The tax adviser in *Tony L. Robucci*, 100 TCM 1060, T.C.Memo. 2011–19, restructured his medical clinic to eliminate its exposure to Federal employment taxes. The restructuring entailed setting up a “shell” LLC. But the new entity did not trigger any meaningful change in the day-to-day operations of the clinic, and the taxpayer never participated in legal transfers of tangible or intangible assets. The Court stated that this highly educated taxpayer should have sought a “second opinion” after getting tax advice about the restructuring that was “too good to be true.” Citing *Neonatology Associates v. Comm.*, 2002–2 USTC ¶50,550, 90 AFTR 2d 2002–5442, 299 F.3d 221 (CA–3, 2002), the court charged that when “a taxpayer is presented with what would appear to be a fabulous opportunity to avoid tax obligations, he should recognize that he proceeds at his own peril.” Again, lacking a reasonable cause exception, the negligence penalty was allowed to stand.

These penalties can be avoided if the taxpayer shows that the failure to file and/or failure to pay was due to reasonable cause and not due to willful neglect. The Code is silent as to what constitutes reasonable cause, and the Regulations do little to clarify this important concept.²⁴ Reasonable cause for failure to pay is presumed under the automatic six-month extension (Form 4868) when the additional tax due is not more than 10 percent of the tax liability shown on the return. In addition, the courts have ruled on some aspects of **reasonable cause**.

- Reasonable cause was found where the taxpayer relied on the advice of a competent tax adviser given in good faith, the facts were fully disclosed to the adviser, and he or she considered that the specific question represented reasonable cause.²⁵ No reasonable cause was found, however, where the taxpayer delegated the filing task to another, even when that person was an accountant or an attorney.²⁶
- Among the reasons not qualifying as reasonable cause were lack of information on the due date of the return,²⁷ illness that did not incapacitate a taxpayer from completing a return,²⁸ refusal of the taxpayer’s spouse to cooperate for a joint return,²⁹ and ignorance or misunderstanding of the tax law.³⁰

Accuracy-Related Penalties

Major civil penalties relating to the accuracy of tax return data, including misstatements stemming from taxpayer negligence and improper valuation of income and deductions,

²⁴Reg. § 301.6651-1(c)(1) likens reasonable cause to the exercise of “ordinary business care and prudence” on the part of the taxpayer.

²⁵*Estate of Norma S. Bradley*, 33 TCM 70, T.C.Memo. 1974–17.

²⁶*U.S. v. Boyle*, 85–1 USTC ¶13,602, 55 AFTR 2d 85–1535, 105 S.Ct. 687 (USSC, 1985). This rule appears to apply to electronic as well as paper-based return filings, to employment as well as income taxes, and to returns where the tax preparer himself or herself commits a fraudulent act. *Brandon R. Ballantyne*, 99 TCM 1523, T.C.Memo. 2010–125; *McNair Eye Center, Inc.*, 99 TCM 1345, T.C.Memo. 2010–81. Knowledgeable taxpayers such as a tax attorney are held to a higher standard in determining

negligence. *Pelton & Gunther P.C.*, 78 TCM 578, T.C.Memo. 1999–339. A taxpayer might be negligent if, when a complicated tax issue is involved, a tax expert is *not* consulted. *Zmuda v. Comm.*, 84–1 USTC ¶9,442, 53 AFTR 2d 84–1269, 731 F.2d 1417 (CA–9, 1984).

²⁷*Beck Chemical Equipment Co.*, 27 T.C. 840 (1957).

²⁸*Alex and Tonya Oria*, 94 TCM 170, T.C.Memo. 2007–276, and *Babetta Schmidt*, 28 T.C. 367 (1957). Compare *Estate of Kirchner*, 46 B.T.A. 578 (1942).

²⁹*Electric and Neon, Inc.*, 56 T.C. 1324 (1971).

³⁰*Stevens Brothers Foundation, Inc.*, 39 T.C. 93 (1965).

are coordinated under the umbrella term **accuracy-related penalties**.³¹ This consolidation of related penalties into a single levy eliminates the possibility that multiple penalties will apply to a single understatement of tax.

The accuracy-related penalties each amount to 20 percent of the portion of the tax underpayment that is attributable to one or more of the following infractions.

- Negligence or disregard of rules and regulations.
- Substantial understatement of tax liability.
- Substantial valuation overstatement.
- Substantial valuation understatement.

The penalties apply only where the taxpayer fails to show a *reasonable basis* for the position taken on the return.³²

Negligence

For purposes of this accuracy-related penalty, **negligence** includes any failure to make a reasonable attempt to comply with the provisions of the tax law. The penalty also applies to any disregard (whether careless, reckless, or intentional) of rules and Regulations.³³ The penalty can be avoided upon a showing of reasonable cause and the fact that the taxpayer acted in good faith.³⁴

The negligence penalty applies to *all* taxes, except when fraud is involved. A negligence penalty may be assessed when the taxpayer fails to report gross income, overstates deductions, or fails to keep adequate records. When the taxpayer takes a nonnegligent position on the return that is contrary to a judicial precedent or published pronouncement of the IRS, the penalty is waived if the taxpayer has a reasonable basis for the interpretation and has disclosed the disputed position on Form 8275.

Substantial Understatement of Tax Liability

The understatement penalty is designed to strike at middle- and high-income taxpayers who are tempted to play the so-called audit lottery.³⁵ Some taxpayers take questionable and undisclosed positions on their tax returns in the hope the return will not be selected for audit. Disclosing the positions would have called attention to the return and increased the probability of audit.

A substantial understatement of a tax liability transpires when the understatement exceeds the larger of 10 percent of the tax due or \$5,000. For a C corporation, a substantial understatement is the lesser of the following.³⁶

- 10 percent of the tax due, but at least \$10,000.
- \$10 million.

The understatement to which the penalty applies is the difference between the amount of tax required to be paid and the amount of tax actually shown on the return.

The penalty is avoided under any of the following circumstances.³⁷

- The taxpayer has **substantial authority** for the treatment. Substantial authority exists when it is perhaps 40 percent likely that a court would find in favor of the taxpayer's position. This conclusion might be reached with an examination of pertinent statutory, administrative, and judicial tax law.
- There is a *reasonable basis* for the tax return position, which is adequately disclosed in the return by attaching Form 8275.

³¹§ 6662.

³²Reg. § 1.6662-3(b)(3). Most tax professionals measure this standard as a 20% probability of prevailing in court.

³³§ 6662(c). There can be no intentional disregard of the rules where the underlying law is unclear, complex, or subject to disagreement. *James J. Freeland*, 51 TCM 253, T.C.Memo. 1986-10, and *Lansdown v. Comm.*, 96-1 USTC ¶50,025, 77 AFTR 2d 96-491, 73 F.3d 373 (CA-10, 1996).

³⁴§ 6664(c)(1).

³⁵§ 6662(b)(2).

³⁶§ 6662(d)(1).

³⁷§ 6662(d)(2)(B). Substantial authority is measured as of either the last day of the tax year to which the return relates or the date the return was filed. Reg. § 1.6662-4(d)(3)(iv)(C).

Penalty for Overvaluation

The objective of the overvaluation penalty is to deter taxpayers from inflating values (or basis), usually of charitable contributions of property, to reduce income taxes.³⁸

- The penalty is 20 percent of the additional tax that would have been paid had the correct valuation been used.
- The penalty applies only when the valuation used by the taxpayer is 150 percent or more of the correct valuation. The penalty is doubled if the valuation error is *gross* (overstated by 200 percent or more).
- The penalty applies only when the resulting income tax underpayment exceeds \$5,000 (\$10,000 for C corporations).

Gretchen (a calendar year taxpayer) purchased a painting for \$10,000. When the painting is worth \$18,000 (as later determined by the IRS), Gretchen donates it to an art museum. Based on the appraisal of a cousin who is an amateur artist, she deducts \$40,000 for the donation. Because Gretchen was in the 30% tax bracket, overstating the deduction by \$22,000 results in a tax underpayment of \$6,600.

Gretchen's penalty for overvaluation is \$2,640, or *double* the regular penalty of \$1,320 (20% × \$6,600 underpayment).

EXAMPLE

11

The substantial valuation overstatement penalty is avoided if the taxpayer can show reasonable cause and good faith. However, when the overvaluation involves *charitable deduction property*, the taxpayer must substantiate both of the following.

- The claimed value of the property is based on a qualified appraisal made by a qualified appraiser.
- The taxpayer made a good faith investigation of the value of the contributed property.³⁹

Based on these criteria, Gretchen in Example 11 would find it difficult to avoid the penalty. A cousin who is an amateur artist does not meet the definition of a qualified appraiser. Likewise, Gretchen apparently has not made her own good faith investigation of the value of the contributed property.

Penalty for Undervaluation

When attempting to minimize the income tax, it is to the benefit of taxpayers to *overvalue* deductions. When attempting to minimize transfer taxes (estate and gift taxes), however, executors and donors may be inclined to *undervalue* the assets transferred. A lower valuation reduces estate and gift taxes. An accuracy-related penalty is imposed for substantial estate or gift tax valuation understatements.⁴⁰ As with other accuracy-related penalties, reasonable cause and good faith on the part of the taxpayer are a defense.

- The penalty is 20 percent of the additional transfer tax that would have been due had the correct valuation been used on Form 706 (estate tax return) or Form 709 (gift and generation-skipping tax return).
- The penalty applies only if the value of the property claimed on the return is 65 percent or less than the amount determined to be correct. The penalty is doubled if the reported valuation error is *gross* (reported value is 40 percent or less than the correct determination).
- The penalty applies only to an additional transfer tax liability in excess of \$5,000.

³⁸ §§ 6662(b)(3), (e), and (h).

³⁹ §§ 6664(c)(2) and (3).

⁴⁰ §§ 6662(b)(5), (g), and (h).

Appraiser's Penalty

When a valuation penalty arises because of the taxpayer's reliance on an appraisal, a further penalty can apply.⁴¹ If the appraiser knew or reasonably should have known that the appraisal would be used as part of a tax or refund computation and that the appraised value more likely than not was improper, then the appraiser pays a penalty equal to the lesser of:

- 10 percent of the tax understatement, but at least \$1,000, or
- 125 percent of the gross income received by the appraiser from the engagement (e.g., the appraisal fee collected).

Penalty for Improper Refund Claim

Whenever a taxpayer files a claim for a tax refund and the refund claim later is found to exceed the final amount allowed by the IRS or a court, a penalty of 20 percent of the disallowed refund results.⁴² The penalty is waived if the taxpayer can show a *reasonable basis* for the refund claim (i.e., probably a 20 percent chance that a court would allow the refund). This penalty is meant to discourage the taxpayer from overstating the amount of the refund requested from the IRS. It does not apply to claims for the earned income tax credit.

Civil Fraud Penalty

A 75 percent civil penalty is imposed on any underpayment resulting from **fraud** by the taxpayer who has filed a return.⁴³ For this penalty, the burden of proof is *on the IRS* to show that the taxpayer acted with a specific intent to evade a tax.

Once the IRS initially has established that fraud occurred, the taxpayer then bears the burden of proof to show by a preponderance of the evidence the portion of the underpayment that is not attributable to fraud.

Although the Code and Regulations do not provide any assistance in ascertaining what constitutes civil fraud, it is clear that mere negligence on the part of the taxpayer is not fraud. Fraud has been found in cases of manipulations of the books, substantial omissions from income, and erroneous deductions.⁴⁴

EXAMPLE

12

Frank underpaid his income tax by \$90,000. The IRS can prove that \$60,000 of the underpayment was due to fraud. The civil fraud penalty is \$45,000 (75% × \$60,000).

Failure to Pay Estimated Taxes

A penalty is imposed for a failure to pay estimated income taxes. The penalty applies to individuals and corporations and is based on the rate of interest in effect for deficiency assessments.⁴⁵ The penalty also applies to trusts and certain estates that are required to make estimated tax payments. The penalty is not imposed if the tax due for the year (less amounts withheld and credits) is less than \$500 for corporations, \$1,000 for all others. For employees, an equal part of withholding is deemed paid on each due date.

Quarterly payments are to be made on or before the fifteenth day of the fourth month (April 15 for a calendar year taxpayer), sixth month, ninth month, and the first month of the following year. Corporations must make the last quarterly payment by the twelfth month of the same year.

⁴¹§ 6695A.

⁴²§ 6676.

⁴³§ 6663. As noted later in the chapter, underpayments traceable to fraudulent acts are not subject to a statute of limitations.

⁴⁴*Dogget v. Comm.*, 60-1 USTC ¶9342, 5 AFTR 2d 1034, 275 F.2d 823 (CA-4, 1960); *Harvey Brodsky*, 21 TCM 578, T.C.Memo. 1962-105; and *Lash v. Comm.*, 57-2 USTC ¶9725, 51 AFTR 492, 245 F.2d 20 (CA-1, 1957).

⁴⁵§§ 6655 (corporations) and 6654 (other taxpayers). Other computations can avoid the penalty. See §§ 6654(d)(2) and (k), 6655(e) and (i).

TAX IN THE NEWS First-Time Tax Violators Can Get Off with Just a Warning

Tax penalties can be a harsh wake-up call when a taxpayer understates a tax liability, and there appears to be “no mercy” when a penalty is applied. Often, a tax penalty arises when the taxpayer has undergone a change in life/business circumstances (e.g., as the consequence of a divorce, retirement, or merger). The taxpayer may not have prepared adequately for the resulting tax increase, and a penalty results, but the taxpayer’s legitimate response might be “I didn’t mean to do it; I just didn’t know the rules.”

The Federal income tax law does allow a measure of mercy, though. A procedure exists under which the taxpayer can apply for an abatement (waiver) of a tax penalty. The IRS has discretion to allow the waiver, but the guidelines make certain the abatement if all of the following circumstances are met.

- The penalty relates to a single tax year.
- The taxpayer asserts a *reasonable cause* for the understatement of tax.
- The taxpayer otherwise is current as to tax filings and payment compliance.
- The taxpayer has not been assessed any other penalties of a significant amount on similar tax returns within the last three years.

An IRS oversight study estimates that only 10 percent of eligible taxpayers claim the first-time penalty waiver. This likely is because the IRS does not advertise the abatement procedure and because guidelines for the program are difficult to find at www.irs.gov.

An individual’s underpayment of estimated tax is the difference between the estimates that were paid and the least of:

- 90 percent of the current-year tax,
- 100 percent of the prior-year tax (the tax year must have been a full 12 months, and a return must have been filed), and
- 90 percent of the tax that would be due on an annualized income computation for the period running through the end of the quarter.

If the taxpayer’s prior-year AGI exceeds \$150,000, the 100 percent requirement becomes 110 percent.

A corporation’s underpayment of estimated tax is the difference between the estimates that were paid and the least of:

- The current-year tax,
- The prior-year tax, and
- The tax on an annualized income computation using one of three methods of computation sanctioned by the Code.

For the prior-year alternative, (1) the prior tax year must have been a full 12 months, (2) a nonzero tax amount must have been generated for that year, and (3) large corporations (taxable income of \$1 million or more in any of the three immediately preceding tax years) can use the alternative only for the first installment of a year.

In computing the penalty, Form 2210 (Underpayment of Estimated Tax by Individuals) or Form 2220 (Underpayment of Estimated Tax by Corporations) is used.

False Information with Respect to Withholding

Withholding from wages is an important element of the Federal income tax system, which is based on a pay-as-you-go approach. One way employees might hope to avoid this withholding would be to falsify the information provided to the employer on Form W-4 (Employee Withholding Allowance Certificate). For example, by overstating the number of exemptions, income tax withholdings could be reduced or completely eliminated.

To encourage compliance, a civil penalty of \$500 applies when a taxpayer claims withholding allowances based on false information. The criminal penalty for willfully

failing to supply information or for willfully supplying false or fraudulent information in connection with wage withholding is an additional fine of up to \$1,000 and/or up to one year of imprisonment.⁴⁶

Failure to Make Deposits of Taxes and Overstatements of Deposits

When a business is not doing well or cash-flow problems develop, employers have a great temptation to “borrow” from Uncle Sam. One way this can be done is to fail to pay to the IRS the amounts that have been withheld from the wages of employees for FICA and income tax purposes. The IRS can apply a number of weapons to discourage the practice.

- A penalty of up to 15 percent of any underdeposited amount not paid, unless the employer can show that the failure is due to reasonable cause and not to willful neglect.⁴⁷
- Various criminal penalties.⁴⁸
- A 100 percent penalty if the employer’s actions are willful.⁴⁹ The penalty is based on the amount of the tax evaded (i.e., not collected or not accounted for or paid over). Because the penalty is assessable against the “responsible person” of the business, more than one party may be vulnerable (e.g., the president and treasurer of a corporation, the third-party payroll service of the entity). Although the IRS may assess the penalty against several persons, it cannot collect more than 100 percent of the tax that is due.
- In addition to these penalties, the actual tax due must be remitted. For instance, an employer remains liable for the employees’ income and payroll taxes that should have been paid.

Failure to Provide Information Regarding Tax Shelters

The IRS has identified over two dozen transactions that it regards as “tax shelters.” These arrangements, often involving leveraged financing and accelerated interest and cost recovery deductions, allegedly are motivated solely by the desire to reduce taxes and have no business or profit-seeking goals. Over the last two decades, the IRS has struggled with numerous means of identifying taxpayers who use such tax shelters.

A tax shelter organizer must register the shelter with the IRS before any sales are made to investors.⁵⁰ A penalty of up to \$10,000 is assessed if the required information is not filed with the Service. This includes a description of the shelter and the tax benefits that are being used to attract investors.

Criminal Penalties

In addition to civil fraud penalties, the Code contains numerous criminal sanctions that carry various monetary fines and/or imprisonment. The difference between civil and criminal fraud is often one of degree. Thus, § 7201, dealing with attempts to evade or defeat a tax, contains the following language.

Any person who *willfully* attempts in any manner to evade or defeat any tax imposed by this title or the payment thereof shall, in addition to other penalties provided by law, be guilty of a felony and, upon conviction thereof, shall be fined not more than \$100,000 (\$500,000 in the case of a corporation), or imprisoned not more than five years, or both, together with the costs of prosecution. [Emphasis added.]

As to the burden of proof, the IRS must show that the taxpayer was guilty of willful evasion “beyond the shadow of any reasonable doubt.” Thus, to avoid a criminal tax penalty, the taxpayer needs to create a degree of reasonable doubt as to guilt. To do so,

⁴⁶ §§ 6682 and 7205.

⁴⁷ § 6656.

⁴⁸ See, for example, § 7202 (willful failure to collect or pay over a tax).

⁴⁹ § 6672.

⁵⁰ § 6111.

the taxpayer might assert that he or she was confused or ignorant about the application of the tax law or relied on the erroneous advice of a competent tax adviser. Another defense against a criminal tax penalty is the lack of capacity to plan and carry out tax evasion (e.g., mental disease or other medical disorder).

Violations of the Federal criminal code in the context of filing tax returns also may arise from other crimes that are not provided for in the Internal Revenue Code. Examples include:

- Making a false claim against the Federal government.
- Participating in a conspiracy to evade Federal taxes (i.e., in addition to the tax understatement).
- Making a false statement to the Federal government or filing a false document (i.e., perjury).

26-1j Statutes of Limitations

A **statute of limitations** defines the period of time during which one party may pursue against another party a cause of action or other suit allowed under the governing law. Failure to satisfy any requirement provides the other party with an absolute defense should the statute be invoked. Inequity would result if no limits were placed on such suits. Permitting an extended period of time to elapse between the initiation of a claim and its pursuit could place the defense at a serious disadvantage. Witnesses may have died or disappeared; records or other evidence may have been discarded or destroyed.

Assessment and the Statute of Limitations

In general, any tax that is imposed must be assessed within three years of the later of (a) the filing date of the return or (b) the unextended due date of the return.⁵¹ Some exceptions to this three-year limitation exist.

- If no return is filed or a fraudulent return is filed, assessments can be made at any time. There is, in effect, no statute of limitations in these cases.
- If a taxpayer omits an amount of gross income in excess of 25 percent of the gross income stated on the return, the statute of limitations is increased to six years. The courts have interpreted this rule as including only items affecting income and not the omission of items affecting deductions, operating losses, or cost of sales.⁵² *Gross income* here includes capital gains, but not reduced by capital losses.

During 2010, Jerry recorded the following income transactions (all of which were duly reported on his timely filed return).

| | | |
|--------------------------|-----------------|--------------------------|
| Gross receipts | | \$ 480,000 |
| Cost of sales | | <u>(400,000)</u> |
| Net business income | | \$ 80,000 |
| Capital gains and losses | | |
| Capital gain | \$ 36,000 | |
| Capital loss | <u>(12,000)</u> | <u>24,000</u> |
| Total income | | <u><u>\$ 104,000</u></u> |

Jerry retains your services in 2015 as a tax consultant. It seems that he inadvertently omitted some income on his 2010 return, and he wants to know if he is “safe” under the statute of limitations. The three-year statute of limitations has expired, but the six-year statute of limitations still applies, putting Jerry in a vulnerable position only if he omitted more than \$129,000 on his 2010 return [(\$480,000 + \$36,000) × 25%].

LO.7

Recognize and apply the rules governing the statute of limitations on assessments and on refunds.

EXAMPLE

13

⁵¹§§ 6501(a) and (b)(1).

⁵²*The Colony, Inc. v. Comm.*, 58–2 USTC ¶9593, 1 AFTR 2d 1894, 78 S.Ct. 1033 (USSC, 1958).

- The statute of limitations may be extended for a fixed period of time by mutual consent of the IRS and the taxpayer. This extension covers a definite period and is made by signing Form 872 (Consent to Extend the Time to Assess Tax). The extension frequently is requested by the IRS when the lapse of the statutory period is imminent and the audit has not been completed. This practice often is applied to audits of corporate taxpayers and explains why many corporations have more than three “open years.”

The statute also is suspended when the taxpayer is “financially disabled”; that is, the taxpayer has been rendered unable to manage his or her financial affairs by a physical or mental impairment that is likely to last for a year or more or to cause the taxpayer’s death. The statute continues to run if another party is authorized to act for the taxpayer in financial matters.⁵³

Refund Claims and the Statute of Limitations

To receive a tax refund, the taxpayer is required to file a valid refund claim. The official form for filing a claim is Form 1040X for individuals and Form 1120X for corporations. If the refund claim does not meet certain procedural requirements, the IRS may reject the claim with no consideration of its merit.

- A separate claim must be filed for each taxable period.
- The grounds for the claim must be stated in sufficient detail.
- The statement of facts must be sufficient to permit the IRS to evaluate the merits of the claim.

The refund claim must be filed within three years of the filing of the tax return or within two years following the payment of the tax if this period expires on a later date.⁵⁴

EXAMPLE

14

On March 10, 2013, Louise filed her 2012 income tax return reflecting a tax of \$10,500. On July 11, 2014, she filed an amended 2012 return showing an additional \$3,000 of tax that was then paid. On May 19, 2016, she filed a claim for refund of \$4,500.

Assuming that Louise is correct in claiming a refund, how much tax can she recover? The answer is only \$3,000. Because the claim was not filed within the three-year statute of limitations period, Louise is limited to the amount she actually paid during the last two years.

Special rules are available for claims relating to bad debts and worthless securities. A seven-year period of limitations applies in lieu of the normal three-year rule.⁵⁵ The extended period is provided in recognition of the inherent difficulty of identifying the exact year in which a bad debt or security becomes worthless.

LO.8

Summarize the legal and ethical guidelines that apply to those engaged in tax practice.

26-2 THE TAX PROFESSION AND TAX ETHICS

Society and its governments expect taxpayers to comply with the letter and the spirit of the tax laws. Tax audits and penalties encourage a high degree of technical tax conformity, but the proper functioning of a voluntary tax compliance system also depends on the ethics of the taxpayer and the tax adviser.

The Treasury and various professional organizations have issued ethical guidelines that are relevant to the tax profession. Professional licensing agencies also are likely to require tax professionals to receive training in ethics to obtain initial certification and to remain in good standing over time.

⁵³Suspension of the statute of limitations has been allowed by some courts when attributable to a taxpayer disability or IRS misconduct. See *Brockamp v. Comm.*, 97-1 USTC ¶50,216, 79 AFTR 2d 97-986, 117 S.Ct. 849 (USSC, 1997). §§ 6501(c)(4) and 6511(h).

⁵⁴§§ 6511(a) and 6513(a).

⁵⁵§ 6511(d)(1).

26-2a The Tax Professional

Who is a tax practitioner? What services does the practitioner perform? A number of different groups apply constraints on the way a tax professional conducts his or her practice.

Generally, practice before the IRS is limited to CPAs, attorneys, and persons who have been enrolled to practice before the IRS [enrolled agents (EAs)]. In most cases, EAs are admitted to practice only if they pass an examination administered by the IRS. CPAs and attorneys are not required to take this examination and are automatically admitted to practice if they are in good standing with the appropriate licensing board regulating their profession.

Persons other than CPAs, attorneys, and EAs may be allowed to practice before the IRS in limited situations. **Circular 230** (“Regulations Governing Practice before the Internal Revenue Service”) issued by the Treasury Department permits certain notable exceptions.

- A taxpayer always may represent himself or herself. A person also may represent a member of the immediate family if no compensation is received for such services.
- Full-time employees may represent their employers.
- Corporations may be represented by any of their officers.
- Partnerships may be represented by any of the partners.
- Trusts, receiverships, guardianships, or estates may be represented by their trustees, receivers, guardians, or administrators or executors, respectively.
- A taxpayer may be represented by the registered tax return preparer who prepared the return for the year in question. See the following discussion.

All nonattorney tax practitioners should avoid becoming engaged in activities that constitute the *unauthorized practice of law*. If they engage in this practice (e.g., by drafting legal documents for a third party), action could be instituted against them in the appropriate state court by the local or state bar association. What actions constitute the unauthorized practice of law is largely undefined, though, and such charges are filed only rarely today.

26-2b Licensing Tax Preparers

There are no minimum education or experience requirements for those who are paid to file Federal tax returns for others. But the IRS does require that all paid tax return preparers, including CPAs and attorneys, obtain a Preparer Tax Identification Number (PTIN) before they assist taxpayers with returns for a new filing season.

For preparers who also are CPAs, attorneys, or EAs, the fee to obtain PTINs is about \$65 per year. This amount is in addition to any other professional, certification, or licensing fee the preparer might be required to pay (e.g., annual fees to maintain a CPA certificate).

Upon receiving a PTIN, the tax professional can refer to himself or herself as a “registered tax return preparer.” All of the provisions of Circular 230 (discussed in the next section) apply to the registered preparer, including those regarding advertising and solicitation of clients. The PTIN holder can neither use the term *certified* in describing this designation nor assert that the IRS endorses his or her practice in any way.

A registered tax return preparer (who is not also a CPA or an attorney) may represent the taxpayer for whom a signed return was prepared before IRS revenue agents, but not before appeals officers, revenue officers, or IRS counsel.

The IRS may use PTIN data to identify preparers who commit a pattern of errors or who participate in fraudulent actions. With more than 1 million paid preparers at work in any filing season, the IRS uses an outside consultant to manage the registration and testing functions.

ETHICS & EQUITY Who Cheats and Why?

Tax compliance for business income reported on the Form 1040, Schedules C, E, and F, tends to be much lower than that for the rest of individuals' taxable income. Because of the use of Forms W-2 and 1099, the reporting of taxable transactions by wage earners and many investors is fairly thorough and tax compliance rates are high. But business income often entails the use of cash, or it is not reported to the IRS under current disclosure rules; so tax cheating may be more common on that part of the tax return.

A recent academic analysis of Schedule C data brings up another motivation for high or low compliance with the tax laws. Occupations (reported by industry codes) in which "integrity" is of higher value might be expected to show

higher tax compliance rates. Integrity may be defined as an activity involving a public or professional reputation or one exposed to professional sanctions such as a loss of license to practice.

Assume that the importance (or lack thereof) of one's business integrity affects the taxpayer's willingness to comply with the tax law. List three occupations where this criterion might lead to high tax compliance. To low tax compliance. For instance, who might be most likely to understate a tax liability on a Form 1040: an attorney, a member of the clergy, or a plumbing contractor? What should the IRS do with such academic data about taxpayer behavior?

26-2c IRS Rules Governing Tax Practice

Circular 230 prescribes the rules governing practice before the IRS. Following are some of the most important rules imposed on CPAs, attorneys, EAs, and all others who prepare tax returns for compensation.

- A prohibition against taking an undisclosed position on a tax return unless there is a *reasonable basis* that the position will be sustained on its merits. Generally, this standard is met when a person knowledgeable in the tax law would conclude that the position has a greater than 20 percent probability of prevailing in the court of final jurisdiction.
- A requirement that nonfrivolous tax return positions that fail the reasonable basis standard be disclosed in the return (i.e., using Form 8275).
- A prohibition against taking frivolous tax return positions. A **frivolous return** is a return with a less than 5 percent chance of being sustained by the court of final jurisdiction.

The Big Picture

EXAMPLE

15

Return to the facts of *The Big Picture* on p. 26-1. Campbell has developed a testing program to be used by its in-house engineers before a new GPS app is released to the public; Campbell wants to claim the research credit for that program. Based on their tax research on this issue, the members of your firm's tax department have severe doubts about taking the credit for this program. Your firm's position is that there is a one-in-six chance that the courts would allow Campbell's credit.

Claiming the credit fails the reasonable basis standard of Circular 230, although it is a non-frivolous filing position. Therefore, if Campbell claims the credit, you must insist that its Form 1120 include a separate disclosure on the return, probably using Form 8275.

- A requirement to inform clients of penalties likely to apply to return positions and of ways such penalties can be avoided.
- A requirement to make known to a client any error or omission the client may have made on any return or other document submitted to the IRS.
- A duty to submit, in a timely fashion, records or information lawfully requested by the IRS.
- An obligation to exercise *due diligence* and to use the *best practices* of the tax profession in preparing, reviewing, and filing tax returns accurately.

Your niece, Selma, plans to start a tax return preparation service. She seeks advice on what procedures and practices to establish in order to develop and maintain a successful business. As a starting point, Selma should set up a standardized procedure for receiving, processing, and reviewing client tax returns. A key to achieving a high quality product would be an appropriate choice of tax accounting software. She should be sure that all client data are kept confidential and that the electronic files holding such data are secure and properly backed up.

Any employees who are hired should be technically competent and properly indoctrinated as to office procedure. All hires will be subject to a background check and be made aware that they are expected to participate in continuing education covering developments in tax law changes. Finally, Selma should formulate adequate disclaiming language so that e-mail recipients do not assume that the content represents technical advice that justifies individual reliance.

EXAMPLE

16

- A restriction against unreasonably delaying the prompt disposition of any matter before the IRS.
- A restriction against charging the client a contingent fee for preparing an original return. Such a fee can be charged when the tax professional deals with an audited or amended return and when assisting the taxpayer in filing a refund claim.
- A restriction against charging the client “an unconscionable fee” for representation before the IRS.
- A restriction against representing clients with conflicting interests.

Nothing prevents the “unlicensed” tax practitioner from advertising his or her specialty, directly soliciting clients, or engaging in other actions that are regulated by the standards of conduct controlling CPAs, attorneys, and EAs. Nevertheless, some constraints do govern all parties engaged in rendering tax returns for the general public.

- A person who holds himself or herself out to the general public as possessing tax expertise could be liable to the client if services are performed in a negligent manner. At a minimum, the practitioner is liable for any interest and penalties the client incurs because of the practitioner’s failure to exercise due professional care.
- If a practitioner agrees to perform a service (e.g., prepare a tax return) and subsequently fails to do so, the aggrieved party may be in a position to obtain damages for breach of contract.
- All persons who prepare tax returns or refund claims for a fee must sign as preparer of the return.⁵⁶ Failure to comply with this requirement could result in a penalty assessment against the preparer.
- Various penalties apply concerning the deliberate filing of false or fraudulent returns. These felonies apply to a tax practitioner who either was aware of the situation or actually perpetrated the false information or the fraud.⁵⁷
- Penalties are prescribed for tax practitioners who disclose to third parties information they have received from clients in connection with the preparation of tax returns or the rendering of tax advice.⁵⁸

Sarah operates a tax return preparation service. Her brother-in-law, Butch, has just taken a job as a life insurance salesperson. To help Butch find contacts, Sarah furnishes him with a list of the names and addresses of all of her clients who report AGI of \$50,000 or more. Sarah is subject to the disclosure penalty.

EXAMPLE

17

Circular 230 is administered by the IRS Office of Professional Responsibility (OPR). Among other duties, the OPR carries out disciplinary hearings and issues penalties, such as fines and licensing restrictions and retractions, relative to tax preparers. The accountability board of most states includes a member of the OPR, so a Circular 230 violation could lead to the loss or suspension of a CPA’s license at the state level as well.

⁵⁶Reg. § 1.6065-1(b)(1). Rev.Rul. 84-3, 1984-1 C.B. 264, contains a series of examples illustrating when a person is deemed to be a preparer of the return.

⁵⁷§ 7206.

⁵⁸§ 7216.

26-2d Preparer Penalties

The Code provides penalties to discourage improper actions by tax practitioners. **Tax preparer** penalties are assessed on any person who prepares for compensation, or engages employees to prepare, a substantial portion of any Federal tax return or refund claim. The following individuals are exempt from the preparer penalties.

- An IRS employee.
- A volunteer who prepares tax returns in a government assistance effort such as Tax Counseling for the Elderly (TCE) or the Volunteer Income Tax Assistance (VITA) program.
- An employee preparing a return for the employer.
- A fiduciary preparing a return for a trust or an estate.
- An individual who provides only data processing, typing, reproduction, or other assistance in preparing a return.

The preparer penalties are applied on a “one preparer per firm, per filing position” basis, so penalty dollars can compound quickly within the tax practice. Some of the most important tax preparer penalties include the following.

1. A penalty for understatements due to taking an **unreasonable position** on a tax return.⁵⁹ The penalty is imposed if the tax position:
 - Is not disclosed on the return and there was no *substantial authority* (i.e., a greater than 40 percent chance) that the tax position would be sustained by its merits on a final court review, or
 - Is disclosed on the return and there was not a *reasonable basis* (i.e., probably a 20 percent chance) for the position.

The penalty is computed as the greater of \$1,000 or one-half of the income of the practitioner that is attributable to the return or claim that violated the conduct standard. The penalty can be avoided by showing reasonable cause and by showing that the preparer acted in good faith.

EXAMPLE

18

Josie is the tax return preparer for Hal’s Form 1040. The return includes a deduction that has a 60% chance of being sustained on its merits because it is contrary to an applicable tax Regulation. If a court denies the deduction, Josie is not assessed a penalty for taking an unreasonable position on the tax return.

Now assume that Hal’s deduction has a 30% chance of being sustained on its merits. If a court denies the deduction, Josie is assessed the penalty (unless the disputed position was disclosed on the return with a Form 8275–R). The amount of the penalty is the greater of \$1,000 or one-half of Josie’s fees for preparing Hal’s Form 1040.

What if Hal’s deduction has a 15% chance of being sustained on its merits? If a court denies the deduction, Josie is assessed a penalty for taking an unreasonable tax return position (even if the disputed position was disclosed on the return with a Form 8275–R). The amount of the penalty is the greater of \$1,000 or one-half of Josie’s fees for preparing Hal’s Form 1040.

2. A penalty for willful and reckless conduct.⁶⁰ The penalty applies if any part of the understatement of a taxpayer’s liability on a return or claim for refund is due to:
 - The preparer’s willful attempt to understate the taxpayer’s tax liability in any manner.
 - Any reckless or intentional disregard of IRS rules or Regulations by the preparer.

The penalty is computed as the greater of \$5,000 or one-half of the income of the practitioner that is attributable to the return or claim that violated the conduct

⁵⁹§ 6694(a). For the most part, these standards match those that apply to the taxpayer penalties of § 6662(d). Stricter disclosure standards apply for tax shelter items and reportable transactions. § 6662A.

⁶⁰§ 6694(b).

standard. Adequate disclosure can avoid the penalty. If both this penalty and the unreasonable position penalty (see item 1) apply to the same return, the reckless conduct penalty is reduced by the amount of the penalty for unreasonable positions.

3. A \$1,000 (\$10,000 for the tax returns of corporations) penalty per return or document is imposed against persons who aid in the preparation of returns or other documents they know (or have reason to believe) would result in an understatement of the tax liability of another person.⁶¹ Thus, this penalty also applies to those other than the preparer of the actual tax return (e.g., advisers, attorneys, corporate officers and executives, and tax shelter promoters). Clerical assistance in the return preparation process does not incur the penalty.

If this penalty applies, neither the unreasonable position penalty (item 1) nor the willful and reckless conduct penalty (item 2) is assessed.

4. A \$50 penalty is assessed against the preparer for failure to sign a return or furnish the preparer's PTIN.⁶²
5. A \$50 penalty is assessed if the preparer fails to furnish a copy of the return or claim for refund to the taxpayer.
6. A \$500 penalty may be assessed if a preparer endorses or otherwise negotiates a check for refund of tax issued to the taxpayer.

26-2e Privileged Communications

Communications between an attorney and client long have been protected from disclosure to other parties (such as the IRS and the courts). A similar privilege of confidentiality extends to tax advice between a taxpayer and tax practitioner, as that term was used previously. The privilege is not available for matters involving criminal charges or questions brought by other agencies, such as the Securities and Exchange Commission.⁶³ Nor is it allowed in matters involving promoting or participating in tax shelters.

A taxpayer likely will want to protect documents such as the tax adviser's research memo detailing the strengths and weaknesses of a tax return position or a conversation about an appeals strategy. The confidentiality privilege should be interpreted in the following manner.

- The privilege for CPAs applies only to tax advice. Only attorneys can exercise the privilege concerning advice rendered as a business consultant, an estate/financial planner, etc.
- The privilege is not available for tax accrual workpapers prepared as part of an independent financial audit.

26-2f AICPA Statements on Standards for Tax Services

Tax practitioners who are CPAs, attorneys, or EAs must abide by the codes or canons of professional ethics applicable to their respective professions. The various codes and canons have much in common with and parallel the standards of conduct set forth in Circular 230.⁶⁴

The AICPA has issued a series of Statements on Standards for Tax Services (SSTs). The Statements are enforceable standards of professional practice for AICPA members working in state or Federal tax practice. The SSTs comprise part of the AICPA's Code of Professional Conduct. Together with the provisions of Circular 230 and the penalty provisions of the Code, the SSTs make up a set of guidelines for the conduct of the tax practitioner who is also a CPA. Other sources of professional ethics are issued by state bar associations and CPA societies, the American Bar Association, and the associations of enrolled agents.

Key provisions of some of the SSTs are presented next.

⁶¹§ 6701.

⁶²§ 6695.

⁶³§ 7525(a)(1).

⁶⁴For an additional discussion of tax ethics, see Sawyers, Raabe, Whittenburg, and Gill, *Federal Tax Research*, 10th ed. (Cengage Learning, 2015), especially Chapters 1 and 14.

ETHICS & EQUITY Where Does My Cost Saving Go?

As is the case in many other U.S. industries, tax return preparers have been outsourcing some of their operations to lower-cost locations overseas. By some estimates, over 5 million state and Federal tax returns are completed in India alone, and such estimates are probably understated because of a lack of disclosure by tax practitioners. Tax and consulting firms defend the practice as a cost-saving measure and contend that the confidentiality of taxpayer data is not compromised.

AICPA ethics rules (applying both to tax return preparation and other work) require:

- Notice to the taxpayer before any data are shared with a third-party service provider.
- Acceptance by the practitioner of full responsibility for the third party's work (i.e., as to quality and security).

Should any cost saving that outsourcing provides be passed on to the client in the form of lower fees? Do you expect that this will occur?

Statement No. 1: Tax Return Positions

Under certain circumstances, a CPA may take a position that is contrary to that taken by the IRS. To do so, however, the CPA must have a good faith belief that the position has a realistic possibility (i.e., probably a one-in-three chance) of being sustained administratively or judicially on its merits if challenged. If the taxing authority (e.g., a state revenue statute) uses a lower standard than that of a *realistic possibility*, this higher standard still applies.

The client should be fully advised of the risks involved and the penalties that may result if the position taken on the tax return is not successful. The client also should be informed that disclosure on the return may avoid some or all of these penalties.

In no case, though, should the CPA exploit the audit lottery. That is, the CPA should not take a questionable position based on the probabilities that the client's return will not be chosen by the IRS for audit. Furthermore, the CPA should not "load" the return with questionable items in the hope that they might aid the client in a later settlement negotiation with the IRS.

The Big Picture

EXAMPLE

19

Return to the facts of *The Big Picture* on p. 26-1. Campbell's new marketing program solicits the opinions of a virtual focus group to test ideas for new products. Based on your tax research, you believe that because the program relies on innovative algorithms that use online contacts to carry out the focus group activities, the program might qualify for the Federal income tax research credit even though it involves marketing research that is excluded from the credit under § 41(d)(4). Still, you believe that there is only a 30% chance the courts would allow the credit.

You meet with Shelly Watkins, Campbell's tax director, to convey the results of your research. Watkins agrees that the research credit would be turned down by an IRS auditor, but she says that Campbell never has been audited and that it is not likely to be audited as long as its legal structure and income levels do not significantly change. Watkins believes that Campbell's corporate officers will sign off on the credit, given both the firm's weak cash position and the low chances that the item will be discovered.

As a CPA, you must inform Campbell that claiming the credit for this activity does not have a realistic possibility of being sustained on its merits and that certain penalties will be assessed if the credit is claimed and not further disclosed on the return.

Whether the credit is claimed is the decision of your client, the taxpayer. But if Campbell wants to claim the credit without the required additional disclosures, you must terminate your engagement with Campbell, under the SSTS and other AICPA provisions.

Statement No. 2: Questions on Returns

A CPA should make a reasonable effort to obtain from the client, and provide, appropriate answers to all questions on a tax return before signing as preparer. Reasonable grounds may exist for omitting an answer.

- The information is not readily available, and the answer is not significant in amount in computing the tax.
- The meaning of the question as it applies to a particular situation is genuinely uncertain.
- The answer to the question is voluminous.

The fact that an answer to a question could prove disadvantageous to the client does not justify omitting the answer.

Statement No. 3: Procedural Aspects of Preparing Returns

In preparing a return, a CPA may in good faith rely without verification on information furnished by the client or by third parties. However, the CPA should make reasonable inquiries if the information appears to be incorrect, incomplete, or inconsistent. In this regard, the CPA should refer to the client's returns for prior years whenever appropriate.

Assuring Taxpayer Compliance

A CPA normally can take a client's word for the validity of dependency exemptions. But suppose a recently divorced client wants to claim his three children as dependents when he does not have custody. You must act in accordance with § 152(e)(2) in preparing the return, and this will require evidence of a waiver by the custodial parent. Without this waiver, you should not claim the dependency exemptions on your client's tax return.

EXAMPLE**20**

While preparing Sunni's income tax return, you review her prior year's income tax return. In comparing the dividend income reported on the Schedule B for the two years, you note a significant decrease from last year's amounts. Further investigation reveals the variation is due to a stock sale this year that was unknown to you until now. Thus, the review of the prior year's return has unearthed a transaction that should be reported on this year's return.

EXAMPLE**21**

If the Code or Regulations require certain types of verification (as is the case with travel and entertainment expenditures), the CPA must advise the client of these rules. Further, inquiry must be made to ascertain whether the client has complied with the verification requirements.

Statement No. 4: Estimates

A CPA may prepare a tax return using estimates received from a taxpayer if it is impracticable to obtain exact data. The estimates must be reasonable under the facts and circumstances as known to the CPA. When estimates are used, they should be presented in such a manner as to avoid the implication of greater accuracy than exists.

Statement No. 5: Recognition of Administrative Proceeding or Court Decision

As facts may vary from year to year, so may the position taken by a CPA. In these types of situations, the CPA is not bound by an administrative or judicial proceeding involving a prior year.

As part of a prior year's audit of Ramon Corporation's income tax return, the IRS disallowed \$78,000 of the \$600,000 salary paid to its president and sole shareholder on the grounds that it is unreasonable. You are the CPA who has been engaged to prepare Ramon's income tax return for 2015. Again, the corporation paid its president a salary of \$600,000 and chose to deduct this amount. Because you are not bound for 2015 by what the IRS deemed reasonable for the prior tax year, the full \$600,000 can be claimed as a salary deduction, assuming that you and Ramon both believe that the entire salary represents reasonable compensation.

EXAMPLE**22**

Statement No. 6: Knowledge of Error

A CPA should promptly advise a client upon learning of an error in a previously filed return or upon learning of a client's failure to file a required return, where the error has a significant (material in amount) effect on the tax liability. The advice can be oral or written and should include a recommendation of the corrective measures, if any, to be taken. The error or other omission should not be disclosed to the IRS without the client's consent.

If the past error is material and is not corrected by the client, the CPA may be unable to prepare the current year's tax return. The CPA must consider the cumulative effects of the error on the taxpayer's liabilities for all tax years, including those in the future.

EXAMPLE**23**

In preparing a client's 2015 income tax return, you discover that final inventory for 2014 was materially understated. First, you should advise the client to file an amended return for 2014 reflecting the correct amount in final inventory. Second, if the client refuses to make this adjustment, you should consider whether the error will preclude you from preparing a substantially correct return for 2015. Because this will probably be the case (last year's closing inventory becomes this year's beginning inventory), you should withdraw from the engagement.

If the client corrects the error, you may proceed with the preparation of the 2015 tax return. You must assure yourself that the error is not repeated on the return that you are preparing.

Statement No. 7: Advice to Clients

In providing tax advice to a client, the CPA must use judgment to ensure that the advice reflects professional competence and appropriately serves the client's needs. No standard format or guidelines can be established to cover all situations and circumstances involving written or oral advice by the CPA.

The CPA may communicate with the client when subsequent developments affect previous advice on significant matters. However, the CPA is not expected to assume responsibility for initiating the communication, unless he or she has agreed to do so in the engagement letter with the client.

The rules regarding professional standards and ethics in tax practice are set forth at the top of the next page.

26-3 TAX PLANNING

26-3a Strategies in Seeking an Administrative Ruling

Determination Letters

In many instances, the request for an advance ruling or a determination letter from the IRS is a necessary or desirable planning strategy. The receipt of a favorable ruling or determination reduces the risk associated with a transaction when the tax results are in doubt. For example, the initiation or amendment of a qualified pension or profit sharing plan should be accompanied by a determination letter. Otherwise, upon subsequent IRS review, the plan may not qualify, and the tax deductibility of contributions to the plan will be disallowed. In some instances, the potential tax effects of a transaction are so numerous and of such consequence that proceeding without a ruling is unwise.

Letter Rulings

In some cases, it may not be necessary or desirable to request an advance ruling. For example, it generally is not desirable to request a ruling if the tax results are doubtful and the company is committed to completing the transaction in any event. If a ruling is requested and negotiations with the IRS indicate that an adverse determination will be

Concept Summary 26.2

Tax Profession and Ethics

1. The Treasury assesses penalties when the taxpayer fails to file a required tax return or pay a tax. Penalties also are assessed when an inaccurate return is filed due to negligence or other disregard of IRS rules. Tax preparers are subject to penalties for assisting a taxpayer in filing an inaccurate return, failing to follow IRS rules in an appropriate manner, or mishandling taxpayer data or funds.
2. Statutes of limitations place outer boundaries on the timing and amounts of proposed amendments to completed tax returns that can be made by the taxpayer or the IRS.
3. Tax practitioners must operate under constraints imposed on them by codes of ethics or pertinent professional societies and by Treasury Circular 230. These rules also define the parties who can represent others in an IRS proceeding.
4. A limited privilege of confidentiality exists between the taxpayer and tax preparer.

forthcoming, it usually is possible to have the ruling request withdrawn. However, the National Office of the IRS may forward its findings, along with a copy of the ruling request, to local IRS personnel. In determining the advisability of a ruling request, the taxpayer should consider the potential exposure of other items in the tax returns of all “open years.”

A ruling request may delay the consummation of a transaction if the issues are novel or complex. Frequently, a ruling can be processed within six months, although in some instances, a delay of a year or more may be encountered.

Technical Advice Memoranda

A taxpayer in the process of contesting a proposed deficiency with the Appeals Division should consider requesting a technical advice memorandum from the IRS. If the memorandum is favorable to the taxpayer, it is binding on the Appeals Division. The request may be particularly appropriate when the practitioner believes that the agent or Appeals Division has been too literal in interpreting an IRS ruling.

26-3b Considerations in Handling an IRS Audit

As a general rule, a taxpayer should attempt to settle disputes at the earliest possible stage of the administrative appeal process. It usually is possible to limit the scope of the examination by furnishing pertinent information requested by the agent. Extraneous information or fortuitous comments may result in the opening of new issues and should be avoided. Agents usually appreciate prompt and efficient responses to inquiries, because their performance may in part be judged by their ability to close or settle assigned cases.

To the extent possible, it is advisable to conduct the investigation of field audits in the practitioner’s office, rather than the client’s office. This procedure permits greater control over the audit investigation and facilitates the agent’s review and prompt closure of the case.

Many practitioners believe that it is generally not advisable to have clients present at the scheduled conferences with the agent, because the client may give emotional or gratuitous comments that impair prompt settlement. If the client is not present, however, he or she should be advised of the status of negotiations. The client makes the final decision on any proposed settlement.

Preparing for the Audit

The tax professional must prepare thoroughly for the audit or Appeals proceeding. Practitioners often cite the following steps as critical to such preparations. Carrying out a level of due diligence in preparing for the proceeding is part of the tax professional’s responsibility in representing the client.

- Make certain that both sides agree on the issues to be resolved in the audit. The goal here is to limit the agent’s list of open issues.
- Identify all of the facts underlying the issues in dispute, including those favorable to the IRS. Gather evidence to support the taxpayer’s position, and evaluate the evidence supporting the other side.

- Research current tax law authorities as they bear on the facts and open issues. Remember that the IRS agent is bound only by Supreme Court cases and IRS pronouncements. Determine the degree of discretion that the IRS is likely to have in disposing of the case.
- Prepare a list of points supporting and contradicting the taxpayer's case. Include both minor points bearing little weight and core principles. Short research memos also will be useful in the discussion with the agent. Points favoring the taxpayer should be mentioned during the discussion and "entered into the record."
- Prepare tax and interest computations showing the effects of points that are in dispute so that the consequences of closing or compromising an issue can be readily determined.
- Determine a "litigation point" (i.e., at which the taxpayer will withdraw from further audit negotiation and pursue the case in the courts). This position should be based on the dollars of tax, interest, and penalty involved; the chances of prevailing in various trial-level courts; and other strategies discussed with the taxpayer. One must have an "end game" strategy for the audit, and thorough tax research is critical in developing that position in this context.

Documentation Issues

The tax practitioner's workpapers should include all research memoranda, and a list of resolved and unresolved issues should be continually updated during the course of the IRS audit. Occasionally, agents request access to excessive amounts of accounting data to engage in a so-called fishing expedition. Providing blanket access to working papers should be avoided. Workpapers should be reviewed carefully to minimize opportunities for the agent to raise new issues not otherwise apparent. It generally is advisable to provide the agent with copies of specific workpapers upon request.

In unusual situations, a Special Agent may appear to gather evidence in the investigation of possible criminal fraud. When this occurs, the taxpayer should be advised to seek legal counsel to determine the extent of his or her cooperation in providing information to the agent. If the taxpayer receives a Revenue Agent's Report, it generally indicates that the IRS has decided not to initiate criminal proceedings. The IRS usually does not take any action on a tax deficiency until the criminal matter has been resolved.

26-3c Statute of Limitations

Extending the Statute

The IRS requests an extension of the statute of limitations when it finds that there is insufficient time to complete an audit or appellate review. The taxpayer is not compelled to agree to the extension request and may be averse to giving the IRS more time. But adverse consequences can result if the taxpayer denies the IRS request.

EXAMPLE

24

Although the statute of limitations governing Thornton's tax return is scheduled to expire in 15 days, the IRS has requested an extension for another 60 days. It wants to complete a more thorough investigation into a disputed \$50,000 deduction. If Thornton refuses to agree to the extension, the IRS likely will disallow the entire deduction. However, if Thornton agrees to the extension, all or part of the deduction may be salvaged.

A disadvantage of extending the statute is that the IRS sometimes can raise new issues during the extension period. However, the taxpayer can take the following protective measures as a condition to agreeing to the extension.

- Shorten the extension period requested before signing the Form 872. This will reduce the chance that the IRS will find and investigate new issues.
- Restrict the scope of the issues covered by the extension (e.g., extend the period only as to the computation of cost of goods sold).

- Instead of Form 872, use a Form 872–A. This allows for an open-ended termination date of the extension. Consequently, when the examination of a disputed issue is completed, the taxpayer can request that the IRS close off the extension. This reduces the chances that the IRS will find and pursue any new issues.

26-3d Penalties

The failure-to-file and failure-to-pay penalties are not a threat for most individual taxpayers. Those penalties are computed as a percentage of the unpaid tax liability; because most taxpayers receive a refund on the Form 1040, the penalty as computed would be zero.

The penalty for failure to pay estimated taxes can become quite severe. Often trapped by the provision are employed taxpayers with outside income. They may forget about the outside income and assume that the amount withheld from wages and salaries is adequate to cover their liability. Not only does April 15 provide a real shock (in terms of the additional tax owed) for these persons, but a penalty situation may have evolved. One way for an employee to mitigate this problem is described in the following example.

Patty, a calendar year taxpayer, is employed by Finn Corporation and earns (after withholding) a monthly salary of \$4,000 payable at the end of each month. Patty also receives income from outside sources (interest, dividends, and consulting fees). After some quick calculations in early October, Patty determines that she has underestimated her tax liability by \$7,500 and will be subject to the penalty for the first two quarters of the year and part of the third quarter. Patty, therefore, completes a new Form W–4 in which she raises her income tax withholding by \$2,500 a month. As a result, an extra \$7,500 is paid to the IRS on Patty’s account for the payroll period from October through December.

Patty avoids penalties for the underpayment for the first three quarters because withholding of taxes is allocated pro rata over the year involved. Thus, a portion of the additional \$7,500 withheld in October–December is assigned to the January 1–April 15 period, the April 16–June 15 period, etc. Had Patty merely paid the IRS an additional \$7,500 in October, the penalty would still have been assessed for the earlier quarters.

EXAMPLE

25

To avoid tax preparer penalties, the tax professional must carry out a number of quality control measures within the context of his or her firm.

- Adopt a “tone at the top” that stresses ethical tax practice, emphasizing at all times the importance of integrity and objectivity in the context of client advocacy.
- Establish and follow ethical guidelines with respect to all forms of client communication and documentation, including tax returns and written, spoken, and electronic tax advice.
- Apply ethical standards even before an engagement letter is prepared for a potential client. The client should be aware of, and participate in, this dedication to ethical behavior.
- Stay current on changes to penalties, ethical guidelines, and Circular 230 provisions through an ongoing educational effort that communicates rule changes and the firm’s best practices to all who handle tax return data.
- Monitor the compliance of all members of the firm with the established ethical guidelines. Use a peer review process periodically to confirm that the system is working as designed and to bring third-party suggestions into the process.

26-3e Privileged Communications

The CPA needs to exercise care to ensure that the privilege of confidentiality will apply to his or her tax work. Taking the following steps can help.

- Segregate the time spent and documents produced in rendering services for tax compliance from that devoted to tax advice. Doing this will protect the privilege from being waived as to the tax advice.

- Explain the extent of the privilege to the client—specify what will and will not be protected from the IRS in a dispute.
- Do not inadvertently waive the privilege, for example, by telling “too much” to the IRS or to a third party who is not protected by the privilege.
- Indemnify the CPA for time spent protecting and enforcing the privilege once it is challenged.

REFOCUS ON THE BIG PICTURE

A TAX ADVISER'S DILEMMA

Your work with Campbell Corporation and its incremental research credit may prove troublesome. To avoid the taxpayer and tax preparer penalties, substantial authority must exist for claiming the credit, but the tax cases and Regulations do not appear to provide much guidance with respect to research expenditures of this sort. How does one craft a tax return position when the tax law largely is silent as to the particulars of the facts of the taxpayer's situation? How much risk of incurring a tax penalty are the taxpayer and your firm willing to assume in deciding how and whether to report these expenditures?

Beyond the monetary effects of claiming the credit, you and the client must consider the publicity aspects of taking this issue to court: Does Campbell want to be the “test case” in the Tax Court on this matter? What would be the effects on your consulting firm if a preparer penalty or even loss of professional certification were to result? If the credit is to be claimed, what degree of “disclosure” does the law require?

At a minimum, your firm and Campbell's tax department must conduct thorough research of analogous situations in the law in which the incremental research credit was and was not allowed for the taxpayer. Due diligence in this regard would require that you examine how other software applications and similar technological innovations, probably having nothing to do with GPS software and national security concerns, were treated for tax credit purposes. Constrained only by the budget dollars that Campbell is willing to dedicate to this task, your research is likely to be both interesting and frustrating, as no “on point” resolution is likely to be found prior to a later audit of the Form 1120 and its disclosures.

What If?

The risk profiles of the tax adviser and a client seldom are identical. What position should your firm take if Campbell's tax department decides to claim the full incremental research credit for an item on which the tax law is silent or unclear, but your firm recommends that a special disclosure be made on the return concerning the item? A disclosure of this sort would protect the parties from later assessment of tax penalties, but Campbell believes that drawing attention to the credit item would increase the likelihood of a targeted audit of the expenditures by the IRS.

Although you are certain that tax fraud is not a problem on the Campbell return, you are concerned about the ramifications of Campbell's desire to omit the recommended disclosure. Your firm might decide to leave the Campbell engagement altogether if it is especially sensitive to exposure to penalties or if it is not certain that adequate research has been done to support the tax return position. Charges of a lack of due diligence by your firm might be brought by the IRS, the firm's professional ethics or certification bodies, or the issuer of its malpractice insurance. Clearly, none of these results is attractive to your firm.

Key Terms

| | | |
|-----------------------------------|------------------------------------|---|
| Accuracy-related penalties, 26-16 | Letter ruling, 26-4 | Tax preparer, 26-26 |
| Circular 230, 26-23 | Negligence, 26-16 | Technical advice memorandum (TAM), 26-4 |
| Closing agreement, 26-12 | Ninety-day letter, 26-9 | Thirty-day letter, 26-9 |

| Enrolled agents (EAs), 26-23 | Revenue Agent's Report (RAR), 26-8 | |
| Fraud, 26-18 | Statute of limitations, 26-21 | |
| Frivolous return, 26-24 | Substantial authority, 26-16 | |

Discussion Questions

- LO.1** As a tax professional with a diverse group of clients and tax issues, why is it important that you understand how the IRS is organized and how its personnel are selected?
- LO.1** Your tax client Chen asks whether it is likely that her Form 1040 will be audited this year. You suspect that Chen might modify the information she reports on her return based on your answer. Address Chen's question, and provide her with a justification to comply fully with the tax law's reporting requirements.
- LO.1** Recently, a politician was interviewed about fiscal policy, and she mentioned reducing the "tax gap." Explain what this term means. What are some of the pertinent political and economic issues relative to the tax gap?
- LO.1** Review Exhibit 26.1, and identify the following.
 - The title of the IRS's chief executive officer.
 - The title of the "IRS's attorney."
 - The names of the four major operating divisions of the IRS.
 - The placement in the IRS organization of the Appeals and Criminal Investigation functions.
- LO.3** During an interview with an IRS official on *Dateline*, the interviewer asks, "So how do you decide which Forms 1040 get audited and which do not?" How should the IRS official respond, taking into account that only some of the audit selection process is public information?
- LO.3** On June 10, Ming states, "I filed my Form 1040 on April 5 and haven't heard from the IRS since then, so I know I will not be audited!" Evaluate Ming's assumption.
- LO.3** You overhear Matheus say, "I am so glad to be divorced from my cheating wife Larissa. She keeps two sets of books in her design business, and I wish the IRS would find out about it." Is Matheus a candidate for the informant reward program that is operated by the IRS? Explain how the program works and how a reward might be paid to Matheus.
- LO.6** Which of the valuation penalties is likely to arise when an aggressive taxpayer reports:
 - A charitable contribution?
 - A business deduction?
 - A decedent's taxable estate?

Issue ID

9. **LO.4, 5** Indicate whether each of the following statements is true or false.
- The government never pays a taxpayer interest on an overpayment of tax.
 - The IRS can compromise on the amount of tax liability if there is doubt as to the taxpayer's ability to pay.
 - The IRS is required to accept Colin's application for an installment plan that delays the payment of her \$6,000 outstanding tax liability.
 - The offer in compromise program attempts to allow upper-income taxpayers additional time in which to pay delinquent tax amounts.
10. **LO.4, 6** In each of the following cases, distinguish between the terms.
- Offer in compromise and closing agreement.
 - Failure to file and failure to pay.
 - 90-day letter and 30-day letter.
 - Negligence and fraud.
 - Criminal and civil tax fraud.
- Issue ID** 11. **LO.7** Discuss the concept of statutes of limitations in the context of the Federal income tax law.
- Who benefits when the statute applies—the government, the taxpayer, both?
 - What happens when the statute is scheduled to expire within two weeks but the IRS audit will not be completed by then?
12. **LO.8** Give the Circular 230 position concerning each of the following situations sometimes encountered in the tax profession.
- Taking an aggressive pro-taxpayer position on a tax return.
 - Not having a quality review process for a return completed by a partner of the tax firm.
 - Purposely delaying compliance with a document request received from the IRS.
 - Not keeping up with changes in the tax law.
 - Charging \$1,500 to complete a Form 1040-EZ.
 - When representing a taxpayer in a Federal income tax audit, charging a fee equal to one-third of the reduction of the tax proposed by the IRS agent.
 - Representing both the husband and wife as to tax matters when negotiating their divorce.
 - Advertising on the Web for new tax clients and including *Se habla español* in the text of the ads.
13. **LO.8** Indicate whether each of the following parties could be subject to the tax preparer penalties.
- Tom prepared Sally's return for \$250.
 - Theresa prepared her grandmother's return for no charge.
 - Georgia prepared her church's return for \$500 (she would have charged an unrelated party \$3,000 for the same work).
 - Geoff prepared returns for low-income taxpayers under his college's VITA program.
 - Hildy prepared the return of her corporate employer.
 - Heejeo, an administrative assistant for an accounting firm, processed a client's return through TurboTax.
- Communications** 14. **LO.8** Using PowerPoint slides, list at least three of the Statements on Standards for Tax Services that apply to CPAs. For each standard you choose, provide a short explanation of its content.

Computational Exercises

15. **LO.6** Alexi files her tax return 20 days after the due date. Along with the return, she remits a check for \$3,000, which is the balance of the tax she owes. Disregarding any interest liabilities, compute Alexi's total penalties for this period.
16. **LO.6** Marcella (a calendar year taxpayer) purchased a sculpture for \$5,000. When the sculpture is worth \$12,000 (as later determined by the IRS), Marcella donates it to the Peoria Museum of Art, a public charity. Based on the appraisal of a friend, Marcella deducts \$38,000 for the donation. Because Marcella was in the 28% tax bracket, overstating the deduction by \$26,000 results in a tax underpayment of \$7,280. Compute Marcella's overvaluation penalty.
17. **LO.6** Rivera underpaid her income tax by \$45,000. The IRS can prove that \$40,000 of the underpayment was due to fraud. Determine Rivera's civil fraud penalty.
18. **LO.7** On June 15, 2014, Sheridan filed his 2013 income tax return reflecting a tax of \$10,500. On October 5, 2015, he filed an amended 2013 return showing an additional \$6,400 of tax, which he paid with the amended return. On August 22, 2017, he filed a claim for a refund of \$7,000. How much Federal income tax can Sheridan recover on the amended return?

Problems

19. **LO.5** Gordon paid the \$10,000 balance of his Federal income tax three months late. Ignore daily compounding of interest. Determine the interest rate that applies relative to this amount, assuming that:
 - a. Gordon is an individual.
 - b. Gordon is a C corporation.
 - c. The \$10,000 is not a tax that is due, but is a refund payable by the IRS to Gordon (an individual).
 - d. The \$10,000 is not a tax that is due, but is a refund payable by the IRS to Gordon (a C corporation).
20. **LO.6** Rita forgot to pay her Federal income tax on time. When she actually filed, she reported a balance due. Compute Rita's failure to file penalty in each of the following cases.
 - a. Two months late, \$1,000 additional tax due.
 - b. Five months late, \$3,000 additional tax due.
 - c. Eight months late, \$4,000 additional tax due.
 - d. Two and a half months late, \$3,000 additional tax due.
 - e. Five months late due to fraud by Rita, \$4,000 additional tax due.
 - f. Ten months late due to fraud by Rita, \$15,000 additional tax due.
21. **LO.6** Wade filed his Federal income tax return on time but did not remit the balance due. Compute Wade's failure to pay penalty in each of the following cases. The IRS has not issued a deficiency notice.
 - a. Four months late, \$3,000 additional tax due.
 - b. Ten months late, \$4,000 additional tax due.
 - c. Five years late, \$5,000 additional tax due.

22. **LO.6** Compute the failure to pay and failure to file penalties for John, who filed his 2015 income tax return on December 20, 2016, paying the \$10,000 amount due at that time. On April 1, 2016, John received a six-month extension of time in which to file his return. He has no reasonable cause for failing to file his return by October 15 or for failing to pay the tax that was due on April 15, 2016. John's failure to comply with the tax laws was not fraudulent.
23. **LO.6** Olivia, a calendar year taxpayer, does not file her 2015 Form 1040 until December 12, 2016. At this point, she pays the \$40,000 balance due on her 2015 tax liability of \$70,000. Olivia did not apply for and obtain any extension of time for filing the 2015 return. When questioned by the IRS on her delinquency, Olivia asserts: "If I was too busy to file my regular tax return, I was too busy to request an extension."
- Is Olivia liable for any penalties for failure to file and for failure to pay?
 - If so, compute the penalty amounts.
24. **LO.6** Maureen, a calendar year individual taxpayer, files her 2014 return on November 4, 2016. She did not obtain an extension for filing her return, and the return reflects additional income tax due of \$15,000.
- What are Maureen's penalties for failure to file and to pay?
 - Would your answer to (a) change if Maureen, before the due date of the return, had retained a CPA to prepare the return and it was the CPA's negligence that caused the delay? Explain.
25. **LO.6** Blair underpaid her taxes by \$250,000. A portion of the underpayment was shown to be attributable to Blair's negligence (\$100,000). A court found that the rest of the deficiency constituted civil fraud (\$150,000). Compute the total fraud and negligence penalties incurred.
26. **LO.6** Compute the overvaluation penalty for each of the following independent cases involving the fair market value of charitable contribution property. In each case, assume a marginal income tax rate of 35%.

| | Taxpayer | Corrected IRS Value | Reported Valuation |
|----|---------------|---------------------|--------------------|
| a. | Individual | \$ 40,000 | \$ 50,000 |
| b. | C corporation | 30,000 | 50,000 |
| c. | S corporation | 40,000 | 50,000 |
| d. | Individual | 150,000 | 200,000 |
| e. | Individual | 150,000 | 250,000 |
| f. | C corporation | 150,000 | 750,000 |

27. **LO.6** Compute the undervaluation penalty for each of the following independent cases involving the value of a closely held business in the decedent's gross estate. In each case, assume a marginal estate tax rate of 40%.

| | Reported Value | Corrected IRS Valuation |
|----|----------------|-------------------------|
| a. | \$ 20,000 | \$ 25,000 |
| b. | 100,000 | 150,000 |
| c. | 150,000 | 250,000 |
| d. | 150,000 | 500,000 |

28. **LO.6** Singh, a qualified appraiser of fine art and other collectibles, was advising Colleen when she was determining the amount of the charitable contribution deduction for a gift of sculpture to a museum. Singh sanctioned a \$900,000 appraisal, even though he knew the market value of the piece was only \$300,000. Colleen assured Singh that she had never been audited by the IRS and that the risk of the government questioning his appraisal was negligible.

But Colleen was wrong, and her return was audited. The IRS used its own appraisers to set the value of the sculpture at \$400,000. Colleen is in the 33% Federal income tax bracket, while Singh's fee for preparing the appraisal was \$20,000.

- a. Compute the penalty the IRS can assess against Singh. (Do not consider the valuation penalty as to Colleen's return.)
 - b. What is the penalty if Singh's appraisal fee was \$7,500 (not \$20,000)?
29. **LO.6** The Eggers Corporation filed an amended Form 1120, claiming an additional \$400,000 deduction for payments to a contractor for a prior tax year. The amended return was based on the entity's interpretation of a Regulation that defined deductible advance payment expenditures. The nature of Eggers's activity with the contractor did not exactly fit the language of the Regulation. Nevertheless, because so much tax was at stake, Eggers's tax department decided to broaden its interpretation and claim the deduction.
- Eggers's tax department estimated that there was only a 15% chance that Eggers's interpretation would stand up to a Tax Court review.
- a. What is the amount of tax penalty that Eggers is risking by taking this position?
 - b. What would be the result if there was a 45% chance that Eggers's interpretation of the Regulation was correct?
30. **LO.6** Kaitlin donated a painting to the local art museum. As she is subject to a 35% marginal tax rate, she needs a large charitable contribution deduction for the year. She engaged Vargas (who was referred to her by the staff of the museum) to provide an appraisal of the painting before she filed her Form 1040 for the year. Kaitlin told Vargas, "Be kind to me on this appraisal, and I'll send several more clients to you in the future." Kaitlin paid Vargas a \$45,000 fee for his services.
- Vargas completed his appraisal and determined that the painting was worth \$500,000 under current market conditions. Still, in light of Kaitlin's promise of future business, Vargas sent Kaitlin an official appraisal reporting a \$900,000 value for the artwork. Vargas had never compromised his integrity, but this time the temptation was too much.
- Kaitlin used the appraisal to claim a \$900,000 deduction for her charitable gift. Kaitlin will incur a valuation penalty now that her Form 1040 has been audited and the IRS has determined that the correct amount of the deduction is \$500,000. But is Vargas also exposed to a Federal tax penalty? Explain.
31. **LO.6** Trudy's AGI last year was \$200,000. Her Federal income tax came to \$65,000, which she paid through a combination of withholding and estimated payments. This year, her AGI will be \$300,000, with a projected tax liability of \$45,000, all to be paid through estimates.
- a. Ignore the annualized income method. Compute Trudy's quarterly estimated tax payment schedule for this year.
 - b. Assume instead that Trudy's AGI last year was \$100,000 and resulted in a Federal income tax of \$20,000. Determine her quarterly estimated tax payment schedule for this year.
32. **LO.6** Kold Services Corporation estimates that its 2015 taxable income will be \$500,000. Thus, it is subject to a flat 34% income tax rate and incurs a \$170,000 liability. For each of the following independent cases, compute Kold's 2015 minimum quarterly estimated tax payments that will avoid an underpayment penalty.
- a. For 2014, taxable income was (\$200,000). Kold carried back all of this loss to prior years and exhausted the entire net operating loss in creating a zero 2014 liability.
 - b. For 2014, taxable income was \$450,000, and tax liability was \$153,000.
 - c. For 2013, taxable income was \$2 million, and tax liability was \$680,000. For 2014, taxable income was \$400,000, and tax liability was \$136,000.

Decision Making
Communications

33. **LO.6** The Leake Company, owned equally by Jacquie (chair of the board of directors) and Jeff (company president), is in very difficult financial straits. Last month, Jeff used the \$300,000 withheld from employee paychecks for Federal payroll and income taxes to pay a creditor who threatened to cut off all supplies. To keep the company afloat, Jeff used these government funds willfully for the operations of the business, but even that effort was not enough. The company missed the next two payrolls, and today other creditors took action to shut down Leake altogether.

How much will the IRS assess in taxes and penalties in this matter and from whom? How can you as a tax professional best offer service to Jacquie, Jeff, and Leake? Address these matters in a memo for the tax research file.

34. **LO.7** Keely filed her 2016 Form 1040 on April 4, 2017. What is the applicable statute of limitations in each of the following independent situations?
- The taxpayer incurred a bad debt loss that she failed to claim.
 - A taxpayer inadvertently omitted a large amount of gross income.
 - Same as (b), except that the omission was deliberate.
 - A taxpayer innocently overstated her deductions by a large amount.
 - What if no return was filed by the taxpayer?
35. **LO.7** Loraine (a calendar year taxpayer) reported the following transactions, all of which were properly included in a timely filed return.

| | | |
|----------------|-----------------|-------------------|
| Gross receipts | | \$ 975,000 |
| Cost of sales | | <u>(850,000)</u> |
| Gross profit | | \$ 125,000 |
| Capital gain | \$ 40,000 | |
| Capital loss | <u>(25,000)</u> | <u>15,000</u> |
| Total income | | <u>\$ 140,000</u> |

- Presuming the absence of fraud, how much of an omission from gross income is required before the six-year statute of limitations applies?
- Would it matter if cost of sales had been inadvertently overstated by \$150,000?
- How does the situation change in the context of fraud by Loraine?

Decision Making

36. **LO.5, 7** On April 3, 2013, Luis filed his 2012 income tax return, which showed a tax due of \$75,000. On June 1, 2015, he filed an amended return for 2012 that showed an additional tax of \$10,000. Luis paid the additional amount. On May 18, 2016, Luis filed a claim for a 2012 refund of \$25,000.
- If Luis's claim for a refund is correct in amount, how much tax will he recover?
 - What is the period that government-paid interest runs with respect to Luis's claim for a refund?
 - How would you have advised him differently?
37. **LO.8** Rod's Federal income tax returns (Form 1040) for the indicated years were prepared by the following persons.

| Year | Preparer |
|------|----------|
| 1 | Rod |
| 2 | Ann |
| 3 | Cheryl |

Ann is Rod's next-door neighbor and owns and operates a pharmacy. Cheryl is a licensed CPA and is engaged in private practice. In the event Rod is audited and all three returns are examined, who may represent him before the IRS at the agent level? Who may represent Rod before the Appeals Division?

38. **LO.8** Christie is the preparer of the Form 1120 for Yostern Corporation. On the return, Yostern claimed a deduction that the IRS later disallowed on audit.

Compute the tax preparer penalty that could be assessed against Christie in each of the following independent situations.

| | Form 8275 Disclosure on the Return of the Disputed Deduction? | Tax Reduction Resulting from the Deduction | Probability That the Courts Would Approve the Deduction | Christie's Fee to Complete Yostern's Return |
|----|---|--|---|---|
| a. | No | \$40,000 | 65% | \$7,000 |
| b. | No | 40,000 | 35 | 7,000 |
| c. | No | 40,000 | 35 | 1,500 |
| d. | Yes | 40,000 | 35 | 7,000 |
| e. | Yes | 40,000 | 15 | 4,000 |

39. **LO.8** Discuss which penalties, if any, might be imposed on the tax adviser in each of the following independent circumstances. In this regard, assume that the tax adviser:
- Suggested to the client various means by which to acquire excludible income.
 - Suggested to the client various means by which to conceal cash receipts from gross income.
 - Suggested to the client means by which to improve her cash flow by delaying for six months or more the deposit of the employees' share of Federal employment taxes.
 - Failed, because of pressing time conflicts, to conduct the usual review of the client's tax return. The IRS later discovered that the return included fraudulent data.
 - Failed, because of pressing time conflicts, to conduct the usual review of the client's tax return. The IRS later discovered a mathematical error in the computation of the personal exemption.
40. **LO.8** Compute the preparer penalty the IRS could assess on Gerry in each of the following independent cases.
- On March 21, the copy machine was not working, so Gerry gave original returns to her 20 clients that day without providing any duplicates for them. Copies for Gerry's files and for use in preparing state tax returns had been made on March 20.
 - Because Gerry extended her vacation a few days, she missed the Annual Tax Update seminar that she usually attends. As a result, she was unaware that Congress had changed a law affecting limited partnerships. The change affected the transactions of 25 of Gerry's clients, all of whom understated their tax as a result.
 - Gerry heard that the IRS was increasing its audits of corporations that hold assets in a foreign trust. As a result, Gerry instructed the intern who prepared the initial drafts of the returns for five corporate clients to leave blank the question about such trusts. Not wanting to lose his position, the intern, a senior accounting major at State University, complied with Gerry's instructions.
41. **LO.8** You are the chair of the Ethics Committee of your state's CPA Licensing Commission. Interpret controlling AICPA authority in addressing the following assertions by your membership.
- When a CPA has reasonable grounds for not answering an applicable question on a client's return, a brief explanation of the reason for the omission should not be provided, because it would flag the return for audit by the IRS.
 - If a CPA discovers during an IRS audit that the client has a material error in the return under examination, he should immediately withdraw from the engagement.
 - If the client tells you that she paid \$500 for office supplies but has lost the receipts, you should deduct an odd amount on her return (e.g., \$499), because an even amount (\$500) would indicate to the IRS that her deduction was based on an estimate.

Decision Making

- d. If a CPA knows that the client has a material error in a prior year's return, he should not, without the client's consent, disclose the error to the IRS.
- e. If a CPA's client will not correct a material error in a prior year's return, the CPA should not prepare the current year's return for the client.

Note: Solutions to Research Problems can be prepared by using the Checkpoint® Student Edition online research product, which is available to accompany this text. It is also possible to prepare solutions to the Research Problems by using tax research materials found in a standard tax library.

Communications

Research Problem 1. Lopez always had taken his Form 1040 data to the franchise tax preparers in a local mall, but this year, his friend Cheryl asked to prepare his return. Cheryl quoted a reasonable fee, and Lopez reasoned that, with finances especially tight in Cheryl's household, she could use the money.

Lopez delivered his Forms W-2 and 1099 and other documentation and said, "I'll pick up the finished return from you on Monday." Cheryl completed the return by that deadline, and without signing and reviewing the forms, Lopez allowed Cheryl to e-file it that day. The arrangement was that Cheryl would receive the refund through a special bank account and write Lopez a check for that amount, less her fee. When the refund came through about three weeks later, Cheryl wrote Lopez a check for \$2,400, and all parties were satisfied. Lopez gladly used Cheryl to e-file the next year's return using the same procedures.

To his surprise, Lopez received a letter from the IRS about 18 months later. The auditor had found that the return Cheryl had e-filed vastly overstated deductions, created false dependency exemptions (using Social Security numbers that did not exist), and wrongly calculated the earned income tax credit. According to the audit report, the refund issued was \$4,500—Cheryl had pocketed the difference. Thus, the corrected tax liability meant that Lopez now owed \$7,000 in tax, before considering interest and penalties.

Lopez contends that he relied on Cheryl's expertise in the tax law and e-filing procedures. Consequently, there was reasonable cause for the underpayment of tax, and the IRS should waive the understatement and negligence penalties. The IRS has expressed sympathy for Lopez's position, but it maintains that the penalty should stand. What do you think? Summarize your findings in a memo for the tax research file.

Communications

Research Problem 2. Blanche Creek (111 Elm Avenue, Plymouth, IN 46563) has engaged your firm because she has been charged with failure to file her 2015 Federal Form 1040. Blanche maintains that the "reasonable cause" exception should apply. During the entire tax filing season in 2016, she was under a great deal of stress at work and in her personal life. As a result, Blanche developed a sleep disorder, which was treated through a combination of pills and counseling.

Your firm ultimately prepared the 2015 tax return for Blanche, but it was filed far beyond the due date. Blanche is willing to pay the delinquent tax and related interest. However, she believes that the failure to pay penalty is unfair, as she was ill. Consequently, she could not be expected to keep to the usual deadlines for filing.

Write a letter to Blanche concerning these matters.

Communications

Research Problem 3. Your firm is preparing the Form 1040 of Norah McGinty, a resident, like you, of Oklahoma. You have contracted for the last three filing seasons with a firm in India, Tax Express Bangalore, to prepare initial drafts of tax returns using tax software that you provide to Tax Express. You find that the use of Tax Express Bangalore's services significantly increases the profits of your Form 1040 practice.

Your firm uses Tax Express annually to help prepare Forms 1040 for about 500 of your clients. Three of your tax managers, JaJuan, Max, and Emma, spend several

weeks in the autumn every year in India, training the Bangalore staff in Federal tax law changes and in the operations of your tax software packages.

Phil, a tax associate in your Norman office, is handling Norah's return this year. Phil works with Norah to complete the online tax questionnaire that summarizes her taxable events and the related dollar amounts. The questionnaire includes the Social Security numbers of Norah and her two dependent children. The children are young, and their income levels do not require them to complete income tax returns.

Phil sends the completed questionnaire and electronic files of supporting documents to the Bangalore staff at the end of the work day on Monday, using a secure file transfer site. Upon arriving at work Thursday morning, Phil finds that Tax Express has completed the Form 1040, including a payment voucher. Phil reviews the return, makes a few minor changes to it, and then meets with Norah on Saturday to convey to her the finalized documents. Norah reviews the form, and she signs it and writes a check for the amount due, mailing the return to the IRS Service Center from her home on the following Monday.

In a memo for the tax research file, discuss any special rules from the Code and Regulations that might affect your firm's use of Tax Express Bangalore for your client Norah McGinty.

Use the tax resources of the Internet to address the following questions. Do not restrict your search to the Web, but include a review of newsgroups and general reference materials, practitioner sites and resources, primary sources of the tax law, chat rooms and discussion groups, and other opportunities.

Internet
Activity

Research Problem 4. Taxpayers generally “go to jail” on tax charges only when criminal activities have been involved. Find information about the criminal tax prosecutions the Treasury undertakes. Compare data for the last year of information available from the IRS and for five years prior to that.

Communications

How many criminal tax charges are initiated in a year? How much time does a criminal tax case take from the filing of charges to disposition by the IRS or a court? What issues tend to be the focus of a criminal tax prosecution? How much additional tax, interest, and penalty revenue does the Treasury collect due to its criminal prosecutions? Summarize your findings for your classmates in no more than four PowerPoint slides.

Research Problem 5. Every year toward the end of the Form 1040 filing season, suggestions are offered to taxpayers about how to pay their taxes if they lack the funds to do so. The discussions address filing extensions, installment plans, and credit card payments. Find two online videos of this sort. Summarize the video clips, and develop a speech outline and no more than four PowerPoint slides for a presentation you will make to your town's Young Executives Club.

Roger CPA Review Questions

1. Which of the following situations will result in a tax preparer's penalty?
 - I. At a client's insistence, the preparer takes and properly discloses a tax position which does not meet the reasonable basis standard
 - II. The preparer discloses a client's personally identifying information to outside parties in order to permit the electronic preparation and submission of the client's return
 - III. The preparer provides his Preparer Tax Identification Number but fails to sign a client's tax return
 - a. II only
 - b. I, II, and III
 - c. I only
 - d. I and III only

2. In which of the following cases is a CPA not subject to a penalty stemming from a position taken on a tax return?
 - I. The position had a “reasonable chance of being sustained”
 - II. The position had a “realistic possibility” of being sustained
 - III. The position was “more likely than not” to be sustained
 - a. I only
 - b. II only
 - c. III only
 - d. I, II, and III
3. Scott is preparing Allison’s 20X4 tax return. Allison’s gross income in 20X4 was \$75,000. In calculating her deductions to arrive at Adjusted Gross Income (AGI), Allison estimates that she paid around \$2,000 in student loan interest. Her student loan servicing company, Crippling Lifetime Debt (CLD), went out of business and her debt was transferred to other loan servicers. Allison monitored all of her account records online, which are no longer readily available because of CLD’s closing. Based on Allison’s monthly payments which he viewed in her bank activity, Scott believes Allison’s estimate is reasonable. May Scott use Allison’s estimate to arrive at Allison’s AGI?
 - a. Yes, because it is less than 10% of Allison’s AGI
 - b. No, because the records at the new loan servicers will be able to confirm or dispute Allison’s estimate
 - c. Yes, because Scott believes the estimate is reasonable
 - d. No, because it is an adjustment for AGI
4. While preparing Margaret’s 20X4 tax return, John discovers an error on her 20X3 tax return, which Margaret prepared herself, in which Margaret’s Adjusted Gross Income (AGI) was understated by \$10,000, roughly ten percent of her AGI. What is John’s responsibility concerning the error?
 - a. Do nothing, since the understatement was less than 25% of Margaret’s AGI
 - b. Correct the error without Margaret’s knowledge on her 20X4 tax return
 - c. Request that Margaret correct the error, and notify the IRS if she doesn’t
 - d. Request that Margaret correct the error, and consider withdrawing from the engagement if she doesn’t
5. Which of the following parties are *not* affected by Treasury Circular 230?
 - a. Attorneys
 - b. IRS Agents
 - c. CPAs
 - d. Enrolled Agents

FAMILY TAX PLANNING

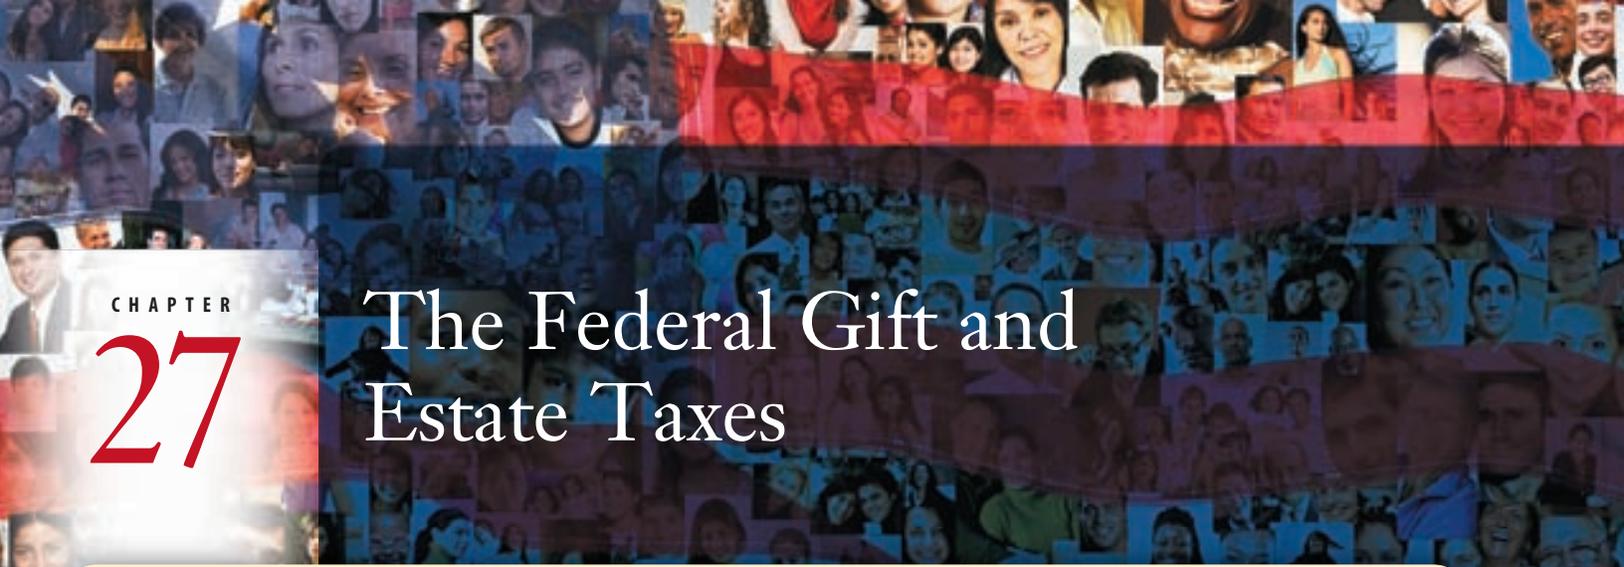

CHAPTER **27**

The Federal Gift and Estate Taxes

CHAPTER **28**

Income Taxation of Trusts and Estates

Family tax planning has as its objective the minimization of *all* taxes imposed on the family unit. Carrying out this objective requires familiarity with the rules applicable to transfers by gift and by death. These rules must then be applied to reduce the transfer tax burden. Finally, entities created as a result of these transfers (trusts and estates) are subject to unique income tax rules.

CHAPTER
27

The Federal Gift and Estate Taxes

LEARNING OBJECTIVES: *After completing Chapter 27, you should be able to:*

- | | |
|--|--|
| LO.1 Explain the nature of the Federal gift and estate taxes. | LO.6 Identify the components of the gross estate. |
| LO.2 List and analyze the Federal gift tax formula. | LO.7 Describe the components of the taxable estate. |
| LO.3 List and analyze the Federal estate tax formula. | LO.8 Calculate the Federal estate tax liability. |
| LO.4 Illustrate the operation of the Federal gift tax. | LO.9 Review and demonstrate the role of the generation-skipping transfer tax. |
| LO.5 Calculate the Federal gift tax. | LO.10 Recognize strategies to minimize Federal gift and estate taxes. |

THE BIG PICTURE

AN EVENTFUL AND FINAL YEAR

Over his lifetime, Peter Hood started and purchased numerous automobile dealerships that he eventually transferred to a newly formed entity, Hood Corporation. Upon his death in 2000, the stock in Hood Corporation passed in equal shares to Peter's surviving spouse, Martha, and their adult children, John and Helen.

For John Hood, 2014 proved to be an eventful and final tax year. Among the major happenings were the following.

- In January, John's divorce from his first wife, Hannah, became final.
- In February, he married Ashley, the manager of one of the Hood car dealerships.
- He made various gifts to family members.
- In July, his mother died of a heart condition, and John served as executor of her estate.
- In late November, he was seriously injured in a car accident (caused by another motorist).
- In early December, he carried out some predeath planning.
- John died of his injuries in mid-December.

What are some of the tax problems (i.e., income, gift, and estate taxes) that might be encountered as a result of these events?

Read the chapter and formulate your response.

Until now, this text has dealt primarily with the various applications of the Federal income tax. Also important in the Federal tax structure are various excise taxes that cover transfers of property. Sometimes called transaction taxes, excise taxes are based on the value of the property transferred and not on the income derived from the property. Two such taxes—the Federal gift tax and the Federal estate tax—are the central focus of this chapter.

LO.1

Explain the nature of the Federal gift and estate taxes.

27-1 TRANSFER TAXES—IN GENERAL

To better understand the Federal gift and estate taxes, one should be familiar with certain tax and legal concepts. What, for example, is the nature of these taxes, upon whom are they imposed, and what is the valuation used for their imposition?

27-1a Nature of the Taxes

Historical Background

Federal tax law imposes a tax on the gratuitous transfer of property in one of two ways. If the transfer occurs during the owner's life, it is subject to the Federal gift tax. If the property passes by virtue of the death of the owner, the Federal estate tax applies. Originally, the two taxes were governed by different rules, including a separate set of tax rates. As Congress believed that lifetime transfers of wealth should be encouraged, the gift tax rates were 25 percent lower than the estate tax rates.¹

The Tax Reform Act of 1976 significantly changed the approach taken by the Federal gift and estate taxes. Recognizing that prior rules had not significantly stimulated a preference for lifetime over death transfers, Congress decided that all transfers should be taxed the same way. Consequently, much of the distinction between life and death transfers was eliminated. Instead of subjecting these different types of transfers to two separate tax rate schedules, the Act substituted a **unified transfer tax** that covered all gratuitous transfers. Thus, gifts were subject to tax at the same rates as those applicable to transfers at death.

The Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) made further changes. Reacting to general public sentiment, Congress concluded that the Federal estate tax was objectionable because it leads to the breakup of family farms and other closely held businesses. Thus, by scheduled increases in the unified tax credit applicable to estates, the estate tax was eliminated by 2010, but the gift tax was retained.

After 2010, the estate tax was reinstated and placed on a parity with the gift tax. The unified tax credit was increased to \$5 million starting in 2011 and made subject to adjustment each year for inflation. The top unified transfer tax rate was raised to 40 percent (from 35 percent).²

Persons Subject to the Tax

The Federal gift tax is imposed on the right of one person (the donor) to transfer property to another (the donee) for less than full and adequate consideration. The tax is payable by the donor.³ If the donor fails to pay the tax when due, the donee may be held liable for the tax to the extent of the value of the property received.⁴

Upon the death of an individual, the Federal estate tax is imposed on the entire estate.⁵ The executor (or administrator) of the estate has the obligation to pay any estate tax that may be due.

¹The estate tax was enacted in 1916. Because the estate tax could be avoided by making transfers just prior to dying (i.e., "deathbed gifts"), a gift tax was added in 1932.

²The Obama Administration has proposed reducing the credit to \$3.5 million and raising the maximum rate to 55%. The proposal is not likely to be enacted by Congress.

³§ 2502(c).

⁴§ 6324(b). Known as the doctrine of transferee liability, this rule also operates to enable the IRS to enforce the collection of other taxes (e.g., income tax and estate tax).

⁵§ 2001(a). Subchapter A (§§ 2001 through 2058) covers the estate tax treatment of those who are either residents or citizens. Subchapter B (§§ 2101 through 2108) covers the estate tax applicable to NRAs.

GLOBAL TAX ISSUES U.S. Transfer Taxes and NRAs

For individuals who are neither residents nor citizens of the United States (i.e., nonresident aliens, or NRAs), the Federal gift tax applies only to gifts of property situated within the United States. Exempted, however, are gifts of intangibles, such as stocks and bonds.

For decedents who are NRAs, the Federal estate tax is imposed on the value of property located within the United States. Unlike the gift tax, however, the estate tax applies to

stock in U.S. corporations. Special reporting procedures apply to the estate taxation of NRAs—see the instructions to Form 706-NA, United States Estate (and Generation-Skipping Transfer) Tax Return, Estate of nonresident not a citizen of the United States.

Source: Code §§ 2101(a), 2501(a)(2), and 2511(a).

If the transferor is a resident or citizen of the United States, then the location of the property transferred is immaterial. Thus, a gift by a U.S. resident of property located in Honduras is subject to the Federal gift tax. For a U.S. citizen or resident, the place of residence at the time of the transfer is not relevant. For these purposes, “United States” includes only the 50 states and the District of Columbia and does not include U.S. possessions or territories.⁶

Types of Tax at Death

Taxes payable by virtue of a person’s death fall into two categories: estate and inheritance. The U.S. government, some states, and several foreign countries impose estate taxes. Inheritance taxes are imposed by some states and other countries. Some states and countries use both types of taxes.

The Federal estate tax differs in several respects from the typical *inheritance tax*. First, the Federal estate tax is levied on the decedent’s entire estate. It is a tax on the right to pass property at death. Inheritance taxes apply to the right to receive property at death and are therefore levied on the heirs. Second, the relationship of the heirs to the decedent usually has a direct bearing on the amount of the inheritance tax. In general, the more closely related the parties, the larger the exemptions and the lower the applicable rates.⁷ Except for transfers to surviving spouses that may result in a marital deduction, the relationship of the heirs to the decedent has no effect on the Federal estate tax.

Formula for the Gift Tax

Like the income tax, which uses taxable income (and not gross income) as a tax base, the gift tax usually does not apply to the full amount of the gift. Deductions and the annual exclusion may be allowed to arrive at an amount called the **taxable gift**.⁸ However, unlike the income tax, which does not consider taxable income from prior years, *prior taxable gifts* must be added to arrive at the tax base to which the unified transfer tax rate is applied. Otherwise, the donor could start over again each year with a new set of progressive rates.

Don makes taxable gifts of \$1 million in 2007 and \$1 million in 2009. Presuming no other taxable gifts and *before applying the unified tax credit*, Don must pay a tax of \$345,800 (see Appendix A) on the 2007 transfer and a tax of \$780,800 (see Appendix A) on the 2009 transfer (using a tax base of \$2 million). If the 2007 taxable gift had not been included in the tax base for the 2009 gift, the tax would have been \$345,800. The correct tax liability of \$780,800 is more than twice \$345,800!

LO.2

List and analyze the Federal gift tax formula.

EXAMPLE

1

⁶§ 7701(a)(9).

⁷For example, one state’s inheritance tax provides an unlimited exemption for a surviving spouse and charities, \$100,000 for Class A heirs (lineal descendants and ascendants), \$500 for Class B heirs (collateral heirs), and

\$100 for Class C (other relatives and strangers). Beginning tax rates applicable to the nonexempt portion range from 2% to 10%, with the top rate applicable to Class C heirs reaching 20%.

⁸§ 2503(a).

Because the gift tax is cumulative in effect, a credit is allowed for the gift taxes paid on prior taxable gifts included in the tax base.

EXAMPLE
2

Assume the same facts as in Example 1. Don will be allowed a credit of \$345,800 against the gift tax of \$780,800. Thus, his gift tax liability for 2009 becomes \$435,000 (\$780,800 – \$345,800).

Because Congress did not intend for the gift tax to apply to smaller transfers, it provided for an annual exclusion. The exclusion amount periodically is adjusted for *significant* inflation. For 2013 through 2015, the amount allowed is \$14,000 (for the period 2009–2012, the exclusion was \$13,000).⁹ The formula for the gift tax is set forth in Concept Summary 27.1.

Concept Summary 27.1

Gift Tax Formula

| | | |
|---|----------|-----------|
| Determine whether the transfers are considered gifts by referring to §§ 2511 through 2519; list the fair market value of only the covered transfers | | \$xxx,xxx |
| Claim the annual exclusion (\$14,000 per donee) as available | \$xx,xxx | |
| Determine the charitable and marital deductions | xx,xxx | (xx,xxx) |
| Taxable gifts [as defined by § 2503(a)] for the current period | | \$ xx,xxx |
| Add: Taxable gifts from prior years | | xx,xxx |
| Total of current and past taxable gifts | | \$ xx,xxx |
| Compute the gift tax on the total of current and past taxable gifts by using the rates in Appendix A | | \$ x,xxx |
| Subtract: Gift tax paid on past taxable gifts and the unified tax credit | | (xxx) |
| Gift tax due on transfers during the current period | | \$ xxx |

LO 3

List and analyze the Federal estate tax formula.

Formula for the Federal Estate Tax

The Federal unified transfer tax at death, commonly known as the Federal estate tax, appears in Concept Summary 27.2. The gross estate is determined by using the fair market value of the property on the date of the decedent’s death (or on the alternate valuation date if applicable).

The gross estate includes all of the property a decedent owns at the time of death. The inclusion may even extend to property the decedent no longer owns—see the later discussion of gifts made within three years of death¹⁰ and certain incomplete transfers.¹¹ Moreover, the gross estate is to be distinguished from the probate estate, which is property that is subject to administration by the executor.

Deductions from the gross estate to arrive at the taxable estate are quite extensive. In addition to the debts of the decedent (e.g., mortgages, credit card accounts, and unpaid medical bills), they even include current and past income taxes (both Federal and state). As in the case of the Federal gift tax, transfers to charity and to a spouse are deductible.

Note that the taxable estate must be adjusted further to arrive at a tax base before a tentative estate tax can be determined. The further adjustment requires the consideration of prior taxable gifts. The reason post-1976 taxable gifts are added to the taxable estate to arrive at the tax base goes back to the scheme of the unified transfer tax. Starting in 1977, all transfers, whether lifetime or by death, were to be treated the same. Consequently, taxable gifts made after 1976 must be accounted for upon the death of the donor. Any possible double tax effect of including these gifts is eliminated by allowing a credit against the estate tax for the gift taxes previously paid.

⁹§ 2503(b)(2).
¹⁰§ 2035.

¹¹§§ 2036–2038.

Concept Summary 27.2

Estate Tax Formula

| | | |
|---|----------|-----------|
| Gross estate (§§ 2031–2046) | | \$xxx,xxx |
| Subtract: | | |
| Expenses, indebtedness, and taxes (§ 2053) | \$xx,xxx | |
| Losses (§ 2054) | xx,xxx | |
| Charitable bequests (§ 2055) | xx,xxx | |
| Marital deduction (§§ 2056 and 2056A) | xx,xxx | |
| State death taxes (§ 2058) | xx,xxx | (xx,xxx) |
| Taxable estate (§ 2051) | | \$ xx,xxx |
| Add: Post-1976 taxable gifts [§ 2001(b)] | | x,xxx |
| Tax base | | \$xxx,xxx |
| Tentative tax on total tax base [§ 2001(c)] | | \$ xx,xxx |
| Subtract: | | |
| Unified transfer tax on post-1976 taxable gifts (gift taxes paid) | \$ x,xxx | |
| Tax credits (including the unified tax credit) (§§ 2010–2016) | x,xxx | (x,xxx) |
| Estate tax due | | \$ x,xxx |

Role of the Unified Tax Credit

The purpose of the **unified transfer tax credit** is to allow donors and decedents to transfer specified amounts of wealth without being subject to the gift and estate taxes. Exhibit 27.1 shows the unified tax credit applicable to transfers by gift and by death from 2000 through 2015. As the credits are subject to indexation for inflation, the amounts for years beyond 2015 cannot yet be determined.¹²

EXHIBIT 27.1

Partial List of Unified Tax Credits

| Year of Transfer | Gift Tax | | Estate Tax | |
|----------------------|------------|------------------|------------|------------------|
| | Credit | Exclusion Amount | Credit | Exclusion Amount |
| 2000 and 2001 | \$ 220,550 | \$ 675,000 | \$ 220,550 | \$ 675,000 |
| 2002 and 2003 | 345,800 | 1,000,000 | 345,800 | 1,000,000 |
| 2004 and 2005 | 345,800 | 1,000,000 | 555,800 | 1,500,000 |
| 2006, 2007, and 2008 | 345,800 | 1,000,000 | 780,800 | 2,000,000 |
| 2009 | 345,800 | 1,000,000 | 1,455,800 | 3,500,000 |
| 2010 | 330,800* | 1,000,000 | –0– | –0– |
| 2011 | 1,730,800 | 5,000,000 | 1,730,800 | 5,000,000 |
| 2012 | 1,772,800 | 5,120,000 | 1,772,800 | 5,120,000 |
| 2013 | 2,045,800 | 5,250,000 | 2,045,800 | 5,250,000 |
| 2014 | 2,081,800 | 5,340,000 | 2,081,800 | 5,340,000 |
| 2015 | 2,117,800 | 5,430,000 | 2,117,800 | 5,430,000 |

*Maximum gift tax rate of 35%.

¹²The unified transfer tax credits prior to 2000 can be found in §§ 2010 and 2505.

The **exclusion amount** (also termed the **exemption equivalent amount** and the **bypass amount**) is the amount of the transfer that will pass free of the gift or estate tax by virtue of the credit.

EXAMPLE

3

In 2015, Janet makes a taxable gift of \$5.43 million. Presuming that she has made no prior taxable gifts, Janet will not owe any gift tax. Under the applicable tax rate schedule (see Appendix A), the tax on \$5.43 million is \$2,117,800, which is the exact amount of the credit allowed.¹³

27-1b Valuation for Estate and Gift Tax Purposes (§ 2032)

The value of the property on the date of its transfer generally determines the amount that is subject to the gift tax or the estate tax. Under certain conditions, however, an executor can elect to value estate assets on the **alternate valuation date**. The election is made by the executor of the estate and is irrevocable.

The alternate valuation date election was designed as a relief provision to ease the economic hardship that could result when estate assets decline in value over the six months after the date of death. If the election is made, all assets of the estate are valued six months after death *or* on the date of disposition if this occurs earlier.¹⁴ The election covers *all* assets in the gross estate and cannot be applied to only a portion of the property.

EXAMPLE

4

Robert's gross estate consists of the following property:

| | Value on Date of Death | Value Six Months Later |
|----------------------------|---------------------------|---------------------------|
| Land | \$4,800,000 | \$4,840,000 |
| Stock in Brown Corporation | 900,000 | 700,000 |
| Stock in Green Corporation | 500,000 | 460,000 |
| Total | <u>\$6,200,000</u> | <u>\$6,000,000</u> |

If Robert's executor elects the alternate valuation date, the estate must be valued at \$6 million. It is not permissible to value the land at its date of death value (\$4.8 million) and choose the alternate valuation date for the rest of the gross estate.

The election of the alternate valuation date must decrease the value of the gross estate *and* decrease the estate tax liability. The reason for this last requirement is that the income tax basis of property acquired from a decedent will be the value used for estate tax purposes. Without a special limitation, the alternate valuation date could be elected solely to add to income tax basis.

EXAMPLE

5

Al's gross estate consists of assets with a date of death value of \$6 million and an alternate valuation date value of \$6.1 million. Under Al's will, all of his property passes outright to Jean (Al's wife). Because of the marital deduction, no estate tax results regardless of which value is used. But if the alternate valuation date could be elected, which it cannot, Jean would have an income tax basis of \$6.1 million in the property acquired from Al.

27-1c Key Property Concepts

When property is transferred either by gift or at death, the form of ownership can have a direct bearing on any transfer tax consequences. Understanding the different forms of ownership is necessary for working with Federal gift and estate taxes.

¹³The rate schedules are contained in § 2001(c), and *some* are reproduced in Appendix A of this text. Unlike the unified tax credit, the tax rate schedules are *not* indexed for inflation.

¹⁴§ 2032(a)(1). For this purpose, the term *disposition* is broadly defined. It includes the transfer of property to an heir to satisfy a bequest and the use of property to fund a testamentary trust. Reg. § 20.2032-1(c).

Undivided Ownership

Assume that Dan and Vicky own an undivided but equal interest in a tract of land. Such ownership can fall into any of four categories: joint tenancy, tenancy by the entirety, tenancy in common, or community property.

If Dan and Vicky hold ownership as **joint tenants** or **tenants by the entirety**, the right of survivorship exists. This means that the last tenant to survive receives full ownership of the property. Thus, if Dan predeceases Vicky, the land belongs entirely to Vicky. None of the land passes to Dan's heirs or is subject to administration by Dan's executor. A tenancy by the entirety is a joint tenancy between husband and wife.¹⁵

If Dan and Vicky hold ownership as **tenants in common** or as community property, death does not defeat an owner's interest. Thus, if Dan predeceases Vicky, Dan's half interest in the land passes to his estate or heirs.

Community property interests arise from the marital relationship. Normally, all property acquired after marriage, except by gift or inheritance, by husband and wife residing in a community property state becomes part of the community. The following states have the community property system in effect: Louisiana, Texas, New Mexico, Arizona, California, Washington, Idaho, Nevada, Wisconsin, and (by election of the spouses) Alaska. All other states follow the common law system of ascertaining a spouse's rights to property acquired after marriage.

Partial Interests

Interests in assets can be divided in terms of rights to income and rights to principal. Particularly when property is placed in trust, it is not uncommon to carve out various income interests that must be accounted for separately from the ultimate disposition of the property itself.

Under Bill's will, a ranch is to be placed in trust, life estate to Sam, Bill's son, with remainder to Sam's children (Bill's grandchildren). Under this arrangement, Sam is the life tenant and, as such, is entitled to the use of the ranch (including any income) during his life. Upon Sam's death, the trust terminates, and its principal passes to his children. Thus, Sam's children receive outright ownership of the ranch when Sam dies.

EXAMPLE

6

27-2 THE FEDERAL GIFT TAX

27-2a General Considerations

In working with the gift tax, it is first necessary to determine whether a gift has in fact taken place. In addition, some transfers are excluded from the gift tax.

Requirements for a Gift

For a gift to be complete under state law, the following elements must be present.

- A donor competent to make the gift.
- A donee capable of receiving and possessing the property.
- Donative intent on behalf of the donor.
- Actual or constructive delivery of the property to the donee or the donee's representative.
- Acceptance of the gift by the donee.

¹⁵Some state laws do not use the term *tenancy by the entirety* but, nevertheless, recognize a joint tenancy between spouses.

LO.4

Illustrate the operation of the Federal gift tax.

Incomplete Transfers

The Federal gift tax does not apply to transfers that are incomplete. Thus, if the transferor retains the right to reclaim the property or has not really parted with the possession of the property, a taxable event has not taken place.

EXAMPLE

7

Lesly creates a trust with income payable to Mary for life, remainder to Paul. Under the terms of the trust instrument, Lesly can revoke the trust at any time and repossess the trust principal and the income earned. No gift takes place on the creation of the trust; Lesly has not ceased to have dominion and control over the property. However, if after the transfer, Lesly relinquishes his right to terminate the trust, the transfer becomes complete, and the Federal gift tax applies.

Business versus Personal Setting

In a business setting, full and adequate consideration for an exchange is apt to exist; thus, gifts in a business setting are rare. If the parties are acting in a personal setting, a gift is usually the result. It is the position of the IRS that valuable consideration (such as would preclude a gift result) does not include a payment or transfer based on “love and affection ... promise of marriage, etc.”¹⁶ Consequently, property settlements in consideration of marriage (i.e., pre- or antenuptial agreements) are regarded as gifts.

ETHICS & EQUITY It's the Thought That Counts

Joe (age 86) and Nicole (age 22) are married. Two days later, they exchange wedding gifts. Joe's gift to Nicole is stock in IBM (valued at \$2 million), while Nicole's

gift to Joe is a bottle of cologne (value of \$32). What tax goals are they trying to accomplish? Will their plan work?

Do not conclude that the presence of *some* consideration is enough to preclude Federal gift tax consequences. Again, the answer may rest on whether the transfer occurred in a business setting.

EXAMPLE

8

Peter sells Bob some real estate for \$40,000. Unknown to Peter, the property contains valuable mineral deposits and is really worth \$200,000. Peter may have made a bad business deal, but he has not made a gift of \$160,000 to Bob.

Certain Excluded Transfers

Transfers to political organizations are exempt from the application of the Federal gift tax.¹⁷ This provision in the Code made unnecessary the previous practice whereby candidates for public office established multiple campaign committees to maximize the number of annual exclusions available to their contributors. As noted, an annual exclusion of \$14,000 for each donee passes free of the Federal gift tax.

The Federal gift tax does not apply to tuition payments made to an educational organization (e.g., a college) on another's behalf. Nor does it apply to amounts paid on another's behalf for medical care.¹⁸ In this regard, the law is realistic because it is unlikely that most donors would recognize these items as being transfers subject to the gift tax. The payments, however, must be made directly to the provider (e.g., college, doctor, or hospital). There is no requirement that the beneficiary of the service (e.g., student or patient) qualify as a dependent of the person making the payment.

¹⁶Reg. § 25.2512-8.

¹⁷§ 2501(a)(5).

¹⁸§ 2503(e).

The Big Picture

Return to the facts of *The Big Picture* on p. 27-1. After Peter died in 2000, his widow, Martha, continued to live in the family home and refused to move in with either of her children (John or Helen). As Martha's health and mental condition deteriorated, her children did everything possible to keep the family housekeeper from quitting. In fact, Helen paid for the housekeeper's gallbladder operation, and John paid the college tuition of her oldest son.

Neither Helen nor John has made gifts to the housekeeper or her son that are subject to taxation. Gifts would have occurred, however, if Helen and John had reimbursed the housekeeper for the amounts involved, instead of paying the providers (i.e., physician, hospital, and college) directly.

EXAMPLE

9

Satisfying an obligation of support is not subject to the gift tax. Thus, no gift takes place when parents pay for their children's education because one of the obligations of parents is to educate their children. What constitutes an obligation of support is determined by applicable state law. In many states, for example, adult children may have an obligation of support with respect to providing for indigent parents.

Lifetime versus Death Transfers

Be careful to distinguish between lifetime (*inter vivos*) and death (testamentary) transfers.

Dudley buys a 12-month certificate of deposit (CD) from State Bank and lists ownership as follows: "Dudley, payable on proof of death to Faye." Nine months later, Dudley dies. When the CD matures, Faye collects the proceeds from State Bank. No gift takes place when Dudley invests in the CD; Faye has received a mere expectancy (i.e., to obtain ownership of the CD upon Dudley's death). At any time before his death, Dudley may withdraw the funds or delete Faye's name from the account, thereby cutting off her expectancy. Furthermore, no gift occurs upon Dudley's death as the CD passes to Faye by testamentary disposition. As noted later, the CD will be included in Dudley's gross estate as property in which the decedent had an interest (§ 2033).

EXAMPLE

10

The payable on death (POD) designation used in Example 10 is a form of ownership frequently used in a family setting when investments are involved (e.g., stocks and bonds and savings accounts). It is very similar in effect to a revocable trust (see Example 7). Both carry the advantage of avoiding the probate estate. The POD designation, however, is simpler to use in the case of bank accounts and securities, and it avoids the need of having to create a formal trust.

27-2b Transfers Subject to the Gift Tax

Whether a transfer is subject to the Federal gift tax depends upon the application of §§ 2511 through 2519 and the applicable Regulations.

Certain Property Settlements (§ 2516)

Normally, the settlement of certain marital rights is not regarded as being for consideration and is subject to the Federal gift tax.¹⁹ As a special exception to this general approach, Congress enacted § 2516. By this provision, transfers of property interests made under the terms of a written agreement between spouses in settlement of their marital or property rights are deemed to be for adequate consideration. The transfers are exempt from the Federal gift tax if a final decree of divorce is obtained within the three-year period beginning on the date one year before the parties entered into the agreement. Likewise excluded are transfers to provide a reasonable allowance for the support of minor children (including legally adopted children) of a marriage. The agreement need not be approved by the divorce decree.

¹⁹Reg. § 25.2512-8.

The Big Picture

EXAMPLE

11

Return to the facts of *The Big Picture* on p. 27-1. Recall that John and Hannah's divorce became final in January 2014. After extended but amicable negotiations, in September 2012, John and Hannah agreed on a property settlement. In return for the receipt of \$200,000 and title to their home, Hannah released all of her marital rights. Shortly thereafter, John made the transfer. Under § 2516, the property settlement resulted in no gift tax consequences to John.

Disclaimers (§ 2518)

A **disclaimer** is a refusal by a person to accept property that is designated to pass to him or her. The effect of the disclaimer is to pass the property to someone else.

The Big Picture

EXAMPLE

12

Return to the facts of *The Big Picture* on p. 27-1. Recall that Martha died of a heart condition in July. Under her will, her estate passes in equal parts to her son and daughter or, if they disclaim, to their children. (Under a buy-sell agreement, Martha's stock in Hood Corporation is redeemed by the corporation with the insurance proceeds from a policy it took out on her life.) Helen disclaims her share of the inheritance, and the assets pass to her children.

Why might Helen disclaim her inheritance and have the property pass directly from Martha to the children? By doing so, an extra transfer tax may be avoided. If the disclaimer does not take place (Helen accepts the inheritance) and the property eventually passes to the children (either by gift or by death), the later transfer is subject to the application of either the gift tax or the estate tax.

The Federal gift tax can also be avoided in cases of a partial disclaimer of an undivided interest.

The Big Picture

EXAMPLE

13

Assume the same facts as in Example 12. John's share of his inheritance from Martha also includes the family hunting lodge. Except for the hunting lodge, John disclaims his share of the inheritance, and the remaining assets pass to his children.

To be effective, the disclaimer must be in writing and timely made. Generally, this means no later than nine months after the right to the property arose. Furthermore, the person making the disclaimer must not have accepted any benefits or interest in the property.

Other Transfers Subject to Gift Tax

Other transfers that may carry gift tax consequences (e.g., the creation of joint ownership) are discussed and illustrated in connection with the Federal estate tax.

Income Tax Considerations

Generally, a donor has no income tax consequences on making a gift. A donee recognizes no income on the receipt of a gift.²⁰ A donee's income tax basis in the property received depends on a number of factors (e.g., donor's basis, year of gift, and gift tax incurred by donor) and is discussed in Chapter 13.

²⁰Both gifts and inheritances are excluded from income under § 103. See Chapter 5.

27-2c Annual Exclusion

The first \$14,000 of gifts (except gifts of future interests in property) made to any one person during any calendar year is excluded in determining the total amount of taxable gifts for the year.²¹ The **annual exclusion** applies to all gifts of a present interest made during the calendar year in the order in which they are made until the \$14,000 exclusion per donee is exhausted. For a gift in trust, each beneficiary of the trust is treated as a separate person for purposes of the exclusion.

During 2015, Laura makes the following cash gifts: \$8,000 to Rita and \$15,000 to Maureen. Laura may claim an annual exclusion of \$8,000 with respect to the gift to Rita and \$14,000 with respect to the gift to Maureen.

EXAMPLE

14

A **future interest** is defined as an interest that will come into being (as to use, possession, or enjoyment) at some future date. Examples of future interests include rights such as remainder interests that are commonly encountered when property is transferred to a trust. A *present interest* is an unrestricted right to the immediate use, possession, or enjoyment of property or of the income.

By a lifetime gift, Ron transfers property to a trust with a life estate (with income payable annually) to June and remainder upon June's death to Albert. Ron made two gifts when the trust was created: one to June of a life estate and one to Albert of a remainder interest. The life estate is a present interest and qualifies for the annual exclusion. Albert's remainder is a future interest and does not qualify for the exclusion. Note that Albert's interest does not come into being until some future date (upon the death of June).

EXAMPLE

15

Although Example 15 indicates that the gift of an income interest is a present interest, this is not always the case. If a possibility exists that the income beneficiary may not receive the immediate enjoyment of the property, the transfer is of a future interest.

Assume the same facts as in Example 15, except that the income from the trust need not be payable annually to June. It may, at the trustee's discretion, be accumulated and added to corpus. Because June's right to receive the income from the trust is conditioned on the trustee's discretion, it is not a present interest. No annual exclusion is allowed. The mere possibility of diversion is enough. It would not matter if the trustee never exercised the discretion to accumulate and did, in fact, distribute the trust income to June annually.

EXAMPLE

16

Trust for Minors

Section 2503(c) offers an exception to the future interest rules just discussed. Under this provision, a transfer for the benefit of a person who has not attained the age of 21 on the date of the gift may be considered a gift of a present interest. This is true even though the minor is not given the unrestricted right to the immediate use, possession, or enjoyment of the property. For the exception to apply, however, certain stringent conditions must be satisfied. One such condition is that all of the property and its income must be made available to the minor upon attaining age 21. Thus, the exception allows a trustee to accumulate income on behalf of a minor beneficiary without converting the income interest to a future interest.

Contributions to Qualified Tuition Programs

For income tax purposes, § 529 plans possess attributes that reflect the best of all possible worlds. Although no up-front deduction is allowed,²² income earned by the fund

²¹§ 2503(b).

²²Depending on the taxpayer's home state, some (or all) of the contributions into the plan may be deductible for *state* income tax purposes.

accumulates free of income tax and distributions are not taxed if they are used for higher education purposes. A special provision allows a donor to enjoy a gift tax advantage by using five years of annual exclusions.

EXAMPLE

17

Trevor and Audrey would like to start building a college education fund for their 10-year-old granddaughter Loni. In 2015, Trevor contributes \$140,000 to the designated carrier of their state's § 529 plan. By electing to split the gift and using five annual exclusions [2 (number of donors) × \$14,000 (annual exclusion) × 5 years = \$140,000], no taxable gift results. (The gift-splitting election is discussed in detail later in this chapter.) Making the five-year election precludes Trevor and Audrey from using any annual exclusion on gifts to Loni for the next four years.²³

These college plans are not included in the gross estate of the transferor.²⁴ This is preferential treatment because § 529 plans are incomplete transfers (e.g., some or all of the funds may be returned if college is not attended). As noted later, incomplete transfers are invariably subject to the estate tax.

27-2d **Deductions**

In arriving at taxable gifts, a deduction is allowed for transfers to certain qualified charitable organizations. On transfers between spouses, a marital deduction may be available. Because both the charitable and marital deductions apply in determining the Federal estate tax, they are discussed later in the chapter.

27-2e **Computing the Federal Gift Tax**

The Unified Transfer Tax Rate Schedule

The top rates of the unified transfer tax rate schedule originally reached as high as 70 percent. Over the years, these top rates were reduced to 55 percent and then to 45 percent for 2007.²⁵

Effective for 2011 and 2012, the top rate was 35 percent for both the gift tax and the estate tax. Beginning with 2013, the top rate is 40 percent. The unified transfer tax rate schedule applies to all transfers (by gift or death) after 1976. Different rate schedules applied for pre-1977 gifts and pre-1977 death transfers.

The Election to Split Gifts by Married Persons

To understand the reason for the gift-splitting election of § 2513, consider the following situations.

Effect of Splitting Gifts

EXAMPLE

18

Dick and Margaret are husband and wife who reside in Michigan, a common law state. Dick has been the only breadwinner in the family, and Margaret has no significant property of her own. Neither has made any prior taxable gifts. In 2015, Dick makes a gift to Leslie of \$6,028,000. Presuming that the election to split gifts did not exist, Dick's gift tax is as follows.

| | |
|---|---------------------|
| Amount of gift | \$ 6,028,000 |
| Subtract: Annual exclusion | (14,000) |
| Taxable gift | <u>\$ 6,014,000</u> |
| Gift tax on \$6,014,000 per Appendix A, [\$345,800 + 40%(\$6,014,000 - \$1,000,000)] | \$ 2,351,400 |
| Subtract: Unified transfer tax credit for 2015 | <u>(2,117,800)</u> |
| Gift tax due on the 2015 taxable gift | <u>\$ 233,600</u> |

²³Trevor and Audrey could resort to § 2503(e)(2)(A) to avoid any gift at all. As mentioned earlier, a *direct* payment of tuition to certain educational institutions is exempt from the gift tax. But this rule does not help build an education fund for future use, as § 529 does. Recall that Loni, the granddaughter, is 10 years old.

²⁴§ 529(c)(4).

²⁵§ 2001(c)(2)(B). The rates for 2015 are in Appendix A.

Effect of Splitting Gifts

EXAMPLE

19

Assume the same facts as in Example 18, except that Dick and Margaret have always resided in California, a community property state. Even though Dick is the sole breadwinner, income from personal services generally is community property. Consequently, the gift to Leslie probably involves community property. If this is the case, the gift tax is as follows.

| | Dick | Margaret |
|--|---------------------|---------------------|
| Amount of gift | \$ 3,014,000 | \$ 3,014,000 |
| Subtract: Annual exclusion | (14,000) | (14,000) |
| Taxable gift | <u>\$ 3,000,000</u> | <u>\$ 3,000,000</u> |
| Gift tax on \$3,000,000 per Appendix A [\$345,800 + 40%(\$3,000,000 – \$1,000,000)] | \$ 1,145,800 | \$ 1,145,800 |
| Subtract: Unified transfer tax credit for 2015 | (2,117,800) | (2,117,800) |
| Gift tax due on the 2015 taxable gift | <u>\$ -0-</u> | <u>\$ -0-</u> |

As the results of Examples 18 and 19 indicate, married donors residing in community property jurisdictions possessed a significant gift tax advantage over those residing in common law states. To rectify this inequity, the Revenue Act of 1948 incorporated the predecessor to § 2513 into the Code. Under this provision, a gift made by a person to someone other than his or her spouse may be considered, for Federal gift tax purposes, as having been made one-half by each spouse.

Returning to Example 18, Dick and Margaret could treat the gift passing to Leslie as being made one-half by each of them, even though the property belonged to Dick. As a result, the parties are able to achieve the same tax consequence as in Example 19. As is the case with the owner spouse, any past taxable gifts of the nonowner spouse must be taken into account in determining the current gift tax.

To split gifts, the spouses must be legally married to each other at the time of the gift. This includes those of same-sex couples if the marriage occurred in a state that legally recognizes same-sex marriage. If they are divorced later in the calendar year, they may still split the gift if neither marries anyone else during that year. They both must indicate on their separate gift tax returns their consent to have all gifts made in that calendar year split between them. In addition, both must be citizens or residents of the United States on the date of the gift. A gift from one spouse to the other spouse cannot be split. Such a gift might, however, be eligible for the marital deduction.

The election to split gifts is not necessary when husband and wife transfer jointly owned or community property to a third party. It is needed if the gift consists of the separate property of one of the spouses. Community property rules generally define separate property as property acquired before marriage and property acquired after marriage by gift or inheritance. The election, then, is not limited to residents of common law states.

27-2f Procedural Matters

Having determined which transfers are subject to the Federal gift tax and the various deductions and exclusions available to the donor, the procedural aspects of the tax should be considered. The following sections discuss the return itself, the due dates for filing and paying the tax, and other related matters.

The Federal Gift Tax Return

For transfers by gift, a Form 709 (U.S. Gift Tax Return) must be filed whenever the gifts for any one calendar year exceed the annual exclusion or involve a gift of a future interest. The Form 709 also must be filed when the election to split gifts is made by the nonowner spouse (see Example 21). A Form 709 need not be filed, however, for transfers

between spouses that are offset by the unlimited marital deduction, regardless of the amount of the transfer.²⁶

When Must A Form 709 Be Filed?

EXAMPLE

20

In 2015, Larry makes five gifts, each in the amount of \$14,000, to his five children. If the gifts do not involve future interests, a Form 709 need not be filed to report the transfers.

EXAMPLE

21

During 2015, Esther makes a gift of \$28,000 cash of her separate property to her daughter. To double the amount of the annual exclusion allowed, Jerry (Esther's husband) is willing to split the gift. Because the § 2513 election can be made only on a gift tax return, a Form 709 must be filed even though no gift tax will be due as a result of the transfer.

In Example 21, no gift tax return would be necessary if the transfer consisted of community property. Because two donors are now involved, the cap for filing becomes more than \$28,000, rather than more than \$14,000.

Presuming that a gift tax return is due, it must be filed on or before the fifteenth day of April following the year of the gift.²⁷ As with other Federal taxes, when the due date falls on Saturday, Sunday, or a legal holiday, the date for filing the return is the next business day. Note that the filing requirements for Form 709 have no correlation to the accounting year used by a donor for Federal income tax purposes. Thus, a fiscal year taxpayer must follow the April 15 rule for any reportable gifts. If sufficient reason is shown, the IRS is authorized to grant reasonable extensions of time for filing the return.²⁸

Key gift tax provisions are reviewed in Concept Summary 27.3.

Concept Summary 27.3

Federal Gift Tax Provisions

1. The Federal gift tax applies to all gratuitous transfers of property made by U.S. citizens or residents. In this regard, it does not matter where the property is located.
2. In the eyes of the IRS, a gratuitous transfer is one not supported by full and adequate consideration. If the parties are acting in a business setting, such consideration usually exists. If purported sales are between family members, a gift element may be suspected.
3. Property settlements can escape the gift tax if a divorce occurs within a prescribed period of time.
4. A disclaimer is a refusal by a person to accept property designated to pass to that person. The effect of a disclaimer is to pass the property to someone else. If certain conditions are satisfied, the issuance of a disclaimer will not be subject to the Federal gift tax.
5. Except for gifts of future interests, a donor is allowed an annual exclusion. The future interest limitation does not apply to certain trusts created for minors.
6. The election to split a gift enables a married couple to be treated as two donors. The election doubles the annual exclusion and makes the nonowner spouse's unified tax credit available to the owner spouse.
7. The election to split gifts is not necessary if the property is jointly owned by the spouses. That is the case when the property is part of the couple's community.
8. In determining the tax base for computing the gift tax, all prior taxable gifts must be added to current taxable gifts. Thus, the gift tax is cumulative in nature.
9. Gifts are reported on Form 709. The return is due on April 15 following the year of the gift.

²⁶§ 6019(a)(2).

²⁷§ 6075(b)(1).

²⁸§ 6081. Under § 6075(b)(2), an extension of time granted to a calendar year taxpayer for filing an income tax return automatically extends the due date of a gift tax return.

27-3 THE FEDERAL ESTATE TAX

The following discussion of the estate tax coincides with the formula that appeared earlier in the chapter in Concept Summary 27.2. The key components in the formula are the gross estate, the taxable estate, the tax base, and the credits allowed against the tentative tax. This formula can be summarized as follows:

27-3a Gross Estate

Simply stated, the **gross estate** includes all property subject to the Federal estate tax. Thus, the gross estate depends on the provisions of the Internal Revenue Code as supplemented by IRS pronouncements and the judicial interpretations of Federal courts.

In contrast to the gross estate, the **probate estate** is controlled by state (rather than Federal) law. The probate estate consists of all of a decedent's property subject to administration by the executor or administrator of the estate. The administration is supervised by a local court of appropriate jurisdiction (usually called a probate court). An executor is the decedent's personal representative appointed under the decedent's will. When a decedent dies without a will or fails to name an executor in the will (or that person refuses to serve), the local probate court appoints an administrator.

The probate estate is frequently smaller than the gross estate. It contains only property owned by the decedent at the time of death and passing to heirs under a will or under the law of intestacy (the order of distribution for those dying without a will). As noted later, such items as the proceeds of many life insurance policies and distributions from retirement plans become part of the gross estate but are not included in the probate estate.

All states provide for an order of distribution in the event someone dies *intestate* (i.e., without a will). After the surviving spouse receives some or all of the estate, the preference is usually in the following order: down to lineal descendants (e.g., children and grandchildren), up to lineal ascendants (e.g., parents and grandparents), and out to collateral relations (e.g., brothers, sisters, aunts, and uncles).

Property Owned by the Decedent (§ 2033)

Property owned by the decedent at the time of death is included in the gross estate. The nature of the property or the use to which it was put during the decedent-owner's lifetime has no significance as far as the estate tax is concerned. Thus, personal effects (such as clothing), stocks, bonds, mutual funds, furniture, jewelry, bank accounts, and certificates of deposit are all included in the deceased's gross estate. No distinction is made between tangible and intangible, depreciable and nondepreciable, or business and personal assets. However, a deceased spouse's gross estate does not include the surviving spouse's share of the community property.

The application of § 2033 is illustrated as follows:

Property Owned at Death

Irma dies owning some City of Denver bonds. The fair market value of the bonds plus any interest accrued to the date of Irma's death is included in her gross estate. Although interest on municipal bonds normally is not taxable under the Federal income tax, it is property owned by Irma at the time of death. However, any interest accrued after death is not part of Irma's gross estate.

LO.6

Identify the components of the gross estate.

EXAMPLE

22

Property Owned at Death

EXAMPLE

23

Sharon dies on April 7, when she owns stock in Robin Corporation and in Wren Corporation. On March 2, both corporations had authorized a cash dividend payable on May 4. Robin's dividend is payable to shareholders of record as of April 2. Wren's date of record is April 9. Sharon's gross estate includes the following: the stock in Robin, the stock in Wren, and the dividend on the Robin stock. It does not include the dividend on the Wren stock because Sharon dies before the April 9 date of record.

EXAMPLE

24

Ray dies holding some promissory notes issued to him by his son. In his will, Ray forgives these notes, relieving the son of the obligation to make any payments. The fair market value of these notes is included in Ray's gross estate.

The Big Picture

EXAMPLE

25

Return to the facts of *The Big Picture* on p. 27-1. At the time of his death, John was the president of Hood Corporation. John's estate receives a distribution from Hood's qualified pension plan of \$1.1 million consisting of the following.

| | |
|--------------------------------|-----------|
| Hood's contributions | \$450,000 |
| John's after-tax contributions | 350,000 |
| Income earned by the plan | 300,000 |

John's estate also receives \$150,000 from Hawk Insurance Company. The payment represents the maturity value of term life insurance from a group plan that Hood maintains for its employees. As to these amounts, John's gross estate includes \$1,250,000 (\$1,100,000 + \$150,000). For income tax purposes, however, \$750,000 (\$450,000 + \$300,000) is subject to tax, while \$500,000 (\$350,000 + \$150,000) is not.

Regarding the result reached in Example 25, retirement plan benefits are invariably subject to estate tax. Besides the conventional qualified pension and profit-sharing plans involved in Example 25, retirement plans include those under § 401(k), § 403(b) for teachers, § 457 for government employees, Keogh (H.R. 10) for self-employed persons, and IRAs—both traditional and Roth. Inclusion in the gross estate occurs irrespective of income tax consequences. Thus, a benefit paid under a Roth IRA is fully subject to the estate tax even though it may not be taxable as income to the beneficiary. The possibility of an income tax deduction for estate taxes paid is covered in Chapter 28 in connection with the discussion of income in respect of a decedent.

In addition to the items noted previously, § 2033 operates to include in the gross estate many assets that can be of significant value. Examples include:

- Real estate holdings (but see § 2040 for jointly owned property).
- Present value of future royalty rights (e.g., patents, copyrights, and mineral interests).
- Interests in a business (i.e., sole proprietorship and partnership).
- Collectibles (e.g., works of art and coin collections).
- Renewal value of leasehold interests.
- Terminable interests (e.g., life estates in realty or trusts) held by a surviving spouse as to which a deceased spouse's estate has made a QTIP election (discussed later in this chapter).
- Unmatured insurance policies on the lives of others.
- Proceeds from casualty and life insurance policies payable to the estate.
- Present value of pending and potential lawsuits or past judgments rendered.

The Big Picture

Return to the facts of *The Big Picture* on p. 27-1. Recall that John's death ultimately resulted from injuries suffered in a car accident caused by another motorist. In addition, John's auto was destroyed in the accident. Presuming that the other driver is solvent or carries casualty insurance, John's gross estate should include the present value of any expected settlement that could result from possible legal action. At the least, his estate must include the recovery expected from his own casualty policy.

EXAMPLE

26

Adjustments for Gifts Made within Three Years of Death (§ 2035)

At one time, all taxable gifts made within three years of death were included in the donor's gross estate unless it could be shown that the gifts were not made in contemplation of death. The special three-year rule for "deathbed gifts" was needed because the gift and estate taxes had not yet been merged into a unified tax. Making such gifts prior to death was advantageous then, as the lower tax rates of the separate gift tax applied.

Post-1976 taxable gifts are added to the taxable estate in arriving at the tax base for determining the estate tax liability—see Concept Summary 27.2 earlier in the chapter. Nevertheless, the three-year rule for inclusion in the gross estate has been retained for the following items.

- Any gift tax paid on gifts made within three years of death. Called the *gross-up* procedure, this prevents the gift tax amount from escaping the estate tax.
- Any property interests transferred by gift within three years of death that would have been included in the gross estate and consist of transfers with a retained life estate (§ 2036), transfers taking effect at death (§ 2037), revocable transfers (§ 2038), and proceeds of life insurance (§ 2042). Most of these transfers are discussed later in the chapter.

Before her death in 2015, Jennifer made the following taxable gifts.

| Year of Gift | Nature of the Asset | Fair Market Value | | Gift Tax Paid |
|--------------|-------------------------------------|------------------------|---------------------------|---------------|
| | | Date of Gift | Date of Death | |
| 2006 | Hawk Corporation stock | \$200,000 | \$1,300,000 | \$ -0- |
| 2013 | Insurance policy on Jennifer's life | 80,000 (cash value) | 1,000,000 (face value) | -0- |
| 2013 | Land | 800,000 | 810,000 | 16,000 |

EXAMPLE

27

Jennifer's *gross estate* includes \$1,016,000 (\$1,000,000 life insurance proceeds + \$16,000 gross-up for the gift tax on the 2013 taxable gift) as to these transfers. Referring to the formula for the estate tax (Concept Summary 27.2), the 2006 taxable gift is added to the *taxable estate* (at the fair market value on the date of the gift) in arriving at the tax base.

In the case of the Hawk stock, notice the substantial saving in transfer taxes that will occur. The gift tax (although none resulted) is based on \$200,000, whereas an estate tax would have applied to \$1.3 million. Thus, the appreciation of \$1.1 million has escaped any transfer tax. Jennifer's estate is allowed a credit for the gift tax paid on the 2013 transfer of land.

The three-year rule also applies in testing qualification under several other relatively narrow provisions.²⁹

²⁹ §§ 2035(c)(1) and (2).

Transfers with a Retained Life Estate (§ 2036) and Revocable Transfers (§ 2038)

Code §§ 2036 and 2038 were enacted on the premise that the estate tax can be avoided on lifetime transfers only if the decedent does not retain control over the property. The logic of this approach is somewhat difficult to dispute. One should not be able to escape the tax consequences of property transfers at death while remaining in a position during life to enjoy some or all of the fruits of ownership.

Under § 2036, the value of any property transferred by the deceased during lifetime for less than adequate consideration must be included if either of the following was retained:

- The possession or enjoyment of, or the right to the income from, the property.
- The right, either alone or in conjunction with any person, to designate the persons who shall possess or enjoy the property or the income.

The decedent is considered to have the right to the income from the property to the extent that such income is to be applied toward the discharge of his or her legal obligation.

The Big Picture

EXAMPLE

28

Return to the facts of *The Big Picture* on p. 27-1. Before Peter Hood died in 2000, he established several trusts. One trust grants John an income interest for life (i.e., a life estate), and upon his death, the trust passes to his children (i.e., remainder interest). Upon John's death, none of the trust property is included in his gross estate. Although he held a life estate, he was not the transferor (Peter was) of the property placed in trust.

The Big Picture

EXAMPLE

29

Return to the facts of *The Big Picture* on p. 27-1. Immediately after inheriting the family hunting lodge from his mother (see Example 13), John transfers it to a newly created trust. Under the terms of the trust instrument, he retains a life estate, remainder to his children and Helen (John's sister). Upon John's death, the property in the trust will be included in his gross estate under § 2036.

In both of the preceding examples, a gift occurred when the trusts were created. In Example 28, Peter made a gift of the entire amount placed in trust. In Example 29, John made a gift of only the remainder interest.

Another type of lifetime transfer that is drawn into a decedent's gross estate is covered by § 2038. The gross estate includes the value of property interests transferred by the decedent (except to the extent that the transfer was made for full consideration) if the enjoyment of the property transferred was subject, at the date of the decedent's death, to any power of the decedent to *alter, amend, revoke, or terminate* the transfer.

The classic § 2038 situation results from the use of a revocable trust. Example 7 (earlier in this chapter) illustrates the use of a revocable trust and shows what happens when the right of revocation is released during the life of the creator of the trust. When the right of revocation is relinquished within three years of death, the trust is included in the creator's gross estate.

Joint Interests (§§ 2040 and 2511)

Recall that joint tenancies and tenancies by the entirety are characterized by the right of survivorship. Thus, upon the death of a joint tenant, title to the property passes to the surviving tenant. None of the property is included in the *probate* estate of the deceased tenant. In the case of tenancies in common and community property, death does not defeat an ownership interest; rather, the deceased owner's interest is part of the probate estate.

The *Federal estate tax treatment* of tenancies in common or of community property follows the logical approach of taxing only the portion of the property included in the deceased owner's probate estate.

Homer, Wilma, and Thelma acquire a tract of land with ownership listed as tenants in common, each party furnishing \$200,000 of the \$600,000 purchase price. When the property is worth \$900,000, Homer dies. If Homer's undivided interest in the property is 33⅓%, the gross estate and probate estate each include \$300,000. This one-third interest is also the same amount that passes to Homer's heirs.

EXAMPLE

30

Unless the parties have provided otherwise, each tenant is deemed to own an interest equal to the portion of the original consideration he or she furnished. The parties in Example 30 could have provided that Homer would receive an undivided one-half interest in the property although he contributed only one-third of the purchase price. In that case, Wilma and Thelma have made a gift to Homer when the tenancy was created, and Homer's gross estate and probate estate each include \$450,000.

For certain joint tenancies, the tax consequences are different. All of the property is included in the deceased co-owner's gross estate unless it can be proved that the surviving co-owners contributed to the cost of the property.³⁰ If a contribution can be shown, the amount to be *excluded* is calculated by the following formula:

$$\frac{\text{Surviving co-owner's initial contribution}}{\text{Total initial cost of the property}} \times \text{Fair market value of the property at death}$$

In computing a survivor's contribution, any funds received as a gift *from the deceased co-owner* and applied to the cost of the property cannot be counted. However, income or gain from gift assets can be counted.

Keith and Steve (father and son) acquire a tract of land with ownership listed as joint tenancy with right of survivorship. Keith furnished \$400,000 and Steve \$200,000 of the \$600,000 purchase price. Of the \$200,000 provided by Steve, \$100,000 had previously been received as a gift from Keith. When the property is worth \$900,000, Keith dies. Because only \$100,000 of Steve's contribution can be counted (the other \$100,000 was received as a gift from Keith), Steve has furnished only one-sixth (\$100,000/\$600,000) of the cost. Thus, Keith's gross estate must include five-sixths of \$900,000, or \$750,000.

This result presumes that Steve can prove that he did in fact make the \$100,000 contribution. In the absence of such proof, the full value of the property is included in Keith's gross estate. Keith's death makes Steve the immediate owner of the property by virtue of the right of survivorship. None of the property is part of Keith's probate estate.

EXAMPLE

31

If the co-owners receive the property as a gift or bequest *from another*, each owner is deemed to have contributed to the cost (or value on date of death) of his or her own interest.

The Big Picture

Return to the facts of *The Big Picture* on p. 27-1. During his lifetime, Peter Hood purchased timberland, listing title as follows: "John and Helen Hood as equal tenants in common." John's basis in the property is one-half of Peter's cost. Upon John's death, one-half of the value of the timberland is included in his gross estate.

EXAMPLE

32

³⁰§ 2040(a).

The Big Picture

EXAMPLE

33

Return to the facts of *The Big Picture* on p. 27-1. In her will, Martha leaves the Hood family residence to her children (John and Helen) as joint tenants with right of survivorship. John's income tax basis is one-half of the value on Martha's death. On John's later death, one-half of the value at that time will be included in his gross estate. Keep in mind that under the right of survivorship, outright ownership goes to Helen and none of the property passes to John's heirs.

To simplify the joint ownership rules for *married persons*, § 2040(b) provides for an automatic inclusion rule upon the death of the first joint-owner spouse to die. Regardless of the amount contributed by each spouse, one-half of the value of the property is included in the gross estate of the spouse who dies first. The special rule eliminates the need to trace the source of contributions and recognizes that any inclusion in the gross estate is neutralized by the marital deduction.

The Big Picture

EXAMPLE

34

Return to the facts of *The Big Picture* on p. 27-1. Recall that after his divorce from Hannah, John married Ashley. Because Hannah kept John's prior home as part of the property settlement (see Example 11), he purchased a new residence. He listed title to the property as "John and Ashley Hood, tenancy by the entirety with right of survivorship." Upon John's death, only one-half of the value of the property is included in his gross estate.

If Ashley had died first, one-half of the value of the residence would have been included in her gross estate even though she made no contribution to its cost.

In Example 34, inclusion in the gross estate of the first spouse to die is neutralized by the unlimited marital deduction allowed for estate tax purposes (see the discussion of the marital deduction later in the chapter). Under the right of survivorship, the surviving joint tenant obtains full ownership of the property. The marital deduction generally is allowed for property passing from one spouse to another.

Whether a *gift* results when property is transferred into some form of joint ownership depends on the consideration furnished by each of the contributing parties for the ownership interest acquired.

Joint Ownership and Gift Tax Result

EXAMPLE

35

Brenda and Sarah purchase real estate as tenants in common. Of the \$800,000 purchase price, Brenda furnishes \$600,000, and Sarah furnishes only \$200,000. If they are equal owners in the property, Brenda has made a gift to Sarah of \$200,000.

EXAMPLE

36

Martha purchases real estate for \$900,000, the title to the property being listed as follows: "Martha, Sylvia, and Dan as joint tenants with the right of survivorship." If under state law the mother (Martha), the daughter (Sylvia), and the son (Dan) are deemed to be equal owners in the property, Martha is treated as having made gifts of \$300,000 to Sylvia and \$300,000 to Dan.

Several important *exceptions* exist to the general rule that the creation of a joint ownership with disproportionate interests resulting from unequal consideration triggers gift treatment. First, if the transfer involves a joint bank account, there is no gift at the time of the contribution. If a gift occurs, it is when the noncontributing party withdraws the funds provided by the other joint tenant. Second, the same rule applies to the purchase of U.S. savings bonds.³¹ Again, any gift tax consequences are postponed

³¹Reg. § 25.2511-1(h)(4).

until the noncontributing party appropriates some or all of the proceeds for his or her individual use.

Life Insurance (§ 2042)

Under § 2042, the gross estate includes life insurance on the decedent's life if:

- the policy's proceeds are receivable by the estate,
- the proceeds are receivable by another for the benefit of the estate, or
- the decedent possessed any of the incidents of ownership in the policy.

Life insurance on the life of another owned by a decedent at the time of death is included in the gross estate under § 2033 (property in which the decedent had an interest) and not under § 2042. The amount includible is the replacement value of the policy.³² Under these circumstances, inclusion of the face amount of the policy is inappropriate as the policy has not yet matured.

At the time of his death, Luigi owned a life insurance policy on the life of Benito, face amount of \$500,000 and replacement value of \$50,000, with Sofia as the designated beneficiary. Because the policy had not matured at Luigi's death, § 2042 would be inapplicable. However, § 2033 (property in which the decedent had an interest) compels the inclusion of \$50,000 (the replacement value) in Luigi's gross estate. If Luigi and Sofia owned the policy as community property, only \$25,000 would be included in Luigi's gross estate.

EXAMPLE

37

In the frequent situation where the beneficiary of the insurance is neither the insured nor the owner of the policy, no tax consequences ensue upon the beneficiary's death. Thus, in Example 37, if Sofia predeceases Benito, no transfer takes place because the policy has not matured. Sofia's interest as a beneficiary is a mere expectancy and not a property interest possessing any value.

The term *life insurance* includes whole life policies, term insurance, group life insurance, travel and accident insurance, endowment contracts (before being paid up), and death benefits paid by fraternal societies operating under the lodge system.³³

As just noted, proceeds of insurance on the life of the decedent receivable by the executor or administrator or payable to the decedent's estate are included in the gross estate. The estate need not be specifically named as the beneficiary. Assume, for example, that the proceeds of the policy are receivable by an individual beneficiary and are subject to an obligation, legally binding upon the beneficiary, to pay taxes, debts, and other charges enforceable against the estate. The proceeds are included in the decedent's gross estate to the extent of the beneficiary's obligation. If the proceeds of an insurance policy made payable to a decedent's estate are community assets and, under state law, one-half belongs to the surviving spouse, only one-half of the proceeds will be considered as receivable by or for the benefit of the decedent's estate.

Proceeds of insurance on the life of the decedent not receivable by or for the benefit of the estate are includible if the decedent at death possessed any of the incidents of ownership in the policy. In this connection, the term *incidents of ownership* means more than the ownership of the policy in a technical legal sense. Generally speaking, the term refers to the right of the insured or his or her estate to the economic benefits of the policy. Thus, it also includes the power to change beneficiaries, revoke an assignment, pledge the policy for a loan, or surrender or cancel the policy.³⁴

³²Reg. § 20.2031-8(a)(1).

³³Reg. § 20.2042-1(a)(1). As to travel and accident insurance, see *Comm. v. Estate of Noel*, 65-1 USTC ¶12,311, 15 AFTR 2d 1397, 85 S.Ct. 1238 (USSC,

1965). As to employer-sponsored group term life insurance, see Example 25 earlier in this chapter.

³⁴Reg. § 20.2042-1(c)(2).

EXAMPLE

38

At the time of death, Broderick was the insured under a policy (face amount of \$1 million) owned by Gregory, with Demi as the designated beneficiary. Broderick took out the policy five years ago and immediately transferred it as a gift to Gregory. Under the assignment, Broderick transferred all rights in the policy except the right to change beneficiaries. Broderick died without having exercised this right, and the policy proceeds are paid to Demi. Under § 2042(2), Broderick's retention of an incident of ownership in the policy (i.e., the right to change beneficiaries) causes \$1 million to be included in his gross estate.

Assuming that the deceased-insured holds the incidents of ownership in a policy, how much is included in the gross estate if the insurance policy is a community asset? Only one-half of the proceeds becomes part of the deceased spouse's gross estate.

Merely purchasing a life insurance contract and designating someone else as the beneficiary thereunder does not constitute a *gift*. As long as the purchaser still owns the policy, nothing has really passed to the beneficiary. Even on the death of the insured-owner, no gift takes place. The proceeds paid to the beneficiary constitute a testamentary and not a lifetime transfer. But consider the following possibility.

EXAMPLE

39

Kurt purchases an insurance policy on his own life and transfers the policy to Olga. Kurt retains no interest in the policy (such as the power to change beneficiaries). In these circumstances, Kurt has made a gift to Olga. Furthermore, if Kurt continues to pay the premiums on the transferred policy, each payment constitutes a separate gift.

Under certain conditions, the death of the insured may constitute a gift to the beneficiary of part or all of the proceeds. This occurs when the owner of the policy is not the insured.

EXAMPLE

40

Randolph owns an insurance policy on the life of Frank, with Tracy as the designated beneficiary. Up until the time of Frank's death, Randolph retained the right to change the beneficiary of the policy. The proceeds paid to Tracy by the insurance company by reason of Frank's death constitute a gift from Randolph to Tracy.³⁵

See Concept Summary 27.4 for a review of the components of the gross estate.

Concept Summary 27.4

Federal Estate Tax Provisions—Gross Estate

1. The starting point for applying the Federal estate tax is to determine which assets are subject to tax. Such assets comprise a decedent's gross estate.
2. The gross estate generally will not include any gifts made by the decedent within three years of death. It does include any gift tax paid on these transfers.
3. Based on the premise that one should not continue to enjoy or control property and not have it subject to the estate tax, certain incomplete transfers are included in the gross estate.
4. Upon the death of a joint tenant, the full value of the property is included in the gross estate unless the survivor(s) made a contribution toward the cost of the property. Spouses are subject to a special rule that calls for automatic inclusion of half of the value of the property in the gross estate of the first tenant to die. The creation of joint ownership is subject to the gift tax when a tenant receives a lesser interest in the property than is warranted by the consideration furnished.
5. If the decedent is the insured, life insurance proceeds are included in the gross estate if either of two conditions is satisfied. First, the proceeds are paid to the estate or for the benefit of the estate. Second, the decedent possessed incidents of ownership (e.g., the right to change beneficiaries) over the policy.

³⁵*Goodman v. Comm.*, 46-1 USTC ¶10,275, 34 AFTR 1534, 156 F.2d 218 (CA-2, 1946).

27-3b Taxable Estate

After the gross estate has been determined, the next step is to compute the taxable estate. By virtue of § 2051, the **taxable estate** is the gross estate less the following: expenses, indebtedness, and taxes (§ 2053); losses (§ 2054); charitable transfers (§ 2055); the marital deduction (§§ 2056 and 2056A); and the deduction for state death taxes (§ 2058). As previously noted, the charitable and marital deductions also have gift tax ramifications.

LO.7

Describe the components of the taxable estate.

Expenses, Indebtedness, and Taxes (§ 2053)

A deduction is allowed for funeral expenses; expenses incurred in administering property; claims against the estate; and unpaid mortgages and other charges against property, whose value is included in the gross estate (without reduction for the mortgage or other indebtedness).

Expenses incurred in administering community property are deductible only in proportion to the deceased spouse's interest in the community.³⁶

Administration expenses include commissions of the executor or administrator, attorney's fees of the estate, accountant's fees, court costs, and certain selling expenses for disposition of estate property.

Claims against the estate include property taxes accrued before the decedent's death, unpaid income taxes on income received by the decedent before he or she died, and unpaid gift taxes on gifts made by the decedent before death.

Amounts that may be deducted as claims against the estate are only for enforceable personal obligations of the decedent at the time of death. Deductions for claims founded on promises or agreements are limited to the extent the liabilities were contracted in good faith and for adequate and full consideration. However, a pledge or subscription in favor of a public, charitable, religious, or educational organization is deductible to the extent that it would have constituted an allowable deduction had it been a bequest.³⁷

Deductible funeral expenses include the cost of interment, the burial plot or vault, a gravestone, perpetual care of the grave site, and the transportation expense of the person bringing the body to the place of burial. No deduction is allowed for cemetery lots the decedent acquired before death for himself or herself and family, but the lots are not included in the decedent's gross estate under § 2033 (property in which the decedent had an interest).

Losses (§ 2054)

Section 2054 permits an estate tax deduction for losses from casualty or theft incurred during the period when the estate is being settled. As is true with casualty or theft losses for income tax purposes, any anticipated insurance recovery must be taken into account in arriving at the amount of the deductible loss. Unlike the income tax, however, the deduction is not limited by a floor (e.g., \$100) or a percentage amount (10 percent of adjusted gross income).

If the casualty occurs to property after it has been distributed to an heir, the loss belongs to the heir and not to the estate. If the casualty occurs before the decedent's death, it should be claimed on the appropriate Form 1040. The fair market value of the property (if any) on the date of death plus any insurance recovery is included in the gross estate.

As is true of certain administration expenses, a casualty or theft loss of estate property can be claimed as an income tax deduction on the fiduciary return of the estate (Form 1041). But a double deduction prohibition applies, and claiming the income tax deduction requires a waiver of the estate tax deduction.³⁸

³⁶*U.S. v. Stapf*, 63-2 USTC ¶12,192, 12 AFTR 2d 6326, 84 S.Ct. 248 (USSC, 1963).

³⁸§ 642(g).

³⁷§ 2053(c)(1)(A) and Reg. § 20.2053-5.

Transfers to Charity (§§ 2055 and 2522)

A deduction is allowed for the value of property in the decedent's gross estate that is transferred by the decedent through testamentary disposition to (or for the use of) any of the following:

- Federal, state, and local governments and agencies.
- Any corporation or association organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes.
- Various veterans' organizations.

The organizations just described are identical to those that qualify for the Federal gift tax deduction under § 2522. With the following exceptions, they are also the same organizations that qualify a donor for an income tax deduction under § 170.

- Certain nonprofit cemetery associations qualify for income tax but not estate and gift tax purposes.
- Foreign charities may qualify under the estate and gift tax but not under the income tax.

No deduction is allowed unless the charitable bequest is specified by a provision in the decedent's will or the transfer was made before death and the property is subsequently included in the gross estate. Generally speaking, a deduction does not materialize when an individual dies intestate (without a will).

The amount of the bequest to charity must be mandatory and cannot be left to someone else's discretion. It is, however, permissible to allow another person, such as the executor of the estate, to choose which charity will receive the specified donation. Likewise, a bequest may be expressed as an alternative and still be effective if the noncharitable beneficiary disclaims (refuses) the intervening interest before the due date for the filing of the estate tax return (nine months after the decedent's death plus any filing extensions).

The Big Picture

EXAMPLE

41

Return to the facts of *The Big Picture* on p. 27-1. After John's accident, he was in the intensive care unit at a local hospital. Although physically incapacitated, he was mentally alert. In early December, he reviewed his financial affairs with his attorney and CPA and executed a new will. His prior will, drawn up several years ago, contained a bequest to the Hood Scholarship Foundation (HSF), an organization created by Peter (John's father) to provide financial assistance to community college students. As HSF's qualified status had never been evaluated by the IRS, the attorney agreed to apply for a determination letter.

John's new will kept the bequest, but only if the IRS approved HSF's qualified status. John's CPA arranged to have all of John's medical expenses (e.g., hospital and physicians) paid as incurred. He also advised John to make a substantial payment on his property taxes and state income taxes.

Marital Deduction (§§ 2056, 2056A, and 2523)

The **marital deduction** originated with the Revenue Act of 1948 as part of the same legislation that permitted married persons to secure the income-splitting advantages of filing joint income tax returns. The purpose of these statutory changes was to eliminate the major tax variations that existed between taxpayers residing in community property and common law states. The marital deduction was designed to provide equity in the estate and gift tax areas.

In a community property state, for example, no marital deduction generally was allowed because the surviving spouse already owned one-half of the community and that portion was not included in the deceased spouse's gross estate. In a common law state, however, most if not all of the assets often belonged to the breadwinner of the

family. When that spouse died first, all of these assets were included in the gross estate. To equalize the situation, therefore, a marital deduction, usually equal to one-half of all separate assets, was allowed upon the death of the first spouse.

Ultimately, Congress decided to dispense with these historical justifications and recognize husband and wife as a single economic unit. Consistent with the approach taken under the income tax, spouses are considered as one for transfer tax purposes. By making the marital deduction unlimited in amount, neither the gift tax nor the estate tax is imposed on outright interspousal transfers of property. The unlimited marital deduction even includes one spouse's share of the community property transferred to the other spouse.

The marital deduction is available to same-sex couples who were married in a jurisdiction that legally recognizes same-sex marriage. Registered domestic partnerships, civil unions, and similar formal relationships *are not* denominated as marriages, so no marital deduction can be claimed.

Passing Requirement Under § 2056, the marital deduction is allowed only for property that is included in the deceased spouse's gross estate and that passes or has passed to the surviving spouse. In determining whether the parties are legally married, look to state law. In this regard, some foreign divorces may raise doubts as to the validity of a subsequent remarriage. Having an ex-spouse does not qualify the decedent for a marital deduction if, in fact, the divorce is valid and final.

The Big Picture

Return to the facts of *The Big Picture* on p. 27-1 and Example 41. In reviewing John's prior will, the parties discovered that one of the main beneficiaries was Hannah, John's first wife. The new will substituted Ashley (John's present wife) for Hannah, thereby salvaging a marital deduction.

EXAMPLE

42

Property that passes from the decedent to the surviving spouse includes any interest received as (1) the decedent's heir or donee, (2) the decedent's surviving tenant by the entirety or joint tenant, or (3) the beneficiary of insurance on the life of the decedent.

At the time of his death in the current year, Matthew owned an insurance policy on his own life (face amount of \$500,000) with Ella (his wife) as the designated beneficiary. Matthew and Ella also owned real estate (worth \$600,000) as tenants by the entirety (Matthew had furnished all of the purchase price). As to these transfers, \$800,000 (\$500,000 + \$300,000) is included in Matthew's gross estate, and this amount represents the property that passes to Ella for purposes of the marital deduction.³⁹

EXAMPLE

43

Disclaimers can affect the amount passing to the surviving spouse. If, for example, the surviving spouse holds the remainder interest (i.e., recovers the balance of the estate) under the will of the deceased spouse, a disclaimer by another heir increases the amount passing to the surviving spouse. This, in turn, will increase the amount of the marital deduction allowed to the estate of the deceased spouse.

A problem arises when a property interest passing to the surviving spouse is subject to a mortgage or other encumbrance. In this case, only the net value of the interest after reduction by the amount of the mortgage or other encumbrance qualifies for the marital deduction. To allow otherwise results in a double deduction because a decedent's liabilities are separately deductible under § 2053.

In his will, Jacob leaves real estate (fair market value of \$500,000) to Rachel, his wife. If the real estate is subject to a mortgage of \$100,000 (upon which Jacob was personally liable), the marital deduction is limited to \$400,000 (\$500,000 – \$100,000). The \$100,000 mortgage is deductible under § 2053 as an obligation of the decedent (Jacob).

EXAMPLE

44

³⁹Inclusion in the gross estate falls under § 2042 (proceeds of life insurance) and § 2040 (joint interests). Although Matthew provided the full purchase

price for the real estate, § 2040(b) requires inclusion of only half of the value of the property when one spouse predeceases the other.

However, if the executor is required under the terms of the decedent's will or under local law to discharge the mortgage out of other assets of the estate or to reimburse the surviving spouse, the payment or reimbursement is an additional interest passing to the surviving spouse.

EXAMPLE

45

Assume the same facts as in Example 44, except that Jacob's will directs that the real estate is to pass to Rachel free of any liabilities. Accordingly, Jacob's executor pays off the mortgage by using other estate assets and distributes the real estate to Jacob's wife. The marital deduction now becomes \$500,000.

Federal estate taxes or other death taxes paid out of the surviving spouse's share of the gross estate are not included in the value of property passing to the surviving spouse. Therefore, it is usually preferable for the deceased spouse's will to provide that death taxes be paid out of the portion of the estate that does not qualify for the marital deduction.

Terminable Interest Limitation Certain interests in property passing from the deceased spouse to the surviving spouse are referred to as **terminable interests**. Such an interest will terminate or fail after the passage of time, upon the happening of some contingency, or upon the failure of some event to occur. Examples are life estates, annuities, estates for terms of years, and patents. A terminable interest will not qualify for the marital deduction if another interest in the same property passed from the deceased spouse to some other person, and by reason of the passing, that other person or his or her heirs may enjoy part of the property after the termination of the surviving spouse's interest.⁴⁰

Transfers by Death and Gift Compared**EXAMPLE**

46

Vicky's will places her property in trust with a life estate to her husband, Brett, remainder to Andrew or his heirs. The interest passing from Vicky to Brett does not qualify for the marital deduction. Brett's interest will terminate upon his death, and Andrew or his heirs will then possess or enjoy the property.

EXAMPLE

47

Assume the same facts as in Example 46, except that Vicky created the trust during her life. No marital deduction is available for gift tax purposes for the same reason as in Example 46.⁴¹

The justification for the terminable interest rule can be illustrated by examining the possible results of Examples 46 and 47 more closely. Without the rule, Vicky could have passed property to Brett at no cost because of the marital deduction. Yet, on Brett's death, none of the property would have been included in his gross estate. Section 2036 (transfers with a retained life estate) would not apply to Brett because he was not the original transferor of the property. The marital deduction should not be available in situations where the surviving spouse can enjoy the property and still pass it to another without tax consequences. The marital deduction is intended to merely postpone the transfer tax upon the death of the first spouse and to shift any such tax to the surviving spouse.

Consistent with the objective of the terminable interest rule, the marital deduction is allowed for transfers of **qualified terminable interest property (QTIP)**. This is defined as property that passes from one spouse to another by gift or at death and for which the transferee-spouse has a qualifying income interest for life.

⁴⁰§§ 2056(b)(1) and 2523(b)(1).

⁴¹Examples 46 and 47 contain the potential for a qualified terminable interest property (QTIP) election discussed later in this section.

For a donee or a surviving spouse, a qualifying income interest for life exists under the following conditions:

- The person is entitled for life to all of the income from the property (or a specific portion of it), payable at annual or more frequent intervals.
- No person has a power to appoint any part of the property to any person other than the surviving spouse during his or her life.⁴²

If these conditions are met, an election can be made to claim a marital deduction as to the QTIP. For estate tax purposes, the executor of the estate makes the election on Form 706 (estate tax return). For gift tax purposes, the donor spouse makes the election on Form 709 (gift tax return). The election is irrevocable.

If the election is made, a transfer tax is imposed on the QTIP when the surviving spouse disposes of it by gift or upon death. If the disposition occurs during life, the gift tax applies, measured by the fair market value of the property as of that time.⁴³ If no lifetime disposition takes place, the fair market value of the property on the date of death (or alternate valuation date if applicable) is included in the gross estate of the second spouse to die.⁴⁴

Effect of QTIP Election

In 1990, Clyde dies and provides in his will that certain assets (fair market value of \$2.1 million) are to be transferred to a trust under which Lily (Clyde's wife) is granted a life estate with the remainder passing to their children upon Lily's death. Presuming that all of the preceding requirements are satisfied and Clyde's executor so elects, his estate receives a marital deduction of \$2.1 million.

EXAMPLE

48

Assume the same facts as in Example 48, with the further stipulation that Lily dies in 2015 when the trust assets are worth \$6.4 million. This amount is included in her gross estate.

EXAMPLE

49

Because the estate tax is imposed on assets not physically included in the probate estate, the law allows the tax liability for those assets to be shifted to the heirs. The amount shifted is determined by comparing the estate tax liability both with and without the inclusion of the QTIP. This right of recovery can be canceled by a provision in the deceased spouse's will.⁴⁵

One also can avoid the terminable interest rule by using a general **power of appointment**.⁴⁶ With this arrangement, the donee (or surviving) spouse holds a right to appoint (i.e., transfer) the trust assets to himself or herself or to whomever else he or she chooses (e.g., various creditors, the estate itself, or creditors of the estate). Because the existence of this power (whether exercised or not) causes either the gift or estate tax to apply to the spouse, an offsetting marital deduction is allowed for the donor spouse.⁴⁷

Most estate planners prefer the QTIP option for avoiding the terminable interest rule, as the QTIP gives the donee (or surviving) spouse less control over the trust assets.

State Death Taxes (§ 2058)

About 20 states, and a number of cities, counties, and similar jurisdictions, levy taxes when property passes to another party because of the death of a decedent. These taxes

⁴² §§ 2523(f) and 2056(b)(7).

⁴³ §§ 2519 and 2511.

⁴⁴ § 2044.

⁴⁵ § 2207A(a).

⁴⁶ Powers of appointment—see § 2014 (estate tax) and § 2514 (gift tax)—are not discussed in this text.

⁴⁷ § 2056(b)(5) and § 2523(e).

can be assessed at marginal rates of almost 20 percent, and the applicable exemption amounts typically are less than that for the Federal estate tax.

The § 2058 deduction mitigates the effect of subjecting property to multiple taxes payable because of a death. The deduction reduces the Federal taxable estate by the amount of state and local estate, inheritance, or other succession taxes paid.

LO.8

Calculate the Federal estate tax liability.

27-3c **Computing the Federal Estate Tax**

Once the taxable estate has been determined, post-1976 taxable gifts are added to arrive at the tax base and the estate tax can be computed.

EXAMPLE

50

Horton dies in 2015, leaving a taxable estate of \$5.7 million. In 2002, he made a taxable gift of \$100,000 upon which he paid no tax due to the availability of the unified tax credit. Horton's estate tax is \$148,000, as determined below (see Concept Summary 27.2).

| | |
|---|---------------------|
| Taxable estate | \$ 5,700,000 |
| Add: Post-1976 taxable gift | 100,000 |
| Tax base | <u>\$ 5,800,000</u> |
| Tentative tax on tax base from tax rate schedule (Appendix A) [\$345,800 + 40%(\$5,800,000 – \$1,000,000)] | \$ 2,265,800 |
| Less: Unified tax credit for 2015 | <u>(2,117,800)</u> |
| Estate tax due | <u>\$ 148,000</u> |

27-3d **Estate Tax Credits**

To place in context the role of estate tax credits in the determination of the Federal estate tax liability, see Concept Summary 27.2 earlier in the chapter.

Unified Tax Credit (§ 2010)

The role of the unified tax credit was discussed in connection with Example 3, and its application was illustrated in Example 50. The amount of the credit depends on the year the transfer occurred, and this information is contained in Exhibit 27.1.

Credit for Tax on Prior Transfers (§ 2013)

Suppose Floyd owns some property that he passes at death to Sarah. Shortly thereafter, Sarah dies and passes the property to Juan. Assuming that both estates are subject to the Federal estate tax, the successive deaths result in a multiple tax effect. To mitigate the possible multiple taxation that might result, § 2013 provides relief in the form of a credit for Federal estate tax paid on prior transfers. In the preceding hypothetical case, Sarah's estate may be able to claim as an estate tax credit some of the taxes paid by Floyd's estate.

The credit is limited to the lesser of the following:

1. The amount of the Federal estate tax attributable to the transferred property in the transferor's estate.
2. The amount of the Federal estate tax attributable to the transferred property in the decedent's estate.

To apply the limitations, certain adjustments must be made that are not covered in this text.⁴⁸ However, it is not necessary for the transferred property to be identified in the present decedent's estate or for it to be in existence at the time of the present decedent's death. It is sufficient that the transfer of property was subjected to the Federal

⁴⁸See the instructions to Form 706 and Reg. §§ 20.2013-2 and -3.

GLOBAL TAX ISSUES Treaty Relief Is Not Abundant!

One means of mitigating double taxation at the international level is to take advantage of treaty provisions. A treaty will determine which country has primary taxing rights, and this may depend on such factors as the domicile of the decedent or the nature of the property involved (e.g., personalty or realty). Unfortunately, the United States has estate tax conventions with only 16 countries: Australia, Austria*, Canada, Denmark*, Finland,

France*, Germany*, Greece, Ireland, Italy, Japan*, the Netherlands, Norway, the Republic of South Africa, Switzerland, and the United Kingdom*. In contrast, almost 70 countries have income tax treaties with the United States. Thus, treaty relief in the estate tax area is not as widespread as with income tax situations.

*Indicates the existence of a gift tax treaty as well.

estate tax in the estate of the transferor and that the transferor died within the prescribed period of time. Exhibit 27.2 shows the correlation between the credit allowed and the time interval between the two deaths.

Importance of Time Interval Between Successive Deaths

Under Floyd's will, Sarah inherits property. One year later, Sarah dies. Assume that the estate tax attributable to the inclusion of the property in Floyd's gross estate was \$150,000 and that the estate tax attributable to the inclusion of the property in Sarah's gross estate is \$120,000. Under these circumstances, Sarah's estate claims a credit against the estate tax of \$120,000 (refer to limitation 2).

EXAMPLE

51

Assume the same facts as in Example 51, except that Sarah dies three years after Floyd. The applicable credit is now 80% of \$120,000, or \$96,000 (see Exhibit 27.2).

EXAMPLE

52

Credit for Foreign Death Taxes (§ 2014)

A credit is allowed against the estate tax for any estate, inheritance, legacy, or succession tax actually paid to a foreign country. For purposes of this provision, the term *foreign country* means not only states in the international sense but also possessions or political subdivisions of foreign states and possessions of the United States.

27-3e Procedural Matters

A Federal estate tax return, if required, is due nine months after the date of the decedent's death.⁴⁹ The time limit applies to all estates regardless of the nationality or residence of

EXHIBIT 27.2

Credit for Tax on Prior Transfers

| Interval between Deaths | Credit Allowed |
|-------------------------|----------------|
| Within 2 years | 100% |
| Within 3 to 4 years | 80% |
| Within 5 to 6 years | 60% |
| Within 7 to 8 years | 40% |
| Within 9 to 10 years | 20% |

⁴⁹§ 6075(a).

the decedent. Frequently, an executor will request and obtain from the IRS an extension of time for filing Form 706 (estate tax return).⁵⁰ Also available is an *automatic* six-month extension of time to file the estate tax return. To receive the extension, the executor must file Form 4768 [Application for Extension of Time to File a Return and/or Pay U.S. Estate (and Generation-Skipping Transfer) Taxes].

The Form 706 filing requirements parallel the exclusion amounts of the unified tax credit available for each year (refer to Exhibit 27.1). The filing requirements may be lower when the decedent has made taxable gifts after 1976.⁵¹

Concept Summary 27.5 highlights the major components in arriving at the taxable estate and the mechanics of determining the estate tax liability.

Concept Summary 27.5

Federal Estate Tax Provisions—Taxable Estate and Procedural Matters

1. In moving from the gross estate to the taxable estate, certain deductions are allowed.
 2. Under § 2053, deductions are permitted for various administration expenses (e.g., executor's commissions), professional fees (e.g., appraisal, accounting, and legal), debts of the decedent, certain unpaid taxes, and funeral expenses.
 3. Casualty and theft losses occurring during the settlement of the estate and not compensated for by insurance can be deducted (§ 2054).
 4. Charitable transfers are deductible if the designated organization holds qualified status with the IRS at the time of death (§ 2055).
 5. Transfers to a surviving spouse yield a marital deduction if they do not violate the terminable interest rule (§ 2056).
- The terminable interest rule can be avoided by making a QTIP election.
6. A deduction is allowed for certain state and local death taxes paid (§ 2058).
 7. The tax base for determining the estate tax is the taxable estate plus post-1976 taxable gifts.
 8. Using the unified transfer tax rates appearing in Appendix A, determine the tax on the tax base.
 9. From the tax determined under item 8, subtract the credits allowed under §§ 2010–2016.
 10. If required, a Federal estate tax return (Form 706) must be filed within nine months of the date of the decedent's death.

LO.9

Review and demonstrate the role of the generation-skipping transfer tax.

27-4 THE GENERATION-SKIPPING TRANSFER TAX (GSTT)

To prevent partial avoidance of Federal gift and estate taxes on large transfers, the tax law imposes an additional generation-skipping transfer tax.

27-4a The Problem

Previously, it was possible to bypass a generation of transfer taxes by structuring the transaction carefully.

Types of Generation-Skipping Transfers

EXAMPLE

53

Under his will, Edward creates a trust, life estate to Stephen (Edward's son) and remainder to Ava (Edward's granddaughter) upon Stephen's death. Edward is subject to the Federal estate tax, but no tax results upon Stephen's death. Stephen held a life estate, but § 2036 does not apply because he was not the grantor of the trust. Nor does § 2033 (property owned by the decedent) come into play because Stephen's interest disappeared upon his death. The ultimate result is that the property in trust skips a generation of transfer taxes.

⁵⁰§ 6081.

⁵¹§ 6018(a)(3).

Types of Generation-Skipping Transfers

Joshua dies at age 89 and leaves all of his property to a trust. Under the terms of the trust instrument, trust income and corpus are to be distributed equally over a 10-year period to Amber and Ethan. Amber is Joshua's 22-year-old third wife, and Ethan is his 30-year-old grandson. As a result of this arrangement, the following tax consequences ensue: The estate tax applies upon Joshua's death, income earned by the trust will be subject to income tax (see Chapter 28), and normally no transfer tax results when distributions of trust income and corpus occur.

EXAMPLE

54

Amy gives assets to Eric (her grandson). Called a direct skip, the gift would circumvent any transfer taxes that would have resulted had the assets been channeled through Eric's parents.

EXAMPLE

55

27-4b **The Solution**

The generation-skipping transfer tax (GSTT) is designed to preclude the avoidance of either the estate tax or the gift tax by making transfers that bypass the next lower generation. In the typical family setting, this involves transfers from grandparents to grandchildren. Such transfers, in effect, would skip any transfer tax that would result if the property were channeled through the children.

The GSTT is triggered by any of these three events: a taxable *termination* occurs, a taxable *distribution* takes place, or a *direct skip* is made.⁵² Example 53 illustrates a termination event. Upon Stephen's death, the fair market value of the trust property that passes to Ava is subject to the GSTT (imposed on the trust). The GSTT will have the effect of reducing the amount Ava receives from the trust.

Example 54 illustrates a distribution event. When the trust makes a distribution to Ethan, the GSTT applies (imposed on Ethan). Any distribution to Amber is not subject to the GSTT because the spouse of the transferor (Joshua in this case) is deemed to be of the same generation.⁵³ The results reached in Example 54 show how ludicrous the application of the GSTT rules can be. Amber (age 22) is treated as being in the same generation as Joshua (age 89), while Ethan (age 30) is two generations removed!

Example 55 illustrates a lifetime version of the direct skip event.⁵⁴ In this situation, the GSTT is imposed upon Amy when the gift is made to Eric. Not only will Amy be subject to the GSTT, but the amount of the tax represents an additional gift to Eric.⁵⁵

The GSTT rate is the highest rate under the gift and estate tax schedules (i.e., 40 percent after 2012). An exemption is allowed equal to the exclusion amount applicable to the Federal estate tax (see Exhibit 27.1).⁵⁶ For a donor who is married, the election to split the gift (under § 2513) can double the amount of the exemption.⁵⁷

27-5 **TAX PLANNING**27-5a **The Federal Gift Tax**

For gifts that generate a tax, consideration must be given to the time value to the donor of the gift taxes paid. Because the donor loses the use of these funds, the expected interval between a gift (the imposition of the gift tax) and death (the imposition of the estate tax) may make the gift less attractive from an economic standpoint. On the plus side, however, are the estate tax savings that result from any gift tax paid. Because these funds are no longer in the gross estate of the donor (except for certain gifts within three years of death), the estate tax thereon is avoided.

LO.10

Recognize strategies to minimize Federal gift and estate taxes.

⁵²§ 2611.⁵³§ 2651(c)(1).⁵⁴§ 2612(c)(1). A direct skip can also take place in a testamentary transfer.⁵⁵§ 2515.⁵⁶§ 2631(c).⁵⁷§ 2652(a)(2).

Gifts possess distinct advantages. First, and often most important, income from the property is generally shifted to the donee. If the donee is in a lower bracket than the donor, the family unit will save on income taxes. Second, the proper spacing of gifts can further cut down the Federal gift tax by maximizing the number of annual exclusions available. Third, many states impose some type of tax at death, but only a relatively few impose a gift tax. Thus, a gift may completely avoid a state transfer tax.

In minimizing gift tax liability in lifetime giving, the optimum use of the annual exclusion can have significant results. Because a new annual exclusion is available each year, spacing gifts over multiple years increases the amount that can be transferred free of gift tax.

EXAMPLE**56**

Starting in 2003, Cora makes gifts in the amount of the annual exclusion to each of her five grandchildren. Taking into account the changes in the amount of the annual exclusion allowed, Cora will have transferred \$815,000 through 2015 with no gift tax consequences.

| Years | | Amount of Exclusion |
|-----------|--|---------------------|
| 2003–2005 | $\$11,000$ (annual exclusion) \times 5 (number of donees) \times 3 (number of years) | \$165,000 |
| 2006–2008 | $\$12,000$ (annual exclusion) \times 5 (number of donees) \times 3 (number of years) | 180,000 |
| 2009–2012 | $\$13,000$ (annual exclusion) \times 5 (number of donees) \times 4 (number of years) | 260,000 |
| 2013–2015 | $\$14,000$ (annual exclusion) \times 5 (number of donees) \times 3 (number of years) | 210,000 |

For married donors, the § 2513 election to split gifts can double the amount of a tax-free transfer. Referring to Example 56, if Cora is married and her husband Julio makes the § 2513 election, \$1,630,000 [$\$815,000$ (amount allowed Cora) \times 2 (number of donors)] can be transferred with no gift tax consequences.

27-5b The Federal Estate Tax

Controlling the Amount of the Gross Estate

Presuming that an estate tax problem is anticipated, the starting point for planning purposes is to reduce the size of the potential gross estate. Aside from initiating a program of lifetime giving, as described next, several other possibilities exist.

Proper Handling of Estate Tax Deductions

Estate taxes can be saved either by reducing the size of the gross estate or by increasing the total allowable deductions. Thus, the lower the taxable estate, the less the amount of estate tax generated. Planning in the deduction area generally involves the following considerations:

- Making proper use of the marital deduction.
- Working effectively with the charitable deduction.
- Taking advantage of the bypass amount.
- Optimizing other deductions and losses allowed under §§ 2053 and 2054.

Approach to the Marital Deduction

When planning for the estate tax marital deduction, both tax and nontax factors have to be taken into account. Based on the time value of taxes deferred, taxpayers should try to postpone estate taxation as long as possible. Usually, by maximizing the marital deduction on the death of the first spouse to die, not only are taxes saved, but the

surviving spouse is enabled to trim his or her future estate by entering into a program of lifetime gifts. By making optimum use of the annual exclusion, considerable amounts can be shifted without incurring *any* transfer tax.

Effectively Working with the Charitable Deduction

As a general guide to obtain overall tax savings, lifetime charitable transfers are preferred over testamentary dispositions. For example, an individual who gave \$20,000 to a qualified charity during his or her life would secure an income tax deduction, avoid any gift tax, and reduce the gross estate by the amount of the gift. By way of contrast, if the \$20,000 had been willed to charity, no income tax deduction would be available, and the amount of the transfer would be includible in the decedent's gross estate (although later deducted for estate tax purposes). In short, the lifetime transfer provides a double tax benefit (income tax deduction plus reduced estate taxes) at no gift tax cost (§ 2522). The testamentary transfer merely neutralizes the effect of the inclusion of the property in the gross estate (inclusion under § 2033 and then deduction under § 2055).

On occasion, a charitable bequest depends on the issuance of a disclaimer by a non-charitable heir.⁵⁸ Such a situation frequently arises with special types of property or collections, which the decedent may believe a noncharitable heir should have a choice of receiving.

Use of Disclaimers in Charitable Bequests

Megan specified in her will that her valuable art collection is to pass to her son or, if the son refuses, to a designated and qualified art museum. At the time the will was drawn, Megan knew that her son was not interested in owning the collection. If, after Megan's death, the son issues a timely disclaimer, the collection will pass to the designated museum, and Megan's estate is allowed a charitable deduction for its estate tax value.

EXAMPLE

57

Dick's will specifies that one-half of his disposable estate is to pass to his wife and the remainder of his property to a designated and qualified charitable organization. If the wife issues a timely disclaimer after Dick's death, all of the property passes to the charity and qualifies for the § 2055 charitable deduction.

EXAMPLE

58

Did the son in Example 57 act wisely if he issued the disclaimer in favor of the museum? Although the disclaimer will provide Megan's estate with a deduction for the value of the art collection, consider the income tax deduction alternative. If the son accepts the bequest, he can still dispose of the collection (and fulfill his mother's philanthropic objectives) through a lifetime donation to the museum. At the same time, he obtains an income tax deduction of his own. Whether this will save taxes for the family unit depends on a comparison of Megan's estate tax bracket with the estimated income tax bracket of the son. If the value of the collection runs afoul of the percentage limitations, the donation can be spread over more than one year. If this is done, and to protect against the contingency of the son's dying before the entire collection is donated, the son can neutralize any potential estate tax consequences by providing in his will for the undonated balance to pass to the museum.

The use of a disclaimer in Example 58 would be sheer folly. It would not reduce Dick's estate tax; it would merely substitute a charitable deduction for the marital deduction. Whether or not the wife issues a disclaimer, no estate taxes will be due. The wife should accept her bequest and, if she is so inclined, make lifetime gifts of it to a qualified charity. In so doing, she generates an income tax deduction for herself.

⁵⁸As noted earlier in this chapter, a disclaimer is a refusal to accept the property. If the disclaimer is timely made, the property is not treated as having passed through the person issuing the disclaimer and a gift tax is avoided.

A special provision permits, under very limited circumstances, a tax-free distribution from an IRA to a qualified charity. The provision does not generate a charitable deduction, but allows the donor to avoid the recognition of income that normally results when a distribution occurs. An estate tax savings also takes place because the donor will no longer own the amount donated upon his or her later death.⁵⁹ For the provision to apply, the donor must be age 70½ or older. The exclusion is limited to \$100,000 per year and is available only for distributions made after 2005 and before 2015.

Taking Advantage of the Bypass Amount

The bypass amount, also known as the exclusion amount or the exemption equivalent amount, is the amount that can pass free of a transfer tax due to the unified credit. The bypass amount can increase because the unified credit is subject to indexation.

| Year | Credit | Bypass Amount |
|------|-------------|---------------|
| 2011 | \$1,730,800 | \$5,000,000 |
| 2012 | 1,772,800 | 5,120,000 |
| 2013 | 2,045,800 | 5,250,000 |
| 2014 | 2,081,800 | 5,340,000 |
| 2015 | 2,117,800 | 5,430,000 |

In the past, a bypass amount frequently was wasted upon the death of the first spouse. Human nature often compels a spouse to leave all of his or her assets to the survivor.

EXAMPLE

59

Ethan and Hope are married, and each has a net worth of \$3.5 million. Upon Ethan's prior death in 2009, his will passed his \$3.5 million to Hope. Although Ethan avoided any estate tax due to the marital deduction, he wasted his bypass amount and concentrated \$7 million in Hope's potential estate.

After 2010, the result reached in Example 59 is different; the bypass amount (also known as the exclusion amount) is "portable," meaning that a **deceased spouse's unused exclusion (DSUE)** amount can be transferred to the surviving spouse.⁶⁰

EXAMPLE

60

Assume the same facts as in Example 59, except that Ethan dies in 2015 with a net worth of \$5.43 million, all of which he passes to Hope. Presuming a proper election was made on his return, Ethan's DSUE amount becomes available. Hope now can use an exclusion amount of \$10.86 million [\$5.43 million (Ethan's DSUE amount) + \$5.43 million (her own exclusion amount)].

The election is made by the executor of the deceased spouse's estate by a timely filing of a Form 706. To mitigate the burden of having to file a Form 706 in cases where no such form is otherwise required, the IRS will allow the executor to use reasonable estimates of value in completing the return. If the election is not made by the executor of the deceased spouse's estate, then any DSUE amount is lost. The election requirement could be a real trap for the unwary in cases involving a "poor spouse" where no Form 706 is due.

EXAMPLE

61

In 2015, Rowena dies leaving a gross estate of \$5 million, all of which she passes to Christopher, her surviving spouse. The executor of Rowena's estate does not file a Form 706, as no Federal estate tax is due. Because no DSUE election was made, Christopher cannot use any of Rowena's "wasted" exemption equivalent. Rowena's executor needed to file a Form 706 to create the DSUE amount for Christopher.

⁵⁹§ 408(d)(8).

⁶⁰§ 2010(c).

If a surviving spouse is predeceased by more than one spouse, the DSUE amount that is available for such a surviving spouse is limited to the unused exclusion of the *last* surviving spouse.

Proper Handling of Other Deductions and Losses under §§ 2053 and 2054

Many § 2053 and § 2054 deductions and losses may be claimed either as estate tax deductions or as income tax deductions of the estate on the fiduciary return (Form 1041), but a choice must be made.⁶¹ The deduction for income tax purposes is not allowed unless the estate tax deduction is waived. It is possible for these deductions to be apportioned between the two returns.

REFOCUS ON THE BIG PICTURE

AN EVENTFUL AND FINAL YEAR

By making use of § 2516, John was able to carry out a property settlement with Hannah without incurring any gift tax consequences (see Example 11). Both Helen and John acted wisely when they chose to disclaim most of their inheritance from their mother. By making the disclaimers, they were able to pass the property to their children without a transfer tax being imposed (see Examples 12 and 13).

Section 2033 operates to include in the gross estate not only John's retirement plan benefits but also any settlement from a potential lawsuit (see Examples 25 and 26). Section 2036 did not apply to the trust that John's father (Peter) created, but it did apply to the one John set up (see Examples 28 and 29). The difference in treatment occurs when it is the owner who retains an interest in the property, thereby making the transfer incomplete.

John's pre-death planning was highly advantageous in several respects.

- By drawing up a new will, the loss of the charitable and marital deductions was avoided (see Examples 41 and 42).
- By prepaying state and local property and income taxes and staying current on medical expenses, John improved his Federal income tax position (see Example 41). He also avoided any estate taxes on the amounts used to pay these expenses.

Discussion Questions

1. **LO.1** Why can the unified transfer tax be categorized as an excise tax? In this regard, how does it differ from an income tax?
- Issue ID** 2. **LO.1** Kim, a wealthy Korean national, is advised by his physicians to have an operation performed at the Mayo Clinic. Kim is hesitant to come to the United States because of the possible tax consequences. If the procedure is not successful, Kim does not want his wealth to be subject to the Federal estate tax. Are Kim's concerns justified? Explain.
3. **LO.1** Arturo is a citizen and resident of Argentina. Attracted by the low prices due to the housing slump, Arturo buys developed real estate in various locations within the United States. What are the U.S. transfer tax consequences if Arturo:
 - a. Makes gifts of the properties to his children during his lifetime?
 - b. Dies and passes the properties to his children?
- Communications** 4. **LO.2** A new out-of-state client, Robert Ball, has asked you to prepare a Form 709 for a large gift he made in 2015. When you request copies of any prior gift tax returns he may have filed, he responds, "What do gifts in prior years have to do with 2015?" Send a letter to Robert at 4560 Walton Lane, Benton, AR 72015, clarifying this matter.
5. **LO.2, 4, 5** Regarding the formula for the Federal gift tax (see Concept Summary 27.1), comment on the following observations.
 - a. A credit is allowed for the gift taxes actually paid on prior gifts.
 - b. The annual exclusion is adjusted each year for inflation.
 - c. The charitable and marital deductions play an important role.
 - d. Some gratuitous transfers might not be subject to the gift tax.
6. **LO.3** Regarding the formula for the Federal estate tax (see Concept Summary 27.2), comment on the following.
 - a. The gross estate includes only property interests owned by the decedent at the time of death.
 - b. The gross estate is not the same as the probate estate.
 - c. In arriving at the taxable estate, all prior gifts must be added to the gross estate.
 - d. Taxable estate \times Applicable unified transfer tax rate = Estate tax due.
7. **LO.3** As to the alternate valuation date of § 2032, comment on the following.
 - a. The justification for the election.
 - b. The main heir prefers the date of death value.
 - c. An estate asset is sold seven months after the decedent's death.
 - d. Effect of the election on income tax basis.
- Issue ID** 8. **LO.4** Gus (age 84) and Belle (age 18) are married in early 2015. Late in 2015, Belle confronts Gus about his failure to transfer to her the considerable amount of property he previously promised. Gus reassures Belle that she will receive the property when he dies. Because the transfer occurs at death, the estate tax marital deduction will avoid any taxes. Comment on the issues involved and any misconceptions Gus may have.
- Issue ID** 9. **LO.4, 6** At a local bank, Jack purchases for \$100,000 a five-year CD listing title as follows: "Meredith, payable on death to Briana." Four years later, Meredith dies. Briana, Meredith's daughter, then redeems the CD when it matures. Discuss the transfer tax consequences if Meredith is:
 - a. Jack's wife.
 - b. Jack's ex-wife.
 - c. Jack's girlfriend.

10. **LO.4** Derek dies intestate (i.e., without a will) and is survived by a daughter, Ruth, and a grandson, Ted (Ruth's son). Derek's assets include a large portfolio of stocks and bonds and a beach house. Ruth has considerable wealth of her own, while Ted has just finished college and is unemployed. Under applicable state law, the order of priority as to heirship favors children followed by grandchildren. **Issue ID**
- To minimize future transfer taxes, what action might Ruth take?
 - What if Ruth wants only the beach house?
11. **LO.4** Qualified tuition programs under § 529 enjoy significant tax advantages. Describe these advantages with regard to the Federal:
- Income tax.
 - Gift tax.
 - Estate tax.
12. **LO.5** Regarding the gift-splitting provision of § 2513, comment on the following.
- What it was designed to accomplish.
 - How the election is made.
 - The treatment of any taxable gifts previously made by the nonowner spouse.
 - The utility of the election in a community property jurisdiction.
13. **LO.5** In connection with the filing of a Federal gift tax return, comment on the following.
- No Federal gift tax is due.
 - The gift is between spouses.
 - The donor uses a fiscal year for Federal income tax purposes.
 - The donor obtained from the IRS an extension of time for filing his or her Federal income tax return.
14. **LO.4** In each of the following independent situations, indicate whether the transfer is subject to the Federal gift tax.
- Asa contributes to his mayor's reelection campaign fund. The mayor has promised to try to get some of Asa's property rezoned from residential to commercial use.
 - Mary Ann inherits her father's collection of guns and mounted animals. Five months later, she disclaims any interest in the mounted animals.
 - Same as (b). Ten months later, Mary Ann disclaims any interest in the guns.
 - Haydon pays an orthodontist for the dental work performed on Michele, his dependent cousin.
 - Same as (d), except that Michele is not Haydon's dependent.
 - Floyd creates a revocable trust with his children as the beneficiaries.
 - Florence purchases a U.S. savings bond listing herself and Taylor (her daughter) as joint owners.
 - Same as (g). One year later, Taylor predeceases Florence.
 - Same as (g). One year later, Florence predeceases Taylor.
15. **LO.6** At the time of Emile's death, he was a joint tenant with Colette in a parcel of real estate. With regard to the inclusion in Emile's gross estate under § 2040, comment on the following *independent* assumptions:
- Emile and Colette received the property as a gift from Douglas.
 - Colette provided the entire purchase price of the property.
 - Colette's contribution was received as a gift from Emile.
 - Emile's contribution was derived from income generated by property he received as a gift from Colette.

16. **LO.6** With regard to “life insurance,” comment on the following.
- What the term includes (i.e., types of policies).
 - The meaning of “incidents of ownership.”
 - When a gift occurs upon maturity of the policy.
 - The tax consequences when the owner of the policy predeceases the insured and the beneficiary.
 - The tax consequences when the owner-insured gives the policy to the beneficiary and dies shortly after making the gift.
- Issue ID** 17. **LO.6, 7** Due to the negligence of the other driver, Adam’s car is completely destroyed, and he is seriously injured. Two days later, Adam dies from injuries suffered in the accident.
- What, if any, are the estate tax consequences of these events?
 - Are there any income tax consequences to Adam or his estate? Explain.
18. **LO.7** Bernice dies and, under a will, passes real estate to her surviving husband. The real estate is subject to a mortgage. For estate tax purposes, how will any marital deduction be determined? Can Bernice’s estate deduct the mortgage under § 2053? Explain.
- Issue ID** 19. **LO.8** Three unmarried and childless sisters live together. All are of advanced age and in poor health, and each owns a significant amount of wealth. Each has a will that passes her property to her surviving sister(s) or, if no survivor, to their church. Within a period of two years and on different dates, all three sisters die. Discuss the Federal estate tax consequences of these deaths.

Computational Exercises

20. **LO.2** Elizabeth, a widow since 2000, made taxable gifts of \$3 million in 2011 and \$4 million in 2015. She paid no gift tax on the 2011 transfer. What is her tax base for determining any gift tax on the 2015 gift?
21. **LO.3** Carter died in 2015 with a gross estate of \$6 million. Before he was married in 2002, Carter had made taxable gifts of \$400,000 upon which he paid no gift tax. All of Carter’s property passes to his surviving spouse. Referring to the formula for the Federal estate tax, as to Carter’s estate, what is his:
- Taxable estate?
 - Tax base?
22. **LO.3** Mary dies in 2015, and included in her gross estate are the following assets:

| | Fair Market Value | |
|------------------------------|-------------------|------------------|
| | Date of Death | Six Months Later |
| Stock in Orange Corporation | \$3,000,000 | \$3,100,000 |
| Stock in Crimson Corporation | 6,100,000 | 5,900,000 |

- How much is included in her gross estate if the alternate valuation date is elected?
 - Suppose all of Mary’s assets pass to her surviving spouse?
23. **LO.4** During the year, Fred makes the following transfers:
- \$1,000 to his mayor’s reelection campaign.
 - \$21,000 to his aunt, Ava, to reimburse her for what she paid the hospital for her gallbladder operation. (Ava is not Fred’s dependent.)
 - \$18,000 paid directly to the surgeon who performed Ava’s gallbladder operation.
 - \$22,000 to purchase a used pickup truck for his son to use while attending college.

Which of these transfers are subject to the Federal gift tax? (Include the total amount and disregard the annual exclusion.)

24. **LO.4** In 2013 and with \$200,000, Alice purchases a CD at State Bank listing title as follows: “Alice, payable on proof of death to Clark.” Alice dies in 2015, and Clark (Alice’s nephew) redeems the CD (now worth \$205,000). Disregarding the annual exclusion, what is Alice’s gift in:
- 2013?
 - 2015?
25. **LO.5** In 2015, Christian wants to transfer as much as possible to his four adult married children (including spouses) and eight minor grandchildren without using any unified transfer tax credit.
- How much can Christian give?
 - What if Christian’s wife, Mia, joins in the gifts?
26. **LO.5** In 2015, Noah and Sophia want to make a maximum contribution to their state’s qualified tuition program (Code § 529 plan) on behalf of their minor granddaughter, Amanda, without exceeding the annual exclusion. How much can they give?
27. **LO.6** At his death, Andrew was a participant in his employer’s contributory qualified pension plan. His account reflects the following:
- | | |
|-------------------------|-------------|
| Employer’s contribution | \$1,000,000 |
| Andrew’s contribution | 800,000 |
| Income earned | 500,000 |
- As to this plan, how much is included in Andrew’s gross estate?
 - If paid to Andrew’s surviving spouse, how much qualifies for the marital deduction?
 - How much is subject to the Federal income tax?
28. **LO.6** In 2001, Mason buys real estate for \$1.5 million and lists ownership as follows: “Mason and Dana, joint tenants with the right of survivorship.” Mason dies first in 2015 when the real estate is valued at \$2 million. How much is included in Mason’s gross estate if Mason and Dana are:
- Brother and sister.
 - Husband and wife.
29. **LO.6** Matthew owns an insurance policy (face amount of \$500,000) on the life of Emily, with Lily as the designated beneficiary. If Emily dies first and the \$500,000 is paid to Lily, how much as to this policy is included in:
- Matthew’s gross estate?
 - Emily’s gross estate?
30. **LO.7** Donald dies in 2014, and under his will, a trust is created in the amount of \$6 million with the following provisions: life estate to Cindy (Donald’s wife) and remainder to their children. His will also passes land (cost basis of \$1 million and fair market value of \$3 million) to the Salvation Army for the site of a new homeless housing project.
- If a QTIP election is made, how much will these transactions reduce Donald’s gross estate to arrive at the taxable estate?
 - If a QTIP election is not made?
31. **LO.8** Under Emma’s will, Addison inherits property that generates an estate tax of \$800,000. Three years later, Addison dies and the property generates an estate tax of \$700,000. To how much of a credit for estate tax on prior transfers is Addison’s estate entitled?

32. **LO.9** In 2000 and with \$5 million, Paul's will creates a trust with the following provisions: life estate to Jacob (Paul's son) and remainder to Anastasia (Paul's granddaughter and Jacob's daughter). Jacob dies in 2015 when the value of the trust is \$8 million.
- Does a generation skipping transfer result?
 - If so, when and in what amount?
33. **LO.10** During 2015, Charley wants to take advantage of the annual exclusion and make gifts to his 6 married children (including their spouses) and his 12 minor grandchildren.
- How much property can Charley give away without creating a taxable gift?
 - Does your answer change if Charley's wife, Coleen, elects to join in making the gifts? Explain.

Problems

34. **LO.3** In each of the following independent situations, indicate whether the alternate valuation date can be elected. Explain why or why not. All deaths occur in 2015.

| Decedent | Value of Gross Estate | | Estate Tax Liability | |
|----------|-----------------------|------------------|----------------------|------------------|
| | Date of Death | Six Months Later | Date of Death | Six Months Later |
| Jayden | \$6,000,000 | \$5,900,000 | \$240,000 | \$239,000 |
| Isabella | 6,100,000 | 6,000,000 | 265,000 | 260,000 |
| Liam | 6,100,000 | 6,000,000 | 200,000 | 210,000 |
| Lily | 6,500,000 | 6,400,000 | 205,000 | 204,000 |

35. **LO.4** Carl made the following transfers during the current year.
- Transferred \$900,000 in cash and securities to a revocable trust, life estate to himself and remainder interest to his three adult children by a former wife.
 - In consideration of their upcoming marriage, gave Lindsey (age 21) a \$90,000 convertible.
 - Purchased a \$100,000 certificate of deposit listing title as "Carl, payable on proof of death to Lindsey."
 - Established a joint checking account with his wife, Lindsey, in December of the current year with \$30,000 of funds he inherited from his parents. In January of the following year, Lindsey withdrew \$15,000 of the funds.
 - Purchased for \$80,000 a paid-up insurance policy on his life (maturity value of \$500,000). Carl designated Lindsey as the beneficiary.
 - Paid \$13,400 to a college for his niece's tuition and \$6,000 for her room and board. The niece is not Carl's dependent.
 - Gave his aunt \$52,000 for her heart bypass operation. The aunt is not Carl's dependent.

What are Carl's taxable gifts for the current year?

- Issue ID** 36. **LO.4, 7** In May 2014, Dudley and Eva enter into a property settlement preparatory to the dissolution of their marriage. Under the agreement, Dudley is to pay Eva \$6 million in satisfaction of her marital rights. Of this amount, Dudley pays \$2.5 million immediately, and the balance is due one year later. The parties are divorced in July. Dudley dies in December, and his estate pays Eva the remaining \$3.5 million in May 2015. Discuss the tax ramifications of these transactions to the parties involved.

37. **LO.4** Jesse dies intestate (i.e., without a will) in May 2014. Jesse's major asset is a tract of land. Under applicable state law, Jesse's property will pass to Lorena, who is his only child. In December 2014, Lorena disclaims one-half of the property. In June 2015, Lorena disclaims the other half interest. Under state law, Lorena's disclaimer results in the property passing to Arnold (Lorena's only child). The value of the land (in its entirety) is as follows: \$2 million in May 2014, \$2.1 million in December 2014, and \$2.2 million in June 2015. Discuss the transfer tax ramifications of these transactions. **Issue ID**
38. **LO.5** Using property she inherited, Myrna makes a gift of \$6.2 million to her adult daughter, Doris. The gift takes place in 2015. Neither Myrna nor her husband, Greg, has made any prior taxable gifts. Determine the gift tax liability if:
- The § 2513 election to split gifts is not made.
 - The § 2513 election to split gifts is made.
 - What are the tax savings from making the election?
39. **LO.6, 7** At the time of his death this year on September 4, Kenneth owned the following assets.

| | Fair Market Value |
|--|-------------------|
| City of Boston bonds | \$2,500,000 |
| Stock in Brown Corporation | 900,000 |
| Promissory note issued by Brad (Kenneth's son) | 600,000 |

In October, the executor of Kenneth's estate received the following: \$120,000 interest on the City of Boston bonds (\$10,000 accrued since September 4) and a \$7,000 cash dividend on the Brown stock (date of record was September 5). The declaration date on the dividend was August 12.

The \$600,000 loan was made to Brad in late 2010, and he used the money to create a very successful business. The note was forgiven by Kenneth in his will.

What are the estate tax consequences of these transactions?

40. **LO.6** At the time of her death on September 4, 2015, Alicia held the following assets.

| | Fair Market Value |
|--|-------------------|
| Bonds of Emerald Tool Corporation | \$ 900,000 |
| Stock in Drab Corporation | 1,100,000 |
| Insurance policy (face amount of \$400,000) on the life of her father, Mitch | 80,000* |
| Traditional IRAs | 300,000 |

*Cash surrender value.

Alicia was also the life tenant of a trust (fair market value of \$2 million) created by her late husband Bert. (The executor of Bert's estate had made a QTIP election.) In October, Alicia's estate received an interest payment of \$11,500 (\$6,000 accrued before September 4, 2015) paid by Emerald and a cash dividend of \$9,000 from Drab. The Drab dividend was declared on August 19 and was payable to date of record shareholders on September 3, 2015. Although Mitch survives Alicia, she is the designated beneficiary of the policy. The IRAs are distributed to Alicia's children. What amount is included in Alicia's gross estate?

41. **LO.6** Assume the same facts as in Problem 40 with the following modifications.
- Mitch is killed in a rock slide while mountain climbing in November 2015, and the insurer pays Alicia's estate \$400,000.
 - Bert's executor did not make a QTIP election.

- Alicia's IRAs were the Roth type (not traditional).
- The record date for the Drab Corporation dividend is September 5 (not September 3).
- On November 7, 2015, Alicia's estate receives from the IRS an \$8,000 income tax refund on the taxes she paid for the preceding calendar year.

What amount is included in Alicia's gross estate?

42. **LO.6, 7** At the time of Matthew's death, he was involved in the following transactions.
- Matthew was a participant in his employer's contributory qualified pension plan. The plan balance of \$2 million is paid to Olivia, Matthew's daughter and beneficiary. The distribution consists of the following.
- | | |
|-----------------------------------|-----------|
| Employer contributions | \$900,000 |
| Matthew's after-tax contributions | 600,000 |
| Income earned by the plan | 500,000 |
- Matthew was covered by his employer's group term life insurance plan for employees. The \$200,000 proceeds are paid to Olivia, the designated beneficiary.
- What are the estate tax consequences?
 - The income tax consequences?
 - Would the answer to part (a) change if Olivia was Matthew's surviving spouse (not his daughter)? Explain.
43. **LO.4, 6** Before her death in early 2015, Katie made the following transfers.
- In 2008, purchased stock in Green Corporation for \$200,000, listing title as follows: "Katie, payable on proof of death to my son Travis." Travis survives Katie, and the stock is worth \$300,000 when Katie dies.
 - In 2013, purchased an insurance policy on her life for \$200,000, listing Paul, another of Katie's sons, as the designated beneficiary. The policy has a maturity value of \$1 million and was immediately transferred to Paul as a gift.
 - In 2013, made a gift of land (basis of \$300,000; fair market value of \$1.3 million) to Adriana, Katie's only daughter. As a result of the transfer, Katie paid a gift tax of \$150,000. The value of the land is still \$1.3 million at Katie's death.
 - In 2013, established a savings account with Noah, her grandfather. Title to the account was listed as "Katie and Noah, joint tenants with right of survivorship." Of the \$200,000 deposited in the account, Katie furnished \$20,000 and Noah contributed the balance. At Katie's death, the balance was \$206,000.
- As to these transfers, how much is included in Katie's gross estate?
- Issue ID** 44. **LO.4, 6, 7** In 2005, using \$2.5 million in community property, Quinn creates a trust, life estate to his wife, Eve, and remainder to their children. Quinn dies in 2011 when the trust is worth \$3.6 million, and Eve dies in 2015 when the trust is worth \$5.6 million.
- Did Quinn make a gift in 2005? Explain.
 - How much, if any, of the trust is included in Quinn's gross estate in 2011?
 - How much, if any, of the trust is included in Eve's gross estate in 2015?
 - Would any of the above answers change if Quinn had used his separate property (rather than community property) when he created the trust? Explain.
45. **LO.6, 9** At the time of his death, Garth held a life estate in the Myrtle Trust with the remainder passing to Garth's adult children. The trust was created by Myrtle (Garth's mother) in 1984 with securities worth \$900,000. The Myrtle Trust had a value of \$4.7 million when Garth died. Discuss the estate tax ramifications as to Garth.

46. **LO.6** In 2007, Peggy, a widow, places \$3 million in trust, life estate to her children, remainder to her grandchildren, but retains the right to revoke the trust. In 2013, when the trust is worth \$3.1 million, Peggy rescinds her right to revoke the trust. Peggy dies in 2015 when the trust is worth \$3.2 million. What are Peggy's transfer tax consequences in:
- 2007?
 - 2013?
 - 2015?
47. **LO.6** At the time of his death on July 9, 2015, Aiden was involved in the following real estate.

| | Fair Market Value (on July 9, 2015) |
|--------------------|--|
| Apartment building | \$2,100,000 |
| Tree farm | 1,500,000 |
| Pastureland | 750,000 |
| Residence | 900,000 |

The apartment building was purchased by Chloe, Aiden's mother, and is owned in a joint tenancy with her. The tree farm and pastureland were gifts from Chloe to Aiden and his two sisters. The tree farm is held in joint tenancy, and the pastureland is owned as tenants in common. Aiden purchased the residence and owns it with his wife as tenants by the entirety. How much is included in Aiden's gross estate based on the following assumptions?

- Aiden dies first and is survived by Chloe, his sisters, and his wife.
 - Aiden dies after Chloe, but before his sisters and his wife.
 - Aiden dies after Chloe and his sisters, but before his wife.
 - Aiden dies last (i.e., he survives Chloe, his sisters, and his wife).
48. **LO.4, 6, 7** In 2002, Gordon purchased real estate for \$900,000 and listed title to the property as "Gordon and Fawn, joint tenants with right of survivorship." Gordon predeceases Fawn in 2015 when the real estate is worth \$2.9 million. Gordon and Fawn are brother and sister.
- Did a gift occur in 2002? Explain.
 - What, if any, are the estate tax consequences in 2015?
 - Under part (b), would your answer change if it was Fawn (not Gordon) who died in 2015? Explain.
49. **LO.4, 6, 7** Assume the same facts as in Problem 48, except that Gordon and Fawn are husband and wife (not brother and sister).
- What are the gift tax consequences in 2002?
 - What are the estate tax consequences in 2015?
 - Under part (b), would your answer change if it was Fawn (not Gordon) who died in 2015? Explain.
50. **LO.5, 6, 7** In each of the *independent* situations below, determine the transfer tax (i.e., estate and gift) consequences of what has occurred. (In all cases, assume that Gene and Mary are married and that Ashley is their daughter.)
- Mary purchases an insurance policy on Gene's life and designates Ashley as the beneficiary. Mary dies first, and under her will, the policy passes to Gene.
 - Gene purchases an insurance policy on his life and designates Ashley as the beneficiary. Gene gives the policy to Mary and continues to pay the premiums thereon. Two years after the gift, Gene dies first, and the policy proceeds are paid to Ashley.

- c. Gene purchases an insurance policy on Mary's life and designates Ashley as the beneficiary. Ashley dies first one year later.
 - d. Assume the same facts as in part (c). Two years later, Mary dies. Because Gene has not designated a new beneficiary, the insurance proceeds are paid to him.
 - e. Gene purchases an insurance policy on his life and designates Mary as the beneficiary. Gene dies first, and the policy proceeds are paid to Mary.
51. **LO.7** While vacationing in Florida in November 2015, Sally was seriously injured in an automobile accident (she died several days later). How are the following transactions handled for tax purposes?
- a. Bruce, Sally's son and executor, incurred \$6,200 in travel expenses in flying to Florida, retrieving the body, and returning it to Frankfort, Kentucky, for burial.
 - b. Early in 2015, Sally had pledged \$50,000 to the building fund of her church. Bruce paid this pledge from the assets of the estate.
 - c. Prior to her death, Sally had promised to give her nephew, Gary, \$20,000 when he passed the bar exam. Gary passed the exam in late 2015, and Bruce kept Sally's promise by paying him \$20,000 from estate assets.
 - d. At the scene of the accident and before the ambulance arrived, someone took Sally's jewelry (i.e., Rolex watch and wedding ring) and money. The property (valued at \$33,000) was not insured and was never recovered.
 - e. As a result of the accident, Sally's auto was totally destroyed. The auto had a basis of \$52,000 and a fair market value of \$28,000. In January 2016, the insurance company pays Sally's estate \$27,000.
52. **LO.7** Roy dies and is survived by his wife, Marge. Under Roy's will, all of his otherwise uncommitted assets pass to Marge. Based on the following property interests, determine the marital deduction allowed to Roy's estate.
- a. Timberland worth \$1.2 million owned by Roy, Marge, and Amber (Marge's sister) as equal tenants in common. Amber furnished the original purchase price.
 - b. Residence of Roy and Marge worth \$900,000 owned by them as tenants by the entirety with right of survivorship. Roy provided the original purchase price.
 - c. Insurance policy on Roy's life (maturity value of \$1 million) owned by Marge and payable to her as the beneficiary.
 - d. Insurance policy on Roy's life (maturity value of \$500,000) owned by Roy with Marge as the designated beneficiary.
 - e. Distribution from a qualified pension plan of \$1.6 million (Roy matched his employer's contribution of \$500,000) with Marge as the designated beneficiary.
53. **LO.8** On the advice of her estate planner, Grace made taxable gifts of \$5 million in 2011. Grace dies in late 2015 leaving a taxable estate of \$1.1 million. Grace has always been single and never made any taxable gifts before 2011. Determine her estate tax liability.
54. **LO.8** Under Rowena's will, Mandy (Rowena's sister) inherits her property. One year later, Mandy dies. Based on the following independent assumptions, what is Mandy's credit for the tax on prior transfers?
- a. The estate tax attributable to the inclusion of the property in Rowena's gross estate is \$700,000, and the estate tax attributable to the inclusion of the property in Mandy's gross estate is \$800,000.
 - b. The estate tax attributable to the inclusion of the property in Rowena's gross estate is \$1.2 million, and the estate tax attributable to the inclusion of the property in Mandy's gross estate is \$1.1 million.
 - c. Would your answers to parts (a) and (b) change if Mandy died seven years (rather than one year) after Rowena?

55. **LO.9** In 2015, Loretta makes a taxable gift of \$2 million to her granddaughter, Bertha. Presuming that Loretta used up both her unified transfer tax credit and her generation-skipping transfer tax credit, how much tax does Loretta owe as a result of the transfer?

Research Problems

Note: Solutions to Research Problems can be prepared by using the Checkpoint® Student Edition online research product, which is available to accompany this text. It is also possible to prepare solutions to the Research Problems by using tax research materials found in a standard tax library.

THOMSON REUTERS
CHECKPOINT
Student Edition

Research Problem 1. Grace Lang was employed as a waitress at the Pancake House in Grand Bay, Alabama. While working the morning shift on March 7, 1999, one of Grace’s customers left her a Florida lottery ticket as a tip. When Grace discovered that she had won part of the Florida Lotto jackpot, the following steps were taken.

- Upon advice of her father and legal counsel, the Lang Corporation was formed and immediately made an S election.
- Grace received 49% of the stock in Lang, and the 51% balance was distributed to family members.
- Grace had the Florida gaming authorities designate the Lang Corporation as the recipient of the prize money—approximately \$10 million payable over 30 years.
- Grace’s coworkers at the Pancake House filed suit against Grace based on an agreement they had to share any lottery winnings equally. The Alabama courts eventually decided that such an agreement did exist but that it was not enforceable. (Alabama law does not permit enforcement of contracts involving illegal activities—gambling is illegal in Alabama.)

In 2007, the IRS determined that Grace had made taxable gifts in 1999 when she shifted some of the lottery winnings to family members. She made the gifts by having 51% of the Lang Corporation stock issued to them. (As Lang is an S corporation, the lottery income passes through to the shareholders.)

Grace disputed the gift tax assessment by contending that her actions were required by the Lang family agreement. Under this agreement, it was understood that each member would take care of the others in the event he or she came into a “substantial amount” of money. Because Grace was bound by the Lang family agreement, she was compelled to relinquish any right to 51% of the Lang stock. Thus, the satisfaction of an obligation is not a gift. As no gift occurred, the imposition of the gift tax is not appropriate.

Who should prevail?

Partial list of research aids:

Estate of Emerson Winkler, 36 TCM 1657, T.C.Memo. 1997–4.

Tonda Lynn Dickerson, 103 TCM 1280, T.C.Memo. 2012–60.

Research Problem 2. In 2000, June, a 75-year-old widow, creates an irrevocable trust naming her five adult grandchildren as the beneficiaries. The assets transferred in trust consist of marketable securities (worth \$800,000) and June’s personal residence

(worth \$400,000). Bob, June's younger brother and a practicing attorney, is designated as the trustee. Other provisions of the trust are as follows.

- Bob is given the discretion to distribute the income to the beneficiaries based on their need or add it to corpus. He is also given the power to change trust investments and to terminate the trust.
- The trust is to last for June's lifetime or, if sooner, until termination by Bob.
- Upon termination of the trust, the principal and any accumulated income are to be distributed to the beneficiaries (June's grandchildren).

For 2000, June files a Form 709 to report the transfer in trust and pays a gift tax based on value of \$1.2 million (\$800,000 + \$400,000).

After the transfer in trust and up to the time of her death, June continues to occupy the residence. Although she pays no rent, she maintains the property and pays the yearly property taxes. June never discussed the matter of her continued occupancy of the residence with either Bob or the beneficiaries of the trust.

Upon June's death in 2008, the value of the trust is \$2.3 million, broken down as follows: marketable securities and cash (\$1.6 million) and residence (\$700,000). Shortly thereafter, Bob sells the residence, liquidates the trust, and distributes the proceeds to the beneficiaries.

What are the estate tax consequences of these transactions to June?

Partial list of research aids:

§ 2036.

Gynn v. U.S., 71-1 USTC ¶12,742, 27 AFTR 2d 71-1653, 437 F.2d 1148 (CA-4, 1971).

Estate of Eleanor T. R. Trotter, 82 TCM 633, T.C.Memo. 2001-250.

Estate of Lorraine C. Disbrow, 91 TCM 794, T.C.Memo. 2006-34.

Research Problem 3. Before her death in 2009, Lucy entered into the following transactions.

- a. In 2000, Lucy borrowed \$600,000 from her brother, Irwin, so that Lucy could start a business. The loan was on open account, and no interest or due date was provided for. Under applicable state law, collection on the loan was barred by the statute of limitations before Lucy died. Because the family thought that Irwin should recover his funds, the executor of the estate paid him \$600,000.
- b. In 2007, she borrowed \$300,000 from a bank and promptly loaned that sum to her controlled corporation. The executor of Lucy's estate prepaid the bank loan, but never attempted to collect the amount due Lucy from the corporation.
- c. In 2008, Lucy promised her sister, Ida, a bequest of \$500,000 if Ida would move in with her and care for her during an illness (which eventually proved to be terminal). Lucy never kept her promise, as her will was silent on any bequest to Ida. After Lucy's death, Ida sued the estate and eventually recovered \$600,000 for breach of contract.
- d. One of the assets in Lucy's estate was a palatial residence that passed to George under a specific provision of the will. George did not want the residence, preferring cash instead. Per George's instructions, the residence was sold. Expenses incurred in connection with the sale were claimed as § 2053 expenses on Form 706 filed by Lucy's estate.
- e. Before her death, Lucy incurred and paid certain medical expenses but did not have the opportunity to file a claim for partial reimbursement from her insurance company. After her death, the claim was filed by Lucy's executor, and the reimbursement was paid to the estate.

Discuss the estate and income tax ramifications of each of these transactions.

Research Problem 4. What type of transfer tax, if any, does your home state impose? What about the state(s) contiguous to your home state? (For Alaska, use Washington; for Hawaii, use California.)

Research Problem 5. The IRS makes available several publications that can prove useful to those involved in the administration of estates. Retrieve and summarize three topics from each of the following documents.

- a. Publication 559.
- b. Publication 510.
- c. Publication 950.

Roger CPA Review Questions

1. Which of the following are valid deductions from decedent's gross estate?
 - I. State death taxes
 - II. Foreign death taxes
 - III. Medical and funeral expenses
 - a. All of the above
 - b. I and II, but not III
 - c. I and III, but not II
 - d. II and III, but not I
2. Bizz, a cash-basis calendar-year taxpayer, died on August 14, 2013. The fair market value of Bizz's estate at date of death was \$10,720,000. What amount of Bizz's estate is effectively tax-free if the maximum basic exclusion amount is taken on his estate tax return?
 - a. \$1,000,000
 - b. \$2,625,000
 - c. \$5,250,000
 - d. \$5,470,000
3. Which of the following conditions must be true for the executor to value the estate assets within six months after the decedent's death?
 - I. The value of the estate must not exceed \$5,250,000
 - II. The executor of the decedent's estate makes the alternate valuation date election
 - III. None of the property included in the gross estate is sold or distributed within six months of the date of death
 - a. II only
 - b. II and III only
 - c. I and II only
 - d. All of the above
4. Disregarding any extensions, within how many months after the date of death of the decedent is the payment of Federal estate tax due?
 - a. 6
 - b. 9
 - c. 3½
 - d. 4½
5. Roger Crocker, a U.S. citizen, died on July 1, 2013, leaving an adjusted gross estate that included the following assets.

| Asset | Fair Market Value on Date of Death |
|------------------------------------|---------------------------------------|
| Jewelry and art | \$2,100,000 |
| 4 multi-family apartment buildings | 5,200,000 |
| Personal property | 3,400,000 |

Under the terms of Roger's will, \$3,400,000 of his personal property was bequeathed outright to his widow, free of estate and inheritance tax. The remainder of the estate was split equally among his three children. Roger made no other taxable gifts during his lifetime. In computing Roger's taxable estate, the executor of the estate should claim marital deduction of:

- a. \$0
 b. \$3,400,000
 c. \$5,250,000
 d. \$5,350,000
6. Pickle, a U.S. citizen, died in 20X4. Pickle made taxable gifts that year of \$290,000 that are not included in Pickle's gross estate. On date of Pickle's death, his estate was \$2,700,000 and his will did not allow for charitable or marital bequeaths. What tax forms must Pickle's estate file for the 20X4 taxable year?

| | Form 709 | Form 706 |
|----|----------|----------|
| a. | Yes | Yes |
| b. | Yes | No |
| c. | No | Yes |
| d. | No | No |

7. During 20X4, Mitchael, a single individual, made the following cash gifts:

| Donee | Amount |
|-----------|----------|
| Alexandra | \$ 7,200 |
| Kaila | 15,000 |
| Marinka | 34,000 |

Alexandra used the money to pay for her medical expenses, whereas Kaila and Marinka used the money for personal purposes. Mitchael did not make any gifts in prior years.

In filing the 20X4 gift tax return, Mitchael was entitled to a maximum annual exclusion of:

- a. \$56,200
 b. \$42,000
 c. \$35,200
 d. \$0
8. During 20X4, Mitchael, a single individual, made the following cash gifts:

| Donee | Amount |
|-----------|----------|
| Alexandra | \$ 7,200 |
| Kaila | 15,000 |
| Marinka | 34,000 |

Alexandra used the money to pay for her medical expenses, whereas Kaila and Marinka used the money for personal purposes. Mitchael did not make any gifts in prior years.

In filing the 20X4 gift tax return, Michael will report a *taxable* gift of:

- a. \$0
 b. \$14,200
 c. \$21,000
 d. \$56,200
9. Cook made the following gifts during the year:
- I. \$14,000 for medical expenses paid directly to a hospital on behalf of an individual
 II. \$45,000 for tuition paid directly to an accredited university of an individual
 III. \$150,000 for campaign expenses paid to a political organization

Which of the gifts made by Cook require him to file a gift tax return for the year?

- a. I and III, but not II
 b. II and III, but not I
 c. III only
 d. None of the above

10. Identify the correct statement regarding portability of a deceased spouse's unused lifetime exclusion amount.
- a. It can be granted via an amended tax return of the surviving spouse
 - b. It permits the surviving spouse to apply the decedent's unused exclusion amount to the surviving spouse's own transfers during life, but not at death
 - c. It is granted via an election on the decedent's fiduciary income tax return
 - d. It can be elected only through a timely filing of a Form 706

Income Taxation of Trusts and Estates

LEARNING OBJECTIVES: *After completing Chapter 28, you should be able to:*

LO.1

Use working definitions with respect to trusts, estates, beneficiaries, and other parties.

LO.2

Identify the steps in determining the accounting and taxable income of a trust or an estate and the related taxable income of the beneficiaries.

LO.3

Illustrate the uses and implications of distributable net income.

LO.4

Apply the Subchapter J rules in a manner that minimizes the income taxation of trusts and estates and still accomplishes the intended objectives of the grantor or decedent.

CHAPTER OUTLINE

SETTING UP A TRUST TO PROTECT A FAMILY

Anna Jiang is the main breadwinner in her family, which includes her husband Tom, a social worker, and two children, Bobby, age 6, and Sally, age 8. Anna has accumulated about \$2 million in after-tax investment accounts, largely made up of growth stocks that do not regularly pay dividends; she inherited most of these securities when her grandmother died about five years ago. Anna has addressed the problem of probate costs through joint property ownership, life insurance policies, and beneficiary arrangements for her retirement plans. She and Tom update their wills every five years or so.

Because there is a history of Alzheimer's disease in her family, Anna Jiang wants to make certain that if she becomes unable to work and cannot manage her financial assets, Tom and the children will have adequate cash flow from the investment assets. One of Anna's colleagues at the office suggests that Anna should set up a trust to take care of her family in case a medical problem ever arises.

Read the chapter and formulate your response.

Taxpayers create trusts for a variety of reasons. Some trusts are established primarily for tax purposes, but most are designed to accomplish a specific financial goal or to provide for the orderly management of assets in case of an emergency.

Because a trust is a separate tax entity, its gross income and deductions must be measured and an annual tax return must be filed. Similarly, when an individual dies, a legal entity is created in the form of his or her estate. This chapter examines the rules related to the income taxation of trusts and estates.

28-1 AN OVERVIEW OF SUBCHAPTER J

The income taxation of trusts and estates is governed by Subchapter J of the Internal Revenue Code, §§ 641 through 692. Certain similarities are apparent between Subchapter J and the income taxation of individuals (e.g., the definitions of gross income and deductible expenditures), partnerships and limited liability entities (e.g., the pass-through principle), and S corporations (e.g., the pass-through principle and the trust or estate as a separate taxable entity). Trusts also involve several important new concepts, however, including the determination of *distributable net income* and the *tier system* of distributions to beneficiaries.

Exhibit 28.1 lists some of the more common reasons that might prompt an individual to create a trust, and Exhibit 28.2 illustrates the structure of a typical trust and estate.

28-1a What Is a Trust?

The Code does not contain a definition of a trust. However, the term usually refers to an arrangement created by a will or by an *inter vivos* (lifetime) declaration through which trustees take title to property for the purpose of protecting or conserving it for the beneficiaries.¹ Usually, trust operations are controlled by the trust document and by the fiduciary laws of the state in which the trust documents are executed.

Typically, the creation of a trust involves at least three parties: (1) The **grantor** (sometimes referred to as the settlor or donor) transfers selected assets to the trust entity. (2) The trustee, who usually is either an individual or a corporation, is charged with

LO.1

Use working definitions with respect to trusts, estates, beneficiaries, and other parties.

EXHIBIT 28.1

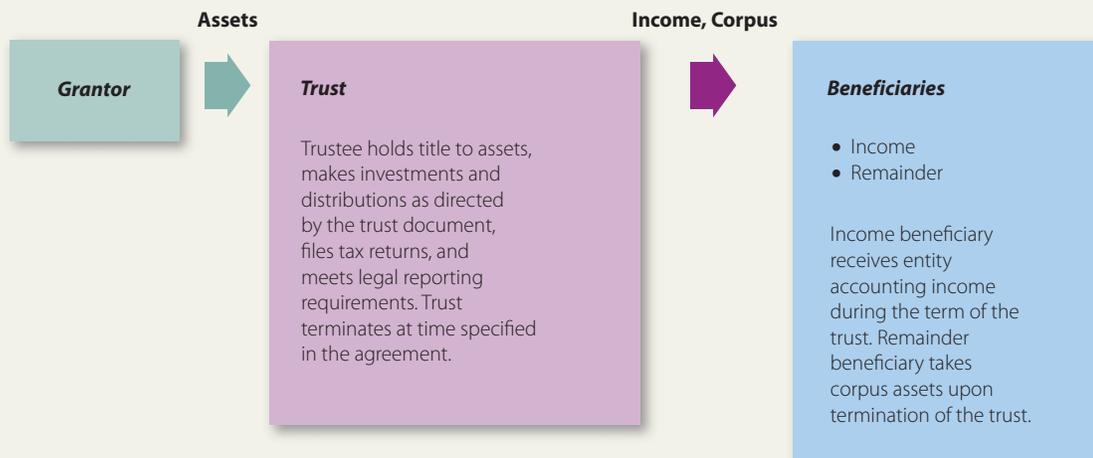

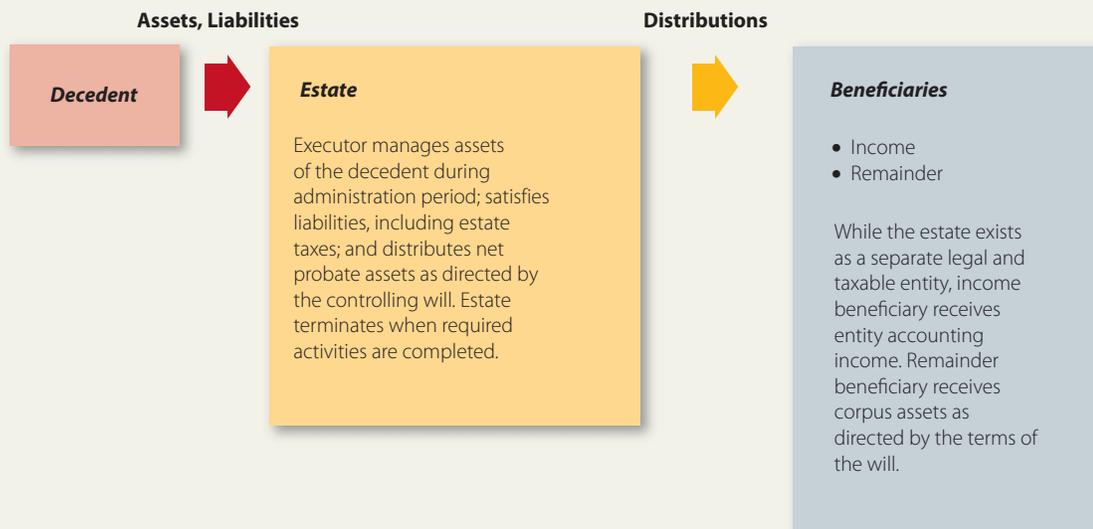

Common Motivations for Creating a Trust

| Type of Trust | Financial and Other Goals |
|----------------------------|---|
| Life insurance trust | Holds life insurance policies on the insured, removes the proceeds of the policies from the gross estate (if an irrevocable trust), and safeguards against receipt of the proceeds by a young or inexperienced beneficiary. |
| "Living" (revocable) trust | Manages assets, reduces probate costs, provides privacy for asset disposition, protects against medical or other emergencies, and provides relief from the necessity of day-to-day management of the underlying assets. |
| Trust for minors | Provides funds for a college education or other needs of the minor and transfers accumulated income without permanently parting with the underlying assets. |
| Retirement trust | Manages asset contributions as dictated by the terms of a qualified retirement plan. Usually, it is exempt from Federal income tax. |
| Divorce trust | Manages the assets of an ex-spouse and ensures that they are distributed in a timely fashion to specified beneficiaries (e.g., as alimony or child support). |

¹Reg. § 301.7701-4(a).

EXHIBIT 28.2

Structure of a Typical Trust and Estate

TRUST**ESTATE**

the fiduciary duties associated with the trust. (3) The beneficiary is designated to receive income or property from the trust.

In some situations, fewer than three persons may be involved, as specified by the trust agreement. For instance, an elderly individual who no longer can manage his or her own property (e.g., because of ill health) may create a trust under which he or she is both the grantor and the beneficiary. In this case, a family member or corporate trustee is charged with the management of the grantor's assets.

In another situation, the grantor might designate himself or herself as the trustee of the trust assets. For example, someone who wants to transfer selected assets to a minor child or elderly parent could use a trust entity to ensure that the beneficiary does not

waste the property. By naming himself or herself as the trustee, the grantor retains virtual control over the property that is transferred.

When only one party is involved (when the same individual is grantor, trustee, and sole beneficiary of the trust), Subchapter J rules do not apply and the entity (known as a **grantor trust**) is ignored for Federal income tax purposes.

Other Definitions

When the grantor transfers title of selected assets to a trust, those assets become the **corpus** (body), or principal, of the trust. Trust corpus, in most situations, earns *income*, which may be distributed to the beneficiaries or accumulated for the future by the trustee, as the trust instrument directs.

In a typical trust, the grantor creates two types of beneficiaries: one who receives the accounting income of the trust (a concept that will be defined in a later section of the chapter), and one who receives the trust corpus that remains at the termination of the trust as a legal entity. Beneficiaries in the former category hold an *income interest* in the trust, and those in the latter category hold a *remainder interest* in the trust's assets. If the grantor retains the remainder interest, the interest is known as a **reversionary interest** (corpus reverts to the grantor when the trust entity terminates).

The trust document establishes the term of the trust. The term may be for a specific number of years (*term certain*) or until the occurrence of a specified event. For instance, a trust might exist:

- for the life of the income beneficiary, in which case the income beneficiary is known as a *life tenant* in the trust corpus;
- for the life of some other individual (e.g., one's parent);
- until the income or remainder beneficiary reaches the age of majority; or
- until the beneficiary, or another individual, marries, receives a promotion, or reaches some specified age.

The trustee may be required to distribute the accounting income of the entity according to a distribution schedule specified in the agreement. Usually, though, the trustee is given more discretion with respect to the timing and nature of the distributions. If the trustee can determine, within guidelines that may be included in the trust document, either the timing of the income or corpus distributions or the specific beneficiaries who will receive them (from among those identified in the agreement), the trust is called a discretionary or **sprinkling trust**. Here, the trustee can “sprinkle” the distributions among the various beneficiaries. As discussed in Chapter 27, family-wide income taxes can be reduced by directing income to those who are subject to lower marginal tax rates. Thus, by giving the trustee a sprinkling power, the income tax liability of the family unit can be manipulated by applying the terms of the trust agreement.

For purposes of certain provisions of Subchapter J, a trust must be classified as either a **simple trust** or a **complex trust**. A simple trust:

- is required to distribute its entire accounting income to designated beneficiaries every year,
- has no beneficiaries that are qualifying charitable organizations, and
- makes no distributions of trust corpus during the year.

A complex trust is any trust that is not a simple trust.² These criteria are applied to the trust every year. Thus, every trust is classified as a complex trust in the year in which it terminates (because it distributes all of its corpus during that year).

²Reg. § 1.651(a)-1.

28-1b What Is an Estate?

An estate is created upon the death of every individual. The entity is charged with collecting and conserving all of the individual's assets, satisfying all liabilities, and distributing the remaining assets to the heirs identified by state law or the will.

Typically, the creation of an estate involves at least three parties: the decedent, all of whose probate assets are transferred to the estate for disposition; the executor, who is appointed under the decedent's valid will (or the administrator, if no valid will exists); and the beneficiaries of the estate, who are to receive assets or income from the entity, as the decedent has indicated in the will. Refer to Exhibit 28.2 for an illustration of these relationships.

An estate's operations are controlled by the probate laws of the decedent's state of residence and by the terms of the will as interpreted by the probate court. If the decedent did not execute a valid will, state law dictates who will carry out the executor's duties, and which beneficiaries will receive which of the decedent's assets and liabilities.

An estate is a separate legal and taxable entity. The termination date of the estate is somewhat discretionary, as it occurs when all of the assets and income of the decedent have been distributed, all estate and decedent liabilities have been satisfied, and all other business of the entity is completed. Thus, there may be an incentive to use the estate as part of an income-shifting strategy (e.g., where the income beneficiaries are subject to low marginal tax rates).

Maria dies, and her estate holds a high-yield investment portfolio. Paulo, the income beneficiary, is subject to a 15% marginal state and Federal income tax rate, while Julia, the remainder beneficiary, is subject to a 30% marginal rate. The tax adviser might suggest that Maria's estate delay its final distribution of assets by a year or more to take advantage of the income tax reduction that is available before the entity terminates.

EXAMPLE

1

If an estate's existence is unduly prolonged, however, the IRS can terminate it for Federal income tax purposes after the expiration of a reasonable period for completing the duties of administration.³

ETHICS & EQUITY To Whom Can I Trust My Pet?

Humane societies encourage the general public to care for their own pets and to adopt those who need owners. It is not uncommon to find provisions in a will to establish a trust or an endowment to care for the pets that the deceased leaves behind. After all, over 60 percent of all individuals live with a pet and more than \$50 billion is spent each year in caring for these companions.

Boilerplate legal language is available to establish a pet-assistance trust. The trust should provide a guaranteed distribution for pet care, including the costs of pet sitters, kennels, and veterinary fees. A few states (e.g., Kentucky and Minnesota) do not recognize such trusts, however.

When decedents establish permanent funds to provide for a favorite pet, the surviving (human) family members may not be so enthused. In a few cases, the survivors challenge the terms of the will or trust, often requesting that a judge downsize the principal amount involved or reduce the specified annual distributions. In this way, the human heirs benefit from any adjustment that is made.

How would you advise a client who wants to establish a well-funded trust to care for Fifi when the family members have income and asset needs of their own?

³Reg. § 1.641(b)-3(a).

28-2 NATURE OF TRUST AND ESTATE TAXATION

In general, the taxable income of a trust or an estate is taxed to the entity or to its beneficiaries to the extent that each has received the accounting income of the entity. Thus, Subchapter J creates a modified pass-through principle relative to the income taxation of trusts, estates, and their beneficiaries. Whoever receives the accounting income of the entity, or some portion of it, is liable for the income tax that results.

Subchapter J produces a significant amount of income tax revenue. About 3 million Forms 1041 are filed every year, and these returns reflect the following approximate aggregate amounts.

- Gross income of over \$100 billion.
- Taxable income of \$50 billion.
- Tax liability of over \$13 billion.

EXAMPLE

2

Adam receives 80% of the accounting income of the Zero Trust. The trustee accumulated the other 20% of the income at her discretion under the trust agreement and added it to trust corpus. Adam is liable for income tax only on the amount of the distribution, while Zero is liable for the income tax on the accumulated portion of the income.

Concept Summary 28.1 summarizes the major similarities and differences between the taxation of trusts and estates and that of other pass-through entities—partnerships, limited liability entities, and S corporations.

Concept Summary 28.1

Tax Characteristics of Major Pass-Through Entities

| Tax Treatment | Subchapter K (Partnerships, LLCs) | Subchapter S (S Corporations) | Subchapter J (Trusts, Estates) |
|--|---|--|--|
| Taxing structure | Pure pass-through, only one level of Federal income tax. | Chiefly pass-through, usually one level of Federal income tax. | Modified pass-through, Federal income tax falls on the recipient(s) of entity accounting income. |
| Entity-level Federal income tax? | Never. | Rarely. See Chapter 22. | Yes, if the entity retains any net taxable income amounts. |
| Form for reporting income and expense pass-through | Schedules K and K-1, Form 1065. | Schedules K and K-1, Form 1120S. | Schedules K and K-1, Form 1041. |
| Subject to entity-level AMT? | No, but preferences and adjustments pass through to owners. | No, but preferences and adjustments pass through to owners. | Yes, if the entity retains any AMT-related accounting income amounts. |
| Controlling documents | Partnership agreement, LLC charter. | Corporate charter and bylaws. | Trust document or will, state fiduciary or probate law. |

28-2a Tax Accounting Periods and Methods

An estate or a trust may use many of the tax accounting methods available to individuals. The method of accounting used by the grantor of a trust or the decedent of an estate need not carry over to the entity.

An estate has the same options for choosing a tax year as any new taxpayer. Thus, the estate of a calendar year decedent dying on March 3 can select any fiscal year or report on a calendar year basis. To eliminate the possibility of deferring the taxation of

fiduciary-source income simply by using a fiscal tax year, virtually all trusts (other than tax-exempt trusts) are required to use a calendar tax year.⁴

28-2b Tax Rates and Personal Exemption

Congress's desire to stop trusts from being used as income-shifting devices has made the fiduciary entity the highest-taxed taxpayer in the Code. The entity reaches the 39.6 percent marginal rate with only \$12,300 of 2015 taxable income, so the grantor's ability to shift income in a tax-effective manner is nearly eliminated. Exhibit 28.3, which lists the 2015 taxes paid by various entities on taxable income of \$50,000, shows how expensive the taxes on an accumulation of income within an estate or a trust can be. Given the current tax rates for individuals, proper income shifting might move assets *out of* the estate or trust and into the hands of the grantor or beneficiary.

A fiduciary's dividend income and net long-term capital gain is taxed at a nominal rate of no more than 20 percent. In addition to the regular income tax, an estate or a trust may be subject to the alternative minimum tax and the additional tax on net investment income (discussed later in the chapter). Estimated tax payments must take into account any liabilities for these taxes.⁵

Both trusts and estates are allowed a personal exemption in computing the fiduciary tax liability. All estates are allowed a personal exemption of \$600. The exemption available to a trust depends upon the type of trust involved. A trust that is required to distribute all of its income currently is allowed an exemption of \$300. All other trusts are allowed an exemption of \$100 per year.⁶

The classification of trusts as to the appropriate personal exemption is similar but not identical to the distinction between simple and complex trusts. The classification as a simple trust is more stringent.

Three trusts appear to operate in a similar fashion, but they are subject to different Subchapter J classifications and exemptions.

Trust Alpha is required to distribute all of its current accounting income to Susan. Thus, it is allowed a \$300 personal exemption. No corpus distributions or charitable contributions are made during the year. Accordingly, Alpha is a simple trust.

Trust Beta is required to distribute all of its current accounting income; it is allowed a \$300 personal exemption. The beneficiaries of these distributions are specified in the trust instrument: one-half of accounting income is to be distributed to Tyrone, and one-half is to be distributed to State University, a qualifying charitable organization. Because Beta has made a charitable distribution for the tax year, it is a complex trust.

The trustee of Trust Gamma can, at her discretion, distribute the current-year accounting income or corpus of the trust to Dr. Chapman. As the trustee is not required to distribute current accounting income, only a \$100 personal exemption is allowed. During the current year, the trustee distributed all of the accounting income of the entity to Dr. Chapman, but made no corpus or charitable distributions. Nonetheless, because it lacks the current-year income distribution requirement, Gamma is a complex trust.

EXAMPLE

3

EXHIBIT 28.3

Comparative Tax Liabilities

| Filing Status/Entity | Taxable Income | Marginal Income Tax Rate (%) | 2015 Tax Liability |
|-------------------------|----------------|------------------------------|--------------------|
| Single | \$50,000 | 25 | \$ 8,294 |
| Married, filing jointly | 50,000 | 15 | 6,578 |
| C corporation | 50,000 | 15 | 7,500 |
| Trust or estate | 50,000 | 39.6 | 18,109 |

⁴§ 645.

⁵§§ 55, 1411.

⁶§ 642(b).

28-2c **Alternative Minimum Tax**

The alternative minimum tax (AMT) may apply to a trust or an estate in any tax year. Given the nature and magnitude of the tax preferences, adjustments, and exemptions that determine alternative minimum taxable income (AMTI), however, most trusts and estates are unlikely to incur the tax.

In general, derivation of AMTI for the entity follows the rules that apply to individual taxpayers. Thus, the corporate ACE adjustment does not apply to fiduciary entities, but AMTI may be created through the application of most of the other AMT preference and adjustment items discussed in Chapter 15.

The fiduciary's AMT is computed using Schedule I of Form 1041. Two full pages of the Form 1041 are dedicated to the computation of taxable income and other items when the AMT applies to the trust or estate. A minimum tax credit might be available in future years through these computations.

For 2015, the entity has a \$23,800 annual AMT exemption. The exemption phases out at a rate of one-fourth of the amount by which AMTI exceeds \$79,450.

A 26 percent AMT rate is applied to AMTI, increasing to 28 percent when AMTI in excess of the exemption reaches \$185,400.

28-2d **Additional Tax on Net Investment Income**

Trusts and estates that are subject to the highest Federal income tax rate for the tax year must pay an additional tax to support the Medicare system. Thus, a 3.8 percent additional tax applies to the entity's undistributed net investment income (NII) that exceeds \$12,150 for 2014 and \$12,300 for 2015. These amounts are indexed annually.

NII includes gross income (less deductions) from interest, dividends, royalties, rents, and passive activities. NII also includes net recognized gains from the disposition of assets producing such income (e.g., capital gains). NII items make up the majority of income items for many investment-oriented fiduciary entities. The NII tax is in addition to the entity's ordinary income tax (maximum rate 39.6 percent) and net capital gains tax (maximum rate 20 percent).

EXAMPLE

4

The Zeta Trust reports \$20,000 of net investment income and \$30,000 in net profits from an active business operation for 2015. Zeta retains all of the business profits but, under the terms of the trust agreement, distributes \$5,000 cash from the NII to its sole beneficiary Victoria. Zeta's liability under the additional tax on NII is \$103 [3.8% tax × (\$15,000 undistributed portfolio income – \$12,300 income amount at which the top tax rate applies)].

Tax-exempt trusts also are exempt from the additional tax on NII. Non-U.S. trusts and estates are not subject to the tax, but if they distribute NII to U.S. beneficiaries, the recipients are subject to the tax. The tax on NII is paid by the grantor of a grantor trust (described earlier in the chapter).

LO.2

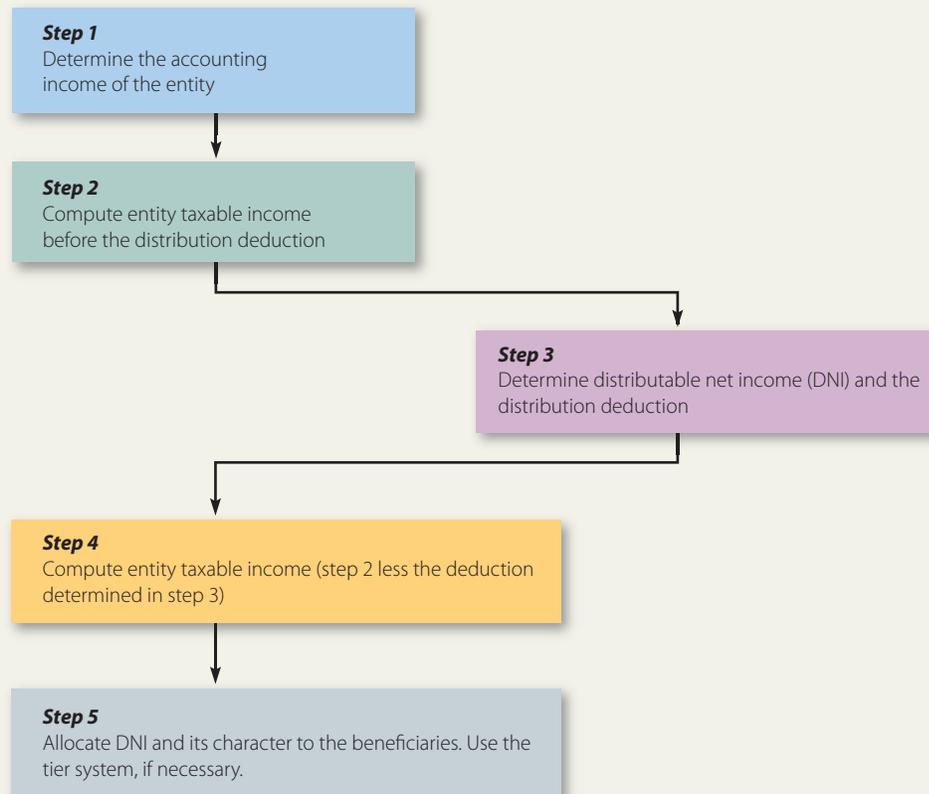

Identify the steps in determining the accounting and taxable income of a trust or an estate and the related taxable income of the beneficiaries.

28-3 **TAXABLE INCOME OF TRUSTS AND ESTATES**

Generally, the taxable income of an estate or a trust is computed similarly to that for an individual. Subchapter J does, however, include several important exceptions and provisions that make it necessary to use a systematic approach to calculating the taxable income of these entities. Exhibit 28.4 illustrates the procedure implied by the Code, and Exhibit 28.5 presents a systematic computation method followed in this chapter.

EXHIBIT 28.4

Accounting Income, Distributable Net Income, and Taxable Income of the Entity and Its Beneficiaries—The Five-Step Procedure

28-3a Entity Accounting Income

Step 1 in determining the taxable income of a trust or an estate is to compute the entity's accounting income for the period. Although this prerequisite is not apparent from a cursory reading of Subchapter J, a closer look at the Code reveals a number of references to the *income* of the entity.⁷ Wherever the term *income* is used in Subchapter J without some modifier (e.g., *gross income* or *taxable income*), the statute is referring to the accounting income of the trust or estate for the tax year.

A definition of **entity accounting income** is critical to understanding the Subchapter J computation of fiduciary taxable income. Under state law, entity accounting income is the amount the income beneficiary of the trust or estate is eligible to receive from the entity. More importantly, the calculation of accounting income is virtually under the control of the grantor or decedent (through a properly drafted trust agreement or will). If the document has been drafted at arm's length, a court will enforce a fiduciary's good faith efforts to carry out the specified computation of accounting income.

Entity accounting income generally is defined by state laws that are derived from the Uniform Principal and Income Act (latest major revision, 1997). Most states have adopted some form of the Uniform Act, which essentially constitutes generally accepted accounting principles (GAAP) in the fiduciary tax setting.

⁷For example, see §§ 651(a)(1), 652(a), and 661(a)(1).

| EXHIBIT 28.5 | | Computational Template Applying the Five-Step Procedure | | |
|--|--------|---|----------------|---|
| Item | Totals | Accounting Income | Taxable Income | Distributable Net Income/Distribution Deduction |
| Income | _____ | _____ | _____ | |
| Income | _____ | _____ | _____ | |
| Expense | _____ | _____ | _____ | |
| Expense | _____ | _____ | _____ | |
| Personal exemption | | | _____ | |
| Accounting income/taxable income before the distribution deduction | | _____ | _____ | _____ |
| | | Step 1 | Step 2 | |
| Exemption | | | | _____ |
| Corpus capital gain/loss | | | | _____ |
| Net exempt income | | | | _____ |
| Distributable net income | | | | _____ |
| Distribution deduction | | | _____ | Step 3 |
| Entity taxable income | | | _____ | Step 4 |

Beneficiary taxable income is addressed in **Step 5**.

When specific items of income and expenditure are allocated either to the income beneficiaries or to corpus, the desires of the grantor or decedent are put into effect. Exhibit 28.6 shows typical assignments of revenue and expenditure items to fiduciary income or corpus. Examples 5 through 7 illustrate that the amounts received by beneficiaries can vary widely, due to changes in these allocations under the terms of the trust agreement.

Where the controlling document is silent as to whether an item should be assigned to income or corpus, state fiduciary law prevails. These allocations are an important determinant of the benefits received from the entity by its beneficiaries and the timing of those benefits.

| EXHIBIT 28.6 | | Common Allocations of Items to Income or Corpus | |
|---|--|---|--|
| Allocable to Income | | Allocable to Corpus | |
| Ordinary and operating net income from trust assets | | Depreciation on business assets | |
| Interest, dividend, rent, and royalty income | | Casualty gain/loss on income-producing assets | |
| Stock dividends | | Insurance recoveries on income-producing assets | |
| One-half of fiduciary fees/commissions | | Capital gain/loss on investment assets | |
| | | Stock splits | |
| | | One-half of fiduciary fees/commissions | |

Entity Accounting Income

The Arnold Trust is a simple trust. Mrs. Bennett is its sole beneficiary. In the current year, the trust earns \$20,000 in taxable interest and \$15,000 in tax-exempt interest. In addition, the trust recognizes an \$8,000 long-term capital gain. The trustee assesses a fee of \$11,000 for the year. If the trust agreement allocates fees and capital gains to corpus, trust accounting income is \$35,000 and Mrs. Bennett receives that amount. Thus, the income beneficiary receives no immediate benefit from the trust's capital gain, and she bears none of the financial burden of the fiduciary's fees.

EXAMPLE

5

| | |
|-------------------------|-----------------|
| Interest income | \$35,000 |
| Long-term capital gain | ± 0—* |
| Fiduciary's fees | ± 0—* |
| Trust accounting income | <u>\$35,000</u> |

* Allocable to corpus.

Assume the same facts as in Example 5, except that the trust agreement allocates the fiduciary's fees to income. The trust accounting income is \$24,000, and Mrs. Bennett receives that amount.

EXAMPLE

6

| | |
|-------------------------|-----------------|
| Interest income | \$35,000 |
| Long-term capital gain | ± 0—* |
| Fiduciary's fees | −11,000 |
| Trust accounting income | <u>\$24,000</u> |

* Allocable to corpus.

Assume the same facts as in Example 5, except that the trust agreement allocates to income all capital gains and losses and one-half of the trustee's commissions. The trust accounting income is \$37,500, and Mrs. Bennett receives that amount.

EXAMPLE

7

| | |
|-------------------------|------------------|
| Interest income | \$ 35,000 |
| Long-term capital gain | +8,000 |
| Fiduciary's fees | −5,500* |
| Trust accounting income | <u>\$ 37,500</u> |

* One-half allocable to corpus.

28-3b Gross Income

The gross income of an estate or a trust is similar to that of an individual. In determining the gain or loss to be recognized by an estate or a trust upon the sale or other taxable disposition of assets, the rules for basis determination are similar to those applicable to other taxpayers. Thus, an estate's basis for property received from a decedent is stepped up or stepped down to the gross estate valuation (refer to Chapters 13 and 27 for a more detailed discussion). Property received as a gift during the donor's lifetime (e.g., in irrevocable trust arrangements) usually takes the donor's basis. Property purchased by the trust from a third party is assigned a basis equal to the purchase price.

Noncash Property Distributions

In general, the entity does not recognize gain or loss upon its distribution of property to a beneficiary under the provisions of the will or trust document. The distributed property has the same basis to the beneficiary of the distribution as it did to the estate or trust. Moreover, the distribution absorbs distributable net income (DNI) and qualifies for a distribution deduction (both of which are explained later in this chapter) to the extent

of the lesser of the distributed asset's basis to the beneficiary or the asset's fair market value as of the distribution date.⁸

The Big Picture

EXAMPLE

8

Return to the facts of *The Big Picture* on p. 28-1. Assume that Anna has established the Jiang Family Trust. The trust distributes a painting (basis of \$40,000 and fair market value of \$90,000) to beneficiary Sally. Sally's basis in the painting is \$40,000. The distribution absorbs \$40,000 of the Jiang Trust's DNI, and the trust claims a \$40,000 distribution deduction relative to the transaction.

A trustee or an executor can elect to recognize gain or loss with respect to all of its in-kind property distributions for the year. If the election is made, the beneficiary's basis in the asset is equal to the asset's fair market value as of the distribution date. The distribution absorbs DNI and qualifies for a distribution deduction to the extent of the asset's fair market value. However, the related-party rules can restrict an estate's or trust's deduction for such losses. Generally, related parties include a trust, its trustee, its grantor, and its beneficiaries, as well as an estate, its executor, and its beneficiaries.

Distributing Appreciated Property

EXAMPLE

9

The Green Estate distributes an antique piano, basis to Green of \$10,000 and fair market value of \$15,000, to beneficiary Kyle. The executor elects that Green recognize the related \$5,000 gain on the distribution. Accordingly, Kyle's basis in the piano is \$15,000 (\$10,000 basis to Green + \$5,000 gain recognized). The election likely increased the Federal income tax paid related to the gain, as Green almost certainly is subject to a higher marginal income tax rate than is Kyle. Without the election, Green would not recognize any gain, and Kyle's basis in the piano would be \$10,000.

EXAMPLE

10

Assume the same facts as in Example 9, except that Green's basis in the piano is \$18,000. The executor elects that Green be assigned the related \$3,000 loss on the distribution. Accordingly, Kyle's basis in the piano is \$15,000 (\$18,000 – \$3,000). Without the election, Kyle's basis in the piano would be \$18,000.

The estate cannot deduct this loss, however. Because an estate and its beneficiaries are related parties, realized losses cannot be recognized immediately.⁹ The loss can be recognized if Kyle later sells the piano to an unrelated party.

Income in Respect of a Decedent

The gross income of a trust or an estate includes **income in respect of a decedent (IRD)** that the entity received.¹⁰ For a cash basis decedent, IRD includes accrued salary, interest, rent, and other income items that were not constructively received before death. For both cash and accrual basis decedents, IRD includes, for instance, death benefits from qualified retirement plans and deferred compensation contracts.

The tax consequences of IRD can be summarized as follows.

- The fair market value of the right to IRD on the appropriate valuation date is included in the decedent's gross estate. Thus, it is subject to the Federal estate tax.¹¹
- The decedent's basis in the property carries over to the recipient (the estate or heirs). There is no step-up or step-down in the basis of IRD items.

⁸§ 643(e).

⁹§ 267(b)(13).

¹⁰See § 691 and the Regulations thereunder. The concept of IRD was introduced in Chapter 27.

¹¹To mitigate the effect of double taxation (imposition of both the estate tax and the income tax), § 691(c) allows the recipient an income tax deduction for the incremental estate tax attributable to the net IRD. For individual recipients, this is an itemized deduction, not subject to the 2%-of-AGI floor.

TAX IN THE NEWS A Trend Toward Dynasty Trusts

In a continuing attempt to discourage tax-motivated income shifting among family members, steep income tax rates on estates and trusts are also being seen at the state level. Although a few states (e.g., Alaska, Nevada, Texas, and Washington) do not impose any income tax on fiduciary entities, those that do are tending to increase their rates as part of their efforts to solve budget deficit woes.

Other states, however, have relaxed some of the rules that affect trusts. In such cases, the objectives are to attract dollars to the state and to expand opportunities for attorneys, tax advisers, and other professionals who create and administer the entities.

If a trust can survive for a long period of time, without making distributions or terminations that cause the generation-skipping tax, trust corpus can grow in a steady and tax-free manner. Wealthy individuals use these “dynasty trusts” as a form of inheritance, and many states also allow the trust assets to be protected from claims of the grantor’s creditors.

Dynasty trusts operate like growth stocks. They minimize income distributions by investing profits and new capital in the family businesses, artwork, and multiple homes for the beneficiaries.

- The recipient of the income recognizes gain or loss, measured by the difference between the amount realized and the adjusted basis of the IRD in the hands of the decedent. The character of the gain or loss depends on the treatment that it would have received had it been realized by the decedent before death. Thus, if the decedent would have realized capital gain, the recipient must do likewise.
- Expenses related to the IRD (such as interest, taxes, and depletion) that were not reported properly on the final income tax return of the decedent may be claimed by the recipient. These items are known as **deductions in respect of a decedent**. Typically, such deductions also include fiduciary fees, commissions paid to dispose of estate assets, and state income taxes payable. They are deductible for both Federal estate and income tax purposes, *for or from* adjusted gross income (AGI) as would have been the case for the decedent.

Working With IRD

Amanda died on July 13 of the current year. On August 2, the estate received a check (before deductions) for \$1,200 from Amanda’s former employer; this was Amanda’s compensation for the last pay period of her life. On November 23, the estate received a \$45,000 distribution from the qualified profit sharing plan of Amanda’s employer, the full amount to which Amanda was entitled under the plan. Both Amanda and the estate are calendar year, cash basis taxpayers.

The last salary payment and the profit sharing plan distribution constitute IRD to the estate. Amanda had earned these items during her lifetime, and the estate had an enforceable right to receive each of them after Amanda’s death. Consequently, the gross estate includes \$46,200 with respect to these two items. However, the income tax basis to the estate for these items is not stepped up (from zero to \$1,200 and \$45,000, respectively) upon distribution to the estate.

The estate must report gross income of \$46,200 for the current tax year with respect to the IRD items. The income recognized upon the receipt of the IRD is \$46,200 [$\$1,200 + \$45,000$ (amounts realized) – \$0 (adjusted bases)].

EXAMPLE

11

Assume the same facts as in Example 11. Amanda’s last paycheck was reduced by \$165 for state income taxes that were withheld by the employer. The \$165 tax payment is a deduction in respect of a decedent and is allowed as a deduction on *both* Amanda’s estate tax return *and* the estate’s income tax return.

EXAMPLE

12

TAX IN THE NEWS Coordinate Your Deductions

The deduction under § 691(c) may be one of the more obscure provisions of the tax law, but its benefits can add up fast. The deduction is allowed on the tax return of the recipient of income in respect of a decedent (IRD). IRD often is received by the estate of the decedent or a trust that he or she created under the will or during lifetime. The deduction is for the Federal estate tax attributable to the IRD item. For an individual, it is a miscellaneous itemized deduction *not* subject to the 2 percent-of-AGI floor.

Because IRD often includes the value of the survivorship feature on pensions and other retirement plans and assets, the amount subject to the estate tax can be substantial. Thus, when the current-year income tax for the IRD recipient is computed, the § 691(c) deduction can be extremely valuable in offsetting the IRD received.

For instance, suppose a decedent's IRA balance generates \$450,000 in attributable estate tax. If the recipient of the IRA takes the net-of-tax distribution in one year, the § 691(c) deduction shelters \$450,000 in gross income and may be worth over \$150,000 in Federal income taxes saved.

But taking the § 691(c) deduction is more complex than it looks. Because different tax advisers often prepare the Form 706 for the estate and the Form 1040 or 1041 for the IRD recipient, the § 691(c) deduction can get lost altogether or at least be miscalculated. When the IRD is paid out over several years, computing the § 691(c) deduction can become complex. And tax software and IRS forms and publications say relatively little about it.

Including the IRD in both the taxpayer's gross estate and the gross income of the estate may seem harsh. Nevertheless, the tax consequences of IRD are similar to the treatment that applies to all of a taxpayer's earned income. The item is subject to income tax upon receipt, and to the extent it is not consumed by the taxpayer before death, it is included in the gross estate.

28-3c Ordinary Deductions

As a general rule, the taxable income of an estate or a trust is similar to that of an individual.¹² Deductions are allowed for ordinary and necessary expenses paid or incurred in carrying on a trade or business; for the production or collection of income; for the management, conservation, or maintenance of property; and in connection with the determination, collection, or refund of any tax.¹³ Reasonable administration expenses, including fiduciary fees and litigation costs in connection with the duties of administration, also can be deductible.

Expenses attributable to the production or collection of tax-exempt income are not deductible.¹⁴ The amount of the disallowed deduction is found by using a formula based on the composition of the income elements of entity accounting income for the year of the deduction. The deductibility of the fees is determined strictly by the Code (under §§ 212 and 265), and the allocation of expenditures to income and to corpus is controlled by the trust agreement or will or by state law.

EXAMPLE

13

The Silver Trust operates a business and invests idle cash in marketable securities. Its sales proceeds for the current year are \$180,000. Expenses for wages, cost of sales, and office administration are \$80,000. Interest income recognized is \$20,000 from taxable bonds and \$50,000 from tax-exempt bonds. The trustee claims a \$35,000 fee for its activities. According to the trust agreement, \$30,000 of this amount is allocated to the income beneficiaries, and \$5,000 is allocated to corpus.

| | |
|--------------------------------------|------------------|
| Sales income | \$180,000 |
| Cost of sales | −80,000 |
| Interest income (\$50,000 is exempt) | +70,000 |
| Fiduciary's fees, as allocated | −30,000 |
| Trust accounting income | <u>\$140,000</u> |

continued

¹²§ 641(b).

¹³§§ 162 and 212.

¹⁴§ 265.

The sales proceeds are included in the gross income of the trust under § 61. The costs associated with the business are deductible in full under § 162. The taxable income is included in Silver's gross income under § 61, but the tax-exempt income is excluded under § 103. The fiduciary's fees are deductible by Silver under § 212, but a portion of the deduction is lost because § 265 prohibits deductions for expenses incurred in the generation of tax-exempt income.

Specifically, 50/250 of the fees of \$35,000 can be traced to tax-exempt income, so \$7,000 of the fees is nondeductible. For purposes of the computation, only the income elements of the year's trust accounting income are included in the denominator. Moreover, the allocation of portions of the fees to income and to corpus is irrelevant in the calculation. The disallowed deduction for fiduciary's fees is computed in the following manner.

$$\begin{aligned} \$35,000^* \text{ (total fees paid)} \times \frac{\$50,000^{**} \text{ (exempt income elements of trust accounting income)}}{\$250,000^{**} \text{ (all income elements of trust accounting income)}} \\ = \$7,000 \text{ (amount disallowed)} \end{aligned}$$

*All fees, and not just those that are allocated to income, are deductible by the trust under § 212.

The numerator and denominator of this fraction are **not reduced by expense items allocable to income (e.g., cost of sales).

Amounts deductible as administration expenses or losses for estate tax purposes (under §§ 2053 and 2054) cannot be claimed by the estate for income tax purposes, unless the estate waives the estate tax deduction. Although these expenses cannot be deducted twice, they may be allocated as the fiduciary sees fit between Forms 706 and 1041; they need not be claimed in their entirety on either return.¹⁵ As discussed earlier, the prohibition against double deductions does not extend to *deductions in respect of a decedent*.

Trusts and estates are allowed cost recovery deductions. Such deductions are assigned proportionately among the recipients of the entity accounting income.¹⁶

Cost Recovery Deductions

Lisa and Martin are the equal income beneficiaries of the Needle Trust. Under the terms of the trust agreement, the trustee has complete discretion as to the timing of the distributions from Needle's current accounting income. The trust agreement allocates all depreciation expense to income. In the current year, the trustee distributes 40% of the current trust accounting income to Lisa and 40% to Martin; thus, 20% of the income is accumulated. The depreciation deduction allowable to Needle is \$100,000. This deduction is allocated among the trust and its beneficiaries on the basis of the distribution of current accounting income: Lisa and Martin each claim a \$40,000 deduction, and the trust can deduct \$20,000.

EXAMPLE

14

Assume the same facts as in Example 14, except that the trust agreement allocates all depreciation expense to corpus. There is no change in the tax result; Lisa and Martin both still claim a \$40,000 depreciation deduction, and Needle retains its \$20,000 deduction. The Code assigns the depreciation deduction proportionately to the recipients of entity accounting income. Allocation of depreciation to income or to corpus is irrelevant in determining which party can properly claim the deduction.

EXAMPLE

15

When a trust sells property received by transfer from the grantor, the amount of depreciation subject to recapture includes the depreciation claimed by the grantor before the transfer of the property to the trust. However, depreciation recapture potential disappears at death.

¹⁵Reg. § 1.642(g)-2.

¹⁶§§ 167(h) and 611(b)(3) and (4).

EXAMPLE

16

Jaime transferred an asset to the Shoulder Trust via a lifetime gift. The asset's total depreciation recapture potential was \$40,000. If Shoulder sells the asset at a gain, ordinary income not to exceed \$40,000 is recognized by the trust. Had Jaime transferred the asset after his death to his estate through a bequest, the \$40,000 recapture potential would have disappeared.

If a trust or an estate operates a trade or business, the entity may be eligible for the domestic production activities deduction (DPAD).¹⁷ Computation of qualified production activities income (QPAI) is made at the entity level. Each beneficiary receives, as a pass-through from the entity, his or her share of QPAI and the W-2 wages paid, based on the proportion of entity accounting income received. The DPAD then can be claimed at the beneficiary level. See Chapter 7 for further discussion of the DPAD.

28-3d Deductions for Losses

An estate or a trust is allowed a deduction for casualty or theft losses that are not reimbursed by insurance or other arrangements. Such losses may also be deductible by an estate for Federal tax purposes under § 2054. An estate is not allowed an income tax deduction unless the estate tax deduction is waived.

The net operating loss (NOL) deduction is available for estates and trusts (i.e., where trade or business income is generated). The net capital losses of an estate or a trust can be claimed by the fiduciary. The tax treatment of these losses is the same as for individual taxpayers.

Fiduciary entities are subject to the passive activity limitations; passive losses can be deducted by the trust or estate only against income from passive sources. The required material participation must be provided by the trustee or executor; the actions of employees or third-party agents¹⁸ cannot be used to meet these tests.

28-3e Charitable Contributions

An estate or a complex trust is allowed a deduction for contributions to charitable organizations under certain conditions.¹⁹

- The contribution is made pursuant to the will or trust instrument, and its amount is determinable using the language of that document.
- The recipient is a qualified organization. For this purpose, qualified organizations include the same charities for which individual and corporate donors are allowed deductions, except that estates and trusts are permitted a deduction for contributions to certain foreign charitable organizations.
- Generally, the contribution is claimed in the tax year it is paid, but a fiduciary can treat amounts paid in the year immediately following as a deduction for the preceding year. Under this rule, estates and complex trusts receive more favorable treatment than do individuals or C corporations.

Unlike the charitable contribution deductions of individuals and corporations, the deductions of estates and complex trusts are not limited in amount (e.g., to a percentage of taxable or adjusted gross income). Nonetheless, the deduction is limited to amounts that have been included in the gross income of the entity.

A contribution is deemed to have been made proportionately from each of the income elements of entity accounting income. However, if the will or trust agreement requires that the contribution be made from a specific type of income or from the current income from a specified asset, the allocation of the contribution to taxable and tax-exempt income will not be required.

¹⁷§ 199(d)(1).

¹⁸§469; TAM 201317010 (4/13).

¹⁹§ 642(c)(1) and Reg. §§ 1.642(c)-1 and -3.

The Big Picture

Return to the facts of *The Big Picture* on p. 28-1. Again assume that Anna has established the Jiang Family Trust. The trust reports gross rent income of \$80,000, expenses attributable to the rents of \$60,000, and tax-exempt interest from state bonds of \$20,000. Under the trust agreement, the trustee is to pay 30% of the annual trust accounting income to the United Way, a qualifying organization. Accordingly, the trustee pays \$12,000 to the charity (i.e., $30\% \times \$40,000$). The charitable contribution deduction allowed is \$9,600 [$(\$80,000/\$100,000) \times \$12,000$], even if the payment to the charity is not made until the following tax year.

EXAMPLE

17

The Big Picture

Assume the same facts as in Example 17, except that the trust instrument also requires that the contribution be paid from the net rent income. The agreement controls, and the allocation formula need not be applied. The entire \$12,000 is allowed as a charitable deduction.

EXAMPLE

18

28-3f Deduction for Distributions to Beneficiaries

The modified pass-through approach of Subchapter J is embodied in the deduction allowed to trusts and estates for the distributions made to beneficiaries during the year. Some portion of any distribution that a beneficiary receives from a trust may be subject to income tax on the beneficiary's own return. At the same time, the distributing entity is allowed a deduction for some or all of the distribution.

Consequently, the modified pass-through principle of Subchapter J is implemented. A good analogy is to the taxability of corporate profits distributed to employees as taxable wages. The corporation is allowed a deduction for the payment, but the employee receives gross income in the form of compensation.

Distributable Net Income

A critical value that is used in computing the amount of the entity's distribution deduction is **distributable net income (DNI)**. As it is defined in Subchapter J, DNI serves several functions. Concept Summary 28.2 illustrates these critical roles of DNI.

- DNI is the maximum amount of the distribution on which the beneficiaries can be taxed.²⁰
- DNI is the maximum amount the entity can use as a distribution deduction for the year.²¹
- The makeup of DNI carries over to the beneficiaries (the items of income and expenses retain their DNI character in the hands of the distributees).²²

Subchapter J defines DNI in a circular manner, however. The DNI value is necessary to determine the entity's distribution deduction and therefore its taxable income for the year. Nonetheless, the Code defines DNI as a modification of the entity's taxable income itself. Using the systematic approach to determining the taxable income of the entity and its beneficiaries, as shown earlier in Exhibit 28.4, compute *taxable income before the distribution deduction*, modify that amount to determine DNI and the distribution deduction, return to the calculation of *taxable income*, and apply the deduction that has resulted.

Taxable income before the distribution deduction (Step 2) includes all of the entity's items of gross income, deductions, gains, losses, and exemptions for the year. Therefore, to compute this amount, (1) determine the appropriate personal exemption for the year and (2) account for all of the other gross income and deductions of the entity.

²⁰§§ 652(a) and 662(a).

²¹§§ 651(b) and 661(c).

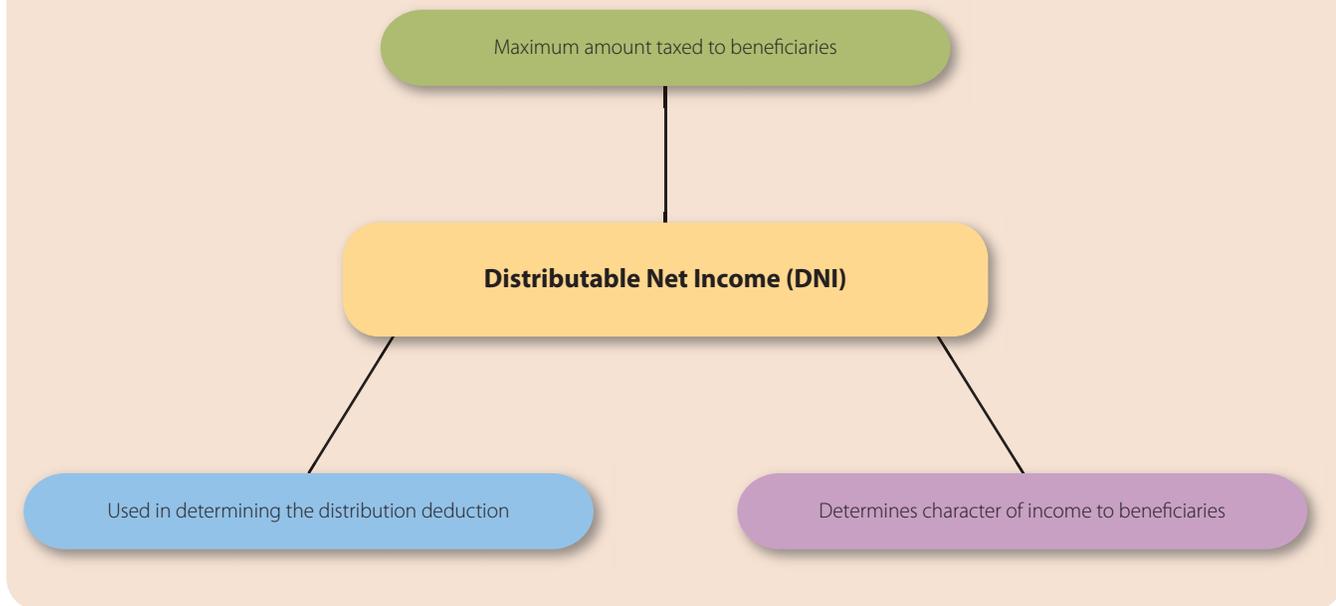

²²§§ 652(b) and 662(b).

LO.3

Illustrate the uses and implications of distributable net income.

Concept Summary 28.2

Uses of the DNI Amount

Step 3 in Exhibit 28.4 is the determination of *distributable net income*, computed by making the following adjustments to the entity's *taxable income before the distribution deduction*.²³

- Add back the personal exemption.
- Add back *net* tax-exempt interest; reduce the total tax-exempt interest by charitable contributions and by related expenses not deductible under § 265.
- Add back the entity's net capital losses.
- Subtract any net capital gains allocable to corpus. The only net capital gains included in DNI are those attributable to income beneficiaries or to charitable contributions.

Because taxable income before the distribution deduction is computed by deducting all of the expenses of the entity (whether they were allocated to income or to corpus), DNI is reduced by expenses that are allocated to corpus. The effect is to reduce the taxable income of the income beneficiaries. The actual distributions to the beneficiaries exceed DNI because the distributions are not reduced by expenses allocated to corpus. Aside from this shortcoming of Subchapter J, DNI offers a good approximation of the current-year economic income available for distribution to the entity's income beneficiaries.

Distribution Deduction

DNI includes the net tax-exempt interest income of the entity, so that amount must be removed from DNI in computing the distribution deduction. Moreover, for estates and complex trusts, DNI and the distribution amount may not be the same; the amount actually distributed during the year may include discretionary distributions of income and distributions of corpus permissible under the will or trust instrument.

The distribution deduction for estates and complex trusts is computed as the lesser of (1) the deductible portion of DNI or (2) the taxable amount actually distributed to the beneficiaries during the year. For a simple trust, however, full distribution is always assumed, relative to both the entity and its beneficiaries, in a manner similar to the pass-through entities.

²³These and other (less common) adjustments are detailed in § 643.

DNI and Distribution Deduction

The Zinc Trust is a simple trust. Because of severe liquidity problems, its year 1 accounting income is not distributed to its sole beneficiary, Mark, until early in year 2. Zinc still is allowed a full distribution deduction for, and Mark still is taxable upon, the entity's year 1 income in year 1.

EXAMPLE

19

The Pork Trust is required to distribute its current accounting income annually to its sole income beneficiary, Barbara. Capital gains and losses and all other expenses are allocable to corpus. In the current year, Pork incurs the following items.

| | |
|-----------------------------|----------|
| Dividend income | \$25,000 |
| Taxable interest income | 15,000 |
| Tax-exempt interest income | 20,000 |
| Net long-term capital gains | 10,000 |
| Fiduciary's fees | 6,000 |

EXAMPLE

20

| Item | Totals | Accounting Income | Taxable Income | Distributable Net Income/ Distribution Deduction |
|--|----------|-------------------|----------------|---|
| Dividend income | \$25,000 | \$25,000 | \$ 25,000 | |
| Taxable interest income | 15,000 | 15,000 | 15,000 | |
| Exempt interest income | 20,000 | 20,000 | | |
| Net long-term capital gain | 10,000 | | 10,000 | |
| Fiduciary fees | 6,000 | | (4,000) | |
| Personal exemption | | | (300) | |
| Accounting income/taxable income before the distribution deduction | | <u>\$60,000</u> | \$ 45,700 | \$ 45,700 |
| | | Step 1 | Step 2 | |
| Exemption | | | | 300 |
| Corpus capital gain/loss | | | | (10,000) |
| Net exempt income | | | | <u>18,000</u> |
| Distributable net income | | | | <u>\$ 54,000</u> |
| Distribution deduction | | | Step 3 | (36,000) |
| Entity taxable income | | | Step 4 | <u>\$ 9,700</u> |

- Step 1.* Trust accounting income is \$60,000; this includes the tax-exempt interest income, but not the fees or the capital gains, pursuant to the trust document. Barbara receives \$60,000 from the trust for the current year.
- Step 2.* Taxable income before the distribution deduction is computed as directed by the Code. The tax-exempt interest is excluded under § 103. Only a portion of the fees is deductible $\{[(\$60,000 - \$20,000)/\$60,000] \times \$6,000 = \$4,000\}$ because some of the fees $(\$6,000 - \$4,000)$ are traceable to the tax-exempt income. The trust claims a \$300 personal exemption, as it is required to distribute its annual trust accounting income.
- Step 3.* DNI and the distribution deduction reflect the required adjustments. The distribution deduction is the lesser of the distributed amount (\$60,000) or the deductible portion of DNI $[\$54,000 - (\$20,000 - \$2,000 = \$18,000 \text{ net exempt income})]$.
- Step 4.* Finally, return to the computation of the taxable income of the Pork Trust. A simple test should be applied at this point to ensure that the proper figure for the trust's taxable income has been determined. On what is Pork to be taxed? Pork has distributed to Barbara \$60,000, which is all of its gross income except the \$10,000 net long-term capital gains. The \$300 personal exemption reduces Pork's taxable income to \$9,700.

DNI and Distribution Deduction

EXAMPLE

21

The Quick Trust is required to distribute all of its current accounting income equally to its two beneficiaries, Faith and the Universal Church, a qualifying charitable organization. Capital gains and losses and depreciation expenses are allocable to income. Fiduciary fees are allocable to corpus. In the current year, Quick incurs various items as indicated.

| Item | Totals | Accounting Income | Taxable Income | Distributable Net Income/ Distribution Deduction |
|--|-----------|----------------------|------------------------|---|
| Rent income | \$100,000 | \$100,000 | \$100,000 | |
| Expenses—rent income | 30,000 | (30,000) | (30,000) | |
| Depreciation—rent income | 15,000 | (15,000) | | |
| Net long-term capital gain | 20,000 | 20,000 | 20,000 | |
| Charitable contribution | | | (37,500) | |
| Fiduciary fees | 18,000 | | (18,000) | |
| Personal exemption | | | (300) | |
| Accounting income/taxable income before the distribution deduction | | <u>\$ 75,000</u> | \$ 34,200 | \$34,200 |
| | | Step 1 | Step 2 | |
| Exemption | | | | 300 |
| Corpus capital gain/loss | | | | |
| Net exempt income | | | | |
| Distributable net income | | | | <u>\$34,500</u> |
| Distribution deduction | | | Step 3 (34,500) | |
| Entity taxable income | | | Step 4 (\$ 300) | |

- Step 1.** Trust accounting income of \$75,000 reflects the indicated allocations of items to income and to corpus. Each income beneficiary receives \$37,500.
- Step 2.** In the absence of tax-exempt income, a deduction is allowed for the full amount of the fiduciary's fees. Quick is a complex trust, but because it is required to distribute its full accounting income annually, a \$300 exemption is allowed. The trust properly does not deduct any depreciation for the rental property. The depreciation deduction is available only to the recipients of the entity's accounting income for the period. Thus, the deduction is split equally between Faith and the church. The deduction probably is of no direct value to the church, a tax-exempt organization. The trust's charitable contribution deduction is based on the \$37,500 the charity actually received (one-half of trust accounting income).
- Step 3.** As there is no tax-exempt income, the only adjustment needed to compute DNI is to add back the trust's personal exemption. Subchapter J requires no adjustment for the charitable contribution. DNI is computed only from the perspective of Faith, who also received \$37,500 from the trust.
- Step 4.** Perform the simple test (referred to previously) to ensure that the proper taxable income for the Quick Trust has been computed. All of the trust's gross income has been distributed to Faith and the charity. As is the case with most trusts that distribute all of their accounting income, the Quick Trust "wastes" the personal exemption.

28-3g Tax Credits

An estate or a trust may claim the foreign tax credit to the extent that it is not passed through to the beneficiaries.²⁴ Similarly, other credits are apportioned between the estate or trust and the beneficiaries on the basis of the entity accounting income allocable to each.

²⁴ §§ 642(a)(1) and 901.

Concept Summary 28.3 outlines the procedures used to determine the Federal taxable income of an estate or trust.

Concept Summary 28.3

Principles of Fiduciary Taxation

1. Estates and trusts are temporary entities created to locate, maintain, and distribute assets, and to satisfy liabilities according to the wishes of the decedent or grantor as expressed in the will or trust document.
2. Generally, the estate or trust acts as a conduit of the taxable income that it receives. To the extent the income is distributed by the entity, it is taxed to the beneficiary. Taxable income retained by the entity is taxed to the entity itself.
3. The entity's accounting income first must be determined. Accounting conventions that are stated in the controlling document or, lacking such provisions, in state law allocate specific items of receipt and expenditure either to income or to corpus. Income beneficiaries typically receive payments from the entity that are equal to the accounting income.
4. The taxable income of the entity is computed using the scheme in Exhibit 28.4. The entity usually recognizes income in respect of a decedent.
5. Deductions for fiduciary's fees and for charitable contributions may be reduced if the entity received any tax-exempt income during the year. Cost recovery deductions are assigned proportionately to the recipients of accounting income.
6. Upon election, realized gain or loss on assets that are properly distributed in kind can be recognized by the entity.

28-4 TAXATION OF BENEFICIARIES

The beneficiaries of an estate or a trust receive taxable income from the entity under the modified pass-through principle of Subchapter J. Distributable net income determines the maximum amount that can be taxed to the beneficiaries for any tax year. The constitution of DNI also carries over to the beneficiaries (e.g., net long-term capital gains and dividends retain their character when they are distributed from the entity to the beneficiary).

A beneficiary includes in gross income an amount based upon the DNI of the trust for any taxable year or years of the entity ending with or within his or her taxable year.²⁵

28-4a Distributions by Simple Trusts

The amount taxable to the beneficiaries of a trust is limited by the trust's DNI. However, because DNI includes net tax-exempt income, the amount included in the gross income of the beneficiaries could be less than DNI. When there is more than one income beneficiary, the elements of DNI are apportioned ratably according to the amount required to be distributed currently to each.

A simple trust has ordinary income of \$40,000, a long-term capital gain of \$15,000 (allocable to corpus), and a trustee commission expense of \$4,000 (payable from corpus). The two income beneficiaries, Allie and Bart, are entitled to the trust's annual accounting income, based on shares of 75% and 25%, respectively.

Although Allie receives \$30,000 as her share ($75\% \times$ trust accounting income of \$40,000), she is allocated DNI of only \$27,000 ($75\% \times$ \$36,000). Likewise, Bart is entitled to receive \$10,000 ($25\% \times$ \$40,000), but he is allocated DNI of only \$9,000 ($25\% \times$ \$36,000). The \$15,000 capital gain is taxed to the trust.

EXAMPLE

22

²⁵ §§ 652(c) and 662(c).

28-4b Distributions by Estates and Complex Trusts

Typically, an estate or a complex trust makes only discretionary distributions. In those cases, the DNI is apportioned ratably according to the distributed amounts.

A computational problem arises with estates and complex trusts when more than one beneficiary receives a distribution from the entity and the controlling document does not require a distribution of the entire accounting income of the entity.

EXAMPLE

23

The trustee of the Wilson Trust has the discretion to distribute the income or corpus of the trust in any proportion between the two beneficiaries of the trust, Wong and Washington. Under the trust instrument, Wong must receive \$15,000 from the trust every year. In the current year, the trust's accounting income is \$50,000, and its DNI is \$40,000. The trustee pays \$15,000 to Wong and \$25,000 to Washington.

How is Wilson's DNI to be divided between Wong and Washington? Several arbitrary methods of allocating DNI between the beneficiaries could be devised. Subchapter J resolves the problem by creating a two-tier system to govern the taxation of beneficiaries in such situations.²⁶ The tier system determines which distributions will be included in the gross income of the beneficiaries in full, which will be included in part, and which will not be included at all.

First and Second Tiers

Income that is required to be distributed currently, whether or not it is distributed, is categorized as a *first-tier distribution*. All other discretionary amounts paid, credited, or distributed are *second-tier distributions*.²⁷ A formula is used to allocate DNI among the appropriate beneficiaries when only first-tier distributions are made and those amounts exceed DNI.

When both first-tier and second-tier distributions are made and the first-tier distributions exceed DNI, the above formula is applied to the first-tier distributions. In this case, none of the second-tier distributions are taxed, because all of the DNI has been allocated to the first-tier beneficiaries.

If both first-tier and second-tier distributions are made and the first-tier distributions do not exceed DNI, but the total of both first-tier and second-tier distributions does exceed DNI, the second-tier beneficiaries recognize income as shown below.

²⁶ §§ 662(a)(1) and (2).

²⁷ Reg. §§ 1.662(a)-2 and -3.

Distributing DNI

The trustee of the Gray Trust is required annually to distribute \$10,000 each to Harriet and Wally, the two beneficiaries of the entity. In addition, the trustee can distribute other amounts of trust income or corpus at his sole discretion. In the current year, the trust reports accounting income of \$60,000 and DNI of \$50,000. However, the trustee distributes only the required \$10,000 each to Harriet and to Wally. The balance of the income is accumulated and added to trust corpus.

In this case, only first-tier distributions have been made, but the total amount of the distributions does not exceed DNI for the year. Although DNI is the maximum amount included by the beneficiaries for the year, they can include no more in gross income than is distributed by the entity. Thus, both Harriet and Wally may be subject to tax on \$10,000 as their proportionate shares of DNI.

EXAMPLE

24

Assume the same facts as in Example 24, except that DNI is \$12,000. Harriet and Wally each receive \$10,000, but they cannot be taxed in total on more than DNI. Each is taxed on \$6,000 [DNI \$12,000 \times (\$10,000/\$20,000 of the first-tier distributions)].

EXAMPLE

25

Return to the facts in Example 23. Wong receives a first-tier distribution of \$15,000. Second-tier distributions include \$20,000 to Wong and \$25,000 to Washington. Wilson's DNI is \$40,000. The DNI is allocated between Wong and Washington as follows.

(1) First-tier distributions

| | |
|--------------------------|--------------|
| To Wong | \$15,000 DNI |
| To Washington | —0— |
| Remaining DNI = \$25,000 | |

(2) Second-tier distributions

| | |
|---------------|--|
| To Wong | \$11,111 DNI [(20/45) \times \$25,000] |
| To Washington | \$13,889 DNI [(25/45) \times \$25,000] |

EXAMPLE

26

Assume the same facts as in Example 26, except that accounting income is \$80,000 and DNI is \$70,000. DNI is allocated between Wong and Washington as follows.

(1) First-tier distributions

| | |
|--------------------------|--------------|
| To Wong | \$15,000 DNI |
| To Washington | —0— |
| Remaining DNI = \$55,000 | |

(2) Second-tier distributions

| | |
|---------------|--------------|
| To Wong | \$20,000 DNI |
| To Washington | \$25,000 DNI |

EXAMPLE

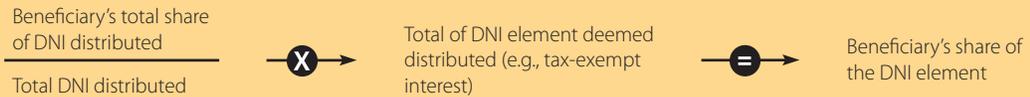

27

28-4c Character of Income

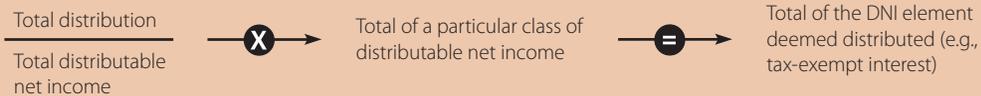

Consistent with the modified pass-through principle of Subchapter J, various classes of income (e.g., dividends, passive or portfolio gain and loss, AMT preferences, tax-exempt interest) retain the same character for the beneficiaries that they had when they were received by the entity. If there are multiple beneficiaries *and* if all of the DNI is distributed, a problem arises in allocating the various classes of income among the beneficiaries.

Distributions are treated as consisting of the same proportion as the items that enter into the computation of DNI. This allocation does not apply, however, if local law or the governing instrument specifically allocates different classes of income to different beneficiaries.²⁸

²⁸Reg. § 1.662(b)-1 seems to allow special allocations, but see *Harkness v. U.S.*, 72-2 USTC ¶9740, 30 AFTR 2d 72-5754, 469 F.2d 310 (Ct.Cls., 1972).

If the entity distributes only a part of its DNI, the amount of a specific class of DNI that is deemed distributed first must be determined.

DNI Flow-Throughs

EXAMPLE

28

The Baron Trust has DNI of \$40,000, including the following: \$10,000 of taxable interest, \$10,000 of tax-exempt interest, and \$20,000 of passive activity income. The trustee distributes, at her discretion, \$8,000 to Mike and \$12,000 to Nancy.

| Beneficiary | Amount Received | Income Type | | |
|-------------|-----------------|------------------|-----------------|----------------|
| | | Taxable Interest | Exempt Interest | Passive Income |
| Mike | \$ 8,000 | \$2,000* | \$2,000 | \$4,000 |
| Nancy | 12,000 | 3,000 | 3,000 | 6,000 |

*\$8,000 distribution/\$40,000 total DNI \times \$10,000 taxable interest in DNI.

EXAMPLE

29

Continue with the facts of Example 28. The character of the income that flows through to Mike and Nancy is effective for all other tax purposes. For instance, the \$4,000 passive activity income that is allocated to Mike is available for offset against passive losses that he incurred from limited partnerships and rental activities for the year. Similarly, the \$3,000 taxable interest income allocated to Nancy can be used to increase the amount of investment interest expense deductible by her in the year of the flow-through. The interest is treated as portfolio income to the same extent as that received directly by the taxpayer.

Special Allocations

Under limited circumstances, the parties may modify the character-of-income allocation method set forth above. A modification is permitted only to the extent the allocation is required in the trust instrument, and only to the extent it has an economic effect independent of the cash-flow and income tax consequences of the allocation.²⁹

EXAMPLE

30

Return to the facts in Example 28. Assume that the beneficiaries are elderly individuals who have pooled their investment portfolios to avail themselves of the trustee's professional asset management skills. Suppose the trustee has the discretion to allocate different classes of income to different beneficiaries and she designates \$10,000 of Nancy's \$12,000 distribution as being from the tax-exempt income. Such a designation *would not be recognized* for tax purposes, and the allocation method of Example 28 must be used.

continued

²⁹Reg. § 1.652(b)-2(b). This is similar to the § 704(b)(2) requirement for partnerships.

Suppose, however, the trust instrument stipulated that Nancy was to receive all of the income from the tax-exempt securities because she alone contributed the exempt securities to trust corpus. Under this provision, the \$10,000 of the nontaxable interest is paid to Nancy. This allocation is *recognized*, and \$10,000 of Nancy's distribution is tax-exempt.

28-4d Losses in the Termination Year

The ordinary net operating and capital losses of a trust or an estate do not flow through to the entity's beneficiaries, as would such losses from a partnership or an S corporation. However, in the year in which an entity terminates its existence, the beneficiaries do receive a direct benefit from the loss carryovers of the trust or estate.³⁰

Net operating losses and net capital losses are subject to the same carryover rules that otherwise apply to an individual. Consequently, NOLs can be carried back 2 years and then carried forward 20 years, while net capital losses can be carried forward only and for an indefinite period of time.

If the entity incurs a negative taxable income in the last year of its existence, the excess of deductions over the entity's gross income flows through directly to the beneficiaries. The net loss is available as a deduction *from* AGI in the beneficiary's tax year with or within which the entity's tax year ends. The amount allowed is in proportion to the relative amount of corpus assets that each beneficiary receives upon the termination of the entity, and it is subject to the 2-percent-of-AGI floor.

Any carryovers of the entity's other losses flow through to the beneficiaries in the year of termination in proportion to the relative amount of corpus assets that each beneficiary receives. Beneficiaries who are individuals use these carryovers as deductions *for* AGI.

The Edgar Estate terminates on December 31, 2015. It had used a fiscal year ending July 31. For the termination year, the estate incurred a \$15,000 negative taxable income. In addition, the estate held an unused NOL carryover of \$23,000 from the year ending July 31, 2010, and an unused net long-term capital loss carryover of \$10,000 from the year ending July 31, 2013. Dawn receives \$60,000 of the total \$100,000 corpus upon termination; she is a calendar-year taxpayer.

Dawn can claim an itemized deduction of \$9,000 $[(\$60,000/\$100,000) \times \$15,000]$ for the entity's negative taxable income in the year of termination. This deduction is subject to the 2%-of-AGI floor on her miscellaneous itemized deductions. In addition, Dawn can claim a \$13,800 deduction *for* AGI in 2015 $(60\% \times \$23,000)$ for Edgar's NOL carryover, and she can use \$6,000 of the estate's net long-term capital loss carryover with her other 2015 capital transactions.

EXAMPLE

31

28-5 PROCEDURAL MATTERS

The fiduciary is required to file a Form 1041 (U.S. Income Tax Return for Estates and Trusts) in the following situations.³¹

- For an estate that has gross income of \$600 or more for the year.
- For a trust that either has any taxable income or, if there is no taxable income, has gross income of \$600 or more.

The fiduciary return (and any related tax liability) is due, before extensions, no later than the fifteenth day of the fourth month following the close of the entity's taxable year. While a paper return may be filed, the IRS encourages electronic filing of the Form 1041 and schedules.

Many fiduciary entities recognize capital gains during the year, through sales of assets that are part of corpus. In that event, a Schedule D is filed with the Form 1041, and the fiduciary entity or its beneficiaries can qualify for the lower tax rates on long-term capital gains.

³⁰Reg. §§ 1.642(h)-1 and -2.

³¹§§ 6012(a)(3) and (4).

TAX IN THE NEWS Don't Trust Your Dictionary

Today, the middle and upper classes often are including trusts in their estate plans. Usually, the purpose of the trust is to spare the survivors the time and effort required to work through a state's probate proceedings.

But planning for death can sometimes lead to confusion about terminology, especially between a living trust and a living will. A "living trust" is typically created to hold the assets of the decedent-to-be, including investments, home-stead, and household goods. Assets are retitled in the name of the trustee, who periodically files a Form 1041 for the new entity. The idea underlying the living trust is to reduce the probate estate. This, in turn, lowers the fees for carrying out the probate process. Such fees often total 5 percent or so of the date of death value of the probate assets.

The living trust accomplishes virtually no Federal tax savings. The trust assets are included in the decedent's gross estate, as the living trust is an incomplete transfer (see Chapter 27). For the most part, the entity is treated as a grantor trust. Because of the retained investment and distribution powers, the donor is still liable for taxes on the taxable income of the fiduciary.

A "living will," on the other hand, is a document that conveys powers to relatives and third parties to make medical and financial decisions when the decedent-to-be can no longer do so. More appropriately referred to as a "health care power of attorney," the document expresses the person's wishes as to how and when to reduce specified medical treatments (including directives for removing life support systems).

The pass-through of income and deduction items to the beneficiary is accomplished through Schedule K-1 to Form 1041. This form is similar in format and function to the Schedule K-1 for partners and S corporation shareholders (see Chapters 21 and 22). Because the typical fiduciary entity records only a few transactions during the year, the Schedule K-1 for Form 1041 is less detailed than those for Forms 1065 and 1120S. See the specimen Form 1041 and schedules in Appendix B to this text.

Trusts and estates must make estimated Federal income tax payments using the same quarterly schedule that applies to individual taxpayers. This requirement applies to estates and grantor trusts only for tax years that end two or more years after the date of the decedent's death. Charitable trusts and private foundations are exempt from estimated payment requirements altogether.³²

LO.4

Apply the Subchapter J rules in a manner that minimizes the income taxation of trusts and estates and still accomplishes the intended objectives of the grantor or decedent.

28-6 TAX PLANNING

Many of the tax planning possibilities for estates and trusts were discussed in Chapter 27. However, several specific tax planning possibilities are available to help minimize the income tax effects on estates and trusts and their beneficiaries.

28-6a A Trust or an Estate as an Income-Shifting Device

The compressed and highly progressive tax rate schedule applicable to Subchapter J entities has reversed the traditional techniques by which families set aside funds for long-term activities such as business startups, college education, and home purchases. When the tax rate schedules for trusts and estates were more accommodating, high-income individuals would shift income-producing assets to trusts to take advantage of the lower effective tax rate that would fall on the income accumulated within the trust. The target of the plan, usually a child, would receive the accumulated income (and, perhaps, trust corpus) at a designated age, and more funds would be available because a lower tax rate had been applied over the life of the investment in the trust.

Today, such an income shift would *deplete*, rather than shelter, the family's assets, as the rates falling on individuals are more graduated than are those applicable to fiduciaries; the kiddie tax also penalizes attempts to shift taxable income to children. Assuming

³²§ 6654(l).

that the objectives of the plan remain unchanged, possible strategies in view of these rate changes include the following.

- Trust corpus should be invested in growth assets that are low on yield but high on appreciation, so that the trustee can determine the timing of the gain and somewhat control the effective tax rate that applies.
- Trust corpus should be invested in tax-exempt securities such as municipal bonds and mutual funds that invest in them to eliminate the tax costs associated with the investment. If this approach is taken, a trust might be unnecessary—the parent should simply retain full control over the assets and invest in the exempt securities in his or her own account.
- The grantor should retain high-yield assets, rather than contribute them to a fiduciary entity, so that control over the assets is not surrendered when the tax cost is too high.
- Use of trust vehicles should be reserved for cases where professional management of the assets is necessary for portfolio growth and the additional tax costs can be justified.

28-6b **Income Tax Planning for Estates**

As a separate taxable entity, an estate can select its own tax year and accounting methods. The executor of an estate should consider selecting a fiscal year because this will determine when beneficiaries must include income distributions from the estate in their own tax returns. Beneficiaries must include the income for their tax year with or within which the estate's tax year ends. Proper selection of the estate's tax year can result in a smoothing out of income and a reduction of the income taxes for all parties involved.

Caution should be taken in determining when the estate is to be terminated. Selecting a fiscal year for the estate can result in a bunching of income to the beneficiaries in the year in which the estate is closed. Prolonging the termination of an estate can be effective income tax planning, but the IRS carefully examines the purpose of keeping the estate open. Because the unused losses of an estate pass through to the beneficiaries only in the termination year, the estate should be closed when the beneficiaries can enjoy the maximum tax benefit of such losses.

The timing and amounts of income distributions to the beneficiaries also present important tax planning opportunities. If the executor can make discretionary income distributions, he or she should evaluate the relative marginal income tax rates of the estate and its beneficiaries. By timing the distributions properly, the overall income tax liability can be minimized. Care should be taken, however, to time the distributions in light of the estate's DNI.

Distribution Strategies

For several years before his death on March 7, Don had entered into annual deferred compensation agreements with his employer. These agreements collectively called for the payment of \$200,000 six months after Don's retirement or death. To provide a maximum 12-month period within which to generate deductions to offset this large item of income in respect of a decedent, the executor or administrator of the estate should elect a fiscal year ending August 31. The election is made simply by filing the estate's first tax return for the short period of March 7 to August 31.

EXAMPLE

32

Carol, the sole beneficiary of an estate, is a calendar year, cash basis taxpayer. If the estate elects a fiscal year ending January 31, all distributions during the period of February 1 to December 31, 2014, are reported on Carol's tax return for calendar year 2015 (due April 15, 2016). Thus, assuming estimated tax requirements otherwise have been met, any income taxes that result from a \$50,000 distribution made by the estate on February 20, 2014, may be deferred until April 15, 2016.

EXAMPLE

33

Distribution Strategies

EXAMPLE

34

Assume the same facts as in Example 33. If the estate is closed on December 15, 2015, the DNI for both the fiscal year ending January 31, 2015, and the final tax year ending December 15, 2015, is included in Carol's tax return for the same calendar year. To avoid the effect of this bunching of income, the estate should not be closed until early in calendar year 2016.

In general, those beneficiaries who are subject to high income tax rates should be made beneficiaries of second-tier (but not IRD) distributions of the estate. Most likely, these individuals will have less need for an additional steady stream of (taxable) income while their income tax savings can be relatively large. Moreover, a special allocation of tax-favored types of income and expenses should be considered. For example, tax-exempt income can be directed more easily to beneficiaries in higher income tax brackets.

EXAMPLE

35

Review Examples 26 and 27 carefully. Note, for instance, the flexibility that is available to the executor or administrator in timing the second-tier distributions of income and corpus of the estate. To illustrate, if Washington is subject to a high tax rate, distributions to him should be minimized except in years when DNI is low. In this manner, Washington's exposure to gross income from the distributions can be controlled so that most of the distributions he receives will be free of income tax.

28-6c Income Tax Planning with Trusts

The great variety in the structuring of trusts provides the grantor, trustee, and beneficiaries with excellent opportunities for tax planning. Many of the same tax planning opportunities available to the executor of an estate are available to the trustee. For instance, the distributions from a trust are taxable to the trust's beneficiaries to the extent of the trust's DNI. If income distributions are discretionary, the trustee can time the distributions to minimize the income tax consequences to all parties.

28-6d Distributions of In-Kind Property

The ability of the trustee or executor to elect to recognize the realized gain or loss relative to a distributed noncash asset allows the gain or loss to be allocated to the optimal taxpayer.

EXAMPLE

36

The Yorba Linda Estate distributed some inventory, basis of \$40,000 and fair market value of \$41,500, to beneficiary Larry. Yorba Linda is subject to a 25% marginal income tax rate, and Larry is subject to a 33% marginal rate. The executor of Yorba Linda should elect that the entity recognize the related \$1,500 realized gain, thereby subjecting the gain to the estate's lower marginal tax rate.

| | |
|---|-------|
| Tax without election, at Larry's 33% rate | \$495 |
| Tax with election, at estate's 25% rate | 375 |

28-6e Additional Taxes on Capital Gains and Net Investment Income

Aggressive income shifting among a fiduciary entity and its beneficiaries may be prompted by the fiduciary's exposure to the liabilities for additional Federal income taxes on capital gains and net investment income. These additional taxes apply only to "high-income" taxpayers, but the income level at which the tax applies is much lower for fiduciaries than it is for individuals.

Thus, investment income and capital gains might best be distributed to individual beneficiaries, removing the items from the additional taxable income of the fiduciary, perhaps without creating an additional tax liability for the beneficiary.

ETHICS & EQUITY Who Should Be a Trustee?

For decades, grantors have chosen a family member to be the trustee of the family savings, the children's education fund, or whatever other assets are placed into management by the trust. The relative chosen is often the most trusted but not always the one with the business skills. Now, however, as the financial world has become more complex, with wild stock market fluctuations, increased fiduciary standards, and potential conflicts of interest, some are questioning the wisdom of using a family member as the trustee.

Using a trust company or other financial institution as a trustee usually results in more stable investment returns, eliminating both the highs and the lows of the stock market cycle. Institutions also can bring other advantages.

- They do not die, run away, become mentally or physically incapacitated, or otherwise unexpectedly become unqualified for the position.
- They are not easily swayed by emotional appeals; nor do they react to family jealousies.
- They are prohibited by law from acting under a conflict of interest, such as might exist between family members when the related trustee is also a trust beneficiary.

On the negative side, human trustees often waive or discount their fiduciary fee, while institutions do not. Especially for trusts with a small corpus, institutional trustees can be prohibitively expensive. And the trust company most often is oriented toward expanding its customer base, rather than offering individual attention to existing clients.

How would you advise a client to address this delicate issue? Compromise solutions might be to:

- Appoint co-trustees. Aunt Grace or Uncle Roberto can provide the personal touch and ensure that trust decisions recognize family needs, while the trust company maximizes investment returns and furnishes professional management.
- Keep the family trustee, but hire professionals to provide advice only when needed, at an hourly rate. This approach avoids the fees based on asset values that trust companies usually charge.
- Use the advisory services of the mutual funds in which trust assets are invested to manage and distribute the corpus and income.

The tax also can be reduced if the fiduciary invests in securities that produce tax-exempt or tax-deferred income, or meets the material participation requirement for otherwise passive activities. In addition, the tax liability can be minimized if the entity invests in assets that produce a low yield (like growth stocks or funds), and if it arranges its portfolio to produce a low turnover rate.

REFOCUS ON THE BIG PICTURE

SETTING UP A TRUST TO PROTECT A FAMILY

Anna Jiang and her family should consider the creation of one or more trusts to provide security in case Anna is incapacitated by medical problems and unable to manage the family's finances. Some suggestions for the family might be:

- Anna transfers some or all of the \$2 million assets to the Jiang Family Trust, with quarterly income payable to Tom and the children. Recipients would be designated by the trustee, but all of the entity's accounting income must be distributed. In this way, the income could be directed to the beneficiary most in need (e.g., to pay for education expenses or to start a new business). The children could be named first-tier beneficiaries, with Tom as a second-tier income beneficiary.
- While Anna is still healthy and earning a regular salary, the trustee could accumulate the accounting income and allow the corpus to build up. Alternatively, the trustee could make gifts to charity or fund education plans for Bobby and Sally.

continued

- Anna should provide clear instructions to the trustee as to her preferences on how the trust corpus should be invested and specify which of Tom's and the children's expenses should and should not be covered.
- The children should be named as remainder beneficiaries of the Jiang Family Trust. In case the trust corpus exceeds the estate tax bypass amount, other remainder beneficiaries could be named to avoid any generation-skipping tax (see Chapter 27).
- Amendments to the trust document should be considered whenever Tom and Anna update their wills.

What If?

If Anna remains healthy, the Jiang Family Trust might be terminated when the children reach the age of majority, as the need for financial support will have diminished. However, if Tom is unable or unwilling to take over management of the assets, the trust should continue. In this event, the trustee might shift the focus to funding long-term care for the couple, making charitable gifts, or financing the education needs of grandchildren.

The controlling trust document should be worded to provide flexibility as to the purposes and termination date of the trust. The trustee should be chosen from family members or business associates who know Anna and Tom well and are familiar with the couple's objectives.

Key Terms

Complex trust, 28-4

Corpus, 28-4

Deductions in respect of a decedent, 28-13

Grantor, 28-2

Grantor trust, 28-4

Income in respect of a decedent (IRD), 28-12

Reversionary interest, 28-4

Simple trust, 28-4

Sprinkling trust, 28-4

Discussion Questions

- Communications**
1. **LO.1** A local bank has asked you to speak at its Building Personal Wealth Conference on the topic of "What Should Your Trust Do for You?" Develop at least four PowerPoint slides, each one listing a function that a trust might be able to accomplish for an individual who has more than a modest level of financial resources.
 2. **LO.1** In general terms, describe how the following entities are subject to the Federal income tax. (Answer only for the entity, not for its owners, beneficiaries, etc.)
 - a. C corporations (Subchapter C).
 - b. Partnerships (Subchapter K).
 - c. S corporations (Subchapter S).
 - d. Trusts and estates (Subchapter J).
- Communications**
3. **LO.1** Your college's accounting group has asked you to give a 10-minute speech titled "Trusts, Estates, and the AMT." The audience will be students who have completed at least one course concerning Federal income taxation. Develop a brief outline for your remarks.

4. **LO.1** Create a fact pattern that illustrates each of the following tax situations. Be specific.
- A simple trust.
 - A complex trust with a \$300 personal exemption.
 - A complex trust with a \$100 personal exemption.
5. **LO.2** Using Exhibit 28.4 as a guide, describe the computation of a fiduciary entity's accounting income, taxable income, and distributable net income.
6. **LO.2** The Liu Trust is short of cash. It is required to distribute \$100,000 to Yang every year, and that payment is due in six weeks. In its asset corpus, Liu holds a number of investments that are valued at \$100,000. One of them is a plot of land with a tax basis to the trust of \$80,000. Assuming that the trust agreement allows, what are the Federal income tax consequences if Liu distributes this land to Yang?
7. **LO.2** In its first tax year, the Vasquez Estate generated \$50,000 of taxable interest income and \$30,000 of tax-exempt interest income. It paid fiduciary fees of \$8,000. The estate is subject to a 35% marginal estate tax rate and a 40% marginal income tax rate. How should the executor assign the deductions for the payment of the fees?
8. **LO.2** The Sterling Trust owns a business and generated \$100,000 in depreciation deductions for the tax year. Mona is one of the income beneficiaries of the entity. Given the following information, can Mona deduct any of the Sterling depreciation on her Form 1040? If so, how much is her deduction?

| | |
|---|------------|
| Sterling's taxable income from the business | \$ 800,000 |
| Sterling's gross income from the business | 4,000,000 |
| Mona's share of trust accounting income | 500,000 |
| Total trust accounting income | 2,500,000 |
| Mona's share of distributable net income | 1,200,000 |
| Total distributable net income | 1,600,000 |

9. **LO.2** In year 1, the Helpful Trust agreed to make a \$50,000 contribution to Local Soup Kitchen, a charitable organization. Helpful's board agreed to the gift at a November year 1 meeting, but the check was not issued until February 20, year 2 (i.e., during the next tax year).
- Can the trust claim a charitable contribution deduction? If so, describe how Helpful should treat its gift.
 - Would the answer to part (a) change if the check was issued on May 1, year 2? If so, how?
10. **LO.3** One of the key concepts in fiduciary income taxation is that of *distributable net income* (DNI). List the major functions of DNI on one PowerPoint slide, with no more than five bullets, to present to your classmates as part of the discussion of this chapter of the text. Just review the uses of DNI in Subchapter J, and do not discuss its computation.
11. **LO.4** Comment on the following items relative to tax planning strategies of a fiduciary entity.
- To reduce taxes for a typical family, should income be shifted *to* a trust or *from* a trust? Why?
 - From a tax planning standpoint, who should invest in tax-exempt bonds, the trust or its beneficiaries?
 - To reduce overall taxes, should a high-income, wealthy beneficiary be assigned to the first or second tier of trust distributions? Why?
 - To minimize taxes, how should a trust treat the distribution of an in-kind asset? Why?

Decision Making

Communications

Decision Making

Computational Exercises

12. **LO.2** The Biltmore Trust is a simple trust. Crawford is its sole beneficiary. In the current year, the trust earns \$3,200 in taxable interest and \$8,000 in tax-exempt interest. In addition, the trust recognizes a \$2,500 long-term capital gain. The trustee assesses a fee of \$1,800 for the year.
- Compute trust accounting income, where the trust agreement allocates fees and capital gains to corpus.
 - Same as (a), except that fees are allocated to income.
13. **LO.2** The Hosta Trust reports gross rent income of \$72,000, expenses attributable to the rents of \$55,000, and tax-exempt interest from state bonds of \$18,000. Under the trust agreement, the trustee is to pay 20% of the annual trust accounting income to the American Red Cross, a qualifying charitable organization. Compute Hosta's charitable contribution deduction.

Problems

14. **LO.1** Complete the following chart, indicating the comparative attributes of the typical simple trust and complex trust by answering yes/no or explaining the differences between the entities where appropriate.

| Attribute | Simple Trust | Complex Trust |
|--|--------------|---------------|
| Trust could incur its own tax liability for the year | _____ | _____ |
| Trust generally distributes all of the DNI | _____ | _____ |
| Trust can deduct its charitable contributions in the year of or the year after payment | _____ | _____ |
| Trust could claim a foreign tax credit | _____ | _____ |
| Maximum tax rate on net long-term capital gains = 20% | _____ | _____ |
| AMT preferences and adjustments flow through to beneficiaries ratably | _____ | _____ |
| Trust can adopt the FIFO method for its inventory assets; the grantor had been using lower of cost or market | _____ | _____ |
| Trust can use a tax year other than the calendar year | _____ | _____ |
| Amount of personal exemption | _____ | _____ |

15. **LO.1** Compute the Federal income tax liability for the Valerio Trust. The entity reports the following transactions for the 2015 tax year. The trustee accumulates all accounting income for the year.

| | |
|---|------------|
| Operating income from a business | \$ 500,000 |
| Dividend income, all from U.S. corporations | 30,000 |
| Interest income, City of San Antonio bonds | 40,000 |
| Fiduciary fees, deductible portion | (15,000) |
| Net rental losses, passive activity | (100,000) |

16. **LO.2** The Polozzi Trust will incur the following items in the next tax year, its first year of existence.

| | |
|--|-----------|
| Interest income | \$ 25,000 |
| Rent income | 100,000 |
| Cost recovery deductions for the rental activity | 35,000 |
| Capital gain income | 40,000 |
| Fiduciary and tax preparation fees | 7,000 |

Betty, the grantor of the trust, is working with you on the language in the trust instrument relative to the derivation of annual accounting income for the entity. She will name Shirley as the sole income beneficiary and Benny as the remainder beneficiary.

- a. Suggest language to Betty that will maximize the annual income distribution to Shirley.
 - b. Suggest language to Betty that will minimize the annual distribution to Shirley and maximize the accumulation on Benny's behalf.
17. **LO.2** Complete the chart below, indicating the Calvet Trust's entity accounting income for each of the alternatives. For this purpose, use the following information.

| | |
|---|-----------|
| Interest income, taxable | \$300,000 |
| Interest income, tax-exempt | 30,000 |
| Interest income, tax-exempt but AMT preference item | 20,000 |
| Long-term capital gain | 40,000 |
| Trustee fee | 10,000 |

| Trust Agreement Provisions | Trust Accounting Income |
|---|-------------------------|
| Fees and capital gains allocable to corpus | _____ |
| Capital gains allocable to corpus, one-half of fees allocable to income | _____ |
| Capital gains allocable to income, silent concerning allocation of fees | _____ |
| Fees and exempt income allocable to corpus, silent concerning allocation of capital gain/loss | _____ |

18. **LO.1, 2, 3** Complete the following chart, indicating the comparative attributes of the typical trust and estate by answering yes/no or explaining the differences between the entities where appropriate.

| Attribute | Estate | Trust |
|--|--------|-------|
| Separate income tax entity | _____ | _____ |
| Controlling document | _____ | _____ |
| Can have both income and remainder beneficiaries | _____ | _____ |
| Computes entity accounting income before determining entity taxable income | _____ | _____ |
| Termination date is determinable from controlling document | _____ | _____ |
| Document identifies both income and remainder beneficiaries | _____ | _____ |
| Generally must use calendar tax year | _____ | _____ |

19. **LO.2** Sanchez incurred the following items.

| | |
|--|----------|
| Business income | \$80,000 |
| Tax-exempt interest income | 40,000 |
| Payment to charity from 2016 Sanchez gross income, paid 3/1/17 | 20,000 |

Complete the following chart, indicating the charitable contributions deduction under the various assumptions.

| Assumption | 2016 Deduction for Contribution |
|--|---------------------------------|
| Sanchez is a cash basis individual. | _____ |
| Sanchez is an accrual basis corporation. | _____ |
| Sanchez is a trust. | _____ |

20. **LO.2, 3** The Allwardt Trust is a simple trust that correctly uses the calendar year for tax purposes. Its income beneficiaries (Lucy and Ethel) are entitled to the trust's annual accounting income in shares of one-half each.

For the current tax year, Allwardt reports the following.

| | |
|---|-----------|
| Ordinary income | \$100,000 |
| Long-term capital gains, allocable to corpus | 30,000 |
| Trustee commission expense, allocable to corpus | 5,000 |

Use the format of Exhibit 28.5 to address the following items.

- a. How much income is each beneficiary entitled to receive?
 - b. What is the trust's DNI?
 - c. What is the trust's taxable income?
 - d. How much gross income is reported by each of the beneficiaries?
21. **LO.2, 3** Assume the same facts as in Problem 20, except that the trust instrument allocates the capital gain to income.
- a. How much income is each beneficiary entitled to receive?
 - b. What is the trust's DNI?
 - c. What is the trust's taxable income?
 - d. How much gross income is reported by each of the beneficiaries?
22. **LO.3** The Kilp Sisters Trust is required to distribute \$60,000 annually equally to its two income beneficiaries, Clare and Renee. If trust income is not sufficient to pay these amounts, the trustee can invade corpus to the extent necessary.
- During the current year, the trust generates only taxable interest income and records DNI of \$160,000; the trustee distributes \$30,000 to Clare and \$150,000 to Renee.
- a. How much of the \$150,000 distributed to Renee is included in her gross income?
 - b. How much of the \$30,000 distributed to Clare is included in her gross income?
 - c. Are these distributions first-tier or second-tier distributions?
23. **LO.3** The Dolce Estate reports the following items for the current tax year.

| | |
|----------------------------|-------------------------|
| Dividend income | \$ 50,000 |
| Taxable interest income | 8,000 |
| Passive activity income | 30,000 |
| Tax-exempt interest income | <u>12,000</u> |
| Distributable net income | <u><u>\$100,000</u></u> |

Dolce’s two noncharitable income beneficiaries, Brenda and Del, receive cash distributions of \$20,000 each. How much of each class of income is deemed to have been distributed to Brenda? To Del?

24. **LO.2, 3** The trustee of the Pieper Trust can distribute any amount of accounting income and corpus to the trust’s beneficiaries, Lydia and Kent. This year, the trust incurred the following.

| | |
|---|----------|
| Taxable interest income | \$40,000 |
| Tax-exempt interest income | 20,000 |
| Long-term capital gains—allocable to corpus | 80,000 |
| Fiduciary’s fees—allocable to corpus | 9,000 |

The trustee distributed \$26,000 to Lydia and \$13,000 to Kent.

- What is Pieper’s trust accounting income?
 - What is Pieper’s DNI?
 - What is Pieper’s taxable income?
 - What amounts are taxed to each of the beneficiaries?
25. **LO.2** Each of the following items was incurred by José, the cash basis, calendar year decedent. Under the terms of the will, Dora took immediate ownership in all of José’s assets, except the dividend-paying stock. The estate received José’s final paycheck.

Decision Making

Applying the rules for income and deductions in respect of a decedent, indicate on which return each item should be reported: Dora’s income tax return (Form 1040), the estate’s first income tax return (Form 1041), or the estate’s estate tax return (Form 706). More than one alternative may apply in some cases.

| Item Incurred | Form(s) Reported on |
|---|---------------------|
| a. Wages, last paycheck | _____ |
| b. State income tax withheld on last paycheck | _____ |
| c. Capital gain portion of installment payment received | _____ |
| d. Ordinary income portion of installment payment received | _____ |
| e. Dividend income, record date was two days prior to José’s death | _____ |
| f. Unrealized appreciation on a mutual fund investment | _____ |
| g. Depreciation recapture accrued as of date of death | _____ |
| h. Medical expenses of last illness | _____ |
| i. Apartment building, rents accrued but not collected as of death | _____ |
| j. Apartment building, property tax accrued and assessed but not paid as of death | _____ |

26. **LO.3** Determine the tax effects of the indicated losses for the Yellow Estate for both tax years. The estate holds a variety of investment assets, which it received from the decedent, Mrs. Yellow. The estate’s sole income and remainder beneficiary is Yellow, Jr. All taxpayers use a calendar tax year.

| Tax Year | Loss Generated |
|-----------------------|---|
| 2016 (first tax year) | Taxable income (\$300) Capital loss (\$12,000) |
| 2017 (final tax year) | Taxable income, all classified as ordinary (\$20,000) |

CHECKPOINT
 Student Edition

Note: Solutions to Research Problems can be prepared by using the Checkpoint® Student Edition online research product, which is available to accompany this text. It is also possible to prepare solutions to the Research Problems by using tax research materials found in a standard tax library.

Communications

Research Problem 1. Grinder Ltd. is an S corporation that is wholly owned by Juan Plowright. Because several of Juan's ancestors have had Alzheimer's disease, Juan is transferring many of his assets to trusts, and he is funding living wills in anticipation of future medical issues.

Juan wants to transfer his Grinder stock to a trust, but he wants to keep control over its operations for as long as possible. Thus, he wants to retain a right to revoke the trust, until such time as the trustee (a Grinder executive who is on good terms with Juan) and a medical professional determine that Juan no longer is competent. You have explained to Juan that this entity is a grantor trust and that there are no income-shifting or transfer-tax-saving aspects in using such a trust.

The pertinent tax issues to be addressed are summarized below.

- Does the grantor trust terminate Grinder's status as an S corporation?
- Will Grinder's S election survive Juan's death? Under the terms of Juan's will, the S shares will be held by his estate and not be distributed to his niece Beatriz until she reaches age 25.

All parties are residents of New Mexico. Cite and summarize your findings in an outline for a talk that you will deliver next week to your school's Accounting Club.

Research Problem 2. For three generations, the Dexter family has sent its children to Private University, preparing them for successful professional careers. The Edna Dexter Trust was established in the 1950s by LaKeisha's late grandmother and has accumulated a sizable corpus. It makes distributions to Edna's descendants rarely, and then only when they need large capital amounts. For example, two years ago, the trust distributed \$500,000 to DuJuan Dexter to aid him in starting a practice in retirement and elder law. In most years, the trust's income is donated to a single charity.

Under the terms of the trust, Bigby Dexter, LaKeisha's uncle and legal guardian, can specify the trust beneficiaries and the amounts to be distributed to them. He also can replace the trustee and designate the charity that will receive the year's contribution. Accordingly, the trust falls under the grantor trust rules of § 678, and Bigby reports the trust's transactions on his own Form 1040.

LaKeisha wants to attend the prestigious local Academy High School, which will require a four-year expenditure for tuition and fees of \$100,000, payable in advance. She approaches the Edna Dexter trustee and requests a current-year distribution of this amount, payable directly to the Academy. Under the laws of the state, the parent or guardian has the responsibility to provide a child with a public school education (no tuition charge) until age 16.

If the payment to the Academy is made, how is it treated under the Subchapter J rules: as a charitable contribution to the Academy, as a corpus distribution to LaKeisha, or in some other manner?

Internet Activity

Use the tax resources of the Internet to address the following questions. Do not restrict your search to the Web, but include a review of newsgroups and general reference materials, practitioner sites and resources, primary sources of the tax law, chat rooms and discussion groups, and other opportunities.

Communications

Research Problem 3. How many estates filed a Form 1041 last year? Simple trusts? Complex trusts? Grantor trusts? How much Federal income tax has been collected on Forms 1041 over the last three tax years? Summarize your findings in a series of graphs to share with your classmates.

Research Problem 4. Under the income tax laws of your state applicable to fiduciaries, how are the following items allocated among the entity and the beneficiaries? Put your findings in a PowerPoint presentation for your classmates.

- Capital gain.
- Cost recovery.
- Fiduciary fees.
- Exempt interest income.
- AMT adjustments.
- General business credits.

Communications

Research Problem 5. Create no more than three PowerPoint slides, summarizing your state's definitions of and rules for using the following terms. *Hint:* Your state might not use these terms at all, or it might use a term that differs slightly; so make sure your Internet research is broad enough to find the equivalent terminology.

- Living will.
- Living trust.
- Health care power of attorney.
- Durable power of attorney.

Roger CPA Review Questions

1. On February 14, 20X5 Charlie Crooker created Charlie's Trust for the benefit of his children. During 20X5, the assets within the trust earned income of \$12,000. What is the amount of the *standard deduction* available to Charlie's Trust when filing its fiduciary income tax return?
 - a. \$600
 - b. \$300
 - c. \$100
 - d. \$0
2. Don Donovan, a U.S. citizen, died on April 1, 20X5. In computing the estate taxable income for 20X5, the executor of Don Donovan's estate could claim a charitable contribution deduction if which of the following is (are) true?
 - I. The recipient of the charitable contribution is a qualified charitable organization
 - II. Don Donovan's will specifically provided for the contribution
 - III. Charitable contributions must be paid from amounts included in the estate's gross income from the year of contribution or from funds permanently set aside for such contributions
 - a. All of the above
 - b. I and II, but not III
 - c. II and III, but not I
 - d. II only
3. Patrick, a cash-basis taxpayer, died on February 3, 20X4. In 20X4, the estate executor made cash distributions of \$1,500 to Patrick's brother, the sole heir of the estate. The following is additional information related to Patrick's estate.

20X4 Estate Income

\$7,500 Taxable rental income
\$8,000 Taxable interest

20X4 Estate Disbursements

\$2,500 Charitable contributions from gross income to a public charity, made under the terms of the will

For the 20X4 calendar year, what was the estate's distributable net income (DNI)?

- a. \$15,500
- b. \$13,000
- c. \$11,500
- d. \$5,000

2014 Tax Table

See the instructions for line 44 to see if you must use the Tax Table below to figure your tax.

Example. Mr. and Mrs. Brown are filing a joint return. Their taxable income on Form 1040, line 43, is \$25,300. First, they find the \$25,300-25,350 taxable income line. Next, they find the column for married filing jointly and read down the column. The amount shown where the taxable income line and filing status column meet is \$2,891. This is the tax amount they should enter on Form 1040, line 44.

Sample Table

| At Least | But Less Than | Single | Married filing jointly* | Married filing separately | Head of a household |
|----------|---------------|--------|-------------------------|---------------------------|---------------------|
| | | | Your tax is— | | |
| 25,200 | 25,250 | 3,330 | 2,876 | 3,330 | 3,136 |
| 25,250 | 25,300 | 3,338 | 2,884 | 3,338 | 3,144 |
| 25,300 | 25,350 | 3,345 | 2,891 | 3,345 | 3,151 |
| 25,350 | 25,400 | 3,353 | 2,899 | 3,353 | 3,159 |

2014 OPTIONAL SALES TAX TABLES

When Used

The election to deduct state and local general sales taxes requires that the taxpayer forgo any deduction for state and local income taxes. Whether this is advisable or not depends on a comparison of the amounts involved. In making the choice, however, the outcome could be influenced by the additional sales tax incurred due to certain “big ticket” purchases that were made. For example, a taxpayer who chose to deduct state and local income taxes for 2013 might well prefer the sales tax deduction in 2014 if a new boat was purchased or home improvements were made during the year. To make the sales tax election, the taxpayer must enter the amount on Schedule A, line 5, and check box b. Unless extended by Congress, the sales tax deduction will expire as to tax years after 2014.

If the sales tax election is made, the amount of the deduction can be determined by use of the *actual expense method* or the *optional sales tax tables* issued by the IRS. The actual expense method can be used only when the taxpayer has actual receipts to support the deduction claimed. In the absence of receipts, the usual case with most taxpayers, resorting to the optional sales tax tables is necessary. Under neither method, however, is the purchase of items used in a taxpayer’s trade or business to be considered.

Adjustments Necessary

The optional sales tax tables are based on a number of assumptions that require adjustments to be made. As the starting point for the use of the tables is AGI, nontaxable receipts have not been included. Examples of receipts that should be added include: tax-exempt interest, veterans’ benefits, nontaxable combat pay, public assistance payments, workers’ compensation, nontaxable Social Security, and other retirement benefits. They do not include any large nontaxable items that are not likely to be spent. For example, a \$100,000 inheritance should not be added if it was invested in a certificate of deposit.

The tables represent the sales tax on the average (and recurring) expenditures based on level of income by family size and do not include exceptional purchases. Therefore, add to the table amount any sales taxes on major purchases (such as motor vehicles, aircraft, boats, and home building materials, etc.).

When the optional sales tax tables are utilized, special adjustments may be needed when a taxpayer has lived in more than one taxing jurisdiction (e.g., state, county, city) during the year. The adjustments involve apportionment of taxes based on days involved and are illustrated in Instructions for Schedule A (Form 1040), pages A-3 to A-6.

Local Sales Taxes

Local sales taxes (i.e., those imposed by counties, cities, transit authorities) may or may not require a separate determination. In those states where they are not imposed, no further computations are necessary. This is also the case where the local taxes are uniform and are incorporated into the state sales tax table. In other situations, another step is necessary to arrive at the optional sales tax table deduction. Depending on where the taxpayer lives, one of two procedures needs to be used. In one procedure, the local sales tax is arrived at by using the **state table** amount—see the Example 1 worksheet. In the other procedure, special **local tables** issued by the IRS for enumerated state and local jurisdictions are modified (if necessary) and used—see the Example 2 worksheet.

Use Illustrated

EXAMPLE 1 The Archers file a joint return for 2014 reflecting AGI of \$88,000 and claiming three exemptions. They have tax-exempt interest of \$3,000, and during the year they incurred sales tax of \$1,650 on the purchase of an automobile for their dependent teenage son. They live in Bellaire, Texas, where the general sales tax rates are 6.25% for state and 2% for local. Since the IRS *has not issued* optional local sales tax tables for Texas, use the Worksheet below to arrive at the Archers' general sales tax deduction of \$3,086.

Sales Tax Deduction Worksheet

(To be used when *no* IRS Optional Local Sales Tax Table Available)

| | | |
|---|-------------|-----------------|
| Adjusted Gross Income (AGI) as listed on line 38 of Form 1040 | | \$88,000 |
| Add nontaxable items | | <u>3,000</u> |
| Table income to be used for purposes of line 1 below | | <u>\$91,000</u> |
| | | |
| 1. Use table income to determine table amount—go to state of residence and find applicable range of table income and exemption column* for <i>state</i> sales tax | | \$ 1,088 |
| 2a. Enter local general sales tax rate | <u>2.0</u> | |
| 2b. Enter state general sales tax rate | <u>6.25</u> | |
| 2c. Divide 2a by 2b | <u>0.32</u> | |
| 2d. Multiply line 1 by line 2c for the local sales tax | | 348 |
| 3. Enter general sales tax on large purchases | | <u>1,650</u> |
| 4. Deduction for general sales tax (add lines 1 + 2d + 3) and report on line 5 of Schedule A of Form 1040 | | <u>\$ 3,086</u> |

*Use total of personal and dependency exemptions as reported in item 6d of Form 1040.

EXAMPLE 2 The Hardys file a joint return for 2014, reporting AGI of \$40,000 and claiming four exemptions (two personal and two dependency). They received \$30,000 in nontaxable pension benefits. Although the Hardys do not keep sales tax receipts, they can prove that they paid \$4,800 in sales tax on the purchase of a new boat in 2014. The Hardys are residents of Georgia and live in a jurisdiction that imposes a 2% local sales tax. Since the IRS *has issued* optional local sales tax tables for Georgia, use the Worksheet below to arrive at the Hardys' general sales tax deduction of \$5,666.

Sales Tax Deduction Worksheet

(To be used for Alaska, Arizona, Arkansas, Colorado, Georgia, Illinois, Louisiana, Missouri, New York, North Carolina, South Carolina, Tennessee, Utah, Virginia, and West Virginia)

| | | |
|--|--------------|-----------------|
| Adjusted Gross Income (AGI) as listed on line 38 of Form 1040 | | \$40,000 |
| Add nontaxable income | | <u>30,000</u> |
| Table income to be used for purposes of line 1 below | | <u>\$70,000</u> |
| | | |
| 1. Use the table income to determine <i>state</i> sales tax amount—go to table for state of residence and find applicable income range and exemption column* | | \$ 540 |
| 2a. Enter local general sales tax rate | <u>2.0</u> | |
| 2b. Enter IRS <i>local</i> sales tax table amount (based on 1%) | <u>\$163</u> | |
| 2c. Multiply line 2b by 2a for the local sales tax | | 326 |
| 3. Enter general sales tax on large purchases | | <u>4,800</u> |
| 4. Deduction for general sales tax (add lines 1 + 2c + 3) and report on line 5 of Schedule A of Form 1040 | | <u>\$ 5,666</u> |

*Use total of personal and dependency exemptions as reported in item 6d of Form 1040.

2014 Optional State Sales Tax Tables (State Sales Tax Rate Shown Next to State Name)

| Income | Exemptions | | | | | Exemptions | | | | | Exemptions | | | | | Exemptions | | | | | | | | | |
|-------------------|------------|------------------------|-----------------------|------|------|------------|-----------------------------|-----------------------|------|------|--------------------------------------|------|------------------------|--------|-------------------------|------------|------|--------------------------|------|--------|------|------|------|------|------|

United States Gift (and Generation-Skipping Transfer) Tax Return

OMB No. 1545-0020

► Information about Form 709 and its separate instructions is at www.irs.gov/form709.

(For gifts made during calendar year 2014)

► See instructions.

2014

Part 1 — General Information

| | | | | | | |
|---------------------------------|--|----|-------------------|--------|--------------------------------|----|
| 1 | Donor's first name and middle initial | 2 | Donor's last name | 3 | Donor's social security number | |
| 4 | Address (number, street, and apartment number) | | | 5 | Legal residence (domicile) | |
| 6 | City or town, state or province, country, and ZIP or foreign postal code | | | 7 | Citizenship (see instructions) | |
| 8 | If the donor died during the year, check here <input type="checkbox"/> and enter date of death _____, _____ | | | | Yes | No |
| 9 | If you extended the time to file this Form 709, check here <input type="checkbox"/> | | | | | |
| 10 | Enter the total number of donees listed on Schedule A. Count each person only once ► | | | | | |
| 11a | Have you (the donor) previously filed a Form 709 (or 709-A) for any other year? If "No," skip line 11b | | | | | |
| b | Has your address changed since you last filed Form 709 (or 709-A)? | | | | | |
| 12 | Gifts by husband or wife to third parties. Do you consent to have the gifts (including generation-skipping transfers) made by you and by your spouse to third parties during the calendar year considered as made one-half by each of you? (see instructions.) (If the answer is "Yes," the following information must be furnished and your spouse must sign the consent shown below. If the answer is "No," skip lines 13–18.) | | | | | |
| 13 | Name of consenting spouse | 14 | SSN | | | |
| 15 | Were you married to one another during the entire calendar year? (see instructions) | | | | | |
| 16 | If 15 is "No," check whether <input type="checkbox"/> married <input type="checkbox"/> divorced or <input type="checkbox"/> widowed/deceased, and give date (see instructions) ► | | | | | |
| 17 | Will a gift tax return for this year be filed by your spouse? (If "Yes," mail both returns in the same envelope.) | | | | | |
| 18 | Consent of Spouse. I consent to have the gifts (and generation-skipping transfers) made by me and by my spouse to third parties during the calendar year considered as made one-half by each of us. We are both aware of the joint and several liability for tax created by the execution of this consent. | | | | | |
| Consenting spouse's signature ► | | | | Date ► | | |
| 19 | Have you applied a DSUE amount received from a predeceased spouse to a gift or gifts reported on this or a previous Form 709? If "Yes," complete Schedule C | | | | | |

Part 2 — Tax Computation

| | | | |
|----|---|----|--|
| 1 | Enter the amount from Schedule A, Part 4, line 11 | 1 | |
| 2 | Enter the amount from Schedule B, line 3 | 2 | |
| 3 | Total taxable gifts. Add lines 1 and 2 | 3 | |
| 4 | Tax computed on amount on line 3 (see <i>Table for Computing Gift Tax</i> in instructions) | 4 | |
| 5 | Tax computed on amount on line 2 (see <i>Table for Computing Gift Tax</i> in instructions) | 5 | |
| 6 | Balance. Subtract line 5 from line 4 | 6 | |
| 7 | Applicable credit amount. If donor has DSUE amount from predeceased spouse(s), enter amount from Schedule C, line 4; otherwise, see instructions | 7 | |
| 8 | Enter the applicable credit against tax allowable for all prior periods (from Sch. B, line 1, col. C) | 8 | |
| 9 | Balance. Subtract line 8 from line 7. Do not enter less than zero | 9 | |
| 10 | Enter 20% (.20) of the amount allowed as a specific exemption for gifts made after September 8, 1976, and before January 1, 1977 (see instructions) | 10 | |
| 11 | Balance. Subtract line 10 from line 9. Do not enter less than zero | 11 | |
| 12 | Applicable credit. Enter the smaller of line 6 or line 11 | 12 | |
| 13 | Credit for foreign gift taxes (see instructions) | 13 | |
| 14 | Total credits. Add lines 12 and 13 | 14 | |
| 15 | Balance. Subtract line 14 from line 6. Do not enter less than zero | 15 | |
| 16 | Generation-skipping transfer taxes (from Schedule D, Part 3, col. H, Total) | 16 | |
| 17 | Total tax. Add lines 15 and 16 | 17 | |
| 18 | Gift and generation-skipping transfer taxes prepaid with extension of time to file | 18 | |
| 19 | If line 18 is less than line 17, enter balance due (see instructions) | 19 | |
| 20 | If line 18 is greater than line 17, enter amount to be refunded | 20 | |

Attach check or money order here.

(If more space is needed, attach additional statements.)

Part 4—Taxable Gift Reconciliation

| | | | | |
|--------------------------------------|---|-----------|--|--|
| 1 | Total value of gifts of donor. Add totals from column H of Parts 1, 2, and 3 | 1 | | |
| 2 | Total annual exclusions for gifts listed on line 1 (see instructions) | 2 | | |
| 3 | Total included amount of gifts. Subtract line 2 from line 1 | 3 | | |
| Deductions (see instructions) | | | | |
| 4 | Gifts of interests to spouse for which a marital deduction will be claimed, based on item numbers _____ of Schedule A | 4 | | |
| 5 | Exclusions attributable to gifts on line 4 | 5 | | |
| 6 | Marital deduction. Subtract line 5 from line 4 | 6 | | |
| 7 | Charitable deduction, based on item nos. _____ less exclusions | 7 | | |
| 8 | Total deductions. Add lines 6 and 7 | 8 | | |
| 9 | Subtract line 8 from line 3 | 9 | | |
| 10 | Generation-skipping transfer taxes payable with this Form 709 (from Schedule D, Part 3, col. H, Total) | 10 | | |
| 11 | Taxable gifts. Add lines 9 and 10. Enter here and on page 1, Part 2—Tax Computation, line 1 | 11 | | |

Terminable Interest (QTIP) Marital Deduction. (see instructions for Schedule A, Part 4, line 4)

If a trust (or other property) meets the requirements of qualified terminable interest property under section 2523(f), and:

- a. The trust (or other property) is listed on Schedule A, and
- b. The value of the trust (or other property) is entered in whole or in part as a deduction on Schedule A, Part 4, line 4, then the donor shall be deemed to have made an election to have such trust (or other property) treated as qualified terminable interest property under section 2523(f).

If less than the entire value of the trust (or other property) that the donor has included in Parts 1 and 3 of Schedule A is entered as a deduction on line 4, the donor shall be considered to have made an election only as to a fraction of the trust (or other property). The numerator of this fraction is equal to the amount of the trust (or other property) deducted on Schedule A, Part 4, line 6. The denominator is equal to the total value of the trust (or other property) listed in Parts 1 and 3 of Schedule A.

If you make the QTIP election, the terminable interest property involved will be included in your spouse's gross estate upon his or her death (section 2044). See instructions for line 4 of Schedule A. If your spouse disposes (by gift or otherwise) of all or part of the qualifying life income interest, he or she will be considered to have made a transfer of the entire property that is subject to the gift tax. See *Transfer of Certain Life Estates Received From Spouse* in the instructions.

12 Election Out of QTIP Treatment of Annuities

◀ Check here if you elect under section 2523(f)(6) **not** to treat as qualified terminable interest property any joint and survivor annuities that are reported on Schedule A and would otherwise be treated as qualified terminable interest property under section 2523(f). See instructions. Enter the item numbers from Schedule A for the annuities for which you are making this election ▶ _____

SCHEDULE B Gifts From Prior Periods

If you answered "Yes," on line 11a of page 1, Part 1, see the instructions for completing Schedule B. If you answered "No," skip to the Tax Computation on page 1 (or Schedules C or D, if applicable). Complete Schedule A before beginning Schedule B. See instructions for recalculation of the column C amounts. Attach calculations.

| A Calendar year or calendar quarter (see instructions) | B Internal Revenue office where prior return was filed | C Amount of applicable credit (unified credit) against gift tax for periods after December 31, 1976 | D Amount of specific exemption for prior periods ending before January 1, 1977 | E Amount of taxable gifts |

SCHEDULE B
(Form 1040A or 1040)

Department of the Treasury
Internal Revenue Service (99)

Interest and Ordinary Dividends

▶ Attach to Form 1040A or 1040.
▶ Information about Schedule B and its instructions is at www.irs.gov/scheduleb.

OMB No. 1545-0074

2014
Attachment
Sequence No. **08**

Name(s) shown on return Your social security number

Part I
Interest

1 List name of payer. If any interest is from a seller-financed mortgage and the buyer used the property as a personal residence, see instructions on back and list this interest first. Also, show that buyer's social security number and address ▶

(See instructions on back and the instructions for Form 1040A, or Form 1040, line 8a.)

Note. If you received a Form 1099-INT, Form 1099-OID, or substitute statement from a brokerage firm, list the firm's name as the payer and enter the total interest shown on that form.

- 2** Add the amounts on line 1
- 3** Excludable interest on series EE and I U.S. savings bonds issued after 1989. Attach Form 8815
- 4** Subtract line 3 from line 2. Enter the result here and on Form 1040A, or Form 1040, line 8a ▶

Note. If line 4 is over \$1,500, you must complete Part III.

| Amount | |
|--------|--|
| 1 | |
| 2 | |
| 3 | |
| 4 | |

Part II
Ordinary Dividends

5 List name of payer ▶

(See instructions on back and the instructions for Form 1040A, or Form 1040, line 9a.)

Note. If you received a Form 1099-DIV or substitute statement from a brokerage firm, list the firm's name as the payer and enter the ordinary dividends shown on that form.

6 Add the amounts on line 5. Enter the total here and on Form 1040A, or Form 1040, line 9a ▶

Note. If line 6 is over \$1,500, you must complete Part III.

| Amount | |
|--------|--|
| 5 | |
| 6 | |

Part III
Foreign Accounts and Trusts

(See instructions on back.)

You must complete this part if you **(a)** had over \$1,500 of taxable interest or ordinary dividends; **(b)** had a foreign account; or **(c)** received a distribution from, or were a grantor of, or a transferor to, a foreign trust.

- 7a** At any time during 2014, did you have a financial interest in or signature authority over a financial account (such as a bank account, securities account, or brokerage account) located in a foreign country? See instructions
- If "Yes," are you required to file FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR), to report that financial interest or signature authority? See FinCEN Form 114 and its instructions for filing requirements and exceptions to those requirements
- b** If you are required to file FinCEN Form 114, enter the name of the foreign country where the financial account is located ▶
- 8** During 2014, did you receive a distribution from, or were you the grantor of, or transferor to, a foreign trust? If "Yes," you may have to file Form 3520. See instructions on back

Cat. No. 11346H

Schedule F (Form 1040) 2014

Part III Farm Income—Accrual Method (see instructions).

| | | | | | | |
|-----|--|-----|--|-----|----------------|-----|
| 37 | Sales of livestock, produce, grains, and other products (see instructions) | | | 37 | | |
| 38a | Cooperative distributions (Form(s) 1099-PATR) | 38a | | 38b | Taxable amount | 38b |
| 39a | Agricultural program payments | 39a | | 39b | Taxable amount | 39b |
| 40 | Commodity Credit Corporation (CCC) loans: | | | | | |
| a | CCC loans reported under election | | | 40a | | |
| b | CCC loans forfeited | 40b | | 40c | Taxable amount | 40c |
| 41 | Crop insurance proceeds | | | 41 | | |
| 42 | Custom hire (machine work) income | | | 42 | | |
| 43 | Other income (see instructions) | | | 43 | | |
| 44 | Add amounts in the right column for lines 37 through 43 (lines 37, 38b, 39b, 40a, 40c, 41, 42, and 43) | | | 44 | | |
| 45 | Inventory of livestock, produce, grains, and other products at beginning of the year. Do not include sales reported on Form 4797 | 45 | | | | |
| 46 | Cost of livestock, produce, grains, and other products purchased during the year | 46 | | | | |
| 47 | Add lines 45 and 46 | 47 | | | | |
| 48 | Inventory of livestock, produce, grains, and other products at end of year | 48 | | | | |
| 49 | Cost of livestock, produce, grains, and other products sold. Subtract line 48 from line 47* | | | 49 | | |
| 50 | Gross income. Subtract line 49 from line 44. Enter the result here and on Part I, line 9 | | | 50 | | |

*If you use the unit-livestock-price method or the farm-price method of valuing inventory and the amount on line 48 is larger than the amount on line 47, subtract line 47 from line 48. Enter the result on line 49. Add lines 44 and 49. Enter the total on line 50 and on Part I, line 9.

Part IV Principal Agricultural Activity Codes

Do not file Schedule F (Form 1040) to report the following.

- Income from providing agricultural services such as soil preparation, veterinary, farm labor, horticultural, or management for a fee or on a contract basis. Instead file Schedule C (Form 1040) or Schedule C-EZ (Form 1040).
- Income from breeding, raising, or caring for dogs, cats, or other pet animals. Instead file Schedule C (Form 1040) or Schedule C-EZ (Form 1040).
- Sales of livestock held for draft, breeding, sport, or dairy purposes. Instead file Form 4797.

These codes for the Principal Agricultural Activity classify farms by their primary activity to facilitate the administration of the Internal Revenue Code. These six-digit codes are based on the North American Industry Classification System (NAICS).

Select the code that best identifies your primary farming activity and enter the six-digit number on line B.

Crop Production

- 111100 Oilseed and grain farming
- 111210 Vegetable and melon farming

- 111300 Fruit and tree nut farming
- 111400 Greenhouse, nursery, and floriculture production
- 111900 Other crop farming

Animal Production

- 112111 Beef cattle ranching and farming
- 112112 Cattle feedlots
- 112120 Dairy cattle and milk production
- 112210 Hog and pig farming
- 112300 Poultry and egg production
- 112400 Sheep and goat farming
- 112510 Aquaculture
- 112900 Other animal production

Forestry and Logging

- 113000 Forestry and logging (including forest nurseries and timber tracts)

| 6 Add lines 4c and 5b 6 | 6 | | | |
| 7 Maximum amount of combined wages and self-employment earnings subject to social security tax or the 6.2% portion of the 7.65% railroad retirement (tier 1) tax for 2014 7 | 7 | 117,000 | 00 | |
| 8a Total social security wages and tips (total of boxes 3 and 7 on Form(s) W-2) and railroad retirement (tier 1) compensation. If \$117,000 or more, skip lines 8b through 10, and go to line 11 8a | 8a | | | |
| b Unreported tips subject to social security tax (from Form 4137, line 10) 8b | 8b | | | |
| c Wages subject to social security tax (from Form 8919, line 10) 8c | 8c | | | |
| d Add lines 8a, 8b, and 8c 8d | 8d | | | |
| 9 Subtract line 8d from line 7. If zero or less, enter -0- here and on line 10 and go to line 11 . ▶ 9 | 9 | | | |
| 10 Multiply the smaller of line 6 or line 9 by 12.4% (.124) 10 | 10 | | | |
| 11 Multiply line 6 by 2.9% (.029) 11 | 11 | | | |
| 12 Self-employment tax. Add lines 10 and 11. Enter here and on Form 1040, line 57, or Form 1040NR, line 55 12 | 12 | | | |
| 13 Deduction for one-half of self-employment tax. Multiply line 12 by 50% (.50). Enter the result here and on Form 1040, line 27, or Form 1040NR, line 27 13 | 13 | | | |

Part II Optional Methods To Figure Net Earnings (see instructions)

| | | | | |
|---|-----------|-------|----|--|
| Farm Optional Method. You may use this method only if (a) your gross farm income ¹ was not more than \$7,200, or (b) your net farm profits ² were less than \$5,198. | | | | |
| 14 Maximum income for optional methods 14 | 14 | 4,800 | 00 | |
| 15 Enter the smaller of: two-thirds (² / ₃) of gross farm income ¹ (not less than zero) or \$4,800. Also include this amount on line 4b above 15 | 15 | | | |
| Nonfarm Optional Method. You may use this method only if (a) your net nonfarm profits ³ were less than \$5,198 and also less than 72.189% of your gross nonfarm income, ⁴ and (b) you had net earnings from self-employment of at least \$400 in 2 of the prior 3 years. Caution. You may use this method no more than five times. | | | | |
| 16 Subtract line 15 from line 14 16 | 16 | | | |
| 17 Enter the smaller of: two-thirds (² / ₃) of gross nonfarm income ⁴ (not less than zero) or the amount on line 16. Also include this amount on line 4b above 17 | 17 | | | |

¹ From Sch. F, line 9, and Sch. K-1 (Form 1065), box 14, code B.
² From Sch. F, line 34, and Sch. K-1 (Form 1065), box 14, code A—minus the amount you would have entered on line 1b had you not used the optional method.
³ From Sch. C, line 31; Sch. C-EZ, line 3; Sch. K-1 (Form 1065), box 14, code A; and Sch. K-1 (Form 1065-B), box 9, code J1.
⁴ From Sch. C, line 7; Sch. C-EZ, line 1; Sch. K-1 (Form 1065), box 14, code C; and Sch. K-1 (Form 1065-B), box 9, code J2.

| Schedule A Charitable Deduction. Do not complete for a simple trust or a pooled income fund. | | |
|---|--|---|
| 1 | Amounts paid or permanently set aside for charitable purposes from gross income (see instructions) | 1 |
| 2 | Tax-exempt income allocable to charitable contributions (see instructions) | 2 |
| 3 | Subtract line 2 from line 1 | 3 |
| 4 | Capital gains for the tax year allocated to corpus and paid or permanently set aside for charitable purposes | 4 |
| 5 | Add lines 3 and 4 | 5 |
| 6 | Section 1202 exclusion allocable to capital gains paid or permanently set aside for charitable purposes (see instructions) | 6 |
| 7 | Charitable deduction. Subtract line 6 from line 5. Enter here and on page 1, line 13 | 7 |

| Schedule B Income Distribution Deduction | | |
|---|--|----|
| 1 | Adjusted total income (see instructions) | 1 |
| 2 | Adjusted tax-exempt interest | 2 |
| 3 | Total net gain from Schedule D (Form 1041), line 19, column (1) (see instructions) | 3 |
| 4 | Enter amount from Schedule A, line 4 (minus any allocable section 1202 exclusion) | 4 |
| 5 | Capital gains for the tax year included on Schedule A, line 1 (see instructions) | 5 |
| 6 | Enter any gain from page 1, line 4, as a negative number. If page 1, line 4, is a loss, enter the loss as a positive number | 6 |
| 7 | Distributable net income. Combine lines 1 through 6. If zero or less, enter -0- | 7 |
| 8 | If a complex trust, enter accounting income for the tax year as determined under the governing instrument and applicable local law | 8 |
| 9 | Income required to be distributed currently | 9 |
| 10 | Other amounts paid, credited, or otherwise required to be distributed | 10 |
| 11 | Total distributions. Add lines 9 and 10. If greater than line 8, see instructions | 11 |
| 12 | Enter the amount of tax-exempt income included on line 11 | 12 |
| 13 | Tentative income distribution deduction. Subtract line 12 from line 11 | 13 |
| 14 | Tentative income distribution deduction. Subtract line 2 from line 7. If zero or less, enter -0- | 14 |
| 15 | Income distribution deduction. Enter the smaller of line 13 or line 14 here and on page 1, line 18 | 15 |

| Schedule G Tax Computation (see instructions) | | |
|--|---|----|
| 1 | Tax: a Tax on taxable income (see instructions) | 1a |
| | b Tax on lump-sum distributions. Attach Form 4972 | 1b |
| | c Alternative minimum tax (from Schedule I (Form 1041), line 56) | 1c |
| | d Total. Add lines 1a through 1c | 1d |
| 2a | Foreign tax credit. Attach Form 1116 | 2a |
| | b General business credit. Attach Form 3800 | 2b |
| | c Credit for prior year minimum tax. Attach Form 8801 | 2c |
| | d Bond credits. Attach Form 8912 | 2d |
| | e Total credits. Add lines 2a through 2d | 2e |
| 3 | Subtract line 2e from line 1d. If zero or less, enter -0- | 3 |
| 4 | Net investment income tax from Form 8960, line 21 | 4 |
| 5 | Recapture taxes. Check if from: <input type="checkbox"/> Form 4255 <input type="checkbox"/> Form 8611 | 5 |
| 6 | Household employment taxes. Attach Schedule H (Form 1040) | 6 |
| 7 | Total tax. Add lines 3 through 6. Enter here and on page 1, line 23 | 7 |

| Other Information | | Yes | No |
|--------------------------|--|-----|----|
| 1 | Did the estate or trust receive tax-exempt income? If "Yes," attach a computation of the allocation of expenses. Enter the amount of tax-exempt interest income and exempt-interest dividends ► \$ _____ | | |
| 2 | Did the estate or trust receive all or any part of the earnings (salary, wages, and other compensation) of any individual by reason of a contract assignment or similar arrangement? | | |
| 3 | At any time during calendar year 2014, did the estate or trust have an interest in or a signature or other authority over a bank, securities, or other financial account in a foreign country? See the instructions for exceptions and filing requirements for FinCEN Form 114. If "Yes," enter the name of the foreign country ► _____ | | |
| 4 | During the tax year, did the estate or trust receive a distribution from, or was it the grantor of, or transferor to, a foreign trust? If "Yes," the estate or trust may have to file Form 3520. See instructions | | |
| 5 | Did the estate or trust receive, or pay, any qualified residence interest on seller-provided financing? If "Yes," see the instructions for required attachment | | |
| 6 | If this is an estate or a complex trust making the section 663(b) election, check here (see instructions) ► <input type="checkbox"/> | | |
| 7 | To make a section 643(e)(3) election, attach Schedule D (Form 1041), and check here (see instructions) ► <input type="checkbox"/> | | |
| 8 | If the decedent's estate has been open for more than 2 years, attach an explanation for the delay in closing the estate, and check here ► <input type="checkbox"/> | | |
| 9 | Are any present or future trust beneficiaries skip persons? See instructions | | |

| Schedule B Other Information | | | |
|-------------------------------------|--|--|--------------------------------|
| 1 | What type of entity is filing this return? Check the applicable box: | Yes | No |
| a | <input type="checkbox"/> Domestic general partnership | | |
| b | <input type="checkbox"/> Domestic limited partnership | | |
| c | <input type="checkbox"/> Domestic limited liability company | | |
| d | <input type="checkbox"/> Domestic limited liability partnership | | |
| e | <input type="checkbox"/> Foreign partnership | | |
| f | <input type="checkbox"/> Other ▶ | | |
| 2 | At any time during the tax year, was any partner in the partnership a disregarded entity, a partnership (including an entity treated as a partnership), a trust, an S corporation, an estate (other than an estate of a deceased partner), or a nominee or similar person? | | |
| 3 | At the end of the tax year: | | |
| a | Did any foreign or domestic corporation, partnership (including any entity treated as a partnership), trust, or tax-exempt organization, or any foreign government own, directly or indirectly, an interest of 50% or more in the profit, loss, or capital of the partnership? For rules of constructive ownership, see instructions. If "Yes," attach Schedule B-1, Information on Partners Owning 50% or More of the Partnership | | |
| b | Did any individual or estate own, directly or indirectly, an interest of 50% or more in the profit, loss, or capital of the partnership? For rules of constructive ownership, see instructions. If "Yes," attach Schedule B-1, Information on Partners Owning 50% or More of the Partnership | | |
| 4 | At the end of the tax year, did the partnership: | | |
| a | Own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of stock entitled to vote of any foreign or domestic corporation? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below | | |
| | (i) Name of Corporation | (ii) Employer Identification Number (if any) | (iii) Country of Incorporation |
| | (iv) Percentage Owned in Voting Stock | | |
| | | | |
| | | | |
| | | | |
| | | | |
| b | Own directly an interest of 20% or more, or own, directly or indirectly, an interest of 50% or more in the profit, loss, or capital in any foreign or domestic partnership (including an entity treated as a partnership) or in the beneficial interest of a trust? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (v) below | | |
| | (i) Name of Entity | (ii) Employer Identification Number (if any) | (iii) Type of Entity |
| | (iv) Country of Organization | (v) Maximum Percentage Owned in Profit, Loss, or Capital | |
| | | | |
| | | | |
| | | | |
| | | | |
| 5 | Did the partnership file Form 8893, Election of Partnership Level Tax Treatment, or an election statement under section 6231(a)(1)(B)(ii) for partnership-level tax treatment, that is in effect for this tax year? See Form 8893 for more details | Yes | No |
| 6 | Does the partnership satisfy all four of the following conditions? | | |
| a | The partnership's total receipts for the tax year were less than \$250,000. | | |
| b | The partnership's total assets at the end of the tax year were less than \$1 million. | | |
| c | Schedules K-1 are filed with the return and furnished to the partners on or before the due date (including extensions) for the partnership return. | | |
| d | The partnership is not filing and is not required to file Schedule M-3 If "Yes," the partnership is not required to complete Schedules L, M-1, and M-2; Item F on page 1 of Form 1065; or Item L on Schedule K-1. | | |
| 7 | Is this partnership a publicly traded partnership as defined in section 469(k)(2)? | | |
| 8 | During the tax year, did the partnership have any debt that was cancelled, was forgiven, or had the terms modified so as to reduce the principal amount of the debt? | | |
| 9 | Has this partnership filed, or is it required to file, Form 8918, Material Advisor Disclosure Statement, to provide information on any reportable transaction? | | |
| 10 | At any time during calendar year 2014, did the partnership have an interest in or a signature or other authority over a financial account in a foreign country (such as a bank account, securities account, or other financial account)? See the instructions for exceptions and filing requirements for FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR). If "Yes," enter the name of the foreign country. ▶ | | |

| | | |
| | | |

E Voluntary Filer.

Part I Financial Information and Net Income (Loss) Reconciliation

- 1a** Did the partnership file SEC Form 10-K for its income statement period ending with or within this tax year?
 - Yes.** Skip lines 1b and 1c and complete lines 2 through 11 with respect to that SEC Form 10-K.
 - No.** Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.
- b** Did the partnership prepare a certified audited non-tax-basis income statement for that period?
 - Yes.** Skip line 1c and complete lines 2 through 11 with respect to that income statement.
 - No.** Go to line 1c.
- c** Did the partnership prepare a non-tax-basis income statement for that period?
 - Yes.** Complete lines 2 through 11 with respect to that income statement.
 - No.** Skip lines 2 through 3b and enter the partnership's net income (loss) per its books and records on line 4a.
- 2** Enter the income statement period: Beginning ____ / ____ / ____ Ending ____ / ____ / ____
- 3a** Has the partnership's income statement been restated for the income statement period on line 2?
 - Yes.** (If "Yes," attach a statement and the amount of each item restated.)
 - No.**
- b** Has the partnership's income statement been restated for any of the five income statement periods immediately preceding the period on line 2?
 - Yes.** (If "Yes," attach a statement and the amount of each item restated.)
 - No.**

| | | |
|---|-----------|-----------|
| 4a Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1 | 4a | |
| b Indicate accounting standard used for line 4a (see instructions): | | |
| 1 <input type="checkbox"/> GAAP 2 <input type="checkbox"/> IFRS 3 <input type="checkbox"/> 704(b) | | |

| | _____ | | 6 | Other decreases (itemize): _____ | |
| | _____ | | 7 | Add lines 5 and 6 | |
| 4 | Add lines 1, 2, and 3 | | 8 | Balance at end of year (line 4 less line 7) | |

**SCHEDULE M-3
(Form 1120)**

**Net Income (Loss) Reconciliation for Corporations
With Total Assets of \$10 Million or More**

OMB No. 1545-0123

2014

Department of the Treasury
Internal Revenue Service

▶ **Attach to Form 1120 or 1120-C.** ▶ **Information about Schedule M-3 (Form 1120) and its separate instructions is available at www.irs.gov/form1120.**

Name of corporation (common parent, if consolidated return)

Employer identification number

- Check applicable box(es): (1) Non-consolidated return (2) Consolidated return (Form 1120 only)
(3) Mixed 1120/L/PC group (4) Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

- 1a** Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
 Yes. Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
 No. Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.
- b** Did the corporation prepare a certified audited non-tax-basis income statement for that period?
 Yes. Skip line 1c and complete lines 2a through 11 with respect to that income statement.
 No. Go to line 1c.
- c** Did the corporation prepare a non-tax-basis income statement for that period?
 Yes. Complete lines 2a through 11 with respect to that income statement.
 No. Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.
- 2a** Enter the income statement period: Beginning MM/DD/YYYY Ending MM/DD/YYYY
- b** Has the corporation's income statement been restated for the income statement period on line 2a?
 Yes. (If "Yes," attach an explanation and the amount of each item restated.)
 No.
- c** Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
 Yes. (If "Yes," attach an explanation and the amount of each item restated.)
 No.
- 3a** Is any of the corporation's voting common stock publicly traded?
 Yes.
 No. If "No," go to line 4a.
- b** Enter the symbol of the corporation's primary U.S. publicly traded voting common stock
- c** Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock

**SCHEDULE M-3
(Form 1120S)**

**Net Income (Loss) Reconciliation for S Corporations
With Total Assets of \$10 Million or More**

OMB No. 1545-0123

2014

Department of the Treasury
Internal Revenue Service

▶ Attach to Form 1120S.

▶ Information about Sch. M-3 (Form 1120S) and its separate instructions is at www.irs.gov/form1120s.

Name of corporation _____

Employer identification number _____

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation prepare a certified audited non-tax-basis income statement for the period ending with or within this tax year? (See instructions if multiple non-tax-basis income statements are prepared.)

- Yes.** Skip line 1b and complete lines 2 through 11 with respect to that income statement.
- No.** Go to line 1b.

b Did the corporation prepare a non-tax-basis income statement for that period?

- Yes.** Complete lines 2 through 11 with respect to that income statement.
- No.** Skip lines 2 through 3b and enter the corporation's net income (loss) per its books and records on line 4a.

2 Enter the income statement period: Beginning _____ / _____ / _____ Ending _____ / _____ / _____

3 a Has the corporation's income statement been restated for the income statement period on line 2?

- Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
- No.**

b Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2?

- Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
- No.**

| | | |
|--|-----------|----------------|
| 4 a Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1 | 4a | |

Part I Additional Medicare Tax on Medicare Wages

| | | | | |
|----------|---|----------|--|--|
| 1 | Medicare wages and tips from Form W-2, box 5. If you have more than one Form W-2, enter the total of the amounts from box 5 | 1 | | |
| 2 | Unreported tips from Form 4137, line 6 | 2 | | |
| 3 | Wages from Form 8919, line 6 | 3 | | |
| 4 | Add lines 1 through 3 | 4 | | |
| 5 | Enter the following amount for your filing status: Married filing jointly \$250,000 Married filing separately \$125,000 Single, Head of household, or Qualifying widow(er) \$200,000 | 5 | | |
| 6 | Subtract line 5 from line 4. If zero or less, enter -0- | 6 | | |
| 7 | Additional Medicare Tax on Medicare wages. Multiply line 6 by 0.9% (.009). Enter here and go to Part II | 7 | | |

Part II Additional Medicare Tax on Self-Employment Income

| | | | | |
|-----------|---|-----------|--|--|
| 8 | Self-employment income from Schedule SE (Form 1040), Section A, line 4, or Section B, line 6. If you had a loss, enter -0- (Form 1040-PR and Form 1040-SS filers, see instructions.) | 8 | | |
| 9 | Enter the following amount for your filing status: Married filing jointly \$250,000 Married filing separately \$125,000 Single, Head of household, or Qualifying widow(er) \$200,000 | 9 | | |
| 10 | Enter the amount from line 4 | 10 | | |
| 11 | Subtract line 10 from line 9. If zero or less, enter -0- | 11 | | |
| 12 | Subtract line 11 from line 8. If zero or less, enter -0- | 12 | | |
| 13 | Additional Medicare Tax on self-employment income. Multiply line 12 by 0.9% (.009). Enter here and go to Part III | 13 | | |

Part III Additional Medicare Tax on Railroad Retirement Tax Act (RRTA) Compensation

| | | | | |
|-----------|---|-----------|--|--|
| 14 | Railroad retirement (RRTA) compensation and tips from Form(s) W-2, box 14 (see instructions) | 14 | | |
| 15 | Enter the following amount for your filing status: Married filing jointly \$250,000 Married filing separately \$125,000 Single, Head of household, or Qualifying widow(er) \$200,000 | 15 | | |
| 16 | Subtract line 15 from line 14. If zero or less, enter -0- | 16 | | |
| 17 | Additional Medicare Tax on railroad retirement (RRTA) compensation. Multiply line 16 by 0.9% (.009). Enter here and go to Part IV | 17 | | |

Part IV Total Additional Medicare Tax

| | | | | |
|-----------|--|-----------|--|--|
| 18 | Add lines 7, 13, and 17. Also include this amount on Form 1040, line 62, (Form 1040NR, 1040-PR, and 1040-SS filers, see instructions) and go to Part V | 18 | | |
|-----------|--|-----------|--|--|

Part V Withholding Reconciliation

| | | | | |
|-----------|--|-----------|--|--|
| 19 | Medicare tax withheld from Form W-2, box 6. If you have more than one Form W-2, enter the total of the amounts from box 6 | 19 | | |
| 20 | Enter the amount from line 1 | 20 | | |
| 21 | Multiply line 20 by 1.45% (.0145). This is your regular Medicare tax withholding on Medicare wages | 21 | | |
| 22 | Subtract line 21 from line 19. If zero or less, enter -0-. This is your Additional Medicare Tax withholding on Medicare wages | 22 | | |
| 23 | Additional Medicare Tax withholding on railroad retirement (RRTA) compensation from Form W-2, box 14 (see instructions) | 23 | | |
| 24 | Total Additional Medicare Tax withholding. Add lines 22 and 23. Also include this amount with federal income tax withholding on Form 1040, line 64 (Form 1040NR, 1040-PR, and 1040-SS filers, see instructions) | 24 | | |

| 24 Total Premium Tax Credit: Enter the amount from line 11E or add lines 12E through 23E and enter the total here | 24 | |
| 25 Advance Payment of PTC: Enter the amount from line 11F or add lines 12F through 23F and enter the total here | 25 | |
| 26 Net Premium Tax Credit: If line 24 is greater than line 25, subtract line 25 from line 24. Enter the difference here and on Form 1040, line 69; Form 1040A, line 45; or Form 1040NR, line 65. If you elected the alternative calculation for marriage, enter zero. If line 24 equals line 25, enter zero. Stop here. If line 25 is greater than line 24, leave this line blank and continue to line 27 | 26 | |

Part 3: Repayment of Excess Advance Payment of the Premium Tax Credit

| | | |
|---|-----------|--|
| 27 Excess Advance Payment of PTC: If line 25 is greater than line 24, subtract line 24 from line 25. Enter the difference here | 27 | |
| 28 Repayment Limitation: Using the percentage on line 5 and your filing status, locate the repayment limitation amount in the instructions. Enter the amount here | 28 | |
| 29 Excess Advance Premium Tax Credit Repayment: Enter the smaller of line 27 or line 28 here and on Form 1040, line 46; Form 1040A, line 29; or Form 1040NR, line 44 | 29 | |

Appendix C

Glossary

The key terms in this glossary have been defined to reflect their conventional use in the field of taxation. The definitions may therefore be incomplete for other purposes.

A

- AAA bypass election.** In the context of a distribution by an S corporation, an election made by the entity to designate that the distribution is first from accumulated earnings and profits (AEP) and only then from the accumulated adjustments account (AAA).
- Abandoned spouse.** The abandoned spouse provision enables a married taxpayer with a dependent child whose spouse did not live in the taxpayer's home during the last six months of the tax year to file as a head of household rather than as married filing separately.
- Accelerated cost recovery system (ACRS).** A method in which the cost of tangible property is recovered (depreciated) over a prescribed period of time. This depreciation approach disregards salvage value, imposes a period of cost recovery that depends upon the classification of the asset into one of various recovery periods, and prescribes the applicable percentage of cost that can be deducted each year. A modified system is currently the default cost recovery method; it is referred to as MACRS. § 168.
- Accelerated death benefits.** The amount received from a life insurance policy by the insured who is terminally ill or chronically ill. Any realized gain may be excluded from the gross income of the insured if the policy is surrendered to the insurer or is sold to a licensed viatical settlement provider. § 101(g).
- Acceleration rule.** Treatment of an intercompany transaction on a consolidated return, when a sold asset leaves the group.
- Accident and health benefits.** Employee fringe benefits provided by employers through the payment of health and accident insurance premiums or the establishment of employer-funded medical reimbursement plans. Employers generally are entitled to a deduction for such payments, whereas employees generally exclude such fringe benefits from gross income. §§ 105 and 106.
- Accident and health insurance benefits.** See *accident and health benefits*.
- Accountable plan.** A type of expense reimbursement plan that requires an employee to render an adequate accounting to the employer and return any excess reimbursement or allowance. If the expense qualifies, it will be treated as a deduction *for* AGI.
- Accounting income.** The accountant's concept of income is generally based upon the realization principle. Financial accounting income may differ from taxable income (e.g., accelerated depreciation might be used for Federal income tax and straight-line depreciation for financial accounting purposes). Differences are included in a reconciliation of taxable and accounting income on Schedule M-1 or Schedule M-3 of Form 1120 for corporations.
- Accounting method.** The method under which income and expenses are determined for tax purposes. Important accounting methods include the cash basis and the accrual basis. Special methods are available for the reporting of gain on installment sales, recognition of income on construction projects (the completed contract and percentage of completion methods), and the valuation of inventories (last-in, first-out and first-in, first-out). §§ 446-474.
- Accounting period.** The period of time, usually a year, used by a taxpayer for the determination of tax liability. Unless a fiscal year is chosen, taxpayers must determine and pay their income tax liability by using the calendar year (January 1 through December 31) as the period of measurement. An example of a fiscal year is July 1 through June 30. A change in accounting period (e.g., from a calendar year to a fiscal year) generally requires the consent of the IRS. Usually, taxpayers are free to select either an initial calendar or a fiscal year without the consent of the IRS. §§ 441-444.
- Accrual method.** A method of accounting that reflects expenses incurred and income earned for any one tax year. In contrast to the cash basis of accounting, expenses need not be paid to be deductible, nor need income be received to be taxable. Unearned income (e.g., prepaid interest and rent) generally is taxed in the year of receipt regardless of the method of accounting used by the taxpayer. § 446(c)(2).

Accumulated adjustments account (AAA). An account that aggregates an S corporation's post-1982 income, loss, and deductions for the tax year (including nontaxable income and nondeductible losses and expenses). After the year-end income and expense adjustments are made, the account is reduced by distributions made during the tax year.

Accumulated E & P. See *accumulated earnings and profits*.

Accumulated earnings and profits. Net undistributed tax-basis earnings of a corporation aggregated from March 1, 1913, to the end of the prior tax year. Used to determine the amount of dividend income associated with a distribution to shareholders. § 316 and Reg. § 1.316-2.

Accumulated earnings credit. A reduction allowed in arriving at accumulated taxable income, in determining the accumulated earnings tax.

Accumulated earnings tax. A special tax imposed on C corporations that accumulate (rather than distribute) their earnings beyond the reasonable needs of the business. The accumulated earnings tax and related interest are imposed on accumulated taxable income in addition to the corporate income tax. §§ 531-537.

Accumulated taxable income (ATI). The base upon which the accumulated earnings tax is imposed. Generally, it is the taxable income of the corporation as adjusted for certain items (e.g., the Federal income tax, excess charitable contributions, the dividends received deduction) less the dividends paid deduction and the accumulated earnings credit. § 535.

Accuracy-related penalty. Major civil taxpayer penalties relating to the accuracy of tax return data, including misstatements stemming from taxpayer negligence and improper valuation of income and deductions, are coordinated under this umbrella term. The penalty usually equals 20 percent of the understated tax liability.

ACE adjustment. An adjustment in computing corporate alternative minimum taxable income (AMTI), computed at 75 percent of the excess of adjusted current earnings (ACE) over unadjusted AMTI. ACE computations reflect longer and slower cost recovery deductions and other restrictions on the timing of certain recognition events. Exempt interest, life insurance proceeds, and other receipts that are included in earnings and profits but not in taxable income also increase the ACE adjustment. If unadjusted AMTI exceeds ACE, the ACE adjustment is negative. The negative adjustment is limited to the aggregate of the positive adjustments under ACE for prior years, reduced by any previously claimed negative adjustments.

Acquiescence. Agreement by the IRS on the results reached in certain judicial decisions; sometimes abbreviated *Acq.* or *A.*

Acquisition indebtedness. Debt incurred in acquiring, constructing, or substantially improving a qualified residence of the taxpayer. The interest on such loans is deductible as qualified residence interest. However, interest on such debt is deductible only on the portion of the indebtedness that does not exceed \$1,000,000 (\$500,000 for married persons filing separate returns). § 163(h)(3).

Acquisitive reorganization. A "Type D" reorganization where substantially all of the acquiring corporation's property is transferred to the target and the acquiring corporation's shareholders own at least 50 percent of the

target after the restructuring. The acquiring liquidates after the restructuring.

Active income. Wages, salary, commissions, bonuses, profits from a trade or business in which the taxpayer is a material participant, gain on the sale or other disposition of assets used in an active trade or business, and income from intangible property if the taxpayer's personal efforts significantly contributed to the creation of the property. The passive activity loss rules require classification of income and losses into three categories with active income being one of them.

Ad valorem tax. A tax imposed on the value of property. The most common ad valorem tax is that imposed by states, counties, and cities on real estate. Ad valorem taxes can be imposed on personal property as well.

Additional first-year depreciation. See *fifty percent additional first-year depreciation* and *one hundred percent additional first-year depreciation*.

Additional Medicare Tax. A tax created as part of the Affordable Care Act that went into effect starting in 2013. This tax is imposed at 0.9% on an individual's wage and self-employment income in excess of a threshold amount. For married individuals, the threshold is \$250,000 (\$125,000 if married filing separately). For other individuals the threshold is \$200,000. These dollar amounts are not adjusted annually for inflation. If an employer pays an employee more than \$200,000 during the year, then regardless of filing status, the employer is required to withhold the Additional Medicare Tax on the excess paid over \$200,000 and reports the tax on the employee's Form W-2. The tax is reported on Form 8959 (Additional Medicare Tax), filed with the individual's Form 1040. § 3101(b) and § 1401(b).

Adjusted basis. The cost or other basis of property reduced by depreciation allowed or allowable and increased by capital improvements. Other special adjustments are provided in § 1016 and the related Regulations.

Adjusted current earnings (ACE). Used to determine an adjustment in computing corporate alternative minimum taxable income (AMTI). ACE reflects restrictions on the timing of certain recognition events. Exempt interest, life insurance proceeds, and other receipts that are included in earnings and profits but not in taxable income also increase ACE.

Adjustments. See *AMT adjustments*.

Adoption expenses credit. A provision intended to assist taxpayers who incur nonrecurring costs directly associated with the adoption process, such as legal costs, social service review costs, and transportation costs. Up to \$13,400 (\$13,400 for a child with special needs regardless of the actual adoption expenses) of costs incurred to adopt an eligible child qualify for the credit. A taxpayer may claim the credit in the year qualifying expenses are paid or incurred if the expenses are paid during or after the year in which the adoption is finalized. For qualifying expenses paid or incurred in a tax year prior to the year the adoption is finalized, the credit must be claimed in the tax year following the tax year during which the expenses are paid or incurred. § 23.

Affiliated group. A parent-subsidiary group of corporations that is eligible to elect to file on a consolidated basis. Eighty

percent ownership of the voting power and value of all of the corporations must be achieved every day of the tax year, and an identifiable parent corporation must exist (i.e., it must own at least 80 percent of another group member without applying attribution rules).

Aggregate (conduit) concept. The theory of partnership taxation under which, in certain cases, a partnership is treated as a mere collection of the activities of each partner. See also *entity concept*.

Alimony and separate maintenance payments. Alimony deductions result from the payment of a legal obligation arising from the termination of a marital relationship. Payments designated as alimony generally are included in the gross income of the recipient and are deductible for AGI by the payor.

Alimony recapture. The amount of alimony that previously has been included in the gross income of the recipient and deducted by the payor that now is deducted by the recipient and included in the gross income of the payor as the result of front-loading. § 71(f).

All events test. For accrual method taxpayers, income is earned when (1) all of the events have occurred that fix the right to receive the income and (2) the amount can be determined with reasonable accuracy. Accrual of income cannot be postponed simply because a portion of the income may have to be returned in a subsequent period. The all events test also is utilized to determine when expenses can be deducted by an accrual basis taxpayer. The application of the test could cause a variation between the treatment of an item for accounting and for tax purposes. For example, a reserve for warranty expense may be properly accruable under generally accepted accounting principles but not be deductible under the Federal income tax law. Because of the application of the all events test, the deduction becomes available in the year the warranty obligation becomes fixed and the amount is determinable with reasonable certainty. Reg. §§ 1.446-1(c)(1)(ii) and 1.461-1(a)(2).

Allocate. The assignment of income for various tax purposes. A multistate corporation's nonbusiness income usually is allocated to the state where the nonbusiness assets are located; it is not apportioned with the rest of the entity's income. The income and expense items of an estate or a trust are allocated between income and corpus components. Specific items of income, expense, gain, loss, and credit can be allocated to specific partners if a substantial economic nontax purpose for the allocation is established.

Alternate valuation date. Property passing from a decedent by death may be valued for estate tax purposes as of the date of death or the alternate valuation date. The alternate valuation date is six months after the date of death or the date the property is disposed of by the estate, whichever comes first. To use the alternate valuation date, the executor or administrator of the estate must make an affirmative election. Election of the alternate valuation date is not available unless it decreases the amount of the gross estate and reduces the estate tax liability.

Alternative depreciation system (ADS). A cost recovery system that produces a smaller deduction than would be calculated under ACRS or MACRS. The alternative system

must be used in certain instances and can be elected in other instances. § 168(g).

Alternative minimum tax (AMT). The AMT is a fixed percentage of alternative minimum taxable income (AMTI). AMTI generally starts with the taxpayer's adjusted gross income (for individuals) or taxable income (for other taxpayers). To this amount, the taxpayer (1) adds designated preference items (e.g., tax-exempt interest income on private activity bonds), (2) makes other specified adjustments (e.g., to reflect a longer, straight-line cost recovery deduction), (3) adjusts certain AMT itemized deductions for individuals (e.g., interest incurred on housing but not taxes paid), and (4) subtracts an exemption amount. The taxpayer must pay the greater of the resulting AMT (reduced for larger corporations by only the foreign tax credit) or the regular income tax (reduced by all allowable tax credits). The AMT does not apply at all to certain small C corporations. AMT preferences and adjustments are assigned to partners, LLC members, and S corporation shareholders.

Alternative minimum tax credit. The AMT can result from timing differences that give rise to positive adjustments in calculating the AMT base. To provide equity for the taxpayer when these timing differences reverse, the regular tax liability may be reduced by a tax credit for a prior year's minimum tax liability attributable to timing differences. § 53.

Alternative minimum taxable income (AMTI). The base (prior to deducting the exemption amount) for computing a taxpayer's alternative minimum tax. This consists of the taxable income for the year modified for AMT adjustments and AMT preferences. § 55(b)(2).

Alternative tax. An option that is allowed in computing the tax on net capital gain. For the corporate taxpayer, the rate is 35 percent (the same as the highest regular corporate tax rate). Thus, for corporate taxpayers, the alternative tax does not produce a beneficial result. For noncorporate taxpayers, the rate is usually 15 percent (but is 25 percent for unrecaptured § 1250 gain and 28 percent for collectibles and § 1202 gain). However, if the noncorporate taxpayer is in either the 10 percent or the 15 percent tax bracket, the alternative tax rate is 0 percent (rather than 15 percent). Certain high-income taxpayers (i.e., in the 39.6 percent tax bracket) have an alternative tax rate of 20 percent. §§ 1(h) and 1201.

Alternative tax NOL deduction (ATNOLD). In calculating the AMT, the taxpayer is allowed to deduct NOL carryovers and carrybacks. However, for this purpose, a special calculation is required that is referred to as the ATNOLD. The regular income tax is modified for AMT adjustments and preferences to produce the ATNOLD. § 56(d).

American Opportunity credit. This credit replaces the HOPE scholarship credit for 2009 through 2017 and applies for qualifying expenses for the first four years of postsecondary education. Qualified expenses include tuition and related expenses and books and other course materials. Room and board are ineligible for the credit. The maximum credit available per student is \$2,500 (100 percent of the first \$2,000 of qualified expenses and 25 percent of the next \$2,000 of qualified expenses). Eligible students include the taxpayer, taxpayer's spouse, and taxpayer's dependents. To qualify for the credit, a student must take

at least one-half of the full-time course load for at least one academic term at a qualifying educational institution. The credit is phased out for higher-income taxpayers. § 25A.

Amortization. The tax deduction for the cost or other basis of an intangible asset over the asset's estimated useful life. Examples of amortizable intangibles include patents, copyrights, and leasehold interests. Most purchased intangible assets (e.g., goodwill) can be amortized for income tax purposes over a 15-year period.

Amount realized. The amount received by a taxpayer upon the sale or exchange of property. Amount realized is the sum of the cash and the fair market value of any property or services received by the taxpayer plus any related debt assumed by the buyer. Determining the amount realized is the starting point for arriving at realized gain or loss. § 1001(b).

AMT adjustments. In calculating AMTI, certain adjustments are added to or deducted from taxable income. These adjustments generally reflect timing differences. § 56.

AMT exemption. An amount deducted from alternative minimum taxable income in deriving alternative minimum tax base. The exemption amount is phased out when AMTI exceeds specified threshold amounts.

AMT preferences. In calculating alternative minimum taxable income (AMTI), certain preference items are added to taxable income. AMT preferences generally reflect differences between the regular tax and the alternative minimum tax (AMT) computational bases. For instance, interest income from certain state and local bonds may be an AMT preference item.

Annual exclusion. In computing the taxable gifts for the year, each donor excludes the first \$14,000 (for 2015) of a gift to each donee. Usually, the annual exclusion is not available for gifts of future interests. § 2503(b).

Annuity. A fixed sum of money payable to a person at specified times for a specified period of time or for life. If the party making the payment (i.e., the obligor) is regularly engaged in this type of business (e.g., an insurance company), the arrangement is classified as a commercial annuity. A so-called private annuity involves an obligor that is not regularly engaged in selling annuities (e.g., a charity or family member).

Apportionment. The assignment of the business income of a multi-state corporation to specific states for income taxation. Usually, the apportionment procedure accounts for the property, payroll, and sales activity levels of the various states, and a proportionate assignment of the entity's total income is made using a three-factor apportionment formula. These activities indicate the commercial domicile of the corporation relative to that income. Some states exclude nonbusiness income from the apportionment procedure; they allocate nonbusiness income to the states where the nonbusiness assets are located.

Appreciated inventory. In partnership taxation, appreciated inventory is a hot asset, and a partner's share of its ordinary income potential must be allocated. If a partner sells an interest in the partnership, ordinary income is recognized to the extent of the partner's share in the partnership's inventory and unrealized receivables. The definition of "inventory" here is broad enough to include any accounts receivable, including unrealized receivables.

Arm's length. See *arm's length transaction*.

Arm's length price. See *arm's length transaction*.

Arm's length transaction. The standard under which unrelated parties would determine an exchange price for a transaction. Suppose, for example, Cardinal Corporation sells property to its sole shareholder for \$10,000. In testing whether the \$10,000 is an "arm's length" price, one would ascertain the price that would have been negotiated between the corporation and an unrelated party in a bargained exchange.

ASC 740 (SFAS 109). Under Generally Accepted Accounting Principles, the rules for the financial reporting of the tax expense of an enterprise. Permanent differences affect the enterprise's effective tax rate. Temporary differences create a deferred tax asset or a deferred tax liability on the balance sheet.

ASC 740-10 (FIN 48). An interpretation by the Financial Accounting Standards Board. When an uncertain tax return position exists, this interpretation is used to determine the financial reporting treatment, if any, for the taxpayer. If it is more likely than not (i.e., a greater than 50 percent probability) that the uncertain return position will be sustained (e.g., by the courts) on its technical merits, it must be reported on the financial statements. The amount to be reported then is computed based on the probabilities of the outcome of the technical review, and the amounts at which the dispute would be resolved. If the more-likely-than-not test is failed, no current financial disclosure of the results of the return position is required.

ASC 740-30 (APB 23). Under Generally Accepted Accounting Principles, the rules for the financial reporting of the tax expense relative to a U.S. corporation's non-U.S. subsidiary. If the parent documents that it is permanently reinvesting the non-U.S. earnings of a non-U.S. subsidiary, the parent does not record as an expense any U.S. income tax the parent might pay on such earnings (i.e., the book tax expense is deferred until such earnings are, if ever, repatriated to the United States).

Asset use test. In the context of a corporate reorganization, a means by which to determine if the continuity of business enterprise requirement is met. The acquiring corporation must continue to use the target entity's assets in the acquirer's business going forward; if this is not the case, the requirement is failed.

Assignment of income. A taxpayer attempts to avoid the recognition of income by assigning to another the property that generates the income. Such a procedure will not avoid income recognition by the taxpayer making the assignment if the income was earned at the point of the transfer. In this case, the income is taxed to the person who earns it.

At-risk limitation. Generally, a taxpayer can deduct losses related to a trade or business, S corporation, partnership, or investment asset only to the extent of the at-risk amount. The taxpayer has an amount at risk in a business or investment venture to the extent that personal assets have been subjected to the risks of the business. Typically, the taxpayer's at-risk amount includes (1) the amount of money or other property that the investor contributed to the venture for the investment, (2) the amount of any of the entity's liabilities for which the taxpayer personally is liable and that

relate to the investment, and (3) an allocable share of nonrecourse debts incurred by the venture from third parties in arm's length transactions for real estate investments.

Attribution. Under certain circumstances, the tax law applies attribution (constructive ownership) rules to assign to one taxpayer the ownership interest of another taxpayer. If, for example, the stock of Gold Corporation is held 60 percent by Marsha and 40 percent by Sidney, Marsha may be deemed to own 100 percent of Gold Corporation if Marsha and Sidney are mother and child. In that case, the stock owned by Sidney is attributed to Marsha. Stated differently, Marsha has a 60 percent direct and a 40 percent indirect interest in Gold Corporation. It can also be said that Marsha is the constructive owner of Sidney's interest.

Automatic mileage method. Automobile expenses are generally deductible only to the extent the automobile is used in business or for the production of income. Personal commuting expenses are not deductible. The taxpayer may deduct actual expenses (including depreciation and insurance), or the standard (automatic) mileage rate may be used (57.5 cents per mile for 2015 and 56 cents per mile for 2014). Automobile expenses incurred for medical purposes or in connection with job-related moving expenses are deductible to the extent of actual out-of-pocket expenses or at the rate of 23 cents per mile for 2015 and 23.5 cents per mile for 2014. For charitable activities, the rate is 14 cents per mile.

B

Bad debts. A deduction is permitted if a business account receivable subsequently becomes partially or completely worthless, providing the income arising from the debt previously was included in income. Available methods are the specific charge-off method and the reserve method. However, except for certain financial institutions, TRA of 1986 repealed the use of the reserve method for 1987 and thereafter. If the reserve method is used, partially or totally worthless accounts are charged to the reserve. A nonbusiness bad debt deduction is allowed as a short-term capital loss if the loan did not arise in connection with the creditor's trade or business activities. Loans between related parties (family members) generally are classified as nonbusiness. § 166.

Balance sheet approach. The process under ASC 740 (SFAS 109) by which an entity's deferred tax expense or deferred tax benefit is determined as a result of the reporting period's changes in the balance sheet's deferred tax asset and deferred tax liability accounts.

Basis in partnership interest. The acquisition cost of the partner's ownership interest in the partnership. Includes purchase price and associated debt acquired from other partners and in the course of the entity's trade or business.

Benchmarking. The tax professional's use of two or more entities' effective tax rates and deferred tax balance sheet accounts. Used chiefly to compare the effectiveness of the entities' tax planning techniques, and to suggest future tax-motivated courses of action.

Blockage rule. A factor to be considered in valuing a large block of corporate stock. Application of this rule generally justifies a discount in the asset's fair market value, because

the disposition of a large amount of stock at any one time may depress the value of the shares in the marketplace.

Boot. Cash or property of a type not included in the definition of a tax-deferred exchange. The receipt of boot causes an otherwise tax-deferred transfer to become immediately taxable to the extent of the lesser of the fair market value of the boot or the realized gain on the transfer. For example, see transfers to controlled corporations under § 351(b) and like-kind exchanges under § 1031(b).

Branch profits tax. A tax on the effectively connected earnings and profits of the U.S. branch of a foreign corporation. The tax is levied in addition to the usual § 11 tax in an amount equal to 30 percent of the dividend equivalent amount. Treaties can override the tax or reduce the withholding percentage. Earnings reinvested in the U.S. operations of the entity are not subject to the tax until repatriation.

Built-in gains tax. A penalty tax designed to discourage a shift of the incidence of taxation on unrealized gains from a C corporation to its shareholders, via an S election. Under this provision, any recognized gain during the first 10 (or 7 or 5) years of S status generates a corporate-level tax on a base not to exceed the aggregate untaxed built-in gains brought into the S corporation upon its election from C corporation taxable years.

Built-in loss property. Property contributed to a corporation under § 351 or as a contribution to capital that has a basis in excess of its fair market value. An adjustment is necessary to step down the basis of the property to its fair market value. The adjustment prevents the corporation and the contributing shareholder from obtaining a double tax benefit. The corporation allocates the adjustment proportionately among the assets with the built-in loss. As an alternative to the corporate adjustment, the shareholder may elect to reduce the basis in the stock.

Business bad debt. A tax deduction allowed for obligations obtained in connection with a trade or business that have become either partially or completely worthless. In contrast to nonbusiness bad debts, business bad debts are deductible as business expenses. § 166.

Business purpose. A justifiable business reason for carrying out a transaction. Mere tax avoidance is not an acceptable business purpose. The presence of a business purpose is crucial in the area of corporate reorganizations and certain liquidations.

Buy-sell agreement. An arrangement, particularly appropriate in the case of a closely held corporation or a partnership, whereby the surviving owners (shareholders or partners) or the entity agrees to purchase the interest of a withdrawing owner. The buy-sell agreement provides for an orderly disposition of an interest in a business and may aid in setting the value of the interest for estate tax purposes.

Bypass amount. The amount that can be transferred by gift or at death free of any unified transfer tax. For 2015, the bypass amount is \$5.43 million for estate tax and \$5.43 million for gift tax.

Bypass election. In the context of a distribution by an S corporation, an election made by the entity to designate that the distribution is first from accumulated earnings and profits and only then from the accumulated adjustments account (AAA).

C

- C corporation.** A separate taxable entity subject to the rules of Subchapter C of the Code. This business form may create a double taxation effect relative to its shareholders. The entity is subject to the regular corporate tax and a number of penalty taxes at the Federal level.
- Cafeteria plan.** An employee benefit plan under which an employee is allowed to select from among a variety of employer-provided fringe benefits. Some of the benefits may be taxable, and some may be statutory nontaxable benefits (e.g., health and accident insurance and group term life insurance). The employee is taxed only on the taxable benefits selected. A cafeteria benefit plan is also referred to as a flexible benefit plan. § 125.
- Capital account.** The financial accounting analog of a partner's tax basis in the entity.
- Capital asset.** Broadly speaking, all assets are capital except those specifically excluded from that definition by the Code. Major categories of noncapital assets include property held for resale in the normal course of business (inventory), trade accounts and notes receivable, and depreciable property and real estate used in a trade or business (§ 1231 assets). § 1221.
- Capital contribution.** Various means by which a shareholder makes additional funds available to the corporation (placed at the risk of the business), sometimes without the receipt of additional stock. If no stock is received, the contributions are added to the basis of the shareholder's existing stock investment and do not generate gross income to the corporation. § 118.
- Capital gain.** The gain from the sale or exchange of a capital asset.
- Capital gain property.** Property contributed to a charitable organization that if sold rather than contributed, would have resulted in long-term capital gain to the donor.
- Capital interest.** Usually, the percentage of the entity's net assets that a partner would receive on liquidation. Typically determined by the partner's capital sharing ratio.
- Capital loss.** The loss from the sale or exchange of a capital asset.
- Capital sharing ratio.** A partner's percentage ownership of the entity's capital.
- Cash balance plan.** A hybrid form of pension plan similar in some aspects to a defined benefit plan. Such a plan is funded by the employer, and the employer bears the investment risks and rewards. But like defined contribution plans, a cash balance plan establishes allocations to individual employee accounts, and the payout for an employee depends on investment performance.
- Cash equivalent doctrine.** Generally, a cash basis taxpayer does not report income until cash is constructively or actually received. Under the cash equivalent doctrine, cash basis taxpayers are required to report income if they receive the equivalent of cash (e.g., property is received) in a taxable transaction.
- Cash method.** See *cash receipts method*.
- Cash receipts method.** A method of accounting that reflects deductions as paid and income as received in any one tax year. However, deductions for prepaid expenses that benefit more than one tax year (e.g., prepaid rent and prepaid interest) usually are spread over the period benefited rather than deducted in the year paid. § 446(c)(1).
- Casualty loss.** A casualty is defined as "the complete or partial destruction of property resulting from an identifiable event of a sudden, unexpected or unusual nature" (e.g., floods, storms, fires, auto accidents). Individuals may deduct a casualty loss only if the loss is incurred in a trade or business or in a transaction entered into for profit or arises from fire, storm, shipwreck, or other casualty or from theft. Individuals usually deduct personal casualty losses as itemized deductions subject to a \$100 nondeductible amount and to an annual floor equal to 10 percent of adjusted gross income that applies after the \$100 per casualty floor has been applied. Special rules are provided for the netting of certain casualty gains and losses.
- Certiorari.** Appeal from a U.S. Court of Appeals to the U.S. Supreme Court is by Writ of Certiorari. The Supreme Court does not have to accept the appeal and usually does not (cert. den.) unless there is a conflict among the lower courts that needs to be resolved or a constitutional issue is involved.
- Charitable contributions.** Contributions are deductible (subject to various restrictions and ceiling limitations) if made to qualified nonprofit charitable organizations. A cash basis taxpayer is entitled to a deduction solely in the year of payment. Accrual basis corporations may accrue contributions at year-end if payment is properly authorized before the end of the year and payment is made within two and one-half months after the end of the year. § 170.
- Check-the-box Regulations.** By using the check-the-box rules prudently, an entity can select the most attractive tax results offered by the Code, without being bound by legal forms. By default, an unincorporated entity with more than one owner is taxed as a partnership; an unincorporated entity with one owner is a disregarded entity, taxed as a sole proprietorship or corporate division. No action is necessary by the taxpayer if the legal form or default status is desired. Form 8832 is used to "check a box" and change the tax status. Not available if the entity is incorporated under state law.
- Child tax credit.** A tax credit based solely on the number of qualifying children under age 17. The maximum credit available is \$1,000 per child through 2017. A qualifying child must be claimed as a dependent on a parent's tax return to qualify for the credit. Taxpayers who qualify for the child tax credit may also qualify for a supplemental credit. The supplemental credit is treated as a component of the earned income credit and is therefore refundable. The credit is phased out for higher-income taxpayers. § 24.
- Circuit Court of Appeals.** Any of 13 Federal courts that consider tax matters appealed from the U.S. Tax Court, a U.S. District Court, or the U.S. Court of Federal Claims. Appeal from a U.S. Court of Appeals is to the U.S. Supreme Court by Certiorari.
- Circular 230.** A portion of the Federal tax Regulations that describes the levels of conduct at which a tax preparer must operate. Circular 230 dictates, for instance, that a tax preparer may not charge an unconscionable fee or delay the execution of a tax audit with inappropriate delays. Circular

230 requires that there be a reasonable basis for a tax return position and that no frivolous returns be filed.

Citor. A tax research resource that presents the judicial history of a court case and traces the subsequent references to the case. When these references include the citing cases' evaluations of the cited case's precedents, the research can obtain some measure of the efficacy and reliability of the original holding.

Claim of right doctrine. A judicially imposed doctrine applicable to both cash and accrual basis taxpayers that holds that an amount is includible in income upon actual or constructive receipt if the taxpayer has an unrestricted claim to the payment. For the tax treatment of amounts repaid when previously included in income under the claim of right doctrine, see § 1341.

Closely held C corporation. A regular corporation (i.e., the S election is not in effect) for which more than 50 percent of the value of its outstanding stock is owned, directly or indirectly, by five or fewer individuals at any time during the tax year. The term is relevant in identifying C corporations that are subject to the passive activity loss provisions. § 469.

Closely held corporation. A corporation where stock ownership is not widely dispersed. Rather, a few shareholders are in control of corporate policy and are in a position to benefit personally from that policy.

Closing agreement. In a tax dispute, the parties sign a closing agreement to spell out the terms under which the matters are settled. The agreement is binding on both the Service and the taxpayer.

Collectibles. A special type of capital asset, the gain from which is taxed at a maximum rate of 28 percent if the holding period is more than one year. Examples include art, rugs, antiques, gems, metals, stamps, some coins and bullion, and alcoholic beverages held for investment.

Combined return. In multistate taxation, a group of unitary corporations may elect or be required to file an income tax return that includes operating results for all of the affiliates, not just those with nexus in the state. Thus, apportionment data is reported for the group's worldwide or water's edge operations.

Community property. Louisiana, Texas, New Mexico, Arizona, California, Washington, Idaho, Nevada, and Wisconsin have community property systems. Alaska residents can elect community property status for assets. The rest of the states are common law property jurisdictions. The difference between common law and community property systems centers around the property rights possessed by married persons. In a common law system, each spouse owns whatever he or she earns. Under a community property system, one-half of the earnings of each spouse is considered owned by the other spouse. Assume, for example, that Jeff and Alice are husband and wife and that their only income is the \$50,000 annual salary Jeff receives. If they live in New York (a common law state), the \$50,000 salary belongs to Jeff. If, however, they live in Texas (a community property state), the \$50,000 salary is owned one-half each by Jeff and Alice.

Compensatory damages. Damages received or paid by the taxpayer can be classified as compensatory damages or as

punitive damages. Compensatory damages are paid to compensate one for harm caused by another. Compensatory damages are excludible from the recipient's gross income.

Complete termination redemption. Sale or exchange treatment is available relative to this type of redemption. The shareholder must retire all of his or her outstanding shares in the corporation (ignoring family attribution rules) and cannot hold an interest, other than that of a creditor, for the 10 years following the redemption. § 302(b)(3).

Completed contract method. A method of reporting gain or loss on certain long-term contracts. Under this method of accounting, all gross income and expenses are recognized in the tax year in which the contract is completed. Reg. § 1.451-3.

Complex trust. Not a simple trust. Such trusts may have charitable beneficiaries, accumulate income, and distribute corpus. §§ 661-663.

Composite return. In multistate taxation, an S corporation may be allowed to file a single income tax return that assigns pass-through items to resident and nonresident shareholders. The composite or "block" return allows the entity to remit any tax that is attributable to the nonresident shareholders.

Conduit concept. An approach assumed by the tax law in the treatment of certain entities and their owners. Specific tax characteristics pass through the entity without losing their identity. For example, items of income and expense, capital gains and losses, tax credits, etc., realized by a partnership pass through the partnership (a conduit) and are subject to taxation at the partner level. Also, in an S corporation, certain items pass through and are reported on the returns of the shareholders.

Conservation easement. An interest in real property that maintains its natural or pristine condition. Most often it restricts the development of the property. Properly structured, the grant of such an easement can generate an income tax deduction for the donor. If the grant takes place after the owner's death, a § 2055 charitable contribution deduction results, and a portion of the property's value is excluded from the gross estate. § 2031(c).

Conservatism principle. The theory behind much of Generally Accepted Accounting Principles, under which assurance is provided that an entity's balance sheet assets are not overstated, nor liabilities understated. For instance, under ASC 740 (SFAS 109), a deferred tax asset is not recorded until it is more likely than not that the future tax benefit will be realized.

Consolidated return. A procedure whereby certain affiliated corporations may file a single return, combine the tax transactions of each corporation, and arrive at a single income tax liability for the group. The election to file a consolidated return usually is binding on future years. §§ 1501-1505 and related Regulations.

Consolidation. The combination of two or more corporations into a newly created corporation. Thus, Apt Corporation and Bye Corporation combine to form Cart Corporation. A consolidation may qualify as a nontaxable reorganization if certain conditions are satisfied. §§ 354 and 368(a)(1)(A).

Constructive dividend. A taxable benefit derived by a shareholder from his or her corporation that is not actually

initiated by the board of directors as a dividend. Examples include unreasonable compensation, excessive rent payments, bargain purchases of corporate property, and shareholder use of corporate property. Constructive dividends generally are found in closely held corporations.

Constructive liquidation scenario. The means by which recourse debt is shared among partners in basis determination.

Constructive receipt. If income is unqualifiedly available although not physically in the taxpayer's possession, it still is subject to the income tax. An example is accrued interest on a savings account. Under the constructive receipt concept, the interest is taxed to a depositor in the year available, rather than the year actually withdrawn. The fact that the depositor uses the cash basis of accounting for tax purposes is irrelevant. See Reg. § 1.451-2.

Continuity of business enterprise. In a tax-favored reorganization, a shareholder or corporation that has substantially the same investment after an exchange as before should not be taxed on the transaction. Specifically, the transferee corporation must continue the historic business of the transferor or use a significant portion of the transferor's assets in the new business.

Continuity of interest. In a tax-favored reorganization, a shareholder or corporation that has substantially the same investment after an exchange as before should not be taxed on the transaction. Specifically, the seller must acquire an equity interest in the acquiring corporation equal in value to at least 50 percent of all formerly outstanding stock of the acquired entity.

Control. Holding a specified level of stock ownership in a corporation. For § 351, the new shareholder(s) must hold at least 80 percent of the total combined voting power of all voting classes of stock and at least 80 percent of the shares of all nonvoting classes. Other tax provisions require different levels of control to bring about desired effects, such as 50 or 100 percent.

Controlled foreign corporation (CFC). A non-U.S. corporation in which more than 50 percent of the total combined voting power of all classes of stock entitled to vote or the total value of the stock of the corporation is owned by U.S. shareholders on any day during the taxable year of the foreign corporation. For purposes of this definition, a U.S. shareholder is any U.S. person who owns, or is considered to own, 10 percent or more of the total combined voting power of all classes of voting stock of the foreign corporation. Stock owned directly, indirectly, and constructively is used in this measure. See *U.S. shareholder*.

Controlled group. A controlled group of corporations is required to share the lower corporate tax rates and various other tax benefits among the members of the group. A controlled group may be either a brother-sister or a parent-subsidiary group.

Corporate liquidation. Occurs when a corporation distributes its net assets to its shareholders and ceases to be a going concern. Generally, a shareholder recognizes capital gain or loss upon the liquidation of the entity, regardless of the corporation's balance in its earnings and profits account. The liquidating corporation recognizes gain and loss on assets that it sells during the liquidation period and on assets that it distributes to shareholders in kind.

Corpus. The body or principal of a trust. Suppose, for example, Grant transfers an apartment building into a trust, income payable to Ruth for life, remainder to Shawn upon Ruth's death. Corpus of the trust is the apartment building.

Correspondence audit. An audit conducted by the IRS by the U.S. mail. Typically, the IRS writes to the taxpayer requesting the verification of a particular deduction or exemption. The remittance of copies of records or other support is requested of the taxpayer.

Cost depletion. Depletion that is calculated based on the adjusted basis of the asset. The adjusted basis is divided by the expected recoverable units to determine the depletion per unit. The depletion per unit is multiplied by the units sold during the tax year to calculate cost depletion.

Cost recovery. The portion of the cost of an asset written off under ACRS (or MACRS), which replaced the depreciation system as a method for writing off the cost of an asset for most assets placed in service after 1980 (after 1986 for MACRS). § 168.

Court of Federal Claims. A trial court (court of original jurisdiction) that decides litigation involving Federal tax matters. Appeal from this court is to the Court of Appeals for the Federal Circuit.

Court of original jurisdiction. The Federal courts are divided into courts of original jurisdiction and appellate courts. A dispute between a taxpayer and the IRS is first considered by a court of original jurisdiction (i.e., a trial court). The four Federal courts of original jurisdiction are the U.S. Tax Court, the U.S. District Court, the Court of Federal Claims, and the Small Cases Division of the U.S. Tax Court.

Credit for certain retirement plan contributions. A nonrefundable credit is available based on eligible contributions of up to \$2,000 to certain qualified retirement plans, such as traditional and Roth IRAs and § 401(k) plans. The benefit provided by this credit is in addition to any deduction or exclusion that otherwise is available resulting from the qualifying contribution. The amount of the credit depends on the taxpayer's AGI and filing status. § 25B.

Credit for child and dependent care expenses. A tax credit ranging from 20 percent to 35 percent of employment-related expenses (child and dependent care expenses) for amounts of up to \$6,000 is available to individuals who are employed (or deemed to be employed) and maintain a household for a dependent child under age 13, disabled spouse, or disabled dependent. § 21.

Credit for employer-provided child care. A nonrefundable credit is available to employers who provide child care facilities to their employees during normal working hours. The credit, limited to \$150,000, is comprised of two components. The portion of the credit for qualified child care expenses is equal to 25 percent of these expenses, while the portion of the credit for qualified child care resource and referral services is equal to 10 percent of these expenses. Any qualifying expenses otherwise deductible by the taxpayer must be reduced by the amount of the credit. In addition, the taxpayer's basis for any property used for qualifying purposes is reduced by the amount of the credit. § 45F.

Credit for small employer pension plan startup costs. A nonrefundable credit available to small businesses based on administrative costs associated with establishing and

maintaining certain qualified plans. While such qualifying costs generally are deductible as ordinary and necessary business expenses, the availability of the credit is intended to lower the costs of starting a qualified retirement program and therefore encourage qualifying businesses to establish retirement plans for their employees. The credit is available for eligible employers at the rate of 50 percent of qualified startup costs. The maximum credit is \$500 (based on a maximum \$1,000 of qualifying expenses). § 45E.

Crop insurance proceeds. The proceeds received when an insured crop is destroyed. Section 451(d) permits the farmer to defer reporting the income from the insurance proceeds until the tax year following the taxable year of the destruction.

Crop method. A method of accounting for agricultural crops that are planted in one year but harvested in a subsequent year. Under this method, the costs of raising the crop are accumulated as inventory and are deducted when the income from the crop is realized.

Cross-purchase buy-sell agreement. Under this arrangement, the surviving owners of the business agree to buy out the withdrawing owner. Assume, for example, Ron and Sara are equal shareholders in Tip Corporation. Under a cross-purchase buy-sell agreement, Ron and Sara would contract to purchase the other's interest, should that person decide to withdraw from the business.

Current E & P. See *current earnings and profits*.

Current earnings and profits. Net tax-basis earnings of a corporation aggregated during the current tax year. A corporate distribution is deemed to be first from the entity's current earnings and profits and then from accumulated earnings and profits. Shareholders recognize dividend income to the extent of the earnings and profits of the corporation. A dividend results to the extent of current earnings and profits, even if there is a larger negative balance in accumulated earnings and profits.

Current tax expense. Under ASC 740 (SFAS 109), the book tax expense that relates to the current reporting period's net income and is actually payable (or creditable) to the appropriate governmental agencies for the current period. Also known as "cash tax" or "tax payable."

D

De minimis fringe. Benefits provided to employees that are too insignificant to warrant the time and effort required to account for the benefits received by each employee and the value of those benefits. Such amounts are excludible from the employee's gross income. § 132.

De minimis fringe benefit. See *de minimis fringe*.

Death benefit. A payment made by an employer to the beneficiary or beneficiaries of a deceased employee on account of the death of the employee.

Debt-financed income. Included in computations of the unrelated business income of an exempt organization, the gross income generated from debt-financed property.

Deceased spouse's unused exclusion (DSUE). In computing the Federal estate tax, the decedent uses the exclusion amount to shelter an amount of the gross estate from tax-

ation. When the first spouse to die fails to use a portion of his/her exclusion amount, the unused portion is "portable," and becomes available to the surviving spouse. The surviving spouse can use the DSUE only of his/her last spouse to predecease.

Deduction for qualified tuition and related expenses.

Taxpayers are allowed a deduction of up to \$4,000 for higher education expenses. Certain taxpayers are not eligible for the deduction: those whose gross AGI exceeds a specified amount and those who can be claimed as a dependent by another taxpayer. These expenses are classified as a deduction *for* AGI, and they need not be employment-related. § 222.

Deductions for adjusted gross income. The Federal income tax is not imposed upon gross income. Rather, it is imposed upon taxable income. Congressionally identified deductions for individual taxpayers are subtracted either from gross income to arrive at adjusted gross income or from adjusted gross income to arrive at the tax base, taxable income.

Deductions from adjusted gross income. See *deductions for adjusted gross income*.

Deductions in respect of a decedent. Deductions accrued at the moment of death but not recognizable on the final income tax return of a decedent because of the method of accounting used. Such items are allowed as deductions on the estate tax return and on the income tax return of the estate (Form 1041) or the heir (Form 1040). An example of a deduction in respect of a decedent is interest expense accrued to the date of death by a cash basis debtor.

Deemed-paid credit. A foreign tax credit allowed to a U.S. taxpayer that has received an actual or constructive dividend from a non-U.S. corporation that has paid foreign income taxes. The credit is computed using the proportion of foreign income taxes paid by the payor corporation to its post-1986 undistributed earnings. Under § 78, the U.S. taxpayer claiming a deemed-paid credit includes the same amount in gross income for the tax year.

Deferred compensation. Compensation that will be taxed when received or upon the removal of certain restrictions on receipt and not when earned. Contributions by an employer to a qualified pension or profit sharing plan on behalf of an employee are an example. The contributions will not be taxed to the employee until the funds are made available or distributed to the employee (e.g., upon retirement).

Deferred tax asset. Under ASC 740 (SFAS 109), an item created on an enterprise's balance sheet by a temporary book-tax difference, such that a tax benefit is not recognized until a later date, although it already has been reported in the financial statements (e.g., the carryforward of a disallowed deduction).

Deferred tax benefit. Under ASC 740 (SFAS 109), a reduction in the book tax expense that relates to the current reporting period's net income but will not be realized until a future reporting period. Creates or adds to the entity's deferred tax asset balance sheet account. For instance, the carryforward of a net operating loss is a deferred tax benefit.

Deferred tax expense. Under ASC 740 (SFAS 109), a book tax expense that relates to the current reporting period's

net income but will not be realized until a future reporting period. Creates or adds to the entity's deferred tax liability balance sheet account. For instance, a deferred tax expense is created when tax depreciation deductions for the period are "accelerated" and exceed the corresponding book depreciation expense.

Deferred tax liability. As determined under the rules of ASC 740 (SFAS 109), an item created on an enterprise's balance sheet by a temporary book-tax difference, such that a tax benefit is recognized earlier for tax purposes than it is in the financial accounting records (e.g., the use of an accelerated cost recovery deduction).

Defined benefit plan. Qualified plans can be dichotomized into defined benefit plans and defined contribution plans. Under a defined benefit plan, a formula defines the benefits employees are to receive. The formula usually includes years of service, employee compensation, and some stated percentage. The employer must make annual contributions based on actuarial computations that will be sufficient to pay the vested retirement benefits.

Defined contribution pension plan. Qualified plans can be dichotomized into defined benefit plans and defined contribution plans. Under a defined contribution plan, a separate account is maintained for each covered employee. The employee's benefits under the plan are based solely on (1) the amount contributed and (2) income from the fund that accrues to the employee's account. The plan defines the amount the employer is required to contribute (e.g., a flat dollar amount, an amount based on a special formula, or an amount equal to a certain percentage of compensation).

Dependency exemption. See *personal and dependency exemptions*.

Depletion. The process by which the cost or other basis of a natural resource (e.g., an oil or gas interest) is recovered upon extraction and sale of the resource. The two ways to determine the depletion allowance are the cost and percentage (or statutory) methods. Under cost depletion, each unit of production sold is assigned a portion of the cost or other basis of the interest. This is determined by dividing the cost or other basis by the total units expected to be recovered. Under percentage (or statutory) depletion, the tax law provides a special percentage factor for different types of minerals and other natural resources. This percentage is multiplied by the gross income from the interest to arrive at the depletion allowance. §§ 613 and 613A.

Depreciation. The deduction for the cost or other basis of a tangible asset over the asset's estimated useful life.

Determination letter. Upon the request of a taxpayer, the IRS will comment on the tax status of a completed transaction. Determination letters frequently are used to determine whether a retirement or profit sharing plan qualifies under the Code, and to determine the tax-exempt status of certain nonprofit organizations.

Disabled access credit. A tax credit designed to encourage small businesses to make their facilities more accessible to disabled individuals. The credit is equal to 50 percent of the eligible expenditures that exceed \$250 but do not exceed \$10,250. Thus, the maximum amount for the credit is \$5,000. The adjusted basis for depreciation is reduced by the

amount of the credit. To qualify, the facility must have been placed in service before November 6, 1990. § 44.

Disaster area loss. A casualty sustained in an area designated as a disaster area by the President of the United States. In such an event, the disaster loss may be treated as having occurred in the taxable year immediately preceding the year in which the disaster actually occurred. Thus, immediate tax benefits are provided to victims of a disaster. § 165(i).

Disclaimers. Rejections, refusals, or renunciations of claims, powers, or property. Section 2518 sets forth the conditions required to avoid gift tax consequences as the result of a disclaimer.

Disguised sale. When a partner contributes property to the entity and soon thereafter receives a distribution from the partnership, the transactions are collapsed and the distribution is seen as a purchase of the asset by the partnership. § 707(a)(2)(B).

Disproportionate distribution. A distribution from a partnership to one or more of its partners in which at least one partner's interest in partnership hot assets is increased or decreased. For example, a distribution of cash to one partner and hot assets to another changes both partners' interest in hot assets and is disproportionate. The intent of rules for taxation of disproportionate distributions is to ensure that each partner eventually recognizes his or her proportionate share of partnership ordinary income.

Disproportionate redemption. Sale or exchange treatment is available relative to this type of redemption. After the exchange, the shareholder owns less than 80 percent of his or her pre-redemption interest in the corporation and only a minority interest in the entity. § 302(b)(2).

Disregarded entity. The Federal income tax treatment of business income usually follows the legal form of the taxpayer (i.e., an individual's sole proprietorship is reported on the Form 1040); a C corporation's taxable income is computed on Form 1120. The check-the-box Regulations are used if the unincorporated taxpayer wants to use a different tax regime. Under these rules, a disregarded entity is taxed as an individual or a corporate division; other tax regimes are not available. For instance, a one-member limited liability company is a disregarded entity.

Distributable net income (DNI). The measure that determines the nature and amount of the distributions from estates and trusts that the beneficiaries must include in income. DNI also limits the amount that estates and trusts can claim as a deduction for such distributions. § 643(a).

District Court. See *Federal District Court*.

Dividend. A nondeductible distribution to the shareholders of a corporation. A dividend constitutes gross income to the recipient if it is paid from the current or accumulated earnings and profits of the corporation.

Dividend equivalent amount (DEA). The amount subject to the branch profits tax, it is equal to the effectively connected E & P of the U.S. branch of a foreign corporation, reduced/(increased) by an increase/(reduction) in U.S. net equity.

Dividends received deduction. A deduction allowed a shareholder that is a corporation for dividends received from a domestic corporation. The deduction usually is 70 percent of the dividends received, but it could be 80 or 100

percent depending upon the ownership percentage held by the recipient corporation. §§ 243–246.

Divisive reorganization. A “Type D” spin-off, split-off or split-up reorganization in which the original corporation divides its active business (in existence for at least five years) assets among two or more corporations. The stock received by the original corporation shareholders must be at least 80 percent of the other corporations.

Dock sale. A purchaser uses its owned or rented vehicles to take possession of the product at the seller’s shipping dock. In most states, the sale is apportioned to the operating state of the purchaser, rather than the seller. See also *apportion* and *sales factor*.

Dollar-value LIFO. An inventory technique that focuses on the dollars invested in the inventory rather than the particular items on hand each period. Each inventory item is assigned to a pool. A pool is a collection of similar items and is treated as a separate inventory. At the end of the period, each pool is valued in terms of prices at the time LIFO was adopted (base period prices), whether or not the particular items were actually on hand in the year LIFO was adopted, to compare with current prices to determine if there has been an increase or decrease in inventories.

Domestic production activities deduction (DPAD). A deduction based on 9 percent of the lesser of qualified production activities income (QPAI) or modified adjusted gross income but not to exceed 50 percent of the W–2 production wages paid. In the case of a corporate taxpayer, taxable income is substituted for modified AGI. § 199.

Domestic production gross receipts (DPGR). A key component in computing the domestic production activities deduction (DPAD). Includes receipts from the sale and other disposition of qualified production property produced in significant part within the United States. DPGR is defined in § 199(c)(4).

E

Earned income credit. A tax credit designed to provide assistance to certain low-income individuals who generally have a qualifying child. This is a refundable credit. To receive the most beneficial treatment, the taxpayer must have qualifying children. However, it is possible to qualify for the credit without having a child. See Chapter 12 for the computation procedure required in order to determine the amount of the credit allowed.

Earnings and profits (E & P). Measures the economic capacity of a corporation to make a distribution to shareholders that is not a return of capital. Such a distribution results in dividend income to the shareholders to the extent of the corporation’s current and accumulated earnings and profits.

Economic effect test. Requirements that must be met before a special allocation may be used by a partnership. The premise behind the test is that each partner who receives an allocation of income or loss from a partnership bears the economic benefit or burden of the allocation.

Economic income. The change in the taxpayer’s net worth, as measured in terms of market values, plus the value of the assets the taxpayer consumed during the year. Because

of the impracticality of this income model, it is not used for tax purposes.

Economic performance test. One of the requirements that must be satisfied for an accrual basis taxpayer to deduct an expense. The accrual basis taxpayer first must satisfy the all events test. That test is not deemed satisfied until economic performance occurs. This occurs when property or services are provided to the taxpayer, or in the case in which the taxpayer is required to provide property or services, whenever the property or services are actually provided by the taxpayer.

Education expenses. Employees may deduct education expenses that are incurred either (1) to maintain or improve existing job-related skills or (2) to meet the express requirements of the employer or the requirements imposed by law to retain employment status. The expenses are not deductible if the education is required to meet the minimum educational standards for the taxpayer’s job or if the education qualifies the individual for a new trade or business. Reg. § 1.162–5.

Educational savings bonds. U.S. Series EE bonds whose proceeds are used for qualified higher educational expenses for the taxpayer, the taxpayer’s spouse, or a dependent. The interest may be excluded from gross income, provided the taxpayer’s adjusted gross income does not exceed certain amounts. § 135.

Effective tax rate. The financial statements for an entity include several footnotes, one of which reconciles the expected (statutory) income tax rate (e.g., 35 percent for a C corporation) with the effective tax rate (i.e., total tax expense as a percentage of book income). The reconciliation often is done in dollar and/or percentage terms.

Effectively connected income. Income of a nonresident alien or foreign corporation that is attributable to the operation of a U.S. trade or business under either the asset-use or the business-activities test.

E-file. The electronic filing of a tax return. The filing is either direct or indirect. As to direct, the taxpayer goes online using a computer and tax return preparation software. Indirect filing occurs when a taxpayer utilizes an authorized IRS e-file provider. The provider often is the tax return preparer.

E-filing. See *E-file*.

Employment taxes. Taxes that an employer must pay on account of its employees. Employment taxes include FICA (Federal Insurance Contributions Act) and FUTA (Federal Unemployment Tax Act) taxes. Employment taxes are paid to the IRS in addition to income tax withholdings at specified intervals. Such taxes can be levied on the employees, the employer, or both.

Energy credits. See *energy tax credits*.

Energy tax credits. Various tax credits are available to those who invest in certain energy property. The purpose of the credit is to create incentives for conservation and to develop alternative energy sources.

Enrolled agent (EA). A tax practitioner who has gained admission to practice before the IRS by passing an IRS examination and maintaining a required level of continuing professional education.

Entertainment expenses. Expenses that are deductible only if they are directly related to or associated with a trade or

business. Various restrictions and documentation requirements have been imposed upon the deductibility of entertainment expenses to prevent abuses by taxpayers. See, for example, the provision contained in § 274(n) that disallows 50 percent (20 percent prior to 1994) of entertainment expenses. § 274.

Entity accounting income. Entity accounting income is not identical to the taxable income of a trust or estate, nor is it determined in the same manner as the entity's financial accounting income would be. The trust document or will determines whether certain income, expenses, gains, or losses are allocated to the corpus of the entity or to the entity's income beneficiaries. Only the items that are allocated to the income beneficiaries are included in entity accounting income.

Entity buy-sell agreement. An arrangement whereby the entity is to purchase a withdrawing owner's interest. When the entity is a corporation, the agreement generally involves a stock redemption on the part of the withdrawing shareholder. See also *buy-sell agreement* and *cross-purchase buy-sell agreement*.

Entity concept. The theory of partnership taxation under which a partnership is treated as a separate and distinct entity from the partners and has its own tax attributes.

Equity method. Under Generally Accepted Accounting Principles, the method of financial reporting for the operations of a subsidiary when the parent corporation owns between 20 and 50 percent of the subsidiary's stock. Creates a book-tax difference, as the two entities' operating results are combined for book purposes, but a Federal income tax consolidated return cannot be filed.

Estate freeze. Procedures directed toward fixing and stabilizing the value of an interest retained in a business, while transferring the growth portion to family members. In the case of a closely held corporation, the estate freeze usually involves keeping the preferred stock and giving away the common stock. The ultimate objective is to reduce estate value when the original owner-donor dies.

Estate tax. A tax imposed on the right to transfer property by death. Thus, an estate tax is levied on the decedent's estate and not on the heir receiving the property.

Estimated tax. The amount of tax (including alternative minimum tax and self-employment tax) a taxpayer expects to owe for the year after subtracting tax credits and income tax withheld. The estimated tax must be paid in installments at designated intervals (e.g., for the individual taxpayer, by April 15, June 15, September 15, and January 15 of the following year).

Excess lobbying expenditure. An excise tax is applied on otherwise tax-exempt organizations with respect to the excess of total lobbying expenditures over grass roots lobbying expenditures for the year.

Excess loss account. When a subsidiary has generated more historical losses than its parent has invested in the entity, the parent's basis in the subsidiary is zero, and the parent records additional losses in an excess loss account. This treatment allows the parent to continue to deduct losses of the subsidiary, even where no basis reduction is possible, while avoiding the need to show a negative stock basis on various financial records. If the subsidiary stock is sold while

an excess loss account exists, capital gain income usually is recognized to the extent of the balance in the account.

Excise tax. A tax on the manufacture, sale, or use of goods; on the carrying on of an occupation or activity; or on the transfer of property. Thus, the Federal estate and gift taxes are, theoretically, excise taxes.

Exclusion amount. The value of assets that is exempt from transfer tax due to the credit allowed for gifts or transfers by death. For gifts and deaths in 2015, the exclusion amount is \$5.43 million. An exclusion amount unused by a deceased spouse may be used by the surviving spouse. See also *exemption equivalent amount*.

Exempt organization. An organization that is either partially or completely exempt from Federal income taxation. § 501.

Exemption amount. See *AMT exemption*.

Exemption equivalent. The maximum value of assets that can be transferred to another party without incurring any Federal gift or estate tax because of the application of the unified tax credit. See also *exemption equivalent amount*.

Exemption equivalent amount. The nontaxable amount (in 2015, \$5.43 million for gift tax and estate tax) that is the equivalent of the unified transfer tax credit allowed.

Expanded affiliated group (EAG). For purposes of the domestic production activities deduction (DPAD), all members of an expanded affiliated group (EAG) are treated as a single corporation. Thus, the activities of any member of the group are attributed to the other members. An EAG must meet the requirements for filing a consolidated return with ownership levels lowered to 50 percent. § 199(d)(4)(B).

F

Fair market value. The amount at which property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of the relevant facts. Reg. §§ 1.1001-1(a) and 20.2031-1(b).

Farm price method. A method of accounting for agricultural crops. The inventory of crops is valued at its market price less the estimated cost of disposition (e.g., freight and selling expense).

FDAP. Income of a nonresident alien or non-U.S. corporation that is received in the form of dividends, interest, rents, royalties, certain compensation, premiums, annuities, and other "fixed, determinable, annual, or periodic" forms. FDAP income usually is subject to U.S. income taxation at a flat 30 percent tax rate.

Federal District Court. A trial court for purposes of litigating Federal tax matters. It is the only trial court in which a jury trial can be obtained.

Feeder organization. An entity that carries on a trade or business for the benefit of an exempt organization. However, such a relationship does not result in the feeder organization itself being tax-exempt. § 502.

FICA tax. An abbreviation that stands for Federal Insurance Contributions Act, commonly referred to as the Social Security tax. The FICA tax is comprised of the Social Security tax (old age, survivors, and disability insurance) and the Medicare tax (hospital insurance) and is imposed on both employers and employees. The employer is responsible for withholding from

the employee's wages the Social Security tax at a rate of 6.2 percent on a maximum wage base and the Medicare tax at a rate of 1.45 percent (no maximum wage base). The maximum Social Security wage base for 2015 is \$118,500 and for 2014 is \$117,000.

Field audit. An audit conducted by the IRS on the business premises of the taxpayer or in the office of the tax practitioner representing the taxpayer.

Fifty percent additional first-year depreciation. This provision, which was effective for property acquired after December 31, 2007, and placed in service before January 1, 2015, provided for an additional cost recovery deduction of 50 percent in the tax year the qualified property is placed in service. Qualified property included most types of new property other than buildings. The taxpayer can elect to forgo this bonus depreciation. See also *one hundred percent additional first-year depreciation*.

Final Regulation. See *finalized Regulation*.

Finalized Regulation. The U.S. Treasury Department Regulations (abbreviated Reg.) represent the position of the IRS as to how the Internal Revenue Code is to be interpreted. Their purpose is to provide taxpayers and IRS personnel with rules of general and specific application to the various provisions of the tax law. Regulations are published in the *Federal Register* and in all tax services.

Financial Accounting Standards Board (FASB). See *Generally Accepted Accounting Principles (GAAP)*.

Fiscal year. A 12-month period ending on the last day of a month other than December. In certain circumstances, a taxpayer is permitted to elect a fiscal year instead of being required to use a calendar year.

Flat tax. In its pure form, a flat tax would eliminate all exclusions, deductions, and credits and impose a one-rate tax on gross income.

Flexible spending plan. An employee benefit plan that allows the employee to take a reduction in salary in exchange for the employer paying benefits that can be provided by the employer without the employee being required to recognize income (e.g., medical and child care benefits).

Flow-through entity. The entity is a tax reporter rather than a taxpayer. The owners are subject to tax. Examples are partnerships, S corporations, and limited liability companies.

Foreign earned income exclusion. The Code allows exclusions for earned income generated outside the United States to alleviate any tax base and rate disparities among countries. In addition, the exclusion is allowed for housing expenditures incurred by the taxpayer's employer with respect to the non-U.S. assignment, and self-employed individuals can deduct foreign housing expenses incurred in a trade or business. The exclusion is limited to \$100,800 per year for 2015 (\$99,200 in 2014). § 911.

Foreign Investment in Real Property Tax Act (FIRPTA). Under the Foreign Investment in Real Property Tax Act, gains or losses realized by nonresident aliens and non-U.S. corporations on the disposition of U.S. real estate creates U.S. source income and are subject to U.S. income tax.

Foreign tax credit (FTC). A U.S. citizen or resident who incurs or pays income taxes to a foreign country on income subject to U.S. tax may be able to claim some of these taxes as a credit against the U.S. income tax. §§ 27 and 901–905.

Franchise. An agreement that gives the transferee the right to distribute, sell, or provide goods, services, or facilities within a specified area. The cost of obtaining a franchise may be amortized over a statutory period of 15 years. In general, the franchisor's gain on the sale of franchise rights is an ordinary gain because the franchisor retains a significant power, right, or continuing interest in the subject of the franchise. §§ 197 and 1253.

Franchise tax. A tax levied on the right to do business in a state as a corporation. Although income considerations may come into play, the tax usually is based on the capitalization of the corporation.

Fraud. Tax fraud falls into two categories: civil and criminal. Under civil fraud, the IRS may impose as a penalty an amount equal to as much as 75 percent of the underpayment [§ 6651(f)]. Fines and/or imprisonment are prescribed for conviction of various types of criminal tax fraud (§§ 7201–7207). Both civil and criminal fraud involve a specific intent on the part of the taxpayer to evade the tax; mere negligence is not enough. Criminal fraud requires the additional element of willfulness (i.e., done deliberately and with evil purpose). In practice, it becomes difficult to distinguish between the degree of intent necessary to support criminal, rather than civil, fraud. In either situation, the IRS has the burden of proof to show the taxpayer committed fraud.

Fringe benefit. Compensation or other benefit received by an employee that is not in the form of cash. Some fringe benefits (e.g., accident and health plans, group term life insurance) may be excluded from the employee's gross income and therefore are not subject to the Federal income tax.

Frivolous return. A tax return that included a position that has no more than a 5 percent chance of being sustained upon review. Taxpayer and tax preparer penalties are assessed if a frivolous position is included in a filed tax return.

Fruit and tree metaphor. The courts have held that an individual who earns income from property or services cannot assign that income to another. For example, a father cannot assign his earnings from commissions to his child and escape income tax on those amounts.

Functional currency. The currency of the economic environment in which the taxpayer carries on most of its activities and in which the taxpayer transacts most of its business.

FUTA tax. An employment tax levied on employers. Jointly administered by the Federal and state governments, the tax provides funding for unemployment benefits. FUTA applies at a rate of 6.0 percent on the first \$7,000 of covered wages paid during the year for each employee in 2015. The Federal government allows a credit for FUTA paid (or allowed under a merit rating system) to the state. The credit cannot exceed 5.4 percent of the covered wages.

Future interest. An interest that will come into being at some future time. It is distinguished from a present interest, which already exists. Assume that Dan transfers securities to a newly created trust. Under the terms of the trust instrument, income from the securities is to be paid each year to Wilma for her life, with the securities passing to Sam upon Wilma's death. Wilma has a present interest in the trust because she is entitled to current income distributions. Sam has a future interest because he must wait for Wilma's

death to benefit from the trust. The annual exclusion of \$14,000 (in 2015) is not allowed for a gift of a future interest. § 2503(b).

G

General business credit. The summation of various nonrefundable business credits, including the tax credit for rehabilitation expenditures, business energy credit, work opportunity credit, research activities credit, low-income housing credit, and disabled access credit. The amount of general business credit that can be used to reduce the tax liability is limited to the taxpayer's net income tax reduced by the greater of (1) the tentative minimum tax or (2) 25 percent of the net regular tax liability that exceeds \$25,000. Unused general business credits can be carried back 1 year and forward 20 years. § 38.

General partner. A partner who is fully liable in an individual capacity for the debts of the partnership to third parties. A general partner's liability is not limited to the investment in the partnership. See also *limited partner*.

General partnership (GP). A partnership that is owned by one or more general partners. Creditors of a general partnership can collect amounts owed them from both the partnership assets and the assets of the partners individually.

Generally Accepted Accounting Principles (GAAP). Guidelines relating to how to construct the financial statements of enterprises doing business in the United States. Promulgated chiefly by the Financial Accounting Standards Board (FASB).

Gift tax. A tax imposed on the transfer of property by gift. The tax is imposed upon the donor of a gift and is based on the fair market value of the property on the date of the gift.

Golden parachute payment. A severance payment to employees that meets the following requirements: (1) the payment is contingent on a change of ownership of a corporation through a stock or asset acquisition and (2) the aggregate present value of the payment equals or exceeds three times the employee's average annual compensation. To the extent the severance payment meets these conditions, a deduction is disallowed to the employer for the excess of the payment over a statutory base amount (a five-year average of compensation if the taxpayer was an employee for the entire five-year period). In addition, a 20 percent excise tax is imposed on the employee who receives the excess severance pay. §§ 280G and 4999.

Goodwill. The reputation and built-up business of a company. For accounting purposes, goodwill has no basis unless it is purchased. In the purchase of a business, goodwill generally is the difference between the purchase price and the fair market value of the assets acquired. The intangible asset goodwill can be amortized for tax purposes over a 15-year period. Reg. § 1.167(a)-3.

Grantor. A transferor of property. The creator of a trust is usually referred to as the grantor of the entity.

Grantor trust. A trust under which the grantor retains control over the income or corpus (or both) to such an extent that he or she is treated as the owner of the property and its income for income tax purposes. Income from a grantor

trust is taxable to the grantor and not to the beneficiary who receives it. §§ 671-679.

Gross roots expenditures. Exempt organizations are prohibited from engaging in political activities, but spending incurred to influence the opinions of the general public relative to specific legislation is permitted by the law.

Gross estate. The property owned or previously transferred by a decedent that is subject to the Federal estate tax. The gross estate can be distinguished from the probate estate, which is property actually subject to administration by the administrator or executor of an estate. §§ 2031-2046.

Gross income. Income subject to the Federal income tax. Gross income does not include all economic income. That is, certain exclusions are allowed (e.g., interest on municipal bonds). For a manufacturing or merchandising business, gross income usually means gross profit (gross sales or gross receipts less cost of goods sold). § 61 and Reg. § 1.61-3(a).

Group term life insurance. Life insurance coverage provided by an employer for a group of employees. Such insurance is renewable on a year-to-year basis, and typically no cash surrender value is built up. The premiums paid by the employer on the insurance are not taxed to the employees on coverage of up to \$50,000 per person. § 79 and Reg. § 1.79-1(b).

Guaranteed payments. Payments made by a partnership to a partner for services rendered or for the use of capital to the extent the payments are determined without regard to the income of the partnership. The payments are treated as though they were made to a nonpartner and thus are deducted by the entity.

H

Half-year convention. A cost recovery convention that assumes that all property is placed in service at mid-year and thus provides for a half-year's cost recovery for that year.

Head of household. An unmarried individual who maintains a household for another and satisfies certain conditions set forth in § 2(b). This status enables the taxpayer to use a set of income tax rates that are lower than those applicable to other unmarried individuals but higher than those applicable to surviving spouses and married persons filing a joint return.

Health Savings Account (HSA). A medical savings account created in legislation enacted in December 2003 that is designed to replace and expand Archer Medical Savings Accounts.

Highly compensated employee. The employee group is generally divided into two categories for fringe benefit (including pension and profit sharing plans) purposes. These are (1) highly compensated employees and (2) non-highly compensated employees. For most fringe benefits, if the fringe benefit plan discriminates in favor of highly compensated employees, it will not be a qualified plan with respect, at a minimum, to the highly compensated employees.

Historic business test. In a corporate reorganization, a means by which to determine if the continuity of business enterprise requirement is met. The acquiring corporation must continue to operate the target entity's existing

business(es) going forward; if this is not the case, the requirement is failed.

Hobby loss. Losses from an activity not engaged in for profit. The Code restricts the amount of losses that an individual can deduct for hobby activities so that these transactions cannot be used to offset income from other sources. § 183.

Holding period. The period of time during which property has been held for income tax purposes. The holding period is significant in determining whether gain or loss from the sale or exchange of a capital asset is long-term or short-term. § 1223.

Home equity loans. Loans that utilize the personal residence of the taxpayer as security. The interest on such loans is deductible as qualified residence interest. However, interest is deductible only on the portion of the loan that does not exceed the lesser of (1) the fair market value of the residence, reduced by the acquisition indebtedness, or (2) \$100,000 (\$50,000 for married persons filing separate returns). A major benefit of a home equity loan is that there are no tracing rules regarding the use of the loan proceeds. § 163(h)(3).

Hot assets. Unrealized receivables and substantially appreciated inventory under § 751. When hot assets are present, the sale of a partnership interest or the disproportionate distribution of the assets can cause ordinary income to be recognized.

H.R. 10 plans. See *Keogh plans*.

Hybrid method. A combination of the accrual and cash methods of accounting. That is, the taxpayer may account for some items of income on the accrual method (e.g., sales and cost of goods sold) and other items (e.g., interest income) on the cash method.

I

Imputed interest. For certain long-term sales of property, the IRS can convert some of the gain from the sale into interest income if the contract does not provide for a minimum rate of interest to be paid by the purchaser. The seller recognizes less long-term capital gain and more ordinary income (interest income). § 483 and the related Regulations.

Inbound taxation. U.S. tax effects when a non-U.S. person begins an investment or business activity in the United States.

Incentive stock option (ISO). A type of stock option that receives favorable tax treatment. If various qualification requirements can be satisfied, there are no recognition tax consequences when the stock option is granted. However, the spread (the excess of the fair market value at the date of exercise over the option price) is a tax preference item for purposes of the alternative minimum tax. The gain on disposition of the stock resulting from the exercise of the stock option will be classified as long-term capital gain if certain holding period requirements are met (the employee must not dispose of the stock within two years after the option is granted or within one year after acquiring the stock). § 422.

Income. For tax purposes, an increase in wealth that has been realized.

Income in respect of a decedent (IRD). Income earned by a decedent at the time of death but not reportable on the final income tax return because of the method of accounting that appropriately is utilized. Such income is included in the gross estate and is taxed to the eventual recipient (either the estate or heirs). The recipient is, however, allowed an income tax deduction for the estate tax attributable to the income. § 691.

Income tax provision. Under ASC 740 (SFAS 109), a synonym for the book tax expense of an entity for the financial reporting period. Following the “matching principle,” all book tax expense that relates to the net income for the reporting period is reported on that period’s financial statements, including not only the current tax expense, but also any deferred tax expense and deferred tax benefit.

Income tax treaties. See *tax treaty*.

Independent contractor. A self-employed person as distinguished from one who is employed as an employee.

Indexation. A procedure whereby adjustments are made by the IRS to key tax components (e.g., standard deduction, tax brackets, personal and dependency exemptions) to reflect inflation. The adjustments usually are made annually and are based on the change in the consumer price index.

Individual Retirement Account (IRA). A type of retirement plan to which an individual with earned income can contribute a statutory maximum of \$5,500 in 2015. IRAs can be classified as traditional IRAs or Roth IRAs. With a traditional IRA, an individual can contribute and deduct a maximum of \$5,500 per tax year in 2015. The deduction is a deduction for AGI. However, if the individual is an active participant in another qualified retirement plan, the deduction is phased out proportionally between certain AGI ranges (note that the phaseout limits the amount of the deduction and not the amount of the contribution). With a Roth IRA, an individual can contribute a maximum of \$5,500 per tax year in 2015. No deduction is permitted. However, if a five-year holding period requirement is satisfied and if the distribution is a qualified distribution, the taxpayer can make tax-free withdrawals from a Roth IRA. The maximum annual contribution is phased out proportionally between certain AGI ranges. §§ 219 and 408A.

Individual Shared Responsibility Payment (ISRP). A mandate or penalty tax that individuals owe starting in 2014 for any month in which they do not have health coverage and do not qualify for an exemption. This mandate was created as part of the Affordable Care Act to encourage individuals to obtain health care coverage. If owed, the penalty is the greater of a “flat dollar amount” or a percentage of household income less the filing threshold. When fully in effect in 2016, the flat dollar amount is \$695 and the percent applied to household income is 2.5%. For a family, the flat dollar amount cannot exceed three times the flat dollar amount. After 2016, the \$695 amount is adjusted annually. The overall cap on the penalty is the national average cost of a bronze level plan (this amount is published by the IRS). Worksheets for computing the penalty are included in the instructions to Form 8965 (Health Coverage Exemptions). § 5000A.

Inheritance tax. A tax imposed on the right to receive property from a decedent. Thus, theoretically, an inheritance

tax is imposed on the heir. The Federal estate tax is imposed on the estate.

Inside basis. A partnership's basis in the assets it owns.

Installment method. A method of accounting enabling certain taxpayers to spread the recognition of gain on the sale of property over the collection period. Under this procedure, the seller arrives at the gain to be recognized by computing the gross profit percentage from the sale (the gain divided by the contract price) and applying it to each payment received. § 453.

Intangible drilling and development costs (IDC). Taxpayers may elect to expense or capitalize (subject to amortization) intangible drilling and development costs. However, ordinary income recapture provisions apply to oil and gas properties on a sale or other disposition if the expense method is elected. §§ 263(c) and 1254(a).

Intermediate sanctions. The IRS can assess excise taxes on disqualified persons and organization management associated with so-called public charities engaging in excess benefit transactions. An excess benefit transaction is one in which a disqualified person engages in a non-fair market value transaction with the exempt organization or receives unreasonable compensation. Prior to the idea of intermediate sanctions, the only option available to the IRS was to revoke the organization's exempt status.

International Accounting Standards Board (IASB). The body that promulgates International Financial Reporting Standards (IFRS). Based in London, representing accounting standard setting bodies in over 100 countries, the IASB develops accounting standards that can serve as the basis for harmonizing conflicting reporting standards among nations.

International Financial Reporting Standards (IFRS). Produced by the International Accounting Standards Board (IASB), guidelines developed since 2001 as to revenue recognition, accounting for business combinations, and a conceptual framework for financial reporting. IFRS provisions are designed so that they can be used by all entities, regardless of where they are based or conduct business. IFRS have gained widespread acceptance throughout the world, and the SEC is considering how to require U.S. entities to use IFRS in addition to, or in lieu of, the accounting rules of the Financial Accounting Standards Board.

Interpretive Regulation. A Regulation issued by the Treasury Department that purports to explain the meaning of a particular Code Section. An interpretive Regulation is given less deference than a legislative Regulation.

Investment income. Consisting of virtually the same elements as portfolio income, a measure by which to justify a deduction for interest on investment indebtedness.

Investment interest. Payment for the use of funds used to acquire assets that produce investment income. The deduction for investment interest is limited to net investment income for the tax year.

Investor losses. Losses on stock and securities. If stocks and bonds are capital assets in the hands of the holder, a capital loss materializes as of the last day of the taxable year in which the stocks or bonds become worthless. Under certain circumstances involving stocks and bonds of affiliated corporations, an ordinary loss is permitted upon worthlessness.

Involuntary conversion. The loss or destruction of property through theft, casualty, or condemnation. Gain realized on an involuntary conversion can, at the taxpayer's election, be deferred for Federal income tax purposes if the owner reinvests the proceeds within a prescribed period of time in property that is similar or related in service or use. § 1033.

Itemized deductions. Personal and employee expenditures allowed by the Code as deductions from adjusted gross income. Examples include certain medical expenses, interest on home mortgages, state income taxes, and charitable contributions. Itemized deductions are reported on Schedule A of Form 1040. Certain miscellaneous itemized deductions are reduced by 2 percent of the taxpayer's adjusted gross income. In addition, a taxpayer whose adjusted gross income exceeds a certain level (indexed annually) must reduce the itemized deductions by 3 percent of the excess of adjusted gross income over that level. Medical, casualty and theft, and investment interest deductions are not subject to the 3 percent reduction. The 3 percent reduction may not reduce itemized deductions that are subject to the reduction to below 20 percent of their initial amount.

J

Joint tenants. Two or more persons having undivided ownership of property with the right of survivorship. Right of survivorship gives the surviving owner full ownership of the property. Suppose Bob and Tami are joint tenants of a tract of land. Upon Bob's death, Tami becomes the sole owner of the property. For the estate tax consequences upon the death of a joint tenant, see § 2040.

K

Keogh plans. Retirement plans available to self-employed taxpayers. They are also referred to as H.R. 10 plans. Under such plans, a taxpayer may deduct each year up to 100 percent of net earnings from self-employment or \$53,000 for 2015, whichever is less. If the plan is a profit sharing plan, the percentage is 25 percent.

Kiddie tax. Passive income, such as interest and dividends, that is recognized by a child under age 19 (or under age 24 if a full-time student) is taxed to him or her at the rates that would have applied had the income been incurred by the child's parents, generally to the extent the income exceeds \$2,100 for 2015. The additional tax is assessed regardless of the source of the income or the income's underlying property. If the child's parents are divorced, the custodial parent's rates are used. The parents' rates reflect any applicable alternative minimum tax and the phaseouts of lower tax brackets and other deductions. § 1(g).

L

Least aggregate deferral method. An algorithm set forth in the Regulations to determine the tax year for a partnership or an S corporation with owners whose tax years differ.

The tax year selected is the one that produces the least aggregate deferral of income for the owners.

Least aggregate deferral rule. See *least aggregate deferral method*.

Legislative Regulation. Some Code Sections give the Secretary of the Treasury or his delegate the authority to prescribe Regulations to carry out the details of administration or to otherwise complete the operating rules. Regulations issued pursuant to this type of authority truly possess the force and effect of law. In effect, Congress is almost delegating its legislative powers to the Treasury Department.

Lessee. One who rents property from another. In the case of real estate, the lessee is also known as the tenant.

Lessor. One who rents property to another. In the case of real estate, the lessor is also known as the landlord.

Letter ruling. The written response of the IRS to a taxpayer's request for interpretation of the revenue laws with respect to a proposed transaction (e.g., concerning the tax-free status of a reorganization). Not to be relied on as precedent by other than the party who requested the ruling.

Liabilities in excess of basis. On the contribution of capital to a corporation, an investor recognizes gain on the exchange to the extent contributed assets carry liabilities with a face amount in excess of the tax basis of the contributed assets. This rule keeps the investor from holding the investment asset received with a negative basis. § 357(c).

Life insurance proceeds. A specified sum (the face value or maturity value of the policy) paid to the designated beneficiary of the policy by the life insurance company upon the death of the insured.

Lifetime learning credit. A tax credit for qualifying expenses for taxpayers pursuing education beyond the first two years of postsecondary education. Individuals who are completing their last two years of undergraduate studies, pursuing graduate or professional degrees, or otherwise seeking new job skills or maintaining existing job skills are all eligible for the credit. Eligible individuals include the taxpayer, taxpayer's spouse, and taxpayer's dependents. The maximum credit is 20 percent of the first \$10,000 of qualifying expenses and is computed per taxpayer. The credit is phased out for higher-income taxpayers. § 25A.

Like-kind exchange. An exchange of property held for productive use in a trade or business or for investment (except inventory and stocks and bonds) for other investment or trade or business property. Unless non-like-kind property (boot) is received, the exchange is fully tax-deferred. § 1031.

Limited liability company (LLC). A legal entity allowed by all of the states. The entity is subject to Federal income tax treatment as though it were a partnership in which all members or owners of the LLC are treated much like limited partners. There are no restrictions on ownership, all members may participate in management, and none has personal liability for the entity's debts.

Limited liability limited partnership (LLLP). A limited partnership for which the general partners are also protected from entity liabilities. An LLLP—or "triple LP"—can be formed in about 20 states. In those states, a limited partnership files with the state to adopt LLLP status.

Limited liability partnership (LLP). A legal entity allowed by many of the states, where a general partnership registers with

the state as an LLP. Owners are general partners, but a partner is not liable for any malpractice committed by other partners. The personal assets of the partners are at risk for the entity's contractual liabilities, such as accounts payable. The personal assets of a specific partner are at risk for his or her own professional malpractice and tort liability and for malpractice and torts committed by those whom he or she supervises.

Limited partner. A partner whose liability to third-party creditors of the partnership is limited to the amounts invested in the partnership. See also *general partner* and *limited partnership*.

Limited partnership (LP). A partnership in which some of the partners are limited partners. At least one of the partners in a limited partnership must be a general partner.

Liquidating distribution. A distribution by a partnership or corporation that is in complete liquidation of the entity's trade or business activities. Typically, such distributions generate capital gain or loss to the investors without regard, for instance, to the earnings and profits of the corporation or to the partnership's basis in the distributed property. They can, however, lead to recognized gain or loss at the corporate level.

Listed property. Property that includes (1) any passenger automobile; (2) any other property used as a means of transportation; (3) any property of a type generally used for purposes of entertainment, recreation, or amusement; (4) any computer or peripheral equipment (with an exception for exclusive business use); (5) any cellular telephone (or other similar telecommunications equipment); and (6) any other property of a type specified in the Regulations. If listed property is predominantly used for business, the taxpayer is allowed to use the statutory percentage method of cost recovery. Otherwise, the straight-line cost recovery method must be used. § 280F.

Living trust. A revocable trust. Often touted as a means of avoiding some probate costs.

Lobbying expenditure. An expenditure made for the purpose of influencing legislation. Such payments can result in the loss of the exempt status of, and the imposition of Federal income tax on, an exempt organization.

Long-term care insurance. Insurance that helps pay the cost of care when the insured is unable to care for himself or herself. Such insurance is generally thought of as insurance against the cost of an aged person entering a nursing home. The employer can provide the insurance, and the premiums may be excluded from the employee's gross income. § 7702B.

Long-term contract. A building, installation, construction, or manufacturing contract that is entered into but not completed within the same tax year. A manufacturing contract is a long-term contract only if the contract is to manufacture (1) a unique item not normally carried in finished goods inventory or (2) items that normally require more than 12 calendar months to complete. The two available methods to account for long-term contracts are the percentage of completion method and the completed contract method. The completed contract method can be used only in limited circumstances. § 460.

Long-term nonpersonal use capital assets. Includes investment property with a long-term holding period. Such

property disposed of by casualty or theft may receive § 1231 treatment.

Long-term tax-exempt rate. Used in deriving net operating loss limitations in the context of an equity structure shift. The highest of the Federal long-term interest rates in effect for any of the last three months. § 382.

Lower of cost or market (replacement cost). An elective inventory method, whereby the taxpayer may value inventories at the lower of the taxpayer's actual cost or the current replacement cost of the goods. This method cannot be used in conjunction with the LIFO inventory method.

Low-income housing credit. Beneficial treatment to owners of low-income housing is provided in the form of a tax credit. The calculated credit is claimed in the year the building is placed in service and in the following nine years. § 42.

Lump-sum distribution. Payment of the entire amount due at one time rather than in installments. Such distributions often occur from qualified pension or profit sharing plans upon the retirement or death of a covered employee. The recipient of a lump-sum distribution may recognize both long-term capital gain and ordinary income upon the receipt of the distribution. The ordinary income portion may be subject to a special 10-year income averaging provision. § 402(e).

M

Majority interest partners. Partners who have more than a 50 percent interest in partnership profits and capital, counting only those partners who have the same taxable year. The term is of significance in determining the appropriate taxable year of a partnership. § 706(b).

Marital deduction. A deduction allowed against the taxable estate or taxable gifts upon the transfer of property from one spouse to another.

Marriage penalty. The additional tax liability that results for a married couple when compared with what their tax liability would be if they were not married and filed separate returns.

Matching rule. Treatment of an intercompany transaction on a consolidated return, when a sold asset remains within the group.

Material participation. If an individual taxpayer materially participates in a nonrental trade or business activity, any loss from that activity is treated as an active loss that can be offset against active income. Material participation is achieved by meeting any one of seven tests provided in the Regulations. § 469(h).

Meaningful reduction test. A decrease in the shareholder's voting control. Used to determine whether a stock redemption qualifies for sale or exchange treatment.

Medical expenses. Medical expenses of an individual, a spouse, and dependents are allowed as an itemized deduction to the extent such amounts (less insurance reimbursements) exceed 10 percent (or 7.5 percent if at least age 65) of adjusted gross income. § 213.

Merger. The absorption of one corporation by another with the corporation being absorbed losing its legal identity. Flow Corporation is merged into Jobs Corporation, and the shareholders of Flow receive stock in Jobs in exchange for their stock in Flow. After the merger, Flow ceases to exist as

a separate legal entity. If a merger meets certain conditions, it is not currently taxable to the parties involved. § 368(a)(1)

Mid-month convention. A cost recovery convention that assumes that property is placed in service in the middle of the month that it is actually placed in service.

Mid-quarter convention. A cost recovery convention that assumes that property placed in service during the year is placed in service at the middle of the quarter in which it is actually placed in service. The mid-quarter convention applies if more than 40 percent of the value of property (other than eligible real estate) is placed in service during the last quarter of the year.

Minimum tax credit (AMT). See *alternative minimum tax credit*.

Miscellaneous itemized deductions. A special category of itemized deductions that includes expenses such as professional dues, tax return preparation fees, job-hunting costs, unreimbursed employee business expenses, and certain investment expenses. Such expenses are deductible only to the extent they exceed 2 percent of adjusted gross income. § 67.

Modified accelerated cost recovery system (MACRS). A method in which the cost of tangible property is recovered over a prescribed period of time. Enacted by the Economic Recovery Tax Act (ERTA) of 1981 and substantially modified by the Tax Reform Act (TRA) of 1986 (the modified system is referred to as MACRS), the approach disregards salvage value, imposes a period of cost recovery that depends upon the classification of the asset into one of various recovery periods, and prescribes the applicable percentage of cost that can be deducted each year. § 168.

Modified adjusted gross income. A key determinant in computing the domestic production activities deduction (DPAD) and certain other tax provisions (e.g., deduction for higher education tuition, exclusion of interest on education savings bonds). §§ 135, 144, and 199.

Moving expenses. A deduction *for* AGI is permitted to employees and self-employed individuals provided certain tests are met. The taxpayer's new job must be at least 50 miles farther from the old residence than the old residence was from the former place of work. In addition, an employee must be employed on a full-time basis at the new location for 39 weeks in the 12-month period following the move. Deductible moving expenses include the cost of moving the household and personal effects, transportation, and lodging expenses during the move. The cost of meals during the move is not deductible. Qualified moving expenses that are paid (or reimbursed) by the employer can be excluded from the employee's gross income. In this case, the related deduction by the employee is not permitted. §§ 62(a)(15), 132(a)(6), and 217.

Multiple support agreement. To qualify for a dependency exemption, the support test must be satisfied. This requires that over 50 percent of the support of the potential dependent be provided by the taxpayer. Where no one person provides more than 50 percent of the support, a multiple support agreement enables a taxpayer to still qualify for the dependency exemption. Any person who contributed more than 10 percent of the support is entitled to claim the exemption if each person in the group who contributed

more than 10 percent files a written consent (Form 2120). Each person who is a party to the multiple support agreement must meet all of the other requirements for claiming the dependency exemption. § 152(c).

Multistate Tax Commission (MTC). A regulatory body of the states that develops operating rules and regulations for the implementation of the UDITPA and other provisions that assign the total taxable income of a multistate corporation to specific states.

N

National sales tax. Intended as a replacement for the current Federal income tax. Unlike a value added tax (VAT), which is levied on the manufacturer, it would be imposed on the consumer upon the final sale of goods and services. To keep the tax from being regressive, low-income taxpayers would be granted some kind of credit or exemption.

Negligence. Failure to exercise the reasonable or ordinary degree of care of a prudent person in a situation that results in harm or damage to another. A penalty is assessed on taxpayers who exhibit negligence or intentional disregard of rules and Regulations with respect to the underpayment of certain taxes.

Net capital gain (NCG). The excess of the net long-term capital gain for the tax year over the net short-term capital loss. The net capital gain of an individual taxpayer is eligible for the alternative tax. § 1222(11).

Net capital loss (NCL). The excess of the losses from sales or exchanges of capital assets over the gains from sales or exchanges of such assets. Up to \$3,000 per year of the net capital loss may be deductible by noncorporate taxpayers against ordinary income. The excess net capital loss carries over to future tax years. For corporate taxpayers, the net capital loss cannot be offset against ordinary income, but it can be carried back three years and forward five years to offset net capital gains. §§ 1211, 1212, and 1221(10).

Net investment income. The excess of investment income over investment expenses. Investment expenses are those deductible expenses directly connected with the production of investment income. Investment expenses do not include investment interest. The deduction for investment interest for the tax year is limited to net investment income. § 163(d).

Net Investment Income Tax (NIIT). A tax created as part of the Affordable Care Act that went into effect starting in 2013. This tax is imposed on individuals, estates, and trusts at a rate of 3.8% of the lesser of (i) net investment income, or (ii) modified AGI less a threshold amount. For married individuals, the threshold is \$250,000 (\$125,000 if married filing separately). For other individuals the threshold is \$200,000. For estates and trusts, the threshold amount is equal to the amount where the 39.6% tax bracket begins for that year. For individuals, the dollar amounts are not adjusted for inflation. The tax is reported on Form 8960 (Net Investment Income Tax—Individuals, Estates, and Trusts), filed with the individual's Form 1040. § 1411.

Net operating loss (NOL). To mitigate the effect of the annual accounting period concept, § 172 allows taxpayers to use an excess loss of one year as a deduction for certain

past or future years. In this regard, a carryback period of 2 (or more) years and a carryforward period of 20 years currently are allowed.

Nexus. A multistate corporation's taxable income can be apportioned to a specific state only if the entity has established a sufficient presence, or nexus, with that state. State law, which often follows the Uniform Division of Income for Tax Purposes Act (UDITPA), specifies various activities that lead to nexus in various states.

Ninety-day letter. This notice is sent to a taxpayer upon request, upon the expiration of the 30-day letter, or upon exhaustion by the taxpayer of his or her administrative remedies before the IRS. The notice gives the taxpayer 90 days in which to file a petition with the U.S. Tax Court. If a petition is not filed, the IRS will demand payment of the assessed deficiency. §§ 6211–6216.

Non-additional-cost services. Services the employer may provide the employee at no additional cost to the employer. Generally, the benefit is the ability to utilize the employer's excess capacity (e.g., vacant seats on an airliner). Such amounts are excludible from the recipient's gross income.

Nonaccountable plan. An expense reimbursement plan that does not have an accountability feature. The result is that employee expenses must be claimed as deductions from AGI. An exception is moving expenses that are deductions for AGI.

Nonacquiescence. Disagreement by the IRS on the result reached in certain judicial decisions. *Nonacq.* or *NA*.

Nonbusiness bad debt. A bad debt loss that is not incurred in connection with a creditor's trade or business. The loss is classified as a short-term capital loss and is allowed only in the year the debt becomes entirely worthless. In addition to family loans, many investor losses are nonbusiness bad debts. § 166(d).

Nonliquidating distribution. A payment made by a partnership or corporation to the entity's owner when the entity's legal existence does not cease thereafter. If the payor is a corporation, such a distribution can result in dividend income to the shareholders. If the payor is a partnership, the partner usually assigns a basis in the distributed property that is equal to the lesser of the partner's basis in the partnership interest or the basis of the distributed asset to the partnership. In this regard, the partner first assigns basis to any cash that he or she receives in the distribution. The partner's remaining basis, if any, is assigned to the noncash assets according to their relative bases to the partnership.

Nonqualified deferred compensation (NQDC). Compensation arrangements that are frequently offered to executives. Such plans may include stock options, restricted stock, etc. Often, an executive may defer the recognition of taxable income. The employer, however, does not receive a tax deduction until the employee is required to include the compensation in income.

Nonqualified stock option (NQSO). A type of stock option that does not satisfy the statutory requirements of an incentive stock option. If the NQSO has a readily ascertainable fair market value (e.g., the option is traded on an established exchange), the value of the option must be included in the employee's gross income at the date of the grant. Otherwise, the employee does not recognize income at the

grant date. Instead, ordinary income is recognized in the year of exercise of the option.

Nonrecourse debt. Debt secured by the property that it is used to purchase. The purchaser of the property is not personally liable for the debt upon default. Rather, the creditor's recourse is to repossess the related property. Nonrecourse debt generally does not increase the purchaser's at-risk amount.

Nonrefundable credit. A credit that is not paid if it exceeds the taxpayer's tax liability. Some nonrefundable credits qualify for carryback and carryover treatment.

Nonresident alien (NRA). An individual who is neither a citizen nor a resident of the United States. Citizenship is determined under the immigration and naturalization laws of the United States. Residency is determined under § 7701(b) of the Internal Revenue Code.

Nontaxable exchange. A transaction in which realized gains or losses are not recognized. The recognition of gain or loss is postponed (deferred) until the property received in the nontaxable exchange is subsequently disposed of in a taxable transaction. Examples are § 1031 like-kind exchanges and § 1033 involuntary conversions.

Not essentially equivalent redemption. Sale or exchange treatment is given to this type of redemption. Although various safe-harbor tests are failed, the nature of the redemption is such that dividend treatment is avoided, because it represents a meaningful reduction in the shareholder's interest in the corporation. § 302(b)(1).

O

Occupational fee. A tax imposed on various trades or businesses. A license fee that enables a taxpayer to engage in a particular occupation.

Occupational taxes. See *occupational fee*.

Offer in compromise. A settlement agreement offered by the IRS in a tax dispute, especially where there is doubt as to the collectibility of the full deficiency. Offers in compromise can include installment payment schedules, as well as reductions in the tax and penalties owed by the taxpayer.

Office audit. An audit conducted by the IRS in the agent's office.

Office in the home expenses. Employment and business-related expenses attributable to the use of a residence (e.g., den or office) are allowed only if the portion of the residence is exclusively used on a regular basis as a principal place of business of the taxpayer or as a place of business that is used by patients, clients, or customers. If the expenses are incurred by an employee, the use must be for the convenience of the employer as opposed to being merely appropriate and helpful. In computing the office-in-the-home expenses, a taxpayer can use either the regular method or simplified method. As a general rule, the regular method requires more effort and recordkeeping but results in a larger deduction. § 280A.

One hundred percent additional first-year depreciation. The Tax Relief Act of 2010 provides for a cost recovery deduction of 100 percent in the tax year qualified property is placed in service. Qualified property includes most types

of new property other than buildings. This provision is effective for property acquired after December 31, 2010, and placed in service before January 1, 2012. See also *fifty percent additional first-year depreciation*.

One-year rule for prepaid expenses. Taxpayers who use the cash method are required to use the accrual method for deducting certain prepaid expenses (i.e., must capitalize the item and can deduct only when used). If a prepayment will not be consumed or expire by the end of the tax year following the year of payment, the prepayment must be capitalized and prorated over the benefit period. Conversely, if the prepayment will be consumed by the end of the tax year following the year of payment, it can be expensed when paid. To obtain the current deduction under the one-year rule, the payment must be a required payment rather than a voluntary payment.

Operating agreement. The governing document of a limited liability company. This document is similar in structure, function, and purpose to a partnership agreement.

Optional adjustment election. See *Section 754 election*.

Options. The sale or exchange of an option to buy or sell property results in capital gain or loss if the property is a capital asset. Generally, the closing of an option transaction results in short-term capital gain or loss to the writer of the call and the purchaser of the call option. § 1234.

Ordinary and necessary. An ordinary expense is common and accepted in the general industry or type of activity in which the taxpayer is engaged. It comprises one of the tests for the deductibility of expenses incurred or paid in connection with a trade or business; for the production or collection of income; for the management, conservation, or maintenance of property held for the production of income; or in connection with the determination, collection, or refund of any tax. §§ 162(a) and 212. A necessary expense is appropriate and helpful in furthering the taxpayer's business or income-producing activity. §§ 162(a) and 212.

Ordinary income property. Property contributed to a charitable organization that, if sold rather than contributed, would have resulted in other than long-term capital gain to the donor (i.e., ordinary income property and short-term capital gain property). Examples are inventory and capital assets held for less than the long-term holding period.

Organizational costs. See *organizational expenditures*.

Organizational expenditures. Items incurred early in the life of a corporate entity that are eligible for a \$5,000 limited expensing (subject to phaseout) and an amortization of the balance over 180 months. Organizational expenditures exclude those incurred to obtain capital (underwriting fees) or assets (subject to cost recovery). Typically, eligible expenditures include legal and accounting fees and state incorporation payments. Such items must be incurred by the end of the entity's first tax year. § 248.

Original issue discount (OID). The difference between the issue price of a debt obligation (e.g., a corporate bond) and the maturity value of the obligation when the issue price is less than the maturity value. OID represents interest and must be amortized over the life of the debt obligation using the effective interest method. The difference is not considered to be original issue discount for tax

purposes when it is less than one-fourth of 1 percent of the redemption price at maturity multiplied by the number of years to maturity. §§ 1272 and 1273(a)(3).

Other adjustments account (OAA). Used in the context of a distribution from an S corporation. The net accumulation of the entity's exempt income (e.g., municipal bond interest).

Other property. In a corporate reorganization, any property in the exchange that is not stock or securities, such as cash or inventory. This amount usually constitutes boot. This result is similar to that in a like-kind exchange.

Outbound taxation. U.S. tax effects when a U.S. person begins an investment or business activity outside the United States.

Outside basis. A partner's basis in his or her partnership interest.

Ownership change. An event that triggers a § 382 limitation for the acquiring corporation.

P

Parent-subsidiary controlled group. A controlled or affiliated group of corporations where at least one corporation is at least 80 percent owned by one or more of the others. The affiliated group definition is more difficult to meet.

Partial liquidation. A stock redemption where noncorporate shareholders are permitted sale or exchange treatment. In certain cases, an active business must have existed for at least five years. Only a portion of the outstanding stock in the entity is retired.

Partnership. For income tax purposes, a partnership includes a syndicate, group, pool, or joint venture, as well as ordinary partnerships. In an ordinary partnership, two or more parties combine capital and/or services to carry on a business for profit as co-owners. § 7701(a)(2).

Partnership agreement. The governing document of a partnership. A partnership agreement should describe the rights and obligations of the partners; the allocation of entity income, deductions, and cash flows; initial and future capital contribution requirements; conditions for terminating the partnership; and other matters.

Passive investment company. A means by which a multistate corporation can reduce the overall effective tax rate by isolating investment income in a low- or no-tax state.

Passive investment income (PII). Gross receipts from royalties, certain rents, dividends, interest, annuities, and gains from the sale or exchange of stock and securities. When earnings and profits (E & P) also exists, if the passive investment income of an S corporation exceeds 25 percent of the corporation's gross receipts for three consecutive years, S status is lost.

Passive loss. Any loss from (1) activities in which the taxpayer does not materially participate or (2) rental activities (subject to certain exceptions). Net passive losses cannot be used to offset income from nonpassive sources. Rather, they are suspended until the taxpayer either generates net passive income (and a deduction of such losses is allowed) or disposes of the underlying property (at which time the loss deductions are allowed in full). One relief provision allows landlords who actively participate in the rental activ-

ities to deduct up to \$25,000 of passive losses annually. However, a phaseout of the \$25,000 amount commences when the landlord's AGI exceeds \$100,000. Another relief provision applies for material participation in a real estate trade or business.

Patent. An intangible asset that may be amortized over a statutory 15-year period as a § 197 intangible. The sale of a patent usually results in favorable long-term capital gain treatment. §§ 197 and 1235.

Payroll factor. The proportion of a multistate corporation's total payroll that is traceable to a specific state. Used in determining the taxable income that is to be apportioned to that state.

Pension plan. A type of deferred compensation arrangement that provides for systematic payments of definitely determinable retirement benefits to employees who meet the requirements set forth in the plan.

Percentage depletion. Depletion based on a statutory percentage applied to the gross income from the property. The taxpayer deducts the greater of cost depletion or percentage depletion. § 613.

Percentage of completion method. A method of reporting gain or loss on certain long-term contracts. Under this method of accounting, the gross contract price is included in income as the contract is completed. Reg. § 1.451-3.

Permanent and total disability. A person is considered permanently and totally disabled if he or she is unable to engage in any substantial gainful activity due to a physical or mental impairment. In addition, this impairment must be one that can be expected to result in death or that has lasted or can be expected to last for a continuous period of not less than 12 months. The taxpayer generally must provide the IRS a physician's statement documenting this condition.

Permanent differences. Under ASC 740 (SFAS 109), tax-related items that appear in the entity's financial statements or its tax return but not both. For instance, interest income from a municipal bond is a permanent book-tax difference.

Permanent establishment (PE). A level of business activity, as defined under an income tax treaty, that subjects the taxpayer to taxation in a country other than that in which the taxpayer is based. Often evidenced by the presence of a plant, an office, or other fixed place of business. Inventory storage and temporary activities do not rise to the level of a PE. PE is the treaty's equivalent to nexus.

Permanently reinvesting. Under ASC 740-30 (APB 23) of Generally Accepted Accounting Principles, a special rule that relates to the book tax expense of non-U.S. subsidiaries. If a parent corporation documents that it is permanently reinvesting the non-U.S. earning of a non-U.S. subsidiary, the parent does not record as an expense any U.S. income tax that the parent might pay on such earnings, i.e., the book tax expense is deferred until such earnings are (if ever) repatriated to the United States.

Personal and dependency exemptions. The tax law provides an exemption for each individual taxpayer and an additional exemption for the taxpayer's spouse if a joint return is filed. An individual may also claim a dependency exemption for each dependent, provided certain tests are met. The amount of the personal and dependency exemptions is \$4,000 in 2015 (\$3,950 in 2014). The exemption is

subject to phaseout once adjusted gross income exceeds certain statutory threshold amounts.

Personal casualty gain. The recognized gain from any involuntary conversion of personal use property arising from fire, storm, shipwreck, or other casualty, or from theft.

Personal casualty loss. The recognized loss from any involuntary conversion of personal use property arising from fire, storm, shipwreck, or other casualty, or from theft.

Personal exemption. See *personal and dependency exemptions*.

Personal holding company tax. A penalty tax imposed on certain closely held corporations with excessive investment income. Assessed at the top individual tax rate on personal holding company income, reduced by dividends paid and other adjustments. § 541.

Personal residence. If a residence has been owned and used by the taxpayer as the principal residence for at least two years during the five-year period ending on the date of sale, up to \$250,000 of realized gain is excluded from gross income. For a married couple filing a joint return, the \$250,000 is increased to \$500,000 if either spouse satisfies the ownership requirement and both spouses satisfy the use requirement. § 121.

Personal service corporation (PSC). A corporation whose principal activity is the performance of personal services (e.g., health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting) and where such services are substantially performed by the employee-owners. The 35 percent statutory income tax rate applies to PSCs.

Personalty. All property that is not attached to real estate (realty) and is movable. Examples of personalty are machinery, automobiles, clothing, household furnishings, and personal effects.

Points. Loan origination fees that may be deductible as interest by a buyer of property. A seller of property who pays points reduces the selling price by the amount of the points paid for the buyer. While the seller is not permitted to deduct this amount as interest, the buyer may do so.

Portfolio income. Income from interest, dividends, rentals, royalties, capital gains, or other investment sources. Net passive losses cannot be used to offset net portfolio income.

Power of appointment. A legal right granted to someone by a will or other document that gives the holder the power to dispose of property or the income from property. When the holder may appoint the property to his or her own benefit, the power usually is called a general power of appointment. If the holder cannot benefit himself or herself but may only appoint to certain other persons, the power is a special power of appointment. Assume Gary places \$500,000 worth of securities in trust granting Donna the right to determine each year how the trustee is to divide the income between Ann and Babs. Under these circumstances, Donna has a special power of appointment. If Donna had the further right to appoint the income to herself, she probably possesses a general power of appointment. For the estate tax and gift tax effects of powers of appointment, see §§ 2041 and 2514.

Precedent. A previously decided court decision that is recognized as authority for the disposition of future decisions.

Precontribution gain or loss. Partnerships allow for a variety of special allocations of gain or loss among the partners, but gain or loss that is “built in” on an asset contributed to the partnership is assigned specifically to the contributing partner. § 704(c)(1)(A).

Preferences. See *AMT preferences*.

Preferred stock bailout. A process where a shareholder used the issuance and sale, or later redemption, of a preferred stock dividend to obtain long-term capital gains, without any loss of voting control over the corporation. In effect, the shareholder received corporate profits without suffering the consequences of dividend income treatment. This procedure led Congress to enact § 306, which, if applicable, converts the prior long-term capital gain on the sale or redemption of the tainted stock to dividend income.

Premium Tax Credit (PTC). A tax credit that is refundable and available in advance of filing a return for the year. The PTC serves to reduce the cost of health coverage obtained on the Marketplace (Exchange). A PTC is available to individuals who purchase coverage on the Exchange and have household income equal to or greater than 100% of the Federal poverty line (FPL) and no greater than 400% of the FPL. Also, an individual must not have been able to obtain affordable coverage from his or her employer. If obtained in advance, the PTC is given to the insurance provider to lower the monthly premium cost to the individual. The PTC is reconciled on Form 8962 (Premium Tax Credit) filed with Form 1040 or 1040-A (not Form 1040-EZ). Individuals who obtain insurance through the Marketplace receive Form 1095-A (Health Insurance Marketplace Statement) by January 31 of the following year. This form provides information necessary to claim or reconcile the PTC, including the monthly cost of premiums and the amount of PTC received in advance each month. § 36B.

Previously taxed income (PTI). Under prior law, the undistributed taxable income of an S corporation was taxed to the shareholders as of the last day of the corporation’s tax year and usually could be withdrawn by the shareholders without tax consequences at some later point in time. The role of PTI has been taken over by the accumulated adjustments account. See also *accumulated adjustments account (AAA)*.

Principal partner. A partner with a 5 percent or greater interest in partnership capital or profits. § 706(b)(3).

Private activity bond. Interest on state and local bonds is excludible from gross income. § 103. Certain such bonds are labeled private activity bonds. Although the interest on such bonds is excludible for regular income tax purposes, it is treated as a tax preference in calculating the AMT.

Private foundation. An exempt organization that is subject to additional statutory restrictions on its activities and on contributions made to it. Excise taxes may be levied on certain prohibited transactions, and the Code places more stringent restrictions on the deductibility of contributions to private foundations. § 509.

Probate costs. The costs incurred in administering a decedent’s estate.

Probate estate. The property of a decedent that is subject to administration by the executor or administrator of an estate.

Procedural Regulation. A Regulation issued by the Treasury Department that is a housekeeping-type instruction indicating information that taxpayers should provide the IRS as well as information about the internal management and conduct of the IRS itself.

Profit and loss sharing ratios. Specified in the partnership agreement and used to determine each partner's allocation of ordinary taxable income and separately stated items. Profits and losses can be shared in different ratios. The ratios can be changed by amending the partnership agreement or by using a special allocation. § 704(a).

Profit sharing plan. A deferred compensation plan established and maintained by an employer to provide for employee participation in the company's profits. Contributions are paid from the employer's current or accumulated profits to a trustee. Separate accounts are maintained for each participating employee. The plan must provide a definite, predetermined formula for allocating the contributions among the participants. It also must include a definite, predetermined formula for distributing the accumulated funds after a fixed number of years, on the attainment of a stated age, or on the occurrence of certain events such as illness, layoff, or retirement.

Profits (loss) interest. A partner's percentage allocation of partnership operating results, determined by the profit and loss sharing ratios.

Property. Assets defined in the broadest legal sense. Property includes the unrealized receivables of a cash basis taxpayer, but not services rendered. § 351.

Property dividend. Generally treated in the same manner as a cash distribution, measured by the fair market value of the property on the date of distribution. Distribution of appreciated property causes the distributing C or S corporation to recognize gain. The distributing corporation does not recognize loss on property that has depreciated in value.

Property factor. The proportion of a multistate corporation's total property that is traceable to a specific state. Used in determining the taxable income that is to be apportioned to that state.

Proportionate distribution. A distribution in which each partner in a partnership receives a pro rata share of hot assets being distributed. For example, a distribution of \$10,000 of hot assets equally to two 50 percent partners is a proportionate distribution.

Proposed Regulation. A Regulation issued by the Treasury Department in proposed, rather than final, form. The interval between the proposal of a Regulation and its finalization permits taxpayers and other interested parties to comment on the propriety of the proposal.

Proprietorship. A business entity for which there is a single owner. The net profit of the entity is reported on the owner's Federal income tax return (Schedule C of Form 1040).

Public Law 86-272. A congressional limit on the ability of the state to force a multistate corporation to assign taxable income to that state. Under P.L. 86-272, where orders for tangible personal property are both filled and delivered outside the state, the entity must establish more than the mere solicitation of such orders before any income can be apportioned to the state.

Punitive damages. Damages received or paid by the taxpayer can be classified as compensatory damages or as punitive damages. Punitive damages are those awarded to punish the defendant for gross negligence or the intentional infliction of harm. Such damages are includible in gross income. § 104.

Q

Qualified ABLE program. A state program that allows funds to be set aside for the benefit of an individual who became disabled or blind before age 26. Cash may be put into the fund annually up to the annual gift tax exclusion amount. Distributions to the designated beneficiary are not taxable provided they do not exceed qualified disability expenses for the year. § 529A.

Qualified business unit (QBU). A subsidiary, branch, or other business entity that conducts business using a currency other than the U.S. dollar.

Qualified dividend income. See *qualified dividends*.

Qualified dividends. Distributions made by domestic (and certain non-U.S.) corporations to noncorporate shareholders that are subject to tax at the same rates as those applicable to net long-term capital gains (i.e., 0 percent, 15 percent, or 20 percent). The 20 percent rate applies to certain high-income taxpayers (i.e., whose tax bracket is 39.6 percent). The dividend must be paid out of earnings and profits, and the shareholders must meet certain holding period requirements as to the stock. §§ 1(h)(1) and (11).

Qualified employee discounts. Discounts offered employees on merchandise or services that the employer ordinarily sells or provides to customers. The discounts must be generally available to all employees. In the case of property, the discount cannot exceed the employer's gross profit (the sales price cannot be less than the employer's cost). In the case of services, the discounts cannot exceed 20 percent of the normal sales price. § 132.

Qualified nonrecourse debt. Debt issued on realty by a bank, retirement plan, or governmental agency. Included in the at-risk amount by the investor. § 465(b)(6).

Qualified production activities income (QPAI). A key determinant in computing the domestic production activities deduction (DPAD). It consists of domestic production gross receipts (DPGR) reduced by cost of goods sold and other assignable expenses. Thus, QPAI represents the profit derived from domestic production activities. § 199.

Qualified real property business indebtedness. Indebtedness that was incurred or assumed by the taxpayer in connection with real property used in a trade or business and is secured by such real property. The taxpayer must not be a C corporation. For qualified real property business indebtedness, the taxpayer may elect to exclude some or all of the income realized from cancellation of debt on qualified real property. If the election is made, the basis of the property must be reduced by the amount excluded. The amount excluded cannot be greater than the excess of the principal amount of the outstanding debt over the fair market value (net of any other debt outstanding on the property) of the property securing the debt. § 108(c).

Qualified residence interest. A term relevant in determining the amount of interest expense the individual taxpayer may deduct as an itemized deduction for what otherwise would be disallowed as a component of personal interest (consumer interest). Qualified residence interest consists of interest paid on qualified residences (principal residence and one other residence) of the taxpayer. Debt that qualifies as qualified residence interest is limited to \$1 million of debt to acquire, construct, or substantially improve qualified residences (acquisition indebtedness) plus \$100,000 of other debt secured by qualified residences (home equity indebtedness). The home equity indebtedness may not exceed the fair market value of a qualified residence reduced by the acquisition indebtedness for that residence. § 163(h)(3).

Qualified small business corporation. For purposes of computing an exclusion upon the sale of qualified small business stock, a C corporation that has aggregate gross assets not exceeding \$50 million and that is conducting an active trade or business. § 1202.

Qualified small business stock. Stock in a qualified small business corporation, purchased as part of an original issue after August 10, 1993. The shareholder may exclude from gross income 50 (or 75 or 100) percent of the realized gain on the sale of the stock if he or she held the stock for more than five years. § 1202.

Qualified terminable interest property (QTIP). Generally, the marital deduction (for gift and estate tax purposes) is not available if the interest transferred will terminate upon the death of the transferee spouse and pass to someone else. Thus, if Jim (the husband) places property in trust, life estate to Mary (the wife), and remainder to their children upon Mary's death, this is a terminable interest that will not provide Jim (or Jim's estate) with a marital deduction. If, however, the transfer in trust is treated as qualified terminable interest property (the QTIP election is made), the terminable interest restriction is waived and the marital deduction becomes available. In exchange for this deduction, the surviving spouse's gross estate must include the value of the QTIP election assets, even though he or she has no control over the ultimate disposition of the asset. Terminable interest property qualifies for this election if the donee (or heir) is the only beneficiary of the asset during his or her lifetime and receives income distributions relative to the property at least annually. For gifts, the donor spouse is the one who makes the QTIP election. For property transferred by death, the executor of the estate of the deceased spouse makes the election. §§ 2056(b)(7) and 2523(f).

Qualified transportation fringes. Transportation benefits provided by the employer to the employee. Such benefits include (1) transportation in a commuter highway vehicle between the employee's residence and the place of employment, (2) a transit pass, and (3) qualified parking. Qualified transportation fringes are excludible from the employee's gross income to the extent categories (1) and (2) above do not exceed \$130 per month in 2015 and category (3) does not exceed \$250 per month in 2015. These amounts are indexed annually for inflation. § 132.

Qualified tuition program. A program that allows college tuition to be prepaid for a beneficiary. When amounts in the plan are used, nothing is included in gross income pro-

vided they are used for qualified higher education expenses. § 529.

Qualified tuition reduction plan. A type of fringe benefit plan that is available to employees of nonprofit educational institutions. Such employees (and the spouse and dependent children) are allowed to exclude from gross income a tuition waiver pursuant to a qualified tuition reduction plan. The exclusion applies to undergraduate tuition. In limited circumstances, the exclusion also applies to the graduate tuition of teaching and research assistants. § 117(d).

Qualifying child. An individual who, as to the taxpayer, satisfies the relationship, abode, and age tests. To be claimed as a dependent, such individual must also meet the citizenship and joint return tests and not be self-supporting. §§ 152(a)(1) and (c).

Qualifying relative. An individual who, as to the taxpayer, satisfies the relationship, gross income, support, citizenship, and joint return tests. Such an individual can be claimed as a dependent of the taxpayer. §§ 152(a)(2) and (d).

R

Rate reconciliation. Under Generally Accepted Accounting Principles, a footnote to the financial statements often includes a table that accounts for differences in the statutory income tax rate that applies to the entity (say, 35 percent) and the higher or lower effective tax rate that the entity realized for the reporting period. The rate reconciliation includes only permanent differences between the book tax expense and the entity's income tax provision. The rate reconciliation table often is expressed in dollar and/or percentage terms.

Realized gain. See *realized gain or loss*.

Realized gain or loss. The difference between the amount realized upon the sale or other disposition of property and the adjusted basis of the property. § 1001.

Realized loss. See *realized gain or loss*.

Realty. Real estate.

Reasonable cause. Relief from taxpayer and preparer penalties often is allowed where reasonable cause is found for the taxpayer's actions. For example, reasonable cause for the late filing of a tax return might be a flood that damaged the taxpayer's record-keeping systems and made a timely completion of the return difficult.

Reasonable needs of the business. A means of avoiding the penalty tax on an unreasonable accumulation of earnings. In determining the base for this tax (accumulated taxable income), § 535 allows a deduction for "such part of earnings and profits for the taxable year as are retained for the reasonable needs of the business." § 537.

Reasonableness. See *reasonableness requirement*.

Reasonableness requirement. The Code includes a reasonableness requirement with respect to the deduction of salaries and other compensation for services. What constitutes reasonableness is a question of fact. If an expense is unreasonable, the amount that is classified as unreasonable is not allowed as a deduction. The question of reasonableness generally arises with respect to closely held corporations where there is no separation of ownership and management. § 162(a)(1).

Recapitalization. An “E” reorganization, constituting a major change in the character and amount of outstanding equity of a corporation. For instance, common stock exchanged for preferred stock can qualify for tax-free “E” reorganization treatment.

Recognized gain. See *recognized gain or loss*.

Recognized gain or loss. The portion of realized gain or loss subject to income taxation.

Recognized loss. See *recognized gain or loss*.

Recourse debt. Debt for which the lender may both foreclose on the property and assess a guarantor for any payments due under the loan. A lender also may make a claim against the assets of any general partner in a partnership to which debt is issued, without regard to whether the partner has guaranteed the debt.

Recovery of capital doctrine. When a taxable sale or exchange occurs, the seller may be permitted to recover his or her investment (or other adjusted basis) in the property before gain or loss is recognized.

Redemption to pay death taxes. Sale or exchange treatment is available relative to this type of stock redemption, to the extent of the proceeds up to the total amount paid by the estate or heir for estate/inheritance taxes and administration expenses. The stock value must exceed 35 percent of the value of the decedent’s adjusted gross estate. In meeting this test, shareholdings in corporations where the decedent held at least 20 percent of the outstanding shares are combined.

Refundable credit. A credit that is paid to the taxpayer even if the amount of the credit (or credits) exceeds the taxpayer’s tax liability.

Regular corporation. See *C corporation*.

Rehabilitation expenditures credit. A credit that is based on expenditures incurred to rehabilitate industrial and commercial buildings and certified historic structures. The credit is intended to discourage businesses from moving from older, economically distressed areas to newer locations and to encourage the preservation of historic structures. § 47.

Rehabilitation expenditures credit recapture. When property that qualifies for the rehabilitation expenditures credit is disposed of or ceases to be used in the trade or business of the taxpayer, some or all of the tax credit claimed on the property may be recaptured as additional tax liability. The amount of the recapture is the difference between the amount of the credit claimed originally and what should have been claimed in light of the length of time the property was actually held or used for qualifying purposes. § 50.

Related corporation. See *controlled group*.

Related party. Various Code Sections define related parties and often include a variety of persons within this (usually detrimental) category. Generally, related parties are accorded different tax treatment from that applicable to other taxpayers who enter into similar transactions. For instance, realized losses that are generated between related parties are not recognized in the year of the loss. However, these deferred losses can be used to offset recognized gains that occur upon the subsequent sale of the asset to a nonrelated party. Other uses of a related-party definition include the conversion of gain upon the sale of a depreci-

able asset into all ordinary income (§ 1239) and the identification of constructive ownership of stock relative to corporate distributions, redemptions, liquidations, reorganizations, and compensation.

Related-party transactions. The tax law places restrictions upon the recognition of gains and losses between related parties because of the potential for abuse. For example, restrictions are placed on the deduction of losses from the sale or exchange of property between related parties. In addition, under certain circumstances, related-party gains that would otherwise be classified as capital gain are classified as ordinary income. §§ 267, 707(b), and 1239.

Rental activity. Any activity where payments are received principally for the use of tangible property is a rental activity. Temporary Regulations provide that in certain circumstances, activities involving rentals of real and personal property are not to be treated as rental activities. The Temporary Regulations list six exceptions.

Reorganization. Occurs, among other instances, when one corporation acquires another in a merger or an acquisition, a single corporation divides into two or more entities, a corporation makes a substantial change in its capital structure, or a corporation undertakes a change in its legal name or domicile. The exchange of stock and other securities in a corporate reorganization can be effected favorably for tax purposes if certain statutory requirements are followed strictly. Tax consequences include the nonrecognition of any gain that is realized by the shareholders except to the extent of boot received.

Required taxable year. A partnership or limited liability company must use a required tax year as its tax accounting period, or one of three allowable alternative tax year ends. The required tax year is determined using the least aggregate deferral rule. But if there is a common tax year used by owners holding a majority of the entity’s capital or profits interests, or used by all of the owners who hold 5 percent or more of the capital or profits interests, then that tax year end is used by the entity.

Research activities credit. A tax credit whose purpose is to encourage research and development. It consists of three components: the incremental research activities credit, the basic research credit, and the energy credit. The incremental research activities credit is equal to 20 percent of the excess qualified research expenditures over the base amount. The basic research credit is equal to 20 percent of the excess of basic research payments over the base amount. § 41.

Research and experimental expenditures. The Code provides three alternatives for the tax treatment of research and experimentation expenditures. They may be expensed in the year paid or incurred, deferred subject to amortization, or capitalized. If the taxpayer does not elect to expense such costs or to defer them subject to amortization (over 60 months), the expenditures must be capitalized. § 174. Three types of research activities credits are available: the basic research credit, the incremental research activities credit, and the energy credit. The rate for each type is 20 percent. § 41.

Reserve method. A method of accounting whereby an allowance is permitted for estimated uncollectible accounts.

Actual write-offs are charged to the reserve, and recoveries of amounts previously written off are credited to the reserve. The Code permits only certain financial institutions to use the reserve method. § 166.

Residential rental real estate. Buildings for which at least 80 percent of the gross rents are from dwelling units (e.g., an apartment building). This type of building is distinguished from nonresidential (commercial or industrial) buildings in applying the recapture of depreciation provisions. The term also is relevant in distinguishing between buildings that are eligible for a 27.5-year life versus a 39-year life for MACRS purposes. Generally, residential buildings receive preferential treatment.

Restricted property plan. An arrangement whereby an employer transfers property (usually stock) to an employee at a bargain price (for less than the fair market value). If the transfer is accompanied by a substantial risk of forfeiture and the property is not transferable, no compensation results to the employee until the restrictions disappear. An example of a substantial risk of forfeiture would be a requirement that the employee return the property if his or her employment is terminated within a specified period of time. § 83.

Revenue Agent's Report (RAR). A Revenue Agent's Report (RAR) reflects any adjustments made by the agent as a result of an audit of the taxpayer. The RAR is mailed to the taxpayer along with the 30-day letter, which outlines the appellate procedures available to the taxpayer.

Revenue neutrality. A description that characterizes tax legislation when it neither increases nor decreases the total revenue collected by the taxing jurisdiction. Thus, any tax revenue losses are offset by tax revenue gains.

Revenue Procedure. A matter of procedural importance to both taxpayers and the IRS concerning the administration of the tax laws is issued as a Revenue Procedure (abbreviated Rev.Proc.). A Revenue Procedure is published in an *Internal Revenue Bulletin* (I.R.B.).

Revenue Ruling. A Revenue Ruling (abbreviated Rev.Rul.) is issued by the National Office of the IRS to express an official interpretation of the tax law as applied to specific transactions. It is more limited in application than a Regulation. A Revenue Ruling is published in an *Internal Revenue Bulletin* (I.R.B.).

Reversionary interest. The trust property that reverts to the grantor after the expiration of an intervening income interest. Assume that Phil places real estate in trust with income to Junior for 11 years, and upon the expiration of this term, the property returns to Phil. Under these circumstances, Phil holds a reversionary interest in the property. A reversionary interest is the same as a remainder interest, except that, in the latter case, the property passes to someone other than the original owner (e.g., the grantor of a trust) upon the expiration of the intervening interest.

Roth IRAs. See *Individual Retirement Account (IRA)*.

S

S corporation. The designation for a small business corporation. See also *Subchapter S*.

Sale or exchange. A requirement for the recognition of capital gain or loss. Generally, the seller of property must

receive money or relief from debt to have sold the property. An exchange involves the transfer of property for other property. Thus, collection of a debt is neither a sale nor an exchange. The term *sale or exchange* is not defined by the Code.

Sales factor. The proportion of a multistate corporation's total sales that is traceable to a specific state. Used in determining the taxable income that is to be apportioned to that state.

Sales tax. A state- or local-level tax on the retail sale of specified property. Generally, the purchaser pays the tax, but the seller collects it, as an agent for the government. Various taxing jurisdictions allow exemptions for purchases of specific items, including certain food, services, and manufacturing equipment. If the purchaser and seller are in different states, a use tax usually applies.

Schedule K-1. A tax information form prepared for each partner in a partnership, each shareholder of an S corporation, and some beneficiaries of certain trusts. The Schedule K-1 reports the owner's share of the entity's ordinary income or loss from operations, as well as the owner's share of separately stated items.

Schedule M-1. On the Form 1120, a reconciliation of book net income with Federal taxable income. Accounts for temporary and permanent differences in the two computations, such as depreciation differences, exempt income, and nondeductible items. On Forms 1120S and 1065, the Schedule M-1 reconciles book income with the owners' aggregate ordinary taxable income.

Schedule M-3. An *expanded* reconciliation of book net income with Federal taxable income (see *Schedule M-1*). Required of C and S corporations and partnerships/LLCs with total assets of \$10 million or more.

Scholarships. Scholarships are generally excluded from the gross income of the recipient unless the payments are a disguised form of compensation for services rendered. However, the Code imposes restrictions on the exclusion. The recipient must be a degree candidate. The excluded amount is limited to amounts used for tuition, fees, books, supplies, and equipment required for courses of instruction. Amounts received for room and board are not eligible for the exclusion. § 117.

Section 121 exclusion. If a residence has been owned and used by the taxpayer as the principal residence for at least two years during the five-year period ending on the date of sale, up to \$250,000 of realized gain is excluded from gross income. For a married couple filing a joint return, the \$250,000 is increased to \$500,000 if either spouse satisfies the ownership requirement and both spouses satisfy the use requirement.

Section 179 expensing. The ability to deduct a capital expenditure in the year an asset is placed in service rather than over the asset's useful life or cost recovery period. The annual ceiling on the deduction is \$25,000 for 2015 (\$500,000 for 2014). However, the deduction is reduced dollar for dollar when § 179 property placed in service during the taxable year exceeds \$200,000 in 2015 (\$2 million in 2014). In addition, the amount expensed under § 179 cannot exceed the aggregate amount of taxable income derived from the conduct of any trade or business by the taxpayer.

Section 179 expensing election. See *Section 179 expensing*.

Section 338 election. When a corporation acquires at least 80 percent of a subsidiary within a 12-month period, it can elect to treat the acquisition of such stock as an asset purchase. The acquiring corporation's basis in the subsidiary's assets then is the cost of the stock. The subsidiary is deemed to have sold its assets for an amount equal to the grossed-up basis in its stock.

Section 382 limitation. When one corporation acquires another, the acquiror's ability to use the loss and credit carryovers of the target may be limited, in an anti-abuse provision specified in the Code. Generally, for instance, the maximum NOL deduction available to the acquiror is the takeover-date value of the target times the tax-exempt interest rate on that date.

Section 401(k) plan. A cash or deferred arrangement plan that allows participants to elect to receive up to \$18,000 in 2015 in cash (taxed currently) or to have a contribution made on their behalf to a profit sharing or stock bonus plan (excludible from gross income). The plan may also be in the form of a salary reduction agreement between the participant and the employer.

Section 754 election. An election that may be made by a partnership to adjust the basis of partnership assets to reflect a purchasing partner's outside basis in interest or to reflect a gain, loss, or basis adjustment of a partner receiving a distribution from a partnership. The intent of the election is to maintain the equivalence between outside and inside basis for that partner. Once the election is made, the partnership must make basis adjustments for all future transactions, unless the IRS consents to revoke the election.

Section 1231 gains and losses. If the combined gains and losses from the taxable dispositions of § 1231 assets plus the net gain from business involuntary conversions (of both § 1231 assets and long-term capital assets) is a gain, the gains and losses are treated as long-term capital gains and losses. In arriving at § 1231 gains, however, the depreciation recapture provisions (e.g., § 1245) are applied first to produce ordinary income. If the net result of the combination is a loss, the gains and losses from § 1231 assets are treated as ordinary gains and losses. § 1231(a).

Section 1231 lookback. For gain to be classified as § 1231 gain, the gain must survive the § 1231 lookback. To the extent of nonrecaptured § 1231 losses for the five prior tax years, the gain is classified as ordinary income. § 1231(c).

Section 1231 property. Depreciable assets and real estate used in trade or business and held for the required long-term holding period. § 1231(b).

Section 1244 stock. Stock issued under § 1244 by qualifying small business corporations. If § 1244 stock becomes worthless, the shareholders may claim an ordinary loss rather than the usual capital loss, within statutory limitations.

Section 1245 property. Property that is subject to the recapture of depreciation under § 1245. For a definition of § 1245 property, see § 1245(a)(3).

Section 1245 recapture. Upon a taxable disposition of § 1245 property, all depreciation claimed on the property

is recaptured as ordinary income (but not to exceed any recognized gain from the disposition).

Section 1250 property. Real estate that is subject to the recapture of depreciation under § 1250. For a definition of § 1250 property, see § 1250(c).

Section 1250 recapture. Upon a taxable disposition of § 1250 property, accelerated depreciation or cost recovery claimed on the property may be recaptured as ordinary income.

Securities. Generally, stock, debt, and other financial assets. To the extent securities other than the stock of the transferee corporation are received in a § 351 exchange, the new shareholder realizes a gain.

Self-employment tax. A tax of 12.4 percent is levied on individuals with net earnings from self-employment (up to \$118,500 in 2015) to provide Social Security benefits (i.e., the old age, survivors, and disability insurance portion) for such individuals. In addition, a tax of 2.9 percent is levied on individuals with net earnings from self-employment (with no statutory ceiling) to provide Medicare benefits (i.e., the hospital insurance portion) for such individuals. If a self-employed individual also receives wages from an employer that are subject to FICA, the self-employment tax will be reduced. A partial deduction is allowed in calculating the self-employment tax. Individuals with net earnings of \$400 or more from self-employment are subject to this tax. §§ 1401 and 1402.

Separate foreign tax credit limitation category. The foreign tax credit of a taxpayer is computed for each of several types of income sources, as specified by the Code to limit the results of tax planning. FTC income "baskets" include general and passive. The FTC for the year is the sum of the credits as computed within all of the taxpayer's separate FTC baskets used for the tax year.

Separate return limitation year (SRLY). A series of rules limits the amount of an acquired corporation's net operating loss carryforwards that can be used by the acquiror. Generally, a consolidated return can include the acquiree's net operating loss carryforward only to the extent of the lesser of the subsidiary's (1) current-year or (2) cumulative positive contribution to consolidated taxable income.

Separately stated item. Any item of a partnership or an S corporation that might be taxed differently to any two owners of the entity. These amounts are not included in the ordinary income of the entity, but are instead reported separately to the owners; tax consequences are determined at the owner level.

Severance tax. A tax imposed upon the extraction of natural resources.

Short period. See *short taxable year*.

Short sale. A sale that occurs when a taxpayer sells borrowed property (usually stock) and repays the lender with substantially identical property either held on the date of the short sale or purchased after the sale. No gain or loss is recognized until the short sale is closed, and such gain or loss is generally short-term. § 1233.

Short taxable year. A tax year that is less than 12 months. A short taxable year may occur in the initial reporting period, in the final tax year, or when the taxpayer changes tax years.

Significant participation activity. Seven tests determine whether an individual has achieved material participation

in an activity, one of which is based on more than 500 hours of participation in significant participation activities. A significant participation activity is one in which the individual's participation exceeds 100 hours during the year. Temp.Reg. § 1.469-5T.

Simple trust. Trusts that are not complex trusts. Such trusts may not have a charitable beneficiary, accumulate income, or distribute corpus.

Simplified employee pension (SEP) plan. An employer may make contributions to an employee's IRA in amounts not exceeding the lesser of 15 percent of compensation or \$53,000 per individual in 2015. These employer sponsored simplified employee pensions are permitted only if the contributions are nondiscriminatory and are made on behalf of all employees who have attained age 21 and have worked for the employer during at least three of the five preceding calendar years. § 219(b).

Small business corporation. A corporation that satisfies the definition of § 1361(b), § 1244(c), or both. Satisfaction of § 1361(b) permits an S election, and satisfaction of § 1244 enables the shareholders of the corporation to claim an ordinary loss on the worthlessness of stock.

Small business stock. See *Section 1244 stock*.

Small Cases Division. A division within the U.S. Tax Court where jurisdiction is limited to claims of \$50,000 or less. There is no appeal from this court.

Sole proprietorship. An individual who operates a business activity reports the results of the business on Form 1040 for the year, usually on Schedule C or F. Federal income tax liabilities are computed using individual tax rates.

Solicitation. A level of activity brought about by the taxpayer within a specific state. Under Public Law 86-272, certain types of solicitation activities do not create nexus with the state. Exceeding mere solicitation, though, creates nexus.

Special allocation. Any amount for which an agreement exists among the partners of a partnership outlining the method used for spreading the item among the partners.

Special use value. Permits the executor of an estate to value, for estate tax purposes, real estate used in a farming activity or in connection with a closely held business at its current use value rather than at its most suitable or optimal use value. Under this option, a farm is valued for farming purposes even though, for example, the property might have a higher potential value as a shopping center. For the executor of an estate to elect special use valuation, the conditions of § 2032A must be satisfied.

Specific charge-off method. A method of accounting for bad debts in which a deduction is permitted only when an account becomes partially or completely worthless.

Spin-off. A type of reorganization where, for example, Ace Corporation transfers some assets to Bow Corporation in exchange for enough Bow stock to represent control. Ace then distributes the Bow stock to its shareholders.

Split-off. A type of reorganization where, for example, Arc Corporation transfers some assets to Bond Corporation in exchange for enough Bond stock to represent control. Arc then distributes the Bond stock to its shareholders in exchange for some of their Arc stock.

Split-up. A type of reorganization where, for example, Ally Corporation transfers some assets to Bar Corporation and

the remainder to Zip Corporation. In return, Ally receives enough Bar and Zip stock to represent control of each corporation. Ally then distributes the Bar and Zip stock to its shareholders in return for all of their Ally stock. The result of the split-up is that Ally is liquidated, and its shareholders now have control of Bar and Zip.

Sprinkling trust. When a trustee has the discretion to either distribute or accumulate the entity accounting income of the trust and to distribute it among the trust's income beneficiaries in varying magnitudes. The trustee can "sprinkle" the income of the trust.

Standard deduction. The individual taxpayer can either itemize deductions or take the standard deduction. The amount of the standard deduction depends on the taxpayer's filing status (single, head of household, married filing jointly, surviving spouse, or married filing separately). For 2015, the amount of the standard deduction ranges from \$6,300 (for single) to \$12,600 (for married, filing jointly). Additional standard deductions of either \$1,250 (for married taxpayers) or \$1,550 (for single taxpayers) are available if the taxpayer is blind or age 65 or over. Limitations exist on the amount of the standard deduction of a taxpayer who is another taxpayer's dependent. The standard deduction amounts are adjusted for inflation each year. § 63(c).

Startup expenditures. Expenditures paid or incurred prior to the beginning of the business that would have been deductible as an ordinary and necessary business expense if business operations had begun. Examples of such expenditures include advertising; salaries and wages; travel and other expenses incurred in lining up prospective distributors, suppliers, or customers; and salaries and fees to executives, consultants, and professional service providers. A taxpayer will immediately expense the first \$5,000 (subject to phaseout) of startup expenditures and amortize the balance over a period of 180 months, unless the taxpayer elects to not do so.

Statute of limitations. Provisions of the law that specify the maximum period of time in which action may be taken concerning a past event. Code §§ 6501-6504 contain the limitation periods applicable to the IRS for additional assessments, and §§ 6511-6515 relate to refund claims by taxpayers.

Statutory employee. Statutory employees are considered self-employed independent contractors for purposes of reporting income and expenses on their tax returns. Generally, a statutory employee must meet three tests:

- It is understood from a service contract that the services will be performed by the person.
- The person does not have a substantial investment in facilities (other than transportation used to perform the services).
- The services involve a continuing relationship with the person for whom they are performed.

For further information on statutory employees, see Circular E, *Employer's Tax Guide* (IRS Publication 15).

Step transaction. Disregarding one or more transactions to arrive at the final result. Assume, for example, that the shareholders of Clue Corporation liquidate the corporation and receive cash and operating assets. Immediately after

the liquidation, the shareholders transfer the operating assets to newly formed Blue Corporation. Under these circumstances, the IRS may contend that the liquidation of Clue should be disregarded (thereby depriving the shareholders of capital gain treatment). What may really have happened is a reorganization of Clue with a distribution of boot (ordinary income) to Clue's shareholders. If so, there will be a carryover of basis in the assets transferred from Clue to Blue.

Step-down in basis. A reduction in the tax basis of property.

Step-up in basis. An increase in the income tax basis of property. A step-up in basis occurs when a decedent dies owning appreciated property. Since the estate or heir acquires a basis in the property equal to the property's fair market value on the date of death (or alternate valuation date if available and elected), any appreciation is not subject to the income tax. Thus, a step-up in basis is the result, with no immediate income tax consequences.

Stock bonus plan. A type of deferred compensation plan in which the employer establishes and maintains the plan and contributes employer stock to the plan for the benefit of employees. The contributions need not be dependent on the employer's profits. Any benefits of the plan are distributable in the form of employer stock, except that distributable fractional shares may be paid in cash.

Stock dividend. Not taxable if pro rata distributions of stock or stock rights on common stock. Section 305 governs the taxability of stock dividends and sets out five exceptions to the general rule that stock dividends are nontaxable.

Stock option. The right to purchase a stated number of shares of stock from a corporation at a certain price within a specified period of time. §§ 421 and 422.

Stock redemption. A corporation buys back its own stock from a specified shareholder. Typically, the corporation recognizes any realized gain on the noncash assets that it uses to effect a redemption, and the shareholder obtains a capital gain or loss upon receipt of the purchase price.

Stock rights. Assets that convey to the holder the power to purchase corporate stock at a specified price, often for a limited period of time. Stock rights received may be taxed as a distribution of earnings and profits. After the right is exercised, the basis of the acquired share includes the investor's purchase price or gross income, if any, to obtain the right. Disposition of the right also can be taxable.

Subchapter S. Sections 1361–1379 of the Internal Revenue Code. An elective provision permitting certain small business corporations (§ 1361) and their shareholders (§ 1362) to elect to be treated for income tax purposes in accordance with the operating rules of §§ 1363–1379. However, some S corporations usually avoid the corporate income tax, and corporate losses can be claimed by the shareholders.

Subpart F. Identifies the current tax treatment of income earned by a controlled foreign corporation. Certain types of income are included in U.S. gross income by U.S. shareholders of such an entity as they are generated, not when they are repatriated.

Subpart F income. See *Subpart F*.

Substance over form. A standard used when one must ascertain the true reality of what has occurred. Suppose, for example, a father sells stock to his daughter for \$1,000. If the stock is really worth \$50,000 at the time of the transfer, the substance of the transaction is probably a gift to her of \$49,000.

Substantial authority. Taxpayer and tax preparer understatement penalties are waived where substantial authority existed for the disputed position taken on the return.

Substantial risk of forfeiture (SRF). A term that is associated with a restricted property plan. Generally, an employee who receives property (e.g., stock of the employer-corporation) from the employer at a bargain price or at no cost must include the bargain element in gross income. However, the employee currently does not have to do so if there is a substantial risk of forfeiture. A substantial risk of forfeiture exists if a person's rights to full enjoyment of property are conditioned upon the future performance, or the refraining from the performance, of substantial services by the individual. § 83.

Sunset provision. A provision attached to new tax legislation that will cause such legislation to expire at a specified date. Sunset provisions are attached to tax cut bills for long-term budgetary reasons to make their effect temporary. Once the sunset provision comes into play, the tax cut is rescinded and former law is reinstated. An example of a sunset provision is contained in the Tax Relief Reconciliation Act of 2001 that related to the estate tax. After the estate tax was phased out in 2010, a sunset provision called for the reinstatement of the estate tax as of January 1, 2011.

Supreme Court. See *U.S. Supreme Court*.

Surviving spouse. When a husband or wife predeceases the other spouse, the survivor is known as a surviving spouse. Under certain conditions, a surviving spouse may be entitled to use the income tax rates in § 1(a) (those applicable to married persons filing a joint return) for the two years after the year of death of his or her spouse. § 2. With respect to the Federal estate tax, this term describes the second spouse to die of a married couple, for the period between the two dates of death.

Syndication costs. Incurred in promoting and marketing partnership interests for sale to investors. Examples include legal and accounting fees, printing costs for prospectus and placement documents, and state registration fees. These items are capitalized by the partnership as incurred, with no amortization thereof allowed.

T

Tax avoidance. The minimization of one's tax liability by taking advantage of legally available tax planning opportunities. Tax avoidance can be contrasted with tax evasion, which entails the reduction of tax liability by illegal means.

Tax benefit rule. A provision that limits the recognition of income from the recovery of an expense or a loss properly deducted in a prior tax year to the amount of the deduction that generated a tax saving. Assume that last year Gary had medical expenses of \$4,000 and adjusted gross income of \$30,000. Because of the AGI limitation, Gary could deduct

only \$1,000 of these expenses [$\$4,000 - (10\% \times \$30,000)$]. If this year Gary is reimbursed in full by his insurance company for the \$4,000 of expenses, the tax benefit rule limits the amount of income from the reimbursement to \$1,000 (the amount previously deducted with a tax saving).

Tax Court. See *U.S. Tax Court*.

Tax credit for the elderly or disabled. An elderly (age 65 and over) or disabled taxpayer may receive a tax credit amounting to 15 percent of \$5,000 (\$7,500 for qualified married individuals filing jointly). This amount is reduced by Social Security benefits, excluded pension benefits, and one-half of the taxpayer's adjusted gross income in excess of \$7,500 (\$10,000 for married taxpayers filing jointly). § 22.

Tax credits. Amounts that directly reduce a taxpayer's tax liability. The tax benefit received from a tax credit is not dependent on the taxpayer's marginal tax rate, whereas the benefit of a tax deduction or exclusion is dependent on the taxpayer's tax bracket.

Tax evasion. The reduction of taxes by the use of subterfuge or fraud or other nonlegal means. For example, a cash basis taxpayer tries to increase his or her charitable contribution deduction by prepaying next year's church pledge with a pre-dated check issued in the following year.

Tax haven. A country in which either locally sourced income or residents of the country are subject to a low rate of taxation.

Tax preferences items. See *AMT preferences*.

Tax preparer. One who prepares tax returns for compensation. A tax preparer must register with the IRS and receive a special ID number to practice before the IRS and represent taxpayers before the agency in tax audit actions. The conduct of a tax preparer is regulated under Circular 230. Tax preparers also are subject to penalties for inappropriate conduct when working in the tax profession.

Tax Rate Schedules. Rate schedules that are used by upper-income taxpayers and those not permitted to use the tax table. Separate rate schedules are provided for married individuals filing jointly, heads of households, single taxpayers, estates and trusts, and married individuals filing separate returns. § 1.

Tax research. The method used to determine the best available solution to a situation that possesses tax consequences. Both tax and nontax factors are considered.

Tax shelters. The typical tax shelter generated large losses in the early years of the activity. Investors would offset these losses against other types of income and therefore avoid paying income taxes on this income. These tax shelter investments could then be sold after a few years and produce capital gain income, which is taxed at a lower rate compared to ordinary income. The passive activity loss rules and the at-risk rules now limit tax shelter deductions.

Tax Table. A table that is provided for taxpayers with less than \$100,000 of taxable income. Separate columns are provided for single taxpayers, married taxpayers filing jointly, heads of households, and married taxpayers filing separately. § 3.

Tax treaty. An agreement between the U.S. Department of State and another country designed to alleviate double taxation of income and asset transfers and to share administra-

tive information useful to tax agencies in both countries. The United States has income tax treaties with almost 70 countries and transfer tax treaties with about 20.

Taxable estate. The taxable estate is the gross estate of a decedent reduced by the deductions allowed by §§ 2053–2057 (e.g., administration expenses, marital and charitable deductions). The taxable estate is subject to the unified transfer tax at death. § 2051.

Taxable gift. The amount of a gift that is subject to the unified transfer tax. Thus, a taxable gift has been adjusted by the annual exclusion and other appropriate deductions (e.g., marital and charitable). § 2053.

Taxable year. The annual period over which income is measured for income tax purposes. Most individuals use a calendar year, but many businesses use a fiscal year based on the natural business year.

Technical Advice Memoranda (TAM). TAMs are issued by the IRS in response to questions raised by IRS field personnel during audits. They deal with completed rather than proposed transactions and are often requested for questions related to exempt organizations and employee plans.

Technical termination of a partnership. The entity is treated for tax purposes as though it has terminated, even though it continues in its activities. When there has been a sale or exchange of more than 50 percent of the capital interests of the partnership within 12 months, the partnership is deemed to have terminated when the 50 percent threshold is crossed. A new partnership immediately is formed through asset contributions by the partners. These activities can affect the entity's tax year and its bases in the assets it holds.

Temporary differences. Under ASC 740 (SFAS 109), tax-related items that appear in the entity's financial statements and its tax return, but in different time periods. For instance, doubtful accounts receivable often create a temporary book-tax difference, as a bad debt reserve is used to compute an expense for financial reporting purposes, but a bad debt often is deductible only under the specific write-off rule for tax purposes, and the difference observed for the current period creates a temporary difference.

Temporary Regulation. A Regulation issued by the Treasury Department in temporary form. When speed is critical, the Treasury Department issues Temporary Regulations that take effect immediately. These Regulations have the same authoritative value as Final Regulations and may be cited as precedent for three years. Temporary Regulations are also issued as proposed Regulations.

Tenants by the entirety. Essentially, a joint tenancy between husband and wife.

Tenants in common. A form of ownership where each tenant (owner) holds an undivided interest in property. Unlike a joint tenancy or a tenancy by the entirety, the interest of a tenant in common does not terminate upon that individual's death (there is no right of survivorship). Assume that Tim and Cindy acquire real estate as equal tenants in common. Upon Tim's death, his one-half interest in the property passes to his estate or heirs, not automatically to Cindy.

Terminable interest. An interest in property that terminates upon the death of the holder or upon the occurrence of some other specified event. The transfer of a terminable

interest by one spouse to the other may not qualify for the marital deduction. §§ 2056(b) and 2523(b).

Theft loss. A loss from larceny, embezzlement, or robbery. It does not include misplacement of items.

Thin capitalization. When debt owed by a corporation to the shareholders becomes too large in relation to the corporation's capital structure (i.e., stock and shareholder equity), the IRS may contend that the corporation is thinly capitalized. In effect, some or all of the debt is reclassified as equity. The immediate result is to disallow any interest deduction to the corporation on the reclassified debt. To the extent of the corporation's earnings and profits, interest payments and loan repayments on the reclassified debt are treated as dividends to the shareholders.

Thirty-day letter. A letter that accompanies an RAR (Revenue Agent's Report) issued as a result of an IRS audit of a taxpayer (or the rejection of a taxpayer's claim for refund). The letter outlines the taxpayer's appeal procedure before the IRS. If the taxpayer does not request any such procedures within the 30-day period, the IRS issues a statutory notice of deficiency (the 90-day letter).

Throwback rule. If there is no income tax in the state to which a sale otherwise would be apportioned, the sale essentially is exempt from state income tax, even though the seller is domiciled in a state that levies an income tax. Nonetheless, if the seller's state has adopted a throwback rule, the sale is attributed to the seller's state and the transaction is subjected to a state-level tax.

Traditional IRA. See *Individual Retirement Account (IRA)*.

Transfer pricing. The process of setting internal prices for transfers of goods and services among related taxpayers. For example, what price should be used when Subsidiary purchases management services from Parent? The IRS can adjust transfer prices when it can show that the taxpayers were attempting to avoid tax by, say, shifting losses, deductions, or credits from low-tax to high-tax entities or jurisdictions.

Transportation expenses. Transportation expenses for an employee include only the cost of transportation (e.g., taxi fares and automobile expenses) in the course of employment when the employee is not away from home in travel status. Commuting expenses are not deductible.

Travel expenses. Expenses that include meals (generally subject to a 50 percent disallowance) and lodging and transportation expenses while away from home in the pursuit of a trade or business (including that of an employee).

Treaty shopping. An international investor attempts to use the favorable aspects of a tax treaty to his or her advantage, often elevating the form of the transaction over its substance (e.g., by establishing only a nominal presence in the country offering the favorable treaty terms).

U

UDITPA. The Uniform Division of Income for Tax Purposes Act has been adopted in some form by many of the states. The Act develops criteria by which the total taxable income of a multistate corporation can be assigned to specific states.

Unclaimed property. A U.S. state may have the right to acquire property that has been made available to an individual

or legal entity for a fixed period of time, where the claimant has not taken possession of the property after a notice period. Examples of such property that a state could acquire are an uncashed payroll check, or an unused gift card.

Undistributed personal holding company income. The tax base for the personal holding company tax. § 545.

Unearned income. Income received but not yet earned. Normally, such income is taxed when received, even for accrual basis taxpayers.

Unified transfer tax. Rates applicable to transfers by gift and death made after 1976. § 2001(c).

Unified transfer tax credit. A credit allowed against any unified transfer tax. §§ 2010 and 2505.

Uniform capitalization (UNICAP) rules. Under § 263A, the Regulations provide a set of rules that all taxpayers (regardless of the particular industry) can use to determine the items of cost (and means of allocating those costs) that must be capitalized with respect to the production of tangible property.

Unitary approach. See *unitary theory*.

Unitary theory. Sales, property, and payroll of related corporations are combined for nexus and apportionment purposes, and the worldwide income of the unitary entity is apportioned to the state. Subsidiaries and other affiliated corporations found to be part of the corporation's unitary business (because they are subject to overlapping ownership, operation, or management) are included in the apportionment procedure. This approach can be limited if a water's edge election is in effect.

Unit-livestock-price method. A method of accounting for the cost of livestock. The livestock are valued using a standard cost of raising an animal with the characteristics of the animals on hand to the same age as those animals.

Unrealized receivables. Amounts earned by a cash basis taxpayer but not yet received. Because of the method of accounting used by the taxpayer, these amounts have a zero income tax basis. When unrealized receivables are distributed to a partner, they generally convert a transaction from nontaxable to taxable or an otherwise capital gain to ordinary income (i.e., as a "hot asset").

Unreasonable compensation. A deduction is allowed for "reasonable" salaries or other compensation for personal services actually rendered. To the extent compensation is "excessive" ("unreasonable"), the distribution could be treated as a dividend, such that no deduction is allowed. The problem of unreasonable compensation usually is limited to closely held corporations, where the motivation is to pay out profits in some form that is deductible to the corporation.

Unreasonable position. A tax preparer penalty is assessed regarding the understatement of a client's tax liability due to a tax return position that is found to be too aggressive. The penalty is avoided if there is substantial authority for the position or if the position is disclosed adequately on the tax return. The penalty equals the greater of \$1,000 or one-half of the tax preparer's fee that is traceable to the aggressive position.

Unrecaptured § 1250 gain. Gain from the sale of depreciable real estate held more than one year. The gain is equal to or

less than the depreciation taken on such property and is reduced by § 1245 and § 1250 gain.

Unrelated business income (UBI). Income recognized by an exempt organization that is generated from activities not related to the exempt purpose of the entity. For instance, the gift shop located in a hospital may generate unrelated business income. § 511.

Unrelated business income tax (UBIT). Levied on the unrelated business income of an exempt organization.

U.S. Court of Federal Claims. A trial court (court of original jurisdiction) that decides litigation involving Federal tax matters. Appeal from this court is to the Court of Appeals for the Federal Circuit.

U.S. shareholder. For purposes of classification of an entity as a controlled foreign corporation, a U.S. person who owns, or is considered to own, 10 percent or more of the total combined voting power of all classes of voting stock of a foreign corporation. Stock owned directly, indirectly, and constructively is counted for this purpose.

U.S. Supreme Court. The highest appellate court or the court of last resort in the Federal court system and in most states. Only a small number of tax decisions of the U.S. Courts of Appeal are reviewed by the U.S. Supreme Court under its certiorari procedure. The Supreme Court usually grants certiorari to resolve a conflict among the Courts of Appeal (e.g., two or more appellate courts have assumed opposing positions on a particular issue) or when the tax issue is extremely important (e.g., size of the revenue loss to the Federal government).

U.S. Tax Court. One of four trial courts of original jurisdiction that decides litigation involving Federal income, death, or gift taxes. It is the only trial court where the taxpayer must not first pay the deficiency assessed by the IRS. The Tax Court will not have jurisdiction over a case unless a statutory notice of deficiency (90-day letter) has been issued by the IRS and the taxpayer files the petition for hearing within the time prescribed.

U.S. trade or business. A set of activities that is carried on in a regular, continuous, and substantial manner. A non-U.S. taxpayer is subject to U.S. tax on the taxable income that is effectively connected with a U.S. trade or business.

Use tax. A sales tax that is collectible by the seller where the purchaser is domiciled in a different state.

V

Vacation home. The Code places restrictions upon taxpayers who rent their residences or vacation homes for part of the tax year. The restrictions may result in a scaling down of expense deductions for the taxpayers. § 280A.

Valuation allowance. Under ASC 740 (SFAS 109), a tax-related item is reported for book purposes only when it is more likely than not that the item actually will be realized. When the “more likely than not” test is failed, a contra-asset account is created to offset some or all of the related deferred tax asset. For instance, if the entity projects that it will not be able to use all of its net operating loss carryforward due to a lack of future taxable income, a valuation allowance is created to reduce the net deferred tax asset

that corresponds to the carryforward. If income projections later change and it appears that the carryforward will be used, the valuation allowance is reversed or “released.” Creation of a valuation allowance usually increases the current tax expense and thereby reduces current book income, and its release often increases book income in the later reporting period.

Value added tax (VAT). A national sales tax that taxes the increment in value as goods move through the production process. A VAT is much used in other countries but has not yet been incorporated as part of the U.S. Federal tax structure.

Vesting requirements. A qualified deferred compensation arrangement must satisfy a vesting requirement. Under this provision, an employee’s right to accrued plan benefits derived from employer contributions must be nonforfeitable in accordance with one of two vesting time period schedules (or two required alternate vesting schedules for certain employer matching contributions).

Voluntary revocation. The owners of a majority of shares in an S corporation elect to terminate the S status of the entity as of a specified date. The day on which the revocation is effective is the first day of the corporation’s C tax year.

W

W-2 wages. The domestic production activities deduction (DPAD) cannot exceed 50 percent of the W-2 wages paid for any particular year. Prop.Reg. § 199-2(f)(2) provides several methods for calculating the W-2 wages, but the payments must involve common law employees. To qualify, employees need to be involved in the production process. § 199.

Wash sale. A loss from the sale of stock or securities that is disallowed because the taxpayer, within 30 days before or after the sale, has acquired stock or securities substantially identical to those sold. § 1091.

Water’s edge. A limitation on the worldwide scope of the unitary theory. If a corporate water’s edge election is in effect, the state can consider in the apportionment procedure only the activities that occur within the boundaries of the United States.

Water’s-edge election. See *water’s edge*.

Wherewithal to pay. This concept recognizes the inequity of taxing a transaction when the taxpayer lacks the means with which to pay the tax. Under it, there is a correlation between the imposition of the tax and the ability to pay the tax. It is particularly suited to situations in which the taxpayer’s economic position has not changed significantly as a result of the transaction.

Whistleblower Program. An IRS initiative that offers special rewards to informants who provide evidence regarding tax evasion activities of businesses or high-income individuals. More than \$2 million of tax, interest, and penalty must be at stake. The reward can reach 30 percent of the tax recovery that is attributable to the whistleblower’s information.

Withholding allowances. The number of withholding allowances serves as the basis for determining the amount of income taxes withheld from an employee’s salary or

wages. The more withholding allowances claimed, the less income tax withheld by an employer. An employee may claim withholding allowances for personal exemptions for self and spouse (unless claimed as a dependent of another person), dependency exemptions, and special withholding allowances.

Work opportunity tax credit. Employers are allowed a tax credit equal to 40 percent of the first \$6,000 of wages (per eligible employee) for the first year of employment. Eligible employees include certain hard-to-employ individuals (e.g., qualified ex-felons, high-risk youth, food stamp recipients, and veterans). The employer's deduction for wages is reduced by the amount of the credit taken. For qualified summer youth employees, the 40 percent rate is applied to the first \$3,000 of qualified wages.

Working condition fringe. A type of fringe benefit received by the employee that is excludible from the employee's gross income. It consists of property or services provided (paid or reimbursed) by the employer for which the employee could take a tax deduction if the employee had paid for them. § 132.

Worthless securities. A loss (usually capital) is allowed for a security that becomes worthless during the year. The loss is deemed to have occurred on the last day of the year. Special rules apply to securities of affiliated companies and small business stock. § 165.

Writ of Certiorari. Appeal from a U.S. Court of Appeals to the U.S. Supreme Court is by Writ of Certiorari. The Supreme Court need not accept the appeal, and it usually does not (*cert. den.*) unless a conflict exists among the lower courts that must be resolved or a constitutional issue is involved.

Appendix E

Practice Set Assignments— Comprehensive Tax Return Problems

PROBLEM 1—INDIVIDUALS (FORM 1040)

John R. and Anne L. Miller are married and live at 13071 Sterling Drive, Aitkin, MN 56431. John is a self-employed insurance claims adjuster (business activity code 524290), and Anne is the dietitian for the local school district. They choose to file a joint tax return each year.

1. John represents several national casualty insurance companies on a contract basis. He operates this business on the cash basis. He is paid a retainer and receives additional compensation if the claims he processes for the year exceed a specified number. As an independent contractor, he is responsible for whatever expenses he incurs. John works out of an office near his home. The office is located at 1202 Motel Road. He shares Suite 326 with a financial consultant, and operating expenses are divided equally between them. The suite has a common waiting room with a receptionist furnished and paid by the landlord. John paid his one-half share of the 2014 expenses as detailed below:

| | |
|---|----------|
| Office rent | \$11,600 |
| Utilities (includes telephone and fax) | 4,300 |
| Replacement of waiting room furniture on April 22 | 3,600 |
| Renters' insurance (covers personal liability, casualty, theft) | 1,400 |
| Office expense (supplies, postage) | 740 |
| New Toshiba copier on February 7 | 300 |
| Waiting room coffee service (catered) | 280 |
| Waiting room magazine subscriptions | 90 |

For his own business use, John purchased a \$2,100 laptop computer on June 17 and a \$1,200 Nikon camera on February 5. Except for his vehicle (see item 2 below), John uses the § 179 write-off option whenever possible. John has no expenditures for which he is required to file Form 1099s.

2. On January 2, 2014, John paid \$31,000 (including sales tax) to purchase a gently used Toyota Camry that he uses 92% of the time for business. No trade-in was involved, and he did not claim any § 179 expensing. John uses the actual operating cost method to compute his tax deduction. He elects to use the 200%

declining-balance MACRS depreciation method with a half-year convention. His expenses relating to the Camry for 2014 are as follows:

| | |
|-----------------------------|---------|
| Gasoline | \$3,500 |
| Auto insurance | 1,700 |
| Interest on car loan | 820 |
| Auto club dues | 325 |
| Oil changes and lubrication | 210 |
| License and registration | 190 |

In connection with his business use of the Camry, John paid \$510 for tolls and \$350 in fines for traffic violations. In 2014, John drove the Camry 14,352 miles for business and 1,248 miles for personal use (which includes his daily, round-trip commute to work).

3. John handles most claim applications locally, but on occasion he must travel out of town. Expenses in connection with these business trips during 2014 were \$930 for lodging and \$1,140 for meals. He also paid \$610 for business dinners he had with several visiting executives of insurance companies with whom he does business. John's other business-related expenses for 2014 are listed below:

| | |
|---|---------|
| Contribution to H.R. 10 (Keogh) retirement plan | \$8,000 |
| Premiums on medical insurance covering self and family (spouse and children) | 4,600 |
| Premiums on disability insurance policy (pays for loss of income in the event John is disabled and cannot work) | 2,400 |
| State and local occupation fee | 450 |
| Birthday gift for receptionist (\$25 box of Godiva chocolates plus \$3 for gift wrap) | 28 |

4. Anne earns \$32,000 working as a registered dietitian for the Aitkin Public School District. The job she holds, manager of the school lunch program, is not classified as full time. Consequently, she is not eligible to participate in the teacher retirement or health insurance programs. Anne's expenses for 2014 are summarized as follows:

| | |
|---|---------|
| Contribution to traditional IRA | \$5,500 |
| Job hunting expense | 720 |
| Continuing education program | 350 |
| Membership dues to the National Association of Dietitians | 120 |
| Subscription to <i>Nutrition Today</i> | 90 |

In order to work full time and earn a larger salary, Anne applied for a position as chief dietitian for a chain of nursing homes. According to the director of the recruiting service she hired, the position has not yet been filled and Anne is one of the leading candidates. The continuing education program was sponsored by the National Association of Dietitians and consisted of a one-day seminar on special diets for seniors. Anne drove the family Chevrolet Malibu 930 miles on job-related use, out of a total of 8,670 miles driven for the year. The Millers purchased the car on July 11, 2012, for \$23,400. Anne uses the automatic mileage method for computing any available deduction for business use of the car.

5. The Millers have supported Gary Simon (Anne's widowed father) for several years, appropriately claiming him as a dependent for tax purposes. On December 27, 2013, Gary suffered a massive stroke. The doctors did everything they could for Gary, but he died in the intensive care unit of Riverwood Hospital on January 8, 2014. In January and February of 2014, the Millers paid the following for Gary: medical expenses of \$11,800 not covered by Medicare (\$6,000 incurred in 2013 and \$5,800 in 2014) and funeral expenses of \$15,300. Gary's health insurance was limited to his Medicare coverage because the Millers' medical insurance (see item 3 above) only covered John, Anne, and their sons. Gary's will named Anne as executor and sole heir of his estate.

6. One of the assets that Anne inherited with the transfer of Gary's estate was his house. Upon the advice of the financial consultant who shares office space with John, the Millers decided to convert Gary's home into a furnished rental house. After several minor repairs (e.g., touching up the paint on the interior walls, replacing various window screens, pressure washing the brick exterior, etc.), the property was advertised for rent in the classified section of the local newspaper on March 1, 2014. The repairs cost \$720, and the newspaper ad was \$360. Based on reconstructed records and appraisal estimates, information about the property is as follows:

| | Original Cost | FMV on 1/8/14 |
|--------------------------|---------------|---------------|
| House | \$40,000 | \$220,000 |
| Land | 10,000 | 50,000 |
| Furniture and appliances | 21,000 | 14,000 |

7. Gary's former residence was rented almost immediately with occupancy commencing April 1, 2014, under the following terms: one-year lease; \$2,400 per month due the first day of the month; first and last month's rent in advance; \$2,000 damage deposit; lawn care included but not utilities. The tenant complied with all terms, except the December rent payment was not made until January 1, 2015—the tenant took an extended holiday trip that started on Thanksgiving Day (November 27) through Christmas Day (December 25). Expenses in connection with the property were as follows: property taxes, \$2,600; repairs, \$320; lawn maintenance, \$540; insurance, \$1,800; and street paving assessment, \$2,100. The property is located at 12120 Lake Road, Aitkin, MN 56431. (Note: If you are using H&R Block software, input 365 in the "days owned" box and in the "days rented" box. Otherwise, the program will apportion the expenses inappropriately.)
8. In early December 2013, a friend advised John to buy stock in Pioneer Aviation, Inc. (PAI). At that time, PAI was in serious financial straits and was headed toward bankruptcy. Nevertheless, according to John's friend, the value of the corporation's underlying assets was such that the shareholders were bound to recover considerably more than the current market price of \$.50 per share. Excited at the chance for a "sure" profit, on December 15, 2013, John purchased 20,000 shares for \$10,000. In September 2014, the trustee in bankruptcy announced that the stock was worthless and that even some of PAI's preferred creditors would not be paid.
9. On June 14, 2014, the Millers sold 500 shares of Garnet Corporation for \$17,500 (\$35 per share). They owned 1,000 shares, acquired as follows: 500 shares on November 5, 2013, for \$25 a share and 700 shares on April 5, 2014, for \$30 a share. The Millers did not instruct their broker as to which shares to sell, so Form 1099-B for this sale reported \$12,500 basis for these shares.
10. One month before she died on April 14, 2005, Violet Simon (Anne's mother) gave Anne a coin collection. Based on careful records that Violet kept, the collection had a cost basis of \$9,000 and a fair market value of \$18,000 at the time Violet passed away. On February 12, 2014, the Miller residence was burglarized and the coin collection was stolen. The Millers filed a claim with the carrier of their homeowner's insurance policy for \$24,000 (the current value of the collection). Unfortunately, all they were able to collect was \$10,000, which was the maximum pay-out allowed for valuables (e.g., jewelry, antiques) without a special rider attached to the insurance policy.
11. In her will, Violet Simon (see item 10) left Anne a vacant lot on Mississippi Road. Violet had paid \$15,000 for the property, and it had a value of \$19,000 when she died. Violet had purchased the lot because it was adjacent to a school that she expected to expand. By 2014, it has become clear that the Mississippi Road area of Aitkin is not growing and that no school expansion will take place. Consequently, on July 1, 2014, Anne sold the lot for \$19,000. Not included in this price are unpaid property taxes (and interest on the unpaid taxes) of \$700 on the lot, which the purchaser assumed and later paid. Form 1099-B did not report the basis of this property.

12. Every year around Christmas, John receives cards from various car repair facilities (including dealerships) expressing thanks for the business referrals and enclosing cash. John has no arrangement, contractual or otherwise, that requires any compensation for the referrals he makes. Concerned about the legality of such “gifts,” John consulted an attorney about the matter a few years ago. Without passing judgment on the status of the payors, the attorney found that John’s acceptance of the payments does not violate state or local law. John sincerely believes that the payments he receives have no effect on the referrals he makes. During December 2014, John received cards containing \$7,200. One additional card containing \$900 was delayed in the mail and was not received by John until January 4, 2015.
13. In addition to those previously noted, the Millers’ receipts during 2014 are summarized below:

| | |
|---|----------|
| Payments to John for services rendered (as reported on Forms 1099–MISC issued by several payor insurance companies) pursuant to contractual arrangement | \$82,000 |
| Income tax refunds for tax year 2013: | |
| Federal | 210 |
| State of Minnesota | 90 |
| Interest income (reported on separate Forms 1099–INT): | |
| State of Minnesota general-purpose bonds | 1,400 |
| General Electric corporate bonds | 1,100 |
| Certificate of deposit at Aitkin National Bank | 900 |
| Qualified dividends (Duke Energy, reported on Form 1099–DIV) | 1,200 |
| Proceeds from garage sale (see item 14 below) | 9,200 |
| Cash gifts from John’s parents | 24,000 |
| John’s net state lottery losses (\$1,000 of winnings reported on Form W2-G; \$2,300 of losses) | (1,300) |

14. On June 7 and 8, 2014, the Millers held a garage sale to dispose of unwanted furniture, appliances, books, bicycles, clothes, and one boat (including trailer). The estimated basis of the items sold is \$25,500. All assets were used by the Millers for personal purposes.
15. Payments made for 2014 expenditures not mentioned elsewhere are as follows:

| | |
|---|---------|
| Medical: | |
| Copayment portion of medical expenses | \$1,300 |
| Dental (orthodontist) | 1,200 |
| Taxes: | |
| State income tax (see item 17 below) | 3,456 |
| State sales taxes | 1,120 |
| Property taxes on personal residence | 3,800 |
| Interest on home mortgage reported on Form 1098 | 4,200 |
| Charitable contributions | 3,600 |

The Millers’ medical insurance does not cover dental services. The Millers pledge contributions of \$1,200 per year to their church. In 2014, they paid the pledges for 2013–2015. During 2014, the Millers drove the Malibu 270 miles for medical purposes (e.g., trips to the hospital, doctor and dentist offices) and 320 miles delivering meals to the poor for Meals-on-Wheels, a qualified charity.

16. The Millers have two sons who live with them: Trace and Trevor. Both are full-time students. Trace is an accomplished singer and earned \$4,200 during the year performing at special events (e.g., weddings, anniversaries, civic functions). Trace deposits his earnings in a savings account intended to help cover future college expenses. Trevor does not have a job.
17. The Form W–2 Anne receives from her employer reflects wages of \$32,000. Appropriate amounts for Social Security and Medicare taxes were deducted. Income tax

withholdings were \$1,320 for Federal and \$1,056 for state. The Millers made quarterly tax payments of \$2,000 for Federal and \$600 for state on each of the following dates: April 15, 2014, June 16, 2014, September 15, 2014, and December 29, 2014. None of the Millers hold any foreign financial accounts. Relevant Social Security numbers are noted below:

| Name | Social Security Number | Birth Date |
|----------------|------------------------|------------|
| John R. Miller | 111-11-1111 | 06/06/1972 |
| Anne L. Miller | 123-45-6781 | 08/14/1973 |
| Gary Simon | 123-45-6784 | 03/12/1934 |
| Trace Miller | 123-45-6788 | 09/13/1997 |
| Trevor Miller | 123-45-6789 | 07/20/1999 |

Requirements

Prepare an income tax return (with all appropriate forms and schedules) for the Millers for 2014 following these guidelines:

- Make necessary assumptions for information not given in the problem but needed to complete the return.
- The taxpayers are preparing their own return (i.e., no preparer is involved).
- The taxpayers have substantiation (e.g., records, receipts) to support all transactions for the year.
- If any refund is due, the Millers want a refund check sent to them by mail.
- The Millers had itemized deductions from AGI for 2013 of \$16,700, of which \$1,500 was for state and local income taxes.
- The Millers do not want to contribute to the Presidential Election Campaign Fund.

PROBLEM 2—INDIVIDUALS (FORM 1040)

David (Dave) S. and Karen H. Brown are husband and wife and live at 4112 Foxglove Drive, McKinney, TX 75070. Dave is a retired petroleum engineer, and Karen is a portrait artist. They choose to file a joint tax return each year.

1. When he retired at age 65, Dave was chief of offshore operations at Pelican Exploration Corporation. While employed, Dave participated in Pelican's contributory qualified pension plan, to which he had contributed \$250,000 (in after-tax dollars). Under one of the plan options, he chose a life-annuity payout of \$60,000 per year over his life. As part of his retirement package, Dave also received nontaxable health insurance coverage for him and Karen. Due to Dave's expertise in Gulf of Mexico offshore operations, Pelican continues to use his services on a consulting basis (see item 3 below).
2. Karen, an accomplished artist, is well known regionally for oil portraits (business activity code 711510). She paints in the Photorealism style, providing her clients with portraits that are often mistaken for photographs. Painting in this style is very time-consuming. Consequently, her output averages between 15 and 16 portraits a year. Her fee of \$3,200 per portrait was set several years ago and never varies. As this is quite reasonable for a Photorealistic oil portrait, she has a long waiting list of clients who have not yet been scheduled for sittings. She does all of her work in the studio the Browns maintain in their personal residence (see item 6 below). Karen is a cash-basis taxpayer with respect to her art business.
3. During 2014, Dave made seven trips on behalf of Pelican as an outside consultant (business activity code 541330). On a typical trip, Dave flies by commercial airline to New Orleans, Houston, or Corpus Christi, and then takes a company helicopter to the offshore platform. If necessary, he rents a room at a local motel. Sometimes

offsite consultations can solve the problem, and a trip to the rig is not necessary. His expenses for these trips are as follows:

| | |
|---|---------|
| Airfare | \$5,100 |
| Lodging | 3,100 |
| Meals | 2,200 |
| Ground transportation (taxis, limos, rental cars) | 750 |

After each trip, Dave recovers his expenses when he is paid by Pelican for the services rendered. Pelican does not require an accounting for the expenses and reimburses Dave based on his verbal report of how much he spent.

4. In early January 2014, Karen was paid for three portraits she painted and delivered in late 2013. During 2014, Karen completed 14 portraits. Payment was received for 11 portraits when they were delivered to the buyers. One portrait was delivered in mid-2014 to the CEO of a company who promised payment within 30 days. Payment was never received, and the company has since entered bankruptcy. Since the CEO has been indicted for securities fraud, Karen feels certain that she will never be paid for the portrait. The final two portraits were delivered in late 2014, and payments for both were received in early 2015. In December 2014, Karen accepted \$3,200 as payment for a portrait to be done in 2015. Although she did not like the arrangement, the customer said the prepayment was motivated by anticipated cash-flow considerations.
5. Karen keeps receipts for all her expenses. Her total cost for painting supplies in 2014 was \$3,010 (e.g., for canvases, brushes, oil paints, smocks, palettes, and other art supplies). The framing of the finished portrait is left to the customer since the most appropriate frame is a matter of personal taste and consideration for where the painting will be exhibited.
6. For convenience and security reasons, Karen prefers to work at home. One-fourth of the 4,000 square-foot living area is devoted to Karen's studio. The Browns built the home at a cost of \$350,000 on a lot previously acquired for \$100,000, and they moved in on June 15, 2011. As to business use, depreciation is based on MACRS (using the mid-month convention) applicable to 39-year nonresidential realty. Besides home mortgage interest and property taxes (see item 19 below), residence expenses for 2014 are summarized below:

| | |
|--|---------|
| Utilities | \$4,200 |
| Molly Maid cleaning service | 2,800 |
| Service fee for home security system | 1,600 |
| Removal of stains from studio flooring | 1,100 |
| Homeowner's insurance | 970 |
| Repairs to studio skylight | 340 |

7. At a mortgage foreclosure auction held on February 4, 2002, Dave acquired an abandoned sugarcane farm near Magnolia, known as LaBeaux Place, for \$30,000. In view of the expansion trend in nearby Houston, he regarded the purchase as a good investment. Early in 2014, Dave was contacted by a Houston real estate developer who offered \$250,000 for LaBeaux Place. Considering the prospect of a large taxable gain, Dave arranged for a property swap by written notice on May 10. In exchange for several vacant lots on Padre Island (TX) worth \$240,000 and cash of \$10,000, Dave transferred LaBeaux Place to the developer. The exchange took place on June 20, 2014.
8. Dave purchased unimproved land near Beaumont (TX) for \$18,200 at an auction held on April 17, 1989. Described as Block 46, the property was adjacent to a modest prison rice farm owned by the Texas Department of Corrections (TDC). Dave bought the property based on a hunch that the TDC might someday wish to expand its Beaumont prison facility. In late 2013, the TDC contacted Dave and offered him

\$160,000 for Block 46. Dave countered with a selling price of \$225,000. After prolonged negotiations, Dave and the TDC could not come to a mutually agreeable selling price. The TDC then threatened to condemn Block 46. After repeated threats of condemnation, Dave transferred the property to the TDC on June 28, 2014, for \$180,000. On December 17, 2014, Dave reinvested \$175,000 in vacant land located near Texas State University in San Marcos. Dave spent the remaining \$5,000 on a vacation for him and Karen to Hawaii in early 2015.

9. The Browns had always thought that taking extended road trips in an RV would be fun. So in June 2014, they bought a new Winnebago Deluxe Coach RV for \$106,250 [\$100,000 (discounted list price) + \$6,250 (state sales tax)]. However, it only took Dave and Karen two weeks on the road to determine that this method of traveling the continental United States was not for them. In August 2014, they sold the RV to a neighbor for \$90,000. The neighbor paid \$20,000 down and paid the balance of \$70,000 in early December 2014. Dave did not charge his neighbor any interest.
10. On May 9, 1997, Dave's father gave him 400 shares of Ragusa Corporation common stock as a birthday gift. The stock cost his father \$16,000 (\$40 a share) and was worth \$20,000 on the date of the gift. In 2009, when the stock was worth \$140 per share, Ragusa declared a 2-for-1 stock split. On July 27, 2014, Dave sold 400 shares for \$20,000 (\$50 a share). For sentimental reasons, Dave kept the remaining 400 shares. Form 1099-B did not report the basis of this property.
11. On December 21, 2014, the Browns sold 500 shares of Cormorant Power common stock for \$40,000 (\$80 a share). They purchased the stock on February 1, 2014, for \$50,000 (\$100 a share), the basis reported on Form 1099-B. The Browns sold the stock to generate a loss to offset some of their capital gains. However, they considered Cormorant Power to be a good investment, so they repurchased 500 shares on February 19, 2015, for \$45,000 (\$90 a share).
12. On March 2, 2013, Karen was contacted by Eva Baum, a former college roommate. Over lunch Eva asked Karen for a loan of \$6,000 to help finance a new venture. Karen made the loan because the venture, a summer art camp in Sedona, AZ, sounded interesting. Eva signed a note due in two years at 10% interest. In late 2014, Karen learned that Eva had disappeared after being charged by Arizona authorities with grand theft. She also learned that Eva is wanted in New Mexico for parole violation from a prior felony conviction. Eva made no payments to Karen on the note.
13. The Browns have a long-term capital loss carryover of \$7,000 from 2013.
14. On May 9, 2010, Maximilian Brown (Dave's favorite uncle) gifted him the family antique gun collection. Based on family records and qualified appraisals, the collection had an adjusted basis to Maximilian of \$4,200 and was worth \$13,000 on the date of the gift. Since Karen abhors guns, Dave has been under heavy pressure to get rid of the collection. After Maximilian died in early 2014, Dave donated the collection to the Alamo Siege Museum (a qualified charity). The transfer was made on December 5, 2014; at that time, several qualified appraisers valued the collection at \$16,000. The museum added the guns to its extensive collection of firearms.
15. While walking the dog in late December 2013, Karen was hit by an out-of-control delivery truck. The mishap sent Karen to the hospital for several days of observation and medical evaluation. Aside from severe bruises, she suffered no permanent injury. Once apprehended, the driver of the truck was ticketed for DUI. The owner of the truck, a local distributor for a national brewery, was quite concerned about the adverse publicity that would result if Karen filed a lawsuit. Consequently, it paid all her medical expenses and offered Karen a settlement if she would sign a release. Under the terms of the settlement, Karen would receive \$134,000—\$126,000 for personal injury and \$8,000 for loss of income because her injuries prevented her from painting for a period of weeks. On January 31, 2014, Karen signed the release and was immediately paid \$134,000.

16. In August 2013, Dave was rear-ended while stopped at a red light. Thankfully, Dave was uninjured. However, his car was damaged. The driver who caused the accident left the scene immediately, so Dave was forced to use his insurance to repair the damage to his car. As a result, Dave was subject to the \$1,000 deductible provision in the policy which he paid with respect to his car repairs in 2013. The Browns claimed no deductions with respect to the accident on their 2013 income tax return. In 2014, the insurance company (Peregrine Casualty) located the driver at fault and recovered the amount paid for repairs by both Dave and Peregrine. Consequently, in April 2014, Dave received a check from Peregrine refunding the \$1,000 he paid for repairs according to his policy's deductible.
17. After an acrimonious divorce, the Browns' only daughter (Pamela Jansen) moved back home in December 2013. She brought her twins (Malone and Macie) with her. Under the divorce decree, Pamela was given custody of the children and awarded child support of \$2,100 a month. The decree does not indicate who is entitled to the dependency exemptions for the children. Pamela has no income for 2014 except the \$4,200 she received for two months of child support. She plans to initiate legal proceedings against her ex-husband for delinquent child support.
18. Besides the items already mentioned, the Browns have the following receipts for 2014:

| | |
|--|----------|
| Social Security benefits (Dave, \$12,000; Karen, \$6,000) | \$18,000 |
| Consulting income paid by Pelican (including expense reimbursement of \$11,150—see item 3) | 35,000 |
| Life insurance proceeds (see below) | 50,000 |
| Qualified dividend income (reported on separate Forms 1099-DIV): | |
| Ragusa Corporation | 1,200 |
| Pelican Power | 400 |
| Interest income (reported on separate Forms 1099-INT): | |
| IBM bonds | 600 |
| CD at First National Bank of McKinney | 400 |
| Wells Fargo money market fund | 300 |
| City of Beaumont (TX) general purpose bonds | 9,000 |

The life insurance proceeds relate to a policy owned by Maximilian Brown (see item 14), which named Dave as sole beneficiary. The receipt of the proceeds came as a complete surprise to Dave, as he never knew the policy existed.

19. Payments made for 2014 expenditures not already mentioned are as follows:

| | |
|---|---------|
| Payment of Pamela's legal fees and court costs incident to her divorce | \$9,000 |
| Medical: | |
| Medicare B insurance premiums for Dave and Karen | 2,244 |
| Health care premiums for dependents | 3,600 |
| Dental implants for Karen | 8,000 |
| Taxes on personal residence | 3,600 |
| Interest on home mortgage | 2,200 |
| Church pledge | 1,200 |
| Professional journals: | |
| Oil and gas related (Dave) | 160 |
| Art related (Karen) | 120 |
| Dues to professional organizations (Dave) | 140 |
| State professional license fee (Dave) | 250 |
| 2013 tax return preparation fee (\$200 for Dave's business; \$250 for Karen's business; and \$450 for personal income tax return) | 900 |

Texas does not impose an income tax, so the Browns choose the state and local sales tax option. In addition to the state general sales tax, the local sales tax rate is 2% (1.5% city; 0.5% county). They do not keep track of sales tax expenditures for

routine purchases (e.g., clothes, prepared foods) but can verify the sales tax on exceptional items (i.e., big-ticket purchases like the RV).

20. The Browns made quarterly Federal income tax payments of \$2,400 on each of the following dates: April 15, 2014, June 16, 2014, September 15, 2014, and December 15, 2014. Last year's Federal income tax return reflected an overpayment of \$800 tax, which the Browns chose to apply to their 2014 income tax liability. The trustee of Dave's retirement plan also withheld \$6,500 of tax with respect to his retirement withdrawals for the year. Neither Dave nor Karen holds any foreign financial accounts. Relevant Social Security numbers are noted below:

| Name | Social Security Number | Birth Date |
|----------------|------------------------|------------|
| David S. Brown | 123-45-6785 | 09/15/1943 |
| Karen K. Brown | 123-45-6786 | 12/03/1948 |
| Pamela Jansen | 123-45-6784 | 10/19/1981 |
| Malone Jansen | 123-45-6787 | 06/25/2008 |
| Macie Jansen | 123-45-6788 | 06/25/2008 |

Requirements

Prepare an income tax return (with all appropriate forms and schedules) for the Browns for 2014 following these guidelines:

- Make necessary assumptions for information not given in the problem but needed to complete the return.
- The Browns are employing the same tax return preparer who completed their prior year tax return.
- The taxpayers have substantiation (e.g., records, receipts) to support all transactions for the year.
- If any refund is due, the Browns want it applied to next year's tax liability.
- The Browns do not want to contribute to the Presidential Election Campaign Fund.

PROBLEM 3—C CORPORATION (FORM 1120)

On November 1, 2005, Janet Morton and Kim Wong formed Pet Kingdom, Inc., to sell pets and pet supplies. Pertinent information regarding Pet Kingdom is summarized as follows:

- Pet Kingdom's business address is 1010 Northwest Parkway, Dallas, TX 75225; its telephone number is (214) 555-2211; and its e-mail address is petkingdom@pki.com.
- The employer identification number is 11-1111111, and the principal business activity code is 453910.
- Janet and Kim each own 50% of the common stock; Janet is president and Kim is vice president of the company. No other class of stock is authorized.
- Both Janet and Kim are full-time employees of Pet Kingdom. Janet's Social Security number is 123-45-6789, and Kim's Social Security number is 987-65-4321.
- Pet Kingdom is an accrual method, calendar year taxpayer. Inventories are determined using FIFO and the lower of cost or market method. Pet Kingdom uses the straight-line method of depreciation for book purposes and accelerated depreciation (MACRS) for tax purposes.
- During 2014, the corporation distributed cash dividends of \$250,000.

Pet Kingdom's financial statements for 2014 are shown below.

| Income Statement | | |
|---|----------------|--------------------------|
| Income | | |
| Gross sales | | \$ 5,750,000 |
| Sales returns and allowances | | <u>(200,000)</u> |
| Net sales | | \$ 5,550,000 |
| Cost of goods sold | | <u>(2,300,000)</u> |
| Gross profit | | \$ 3,250,000 |
| Dividends received from stock investments in less-than-20%-owned U.S. corporations | | 43,750 |
| Interest income: | | |
| State bonds | \$ 15,000 | |
| Certificates of deposit | <u>20,000</u> | <u>35,000</u> |
| Total income | | \$ 3,328,750 |
| Expenses | | |
| Salaries—officers | | |
| Janet Morton | \$262,500 | |
| Kim Wong | <u>262,500</u> | \$525,000 |
| Salaries—clerical and sales | | 725,000 |
| Taxes (state, local, and payroll) | | 238,000 |
| Repairs and maintenance | | 140,000 |
| Interest expense: | | |
| Loan to purchase state bonds | \$ 9,000 | |
| Other business loans | <u>207,000</u> | 216,000 |
| Advertising | | 58,000 |
| Rental expense | | 109,000 |
| Depreciation* | | 106,000 |
| Charitable contributions | | 38,000 |
| Employee benefit programs | | 60,000 |
| Premiums on term life insurance policies on lives of Janet Morton and Kim Wong; Pet Kingdom is the designated beneficiary | | <u>40,000</u> |
| Total expenses | | <u>(2,255,000)</u> |
| Net income before taxes | | \$ 1,073,750 |
| Federal income tax | | <u>(356,023)</u> |
| Net income per books | | <u><u>\$ 717,727</u></u> |

*Depreciation for tax purposes is \$136,000. You are not provided enough detailed data to complete a Form 4562 (depreciation). If you solve this problem using H&R BLOCK Tax Software, enter the amount of depreciation on line 20 of Form 1120.

Balance Sheet

| Assets | January 1, 2014 | December 31, 2014 |
|--|------------------------|--------------------------|
| Cash | \$ 1,200,000 | \$ 1,037,750 |
| Trade notes and accounts receivable | 2,062,500 | 2,147,000 |
| Inventories | 2,750,000 | 3,030,000 |
| Stock investment | 1,125,000 | 1,125,000 |
| State bonds | 375,000 | 375,000 |
| Certificates of deposit | 400,000 | 400,000 |
| Prepaid Federal tax | –0– | 3,977 |
| Buildings and other depreciable assets | 5,455,000 | 5,455,000 |
| Accumulated depreciation | (606,000) | (712,000) |
| Land | 812,500 | 812,500 |
| Other assets | 140,000 | 128,500 |
| Total assets | <u>\$13,714,000</u> | <u>\$13,802,727</u> |
| Liabilities and Equity | January 1, 2014 | December 31, 2014 |
| Accounts payable | \$ 2,284,000 | \$ 1,975,000 |
| Other current liabilities | 175,000 | 155,000 |
| Mortgages | 4,625,000 | 4,575,000 |
| Capital stock | 2,500,000 | 2,500,000 |
| Retained earnings | 4,130,000 | 4,597,727 |
| Total liabilities and equity | <u>\$13,714,000</u> | <u>\$13,802,727</u> |

During 2014, Pet Kingdom made estimated tax payments of \$90,000 each quarter to the IRS. Prepare a Form 1120 for Pet Kingdom for tax year 2014. Suggested software: H&R BLOCK Tax Software.

PROBLEM 4—C CORPORATION (FORM 1120)

On February 12, 2002, Nancy Trout and Delores Lake formed Kingfisher Corporation to sell fishing tackle. Pertinent information regarding Kingfisher is summarized as follows:

- Kingfisher's business address is 1717 Main Street, Ely, MN 55731; its telephone number is (218) 555-2211; and its e-mail address is kingfisher@kf.com.
- The employer identification number is 11-1111111, and the principal business activity code is 451110.
- Nancy owns 50% of the common stock and is president of the company, and Delores owns 50% of the common stock and is vice president of the company. No other class of stock is authorized.
- Both Nancy and Delores are full-time employees of Kingfisher. Nancy's Social Security number is 123-45-6789, and Delores's Social Security number is 987-65-4321.
- Kingfisher is an accrual method, calendar year taxpayer. Inventories are determined using FIFO and the lower of cost or market method. Kingfisher uses the straight-line method of depreciation for book purposes and accelerated depreciation (MACRS) for tax purposes.
- During 2014, the corporation distributed cash dividends of \$80,000.

Kingfisher's financial statements for 2014 are shown below.

| Income Statement | | | |
|---|----------------|---------------|-------------------|
| Income | | | |
| Gross sales | | | \$2,408,000 |
| Sales returns and allowances | | | <u>(80,000)</u> |
| Net sales | | | \$2,328,000 |
| Cost of goods sold | | | <u>(920,000)</u> |
| Gross profit | | | \$1,408,000 |
| Dividends received from stock investments in less-than-20%-owned U.S. corporations | | | 12,000 |
| Interest income | | | |
| State bonds | \$ 14,000 | | |
| Certificates of deposit | <u>10,000</u> | | <u>24,000</u> |
| Total income | | | \$1,444,000 |
| Expenses | | | |
| Salaries—officers | | | |
| Nancy Trout | \$160,000 | | |
| Delores Lake | <u>160,000</u> | \$320,000 | |
| Salaries—clerical and sales | | 290,000 | |
| Taxes (state, local, and payroll) | | 85,000 | |
| Repairs and maintenance | | 56,000 | |
| Interest expense: | | | |
| Business loans | \$ 12,000 | | |
| Loan to purchase state bonds | <u>8,000</u> | 20,000 | |
| Advertising | | 6,000 | |
| Rental expense | | 68,000 | |
| Depreciation* | | 40,000 | |
| Charitable contributions | | 15,000 | |
| Employee benefit programs | | 24,000 | |
| Premiums on term life insurance policies on lives of Nancy Trout and Delores Lake; Kingfisher is the designated beneficiary | | <u>16,000</u> | |
| Total expenses | | | <u>(940,000)</u> |
| Net income before taxes | | | \$ 504,000 |
| Federal income tax | | | <u>(171,904)</u> |
| Net income per books | | | <u>\$ 332,096</u> |

*You are not provided enough detailed information to complete a Form 4562 (depreciation). If you solve this problem using H&R BLOCK Tax Software, enter the amount of depreciation on line 20 of Form 1120.

Balance Sheet

| Assets | January 1, 2014 | December 31, 2014 |
|---------------------------------------|------------------------|--------------------------|
| Cash | \$ 380,000 | \$ 335,524 |
| Trade notes and accounts receivable | 308,400 | 480,280 |
| Inventories | 900,000 | 1,012,000 |
| State bonds | 160,000 | 160,000 |
| Federal income tax refund | –0– | 3,096 |
| Certificates of deposit | 140,000 | 140,000 |
| Stock investments | 300,000 | 300,000 |
| Building and other depreciable assets | 240,000 | 240,000 |
| Accumulated depreciation | (88,800) | (128,800) |
| Land | 20,000 | 20,000 |
| Other assets | 3,600 | 2,000 |
| Total assets | <u>\$2,363,200</u> | <u>\$2,564,100</u> |
| Liabilities and Equity | January 1, 2014 | December 31, 2014 |
| Accounts payable | \$ 300,000 | \$ 299,104 |
| Other current liabilities | 80,300 | 40,000 |
| Mortgages | 210,000 | 200,000 |
| Capital stock | 500,000 | 500,000 |
| Retained earnings | <u>1,272,900</u> | <u>1,524,996</u> |
| Total liabilities and equity | <u>\$2,363,200</u> | <u>\$2,564,100</u> |

During 2014, Kingfisher made estimated tax payments of \$43,750 each quarter to the IRS. Prepare a Form 1120 for Kingfisher for tax year 2014. Suggested software: H&R BLOCK Tax Software.

PROBLEM 5—PARTNERSHIP (FORM 1065)

On January 1, 2008, the Branson Company (EIN 22-2222222) and Porto Engineering, Inc. (EIN 33-3333333), formed Branto LLC (an equally owned joint venture). During its first four years, the LLC worked with the U.S. Department of Homeland Security and the National Transportation Safety Board to design and develop a specific device for airport passenger screening. Porto provides engineering expertise, and Branson provides high-tech manufacturing, selling, and distribution expertise. Early in 2013, the two governmental agencies recommended the product. In 2014, Branto's screening device was being successfully marketed, sold, delivered, and installed in airports around the United States.

The LLC uses the accrual method of accounting and the calendar year for reporting purposes. Its current address is 3750 Airport Boulevard, Seattle, WA, 98124. The following information was taken from the trial balance supporting the LLC's GAAP-basis (audited) financial statements for the 2014 calendar year:

| | |
|--|---------------------|
| Revenues: | |
| Sales revenues | \$40,000,000 |
| Interest income | 50,000 |
| Total revenues | <u>\$40,050,000</u> |
| Amounts related to cost of goods sold: | |
| Beginning inventory | \$ 2,000,000 |
| Materials purchases | 8,000,000 |
| Labor | 9,000,000 |
| Additional § 263A costs | –0– |
| Other costs: Various items | 2,700,000 |
| Book depreciation | 1,275,000 |
| Less: Ending inventory | <u>(3,000,000)</u> |
| Total amount of work in progress | <u>\$19,975,000</u> |

| | |
|---|---------------------|
| Other costs <i>not</i> related to production: | |
| Salaries and wages | \$ 1,000,000 |
| Taxes and licenses (no state income taxes) | 300,000 |
| Charitable contributions | 100,000 |
| Interest expense | 1,200,000 |
| Meals and entertainment (subject to 50% disallowance) | 1,200,000 |
| Travel expenses | 800,000 |
| Insurance (including key employee life insurance of \$100,000) | 300,000 |
| Legal and professional fees | 900,000 |
| Office expenses | 2,000,000 |
| Sales and promotion expenses | 1,500,000 |
| Utilities | 800,000 |
| Warranty expense (increase to reserves; not fixed and determinable) | 300,000 |
| Total other costs | <u>\$10,400,000</u> |
| Net income per books and GAAP-basis audited financial statements | <u>\$ 9,675,000</u> |

The beginning and ending GAAP-basis balance sheets for the LLC were as follows at December 31, 2014:

| | Beginning | Ending |
|--|---------------------|---------------------|
| Cash | \$ 975,000 | \$ 825,000 |
| Accounts receivable | 620,000 | 2,600,000 |
| Inventories | 2,000,000 | 3,000,000 |
| U.S. government obligations | 1,000,000 | 1,000,000 |
| Land | 600,000 | 600,000 |
| Buildings and equipment | 12,000,000 | 19,500,000 |
| Accumulated depreciation | <u>(6,375,000)</u> | <u>(7,650,000)</u> |
| Total assets | <u>\$10,820,000</u> | <u>\$19,875,000</u> |
| Accounts payable | \$ 420,000 | \$ 800,000 |
| Operating line of credit (guaranteed by members) | 1,000,000 | 5,500,000 |
| Warranty reserves (not guaranteed by members) | 200,000 | 500,000 |
| Mortgage notes on building | 5,000,000 | 6,000,000 |
| Capital, Branson Company | 2,100,000 | 3,537,500 |
| Capital, Porto Engineering, Inc. | <u>2,100,000</u> | <u>3,537,500</u> |
| Total liabilities and capital | <u>\$10,820,000</u> | <u>\$19,875,000</u> |

The LLC uses the lower of cost or market method for valuing inventory. Branto is subject to § 263A; for simplicity, assume that § 263A costs are reflected in the same manner for book and tax purposes. Branto did not change its inventory accounting method during the year. There were no write-downs of inventory items, and Branto does not use the LIFO method.

The LLC claimed \$2,499,270 of depreciation expense for tax purposes (book depreciation is \$1,275,000). All tax depreciation expense should be reported on Form 1125-A. The LLC placed \$7.5 million of assets in service during the current year; this exceeds the threshold for eligibility for a § 179 deduction. Current asset additions are treated as 5-year MACRS assets. The LLC has a positive adjustment of \$98,100 for AMT purposes related to tax depreciation (tax depreciation exceeds that allowable for AMT purposes).

All borrowings were used exclusively for business operations; consequently, none of the interest expense is considered investment interest expense. The LLC members were required to guarantee the debt related to the operating line of credit. The accounts payable, accrued warranty claim liabilities, and mortgage were not guaranteed by the members. The mortgage relates to the real property and is considered qualified nonrecourse financing. The partners share equally in all LLC liabilities, because all initial contributions and all ongoing allocations and distributions are pro rata.

The LLC's activities are eligible for the domestic production activities deduction (DPAD). For simplicity, assume that the LLC's qualified production activities income

(QPAD) is \$9.5 million. Assume the LLC's production-related W-2 wages are \$10 million. Because of prior state losses and tax concessions, no current or deferred state income taxes are reported for financial purposes.

No guaranteed payments were paid to either of the LLC members. Instead, the members each withdrew \$3.4 million of cash during the year. None of the members contributed cash or other property to the LLC during the year.

Both LLC members are U.S. Subchapter C corporations. Both members are classified as domestic corporations and "LLC member-managers" on Schedule K-1.

The IRS's business code for "Other specialty trade contractors" is 238900. The LLC files its tax return in Ogden, Utah. Branson Company is located at 3750 Airport Boulevard, Seattle, WA 98124 (the same as the LLC's address).

The capital account reconciliation on the partners' Schedules K-1 is prepared on a GAAP basis, as are the LLC's Schedules L and M-2. On the Analysis of Income (Loss), the IRS's instructions indicate that the amounts for any LLC members should be reported on the line for limited partners. The LLC is required to file Schedule M-3, Form 8916-A (Supplemental Attachment to Schedule M-3), and Schedule C with its Form 1065. The instructions for Schedule M-3 state that, if a line description is provided on pages 2 or 3 of the form (or on Form 8916), an income or expense item should be reported on the M-3 regardless of whether there is a book-tax difference.

- Prepare pages 1, 4, and 5 of Form 1065 and Form 1125-A for Branto LLC. Do not prepare Form 4562. Leave any items blank where insufficient information has been provided. Prepare supporting schedules as necessary if adequate information is provided.
- Prepare Schedule M-3 and Form 8916-A (page 1 only). Do not prepare Schedule C or page 2 of Form 8916-A. There are four book-tax differences (two temporary differences and two permanent differences).
- Prepare Schedule K-1 for 50% LLC member Branson Company.

PROBLEM 6—S CORPORATION (FORM 1120S)

John Parsons (123-45-6781) and George Smith (123-45-6782) are 70% and 30% owners, respectively, of Premium, Inc. (11-1111111), a candy company located at 1005 16th Street, Cut and Shoot, TX 77303. Premium's S election was made on January 15, 2008, its date of incorporation. The following information was taken from the company's 2014 income statement.

| | |
|---------------------------------|------------|
| Interest income | \$ 100,000 |
| Gross sales receipts | 2,410,000 |
| Beginning inventory | 9,607 |
| Direct labor | (203,102) |
| Direct materials purchased | (278,143) |
| Direct other costs | (249,356) |
| Ending inventory | 3,467 |
| Salaries and wages | (442,103) |
| Officers' salaries | (150,000) |
| Repairs | (206,106) |
| Depreciation expense | (15,254) |
| Interest expense | (35,222) |
| Rent expense (operating) | (40,000) |
| Taxes | (65,101) |
| Charitable contributions (cash) | (20,000) |
| Advertising expenses | (20,000) |
| Payroll penalties | (15,000) |
| Other deductions | (59,899) |
| Book income | 704,574 |

A comparative balance sheet appears below.

| | January 1, 2014 | December 31, 2014 |
|----------------------------------|------------------|-------------------|
| Cash | \$ 47,840 | \$? |
| Accounts receivable | 93,100 | 123,104 |
| Inventories | 9,607 | 3,467 |
| Prepaid expenses | 8,333 | 17,582 |
| Building and equipment | 138,203 | 185,348 |
| Accumulated depreciation | (84,235) | (?) |
| Land | <u>2,000</u> | <u>2,000</u> |
| Total assets | <u>\$214,848</u> | <u>\$844,422</u> |
| Accounts payable | \$ 42,500 | \$ 72,300 |
| Notes payable (less than 1 year) | 4,500 | 2,100 |
| Notes payable (more than 1 year) | 26,700 | 24,300 |
| Capital stock | 30,000 | 30,000 |
| Retained earnings | <u>111,148</u> | <u>?</u> |
| Total liabilities and capital | <u>\$214,848</u> | <u>\$844,422</u> |

Premium's accounting firm provides the following additional information.

| | |
|--|-----------|
| Distributions to shareholders | \$100,000 |
| Beginning balance, Accumulated adjustments account | 111,148 |

Using the preceding information, prepare a complete Form 1120S and Schedule K-1s for John Parsons and George Smith, 5607 20th Street, Cut and Shoot, TX 77303. Do not complete the Form 4562. If any information is missing, make realistic assumptions.

PROBLEM 7—GIFT TAX (FORM 709)

James A. and Ella R. Polk, ages 70 and 65, are retired physicians who live at 13319 Taylorcrest Street, Houston, Texas 77079. Their three adult children (Benjamin Polk, Michael Polk, and Olivia Turner) are mature and responsible persons. The Polks have heard that the Obama administration has proposed lowering the Federal gift tax exclusion from \$5.25 million to \$3 million. Although this change may not occur, the Polks feel they should take advantage of the more generous exclusion available under existing law. Thus, in 2014, the Polks make transfers of many of their high value investments. These and other gifts made during 2014 are summarized below.

| Asset Transfer | Donor | |
|--|-------------|-------------|
| | James | Ella |
| Condominium located in Conroe (TX) acquired in 1999, cost \$1.2 million, to Benjamin, Michael, and Olivia as equal tenants in common. | \$1,900,000 | \$1,900,000 |
| Office building, located in Round Rock (TX) built in 2001, cost \$1.8 million, to Benjamin, Michael, and Olivia as equal tenants in common. | 2,300,000 | 2,300,000 |
| Vacation ranch in Bandera (TX) inherited by James from his father in 1996, value then \$900,000, to Benjamin, Michael, and Olivia as equal joint tenants with right of survivorship. | 2,600,000 | –0– |
| Ella used her separate property to reimburse her father (Alan Roberts) for his heart bypass operation. | –0– | 82,000 |
| Paid for daughter's (Olivia's) wedding to John Turner | 20,000 | 20,000 |
| James used his separate property to purchase a new automobile (BMW) as a graduation present (from medical school) for his favorite niece (Carol Polk) | 42,000 | –0– |

Prepare 2014 gift tax returns (Form 709) for both of the Polks. A § 2513 election to split gifts is made. The Polks have made no taxable gifts in prior years. Relevant Social Security numbers are 123-45-6789 (James) and 123-45-6788 (Ella).

PROBLEM 8—ESTATE TAX (FORM 706)

Harriet C. Harper, age 74, died as a result of an automobile accident on June 6, 2014. At the time of her death, Harriet lived at 1520 Marlin Drive, Clearwater, FL 33758. She was predeceased by her husband, John W. Harper, who died in 2001. Harriet is survived by her two adult children, Travis Harper and Hannah Baker. Information regarding Harriet's estate is summarized below.

- John's will established a marital deduction trust with \$1 million of assets. Under the terms of the trust, Harriet received a life estate with the remainder passing to their children (i.e., Travis and Hannah). To obtain a marital deduction for John's estate, his executor made a QTIP election. On June 6, 2014, the trust had a value of \$2.1 million. During 2014, the trust assets are distributed to Travis and Hannah.
- Harriet owned three insurance policies with Falcon Assurance Company—one on her life and one on the life of each of her children. All policies have a maturity value of \$100,000; all name Harriet or her estate as the beneficiary. As of June 6, 2014, the policies on Travis and Hannah each had a value of \$40,000.
- A tract of undeveloped land in Pinellas County (FL) was purchased by Harriet as an investment in 2002 for \$300,000. To help finance the purchase, Harriet obtained mortgage funds from Tampa Savings and Loan. As of June 6, 2014, the land was worth \$1 million, and Harriet owed \$200,000 on the mortgage.
- Rental beach cottages in Destin (FL) were inherited from John and worth \$1.2 million on June 6, 2014. The cottages had a value of \$600,000 when John died; his original cost is unknown.
- A family vacation lodge in Union (SC) was held as joint tenants with right of survivorship in the names of Harriet Harper, Travis Harper, and Hannah Baker. The property was purchased in 2002 for \$400,000; \$200,000 was provided by Harriet and \$100,000 was furnished by each of her children. On June 6, 2014, the lodge was worth \$1.4 million.
- Harriet's Marlin Drive residence is owned by her. It had a value of \$800,000 on June 6, 2014.
- The accident that fatally injured Harriet was caused by the delivery truck of a national soft drink bottling company. Not only was the truck in disrepair, but the driver was charged with DUI. To avoid the adverse publicity of a lawsuit involving the obvious gross negligence, the corporate office offered to settle any claims. After careful deliberation, Harriet's co-executors (Travis and Hannah) signed a release. In return, the estate received \$700,000 in cash plus payment of all medical expenses. Of the medical expenses, the doctors and hospital were paid directly by the bottling company. The settlement was received by the estate before it was closed and the Form 706 filed.
- Other assets owned by Harriet as of June 6, 2014 included:

| | |
|--|-----------|
| Checking account at Dunedin State Bank | \$ 18,000 |
| State of Georgia bonds (interest accrued to date of death) | 205,000 |
| Personal and household effects | 60,000 |
| Federal income tax refund receivable (for tax year 2013) | 4,000 |

- Liabilities and expenses in connection with the administration of the estate include:

| | |
|--|----------|
| Harriet's credit card debt and household bills (e.g., utilities, gardener) | \$21,000 |
| Federal income tax (January 1, 2014, to June 6, 2014) | 27,000 |
| Funeral expenses | 9,000 |
| Attorney's fees | 24,000 |
| Accounting fees | 10,000 |
| Appraisal fees and court costs | 6,000 |
| Unpaid pledge to Clearwater First Methodist Church Building Fund (paid by the estate during its administration) | 40,000 |

Because Travis and Hannah had experience in handling their father's estate, Harriet's will designated them as co-executors of her estate. The probate of the Estate of Harriet C. Harper is completed December 16, 2014. Travis and Hannah are the sole heirs.

Prepare an estate tax return (Form 706) for Harriet. In this regard, make the following assumptions.

- Disregard any request for information that is not available.
- Some deductions require a choice between the income and estate taxes (Form 706 or Form 1041) and cannot be deducted twice (see Chapters 27 and 28). Resolve all choices in favor of Form 706.
- Harriet had made no taxable gifts in prior years.
- Relevant Social Security numbers:

| Name | Social Security Number |
|----------------|------------------------|
| Harriet Harper | 123-45-6781 |
| Travis Harper | 123-45-6782 |
| Hannah Baker | 123-45-6783 |

PROBLEM 9—TRUST (FORM 1041)

Prepare the 2014 fiduciary income tax return (Form 1041) for the Blue Trust. In addition, determine the amount and character of the income and expense items that each beneficiary must report for the year, and prepare a Schedule K-1 for Betty Blue. Omit all alternative minimum tax computations. The year's activities of the trust include the following.

| | |
|----------------------------------|----------|
| Dividend income, all U.S. stocks | \$50,000 |
| Taxable interest income | 10,000 |
| Tax-exempt interest income | 15,000 |
| Fiduciary's fees | 4,000 |

The trust and Betty both use the calendar tax year. Under the terms of the trust instrument, fiduciary's fees are allocated to income. The trustee must distribute all of the entity's accounting income to Betty Blue by February 15 of the following year. The trustee followed this charge and made no other distributions during the year. Fiduciary's fees properly were assigned as an offset to taxable interest income.

The trust was created on July 8, 1990. There are no tax credits for the year, and none of the entity's income was derived from a personal services contract. The trust has no economic interest in any foreign trust. Its Federal identification number is 11-1111111.

The trustee, Hoover State Federal Bank, is located at 4959 Cold Harbor Boulevard, Mountain Brook, AL 35223. Its employer identification number is 98-7654321. Betty lives at 67671 Crestline Road, Birmingham, AL 35212. Her Social Security number is 123-45-6789.

Equals: Tentative minimum tax (TMT)

Minus: Regular tax liability (less any foreign tax credit)

Equals: AMT (if TMT > regular tax liability)

AMT Formula for Corporations

Taxable income prior to any regular tax NOL deduction

Plus or minus: Adjustments

Plus: Preferences

Equals: Pre-ACE alternative minimum taxable income (AMTI)

Plus or minus: ACE adjustment

Equals: AMTI before ATNOLD

Minus: ATNOLD (limited to 90% of AMTI before ATNOLD)

Equals: AMTI

Minus: Exemption

Equals: Alternative minimum tax (AMT) base

Multiplied by: 20%

Equals: Tentative minimum tax before AMT foreign tax credit

Minus: AMT foreign tax credit

Equals: Tentative minimum tax (TMT)

Minus: Regular tax liability (less any foreign tax credit)

Equals: AMT (if TMT > regular tax liability)
