immigration, it gave way to Babylonian rule.

The Babylonian empire, which saw the enslavement of the Jews, was defeated in 539 BC by the Persian King Cyrus. In the 4th century BC Alexander the Great overthrew the Persians and Syria came under Greek rule until the expansion of Rome in the early 2nd century BC. Syria became a Roman province in 64 BC. The Greek cities of the interior (the Decapolis) were rebuilt, including Damascus. Palmyra, a key city on the trade routes to the Euphrates, rose against Rome under Queen Zenobia but was defeated in AD 272.

Syria became an important frontier zone under Diocletian, who established lines of defence (*limes*) against eastern invaders. Syrian cities such as Edessa had contained the earliest Christian communities, and Antioch, where St Peter preached, grew in significance when Emperor Constantine moved the seat of the Empire east to Byzantium in 303. In 451 it was made a patriarchate.

Syria prospered under Byzantium until the Persian invasions of the 6th century. In the 620s Emperor Heraclius briefly regained the region for Byzantium, before ceding it to Muslim Arab forces at the Battle of the Yarmuk River in 636. Syria was at the heart, geographically and politically, of the Umayyad empires for the next 100 years. From 661 Damascus was capital of the Umayyad Caliphate, though its influence declined after 750 when the Abbasid Caliphate moved the capital to Baghdad.

From 969 the resurgent Byzantine Empire challenged for control of the region, twice conquering its principal cities. In 1085 Syria was conquered by the Seljid Turks. With the beginning of the Crusades Muslim-held strongholds were repeatedly attacked by Christian invaders. Antioch and Edessa fell to the crusaders in 1098 and Jerusalem in 1099. In the 12th century Muslim tribes won back much land under the successive leaderships of Zengi of Mosul, Nur-ad Din and Salah ad-Din (Saladin). Salah ad-Din founded the Ayyubid dynasty and in 1187 his forces recaptured Jerusalem from the Christians.

In 1260 a series of Mongol invasions began from the east, destroying cities and agriculture before being repelled by the Egyptian Mamluks. The Mamluks also drove the last crusaders from the Holy Land in 1302. The area remained under Mamluk rule until it fell to the Ottoman Turks in 1516. In the 1830s Egyptian forces invaded Syria as part of a wider war against the Ottomans. European powers became involved, brokering several agreements and finally forcing Egypt to withdraw in 1840.

During the First World War, in which Turkey joined the Central Powers, the French and British drew up the Sykes–Picot agreement, which planned the division of the Middle East into areas of French and British control. After the end of the war, the Ottoman Empire was dissolved and Lebanon, Palestine and Transjordan were made separate territories, reducing Syria to its modern borders.

In March 1920 Faisal ibn Husayn of Mecca became king of Syria but was deposed by the French, who were awarded the Syrian mandate by the League of Nations later that year. A widespread revolt against French rule was suppressed in 1925, with French troops bombarding Damascus. An abortive attempt to negotiate independence in 1936 was followed by more fruitful discussions in 1941, when British and Free French forces occupied the country. Syria held elections in 1943, electing the nationalist Shukri al-Kuwatli as president. Syrian independence was recognized on 1 Jan. 1944 and European forces withdrew in 1946.

A series of military coups from 1949–54 interrupted civilian government. The 1948 Arab–Israeli War, in which Syria fought for the Palestinians, ushered in decades of mutual hostility with neighbouring Israel. In 1956 the Suez Crisis prompted a period of martial law. In the same year Syria signed a pact with the Soviet Union which ensured supplies of military equipment in return for Communist influence. Popular enthusiasm for the Pan-Arabist movement led Syria to unite with Egypt in 1958, creating the United Arab Republic. However, Syria seceded in Sept. 1961 and a series of military coups ensued, culminating in the Ba'ath Party taking power in 1963. After the Syrian Ba'athists split from the Iraqi Ba'athists in 1966, long-term tensions arose between the two countries and led to Syrian support for Iran.

The 1967 war with Israel resulted in the loss of the Golan Heights. In 1970 Hafez al-Assad (of the minority Alawite sect) seized power. He was elected president in 1971 and embarked on a 'corrective' movement to end corruption. Domestic opposition was suppressed and the Sunni fundamentalist Muslim Brotherhood was destroyed along with the city of Hamah in 1982. Syrian forces invaded Lebanon in 1976 to prevent a Palestinian

victory over the Maronite Christians, with whom Syria had political ties.

Assad joined the international coalition against the Iraqi occupation of Kuwait in 1991 and engaged in unsuccessful talks with Israel in the 1990s. His son, Bashar, took over on Assad's death in 2000. In 2003 Syria refused to back the US-led invasion of Iraq and relations with Washington were further strained over US accusations of Syrian support for terrorism. Though Syrian influence in Lebanon remained strong, it withdrew its last troops from the country in 2005, after involvement in the assassination of the former Lebanese prime minister, Rafiq al-Hariri. Following French-brokered talks, in Oct. 2008 Syria established diplomatic relations with Lebanon for the first time.

Beginning in March 2011 there were popular anti-government protests throughout the country, echoing similar demonstrations in the region and leading to the dismissal of the government. In April 2011 the state of emergency in place since 1963 was lifted. The USA and the EU imposed sanctions from May 2011 in response to the violent repression of protests that have resulted in more than 60,000 deaths according to the United Nations. Over 700,000 people have left the country in the wake of the crisis.

### TERRITORY AND POPULATION

Syria is bounded by the Mediterranean and Lebanon in the west, by Israel and Jordan in the south, by Iraq in the east and by Turkey in the north. The frontier between Syria and Turkey was settled by the Franco-Turkish agreement of 22 June 1929. The area is 185,180 sq. km (71,498 sq. miles). The census of 2004 gave a population of 17,921,000; density, 97 per sq. km. Estimate, 2011, 21,377,000. In 2011, 56.2% of the population lived in urban areas.

The UN gives a projected population for 2015 of 22.18m.

Area and population (2011 estimate, in 1,000) of the 14 districts (*mohafaza*):

|                       | Sq. km | Population |
|-----------------------|--------|------------|
| Aleppo (Halab)        | 18,500 | 4,868      |
| Damascus City         | 105    | 1,754      |
| Damascus District     | 18,032 | 2,836      |
| Darā                  | 3,730  | 1,027      |
| Deir Ez-Zor           | 33,060 | 1,239      |

| Tartous               | 1,892  | 797        |

The capital is Damascus (Dimashq), with a 2004 population of 1,414,913. Other principal towns (population, 2004 in 1,000): Aleppo, 2,132.1; Homs, 652.6; Lattakia, 383.8; Hamah, 313.0; Raqqah, 220.5; Deir Ez-Zor, 211.9; Hasakah, 188.2; Al-Kamishli, 184.2.

Over 1m. Iraqi refugees entered Syria between 2003 and 2007, although many started to return in late 2007. There were an estimated 755,000 refugees in Syria in 2011, a figure exceeded only in Pakistan and Iran.

Arabic is the official language, spoken by 90% of the population, while 9% speak Kurdish (chiefly in Hasakah in the northeast of the country) and 1% other languages.

### SOCIAL STATISTICS

2008 births, estimate, 594,000; deaths, 72,000. Rates, 2008 estimate (per 1,000 population): birth, 28.0; death, 3.4. Infant mortality, 2010 (per 1,000 live births), 14. Expectation of life, 2007, was 72.2 years for males and 76.0 for females. Annual population growth rate, 2000–08, 3.1%. Fertility rate, 2008, 3.2 births per woman.

### CLIMATE

The climate is Mediterranean in type, with mild wet winters and dry, hot summers, though there are variations in temperatures and rainfall between the coastal regions and the interior, which even includes desert conditions. The more mountainous parts are subject to snowfall. Damascus, Jan. 38.1°F (3.4°C), July 77.4°F (25.2°C). Annual rainfall 8.8" (217 mm). Aleppo, Jan. 36.7°F (2.6°C), July 80.4°F (26.9°C). Annual rainfall 10.2" (258 mm). Homs, Jan. 38.7°F (3.7°C), July 82.4°F (28°C). Annual rainfall 3.4" (86.7 mm).

### CONSTITUTION AND GOVERNMENT

A new constitution was adopted on 27 Feb. 2012, after receiving 89.4% support in a referendum with a turnout of 57.4%. It replaced the previous constitution promulgated in 1973. Among the new constitution's provisions is the removal of a previous clause confirming the Arab Socialist Renaissance (*Ba'ath*) Party, in power since 1963, as the 'leading party in the State and society'. The constitution proceeds to outlaw parties established on a 'religious, sectarian, tribal [or] regional' basis. The *President* is limited to two seven-year terms, although this clause may not be retroactively applied, allowing the incumbent, President Bashar al-Assad, to remain in office for potentially four terms. At a referendum on 27 May 2007 Bashar al-Assad (b. 1965) was confirmed as *President* for a second term, receiving 97.6% of the vote. Presidential elections may be contested, though any candidate must be a Muslim. The description of Syria as a 'planned socialist economy' in the 1973 constitution has been replaced by an assertion that the economy 'shall be based on the principle of developing public and private economic activity through economic and social plans'.

The amended constitution was widely perceived as an attempt by President al-Assad to appease the opposition movement that emerged during the 2011 Arab Spring and placate international opinion against him. Nonetheless, the referendum was boycotted by leading opposition groups and received little support from the international community. Legislative power is held by a 250-member People's Assembly (*Majlis al-Sha'ab*), renewed every four years in 15 multi-seat constituencies.

### National Anthem

'Humata al Diyari al aykum salaam' ('Defenders of the Realm, on you be peace'); words by Khalil Mardam Bey, tune by M. S. and A. S. Flayfel.

## CURRENT LEADERS

### Bashar al-Assad

#### *Position*

President

#### *Introduction*

Bashar al-Assad was confirmed as president in a national referendum in July 2000 following the death of his father the previous month. He had not been groomed for a political career, pursuing instead a medical education in England. However, on the death of his elder brother Basil—their father's chosen successor—in an accident in 1994, Assad was recalled to

Damascus. Thereafter he rose through the senior ranks of the armed forces, consolidating his influence and authority within his father's regime to achieve the first-ever father-to-son succession to the highest office in an Arab republic. From March 2011 his repressive rule was dogged by street protests, echoing those in several other Arab states. By early 2012 the discontent had descended into open civil war between the security forces and disparate opposition groups across the country. Despite mounting pressure on Assad from the international community—with the notable exceptions of Russia and China—to accept political reform or stand down, there seemed little prospect of a resolution to the conflict by early 2013, by which time an estimated 60,000 Syrians had died and many more had fled the country as refugees.

#### *Early Life*

Assad was born in Damascus on 11 Sept. 1965. After attending high school in the capital, he went to London, England, to study ophthalmology. Having returned to Syria upon the death of his brother, he became commander of the Syrian army's armoured division. Assad reportedly used this position to install his own supporters and remove ageing senior figures and potential rivals from the army and security services. He was appointed to the rank of colonel in 1999.

When President Hafez al-Assad died suddenly on 10 June 2000, Syria's political establishment was quick to demonstrate support for his son. The People's Assembly voted to change the constitution to lower the minimum age for a president from 40 to 34—Assad's age at that time. The Assembly and the dominant Ba'ath Party approved his nomination for the presidency (as the only candidate) and the party elected him as its secretary-general. He was also declared commander-in-chief of the armed forces, his military rank having been elevated to lieutenant-general. In a national referendum held on 10 July 2000, Assad was endorsed as president with 97.3% of the votes cast.

#### *Career in Office*

In his inaugural address to the People's Assembly, Assad spoke of the need for economic reform. He called for the restructuring of the state-dominated economy and improved competitiveness, the dismantling of bureaucracy and the ending of corruption. Private investment has since been encouraged. However, initial signs of political liberalization—a partial lifting of censorship, the release of some political prisoners, tolerance of criticism of the government and party, and the limited introduction of the Internet—faded in 2001 as dissidents were again arrested and detained. On the international stage, peace with Israel remained elusive, given Syria's stipulation that the Israelis give up the whole of the Golan Heights seized in the Six-Day War of 1967. Also, the renewed Palestinian *intifada* against Israeli occupation polarized the already volatile politics of the Middle East and made a Syrian-Israeli accord increasingly unlikely.

In 2002–03 Syria opposed US military threats against Iraq, fearing the consequences of another war in the Middle East, and claimed that the UN Security Council did not endorse an invasion. US-led forces nevertheless invaded Iraq in March 2003 and Saddam Hussein was toppled the following month. The USA subsequently threatened Assad with economic, diplomatic or other undefined sanctions, suggesting that Syria was harbouring members of Saddam Hussein's regime and had been involved in the development of chemical weapons.

In Jan. 2004 Assad visited Turkey, the first Syrian leader to do so, improving several decades of cool relations between the two countries. The following May the USA imposed economic sanctions on Syria for alleged support for terrorism and failure to stop militants entering Iraq. A UN Security Council resolution adopted in Sept. 2004 and the subsequent assassination of former Lebanese prime minister Rafiq al-Hariri in Beirut in Feb. 2005 (allegedly with Syrian involvement) increased the international pressure on Assad to remove Syria's forces from Lebanon

completely. Although the withdrawal was completed in April that year, the UN continued to probe al-Hariri's murder, implicating senior Syrian officials and chiding Assad's government for its perceived lack of co-operation with UN investigators. Syria's frosty diplomatic relationship with the USA was aggravated by Assad's support for Hizbollah during the radical Lebanese militia's war against the Israeli military in July–Aug. 2006.

Following the restoration of Iraqi-Syrian diplomatic ties in Nov. 2006, President Jalal Talabani became the first Iraqi head of state to visit Damascus for 30 years in Jan. 2007. In March the European Union reopened a dialogue with the Syrian government, and in May the US Secretary of State met the Syrian foreign minister in Egypt for the first high-level bilateral contact in two years. Relations with Israel, however, deteriorated further after an Israeli air strike against an undefined site in northern Syria in Sept. (which US intelligence sources claimed in April 2008 to have been a covert nuclear reactor plant).

Despite the ruling National Progressive Front's overwhelming victory in parliamentary elections in April 2007 and Assad's endorsement as president for a further term in a national referendum in May, a crackdown on dissent remained in force. During that year several government critics and human rights campaigners were sentenced to terms of imprisonment, and in Jan. 2008 Syria's leading dissident, Riyad Seif, was detained by security services.

In Oct. 2008 Syria and Lebanon signed an accord establishing diplomatic relations for the first time in their turbulent post-independence history. After several postponements, the Damascus stock exchange was launched in March 2009, marking a further step in the liberalization of Syria's state-controlled economy.

From March 2011 Assad faced popular protests against his rule, echoing similar demonstrations in countries throughout North Africa and the Middle East. The initial release of several dozen political prisoners failed to quell discontent, which spread rapidly from Damascus to other major cities. In April 2011 he lifted the state of emergency in place for 48 years, but violent repression of the uprising by government forces continued through the rest of the year and into 2012 in defiance of international opinion. The USA and EU imposed sanctions, including asset freezing and travel bans, and the Arab League suspended Syria's membership. However, China and Russia vetoed two UN resolutions critical of Syria in Oct. 2011 and again in Feb. 2012.

At the end of 2011 Assad had agreed to allow observers from the Arab League into the country to monitor the security situation but, at the end of Jan. 2012 against the backdrop of intensifying violence, the League abandoned its observer mission. Assad continued to resist the pressure for political change through the rest of the year, maintaining that his opponents were terrorists and outlaws and did not reflect public opinion. However, his hold on the country became increasingly tenuous as civil war escalated, encompassing all Syria's major cities. In late 2012 anti-Assad groups united to form the Syrian National Coalition for Revolutionary and Opposition Forces, which promptly gained diplomatic recognition from the major Western nations, the Gulf states and also from Turkey (the Assad regime's relations with which had by then been further soured by a number of violent border incidents and the tide of Syrian refugees).

## DEFENCE

Military service is compulsory for a period of 18 months. Defence expenditure in 2008 totalled US\$1,941m. (US\$91 per capita), representing 3.8% of GDP. Syria had 14,000 troops based in Lebanon in early 2005, but in March 2005 the two countries agreed that Syria would begin to redeploy the troops to the Bekaa Valley in the east of the country. They were subsequently all withdrawn from Lebanon.

In Sept. 2007 an Israeli air strike destroyed a suspected nuclear reactor in the Deir Ez-Zor region.

## Army

Strength (2007) about 215,000 (including conscripts) with a further 280,000 available reservists. In addition there is a gendarmerie of 8,000 and a Workers Militia of approximately 100,000.

## Navy

The Navy included two small frigates and 18 patrol and coastal combatants in 2007. A small naval aviation branch of the Air Force operates 13 attack helicopters. Personnel in 2007 numbered 7,600. The main base is at Tartous (where the Russian military also has a naval base) with additional bases located at Lattakia and Minet el-Baida.

## Air Force

The Air Force, including Air Defence Command, had (2007) 30,000 personnel with an additional 10,000 reservists. Air Defence Command numbered 60,000 in 2007. There were 583 combat-capable aircraft (including MiG-21, MiG-23, MiG-25 and MiG-29 supersonic interceptors and Su-22 and Su-24 fighter-bombers), and 71 attack helicopters.

## ECONOMY

In 2006 agriculture accounted for 18.3% of GDP, industry 32.2% and services 49.5%.

## Overview

Syria experienced GDP growth above 3% every year from 2004 to 2010. With civil war from 2011 the economy contracted by 2–3%. Prior to 2011 oil accounted for 20% of government revenues and 35% of export receipts, with agriculture responsible for 20% of GDP. Since 2011 the EU has imposed sanctions on oil exports and the once prosperous tourism sector has been devastated. Inflation rose above 30% in 2012 and the economy is estimated to have contracted by 20%.

Foreign direct investment declined from 10% before the crisis to 2% in 2012 and the Syrian pound experienced a 51% decline against the US dollar. The Heritage Foundation has rated the country the fourth worst for economic freedom. Property rights are often unclear and corruption at the government and judicial levels rife. The authoritarianism and bureaucracy of the Assad regime has marginalized private enterprise.

Syria's economic future is dependent on ending the civil war. Structural reforms and higher educational standards are vital to recovery, as is the restoration of foreign investment. The Washington-based Institute for International Finance has predicted that foreign exchange reserves will run out by the end of 2013.

## Currency

The monetary unit is the *Syrian pound* (SYP) of 100 *piastres*. Inflation was 15.2% in 2008, falling to 2.8% in 2009. It stood at 4.4% in 2010. Gold reserves were 833,000 troy oz in July 2004. Total money supply in March 2004 was £Syr.642,259m.

## Budget

The fiscal year is the calendar year. In 2007 revenues were £Syr.458.6bn. and expenditures £Syr.520.5bn.

## Performance

There was real GDP growth of 5.9% in 2009 and 3.4% in 2010; total GDP in 2010 was US\$59.1bn.

## Banking and Finance

The Central Bank is the bank of issue. Commercial banks were nationalized in 1963. The *Governor* of the Central Bank is Adib Mayaleh. In 2007 there were nine private banks.

In Aug. 2000 it was announced that private banks were to be established for the first time in nearly 40 years. Syria's first private banks since 1961 opened in 2004.

Foreign debt totalled US\$4,729m. in 2010, equivalent to 8.2% of GNI.

A stock exchange opened in Damascus in March 2009 with six listed companies.

## ENERGY AND NATURAL RESOURCES

### Environment

Syria's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 2.5 tonnes per capita.

### Electricity

Installed capacity was 7.9m. kW in 2007. Production in 2007 was 38.64bn. kWh and consumption per capita 2,037 kWh.

### Oil and Gas

Oil reserves in 2008 were 2.5bn. bbls; production, 19.8m. tonnes. Natural gas reserves (2008), 280bn. cu. metres; production, 5.5bn. cu. metres.

### Minerals

Phosphate production, 2004, 2,883,000 tonnes; other minerals are gypsum (432,000 tonnes in 2004) and salt (141,000 tonnes in 2004). There are indications of lead, copper, antimony, nickel, chrome and other minerals widely distributed. Sodium chloride and bitumen deposits are being worked.

### Agriculture

The arable area in 2001 was 4.64m. ha. and there were 815,000 ha. of permanent cropland. 1.27m. ha. were irrigated in 2001. In 2001 there were 100,347 tractors and 4,500 harvester-threshers in use. Production of principal crops, 2001 (in 1,000 tonnes): wheat, 4,745; sugar beets, 1,175; seed cotton, 1,010; olives, 866; tomatoes, 732; cottonseed, 656; potatoes, 480; oranges, 465. Livestock (2003 estimates, in 1,000): sheep, 13,500; goats, 1,000; cattle, 880; asses, 217; chickens, 30,000. ### Fisheries

The total catch in 2010 was 6,635 tonnes (55% freshwater fish).

## INDUSTRY

Production (in tonnes): cement (2009), 5,497,000; residual fuel oil (2007), 4,862,000; distillate fuel oil (2007), 3,824,000; petrol (2007), 1,278,000; fertilizers (2003), 304,000; vegetable oil (2001), 89,000; cotton yarn (2001), 83,000; refrigerators (2002), 113,000 units; washing machines (2002), 85,000 units; cigarettes (2001), 12.0bn. units; woollen carpets (2002), 2.2m. sq. metres.

### Labour

In 2005 the labour force totalled 5,312,000. Unemployment was 11.5% in 2005.

## INTERNATIONAL TRADE

### Imports and Exports

Imports (c.i.f.) in 2008 totalled US\$18,104.7m. (US\$14,655.1m. in 2007) and exports (f.o.b.) US\$14,380.0m. (US\$11,545.7m. in 2007). Main imports, 2003, included: machinery and equipment, 18.3%; foodstuffs, 17.7%; chemicals and chemical products, 14.9%; base and fabricated metals, 14.6%. Main exports in 2003 included: crude petroleum, 62.5%; refined petroleum, 8.8%; live animals and meat, 4.2%; textiles, 4.2%. In 2003 imports came mainly from China (5.9%), Ukraine (5.8%), Turkey (5.7%) and USA (5.0%). Exports in 2003 went mainly to Italy (33.2%), France (14.4%), Turkey (7.5%) and Saudi Arabia (5.9%).

## COMMUNICATIONS

### Roads

In 2006 there were 40,032 km of roads, including 1,103 km of motorways, 5,971 km of main roads and 31,849 km of secondary roads; 95.8% of roads were paved. There were in 2007 a total of 446,100 passenger cars in use (22 per 1,000 inhabitants), 50,800 buses and coaches and 528,300 vans and lorries. In 2007 there were 13,465 road accidents involving injury resulting in 2,818 deaths.

### Rail

In 2008 the Syrian Railways operated 1,801 km of 1,435 mm gauge; in 2005 the smaller Hedjaz-Syrian Railway operated 338 km of 1,050 mm gauge. Passenger-km travelled on the Syrian Railways in 2008 came to 1.1bn. and freight tonne-km to 2.4bn.; passenger-km travelled on the Hedjaz-Syrian Railway in 2005 came to 412,000 and freight tonne-km to 1.4m.

### Civil Aviation

The main international airport is at Damascus, with some international traffic at Aleppo and Lattakia. The national carrier is the state-owned Syrian Arab Airlines. In 2003 scheduled airline traffic of Syrian-based carriers flew 9m. km, carrying 940,000 passengers (908,000 on international flights). Damascus handled an estimated 1,747,000 passengers in 2000 (1,660,000 on international flights) and 25,000 tonnes of freight.

### Shipping

In Jan. 2009 there were 102 ships of 300 GT or over registered, totalling 314,000 GT. Vessels totalling 4,397,000 NRT entered ports in 2005 and vessels totalling 3,927,000 NRT cleared.

### Telecommunications

In 2006 there were 3,243,000 main (fixed) telephone lines but 2,294,000 people were on the waiting list for a line. Mobile phone subscribers numbered 7,056,200 in 2008 (33.2 per 100 persons). There were an estimated 3.6m. internet users in 2008.

## SOCIAL INSTITUTIONS

### Justice

Syrian law is based on both Islamic and French jurisprudence. There are two courts of first instance in each district, one for civil and one for criminal cases. There is also a Summary Court in each sub-district, under Justices of the Peace. There is a Court of Appeal in the capital of each governorate, with a Court of Cassation in Damascus. The death penalty is still in force. Executions may be held in public.

The population in penal institutions in 2004 was 10,599 (57 per 100,000 of national population).

### Education

In 2007 there were 145,781 pre-primary school children, 2,310,168 primary school pupils and 2,549,444 secondary school pupils. In 2001, 17 teacher colleges had 791 teachers and 8,204 students; 593 schools for technical education had 16,849 teachers and 139,551 students. Adult literacy in 2009 was an estimated 84.2% (male, 90.4%; female, 78.0%).

In 2005-06 there were five universities: Al-Baath University, the Syrian Virtual University, Tishreen University, the University of Aleppo and the University of Damascus. The establishment of private universities has been permitted since 2001.

In 2007 total expenditure on education came to 4.9% of GDP and accounted for 16.7% of total government expenditure.

### Health

In 2001 there were 19,716 beds in 406 hospitals, and 1,046 health centres. There were 30,702 physicians, 16,169 dentists, 38,070 nurses and midwives and 16,579 pharmacists in 2008.

## RELIGION

In 2001 there were an estimated 14.39m. Muslims (namely Sunni with some Shias and Ismailis). There are also Druzes and Alawites. Christians (920,000 in 2001) include Greek Orthodox, Greek Catholics, Armenian Orthodox, Syrian Orthodox, Armenian Catholics, Protestants, Maronites, Syrian Catholics, Latins, Nestorians and Assyrians. There are also Jews and Yezides.

## CULTURE

### World Heritage Sites

There are six UNESCO sites in Syria: the old city of Damascus, dating from the 3rd millennium BC and including the Umayyid Mosque (inscribed in 1979); the old city of Bosra, once the capital of the Roman province of Arabia and an important stopover on the ancient caravan routes (1980); Palmyra (Tadmur), a desert oasis northeast of Damascus, containing the ruins of a city that was one of the most prosperous centres of the ancient world (1980); the old city of Aleppo, located at the crossroads of various trade routes since the 2nd millennium BC (1986); the two castles of Crac des Chevaliers and Qal'at Salah El-Din (2006); and the Ancient Villages of Northern Syria (2011), which date from the 1st to the 7th centuries AD.

### Press

In 2006 there were four national daily newspapers with a combined circulation of 130,000. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Syria ranked 173rd out of 178 countries.

### Tourism

In 2005 there were 3,368,000 non-resident tourists; receipts totalled US\$2.28bn.

### Festivals

Islamic religious festivals are observed throughout the year. Among the most colourful is Milad al-Nabi, held in April to commemorate the birth of Muhammad. The Silk Road Festival takes place in Sept./Oct., when all major cities hold celebrations and Damascus in particular is transformed back to the city that once served as a meeting place for the caravans travelling the Silk Road. Independence Day is widely observed on 17 April.

## KEY HISTORICAL EVENTS

The Tajik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tajiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929. In Aug. 1990 the Tajik Supreme Soviet adopted a declaration of republican sovereignty and in Sept. 1991 Tajikistan declared independence. In Dec. 1991 the republic became a member of the CIS. After demonstrations and fighting, the Communist government was replaced by a Revolutionary Coalition Council on 7 May 1992. Following further demonstrations, President Nabiyeu was ousted on 7 Sept. Civil war broke out, and the government resigned on 10 Nov. On 30 Nov. it was announced that a CIS peacekeeping force would be sent to Tajikistan. A state of emergency was imposed in Jan. 1993. On 23 Dec. 1996 a ceasefire was signed. A further agreement on 8 March 1997 provided for the disarmament of the Islamic-led insurgents, the United Tajik Opposition, and their eventual integration into the regular armed forces. A peace agreement brokered by Iran and Russia was signed in Moscow on 27 June 1997 stipulating that the opposition should have 30% of ministerial posts in a Commission of National Reconciliation. President Rakhmon (formerly Rakhmonov), first elected in 1994, won a second term in 1999. The country's first multi-party parliamentary election was held in Feb. 2000, although it was criticized by observers for failing to meet democratic standards.

Ethnic conflict and terrorist attacks continue to plague Tajikistan, with Russia offering military support. Fighting in the Fergana Valley, involving the Islamist Movement of Uzbekistan, is a cause for concern for all Central Asian governments.

## TERRITORY AND POPULATION

Tajikistan is bordered in the north and west by Uzbekistan and Kyrgyzstan, in the east by China and in the south by Afghanistan. Area, 143,100 sq. km (55,200 sq. miles). It includes two regions (Sughd and Khatlon), one autonomous region (Gorno-Badakhshan Autonomous Region), the city of Dushanbe and regions of republican subordination. 2010 provisional census population, 7,565,000; density, 53 per sq. km. 80% of the population in 2000 were Tajiks, 15% Uzbeks and 1% Russians.

The UN gives a projected population for 2015 of 7.40m.

In 2011 only 26.4% of the population lived in urban areas, making it the most rural of the former Soviet republics.

The capital is Dushanbe (2010 provisional population, 724,000). Other large towns are Khujand (formerly Leninabad), Kulyab (Kūlob) and Kurgan-Tyube.

The official language is Tajik, written in Arabic script until 1930 and after 1992 (the Roman alphabet was used 1930–40; the Cyrillic, 1940–92).

## SOCIAL STATISTICS

Estimates, 2008: births, 192,000; deaths, 44,000. Rates, 2008 estimate (per 1,000 population): births, 28.1; deaths, 6.4. Life expectancy, 2007, 63.7 years for men and 69.3 for women. Annual growth, 2000–08, 1.3%. Infant mortality, 2010, 52 per 1,000 live births; fertility rate, 2008, 3.4 births per woman.

In the Human Development Index, or HDI (measuring progress in countries in longevity, knowledge and standard of living), Tajikistan is ranked the lowest of any of the former Soviet republics at 127th in the 2011 rankings published in the annual Human Development Report.

## CLIMATE

Considering its altitude, Tajikistan is a comparatively dry country. July to Sept. are particularly dry months. Winters are cold but spring comes earlier than farther north. Dushanbe, Jan.  $-10^{\circ}\text{C}$ , July  $25^{\circ}\text{C}$ . Annual rainfall 375 mm.

## CONSTITUTION AND GOVERNMENT

In Nov. 1994 a new constitution was approved by a 90% favourable vote by the electorate, which enhanced the President's powers. The head of state is the *President*, elected by universal suffrage. When the 1994 constitution took effect the term of office was five years. However, an amendment to the Constitution prior to the 1999 election extended the presidential term to seven years, although a president could only serve one term. A further referendum approved in June 2003 allowed President Rakhmonov (now Rakhmon) to serve two additional terms after the expiry of the one that he was serving at the time, in Nov. 2006, theoretically enabling him to remain in office until 2020. The Organization for Security and Co-operation in Europe and the USA expressed concerns at the result. Tajikistan has a bicameral legislature. The lower chamber is the 63-seat *Majlisi Namoyandagon* (*Assembly of Representatives*), with 41 members elected in single-seat constituencies and 22 by proportional representation for five-year terms. The upper chamber is the 34-seat *Majlisi Milliy* (*National Assembly*), with 25 members chosen for five-year terms by local deputies, eight appointed by the president and one seat reserved for the former president.

## National Anthem

'Zinda bosh, ey Vatan, Tochikistoni ozodi man' ('Live long, O Nation, my free Tajikistan'); words by Gulnazar Keldi, tune by Suleiman Yudakov.

## RECENT ELECTIONS

At presidential elections on 6 Nov. 2006 President Rakhmon was re-elected with 79.3% of votes cast. Opposition parties boycotted the poll.

In elections to the Assembly of Representatives held on 28 Feb. 2010 the People's Democratic Party of Tajikistan (PDPT) won 54 of 63 seats (71.0% of the vote), the Islamic Renaissance Party of Tajikistan (IRP) 2 (8.2%), the Communist Party (CP) 2 (7.0%), Agrarian Party 2 (5.1%) and the Party of Economic Reforms of Tajikistan 2 (5.1%). Turnout was 90.8%. The last seat went to the PDPT in a second round of voting held on 14 March bringing their total to 55. Elections to the National Assembly were held on 25 March 2010. 25 of the 34 seats were voted for by local majlisi deputies, eight were appointed by the president and the other member is the former president.

## CURRENT LEADERS

### Emomalii Rakhmon

*Position*  
President

#### Introduction

Emomalii Rakhmon (formerly Rakhmonov), a former cotton-farm administrator, became Tajikistan's head of state in Nov. 1992, after the country's first post-Soviet leader, Rakhmon Nabiyev, was forced to resign. Rakhmon has survived civil war and an assassination attempt, but reforming institutions and raising living standards in one of the region's poorest countries has proved a hard challenge. In March 2007 he announced that he was dropping the Russian suffix (-ov) from his surname.

#### Early Life

Emomalii Sharipovich Rakhmon was born on 5 Oct. 1952 in the Danghara district of the Kulob province of the Tajik Soviet Socialist Republic (SSR). He studied electronics and from 1969 worked at a vegetable-oil extraction factory in Qurghonteppea. After three years in the Soviet navy, Rakhmon became an administrator at Lenin *Kholkov* (collective farm) in Danghara, constructing a power base as chairman of the farm's trade union committee.

He studied economics by correspondence and in 1982 graduated from the Tajik State University. He was elected people's deputy of the supreme council of the Tajik SSR in 1990. Tajikistan declared independence in Sept. 1991 but hopes of an economically viable state were undermined by civil war. On 19 Nov. 1992, following Nabiev's forced resignation and the annulment of the office of president, Rakhmon was elected chairman of the supreme council and head of state. On 6 Nov. 1994, following

inter-Tajik peace talks, he won presidential elections, claiming 58.3% of the vote.

#### Career in Office

Civil war continued through the early years of Rakhmon's presidency and by the time hostilities between the Islamist-led opposition and his Moscow-backed administration ended in June 1997, at least 50,000 people had died. In March 1998 he joined the centrist People's Democratic Party of Tajikistan (PDPT). He was re-elected president on 6 Nov. 1999 with 97% of the vote, and on 22 June 2003 won a referendum to allow him to run for two further seven-year terms. Rakhmon's grip on power was underlined in the general elections of Feb. 2005 and Feb. 2010 when his PDPT won landslide parliamentary victories. The opposition Islamic and communist parties alleged fraud in both polls and observers said the vote failed to meet international standards. Meanwhile, Rakhmon was again re-elected overwhelmingly to the presidency in Nov. 2006 as the opposition boycotted the vote.

Tajikistan suffered a particularly severe winter in 2007–08 and also faced an energy crisis. Many industries were forced to shut down, some rural areas had no electricity and even the capital faced food shortages. In April 2008 the International Monetary Fund ordered the Tajik authorities to repay IMF disbursements that had been obtained on the basis of false data and misreporting. Rakhmon subsequently removed some senior National Bank officials from their positions.

In April 2009 the government finalized an agreement allowing the USA to transport non-military equipment to Afghanistan across Tajik territory.

Tensions increased between Tajikistan and Uzbekistan through 2012 as the Tajik government accused its neighbour of disrupting gas and electricity deliveries, while the Uzbek government objected to Tajik plans for a large dam project that it claimed would restrict access to regional water resources.

In Oct. 2012 Tajikistan agreed to extend Russia's lease on a Soviet-era army base, scheduled to expire in 2014, for 30 more years.

## DEFENCE

Conscription is compulsory for two years. In 2007 the active armed forces had a strength of 8,800. Paramilitary forces totalled 7,500 including 3,800 interior troops and 2,500 emergencies ministry troops. 5,500 Russian Army personnel were stationed in the country in 2007.

Defence expenditure in 2008 totalled US\$80m. (US\$11 per capita), representing 1.7% of GDP.

#### Army

Personnel strength (2007) 7,300.

#### Air Force

Air Force/Air Defence strength (2007) 1,500.

## ECONOMY

In 2006 agriculture accounted for 24.8% of GDP, industry 27.4% and services 47.8%.

#### Overview

Though arable land accounts for only 10% of the total, Tajikistan is primarily an agrarian economy, with the sector employing two-thirds of the labour force and contributing 11% of export revenues. As a result of war and repeated changes of political leadership in the 1990s, the economy deteriorated faster than in other former Soviet satellites. In 1996 a reform programme was launched, supported by the IMF and the World Bank. Despite a slow start and the Russian financial crisis of 1998, the focus on reconstruction stimulated a market-driven economy.

Economic growth, which averaged 8.6% from 2000–08, depended on cotton and aluminium exports, as well as rising

remittances from overseas. Sound macroeconomic management has enabled inflation to be controlled, having reached levels between 30–40% in the period 1998–2001. Other achievements include the halving of foreign debt, stabilization of the exchange rate and a reduction in poverty levels. Between 1999 and 2009, poverty rates fell from 83% to 47%. However, governance and institutions are weak and unemployment is widespread.

With the global financial crisis growth slowed to 3.9% in 2009, caused by a sharp reduction in remittances (down 31% from the 2008 peak level) and lower prices and demand for aluminium and cotton. Nonetheless, a pick-up in remittances initiated a recovery in 2010.

### Currency

The unit of currency is the *somoni* (TJS) of 100 *dirams*, which replaced the Tajik rouble on 30 Oct. 2000 at 1 somoni = 1,000 Tajik roubles. The introduction of the new currency was intended to strengthen the national banking system. The IMF voiced their support for the new currency, which it believed would contribute to macroeconomic stability and expedite the transition to a market economy. Inflation in 1993 was 2,195%, declining to 418% in 1996 and still further to 7.2% in 2004, the reduction being helped by a US\$22m. IMF loan in 1996 and maintenance of a tighter monetary regime. Although the rate had risen back up to 20.4% in 2008, inflation fell to 6.5% in 2010 but went up again to 12.4% in 2011. Total money supply was 241m. somoni in Dec. 2004. Gold reserves stood at 47,000 troy oz in July 2005.

### Budget

Revenues in 2009 totalled 4,175m. somoni and expenditure 5,643m. somoni.

## Gorno-Badakhshan Autonomous Region

Comprising the Pamir massif along the borders of Afghanistan and China, the province was set up on 2 Jan. 1925, initially as the Special Pamir Province. Area, 63,700 sq. km (24,590 sq. miles). The population in 2007 was 218,000 (mainly Tajiks with a Kirghiz minority). Capital, Khorog (2007: 29,000). The inhabitants are predominantly Ismaili Muslims.

Mining industries are developed (gold, rock-crystal, mica, coal, salt). Wheat, fruit and fodder crops are grown, and cattle and sheep are bred in the western parts. Total area under cultivation, 16,236 ha. In 2004 the region was 69% self-sufficient in food; humanitarian aid had comprised 85% of all food consumed in 1993.

The area is the most impoverished in Tajikistan, with 84% of the population falling below the poverty line in 2003, compared to a national average of 64%. Around 20% of the population of working age is employed abroad, mainly in the Russian Federation. Unemployment is approximately 70%.

The Khorog State University was founded in 1992. The private University of Central Asia has a campus located in Khorog (the other two being in Tekeli, Kazakhstan and Naryn, Kyrgyzstan). In 2004 there was one doctor per 476 inhabitants and 91 hospital beds per 10,000 inhabitants.

## KEY HISTORICAL EVENTS

Archaeological evidence suggests that present-day Tanzania was inhabited by Khoisan-speaking hunter-gatherers from at least 10,000 BC. The Sandawe and Hadze of north-central Tanzania are descendants of these groups. Cushitic-speaking cattle herders migrated south from Ethiopia and Sudan from around 1000 BC. Beginning in the first millennium AD, Tanzania was settled by Bantu-speaking iron-working farmers, whose origins are considered to be in the borderlands of present-day Nigeria and Cameroon.

Seafarers from Arabia established a trading settlement on the coast at Kilwa around AD 800, and Persian merchants settled on the islands of Zanzibar and Pemba. Nilotic-speaking pastoralists (including the Maasai and Luo) moved south into Tanzania between AD 900 and AD 1700. Sultan Hassan bin Sulaiman I established control of Kilwa around 1270. Islam spread and a thriving Afro-Arab 'Swahili' culture took hold in coastal areas.

Portuguese explorers arrived off Kilwa in 1500, heralding two centuries of Portuguese control over various East African trading ports. Zanzibar came under Omani control in the 1650s and prospered as a centre of the slave trade, extending its influence over the coastal hinterland and into the mainland interior. Britain attempted to end the slave trade by signing the Treaty of Moresby with the Sultan of Zanzibar in 1822. During the 1880s the German imperialist, Dr Carl Peters, founded German East Africa by signing agreements with local rulers. A series of agreements between Britain and Germany and the Sultan of Zanzibar saw

Germany become the dominant influence over most of mainland Tanzania, while the Sultan of Zanzibar retained control of a strip of coastal territories and Britain ruled Zanzibar as a protectorate.

German East Africa was conquered by the Allies in the First World War and subsequently divided between the Belgians, the Portuguese and the British. The country was administered as a League of Nations mandate until 1946, and then as a UN trusteeship territory until 9 Dec. 1961. Tanganyika achieved responsible government in Sept. 1960 and full self-government on 1 May 1961. On 9 Dec. 1961 Tanganyika became a sovereign independent member state of the Commonwealth of Nations. On 9 Dec. 1962 the country adopted a republican form of government (still within the British Commonwealth) and Dr Nyerere was elected as the first president.

Zanzibar gained internal self-government on 24 June 1963, followed by full independence on 9 Dec. 1963. On 12 Jan. 1964 the sultanate was overthrown by a revolt of the Afro-Shirazi Party leaders who established the People's Republic of Zanzibar. Also in Jan. 1964 there was an attempted coup against Nyerere who had to seek British military help. On 26 April 1964 Tanganyika, Zanzibar and Pemba combined to form the United Republic of Tanzania. The first multi-party elections were held in 1995.

## TERRITORY AND POPULATION

Tanzania is bounded in the northeast by Kenya, north by Lake Victoria and Uganda, northwest by Rwanda and Burundi, west by Lake Tanganyika, southwest by Zambia and Malawi, and south by Mozambique. Total area 942,799 sq. km (364,881 sq. miles), including the offshore islands of Zanzibar (1,554 sq. km) and Pemba (906 sq. km) and inland water surfaces (59,050 sq. km). 2012 census population, 44,929,002, giving a density of 50.8 per sq. km.

The UN gives a projected population for 2015 of 52.31m.

In 2011, 26.9% of the population lived in urban areas. 0.5m. Hutu refugees were forcibly repatriated to Rwanda in Dec. 1996. In 2000 Tanzania hosted the highest number of refugees in Africa, with a population of over 680,000. By Nov. 2009 repatriation programmes had allowed the number of refugees to drop below 100,000 for the first time in 15 years.

The chief towns (2002 census populations) are Dar es Salaam, the chief port and former capital (2,339,910), Arusha (270,485), Mbeya (232,596) and Mwanza (209,806). Dodoma, the capital, had a population of 150,604 in 2002.

The United Republic is divided into 30 administrative regions of which 25 are in mainland Tanzania, three in Zanzibar and two in Pemba. Areas and 2002 populations of the regions:

The official languages are Swahili (spoken as a mother tongue by only 8.8% of the population, but used as a *lingua franca* by 91%) and English.

## SOCIAL STATISTICS

2008 estimates: births, 1,765,000; deaths, 482,000. Rates, 2008 estimates (per 1,000 population): births, 41.5; deaths, 11.4. Annual population growth rate, 2000–08, 2.7%. Life expectancy in 2007 was 54.2 years for men and 55.8 for women. 45% of the population was below 15 years old in 2008. Infant mortality, 2010, 50 per 1,000 live births; fertility rate, 2008, 5.6 births per woman.

## CLIMATE

The climate is very varied and is controlled largely by altitude and distance from the sea. There are three climatic zones: the hot and humid coast, the drier central plateau with seasonal variations of temperature, and the semi-temperate mountains. Dodoma, Jan. 75°F (23.9°C), July 67°F (19.4°C). Annual rainfall 23" (572 mm). Dar es Salaam, Jan. 82°F (27.8°C), July 74°F (23.3°C). Annual rainfall 43" (1,064 mm).

## CONSTITUTION AND GOVERNMENT

The current constitution dates from 25 April 1977 but underwent major revisions in Oct. 1984. The *President* is head of state, chairman of the party and commander-in-chief of the armed forces. The *Prime Minister* is also the leader of government business in the National Assembly.

The 357-member *Bunge* (*National Assembly*) is composed of 239 constituency representatives, 102 appointed women, ten Union presidential nominees (five of whom must be women), five representatives of the Zanzibar House of Representatives (two women), and one *ex officio* member (the Attorney General). In Dec. 1979 a separate constitution for Zanzibar was approved. Although at present under the same Constitution as Tanzania, Zanzibar has, in fact, been ruled by decree since 1964. The formation of a government of national unity was approved by 66.4% of voters in a referendum in July 2010. Following elections on 21 Oct. 2010 the new government was inaugurated in Nov. 2010.

## CURRENT LEADERS

### Jakaya Kikwete

*Position*  
President

### Introduction

Jakaya Kikwete became president of Tanzania on 14 Dec. 2005, winning an overwhelming majority in national elections that were generally considered free and fair. A Muslim from the coastal district of Bagamoyo, Kikwete was a military leader in the 1970s and 1980s and served as foreign minister for ten years from 1995. He was re-elected in Oct. 2010.

### Early Life

Jakaya Mrisho Kikwete was born on 7 Oct. 1950 in Msoga, Bagamoyo District on the coast of Tanganyika. He attended schools in Msoga and Kibaha, before studying economics at the University of Dar es Salaam. In 1975, while at university, Kikwete joined the ruling Tanganyika African National Union, which later became the Chama Cha Mapinduzi (CCM, Revolutionary State Party). Following his graduation in 1978, Kikwete joined the Tanzania People's Defence Force (TPDF), where he served as a lieutenant from 1972–79 and subsequently as captain.

In 1984, having spent a year at the Monduli military officers college in Arusha, Kikwete became chief political instructor of the TPDF. In 1988 he was elected to represent Bagamoyo parliamentary constituency, a post he held for three consecutive terms. He was deputy minister of energy, water and minerals from 1988–90 before being promoted to minister and serving under President Ali Hassan Mwinyi for four years. Following

constitutional reform that legalized opposition parties in 1992, Kikwete retired from the army.

In 1995, having served as finance minister for a year, Kikwete became one of 14 challengers for the CCM leadership. He lost to Benjamin Mkapa, who led the party to victory in national elections in Oct. 1995 amid widespread allegations of voting irregularities. Kikwete was appointed foreign minister, a post he held until 2005, winning praise for his mediation work in war-torn Burundi and the Democratic Republic of the Congo. His department was credited with advancing regional integration within the East African Community and in the Southern African Development Community. Kikwete won the right to lead his party into the 2005 national elections and emerged victorious from the poll on 14 Dec. He received 80% of the vote and replaced Mkapa as president. The CCM retained its overwhelming majority in parliament, with 206 out of 232 seats.

#### **Career in Office**

In his inauguration speech, Kikwete vowed to continue the free-market policies of Mkapa and prioritized the improvement of relations with the semi-autonomous islands of Zanzibar. He inherited a country in which poverty is widespread but whose economy had been growing at a rate of 6% a year. He was expected to maintain political stability as the country benefited from rising gold production and donor-supported investment. In Aug. 2006, in recognition of the government's economic reform efforts, the African Development Bank cancelled US\$645m. of Tanzanian debt and also agreed a loan of US\$74m. for poverty reduction programmes.

In Feb. 2008 Prime Minister Edward Lowassa and two other ministers resigned in the wake of a corruption scandal involving an energy deal with a US-based electricity company, in response to which Kikwete dissolved the cabinet and appointed Mizengo Kayanza Peter Pinda as the new premier. Kikwete served as chairman of the African Union for 2008.

In Oct. 2010 Kikwete and the CCM were returned to power in presidential and parliamentary elections. Following allegations of ministerial misuse of public funds, Kikwete sacked six members of his cabinet in May 2012.

In Aug. 2012 the government confirmed that Iranian oil tankers had been operating under the Tanzanian flag to circumvent international sanctions on Iranian oil trading. The USA, in response, threatened possible action against Tanzania unless the practice was stopped.

#### **DEFENCE**

Defence expenditure totalled US\$184m. in 2008 (US\$5 per capita), representing 0.9% of GDP.

#### **Army**

Strength (2007), 23,000. There is a paramilitary Police Field Force of 1,400.

#### **Navy**

Personnel in 2007 totalled about 1,000. The principal bases are at Dar es Salaam, Zanzibar and Mwanza.

#### **Air Force**

The Tanzanian People's Defence Force Air Wing was built up initially with the help of Canada, but combat equipment has been acquired from China. Air Defence Command personnel totalled 3,000 in 2007. Although there were a reported 19 combat-capable aircraft in 2007 virtually no air defence assets were serviceable.

#### **INTERNATIONAL RELATIONS**

In Nov. 1999 a treaty was signed between Tanzania, Kenya and Uganda to create a new East African Community as a means of developing East African trade, tourism and industry and laying the foundations for a future common market and political federation.

#### **ECONOMY**

Agriculture accounted for 28.8% of GDP in 2009, industry 24.3% and services 46.9%.

#### **Overview**

Real GDP grew by an average 6% per year from 2009–11, driven by mining and construction, the two fastest-growing sectors of the economy. Flourishing tourism and the implementation of economic reforms further boosted growth. Per capita income was US\$1,500 in 2011. An estimated 40% of the state budget is financed by aid. Agriculture employs over 80% of the workforce and accounts for 85% of exports. In 2011, 7% of the government budget went to the agricultural sector.

From the late 1960s to the mid-1980s the economy stagnated under corrupt state control. From 1985 popular discontent encouraged the government of Ali Hassan Mwinyi to loosen control over prices and trade. Subsequent banking reforms and a stronger private sector have spurred investment.

Tanzania is one of the largest producers of gold in Africa, with exports growing by 30% in the year to June 2012. Gold exports in 2011 were 40.4 tonnes, up from 35.6 tonnes in 2010. The country is also a major producer of coffee. Tanzania's main export market is China (accounting for 14.2%), followed by India (9.9%) and Japan (7.7%).

#### **Currency**

The monetary unit is the *Tanzanian shilling* (TZS) of 100 cents. Foreign exchange reserves were US\$3,533m. in Sept. 2009. Inflation, which had been 26.5% in 1995, was down to 4.1% in 2004, the lowest rate for more than 20 years. It has gone up since then and was 7.2% in 2010 and 12.7% in 2011. Total money supply in Aug. 2009 was Sh. 3,429.5bn.

#### **Budget**

The fiscal year ends 30 June. In 2006–07 revenues were Sh. 3,691.2bn. and expenditures Sh. 4,474.7bn. Tax revenue accounted for 68.5% of revenues in 2006–07 and current expenditure 70.1% of expenditures.

VAT is 18%.

#### **Performance**

Real GDP growth was 6.0% in 2009, 7.0% in 2010 and 6.4% in 2011. Total GDP in 2011 was US\$23.9bn. (mainland Tanzania only).

#### **Banking and Finance**

The central bank is the Bank of Tanzania (*Governor*, Prof. Benno Ndulu).

On 6 Feb. 1967 all commercial banks with the exception of National Co-operative Banks were nationalized, and their interests vested in the National Bank of Commerce on the mainland and the Peoples' Bank in Zanzibar. However, in 1993 private-sector commercial banks were allowed to open. In 1997 the National Bank of Commerce (NBC) was split into a trade bank, a regional rural bank and a micro-finance bank. It was privatized in 2000, with the South African concern Absa Group Limited purchasing a 55% stake. The government retained 30% with the International Finance Corporation holding 15%. In 2010 it had 53 branches; total assets at 31 Dec. 2009, Sh. 1,294,606m. The NBC's market dominance has severely declined since 1997. In Dec. 2008 the Co-operatives Rural and Development Bank (CRDB) held 17% of the banking sector's total assets, making it the market leader (the National Microfinance Bank held 16% and the NBC 13%). In Oct. 2010 there were 28 commercial banks registered in Tanzania.

Foreign debt totalled US\$8,664m. in 2010, representing 37.7% of GNI.

A stock exchange opened in Dar es Salaam in 1996.

## ENERGY AND NATURAL RESOURCES

### Environment

Tanzania's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.1 tonnes per capita.

### Electricity

Installed capacity was an estimated 1.0m. kW in 2007, but there are plans to increase this to 2.8m. kW by 2015. Only 14% of the population has access to electricity. Production in 2007 was 4.17bn. kWh, with consumption per capita 107 kWh.

### Oil and Gas

A number of international companies are exploring for both gas and oil. In 2007 proven natural gas reserves were 6.5bn. cu. metres.

### Minerals

Tanzania's mineral resources include gold, nickel, cobalt, silver and diamonds. International funds injected to improve Tanzania's economy have resulted in notable increases, particularly in gold production. The first commercial gold mine began operating in Mwanza in 1998. By 2005 the value of gold exports had reached US\$642m., up from US\$121m. in 2000. Gold production in 2005 totalled 52,236 kg. Large deposits of coal and tin exist but mining is on a small scale. Estimated diamond production in 2005 was 205,000 carats; exports totalled US\$33.7m. in 2004.

### Agriculture

About 80% of the workforce are engaged in agriculture, chiefly in subsistence farming. Agricultural produce contributes around 85% of exports. There were an estimated 4.0m. ha. of arable land in 2002 and 1.1m. ha. of permanent crops. Approximately 170,000 ha. were irrigated in 2002. There were about 7,600 tractors in 2002.

Production of main agricultural crops in 2002 (in 1,000 tonnes) was: cassava, 6,888; maize, 2,705; sugarcane, 1,600; sweet potatoes, 950; sorghum, 834; rice, 640; plantains, 602; coconuts, 370; millet, 300; dry beans, 270; potatoes, 240; seed cotton, 222. Zanzibar is a major producer of cloves.

Livestock (2003 estimates): 17.70m. cattle; 12.56m. goats; 3.52m. sheep; 30m. chickens.

Livestock products (2003 estimates, in 1,000 tonnes): beef and veal, 246; goat meat, 31; pork, bacon and ham, 13; lamb and mutton, 10; poultry meat, 45; goat's milk, 835; cow's milk, 100; eggs, 34; honey, 26.

### Forestry

Forests covered 33.43m. ha. in 2010 (38% of the total land area). In 2007, 24.44m. cu. metres of roundwood were cut.

### Fisheries

Catch (2008) 325,476 tonnes, of which 281,690 tonnes were from inland waters.

## INDUSTRY

Industry is limited, and is mainly textiles, petroleum and chemical products, food processing, tobacco, brewing and paper manufacturing.

## INTERNATIONAL TRADE

### Imports and Exports

In 2010 imports (c.i.f.) amounted to US\$8,012.9m. (US\$6,530.8m. in 2009); exports (f.o.b.) US\$4,050.5m. (US\$2,982.4m. in 2009).

Principal imports, 2002: consumer goods, 31.0%; machinery and apparatus, 22.2%; transport equipment, 13.2%; crude and refined petroleum, 11.8%. Principal exports, 2002: minerals (notably gold), 42.4%; cashew nuts, 5.8%; tobacco, 5.6%; coffee, 4.0%; tea, 3.4%.

Main import suppliers, 2002: South Africa, 11.4%; Japan, 8.4%; India, 6.5%; Russia, 6.1%; UAE, 5.9%. Main export markets, 2002: UK, 18.5%; France, 17.4%; Japan, 11.0%; India, 7.3%; Netherlands, 6.2%.

## COMMUNICATIONS

### Roads

In 2008 there were 87,524 km of roads, including 10,042 km of highways or national roads. Passenger cars in use in 2007 numbered 80,900; there were also 369,900 lorries and vans, 23,100 buses and coaches, and 52,000 motorcycles and mopeds.

### Rail

In 1977 the independent Tanzanian Railway Corporation was formed. The network totalled 2,707 km (metre-gauge) in 2005, excluding the joint Tanzania-Zambia (Tazara) railway's 961 km in Tanzania (1,067 mm gauge) operated by a separate administration. In 2008 the state railway carried 0.5m. passengers and 0.5m. tonnes of freight, and in 2005 the Tazara carried 0.9m. passengers and 0.6m. tonnes of freight.

In Oct. 1998 a transshipment facility for containers opened at Kidatu, southwest of Dar es Salaam, providing a link between the 1,067 mm gauge railways of the southern part of Africa and the 1,000 mm gauge lines of the north.

### Civil Aviation

There are three international airports: Dar es Salaam, Zanzibar and Kilimanjaro (Moshi/Arusha). Air Tanzania, the national carrier, provides domestic services and in 2003 had flights to Abu Dhabi, Blantyre, Johannesburg, Lilongwe, Mombasa, Muscat and Nairobi. In 2003 scheduled airline traffic of Tanzanian-based carriers flew 4m. km, carrying 150,000 passengers (61,000 on international flights). Dar es Salaam is the busiest airport, handling 1,155,000 passengers in 2006 (659,000 on international flights), followed by Zanzibar with 486,000 (197,000 on international flights).

### Shipping

In Jan. 2009 there were 20 ships of 300 GT or over registered, totalling 31,000 GT. The main seaports are Dar es Salaam, Mtwara, Tanga and Zanzibar. There are also ports on the lakes.

### Telecommunications

In 2008 there were 123,800 main (fixed) telephone lines; mobile phone subscribers numbered 13,006,800 in 2008 (30.6 per 100 persons). There were 520,000 internet users in 2008. In June 2012 there were 518,000 Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The Judiciary is independent in both judicial and administrative matters and is composed of a four-tier system of Courts: Primary Courts; District and Resident Magistrates' Courts; the High Court; and the Court of Appeal. The Chief Justice is head of the Court of Appeal and the Judiciary Department. The Court's main registry is at Dar es Salaam; its jurisdiction includes Zanzibar. The Principal Judge is head of the High Court, also headquartered at Dar es Salaam, which has resident judges at seven regional centres.

The population in penal institutions in Sept. 2006 was 43,911 (113 per 100,000 of national population).

### Education

In 1999-2000 there were 11,409 primary schools with 103,731 teachers for 4.19m. pupils. At secondary level there were 247,579 pupils with 12,496 (1997) teachers in 826 schools, and at university level in 2000-01 there were 21,960 students with 2,192 academic staff. Primary school fees were abolished in Jan. 2002.

Technical and vocational education is provided at several secondary and technical schools, and at the Dar es Salaam Technical College. There are 53 teacher training colleges,

including the college at Chang'ombe for secondary-school teachers.

There is one university, one university of agriculture and one open university. There are also nine other institutions of higher education.

Adult literacy rate in 2003 was 69.4% (male, 77.5%; female, 62.2%). In 1998–99 total expenditure on education came to 2.2% of GNP.

#### Health

In 2006 there were 1,807 doctors and dentists and 39,432 nurses and midwives. In 2005 there were 219 hospitals, 481 health centres and 4,679 dispensaries.

#### RELIGION

In 2001 there were 18.3m. Christians (including Roman Catholics, Anglicans and Lutherans) and 11.5m. Muslims. Muslims are concentrated in the coastal towns; Zanzibar is 99% Muslim. The remainder of the population follow traditional religions. In Feb. 2013 the Roman Catholic church had one cardinal.

#### CULTURE

##### World Heritage Sites

Tanzania has seven sites on the UNESCO World Heritage List: Ngorongoro Conservation Area (inscribed on the list in 1979); the Ruins of Kilwa Kisiwani and of Songo Mnara (1981); Serengeti National Park (1981); Selous Game Reserve (1982); Kilimanjaro National Park (1987); the Stone Town of Zanzibar (2000); and the Kondo Rock-Art sites (2006).

##### Press

In 2006 there were 14 dailies with a combined circulation of 115,000.

#### Tourism

There were 15 national parks in Tanzania in 2008. In 2004 there were 583,000 foreign tourists (excluding same-day visitors), bringing revenue of US\$610m. Tourism is the country's second largest foreign exchange earner after agriculture.

## KEY HISTORICAL EVENTS

Excavations at Ban Chiang on the Khorat plateau in northeast Thailand suggest rice farming was under way by as early as 2500 BC. From around 300 BC the Indianized Funan kingdom held sway across much of southeast Asia, including eastern and central Thailand. Artifacts discovered at the Funan capital of Ba Phnom, in modern Cambodia, point to trading links with China and India and as far as the Middle East and Rome. At its height in the 6th century AD, Funan control included part of the Malay peninsula.

Mon, Tai and Khmer peoples first entered northern and eastern Thailand from southern China in the 5th century AD. Taking advantage of Funan's decline after the 6th century, the Mon began

to establish independent kingdoms. Among them was Dvaravarti, which in the 10th century was absorbed by the Indian-influenced Khmer empire, centred on Angkor. Mongol incursions into Yunnan in southern China in the mid-13th century forced a new wave of Tai migration that culminated in the Sukhothai kingdom of north-central Thailand. Under Ramkhamhaeng (1279–98), its influence stretched southward to the Malay peninsula. Trade with India and China flourished and the Siamese language developed in written form.

The Tai kingdom of Lan Na emerged as the dominant power in northern Thailand in the 14th century while further south the declining Sukhothai came under the influence of Rama Tibodi, prince of U Tong, who, around 1350, established a Buddhist dynasty centred on Ayutthaya. Rice cultivation and trade brought prosperity and power to Siam over the next four centuries, though tempered by frequent warfare with the Khmer empire and the Lao state of Chiang Mai. Trade with Europe, the Middle East, China and Japan expanded considerably in the 16th and 17th centuries, notably under King Narai (1656–88). Relations with France developed in the 1680s but soured amid attempts to convert Narai to Christianity: French troops were expelled in 1688 and most foreigners were barred from Siam over the next century.

Ayutthaya suffered a series of attacks from Burma in the mid-1700s and fell in 1767 although Thai forces, led by Gen. Phya Tak (King Taksin), re-established control with the help of Chinese merchants within a decade. His successor, Chao Phraya Chakkri (Rama I), established Bangkok as his capital and restored the Buddhist religion during his reign (1782–1809). Subsequent Chakkri kings resumed relations with the West but, through skilful diplomacy, managed to preserve Siam's independence. The nation remained an absolute monarchy until 24 June 1932 when a group of rebels calling themselves the People's Party precipitated a bloodless coup. After King Prajadhipok tried to dissolve the newly appointed general assembly the army moved against him to become the dominant political force, a position it has held ever since. In 1939 Field Marshal Pibul Songgram became premier and embarked on a pro-Japanese policy that brought Thailand into the Second World War on Japan's side.

After 1945 periods of military rule were interspersed with attempts at democratic, civilian government. Democratic government was reintroduced for a short time after 1963 and again from 1969–71, until a military coup was staged aimed at checking crime and the communist insurgency. A moderately democratic constitution was introduced in 1978. On 23 Feb. 1991 a military junta seized power in Thailand's 17th coup since 1932. Following the appointment of Gen. Suchinda Kraprayoon as prime minister on 17 April 1992 there were violent anti-government demonstrations. Gen. Suchinda resigned and in May the legislative assembly voted that future prime ministers should be elected by its members rather than appointed by the military. The 1995 election was fought against a background of political and financial corruption. After the 1996 election a new constitution was drafted allowing for the separation of the executive, legislative and judicial branches of government.

On 26 Dec. 2004 Thailand, along with a number of other south Asian countries, was hit by a devastating tsunami. The death toll in Thailand was put at 8,000. The government of Thaksin Shinawatra was overthrown in a bloodless military coup on 19 Sept. 2006. Elections held in Dec. 2007 were won by the People's Power Party (PPP), the successor to Thaksin's banned Thai Rak Thai. Samak Sundaravej became prime minister in Feb. 2008, marking a return to civilian rule. When a Constitutional Court ruling removed him from office in Sept. 2008 he was replaced by

Somchai Wongsawat. Wongsawat in turn had to step down in Dec. 2008 when the Constitutional Court disbanded the ruling PPP following accusations of electoral fraud. Opposition leader Abhisit Vejjajiva formed a parliamentary coalition and was elected to the premiership. The pro-Thaksin United Front for Democracy against Dictatorship ('red-shirts') held anti-government protests in April 2009 and again in March–May 2010. On both occasions the government imposed a state of emergency, the most recent of which lasted until Dec. 2010.

### TERRITORY AND POPULATION

Thailand is bounded in the west by Myanmar, north and east by Laos and southeast by Cambodia. In the south it becomes a peninsula bounded in the west by the Indian Ocean, south by Malaysia and east by the Gulf of Thailand. The area is 513,120 sq. km (198,117 sq. miles).

At the 2010 census the population was 65,479,453; density, 127.6 per sq. km. In 2011, 34.4% of the population lived in urban areas.

The UN gives a projected population for 2015 of 70.88m.

Thailand is divided into six regions, 76 provinces and Bangkok, the capital. Population of Bangkok (2000 census figure), 6,355,144. Other towns (2000 census figures): Samut Prakan (378,741), Nonthaburi (291,555), Udon Thani (222,425), Nakhon Ratchasima (204,641), Hat Yai (187,920).

Thai is the official language, spoken by 53% of the population as their mother tongue. 27% speak Lao (mainly in the northeast), 12% Chinese (mainly in urban areas), 3.7% Malay (mainly in the south) and 2.7% Khmer (along the Cambodian border). There are more Lao speakers in Thailand than in Laos.

### SOCIAL STATISTICS

2005–06 births, 705,639; deaths, 440,024; marriages (2005), 345,234; divorces (2005), 90,688. Rates (per 1,000 population, 2005–06): birth, 10.9; death, 6.8; marriage (2005), 5.2; divorce (2005), 1.4. Annual population growth rate, 2000–05, 1.0%. Expectation of life (2007): 65.4 years for men; 72.1 years for women. Infant mortality, 2010, 11 per 1,000 live births; fertility rate, 2008, 1.8 births per woman.

### CLIMATE

The climate is tropical, with high temperatures and humidity. Over most of the country, three seasons may be recognized. The rainy season is June to Oct., the cool season from Nov. to Feb. and the hot season is March to May. Rainfall is generally heaviest in the south and lightest in the northeast. Bangkok, Jan. 78°F (25.6°C), July 83°F (28.3°C). Annual rainfall 56" (1,400 mm).

On 26 Dec. 2004 an undersea earthquake centred off the Indonesian island of Sumatra caused a huge tsunami that flooded coastal areas in western Thailand resulting in 8,000 deaths. In total there were more than 225,000 deaths in 14 countries.

### CONSTITUTION AND GOVERNMENT

The reigning King is **Bhumibol Adulyadej**, born 5 Dec. 1927. King Bhumibol married on 28 April 1950 Princess Sirikit (born 12 Aug. 1932), and was crowned 5 May 1950 (making him currently the world's longest-reigning monarch). *Offspring*: Princess Ubol Ratana (born 5 April 1951, married Aug. 1972 Peter Ladd Jensen, divorced 1998); Crown Prince Vajiralongkorn (born 28 July 1952, married 3 Jan. 1977 Soamsawali Kitiyakra, divorced 1993; married 10 Feb. 2001 Srirasmi Akharaphongpreecha); Princess Maha Chakri Sirindhorn (born 2 April 1955); Princess Chulabhorn (born 4 July 1957, married 7 Jan. 1982 Virayudth Didyasarin, divorced 1984).

Following the coup of Sept. 2006 an interim constitution was introduced on 1 Oct. 2006 to replace the 1997 constitution. In the country's first ever referendum, held on 19 Aug. 2007, 56.7% of votes cast were in favour of a new draft constitution (the 18th

constitution since independence in 1932) that paved the way for elections before the end of the year, set a limit of two four-year terms for the prime minister and made it easier to impeach the prime minister. Turnout was low.

There is a 150-seat *Senate* (76 senators elected in the 76 provinces and 74 appointed by a selection panel) and a 500-seat *House of Representatives* (375 members elected by popular vote from constituencies and 125 selected on a proportional basis from party lists).

### National Anthem

## RECENT ELECTIONS

At the elections to the House of Representatives on 3 July 2011 the Pheu Thai Party (PTP) won a majority with 265 seats out of 500 and 53.0% of the vote, ahead of the ruling Democrat Party with 159 seats (31.8%), Bhumjaithai with 34 seats (6.8%), Charthai Pattana with 19 (3.8%), the Chart Pattana Puea Pandin Party with 7 (1.4%) and the Phalang Chon Party also with 7 and 1.4%. Five other parties won four seats or fewer. Turnout was 66%. In a special session of the House of Representatives held on 5 Aug. 2011 the Thai parliament elected Yingluck Shinawatra prime minister by 296 to 3 with 197 abstentions.

There were elections to the 150-seat Senate on 2 March 2008. 76 members were elected, one for each of the country's provinces. The other 74 seats were appointed by a selection committee headed by a military-installed chief. Among the latter, 18 were former MPs or relatives of top politicians.

## CURRENT LEADERS

### Yingluck Shinawatra

#### Position

Prime Minister

#### Introduction

Yingluck Shinawatra became prime minister in Aug. 2011 after leading the Pheu Thai Party (PTP) to a landslide victory. The younger sister of former prime minister Thaksin Shinawatra, she is the country's first female premier.

#### Early Life

Yingluck was born in June 1967 in the northern province of Chiang Mai, the youngest of nine children. Her father, Lert Shinawatra, was a businessman and MP while her mother, Yindi Ramingwong, was the daughter of Princess Jantip Na Chiang Mai. In 1988 Yingluck graduated in public administration from Chiang Mai University and in 1991 completed a masters degree at Kentucky State University in the USA.

She joined Shinawatra Directories Co. in 1993, one of a number of businesses run by her brother, Thaksin. In 1994 she worked with Rainbow Media before returning to the family business as general productions manager and, from 1997, vice-president.

In 1999 Thaksin's businesses were brought together under Shin Corporation and in 2002 Yingluck became CEO of the group's

flagship company and Thailand's biggest mobile phone enterprise, AIS (Advance Info Service). She resigned in 2006 when Shin Corporation was sold to Temasek Holdings and took over as executive president of the family-owned property development company, SC Asset. She also served on the committee of the Thaicom Foundation, which provides educational opportunities for underprivileged children.

Thaksin was elected prime minister in 2001 but was ousted in a military coup in Sept. 2006. His party was dissolved by the constitutional court in 2007 and he has subsequently spent much of his time in exile. However, his followers established the Pheu Thai Party (PTP) in 2008 and convinced Yingluck, a political newcomer, to run in the July 2011 elections. The PTP won a majority in parliament and elected Yingluck prime minister the following month.

#### Career in Office

Expected to continue the economic liberalization pursued by her brother, Yingluck surrounded herself with a team of long-established political operators. Among her key challenges was addressing the country's long-standing political instability, which had resulted in violent social clashes in April 2009 and April–May 2010. She pledged to support an Independent Truth and Reconciliation Commission, although work on reconciliation legislation and a proposed amnesty provoked opposition through 2012 from protesters fearful that it would pave the way for Thaksin's return to power. She also promised to eliminate poverty by 2020, cut corporate tax and raise the minimum wage. In addition, she backed proposals for free public wi-fi access and a computer for every school child.

In Jan. 2012 she appointed ten new ministers and in Nov. survived a parliamentary no confidence motion in the wake of a major anti-government demonstration in Bangkok.

## DEFENCE

Conscription is for two years; if there are not enough volunteers a conscription lottery is held to fill the quota. In 2008 defence expenditure totalled US\$4,294m. (US\$65 per capita), representing 1.6% of GDP. Year-on-year expenditure rose in real terms by 25% in 2007 and 17% in 2008.

### Army

Strength (2007) 190,000. In addition there were 45,000 National Security Volunteer Corps, around 20,000 *Thahan Phran* ('Hunter Soldiers', a volunteer irregular force), 41,000 Border Police and a 50,000 strong paramilitary provincial police force (including an estimated 500-strong special action force).

### Navy

The Royal Thai Navy is, next to the Chinese, the most significant naval force in the South China Sea. The fleet includes a small Spanish-built vertical/short-take-off-and-land carrier *Chakri Naruebet*, which entered service in 1997 and operates nine ex-Spanish AV-8A Harrier aircraft (although their serviceability is in doubt) and helicopters, and ten frigates. Manpower was 70,600 (2007) including 25,849 conscripts and 1,940 naval aviation.

The main bases are at Bangkok, Sattahip, Songkla and Phang Nga, with the riverine forces based at Nakhon Phanom.

### Air Force

The Royal Thai Air Force had a strength (2007) of 46,000 personnel and 165 combat-capable aircraft, including F-16s and F-5Es. The RTAF is made up of four air divisions.

## ECONOMY

In 2006 agriculture accounted for 10.7% of GDP, industry 44.5% and services 44.8%.

Thailand's 'shadow' (black market) economy is estimated to constitute approximately 48% of the country's official GDP.

## Overview

Thailand has transformed into a diverse, industrialized economy in the last 30 years. An export-oriented, labour-intensive manufacturing sector has developed thanks largely to foreign investment, which in 2011 reached US\$5.8bn. Exports account for 71.3% of income, with the major trading partners being the USA (12.6%), Japan (11.9%) and China (9.7%).

The Asian financial crisis of the late 1990s saw GDP contract by 10.5% in 1998 as high inflation, rising unemployment and poverty took grip. The economy recovered quickly and from 1999–2007 grew at over 4% every year except for 2001, when it grew by 2.2% against the backdrop of a global slowdown.

A prudent macroeconomic policy, low public debt and low inflation helped Thailand recover from the Asian financial crisis, with average GDP growth from 2002 to 2006 of 5.7%. However, the global financial crisis combined with domestic political turmoil to restrict exports and undermine business confidence, resulting in one of the steepest contractions in Southeast Asia. Performance improved after 2009, with growth of nearly 8% in 2010, 0.1% in 2011 and over 6% in 2012. The low growth of 2011 reflected devastating floods that year, prompting the government to invest £40bn. in infrastructure reconstruction and improvements designed to limit the threat posed by future flooding.

The World Bank improved Thailand's economic status to one of upper middle income nation in July 2011 and the country is set to reach most of its UN Millennium Development targets. The poverty rate has declined to 8.1%, with the government set to raise the minimum wage in a bid to improve living standards.

## Currency

The unit of currency is the *baht* (THB) of 100 *satang*. After being pegged to the US dollar, the baht was devalued and allowed to float on 2 July 1997. It was the devaluation of the baht that sparked the financial turmoil that spread throughout the world over the next year. Foreign exchange reserves were US\$127,165m. in Sept. 2009 (US\$28,434m. in 1998) and gold reserves 2.70m. troy oz. Total money supply in Aug. 2009 was 1,022.2bn. baht. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 0.7% | 1.8% | 2.8% | 4.5% | 4.6% | 2.2% | 5.5% | -0.8% | 3.3% | 3.8% |

## Budget

The fiscal year runs from 1 Oct.–30 Sept. In 2006–07 budgetary central government revenue was 1,488.6bn. baht and expenditure 1,462.2bn. baht. Main sources of revenue in 2006–07: taxes on income, profits and capital gains, 614.9bn. baht; taxes on goods and services, 610.4bn. baht; taxes on international trade and transactions, 87.8bn. baht. Main items of expenditure by economic type in 2006–07: compensation of employees, 555.9bn. baht; grants, 358.4bn. baht; use of goods and services, 317.7bn. baht.

VAT is 7%.

## Performance

Real GDP growth rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 5.3% | 7.1% | 6.3% | 4.6% | 5.1% | 5.1% | 2.6% | -2.3% | 7.8% | 0.1% |

According to the National Economic and Social Development Board, the real GDP growth rate was 6.4% (provisional) in 2012. Thailand's total GDP in 2011 was US\$345.7bn.

## Banking and Finance

The Bank of Thailand (founded in 1942) is the central bank and bank of issue, an independent body although its capital is government-owned. Its assets and liabilities in 2002 were 2,853,897m. baht. Its *Governor* is Prasarn Trairatvorakul. In 2002

there were 30 commercial banks, 13 domestic banks and 21 foreign banks. In addition the Thai government controlled four banks in 2002: the Bank of Agriculture and Agricultural Co-operatives, the Government Housing Bank, the Government Savings Bank and the Export-Import Bank of Thailand. Total assets of commercial banks, 2002, 6,900,947m. baht. Deposits, 2001, 5,109,973m. baht.

Thailand received US\$9.6bn. worth of foreign direct investment in 2011 (US\$9.7bn. in 2010).

External debt amounted to US\$71,263m. in 2010, up from US\$46,3424m. in 2005 although down from US\$79,720m. in 2000. As a share of GNI foreign debt declined from 66.0% in 2000 to 27.6% in 2005 and further to 23.4% in 2010.

There is a stock exchange (SET) in Bangkok.

## ENERGY AND NATURAL RESOURCES

### Environment

Thailand's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 3.9 tonnes per capita in 2008.

### Electricity

Installed capacity, 2007, was 34.3m. kW. Output, 2007, 143.38bn. kWh, with consumption per capita 2,256 kWh.

### Oil and Gas

Proven crude petroleum reserves in 2008 were 0.5bn. bbls. Production of oil (2008), 13.4m. tonnes. Thailand and Vietnam settled an offshore dispute in 1997 that stretched back to 1973. Demarcation allowed for petroleum exploration in the Gulf of Thailand, with each side required to give the other some revenue if an underground reservoir is discovered that straddles the border.

Production of natural gas (2008), 28.9bn. cu. metres. Reserves, 2008, 300bn. cu. metres. In April 1998 Thailand and Malaysia agreed to share equally the natural gas jointly produced in an offshore area (the Malaysian-Thailand Joint Development Area) that both countries claim as their own territory.

### Minerals

The mineral resources include antimony, cassiterite (tin ore), copper, diatomite, dolomite, gold, gypsum, kaolin, lignite, limestone, manganese, marl, potash, rubies, sapphires, silica sand, silver and zinc. Production, 2005 unless otherwise indicated (in tonnes): limestone (2008), 142.12m.; lignite, 21.43m.; gypsum, 7.11m.; salt, 1.17m.; feldspar, 1.15m.; kaolin, 746,000; iron ore (metal content), 116,000 (estimate); zinc ore (metal content), 31,000 (estimate).

### Agriculture

In 2002 there were an estimated 15.9m. ha. of arable land and 3.5m. ha. of permanent cropland. About 4.96m. ha. were irrigated in 2002. The chief produce is rice, a staple of the national diet. Output of the major crops in 2002 was (in 1,000 tonnes): sugarcane, 74,258; rice, 26,057; cassava, 16,868; maize, 4,230; natural rubber, 2,456; bananas, 1,800; pineapples, 1,739; mangoes, 1,750; coconuts, 1,418. Thailand is the world's leading producer of natural rubber. Livestock, 2003: pigs, 7,059,000; cattle, 5,048,000; buffaloes, 1,613,000; chickens, 177m.; ducks, 20m.

### Forestry

Forests covered 18.97m. ha. in 2010, or 37% of the land area. Of the total area under forests 35% was primary forest in 2010, 44% other naturally regenerated forest and 21% planted forest. Teak and other hardwoods grow in the deciduous forests of the north; elsewhere tropical evergreen forests are found, with the timber yang the main crop (a source of yang oil). In 2007, 28.32m. cu. metres of roundwood were cut.

## Fisheries

In 2010 the total catch came to 1,827,199 tonnes with marine fishing accounting for 89% of all fish caught. Thailand is the third largest exporter of fishery commodities in the world (after China and Norway), with exports in 2009 totalling US\$6.24bn. Imports of fishery commodities in 2009 totalled US\$1.98bn. Thailand is also the third largest producer of fishmeal (after Peru and Chile), with 381,200 tonnes in 2009. Aquaculture production in 2010 was the sixth highest in the world, at 1,286,122 tonnes.

## INDUSTRY

The leading companies by market capitalization in Thailand in March 2012 were: PTT, an oil and gas company (US\$32.8bn.); Siam Commercial Bank (US\$23.5bn.); and PTTEP, a petroleum exploration and production company (US\$18.8bn.).

Production (2002 unless otherwise indicated): 31.65m. tonnes of cement (2008), 18.38m. tonnes of distillate fuel oil (2007), 7.33m. tonnes of residual fuel oil (2007), 6.31m. tonnes of petrol (2007), 5.95m. tonnes of sugar, 5.21m. tonnes of crude steel (2008), 768,098 tonnes of synthetic fibre, 519,006 tonnes of galvanized iron sheets, 208,000 tonnes of tin plate (2001), 1,636.0m. litres of soft drinks (2001), 1,238.0m. litres of beer (2001), 30.8bn. cigarettes, 169,304 automobiles and 415,593 commercial vehicles, and 6,096,000 televisions.

## Labour

In the period Sept.–Dec. 2003 the total labour force was 35.5m.; 14.2m. persons were employed in agriculture, hunting and forestry, 5.3m. in manufacturing, 5.2m. in wholesale and retail trade and 2.1m. in hotels and restaurants. The unemployment rate was 2.4% in June 2002. There is no nationwide minimum wage but a minimum wage is set at different levels at the provincial level. It varied between 159 baht and 221 baht per day in July 2011.

## INTERNATIONAL TRADE

### Imports and Exports

In 2010 imports (c.i.f.) totalled US\$182,393.4m. (US\$133,769.6m. in 2009); exports (f.o.b.), US\$195,311.5m. (US\$152,497.2m. in 2009). Main imports in 2003: machinery and transport equipment, 43.5%; chemicals and related products, 11.2%; petroleum and petroleum products, 10.6%; iron and steel, 5.4%. Exports: machinery and transport equipment, 43.8%; chemicals and related products, 6.5%; fish and seafood, 4.9%; clothing and apparel, 4.5%. Main import sources in 2003: Japan (24.1%), USA (9.5%), China (8.0%), Malaysia (6.0%), South Korea (3.8%). Principal export destinations (2003): USA (17.0%), Japan (14.2%), Singapore (7.3%), China (7.1%), Hong Kong (5.4%).

## COMMUNICATIONS

### Roads

In 2006 there were 180,053 km of roads, of which 450 km were motorways. Vehicles in use in 2006 included: 3.80m. passenger cars, 4.99m. lorries and vans and 15.67m. motorcycles and mopeds.

### Rail

The State Railway totalled 4,071 km in 2005. Passenger-km travelled in 2008 came to 8.0bn.; freight tonne-km transported in 2007 totalled 3.2bn. A metro ('Skytrain'), or elevated transit system, was opened in Bangkok in 1999. A second (underground) mass transit system in Bangkok, the Bangkok Subway, was opened in 2004.

### Civil Aviation

There are international airports at Bangkok (Suvarnabhumi), Chiang Mai, Phuket and Hat Yai. The national carrier, Thai Airways International, is 51.03% state-owned. In 2005 scheduled airline traffic of Thai-based carriers flew 213.8m. km, carrying 21,507,900 passengers. Bangkok handled 28,808,422 passengers in

2001 (21,395,311 on international flights) and 840,033 tonnes of freight. Phuket is the second busiest airport for passenger traffic, with 3,557,319 passengers in 2001 (2,225,031 on domestic flights), and Chiang Mai the second busiest for freight, with 23,786 tonnes in 2001. Suvarnabhumi, Bangkok's newest international airport, opened in Sept. 2006.

### Shipping

In Jan. 2009 there were 612 ships of 300 GT or over registered, totalling 2,738,000 GT. Of the 612 vessels registered, 209 were oil tankers, 205 general cargo ships, 72 liquid gas tankers, 52 bulk carriers, 26 chemical tankers, 26 passenger ships and 22 container ships. The busiest ports are Laem Chabang and Bangkok.

### Telecommunications

In 2008 there were 7.0m. main (fixed) telephone lines. In the same year mobile phone subscribers numbered 62.0m. (920.1 per 1,000 persons). There were 16.1m. internet users in 2008. In March 2012 there were 14.2m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The judicial power is exercised in the name of the King, by (a) courts of first instance, (b) the court of appeal (*Uthorn*) and (c) the Supreme Court (*Dika*). The King appoints, transfers and dismisses judges, who are independent in conducting trials and giving judgment in accordance with the law.

Courts of first instance are subdivided into 20 magistrates' courts (*Kwaeng*) with limited civil and minor criminal jurisdiction; 85 provincial courts (*Changwad*) with unlimited civil and criminal jurisdiction; the criminal and civil courts with exclusive jurisdiction in Bangkok; the central juvenile courts for persons under 18 years of age in Bangkok.

The court of appeal exercises appellate jurisdiction in civil and criminal cases from all courts of first instance. From it appeals lie to Dika Court on any point of law and, in certain cases, on questions of fact.

The Supreme Court is the supreme tribunal of the land. Besides its normal appellate jurisdiction in civil and criminal matters, it has semi-original jurisdiction over general election petitions. The decisions of Dika Court are final. Every person has the right to present a petition to the government who will deal with all matters of grievance.

The death penalty is still in force; there were two confirmed executions in 2009 (the first since 2003), but none since. The population in penal institutions in March 2011 was 224,292 (328 per 100,000 of national population).

### Education

Education is compulsory for children for nine years and is free in local municipal schools. In 2007 there were 5,703,756 primary school pupils with 321,930 teaching staff. There were 4,789,339 secondary school pupils in 2007 with 227,929 teaching staff. There were 1,005,481 students in vocational education in 2005. In higher education there were 2,503,572 students in 2007 with 66,431 academic staff. In 2005 there were 78 public and 61 private institutions of higher education, 146 industry and community colleges, 110 technical colleges, 54 polytechnic colleges and 44 agricultural and technology colleges.

The adult literacy rate in 2005 was 94%.

In 2007 public expenditure on education came to 4.0% of GNI and 20.9% of total government spending.

### Health

In 2002 there were 3,658 hospitals, with a provision of 69 beds per 10,000 population. In 2000 there were 18,025 doctors, 4,141 dentists, 6,384 pharmacists, 70,978 nurses and (in 1997) 2,677 midwives. Thailand is considered to be the most successful country in the world in preventing the spread of HIV/AIDS. The

number of annual new HIV cases has fallen to under 20,000 from a high of 140,000 in the mid 1990s.

### RELIGION

At the 2000 census 94.6% of the population were Buddhists and 4.6% Muslims. In Feb. 2013 the Roman Catholic church had one cardinal.

### CULTURE

#### World Heritage Sites

There are five UNESCO sites in Thailand. They are: the Thung Yai-Huai Kha Khaeng wildlife sanctuaries (inscribed in 1991); the palace, temples, Buddhas, etc. of the historic town of Sukhothai (1991); the 15th–18th century historic town of Ayutthaya (1991); the Bronze Age Ba Chiang archaeological site (1992); and the mountainous Dong Phrayayen-Khao Yai forest complex (2005).

#### Press

In 2008 there were 46 daily newspapers (45 paid-for and one free), with a combined circulation of 7.4m. The newspapers with the highest circulation figures are *Thai Rath*, *Daily News* and *Kom Chad Luek*.

#### Tourism

In 2010 there were 15,936,000 tourist arrivals, up from 14,150,000 in 2009. Tourist numbers have doubled since 1998. The leading nationalities of tourists in 2010 were Malaysia (2,059,000), China (1,122,000), Japan (994,000) and the United Kingdom (811,000).

#### Festivals

Songkran, celebrated on 13 April each year, is the traditional Thai New Year festival, although 1 Jan. was made the official New Year in 1940. Other notable festivals include: the colourful Bosang Umbrella Fair in Jan. and a Flower Carnival in Feb., both in

Chiang Mai; a Candle Festival held in Ubon Ratchathani on Khao Phansa Day in July (the day after the full moon of the eighth lunar month, marking the start of Buddhist Lent); Buffalo Races, held during Oct. at Chonburi; and an annual Elephant Round-up in the third week of Nov. at Surin.

## KEY HISTORICAL EVENTS

Portugal abandoned its former colony, with its largely Roman Catholic population, in 1975, when it was occupied by Indonesia and claimed as the province of Timor Timur. The UN did not recognize Indonesian sovereignty over the territory. An independence movement, the Revolutionary Front for an Independent East Timor (FRETILIN), maintained a guerrilla resistance to the Indonesian government which resulted in large-scale casualties and alleged atrocities. On 24 July 1998 Indonesia announced a withdrawal of troops from Timor-Leste and an amnesty for some political prisoners, although no indication was given of how many of the estimated 12,000 troops and police would pull out. On 5 Aug. 1998 Indonesia and Portugal reached agreement on the outlines of an autonomy plan which would give the Timorese the right to self-government except in foreign affairs and defence.

In a referendum on the future of Timor-Leste held on 30 Aug. 1999 the electorate was some 450,000 and turnout was nearly 99%. 78.5% of voters opted for independence, but pro-Indonesian militia gangs wreaked havoc both before and after the referendum. The militias accused the UN of rigging the poll. There was widespread violence in and around Dili, the provincial capital, with heavy loss of life, and thousands of people were forced to take to the hills after intimidation. Timor-Leste's first democratic election took place on 30 Aug. 2001 in a ballot run by the UN, with FRETILIN winning 57% of the vote and 55 of the 88 seats in the new constituent assembly. Timor-Leste became an independent country on 20 May 2002.

## TERRITORY AND POPULATION

Timor-Leste (East Timor) has a total land area of 14,954 sq. km (5,774 sq. miles), consisting of the mainland (13,987 sq. km), the enclave of Oecussi-Ambeno in West Timor (817 sq. km), and the islands of Ataúro to the north (140 sq. km) and Jaco to the east (10 sq. km). The mainland area incorporates the eastern half of the island of Timor. Oecussi-Ambeno lies westwards, separated from the main portion of Timor-Leste by a distance of some 100

km. The island is bound to the south by the Timor Sea and lies approximately 500 km from the Australian coast.

Population at the census of July 2010, 1,066,409 (544,198 males); density, 71 per sq. km. The largest city is Dili, Timor-Leste's capital. In 2010 its population was 192,652. In 2011, 28.6% of the population were urban.

The UN gives a projected population for 2015 of 1-30m.

The ethnic East Timorese form the majority of the population. Non-East Timorese, comprising Portuguese and West Timorese as well as persons from Sumatra, Java, Sulawesi and other parts of Indonesia, are estimated to constitute approximately 20% of the total population.

During Indonesian occupation the official language was Bahasa Indonesia. Timor-Leste's constitution designates Portuguese and Tetum (the region's *lingua franca*) as the official languages, and English and Bahasa Indonesia as working languages.

## SOCIAL STATISTICS

2008 estimates: births, 44,000; deaths, 9,500. Rates, 2008 estimates (per 1,000 population): births, 40.0; deaths, 8.7. Annual population growth rate in 2000–08, 3.7%. Fertility rate, 2008, 6.5 children per woman. In 2007 life expectancy at birth was 59.8 years for males and 61.5 years for females.

From having the world's highest rate of infant mortality in the early 1980s, Timor-Leste's infant mortality rate dropped to 46 per 1,000 live births in 2010, although the figure varies widely between urban and rural areas.

## CLIMATE

In the north there is an average annual temperature of over 24°C (75°F), weak precipitation—below 1,500 mm (59") annually—and a dry period lasting five months. The mountainous zone, between the northern and southern parts of the island, has high precipitation—above 1,500 mm (59")—and a dry period of four months. The southern zone has precipitation reaching 2,000 mm (79") and is permanently humid. The monsoon season extends from Nov. to May.

## CONSTITUTION AND GOVERNMENT

The constitution promulgated in 2002 created a unicameral system with a *National Parliament* with a minimum requirement of 52 directly-elected seats and a maximum of 65. For the first term after independence the parliament had 88 members but this was reduced after the June 2007 legislative elections.

The *President* is directly elected for a period of five years and may not serve more than two terms.

## National Anthem

'Pátria, Pátria, Timor-Leste, nossa Nação' ('Fatherland, fatherland, East Timor our Nation'); words by F. Borja da Costa, tune by A. Araujo.

## RECENT ELECTIONS

Presidential elections were held on 17 March and 16 April 2012. In the first round Francisco Guterres of the ruling FRETILIN party received 28.8% of votes cast against Taur Matan Ruak (ind.) with 25.7%, José Ramos-Horta (ind.) with 17.5% and Fernando de Araújo of the Democratic Party with 17.3%. Eight other candidates received less than 4% each. In the second round Ruak was elected president with 61.2% of the vote against 38.8% for Guterres. Turnout was 78.2% in the first round and 73.1% in the second.

Elections to the 65-member National Parliament took place on 7 July 2012. The Congresso Nacional de Reconstrução de

Timor-Leste (CNRT; National Congress for Timorese Reconstruction) won 36.7% of votes cast and 30 seats, ahead of the Frente Revolucionária de Timor-Leste Independente (FRETILIN; Revolutionary Front for an Independent East Timor) with 29.9% of the votes and 25 seats, the Partido Democrático (PD; Democratic Party) 10.3% and 8 seats and the Frente de Reconstrução Nacional de Timor-Leste-Mudança (Front for National Reconstruction of Timor-Leste-Change) 3.1% and 2 seats. 17 other parties failed to win a seat. Turnout was 74.8%.

## CURRENT LEADERS

### Taur Matan Ruak

#### *Position*

President

#### *Introduction*

Taur Matan Ruak became president in May 2012, taking the largely ceremonial role as UN peacekeepers stationed in the country since 1999 prepared to withdraw.

#### *Early Life*

Born José Maria de Vasconcelhos on 10 Oct. 1956 in Baucau District, the president is popularly known by his *nom de guerre*, Taur Matan Ruak, meaning 'two sharp eyes' in the local Tetun language.

During the Indonesian invasion in Dec. 1975, Ruak joined FALINTIL (Forças Armadas da Libertação Nacional de Timor-Leste)—the military wing of FRETILIN (Frente Revolucionária de Timor-Leste Independente). On 13 March 1979 he was captured by Indonesian troops but escaped after 23 days to re-join FALINTIL. Rising through the ranks, he became chief-of-staff in 1992, commander in 1998 and commander-in-chief in 2000.

With the dissolution of FALINTIL, Ruak became a brigadier general in the newly established national armed force (F-FDTL) on 1 Feb. 2001. In 2006 he faced criticism over the military's transfer of weapons to civilians during unrest that year, with a UN commission of inquiry recommending his prosecution. However, a Timorese inquiry cleared him of all charges and Ruak was promoted to major general in 2009.

He resigned from the F-FDTL on 1 Sept. 2011 and announced his presidential candidacy a month later. Running as an independent, he was backed by Prime Minister Xanana Gusmão and the Conselho Nacional de Reconstrução de Timor (CNRT) party. After coming second with 26% in the first round of voting, Ruak won the second round with 61% of votes cast.

#### *Career in Office*

Ruak was sworn in on 20 May 2012, the tenth anniversary of Timor-Leste's independence. He reappointed Gusmão as prime minister after the July 2012 parliamentary elections. Despite having no executive powers, Ruak will work closely with the premier and his government on issues including the diversification of the economy, national defence strategy and forging closer ties with regional partners, especially Indonesia and Australia.

### Xanana Gusmão

#### *Position*

Prime Minister

#### *Introduction*

Independent Timor-Leste's first president, Xanana Gusmão, having led the independence movement for over two decades, came to power in a landslide victory at elections in April 2002. He stood down in May 2007 but was subsequently appointed prime minister in Aug. that year.

#### *Early Life*

Xanana Gusmão was born José Alexandre Gusmão on 20 June 1946 in Laleia, Manatuto. After studying at a Jesuit seminary in Soibada and then at Dare, he became a civil servant.

He joined FRETILIN in 1974, becoming its leader in 1978. In 1981 he was elected commander-in-chief of its military wing and worked to integrate the various groups fighting for independence.

In Nov. 1992 he was captured by the Indonesian army and sentenced to life imprisonment on charges of subversion but remained the figurehead of the independence movement. Following an appeal from then UN Secretary-General Kofi Annan, Gusmão was released after the referendum of Sept. 1999 in which an overwhelming majority of Timorese voted for independence.

Timor-Leste gained independence on 20 May 2002 and Gusmão was inaugurated as president, having won a landslide victory in elections the previous month.

#### *Career in Office*

Gusmão appealed for reconciliation and an end of violence against those who opposed independence. The authority of the state and its institutions, however, remained fragile. In April 2006, 600 striking soldiers who had been sacked by Prime Minister Mari Alkatiri demonstrated in Dili. The protests turned into wider factional violence across the country and the government called in foreign troops led by Australia in May to restore law and order. At the same time, relations between president and prime minister broke down. In June Alkatiri stood down and was replaced by José Ramos-Horta. A UN peacekeeping mission was then set up in Aug. 2006.

Gusmão did not contest presidential elections held in April–May 2007, announcing his intention to run instead for prime minister as the leader of a new National Congress for Timorese Reconstruction (CNRT), having become disillusioned with FRETILIN. His close ally José Ramos-Horta succeeded him as president. Despite FRETILIN winning the largest number of seats in parliamentary elections in June 2007, Gusmão formed a coalition government and was sworn in as prime minister on 8 Aug. 2007.

Like then President Ramos-Horta, Gusmão was also targeted by rebel soldiers in Feb. 2008 in a separate attack, but was unhurt. He described the incident as a coup attempt and imposed a state of emergency.

In Oct. 2009 Gusmão's government survived an opposition vote of confidence in parliament over its controversial release of a pro-Indonesian militia leader accused of war crimes against Timorese citizens in 1999.

Acknowledging public concern over allegations of corruption against senior officials, in Feb. 2010 the government appointed the country's first anti-corruption commissioner.

In parliamentary elections in July 2012, Gusmão's CNRT became the largest party with 30 seats, ahead of FRETILIN with 25.

## DEFENCE

The Timor-Leste Defence Force comprises an army and a small naval element. In 2005 there was a 1,250-strong army, but nearly half of the personnel were dismissed in early 2006 for going on strike.

In 2006 the UN initiated the 'Integrated Mission in East Timor' (UNMIT) in a bid to bring stability to the country. Totalling 2,745 personnel in mid-2012, it was withdrawn at the end of Dec. 2012. The Australian-led International Stabilisation Force, also deployed in 2006, left in March 2013.

## ECONOMY

### Overview

Timor-Leste is one of Asia's poorest countries. Following a referendum in 1999 in which the population voted overwhelmingly in favour of independence from Indonesia, militia groups led a campaign of violence that ravaged the infrastructure. Since independence in May 2002, authorities have relied on the UN and other development agencies to help rebuild the economy.

Oil resources in the Timor Sea have transformed the prospects of the country. Expansionary fiscal policy driven by a boom in oil revenues since 2005 has resulted in strong growth, although this was interrupted in 2006 with an outbreak of violence leading to military and humanitarian assistance from neighbouring economies and the UN. The global economic crisis has affected the economy largely through lower oil and gas revenues. Maintaining fiscal discipline, ensuring good use of public monies and upholding security will be critical in sustaining growth.

### Currency

The official currency is the US dollar. The Australian dollar and the Indonesian rupiah, both previously used, no longer serve as legal tender. Inflation was 6.8% in 2010, increasing to 13.5% in 2011.

### Budget

Revenues in 2005–06 were US\$485m. (oil and gas revenue, 93.1%) and expenditures US\$93m. (current expenditure, 71.3%).

### Performance

Total GDP in 2011 was US\$1.1bn. Real GDP growth was 12.8% in 2009, 9.5% in 2010 and 10.6% in 2011.

## ENERGY AND NATURAL RESOURCES

### Environment

Timor-Leste's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.3 tonnes per capita in 2008.

### Electricity

Electricity produced in 2007 totalled an estimated 135m. kWh.

### Oil and Gas

Although current production is small, the Timor Gap, an area of offshore territory between Timor-Leste and Australia, is one of the richest oilfields in the world outside the Middle East. Potential revenue from the area is estimated at US\$11bn. The area is split into three zones with a central 'zone of occupation' (occupying 61,000 sq. km). Royalties on oil discovered within the central zone were split equally between Indonesia and Australia following the Timor Gap Treaty which came into force on 9 Feb. 1991. Questions over Timor-Leste's rights to oil revenue from the area

have arisen following the 1999 independence referendum. There are also extensive offshore gas fields, but the region generally remains underexplored.

### Minerals

Gold, iron sands, copper and chromium are present.

### Agriculture

Although the presence of sandalwood was one of the principal reasons behind Portuguese colonization, its production has declined in recent years. In 2007 there were an estimated 170,000 ha. of arable land and 68,000 ha. of permanent crops. Principal crops are maize, rice, cassava, sweet potatoes, coconuts and coffee.

### Forestry

Forests covered 0.74m. ha. in 2010, representing 50% of the total land area.

### Fisheries

The total fish catch in 2008 was 3,125 tonnes.

## INDUSTRY

### Labour

In 2010 unemployment was officially 9.8% of the labour force between 15 and 64.

## INTERNATIONAL TRADE

### Imports and Exports

Imports totalled US\$268.5m. in 2008 and exports US\$49.2m. Major imports are mineral fuels, motor vehicles and cereals. Coffee and cattle are important exports. Leading import suppliers are Indonesia, Singapore, Australia and Vietnam. Leading export destinations are Germany, the USA, Indonesia and Singapore.

## COMMUNICATIONS

### Civil Aviation

There is an international airport at Dili (Presidente Nicolau Lobato International Airport).

### Telecommunications

In 2010 there were 2,907 landline telephone subscriptions (2,334 in 2005) and 350,891 mobile phone subscriptions (33,072 in 2005).

## SOCIAL INSTITUTIONS

### Justice

Timor-Leste's judiciary currently conforms to a UN-drafted legal system based on Indonesian law. This is scheduled to be replaced by a civil and penal judiciary system which will be based on Portuguese law. The Supreme Court of Justice is the highest court of law. There are four District Courts and a Court of Appeal.

### Health

Plans for a medical system include 64 community health centres, 88 health posts, 117 mobile clinics and 21 doctors.

## RELIGION

Over 90% of Timor-Leste's population are Roman Catholic, with Protestants, Muslims, Hindus and Buddhists accounting for the remainder.

## CULTURE

### Press

In 2007 there were three daily newspapers: *Suara Timor Lorosae*, *Timor Post* and *Jornal Nacional Diario*. There were also three non-dailies in 2007.

### Tourism

In 2009, 44,131 non-resident tourists—excluding same-day visitors—arrived by air (up from 35,999 in 2008).

## KEY HISTORICAL EVENTS

Eleventh century records relate Togo's settlement by a succession of tribes. The Kwa people from the Volta region were joined by the Ewe people from the Niger Valley, while later migrations included the Ana, Mina and Guin people from Ghana and the Ivory Coast, and the Nawdba from the east, who settled in northern Togo.

During 1471–72 Portuguese explorers and traders began trading along the coast in gold, silver and pepper. In the 16th century Britain, Denmark, Holland, France, Germany, Sweden and Portugal all shipped slaves from the region in co-operation with tribal leaders. The 18th century saw conflicts with the Akwamu Confederacy and the Ashanti Kingdom in the west, and the Kingdom of Dahomey in the east, as tribal rulers tried to consolidate their territory. Meanwhile, Britain, France and Germany became the dominant European powers in the region.

Following the abolition of slavery in the 19th century, British, French and German traders built up a flourishing palm oil export trade from Anecho, Agoue and Porto Seguro. As a result several

Togolese families of partly Brazilian or Portuguese origin came to prominence, some retaining considerable influence to the present day.

Despite competition from Britain and France, Germany signed a treaty with chief Mlapa III on 5 July 1884 in the village of Togo (modern Togoville) to establish colonial rule on the coast. German control was then extended inland and, following agreement with Britain and France, the borders of German Togoland were defined. Using slave labour, the German administration developed the agricultural sector, focusing on cacao, coffee and cotton.

In 1914 the Allies overran German Togoland and in 1922 it was partitioned into a western British Mandated Territory and an eastern French Mandated Territory under the League of Nations. In 1946, following the Second World War, British Togoland and French Togoland became Trust territories under the United Nations. On 9 May 1956 a UN-sponsored referendum in British Togoland resulted in a majority vote for union with the neighbouring colony of Gold Coast. The territory soon merged with Gold Coast to become Ghana, despite objections from the southern Togolese, most of whom had voted for union with French Togo. In 1956 French Togo was granted partial self-government to become the Republic of Togo. It gained full independence on 27 April 1960.

Sylvanus Olympio was elected president in 1958. In 1961 a new constitution established a seven-year-term and broad executive powers for the presidency, alongside an elected national assembly. Olympio won the 1961 election and his party, Unité Togolaise (UT), took all 51 national assembly seats. In 1962 Olympio disbanded the main opposition parties, alleging they had plotted against his government. On 13 Jan. 1963 Olympio was assassinated by soldiers and the army voted in Nicolas Grunitsky as head of state. A military coup ousted Grunitsky in Jan. 1967 and on 14 April 1967 Gen. (then Col.) Etienne Gnassingbé Eyadéma took the presidency.

Eyadéma developed the country's investment banking sector and its phosphates exports, prompting economic growth until recession in the 1980s caused a price collapse. Eyadéma ruled as head of Togo's only officially recognized political party, the Rassemblement du Peuple Togolais (RPT), and survived several attempted coups. In Aug. 1991 a national conference of Togo's leading political movements led to a reduction in Eyadéma's executive powers. A transitional administration, the High Council of the Republic, was installed, led by Kokou Koffigoh.

In Nov. 1991 the new government banned the RPT and the army, which backed Eyadéma, attempted a coup. Eyadéma negotiated the return of some of his powers and won an election in Aug. 1992, though its validity was disputed and the main opposition parties boycotted it. In 1994 a coalition of the Comité d'Action pour le Renouveau and the Union Togolaise pour la Démocratie won a majority in the national assembly elections. The RPT returned to power in the election of June 1998 and Eyadéma retained the presidency throughout the entire period until his death in Feb. 2005.

On Eyadéma's death the military installed his son, Faure Gnassingbé, as president and the following day the constitution was amended to legalize his succession. Under domestic and international pressure he stepped down on 25 Feb. 2005 and parliament speaker Abbas Bonfoh became interim president. Faure Gnassingbé won the presidential election held in April 2005 but the opposition alleged vote rigging and 400–500 people died in riots. Gnassingbé was subsequently confirmed as president.

## TERRITORY AND POPULATION

Togo is bounded in the west by Ghana, north by Burkina Faso, east by Benin and south by the Gulf of Guinea. The area is 56,600 sq. km. 2010 census population, 6,191,155 (3,182,060 females); density, 109 per sq. km.

The UN gives a projected population for 2015 of 6-67m.

In 2011, 44.1% of the population lived in urban areas. In 2005, 43% were below the age of 15. The capital is Lomé (2010 census population, 837,437), other towns being Sokodé (95,070), Kara (94,878), Kpalimé (75,084), Atakpamé (69,261), Dapaong (58,071) and Tsévié (54,474).

Area, 2010 census population and chief town of the five regions:

| Region       | Area in sq. km | Population | Chief town |
|--------------|----------------|------------|------------|
| Centrale     | 13,317         | 617,871    | Sokodé     |
| De La Kara   | 11,738         | 769,940    | Kara       |
| Des Plateaux | 16,975         | 1,375,165  | Atakpamé   |
| Des Savanes  | 8,470          | 828,224    | Dapaong    |
| Maritime     | 6,100          | 2,599,955  | Lomé       |

There are 37 ethnic groups. The south is largely populated by Ewe-speaking peoples (forming 23% of the population), Watyi (10%) and other related groups, while the north is mainly inhabited by Hamitic groups speaking Kabre (14%), Tem (6%) and Gurma (3%). The official language is French but Ewe and Kabre are also taught in schools.

## SOCIAL STATISTICS

2008 estimates: births, 212,000; deaths, 53,000. Estimated rates, 2008 (per 1,000 population): births, 32.9; deaths, 8.2. Expectation of life (2007) was 60.4 years for males and 63.9 for females. Annual population growth rate, 2000–05, 2.8%. Infant mortality, 2010, 66 per 1,000 live births; fertility rate, 2008, 4.3 births per woman.

## CLIMATE

The tropical climate produces wet seasons from March to July and from Oct. to Nov. in the south. The north has one wet season, from April to July. The heaviest rainfall occurs in the mountains of the west, southwest and centre. Lomé, Jan. 81°F (27.2°C), July 76°F (24.4°C). Annual rainfall 35" (875 mm).

## CONSTITUTION AND GOVERNMENT

A referendum on 27 Sept. 1992 approved a new constitution by 98.11% of votes cast. Under this the *President* and the *National Assembly* were directly elected for five-year terms. Initially the president was allowed to be re-elected only once. However, on 30 Dec. 2002 parliament approved an amendment to the constitution lifting the restriction on the number of times that the president may be re-elected. The National Assembly has 81 seats and is elected for a five-year term.

### National Anthem

‘Terre de nos aïeux’ (‘Land of our forefathers’).

## RECENT ELECTIONS

In presidential elections held on 4 March 2010 Faure Gnassingbé was re-elected with 60.9% of the vote, ahead of Jean-Pierre Fabre of the Union of Forces for Change (Union des Forces de Changement) with 33.9% and Yawovi Agboyibo of the Action Committee for Renewal (Comité d’Action pour la Renouveau) with 3.0%. There were four other candidates. Turnout was 65.7%.

At the parliamentary elections on 14 Oct. 2007 the ruling RPT (reconfigured as the Union for the Republic/UNIR in April 2012) won 50 of 81 seats with 32.7% of votes cast, the Union of Forces for Change 27 with 30.8% and the Action Committee for Renewal 4 with 6.8%. Turnout was 94.8%.

## CURRENT LEADERS

### Faure Gnassingbé

#### Position

President

#### Introduction

Faure Gnassingbé was installed as president after the death of his father, one of Africa’s longest-serving leaders. The appointment led to violent protests and international condemnation. Forced to step down, he contested a presidential election and emerged victorious in April 2005 with just over 60% of the vote. Faure then pursued a policy of political reconciliation, paving the way for peaceful parliamentary elections in Oct. 2007. He was re-elected to the presidency in March 2010.

#### Early Life

Faure Essozimna Gnassingbé was born in Afagnan, Togo on 6 June 1966. He is the son of Gnassingbé Eyadéma, a general who led a coup in 1963, declared himself president in 1967 and remained head of state until his death in Feb. 2005. Faure attended school in the capital, Lomé, followed by the Sorbonne University in Paris and the George Washington University in the USA. Returning to an unstable and economically crippled Togo in the mid-1990s, Faure began work as a civil servant.

He entered politics in 2002, when he was elected the representative of the ruling Togolese People’s Assembly (RPT; since reconfigured as the UNIR) for Blitta constituency in central Togo, and in June 2003 he took office as minister of public works, mines and telecommunications.

On 6 Feb. 2005, the day after his father's death, Faure was proclaimed as his successor by the Togolese army, sparking widespread protest. Amid mounting international criticism and threats of sanctions, Faure announced that a presidential election would be held on 24 April 2005 and stepped down from office. Official results gave Faure over 60% of the vote at the subsequent elections and, despite violence erupting in Lomé amid claims of electoral fraud, he was sworn in as president on 4 May 2005.

#### *Career in Office*

Faure promised to push for economic growth, to reform institutions and to improve Togo's image abroad. Although most of the key government posts went to members of the ruling party, Edem Kodjo, the leader of a moderate opposition party, was named prime minister in June 2005. In Sept. 2006 Faure appointed another veteran opposition leader, Yawovi Madji Agboyibo of the Action Committee for Renewal, as prime minister with the task of forming a unity government. In Oct. 2007 the ruling RPT won parliamentary elections in which opposition parties took part for the first time in almost two decades and which were declared by international observers to be free and fair. Faure then appointed Komlan Mally prime minister and a new government was formed in Dec. When Mally resigned in Sept. 2008, Faure appointed Gilbert Houngbo, an independent, as the new premier. In April 2009 the government claimed that there had been a foiled coup plot against Faure involving his half-brother and former defence minister Kpatcha Gnassingbé. Faure was returned to office in presidential elections on 4 March 2010 that were deemed relatively fair by international observers. In May veteran opposition leader Gilchrist Olympio agreed to join a government of national unity, ending years of hostility towards the then RPT but causing a deep split within his Union of Forces for Change which had alleged widespread fraud in the election.

Parliamentary elections scheduled for Oct. 2012 were postponed after violent protests in June against electoral law amendments that demonstrators claimed favoured the ruling UNIR. In July Faure appointed Kwevi Ahoomey-Zunu as prime minister following the resignation of Gilbert Houngbo.

#### **DEFENCE**

There is selective conscription that lasts for two years. Defence expenditure totalled US\$56m. in 2008 (US\$10 per capita), representing 1.9% of GDP.

#### **Army**

Strength (2007) around 8,100, with a further 750 in a paramilitary gendarmerie.

#### **Navy**

In 2007 the Naval wing of the armed forces numbered about 200 and was based at Lomé.

#### **Air Force**

The Air Force—established with French assistance—numbered (2007) 250, with 16 combat aircraft although their serviceability is in doubt.

#### **ECONOMY**

Agriculture contributed 33% of GDP in 2009, industry 16% and services 51%.

#### **Overview**

Togo's economic performance is among the weakest in Sub-Saharan Africa, with poverty increasing significantly since the early 1980s. Social indicators are low, with the economy ranked 162nd out of 187 countries on the Human Development Index. In the World Bank's Doing Business 2010 report, Togo ranked 160th of 183 countries. The main economic activities are mining, agriculture and re-exporting. The primary sector, port activities

and public investment have been the drivers of growth in recent years.

After civil and economic turmoil in the early 1990s, a structural redevelopment programme launched in 1994 supported growth. Following a downturn in 2005, the government acted to restore fiscal discipline and strengthen governance. The surge in global food and fuel prices in 2008, as well as heavy flooding, hurt the economy. Further flooding in large parts of the country between Sept. and Oct. 2010 caused more damage to infrastructure and crops.

In Dec. 2010 Togo completed the Heavily Indebted Poor Countries (HIPC) process, leading to a cancellation of around 82% of its external debt. As a result, total government debt fell from 67% of GDP to about 30%.

#### **Currency**

The unit of currency is the *franc CFA* (XOF) with a parity of 655.957 francs CFA to one euro. Foreign exchange reserves were US\$270m. in June 2005 and total money supply was 177,138m. francs CFA. Inflation was 8.7% in 2008, falling to 3.2% in 2010. It stood at 3.6% in 2011.

#### **Budget**

In 2008 revenues were 249.9bn. francs CFA and expenditures 253.3bn. francs CFA. Tax revenue accounted for 84.5% of revenues in 2008; current expenditure accounted for 80.2% of expenditures.

VAT is 18%.

#### **Performance**

Real GDP growth was 3.5% in 2009, 4.0% in 2010 and 4.9% in 2011. Total GDP in 2011 was US\$3.6bn.

#### **Banking and Finance**

The bank of issue is the Central Bank of West African States (BCEAO). The *Governor* is Tiémoko Meyliet Koné. In 2003 there were six commercial banks, three development banks, a savings bank and a credit institution. Foreign debt totalled US\$1,728m. in 2010, representing 61.1% of GNI.

#### **ENERGY AND NATURAL RESOURCES**

##### **Environment**

Togo's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 0.5 tonnes per capita.

##### **Electricity**

Installed capacity in 2007 was an estimated 84,000 kW. In 2007 production totalled 196m. kWh. Additional electricity is imported, mainly from Ghana. Consumption per capita in 2007 was 130 kWh.

##### **Minerals**

Output of phosphate rock in 2007 was 750,000 tonnes. Other minerals are limestone, iron ore and marble.

##### **Agriculture**

Agriculture supports about 80% of the population. Most food production comes from individual holdings under 3 ha. Inland, the country is hilly; dry plains alternate with arable land. There were an estimated 2.46m. ha. of arable land in 2007 and 0.17m. ha. of permanent crops. There are considerable plantations of oil and cocoa palms, coffee, cacao, kola, cassava and cotton. Production, 2003 (in 1,000 tonnes): cassava, 724; yams, 569; maize, 516; sorghum, 177; seed cotton, 159; cotton lint, 76; cottonseed, 75; rice, 68; millet, 50; dry beans, 44; groundnuts, 37.

Livestock (2003 estimates, in 1,000): sheep, 1,800; goats, 1,470; pigs, 310; cattle, 279; chickens, 8,000.

### Forestry

Forests covered 0.29m. ha. in 2010, or 5% of the land area. Teak plantations covered 8,600 ha. In 2007, 6.04m. cu. metres of roundwood were cut.

### Fisheries

The catch in 2010 totalled an estimated 27,500 tonnes (82% from marine waters).

### INDUSTRY

Industry is small-scale. Cement and textiles are produced and food processed. In 2005 industry accounted for 24% of GDP, with manufacturing contributing 10%.

### Labour

In 2010 the estimated labour force was 3,059,000 (56% males), up from 2,182,000 in 2000. In Aug. 2008 the statutory monthly minimum wage was raised to 28,000 francs CFA.

### INTERNATIONAL TRADE

A free trade zone was established in 1990.

The main import suppliers in 2005 were France (17.6%), China (13.2%), Côte d'Ivoire (6.5%), Italy (4.5%) and Spain (4.2%). Principal export destinations in 2005 were Ghana (20.3%), Burkina Faso (18.4%), Benin (11.6%), Mali (7.4%) and India (5.9%). Leading imports are food, refined petroleum, and chemicals and chemical products; main exports are cement, phosphates and cotton.

### COMMUNICATIONS

#### Roads

There were 11,652 km of roads in 2007, including 3,067 km of highways or national roads. In 2007 there were 10,600 passenger cars in use, 2,200 lorries and vans and 34,200 motorcycles and mopeds.

#### Rail

There are four metre-gauge railways connecting Lomé, with Aného (continuing to Cotonou in Benin), Kpalimé, Tabligbo and (via Atakpamé) Blitta; total length in 2005, 532 km. In 2005 the railways carried 1.1m. tonnes of freight. There has been no passenger rail service since 1996.

#### Civil Aviation

In 2003 Trans African Airlines flew from Tokoin airport, near Lomé, to Abidjan, Bamako, Brazzaville, Cotonou, Dakar and Pointe-Noire. There were also international flights with other airlines to Addis Ababa, Brussels, Douala, Kinshasa, Lagos, Libreville, Ouagadougou and Paris. In 2001 Tokoin handled 151,000 passengers (all on international flights) and 5,100 tonnes of freight. In 2003 scheduled airline traffic of Togo-based carriers flew 1m. km, carrying 46,000 passengers (all on international flights).

#### Shipping

In Jan. 2009 there were 18 ships of 300 GT or over registered, totalling 33,000 GT.

#### Telecommunications

In 2008 there were 140,900 main (fixed) telephone lines in Togo; mobile phone subscribers numbered 1,549,500 in 2008 (24.0 per 100 persons). There were 350,000 internet users in 2008.

### SOCIAL INSTITUTIONS

## KEY HISTORICAL EVENTS

The Tongatapu group of islands in the south western Pacific Ocean were discovered by Tasman in 1643. The Kingdom of Tonga attained unity under Taufa'ahau Tupou (George I) who became ruler of his native Ha'apai in 1820, of Vava'u in 1833 and of Tongatapu in 1845. By 1860 the kingdom had converted to Christianity. In 1862 the king granted freedom from arbitrary rule of minor chiefs and extended land rights. These institutional changes, together with the establishment of a parliament of chiefs, paved the way towards a democratic constitution. By the Anglo-German Agreement of 14 Nov. 1899, the Tonga Islands became a British protectorate. The protectorate was dissolved on 4 June 1970 when Tonga, the only ancient kingdom surviving from the pre-European period in Polynesia, achieved independence within the Commonwealth.

## TERRITORY AND POPULATION

The Kingdom consists of some 169 islands and islets with a total area, including 30 sq. km of inland waters plus uninhabited islands, of 748 sq. km (289 sq. miles), and lies between 15° and 23° 30' S. lat and 173° and 177° W. long, its western boundary being the eastern boundary of the Fiji Islands. The islands are split

up into the following groups (reading from north to south): the Niuas, Vava'u, Ha'apai, Tongatapu and 'Eua. The three main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north. Census population (2011, provisional) 103,036; density, 138 per sq. km. In 2011, 23.5% of the population lived in urban areas.

The UN gives a projected population for 2015 of 106,000.

The capital is Nuku'alofa on Tongatapu; population (2011 provisional), 35,778 (urban population, 24,158).

There are five divisions comprising 23 districts:

| Division  | Sq. km | Census 2011 (provisional) | Capital    |
|-----------|--------|---------------------------|------------|
| Niuas     | 72     | 1,281                     | Hihifo     |
| Vava'u    | 119    | 14,938                    | Neiafu     |
| Ha'apai   | 110    | 6,650                     | Pangai     |
| Tongatapu | 261    | 75,158                    | Nuku'alofa |
| 'Eua      | 87     | 5,011                     | Ohonua     |

Both Tongan and English are recognized as official languages.

## SOCIAL STATISTICS

Births, 2008 estimates, 2,900; deaths, 600; marriages (Tongatapu only), 892; divorces, 95. Expectation of life, 2007: males, 69.0 years; females, 74.6. Annual population growth rate, 2000–08, 0.6%. Infant mortality, 2010, 13 per 1,000 live births. Fertility rate, 2008, 4.0 births per woman.

## CLIMATE

Generally a healthy climate, although Jan. to March hot and humid, with temperatures of 90°F (32.2°C). Rainfall amounts are comparatively high, being greatest from Dec. to March. Nuku'alofa, Jan. 25.8°C, July 21.3°C. Annual rainfall 1,643 mm. Vava'u, Jan. 27.3°C, July 23.4°C. Annual rainfall 2,034 mm.

## CONSTITUTION AND GOVERNMENT

The reigning King is **Tupou VI** ('Aho'eitu 'Unuaki'otonga **Tuku'aho Tupou VI**), born 12 July 1959, succeeded on 18 March 2012 on the death of his brother, George Tupou V.

The current Constitution is based on the one granted in 1875. It was last amended in 2003 to increase the constitutional powers of the King and restrict media freedom. There is a Privy Council, Cabinet, Legislative Assembly and Judiciary. The 28-member *Legislative Assembly* is composed of 17 elected representatives of the people, nine nobles elected by their peers and two *ex officio* members. Prior to the Nov. 2010 election there were 32 members, of which only nine were elected representatives of the people (plus the nine nobles elected by their peers and also 14 appointed ministers).

## National Anthem

'E 'Otua, Mafimafi, ko ho mau 'eiki Koe' ('Oh Almighty God above, thou art our Lord and sure defence'); words by Prince Uelingtoni Ngu Tupoumalohi, tune by K. G. Schmitt.

## RECENT ELECTIONS

Elections were held on 25 Nov. 2010 for the 17 elected seats. The Democratic Party of the Friendly Islands won 12 seats and independent candidates five.

## CURRENT GOVERNMENT

In March 2013 the government comprised:

*Prime Minister and Minister of Foreign Affairs and Trade, Defence, and Information and Communications:* Lord Tu'ivakano (in office since 22 Dec. 2010).

*Deputy Prime Minister and Minister for Infrastructure:* Samiu Kuita Vaipulu.

*Minister for Agriculture, Food, Forests and Fisheries:* Sangster Saulala. *Commerce, Tourism and Labour:* Viliami Uasike Latu. *Education and Training:* 'Ana Maui Taufe'ulungaki. *Finance and National Planning:* Lisiate 'Aloveita 'Akolo. *Health:* Lord Tu'i'afitu. *Internal Affairs:* Lord Vaea. *Justice:* Clive Edwards. *Lands, Environment, Climate Change and Natural Resources:* Lord Ma'afu. *Police, Prisons and Fire Services, and Revenue Services:* Siosifa Tu'utafaiva. *Public Enterprises:* Sosefo Fe'aomoeata Vakata. *Government Website:* <http://www.mic.gov.to>

## CURRENT LEADERS

### Lord Tu'ivakano

#### Position

Prime Minister

#### Introduction

Lord Tu'ivakano became prime minister in Dec. 2010 after winning a majority in the legislative assembly. His victory came as a blow to pro-democracy hopes that recent reforms would reduce the influence of the traditional power brokers.

#### Early Life

Lord Tu'ivakano was born Siale 'Ataongo Kaho on 15 Jan. 1952 in Niutoua, in the Western District of Tongatapu. He was educated in New Zealand at Three Kings School, Auckland, and at Wesley College, Paerata. In 1974 he graduated with a diploma in teaching from Ardmore Teachers' College, Auckland.

On his return to Tonga in 1975, Tu'ivakano joined the staff at of Tonga High School before moving to the physical education department of the ministry of education. In 1980 he was appointed head of the youth, sports and culture division, where he developed a physical health curriculum for primary schools.

On his father's death in Jan. 1986 he became the 17th Lord Tu'ivakano and inherited four estates in Tongatapu. In 1991 he graduated in political science from Flinders University in South Australia. The following year he returned to the ministry of education as senior education officer for youth, sport and culture but resigned in 1996 when he entered parliament as a Nobles' Representative for the island of Tongatapu.

From 2002–04 Tu'ivakano served as speaker of the Legislative Assembly and in March 2005 joined the cabinet as minister for works. Following a reshuffle in May 2006 he was given the portfolio of training, employment, youth and sport. In the Nov. 2010 elections he was re-elected as representative for Tongatapu and, following constitutional reforms, became the first prime minister elected by parliament, winning 14 of the 26 votes cast in a secret ballot. He was sworn into office on 22 Dec. 2010.

#### Career in Office

Tu'ivakano's election was regarded as a victory for traditionalists over the pro-democracy movement. He was expected to put the revitalization of the agriculture and tourism sectors at the heart of his premiership and to spur manufacturing growth. However, in Oct. 2012 he narrowly survived a parliamentary no confidence motion after the opposition accused his government of misappropriating funds.

## DEFENCE

### Army

The Tonga Defence Services number around 450 troops.

### Navy

A coastal naval force operating several small patrol boats is based at Touliki, in Nuku'alofa.

### Air Force

An Air Force was created in 1996. There is also a small naval aviation unit.

## ECONOMY

In 2010 agriculture accounted for 19% of GDP, industry 20% and services 61%.

### Overview

Tonga is heavily reliant on remittances, averaging around 32% of GDP since the early 2000s. The main source of remittances is the USA, followed by New Zealand and Australia. Agriculture accounts for 19% of GDP. Tourism is the second largest source of foreign exchange and a key sector of growth, accounting for 8% of GDP.

The global downturn saw growth fall to 0.9% in 2009 as a result of a sharp fall in remittances, as well as the increased cost of food and fuel imports. Domestic economic activity rebounded with growth of 1.5% in 2011, driven by donor-funded construction and infrastructure projects as well as increased tourism. Tonga suffers from chronic trade deficits, with a fiscal deficit of 6% of GDP.

The economy has underperformed relative to other Pacific Island countries and is vulnerable to external shocks since it relies heavily on imports, particularly of food and fuel. High labour costs, limited export diversification and lack of long-term investment to improve productivity and efficiency impede efforts towards sustainable growth.

### Currency

The unit of currency is the *pa'anga* (TOP) of 100 *seniti*. There was inflation of 3.9% in 2010 and 5.3% in 2011. In July 2005 foreign exchange reserves were US\$49m. and total money supply was T\$65m.

### Budget

Revenues were T\$200.3m. in 2008–09, with expenditures T\$185.3m.

There is a consumption tax of 15%.

### Performance

The economy grew by 0.9% in 2009, 1.6% in 2010 and 1.5% in 2011. Total GDP in 2011 was US\$0.4bn. Tonga ranks among the countries most reliant on remittances from abroad, which accounted for 28% of total GDP in 2009.

### Banking and Finance

The National Reserve Bank of Tonga (*Governor*, Siosi Cocker Mafi) was established in 1989 as a bank of issue and to manage foreign reserves. The Bank of Tonga and the Tonga Development Bank are both situated in Nuku'alofa with branches in the main islands. Other commercial banks in Nuku'alofa are ANZ Banking Group Ltd, the MBF Bank Ltd, the National Reserve Bank of Tonga and the Westpac Banking Corp. Foreign debt in 2007 amounted to US\$91m.

## ENERGY AND NATURAL RESOURCES

### Environment

Tonga's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 1.7 tonnes per capita.

### Electricity

Production (2007 estimate) 43m. kWh. Installed capacity (2007 estimate) 12,000 kW.

### Agriculture

In 2007 there were approximately 15,000 ha. of arable land and 12,000 ha. of permanent crops. Production (2003 estimates, in 1,000 tonnes): coconuts, 58; pumpkins and squash, 20; cassava, 9; sweet potatoes, 6; taro, 4; yams, 4; plantains, 3.

Livestock (2003 estimates): pigs, 81,000; goats, 12,000; cattle, 11,000; horses, 11,000.

#### Forestry

Forests covered 9,000 ha. in 2010, or 13% of the land area.

#### Fisheries

In 2008 the estimated total catch was 2,141 tonnes.

### INDUSTRY

The main industries produce food and beverages, paper, chemicals, metals and textiles.

### INTERNATIONAL TRADE

#### Imports and Exports

In 2010 imports (c.i.f.) were valued at US\$158.8m. and exports (f.o.b.) at US\$8.3m. Main imports are food and live animals, basic manufactures, machinery and transport equipment, and mineral fuels and lubricants; main exports are coconut oil, vanilla beans, root crops, desiccated coconut and watermelons. The leading import suppliers in 2006 were New Zealand (33.1%), Fiji Islands (28.2%), Australia (12.5%) and the USA (9.8%); principal export markets were Japan (40.6%), USA (25.0%), Australia (14.6%) and South Korea (8.3%).

### COMMUNICATIONS

#### Roads

In 2002 there were 680 km of roads (184 km paved). Vehicles in use in 2000 numbered approximately 8,400 passenger cars, 8,700 trucks and vans, and (1996) 40 buses and coaches.

#### Civil Aviation

There is an international airport at Nuku'alofa on Tongatapu. The national carrier was the state-owned Royal Tongan Airlines, but it ceased operations in May 2004 owing to financial difficulties. In 2009 Nuku'alofa (Fua'Amotu International) handled 222,612 passengers and 1,417 tonnes of freight.

#### Shipping

In Jan. 2009 there were 29 ships of 300 GT or over registered, totalling 62,000 GT. The main port is Nuku'alofa.

#### Telecommunications

The operation of the National Telecommunication Network and Services is the responsibility of the Tonga Telecommunication Commission (TCC). In 2008 there were 25,500 main (fixed) telephone lines; mobile phone subscribers numbered 50,500 in 2008 (48.7 per 100 persons). There were 8,400 internet users in 2008. Ucall mobile GSM digital has been in operation in Tonga since Dec. 2001.

### SOCIAL INSTITUTIONS

#### Justice

The judiciary is presided over by the Chief Justice. The enforcement of justice is the responsibility of the Attorney-General and the Minister of Police. In 1994 the UK ceased appointing Tongan judges and subsidizing their salaries.

The population in penal institutions in mid-2007 was 86 (74 per 100,000 of national population).

### Education

In 2002 there were a total of 17,105 pupils with 773 teachers in primary schools and 14,567 pupils with 1,012 teachers in secondary schools. There is an extension centre of the University of the South Pacific at Nuku'alofa, a teacher training college and three technical institutes.

Adult literacy in 2006 was 99.0%. In 2004 public expenditure on education came to 5.0% of GDP.

### Health

In 2004 there were four hospitals and 29 hospital beds per 10,000 inhabitants. There were 41 physicians in 2004, 29 dentists, 316 nurses and 20 health officers.

### RELIGION

In 2001 there were 44,000 adherents of the Free Wesleyan Church and 16,000 Roman Catholics, with the remainder of the population being followers of other religions (notably Latter-day Saints).

### CULTURE

#### Press

There are no daily newspapers. There were three paid-for non-daily newspapers in 2008: the *Tonga Chronicle* (a government-owned weekly), the *Times of Tonga* and *Matangi Tonga*.

#### Tourism

There were 46,040 tourist arrivals by air in 2007. Receipts in 2007 (excluding passenger transport) totalled US\$16m.

## KEY HISTORICAL EVENTS

When Columbus visited Trinidad in 1498 the island was inhabited by Arawak Indians. Tobago was occupied by the Caribs. Trinidad remained a neglected Spanish possession for almost 300 years until it was surrendered to a British naval expedition in 1797. The British first attempted to settle Tobago in 1721 but the French captured the island in 1781 and transformed it into a sugar-producing colony. In 1802 the British acquired Tobago and in 1899 it was administratively combined with Trinidad. When slavery was abolished in the late 1830s, the British subsidized immigration from India to replace plantation labourers. Sugar and cocoa declined towards the end of the 19th century. Oil and asphalt became the main sources of income. On 31 Aug. 1962 Trinidad and Tobago became an independent member of the Commonwealth. A Republican Constitution was adopted on 1 Aug. 1976.

The government shut down the sugar industry after the 2007 harvest. The industry underpinned the economy for centuries but had become unsustainable after the withdrawal of EU subsidies. In Aug. 2011 Prime Minister Kamla Persad-Bissessar declared a state of emergency in a bid to confront the increasingly violent threat posed by the illegal drugs and weapons trade. Lasting until Dec. 2011, it was the first state of emergency since 1990, when the Jamaat al Muslimeen group unsuccessfully attempted a coup.

## TERRITORY AND POPULATION

The island of Trinidad is situated in the Caribbean Sea, about 12 km off the northeast coast of Venezuela; several islets, the largest being Chacachacare, Huevos, Monos and Gaspar Grande, lie in the Gulf of Paria which separates Trinidad from Venezuela. The smaller island of Tobago lies 30-7 km further to the northeast.

Altogether, the islands cover 5,128 sq. km (1,980 sq. miles), of which Trinidad (including the islets) has 4,828 sq. km (1,864 sq. miles) and Tobago 300 sq. km (116 sq. miles). In 2000 the census population was 1,262,366 (Trinidad, 1,208,282; Tobago, 54,084); density, 246 per sq. km.

The UN gives a projected population for 2015 of 1-36m.

In 2011, 14-2% of the population lived in urban areas. Capital, Port-of-Spain (2000 census, 49,031); other important towns, San Fernando (55,419), Arima (32,278) and Point Fortin (19,056). The main towns on Tobago are Scarborough and Plymouth. Those of African descent are (2000) 39-2% of the population; East Indians, 38-6%; mixed races, 16-3%; European, Chinese and others, 5-9%.

The official language is English.

## SOCIAL STATISTICS

Births, 2006, 18,090; deaths (2005), 9,885. 2006 birth rate (per 1,000 population), 13-9; 2005 death rate, 7-6. Expectation of life, 2007, was 65-6 years for males and 72-8 for females. Annual population growth rate, 1998-2008, 0-4%. Infant mortality, 2010, 24 per 1,000 live births; fertility rate, 2008, 1-6 births per woman.

## CLIMATE

## CURRENT LEADERS

### Anthony Carmona

*Position*  
President

#### *Introduction*

Anthony Carmona became president in March 2013. Previously a high court judge, he served on the International Criminal Tribunal for the former Yugoslavia (ICTY) and was scheduled to become a judge at the International Criminal Court (ICC). He is regarded as a political independent.

#### *Early Life*

Anthony Carmona was born on 7 March 1953 in Fyzabad and educated at Presentation College, San Fernando. After studying English and political science at the University of the West Indies (UWI) in Jamaica, he studied law, first at the UWI in Barbados, then at the Sir Hugh Wooding Law School in Trinidad and Tobago, graduating in 1983. In this period he also taught in schools and at the UWI.

Carmona served as deputy director of public prosecutions from 1995 until 1999, when he was appointed acting director. He was legal adviser to President A. N. R. Robinson on matters of criminal law relating to the establishment of the ICC, and was a member of the Trinidad and Tobago legislative review committee. He also advised the ministry of foreign affairs and the ministry of the attorney general on international treaties and conventions.

From 2001–04 he served on the ICTY, dealing with the appeals of those convicted of war crimes, crimes against humanity and genocide. From 2004–13 he was a high court judge in Trinidad and Tobago. Elected one of six ICC judges in 2012, he was scheduled to take up his post in The Hague in March 2013.

However, on 4 Feb. 2013 Prime Minister Persad-Bissessar nominated him for the presidency. Carmona was elected to the post in a vote by the coalition government on 15 Feb. 2013, resigning from the ICC in order to take up the role.

#### *Career in Office*

Carmona took office on 18 March 2013. He has pledged to champion a more open style of government.

### Kamla Persad-Bissessar

*Position*  
Prime Minister

#### *Introduction*

Kamla Persad-Bissessar was sworn in as the country's first female prime minister in May 2010.

#### *Early Life*

Persad-Bissessar was born on 22 April 1952 in Siparia, southern Trinidad. She studied at the University of the West Indies, the Hugh Wooding Law School in Trinidad and Tobago, Norwood Technical College in England and the Arthur Lok Jack Graduate School of Business, Trinidad.

While in England, Persad-Bissessar was a social worker with the Church of England Children's Society of London. She then worked as a teacher in Jamaica. She later taught at the St Augustine campus of the University of the West Indies in Trinidad. She also lectured at the Jamaica College of Insurance. After six years in education, Persad-Bissessar became a full-time attorney-at-law.

From 1987–91 she served as an alderman for St Patrick County Council. She joined the senate in 1994 representing the United National Congress (UNC). From 1995 she was the MP for Siparia. She twice served as attorney general, in 1995 and in 2001. In Dec. 2000 she became minister of education. The UNC returned to the opposition benches in 2002, with Persad-Bissessar elected leader of the parliamentary opposition in April 2006.

#### *Career in Office*

On 24 Jan. 2010 Persad-Bissessar was elected party leader of the UNC. After a landslide victory for the People's Partnership coalition (of which the UNC is a part) at a snap general election on 24 May 2010, she replaced Patrick Manning as prime minister, promising increased transparency in government.

In March 2012 she defeated a no confidence motion in parliament brought by the opposition leader, who accused her government of not properly managing the economic, political and social issues facing the country.

## DEFENCE

The Trinidad and Tobago Defence Force consists of the Trinidad and Tobago Regiment, the Coast Guard, the Air Guard and the Defence Force Reserves. Personnel in 2007 totalled around 2,700.

In 2008 defence expenditure totalled US\$143m. (US\$116 per capita), representing 0.6% of GDP.

### Army

The Trinidad and Tobago Regiment (the Army) is part of the Trinidad and Tobago Defence Force. It has approximately 2,000 personnel organized into a Regiment Headquarters and four battalions.

### Navy

In 2007 there was a Coast Guard of about 700.

### Air Force

The Air Guard, formerly part of the Coast Guard, had 50 personnel and five aircraft in 2007.

## ECONOMY

Industry accounted for 59% of GDP in 2007 and services 41%.

### Overview

Trinidad and Tobago has one of the highest per capita incomes in the Latin American and Caribbean region. The country is a major financial centre in the Caribbean and a leader in regional economic integration, playing a key role in the CARICOM Single Market Economy since its establishment in 2006.

The islands are rich in natural resources, with oil and gas accounting for 44% of GDP, 83% of merchandise exports and 58% of government revenue. However, the country is vulnerable to international market fluctuations. Additionally, few have benefited from the wealth created by oil and gas, which employs only 3% of the labour force. Tourism constituted 11% of GDP and 15% of total employment in 2009. An estimated 17% of the population lives in poverty.

The global economic crisis caused a sharp decline in the prices of major exports, including crude oil, resulting in a lengthy recession. The largest privately-held conglomerate in the country, the CL Financial Group, received a government bailout in 2009. The debt-to-GDP ratio has increased sharply since 2008, with public sector debt standing at 32.4% of GDP in 2011.

### Currency

The unit of currency is the *Trinidad and Tobago dollar* (TTD) of 100 cents. Inflation was 10.5% in 2010 and 5.1% in 2011. In April 1994 the TT dollar was floated and managed by the Central Bank at TT\$6.06 to US\$1.00. Foreign exchange reserves in July 2005 were US\$3,918m. and gold reserves 61,000 troy oz. Total money supply in May 2005 was TT\$9,438m.

### Budget

The fiscal year for the budget is 1 Oct. to 30 Sept. In 2009–10 central government revenue was TT\$41,983m. and expenditure was TT\$45,805m. Energy accounted for 52.5% of revenues; current expenditure accounted for 83.7% of expenditures.

VAT is 15%.

### Performance

After the economy contracted by 3.3% in 2009 there was zero growth in 2010. In 2011 there was negative growth again, of -1.5%. Total GDP in 2011 was US\$22.5bn.

### Banking and Finance

The Central Bank of Trinidad and Tobago began operations in 1964 (*Governor*, Jwala Rambarran). Its net reserves were US\$1,281.1m. in Aug. 2000. There are seven commercial banks. Government savings banks are established in 69 offices, with a head office in Port-of-Spain. The stock exchange in Port-of-Spain participates in the regional Caribbean exchange.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 41.0 tonnes per capita in 2008.

### Electricity

In 2007 the estimated installed capacity was 1.49m. kW, electricity production was 7.66bn. kWh and consumption per capita 5,748 kWh.

### Oil and Gas

Oil production is one of Trinidad's leading industries. Commercial production began in 1908; production of oil in 2008 was 6.9m. tonnes. Reserves in 2008 totalled 0.8bn. bbls. Crude oil is also imported for refining.

In 2008 production of natural gas was 39.3bn. cu. metres; proven reserves of natural gas were 480bn. cu. metres. A major discovery of approximately 50bn. cu. metres was made by BP in

2000, followed by a further discovery of approximately 30bn. cu. metres in 2002.

### Agriculture

In 2007 the agricultural population was an estimated 94,000, of which some 49,000 were economically active. Production of main crops (2003 estimates, in 1,000 tonnes): sugarcane, 873; coconuts, 16; bananas, 7; pumpkins and squash, 6; oranges, 5; cucumbers and gherkins, 4; pineapples, 4; plantains, 4. There were around 25,000 ha. of arable land and 22,000 ha. of permanent cropland in 2007. Livestock (2003 estimates): pigs, 76,000; goats, 23,000; cattle, 29,000; chickens, 28m. Livestock products, 2003: meat, 60,000 tonnes (including poultry, 57,000 tonnes); milk, 9,000 tonnes.

### Forestry

### Fisheries

The catch in 2010 totalled 13,931 tonnes.

## INDUSTRY

Industrial production includes (in tonnes): ammonia and urea (1998), 3,946,700; iron and steel (2007), 3,440,400; residual fuel oil (2007), 3,027,000; methanol (1999), 2,149,800; distillate fuel oil (2007), 1,736,000; petrol (2007), 1,273,000; cement (2006), 883,000; sugar (2002), 104,000; rum (1998), 3,916,000 proof gallons; beer (2000), 62.5m. litres; cigarettes (2000), 2,050,000 units. Trinidad and Tobago ranks among the world's largest producers of ammonia and methanol.

### Labour

The working population in the first quarter of 2003 was 588,300. The number of unemployed was 65,000. 77,300 people worked in construction (including electricity and water); 55,500 in manufacturing (including other mining and quarrying); 38,600 in transport storage and communication; 37,800 in agriculture; 17,500 in petroleum and gas; other services, 295,300. Total employment: 523,300. The unemployment rate in the fourth quarter of 2005 was a record low 6.7%.

## INTERNATIONAL TRADE

External debt was US\$2,652m. in 2005.

### Imports and Exports

In 2010 imports (c.i.f.) totalled US\$6,479.6m. and exports (f.o.b.) US\$10,981.7m. In 2005 crude petroleum accounted for 19% of imports, and refined petroleum 29% of exports. Trinidad and Tobago is the world's leading exporter of ammonia and methanol. The principal import sources in 2005 were the USA (29.2%), Brazil (13.5%), Venezuela (6.0%) and Colombia (5.6%). The main export markets in 2005 were the USA (58.6%), Jamaica (7.5%), France (4.4%) and Barbados (4.3%).

## COMMUNICATIONS

### Roads

In 2002 there were about 8,320 km of roads, of which 51.1% were paved. There were 468,255 vehicles in use in 2007.

### Civil Aviation

There is an international airport at Port-of-Spain (Piarco) and in Tobago (A. N. R. Robinson International Airport). In 2001 Piarco handled 1,725,111 passengers (1,317,811 on international flights) and 29,673 tonnes of freight. The national carrier is Caribbean Airlines, which has flights to 11 international destinations as well as operating domestic services. In 2003 scheduled airline traffic of Trinidad and Tobago-based carriers flew 31m. km, carrying 1,084,000 passengers (972,000 on international flights).

### Shipping

In Jan. 2009 there were 11 ships of 300 GT or over registered, totalling 29,000 GT. The largest port is Port-of-Spain. The other main harbour is Point Lisas. There is a deep-water harbour at Scarborough (Tobago). A ferry service links Port-of-Spain with Scarborough.

### Telecommunications

International and domestic communications are provided by Telecommunications Services of Trinidad and Tobago (TSTT) by means of a satellite earth station and various high-quality radio circuits. The marine radio service is also maintained by TSTT. In 2008 there were 307,000 main (fixed) telephone lines; mobile phone subscribers numbered 1,505,000 in 2008 (112.9 per 100 persons). There were 227,000 internet users in 2008. In Dec. 2011 there were 441,000 Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The High Court consists of the Chief Justice and 11 puisne judges. In criminal cases a judge of the High Court sits with a jury of 12 in cases of treason and murder, and with nine jurors in other cases. The Court of Appeal consists of the Chief Justice and seven Justices of Appeal. In hearing appeals, the Court is comprised of three judges sitting together except when the appeal is from a Summary Court or from a decision of a High Court judge in chambers. In such cases two judges would comprise the Court. There is a limited right of appeal from it to the British Privy Council. There are three High Courts and 12 magistrates' courts. There is an *Ombudsman*. Trinidad and Tobago was one of ten countries to sign an agreement in Feb. 2001 establishing a Caribbean Court of Justice (CCJ) to replace the British Privy Council as the highest civil and criminal court. In the meantime the number of signatories has risen to 12. The court was inaugurated at Port-of-Spain on 16 April 2005. However, despite its location Trinidad and Tobago has yet to accept the CCJ as its final court of appeal.

The death penalty is authorized. There were ten executions in 1999, although none since. There were 550 homicides in 2008 (41 per 100,000 persons), up from just 98 in 1998.

The population in penal institutions at 31 Dec. 2007 was 3,510 (270 per 100,000 of national population).

### Education

## KEY HISTORICAL EVENTS

Tunisia's earliest inhabitants included the semi-nomadic Berbers, whose descendants still live in North Africa's Atlas Mountains. Phoenician merchants established trading settlements throughout the central and western Mediterranean from the 10th century BC and founded the port of Carthage in 814 BC. By the 5th century Carthage had become the most powerful city in the western Mediterranean with an empire extending from present-day Morocco to Egypt and controlling Sardinia, the Balearic Islands, Malta and much of Sicily. A rival to the Roman Empire, the city was eventually destroyed in the Third Punic War. From 146 BC Tunisia was absorbed into the Roman Empire and its people sold into slavery.

Emperor Augustus supervised the reconstruction of Carthage in the 2nd century AD, although frequent revolts broke out as the

Roman Empire waned. In 429 Tunisia was captured by the Vandals who ruled until ousted by the Byzantines in 534. Uqba ibn Nafa led an Arab Muslim army into Tunisia in 670 and founded the city of Kairouan. Most of the indigenous Berber population converted to Islam and the region, known as Ifriqiya, became part of the powerful caliphate centred on Baghdad where it reached its apotheosis under Harun al Rashid (786–809). Tunisia subsequently came under the control of the local Aghlabid dynasty and then under the Fatimids from 909. Bedouin Arabs from the Nile Valley (the Banu Hilal) entered the region around 1000 and from the 12th century Tunisia came under the orbit of the al-Muwahhid empire. The Berber general Abd al-Wahid ibn Abi Hafs wrested control in 1207, heralding three centuries of rule by the Hafsid dynasties. The port of Tunis was made capital and the term 'Tunisia' gradually replaced 'Ifriqiya'.

Ottoman troops advanced from the east in the early 16th century, forcing the Hafsids into an alliance with the Spanish Habsburgs in 1534. However, the Ottomans seized Tunis in 1574. Direct control from Istanbul was superseded by rule through local governors known as beys, such as the Muradid beys who made powerful alliances in the Tunisian hinterland and held sway from the 1640s to 1705. Al-Husayn ibn Ali (ruled 1705–40) founded the Husaynid dynasty and oversaw a period of prosperity through trade and piracy.

As the Ottoman Empire declined Tunisia became increasingly autonomous but attempts to establish a republic in the mid-19th century failed owing to a weak economy and political unrest. In 1869 Tunisia declared itself bankrupt and an international commission from France, Great Britain and Italy took over the country's finances. In 1881 Tunisia was invaded by France which alleged that Tunisian troops had been threatening the French colony of Algeria. Tunisia became a French protectorate despite Italian opposition.

Nationalist sentiment increased after the First World War and the Destour (Constitutional) Party was set up in 1920. Its more radical successor, the Neo-Destour Party, was established by Habib Bourguiba in 1934. Seen as a threat to colonial rule, Bourguiba was imprisoned in 1938. After the Second World War France offered increased autonomy. Nationalists, dismayed at the slow pace of reform, staged mass strikes and demonstrations in 1950. Violent protest increased until France granted internal self-government in 1955, with full independence on 20 March 1956. A constitutional assembly was established and Bourguiba became prime minister. The monarchy was abolished and a republic established the following year, with Bourguiba as president.

Taking a socialist secular line, Bourguiba promoted social and economic development. In 1975 the constitution was amended so that Bourguiba could be president-for-life. The late 1970s saw hardship and growing discontent. A general strike in Jan. 1978 erupted into riots and violence flared again in 1980 and 1984. Islamist groups became increasingly influential and Bourguiba was overthrown in a bloodless coup in 1987. His successor, Zine El Abidine Ben Ali, introduced democratic reforms, eased restrictive press laws and opened negotiations with Islamic groups, although he refused to recognize the prominent al-Nahda party. He was re-elected president in 1994, 1999, 2004 and 2009. However, widespread anti-government protests in Dec. 2010 and Jan. 2011 led to Ben Ali going into exile. A national unity government took power in his place. A state of emergency declared in Jan. 2011 remains in place.

## TERRITORY AND POPULATION

Tunisia is bounded in the north and east by the Mediterranean Sea, west by Algeria and south by Libya. The area is 163,610 sq. km,

including 9,080 sq. km of inland waters. In 2004 the census population was 9,910,872; density, 64 per sq. km. Estimate, 2011, 10,673,800. In 2011, 67.7% of the population were urban.

The UN gives a projected population for 2015 of 11.03m.

## SOCIAL STATISTICS

2008 estimates: births, 183,000; deaths, 61,000; marriages (2005), 74,000. Rates (2008 estimates): birth, 18 per 1,000 population; death, 6. Annual population growth rate, 2000–05, 1.0%. In 2005 the most popular age range for marrying was 30–34 for males and 25–29 for females. Expectation of life, 2007, was 71.8 years for males and 76.0 for females. Infant mortality, 2010, 14 per 1,000 live births; fertility rate, 2008, 1.8 births per woman.

## CLIMATE

The climate ranges from warm temperate in the north, where winters are mild and wet and the summers hot and dry, to desert in the south. Tunis, Jan. 48°F (8.9°C), July 78°F (25.6°C). Annual rainfall 16" (400 mm). Bizerta, Jan. 52°F (11.1°C), July 77°F (25°C). Annual rainfall 25" (622 mm). Sfax, Jan. 52°F (11.1°C), July 78°F (25.6°C). Annual rainfall 8" (196 mm).

## CONSTITUTION AND GOVERNMENT

The Constitution was promulgated on 1 June 1959 and reformed in 1988. The office of President-for-life was abolished and Presidential elections were to be held every five years. On 26 May 2002 a referendum was held that abolished the three-term limit on the presidency with 99% of votes cast in favour of doing so and of raising the age limit for incumbent presidents from 70 to 75 years. The results were viewed with scepticism by human rights groups and opposition figures who saw the referendum as an attempt by then President Zine El Abidine Ben Ali to retain power. Ben Ali was scheduled to retire in 2004 after his third presidential term but remained the president until the revolution of Jan. 2011.

Following the revolution, elections were held in Oct. 2011 for a new 217-seat Constituent Assembly, with a mandate to draft and

approve a new constitution. Approval requires two-thirds support from the Assembly. In the event that a draft constitution is not approved after two readings, it will be submitted to a popular referendum.

## National Anthem

'Humata al Hima' ('Defenders of the Homeland'); words by Mustapha al Rafi and Abdoul Kacem Chabbi, tune by M. A. Wahab.

President

### Introduction

Moncef Marzouki was elected interim president in Dec. 2011, a year on from the start of the revolution that ignited the Arab Spring. A French-trained physician, human rights activist and

leader of a secular, left-wing political party, he was a long-standing critic of the autocratic Ben Ali regime and spent many years in exile in France.

#### **Early Life**

Mohamed Moncef ben-Bedoui Marzouki was born in Grombalia in the northeast of the French Protectorate of Tunisia on 7 July 1945, the son of a magistrate. He attended Sadiki College in Tunis and then the Lycee Régnauld in Tangier after his family moved to Morocco in 1956 amid the upheaval of Tunisia's independence.

In 1973 he graduated in medicine from Strasbourg University in France, specializing in neurology and practising in Alsace. Returning to Tunisia in 1979, he settled in Sousse and became a professor of community medicine at the city's university and a member of the Tunisian League for Human Rights (LTDH). Elected leader of the LTDH in 1989, he was an increasingly vocal critic of President Zine El Abidine Ben Ali, particularly in the wake of the government's violent crackdown on the Islamist Ennahda movement in 1991.

Marzouki failed in an attempt to contest the presidential election of March 1994, in which Ben Ali was the only official candidate. Marzouki was subsequently jailed and only released after an international outcry and the intervention of Nelson Mandela. In the 1990s he campaigned on behalf of Amnesty International and the Cairo-based Arab Organization for Human Rights.

In July 2001 he formed the Congress for the Republic (CPR), a centre-left, secular political party that was declared illegal. Having been forced out of the University of Sousse, Marzouki left Tunisia in 2002 for France, where he worked as a doctor in the suburbs of Paris. He published books and articles on community medicine, human rights and politics, cautioning against the 'Arab malaise' of societies caught 'between dictatorship and religious fundamentalism'.

Marzouki returned to Tunisia on 18 Jan. 2011 during a popular uprising fired by high unemployment, rising prices, corruption and lack of civil freedoms, which culminated in the overthrow of Ben Ali. The CPR came second behind the moderate Islamist Ennahda party in elections for the constituent assembly on 23 Oct. 2011. After the parties reached a coalition deal, Marzouki was elected interim president. He took office on 13 Dec. 2011.

#### **Career in Office**

Marzouki's mandate was to oversee the drafting of a new constitution and preparations for fresh elections. He was expected to direct foreign policy and to serve as commander in chief of the armed forces, although key decisions would require consultation with the prime minister and leader of Ennahda, Hamadi Jebali.

Religious tensions sparked protests and some violence in 2012. Extreme Islamists staged a number of demonstrations demanding the incorporation of Sharia law into the new constitution, and in June 2012 the government imposed a curfew in some areas in response to riots. In Aug. there were also protests against constitutional provisions that some feared could limit sexual equality and women's rights.

In June 2012 the exiled former president, Ben Ali, received a life sentence *in absentia* for the deaths of demonstrators in the 2011 revolution.

#### **DEFENCE**

Selective conscription is for one year. Defence expenditure in 2008 totalled US\$534m. (US\$51 per capita), representing 1.3% of GDP.

#### **Army**

Strength (2007) 27,000 (22,000 conscripts). There is also a National Guard numbering 12,000.

#### **Navy**

In 2007 naval personnel totalled around 4,800. Forces are based at Bizerta, Sfax and Kelibia.

#### **Air Force**

The Air Force operated 27 combat-capable aircraft in 2007, including 12 F-5E/F Tiger II fighters and 12 Aero L-59s. Personnel (2007) 4,000.

#### **ECONOMY**

In 2006 agriculture accounted for 11.1% of GDP, industry 27.8% and services 61.1%.

#### **Overview**

Tunisia's economic record compares favourably with other developing countries, particularly those on the African continent. After a balance of payments crisis in the mid-1980s, steps were taken to improve macroeconomic policy, foster the non-public sector and liberalize prices and controls. In the 1990s the economy grew steadily at an average annual rate of 5%. Inflation and annual budget deficits have fallen and poverty has been reduced.

Tunisia's trade is oriented towards the EU, with France, Italy, Germany and Spain the country's most important trading partners in descending order. However, Tunisia's textile exporters lost EU market share to Asia as a result of the end of the Multi-Fibre Agreement quota system in Jan. 2005. The economy is diversified relative to many of its non-European neighbours, with significant mining, tourism, energy, manufacturing and agricultural sectors.

A swift policy response left the economy largely unaffected by the global financial crisis. Growth was 3.1% in 2009, with exports and domestic demand rebounding. Following the Jasmine Revolution of early 2011 and the neighbouring Libyan crisis, the short-term economic outlook weakened, with tourism and foreign direct investment suffering.

Unemployment remains persistently high, particularly among young people, with the unemployment rate for university graduates at 25%. In May 2011 the G8 group of countries promised US\$20bn. in loans and grants to Tunisia and Egypt over a three-year period. In 2011 the interim government announced a US\$1.5bn. stimulus package, plus an emergency economic and social development plan. This includes measures to tackle security problems and unemployment, boost private sector growth and regional development and improve the lot of the poorest families.

#### **Currency**

The unit of currency is the *Tunisian dinar* (TND) of 1,000 *millimes*. The currency was made convertible on 6 Jan. 1993. Foreign exchange reserves were US\$4,069m. and gold reserves 218,000 troy oz in July 2005. Inflation was 4.4% in 2010 and 3.5% in 2011. Total money supply was 8,339m. dinars in June 2005.

#### **Budget**

The fiscal year is the calendar year. Budgetary central government revenue totalled 13,266m. dinars in 2008 and expenditure 11,544m. dinars. Taxes accounted for 85.4% of total revenues in 2008. Principal sources of revenue in 2008: taxes on goods and services, 5,061m. dinars; taxes on income, profits and capital gains, 4,561m. dinars; taxes on international trade and transactions, 965m. dinars. Main items of expenditure by economic type in 2008: compensation of employees, 5,164m. dinars; subsidies, 2,713m. dinars; interest, 1,143m. dinars.

VAT is 18% (reduced rates, 12% and 6%).

#### **Performance**

Real GDP growth was 3.1% in both 2009 and 2010 but the economy contracted by 1.8% in 2011. Tunisia's total GDP in 2011 was US\$45.9bn.

#### **Banking and Finance**

The Central Bank of Tunisia (*Governor*, Chedly Ayari) is the bank of issue. In 2003 there were 12 commercial banks, six development banks, two merchant banks and five 'offshore' banks.

In 2010 external debt totalled US\$21,584m., equivalent to 51.1% of GNI.

There is a small stock exchange (51 companies trading in 2007).

## ENERGY AND NATURAL RESOURCES

### Environment

Tunisia's carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 2.1 tonnes per capita.

### Electricity

Installed capacity was 3.2m. kW in 2007. Production in 2007 was 14.06bn. kWh; consumption per capita was 1,375 kWh.

### Oil and Gas

Oil production (2008) was 4.2m. tonnes with 0.6bn. bbls in proven reserves. Natural gas production (2007), 2.3bn. cu. metres; proven reserves were 65bn. cu metres in 2007.

### Minerals

Mineral production (in 1,000 tonnes) in 2004: phosphate rock, 8,051; salt, 1,117; iron ore, 256; zinc ore (concentrated), 53; lead, 5.

### Agriculture

There are five agricultural regions: the *north*, mountainous with large fertile valleys; the *northeast*, with the peninsula of Cap Bon, suited for the cultivation of oranges, lemons and tangerines; the *Sahel*, where olive trees abound; the *centre*, a region of high tablelands and pastures; and the *desert* of the south, where dates are grown.

In 2007 the economically active agricultural population was an estimated 787,000. Large estates predominate; smallholdings are tending to fragment, partly owing to inheritance laws. In 2006 356,000 ha. were irrigated. There were 2.76m. ha. of arable land in 2007 and 2.17m. ha. of permanent crops. There were 140 tractors and ten harvester-threshers per 10,000 ha. of arable land in 2006. The main crops are cereals, citrus fruits, tomatoes, melons, olives, dates, grapes and olive oil. Production, 2003 estimates (in 1,000 tonnes): wheat, 1,150; tomatoes, 800; melons and watermelons, 520; olives, 500; barley, 345; potatoes, 345; chillies and green peppers, 206; onions, 120; dates, 115; grapes, 115; oranges, 106; apples, 100; peaches and nectarines, 82; olive oil, 73; grapefruit and pomelos, 72; pears, 68.

Livestock, 2003 estimates (in 1,000): sheep, 6,850; goats, 1,400; cattle, 760; camels, 231; asses, 230; mules, 81; horses, 57. Livestock products, 2003 estimates (in 1,000 tonnes): meat, 250; milk, 989; eggs, 83.

### Forestry

In 2010 there were 1.01m. ha. of forests (6% of the land area). Timber production in 2007 was 2.38m. cu. metres.

### Fisheries

In 2010 the catch amounted to 97,743 tonnes, almost exclusively from marine waters.

## INDUSTRY

Production (in 1,000 tonnes): cement (2007), 7,379; phosphoric acid (2008), 2,113; residual fuel oil (2007), 646; distillate fuel oil (2007), 556; lime (2008), 369; crude steel (2007), 61. There were 5,837 industrial enterprises of ten employees or more in 2010 employing a total of 498,929 people. Industry accounted for 28.1% of GDP in 2006, with manufacturing contributing 16.9%.

### Labour

The economically active population totalled 3,593,200 in 2007. Out of 3,085,100 in employment, 48.6% were engaged in commerce and services, 32.1% in industry, mining, energy and

construction, and 19.3% in agriculture and fisheries. Unemployment was 14.1% in 2007.

## INTERNATIONAL TRADE

In Feb. 1989 Tunisia signed a treaty of economic co-operation with the other countries of Maghreb: Algeria, Libya, Mauritania and Morocco. Tunisia was the first country to sign a partnership agreement with the European Union, becoming fully integrated in its free trade zone in Jan. 2008.

### Imports and Exports

### Civil Aviation

The national carrier, Tunisair, is 74.5% state-owned. Scheduled airline traffic of Tunisian-based carriers flew 43.2m. km and carried 2,098,300 passengers in 2005. There are six international airports. In 2001 Monastir (Habib Bourguiba) handled 3,894,000 passengers (3,885,000 on international flights) and 800 tonnes of freight. Tunis-Carthage handled 3,315,000 (3,061,000 on international flights) and 21,800 tonnes of freight. Djerba handled 2,161,000 passengers (1,945,000 on international flights) and 700 tonnes of freight.

### Shipping

There are ports at Tunis, its outer port Tunis-Goulette, Sfax, Sousse and Bizerta, all of which are directly accessible to ocean-going vessels. The ports of La Skhirra and Gabès are used for the shipping of Algerian and Tunisian oil. In Jan. 2009 there were 17 ships of 300 GT or over registered, totalling 125,000 GT.

### Telecommunications

Tunisia had 1,273,300 fixed line telephone subscribers (126.5 per 1,000 persons) in 2007 and 7,842,600 mobile phone subscribers. There were 1,722,190 internet users in 2007. In June 2012 there were 3.1m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

There are 51 magistrates' courts, 13 courts of first instance, three courts of appeal (in Tunis, Sfax and Sousse) and the High Court in Tunis.

A Personal Status Code was promulgated on 13 Aug. 1956 and applied to Tunisians from 1 Jan. 1957. This raised the status of

women, made divorce subject to a court decision, abolished polygamy and decreed a minimum marriage age.

The population in penal institutions in Jan. 2011 was approximately 31,000 (297 per 100,000 of national population).

### Education

The adult literacy rate in 2008 was 78%. All education is free from primary schools to university. Attendance at school is compulsory between the ages of six and 16. In 2007 there were 1,068,822 pupils in primary schools with 58,879 teaching staff and 1,268,219 pupils in secondary schools with 79,735 teaching staff.

In 2007 there were 13 public universities including the Virtual University of Tunis. There are a number of other public and private higher education institutions. There were 326,185 students in higher education in 2007 with 18,117 academic staff.

### KEY HISTORICAL EVENTS

There is evidence of human habitation in Anatolia (Asia Minor) from around 7500 BC. Catal Huyuk (on the Konya Plain) flourished between 6500 and 5800 BC to become one of the world's largest and most important Neolithic sites. Between 1800 and 1200 BC much of Anatolia came under Hittite rule, initially centred on Cappadocia. The artistic work of the Hittites shows a high level of culture with Babylonian and Assyrian influence. Greek colonies were established around the Anatolian coast from around 700 BC including Byzantium, which was founded by Greeks from Megara in 667 BC. Anatolia was conquered by Persians in the 6th century BC.

Alexander the Great defeated the Persians around 330 BC. After his death there was a long civil war between the Seleucids and the Ptolemies, while the kingdoms of Galatia, Armenia, Pergamum, Cappadocia, Bithynia and Pontus all established footholds in the region. Rome gained dominance around the 2nd century BC and brought stability and prosperity. Turkey was home to some of the earliest centres of Christianity, such as Antioch (modern Antalya) and Ephesus. In AD 324 the Emperor Constantine began the construction of a new capital at Byzantium. Constantinople became the centre of the Byzantine (Eastern Roman) Empire, which peaked under Justinian in the mid-6th century.

Muslim Arab forces attacked Constantinople in the 670s and besieged the city again in 716 but were repelled, thwarting the expansion of the Umayyad Caliphate ruled by Umar II. Constantine V (741–75) led Christian Byzantine forces eastward to recover lands in Anatolia. The Seljuk Turks, whose origins were in central Asia, established dominance over much of Anatolia during the 11th century, led by Alp Arslan. They came under threat during the Crusades and were overrun by the Mongol hordes from 1243. The Ottoman principality was one of a number of small Turkish states that emerged in Anatolia amid the retreat

of the Mongols and the waning of the Seljuk and Byzantine empires. Osman I led the early phase of Ottoman expansion, conquering Byzantine towns in northwest Anatolia in the early 14th century. Sultan Mehmed II seized Constantinople in 1453 and went on to establish Ottoman dominance in the Balkans and the Aegean. The empire expanded to its fullest extent under Suleiman the Magnificent (1494–1566), taking in North Africa, the Levant, Persia, Anatolia, the Balkans and the Caucasus.

From the early 17th century the Ottoman empire fell into a long decline, its power weakening rapidly in the 19th century. The Kingdom of Greece broke away from Ottoman rule in 1832, with Serbs, Romanians, Armenians, Albanians, Bulgarians and Arabs demanding independence soon afterwards. Attempts by Turkey to redefine itself were further hindered in the 20th century by the First World War, during which it sided with Germany. In fighting with Greece over disputed territory from 1920–22, the Turkish National Movement was led by Mustafa Kemal (Atatürk: 'Father of the Turks'), who wanted a republic based on a modern secular society. Turkey became a republic on 29 Oct. 1923, with Ankara its capital. Islam ceased to be the official state religion in 1928 and women were given the same rights to employment and education as men, although they were not able to vote in national elections until 1934. İsmet İnönü became president following Kemal's death in 1938 and steered a neutral course through the Second World War. The 1950s were marked by a policy of firm alignment with the West, and Turkey joined NATO in 1952.

On 27 May 1960 the Turkish army overthrew the government and party activities were suspended. A new constitution was approved in a referendum held on 9 July 1961. On 12 Sept. 1980 the Turkish armed forces again drove the government from office. A new constitution was enforced after a national referendum on 7 Nov. 1982. In the face of mounting Islamization of government policy, the Supreme National Security Council reaffirmed its commitment to the secular state. On 6 March 1997 Prime Minister Necmettin Erbakan, leader of the pro-Islamist Welfare Party, promised to combat Muslim fundamentalism but in June he was forced to resign by a campaign led by the army.

There are ongoing quarrels with Greece over the division of Cyprus, oil rights under the Aegean and ownership of uninhabited islands close to the Turkish coast. In Feb. 2000 the Kurdish Workers' Party (PKK) formally abandoned its 15-year rebellion and adopted the democratic programme urged by its imprisoned leader, Abdullah Öcalan. Despite being a long-term ally of the USA, the Turkish parliament voted against allowing US troops to attack Iraq from its southeastern border in 2003, with the incumbent Justice and Development Party (AKP) government harbouring concerns about the possibility of an independent Kurdish state arising from a divided Iraq.

An associate member of the EU since 1964, Turkey is in the process of accession pending the completion of negotiations. However, significant hurdles remain, including the status of Northern Cyprus, the issue of human rights in Turkey and lukewarm support for its accession in some EU states.

In Aug. 2007 Abdullah Gül became president, following several months of political wrangling over concerns that his Islamist background might compromise Turkey's constitutional secularism.

### TERRITORY AND POPULATION

Turkey is bounded in the west by the Aegean Sea and Greece, north by Bulgaria and the Black Sea, east by Georgia, Armenia and Iran, and south by Iraq, Syria and the Mediterranean. The area (including lakes) is 783,562 sq. km (302,535 sq. miles). The last traditional census was in 2000. In 2007 an address-based population registration system was established to replace

ten-yearly censuses. The population at the census of 31 Dec. 2009 using this method was 72,561,312, giving a density of 94.3 per sq. km. In 2011, 70.1% of the population lived in urban areas.

The UN gives a projected population for 2015 of 77.00m.

Turkish is the official language. Kurdish and Arabic are also spoken.

Some 14m. Kurds live in Turkey. In Feb. 1991 limited use of the Kurdish language was sanctioned, and in Aug. 2002 parliament legalized Kurdish radio and television broadcasts.

## SOCIAL STATISTICS

Births, 2009, 1,241,617; deaths, 367,971. 2009 birth rate per 1,000 population, 17.3; death rate, 5.1. 2009 marriages, 591,472 (rate of

8.2 per 1,000 population); divorces, 114,162 (rate of 1.6 per 1,000 population). Population growth rate, 2009, 1.3%. Expectation of life, 2007, was 69.4 years for males and 74.2 for females. Infant mortality, 2010, 12 per 1,000 live births, declining significantly from 66 per 1,000 live births in 1990. Fertility rate, 2008, 2.1 births per woman. In 2006 the most popular age for marrying was 25–29 for males and 20–24 for females.

## CLIMATE

Coastal regions have a Mediterranean climate, with mild, moist winters and hot, dry summers. The interior plateau has more extreme conditions, with low and irregular rainfall, cold and snowy winters, and hot, almost rainless summers. Ankara, Jan. 32.5°F (0.3°C), July 73°F (23°C). Annual rainfall 14.7" (367 mm). İstanbul, Jan. 41°F (5°C), July 73°F (23°C). Annual rainfall 28.9" (723 mm). İzmir, Jan. 46°F (8°C), July 81°F (27°C). Annual rainfall 28" (700 mm).

## CONSTITUTION AND GOVERNMENT

On 7 Nov. 1982 a new constitution was adopted, which has subsequently undergone several revisions. Following a referendum on 21 Oct. 2007, it was amended so that the *President* will be directly elected by the people, rather than by *Parliament*, as is currently the case. Furthermore, the President will be able to serve for up to two five-year terms, rather than being limited to a single seven-year term. This reform will come into force at the next presidential election (scheduled for Aug. 2014), and does not apply to the incumbent President. Further amendments were introduced after acceptance in a referendum on 12 Sept. 2010. Under their terms, military officers accused of crimes against the state may be tried in civilian courts. Legal protection previously granted to participants in the 1980 coup was removed. Government workers are granted the right to collective bargaining and restrictions on striking were loosened. The *Constitutional Court* was expanded, with the president and parliament having a greater say in judicial appointments.

The Presidency is not an executive position; the President may not be linked to a political party but can veto laws and official appointments. There is a 550-member Turkish Grand National Assembly, elected by universal suffrage (at 18 years and over) for four-year terms by proportional representation.

## National Anthem

'Korkma! Sönmez bu şafaklarda yüzen al sancak' ('Be not afraid! Our flag will never fade'); words by Mehmed Akif Ersoy, tune by Zeki Üngör.

**RECENT ELECTIONS**

Parliamentary elections were held on 12 June 2011. The ruling Justice and Development Party (AKP)—former Islamists—won 326 of the 550 seats with 49.9% of votes cast, against 135 seats and 25.9% for the Republican People's Party (CHP) and 53 seats and 13.0% for the Nationalist Movement Party. The remaining seats went to independents. There were 12 parties that failed to secure the 10% of votes needed to gain parliamentary representation. Turnout was 86.7%.

In the presidential elections held on 27 April and 6 May 2007, the AKP nominee Abdullah Gül failed to gain the backing of enough members of the assembly. Amid concerns that Gül's Islamist background would compromise the country's secular status, the presidential vote was postponed until after early parliamentary elections that were brought forward to July. In the second presidential elections of 2007 the first round was held on 20 Aug. Abdullah Gül received 347 votes, Sabahattin Çakmaköğlu (Nationalist Movement Party) 70 and Tayfun İçli (Democratic Left Party) 13, with 23 votes blank and one invalid. As 367 votes (a two-thirds majority) were required to be elected in either the first or second round a second round was held on 24 Aug., with Gül receiving 337 votes, Çakmaköğlu 71 and İçli 14; 24 votes were

blank. A third round was therefore held on 28 Aug. at which only a simple majority was required. Gül received 339 votes, Çakmaköğlu 70 and İçli 13.

President

*Introduction*

Abdullah Gül was elected president on 28 Aug. 2007. His background in Islamist politics and membership of political parties banned under the country's secular constitution stoked widespread concern when he was nominated as a presidential candidate. A former prime minister and close ally of the incumbent premier, Recep Tayyip Erdoğan, Gül has taken a moderate line since 2001, advocating a pro-Western agenda and eventual EU membership.

*Early Life*

Abdullah Gül was born on 29 Oct. 1950 in Kayseri, central Turkey. He graduated in economics from İstanbul University in 1971 and began an academic career there. From 1980–83 he taught economics at the Sakarya School of Engineering and Architecture. As a devout Muslim, and having received a PhD in 1983, he joined the Islamic Development Bank (in Jeddah, Saudi Arabia) as an economist, a position he held for eight years.

Returning to Turkey in 1991, Gül entered politics. Campaigning for the Islamist Welfare Party, he was elected representative for Kayseri. He rose through the party ranks to become state minister and speaker for the government of Necmettin Erbakan in 1996. He was initially critical of Turkey's overtures towards the West and opposed EU membership. His ambitions were curtailed in 1997 by a military-backed campaign to oust the government. The following year a ban was imposed on the Welfare Party which was said to threaten the secular constitution. Gül, along with around 100 Welfare Party members, joined the Virtue Party, contesting its leadership in 2000. This party was banned in June 2001.

In Aug. 2001 Gül and other ex-party members joined Recep Tayyip Erdoğan's newly-formed Justice and Development Party (AKP), which presented itself as pro-Western and democratic. In the 2002 parliamentary elections Erdoğan led a high profile campaign, but was barred from standing because he had a criminal conviction for reading an Islamic poem at a political rally. The AKP found popularity with voters dissatisfied with the

ruling government and won an outright victory to replace the three-party coalition. Two weeks after the election the party nominated Gül for the premiership.

#### *Career in Office*

As prime minister, Gül wanted to prove that Turkey could operate as both a Muslim and democratic state. The AKP campaigned on a pro-Western agenda and was committed to steering Turkey towards EU membership. Gül announced plans to reform the laws on the freedom of expression and human rights that had been partly responsible for Turkey's omission from the EU expansion plans in 2002. He supported further privatization and sought to achieve a modernized and efficient administration, reducing his cabinet from 36 to 26 places. In Dec. 2002 President Ahmet Necdet Sezer agreed to constitutional changes that would allow Erdoğan to stand for a parliamentary seat and thus become eligible for the premiership.

In the run-up to the US-led invasion of Iraq in March 2003, parliament refused to allow the USA to deploy troops on Turkish territory, though permission was given to use its airspace. Erdoğan returned to parliament in a by-election the same month and was appointed prime minister. Gül became foreign minister, working to achieve an EU accession date, although this was thwarted by the continued impasse over the status of Cyprus.

Prime Minister Erdoğan announced in April 2007 that Gül would be the AKP candidate in the 2007 presidential election. This sparked Turkey's most serious political crisis in a decade, with mass protests in the big cities in support of secularism. The military also warned that it would defend secularism. The AKP was forced to call early elections for 22 July, which it won decisively. Gül was re-nominated as the AKP candidate and on 28 Aug. he was elected president in the third round of voting. The chief of the general staff absented himself from the swearing-in ceremony.

In his inauguration speech, Gül sought to dispel secularist fears of an AKP Islamist agenda. However, parliament's vote to remove the ban on women wearing headscarves at universities in Feb. 2008 was seized on by secularists as evidence that Gül was attempting to introduce Islamic rule. In June the Constitutional Court rejected the move in a ruling that was viewed as a setback for the AKP government.

In July 2009 Gül approved controversial government legislation allowing civilian courts to prosecute military personnel for offences against the state. Then in Aug. 2011, after Turkey's top military leadership had resigned en masse in a dispute over promotions, he moved quickly to appoint replacements and assert civilian control over the powerful and traditionally secular armed forces.

### **Recep Tayyip Erdoğan**

#### *Position*

Prime Minister

#### *Introduction*

Recep Tayyip Erdoğan became prime minister in March 2003. He led the Justice and Development Party (AKP) to victory at the general elections of Nov. 2002 but, because of a previous criminal conviction, was banned from standing for a parliamentary seat thus making him ineligible for the premiership. A constitutional amendment allowed him to stand for election in early 2003 and he subsequently replaced his party deputy, Abdullah Gül, as prime minister. For many years a prominent Islamist spokesman, Erdoğan has remoulded himself as a pro-European moderate conservative, although he continues to cause unease among many of Turkey's secularists. He identified Turkey's admission to the European Union as his government's top priority and introduced reforms that paved the way for the opening of membership talks from Oct. 2005. However, the EU negotiations have since been hampered by Turkey's continuing refusal to recognize the

government of Greek Cyprus. Erdoğan was returned as premier in 2007 as the AKP won parliamentary elections with almost 47% of the vote, and again in 2011 as the party won a third consecutive victory at the polls with an increased vote share.

#### *Early Life*

Erdoğan was born in 1954 in Rize and his family later moved to İstanbul. He attended a Koranic college before graduating in economics in 1981 from Marmara University in İstanbul where he met Necmettin Erbakan, who would become Turkey's first Islamist premier. From the mid-1980s Erdoğan became active in the pro-Islamist Welfare Party. In 1994 he was made mayor of İstanbul and was noted for running an effective administration free of corruption.

The Welfare Party was outlawed in 1998 for contravening Turkey's secularist constitution. In the same year Erdoğan was imprisoned for inciting racial hatred when he read a pro-Islamist poem at a political rally. He served four months of a ten-month sentence. Following the banning of the Virtue Party (the successor party to Welfare) in June 2001, Erdoğan established the AKP, espousing pro-Western and democratic policies, and the party won an outright victory at the general elections of Nov. 2002. Erdoğan remained the AKP's figurehead while Abdullah Gül, his deputy and a former foreign minister, was named prime minister.

Following constitutional changes in Dec. 2002, Erdoğan was able to successfully contest a by-election in Feb. 2003. Gül stood down to be replaced by Erdoğan the following month.

#### *Career in Office*

Despite the AKP's Islamic roots, Erdoğan believes that Turkey can operate as both a Muslim and democratic state within Europe. He has voiced his commitment to democratization—including liberalizing laws on freedom of expression and human rights that were partly responsible for Turkey's omission from the EU expansion plans advanced in 2002—and confirmed his support for further privatization.

Erdoğan's early tenure was dominated by the US-led invasion of neighbouring Iraq from March 2003. Mirroring Turkish popular opinion, the government refused to allow the deployment of US ground troops on its territory, endangering aid and loans from the USA and IMF until the Turkish parliament agreed to the use of its airspace by the US air force. Turkey's deployment of troops in Kurdish-held northern Iraq to block any attempts to establish a Kurdish separatist state meanwhile caused international concern.

Turkey's wish for early entry into the EU was undermined by the failure in 2003 of the leaders of the Greek and Turkish sectors of Cyprus to agree on UN proposals for the island's reunification. A revised UN reunification plan was put to both sides in twin referenda in April 2004, which was endorsed by Turkish Cypriots but rejected by Greek Cypriots. Because both sides had to approve the proposals, the island remained divided as it joined the EU the following month. To fulfil the political criteria for EU membership, Erdoğan had pushed through parliament a series of reform packages in 2003 to bring Turkey into line with EU legislation. In 2004 a protocol abolishing the death penalty was signed and penal reforms introduced tougher measures to prevent torture and violence against women. Once Erdoğan's government had introduced the necessary legislative and constitutional reforms, and made a deal accepting Cyprus as an EU member, the European Council agreed in Dec. 2004 to open accession negotiations with Turkey which began in Oct. 2005. However, in late 2006 the EU partially suspended them because of the Turkish government's failure to open its ports and airports to Cypriot traffic. Erdoğan emphasized that the accession process would be maintained but there has been little substantive progress as he continues to press the EU to take steps to end the Turkish Cypriot community's economic isolation.

In early 2007 Erdoğan decided not to stand for election to the state presidency in view of strong secular opposition, and instead put forward foreign minister Abdullah Gül as the AKP candidate. Gül was equally unpalatable to secular and particularly military opinion, leading to a political stand-off in the National Assembly. However, Erdoğan consequently called an early general election for July, which returned the AKP to power, and in Aug. the new parliament endorsed Gül as president.

Secular concerns over the AKP's Islamist intentions resurfaced in Feb. 2008 when parliament voted to remove the ban on women wearing headscarves at universities. The Constitutional Court overturned the proposed law in June that year and then only narrowly ruled in July against a petition by state prosecutors to ban the AKP for alleged anti-secular activities, which could have led to a political crisis and Erdoğan's disqualification from politics. Tensions between the AKP and the secular opposition have since continued. In Sept. 2010 Erdoğan's government won a referendum on constitutional reforms increasing parliamentary control over the army and judiciary, and in Dec. the trial began of 196 active and retired military officers charged with a longstanding alleged plot to destabilize the country and overthrow the AKP administration. In Jan. 2012 former military chief of staff Gen. İlker Başbuğ was arrested and accused of planning a coup. His trial began in March, while in Sept. three other generals were jailed for 20 years.

Erdoğan's harder line towards Kurdish separatist insurgents based in northern Iraq had led to cross-border Turkish air and artillery assaults in 2007-08. In a new initiative to end the conflict his government put forward measures in parliament in Dec. 2009 to extend Kurdish linguistic and cultural rights and to limit the military presence in the mainly Kurdish southeast of the country. In July 2010 the PKK indicated its willingness to consider a truce in return for greater political and cultural rights, but the offer met with no official response. There was instead an escalation of Turkish military and penal measures against the PKK and pro-Kurdish activists in 2011 and 2012.

In foreign affairs, Erdoğan clashed publicly in 2009 with the president of Israel over Israeli military action in the Palestinian Gaza Strip, and relations were damaged further in 2010 as nine Turkish activists were killed in an Israeli commando raid on a flotilla of ships carrying aid and supplies to Gaza. In Sept. 2011 the Turkish government suspended all defence links after expelling the Israeli ambassador. Turkey's diplomatic ties with the USA and France have also come under strain over US congressional, and French parliamentary, recognition of the mass killing of Armenians in 1915 during Ottoman rule as genocide. Despite Turkey's rejection of Armenia's claims about the episode, the two governments agreed in Oct. 2009 on a framework to normalize relations, subject to parliamentary ratification by both sides, although this has yet to be realized. In 2011, while critical of NATO's military action against the Gaddafi regime in Libya, Erdoğan was supportive of the 'Arab Spring' protest movements that erupted against established regimes across much of the Middle East and North Africa.

The escalation of the civil war in Syria in 2012 led to a serious deterioration in Turkey's relations with the neighbouring regime of President Assad. In June a Turkish reconnaissance aircraft was shot down by a Syrian missile, prompting threats of retaliation from Erdoğan. In Oct. a series of exchanges of artillery fire across the border followed a Syrian mortar attack that killed five Turkish civilians. In Nov. the Turkish government formally requested the deployment of NATO Patriot missiles on its territory as a defensive deterrent to Syrian attack. Turkey was meanwhile faced with a surge of Syrian refugees from the civil conflict.

## DEFENCE

The President of the Republic is C.-in-C. of the armed forces. The *National Security Council*, chaired by the Prime Minister and comprising military leaders and the ministers of defence and the

economy, also functions as a *de facto* constitutional watchdog. Reforms passed in July 2003 in preparation for EU membership aimed to reduce the influence of the military in the political system. In Oct. 2003 the Turkish parliament voted to send 10,000 troops to Iraq, which would have made it the third largest force in the country after the USA and the UK, but the Iraqi Governing Council rejected the plan.

Conscription is 15 months for privates, 12 months for reserve officers and six months for privates who have completed a university degree.

In 2008 defence expenditure totalled US\$13,531m., with spending per capita US\$179. The 2008 expenditure represented 1.9% of GDP.

## Army

Strength (2007) 660,700 (including 325,000 conscripts and 258,700 reservists). There is also a paramilitary gendarmerie-cum-national guard of 150,000. In addition around 36,000 Turkish troops are stationed in Northern Cyprus.

## Navy

The fleet includes 13 diesel submarines and 24 frigates. The main naval base is at Gölcük in the Gulf of İzmit. Other bases are located at Aksaz-Karaağaç, Antalya, Bartın, Çanakkale, Erdek, Ereğli, Foça, İskenderun, İstanbul, İzmir and Mersin. There are three naval shipyards: Gölcük, İzmir and Taşkızak.

The naval air component operates 11 combat-capable helicopters. There is a 3,100-strong Marine Regiment. The Coast Guard numbers 3,250 (including 1,400 conscripts).

Personnel in 2007 totalled 48,600 (34,500 conscripts) including marines and coast guard.

## Air Force

The Air Force is organized as two tactical air forces, with headquarters at Eskişehir and Diyarbakır. There were 435 combat-capable aircraft in operation in 2007 including F-5A/Bs, F-4E Phantoms and F-16C/Ds.

Personnel strength (2007), 60,000.

## INTERNATIONAL RELATIONS

Relations between Turkey and Iraq have long been strained over activity in the borderlands of northern Iraq by Kurdish separatist movements including the PKK. In Dec. 2007 Turkey launched air strikes on Iraqi territory against the PKK and in Feb. 2008 Turkish troops made a week-long incursion into northern Iraq to fight rebels.

Turkey has applied to join the European Union. At the EU's Helsinki Summit in Dec. 1999 Turkey was awarded candidate status. Talks on membership began in Oct. 2005 but Turkey is unlikely to join the EU in the foreseeable future.

## ECONOMY

Agriculture accounted for 9.5% of GDP in 2006, industry 28.7% and services 61.8%.

## Overview

In recent decades strong growth has been interrupted by sharp recessions in 1994, 1999, 2001 and 2009. In 2000 Turkey committed to a programme of wide-ranging structural reforms, strong fiscal adjustment and a pre-announced exchange rate crawl. However, the financial and currency crisis in 2001 caused the collapse of the three-year exchange rate-based stabilization programme and brought the country to the brink of debt default.

A strengthened programme was introduced in May 2001 with additional IMF support. Key structural reforms emphasized public sector standards, liberalizing markets and building a strong banking sector. Tight fiscal policies, IMF-inspired reforms and central bank independence brought Turkey improved macroeconomic health. From 2003-07 annual GDP growth averaged nearly 7% and public debt fell from 74% to 39% of GDP.

The subsequent global economic crisis saw oil and food import prices surge while unemployment reached 16% in 2009, higher than during the 2001 crisis. GDP growth dropped to 0.7% in 2008, with domestic political tensions adding to the country's vulnerability. The economy contracted in 2009, with export earnings and private investment falling by more than 30% in the early part of the year. However, growth recovered in 2010 and unemployment fell back to its pre-crisis level of around 10%. Real GDP growth stood above 8% in 2010 and 2011, but slowed in 2012. The current account deficit and inflation rate declined, while net exports increased.

Agriculture accounts for roughly 25% of total employment. The largest industrial sector is textiles and clothing, while the auto, autoparts and electronics industries have grown strongly. In 2005 the Baku-Tbilisi-Ceyhan oil pipeline opened, bringing up to 1m. bbls per day from the Caspian to the Ceyhan Marine Terminal in Turkey. The country also has one of the most successful tourism sectors in the region. In 1996 a customs union was established with the EU and in 2005 Turkey began the EU accession process, providing further incentive to maintain macroeconomic and structural reforms. In the long term, the IMF emphasizes the need to develop competitiveness and improve the business climate, as well as diversifying energy sources.

### Currency

The unit of currency is the Turkish *lira* (TRY) of 100 *kurus*. It was introduced on 1 Jan. 2005 as the new Turkish lira—officially abbreviated as YTL—replacing the Turkish lira (TRL) at 1 new Turkish lira = 1m. Turkish lira. On 1 Jan. 2009 the 'new' was removed and its official name is again just 'Turkish lira'. Gold reserves were 3.73m. troy oz in Sept. 2009 and foreign exchange reserves US\$69,387m. Inflation rates (based on OECD statistics):

| 2002  | 2003  | 2004 | 2005 | 2006 | 2007 | 2008  | 2009 | 2010 | 2011 |
|-------|-------|------|------|------|------|-------|------|------|------|
| 45.0% | 21.6% | 8.6% | 8.2% | 9.6% | 8.8% | 10.4% | 6.3% | 8.6% | 6.5% |

Total money supply in July 2009 was YTL88,267m.

### Budget

The fiscal year is the calendar year. Budgetary central government revenue totalled YTL218,858m. in 2007 (YTL189,578m. in 2006) and expenditure YTL206,695m. (YTL167,990m. in 2006). Tax revenues were YTL157,913m. in 2007.

VAT is 18%, with reduced rates of 8% and 1%.

### Performance

Real GDP growth rates (based on OECD statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|------|------|------|------|------|------|------|-------|------|------|
| 6.2% | 5.3% | 9.4% | 8.4% | 6.9% | 4.7% | 0.7% | -4.8% | 9.2% | 8.5% |

Total GDP was US\$775.0n. in 2011. GDP per capita nearly trebled in the space of eight years, rising from US\$3,492 in 2002 to US\$10,440 in 2008.

### Banking and Finance

The Central Bank (Merkez Bankası; *Governor*, Erdem Başçı) is the bank of issue. In 2003 there were 36 commercial banks (three state-owned, two under the Deposit Insurance Fund, 18 private, 13 foreign), and 14 development and investment banks. The Central Bank's assets were US\$51.66bn. in 2003. The assets and liabilities of deposit money banks were US\$25.8bn. Turkey's two state-owned banks, Ziraat Bankası (the Agricultural Bank, with a public mission to lend to farmers) and Halk Bankası (with a public mission to lend to small and medium sized enterprises), together accounted for 27% of total assets in the Turkish banking sector in Dec. 2002. Ziraat Bankası is Turkey's largest bank, with 18.1% of total assets as of March 2003.

In 2010 external debt totalled US\$293,872m., equivalent to 40.4% of GNI.

Foreign direct investment in 2011 was US\$15,876m., up from US\$9,038m. in 2010. In Dec. 2000 the IMF gave Turkey an emergency loan of US\$7.5bn. as the country experienced a financial crisis after ten banks were placed in receivership. The economic crisis continued as the lira was floated on the international market and lost 30% of its value against the US dollar in the space of 12 hours in Feb. 2001. Within a week the lira had been devalued by approximately 40%. In April 2001 Turkey secured a further US\$10bn. loan from the IMF and the World Bank. This was followed in Feb. 2002 with a three-year US\$16bn. loan from the IMF, taking total loans paid or pledged to US\$31bn.

There is a stock exchange in İstanbul (ISE).

## ENERGY AND NATURAL RESOURCES

### Environment

In 2008 Turkey's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 3.6 tonnes per capita. Turkey's greenhouse gas emissions rose by 96.0% between 1990 and 2008.

### Electricity

In 2007 installed capacity was 40.84m. kW (13.39m. kW hydro-electric); production in 2007 was 191.6bn. kWh and consumption per capita 2,572 kWh. There are plans to build two nuclear plants to meet the country's growing energy needs.

### Oil and Gas

Crude oil production (2007) was 2,134,000 tonnes. Reserves in 2005 were 296m. bbls. In 2007, 23,446,000 tonnes of crude petroleum were imported. Natural gas output was 891m. cu. metres in 2007.

Accords for the construction of an oil pipeline from Azerbaijan through Georgia to the Mediterranean port of Ceyhan in southern Turkey (the BTC pipeline) were signed in Nov. 1999. Work on the pipeline began in Sept. 2002 and it was officially opened in May 2005.

A gas pipeline from Baku in Azerbaijan (the South Caucasus pipeline) through Georgia to Erzurum was commissioned in June 2006.

### Minerals

Turkey is rich in minerals, and is a major producer of chrome.

Production of principal minerals (in 1,000 tonnes, in 2007 unless otherwise indicated) was: lignite, 72,902; iron, 4,849; copper (gross weight), 4,806; boron, 4,407; coal, 2,462; salt, 2,366; magnesite (2006), 2,088; chrome, 1,679.

### Agriculture

In 2002 there were 6,745,000 households engaged in farming, of which 148,190 were engaged purely in animal farming. Agriculture accounts for 45% of the workforce but only 11.5% of GDP. In 2002 Turkey had 25.94m. ha. of arable land and 2.59m. ha. of permanent crops. 5.2m. ha. were irrigated in 2002. Vineyards, orchards and olive groves occupied 2,776,000 ha. in 2005.

Production (2005, in 1,000 tonnes) of principal crops: wheat, 21,500; sugar beets, 15,181; tomatoes, 10,050; barley, 9,500; melons and watermelons, 5,795; maize, 4,200; potatoes, 4,090; grapes, 3,850; apples, 2,570; dry onions, 2,070; peppers, 1,829; cucumbers, 1,745; cottonseed (2004), 1,426; oranges, 1,202; sunflower seeds, 975; cotton lint (2004), 936; aubergines, 930; apricots, 860; olives, 800; cabbage, 675; chick-peas, 600; lemons, 600; hazelnuts, 530. Turkey is the largest producer of apricots and hazelnuts.

Livestock, 2002 (in 1,000): sheep, 26,972; cattle, 10,548; goats, 7,022; asses, 462; horses, 271; buffaloes, 138; mules, 97; chickens, 218,000. Livestock products, 2002 (in 1,000 tonnes): milk, 8,409; meat, 1,376; eggs, 543; cheese, 113; honey, 75.

### Forestry

There were 11-33m. ha. of forests in 2010, or 15% of the total land area. Timber production was 17-66m. cu. metres in 2007.

### Fisheries

The catch in 2010 totalled 485,939 tonnes (445,680 tonnes from marine waters). Aquaculture production in 2010 came to 167,721 tonnes.

## INDUSTRY

The leading companies by market capitalization in March 2012 were: Garanti Bankası (US\$16-6bn.); and Akbank (US\$15-7bn.).

Production in 2005 (in 1,000 tonnes unless otherwise stated): cement, 41,100; crude steel, 20,965; iron and steel bars, 11,854; distillate fuel oil (2007), 7,016; residual fuel oil (2007), 6,399; petrol (2007), 4,098; coke (2007), 3,335; sugar, 1,928; nitrogenous fertilizers, 1,525; paper and paperboard, 1,005; cotton yarn, 459; olive oil, 301; polyethylene, 274; pig iron, 178; cotton woven fabrics, 609m. metres; woollen woven fabrics, 32m. metres; carpets, 58,034,681 sq. metres; TV sets, 20,790,123 units; refrigerators, 5,098,866 units; cars, 635,137 units; lorries, 39,324 assembled units; tractors, 38,800 units; cigarettes, 104,170 tonnes.

### Labour

Out of 22,047,000 people in employment in 2005 (16,346,000 men), 6,493,000 were engaged in agriculture, hunting, forestry and fisheries, 4,083,000 in manufacturing, 3,610,000 in wholesale and retail trade/repair of motor vehicles, motorcycles and personal and household goods and 1,246,000 in public administration and defence/compulsory social security. The unemployment rate in 2011 was 8-8%. The gross monthly minimum wage was YTL666 in Jan. 2009.

Main export markets, 2006: Germany, 9,684; UK, 6,813; Italy, 6,753; USA, 5,061; France, 4,604; Spain, 3,721. The EU accounted for 40-7% of imports and 54-3% of exports in 2006.

## COMMUNICATIONS

### Roads

In 2006 there were 427,099 km of roads, including 1,987 km of motorway. In 2007 road vehicles in use included 6,472,200 passenger cars, 2,619,700 lorries and vans, 561,700 buses and coaches and 2,003,500 motorcycles and mopeds. There were 5,002 fatalities from road accidents in 2007.

### Rail

Total length of railway lines in 2005 was 8,697 km (1,435 mm gauge), of which 2,336 km were electrified. An undersea rail tunnel to link European and Asian Turkey is currently under construction; it is expected to open in 2015. Passenger-km travelled in 2005 came to 5-04bn. and freight tonne-km to 9-15bn. There are metro systems operating in Adana, Ankara, Bursa, İstanbul and İzmir.

### Civil Aviation

There are international airports at İstanbul (Atatürk and Sabiha Gökçen), Dalaman (Muğla), Ankara (Esenboga), İzmir (Adnan Menderes), Adana and Antalya. The national carrier is Turkish Airlines, which is 49-1% state-owned. In 2006 it flew 207-2m. km and carried 16,946,000 passengers (8,041,000 on international flights). In 2009 İstanbul's Atatürk Airport handled 29,854,119 passengers (18,396,050 on international flights) and 381,174 tonnes of freight. Antalya was the second busiest airport for passenger traffic, with 18,403,617 passengers (15,210,554 on international flights) and İstanbul's Sabiha Gökçen Airport third with 6,640,230 passengers (4,510,895 on domestic flights).

### Shipping

In Jan. 2009 there were 912 ships of 300 GT or over registered, totalling 5-05m. GT. Of the 912 vessels registered, 469 were general cargo ships, 148 passenger ships, 123 oil tankers, 100 bulk carriers, 37 container ships, 27 chemical tankers and eight liquid gas tankers. The Turkish-controlled fleet comprised 1,156 vessels of 1,000 GT or over in Jan. 2009, of which 520 were under the Turkish flag and 636 under foreign flags. In 2007 Turkish ports handled 288-1m. tonnes of cargo (114-6m. tonnes loaded and 173-5m. tonnes unloaded), more than double the 140-2m. tonnes handled in 2003.

### Telecommunications

In 2008 there were 17,502,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 65,824,000 (890-5 per 1,000 persons). In Nov. 2005 the government sold a 55% stake in Türk Telecom to a consortium led by Saudi Arabia's Oger Telecom and Telecom Italia. The government's stake fell to 30% in May 2008 through a public offering. There were 25-4m. internet users in 2008. In March 2012 there were 31-0m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The unified legal system consists of: (1) justices of the peace (single judges with limited but summary penal and civil jurisdiction); (2) courts of first instance (single judges, dealing with cases outside the jurisdiction of (3) and (4)); (3) central criminal courts (a president and two judges, dealing with cases where the crime is punishable by imprisonment over five years); (4) commercial courts (three judges); (5) state security courts, to prosecute offences against the integrity of the state (a president and two judges).

The civil and military High Courts of Appeal sit at Ankara. The Council of State is the highest administrative tribunal; it consists of five chambers. Its 31 judges are nominated from among high-ranking personalities in politics, economy, law, the army, etc. The Military Administrative Court deals with the judicial control of administrative acts and deeds concerning military personnel. The Court of Jurisdictional Disputes is empowered to resolve disputes between civil, administrative and military courts. The Supreme Council of Judges and Public Prosecutors appoints judges and prosecutors to the profession and has disciplinary powers.

The Civil Code and the Code of Obligations have been adapted from the corresponding Swiss codes. The Penal Code is largely based upon the Italian Penal Code, and the Code of Civil Procedure closely resembles that of the Canton of Neuchâtel. The Commercial Code is based on the German.

The population in penal institutions in Nov. 2008 was 101,100 (142 per 100,000 of national population).

The death penalty, not used since 1984, was abolished in peacetime in Aug. 2002. The government signed a European Convention protocol abolishing the death penalty entirely in Jan. 2004.

## Education

Adult literacy in 2009 was 90.8% (male, 96.4%; female, 85.3%). Compulsory primary and secondary education is free of charge in state schools between the ages of six and 18. In Aug. 2002 parliament legalized education in Kurdish. In 2003–04 there were 583 religious schools with 84,898 pupils.

| Statistics for 2005–06                | Number | Teachers | Students   |
|---------------------------------------|--------|----------|------------|
| Pre-school institutions               | 18,539 | 20,910   | 550,146    |
| Primary schools                       | 34,990 | 389,859  | 10,673,935 |
| High schools                          | 3,406  | 102,581  | 2,075,617  |
| Vocational and technical high schools | 4,029  | 82,736   | 1,182,637  |

In 2007–08 there were 53 state universities, including two higher institutes of technology, and 24 private universities. In 2002–03 a total of 1,894,000 students enrolled at 1,379 establishments of higher education (including the universities); teaching staff numbered 74,134. In 2001, 41,867 students were studying abroad.

In 2006 public expenditure on education came to 2.9% of GDP.

## Health

In 2006 there were 116,014 physicians, 23,798 dentists, 217,685 nurses and midwives and 24,740 pharmacists. There were 1,347 hospitals with 179,649 beds in 2009.

## Welfare

In 2000, 1,349,151 beneficiaries received TRL2,273,278,239m. from the Government Employees Retirement Fund. Of these, 820,167 persons were retired and 376,131 were widows, widowers or orphans of retired persons. There were 3,339,327 beneficiaries from the Social Insurance Institution in 2000.

## RELIGION

Islam ceased to be the official religion in 1928. The Constitution guarantees freedom of religion but forbids its political exploitation or any impairment of the secular character of the republic.

In 2001 there were 64.36m. Muslims, two-thirds Sunni and one-third Shia (Alevi). The Greek Orthodox, Gregorian Armenian, Armenian Apostolic and Roman Catholic Churches are represented in İstanbul, and there are small Uniate, Protestant and Jewish communities.

## CULTURE

### World Heritage Sites

UNESCO World Heritage sites under Turkish jurisdiction (with year entered on list) are: Historic Areas of İstanbul (1985), including the ancient Hippodrome of Constantine, the 6th-century Hagia Sophia and the 16th-century Süleymaniye Mosque; Göreme National Park and the Rock Sites of Cappadocia (1985); Great Mosque and Hospital of Divriği (1985), founded in the early 13th century; Hattusha (1986), the former capital of the Hittite Empire; Nemrut Dağ (1987), including the 1st century BC mausoleum of Antiochus I; Xanthos-Letoon (1988), the capital of Lycia; Hierapolis-Pamukkale (1988), including mineral forests, petrified waterfalls and the ruins of ancient baths, temples and other Greek monuments; City of Safranbolu (1994), a caravan station from the 13th century; Archaeological Site of Troy (1998); the Selimiye Mosque and its Social Complex (2011) in Edirne, the former capital of the Ottoman Empire; and the Neolithic Site of Çatalhöyük (2012), vast archaeological remains of Neolithic occupation dating from 7400–6200 BC, a unique illustration of the evolution of social organization and cultural practices as humans adapted to a sedentary life.

## Press

In 2006 there were 81 daily newspapers with a combined average daily circulation of 5.1m. The best-selling newspapers are *Posta* and *Zaman*, with average daily circulations of 635,000 and 565,000 respectively. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Turkey ranked 138th out of 178 countries. In March 2011, 57 journalists were in prison—more than in any other country.

## Tourism

In 2009, 25.5m. international tourists visited Turkey, making it the seventh most popular tourist destination; receipts from tourism in 2009 totalled US\$21.3bn.

## Festivals

Republic Day is on 29 Oct. The most important Islamic festivals are Şeker Bayramı ('sugar festival', Eid al-Fitr) at the end of Ramadan and Kurban Bayramı (Eid al-Adha). Their dates vary depending on the Islamic calendar. İstanbul hosts a variety of festivals including International İstanbul Film Festival (April), the One Love music festival (June), the International İstanbul Music Festival (June), International İstanbul Jazz Festival (July) and the Rock'n Coke music festival (July). Aspandos International Opera and Ballet Festival takes place in Antalya in June–July.

## KEY HISTORICAL EVENTS

Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan. The Khan of Khiva was deposed in Feb. 1920 and a People's Soviet Republic was set up. In Aug. 1920 the Amir of Bokhara suffered the same fate. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921. In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute their territories on a nationality basis. The redistribution was completed in May 1925 when the new states of Uzbekistan, Turkmenistan and Tadzhikistan were accepted into the USSR as Union Republics. Following the break-up of the Soviet Union, Turkmenistan declared independence in Oct. 1991. Saparmurad Niyazov was elected president and founded the Democratic Party of Turkmenistan, the country's only legal party. Also prime minister and supreme commander of the armed forces, parliament proclaimed Niyazov head of state for life in Dec. 1999. He held the official title of 'Turkmenbashi', leader of all Turkmen. In July 2000 Niyazov introduced a law requiring all officials to speak Turkmen. He died of a heart attack in Dec. 2006. Gurbanguly Berdymukhammedov succeeded him.

## TERRITORY AND POPULATION

Turkmenistan is bounded in the north by Kazakhstan, in the north and northeast by Uzbekistan, in the southeast by Afghanistan, in the southwest by Iran and in the west by the Caspian Sea. Area, 448,100 sq. km (186,400 sq. miles). The 1995 census population was 4,483,251; density 10.0 per sq. km. Estimate, 2010, 5.04m.; density, 11 per sq. km. In 1999, 85% of the population were Turkmen, 7% Russian, 5% Uzbek and 3% other. Since then the Russian population has declined dramatically as the rights of Russians living in Turkmenistan deteriorated considerably. A dual-citizenship treaty between Turkmenistan and

Russia has been rescinded. In 2011, 50.0% of the population lived in rural areas.

The UN gives a projected population for 2015 of 5.36m.

There are five administrative regions (*velayaty*): Ahal, Balkan, Dashguz, Lebap and Mary, comprising 42 rural districts, 15 towns and 74 urban settlements. The capital is Ashgabat (formerly Ashkhabad; 2004 estimated population, 827,500); other large towns are Turkmenabat (formerly Chardzhou), Mary (Merv), Balkanabad (Nebit-Dag) and Dashguz.

The official language is Turkmen, spoken by 77% of the population; Uzbek is spoken by 9% and Russian by 7%.

## SOCIAL STATISTICS

2008 estimates: births, 111,000; deaths, 39,000. Estimated rates, 2008 (per 1,000 population): births, 21.9; deaths, 7.7. Annual population growth rate, 2000–08, 1.4%. Life expectancy, 2007: 60.6 years for males and 68.8 for females. Infant mortality, 2010, 47 per 1,000 live births; fertility rate, 2008, 2.5 births per woman.

## CLIMATE

The summers are warm to hot but the humidity is relatively low. The winters are cold but generally dry and sunny over most of the country. Ashgabat, Jan.  $-1^{\circ}\text{C}$ , July  $25^{\circ}\text{C}$ . Annual rainfall 375 mm.

## CONSTITUTION AND GOVERNMENT

A new constitution was adopted on 26 Sept. 2008. It provided for a head of state who is elected by popular vote for a five-year term and abolished the 2,500-member *Khalk Maslakhaty* (People's Council), formerly the highest representative body. The *Majlis* (Assembly), which now serves as the sole legislative body, was increased from 65 to 125 members. The constitution also allows for a multiparty system.

At a referendum on 16 Jan. 1994, 99.99% of votes cast were in favour of prolonging President Niyazov's term of office to 2002. In 1999 the *Khalk Maslakhaty* declared him president for life.

## National Anthem

'Turkmenbasyn guran beyik binasy' ('The country which Turkmenbashi has built'); composed by Veli Muhatov.

## RECENT ELECTIONS

In the presidential election of 12 Feb. 2012 incumbent Gurbanguly Berdymukhammedov was re-elected with 97.0% of the vote (89.2% in 2007), ahead of Yarmukhammet Orazgulyev with 1.2%. Turnout was 96.3%.

*Majlis* elections were held on 14 Dec. 2008. Most of the candidates were from the Democratic Party (DP; former Communists). 123 of 125 seats were filled on 14 Dec. 2008 and results in the remaining two constituencies were decided by run-offs held on 28 Dec. 2008 and 8 Feb. 2009. The official turnout figure of 93.9% was disputed by human rights groups.

## CURRENT LEADERS

### Gurbanguly Berdymukhammedov

*Position*  
President

#### Introduction

Gurbanguly Berdymukhammedov came to power in 2006 following the death of President Saparmurad Niyazov, known as Turkmenbashi. Berdymukhammedov had served as minister of health in Niyazov's government since 1997, implementing the closure of rural hospitals. Though not initially regarded as a frontrunner for the presidency, he became acting president when Niyazov's constitutional successor, Ovezgeldi Atayev, was charged with criminal offences. Having won the Feb. 2007 presidential election, Berdymukhammedov began to strengthen ties with the outside world and introduced some constitutional reforms, although critics questioned their democratic validity. He was re-elected in Feb. 2012.

#### Early Life

Berdymukhammedov was born in Babaarap village in the region of Ashgabat in 1957. He graduated in dentistry from the Turkmen state medical institute in 1979 and later completed a PhD in medical sciences in Moscow. In 1995 he was appointed head of the dentistry centre of the ministry of health and became associate professor and dean of the dentistry faculty of the state medical institute. He was Niyazov's personal dentist and in 1997 entered political life as the minister for health and the medical industry.

In April 2001 Berdymukhammedov was appointed deputy chairman of the council of ministers. Under Niyazov's autocratic regime the health service suffered acute financial problems. In April 2004 Niyazov announced that since state healthcare workers were not being paid, Berdymukhammedov would also forfeit his pay for three months. In the same year Berdymukhammedov implemented drastic cuts, closing all rural hospitals and sacking 15,000 healthcare workers, replacing them with untrained army conscripts.

When Niyazov died of a heart attack on 21 Dec. 2006, the Turkmen constitution provided for Ovezgeldi Atayev, chairman of the *Khalk Maslakhaty* (People's Council), to become acting president. However, Berdymukhammedov assumed the role and announced that Atayev was the subject of criminal investigation. On 26 Dec. an extraordinary session of the *Khalk Maslakhaty* amended the constitution to allow the acting president to stand in presidential elections. It also blocked the candidacy of leading opposition figures based abroad.

Berdymukhammedov was said to have the backing of Akmurad Rejepov, head of the presidential security service, and although five other candidates stood in the elections, his victory was widely predicted. During his campaign Berdymukhammedov promised to reform the agricultural sector and to improve living conditions.

He pledged that the government would continue to provide free natural gas, electricity, salt and water, and that salaries and pensions would be increased regularly.

#### Career in Office

On 11 Feb. 2007 Berdymukhammedov was elected president with nearly 90% of the vote. While making no decisive break with Niyazov's isolationist policies, there were early indications of a more outward-looking stance. Representatives of many foreign governments attended his inauguration and he subsequently received delegations from China, Russia and the USA. He confirmed that Turkmenistan would honour its gas contracts with Russia and moved towards stronger relations with neighbouring Afghanistan by writing off US\$4m. of debt. The government also announced that it was reinforcing commercial ties with Iran.

Berdymukhammedov extended the period of formal schooling, reintroduced foreign languages to the curriculum and lifted restrictions on travel within Turkmenistan. He raised the prospect of reopening rural hospitals and promised to widen Internet access (available to 1% of the population when he came to power). However, these reforms would be dependent on an economic upturn. A new constitution was adopted in Sept. 2008 that increased the number of parliamentary seats to 125 and increased the influence of the *Majlis*. Nevertheless, Berdymukhammedov's hold on power was reinforced as parliamentary elections in Dec. that year returned an overwhelming number of candidates from his dominant Democratic Party.

The cult of personality around the presidency has lessened under Berdymukhammedov, but the government retains tight control over political organizations. It also continues to attract criticism for human rights and a lack of transparency in the electoral system, under which the president was returned for a second term in Feb. 2012.

The government has sought to diversify its gas markets and break free of Russian dominance of the export routes. An export pipeline to China was inaugurated in Dec. 2009 and in Jan. 2010 a second pipeline to Iran opened.

## DEFENCE

Conscription is compulsory for two years. Defence expenditure in 2008 totalled US\$84m. (US\$17 per capita), representing 0.7% of GDP.

#### Army

In 2007 the Army was 18,500-strong.

#### Navy

A Navy/Coast Guard is in the process of being formed and is expected to be completed in 2015. In 2007 it numbered 500 and operated from a minor base at Turkmenbashi with six patrol and coastal combatants. The Caspian Sea Flotilla is operating as a joint Russian, Kazakhstani and Turkmenistani flotilla under Russian command. It is based at Astrakhan.

#### Air Force

The Air Force, with 3,000 personnel (including Air Defence), had 94 combat-capable aircraft in 2007 including Su-17s and MiG-29s.

## ECONOMY

In 2008 agriculture accounted for 12.3% of GDP, industry 53.7% and services 34.0%.

Turkmenistan featured among the ten most corrupt countries in the world in a 2012 survey of 176 countries carried out by the anti-corruption organization *Transparency International*.

## Overview

Turkmenistan is home to the fifth largest oil and gas reserves in the world. Hydrocarbons comprise 80% of exports and are the chief factor in the country's recent economic upturn. Other major

exports include textiles and raw cotton. Despite a privatization programme launched in 1994, most businesses remain state-run and foreign investment levels are low.

When Turkmenistan gained independence from the Soviet Union in 1991 the economy suffered from the break in traditional economic ties, poor harvests and mismanagement of state-run industries. The situation worsened in 1997 when natural gas exports were halted as a result of non-payment by Commonwealth of Independent States (CIS) countries but improved the following year with the resumption of gas exports to Ukraine and Russia.

Government sources report growth of 17% annually since 1999 but research by international organizations suggest a lower figure. Nevertheless, growth in the past has been impressive, driven by state investment (around 30% of GDP) in oil refineries, food processing, transportation and textiles.

Turkmenistan reached agreement with Russia in 2003 and China in 2005 to supply natural gas, guaranteeing income in the medium term. However, gas exports are hindered by reliance on Russian pipelines while government expenditures have focused on infrastructure and national prestige projects that bring little revenue.

### Currency

The unit of currency is the *new manat* (TMT) of 100 *tenge*, introduced on 1 Jan. 2009 to replace the *manat* (TMM) at a rate of 1 TMT = 5,000 TMM. There was inflation of 14.5% in 2008, followed by deflation of 2.7% in 2009. In 2010 there was inflation again, of 4.4%, rising to 5.3% in 2011.

### Budget

Revenues were 10.1bn. manat in 2008 and expenditures 5.4bn. manat.

VAT is 15%.

### Performance

Total GDP in 2011 was US\$28.1bn. Annual real GDP growth averaged -10.6% between 1994 and 1997. However, a spectacular revival led to average annual economic growth of 15.9% between 1999 and 2006. Real GDP growth was 14.7% in 2008, 6.1% in 2009, 9.2% in 2010 and 14.7% again in 2011. The rapid growth of recent years is largely down to large-scale gas exports to Russia.

### Banking and Finance

There are two types of bank in Turkmenistan—state commercial banks and joint stock open-end commercial banks. The central bank is the State Central Bank of Turkmenistan (*Chairman*, Tuvakmammed Japarov). A government-led restructuring of the banking sector in 1999 saw the total number of banks reduced from 67 to 12 by 2002. In 2010 foreign debt totalled US\$422m., equivalent to just 2.1% of GNI.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 11.8 tonnes per capita.

### Electricity

Installed capacity in 2007 was an estimated 3.9m. kW. Production was 14.88bn. kWh in 2007, with consumption per capita 2,703 kWh.

### Oil and Gas

Turkmenistan possesses the world's fourth largest reserves of natural gas and substantial oil resources, but disputes with Russia have held up development. The 1,833-km Turkmenistan–China gas pipeline, taking natural gas to Xinjiang in China via Kazakhstan and Uzbekistan, was inaugurated in Dec. 2009. Oil production in 2008 was 10.2m. tonnes.

In 2008 natural gas reserves were estimated at 7,940bn. cu. metres and oil reserves at 0.6bn. bbls. In 2008 natural gas production was 66.1bn. cu. metres.

### Minerals

There are reserves of coal, sulphur, magnesium, potassium, lead, barite, viterite, bromine, iodine and salt.

### Agriculture

Cotton and wheat account for two-thirds of agricultural production. Barley, maize, corn, rice, wool, silk and fruit are also produced. Production of main crops (2003, in 1,000 tonnes): wheat, 2,534; seed cotton, 714; cottonseed, 480; sugar beets, 255; watermelons, 230; tomatoes, 150; cotton lint, 140; grapes, 130; rice, 110. There were approximately 1.85m. ha. of arable land in 2007 and 63,000 ha. of permanent crops.

Livestock, 2003 estimates: sheep, 6.0m.; cattle, 860,000; goats, 370,000; pigs, 45,000; chickens, 5m.

### Forestry

There were 4.13m. ha. of forests (9% of the land area) in 2010.

### Fisheries

There are fisheries in the Caspian Sea. The estimated total catch in 2008 was 15,000 tonnes, exclusively freshwater fish.

## INDUSTRY

Main industries: oil refining, gas extraction, chemicals, manufacture of machinery, fertilizers, textiles and clothing. Output, 2007 (in tonnes): distillate fuel oil, 2,908,000; residual fuel oil, 2,020,000; petrol, 1,464,000; cement, 941,000; cotton woven fabrics (2001), 61.0m. sq. metres; footwear (2001), 375,000 pairs.

### Labour

The estimated labour force in 2010 totalled 2,509,000 (53% males), up from 1,826,000 in 2000.

## INTERNATIONAL TRADE

### Imports and Exports

Imports, 2003, US\$2,512m.; exports, US\$2,632m. Main imports: light manufactured goods, processed food, metalwork, machinery and parts. Main exports: gas, oil and cotton. The main import suppliers in 1998 were Ukraine (16.1%), Turkey (13.1%), Russia (11.6%), Germany (6.9%) and the USA (6.4%). The leading export markets were Iran (24.1%), Turkey (18.3%), Azerbaijan (6.9%), UK (4.9%) and Russia (4.7%).

## COMMUNICATIONS

### Roads

Length of roads in 2002, 58,592 km (of which 81.2% were paved). In 2006 there were 650 fatalities as a result of road accidents.

### Rail

Length of railways in 2008, 3,095 km of 1,520 mm gauge. A rail link to Iran was opened in 1996. In 2008, 6.2m. passengers and 25.4m. tonnes of freight were carried.

### Civil Aviation

Turkmenistan Airlines, founded in 1992, is the flag carrier. In 2005 scheduled airline traffic of Turkmenistan-based carriers flew 9.5m. km, carrying 1,899,800 passengers.

### Shipping

In Jan. 2009 there were ten ships of 300 GT or over registered, totalling 23,000 GT. The main port is Turkmenbashi, on the Caspian Sea.

### Telecommunications

Telephone subscribers numbered 805,500 in 2007 (162.2 per 1,000 population), including 347,600 mobile phone subscribers. There were 70,000 internet users in 2007. The internet was banned under the former president, Saparmurad Niyazov, and has only been available since early 2007.

## SOCIAL INSTITUTIONS

### Justice

The population in penal institutions in 2006 was 10,953 (224 per 100,000 of national population). The death penalty was abolished in 1999 (there were over 100 executions in 1996).

### Education

Free compulsory education from age seven was extended from nine years' duration to ten in 2007. The duration of higher education programmes is generally five years (longer in the case of medicine and some other disciplines). In 2003 there were 1,705 general secondary schools, 116 professional schools and 15 secondary vocational training schools. About 1,018,600 students were enrolled in general secondary education. In the same year there were approximately 65,100 teachers. In 2003, 129,000 children (24% of those eligible) were enrolled in 944 pre-schools.

In 2009 adult literacy was estimated at 99.6%.

### Health

In 2006 there were 43 hospital beds per 10,000 inhabitants. There were 12,210 physicians, 703 dentistry personnel and 23,026 nursing and midwifery personnel in 2006.

### Welfare

A Social Security Code was adopted in 2007. In 2010 there were 274,171 pensioners; in Jan. 2010 the minimum pension was 121 new manat a month and the maximum pension 532 new manat.

## RELIGION

Around 87% of the population in 2001 were Muslims (mostly Sunni).

## CULTURE

### World Heritage Sites

Turkmenistan has three sites on the UNESCO World Heritage List: the State Historical and Cultural Park 'Ancient Merv' (inscribed on the list in 1999), the oldest and best-preserved Central Asian Silk Route city, dominated by Seljuk architecture; Kunya-Urgench (2005), the ancient capital of the Khorezem region; and the Parthian Fortresses of Nisa (2007), the site of one of the earliest and most important cities of the Parthian Empire.

### Press

In 2008 there were two daily newspapers with a combined average circulation of 56,000. Approval is required from the president's office before publication. In the 2010 *World Press Freedom Index* compiled by Reporters Without Borders, Turkmenistan ranked 176th out of 178 countries.

### Tourism

In 2005 there were 12,000 non-resident tourists.

### Calendar

In Aug. 2002 President Saparmurad Niyazov renamed the days of the week and the months, for example with Jan. becoming 'Turkmenbashi' after the president's official name, meaning 'head of all the Turkmen'. April was renamed in honour of the president's mother. Tuesday was renamed 'Young Day' and Saturday 'Spiritual Day'. However, in April 2008 President Gurbanguly Berdimukhammedov reversed his predecessor's decisions.

## KEY HISTORICAL EVENTS

Formerly known as the Ellice Islands, Tuvalu is a group of nine islands in the western central Pacific. Joining the British controlled Gilbert Islands Protectorate in 1916, they became the Gilbert and Ellice Islands colony.

After the Japanese occupied the Gilbert Islands in 1942, US forces occupied the Ellice Islands. A referendum held in 1974 produced a large majority in favour of separation from the Gilbert Islands. In 1975 the Ellice Islands were renamed Tuvalu. Independence was achieved on 1 Oct. 1978. Early in 1979 the USA signed a treaty of friendship with Tuvalu and relinquished its claim to the four southern islands in return for the right to veto any other nation's request to use any of Tuvalu's islands for military purposes. In 2011 a state of emergency was declared on two occasions; the first in Jan. as a result of protests and the second in Oct. owing to a shortage of clean drinking water.

## TERRITORY AND POPULATION

Tuvalu lies between 5° 30' and 11° S. lat. and 176° and 180° E. long. and comprises Nanumea, Nanumaga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti (administrative centre; 2002 estimated population, 4,492), Nukulaelae and Niulakita. Population (census 2002) 9,561, excluding an estimated 1,500 who were working abroad, mainly in Nauru and Kiribati. Area approximately 26 sq. km (10 sq. miles). Density, 2002, 373 per sq. km.

In 2011, 50-9% of the population lived in urban areas. The population is of a Polynesian race.

The official languages are Tuvaluan and English.

## SOCIAL STATISTICS

2005 births (est.), 230; deaths (est.), 60. Infant mortality, 2010, 27 per 1,000 live births. Expectation of life, 2008: males, 64 years; females, 63. Annual population growth rate, 1998–2008, 0.5%; fertility rate, 2008, 3.2 births per woman.

## CLIMATE

A pleasant but monotonous climate with temperatures averaging 86°F (30°C), though trade winds from the east moderate conditions for much of the year. Rainfall ranges from 120" (3,000 mm) to over 160" (4,000 mm). Funafuti, Jan. 84°F (28.9°C), July 81°F (27.2°C). Annual rainfall 160" (4,003 mm). Although the

islands are north of the recognized hurricane belt they were badly hit by hurricanes in the 1990s, raising fears for the long-term future of Tuvalu as the sea level continues to rise.

## CONSTITUTION AND GOVERNMENT

The Head of State is the British sovereign, represented by an appointed Governor-General. The Constitution provides for a Prime Minister and the cabinet ministers to be elected from among the 15 members of the *Fale I Fono* (Parliament).

## National Anthem

'Tuvalu mote Atua' ('Tuvalu for the Almighty'); words and tune by A. Manoa.

## RECENT ELECTIONS

Elections were held on 16 Sept. 2010. Only non-partisans were elected as there are no political parties. On 21 Dec. 2010, after only three months in power, Maatia Toafa and his government were ousted following a motion of no confidence. Willy Telavi, minister of home affairs, was elected the new prime minister by parliament on 24 Dec., defeating Enele Sopoaga by eight votes to seven.

## CURRENT GOVERNMENT

*Governor-General:* Sir Iakoba Taewa Italeli (sworn in 16 April 2010).

In March 2013 the cabinet comprised:

*Prime Minister and Minister of Natural Resources:* Willy Telavi (took office on 24 Dec. 2010).

*Deputy Prime Minister and Minister of Transport, Communication and Public Utilities:* Kausea Natano.

*Minister of Education, Youth and Sports:* Falesa Pitoi. *Finance and Economic Development:* Lotoala Metia. *Foreign Affairs, Environment, Trade, Labour and Tourism:* Apisai Ielemia. *Health:* Taom Tanukale. *Home Affairs:* Pelenike Isaia.

*Speaker:* Kamuta Latasi.

## CURRENT LEADERS

### Willy Telavi

#### *Position*

Prime Minister

#### *Introduction*

Tuvalu's long-standing police commissioner, Willy Telavi, was first elected to parliament in 2006 and served as minister for home affairs. He was elected prime minister in Dec. 2010 following a vote of no confidence in the previous incumbent, Maatia Toafa.

#### *Early Life*

Willy Telavi was born on Nanumea, the north-westernmost of Tuvalu's nine islands. He completed a diploma in legal studies at the University of the South Pacific in 1999 and received a masters degree in international management from the University of the Northern Territory (now Charles Darwin University), Australia, in 2000.

Between 1993 and 2009 he served as Tuvalu's police commissioner and in 2006 he was elected to the 15-member parliament as one of two representatives of Nanumea. He was appointed minister of home affairs in the government of Apisai Ielemia, a position he retained following the general election of Sept. 2010 when Maatia Toafa became prime minister.

Toafa's premiership soon came under pressure amid widespread concerns that the government could no longer cover the full costs of medical treatment for patients needing to go abroad. When a motion of no confidence in Toafa was tabled in

Dec. 2010 Telavi, along with two other MPs, withdrew his support from the prime minister and joined the opposition, enabling the motion to be carried and parliament to be dissolved. Willy Telavi was elected premier on 24 Dec. 2010.

#### **Career in Office**

Telavi's administration came under pressure in early Jan. 2011 when protesters from the island of Nukufetau peacefully demanded the resignation of Lotoala Metia, the finance and economic development minister, after he allegedly snubbed a meeting with island elders. On 13 Jan., following a protest on the main island of Funafuti that was supported by five members of the opposition and appeared to be linked to a campaign for another change in government, Telavi declared a state of emergency—the first in the nation's history—and imposed a 14-day ban on public gatherings. Metia was placed under police guard and the country's naval patrol boat was deployed to guard the coastline near Telavi's home and those of other government ministers.

In Aug. 2012 Telavi agreed to stop letting ships owned by Iran operate under its national flag, having been accused by the USA of breaking international sanctions on Iranian oil trading.

#### **ECONOMY**

Finance, real estate, public administration, defence and services accounted for 50.5% of GDP in 2008; agriculture and fishing, 18.2%; trade, hotels and restaurants, 13.9%; transport and communications, 12.2%.

#### **Overview**

With few natural resources, the economy is dependent on foreign aid, the sale of tuna fishing licences and interest from the Tuvalu Trust Fund, established in 1987 by Australia, New Zealand and the UK. Revenues are also derived from the sale of the '.tv' internet suffix to a US-based company.

Government spending on administration, construction and social development has helped offset a decline in remittances. However, the volatility of fishing licence income and overruns in the government's scholarship and medical insurance programmes are a threat to financial stability.

#### **Currency**

The unit of currency is the Australian *dollar* although Tuvaluan coins up to \$A1 are in local circulation.

#### **Budget**

In 2008 revenues totalled \$A45.4m. and expenditures \$A42.9m.

#### **Performance**

The economy contracted by 1.7% in 2009 and 2.9% in 2010 but there was growth of 1.1% in 2011. In 2011 total GDP was US\$36m.

#### **Banking and Finance**

The Tuvalu National Bank was established at Funafuti in 1980, and is a joint venture between the Tuvalu government and Westpac International. There is also a development bank.

#### **ENERGY AND NATURAL RESOURCES**

##### **Electricity**

Installed capacity was an estimated 2,000 kW in 2007; production was 4m. kWh.

##### **Agriculture**

Coconut palms are the main crop. Production of coconuts (2009 estimate), 1,700 tonnes. Fruit and vegetables are grown for local consumption. Livestock, 2009 estimate: pigs, 13,600; chickens, 45,000.

##### **Fisheries**

Total catch, 2009, 5,097 tonnes. A seamount was discovered in Tuvaluan waters in 1991 and is a good location for deep-sea fish. The sale of fishing licences to American, Japanese, New Zealand, South Korean and Taiwanese fleets provides a significant source of

income, in some years contributing up to 50% of total government revenue.

#### **INDUSTRY**

Small amounts of copra, handicrafts and garments are produced.

#### **INTERNATIONAL TRADE**

##### **Imports and Exports**

Main sources of income are copra, stamps, handicrafts and remittances from Tuvaluans abroad. 2007 imports, \$A18.5m.; 2007 exports, \$A0.1m. Leading import suppliers are Australia, China and Japan. Significant export destinations are Australia, India and Indonesia.

#### **COMMUNICATIONS**

##### **Roads**

In 2002 there were 20 km of roads.

##### **Civil Aviation**

In 2010 Air Pacific operated two flights a week from Funafuti International to Suva in the Fiji Islands.

##### **Shipping**

Funafuti is the only port and a deep-water wharf was opened in 1980. In Jan. 2009 there were 96 ships of 300 GT or over registered, totalling 1.03m. GT. Of the 96 vessels registered, 40 were oil tankers, 36 general cargo ships, nine chemical tankers, five bulk carriers, four passenger ships and two container ships. Tuvalu is a 'flag of convenience' country.

##### **Telecommunications**

In 2008 there were approximately 1,500 main telephone lines in operation. There were some 2,000 mobile phone subscribers and 4,200 internet users in 2008.

#### **SOCIAL INSTITUTIONS**

##### **Justice**

There is a High Court presided over by the Chief Justice of the Fiji Islands. A Court of Appeal is constituted if required. There are also eight Island Courts with limited jurisdiction.

##### **Education**

There were 1,798 pupils at nine primary schools in 2001, and 558 pupils at Motufoua Secondary School in 2001. The Fetuvalu High School reopened in 2002 with Form 3 only. Education is free and compulsory from the ages of six to 15. There is a Maritime Training School at Funafuti, and the University of the South Pacific, based in the Fiji Islands, has an extension centre at Funafuti.

In 1999–2000 total expenditure on education came to 16.8% of total government expenditure.

##### **Health**

In 2002 there was one central hospital situated at Funafuti and clinics on each of the other eight islands; there were seven doctors and 34 nurses.

#### **RELIGION**

The majority of the population are Christians, mainly Protestant, but with small groups of Roman Catholics, Seventh Day Adventists, Jehovah's Witnesses and Bahais. There are some Muslims and Latter-day Saints (Mormons).

#### **CULTURE**

##### **Press**

The Government Broadcasting and Information Division produces *Tuvalu Echoes*, a fortnightly publication, and *Te Lama*, a monthly religious publication.

##### **Tourism**

There were 1,130 visitor arrivals in 2007.

## KEY HISTORICAL EVENTS

Bantu-speaking mixed farmers first migrated into southwest Uganda from the west around 500 BC. There is evidence that they smelted iron for tools and weapons. In the following centuries Nilotic-speaking pastoralists entered northern Uganda from the upper Nile valley (now southern Sudan). By AD 1300 several kingdoms (the Chwezi states) had been established in southern Uganda. In 1500 Nilotic-speaking Luo people invaded the Chwezi states and established the kingdoms of Buganda, Bunyoro and Ankole. At this time, northern Uganda became home to the Alur and Acholi ethnic groups. During the 17th century Bunyoro was southern Uganda's most powerful state, controlling an area that stretched into present-day Rwanda and Tanzania. From about 1700 the kingdom of Buganda expanded (largely at the expense of Bunyoro), and a century later it dominated a large territory bordering Lake Victoria from the Victoria Nile to the Kagera River. The *kabaka* (king) maintained a large court and a powerful army and traded in cattle, ivory and slaves.

Arab traders from Zanzibar on Africa's east coast reached Lake Victoria by 1844. A prominent trader, Ahmad bin Ibrahim, introduced the *kabaka* to foreign trade; imported cloth and firearms were exchanged for ivory and slaves. Ibrahim also introduced Islam to the region. In 1862 John Speke, a British explorer who was attempting to find the source of the Nile, became the first European to visit Buganda, by then a highly developed state supported by an army of more than 150,000 and a navy.

He met with Kabaka Mutesa I; as did Henry Stanley, who reached Buganda in 1875. Mutesa, fearful of attacks from Egypt, agreed to Stanley's proposal to allow Christian missionaries to

enter his realm. Members of the British Protestant Church Missionary Society arrived in 1877 and were followed two years later by representatives of the French Roman Catholic White Fathers. Both were successful in attracting converts but by the 1880s they were in fierce competition. Trade with the Indian Ocean ports continued, bringing with it greater Islamic influence.

Mutesa was succeeded by Mwanga in 1884. He was wary of the new foreign ideologies and attempted to halt their spread but was deposed by Christian and Muslim converts in 1888. He was later reinstated but with considerably reduced power and influence. In 1889 Mwanga was visited by Carl Peters, a German doctor, and the *kabaka* subsequently signed a treaty of friendship with Germany. Britain was concerned by the growth of German influence and the potential threat to its position on the Nile. In 1890 the two European powers signed a treaty giving Britain rights to what was to become Uganda and giving Germany control over land to the southeast (now Tanzania). Frederick Lugard, acting as an agent of the Imperial British East Africa Company (IBEAC), arrived in Buganda with a detachment of troops and in 1892 he backed Protestant converts in an attack on the French Catholic mission.

## British Rule

In 1894 Britain made Uganda a protectorate. Allying with the Protestant Baganda chiefs, the British set about conquering the rest of the country, assisted by Nubian mercenary troops, formerly in the service of the khedive of Egypt. The British deposed Mwanga and replaced him with his infant son Daudi Chwa. Bunyoro had been spared the religious civil wars of Buganda and was firmly united by its king, Kabarega. Following five years of conflict, the British occupied Bunyoro and conquered Acholi and the northern region. Other African chiefdoms, such as Ankole in the southwest, signed treaties with the British, as did the chiefdoms of Busoga. In 1900 an agreement was signed between the British administration under Sir Harry Johnston and Buganda, giving the kingdom considerable autonomy and transforming it into a constitutional monarchy controlled largely by Protestant chiefs. Half of Bunyoro's conquered territory was also awarded to Buganda, including the historic heartland of the kingdom containing several royal tombs. Buganda doubled in size from ten to 20 counties (*sazas*), but the 'lost counties' of Bunyoro remained a grievance.

## Economic Development

In 1901 a railway from Mombasa on the Indian Ocean reached Kisumu, on Lake Victoria, connected by boat with Uganda. The railway was later extended to Kampala. The railway had cost far more than was anticipated and the British, anxious for a return on their investment, turned to cotton to provide raw materials for British mills. Buganda, with its strategic location on the north shore of Lake Victoria, reaped the benefits of cotton growing; it soon became the major export crop and made the Buganda kingdom relatively prosperous. Coffee and sugar production accelerated in the 1920s. The country attracted few permanent European settlers and the cash crops were mostly produced by African smallholders, rather than the plantation system used in other colonies. Many South Asians were encouraged to settle in Uganda, where they played a leading role in the country's commerce. In 1921 a legislative council for the protectorate was established (although its first African member was admitted only in 1945).

The colonial government regulated the buying and processing of cash crops, setting prices and reserving the role of intermediary for Asians, who were thought to be more efficient. The British and Asians repelled African attempts to break into cotton ginning, leading to resentment among the Baganda. In addition, on the

Asian-owned sugar plantations established in the 1920s, labour for sugarcane and other cash crops was increasingly provided by migrants from the fringes of Uganda and beyond. In 1949 discontented Baganda rioted and burned down the houses of pro-government chiefs in Kampala. The rioters had three demands: the right to bypass government price controls on the sales of cotton, the removal of the Asian monopoly over cotton ginning, and the right to have their own representatives in local government. They were also critical of the young kabaka, Frederick Walugembe Mutesa II. The British governor, Sir John Hall, regarded the riots as the work of communist-inspired agitators such as the Uganda African Farmers Union (UAFU), founded by I. K. Musazi in 1947. The UAFU was banned and none of the requested reforms were implemented. Musazi's Uganda National Congress replaced the UAFU in 1952 but remained a discussion group rather than an organized political party.

Meanwhile, the British began to prepare for an independent Uganda. Britain's post-war withdrawal from India, nationalism in West Africa and a more liberal philosophy all had an effect. Sir Andrew Cohen was installed as governor in 1952 and pursued economic and political reforms: removing obstacles to African cotton ginning, encouraging co-operatives, establishing the Uganda Development Corporation and reorganizing the Legislative Council to include Africans elected from districts across the country for the first time. There was also talk of a future federation of east African territories (Kenya, Uganda and Tanganyika). However, there was resistance among the Baganda, who feared the erosion of their power-base. Mutesa II refused to co-operate with Cohen's plan for an integrated Buganda. Cohen deported him to exile in London, setting off a storm of protest. Two years later Mutesa II was reinstated, officially as a constitutional monarch, but in reality having considerable political clout. In 1960 a political organizer from Lango, Milton Obote, formed a new party, the Uganda People's Congress (UPC), as a coalition of all those who opposed Buganda dominance (apart from the Catholic-dominated Democratic Party (DP)).

### *Independence*

On 9 Oct. 1962 Uganda became independent, with Obote as prime minister and the kabaka as head of state. Buganda was given considerable autonomy. In 1963 Uganda became a republic and Mutesa II was elected president. The first years of independence were dominated by a struggle between the central government and Buganda. In 1966 Obote introduced a new constitution that ended Buganda's autonomy and restored the 'lost counties' to the Bunyoro. Obote then captured the kabaka's palace at Mengo and forced the kabaka to flee the country. In 1967 a new constitution was introduced giving the central government—especially the president—greater power and dividing Buganda into four districts. The traditional kingships were also abolished (in the case of Buganda retroactive to 1966). The 1960s saw a steady build-up of military power in Uganda, under Major Gen. Idi Amin Dada.

In Jan. 1971 Obote was deposed in a coup by Idi Amin. Amin was faced with opposition within the army by officers and troops loyal to Obote but by the end of 1971 he was in firm control. In 1972 he ordered Asians who were not citizens of Uganda to leave the country and within three months all 60,000 had left, most of them for Britain. Their expulsion hit the Ugandan economy hard. Amin's rule became increasingly dictatorial and brutal; it is estimated that over 300,000 Ugandans were killed during the 1970s. His corrupt administration led to divisions in the military and a number of coup attempts. Israel conducted a successful raid on the Entebbe airport in 1976 to rescue passengers on a plane hijacked by Palestinian terrorists. Amin's expulsion of Israeli technicians won him the support of Arab nations such as Libya.

In 1976 Amin declared himself president for life and two years later he invaded Tanzania in an attempt to annex the Kagera region. The following year Tanzania launched a successful

counter-invasion, unifying anti-Amin forces under the Uganda National Liberation Front (UNLF). Amin's forces were driven out and he fled to exile in Saudi Arabia. Tanzania left an occupation force in Uganda. Yusufu Lule was installed as president but was quickly replaced by Godfrey Binaisa, who was then overthrown in a military coup on 10 May 1980, headed by Paulo Muwanga. Shortly after the Muwanga 1980 coup, Obote made a triumphant return from Tanzania and rallied his former UPC supporters. His main opponents were the DP, led by Paul Kawanga Ssemogerere. The DP were announced as winners on 10 Dec. 1980 but Muwanga seized control of the Electoral Commission and announced a UPC victory 18 hours later, verified by the Commonwealth Observer Group.

In Feb. 1981, shortly after the new Obote government took office, with Paulo Muwanga as vice-president and minister of defence, a former Military Commission member, Yoweri Museveni, and his armed supporters declared themselves the National Resistance Army (NRA). Museveni vowed to overthrow Obote by means of a popular rebellion, and what became known as 'the war in the bush' began. Approximately 200,000 Ugandans sought refuge in neighbouring Rwanda, Zaïre and Sudan. In 1985 a military coup deposed Obote and Lieut.-Gen. Tito Okello became head of state. When it was not given a role in the new regime, the NRA continued its guerrilla campaign. It took Kampala in 1986 and Museveni became the new president. He concentrated on rebuilding the ruined economy by cutting back the army and civil service and reforming agriculture and industry. In 1993 Museveni permitted the restoration of traditional kings, including Ronald Muwenda Mutebi II as kabaka. In May 1996 Museveni was returned to office in the country's first direct presidential elections. A new parliament, chosen in elections in June, was dominated by Museveni supporters.

Museveni was re-elected in March 2001, following a period of relative stability and economic growth. However, his popularity was diminished by discontent with Uganda's intervention in the Democratic Republic of the Congo's (formerly Zaïre) civil war and signs of corruption in the government. Uganda's forces were largely withdrawn from the Democratic Republic of the Congo by the end of 2002. In 2005 the International Court in The Hague ordered Uganda to pay compensation to the DRC for its activities there between 1998 and 2003.

In Feb. 2006 Museveni won a new presidential term. In July 2006 peace talks commenced between the government and the Lord's Resistance Army (LRA), a fanatically religious group led by Joseph Kony that has terrorized northern Uganda for many years. A ceasefire was declared in Aug. 2006 but subsequent talks have been marred by disputes and walkouts.

### **TERRITORY AND POPULATION**

Uganda is bounded in the north by South Sudan, in the east by Kenya, in the south by Tanzania and Rwanda, and the west by the Democratic Republic of the Congo. Total area 241,550 sq. km, including 41,740 sq. km of inland waters.

The 2002 census population was 24,442,084 (11,929,803 males, 12,512,281 females). Estimate, 2011, 32,939,800; density, 164 per sq. km. The largest city is Kampala, the capital (population estimate of 1,659,600 in 2011). Other major towns are Gulu, Lira, Jinja, Mbale, Mbarara, Masaka and Entebbe. In 2011, 13.5% of the population lived in urban areas.

The UN gives a projected population for 2015 of 39.11m.

The country is administratively divided into one city and 111 districts, which are grouped in four geographical regions (which do not have administrative status). Area and population of the regions in 2002 (census) and 2011 (estimate):

| Region         | Area in<br>sq. km | 2002 population<br>in 1,000 | 2011 population<br>in 1,000 |
|----------------|-------------------|-----------------------------|-----------------------------|
| Central Region | 61,510            | 6,575.4                     | 8,465.5                     |
| Eastern Region | 39,953            | 6,204.9                     | 8,623.7                     |

| Region          | Area in sq. km | 2002 population in 1,000 | 2011 population in 1,000 |
|-----------------|----------------|--------------------------|--------------------------|
| Northern Region | 84,658         | 5,363.7                  | 7,620.6                  |
| Western Region  | 54,917         | 6,298.1                  | 8,230.0                  |

The official languages are English and (since 2005) Kiswahili. About 70% of the population speak Bantu languages; Nilotic languages are spoken in the north and east.

## SOCIAL STATISTICS

2008 estimates: births, 1,461,000; deaths, 401,000. Rates, 2008 estimates (per 1,000 population): births, 46.2; deaths, 12.7. Uganda has one of the youngest populations of any country, with 76% of the population under the age of 30 and 48% under 15. Uganda's life expectancy at birth in 2007 was 51.4 years for males and 52.4 years for females. Life expectancy declined dramatically until the late 1990s, largely owing to the huge number of people in the country with HIV. However, for both males and females expectation of life is now starting to rise again. Annual population growth rate, 2000–08, 3.2%. Infant mortality, 2010, 63 per 1,000 live births; fertility rate, 2008, 6.3 births per woman.

## CLIMATE

Although in equatorial latitudes, the climate is more tropical because of its elevation, and is characterized by two distinct rainy seasons, March–May and Sept.–Nov. In comparison, June–Aug. and Dec.–Feb. are relatively dry. Temperatures vary little over the year. Kampala, Jan. 74°F (23.3°C), July 70°F (21.1°C). Annual rainfall 46.5" (1,180 mm). Entebbe, Jan. 72°F (22.2°C), July 69°F (20.6°C). Annual rainfall 63.9" (1,624 mm).

## CONSTITUTION AND GOVERNMENT

The *President* is head of state and head of government, and is elected for a five-year term by adult suffrage. In Aug. 2005 Parliament amended the constitution to allow an incumbent to hold office for more than two terms, thus enabling President Museveni to serve another term in office. Having lapsed in 1966, the kabakaship was revived as a ceremonial office in 1993. Ronald Muwenda Mutebi (b. 13 April 1955) was crowned Mutebi II, 36th Kabaka, on 31 July 1993.

Until 1994 the national legislature was the 278-member National Resistance Council, but this was replaced by a 284-member *Constituent Assembly* in March 1994. A new constitution was adopted on 8 Oct. 1995 and the Constituent Assembly dissolved. Uganda's parliament is now the 386-member *National Assembly* (238 members elected by popular vote, 137 indirectly elected from special interest groups—including women and the army—and 11 *ex officio* members). A referendum on the return of multi-party democracy was held on 29 June 2000, but 88% of voters supported President Museveni's 'no-party' Movement system of government. Turnout was 51%. In Feb. 2003 President Museveni pledged to lift the ban on political parties. In a referendum held on 28 July 2005, 92.4% of voters backed the restoration of a multi-party political system, although the opposition called for a boycott.

## National Anthem

'Oh, Uganda, may God uphold thee'; words and tune by G. W. Kakoma.

## RECENT ELECTIONS

Presidential elections were held on 18 Feb. 2011. President Museveni was re-elected by 68.4% of votes cast, with his main rival, Kizza Besigye, receiving 26.0% of the vote. There were six other candidates. Turnout was 59.3%.

Parliamentary elections were held on the same day. The National Resistance Movement won 279 seats, the Forum for Democratic Change 34, the Democratic Party 11, Uganda People's Congress 9 and the Conservative Party and the Justice Forum

both gained one seat each. 37 seats went to independents. Turnout was 59.3%.

## CURRENT GOVERNMENT

## CURRENT LEADERS

### Yoweri Museveni

*Position*  
President

### Introduction

Yoweri Museveni became president of Uganda in 1986 and has been largely credited with transforming the country's economy after the years of misrule by Idi Amin Dada and Milton Obote. He won the first direct presidential elections in 1996 and was re-elected in 2001. In July 2005 a national referendum approved the lifting of restrictions on multi-party politics (in force since Museveni came to power) and the National Assembly abolished a constitutional limit on presidential terms. He won further terms in Feb. 2006 and Feb. 2011. His government has been in faltering talks with the Lord's Resistance Army (LRA) since 2006 in an attempt to end the long-standing conflict with the rebel group.

### Early Life

Yoweri Kaguta Museveni was born in 1944 in Ankole, western Uganda, where he attended Mbarara High School and Ntare School. He studied economics and political science at the University of Dar es Salaam, Tanzania, graduating in 1970. While at university Museveni was politically active and became the chairman of a leftist student group linked to African liberation movements. In 1971 Idi Amin Dada came to power in Uganda and Museveni went back to Tanzania. He was a founder of the Front for National Salvation, one of the rebel groups that overthrew Amin in 1979. Museveni held various ministerial posts before running for president in 1980. Defeated by Milton Obote, he formed the National Resistance Army, which took power on 26

Jan. 1986 when Museveni declared himself president and minister of defence. His movement was supported by Col. Gaddafi of Libya.

### *Career in Office*

For much of his presidency, Museveni has been favoured by Western nations and foreign aid donors for opening up the Ugandan economy and reducing poverty. Primary school education has increased markedly and, thanks to anti-AIDS campaigns, he has succeeded in reducing HIV levels. However, Museveni's image has been tarnished internationally by Ugandan military interference in neighbouring Democratic Republic of the Congo and by human rights concerns.

After coming to power, Museveni claimed that political parties divided poor countries like Uganda into ethnic, religious and tribal groups. His preferred system therefore had individuals competing for political office on individual merit. However, after 2001 calls for a return to multi-party democracy in Uganda became more persistent, and this was approved in a national referendum in July 2005, although the turnout was low. Museveni's government nevertheless supported the restoration. Parliament meanwhile voted to lift the constitutional limit on the office of president. Museveni stood for re-election in Feb. 2006 and won a further term with almost 60% of the vote.

In Oct. 2005 Kizza Besigye—Museveni's main opposition rival in the 2001 presidential poll which had been tainted by violence—returned to Uganda from exile in South Africa to contest the 2006 elections. His subsequent arrest for treason provoked violent street protests before his release on bail in Jan. 2006. Meanwhile, concern over alleged human rights abuses by Museveni's government led the UK and other European countries to suspend direct development aid in Dec. 2005. Britain later agreed to resume aid in Nov. 2007 at the biennial Commonwealth Heads of Government conference hosted by Museveni in Kampala.

In July 2006 the government opened peace talks with the rebel LRA, which has conducted an insurgency in northern Uganda since the 1980s involving atrocities against the local population. A truce was signed in Aug., but subsequent political progress was limited amid reported divisions within the LRA itself. In early 2008 the LRA announced that its leader, Joseph Kony, was ready to sign a peace agreement. Optimism proved unfounded, however, leading to a new offensive in Dec. against the rebels by troops from Uganda, Sudan and the Democratic Republic of the Congo. In Jan. 2009 the LRA called for a new ceasefire and in March Ugandan troops ended their offensive. Museveni's government claimed that the campaign had seriously hampered LRA capabilities and also rescued many kidnap victims. The LRA has nevertheless remained a destabilizing force in the region.

Following the announcement in Jan. 2009 of a significant oil discovery in Uganda by a British exploration company, Museveni said that the income from the oil, if well invested, could transform the country's economy and development. Subsequent allegations of bribery in the award of oil contracts led parliament to suspend new oil deals in Oct. 2011 and Museveni to publicly reject claims that government ministers were engaged in corrupt practices. At the same time, however, Sam Kutesa resigned as foreign minister ahead of an investigation (although he was reinstated in Aug. 2012).

In Sept. 2009 there were riots in Kampala by supporters of Ronald Mutebi, the king of Buganda (one of five ancient kingdoms that had been restored by Museveni) and leader of Uganda's largest ethnic group. Tensions between Museveni's government and Buganda grew when parliament passed new land legislation that the king had opposed because it eroded his ownership rights.

In Dec. 2009 the National Resistance Movement endorsed Museveni as its candidate for the presidential election in Feb. 2011. He secured a further term, taking 68% of the vote, but Kizza Besigye, his main challenger again, rejected the result amid claims

of vote-rigging. In April and May Besigye organized opposition protests in Kampala, partly in reaction to rising food and fuel prices, but they were met with a heavy-handed response by security forces and Besigye himself was attacked and injured.

In late 2012 there were further allegations from the United Nations of Ugandan support for rebel forces opposed to the Kabila regime in the Democratic Republic of the Congo. In Nov. Museveni's government responded by declaring that Ugandan troops would be withdrawn from UN-sponsored peacekeeping missions.

## **DEFENCE**

Defence expenditure in 2008 totalled US\$277m. (US\$9 per capita), representing 1.7% of GDP.

### **Army**

The Uganda People's Defence Forces had a strength estimated at 45,000 in 2007. There is a Border Defence Unit about 600-strong and local defence units estimated at 10,000.

### **Navy**

There is a Marine unit of the police (about 400-strong in 2007).

### **Air Force**

In 2007 the Army's aviation wing operated 14 combat-capable aircraft (although the serviceability of some was in doubt) and one attack helicopter. There was also a police air wing around 800-strong.

## **INTERNATIONAL RELATIONS**

In Nov. 1999 Uganda, Tanzania and Kenya created a new East African Community to develop East African trade, tourism and industry and to lay the foundations for a future common market and political federation.

## **ECONOMY**

In 2006 agriculture accounted for 31.1% of GDP, industry 18.1% and services 50.7%.

### **Overview**

After the economic turmoil under Idi Amin in the 1970s, Uganda has become a relatively stable and prosperous economy. GDP growth rose from an average of 7% per year in the 1990s to over 8% in the seven years up to 2007–08. Growth remained robust throughout the global financial crisis. The main export commodities are coffee, and fish and fish products. Recent trends have shown a shift away from agriculture towards industry and services.

A Poverty Eradication Action Plan (PEAP) was launched in 1997, aimed at reducing the number of people in poverty to less than 10% of the population by 2017. While the long-term growth rate falls short of this target, poverty fell from 44% of the population in 1997 to 31.5% in 2006. In April 2010 President Museveni unveiled the successor to PEAP, a five-year National Development Plan to turn Uganda into a middle-income economy. Strategies include improvements in the transport infrastructure, increased employment opportunities and nurturing the private sector, while reducing the proportion below the poverty line to 25%.

### **Currency**

The monetary unit is the *Uganda shilling* (UGX) notionally divided into 100 *cents*. In 1987 the currency was devalued by 77% and a new 'heavy' shilling was introduced worth 100 old shillings. Inflation was 13.1% in 2009, falling to 4.0% in 2010. It increased to 18.0% in 2011, the highest rate since 1993. Foreign exchange reserves in June 2005 were US\$1,326m. Total money supply in July 2005 was Shs 1,513.0bn.

## Budget

The financial year runs from 1 July–30 June. Revenues for 2006–07 were Shs 3,574bn. and expenditures Shs 4,032bn. Tax revenue accounted for 63.3% of revenues in 2006–07; current expenditure accounted for 60.6% of expenditures.

VAT is 18%.

## Performance

Real GDP growth was 7.0% in 2009, 6.1% in 2010 and 5.1% in 2011. In recent times Uganda has consistently been among Africa's best performers. In spite of growth rates that averaged 6.4% over ten years to 1998, per capita income is only just around the level of 1971, when Gen. Idi Amin came to power. Uganda's total GDP in 2011 was US\$16.8bn.

## Banking and Finance

The Bank of Uganda (*Governor*, Emmanuel Tumusiime Mutebile) was established in 1966 and is the central bank and bank of issue. In addition there are five foreign, six commercial and two development banks. There is also the state-owned Uganda Development Bank, which is scheduled for eventual privatization.

External debt totalled US\$2,994m. in 2010, representing 17.9% of GNI.

In 2010 foreign direct investment totalled US\$848m.

## ENERGY AND NATURAL RESOURCES

### Environment

Uganda's carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 0.1 tonnes per capita in 2008.

### Electricity

Installed capacity in 2007 was approximately 0.4m. kW, about 75% of which was provided by the Owen Falls Extension Project (a hydro-electric scheme). Production (2007) 2.0bn. kWh. Per capita consumption (2007) 67 kWh. Only 10% of the population has access to electricity.

### Oil and Gas

Oil was first discovered in Uganda in 2006. There was a further major find in 2009, which may represent the largest onshore discovery in sub-Saharan Africa. Reserves have been estimated at 2.5bn. bbls. Production was expected to begin in 2012 but it is now not forecast to start until 2017.

### Minerals

In Nov. 1997 extraction started on the first of an estimated US\$400m. worth of cobalt from pyrites. Tungsten and tin concentrates are also mined. There are also significant quantities of clay and gypsum.

### Agriculture

80% of the workforce is involved with agriculture. In 2007 the agricultural area included an estimated 5.5m. ha. of arable land and about 2.2m. ha. of permanent crops. Agriculture is one of the priority areas for increased production, with many projects funded both locally and externally. It contributes 90% of exports. Production (2003 estimates) in 1,000 tonnes: cassava, 13,500; plantains, 10,000; sweet potatoes, 2,600; sugarcane, 1,600; maize, 1,200; bananas, 615; millet, 584; potatoes, 546; dry beans, 535; sorghum, 395; coffee, 186. Coffee is the mainstay of the economy, accounting for more than 50% of the annual commodity export revenue. Uganda is the world's leading producer of plantains.

Livestock (2003 estimates): goats, 6.9m.; cattle, 6.1m.; pigs, 1.7m.; sheep, 1.2m.; chickens, 33m. Livestock products, 2003 estimates (in 1,000 tonnes): milk, 700; meat, 293.

### Forestry

In 2010 the area under forests was 2.99m. ha., or 15% of the total land area. Exploitable forests consist almost entirely of hardwoods. Timber production in 2007 totalled 41.08m. cu.

metres. Uganda has great potential for timber-processing for export, manufacture of high-quality furniture and wood products, and various packaging materials.

## Fisheries

In 2010 fish landings totalled 413,805 tonnes, entirely from inland waters. Fish farming (especially catfish and tilapia) is a fast-growing industry, with production having increased from 5,539 tonnes in 2004 to 76,654 tonnes in 2009. Exports of fishery commodities, valued at US\$109m. in 2009, are now one of Uganda's leading foreign currency earners.

## INDUSTRY

Production (in 1,000 tonnes): cement (2001), 416; sugar (2002), 160; soap (2002), 92; beer (2002), 98.9m. litres. In 2001 industry accounted for 20.9% of GDP, with manufacturing contributing 9.8%. Industrial production grew by 5.4% in 2001.

## Labour

The labour force in 2002–03 totalled 9,772,600 (47% males). In 2002–03 the unemployment rate was 3.2%.

## INTERNATIONAL TRADE

### Imports and Exports

In 2010 imports (c.i.f.) amounted to US\$4,664.3m. (US\$4,247.4m. in 2009); exports (f.o.b.) US\$1,618.6m. (US\$1,567.6m. in 2009). Coffee, fish and fish products are the principal exports. Major imports are machinery and transport equipment, and food, beverages and tobacco products. The main import suppliers in 2006 were Kenya (15.7%), UAE (12.7%) and India (8.2%). In 2006 the main export markets were UAE (19.4%), Sudan (9.5%) and Kenya (9.1%).

## COMMUNICATIONS

### Roads

In 2003 there were 70,746 km of roads, of which 23% were paved. There were 81,300 passenger cars in use in 2007, 79,300 lorries and vans, 40,500 buses and coaches, and 176,500 motorcycles and mopeds. In 2007 there were 17,428 road accidents resulting in 2,779 deaths.

In 2007 the government established the Uganda Road Fund, a body responsible for financing road maintenance. The estimated budget in 2007–08 totalled US\$111.35m.

### Rail

In 2005 the Uganda Railways network totalled 1,241 km (metre gauge). In 1996 passenger services were suspended and have not been reinstated in the meantime. Freight tonne-km in 2003 came to 213m.

### Civil Aviation

There is an international airport at Entebbe, 40 km from Kampala. Air Uganda, formed in 2007, is the national airline. In 2003 scheduled airline traffic of Uganda-based carriers flew 2m. km, carrying 40,000 passengers (all on international flights). In 2001 Entebbe handled 370,063 passengers (343,722 on international flights) and 37,195 tonnes of freight.

### Telecommunications

In 2008 there were 168,500 main (fixed) telephone lines; mobile phone subscribers numbered 8,554,900 in 2008 (27.0 per 100 persons). There were 2.5m. internet users in 2008. In June 2012 there were 415,000 Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The Supreme Court of Uganda, presided over by the Chief Justice, is the highest court. There is a Court of Appeal and a High Court below that. Subordinate courts, presided over by Chief Magistrates and Magistrates of the first, second and third grade, are

established in all areas: jurisdiction varies with the grade of Magistrate. Chief and first-grade Magistrates are professionally qualified; second- and third-grade Magistrates are trained to diploma level at the Law Development Centre, Kampala. Chief Magistrates exercise supervision over and hear appeals from second- and third-grade courts, and village courts.

The population in penal institutions in April 2007 was 26,273 (88 per 100,000 of national population). The death penalty is still in force. There were two executions in 2006 but none since.

#### Education

In 2007 there were 7,537,971 pupils and 132,325 teaching staff at primary schools. In 1995, 93.9% of primary schools were government-aided and 6.1% private. There were 1,000,580 students and 54,267 teaching staff at secondary schools in 2007. In 1995 there were 13,174 students in 94 primary teacher training colleges; 13,360 students in 24 technical institutes and colleges; 22,703 students in ten national teachers' colleges; 1,628 students in five colleges of commerce; 504 students in the Uganda Polytechnic, Kyambogo; 800 students in the National College of Business Studies, Nakawa. In 1995–96 there was one university and one university of science and technology in the public sector, and one Christian, one Roman Catholic and one Islamic university in the private sector. In 2008–09 there were 124,000 students in tertiary education and 4,000 academic staff. The adult literacy rate was 71.4% in 2006 (81.4% among males and 62.1% among females).

School attendance has trebled since Yoweri Museveni became president in 1986. In 1997 free primary education was introduced, initially for four children in every family but from 2003 for all children. In 2008–09 public expenditure on education came to 3.2% of GDP and 15.0% of total government spending.

#### Health

In 2001 there were 946 health centres (189 private) and 104 hospitals (49 private). In 2002 there were 1,175 physicians, 75 dentists, 1,350 nurses and 850 midwives. Uganda has been one of the most successful African countries in the fight against AIDS. A climate of free debate, with President Museveni recognizing the threat as early as 1986 and making every government department take the problem seriously, resulted in HIV prevalence among adults declining from approximately 30% in 1992 to 11% in 2000.

#### RELIGION

In 2001 there were 10.05m. Roman Catholics, 9.45m. Anglicans and 1.25m. Muslims. In Feb. 2013 there was one Roman Catholic cardinal. Traditional beliefs are also widespread.

#### CULTURE

##### World Heritage Sites

Uganda has three sites on the UNESCO World Heritage List: Bwindi Impenetrable National Park (inscribed on the list in 1994); Rwenzori Mountains National Park (1994); and the Tombs of the Buganda Kings at Kasubi (2001).

##### Press

There were five daily newspapers in 2008 with a combined average daily circulation of 110,000.

##### Tourism

In 2005 there were 468,000 non-resident tourists; spending by tourists totalled US\$357m.

##### Festivals

The main festivals are for Islamic holidays (March and June), Martyrs' Day (3 June), Heroes' Day (9 June) and Independence Day (9 Oct.).

### KEY HISTORICAL EVENTS

Kyiv (formerly Kiev) was the centre of the Rus principality in the 11th and 12th centuries and is still known as the Mother of Russian cities. The western Ukraine principality of Galicia was annexed by Poland in the 14th century. At about the same time, Kyiv and the Ukrainian principality of Volhynia were conquered by Lithuania before being absorbed by Poland. Poland, however, could not subjugate the Ukrainian cossacks, who allied themselves with Russia. Ukraine, except for Galicia (part of the Austrian Empire, 1772–1919), was incorporated into the Russian Empire after the second partition of Poland in 1793.

In 1917, following the Bolshevik revolution, the Ukrainians in Russia established an independent republic. Austrian Ukraine proclaimed itself a republic in 1918 and was federated with its Russian counterpart. The Allies ignored Ukrainian claims to Galicia, however, and in 1918 awarded that area to Poland. From 1922 to 1932, drastic efforts were made by the USSR to suppress Ukrainian nationalism. Ukraine suffered from the forced collectivization of agriculture and the expropriation of foodstuffs; the result was the famine of 1932–33 when more than 7m. people died. Following the Soviet seizure of eastern Poland in Sept. 1939, Polish Galicia was incorporated into the Ukrainian SSR. When the Germans invaded Ukraine in 1941 hopes that an autonomous or independent Ukrainian republic would be set up under German protection were disappointed. Ukraine was retaken by the USSR in 1944. The Crimean region was joined to Ukraine in 1954.

On 5 Dec. 1991 the Supreme Soviet declared Ukraine's independence. Ukraine was one of the founder members of the Commonwealth of Independent States in Dec. 1991. After

independence Crimea, which was part of Russia until 1954, became a source of contention between Moscow and Kyiv. The Russian Supreme Soviet laid claim to the Crimean port city of Sevastopol, the home port of the 350-ship Black Sea Fleet, despite an agreement to divide the fleet. There was also conflict between Ukraine and Russia over possession and transfer of nuclear weapons, delivery of Russian fuel to Ukraine and military and political integration within the CIS. Leonid Kuchma was elected president in 1994 and re-elected in 1999. Support for him fell after public demonstrations against maladministration including the accusation that he was responsible for the murder of a radical journalist. Conflicts between the presidential administration and government led to the sacking of reform-minded prime minister Viktor Yushchenko in April 2001, who was replaced by Kuchma loyalist Anatolii Kinakh at the end of May.

The Pope's historic visit to Ukraine in June 2001 was accompanied by disturbances, particularly in the capital. Presidential elections in Oct. and Nov. 2004 were won by Kuchma's chosen successor, Viktor Yanukovich, who defeated Viktor Yushchenko in the second round run-off. But observers claimed the election failed to meet democratic standards and in Kyiv widespread protests came to be known as the 'Orange Revolution'. After the poll was declared invalid Yushchenko was elected president in a repeat of the run-off. However, infighting between the leaders of the revolution led to growing popular discontent. In Feb. 2010 Yanukovich was elected president, defeating Yuliya Tymoshenko, a figurehead of the 2004 protests.

### TERRITORY AND POPULATION

Ukraine is bounded in the east by the Russian Federation, north by Belarus, west by Poland, Slovakia, Hungary, Romania and Moldova, and south by the Black Sea and Sea of Azov. Area, 603,628 sq. km (233,062 sq. miles). In 2001 the census population was 48,457,102, of whom 26,015,758 were female; Jan. 2012 estimate, 45,633,637, giving a density of 76 per sq. km. In 2001, 78% of the population were Ukrainians, 17% Russians and 5% others—Belarusians, Moldovans, Hungarians, Bulgarians, Poles and Crimean Tatars (most of the Tatars were forcibly transported to Central Asia in 1944 for anti-Soviet activities during the Second World War). Ukraine's population is projected to drop to 41-62m. by 2025, a reduction of 8% in 15 years. In 2011, 69-1% of the population lived in urban areas.

The UN gives a projected population for 2015 of 44-22m.

Ukraine is divided into 24 provinces, two municipalities (Kyiv and Simferopol) and the Autonomous Republic of Crimea. Area and estimated population in Jan. 2012:

The 1996 constitution made Ukrainian the sole official language. Russian (the language of 33% of the population), Romanian, Polish and Hungarian are also spoken. Additionally, the 1996 constitution abolished dual citizenship, previously available if there was a treaty with the other country (there was no such treaty with Russia). Anyone resident in Ukraine since 1991 may be naturalized.

### SOCIAL STATISTICS

2009 births, 512,525; deaths, 706,739; marriages, 318,198; divorces, 145,439. Rates (per 1,000 population), 2009: births, 11.1; deaths, 15.3. Annual population growth rate, 2000–05, –0.9%. Life expectancy, 2007: males, 62.7 years, females, 73.8. In 2006 the most popular age range for marrying was 20–24 for both males and females. Infant mortality, 2010, 11 per 1,000 live births; fertility rate, 2008, 1.3 births per woman (one of the lowest rates of any country).

### CLIMATE

Temperate continental with a subtropical Mediterranean climate prevalent on the southern portions of the Crimean Peninsula. The average monthly temperature in winter ranges from 17.6°F to 35.6°F (–8°C to 2°C), while summer temperatures average 62.6°F to 77°F (17°C to 25°C). The Black Sea coast is subject to freezing, and no Ukrainian port is permanently ice-free. Precipitation generally decreases from north to south; it is greatest in the Carpathians where it exceeds more than 58.5" (1,500 mm) per year, and least in the coastal lowlands of the Black Sea where it averages less than 11.7" (300 mm) per year.

### CONSTITUTION AND GOVERNMENT

In a referendum on 1 Dec. 1991, 90.3% of votes cast were in favour of independence. Turnout was 83.7%.

A new constitution was adopted on 28 June 1996. It defines Ukraine as a sovereign, democratic, unitary state governed by the rule of law and guaranteeing civil rights. The head of state is the *President*, elected directly by the people for a five-year term. An amendment to the constitution that came into effect on 1 Jan. 2006 gives increased powers to parliament, including the right to appoint and dismiss the prime minister. However, after

parliament dismissed the prime minister and the cabinet on 10 Jan. 2006 President Yushchenko stated that only the new parliament that was to be elected in March 2006 would have such powers.

Parliament is the 450-member unicameral *Verkhovna Rada* (*Supreme Council*), elected for four-year terms. Prior to the March 2006 election half of the members were chosen from party lists by proportional vote and half from individual constituencies, but in accordance with a constitutional amendment for the 2006 election all 450 members were chosen from party lists. The same method applied for the elections in 2007 but for the 2012 election it was decided to revert to the pre-2006 mixed voting system.

There is an 18-member *Constitutional Court*, six members being appointed by the President, six by parliament and six by a panel of judges. Constitutional amendments may be initiated at the President's request to parliament, or by at least one-third of parliamentary deputies. The Communist Party was officially banned in the country in 1991, but was renamed the Socialist Party of Ukraine. Hard-line Communists protested against the ban, which was rescinded by the Supreme Council in May 1993.

### National Anthem

'She'che ne vmerla, Ukraïna i slava, i volya' ('Ukraine's freedom and glory has not yet perished'); words by P. Chubynsky, tune by M. Verbytsky.

### RECENT ELECTIONS

Presidential elections were held in two rounds on 17 Jan. and 7 Feb. 2010. In the first round Viktor Yanukovych won 35.3% of the vote against 25.1% for prime minister Yuliya Tymoshenko, 13.1% for Sergei Tigipko, 7.0% for Arseniy Yatsenyuk and 5.5% for incumbent President Viktor Yushchenko. There were 13 other candidates. Turnout was 66.8%. Yanukovych won the second round with 49.0% against 45.5% for Tymoshenko. However, the results were suspended after Tymoshenko accused Yanukovych of electoral fraud prompting an inquiry. She withdrew her appeal on 20 Feb. but did not attend Yanukovych's inauguration on 25 Feb. and refused to recognize his position. On 3 March, Tymoshenko's government lost a parliamentary vote of confidence and she was ousted as prime minister.

In parliamentary elections held on 28 Oct. 2012 the Party of Regions of President Viktor Yanukovych won 187 seats with 30.0% of the vote under the proportional party-list system, the All-Ukrainian Union 'Fatherland' of Yuliya Tymoshenko 102 seats (with 25.5%), the Ukrainian Democratic Alliance for Reform of WBC boxing world heavyweight champion Vitali Klitschko 40

(14.0%), the far-right Svoboda 38 (10.4%) and the Communist Party of Ukraine 32 (13.2%). Four other parties gained three seats or fewer and 44 went to independents. Turnout was 58.0%.

## CURRENT LEADERS

### Viktor Yanukovich

#### *Position*

President

#### *Introduction*

Having served as prime minister under President Kuchma from 2002–05, Viktor Yanukovich was briefly declared president after the bitterly contested 2004 election. When the result was annulled he lost the re-run and resigned as prime minister. In March 2006 his Party of Regions won the largest number of seats in parliament and in Aug. 2006 he became prime minister in a coalition government. His power base is in eastern Ukraine, where he has strong links with industrialists, and he favours close ties between Ukraine and Russia. On 18 Dec. 2007 Yanukovich was formally dismissed by parliament. In 2010 he fought a bitterly contested presidential election against Yuliya Tymoshenko, narrowly defeating her in the second round of voting. Tymoshenko contested the results, claiming electoral misconduct, but Yanukovich was sworn in as president on 25 Feb.

#### *Early Life*

Viktor Yanukovich was born on 9 July 1950 in Yenakiyev, Donetsk Oblast, in Russian-speaking eastern Ukraine. His mother, an ethnic Ukrainian nurse, died when he was two, and his father, an ethnic Belarusian train driver, died when he was in his teens, leaving him in the care of his grandmother. He served a prison sentence in 1967 for robbery and another in 1970 for bodily injury, although he claims to have been later cleared of both crimes. In 1972 he began working in the Donetsk coal industry and completed his education, graduating in mechanical engineering from Donetsk Polytechnic Institute, in 1980. He joined the Communist Party and rose rapidly as a manager in Donetsk regional transport.

He entered politics in Aug. 1996 as deputy head of Donetsk Oblast administration and was appointed head in May 1997. From May 1999–May 2001 he was head of the Donetsk Oblast regional council and became closely associated with a group of business and political figures known as the ‘Clan of Donetsk’, led by the coal and steel oligarch Rinat Akhmetov. His lobbying for them brought him strong political and financial support but also

fuelled rumours of links to organized crime. In Nov. 2002 he was appointed prime minister by President Leonid Kuchma.

Yanukovich oversaw the continuing liberalization of the economy, cutting higher rates of income tax and encouraging land privatization. He often favoured the interests of Ukrainian industrialists over international investors, helping to power the domestic economy but leading to allegations of corruption. He maintained strong links with Russia and spoke against Ukraine joining the European Union and NATO. In 2003 his government signed an agreement to take Ukraine into a free trade zone and customs alliance with Russia, Belarus and Kazakhstan, although negotiations subsequently stalled. Kuchma chose not to fight the 2004 presidential election and Yanukovich stood as his successor, openly supported by Russia’s President Putin.

Yanukovich lost the first round to Viktor Yushchenko of the pro-west, liberal Our Ukraine party but won the second round on 21 Nov. 2004. The result was challenged and Yushchenko’s supporters staged huge street protests dubbed the ‘Orange Revolution’. The Supreme Court annulled the result and a re-run of the second round saw Yushchenko triumph. Following a parliamentary vote of no confidence in his government, Yanukovich resigned as prime minister in Jan. 2005.

Yanukovich spent 2005 building on his grassroots support in eastern Ukraine. He profited from disillusionment with Yushchenko’s government, which was divided and indecisive. Yanukovich’s Party of Regions emerged as the largest party at the March 2006 parliamentary elections with 186 seats out of 450, ahead of the Tymoshenko Bloc and Our Ukraine. However, with no overall parliamentary majority, months of wrangling over a new government ensued before Yushchenko was forced to nominate Yanukovich as prime minister in Aug. 2006. Yanukovich agreed a coalition deal with Yushchenko’s party, but the working relationship was uneasy from the outset. In Dec. 2007, following further elections in Sept., he was replaced by Tymoshenko as prime minister of a new coalition between her supporters and Yushchenko’s Our Ukraine.

#### *Career in Office*

Yanukovich regained the presidency in Feb. 2010 after comprehensively defeating Yushchenko in the first round of elections and then prime minister Tymoshenko in the second, winning by a 3.5% margin. Tymoshenko accused him of vote-rigging and mounted a legal challenge against the results. However, she subsequently dropped her action stating that she would not receive a fair hearing. She and her party nevertheless refused to recognize Yanukovich’s election and boycotted the inauguration ceremony. In March Yanukovich appointed a longstanding ally, Mykola Azarov, to succeed Tymoshenko as prime minister. The following month parliament agreed to extend the lease of the Russian Black Sea naval base in Crimea for 25 years in exchange for accords on cheaper gas supplies and in June voted to abandon Ukraine’s NATO membership aspirations.

In Oct. 2010 Yanukovich forced through constitutional changes overturning limits on presidential power that had been introduced in 2004. At the end of the year Tymoshenko and former interior minister Yuriy Lutsenko were charged with abuse of state funds while in office. Both rejected the accusation as a politically motivated manoeuvre by the Yanukovich government, but in Oct. 2011 Tymoshenko was found guilty and jailed for seven years. Her conviction prompted international condemnation, particularly from the European Union whose high representative for foreign policy warned of ‘profound implications’ for EU–Ukraine relations, including for Ukraine’s hope of concluding a trade and association agreement.

In Oct. 2012 the Party of Regions retained power after a decisive win in parliamentary elections, although international monitors criticized the conduct of the poll. In Dec. Yanukovich appointed a reconstituted but largely unchanged government under Prime Minister Azarov.

## Mykola Azarov

### Position

Prime Minister

### Introduction

Mykola Azarov was appointed prime minister on 11 March 2010. A close ally of President Viktor Yanukovich, his predecessor as leader of the Party of Regions, Azarov is regarded as a technocrat. Ethnically Russian, he is a veteran of the country's turbulent political system, having previously served as deputy prime minister, foreign minister and, on two occasions, acting prime minister.

### Early Life

Mykola Azarov was born on 17 Dec. 1947 in the town of Kaluga, in what is now Russia. He studied geology at Moscow State University before working at a coal mine in the Russian city of Tula. In 1984 he moved to Donetsk to serve first as deputy director and later as director of the Ukrainian State Geological Institute. He became a member of Ukraine's parliament in 1994 and two years later was appointed head of the state tax authority.

During his six years there, Azarov had a reputation for authoritarianism and controversy. It was alleged that he promoted electoral fraud and the intimidation of journalists to secure the re-election of President Leonid Kuchma in 1999. Azarov staunchly denied the accusations, citing a plot against him by rivals.

In 2002 the European Choice parliamentary group, of which he was chairman, nominated Azarov for prime minister. He declined and stood aside for Yanukovich, who assumed both the leadership of the Party of Regions and the premiership. Yanukovich appointed Azarov as deputy prime minister and finance minister in his first cabinet, with Azarov serving until 2005 and then again in 2006–07. His most notable reform was to bring the variable tax rate on personal income down to a uniform flat rate.

During the political upheaval that accompanied the Orange Revolution over the winter of 2004–05, Azarov twice served briefly as acting prime minister. After masterminding Yanukovich's victorious presidential election campaign in 2010, he assumed the leadership of the Party of Regions and was confirmed as prime minister by parliament on 11 March 2010.

### Career in Office

Azarov declared that his primary task was to restore the struggling economy. Admitting that 'the coffers are empty', he pledged to push through a programme of budgetary restraints to encourage the IMF to resume funding suspended in 2009. However, in Nov. 2011 the IMF postponed loan instalment negotiations because of a lack of progress by the Azarov government on pension reform and the removal of domestic gas subsidies.

Criticized by opponents for his poor grasp of the Ukrainian language, Azarov promised that government affairs would be conducted in Ukrainian.

In foreign affairs he has sought to improve strained relations with Moscow.

Following the Party of Regions' victory in parliamentary elections in Oct. 2012, President Yanukovich nominated Azarov in Dec. for a new term as prime minister of a reconstituted government.

## DEFENCE

The 1996 constitution bans the stationing of foreign troops on Ukrainian soil, but permits Russia to retain naval bases. Ukraine hosts Russia's Black Sea Fleet at Sevastopol in Crimea under a lease that is scheduled to end in 2042 (having been extended by 25 years in April 2010). Conscription is for 12 months. Although the former government announced its intention to end conscription and move towards a professional military, this process is now unlikely to begin until at least 2015. On 31 May 1997 the presidents of Ukraine and Russia signed a Treaty of Friendship and Co-operation which provided *inter alia* for the division of the

former Soviet Black Sea Fleet and shore installations. There were around 1m. armed forces reserves in 2007.

Military expenditure in 2008 totalled US\$1,804m. (US\$39 per capita), representing 1.0% of GDP.

### Army

In 2007 ground forces numbered 70,753. Equipment included 2,984 main battle tanks (T-55s, T-64s, T-72s, T-80s and T-84s) and 139 attack helicopters.

In addition there were around 39,900 Ministry of Internal Affairs troops, 45,000 Border Guards and some 9,500 civil defence troops.

### Navy

In 2007 the Navy numbered 13,932, including some 2,500 Naval Aviation and 3,000 naval infantry. The main base is located at Sevastopol. The operational forces include one frigate.

The aviation forces of the former Soviet Black Sea Fleet under Ukrainian command operate ten combat-capable aircraft and 77 helicopters.

### Air Force

There are three air commands—West, South and Central—plus a Task Force 'Crimea'.

Equipment includes 211 combat-capable aircraft (MiG-29s, Su-24s, Su-25s and Su-27s).

Personnel, 2007, 45,240.

## ECONOMY

In 2006 agriculture accounted for 8.6% of GDP, industry 34.1% and services 57.3%.

### Overview

Following independence in 1991, Ukraine's transition to a market economy was tumultuous. The economy was in recession for much of the 1990s, losing 60% of GDP between 1991 and 1999. Prices stabilized after the introduction of a new currency, the hryvnia, in 1996 and structural reforms helped bring the economy under control in 2000. Despite a sharp slowdown in 2005 following the political upheaval of the 2004 presidential elections, economic growth averaged 7.0% between 2001 and 2008 (peaking at 12.1% in 2004), the second highest rate in Europe after that of Latvia.

While the economy has proved resilient in the face of domestic political uncertainties and rising energy prices, global financial turmoil sparked a withdrawal of investment and a collapse in steel prices. Amid forecasts of an imminent recession, the IMF approved a US\$16.4bn. loan in Oct. 2008. Nonetheless, in 2009 GDP shrank by nearly 15%, reflecting the collapse of steel output and declines in the construction and retail sectors. Beginning in Oct. 2008 the hryvnia lost 40% of its value against the US dollar. Economic growth resumed in 2010 following moderate improvements in external demand but significant challenges remain. In Aug. 2010 the IMF approved a US\$15.1bn. loan to put the country on the path to fiscal sustainability, restructure the gas sector and to stabilize the banking system.

### Currency

The unit of currency is the *hryvnia* (UAH) of 100 *kopiykas*, which replaced karbovanets on 2 Sept. 1996 at 100,000 karbovanets = 1 hryvnia. 2000 saw the introduction of a floating exchange rate for the hryvnia.

Inflation rates (based on IMF statistics):

| 2003 | 2004 | 2005  | 2006 | 2007  | 2008  | 2009  | 2010 | 2011 |
|------|------|-------|------|-------|-------|-------|------|------|
| 5.2% | 9.0% | 13.5% | 9.1% | 12.8% | 25.2% | 15.9% | 9.4% | 8.0% |

Inflation had been 4,735% in 1993. Foreign exchange reserves in Sept. 2009 were US\$25,189m., gold reserves were 864,000 troy oz and total money supply was 221,530m. hryvnias.

## Budget

In 2008 revenues were 229,598m. hryvnias and expenditures 241,490m. hryvnias. Tax revenue accounted for 73.8% of revenues in 2008; public services accounted for 33.4% of expenditures in 2008, social protection 22.0%, and education and health 12.4%.

VAT is 20%.

## Performance

Real GDP growth rates (based on IMF statistics):

| 2003 | 2004  | 2005 | 2006 | 2007 | 2008 | 2009   | 2010 | 2011 |
|------|-------|------|------|------|------|--------|------|------|
| 9.6% | 12.1% | 2.7% | 7.3% | 7.9% | 2.3% | -14.8% | 4.1% | 5.2% |

Between 1994 and 1998 average annual real GDP growth was -10.0%, and it was still negative in 1999, at -0.2%. In 2000 the economy expanded considerably and this resurgence continued in the following years with per capita income more than tripling in the period 2000-06. Ukraine's economy did, however, experience a major downturn again in the wake of the global financial crisis that started in 2008. Ukraine's total GDP in 2011 was US\$165.2bn.

## Banking and Finance

A National Bank was founded in March 1991. It operates under government control, its Governor being appointed by the President with the approval of parliament. The *Governor* is Igor Sorkin. There were 198 banks in all as at 1 Jan. 2012, with assets totalling 1,054,280m. hryvnias. The largest banks are PrivatBank, Ukreximbank and Oschadbank.

In 2010 external debt totalled US\$116,808m., equivalent to 85.9% of GNI.

There is a stock exchange in Kyiv.

## ENERGY AND NATURAL RESOURCES

### Environment

Carbon dioxide emissions from the consumption and flaring of fossil fuels in 2008 were the equivalent of 7.6 tonnes per capita. Ukraine's greenhouse gas emissions fell by 53.9% between 1990 and 2008, mainly owing to the decline of polluting industries from the Soviet era.

### Electricity

Installed capacity was an estimated 53.9m. kW in 2007. In 2007 production was 196.25bn. kWh; consumption per capita in 2007 was 4,049 kWh. A Soviet programme to greatly expand nuclear power-generating capacity in the country was abandoned in the wake of the 1986 accident at Chernobyl. Chernobyl was closed down on 15 Dec. 2000. In 2007 there were 15 nuclear reactors in use supplying 47.5% of output.

### Oil and Gas

In 2007 output of crude petroleum was 3.3m. tonnes; in 2008 production of natural gas was 18.7bn. cu. metres, with 920bn. cu. metres of proven natural gas reserves.

### Minerals

Ukraine's industrial economy, accounting for more than a quarter of total employment, is based largely on the republic's vast mineral resources. The Donetsk Basin contains huge reserves of coal, and the nearby iron-ore reserves of Kryvy Rih are equally rich. Among Ukraine's other mineral resources are manganese, bauxite, nickel, titanium and salt. Production in 2004 (in 1m. tonnes): iron ore, 65.5m.; coal, 59.2m.; manganese, 2.4m.; salt, 2.3m.

### Agriculture

Ukraine has extremely fertile black-earth soils in the central and southern portions, totalling nearly two-thirds of the territory. In 2002 there were 32.54m. ha. of arable land and 0.91m. ha. of permanent crops. Output (in 1,000 tonnes) in 2002: wheat, 20,556; potatoes, 16,620; sugar beets, 14,452; barley, 10,364; maize,

4,180; sunflower seeds, 3,270; rye, 1,509; cabbage, 1,229; tomatoes, 1,038. Livestock, 2003: 9,203,000 pigs, 9,108,000 cattle, 1,034,000 goats, 950,000 sheep, 148m. chickens, 20m. ducks. Livestock products, 2003 (in 1,000 tonnes): milk, 13,660; meat, 1,649; eggs, 656.

### Forestry

The area under forests in Ukraine in 2010 was 9.71m. ha. (17% of the total land area). In 2007, 16.88m. cu. metres of timber were produced.

### Fisheries

In 2010 the catch totalled 186,021 tonnes, of which 181,381 tonnes were from sea fishing. The total catch in 1988 had been 1,048,157 tonnes.

## INDUSTRY

In 2007 industry accounted for 28.2% of GDP, with manufacturing contributing 20.5%. Industrial production grew by 10.2% in 2007. Output, 2007 (in tonnes unless otherwise stated): pig iron, 35.6m.; crude steel, 29.0m.; rolled ferrous metals, 24.5m.; cement, 15.0m.; petrol, 4.2m.; distillate fuel oil, 4.1m.; residual fuel oil, 3.4m.; mineral fertilizer, 2.8m.; bread and bakery products, 2.0m.; sugar, 1.9m.; sulphuric acid, 1.6m.; fabrics, 114m. sq. metres; footwear, 22.5m. pairs; refrigerators, 824,000 units; television sets, 507,000 units; passenger cars, 380,000 units; washing machines, 173,000 units; cigarettes, 129bn. units.

### Labour

In 2011 a total of 20,324,000 persons aged 15 to 70 were in employment. The principal areas of activity were (in 1,000): wholesale and retail trade, and restaurants and hotels, 4,865; agriculture, hunting, forestry and fishing, 3,394; manufacturing, 3,353. In 2011 there were 1,733,000 unemployed and the level of unemployment was 7.9%.

## INTERNATIONAL TRADE

### Imports and Exports

In 2008 imports (c.i.f.) amounted to US\$85,534m. (US\$60,618m. in 2007); exports (f.o.b.) US\$67,003m. (US\$49,296m. in 2007). Main import suppliers in 2004: Russia, 40.7%; Germany, 9.4%; Turkmenistan, 6.7%; Poland, 3.3%; Italy, 2.8%. Main exports markets in 2004: Russia, 18.0%; Germany, 5.8%; Turkey, 5.7%; Italy, 5.0%; USA, 4.6%. Main imports, 2004: crude petroleum, 16.7%; machinery, 16.3%; chemicals and chemical products, 12.6%; natural gas, 12.4%. Main exports: ferrous and nonferrous metals, 39.9%; food and raw materials, 10.6%; chemicals and chemical products, 9.9%; machinery, 9.3%.

## COMMUNICATIONS

### Roads

In 2007 there were 169,422 km of roads, including 20,497 km of national roads. There were 5,939,600 passenger cars in use in 2007 and 714,300 motorcycles and mopeds. There were 63,554 road accidents involving injury in 2007 (9,574 fatalities).

### Rail

Total length was 22,302 km in 2009. Passenger-km travelled in 2009 came to 48.3bn. and freight tonne-km to 196.2bn. There are metros in Kyiv, Kharkiv, Kryvy Rih and Dnipropetrovsk.

### Civil Aviation

The main international airport is Kyiv (Boryspil), and there are international flights from seven other airports. There are two major Ukrainian carriers. Ukraine International Airlines operated international flights in 2005 to Amsterdam, Barcelona, Berlin, Brussels, Dubai, Düsseldorf, Helsinki, Kuwait, Lisbon, London, Madrid, Paris, Rome, Vienna and Zürich. Aerosvit had international flights in 2005 to Ashgabat, Athens, Baku, Bangkok, Beijing, Belgrade, Birmingham, Budapest, Cairo, Delhi, Dubai,

Hamburg, İstanbul, Larnaca, Moscow, New York, Prague, St Petersburg, Sofia, Stockholm, Tel Aviv, Toronto and Warsaw.

In 2001 Kyiv handled 1,517,130 passengers (1,458,524 on international flights) and 11,875 tonnes of freight. Simferopol was the second busiest airport for passenger traffic, with 325,323 passengers (248,574 on international flights), and Odesa the second busiest for freight, with 3,588 tonnes.

### Shipping

In 2007, 2m. passengers and 15m. tonnes of freight were carried by inland waterways. In Jan. 2009 there were 224 ships of 300 GT or over registered, totalling 770,000 GT. The main seaports are Illichivsk, Izmail, Mariupol, Mykolaiv, Odesa and Yuzhny. Odesa is the leading port, in 2006 handling 28,010,000 tonnes of freight (23,674,000 tonnes loaded and 4,336,000 tonnes discharged).

### Telecommunications

In 2008 there were 13,177,000 main (fixed) telephone lines. In the same year mobile phone subscribers numbered 55,695,000 (1,210.9 per 1,000 persons). Ukraine had 6.4m. internet subscribers in 2007, of which 0.8m. were broadband subscribers. In March 2012 there were 1.7m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

A new civil code was voted into law in June 1997. Justice is administered by the Constitutional Court of Ukraine and by courts of general jurisdiction. The Supreme Court of Ukraine is the highest judicial organ of general jurisdiction. The death penalty was abolished in 1999. Over the period 1991–95, 642 death sentences were awarded and 442 carried out; there were 169 executions in 1996. In March 1997 death penalties were still being awarded but not carried out. 553,994 crimes were reported in 2000.

The population in penal institutions in Jan. 2008 was 149,690 (323 per 100,000 of national population).

### Education

In 2003–04 the number of pupils in 21,900 primary and secondary schools was 5.9m.; 339 further education establishments had 1,843,800 students, and 670 technical colleges had 592,900 students; 977,000 children were attending pre-school institutions.

In 2005–06 there were 16 universities including an international university of information systems, management and business.

Adult literacy rate in 2008 was over 99%.

In 2006 public expenditure on education came to 6.2% of GDP and 19.3% of total government spending.

### Health

In 2007 there were 223,294 physicians, 25,450 dentists, 340,986 nurses, 23,645 midwives and 21,745 pharmacists. There were 439,549 beds in 2,843 hospitals in 2007.

### Welfare

There were 10.6m. old-age pensioners as at 1 Jan. 2012 and 3.2m. other pensioners. The total included 881,636 Chernobyl victims. In 2002 social insurance and pension security programmes totalled 27.4bn. hryvnias, representing 12.4% of GDP.

## RELIGION

The majority faith is the Orthodox Church, which is split into three factions. The largest is the Ukrainian Orthodox Church, Moscow Patriarchate (the former exarchate of the Russian Orthodox Church), headed by Metropolitan Volodymyr (Sabodan), Metropolitan of Kyiv and All Ukraine, which recognizes Kirill I (Vladimir Mikhailovich Gundyayev) as Patriarch of Moscow and All Russia and insists that all Ukrainian churches should be under Moscow's jurisdiction. There were 9.5m. adherents in 2001. The second largest is the Ukrainian

Orthodox Church, Kyivan Patriarchate, headed by Metropolitan Filaret (Denysenko), Patriarch of Kyiv and All Rus-Ukraine, which was created in June 1992. It had 4.8m. adherents in 2001. Metropolitan Filaret was excommunicated by the Ukrainian Orthodox Church, Moscow Patriarchate in Feb. 1997. The third faction is the Ukrainian Autocephalous Orthodox Church, headed by Metropolitan Mefodiy (Kudryakov) of Ternopil, which favours the unification of the three bodies. Only the Ukrainian Orthodox Church, Moscow Patriarchate is in communion with world Orthodoxy.

The hierarchy of the Roman Catholic Church (*Primate*, Cardinal Mieczyslaw Mokrzycki, Archbishop Metropolitan of Lviv) was restored by the Pope's confirmation of ten bishops in Jan. 1991. In Feb. 2013 there were two cardinals. The Ukrainian Greek Catholic Church (*Head*, Bishop Sviatoslav Shevchuk, Major Archbishop, Metropolitan of Kyiv-Halych) is a Church of the Byzantine rite, which is in full communion with the Roman Church. Catholicism is strong in the western half of the country.

## CULTURE

### World Heritage Sites

Ukraine has five sites on the UNESCO World Heritage List: Kyiv—Saint Sophia Cathedral and Related Monastic Buildings, Kyiv—Pechersk Lavra (inscribed on the list in 1990 and 2005); Lviv—the Ensemble of the Historic Centre (1998 and 2008); the Struve Geodetic Arc (2005), a chain of survey triangulations spanning from Norway to the Black Sea that helped establish the exact shape and size of the earth, which is shared with nine other countries; the primeval beech forests of the Carpathians (2007), shared with Slovakia; and the Residence of Bukovinian and Dalmatian Metropolitans (2011), a property built from 1864–82.

### Press

In 2006 there were 41 daily newspapers with an average combined circulation of 3,511,000. The newspapers with the highest circulation figures are *Fakty i Kommentarii* and *Komsomolskaja Pravda v Ukraine*.

### Tourism

There were 23,122,000 non-resident tourists in 2007; total receipts were US\$5,317m.

### Festivals

The arts festival Day of Kyiv occurs on the last weekend of May. The main music festivals are KaZantip Republic at Popovka in Crimea (Aug.), Koktebel Jazz Festival (Sept.) and Jazz Carnival in Odesa (Sept.). The Molodist International Film Festival takes place in Kyiv in Oct.

## Crimea

The Crimea is a peninsula extending southwards into the Black Sea with an area of 26,100 sq. km. Population (Oct. 2005), 1,990,000 (ethnic groups, 2001 census: Russians, 58.3%; Ukrainians, 24.3%; Tatars, 12.0%). The capital is Simferopol (2001 census, 363,000).

It was occupied by Tatars in 1239, conquered by Ottoman Turks in 1475 and retaken by Russia in 1783. In 1921 after the Communist revolution it became an autonomous republic, but was transformed into a province (*oblast*) of the Russian Federation in 1945, after the deportation of the Tatar population

in 1944 for alleged collaboration with the German invaders in the Second World War. 46% of the total Tatar population perished during the deportation. Crimea was transferred to Ukraine in 1954 and became an autonomous republic in 1991. About half the surviving Tatar population of 0.5m. had returned from exile by 2000. The Tatar population is disproportionately disadvantaged within Crimea, with an unemployment rate of over 60% in 2000.

At elections held in two rounds on 16 and 30 Jan. 1994 Yuri Meshkov was elected *President*. The post of president was abolished by Ukraine in March 1995 after calls for a referendum on Crimean independence. Parliamentary elections were held on 26 March 2006. The Bloc For Yanukovych! (Party of Regions and the Russian Bloc) obtained 44 seats, Soiuz 10, Kunitsyn's Electoral Bloc 10, the Communist Party of Ukraine 9, the People's Movement of Ukraine 8, the Yuliya Tymoshenko Electoral Bloc 8, the People's Opposition Bloc of Natalia Vitrenko 7 and the Opposition Bloc Ne Tak 4. The *Prime Minister* is Anatolii Mohylyov and the *Chairman of Parliament* Volodymyr Konstantynov.

On 2 Nov. 1995 parliament adopted a new constitution which defines the Crimea as 'an autonomous republic forming an integral part of Ukraine'. The status of 'autonomous republic' was confirmed by the 1996 Ukrainian Constitution, which provides for Crimea to have its own constitution as approved by its parliament. The Prime Minister is appointed by the Crimean parliament with the approval of the Ukrainian parliament.

The Tatar National Kurultay (Parliament) elects an executive board (*Mejlis*). The *Chairman* is Mustafa Jemilev. A power-sharing agreement of 12 May 2005 guarantees the Crimean Tatars two ministry portfolios and the post of deputy prime minister in the Crimean local government.

In 2004 there were 624 pre-school institutions with 38,000 pupils and 638 primary and secondary schools with 241,000 students and 20,396 teachers. There were 68,000 students studying at 35 institutes of higher education in 2004.

## KEY HISTORICAL EVENTS

Archaeological evidence indicates that in the 3rd millennium BC a culture known as Umm al-Nar developed in modern-day Abu Dhabi, its influence spreading inland and along the coast of Oman to the south. There was trade with both the Mesopotamian civilization and the Indus culture, particularly the export of copper (then the most valuable natural resource) from the Hajar mountains. Later settlements, with Hellenistic features and dating from between the 3rd century BC and the 3rd century AD, have been discovered at Meleiha, near the Sharjah coast, and at Al-Dur in the emirate of Umm al Qaiwain. There are indications that the coastal areas of the United Arab Emirates (UAE) and Oman came under Sassanian (Persian) influence from the 4th century AD until the early 7th century when the Islamic era began. After the death of the Prophet Muhammad, tribes in the Dibba region along the eastern coast rebelled before Islamic forces won a decisive battle in AD 632.

In the Middle Ages much of the region was part of the Persian Kingdom of Hormuz (from 1300), which controlled the approach to the Gulf and most of the trade. European intervention in the Gulf began in the early 16th century when the Portuguese established a commercial monopoly, building a number of forts including Julfar (in modern-day Ras al-Khaimah), a major medieval trading centre. Portuguese ascendancy was later challenged by the Dutch and then by the British, who exercised their naval power in the Gulf in the 18th century to protect trade with India.

By that time two major tribal confederations had grown powerful along the coast of the lower Gulf. The largest tribal grouping, the Bani Yas, was established on the coast by the late 16th century. A large Bani Yas settlement was founded in Abu Dhabi in the 1760s, following the discovery of water on Abu Dhabi island, and in 1793 it became the seat of government of the

al-Nahyan branch of the tribal confederation. There is further evidence of elements of the Bani Yas population extending from Qatar in the west to Dubai in the east and inland to the Liwa oasis belt. The Qawasim, a branch of the Huwalah tribe, were a maritime people (largely operating from Ras al-Khaimah) who emerged as an important group once the Omani empire of the late 17th and early 18th centuries was destroyed at the end of the Omani-Persian war in 1720. They established control over other strands of the Huwalah between Sharjah and Musandam and with a large fleet, posed a serious challenge to British shipping.

Piracy was rife until the early 19th century when the British sent several naval expeditions to the Gulf ports to suppress the raiders. In 1820 Britain signed the General Treaty of Peace against piracy and the slave trade with the principal Arab sheikhdoms. From this and later agreements the area became known as the Trucial Coast from the 1850s (the term Trucial referring to the fact that the component sheikhdoms were bound by the truces concluded with Britain). Britain assumed responsibility for the defence of the territory under the maritime treaty of 1853 and, under the exclusive treaties of 1892, for external relations of each of the Trucial sheikhdoms. The sheikhdoms were otherwise autonomous and followed the traditional form of Arab monarchy, with each ruler having virtually absolute power over his subjects.

The collapse of the pearl market, which was believed to have originated in the Gulf in the late Stone Age, and the world economic depression of the early 20th century undermined the economies of the Trucial States. Their subsequent transformation began with the discovery of oil off the coast of Abu Dhabi. Sheikh Shakhbut bin Sultan al-Nahyan, the ruler of Abu Dhabi from 1928–66, granted the first of several oil exploration concessions to foreign companies in 1939. However, the Second World War delayed exploration. The first commercial discovery was made in the late 1950s and the first exports began in 1962.

Sheikh Shakhbut, who was seen as an obstacle to the development of the oil industry, was deposed in 1966 in favour of his younger brother Sheikh Zayed bin Sultan al-Nahyan. The president of the UAE for more than 30 years until his death in 2004, he was re-elected by the rulers of the other emirates at five-year intervals. In the late 1960s oil was discovered in Dubai and in Sharjah, and then in Ras al-Khaimah in the 1980s.

In Jan. 1968 Britain announced the withdrawal of its military forces from the area by 1971. In March the Trucial States joined Bahrain and Qatar (which were also under British protection) in what was named the Federation of Arab Emirates. It was intended that the Federation should become fully independent but the interests of Bahrain and Qatar proved to be incompatible with those of the other sheikhdoms and both seceded from the Federation in 1971 to become separate independent entities. Six of the Trucial States (Abu Dhabi, Dubai, Sharjah, Umm al Qaiwain, Ajman and Fujairah) had agreed a federal constitution for achieving independence as the United Arab Emirates. The British accordingly terminated its special treaty relationship, and the UAE became independent on 2 Dec. 1971. The remaining sheikhdom, Ras al-Khaimah, joined the UAE in Feb. 1972. At independence Sheikh Zayed of Abu Dhabi took office as the first President of the loose federation. Sheikh Rashid bin Said al-Maktoum, the ruler of Dubai for over 30 years from 1958, became Vice-President. The al-Maktoum family, like the al-Nahyan rulers of Abu Dhabi, are a dynastic line of the Bani Yas tribe. The UAE instituted the Federal National Council, a 40-member consultative body appointed by the seven rulers. After the oil price increases of 1973–74—the UAE having given support to the Arab cause in the 1973 war with Israel—the economy and wealth of the new federation developed rapidly.

An attempted coup took place in Sharjah in 1987. Sheikh Sultan Bin Mohammad al-Qassimi abdicated in favour of his brother after admitting mismanagement of the emirate's economy but was restored to power by the Supreme Council of Rulers. In 1991 the UAE became involved in a major international financial scandal when the Bank of Credit and Commerce International (BCCI), in which the Abu Dhabi ruling family held a controlling 77% interest, collapsed. Abu Dhabi sued BCCI for damages in 1993 and several executives were convicted of fraud, given prison sentences and ordered to pay compensation.

Sheikh Rashid bin Said al-Maktoum died in 1990 and was succeeded by his son Sheikh Maktoum bin Rashid al-Maktoum as ruler of Dubai and UAE vice-president. In June 1996 the Federal National Council approved a permanent constitution replacing the provisional document that had been renewed every five years since 1971. At the same time, Abu Dhabi City was designated as the UAE's permanent capital.

In foreign relations the UAE has adopted a largely pro-Western and anti-Iranian stance. Following the fall of the Shah of Iran in 1979 and the outbreak of the Iran–Iraq war in 1980, the stability of the entire region was threatened. Partly in response to Iranian threats to close the Strait of Hormuz to shipping carrying oil exports from Gulf countries, the UAE joined with five other states to form the Gulf Co-operation Council (GCC) in 1981 to work towards political and economic integration. There has been further tension with Iran relating to territorial claims over the island of Abu Musa and the Greater and Lesser Tunb islands, strategically located in the Strait of Hormuz. Iran claimed sovereignty over the islands in the early 1990s and rejected a proposal by the GCC for the claim to be resolved by the International Court of Justice. In 1996 Iran opened an airport on Abu Musa and a power station on Greater Tunb, further damaging relations. Following UAE criticism of a rapprochement between Saudi Arabia and Iran, the GCC reiterated its support for the Emirates in the dispute in 2001. Iran rejected what it claimed was a biased decision. An agreement on the demarcation of the border between the UAE and Oman was ratified in 2003.

UAE forces joined the US-led international coalition against Iraq after the invasion of Kuwait in 1990. Following the Sept. 2001 attacks in the USA, the UAE's banking sector was subject to international scrutiny, and the government consequently ordered financial institutions to freeze the assets of 62 organizations and individuals suspected of funding terrorist movements. The USA stationed forces in the UAE during the invasion of Iraq in March 2003.

## TERRITORY AND POPULATION

The Emirates are bounded in the north by the Persian Gulf, northeast by Oman, east by the Gulf of Oman and Oman, south and west by Saudi Arabia. Their area is approximately 83,600 sq. km (32,300 sq. miles), excluding over 100 offshore islands. The total population at the 2005 census was 4,106,427 (68.3% male); density, 49 per sq. km. Estimate, 1 July 2008, 4,765,000. The United Nations population estimate for 2008 was 6,207,000. About one-tenth are nomads. In 2011, 84.4% of the population lived in urban areas. Approximately 80% of the population are foreigners, the highest percentage of any country.

The UN gives a projected population for 2015 of 8.37m. The population of the United Arab Emirates has doubled since the early 2000s.

Populations of the seven Emirates, 2005 census (in 1,000): Abu Dhabi, 1,399; Ajman, 207; Dubai, 1,321; Fujairah, 126; Ras al-Khaimah, 210; Sharjah, 794; Umm al Qaiwain, 49. The chief cities are Dubai (2005 census population of 1,305,060), Abu Dhabi, the federal capital (959,692 in 2005), Sharjah and Al Ain. In addition to being the most populous Emirate, Abu Dhabi is also the wealthiest, ahead of Dubai.

The official language is Arabic; English is widely spoken.

## SOCIAL STATISTICS

2008 births, 68,779; deaths, 9,775. 2008 birth rate (per 1,000 population), 14.4; death rate, 1.6; infant mortality rate (per 1,000 live births), 6 (2010). Life expectancy, 2007, 76.6 years for men and 78.7 years for women. Annual population growth rate, 1998–2008, 4.4%; fertility rate, 2008, 1.9 births per woman. The UAE has had one of the largest reductions in its fertility rate of any country in the world over the past quarter of a century, having had a rate of 4.4 births per woman in 1990.

## CLIMATE

The country experiences desert conditions, with rainfall both limited and erratic. The period May to Sept. is generally rainless. Abu Dhabi, Jan. 65°F (18.3°C), July 95°F (35.0°C). Annual rainfall 3.5" (89 mm). Dubai, Jan. 66°F (18.9°C), July 94°F (34.4°C). Annual rainfall 3.7" (94 mm).

## CONSTITUTION AND GOVERNMENT

The Emirates is a federation, headed by a *Supreme Council of Rulers* which is composed of the seven rulers which elects from among its members a *President* and *Vice-President* for five-year terms, and appoints a *Council of Ministers*. The Council of Ministers drafts legislation and a federal budget; its proposals are submitted to a *Federal National Council* of 40 appointed members which may propose amendments but has no executive power. It was announced in Dec. 2005 that 20 of the 40 members would in future be elected through councils for each of the seven Emirates. There is a *National Consultative Council* made up of citizens.

The current constitution came into force on 2 Dec. 1971 and was made permanent in 1996.

## National Anthem

'Ishy Biladi' (Long live my Homeland); words by Abdullah Al Hassan, tune by Mohamed Abdel Wahab.

## GOVERNMENT CHRONOLOGY

Presidents since 1971.

## CURRENT LEADERS

### Sheikh Khalifa bin Zayed al-Nahyan

*Position*  
President

#### Introduction

Sheikh Khalifa bin Zayed al-Nahyan was appointed president on 3 Nov. 2004, following the death of his father, Sheikh Zayed, who helped establish the country in 1971 and presided over it for 33 years. Sheikh Khalifa has continued his father's policies of co-operation with neighbouring Arab countries and with the USA, and reducing the UAE's economy's dependence on oil and gas extraction.

#### Early Life

Sheikh Khalifa bin Zayed al-Nahyan, the eldest son of his father, was born in 1948 in Al-'Ayn, Abu Dhabi. In 1966, following his father's promotion to the post of Ruler of Abu Dhabi, he was appointed as Ruler's Representative in the Emirate's eastern province. Three years later he was nominated as Crown Prince and head of Abu Dhabi's new department of defence.

Following Sheikh Zayed's initiative in 1971 to bring together the rulers of the Trucial States to form the United Arab Emirates (and his assumption of the federation presidency), Sheikh Khalifa assumed two posts—deputy prime minister in the UAE's federal cabinet and chairman of the Abu Dhabi Executive Council. He oversaw the implementation of a massive infrastructure development programme in Abu Dhabi, funded by revenue from the Emirate's vast oil reserves. In May 1976, following the unification of the armed forces of the seven Emirates, Sheikh Khalifa was nominated as deputy supreme commander of the UAE Armed Forces. He went on to establish numerous military training institutions and was responsible for the procurement of equipment and weapons.

In 1981 Sheikh Khalifa established the Abu Dhabi Department of Social Services and Commercial Buildings to offer low-interest loans for house building. The scheme was extended in 1991 and 2000, in line with the rapid increase in the country's population. From the late 1980s, he was Chairman of the Supreme Petroleum Council, and helped develop the UAE's petrochemicals and industrial complex at Ruwais in an attempt to diversify the economy. He also served as chairman of the Abu Dhabi Fund for Development (responsible for the country's overseas aid programme), chairman of the Abu Dhabi Investment Authority and head of the Environmental Research and Wildlife Development Agency. In late 1991 and early 1992 Sheikh Khalifa and his father were mired in the scandal surrounding the collapse of the BCCI bank, 77% of which was owned by the Abu Dhabi government. This followed a fraud in which its founder, Agha Hassan Abedi, and other officers stole billions of dollars. Sheikh Khalifa's scheme to compensate creditors resulted in a payout of US\$1.8bn.

When Sheikh Zayed's health began to decline in the late 1990s, Sheikh Khalifa became the public face of the UAE, along with Sheikh Maktoum, Ruler of Dubai. On 3 Nov. 2004, the day after the death of Sheikh Zayed, Sheikh Khalifa was appointed president of the UAE.

#### Career in Office

Sheikh Khalifa said his key objective as president was to continue on the path laid down by his father. A strong supporter of the six-member Gulf Co-operation Council, he has sought to promote solidarity between Arab states, to support the Palestinian people and to help restore stability in Iraq. In Dec. 2005 he announced plans for the UAE's first elections, in which half of the members of the consultative Federal National Council would be elected by a limited number of citizens. The non-party elections were held in Dec. 2006, and the government said that they marked the start of a wider process to extend political participation.

In May 2009 the UAE withdrew from plans for Gulf monetary union, undermining prospects for further economic integration in the region. This move followed the decision to locate the headquarters of the Gulf Co-operation Council Monetary Council in Saudi Arabia. Meanwhile, the UAE and particularly Dubai were adversely affected by the global financial crisis, as banks were overexposed to a serious reversal in the property market. In Feb. 2009, and again in Dec., the Abu Dhabi government intervened to support the banking sector, to prevent a debt default by Dubai and to reassure the financial markets.

In 2011 the UAE was not disturbed significantly by the wave of political protest that erupted across much of the Arab world, although the government expanded the voter franchise for elections to the Federal National Council in Sept. that year. There was, however, increasing nervousness in 2012 over the continuing regional pressures for political liberalization and the rise of Islamist movements, prompting the arrest of a number of activists accused of plotting to destabilize the country.

In 2011 the UAE joined the NATO-led military operation that helped dislodge the authoritarian Gaddafi regime in Libya.

## DEFENCE

In 2008 defence expenditure totalled US\$13,733m. (US\$2,972 per capita), representing 5-1% of GDP. The expenditure per capita in 2008 was the highest in the world.

### Army

The strength was (2007) 44,000 (including Dubai independent forces).

### Navy

The combined naval flotilla of the Emirates includes two frigates and two corvettes. Personnel in 2007 numbered around 2,500. The main base is at Abu Dhabi, with minor bases in the other Emirates.

### Air Force

Personnel (2007) 4,500, with 184 combat-capable aircraft (including F-16s, Mirage 2000s and *Hawks*), and some 40 attack helicopters.

## ECONOMY

Crude petroleum and natural gas accounted for 36.8% of GDP in 2008; trade and hotels, 17.4%; finance and real estate, 15.1%; construction, 7.4%.

### Overview

The UAE has a strong record of market-oriented economic reform. It is the fourth largest oil exporter in the world and ranks fifth globally in proven reserves of natural gas and oil. Diversification has stimulated manufacturing, tourism, media, shipping, and financial and commercial services. 80% of the population are

expatriates. Unemployment is high among nationals, particularly the young and those living in the Northern Emirates.

From 2003–08 growth was consistently strong, buoyed by high oil prices and the rapid expansion of construction, financial services and trade services. The economy ran significant current account surpluses (including US\$36bn. in 2006), primarily from oil although non-oil exports in manufacturing, agriculture and services also contributed.

However, the global financial crisis caused a slowdown in real estate and construction, weakened tourism, trade and financial services, and lowered oil prices. Dubai World, one of three government-backed conglomerates, was forced to restructure its debt, resulting in higher sovereign debt. Non-performing loans doubled while property values fell. Strong tourism and trade, large-scale public investment in Abu Dhabi, and higher oil prices boosted GDP in 2010–11 as a recovery gained strength. Nonetheless, excess supply of property in Dubai, high dependency on the hydrocarbon sector, and regional turmoil are risks to long-term prospects.

### Currency

The unit of currency is the *dirham* (AED) of 100 *fil*s. Gold reserves are negligible. In March 2009 foreign exchange reserves were US\$34,040m. and total money supply was DH 211,314m. Inflation rates (based on IMF statistics):

| 2002 | 2003 | 2004 | 2005 | 2006 | 2007  | 2008  | 2009 | 2010 | 2011 |
|------|------|------|------|------|-------|-------|------|------|------|
| 2.9% | 3.1% | 5.0% | 6.2% | 9.3% | 11.1% | 12.3% | 1.6% | 0.9% | 0.9% |

In 2001 the six Gulf Arab states—the United Arab Emirates, along with Bahrain, Kuwait, Oman, Qatar and Saudi Arabia—signed an agreement to establish a single currency by 2010. In June 2009 it was agreed to postpone the implementation of the new currency, the *khaleeji*, until 2013. It is now likely to be even later. Both Oman and the United Arab Emirates have now withdrawn from the scheme, in 2007 and 2009 respectively.

### Budget

The fiscal year is the calendar year. Revenue in 2008 totalled DH 292,600m. and expenditure DH 289,000m. Revenue is principally derived from oil-concession payments. Defence, education, and public order and safety are the main items of expenditure.

### Performance

Real GDP growth rates (based on IMF statistics):

| 2002  | 2003  | 2004  | 2005 | 2006 | 2007 | 2008 | 2009  | 2010 | 2011 |
|-------|-------|-------|------|------|------|------|-------|------|------|
| -0.7% | 16.4% | 10.1% | 8.6% | 8.8% | 6.5% | 5.3% | -4.8% | 1.3% | 5.2% |

In 2011 total GDP was US\$360.2bn.

### Banking and Finance

The UAE Central Bank was established in 1980 (*Governor*, Sultan bin Nasser Al-Suwaidi). The largest banks are Emirates NBD, with assets of US\$76.9bn. in Dec. 2008, the National Bank of Abu Dhabi (assets of US\$44.6bn.) and the Abu Dhabi Commercial Bank (US\$40.2bn.). Foreign banks are restricted to eight branches each.

There are stock exchanges in Abu Dhabi and Dubai.

## ENERGY AND NATURAL RESOURCES

### Environment

In 2008 carbon dioxide emissions from the consumption and flaring of fossil fuels were the equivalent of 43.1 tonnes per capita, among the highest in the world.

### Electricity

Installed capacity was 18.5m. kW in 2007. Production in 2007 was 76.11bn. kWh, with consumption per capita (2007) 17,376 kWh. Construction of the first of four nuclear plants began in July 2012. The United Arab Emirates is the first country to begin

construction of its first nuclear power plant since construction was started on China's first plant in 1985. The first plant is scheduled to become operational in 2017. All four plants are projected to be completed by 2020.

### Oil and Gas

Oil and gas provided about 33.7% of GDP in 2002. Oil production, 2008, 139.5m. tonnes. The UAE had reserves in 2008 amounting to 97.8bn. bbls. Oil production in Abu Dhabi is 85% of the UAE's total.

Abu Dhabi has reserves of natural gas, nationalized in 1976. There is a gas liquefaction plant on Das Island. Proven natural gas reserves (2008) were 6,430bn. cu. metres. Natural gas production, 2008, 50.2bn. cu. metres.

### Minerals

Sulphur, gypsum, chromite and lime are mined.

### Agriculture

The fertile Buraimi Oasis, known as Al Ain, is largely in Abu Dhabi territory. A lack of water and good soil means few natural opportunities for agriculture but there is a programme of fostering agriculture by desalination, dam-building and tree-planting; strawberries, flowers and dates are now cultivated for export. In 2002 there were 75,000 ha. of arable land and 191,000 ha. of permanent cropland. Output, 2002 (in 1,000 tonnes): dates, 758; tomatoes, 231; cabbage, 30; cucumbers and gherkins, 26; pumpkins and squash, 21.

Livestock products, 2003 estimates (in 1,000 tonnes): meat, 74; milk, 56; eggs, 18. Livestock (2002): goats, 1.4m.; sheep, 554,000; camels, 246,000; cattle, 107,000; chickens, 12m.

### Forestry

In 2010, 0.32m. ha. were under forests (4% of the total land area).

### Fisheries

Total catch, 2010, 79,610 tonnes (exclusively marine fish).

## INDUSTRY

The largest company in the United Arab Emirates by market capitalization in March 2012 was Emirates Telecom (US\$19.2bn.).

In 2005 industry accounted for 57% of GDP, with manufacturing contributing 13%. Products include aluminium, cable, cement, chemicals, fertilizers (Abu Dhabi), rolled steel and plastics (Dubai, Sharjah), and tools and clothing (Dubai). The diamond business is becoming increasingly important in Dubai.

### Labour

Males constituted 85% of the economically active labour force in 2005 (one of the highest percentages of any country in the world). Foreign workers make up over 90% of the workforce in the private sector. A total of 2,660,000 persons were in employment in 2005, with the leading areas of activity as follows: community, social and personal services, 587,900; construction, 502,700; wholesale and retail trade, restaurants and hotels, 460,200; manufacturing, 292,600. In 2005 the unemployment rate was 1.9%.

## INTERNATIONAL TRADE

There are free trade zones at Jebel Ali (administered by Dubai), Sharjah and Fujairah. Foreign companies may set up wholly owned subsidiaries. In 2010 there were over 6,400 companies in the Jebel Ali zone.

The United Arab Emirates, along with Bahrain, Kuwait, Oman, Qatar and Saudi Arabia entered into a customs union in Jan. 2003.

### Imports and Exports

Imports in 2001 totalled DH 120.6bn.; exports DH 176.9bn. Principal imports: machinery and transport equipment, food and textiles. Crude petroleum and natural gas are the main exports.

Main import suppliers, 2001: Japan (10.2%), USA (9.6%), UK (8.8%), China (8.6%). Main export markets: Japan (36.4%), India (7.5%), South Korea (7.1%), Singapore (6.3%).

## COMMUNICATIONS

### Roads

In 2008 there were 4,080 km of roads. There were 1,279,100 passenger cars (293 per 1,000 inhabitants), 48,200 buses and coaches and 39,400 lorries and vans in 2007.

### Rail

Etihad Rail, a rail network linking the seven Emirates, is under construction and is expected to become operational by 2018. The first of three phases is scheduled for completion during 2013.

A metro system opened in Dubai in Sept. 2009.

### Civil Aviation

There are international airports at Abu Dhabi, Al Ain, Dubai, Fujairah, Ras al-Khaimah and Sharjah. Dubai is the busiest airport, handling 40,901,752 passengers and 1,927,520 tonnes of freight in 2009 (up from 37,441,440 passengers and 1,824,992 tonnes of freight in 2008). In the meantime passenger numbers have grown still further and Dubai is now the 13th busiest airport in the world overall and the fourth busiest for international passenger traffic. As recently as 2006 it did not even rank among the 30 busiest airports in the world. Dubai set up its own airline, Emirates, in 1985. It now operates internationally, and in 2006–07 flew to 89 destinations worldwide and carried 17,544,140 passengers. Etihad Airways, the national airline of the United Arab Emirates, began operations in Nov. 2003. Air Arabia is a low-cost airline based in Sharjah, flying to 35 destinations (mainly in Asia).

In the World Economic Forum's *Global Competitiveness Report 2009–2010* the UAE ranked third for quality of air transport infrastructure.

### Shipping

There are 15 commercial seaports, of which five major ports are on the Persian Gulf (Zayed in Abu Dhabi, Rashid and Jebel Ali in Dubai, Khalid in Sharjah, and Saqr in Ras al-Khaimah) and two on the Gulf of Oman: Fujairah and Khor Fakkan. Rashid and Fujairah are important container terminals. In Jan. 2009 there were 124 ships of 300 GT or over registered, totalling 913,000 GT.

### Telecommunications

In 2008 there were 1,508,000 main (fixed) telephone lines. In the same year active mobile phone subscribers numbered 9.4m. (2,086.5 per 1,000 persons—the highest rate of any country). There were 2.9m. internet users in 2008. In March 2012 there were 2.9m. Facebook users.

## SOCIAL INSTITUTIONS

### Justice

The basic principles of the law are Islamic. Legislation seeks to promote the harmonious functioning of society's multi-national components while protecting the interests of the indigenous population. Each Emirate has its own penal code. A federal code takes precedence and ensures compatibility. There are federal courts with appellate powers, which function under federal laws. Emirates have the option to merge their courts with the federal judiciary.

The death penalty is in force; it was used in Feb. 2011 for the first time since 2008. There was also an execution in Dec. 2012.

### Education

In 2007 there were 100,269 pre-primary pupils with 4,823 teaching staff, 284,034 primary pupils with 16,523 teaching staff and 310,999 secondary pupils with 24,152 teaching staff. In 2005–06 there were 14,984 students at the United Arab Emirates University and 2,925 students at the five colleges of Zayed University. The largest higher education institution is the system of the Higher Colleges of Technology, with 16,894 students in 2005–06. It has 17 campuses throughout the UAE. The adult literacy rate in 2005 was 90.0%. In 2009 public expenditure on education came to 1.2% of GDP and 23.4% of total government spending.

### Health

In 2003 there were 38 government hospitals with 5,722 beds. In 2003 there were 27 private hospitals, 131 government health centres and 1,281 private clinics. There were 5,825 physicians in 2001 and 954 dentists, 12,045 nurses and 1,086 pharmacists.

### RELIGION

Most inhabitants are Sunni Muslims, with a small Shia minority.

### CULTURE

#### World Heritage Sites

The Cultural Sites of Al Ain (Hafit, Hili, Bidaa Bint Saud and Oases Areas), a property that includes circular stone tombs, wells, towers, palaces and administrative buildings dating back to 2500 BC, was inscribed on the UNESCO World Heritage List in 2011.

#### Press

In 2006 there were 14 daily newspapers with a combined circulation of 901,000.

#### Tourism

In 2005, 7,126,000 tourists stayed in hotels and similar accommodation; spending by tourists in 2005 totalled US\$3,218m.

## KEY HISTORICAL EVENTS

Remains of Stone Age settlements of hunters and fishermen suggest that the first inhabitants crossed from the low countries of Continental Europe on one or more wide causeways. By the time their successors had turned to subsistence farming, the land links to the continent had disappeared under the sea. These offshore islands created at the ending of the Ice Age shared, with nearside Europe, a slowly evolving agricultural economy using bronze and iron tools. The Ancient Britons were Celts, whose ancestors had migrated from the valleys of the Rhine, the Rhône and the Danube. Having asserted their command of northern Italy and France (Gaul), the Celts established a bridgehead to Ireland and thence to Britain. By 600 BC they were the undisputed dominant force of Western Europe and were to remain so until challenged by the Romans.

The Romans were dominant from AD 78. From the 3rd century they were increasingly harried by tribes of Celts from Scotland and Ireland and by Angles and Saxons from northern Germany. Celtic tradition, presided over by druids (religious leaders) and bards (storytellers), survived most successfully in Ireland and Wales where Roman influence was barely visible. Scotland resisted the Roman legions; Hadrian's Wall was built as a northern frontier between the Tyne and Solway Firth in the early 2nd century AD. Roman authority was challenged, notably by Boudicca, queen of the Iceni tribe of East Anglia. The rebellion and the brutal repression that followed led to a long period of peaceful settlement, during which the Romans established a road network linking new towns such as Londinium (London) and Eboracum (York). But by the 5th century Roman Britain had disintegrated into a collection of warring kingdoms. The English and Welsh economies thrived on the export of silver, lead, gold, iron and other minerals. With the spread of Christianity, chiefly by Irish missionaries, came the beginnings of an education and legal system.

After the withdrawal of the Roman legions in the early 5th century, the Romano-British were pushed back to higher land in the west by waves of invading Saxons, Angles and Jutes. Danish invasions in 865 established the Danelaw in northern England. Alfred the Great of Wessex resisted Danish expansion, strengthening Anglo-Saxon unity.

## Norman Conquest

William, duke of Normandy, led the Norman Conquest and was crowned king in 1066. When William died in 1087 he left Normandy to his eldest son Robert, thus separating it from England. The French dialect known as Anglo-Norman was spoken by the ruling class in England for two centuries after the Conquest. The Norman heritage was preserved also in the overlap between French and English feudal lords. Henry II, the founder of the Plantagenet dynasty, was feudatory lord of half of France. But most of the French possessions were lost by Henry's son John. Thereafter, the Norman baronage came to regard themselves as English. The ambitions of Edward III began and those of Henry V renewed the Hundred Years War (1338–1453) with France, which ended with the loss of all the remaining French possessions except Calais.

The dynastic struggle between the rival houses of York and Lancaster was concluded by the invasion of Henry (VII) Tudor in 1485. His son, Henry VIII, asserted royal authority over the church and rejected papal authority. Tudor power reached its zenith with Elizabeth I, under whom Protestantism became firmly established in England. The Spanish Armada—an attempt by Catholic Spain to return England to the papal fold—was repelled in 1588.

The accession of James VI of Scotland to the English throne in 1603 brought the two countries into dynastic union. A struggle for supremacy between Crown and Parliament culminated in the Civil War, which started in 1642. Charles I was executed by Parliament in 1649, beginning the rule of Protector Oliver Cromwell. The Stuart monarchy was restored in 1660, on terms which conceded financial authority and thus decision-making power to Parliament. The attempt of James II, a Catholic, to restore the royal prerogative led to the intervention of William of Orange. James fled the country and the crown was taken by William (III) and his wife Mary as queen regnant. The accession of William involved England in a protracted war against France.

The parliaments of England and Scotland were united in 1707 under Queen Anne, the first British monarch. With the accession of the Hanoverian George I in 1714, the system of Parliamentary party government took hold. By the mid-18th century London had taken over from Amsterdam as the leading financial centre. With easy access to capital, entrepreneurs were able to invest in new, improved methods of production. With the harnessing of steam power made possible by the engineering genius of Thomas Newcomen and James Watt, economic enterprise shifted away from the southeast to the north of England, Scotland and South Wales where there were large reserves of coal. The demand for raw materials and the pursuit of markets for finished goods opened up trade throughout the civilized world and extended British influence.

#### *American Colonies*

Britain's first successful colonies in North America were established in the reign of James I of England (1603–25) and, soon afterwards, Bermuda, St Kitts, Barbados and Nevis were colonized. By the mid-17th century, Britain controlled the American east coast and had strong bases in India and in the West Indies, where the sugar economy was dependent on slave labour imported from West Africa. Critical to imperial expansion was Britain's rivalry with France. Britain emerged much strengthened from the War of the League of Augsburg (1689–97) and the War of Spanish Succession (1702–13) while French ambitions in Europe and beyond were severely curtailed. But it was the Seven Years' War (1756–63), in which France and Prussia were the chief contenders, that deprived France of her remaining territorial claims in North America and India and confirmed Britain as the world's leading maritime power.

Relations between Parliament and Crown went through an unsettled period in the reign of George III, who was blamed for the loss of the American colonies. The War of Independence ended with Britain's recognition of American right to self-government in 1783. In 1793 revolutionary France declared war and was not finally defeated until 1815. The demands of war further stimulated the new, steam-powered industries. Despite Britain finding itself the pre-eminent world power, after 1815 there was frequent unrest as an increasingly urban and industrial society found its interests poorly represented by a parliament composed chiefly of landowners. The Reform Act of 1832 extended representation in Parliament and further acts (1867, 1884, 1918 and 1928) led gradually to universal adult suffrage.

Ireland was brought under direct rule from Westminster in 1801, creating the United Kingdom of Great Britain and Ireland. The accession of Victoria in 1837 was the beginning of an era of unprecedented material progress. Early industrial development produced great national wealth but its distribution was uneven and the condition of the poor improved slowly. Whereas early Victorian reforms were responses to obvious distress, governments after 1868 were more inclined towards preventive state action.

The Victorian empire included India, Canada, Australasia and vast territories in Africa and Eastern Asia. There was war with Russia in the Crimea (1854–56); most wars, however, were fought to conquer or pacify colonies. After 1870 the Suez Canal enabled Britain to control the empire more efficiently; Britain became a 40% shareholder in 1875 and the controlling power in Egypt in 1882. The most serious imperial wars were the Boer Wars of 1881 and 1899–1902 against the Dutch settlers in South Africa. After a less than glorious victory, Britain negotiated a Union of South Africa, by which South Africa enjoyed the same autonomy agreed for Canada (1867), Australia (1901) and later New Zealand (1907). The 'dominion status' of these countries was clarified by the Statute of Westminster (1931).

With the spread of trade unionism and the emergence of the Labour Party, the gap between right- and left-wing politics widened after 1900. Labour had to wait until 1924 to form its first government but the Liberal landslide of 1906 carried forward the

programme of social reform. David Lloyd George's People's Budget led to the abolition of the House of Lords' right to override the House of Commons while a contributory insurance scheme to cover basic health care, a modest benefit for the unemployed, free school meals and non-contributory old age pensions were all introduced.

On 3 Aug. 1914 Germany invaded Belgium. Britain was obliged by treaty to retaliate by declaring war. Four years of bloody trench warfare ensued in northern France and Belgium, with American intervention in 1917 helping to break the stalemate. The United Kingdom alone lost 715,000 soldiers and another 200,000 from the empire. Rebellions broke out in Ireland, born of the failure of successive attempts to agree a formula for Irish Home Rule. The issue was complicated by factional disagreement in southern Ireland and the wish of northern Ireland (Ulster) to remain in the United Kingdom. In 1920, after four years' conflict, the Government of Ireland Act partitioned the country. The northern six counties remained British, a parliament was created and a Unionist government took office. The southern 26 counties moved by stages to complete independence as the Irish Free State in 1922.

#### *Second World War*

A post-war boom was followed by a lengthy recession and heavy unemployment, exacerbated by the reluctance of politicians to adopt Keynesian economics. Germany revived as a military power in the 1930s, unchecked by reluctant neighbours after the punitive Treaty of Versailles. British Prime Minister Neville Chamberlain agreed to the German acquisition of parts of Czechoslovakia at the Munich Agreement in 1938. His policy of appeasement was much criticized, though it is arguable that Britain was in no position to go to war in 1938. Germany invaded Poland on 1 Sept. 1939. Britain, bound once more by treaty, declared war. In May 1940 Chamberlain was replaced as prime minister by Winston Churchill, who formed a national unity government. Although British military casualties were less than in the 1914–18 war, the civilian population was hit much worse during the Second World War; over 90,000 died, many as a result of German bombing in the Battle of Britain in 1940.

The war ended with German and Japanese defeat in 1945, by which stage the United Kingdom was virtually bankrupt. In 1939 the country had had assets of around £3,000m. By the end of the war, it owed about the same amount. A pre-war balance of payments deficit averaging £43m. a year had jumped to £750m. It was a time of great social upheaval. In the 1945 election a Labour government under Clement Attlee was returned with a large majority and a socialist programme, which emphasized wealth distribution above wealth creation, was implemented. It undertook to establish a free National Health Service, an ambitious housing programme and the state control of major industries. Subsequent governments modified but generally accepted the changes.

With Britain bankrupted, the United States stepped into the breach as the now undisputed free world leader. Fearing a European breakdown and a Communist takeover, the Marshall Plan was implemented by the USA, providing massive investment to rebuild Europe. An essential condition of the Marshall Plan was a joint effort of the participating nations to put their economies in order. But when continental leaders made the first tentative moves towards European unity, the UK was unwilling to be closely involved. With the independence of India (and Pakistan), the centrepiece of the British Empire, in 1947, decolonization took root, reaching its climax in the 1960s. Rather than to Europe, Britain now looked instead to a Commonwealth of freely associated states, recognizing the British monarch as symbolic Commonwealth head (some states chose to retain the monarch as head of state), and to the 'special relationship' with the United States.

In March 1957 France, Germany, Italy, Belgium, the Netherlands and Luxembourg signed the Treaty of Rome, which laid down

terms for the European Economic Community. Two years later seven of the European countries outside the Common Market—Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the UK—formed the European Free Trade Association. When the United Kingdom moved to join the EEC in 1962, five of the six members of the Community were willing to support the application but France vetoed it. A second application, in 1967, also failed but admission was achieved in 1973 under the Conservative government of Edward Heath. Membership of the Community was endorsed by referendum in 1975.

On the wider international scene, the limits of independent military action were made clear by the Suez crisis of 1956 when the UK, in collusion with France and Israel, used force to stop President Nasser of Egypt nationalizing the Suez Canal. Assumed American support was not forthcoming and the enterprise collapsed when the UK was left alone to cope with a potentially disastrous run on sterling. In the 1960s and 1970s the UK began to come to terms with advanced technology. Old-established industries such as textiles, shipbuilding, iron and steel and coal mining, the leaders of the first industrial revolution, gave way to manufacturing that relied on the microchip. Service industries, particularly in the financial sector, occupied an increasing share of the economy and trade restrictions were dismantled throughout the world.

In 1979 a Conservative government led by Margaret Thatcher came to power, committed to a free market economy. State industry was returned to private enterprise, the trade unions (blamed for the crippling 1978–79 Winter of Discontent) lost much of their power to direct government policy, and high earners were to benefit from lower taxation. A period of readjustment climaxed with a coal miners' strike during 1984–85 that turned into a trial of strength between the government and organized labour. The Labour Party and allied unions, themselves in the process of modernization, distanced themselves from the socialist rhetoric of the miners' leaders and the strike collapsed.

Despite rising living standards, there was concern about the quality of essential services such as education and health and disillusionment with a Conservative administration unable to construct a coherent European policy. In 1997 a Labour government, led by Tony Blair, was returned with a large Commons majority. Like Thatcher, he believed in the free market. In addition he introduced reforms in the system of government including the abolition of voting rights of hereditary peers in the House of Lords and the setting up of directly elected assemblies for Scotland, Wales and Northern Ireland. Blair showed greater enthusiasm for involvement in Europe while the war in Iraq went some way to recementing the 'special relationship' with the USA. Fears of terrorist reprisals for British involvement in the Iraq war were realised on 7 July 2005 when bombs planted on three London underground trains and a bus killed 52 people. Gordon Brown, the chancellor during Blair's premiership, succeeded him as prime minister in June 2007. He was replaced by Conservative leader David Cameron, who took office in May 2010 in a coalition with the Liberal Democrats to end 13 years of Labour rule.

<sup>1</sup>Areas now included in Wales formed the English county of Monmouthshire until 1974.

<sup>2</sup>The final counts for England and Wales are believed to be over-stated as a result of an error in processing. The preliminary counts presented here rounded to the nearest hundred are thought to be more accurate.

<sup>3</sup>There was a high level of non-enumeration in Northern Ireland during the 1981 census mainly as a result of protests in Catholic areas about the Republican hunger strikes.

The land area of the United Kingdom in 2011 was 242,509 sq. km; density, 261 per sq. km. 79.8% of the population lived in urban areas in 2011. London had a 2011 population of 8,174,000.

The UN gives a projected population for 2015 of 63.94m.

In Scotland about 2% of the population in 2001 were from a minority (non-White) ethnic group, compared with 1.3% in 1991. Pakistanis formed the largest such group, constituting 0.3%.

The following table shows the distribution of the urban and rural population in the United Kingdom since 1960:

|      | Population in thousands |             | Percentage |       |
|------|-------------------------|-------------|------------|-------|
|      | Urban areas             | Rural areas | Urban      | Rural |

Urban and rural areas were re-defined for the 1981 and 1991 censuses on a land use basis. In Scotland 'localities' correspond to urban areas. The 1981 census gave the usually resident population of England and Wales as 48,521,596, of which 43,599,431 were in urban areas; and of Scotland as 5,035,315, of which 4,486,140 were in localities.

**British Citizenship.** Under the British Nationality Act 1981 there are three main forms of citizenship: citizenship for persons closely connected with the UK; British Dependent Territories citizenship; British Overseas citizenship. British citizenship is acquired automatically at birth by a child born in the UK if his or her mother or father is a British citizen or is settled in the UK. A child born abroad to a British citizen is a British citizen by descent. British citizenship may be acquired by registration for stateless persons, and for children not automatically acquiring such citizenship or born abroad to parents who are citizens by descent; and, for other adults, by naturalization. Requirements for the latter include five years' residence (three years for applicants married to a British citizen). The Hong Kong (British Nationality) Order 1986 created the status of British National (Overseas) for citizens connected with Hong Kong before 1997, and the British

Nationality (Hong Kong) Act 1990 made provision for up to 50,000 selected persons to register as British citizens.

**Emigration and Immigration.** Immigration is mainly governed by the Immigration Act 1970 and Immigration Rules made under it. British and Commonwealth citizens with the right of abode before 1983 are not subject to immigration control, nor are citizens of European Economic Area countries. Other persons seeking to work or settle in the UK must obtain a visa or entry clearance.

Total international migration estimates for recent years are as follows.

Inflows (in 1,000):

|      | Total | British | Non-British |
|------|-------|---------|-------------|
| 2007 | 574   | 74      | 500         |

| 2010 | 591   | 93      | 498         |

Outflows (in 1,000):

|      | Total | British | Non-British |
|------|-------|---------|-------------|
| 2007 | 341   | 171     | 169         |
| 2008 | 427   | 173     | 255         |
| 2009 | 368   | 140     | 228         |
| 2010 | 339   | 136     | 203         |

The number of immigrants into the UK in 2006, at 596,000, was the highest on record for a calendar year. The number of emigrants from the UK in 2008, at 427,000, was the highest on record for a calendar year. The number of emigrants in 2010 was the lowest since 2001. Net migration—the difference between immigration and emigration—was 252,000 in 2010 (the highest on record for a calendar year), up from 198,000 in 2009. Emigration from the UK last exceeded immigration into the UK in 1993.

In 2010 there were 241,192 grants of settlement in the UK (194,781 in 2009 and 148,936 in 2008), including from Asia, 121,812; and Africa, 64,875. Main individual countries were: India, 37,436; Pakistan, 21,382; China, 14,616; Nigeria, 10,031; Philippines, 9,934; Zimbabwe, 9,848. In 2008, 6.6% of the UK's population were foreign citizens, compared to the EU-wide average of 6.2%.

**Asylum.** In 2010 there were 17,916 applications for asylum, down from 24,487 in 2009 and the high of 84,132 in 2002. The main countries of origin in 2010 were Iran, Afghanistan, Zimbabwe, Pakistan, Sri Lanka and China. Applications, including dependants, were 22,644 in 2010. While respecting its obligations to political refugees under the UN Convention and Protocol relating to the status of Refugees, the government has powers under the Asylum and Immigration Act 1996 to weed out applicants seeking entry for non-political reasons and to designate certain countries as not giving risk of persecution.

## SOCIAL STATISTICS

UK statistics, 2010: births, 807,271; deaths, 561,666; marriages (provisional), 277,736; divorces (provisional), 132,338. UK rates (per 1,000 population), 2010: birth, 13.0; death, 9.0; marriage (provisional), 4.5; divorce (provisional), 2.1. The number of births in the UK in 2010 was the highest since 1972; the number of deaths in 2009 was the lowest since the early 1930s. Provisional statistics, 2011: births, 807,776; deaths, 552,232. In 1976, for the only time in the 20th century, deaths in the UK (680,800) exceeded births (675,500). In 2007 cancer caused 159,000 deaths (28% of all deaths in the UK, making it the biggest killer, ahead of

coronary heart disease, at 91,000 (16%) and respiratory diseases, at 78,000 (14%). UK life expectancy, 2008–10: males, 78.2 years; females, 82.3. The World Health Organization's *World Health Statistics 2009* put the UK in joint 21st place in a 'healthy life expectancy' list, with an expected 72 years of healthy life for babies born in 2007. Annual population growth rate, 2001–10, 0.6%. In 2007, 16.0% of the total population was over 65, up from 11.7% in 1960. In 2009 there were 5,675 suicides (4,304 of whom were men), giving a suicide rate of nine per 100,000 population. Infant mortality, 2008, 4.7 per 1,000 live births. Fertility rate, 2010, 2.0 births per woman. Of the 794,383 live births in the UK in 2008, 45.4% were to unmarried women, up from 6% in 1961 and 20% in 1986. In 1999 for the first time there were more births to women in the 30–34 age group in the UK than in the 25–29 bracket. 63% of dependent children lived in married couple families in the UK in 2010 and 23% in single-parent families.

Great Britain statistics, 2009: births, 765,924; deaths, 545,204; marriages, 259,967; divorces, 124,343; abortions, 208,748. In 2010 the average household in Great Britain consisted of 2.4 people, down from 3.1 in 1961. A UNICEF report published in 2010 showed that 12.1% of children in the UK live in relative poverty (living in a household in which disposable income—when adjusted for family size and composition—is less than 50% of the national median income), compared to just 4.7% in Iceland.

England and Wales statistics (in 1,000), 2009 (and 2008): births, 706 (709); deaths, 491 (509); marriages, 232 (236); divorces, 114 (122). In 2003 there was a rise in the number of births for the first time since 1996, a trend which has generally continued since. Provisional totals for 2010 suggest that the annual number of births in England and Wales is now at its highest level since the early 1970s. The under 18 conception rate for 2010 was the lowest since 1969, at 35.5 conceptions per 1,000 females aged 15–17. By 2010 the number of centenarians had reached an estimated 11,600 in England and Wales. The average age of first marriage in England and Wales in 2009 was 32 years for men and 30 years for women, up from 25 years for men and 23 years for women in 1971. 67% of marriages in England and Wales in 2009 were civil and 33% religious, compared to 51% religious and 49% civil in 1991. Same-sex civil partnerships were legalized in Dec. 2005.

Britain has one of the highest rates of drug usage in Europe. Figures released in 2005 showed that 38% of schoolchildren in England and Wales aged 15 and 16 have used cannabis. In 2007–08, 15.4% of 16 to 30-year-olds had used cannabis and 5.0% cocaine. A 2009 report found that use of ecstasy and amphetamines in England and Wales was the highest in the European Union and cocaine use the second highest after Spain. There were 2,878 recorded drug-related deaths in England and Wales in 2009, down slightly from 2,928 in 2008 and from a peak of 3,110 in 1999, although up from 2,570 in 2006.

## CLIMATE

The climate is cool temperate oceanic, with mild conditions and rainfall evenly distributed over the year, though the weather is very changeable because of cyclonic influences. In general, temperatures are higher in the west and lower in the east in winter and rather the reverse in summer. Rainfall amounts are greatest in the west, where most of the high ground occurs.

London, Jan. 39°F (3.9°C), July 64°F (17.8°C). Annual rainfall 25" (635 mm). Aberdeen, Jan. 38°F (3.3°C), July 57°F (13.9°C). Annual rainfall 32" (813 mm). Belfast, Jan. 40°F (4.5°C), July 59°F (15.0°C). Annual rainfall 37.4" (950 mm). Birmingham, Jan. 38°F (3.3°C), July 61°F (16.1°C). Annual rainfall 30" (749 mm). Cardiff, Jan. 40°F (4.4°C), July 61°F (16.1°C). Annual rainfall 42.6" (1,065 mm). Edinburgh, Jan. 38°F (3.3°C), July 58°F (14.5°C). Annual rainfall 27" (686 mm). Glasgow, Jan. 39°F (3.9°C), July 59°F (15.0°C). Annual rainfall 38" (965 mm). Manchester, Jan. 39°F (3.9°C), July 61°F (16.1°C). Annual rainfall 34.5" (876 mm).

The Queen's legal title rests on the statute of 12 and 13 Will. III, ch. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor. On 8 Feb. 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor.

*Lineage to the throne.* 1) Prince of Wales. 2) Prince William of Wales. 3) Prince Henry of Wales. 4) Duke of York. 5) Princess Beatrice of York. 6) Princess Eugenie of York.

By letters patent of 30 Nov. 1917 the titles of Royal Highness and Prince or Princess are restricted to the Sovereign's children, the children of the Sovereign's sons and the eldest living son of the eldest son of the Prince of Wales.

Traditionally provision has been made for the support of the royal household, after the surrender of hereditary revenues, by the settlement of the Civil List soon after the beginning of each reign.

The Civil List Act of 1 Jan. 1972 provided for a decennial, and the Civil List (Increase of Financial Provision) Order 1975 for an annual review of the List, but in July 1990 it was again fixed for one decade. The Civil List of 2012 provided for an annuity of £7,900,000 to the Queen annually; and £359,000 to Prince Philip. These amounts were the same as for the periods 2001–10 and 1991–2000. The income of the Prince of Wales derives from the Duchy of Cornwall. The Civil List was exempted from taxation in 1910. The Queen has paid income tax on her private income since April 1993. In Oct. 2010 Chancellor George Osborne announced that from 2013 the Civil List would be abolished. It has been replaced by a Sovereign Support Grant combining the Civil List and three Grants-in-Aid into one payment, with the Queen receiving 15% of the profits from the Crown Estate but two years in arrears. The Sovereign Grant is set at £36.1m. for 2013–14.

The supreme legislative power is vested in Parliament, which consists of the Crown, the House of Lords and the House of Commons, and evolved into something resembling its present form in the mid-14th century. A Bill which is passed by both Houses and receives Royal Assent becomes an Act of Parliament and part of statute law.

Parliament is summoned, and a General Election is called, by the sovereign on the advice of the Prime Minister. Under the Fixed Term Parliaments Act 2011 a Parliament lasts five years, normally divided into annual sessions. A session is ended by prorogation, and most Public Bills which have not been passed by both Houses then lapse, unless they are subject to a carry over motion. A Parliament ends by dissolution at the end of five years, if a motion of no confidence is passed and no alternative government is found or if a motion for an early general election is agreed by at least two-thirds of the House of Commons.

Under the Parliament Act 1911 all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the Lords without amendment, may become law without their concurrence within one month of introduction in the Lords. Under the Parliament Acts 1911 and 1949 Public Bills introduced in the House of Commons, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the Commons in two successive sessions and rejected each time by the Lords, may become law without being passed by the Lords provided that one year has elapsed between Commons second reading in the first session and passing of the bill by the Commons in the second session, and that the Bill reaches the Lords at least one month before the end of the second session. The Parliament Acts have been used four times since 1949: in 1991 for the War Crimes Act, in 1999 for the European Parliamentary Elections Act, in 2000 for the Sexual Offences (Amendment) Act and for the Hunting Act in 2004.

Peerages are created by the sovereign, on the advice of the Prime Minister, with no limits on their number. The following are the main categories of membership (composition at 6 Sept. 2011, excluding 24 members who were on leave of absence, 13 disqualified as senior members of the judiciary, one disqualified as a MEP and one suspended):

| <i>Party</i>            | <i>Excepted<br/>Life Peers</i> | <i>Hereditary<br/>Peers<sup>1</sup></i> | <i>Bishops</i> | <i>Total</i> |

The House of Commons consists of Members (of both sexes) representing constituencies determined by the Boundary Commissions. Persons under 18 years of age (since July 2006—formerly 21 years), Clergy of the Church of England and of the Scottish Episcopal Church, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen, most judicial officers and other office-holders named in the House of Commons (Disqualification) Act are disqualified from sitting in the House of Commons. In general hereditary peers are no longer disqualified from membership of the Commons, following the passage of the House of Lords Act 1999. However, the 92 hereditary peers who still sit in the Lords remain disqualified, as do the few hereditary peers who were given life peerages after the passing of the 1999 Act. Life peers are disqualified from membership of the House of Commons.

The Representation of the People Act 1948 abolished the business premises and university franchises, thus ending the practice of plural voting previously afforded certain graduates and business-owners. Only registered persons can vote at Parliamentary elections. No person may vote in more than one constituency at a general election. All persons may apply to vote by post if they are unable to vote in person, or if they fulfil certain legal requirements they may also be entitled to vote by proxy. Elections are held on the first-past-the-post system, in which the candidate who receives the most votes is elected.

All persons over 18 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of Ireland are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register, and are entitled to vote at elections held during the period for which the register remains in force.

Members of the armed forces, Crown servants employed abroad and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as 'service voters' provided they make a 'service declaration'. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register. In certain circumstances, British subjects living abroad may also vote.

The Parliamentary Constituencies Act 1986, as amended by the Boundary Commissions Act 1992, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions' last reports were made in Feb. 2007, and future reports will be due at intervals of not less than eight and not more than 12 years; and may be submitted from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The Parliamentary electorate of the United Kingdom and Northern Ireland in the register in Dec. 2009 numbered 45,420,808 (38,129,082 in England, 2,261,269 in Wales, 3,869,700 in Scotland and 1,160,757 in Northern Ireland).

At the UK general election held on 6 May 2010, 649 out of 650 members were returned, 532 from England, 59 from Scotland, 40 from Wales and 18 from Northern Ireland. Every constituency returns a single member. Voting was postponed until 27 May in Thirsk and Malton owing to the death of a candidate shortly before the election.

On 5 May 2011 a referendum was held on proposals to replace the 'first past the post' electoral system (in which each constituency returns the candidate polling the largest number of votes) with an 'alternative vote' system (AV). The promise of a referendum on the issue was a key condition for the Liberal Democrats joining the coalition government following the 2010 general election. Under the AV system, voters rank candidates in order of preference, with the votes of the candidate receiving least support redistributed until one candidate has over 50% of votes. The Liberal Democrats and the Labour Party campaigned in support of moving to AV while the Conservatives opposed it. Turnout was 42.0%, with 67.9% of votes against the change and 32.1% in favour.

One of the main aspects of the former Labour government's programme of constitutional reform was Scottish and Welsh devolution. In the referendum on Scottish devolution on 11 Sept. 1997, 1,775,045 votes (74.3%) were cast in favour of a Scottish parliament and 614,400 against (25.7%). The turnout was 60.4%, so around 44.8% of the total electorate voted in favour. For the second question, on the Parliament's tax-raising powers, 1,512,889 votes were cast in favour (63.5%) and 870,263 against (36.5%). This represented 38.4% of the total electorate.

On 18 Sept. 1997 in Wales there were 559,419 votes cast in favour of a Welsh assembly (50.3%) and 552,698 against (49.7%). The turnout was 51.3%.

For MPs' salaries see *below*. Members of the House of Lords are unsalaried but may recover expenses incurred in attending sittings of the House by claiming a flat rate attendance allowance of £150 or £300. Additionally, Members of the House who are disabled may recover the extra cost of attending the House incurred by reason of their disablement. In connection with attendance at the House and parliamentary duties within the UK, Lords may also recover the cost of travelling to and from home.

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons. The head of the Cabinet is the *Prime Minister*, a position first constitutionally recognized in 1905. The Prime Minister's colleagues in the Cabinet are appointed on his recommendation.

**Salaries.** Members of Parliament received an annual salary of £65,738 in 2012–13 (unchanged since 2010–11). Ministers who are MPs also receive a ministerial salary. Salary entitlements for 2012–13 (including parliamentary salaries where applicable): Prime Minister, £142,500 (£76,762 ministerial salary); Cabinet Ministers, £134,565 (in the House of Lords, £101,038); Ministers of State, £98,740 (in the Lords £78,891); Parliamentary Under-Secretaries, £89,435 (in the Lords, £68,710); Government Chief Whip, £134,565 (in the Lords, £78,891); Leader of the Opposition, £128,836 (in the Lords, £68,710); Speaker, £141,504; Attorney General, £161,510; Solicitor General, £124,986; Advocate General for Scotland, £91,775. Following a scandal over MPs' abuse of expenses, the Parliamentary Standards Act 2009 was passed in July 2009 creating the Independent Parliamentary Standards Authority (IPSA). Reforms to the expenses system were introduced by the IPSA in May 2010.

**The Privy Council.** Before the development of the Cabinet System, the Privy Council was the chief source of executive power, but now its functions are largely formal. It advises the monarch to approve Orders in Council and on the issue of royal proclamations, and has some independent powers such as the supervision of the registration of the medical profession. It consists of all Cabinet members, the Archbishops of Canterbury and York, the Speaker of the House of Commons and senior British and Commonwealth statesmen. There are a number of advisory Privy Council committees. The Judicial Committee is the final court of appeal from courts of the UK dependencies, the Channel Islands and the Isle of Man, and some Commonwealth countries.

**Freedom of Information Act.** The Freedom of Information Act 2000 was implemented gradually between Nov. 2002 and Jan. 2005 when the General Right of Access to all information became law. Not to be confused with the Data Protection Act of 1998, the FOIA allows individuals to gain access to information held by public authorities in England, Wales and Northern Ireland. A separate Act applies in Scotland. Some information is exempted from release, for example security-related documents. An independent Commissioner for Information oversees the process.

### Local Government

Administration is carried out by four types of bodies: (i) local branches of some central ministries, such as the Departments of Health and Social Security; (ii) local sub-managements of nationalized industries; (iii) specialist authorities such as the National Rivers Authority; and (iv) the system of local government described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils. There are separate systems for England, Wales, Scotland and Northern Ireland.

The Local Government Act 1992 provided for the establishment of new unitary councils (authorities) in England, responsible for all services in their areas, though the two-tier structure of district and county councils remained for much of the country. In 1996 all of Wales and Scotland was given unitary local government systems. In April 2009 a further nine single-tier unitary authorities were created in a bid to simplify the system.

Local authorities have statutory powers and claims on public funds. Relations with central government are maintained through the Department for Communities and Local Government in England, and through the Welsh and Scottish Executives. In England the Home Office is concerned with some local government functions. (These are performed by departments within the Welsh and Scottish Offices.) Ministers have powers of intervention to protect individuals' rights and safeguard public health, and the government has the power to cap (i.e. limit) local authority budgets.

The chair of the council (known as the Mayor in boroughs and cities) is traditionally one of the councillors elected by the rest. However, the Mayor of London has been directly elected since 1999 and following the Local Government Act 2000, 15 councils in England have also introduced direct mayoral elections. Mayors of cities may have the title of Lord Mayor conferred on them. 51 towns in England, seven in Scotland, six in Wales and five in Northern Ireland have the status of city. Brighton and Hove, Wolverhampton and Inverness were awarded city status in 2000. In 2002 Preston, Newport, Stirling, Lisburn and Newry were given city status to mark Queen Elizabeth II's golden jubilee; and in 2012 Chelmsford, Perth and St Asaph were granted city status to mark her diamond jubilee. This status is granted by the personal command of the monarch and confers no special privileges or powers. In Scotland, the chair of city councils is deemed Lord Provost, and is elsewhere known as Convenor or Provost. In Wales, the chair is called Chairman in counties and Mayor in county boroughs. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community.

**Functions.** Legislation in the 1980s initiated a trend for local authorities to provide services by, or in collaboration with, commercial or voluntary bodies rather than provide them directly. Savings are encouraged by compulsory competitive tendering. In England, county councils are responsible for strategic planning, transport planning, non-trunk roads and regulation of traffic, personal social services, consumer protection, disposal of waste, the fire and library services and, partially, for education. District councils are responsible for environmental health, housing, local planning applications (in the first instance) and refuse collection. Unitary authorities combine the functions of both levels.

**Finance.** Revenue is derived from the Council Tax, which supports about one-fifth of current expenditure, the remainder being funded by central government grants and by the redistribution of revenue from the national non-domestic rate (property tax). Capital expenditure is financed by borrowing within government-set limits and sales of real estate.

**Elections.** Elections. England: The 36 metropolitan districts are divided into wards, each represented by three councillors. One-third of the councillors are elected each year for three years out of four. All metropolitan districts had an election on 3 May 2012. The 201 district councils and the 56 English unitary authorities are divided into wards. Each chooses either to follow the metropolitan district system, or to have all seats contested once every four years, or to elect by halves every two years. 92 district councils had an election on 3 May 2012. The 27 county councils have one councillor for each electoral division, elected every four years, with elections next scheduled for 2017.

In London there are 33 councils (including the City of London), the whole of which are elected every four years. London borough elections took place on 6 May 2010. The Greater London Authority has a 25-member Assembly, elected using AMS (Additional Member System), and a directly elected mayor, elected by the SV (Supplementary Vote) system. For the election of London Assembly members London is divided into 14 constituencies. Each constituency elects one member, in addition to which there are 11 'London Member' seats. Boris Johnson (Con.) was re-elected mayor on 3 May 2012.

Wales: The 22 unitary authorities are split between single and multi-member wards, elected every four years. Elections for 21 authorities were held on 3 May 2012.

Scotland: The 32 unitary authorities generally hold elections every four years. The last elections, held on 3 May 2012, were delayed by one year to avoid a clash with elections to the Scottish parliament in May 2011. The next elections are scheduled for 2017 and thereafter local elections will revert to a four-year cycle.

Resident citizens of the UK, Ireland, a Commonwealth country or an EU country may vote and stand for election at age 18.

**Election Results.** English elections for 35 councils (of which 27 non-metropolitan county councils, seven unitary authorities and the Isles of Scilly) took place on 2 May 2013. Excluding the Isles of Scilly—where all the councillors are independents—the Conservatives secured control over 18 councils (a net loss of 10), Labour 3 (a net gain of 2) and no overall control in the remaining 13. The Conservatives lost 335 seats (for a total of 1,116), Labour gained 291 (538), the Liberal Democrats lost 124 (352), the UK Independence Party gained 139 (147) and others gained 29 (209).

English elections for 36 metropolitan boroughs, 18 unitary authorities and 74 districts on 3 May 2012 resulted in Labour control of 61 councils, Conservative 42, the Liberal Democrats 6 and no overall control in 19. Labour gained 534 seats (1,188 overall), the Conservatives lost 328 (total 785), the Liberal Democrats lost 190 (total 289) and others lost 52 (total 152).

English elections for 36 metropolitan boroughs, 49 unitary authorities and 194 districts on 5 May 2011 resulted in Conservative control of 157 councils, Labour 57, the Liberal Democrats 10 and others 55. The Conservatives gained 81 seats (4,820 overall), Labour gained 800 (total 2,392), the Liberal Democrats lost 695 (total 1,056) and others lost 199 (total 761).

English elections for 36 metropolitan boroughs, 32 London boroughs, 20 unitary authorities and 76 shire district councils were held on 6 May 2010. The Conservatives emerged with control of 65 councils (a net loss of 8), Labour 37 (net gain 15), Liberal Democrats 13 (net loss 4), with no overall control in 45.

Elections for 21 Welsh unitary authorities held on 3 May 2012 resulted in Labour control of ten councils, independent control of two and no overall control in nine councils. An election for Anglesey's unitary authority on 2 May 2013 resulted in a continuation of no party having overall control.

Elections for all 32 unitary authorities in Scotland held on 3 May 2012 resulted in Labour control of 4 councils, Scottish National Party control of 2 and independents 3, with no overall control in the remaining 23. The Scottish National Party won 424 seats; Labour, 394; the Conservatives, 115; the Liberal Democrats, 71; the Greens, 14; the Scottish Socialist Party, 1; and others, 201.

Elections for London's Mayor and a 25-member London Assembly took place on 3 May 2012. Boris Johnson (Con.) won with 51.53% of the vote (including second preferences). He gained 1,054,811 votes (971,931 as first votes) against 992,273 votes (889,918 as first votes) for former mayor Ken Livingstone (Lab.).

### RECENT ELECTIONS

At the general election of 6 May 2010, 29,653,638 votes were cast. The Conservative Party won 306 seats with 36.1% of votes cast (197 with 32.3% in 2005); the Labour Party 258 with 29.0% (356 seats with 35.2%); the Liberal Democrats 57 with 23.0% (62 with 22.1%); Green 1 (others 3). Regional parties (Scotland): the Scottish National Party won 6 seats (6 in 2005); (Wales): Plaid Cymru 3 (3); (Northern Ireland): the Democratic Unionist Party 8 (9); Sinn Féin 5 (5); the Social and Democratic Labour Party 3 (3); the Alliance Party 1 (0). Voting was postponed in one constituency (Thirsk and Malton) following the death of a candidate but a subsequent by-election held on 27 May saw the Conservatives win the seat, bringing their total to 307. The Conservatives gained 100 seats and lost 3; Labour gained 3 seats and lost 94; the Liberal Democrats gained 8 seats and lost 13. Turnout was 65.1% (61.3% in 2005).

### European Parliament
