*Health Care State Rankings 2007* sells for \$59.95 (\$6 shipping) and is only available in paper binding. For those who prefer ranking information tailored to a particular state, we also offer Health Care State Perspectives, state-specific reports for each of the 50 states. These individual guides provide information on a state's data and rank for each of the categories featured in the national Health Care State Rankings volume. Perspectives sell for \$19 or \$9.50 if ordered with Health Care State Rankings. If crime statistics are your interest, please ask about our annual Crime State Rankings (\$59.95 paper). If you are interested in city and metropolitan crime data, we offer City Crime Rankings (\$49.95 paper). For a general view of the states, please ask about our annual State Rankings reference book (\$59.95 paper) or our new annual State Trends (\$59.95 paper). Also available is Education State Rankings. This view of preK-12 education at the state level is \$59.95. All of our books are available on CD-ROM in PDF format (same price as printed book) or with both PDF format and data sets in various database formats (\$99.95). Shipping and handling is \$6 per order. For information, please visit our website at [www.statestats.com](http://www.statestats.com).

March 2007

# PREFACE

A strong health care system is a major factor in the quality of life of every state and community. Along with good medical care and hospitals, citizens and leaders need to have access to straightforward, unbiased and reliable health care information. This newly revised, 15th edition of *Health Care State Rankings* provides a huge collection of relevant, user-friendly health care data for each of the 50 United States. Our books provide this information with no agenda other than to bring readers the most up-to-date and reliable collection of state health care facts possible.

Virtually every aspect of health care is addressed in *Health Care State Rankings 2007*. Births and reproductive health, deaths, disease, insurance and finance, health care providers, facilities and physical fitness are compared state-by-state. From the average cost of health insurance premiums to teen birth rates, *Health Care State Rankings 2007* is an essential information tool for researchers, librarians, community leaders and concerned citizens throughout the United States.

## Important Notes About *Health Care State Rankings 2007*

*Health Care State Rankings 2007* presents information from government and private sector sources in one user-friendly volume. Our goal is to translate complicated and often convoluted health care data into easy-to-understand, meaningful state comparisons. As we revise this volume each year, we reexamine each table, update most, delete others and add new tables of interest to our readers.

We make every effort to present the data in *Health Care State Rankings 2007* as simply and straightforwardly as possible. Source information and other pertinent footnotes are clearly shown at the bottom of each page. National totals, rates and percentages are prominently displayed at the top of each table. Every other line is shaded in gray for easier reading. In addition, numerous information-finding tools are provided: a thorough table of contents, table listings at the beginning of each chapter, a roster of sources with addresses and phone numbers, a detailed index and a chapter thumb index.

The numbers shown in *Health Care State Rankings* require no additional calculations to convert them from millions, thousands, etc. All states are ranked on a high to low basis, with any ties among the states listed alphabetically for a given ranking. Negative numbers are shown in parentheses “( ).” For tables with national totals (as opposed to rates, per capita, etc.) a separate column is included showing what percent of the national total each individual state’s total represents. This column is headed by “% of USA.” This percentage figure is particularly interesting when compared with a state’s share of the nation’s population for a particular year (see appendix.)

For those researchers needing information for just one state, our *Health Care State Perspective* series of

publications fills the bill. These 21-page comb bound reports feature data and ranking information for an individual state, as reported in *Health Care State Rankings 2007*. (For example *California Health Care in Perspective* features information about the state of California only.) These serve as handy, quick reference guides for those who do not want to page through the entire *Health Care State Rankings* volume searching for information for their particular state. *Health Care State Perspectives* sell for \$19. When purchased with a copy of *Health Care State Rankings 2007*, these handy quick reference guides are just \$9.50. For additional information, please call us toll-free at 1-800-457-0742.

## Other Books From Morgan Quitno Press

In addition to *Health Care State Rankings 2007*, our company offers five other annual rankings reference books. *State Rankings* is our original title, providing a general view of the states. Now in its 18th edition, *State Ranking 2007* provides easy-to-understand state comparisons in agriculture, transportation, government finance, health, crime, education, housing, energy and so much more. *Education State Rankings 2006-2007* takes an in-depth look at preK-12 education, comparing states in teachers’ salaries, class sizes, per pupil spending, graduation rates and 400 other categories. *Crime State Rankings 2007* provides a huge collection of user-friendly state statistics regarding law enforcement personnel and expenditures, corrections, juvenile crime and delinquency, arrests and offenses. A companion volume, *City Crime Rankings*, compares crime in all metropolitan areas and cities of 75,000 or more population (approx. 370 cities). Numbers of crimes, crime rates and changes in crime rates over one and five years are presented for all major crime categories reported by the FBI. *State Trends* is the newest reference book in Morgan Quitno’s collection. Now in its third edition, this volume has earned rave reviews for providing a quick and easy way to track important changes in the 50 United States. One, five, 10 and 20-year trends are measured for a wide variety of quality of life factors.

The information in all our books also is available on CD-ROM. These electronic editions provide a searchable PDF version of each book as well as the raw data in .dbf, Excel and ASCII formats. Additional information about all of our publications, including prices and ISBN numbers, is available online at [www.morganquitno.com](http://www.morganquitno.com) or by calling 1-800-457-0742.

Finally, we are so thankful for the many librarians, government and health care industry officials who help us understand and decipher data year after year. Thanks also to you, our readers, for helping us keep our books relevant and useful. Please continue to send your comments to [information@morganquitno.com](mailto:information@morganquitno.com). We look forward to hearing from you.

# WHICH STATE IS HEALTHIEST?

Vermont is on a healthy winning streak! For the fifth time in six years, Vermont is the nation's Healthiest State. The Green Mountain State has earned bragging rights to first place in Morgan Quitno's 15th annual Healthiest State

Award due to its healthy population and access to affordable and reliable health care. Following Vermont were Minnesota, Massachusetts, Maine and New Hampshire.

At the opposite end of the rankings list, Louisiana slipped to last place, a position it last held in 2005. Joining Louisiana on the less healthy end of the rankings scale were New Mexico, Mississippi, Nevada and Florida.

## Methodology

The Healthiest State designation is awarded based on 21 factors chosen from the 2007 edition of Morgan Quitno's annual reference book, *Health Care State Rankings*. These factors reflect access to health care providers, affordability of health care and a generally healthy population (see box below.)

The 21 factors selected for this year's award remained unchanged from those used last year. The factors were divided into two groups: those that are "negative" for which a high ranking would be considered bad for a state, and those that are "positive" for which a high ranking would be considered good for a state. Rates for each of the 21 factors were processed through a formula that measures how a state compares to the national average for a given category. The positive and negative nature of each factor was taken into account as part of the formula. Once these computations were made, the factors then were weighted equally. These weighted scores then were added together to get a state's final score ("SUM" on the table above). This way, states are assessed based on how they stack up against the national average. The end result is that the farther below the national average a state's health ranking is, the lower (and less healthy) it ranks. The farther above the national average, the higher (and healthier) a state ranks. This same methodology is used for our Dangerous State and Safest/Dangerous City Awards.

The table above shows how each state fared in the 2007 Healthiest State Award as well as its placement in 2006. Our award always spurs some rousing debate among states. While our selection of factors clearly affects the final rankings, we believe that they provide a solid measurement of how states are faring in regard to health care.

Congratulations to Vermont for its continuing success!

### POSITIVE (+) AND NEGATIVE (-) FACTORS CONSIDERED:

1. Births of Low Birthweight as a Percent of All Births (Table 14) -
2. Teenage Birth Rate (Table 33) -
3. Percent of Mothers Receiving Late or No Prenatal Care (Table 62) -
4. Age-Adjusted Death Rate (Table 90) -
5. Infant Mortality Rate (Table 96) -
6. Age-Adjusted Death Rate by Malignant Neoplasms (Table 156) -
7. Age-Adjusted Death Rate by Suicide (Table 180) -
8. Average Annual Family Coverage Health Insurance Premium (Table 237) -
9. Percent of Population Not Covered by Health Insurance (Table 241) -
10. Percent of Children Not Covered by Health Insurance (Table 245) -
11. Estimated Rate of New Cancer Cases (Table 324) -
12. AIDS Rate (Table 352) -
13. Sexually Transmitted Disease Rate (Table 386) -
14. Percent of Population Lacking Access to Primary Care (Table 411) -
15. Percent of Adults Who Are Binge Drinkers (Table 494) -
16. Percent of Adults Who Smoke (Table 495) -
17. Percent of Adults Obese (Table 502) -
18. Percent of Adults Who Do Not Exercise (Table 504) -
19. Beds in Community Hospitals per 100,000 Population (Table 197) +
20. Percent of Children Aged 19-35 Months Immunized (Table 381) +
21. Safety Belt Usage Rate (Table 513) +

# TABLE OF CONTENTS

## I. Births and Reproductive Health

1	Births in 2005
2	Birth Rate in 2005
3	Percent Change in Birth Rate: 1996 to 2005
4	Births in 2004
5	Birth Rate in 2004
6	Fertility Rate in 2005
7	Births to White Women in 2005
8	White Births as a Percent of All Births in 2005
9	Births to Black Women in 2005
10	Black Births as a Percent of All Births in 2005
11	Births to Hispanic Women in 2005
12	Hispanic Births as a Percent of All Births in 2005
13	Births of Low Birthweight in 2005
14	Births of Low Birthweight as a Percent of All Births in 2005
15	Births of Low Birthweight to White Women in 2005
16	Births of Low Birthweight to White Women as a Percent of All Births to White Women in 2005
17	Births of Low Birthweight to Black Women in 2005
18	Births of Low Birthweight to Black Women as a Percent of All Births to Black Women in 2005
19	Births of Low Birthweight to Hispanic Women in 2005
20	Births of Low Birthweight to Hispanic Women as a Percent of All Births to Hispanic Women in 2005
21	Births to Unmarried Women in 2005
22	Births to Unmarried Women as a Percent of All Births in 2005
23	Births to Unmarried White Women in 2005
24	Births to Unmarried White Women as a Percent of All Births to White Women in 2005
25	Births to Unmarried Black Women in 2005
26	Births to Unmarried Black Women as a Percent of All Births to Black Women in 2005
27	Births to Unmarried Hispanic Women in 2005
28	Births to Unmarried Hispanic Women as a Percent of All Births to Hispanic Women in 2005
29	Pregnancy Rate in 2003
30	Teenage Pregnancy Rate in 2003
31	Percent Change in Teenage Pregnancy Rate: 1999 to 2003
32	Births to Teenage Mothers in 2005
33	Teenage Birth Rate in 2005
34	Births to Teenage Mothers as a Percent of Births in 2005
35	Percent Change in Teenage Birth Rate: 2001 to 2005
36	Teenage Birth Rate in 2004
37	Births to White Teenage Mothers in 2005
38	White Teenage Birth Rate in 2005
39	Births to White Teenage Mothers as a Percent of White Births in 2005
40	Births to Black Teenage Mothers in 2005
41	Black Teenage Birth Rate in 2005
42	Births to Black Teenage Mothers as a Percent of Black Births in 2005
43	Births to Young Teenagers: 2002 to 2004
44	Young Teen Birthrate: 2002 to 2004
45	Births to Women 35 to 54 Years Old in 2004
46	Births to Women 35 to 54 Years Old as a Percent of All Births in 2004
47	Births by Vaginal Delivery in 2005
48	Percent of Births by Vaginal Delivery in 2005
49	Births by Cesarean Delivery in 2005
50	Percent of Births by Cesarean Delivery in 2005
51	Percent Change in Rate of Cesarean Births: 2001 to 2005
52	Twin Birth Rate: 2002-2004
53	Assisted Reproductive Technology Procedures in 2003
54	Infants Born from Assisted Reproductive Technology Procedures in 2003
55	Percent of Assisted Reproductive Technology Procedures that Resulted in Live Births in 2003
56	Percent of Total Live Births Resulting from Assisted Reproductive Technology Procedures in 2003
57	Percent of Assisted Reproductive Technology Procedure Infants Born in Multiple Birth Deliveries in 2003
58	Percent of Mothers Beginning Prenatal Care in First Trimester in 2004
59	Percent of White Mothers Beginning Prenatal Care in First Trimester in 2004

# TABLE OF CONTENTS (continued)

- 60 Percent of Black Mothers Beginning Prenatal Care in First Trimester in 2004
- 61 Percent of Hispanic Mothers Beginning Prenatal Care in First Trimester in 2004
- 62 Percent of Mothers Receiving Late or No Prenatal Care in 2004
- 63 Percent of White Mothers Receiving Late or No Prenatal Care in 2004
- 64 Percent of Black Mothers Receiving Late or No Prenatal Care in 2004
- 65 Percent of Hispanic Mothers Receiving Late or No Prenatal Care in 2004

## Abortions

- 66 Reported Legal Abortions in 2003
- 67 Percent Change in Reported Legal Abortions: 1999 to 2003
- 68 Reported Legal Abortions per 1,000 Live Births in 2003
- 69 Reported Legal Abortions per 1,000 Women Ages 15 to 44 in 2003
- 70 Percent of Legal Abortions Obtained by Out-Of-State Residents in 2003
- 71 Percent of Reported Legal Abortions that were First-Time Abortions: 2003
- 72 Percent of Reported Legal Abortions Obtained by White Women in 2003
- 73 Percent of Reported Legal Abortions Obtained by Black Women in 2003
- 74 Percent of Reported Legal Abortions Obtained by Hispanic Women in 2003
- 75 Percent of Reported Legal Abortions Obtained by Married Women in 2003
- 76 Percent of Reported Legal Abortions Obtained by Unmarried Women in 2003
- 77 Reported Legal Abortions Obtained by Teenagers in 2003
- 78 Percent of Reported Legal Abortions Obtained by Teenagers in 2003
- 79 Reported Legal Abortions Obtained by Teenagers 17 Years and Younger in 2003
- 80 Percent of Reported Legal Abortions Obtained by Teenagers 17 Years and Younger in 2003
- 81 Percent of Teenage Abortions Obtained by Teenagers 17 Years and Younger in 2003
- 82 Reported Legal Abortions Performed at 12 Weeks or Less of Gestation in 2003
- 83 Percent of Reported Legal Abortions Performed at 12 Weeks or Less of Gestation in 2003
- 84 Reported Legal Abortions Performed at or After 21 Weeks of Gestation in 2003
- 85 Percent of Reported Legal Abortions Performed at or After 21 Weeks of Gestation in 2003

## II. Deaths

- 86 Deaths in 2005
- 87 Death Rate in 2005
- 88 Deaths in 2004
- 89 Death Rate in 2004
- 90 Age-Adjusted Death Rate in 2004
- 91 Percent Change in Death Rate: 1995 to 2004
- 92 Deaths in 2003
- 93 Death Rate in 2003
- 94 Age-Adjusted Death Rate in 2003
- 95 Infant Deaths in 2005
- 96 Infant Mortality Rate in 2005
- 97 Infant Deaths in 2003
- 98 Infant Mortality Rate in 2003
- 99 White Infant Deaths in 2003
- 100 White Infant Mortality Rate in 2003
- 101 Black Infant Deaths in 2003
- 102 Black Infant Mortality Rate in 2003
- 103 Neonatal Deaths in 2003
- 104 Neonatal Death Rate in 2003
- 105 White Neonatal Deaths in 2003
- 106 White Neonatal Death Rate in 2003
- 107 Black Neonatal Deaths in 2003
- 108 Black Neonatal Death Rate in 2003
- 109 Deaths by AIDS in 2003
- 110 Death Rate by AIDS in 2003
- 111 Age-Adjusted Death Rate by AIDS in 2003
- 112 Estimated Deaths by Cancer in 2007
- 113 Estimated Death Rate by Cancer in 2007
- 114 Age-Adjusted Death Rate by Cancer for Males in 2003
- 115 Age-Adjusted Death Rate by Cancer for Females in 2003

"Assisted Reproductive Technology, 2003" (Morbidity and Mortality Weekly Report, Vol. 55, No. SS-04, 05/26/06)

\*By patient's residence. Does not include 1,662 procedures for patients with residences outside the U.S. Assisted reproductive technology (ART) includes treatments in which both eggs and sperm are handled in the laboratory. In 2003, 74% of ART treatments were freshly fertilized embryos using the patient's eggs, 14% were thawed embryos using the patient's eggs, 8% were freshly fertilized embryos from donor eggs and 4% were thawed embryos from donor eggs.

# Infants Born from Assisted Reproductive Technology Procedures in 2003

**National Total = 48,050 Live Births\***

"National Vital Statistics Reports" (Vol. 54, No. 13, April 19, 2006)

\*Final data by state of residence. A severe, chronic form of diabetes caused by insufficient production of insulin and resulting in abnormal metabolism of carbohydrates, fats, and proteins. The disease, which typically appears in childhood or adolescence, is characterized by increased sugar levels in the blood and urine, excessive thirst and frequent urination. Age-adjusted rates based on the year 2000 standard population.

## Deaths by Diseases of the Heart in 2003

National Total = 685,089 Deaths\*

OSCAR Report 10 (January 22, 2007)

\*Certified by CMS to participate in the Medicare/Medicaid programs. Excludes agencies that do not accept federal funding. National total does not include 55 certified home health agencies in U.S. territories. A home health agency provides health services to individuals in their homes for the purpose of promoting, maintaining or restoring health or maximizing the level of independence, while minimizing the effects of disability and illness.

## Medicare and Medicaid Certified Hospices in 2007

**National Total = 3,043 Hospices\***

"National Practitioner Data Bank, 2004 Annual Report" (<http://www.npdb-hipdb.com/annualrpt.html>)

\*National figure includes U.S. territories and U.S. Armed Forces locations overseas.

\*\*The figures for these states have not been adjusted for payments by state compensation funds and other similar funds. Average payments for these states understate the actual average amounts received by claimants.

## Percent of Private-Sector Establishments That Offer Health Insurance: 2004

"Children's Health Insurance Program Annual Enrollment Report"

\*Figures for fiscal year 2005. The State Children's Health Insurance Program (SCHIP) was created in 1997 to help states expand health insurance to children whose families earn too much to qualify for Medicaid, yet not enough to afford private health insurance. Calculated using 2005 Census estimates for 17 and younger for reporting states.

\*\*Not available.

## Expenditures for State Children's Health Insurance Program (SCHIP) in 2005

**National Total = \$5,044,800,000\***

## Projected National Health Care Expenditures in 2007

**Total Health Care Expenditures = \$2,325,700,000,000\***

The 2004 health care expenditures broken down to the state level and shown on pages 301 to 321 were released in May of 2006 and are the most recent state health expenditure data available from the Centers for Medicare and Medicaid Services (CMS).

Given the high level of interest in health care finance data, we have assembled a table showing the most recent national level health care expenditure projections. We will continue to monitor CMS data releases and will include state expenditure updates in forthcoming editions.

	PROJECTED EXPENDITURES IN 2007	PROJECTED PERCENT CHANGE: 2006 TO 2007
Total Health Care Expenditures	\$2,325,700,000,000	7.2
Per Capita Total Health Care Expenditures	\$7,768	
Personal Health Care Expenditures	\$1,928,700,000,000	7.0
Per Capita Personal Health Care Expenditures	\$6,442	
Hospital Care Expenditures	\$709,100,000,000	7.0
Per Capita Hospital Care Expenditures	\$2,368	
Physician Services Expenditures	\$496,500,000,000	7.2
Per Capita Physician Services Expenditures	\$1,658	
Dental Services Expenditures	\$101,300,000,000	7.4
Per Capita Dental Services Expenditures	\$338	
Other Professional Services	\$54,000,000,000	-9.5
Per Capita Other Professional Services	\$180	
Home Health Care Expenditures	\$57,300,000,000	7.9
Per Capita Home Health Care Expenditures	\$191	
Prescription Drugs	\$236,800,000,000	8.0
Per Capita Prescription Drugs	\$791	
Nursing Home Care	\$192,200,000,000	5.9
Per Capita Nursing Home Care	\$642	
Other Personal Care Expenditures	\$67,800,000,000	8.1
Per Capita Other Personal Care Expenditures	\$226

"Morbidity and Mortality Weekly Report" (January 5, 2007, Vol. 55, Nos. 51 & 52)

\**Escherichia Coli* is a common bacterium that normally inhabits the intestinal tracts of humans and animals but can cause infection in other parts of the body, especially the urinary tract. One strain, sometimes transmitted in hamburger meat, can cause serious infection resulting in sickness and death.

"Morbidity and Mortality Weekly Report" (January 5, 2007, Vol. 55, Nos. 51 & 52)

\*Escherichia Coli is a common bacterium that normally inhabits the intestinal tracts of humans and animals but can cause infection in other parts of the body, especially the urinary tract. One strain, sometimes transmitted in hamburger meat, can cause serious infection resulting in sickness and death.

## Hepatitis A and B Cases Reported in 2006

"State Vaccination Coverage Levels" (Morbidity and Mortality Weekly Report, Vol. 55, No. 36, Sept 15, 2006)

\*This table is consistent with previous tables showing "fully" immunized children. Figures here are for the 4:3:1:3 series. Children received four doses of DTP/DT/DTaP (Diphtheria, Tetanus, Pertussis (Whooping Cough), Acellular Pertussis), three doses of OPV (Oral Poliovirus Vaccine), one dose of MCV (Measles-Containing Vaccine) and three doses of Hib (Haemophilus influenzae type b). Hepatitis B and Varicella vaccines are not included in this series.

## Percent of Children Aged 19 to 35 Months Fully Immunized in 2005

**National Percent = 76.1%\***

Source: American Osteopathic Association

"Fact Sheet 2006" ([http://www.do-online.osteotech.org/pdf/ost\\_factsheet.pdf](http://www.do-online.osteotech.org/pdf/ost_factsheet.pdf))

\*Active osteopaths under age 65 as of June 1, 2006. National total does not include 228 osteopaths not shown by state. Osteopaths practice a system of medicine based on the theory that disturbances in the musculoskeletal system affect other body parts, causing many disorders that can be corrected by various manipulative techniques in conjunction with conventional medical, surgical, pharmacological, and other therapeutic procedures.

## Rate of Osteopathic Physicians in 2006

National Rate = 18 Osteopaths per 100,000 Population\*

Source: U.S. Department of Health and Human Services, National Institute on Alcohol Abuse and Alcoholism  
 "Volume Beverage and Ethanol Consumption for States" (<http://www.niaaa.nih.gov/Resources/>)

\*This is apparent consumption of actual alcohol, not entire volume of an alcoholic beverage (e.g. wine is roughly 11% absolute alcohol content). Apparent consumption is based on several sources which together approximate sales but do not actually measure consumption. Accordingly, figures for some states may be skewed by purchases by nonresidents.
