PREFACE

If you happen to be reading the profiles of people in the corporate world, or dealing with qualified business persons or even undertaking some activity in the world of business, chances are that you will inevitably come across certain designations and designatory letters used after peoples' names that will baffle you. You will ask yourself: "What are those? What do they mean? Where were they obtained?" Where can I get some information on them?" Ever wonder where you can start looking for the answers? You would think that such information is readily available only to find out that it is not. In the past, you would certainly have been at the mercy of libraries and professional associations only to discover that they, too, were in the dark. Not anymore.

This guide covers over 2,000 of the known professional designations and designatory letters in accounting, auditing, finance, investment, insurance, logistics, management, purchasing, marketing, actuarial science, consulting, corporate governance, information technology, information technology security, supply management, banking, real estate, taxation, inventory management and other related disciplines. Over 980 professional bodies from 147 countries around the world are in this handy reference. It is certainly not an exhaustive one as some organizations might have been unintentionally omitted, but, it represents a good start for information on professional designations.

Why such a directory in the first place? Several reasons propel me to research the material for this book, the more important of which are

- **Globalization.** As the world is rapidly becoming one big global village, there is a great need to understand information on professional organizations around the world.
- **Multinationals.** Qualified personnel from their corporate staff headquarters are sent to the branches of these giants all over the world where they are also required to recruit local staff.
- In **both** cases, professionals will need to know what the local and foreign professional qualifications are in order to determine peer acceptance, reciprocity and compliance with any local laws.
- **Career guidance.** College and university students, career guidance counselors and others will find that this is a good starting point in seeking or advising on a career in the world of business. This book will save valuable time and resources that would otherwise be spent rummaging through voluminous sources for information leading up to the designations listed here.
- **Clarification.** Human Resources (HR) and other corporate departments are sometimes at a loss as to the nature and meaning of certain designations. While some credentials like the Certified Internal Auditor (CIA) and Certified Information Systems Auditor (CISA) pose no problem since each is the only of its kind administered by a single body worldwide, the same is not true for others. For instance, the Certified Public Accountant (CPA) and Chartered Accountant (CA) designations are not solely restricted to the United States and Scotland, respectively. There are now scores of professional administering bodies that award CPAs and CAs all over the world. Each varies in terms of scope, objective, experience requirement, and depth of technical knowledge.
- **Information.** In the academic world, there is a range of material such as individual university calendars, the Commonwealth Universities Yearbook, Higher Education Directory, International Handbook of Universities, World Guide to Higher Education, and so forth on degree programs given by colleges, universities and other institutions of higher learning. But have you ever wondered where to initially look for information

on the CPA, CMA, CIA, CPM, ASIA, CFA, FLMI, FCIA, CA, or ACCA, just to name a few? Until this guide was produced, there was no material in this area.

- **Research.** Accounting firms, members of academe, libraries, professional accounting and business organizations and researchers will all find this directory helpful in pinpointing certain designations and what they mean. Contact can also be made with the professional bodies listed for sharing knowledge on common issues. It is hoped that they will all contribute towards harmonizing the various professions on a global basis.

What then does this directory set to prove? It can be used to track organizations around the world to provide further material on the programs leading up to the qualifications they offer which are listed here. The descriptions obtained can then be evaluated to measure their worth, coverage, and in-depth level to determine comparability for peer acceptance.

The book is organized alphabetically by countries. Each entry listed has 11 fields as follows:

Designation:	Address:
Designatory Letters:	Telephone:
Administering Body:	E-mail:
Membership:	Fax:
Profession:	Web:
Established:	

Certain fields do not apply to some organizations, for example, the International Federation of Accountants that grants no designation or designatory letters or the Financial Accounting Standards Board that has no membership. These are denoted as 'NA.' For others, especially the non-English speaking countries, it was difficult obtaining information for these fields and others. A dash (--) has therefore been inserted in a particular field where the information sought was not obtained. It is hoped that there will be an improvement in this area in a future edition of the guide.

Designations and designatory letters are spelled out. In some instances, the professional bodies insist on this distinction. Memberships are rounded and approximate. Some professional bodies keep their membership a closely guarded secret refusing to divulge the information while others willingly provide the numbers. For some organizations, the membership numbers refer to the amount of certification holders. The year the organization was established will be useful for those who have an interest in business history and the impact of professional associations on business trends. In this era of technology, most organizations have e-mail addresses and Web sites of their own. However, some do not have any contact details at all but they can be tracked through umbrella organizations to which they belong.

Please note that the mentioning of a professional body in this guide does not validate or endorse that particular administering body and where applicable, the certification/s it offers. That was not the intention of the book. Rather, it was put together to help clarify the meaning of designatory letters and provide the contact details of their administering bodies.

Finally, readers are encouraged to provide information on any professional body that has not been listed in this guide for a future revised edition.

ABOUT THE AUTHOR

Lal Balkaran is self-taught and is a Certified Internal Auditor (CIA), Certified General Accountant (CGA), Fellow of the Chartered Institute of Management Accountants of the UK (FCMA), and Fellow of the Institute of Chartered Secretaries and Administrators in Canada (FCIS). He also holds an MBA from Heriot-Watt University of Edinburgh, Scotland.

Mr. Balkaran has had over 25 years of senior finance and varied internal auditing experience obtained in a wide range of industries in the Caribbean and North America. He has had articles published in several international journals including four in the Institute of Internal Auditor's (IIA) own prestigious *Internal Auditor*. On top of this, he has authored the following six reference books on international professional accounting and business certification programs:

- *A Practical Guide to Auditing and Related Terms* [World's first dictionary of auditing]
- *Accountants & Related Professionals: Reciprocal Memberships & Peer Acceptance*
- *Handbook of Global Professional Accounting Programs*
- *Handbook of Global Professional Business Programs*
- *Managerial Control Techniques* and
- *Professional Accounting & Business Programs: Effective Study and Examination Techniques*

He also wrote five reference books on his native Guyana. Mr. Balkaran taught courses in Internal Auditing, Management Accounting, and Quantitative Techniques, and was an external examiner to two Commonwealth universities.

He is a past President of the Toronto Chapter of the IIA and was recently made an Honorary Member of the chapter. Mr. Balkaran has also done several seminars in North America and the Caribbean on internal auditing related topics. He is a member of the IIA's Global Board of Research and Education Advisors, the *Internal Auditor* Editorial Advisory Board, and the Internal Audit Advisory Committee of the Treasury Board of Canada. Mr. Balkaran is also the founder of IIA-Guyana.

He currently works as a Senior Manager in the Advisory Practice of KPMG in Toronto.
