## ACKNOWLEDGMENTS

This monograph evolved gradually alongside my ongoing work on other syntactic issues related to various Semitic languages. I have tried to integrate several fields of research which concern Biblical Hebrew and general Bible studies: linguistics, discourse studies, text linguistics, textual philology, literary approaches to the Bible, comparative Semitic, and Bible translation studies.

Now that my work is completed, I would like to express my gratitude first of all to Prof. Gideon Goldenberg and Prof. Anson F. Rainey, whose vast knowledge and good will have been an ongoing source of inspiration to my work. I would also like to thank Prof. Gideon Goldenberg for his sound advice on issues related to the current monograph. My sincere thanks go to Prof. S. E. Fassberg for reading my manuscript and commenting on it, for assisting me with bibliographical references, and for his constant good will and advice. I would also like to thank the Memorial Foundation for Jewish Culture for granting me a generous fellowship, which enabled me to accomplish my task to my satisfaction.

Finally, I would like to thank all my family, and especially my parents, Zfira and Moshe Dim, my husband Gill, and my children, Noga and Oded, who have appreciated and supported my work throughout the years.

#### CHAPTER ONE

#### INTRODUCTION

This book aims at a comprehensive presentation, discussion, and analysis of parenthesis in Biblical Hebrew. It begins with a theoretical discussion of parenthesis in general and continues with its recognition and realization in Biblical Hebrew. Complications are shown to arise in formulating a universal definition of the essence and structure of parenthesis, but also in the identification of parenthetical clauses, phrases, and words in specific languages, in particular Biblical Hebrew. Terms like parenthesis, parenthetical expression or remark, parenthetical unit or entity, and the like, are widely used in various related studies. In this book they primarily refer to any peripheral information external to a sentence, a piece of information which can be expressed by a single word, a phrase, or a clause.

Theoretical discussions of parenthesis can be traced in linguistic, discourse, and literary studies. Linguistic means to express peripheral parenthetical content are part of any language system. However, in many languages it might be difficult to determine the exact border between parenthetical units and other tangential constructions, the most prominent being certain types of sentence adverbials. As to adverbs and adverbial constructions, in Biblical Hebrew, for example, elements morphologically identifiable as adverbs are very rare. Other adverbial units in Biblical Hebrew, including sentence adverbials, might be somewhat easier to trace and define. Parenthetical words and phrases in Biblical Hebrew are perhaps as exceptional as morphological adverbs. In fact, a comparison of Biblical Hebrew and Modern Hebrew reveals that most adverbs, sentence adverbials, and parenthetical words and phrases in use in Modern Hebrew were created in Medieval Hebrew, in the Hebrew of the enlightenment and revival, or in still later stages, and do not originate in Biblical Hebrew. Parenthetical words and phrases seem scarce in Biblical Hebrew. By contrast, certain Biblical Hebrew clauses and extended discourse units can more easily be pinpointed

 $<sup>^{\</sup>rm 1}$  On elements morphologically identifiable as adverbs see, e.g., Kogut 2002:115–121.

and identified, and they can often be categorized as parenthetical not according to their shape but according to their content.<sup>2</sup>

In the light of these statements, in this book first parenthetical clauses are exhibited and discussed, and only in the next chapter are certain words and phrases described that might be relevant to the discussion. Most of them do not represent clear and perfect parenthetical units, and several might also be regarded as sentence adverbials.

## 1.1 Parenthesis in General Linguistics

As stated above, the widespread terms parenthesis, parenthetical expression or remark, parenthetical unit or entity, and the like, generally refer to any peripheral information, expressed by a single word, phrase, or clause, which in terms of content is external to a sentence. As for their syntax, it is generally accepted that parenthetical units do not depend syntactically on, and are not complements of, any sentence part or the sentence as a whole; the sentence to which they are attached is grammatically complete without them. A short review follows of several contributions to the delimitation, recognition, and explanation of parenthetical units.

A starting point for this review could well be the famous book of the well known linguist, Leonard Bloomfield, *Language*.<sup>3</sup> In a discussion of parataxis in syntax Bloomfield defines parenthesis as "a variety of parataxis in which one form interrupts the other." Many more later studies, when discussing parataxis, namely coordination or juxtaposition, versus hypotaxis, namely subordination, frequently state that parenthetical units are independent, and, like Bloomfield, that parentheses interrupt the sentence in which they appear.<sup>5</sup>

Another scholar, Ziv, mentions two characteristics of parenthetical units: they do not hold a fixed position in a sentence and they are not dependent on other sentence elements.<sup>6</sup> Both characteristics are based

<sup>&</sup>lt;sup>2</sup> But note that recognizing boundaries of discourse units and their possible identification with orthographic paragraphs may also meet difficulties. For discussions of this complexity by many discourse scholars see, e.g., Brown & Yule 1983:95–100, §3.6.1.

<sup>&</sup>lt;sup>3</sup> Bloomfield 1933.

<sup>&</sup>lt;sup>4</sup> Bloomfield 1933:186, §12.3.

<sup>&</sup>lt;sup>5</sup> See the continuation of this approach, e.g., in Peterson 1999, who accepts these terms and also defines the connection between parenthetical clauses and their host clauses as non-syntagmatic relations.

<sup>&</sup>lt;sup>6</sup> Ziv 1985:182–183. On the possibility to locate parenthetical units in more than one position, also see, e.g., Peterson 1999:237–238, §5.

on negating certain properties. Elsewhere Ziv indicates that a positive definition of parenthetical units is generally absent in linguistic literature, although a common denominator of many linguistic treatments is "the observation that the entities in question lack any grammatical role in the sentential unit and do not partake in syntactic processes affecting the sentence."<sup>7</sup>

Nevertheless, the basic criteria for syntactically identifying parenthetical units are not always completely fulfilled by units interpreted as parenthetical. In a chapter on parenthetic clauses Jespersen<sup>8</sup> mentioned units he entitled 'ordinary parenthetic remarks', like "This, I think, (or, This, it seems,) is madness," and 'speaker's aside', like "Talking of golf, have you met Nelson lately?"10 but also certain types of non-restrictive relative clauses and cleft sentences.<sup>11</sup> Non-restrictive relative clauses and the 'it is (is it) together with the connective word' component of cleft sentences, mentioned by Jespersen, cannot be called entirely syntactically independent. Another prominent problem which arises in various languages is the complexity in determining the exact border between parenthetical units and certain types of sentence adverbials. 12 Once again, a clear-cut detection and a satisfying syntactic description of a parenthetical unit, as completely distinct from sentence adverbials, are unattainable.

These two difficulties, namely (1) differentiating parenthetical and non-parenthetical units that both display a certain syntactic attachment

<sup>&</sup>lt;sup>7</sup> Ziv 2001:1, and see more references regarding linguistic treatments of parenthetical units ibid.:10, note 1.

B Jespersen 1937:72–79, §25.
 Jespersen 1937:72, §25.1.

Jespersen 1937:79, §25.9.

Jespersen 1937:72–79, §25.2–§25.8. Note ibid.:76, §25.6. On the relation of non-restrictive relative clauses to parenthetical units in English see also McCawley 1988:427.

<sup>&</sup>lt;sup>12</sup> Sentence adverbials are adverbs which function as sentence modifiers. They do not refer to certain parts of the sentence but to the sentence as a whole (Crystal 2003:14, Blau 1977:2-4, §1.2-§1.3). The borderline between parenthetical units and sentence adverbials is not clear, nor is that between sentence adverbials and other adverbials (e.g., Blau 1977:2, §1.2). On the complexity in the classification of English adverbs see, e.g., Greenbaum 1969:15-34, Biber & Others 1999:136, §3.4. On a partially similar use of modal parenthetical verbs and sentence adverbials and their dissimilarities, see Urmson 1952:486-489. Rouchota isolates an English group of adverbials which he labels 'adverbial discourse connectives', like moreover, nevertheless, after all, furthermore, then, etc. and suggests that in contrast to other connectives, like but, whereas, so, etc., the former should be regarded as parenthetical because they enjoy relatively free position and "function as a comment or gloss on some aspect of the meaning of the host clause" (Rouchota 1998:100-102).

by coordinates or subordinates to their host clause, and (2) differentiating parenthetical units and certain sentence adverbials, are tackled in other studies. One such example is Haegeman's paper on parenthetical adverbials in which she argues, following others, that "peripheral adverbials can best be treated as being outside the syntactic representation of the sentences which they modify" and further, that "such adverbials are not syntactically integrated in their modifee at any level of representation."13 Haegeman's work is established in the frame of Relevance theory, which is not our concern here, and she covers English examples only. Still, she discerns the loose syntactic connection of parenthetical adverbials to their host clause, while formally initiated by coordinates and subordinates similar to other sentence adverbials, and she observes that these constructions should be interpreted not on the level of syntax but of utterance, namely taking into account contextual pragmatic discourse considerations; these matters are significant for the current work. Espinal in a paper published at the same time<sup>14</sup> recognizes that there might be nothing syntactically peculiar in parenthetical units, as well as other disjuncts, in comparison with their host clauses. This paper introduces pragmatic considerations into the analysis of these constructions, mostly in English.

Contextual pragmatic discourse considerations are introduced into the analysis of English parenthetical units in earlier works also. Corum, as early as 1975, talks about the illocutionary force implicit in constructions she refers to as 'parenthetic adjuncts' and to which she assigns shared functional properties of strengthening or weakening the force of an assertion. The term parenthetic adjuncts includes, according to Corum, parenthetical adverbs, adverbial phrases, parentheticals, some non-restrictive relative clauses, and rhetorical tag questions. More-

<sup>&</sup>lt;sup>13</sup> Haegeman 1991.

<sup>&</sup>lt;sup>14</sup> Espinal 1991:727–728. By 'disjuncts' Espinal refers to "a wide variety of constituents [which] bear no obvious syntactic relationship to the sentences they seem to be included in," that is, disjunct sentences, disjunct appositive relatives, disjunct adjectival phrases, disjunct adverbial clauses, disjunct adverbial phrases, disjunct noun phrases, disjunct prepositional phrases and combined disjuncts (ibid.:726–727). The lack of syntactic relation between parenthetical units and their host clause is further treated by Burton-Roberts, who draws the discussion into the realm of utterance instead of the clause (Burton-Roberts 1999).

<sup>&</sup>lt;sup>15</sup> Corum 1975.

<sup>&</sup>lt;sup>16</sup> A 'tag question' is "a question structure usually consisting of an auxiliary verb plus pronoun, attached to the end of a statement in order to convey a negative or positive orientation" (Crystal 2003:456). The term 'parentheticals' may be differentiated as a special type of a parenthetical unit and it may accordingly be used in reference

over, the inclusion of such a variety of patterns under the single title parenthetic adjuncts reflects the difficulty of defining within the frame of syntax alone the exact distinction between parenthetical units and other interfacing syntactic patterns.<sup>17</sup> This problem is also manifested in later studies, such as Espinal's paper mentioned above.<sup>18</sup>

Yet again, pragmatic discourse considerations are called on for a description of a unique type of parenthesis in a paper published in 1979 by Mittwoch. This paper treats a special type of English parenthetical units, namely a final parenthetical question following another question, like "Is he going do you know", and other partly similar types, and Mittwoch compares them with equivalent sentences with opposite word order. <sup>19</sup> Mittwoch concludes that the two questions in such constructions are syntactically separate while pragmatically they form one unit. Another pragmatic approach analyzes German parenthetical units alongside a few English ones as syntactically separate units embedded in their host clauses for pragmatic reasons which do not contribute to the primary pragmatic function of the host clause. This view is expressed by Hoffmann. <sup>20</sup> Trumer's work on the status of parentheses from a pragmatic viewpoint is a similar attempt to introduce pragmatic

to "expressions which can be appended parenthetically to an anchor clause but which also have a non-parenthetical use in which they take a declarative content clause as complement—expressions like *I think, don't you think*?, and so on" (Huddleston & Pullum 2002:801).

<sup>&</sup>lt;sup>17</sup> Pragmatic considerations are deliberated by Hand (1993) as well as his discussion of the common omission of 'that' before English indirect speech and its syntactic implications. Hand tries to minimize the need to syntactically distinguish between indirect speech propositions which contain 'that,' introducing embedded constructions, and those which avoid it, whose speech expression is parenthetical. An attitude expressing such indifference to the distinction between these two constructions is fairly common, e.g., Urmson 1952:481. Nonetheless, Hand's treatment of the topic does convey the pragmatic dissimilarity of the two constructions. Reinhart (1983), on the other hand, claims that the two constructions, with and without 'that,' when containing verbs expressing point of view alongside speech verbs, are evidently distinct. Reinhart claims that they can be distinguished by the number of points of view involved in each: a clause connected by 'that' expresses more than one point of view, but when parenthetical it expresses only one (Reinhart 1983:172-175). On p. 176 Reinhart too introduces into the discussion the need to look at the context to differentiate between the two types. A distinction between such embedded constructions with 'that' and others in which verbs like, think, know, etc., are parenthetically used, is also stated in Emonds 1973, though he is mainly interested in their representation in transformational grammar.

<sup>&</sup>lt;sup>18</sup> Espinal 1991.

<sup>&</sup>lt;sup>19</sup> Mittwoch 1979.

<sup>&</sup>lt;sup>20</sup> Hoffmann 1998.

considerations into the analysis of parenthetical units in reference to Modern Hebrew.<sup>21</sup>

Kaltenböck, in his recent paper "Charting the Boundaries of Syntax: a Taxonomy of Spoken Parenthetical Clauses," presents a collection of definitions of parenthetical units which are not necessarily entirely independent from a syntactic point of view. His list of "syntactic categories commonly included under parenthetical" includes the following potentially dependent syntactic constructions: coordinated main clauses, reporting clauses, non-restrictive relative clauses, content appositive clauses, adverbial clauses, question tag, adverbial phrases, interjections and discourse markers.<sup>22</sup> Kaltenböck goes on to discuss in detail a certain type of parenthetical clauses that he names 'syndetic parenthetical clauses'; these show a certain type of connection to their host sentence, by markers like namely, that is, that is to say, especially, and other coordinate and subordinate elements.<sup>23</sup> The range of constructions covered by this paper, and by other linguistic literature, as potentially parenthetical makes the task of identifying parenthetical units in any language a complex task. Consequently, one has to rely not only on linguistic syntactic definitions but on functional-pragmatic ones as well.

A good conclusion to a discussion of the general linguistic status of parenthetical units is Kaltenböck's words, as follows:

Parenthetical clauses (PCs for short) are interesting especially because of their borderline status, crossing, as it were, the boundaries of syntax. On the one hand, PCs are part of syntax in terms of linear precedence: they intersect with other structures (their host structures) on the linear plane, sharing with them a terminal string. On the other hand, they fall outside the scope of syntax since this linear order is not controlled by independently motivated principles governing the linearisation of underlying structures (e.g., c-command). PCs, in other words, have no syntagmatic (i.e. paratactic, hypotactic) link to their host clauses. They are related to their host by linear adjacency but are not part of any larger syntactic unit, i.e. they do not form constituents. This 'peripheral' position of PCs, where the principle of linearity overrules that of hierarchical relations is, of course, difficult to account for in a grammar and has been a particular concern for generativists. On the one hand, it has led to proposals to extend the grammar to include such fringe phenomena by

<sup>&</sup>lt;sup>21</sup> Trumer 1987.

 $<sup>^{22}</sup>$  Kaltenböck 2005:25–27. See also a potentially wider definition of parenthetical units in Biber & Others 1999:138, §3.4.2.

<sup>&</sup>lt;sup>23</sup> Kaltenböck 2005:34–36.

adding an extra level of representation...or stipulating elaborate transformations.... On the other hand, it has led to analyses which exclude PCs from the domain of grammar altogether, treating them simply as utterance phenomena....<sup>24</sup>

Although Kaltenböck refers only to parenthetical clauses and his work is established in terms of generative grammar, which is outside the scope of this book, his statements support the general agreement regarding a fundamental criterion, that parenthetical units do not depend syntactically on and are not complements of any sentence part or of the sentence as a whole, and the sentence is grammatically complete without them. <sup>25</sup> This syntactic independence of parenthetical units becomes evident by their being dispensable and unattached to any other sentence parts, and it is further confirmed, according to Kaltenböck and others, by certain tests, like the inability to become the focus of a cleft sentence and of being questioned, quantified, and affected by negation in the host clause.<sup>26</sup> Taking this observation a step forward, another scholar, Taglicht, in his work on focus and scope in English, shows that, being external, parenthetical units might acquire another function, that is, they can function as what he labels 'partitions,' namely parenthetical units can set off marked themes from the rest of the sentence.<sup>27</sup>

The second important criterion mentioned above, that parenthetical units do not hold a fixed position in a sentence, is also indicated by Kaltenböck, who entitles it 'positional flexibility.'<sup>28</sup> Kaltenböck correctly highlights the inherent problem in defining parenthetical units: they "cannot be defined by themselves...They derive their existence, as it were, from their interaction with a host clause."<sup>29</sup>

<sup>&</sup>lt;sup>24</sup> Kaltenböck 2005:21–22. For more references regarding the definition of parenthesis and parentheticals in linguistic literature see, e.g., Kaltenböck 2005:23–27.

<sup>&</sup>lt;sup>25</sup> In fact, grammatical theories like generative grammar, relevance theory, etc., in particular have stimulated extensive debate on the syntactic status of parenthesis, since they are most curious about its representation in formal syntactic descriptions. Although formal syntactic descriptions are not an interest of this book, the theoretical approaches expressed in those studies contribute to understanding the proper framework for the classification of Biblical Hebrew parentheses.

<sup>&</sup>lt;sup>26</sup> Kaltenböck 2005:31, and more references there. See also Espinal 1991:729–735, 81.2.

<sup>&</sup>lt;sup>27</sup> Taglicht 1984:22. The term 'theme' is used by Taglicht for what is elsewhere referred to as 'logical subject', 'topic', etc.

<sup>&</sup>lt;sup>28</sup> Kaltenböck 2005:22.

<sup>&</sup>lt;sup>29</sup> Kaltenböck 2005:27.

Due to the vague definitions of parenthesis and parenthetical units, confusion obviously arises about which constructions are entitled to be included under this heading. A prosodic test for spotting parenthetical units by recognizing them as separate tone units might also be called for, but it cannot become a standard overall criterion given that many parenthetical units are not indicated by prosodic marking, 30 and more important for this book, prosody cannot be examined in ancient languages preserved only in written forms, such as Biblical Hebrew. The prosodic approach to speech utterances is paralleled regarding written texts in the search for similar evidence in typographic signs, like punctuation marks, brackets, dashes, etc. Such signs frequently mark parenthetical units in English, Modern Hebrew, and other languages.<sup>31</sup> But again, modern typographic signs do not assist much with ancient texts. As to Biblical Hebrew, although the Masoretic system of accents, which was added to the Hebrew Bible around the 7th-9th centuries C.E., might be regarded to a certain extent as the equivalent of prosodic and typographic features, alongside its other roles, it should not be treated as the one and only reading instruction but as a reading suggestion based on the Masoretic tradition and reflecting a certain exegesis. Therefore, it cannot make up for the gap in prosodic or typographic data.

The complexity in establishing formal criteria for parenthetical units leaves only two formal criteria as fundamental for identifying parenthesis in this book: (1) parenthetical units are relatively independent syntactically, and (2) they frequently enjoy flexible positioning in a sentence. (3) A third criterion, functional-pragmatic, relies on contextual considerations. These criteria, and the degree of their fulfillment in each of the constructions discussed in the following chapters, are the basis of this study.

#### 1.2 General Discourse Studies

Several linguistic works which prefer pragmatic discourse terms to syntactic ones in treating parenthetical units have been cited in the previous section on general linguistics. This approach is further developed

<sup>30</sup> Kaltenböck 2005:28.

 $<sup>^{31}</sup>$  See, e.g., Quirk and Others 1972:1071–1072, App.III.23, Quirk and Others 1985:1625–1626, §III.16, 1629–1630, §III.20, Biber & Others 1999:137, §3.4.2, Huddleston & Pullum 2002:1748–1751.

in general discourse studies regarding external information deviating from the main discourse. Brown and Yule, for example, consider a certain pattern described by them as 'a further context,' which may be constructed with its own index and co-ordinates.<sup>32</sup> Later in the text they also label this context an 'extracted fragment.'33 The co-ordinates of the index mentioned by Brown and Yule, following Lewis, 34 are possible world co-ordinates, that is, "to account for states of affairs which might be, or could be supposed to be or are"; time co-ordinates, that is, "to account for tensed sentences and adverbials like today or next week"; place co-ordinates "to account for sentences like here it is"; speaker co-ordinates, that is, "to account for sentences which include first person reference (I, me, we, our, etc.)"; audience co-ordinates, that is, "to account for sentences including you, yours, yourself, etc."; indicated object co-ordinates, that is, "to account for sentences containing demonstrative phrases like this, those, etc."; previous discourse co-ordinates, that is, "to account for sentences including phrases like the latter, the aforementioned, etc."; and assignment coordinates, that is, "an infinite series of things (sets of things, sequences of things...)." [Italics in the original] Such co-ordinates can assist in identifying parenthetical units in any language, including Biblical Hebrew, which is our focus here. Especially important for the current research are time and place particles traced in biblical texts which refer to time and place different from those of the main story line. Such time and place particles should probably be accredited to editorial work done by a certain scribe or narrator.

The term 'discourse' itself is found in the titles 'discourse grammar' and 'discourse studies,' which are partially equivalent to 'text linguistics' and are aimed at a study of text and conversation units which integrate pragmatic and functional considerations. Still, the term 'discourse' by itself, and more strictly 'direct discourse,' might also be used simply for a set of utterances joined in a conversation.<sup>35</sup> In any event, discourse studies and text linguistics deal with coherent units of texts, and seek

<sup>&</sup>lt;sup>32</sup> Brown & Yule 1983:48, §2.2.2.

<sup>&</sup>lt;sup>33</sup> Brown & Yule 1983:49, §2.2.2.

<sup>&</sup>lt;sup>34</sup> Lewis 1972:175–176, Brown & Yule 1983:40–41, §2.2.1. Other scholars with similar lists of co-ordinates are mentioned in Brown & Yule 1983:41, §2.2.1.

<sup>&</sup>lt;sup>35</sup> Crystal 2003:141–142, 461–462. On this term see also Dawson 1994:13–14, 21–22. On the terms narrative syntax, text grammar, text linguistics, and discourse grammar, and their equivalents, see van der Merwe 1997b:134–135. For an introduction to this field in Biblical Hebrew see Bodine 1995b:1–18. Niccacci indicates that the first scholar to apply the term 'text linguistics' to Biblical Hebrew was W. Schneider. (Niccacci 1995:111, note 2).

to describe their common characteristics; a fundamental distinction in this field of research is between narrative and conversation.<sup>36</sup> Discourse and text linguistic studies look for distinct characteristics of the two text types, narrative and discourse, and they display extreme sensitivity to syntactic marking of the shift from one type to the other. More important for the present work, such studies constantly discuss the possibility of a break in the narrative flow by a shift from narrative to direct discourse and vice versa, or by the introduction of parenthetical, new, and contrastive background, and off-the-line information by several syntactic means.<sup>37</sup>

## 1.3 Biblical Hebrew Syntax and Discourse Studies

Thus far syntactic and discourse approaches to parenthesis have been presented and discussed only from a theoretical point of view. The present subsection reviews progress in these fields regarding Biblical Hebrew to date.

First, let us tackle a tangential topic, namely parenthetical words and sentence adverbials in Biblical Hebrew. Numerous scholars, some of whom are mentioned here, generally conclude that most adverbials and parenthetical words and phrases in use in Modern Hebrew do not originate in Biblical Hebrew. This statement is true and valid. Blau's work "An Adverbial Construction in Hebrew and Arabic, Sentence Adverbials in Frontal Position Separated from the Rest of the Sentence" is a good example. Blau presents sentence adverbials at four Hebrew stages: Biblical Hebrew, Middle (Mishnaic) Hebrew, Medieval Hebrew, and Modern Hebrew. The section dealing with sentence adverbials in Modern Hebrew in Blau's work is the largest and contains the widest variety. Blau's discussion of sentence adverbials in Biblical Hebrew

<sup>&</sup>lt;sup>36</sup> Other terms in use are 'speech', 'dialogue', and 'discourse', the last in the narrow sense (Crystal 2003:141). For the German terms parallel to narrative and conversation, *Erzählung* and *Rede*, see, e.g., Polotsky 1985:157, Schneider 1978:161–163, §44.2. In this book 'narrative' is regarded as a text which conveys temporal events. On such a definition, alongside other definitions of narrative, see, e.g., Reinhart 1984:781.

<sup>&</sup>lt;sup>37</sup> On the term background, namely a break in the narrative temporal flow to insert side information, and its contrast, foreground, namely the narrative temporal flow, in linguistics, see, e.g., Reinhart 1984:782–785.

<sup>&</sup>lt;sup>38</sup> Blau 1977.

<sup>&</sup>lt;sup>39</sup> Blau 1977:18–52, §2.

<sup>40</sup> Blau 1977:34–52, §2.4.

concentrates on particles and conjunctions which separate sentence adverbials from the rest of the sentence: the presentatives חָבָּה and חְּהַבָּה, and the conjunctions, conjunctive and consecutive wāw, בְּשֶׁר, מְשֶׁר, and rarely שָׁ. Sentence adverbials separated from the rest of the sentence by these particles and conjunctions include time particles, e.g., הְשָׁהָ, דְּשָׁר, וְשַּהָּה + time reference, and many other time references, as well as other particles which express nuances of addition, cause, affirmation, contrast, and the like, e.g., אַבָּן, לָבֵן, גַּם Occasionally, prepositional phrases also function as sentence adverbials, e.g., בְּחַלוֹמִי (Gen. 40:9). Such sentence adverbials are also treated in Blau's discussion of later periods of Hebrew. Several of these sentence adverbials might also be regarded by certain scholars as parenthetical to some measure.

The treatment of Modern Hebrew by other scholars also includes many epistemic modal adverbials, like, עניח ש., באמת ש., בודאי ש., גניח ש., בודאי ש., בודאי ש., בודאי ש., בודאי ש., ממובן ש., במובן ש., ממובן ש., מחללא ספק ש., מחללא ספק ש., מחללא מפק ש., מחללא and the like, which might at least partially be defined as parenthetical words and phrases as well, as suggested, for instance, by Livnat. The probable late origin of many parenthetical words and phrases in Hebrew is also apparent in Dubnov's work on parenthesis with emotional meaning in Modern Hebrew. She convincingly shows that such constructions are products of much later stages of Hebrew, some originating in Medieval Hebrew under the influence of Arabic, but many more having developed under the influence of German, Yiddish and Russian, either in independent Hebrew writings or in Hebrew translations from German and Russian literature.

A similar conclusion regarding a more specific type of post-Biblical Hebrew parenthetical units is also expressed by Sarfatti, in his short discussion on the expressions that he names 'parenthetical laudatory formulas' such as זכר , זכרונו לברכה , עליו השלום , זכותו יגן עלינו

<sup>41</sup> Blau 1977:18-30, §2.1.

<sup>&</sup>lt;sup>42</sup> See Livnat's Ph.D. hybrid title "Parenthetic Sentential Adverbials in Contemporary Hebrew" (Livnat 1994b). Also see Livnat 1999 in which she states that epistemic modality can be realized in Modern Hebrew by various syntactic measures, e.g., principle propositions, formal predicates, sentence adverbials (also entitled by her 'parenthetic sentential adverbials'), parenthetical clauses, heads of relative clauses, and one-member clauses. In another paper Livnat isolates a sub-group of Modern Hebrew sentential adverbs which specifically indicate the domain in which a clause is true (Livnat 2000).

<sup>&</sup>lt;sup>43</sup> Dubnov 2005.

12 Chapter one

etc. and their acronyms. 44 Sarfatti indicates that these formulas might have remote roots in certain non-laudatory expressions in Biblical Hebrew and in Rabbinic Hebrew, and suggests that they mainly evolved in the Medieval Hebrew dialect that developed under the influence of Arabic. Sarfatti presents his thesis as a proposal for further research on this topic more than as a conclusive account; ultimately he concludes that the essence of these parenthetical units should not be sought in Biblical Hebrew or Rabbinic Hebrew. Nonetheless, as Sarfatti intimates, and Sharvit in a paper on invocations of the dead details and demonstrates, certain parenthetical laudatory formulas, especially those following the name of a deceased person, such as זכרונו לברכה, etc., in fact have roots in certain Biblical Hebrew verses, in their equivalents in the analogous language of the book of Ben Sira, and in Rabbinic Hebrew literature and epigraphy. Examples are Prov. 10:7—זכר צדיק ירקב ירקב "The memory of the righteous is a blessing, but the name of the wicked will rot," and משה זכרו לטובה (Ben Sira 45:1).<sup>45</sup> The important distinction between the earlier rare occurrences and the later widespread medieval formulas lies in the mostly dissimilar syntactic status of either: the latter are always parenthetical while the former are rarely so. The development, distribution, and parenthetical role of these laudatory formulas as parenthetical units, therefore, is to be traced, as Sarfatti suggests, not earlier than Medieval Hebrew, and very probably to the influence of Arabic. Consequently, these parenthetical words and phrases exceed the scope of the current work.

The foregoing statement leads the discussion of Biblical Hebrew parenthesis in other directions. A productive course is not to seek out Biblical Hebrew parenthetical words and phrases but how Biblical Hebrew deals with larger units of information outside the flow of Biblical narrative. Since the typical verbs in Biblical Hebrew narrative clauses are prefix conjugation forms prefixed by the conversive  $w\bar{a}w$ , namely wayyiqtol forms, the narrative flow can be broken by means of a different type of verbal clauses in order to introduce parenthetical, new, and contrastive settings and off-the-line information, namely clauses with suffix conjugation forms (qatal forms) following their subjects. This pos-

<sup>44</sup> Sarfatti 2003.

<sup>&</sup>lt;sup>45</sup> Sharvit 2001, Beentjes 1997:79. Sharvit 2001 and Sarfatti 2003 both suggest that the laudatory formula עליו השלום in Rabbinic literature is probably a later addition in printed editions, since it does not appear in manuscripts. Both also suggest an Arabic origin for this expression (Sharvit 2001:85, Sarfatti:81).

sibility is described in numerous studies. Other scholarly works enlarge the number of means used for this purpose, and indicate, in addition to clauses containing *qatal* verbal forms, all clauses not introduced by *wayyiqtol*, namely verbless, participial, and elliptic clauses. Several such contributions are discussed below.<sup>46</sup>

Ewald and Gesenius, the well known nineteenth-century Biblical Hebrew grammarians, acknowledged even then the sequential nature of what they called the *imperfect* with waw consecutive, which is their label for the wayyiqtol forms, and they defined this verbal use as a narrative tense. 47 Moreover, within a discussion of verbal usage in relation to the consecutive wāw, Ewald specifically mentions the term 'parenthetical proposition': "when any parenthetical proposition begins, whether it be a relative one with אָשֶׁר, who, בי, for, etc. or a circumstantial clause..., the simple tense-form always reappears" (italics in the original).<sup>48</sup> By 'simple tense-form' Ewald means gatal forms. Also, Ewald includes under the definition of a parenthetical proposition alongside certain types of circumstantial clauses other subordinate clause types too. This implies that he recognized as potentially parenthetical not only syntactically disconnected clauses but certain subordinate clauses in certain contexts as well. The term 'parenthesis' reappears in Joüon's grammar in connection with a certain circumstantial clause, to which he assigns parenthetical properties.<sup>49</sup>

<sup>&</sup>lt;sup>46</sup> For references other than those discussed next see, e.g., Schlesinger 1953:386–390, who mentions several syntactic conditions for using suffix conjugation verbs, Gibson 1995, Gross 1981, Sailhamer 1990:321–323, §1.1.1–§1.1.3, Talstra 1995b. Myhill & Xing question the use of the term contrast in Myhill & Xing 1993:37, and discuss other uses of clauses in which the verb is in a second place including foreground and background information (ibid.:40ff). de Regt 2006 discusses several motivations for Hebrew syntactic inversions and their reflection in English. See many more references in van der Merwe 1994, 1997a, 1999; a brief reference to these measures in van Wolde 1997b:39; Zevit 1998, mostly for the role of *qatal* in expressing anterior constructions in Biblical Hebrew, but also other constructions like subject-predicate word order (Zevit 1998:71), and see Zevit 1998:1–13, for other references; Joüon & Muraoka 2006:362–363, §118da. A similar interpretation of *yaqtulu* for expressing foreground information and *qatala* for expressing deviations from the narrative flow is offered by Greenstein regarding Ugaritic narrative verse (Greenstein 2006:91–101).

<sup>&</sup>lt;sup>47</sup> Ewald 1881:244–245, §342, *GKC* 1910:326, §111a. Also see Joüon & Muraoka 2006:350–352, §115, 360–362, §118a,c,d. On West-Semitic origins and parallels to these forms see, e.g., Smith 1991:14, 17–19. On their role also see Givón 1977:198, 200.

Other works on Biblical Hebrew syntax which show sensitivity to the function of certain clause types and verbal forms in various texts are those of Andersen, Khan, and the extensive Biblical Hebrew Syntax of Waltke and O'Connor. Though these authors choose to work in the frame of the sentence and avoid analyzing larger units, they indicate that certain clause types might be selected by the scribes or narrators for functional-pragmatic reasons. Andersen observes many clause types which deviate from the main story line. Of these, especially noteworthy for us is Andersen's treatment of circumstantial clauses, more specifically the type he describes as "circumstantial clause beside the episode." At the beginning of his treatment of such clauses Andersen also discusses "circumstance as parenthesis," and his observations there are fundamental for this study. He states:

The best-known circumstantial clauses are those which come alongside the main thread of discourse. They generally report some coetaneous event or state, hence the name 'circumstantial'. For the same reason they are sometimes described as subordinate or 'adverbial', and not always distinguished from parenthetical information placed in apposition. We pay more attention to surface features, and distinguish circumstantial clauses carefully from conjunctionless apposition.

It is a token of this standing alongside the main time stream that predicators in such circumstantial clauses are predominantly tenseless, neither past nor future, even when the rest of the discourse is either past or future. Verbless clauses, and clauses with participles or quasiverbals as predicators, when used circumstantially, take their tense from the lead clause or from a paragraph as a whole.<sup>53</sup>

<sup>&</sup>lt;sup>50</sup> Andersen 1970 discusses nominal clauses; idem 1974 discusses apposition sentences, coordination, circumstantial, adjunctive, and surprise clauses, conjunctive, chiastic, disjunctive, contrastive, inclusive, exclusive, and antithetical sentences. Khan 1988 is a treatment of sentences involving extraposition in Biblical Hebrew alongside Arabic, Aramaic (Biblical Aramaic and Syriac), Akkadian, and Amharic. The examination of the linguistic evidence is accompanied by a discussion of the discourse roles played by extraposition in each language. Waltke & O'Connor 1990:53–55, §3.3.4 indicate their reservations about using discourse methods, but they are amenable to functional-pragmatic considerations, as can be seen in Waltke & O'Connor 1991:490, §30.5.2b, where the use of the past perfect is discussed, and 651–652, §39.2.3c, where it is said that "a disjunctive-waw clause may also shift the scene or refer to new participants." Clauses are described as interruptive, explanatory, or parenthetical, following Lambdin 1971:164

<sup>&</sup>lt;sup>51</sup> Andersen 1994 goes beyond the borders of a clause and treats connections between clauses.

<sup>&</sup>lt;sup>52</sup> Andersen 1974:77–91, §5.

<sup>&</sup>lt;sup>53</sup> Andersen 1974:82, §5.1.3, §5.1.3.0.

This book follows Andersen's observations above on the essence of these circumstantial clauses, the clause patterns of which they are made, that is, mainly verbless, participial, and quasi-verbal, and their tenseless character. It also adopts Andersen's observation of a similar role of circumstantial clauses with suffix conjugation verbs and with prefix conjugation verbs in non-initial position.<sup>54</sup>

A short but important paper by Polotsky discusses the distinction between narration and discourse and the existence of sequential and non-sequential verbal forms in Ramesside Egyptian and in Biblical Hebrew.<sup>55</sup> Polotsky shows that the sequential forms appear in narrative, and alternate with another tense, 'a retrospective' or 'a perfect', in his terms. According to Polotsky and according to his examples, the sequential tense in Biblical Hebrew is wayyiqtol and the non-sequential as well as speech tense is *gatal*. Rainey too, in a paper on *yagtul* preterite in Northwest Semitic, 56 discusses yaqtul as a narrative tense capable of being replaced by *qatal*, when fronting or contrast is involved.<sup>57</sup> Rainey is also aware of the use of yagtul in first position versus gatal in second position, following another sentence component.<sup>58</sup> The Northwest Semitic form, yaqtul, is obviously reflected, according to him and others, in the form wayyiqtol in Biblical Hebrew. Zevit, in his monograph on the anterior construction in Classical Hebrew, states the following regarding certain uses of *qatal* as anterior past:

Syntactically, anterior clauses are connected to the narrative flow through the conjunction which creates formally a minimal cohesion; semantically, they are disconnected because they introduce a new topic; but logically, they work against text cohesiveness by arresting and reversing temporarily the chronological flow of the narrative. Their main function is to provide information for the main narrative line by advancing heretofore unknown

<sup>&</sup>lt;sup>54</sup> Andersen 1974:85–86, §5.1.3.4, §5.1.3.5. The non-initial position of the prefix verb is revealed in Andersen's example בְּיִישְׁמִת בְּנֵי-יִשְׁמִת בְּנֵי-יִשְׁמִת בְּנֵי-יִשְׁמִת בְּנִי-יִשְׁמִת בְּנֵי-יִשְׁמִת הַנֵּי-יִשְׁמִת מָּנִי מִּהְיָיִן עַל-שְׁמִת בְּנֵי-יִשְׁמִת בְּנֵי-יִשְׁמִת הַנֵּי-יִשְׁמִת הַנֵּי-יִשְׁמִת בּנֵי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִים מִּהְיִין עַל-שְׁמִת בּנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִי-יִשְׁמִת פּבְנִייִּ מִּיְּתְ עַל-שְׁמִת בּנִייִי עָל-שְׁמִת בּנִי-יִשְׁמִת פּבְנִיי מִּיְּתְ עַל-שְׁמִת בּנִיי מִּיְּתְ עַל-שְׁמִת בּנִייִי מָּל-שְׁמִת בּנִיי מִּיְּתְ עַל-שְׁמִת בּנִיי מִּיְּתְ עַל-שְׁמִת בּנִיי מִּיְּתְ עַל-שְׁמִת בּנִיי מִּיְּתְ עַל-שְׁמִת בּנִיי מִּיִּתְ עַּל-שְׁמִת בּנִיי מִּיִּתְ עַּל-שְׁמִת בְּנִיי מִּיְּתְ עַּל-שְׁמִת בְּנִייִי מְּיִּבְּנִי מִּיְּתְ עַּל-מִּת בּנִיי מִּיְּבְּנִי מְּיִּתְ עָּל-מְעִּמְת בְּנִייִּי מְּיִּתְ עַל-מְּמְת בּנְיִי מְּבְּנִי מְּיִּבְּנִי מְּיִּתְ עָּל-מְעִּמְת בּנִיי מְּיִּבְּנִי מְּיִּבְנְיִי מְּיִּבְּנִי מְּיִּבְנְיִי מְּיִּבְּנְיִי מְּיִּבְּנִי מְּיִבְּנְי מְּבְּנִי מְּיִּבְּנִי מְּיִּבְּנִי מְּיִי מְּעִּבְּנִי מְּיִּבְּנְי מְּבְּנִי מְּיִּלְ עָּלּר בְּעִּי מְּתְּי בְּיִּי מְּיִּבְּנִי מְּיִּי מְּעִּי מְּיִּי מְּבְּנִי מְּיִּי מְּיִּי מְּיִי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִּי מְּיִי מְּיִּי מְּיִי מְּיִּי מְּיִי מְּיִי מְּיִּי מְּיִי מְּיִּי מְּיִי מְּיִי מְּיִּי מְּיִּי מְיִי מְּיִי מְּיִי מְיִּי מְיִּיְי מְיִּי מְיִּיְיִי מְיִּיְי מְיִּי מְיִּי מְיִּי מְיִּי מְיִּיְיִי מְיִייְיִי מְיִּיְיִי מְיִּיְיִי מְּיִייְ מְיִּיְיִי מְּיִייְ מְּיִייְ מְיִייְ מְּיִייְ מְיִּייְ מְיִייְּיִי מְּיִּייִי מְּיִּייְ מְיִּיּיִי מְּיִּי מְּייִי מְּייִי מְיּי מְּיִיי מְיּיִּי מְּיִּיי מְּיִּייִּי מְּיִּי מְּיּיי מְיּיי מְּיּיי מְיּייִי מְּיּיי מְיּיי מְיּיי מְיּיי מְיּייִּי מְיּייִּיי מְּיִּייִּי מְיִּיּים מְּיִייְּיִיּי מְיּיְיי מְיּבְּייי מְיּייִּים מְּייִייְּייִּים מְּיִייְּבְּיּיִּים מְיי

<sup>&</sup>lt;sup>56</sup> Rainey 2003a.

<sup>&</sup>lt;sup>57</sup> See Rainey 2003a:407 regarding Ancient Hebrew, and Rainey 2003b:12–21. Rainey 2003b:34–39 extends these conclusions to other West-Semitic languages. These papers follow and extend Rainey's earlier views presented in prior publications, primarily Rainey 1996 II, which deals with the Canaanite verbal system in the Amarna tablets; see especially Rainey 1996 II:221–233, 347–366.

<sup>&</sup>lt;sup>58</sup> Rainey 2003a:407.

background information into the foreground. In some cases, the information can be trivial, as in death notices (Judg 4:1; 16:31); in others, it can be significant, marking the incipit of motifs that then come to dominate the narrative (Gen 6:7–8m 37:2–3); in yet others, it may be of a parenthetical nature (Gen 8:4–5; 31:25). <sup>59</sup>

A major contribution to the understanding of the verbal usage in Biblical Hebrew is made by Niccacci, who again, like the above author, reveals sensitivity to various text types. Niccacci mainly follows Weinrich's division into distinct use of tense in discourse and narrative, both of these having three aspects which Niccacci calls linguistic attitude, foregrounding, and linguistic perspective. 60 Accordingly, he draws three basic tables, in each of which he sets the main verbal forms in two columns, one for the narrative type of text and one for the discourse type. 61 The first of the three aforementioned aspects, namely linguistic attitude, concerns narrative and commentary; the second, foregrounding, concerns highlighting and background;<sup>62</sup> the third, linguistic perspective, concerns retrieved information, degree zero, which is the level of the story itself, and anticipated information.<sup>63</sup> As for basic verbal forms in the Biblical Hebrew texts, Niccacci treats not merely two, that is, wayvigtol and gatal, but four: wayvigtol, yigtol, gatal, and wəgatal. He mentions wayyiqtol as the main narrative form and yigtol as dominant in discourse, and he indicates that both are the basic forms of Hebrew prose.<sup>64</sup> Niccacci further states that "narrative develops by means of a chain of WAYYIQTOLs."65 By contrast, he considers *qatal* retrospective, namely a form which expresses recovered information (like an antecedent event or flashback) or a comment on the main events (background). It is used in narrative and discourse but not

<sup>&</sup>lt;sup>59</sup> Zevit 1998:25–26. Zevit uses 'parenthetical' in reference of some of the examples. <sup>60</sup> Niccacci 1990:19–20, §2–§3, Weinrich 1971. Weinrich is mentioned among others who refer to the distinction between narration and discourse by Polotsky (Polotsky 1985:157), and see van der Merwe 1997a:9–10, §4.4.1 and Longacre 1995:99.

<sup>&</sup>lt;sup>61</sup> "Narrative concerns persons or events which are not present or current in the relationship involving writer-reader and so the third person is used. In discourse, on the other hand, the speaker addresses the listener directly (dialogue, sermon, prayer)" (Niccacci 1990:29, §7).

<sup>&</sup>lt;sup>62</sup> On the meaning of these terms see, e.g., Cook 2004:254–257, §2.2, and a short definition on pp. 261–262, note 27. Also see van Wolde 1997b:34–39 for these terms, and Aristar Dry 1992 for various approaches to the definition of foregrounding.

as a narrative form.<sup>66</sup> The form *wəqatal* might function in discourse, in a chain of verbs, somehow similar to *wayyiqtol* in narrative.<sup>67</sup> Niccacci's description of the verbal and clausal uses in Biblical Hebrew conforms to the idea of breaking a narrative flow by using clause patterns which deviate from the normal narrative pattern.<sup>68</sup>

In another paper Niccacci indicates that he makes "a sharp distinction…between verb forms of connection and verb forms of interruption" and that the former are verbal and the latter are nominal sentences. <sup>69</sup> He also states there that "in narrative a verbal sentence is a linguistic sign of connection, while a nominal sentence (simple or compound) is a sign of interruption in the mainline of communication." Niccacci's distinction between verbal and nominal clauses is sometimes considered controversial, <sup>71</sup> but his distinction between connecting and interrupting patterns is significant for the current work; several of Niccacci's interrupting patterns can be defined as parenthetical.

Many scholars consider Longacre's discourse approach and its application to Biblical Hebrew pioneering and fundamental work. Though the complete scope of his discourse theory is beyond the concern of this study, Longacre's recognition that different verbal forms and clause types in Biblical Hebrew are used in distinct narrative and non-narrative text types and to introduce off-line information is relevant and significant. Longacre's approach has been maintained, developed, and modified by several scholars. Dawson, for example, also takes into account various types of texts, narrative and non-narrative, and the parameters of main-line versus off-line, and foreground versus background. He follows and develops Longacre's methods, finding Longacre's contributions

in this field "particularly productive".<sup>76</sup> Heller's "Narrative Structures and Discourse Constellations, an Analysis of Clause Function in Biblical Hebrew Prose" likewise develops Longacre's approach and methods and applies them to a specific Biblical Hebrew corpus.<sup>77</sup> Heller, like others, emphasizes the role of *wayyiqtol* as a sequential verb.<sup>78</sup>

Longacre's approach and analysis have not been accepted by all. Another scholar, Heimerdinger, in "Topic, Focus and Foreground in Ancient Hebrew Narrative," rejects Longacre and his followers' methods and conclusions.<sup>79</sup> He links his own approach to literary studies rather than text linguistics, and explains Biblical Hebrew word order and verbal choice by functional criteria only, concentrating mostly on topic and focus as stimulating the choices of word order and verbal usage.80 Though Heimerdinger himself sees his approach as sharply opposed to Longacre's, it might be better to consider the two approaches as complementary, since both discourse and functional grounds play a part in word order and verbal choice in Biblical Hebrew, as in many other languages.<sup>81</sup> Another critic of the discourse approach is Cook, who in a recent paper maintains that wayyiqtol and waqatal are not merely empty verbal forms functioning according to discourse factors but they necessarily carry a basic semantic meaning. This meaning might support the discourse's functional usage but it is not identical to it.82 Again, and according to Cook himself, his approach can be regarded as complementary to the discourse approach, not contradictory. A similar view of the need to combine the two approaches was nicely expressed still earlier by Joosten: "... the recent text-linguistic and discourse-oriented approaches to the problem of the Biblical Hebrew

<sup>&</sup>lt;sup>76</sup> Dawson 1994:114, §3.2.2.

verb do not replace earlier analyses in terms of tense and aspect, but are complementary to them."83

One more important work on Biblical Hebrew verbal usage in the frame of discourse studies is Eskhult's "Studies in Verbal Aspect and Narrative Technique in Biblical Hebrew Prose." At the outset Eskhult indicates that the scope of his first application is "to show how the static (wə)subj-qtl clause is used as an episode marginal circumstantial," and that the scope of his second application is

to exhibit a broader amplification of the theoretical outline: how static clauses are used in the economy of a narrative or an episode, and further to investigate the interplay between foregrounded and backgrounded clauses, especially as to the delimitation of scenes, and, finally, to investigate the function of the different aspectual values in their narrow context, and the bearing of the difference between narrative discourse and direct speech in this respect.<sup>85</sup>

Eskhult's conclusions emphasize the distinction in verbal usage between narrative and speech and the central role played by circumstantial clauses in establishing marginal information. <sup>86</sup> His observations, including his use of terms like 'marginal' and 'circumstantial,' and 'foreground' versus 'background' clauses, are crucial for this study. <sup>87</sup>

In his book *Participants in Old Testament Texts and the Translator*, de Regt discusses various ways of introducing participants into a Biblical text and their reflections in Bible translations.<sup>88</sup> de Regt concentrates on implicit and explicit ways of referring to characters in Biblical Hebrew, most of which are irrelevant for this book, and he examines various text

<sup>83</sup> Joosten 1997a:51, and see the application of his approach in Joosen 1997b.

<sup>84</sup> Eskhult 1990.

<sup>85</sup> Eskhult 1990:9-10.

<sup>&</sup>lt;sup>86</sup> See especially his treatment of dialogue versus narration in Eskhult 1990:37–41, §2.5, of circumstantial clauses in Eskhult 1990:31–33, §2.3.3, and of episode marginal circumstantial clauses in Eskhult 1990:45–57, §3, and its summary there on p. 57, §3.5.

<sup>&</sup>lt;sup>87</sup> References to the issue of time, and sometimes also word order and discourse in Biblical Hebrew, also exist in many studies on the complexity of the tenses and aspects in Biblical Hebrew. See Driver 1892 for the treatment of Hebrew verbs as expressing aspects, Mcfall 1982 for his historical survey, Hatav 1997:3–5, Van der Merwe 1997c, and Goldfajn 1998 for introducing the concept of 'relative time', that is, according to Goldfajn, "the time that is being talked about or the temporal standpoint from which the event is considered" (Goldfajn 1998:46) to the study of Biblical Hebrew, and Goldfajn 1998:69–72, 78–85, 90–104, for the prefix wāw and telicity, for discourse studies and Biblical Hebrew, and for word order in Biblical Hebrew narrative. On Goldfajn's work also see Zewi 2001.

<sup>88</sup> de Regt 1999.

genres—narrative, dialogue, poetry and prophetic texts, of which the last two are also irrelevant here. Yet de Regt makes some important observations for a discussion of parenthesis in Biblical Hebrew. In one, he concurs with others that "...it is often preverbal subjects that are associated with the reintroduction of participants and the beginning of a new paragraph."89 In another he points out that "sometimes a participant is introduced in a verbless clause that gives him a name," with examples such as Gen. 4:21,22 and Num. 26:59. de Regt adds that occasionally an additional preceding clause introduces a new character into the story, as in Gen. 38:1 and 1 Sam. 17:13.90 These measures should also be considered as breaking the narrative flow by inserting information which is external to the story line.

Finally, parenthesis is hardly ever mentioned or discussed in syntactic studies of other Semitic languages. An occasional reference to parenthetical units appears in Reckendorf's Arabische Syntax in which he mentions the break of an Arabic sentence by a parenthetical clause initiated by one of the two Arabic conjunctions (wa) and (wa) under a general discussions of these particles. 91 Another short section dedicated to parenthesis in Syriac appears in Nöldeke's Compendious Syriac Grammar, in which he treats parenthetical units involving verbs of thought and speech which interrupt the clausal sequence. 92 A slightly longer treatment of parentheses in several Semitic languages appears in Brockelmann's Grundriss der vergleichenden Grammatik der semitischen Sprachen. 93 Brockelmann discusses and demonstrates several parenthetical constructions in Arabic, neo-Ethiopian languages, Biblical Hebrew, and Syriac.

The elusive linguistic nature of parenthesis in general and certain parenthetical patterns in particular, and the difficulty in recognizing, defining, and analyzing them, have certainly aggravated the relative ignorance of scholarly studies on Semitic languages about these constructions.

# 1.4 Textual Philology: Interrupted Syntactic Structures as Possible Parentheses

Gottstein examines another way supposedly employed for expressing marginal parenthetical remarks in a paper on "Afterthought and the Syntax of Relative Clauses in Biblical Hebrew."94 He defines 'afterthought' thus: "Talking on a certain matter, one may switch over to something else, still thinking dimly of the first, and suddenly turn back. Or one finishes a sentence and then proceeds to comment on a detail of it."95 Gottstein considers relative clauses that do not immediately follow their head as expressions of afterthought. A much similar view is expressed by Weingreen, who explains a relative clause detached from his head in terms of a 'gloss'. He explains a 'gloss' as "a brief note on the text, not inserted into the text editorially, but incorporated into it by a copyist."96 According to the definition of these two scholars these are cases of anacoluthon, 97 and they raise two questions: (1) Is an acoluthon in general to be considered a type of parenthesis?; (2) Are the interrupted relative clauses attested in the Hebrew Bible to be considered anacoluthon?<sup>98</sup> Such approaches might generally belong to the sphere of textual philology. Despite Weingreen's remark, which attaches glosses not to editorial work but to possible intervention by copyists, these textual supplementary elements can generally refer to any interference in a text later than the initial time of its creation and hence can be regarded as some kind of editorial work.

<sup>&</sup>lt;sup>94</sup> Gottstein 1949. Waltke & O'Connor 1991:648, §39, note 1, consider Gottstein's paper as dealing with parenthetical expressions.

<sup>95</sup> Gottstein 1949:36.

שַּרְיְנִיהְ פּּבֶּכּח וְיִרְשׁוּ גַם-הַמְּה אֶּעֶר-וְּצִיק אֲשֶׁר-וְנִיק וֹ עַּבְּלָה וְשְׁבְּּפֶּח וְלְּבֶּעְ וְשְׁרְבֶּח הַלְּבֶּעְ אֲשֶׁר-וְה׳ אֱלֹהִיכֶּם נֹחֵן לְהֶם וְשְׁבְּּהֶם לְּאֶרֶץ יְרָשׁוּ גָם-הַמְּה אֶּעֶר וְחָן לְכֶם מֹשֶׁה עֶבֶּד ה׳ בְּעָבֶּר הַיִּרְדֵּן מִיְרָח הַשְּׁמֶשׁ הֹיִרְשׁהְּשׁ אוֹתָה אֲשֶׁר וְחָן לְכֶם מֹשֶׁה עֶבֶּד ה׳ בְּעַבֶּר הַיִּרְדֵּן מִיְרָח הַשְּׁמֶשׁ "Until the LORD gives rest to your brethren as well as to you, and they also take possession of the land which the LORD your God is giving them; then you shall return to the land of your possession, and shall possess it, the land which Moses the servant of the LORD gave you beyond the Jordan toward the sunrise," in which the relative clause you beyond the Jordan toward the sunrise, in which the relative clause (Weingreen 1957:150−151). Note that the RSV translation repeats the head "the land" before the relative clause. Weingreen generally differentiates between intentional editorial notes, which are integral part of a text, and glosses (Weingreen 1957:149).

<sup>&</sup>lt;sup>97</sup> However, the term 'gloss' might be used in general linguistics for any comment on a clause or utterance, not necessarily anacoluthon (e.g., Rouchota 1998:121). Such an interpretation of 'gloss' corresponds to a parenthetical expression.

<sup>&</sup>lt;sup>98</sup> A discussion of the possibility than such constructions are a consequence of an editorial work of biblical texts appears in Zevit 1998:35–37.

The first question arises sporadically in discussions on parenthetical units, and Kaltenböck, for instance, in his paper on the classification of spoken parenthetical clauses in English, wisely rejects the possibility of including anacoluthon under the title of parenthetical clauses: "The difference between PCs [parenthetical clauses] and anacolutha is this that the former follow a clear and relatively predictable pattern, whereas the latter fall into the category of performance error, caused by working memory limitations." <sup>99</sup>

As to the second question, in an earlier paper I tried to show that interrupted relative clauses in the Hebrew Bible are not anacolutha but systematic Biblical Hebrew patterns. Interrupted relative clauses in Biblical Hebrew, in my opinion, are only one type of a general syntactic organization and conduct whereby interrupted syntactic structures, that is, extraposition, prolepsis, adverbials between logical subject and predicate, broken predicates, objects separated from their verbs, and attributes, appositions, and attributive clauses separated from their heads (relative clauses in Gottstein's terminology), function as normal components of the language variety, even if they are not as widespread as parallel continuous structures. These interrupted syntactic structures may or may not serve as parenthetical units, and their possible parenthetical action is recognized not due to their being syntactically detached but to other considerations.

In general, attributes, appositions, and attributive clauses, or in Gottstein's terminology relative clauses, sometimes do and sometime do not carry relative external information. The distinction between those that do and those that do not only partly overlaps the distinction between joint and disjoint heads and attributes, appositions, and attributive clauses. Only some of the interrupting phrases and clauses that break the sequence of the so-called interrupted syntactic structures suit the definition of parenthetical units designated in this book.

One example of an interrupted syntactic structure which may nicely be interpreted as containing a parenthetical unit whose information

<sup>99</sup> Kaltenböck 2005:49, and another reference there.

<sup>&</sup>lt;sup>100</sup> Zewi 1999b. Also see Tsumura 1996 who considers certain similar interrupted constructions in Biblical Hebrew poetic texts and poetic prose as involving insertion of certain elements rather than inversion, break up, or ellipsis, and explains them as stylistic/rhetoric variants. Interest in discontinuous syntactic structures, including parenthetical units, is also manifested in several studies by transformational grammarians, but their main interest is aimed at the preferred grammatical representation of these patterns by generative trees, e.g., McCawley 1982, Espinal 1991:735–751, §2–§3.

is external to the host sentence is 1 Kgs. 11:26—נירבעם בן-נבט אָפָרָתִי מְן-הַצְרֵדָה וְשֶׁם אָמוֹ צָרוּעָה אָשֶׁה אַלְמָנָה עָבֶד לְשׁלֹמה וַיִּרֶם יִד בַּמְלֶדְ —"Jeroboam the son of Nebat, an Ephraimite of Zeredah, a servant of Solomon, whose mother's name was Zeruah, a widow, also lifted up his hand against the king." The clause in boldface above, which conveys external parenthetical information regarding Jeroboam's mother, intervenes in the Biblical Hebrew version between וירבעם בּן-נבט and the adjacent nominal phrase which continues the description of Jeroboam, עבד לשלמה. The RSV translation, for instance, is uneasy about this Biblical Hebrew word order and changes the places of עבד לשלמה, putting the latter before the former, in accordance with English word order conventions. Nonetheless, the phrase עבד לשלמה itself can be interpreted either as the predicate of וירבעם בן-נבט אפרתי מן-הצרדה, considering the whole of וַיַּרְבַעָם בָּן-נָבַט אָפָרָתִי מִן-הָצְרֵדָה וְשֶׁם אָמוֹ צִרוּעָה אָשֶׁה אַלְמֵנָה a complete sentence, or as its apposition, considering the verb וירם the predicate.

Miller, in her book on the representation of speech in Biblical Hebrew, also discusses what she calls 'discontinuous frames' in which, according to her, "a quotative frame may be interrupted by parenthetical narrative material." Miller adds: "The parenthetical material is marked off from the frame by being either a nominal clause or a disjunctive verbal clause," thereby adopting the position of many discourse studies. Miller divides her four instances of this phenomenon into those in which the quotative frame is split into two halves (1 Sam. 22:9 and Judg. 20:27–28a, discussed here) and those in which the quotative frames are stated twice (2 Sam. 21:2–3 and 1 Kgs. 12:10, discussed here).

However, Miller's example from 1 Sam. 22:9—אָדמִי יְהָאָדמִי יְהָאָרמִי וְהַאָּבְּעַלְּבָּוֹיְשִׁי בָּאַ נֹבֶה אָל-אַחִימֶלֶךְ בָּן-אָחְטוּב נַּצְב עַל-עַבְדֵי-שָׁאוּל וַיֹּאמֵר רָאִיתִי אֶת-בָּן-יִשִׁי בָּא נֹבֶה אָל-אַחִימֶלֶךְ בָּן-אָחְטוּב "Then answered Doeg the Edomite, who stood by the servants of Saul, 'I saw the son of Jesse coming to Nob, to Ahimelech the son of Ahitub' "—is in fact a circumstantial clause וְהוֹא נִצְב עַל-עַבְדֵי-שָׁאוּל which describes a proper name, and its appearance next to the proper name creates an interrupted syntactic structure which, as suggested in

<sup>&</sup>lt;sup>101</sup> Miller 1996:217, §4.4.2. On interruption in direct speech see also de Regt 1999:21–22, §2.1.1.

<sup>&</sup>lt;sup>102</sup> Miller 1996:217–218, §4.4.2.

<sup>&</sup>lt;sup>103</sup> Miller 1996:218–220, §4.4.2.

my paper on this topic, is natural to Biblical Hebrew. 104 Likewise, 1 Kgs. 12:10—הָּבָּרוֹ לָּעָם הַאָּרוֹ בָּרְלוּ אָתוֹ לֵאמֹר בֹּה-תֹאמַר לָעָם הַאָּדִים אֲשֶׁר נְּדְבוּר וּאֲלִיוּ הַיְּלָדִים אֲשֶׁר נְּבְּרוֹ אֵלֶיוּ לֵּאמֹר אָבִיךּ הִּבְּדִּר אָת-עֻבְּנוּ וְאַהָּה הָקַל מֵעְלֵינוּ כֹּה תְּדָבֵּר אֲשֶׁר דִּבְּרוֹ אֱלִיךִּ לֵאמֹר אָבִיךּ הִרְבָּיִד אֶת-עֻלֵנוּ וְאַהָּה הָקַל מֵעְלֵינוּ כֹּה תְּדָבֵּר "And the young men who had grown up with him said to him, 'Thus shall you speak to this people who said to you, 'Your father made our yoke heavy, but do you lighten it for us'; thus shall you say to them, 'My little finger is thicker than my father's loins'"—contains an interrupted syntactic structure of a similar nature, and the repetition of the quotation frame in this verse is probably due to the length of the relative clause and its conclusion of another speech expression within it.

Only two of Miller's examples truly constitute parenthetical units. These are Judg. 20:27–28a—וַישַׁאַלוּ בָנִי-יִשְׁרָאַל בָּה׳ וְשֶׁם אָרוֹן בַּרִית הָאֵלהִים פַנְמִים הָהֶם וּפֵינָחָס בָּן-אַלְעַזַר בָּן-אַהַרן עמד לְפַנִיו בַּיָמִים הָהֶם לָאמר הָאוֹסְף עוד לצאת למלחמה עם-בני-בנימן אחי אם-אחדל "And the people of Israel inquired of the LORD (for the ark of the covenant of God was there in those days, and Phinehas the son of Eleazar, son of Aaron, ministered before it in those days), saying, 'Shall we yet again go out to battle against our brethren the Benjaminites, or shall we cease?" and 2 Sam. 21:2-3—איקרא המלך לגבענים ויאמר אליהם והגבענים לא מַבְּנֵי יִשְׂרָאָל הַמָּה כִּי אָם-מִיחֶר הָאָמֹרי וּבְנֵי יִשְׂרָאָל נְשִׁבְּעוּ לְהֵם וַיְבַקְּשׁ שַׁאוּל לְהַכּּתָם בְּקַנֹּאחוֹ לְבָנִי-יִשְּׂרָאֵל וִיהוּדָה וַיֹּאמֵר דַּוִד אֱל-הַגָּבְענִים מַה אֱעֵשֶה לְכֵם יבְמָה אָכָבֶּר וּבְרָכוּ אֵת-נָחֵלָת ה׳ "So the king called the Gibeonites. Now the Gibeonites were not of the people of Israel, but of the remnant of the Amorites; although the people of Israel had sworn to spare them, Saul had sought to slay them in his zeal for the people of Israel and Judah. And David said to the Gibeonites, 'What shall I do for you? And how shall I make expiation, that you may bless the heritage of the LORD?"." The parenthetical units are וְשֵׁם אֲרוֹן בָּרִית הָאֱלֹהִים בַּיָמִים הָהֶם in the first example, and ופינחס בן-אַלעור בן-אהרן עמד לפניו בימים ההם והגבענים לא מבני ישראל המה כי אם-מיתר האמרי ובני ישראל נשבעו להם ישראל ויהודה in the second, and they split the quotative frame into two. Again, the repetition in the second example is probably due to the length of the parenthetical unit, but its context affirms its parenthetical nature. These two examples are discussed below in the appropriate section.

<sup>104</sup> Zewi 1999b.

# 1.5 Literary Approaches

Like discourse studies, works taking a literary approach to biblical texts, whose main interests are the art and aesthetics of the biblical narrative, have again created a young field of research, compared with biblical exegesis and philology. <sup>105</sup> This fresh field is connected to biblical linguistics through its exponents' awareness of the language means used by the authors of the biblical narrative to achieve their literary goals. The literary approach has made certain contributions to the question of parenthesis, several of which are discussed below. <sup>106</sup>

Robert Alter, a scholar of the biblical text from a literary point of view, made one such important contribution to the subject of parenthetical information. The term in his work relevant to parenthesis is 'exposition,' or 'expository information,' meaning brief, generally verbless statements (excluding forms of היה). They appear mostly at the start of biblical stories, but also occasionally interrupt the sequence and present general data unrelated to any specific time as background. Another Bible scholar who works in the frame of the literary approach, Berlin, detects a similar feature and describes its use as expressing different points of view in a narrative. On change in tense she says, "sometimes a shift to a nominal construction seems to indicate a shift in perspective, even though this construction is the normal way to form a circumstantial clause."

Sternberg, in his book *The Poetics of Biblical Narrative, Ideological Literature and the Drama of Reading*, employs the term 'exposition' for certain

<sup>&</sup>lt;sup>105</sup> On the development of this field, see, e.g., Amit 2001:10–14.

<sup>&</sup>lt;sup>106</sup> This book makes no distinction between biblical authors and biblical editors, since it is generally impossible to identify and separate original texts from editorial changes and additions. On the inability to distinguish between authors and editors of biblical narrative see Amit 1999:15–16. The term 'narrator' is also used in this book not for a character within the story but as an equivalent to the term 'author'.

<sup>107</sup> Alter 1981:80-87.

<sup>&</sup>lt;sup>108</sup> Literary expositions can be units larger than one clause or sentence. Such units will not be discussed in this book. Exposition in general fiction is explained at length in Sternberg 1978:1–34. Note also Ska's definition of 'exposition': "The 'exposition' is the presentation of *indispensable* pieces of information about the state of affairs that *precedes* the beginning of the action itself. These details are necessary for the understanding of the narration. Logically the exposition is the first moment of a narration, but concretely the action can begin in *medias res* (expression coined by Horace) and the exposition can come afterwards." (in Ska 1990:21, italics are in the original text).

<sup>&</sup>lt;sup>109</sup> Berlin 1983. On 'point of view' in Hebrew narrative see also Ska 1990:65–81.

<sup>&</sup>lt;sup>110</sup> Berlin 1983:93.

intrusions of the scribe or narrator into the biblical texts. These expositions, according to him, are the scribe/narrator's commentaries on certain points in the text, and he identifies several such types: "...general information about the world, relate to individuals or groups, consist in external accounts or..." any of character sketches, descriptions of objects, interscenic summaries, retrospects, prospects, genealogies and catalogues, identifications, value judgments, telescoped inside views, notes and stage directions in dialogue, intrusions into direct discourse, bibliographical references, and temporal or cultural bridging. Though the classification of external information reflecting the scribe/narrator's viewpoint in this book does not entirely conform with Sternberg's classification, his observations are significant. 112

Another scholar concerned with the structure of biblical narrative including exposition is Amit in her books *The Book of Judges: The Art of Editing* and *Reading Biblical Narrative*.<sup>113</sup> Though Amit does not mention any linguistic means employed for expressing exposition, like parenthesis, change in word order, use of nominal clauses, etc., in either of her books, the role of exposition at the beginning of biblical stories is well defined and summarized. The following is a quote from "Reading Biblical Narrative":

In most cases, the story opens with an exposition, which provides readers with the primary information and basic background materials to enable them to enter the world of the story, at least at the start. These materials may present the central characters, refer to the time and/or place of the action, or depict the prevailing conditions and customs in the story's setting, which introduces the readers to a world that is differently constituted from their own.<sup>114</sup>

#### She continues:

The exposition is usually made up of descriptive and static information, which can even be determined as habitual, and ends with the transition to the dynamic action in the form of some statement or deed that changes the initial situation. Consequently, the elements from which the exposition is constructed are different from those of the story itself. 115

<sup>&</sup>lt;sup>111</sup> Sternberg 1985:120–121. Also see Sternberg's definition of the function of 'exposition' in fiction in Sternberg 1978:1.

<sup>&</sup>lt;sup>112</sup> Sternberg (1985) also notes other cases in which expositional information is placed in a text, e.g., ironic exposition on pp. 193–194.

<sup>&</sup>lt;sup>113</sup> Amit 1999, 2001.

<sup>&</sup>lt;sup>114</sup> Amit 2001:33. Also see Amit 1999:121-122.

<sup>115</sup> Amit 2001:33-34.

Brichto in his book *Toward a Grammar of Biblical Poetics, Tales of the Prophets* evinces his awareness of the role of parenthesis in Biblical Hebrew literature for flashbacks and side information. He mentions this role in relation to resumptive techniques: "The availability of the nominal sentence with waw-conjunctive for flashback scenes (actually for parenthetic asides, of which one type is the flashback) points to the resumptive episode as a highly nuanced and flexible device, not limited to parenthetical of flashback functions." <sup>116</sup>

#### 1.6 Frame of Work

The purpose of this study is to identify, collect, classify, describe, and analyze several types of parenthetical means and expressions employed in Classical Biblical Hebrew, and to set out the linguistic options existing in Biblical Hebrew for inserting parenthetical information into a clause or a chain of clauses. The parenthetical means and expressions are classified in two major groups: full parenthetical clauses, which express external information within a main sentence or in a chain of clauses; and parenthetical words and phrases within a clause or a sentence. Parenthetical clauses are described first because their parenthetical nature is more apparent in Biblical Hebrew than is that of parenthetical words and phrases, most of which are on the borderline between adverbs and parenthesis units.

The basic questions confronted and discussed for each example or group of examples are these:

- 1. Does the parenthetical unit have some sort of syntactic relation to the host clause or not? The answer depends on linguistic syntactic considerations.
- 2. What is the context in which each parenthetical unit occurs? This question introduces functional-pragmatic considerations into the discussion of each type of parenthesis.
- 3. Does the parenthetical unit add information or comment on one specific sentence part or on the whole sentence? This question involves linguistic as well as pragmatic considerations.

<sup>&</sup>lt;sup>116</sup> Brichto 1992:16-17.

- 4. Does the additional information or comment expressed by the parenthetical unit include a subjective opinion of the writer or speaker, namely does it express an epistemic or deontic modal nuance or not? The issue of modality again belongs to the realm of linguistics.
- 5. Should a certain parenthesis be regarded as a natural spontaneous parenthetical unit which is part of direct speech cited in the story or the general narrative flow, or it is an editorial addition inserted into a text by a later scribe, narrator, or even a later copyist?

The use of the term 'functional' in the current work is generally aimed at "the relationship between a linguistic form and other parts of the linguistic pattern or system in which it is used," according to one definition of 'function' in Crystal's dictionary of linguistics and phonetics. <sup>117</sup> The term 'pragmatic' is used very broadly in this book. It is based on the assertion of Brown and Yule that "Any analytic approach in linguistics which involves contextual considerations, necessarily belongs to that area of language study called pragmatics," <sup>118</sup> and is not restricted to the theory of speech acts.

The gap between the linguistic and discourse approaches to Biblical Hebrew on the one hand, and literary and exegetical approaches to the Hebrew Bible on the other, has considerably widened in the 20th–21st centuries, almost to the point of detachment. Aware of this state of affairs, I have made a special effort to consider all these approaches in explaining and analyzing parenthesis and to benefit from any contribution of each of them to this topic.

The corpus under consideration includes all the books of the Pentateuch and the Early Prophets, some prose parts of Isaiah and Jeremiah, and the book of Ruth, that is, chiefly Classical Biblical Hebrew prose. Late biblical books and earlier and late poetic texts are excluded. The basic English translation employed for each example is the *RSV*, with occasional minor changes whenever they are found to be necessary highlight or clarify a certain construction or meaning.

<sup>&</sup>lt;sup>117</sup> Crystal 2003:191. Ibid. and on p. 193 see more on the connection of this definition to the 'Functional Sentence Perspective' (FSP) approach of the Prague School. On the broad scope and the complexity of the term 'function', see Crystal 2003:191–192.

<sup>&</sup>lt;sup>118</sup> Brown & Yule 1983:26, §1.3.4. For the range of definitions related to pragmatics, see Mey 1994, especially p. 3267, §2.3.3 regarding grammar and context. Note also his opening remark: "Among pragmaticians, there seems to be no agreement as to how to do pragmatics, nor as to what pragmatics is, nor how to define it, nor even as to what pragmatics is *not*" (Mey 1994:3260, §1.1).

INTRODUCTION 29

Several mostly Semitic Bible translations have been consulted for this study, and they are cited whenever they seem to contribute to a better or different significant understanding of the syntactic constructions examined. These translations were selected eclectically as a study such as this can benefit from the insights of any Bible translation. Several of these translations are known to be relatively flexible and free. Others are more literal and strict. The Semitic translations are the following: the early 10th-century Arabic translation of Saadya Gaon (882–942 C.E.) of the Pentateuch, famous in its syntactic flexibility; the Christian Arabic Bible known as al-kitāb al-mugaddas; the Geez translation of the Octateuch; the Targum Ongelos Aramaic translation of the Pentateuch; the Targum Jonathan Aramaic translation of the Former Prophets; and the Syriac translation known as the Peshitta. 119 Another non-Semitic English translation, the JPS, was consulted in addition to the RSV, because the two translations differ in style. The former is generally known for its tendency to translate the biblical passages in a relatively freer style than the latter. Again, the references in this book to these Bible translations are selective. The translation source is not given after each quote except when it sheds special light on certain examples or topics.

Let us turn now to the next stage and discuss the biblical parenthetical units themselves, parenthetical clauses first.

Examples in Geez and Syriac are presented both in original orthography and in transliteration. The Geez transliteration conventions are based on Leslau 1989. I thank Prof. Gideon Goldenberg for his assistance and advice regarding the transliterations.

#### CHAPTER TWO

#### PARENTHETICAL CLAUSES

The issues and examples discussed in this chapter include clauses which present external information within a main sentence or a chain of clauses in discourse and narrative Classical Hebrew prose. Some examples, like appeals and pleas, and expressions affirming God's existence, identity and status, appear in speech expressions inserted into the story line. Others, such as references to speakers, fixed narrative formulas, and circumstantial clauses with additional information, belong to the narrative sequence.

The examples are presented and discussed in three sections. (1) Parenthetical units related to speech, that is, external expressions referring to a speaker; appealing and pleading; affirming God's existence, identity and status or indicating external intervention; oath patterns. (2) Unique narrative formulas introduced by וְיֵהֶר דָּבְרֵי or יְבָרֵי and others indicating a proper name, a month name or related information. (3) Other external information, mostly expressed by circumstantial clauses, whereby the narrative is augmented with some background, foreshadowing, and explanation, theological and historical remarks, and other marginal matter.

As explained below some of the clause types and patterns are more easily defined as parenthetical units, while others can be interpreted as such only partially. Sometimes the interpretation of units as parenthetical can be based on both linguistic and functional-pragmatic criteria. In other cases the units examined are linguistically subordinated to, or coordinated with, other sentential elements; syntactically they resemble any other non-parenthetical sentence components, and can be interpreted as parenthetical only from a functional and pragmatic point of view.

2.1 External Expressions Referring to a Speaker, Appealing and Pleading, Affirming God's Existence, Identity, and Status or Indicating External Intervention, and Oath Patterns

All the examples in this section are related to speech. References to a speaker recall a previous speech act involving a declaration of intentions,

while appeals and pleas, and expressions affirming God's existence, identity, and status, are speech utterances. Since the two latter types appear within speech, they should be considered speech or discourse parenthetical units, while the first type should be considered part of the narrative.

#### 2.1.1 Reference to a Speaker

Most examples in this section contain references to God or other speaking characters as complete clauses introduced by בַּאָשֶׁר. The information in these clauses is usually the content of the speech, and should be considered an extension of the clause which yields extra information about the speaker. A sub-type of these examples is a pattern which contains a reference to God as the speaker, but also an affirmation that his words will be executed. It is constructed as...בָּר בּרָבר...בֹּן סִר בּרָבֹר אַשֶּׁר צִּוָּה...בֹן or as a full clause בְּרַבְּר צִּיָּהְר בִּרְבִר...בֹּן סִרְּבַר...בֹּן סִרְּבַר...בֹּן הַרְּבָר...בֹן or...בֹּר בֹּרְבָר...בֹן or...בֹּר בֹּרְבַר...בֹּר הַרְבַר...בֹּר הַרְבַר...בֹּר בֹּרְבַר...בֹּר הַרְבַר...בֹר הַרְבַר...בַר בַּרְבַר...בֹר הַרְבַר...בֹר הַרְבָר...בֹר הַרְבַר...בֹר הַרְבַר...בֹר הַרְבְּבְר...בֹר הַרְבְּבְּר...בֹר הַרְבְּבְר...בֹר הַרְבְּבְר...בֹר הַרְבְּבְר...בֹר הַרְבּר...בֹר הַרְבּר...בֹר הַרְבּר...בֹר הַרְבּר...בֹר הַרְבּר...בֹר הַרְבּר...בַר הַרְבַר...בּר הַרְבּר...בּר הַרְבָּר...בֹר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...בּר הַרְבּר...ב

These clauses, which add external information by referring to the speaker as responsible for certain content, usually appear at the end of the full sentence, but their syntactic structure is not completely independent. The clause type which conveys the external information should in fact be syntactically labeled adverbial; more specifically it can be defined as a comparative adverbial clause because of the use of the comparative pain its introduction. This clause type should be regarded as adverbial according to its grammatical pattern and parenthetical according to its context. Examples of this type are presented below, sub-divided into those which refer to God as speaker and to others as speakers.

<sup>&</sup>lt;sup>1</sup> Desmets & Roussarie 2001, though working in the frame of Head-Driven Phrase Structure Grammar which is beyond the scope of this work, treat similar clauses introduced by *comme* in French, which they name 'French reportive *comme* clauses,' as a case of parenthetical adjunction. They treat this topic from a semantic standpoint and determine that these clauses are parenthetical since they do not contribute to the referential content of the head-phrase to which they are connected.

<sup>&</sup>lt;sup>2</sup> Zevit mentions these constructions as examples of anterior past and rightly states that in such examples "the verb alludes to a prior event in the narrative and does not present the prior event itself" (Zevit 1998:67–68).

#### 2.1.1.1 God as the Speaker

In the following examples the name of God is mentioned as responsible for certain past, present, or future events and situations. These events and situations are indicated in the clause mentioning God as the speaker, and they are regarded as fulfillments of God's wish expressed by God at a certain point in time. The pattern employed for referring to God as the speaker consists of 'בַּאָשֶׁר + a verb of speech (mostly דבר, and also אמר, צוה, נשבע + the name of God.' This pattern is very common in the corpus examined, and its appearance and function in certain points in the story should probably be regarded as being a certain fixed literary formula. The examples can appear in the course of narrative, e.g., Gen. 17:23, 21:1, Judg. 6:27, 2 Sam. 24:19, 1 Kgs. 5:26, and 2 Kgs. 24:13 below, and in discourse, e.g., Gen. 24:51, Lev. 10:15, Deut. 2:14, 6:19,25, and Josh. 22:3. In 1 Kgs. 6:12 God himself in first person recalls his role as the speaker responsible for a certain earlier promise. In both types, the indication of God as the speaker refers to a previous act of speech ascribed to God.

The first example mentions God as a speaker in the course of narrative, and his speech refers to an earlier instruction made by God regarding circumcision.

Gen. 17:23—אַרְרָהָם אֶת-יִשְׁמְעֵאל בְּנוֹ וְאֵת בְּל-יִילִידֵי בֵיתוֹ וְאֵת בְּל-מְקְנַת בְּאָנְשֵׁי בִּית אָבְרָהָם וְיִּמְל אֶת-בְּשֵׁר עְרְלְתִם בְּעָעֶם הַיּוֹם הַזֶּה כַּאֲשֶׁר בַּסְפּוֹ בְּל-זְכָר בְּאַנְשֵׁי בִּית אַבְרָהָם וְיִּמְל אֶת-בְּשַׁר עְרְלְתִם בְּעָעֶם הַיּוֹם הַזֶּה כַּאֲשֶׁר "Then Abraham took Ishmael his son and all the slaves born in his house or bought with his money, every male among the men of Abraham's house, and he circumcised the flesh of their foreskins that very day, as God had said to him."

The second example makes two references to God as speaker with the two most common speech verbs in the Bible, אָמֶר, and דָּבֶּר, as the verse is parallel in structure. As evident from the examples in this section the verb אמ״ר is not commonly used in indications of God as the speaker, probably because this verb is mainly employed elsewhere in the Bible to introduce direct speech.³ Its appearance here is probably due to the scribe/narrator's wish to use different verbs in the two parts of the parallelism. Other verbs which frequently occur in this pattern and are also demonstrated in other examples below are אַנָּיִב and בַּשְׁבַע The choice of the latter reflects more obviously the obligatory nature

<sup>&</sup>lt;sup>3</sup> For the difference between אמ"ר see Goldenberg 1991:85–86.

of God's speech. Note that the *RSV* renders the verb יבֵּד in the following example not as a verb of speech but as expressing promise. This again might be due to the need to use different translations for two closely similar verbs of speech in order to create a parallelism in the translation. However, such rendering appears in other examples as well, e.g., Josh. 22:3 below.

Gen. 21:1—יַבָּאֲשֶׁר הָּבֶּר הַיַּעֲשׁ ה׳ לְשֶׁרָה כַּאֲשֶׁר הָבֶּר "The LORD visited Sarah **as he had said**, and the LORD did to Sarah **as he had promised."** 

The following verse is part of a direct speech addressed to Abraham's servant by Laban and Bethuel, both of whom acknowledge that their consent to give Rebekah is according to God's wish.

Gen. 24:51 הַנֶּה-רִבְקָה לְפָּנֶיךּ קַח וְלֵךְ וּתְהִי אִּשֶׁה לְבֶּן-אֲדֹנֶיךּ כַּאֲשֶׁר דִּבֶּר הי—Behold, Rebekah is before you, take her and go, and let her be the wife of your master's son, as the LORD has spoken."

God's command in the following example concerns the ordained laws of the offerings.

Lev. 10:15—אַנּיְרָ הְּנִיּפְה הַלְּבִים יָבִיאוּ לְּהְנִיף הְּנוּפְּה תַּוְנוּפְה עַל אִשֵּׁי הַחֲלְבִים יָבִיאוּ לְהְנִיף הְּנוּפְּה הַיִּתְּוֹלְם בַּאֲשֶׁר צִּוְּה הֹי "The thigh that is offered and the breast that is waved they shall bring with the offerings by fire of the fat, to wave for a wave offering before the LORD, and it shall be yours, and your sons' with you, as a due for ever; as the LORD has commanded."

The sense that the clause referring to the speaker has a looser connection to the inner content of the preceding clause than to its other components is sometimes expressed in other modern Bible translations such as the  $\mathcal{J}PS$  by a special punctuation mark, a hyphen, instead of the more common comma, for instance, in the verse above: "... and which are to be your due and that of your children with you for all time—as the Lord has commanded."

The following example recalls the strongest manner of promise, namely an oath.

Deut. 2:14—זְיֶלְכְנוּ מָקְבֵשׁ בַּרְנֵעַ עֵד אֲשֶׁר-עְבַרְנוּ אֶת-נַחַל זֶעֶד הַמְּלְבָנוּ מִקְבֵשׁ בַּרְנֵע עֵד אֲשֶׁר-עְבַרְנוּ אֶת-נַחַל זֶעֶד הַמְּחֲנֶה בַּאֲשֶׁר וִשְׁבַּע שְׁלְשִׁים וּשְׁמֹנֶה שְׁנָה עַד-תּם כָּל-הַדּוֹר אַנְשֵׁי הַמְּלְחָמְה מִקֶּרֶב הַמַּחְנֶה כַּאֲשֶׁר וִשְׁבַּע הַיּשְׁבִּע "And the time from our leaving Kadesh-barnea until we crossed the brook Zered was thirty-eight years, until the entire generation, that is, the men of war, had perished from the camp, as the LORD had sworn to them."

Again, the Biblical Hebrew verb typical of indirect speech, "\"\"\", occurs in the following verse and the whole pattern of indication of God as the speaker is embedded in direct speech.

Deut. 6:19—לְהַדֹף אֶת-כְּל-איְבֶיךְ מִפְּנֵיךְ כַּאֲשֶׁר דִּבֶּר הי—"By thrusting out all your enemies from before you, **as the LORD has promised**."

Another embedding within a direct speech utterance occurs in the next example, and the verb צָּוְנֵע specifically expresses a command.

Deut. 6:25—הַמְּצְוָה הַזֹּאַת לְפְנֵי הִי-נִשְּׁמֹר לְעֲשׁוֹת אֶת-בְּל-הַמְּצְוָה הַזֹּאַת לְפְנֵי הִי—"And it will be righteousness for us, if we are careful to do all this commandment before the LORD our God, **as he has commanded us**."

The example of Josh. 22:3 is embedded in direct speech as well. The verb used for the indication of God as a speaker is זָבֶּר and it is rendered by the *RSV* as expressing promise.

Josh. 22:3—וְּלֶהֵיכֶם לְּאֲחֵיכֶם כַּאֲשֶׁר דְּבֶּר לְהֶם וְעָהְה בְּנוּ וּלְכוּ לְכֶּם הַאֲשֶׁר דְבֶּר לְהֶם וְעָהְה בְּנוּ וּלְכוּ לְכֶּם הֹיִרְדֵּן הֹי אֱלְהֵיכֶם אָלֹ-אֶרֶץ אֲחָזָתְכֶם אֲשֶׁר נְתַן לְכֶם מֹשֶׁה עֶבֶד ה׳ בְּעֵבֶר הַיִּרְדֵּן "And now the LORD your God has given rest to your brethren, as he promised them; therefore turn and go to your home in the land where your possession lies, which Moses the servant of the LORD gave you on the other side of the Jordan."

In contrast to the above translation of the verb זָבֶּר as a promise, its translation in Judg. 6:27 is as an ordinary speech verb.

Judg. 6:27—נְּיָּקְעוֹן עֲשָׂרָה אֲנָשִׁים מֵעֲבְדְיו וַיִּעַשׁ כַּאֲשֶׁר דָּבֶּר אֲלָיו הי וַיְהִי So Gideon took ten men of his servants, and did as the LORD had told him; but because he was too afraid of his family and the men of the town to do it by day, he did it by night."

The next example is again an indication of a command given by God, and it is embedded in the course of the narrative. God's command in this case is transmitted through Gad whom the scribe/narrator also indicates by the phrase בַּדְבַר-נָּד "at Gad's word."

2 Sam. 24:19—יַניעל דָּוָד כִּדְבַר-גְּד כַּאֲשֶׁר צִּוָּה הי—"So David went up at Gad's word, as the LORD commanded."

Another example which mentions God's speech, and, according to the RSV rendering, God's promise, by using the verb דָּבֶּר is the following.

 $1~{
m Kgs.}~5:26$ יַבֶּין חִירְם וּבֵין חִירְם וּבַּּרּ-לוֹ וַיְהִי שְׁלֹם בַּּיִּם חִירְם וּבֵין חִירְם וּבִּית שְׁנֵיהֶם הַיֹּ נְתְּן חְרְמָה לִּשְׁלֹמה בַּאֲשֶׁר הָּבֶּרִתוּ בְּרִית שְׁנֵיהֶם "And the LORD gave Solomon wisdom, **as he promised him**; and there was peace between Hiram and Solomon; and the two of them made a treaty."

In the next verse God himself recalls, in direct speech in first person, his own earlier promise, and adds to it certain conditions.

1 Kgs. 6:12—הַבָּיִת הַזֶּה אֲשֶׁר-אַהָּה בֹנֶה אִם-תֵּלֵךְ בְּחָקֹתִי וְאֶת-מְשְׁפְּטִי תַּעֲשֶׂה בְּנֶה אָל-דְּדִּדְּ אָשֶׁר הַבַּרְחִּי אֶל-דְּדִּדְּ אֲשֶׁר הַבַּרְחִי אֶל-דְּדִּדְּ בְּיִתְי אֶת-בְּלַ-מִצְּוֹתִי לְלֶכֶת בְּהֶם וַהֲקִמֹתִי אֶת-דְּבְרִי אִתְּךְ אֲשֶׁר דִּבַּרְחִי אֶל-דְּדִּדְ "Concerning this house which you are building, if you will walk in my statutes and obey my ordinances and keep all my commandments and walk in them, then I will establish my word with you, which I spoke to David your father."

The clause אָבּיך אָבִיך אָבִיך אָבִיך אָבּיְד אָבִיך אָבּיְדּ אָבִיך אָבִיך אָבִיך אָבִיך אָבִיך אָבִיך אָבִיך אָבִיך אַבּיִר אָבִיך אַבּיִר אַבּיִר אַבּיִר אַבּיִר אַבּיִר ווער clause, and is understood as such by many translators. The \$\mathcal{JPS}\$, for instance, translates it: "...I will fulfill for you the promise **that I gave to your father David**." But note that the relative clause in the Hebrew version is subsequent to the direct object אָבֶּרִי אָבְּיִר אָבְּרִי אָבְּיִר אָבְּרִי אָבְּיִר אָבְּרִי אָבְּיִר אָבְּרִי אָבְּרִי אָבְּרִי אָבְּרִי אָבְּרִי אַבְּרִי אַבְּרִי אַבְּרִי אַבְּרִי אַבְּרִי אָבְּרִי אַבְּרִי אָבִיי אָבִיי אָבְּרִי אַבְּרִי אָבְיי אַבְּרִי אַבְּבִיי אַבְּרִי אַבְּרִי אַבְּרִי אַבְּבִיי אַבְּרִי אַבְּרִי אַבְּיִי אָבְייי אָבִּיי אָבְיי אַבּיִי אַבְּרִי אַבְּרִי אָבְיִי אָבִיי אַבְּבְיי אַבְּיִי אַבְיי אַבְייי אַבְּיִי אָבְיִי אָבְיִי אָבְייי אָבְיִי אָבְייי אָבְייי אָבְייִי אָבְייי אָבְייי אָבְייִי אָבְייִיי אָבְייִיי אָבְיִיי אָבְייי אָבְייי אָבְייי אָבְייי אָבְיייי אָבְיייי אָבְיייי אָבְייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָּבִייי אָבְיייי אָבְיייי אַבְיייי אָבְיייי אָבְיייי אָבְיייי אָּבְיייי אָּבְיייי אָּבְיייי אָּבְיייי אָבְיייי אָבְיייי אָבְייי אָבְיייי אָבְיייי אָבְיייי אָבְייייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְיייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אַבְיייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אָבְייייי אָבְיייי אָבְיייי אָבְייייי אָבְיייייי אָבְיייייי אָבְייייי אָבְייייי אָבְיייי אָבְייייי אָבְייייי אָבְיייייי

Finally, in 2 Kgs. 24:13 below the indication of God as the speaker appears again in discourse. Though the verb chosen is the ordinary indirect speech verb, דְּבֶּר, it actually refers to a dramatic episode, namely the fulfillment of an important prophecy on the fate of Jerusalem.

2 Kgs. 24:13—נְיוֹצֵא מִשֶּׁם אֶת-כְּל-אוֹצְרוֹת בֵּית הֹ וְאוֹצְרוֹת בֵּית הַמֶּלֶדְּ וַיְקצֵאִץ הְבָּל-אוֹצְרוֹת בַּית הֹי וְאוֹצְרוֹת בַּית הַמְּלֶדְ וַיְקצֵץ הִּבְּר הֹי בַּאֲשֶׁר דָּבֶּר הֹי "And he carried off all the treasures of the house of the LORD, and the treasures of the king's house, and cut in pieces all the vessels of gold in the temple of the LORD, which Solomon king of Israel had made, **as the LORD had foretold.**"

# 2.1.1.2 Inclusion of the Pattern בָּבל אָשֶׁר/ בָּאָשֶׁר צָּוָה ...בָּן

The pattern displayed in this section is an extended variant of the foregoing and it similarly conveys an affirmation of God's wish and respon-

<sup>&</sup>lt;sup>4</sup> Zewi 1999b, and especially 90-91.

The next two examples demonstrate two modifications of this pattern. The first is 'בָּכֹל אֲשֵׁר' + a verb of speech אָנָה + the name of God'.

Gen. 6:22—נַעַשׁ נֹחַ כְּכֹל אֲשֶׁר צִּוָּה אֹחוֹ אֱלֹהִים כֵּן עָשָּׂה "Noah did this; **he** did all that God commanded him."

The second example is constructed in the pattern 'בַּאֲשֶׁר + a verb of speech אָנָה + the name of God'.

Num. 36:10—בַּאֲשֶׁר צִּוָּה הי אֶת-מֹשֶׁה כֵּן עָשׂוּ בְּנוֹת צְּלְפְחָד "The daughters of Zelophehad **did as the LORD commanded Moses**."

Another plausible variant of this formula appears as part of an oath in the next example, though the content particle בָּי intervenes between the two parts of the pattern and slightly changes its structure.

In 1 Kgs. 14:11—הָמֵת לְיִרְבְעֶם בָּעִיר יֹאכְלוּ הַבְּלְבִים וְהַמֵּת בַּשְּׂדֶה יֹאכְלוּ עוֹף הֹאַכְלוּ עוֹף. "Any one belonging to Jeroboam who dies in the city the dogs shall eat; and any one who dies in the open country the birds of the air shall eat; for the LORD has spoken it," what looks like a causal clause, בִּי ה׳ דָּבֵּר, is in use instead of a clause introduced by בַּאֲשֶׁר. This clause is furthermore translated as a causal clause by the RSV, the Arabic translation al-kitāb al-muqaddas, and Targum Jonathan. However a close examination of the context shows that it is part of God's prophecy dealing with the fate of Jeroboam sent by the prophet Ahijah, and the role of the insertion of the name of God as speaker here is quite similar to that in all the other clauses above.

More examples of this pattern are Gen. 7:16, 21:4, Num. 17:30, Deut. 9:3, 10:9, 11:25, 18:2, 19:8, 26:18, 27:2, Josh. 23:4,9, 1 Kgs. 5:19, 8:20, 56, and 2 Kgs. 15:12.

#### 2.1.1.3 Examples with Other Speakers

Other characters, usually of a superior status, are also indicated as responsible for a certain wish or command by the same pattern. The first example includes an inflected verbal form of מו"ה, and it refers to a wish and command expressed by Jacob in his last words before his death.

Gen. 50:12—נַּיְטָשׁר בְּנְי לוֹ כֵּן כַּאֲשֶׁר צִּנְּם "Thus his sons did for him **as** he had commanded them."

The next three examples display inflected forms of the verb דב"ר, and refer to commands in Lev. 10:5 and Num. 32:27, and a promise in 2 Kgs. 4:17. Moses is indicated as the speaker in Lev. 10:5:

יִּיְּקְרְבוּ וַיִּשְׂאָם בְּכָתְּנֹתָם אֶל-מַחוּץ לִמְחַנֶּה כַּאֲשֶׁר דָּבֶּר מֹשֶׁה - נִיִּשְׁרָבוּ וַיִּשְׂאָם בְּכָתְּנֹתָם אֶל-מַחוּץ לִמְחַנָּה כַּאֲשֶׁר דִּבֶּר מֹשֶׁה near, and carried them in their coats out of the camp, **as Moses had said.**"

Num. 32:27 indicates Moses as the speaker once more, though he is not mentioned by his own proper name but by the title אַדני:

יַעַבְרָיּ דִּעַבְרָיּ בָּל-חֲלוּץ צָבָא לִפְנֵי ה' לַמִּלְחָמְה כַּאֲשֶׁר אֲּדֹנִי דּבֵר "But your servants will pass over, every man who is armed for war, before the LORD to battle, **as my lord orders**."

The next example, 2 Kgs. 4:17, indicates the prophet Elisha as the speaker. A shortened form of בָּאָשֶׁר, namely the relative particle אֲשָׁר without the comparative בְּאָשֶׁר , appears in this verse. Its meaning and function here, though, are equivalent to בַּאָשֶׁר

ינְתַּהַר הָאָשֶׁה וַתֵּלֶּד בֵּן לַמּוֹעֵד הַזֶּה בְּעֵת חַיְּה אֲשֶׁר-דִּבֶּר אֵלֶיהְ אֱלִישְׁע "But the woman conceived, and she bore a son about that time the following spring, **as Elisha had said to her**."

# 2.1.1.4 Examples with the Pattern בְּבֹל אֲשֶׁר/ בַּאֲשֶׁר צִּוָּה ...בּן

The extended pattern of a full sentence containing an adverbial comparative clause initiated by and a repetition of previous content by a certain inflected form, usually of the verb עש"ה, is also frequent with reference to characters other than God. As in the examples in §2.1.1.2 above, which refer to God, when this pattern appears in direct speech, e.g., Gen. 18:5 and 2 Sam. 9:11 below, it does not refer to a speaker only but generally belongs to the realm of deontic modality, since it involves a subjective affirmation.

In the following example the order of the two main parts of the pattern is inverted, and the adverbial comparative clause, באשר דברת, ap-

pears second, after בֵּן תַּעֲשֶה. This modification is not unusual in Biblical Hebrew, and it is demonstrated once more in Josh. 4:8, presented in §2.1.1.5 below. The whole pattern appears in direct speech.

Gen. 18:5—מָרֶתֶּם מְבַרְתֶּבְרְתָּ בְּבֶּכֶם אֲחַר תַּעֲבֹרוּ בִּי-עֵל-בֵּן עֲבַרְתֶּם וְסַעֲדוּ לִּבְּכֶם אַחַר תַּעֲבֹרוּ בִּי-עֵל-בֵּן עֲבַרְתֶּם וְּאַמְרוּ בַּן תַּצְשֶׁה בַּאֲשֶׁר דִּבַּרְתָּ יי...While I fetch a morsel of bread, that you may refresh yourselves, and after that you may pass on—since you have come to your servant.' So they said, 'Do as you have said.'"

In the next example the verb הָּיָה appears instead of the more common inflected verbal form of עש"ה, since it refers to a general situation more than to a specific event. The whole pattern refers to a past situation and appears in narrative, and it is part of the Joseph stories.

Gen. 41:13—וְיְהִי כַּאֲשֶׁר פָּחַר-לָנוּ כֵּן הִיָה אֹתִי הֵשִׁיב עַל-כַּנִּי וְאֹתוֹ תְלָה-"And as he interpreted to us, so it came to pass; I was restored to my office, and the baker was hanged."

An inflected form of the verb עש"ה recurs in the following example in a prefix conjugation, and the two prefix conjugation verbs in the pattern refer this time to the future. Again, the whole pattern appears in direct speech, addressed in this case to a superior, a king.

2 Sam. 9:11—וַיְּאֶמֶר צִיבְא אֶל-הַמֶּלֶךְ כְּלל אֲשֶׁר יְצַנֶּה אֲדֹנִי הַמֶּלֶךְ אֶח-עֲבְדּוֹ כֵּן "Then Ziba said to the king, 'According to all that my lord the king commands his servant, so will your servant do.' So Mephibosheth ate at David's table, like one of the king's sons."

More examples are Josh. 4:10,12, 1 Kgs. 8:53, 12:12, 2 Kgs. 7:17.

## 2.1.1.5 God and Another Speaker

The following example includes as speakers God and another, in this case, a high ranking leader, Joshua. The first occurrence is constructed according to the long pattern of an adverbial comparative clause initiated by and a reference to previous content by an inflected form of the verb מַשְּשׁוּ-בֵּן בְּנֵי-יִשְׂרָאֵל in inverted order, namely וַּיַשְשׁוּ-בֵן בְּנֵי-יִשְׂרָאֵל first and second occurrence is the simpler comparative clause, בַּאֲשֶׁר דָּבֶּר ה׳ אֶל-יְהוֹשֶׁעַ. Both patterns appear within narrative.

Josh. 4:8—קוֹם מְתּוֹדְּ בְּנִי-יִשְׂרָאֵל כַּאֲשֶׁר צִּוָּה יְהוֹשָׁעַ וַיִּשְׁאוּ שְׁתֵּי-עֶשְׂרֵה אֲבְנִים מִתּוֹדְּ Josh. 4:8—קוֹלוּ בְּנֵי-יִשְׂרָאֵל וַיְעֲבִרוּם עִמְּם אֶל-הַמְּלוֹן הַיִּרְבוֹן - כַּאֲשֶׁר דִּבֶּר הי אֶל-יְהוֹשָׁעַ לְמִסְפַּר שִׁבְטִי בְנֵי-יִשְׂרָאֵל וַיְעֲבִרוּם עִמְם אֶל-יְהוֹשָׁעַ לְמִסְפַּר שִׁבְטִי בְנֵי-יִשְׂרָאֵל וַיְעֲבִרוּם עִשְם "And the men of Israel did **as Joshua commanded**, and

took up twelve stones out of the midst of the Jordan, according to the number of the tribes of the people of Israel, **as the LORD told Joshua**; and they carried them over with them to the place where they lodged, and laid them down there."

## 2.1.1.6 Other Syntactic Structures Introducing a Speaker

Another way to refer to a speaker in a sentence is by setting him as the subject/agent of a speech verb, while the content of his speech is the object of that speech verb. In such cases the speech expression is syntactically dependent on the speech verb, and in most cases the clause containing the speaker/agent and the verb of speech is syntactically considered the main clause. Nonetheless, when a speaker and a verb of speech appear in the middle of a speech expression, and in certain cases even when they follow it, they are deemed parenthetical units in many syntactic treatments.<sup>5</sup> Such a duality and ambiguity in placement and analysis regarding speech verbs also exists in scholarly works concerning modal verbs expressing attitude and opinion, e.g., believe, think, etc. In fact, such modal verbs can be syntactically followed by a content clause introduced by 'that,' although they can also be used parenthetically without 'that.' The latter constructions rarely occur in Biblical Hebrew, and a few of them are discussed later.

Miller, in her study of representation of speech in Biblical Hebrew narrative, says that she finds in her corpus only two examples of a speaker and a speech verb in medial position. One is in prose, more specifically in prophetic language, since it concludes a prophecy introduced as דָּבַר-ה׳ and transmitted by Isaiah to Hezekiah:

2 Kgs. 20:16–18—יְשִׁעְיְהוּ אֶל-חִזְקְיָהוּ שְׁמֵע דְּבַר-ה׳. הַנֵּה יְמִים בְּאִים הָיָּה אֶּלְּר חִזְּקְיְהוּ שְׁמֵע דְּבַר-ה׳. הַנֵּה יְמִים הַיָּה בְּבֶּלְה לֹא-יִוְתֵר דְּבָּר וְנְשֶׁא כְּּל-אֲשֶׁר בְּבִיתֶּךְ וַאֲשֶׁר אָצְרוּ אֲבֶּתיִיךְ עַד-הַיּוֹם הַיָּה בְּבֶּלְה לֹא-יִוְתֵר דְּבָּר לֹא-יִוְתֵר דְּבָּר ה׳. וּמִבְּנְיִךְ אֲשֶׁר יִצְאוּ מִמְּךְ אֲשֶׁר תִּוֹלִיד יִקְח יְקְחוּ וְהִיוּ סְרִיסִים בְּהֵיכַל מֶלֶדְ "Then Isaiah said to Hezekiah, 'Hear the word of the LORD: Behold, the days are coming, when all that is in your house, and that which your fathers have stored up till this day, shall be carried to Babylon; nothing shall be left, says the LORD. And some of your own sons, who are born to you, shall be taken away; and they shall be eunuchs in the palace of the king of Babylon.'"

<sup>&</sup>lt;sup>5</sup> Lyons 1977:738.

<sup>&</sup>lt;sup>6</sup> On this duality in English, see Reinhart 1983:172–175.

<sup>&</sup>lt;sup>7</sup> Miller 1996:213–215, §4.4.1.

Miller's other example is in poetry, in the Song of Deborah, and its language in general reflects ancient poetic language.

Judg. 5:23—יֹם אָמֶר מְלְאַךְּ הֹי אָרוֹר יִשְׁבֶּיהְ כִּי לֹא-בָאוּ לְעֶזְרֵת הֹי בַּגְּבּוֹרִים "Curse Meroz, **says the angel of the LORD**, curse bitterly its inhabitants, because they came not to the help of the LORD, to the help of the LORD against the mighty."

As to final position, Miller states that such cases are also very rare. Especially important for this study are those, cited by Miller, in which the speaker and the speech verb are mentioned before the speech expression and are repeated in post-position: repetition of information about a certain speech mentioned earlier in the text is proof of its parenthetical nature.<sup>8</sup> Here is an example:

Exod. 19:3–6—מָלָה פֶּלְה פְּלָה מְּלָה מְּלְה מְּלָה מְּלְה מְּלְּה מְּלָב וְחַבֵּּיד לִבְנֵי יִשְׂרָאֵל. אַתְּם רְאִיתָם אֲשֶׁר עָשִׁיתִי לְמִצְּרְיִם וְאָבְא אֶתְכֶם אֵלְי. וְשְׁהְרֶם אֶּרְבָּ שְּׁמְעָ הִּשְׁמְעוּ בְּקְלִי וּשְׁמִרְתָּם אֶּתְּכֶם עַלּ-בַּנְפִי וְשָׁרִים וְאָבָא אֶתְכֶם אֵלְי. וְעַתְּה אִם-שְׁמוֹעַ הִּשְׁמְעוּ בְּקְלִי וּשְׁמִרְתָּם אֶּתְּכֶם עַלּ-בַּנְפִי וְשָׁרִים וְאָבָא אֶתְכֶם אֵלָי. חְבְּרִים וְאָבֶץ. תִּהְיוּ-לִי מָמְלֶכֶת בֹּהְנִים אֶשֶׁר הְּדָבֵּר אֶל-בְּנֵי יִשְׂרָאֵל And Moses went up to God, and the LORD called to him out of the mountain, saying, "Thus you shall say to the house of Jacob, and tell the people of Israel: You have seen what I did to the Egyptians, and how I bore you on eagles' wings and brought you to myself. Now therefore, if you will obey my voice and keep my covenant, you shall be my own possession among all peoples; for all the earth is mine, and you shall be to me a kingdom of priests and a holy nation. These are the words which you shall speak to the children of Israel.'"

Brockelmann gives more such examples regarding parenthesis in Biblical Hebrew in his extensive comparative account of the grammar of the Semitic languages.<sup>9</sup> Two examples are from prose. The first is Genesis 3:3, which displays an utterance attributed to God.

Gen. 3:3—וּמְפָּרִי הָעֵץ אֲשֶׁר בְּתוֹךְ-הִגָּן אָמֵר אֱלֹהִים לֹא תֹאְכלוּ מִמֶּנוּ וְלֹא תִגְעוּ בְּּן-הְמָתוּן **But God said**, 'You shall not eat of the fruit of the tree which is in the midst of the garden, neither shall you touch it, lest you die '"

The second example is in Exod. 5:16, which relates a complaint submitted by the foremen of the Israelites to Pharaoh. The phrase אַמְרִים לְנוּ refers to Pharaoh's taskmasters as those uttering the command aimed at the Israelites: "Make bricks!"

<sup>&</sup>lt;sup>8</sup> Miller 1996:215–217, §4.4.1.

<sup>&</sup>lt;sup>9</sup> Brockelmann 1913:671, §463b.

42 Chapter two

Exod. 5:16— הֶּבֶן אַין לְעַבְדֶיךּ וּלְבֵנִים אֹמְרִים לָנוּ עֲשׁוּ (No straw is given to your servants, **yet they say to us**, 'Make bricks!'"

The fragile nature of the word order in the examples above is further revealed in certain Bible translations. The RSV translation, for example, changes the place of the reference to the speaker in Gen. 3:3 and Exod. 5:16 so that it introduces the speech instead of interrupting it. However, Saadya Gaon's Arabic translation and al-kitāb al-muqaddas both are hesitant about the word order in these verses. Saadya Gaon keeps the original word order in Gen. 3:3—המו לכן מן ת׳מר אלשג׳רה אלת׳ פי וסטה קאל אללה לא תאכלא מנהא ... לכן מן ת׳מר אלשג׳רה אלת׳ פי וסטה לוד לע אלינא ויקולון לנא אצ׳רבו לבנא חבוא מו But al-kitāb al-muqaddas transforms the syntactic structure of the first verse, Gen. 3:3, into a complete extraposition, and the reference to the speaker is set at the beginning of the clause that immediately follows the extraposed part, namely وَأُمَّا الشَّجَرَةُ النِّتي فِي وَسَطَ الْجَنَّةُ فَقَالَ اللهُ لاَ تَأْكُلُا مَنْهُ وَلاَ تَمَسَّاهُ لِثَكُلاً تُمُونَاهُ بِهُ وَسَطَ الْجَنَّةُ فَقَالَ اللهُ لاَ تَأْكُلاً مَنْهُ وَلاَ تَمَسَّاهُ لِثَكَلاً تُمُونَاهُ (Exod. 5:16 maintains its word order in this translation.

The reference to the speaker is preserved in the middle of Gen. 3:3 in the Geez Bible translation as well, although the verb of speech is repeated at its end. The status of the independent speech is also changed in the Geez Bible translation since the subordinate content particle kama twice precedes the speech: 11 Ph. 12 APPG 60 HUN THE LOAD APPG 60 HUN THE LOAD APPG 60 HUN THE LOAD APPG 60 APPG 60 HUN THE LOAD APPG 60 APPG 60

The rest of Brockelmann's examples are from Prophetic books, like the following three. <sup>12</sup> In the first example, Isa. 1:18, the parenthetical clause 'אַמָּר ה' appears in middle position.

<sup>&</sup>lt;sup>10</sup> The translations of Saadya Gaon are cited in this work according to Derenbourg Edition unless otherwise stated. Ms. St. Petersburg and Ḥasīd edition are also consulted and are mentioned only where they present dissimilar meaningful versions.

<sup>11</sup> A third occurrence of the content particle *kama* appears in the translation. This time it is not subordinate to the verb of speech but to the verb which precedes the particle *kama*, namely *'i-nags(!)os(!)o*, and it renders the Hebrew particle [3].

<sup>&</sup>lt;sup>12</sup> For more such examples in prophetic language see Brockelmann 1913:671, §463b.

לְכוּ-נָא וְנִנְכְחָה הֹאמֵר הֹי אִם-יִהְיוּ חֲטָאֵיכֶם כַּשְׁנִים כַּשֶׁלֶג יַלְבִּינוּ אָם-יַאְדִּימוּ כַתּוֹלְע
"Come now, let us reason together, **says the LORD**: though your sins are like scarlet, they shall be as white as snow; though they are red like crimson, they shall become like wool."

In the second example, Isa. 48:22, the clause אָמֶר ה' appears in middle position again.

יים אָמֶר הי לְּרְשְׁעִים "There is no peace,' **says the LORD**, 'for the wicked.'"

In the third example the clause 'בֹה אָמַר ה' can be considered in initial position since only the coordinate particle לָבֵן precedes it.

Jer.~11:11 לְבֵן כֹּה אָמַר הי הְנְגִי מֵבִיא אֲלֵיהֶם רְעָה אֲשֶׁר לֹא-יוּכְלוּ לְצֵאת מִמֶּנְה הי הַנְגִי מֵבִיא אֲלֵיהֶם רְעָה אֲשֶׁר לֹא-יוּכְלוּ לִּא אָשְׁמַע אֲלֵיהֶם "Therefore, **thus says the LORD**, Behold, I am bringing evil upon them which they cannot escape; though they cry to me, I will not listen to them."

In all these last three examples a certain form of the direct speech verb אמ"ר followed by the name of God as the speaker forms a definite parenthesis.

## 2.1.2 Appeal and Plea

Appeal and plea expressions generally belong to the sphere of deontic modality, which reflects a subjective standpoint, and they are not necessarily syntactically parenthetical. The first group of examples includes phrases of appeal and plea that syntactically are full clauses, such as phrases of appeal and plea that syntactically are full clauses, such as and the like. These clauses can be analyzed in more than one respect. As for the syntactic status of the idiom אָם-נָא מְּלֶאתִי חֵן בְּעֵינֶיךְּ , it is a protasis of a conditional sentence, hence dependent on the main sentence, but this idiom is actually frozen and its content is parenthetical to the main content presented in the main sentence, which is the appeal or plea itself. Other expressions of appeal and plea that are not full clauses but words and phrases are discussed later in the appropriate section.

# 2.1.2.1 The Idiom אָם-נָא מָצָאתִי חֵן בְּעֵינֶיךְ

The following are examples containing the appeal and plea formula ... אָם-נָא מְנָאִתִי חֵן בְּעֵינִי., which introduces a request and fulfill other roles. Many ancient Bible translations of this formula are usually fixed and literal, and do not show its parenthetical nature well enough. A more accurate and adequate translation could have been simply 'please',

as in the  $\mathcal{J}PS$  translation in 1 Sam. 20:29; or slightly longer versions, such as the  $\mathcal{J}PS$  translation of Gen. 18:3 below: "If it please you…" and the  $\mathcal{J}PS$  translation of the next example, Gen. 33:10: "I pray you…." As we will see below, the  $\mathcal{J}PS$ , as may be expected from modern Bible translations, also demonstrates elsewhere a greater flexibility in its translations of this formula. Even the more literal RSV translation reveals some flexibility in its rendering of this frozen formula.

As to modal nuances, deontic modality and subjectivity are revealed in the content of this expression and in the fact that almost all appearances of this formula in the examples below, apart from 1 Sam. 1:18, which is third person, are in first person singular or plural. This formula regularly expresses a plea or thanks, but occasionally it stands simply in its literal meaning, as in 2 Sam. 15:25 below.

The *RSV* translations for the following examples are, as stated, somewhat flexible. Its rendering of אָם-נָא מְנָאָתִי חֵן בְּטֵינֶיךְ in both the next examples, Gen. 18:3 and Gen. 33:10, is "if I have found favor in your sight," but the translation in the third example, Gen. 47:25, is different: "may it please my lord."

In the first example the clause אָם-נָא מְצָאתִי חֵן בְּטֵינֶיךְ is in first person singular. The pattern is part of an utterance containing an appeal and made by Abraham to three visitors whom he regards as three messengers of God. This belief, along with the statement of a preceding verse, Gen. 18:1—נֵירָא אֵלְיו הֹי בְּאֵלֹנֵי מִמְרֵא —"And the LORD appeared to him by the oaks of Mamre," explains why Abraham addresses the three men with the phrase אַדֹנִי in singular, and employs a singular possessive pronoun in the word בְּטֵינֵיךְּ

Gen. 18:3—וַיֹּאמֶר אֲדֹנֶי אָם-נָא מְצָאָחִי חֵן בְּעֵינֶיךּ אַל-נָא תַעֲבֹר מֵעַל עַבְדֶּךְ "And he said, 'My lord, **if I have found favor in your sight**, do not pass by your servant.'"

In the second clause the phrase אָם-נָא מְצָאִתִי הֵן בְּעֵינֶיךּ is stated again in first person singular. It is spoken this time by Jacob and constitutes an especially polite appeal aimed at his brother, Esau.

Gen. 33:10ייַאֶקר מְּלְחָתְּ מְּדְחָתִּ מְדְּחָתִּ מְנְּחָתִּ מְנְּחָתִּ מְנְּחָתִּ מְנְּחָבּ אַל-נְא אִם-נָא מְצָאַתִי חַן בְּעֵינִיךּ וְלְמַחְתָּ מִנְחָתִי מְיָדִי מַלְּבְּנִי מַלְבְּנֵי "Jacob said, 'No, I pray you, **if I have found favor in your sight**, then accept my present from my hand; for truly to see your face is like seeing the face of God, with such favor have you received me.'"

In the third example the clause נְמְצָא-חֵן בְּטֵינֵי אֲדֹנִי instead of מָּצָאּחָוּ, employing a prefix conjugation verb מָּצָאּחִי instead of מָּצָאּחִי. The clause מָּצָאּ-חֵן בְּעֵינֵי אֲדֹנִי אֲדֹנִי אָדֹנִי אָדֹנִי אָדֹנִי אָדֹנִי אָדֹנִי אָדֹנִי

to Joseph, and it expresses either a plea or thanks. As expressed by the English translation of Gen. 47:25 below the formula under discussion is interpreted by the *RSV* as a plea. The *JPS* understands it as a thanking formula: "We are grateful to my lord." This seems more plausible in this case, for according to the context the Egyptians thank Joseph for saving them from famine. It also conforms with other examples presented later on, in which this very formula conveys thanks.

Gen. 47:25—וּיֹאמְרוּ הֶּחֶיִתְנוּ נִמְצָא-חֵן בְּעֵינֵי אֲדֹנִי וְהִיינוּ עֲבָדִים לְפַרְעֹה "And they said, 'You have saved our lives; **may it please my lord**, we will be slaves to Pharaoh.'"

More examples of the plea formula, in the *RSV* translation usually beginning "If we have found favor..." and continuing "in your sight/ with thee/ in your eyes/ in the eyes of the Lord," are as follows.

The first, Num. 32:5, is in first person plural. It is said by the sons of Gad and the sons of Reuben and is directed mostly at Moses, and also at Eleazar the priest and the leaders of the congregation, as stated in a preceding verse, Num. 32:2. The plea formula אָם-מָצָאנוּ חֵוְ בְּעֵינֶיךְ in this case indeed expresses a plea.

Num. 32:5—הָּמָבְרֶיךְּ לְּאֲחָזָה מְּלֵבְרֶיךְּ לַאֲחָזָה 32:5 מַיֹּאמְת לְעֲבֶרֶיךְּ לַאֲחָזָה יְתַן בְּעֵינִיךְ יַתְּן אֶת-הָיִרְבֵּן "And they said, '**If we have found favor in your sight**, let this land be given to your servants for a possession; do not take us across the Jordan.'"

The next example, אָם-נָא מְצָאתִי חֵן בְּעֵינֶיך, is in first person singular, and it too expresses a plea, made by Gideon to God.

Judg. 6:17—עָמָר אָלָיו אָם-נָא מְצָאַתִי חֵן בְּעֵינֶיף וְעָשִיתְ לִּי אוֹת שָׁאַתְּה מְדַבֵּר העִמִי "And he said to him, '**If now I have found favor with thee**, then show me a sign that it is thou who speakest with me.'"

1 Sam. 20:29 below contains אָם-מְצָאתִי חֵן בְּטֵינֶיךְ in first person singular once more. It again expresses a plea, and it is cited in an utterance by Jonathan in answer to Saul his father's inquiry regarding the whereabouts of David. The citation itself, according to Jonathan, includes a previous appeal made by David to Jonathan.

1 Sam. 20:29 נִיֹּאמֶר שַׁלְּחֵנִי נָא כִּי זֶבַח מִשְׁפְּחְה לְנוּ בְּעִיר וְהוּא צִוְּה-לִי אָחִי-20:29 וַּמְשְׁלְחָן רַיִּאמֶר שַׁלְחָן בּעִינִיךּ אָמְלְטָה נָּא וְאֶרְאֶה אֶת-אֶחִי עַל-כֵּן לֹא-בָא אֶל-שֵּלְחָן יְעַתָּה אָם-מָצָאּתִי חֵן בְּעֵינִיךּ אָמְלְטָה נָּא וְאֶרְאֶה אֶת-אֶחִי עַל-כֵּן לֹא-בָא אֶל-שֵּלְחִן "he said, 'Let me go; for our family holds a sacrifice in the city, and my brother has commanded me to be there. So now, **if I have found favor in your eyes**, let me get away, and see my brothers.' For this reason he has not come to the king's table."

Another example of this pattern follows. This time it is with a prefix conjugation verb, אֶּמְצָא also demonstrated in the form נְמְצָא in Gen. 47:25 above, instead of the more common suffix conjugation verb מְּמָצִא חֵן בְּעֵינֵי ה', and again in first person singular. The formula אָם-אֶּמְצָא חֵן בְּעֵינֵי ה' in this example is spoken by King David to the priest Zadok. Contrary to all other examples presented here, אָּמְצָא חֵן בְּעֵינֵי ה' is probably neither a plea nor thanks but conveys more or less the actual sense of the phrase: "If God wishes...."

2 Sam. 15:25—אָבֶּר הָשֶׁר הָשֶׁר הְשֶׁר הְשֶׁר הְשֶׁר הְשֶׁר הְשֶּׁר הָשֶּׁר הָשֶּׁר הְשֶּׁר הְשֶׁר הְשֶׁר הְשֶׁר הְשֶׁר הְשִּׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִּׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִּׁר הְשִׁר הְשִׁר הְשִּׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הְשִׁר הוּשׁר הוּשׁר הוּשְׁר הְשִׁר הְשְׁר הְשִׁר הְשְׁר הְשְר הְשְׁר הְישְׁר הְשְׁב הְשְׁר הְשְׁב הְשְׁר הְשְׁב הְשְׁר הְשְיב הְשְׁר הְשְׁר הְשְׁר הְשְׁר הְשְׁב הְשְׁב הְשְׁבְּבְּיְבְיוֹי הְשְׁבְּבְיב הְשְׁבְּבְּבְּי הְשְׁבְּבְּיְבְי הְשְׁבְּבְּיְבְּי

Also see 1 Sam. 25:8, 27:5, and many more.

The same idiom appears to be a thanking formula in the three ensuing examples, 1 Sam. 1:18, 2 Sam. 16:4, and Ruth 2:13, though, as suggested above, the *RSV* translations of these examples are often frozen, literal, and do not reflect it as well as they do the foregoing meaning. In the first example the thanking formula follows Eli's promise that Hannah will see her wishes fulfilled. A non-literal translation of the thanking formula in this verse should be just 'thanks', but it is translated literally by an expression analogous to those employed in the previous examples: "Let your maidservant find favor in your eyes." In the second example Ziba thanks David, and here too the *RSV* provides a literal translation, "let me ever find favor in your sight," instead of just 'thanks.' In the third example Ruth thanks Boaz, and this is the only case of a non-literal translation by the *RSV*: "You are most gracious to me."

In the first example the verb מְּמָצָא is a prefix conjugation verb in third person singular.

ו Sam. 1:18—וְתְּאֶבֶל הְּאִשֶּׁה לְדַרְכְּה וַתּאֹכֵל הַמְּאָשָׁה הַוֹּלְדְּ הָאִשָּׁה בְּלֹיךְבְּה וַתִּאבֶל הַּמְּבְלּה חֵוּ בְּעֵינִיף וַתֵּלֶּךְ הָאִשָּׁה לְּדִרְכְּה וַתֹּאבֵל "And she said, '**Let your maidservant find favor in your eyes**.' Then the woman went her way and ate, and her countenance was no longer sad."

The next example consists of the verb אֶּמְצָא, a prefix conjugation verb in first person singular.

2 Sam. 16:4—אָמֶר הַמֶּלֶדְ לְצִבְא הָנֵה לְדְּ כֹּל אֲשֶׁר לִמְפִי-בֹּשֶׁת וַיֹּאמֶר צִיבָא הְנֵה לְדְּ כֹּל אֲשֶׁר לִמְפִי-בֹשֶׁת וַיִּאמֶר אָםן בְּצִינָיךְ אֲדֹנִי הַמֶּלֶדְ "Then the king said to Ziba, 'Behold, all that belonged to Mephibosheth is now yours.' And Ziba

said, 'I do obeisance; **let me ever find favor in your sight**, my lord the king.'"

The last example displays the prefix conjugation verb אֶּמְצָא in first person singular.

Ruth 2:13—קּאָמָר אָמְצָא-חַן בּעִינֶיף אֲדֹנִי בִּי נִחִמְתָּנִי וְכִי דַבַּרְתְּ עַל-לֵב שִׁפְּחְתֶּךְ בְּעִינֶיף אֲדֹנִי בִּי נַחִמְתְּנִי וְכִי דַבַּרְתְּ עַל-לֵב שִׁפְּחְתֶּךְ הַּאַחָת שִּׁפְּחֹתֶיף "Then she said, '**You are most gracious to me**, my lord, for you have comforted me and spoken kindly to your maidservant, though I am not one of your maidservants.'"

## 2.1.2.2 Other Appeal and Plea Expressions

Other appeal and plea expressions which serve in Biblical Hebrew involve the verbs הואיל, the latter only in the prefix conjugation and in a negative construction. Syntactically, these expressions are verbs of main clauses so they cannot be defined dispensable, as parenthetical units are expected to be. Nonetheless, once they are analyzed as frozen idioms and their meaning is carefully considered, it is clear that these expressions are actually external to the content of the appeal or plea itself, and function only as introductory formulas. This is the reason for their inclusion in the present discussion. Moreover, these patterns often appear in combination with the particle אָב, whose meaning is discussed in §3.1.5.2 below.

The first example with הואיל, in Gen. 18:27, includes הוֹאַלְתִּי as part of an appeal and plea formula which contains the self-diminishing clause "I who am but dust and ashes." The appeal is made by Abraham to God as part of a long dialogue regarding the fate of Sodom, stretching from verse 23 to verse 32 of Gen. 18.

Gen. 18:27—וַיַען אַבְרְהָם נִיֹאמֵר הָנֵּה-נָא הוֹאַלְתִּי לְרַבֵּר אֶל-אֲדֹנְי וְאָנֹכִי עָפָר וְאֵפֶּר —"Abraham answered, 'Behold, I have taken upon myself to speak to the Lord, I who am but dust and ashes.'"

In the next example, Judg. 19:6, the phrase הוֹאֶל-נָא should certainly be regarded as a plea, entirely analogous to the plea word 'please,' since it is found in direct speech which expresses pleading. A plea is also revealed in the use of the combination יַּרָפָער-בּוֹי "...urged him," in verse 7 following. A similar meaning is reflected in the RSV translation here, as well as other Bible translations.

Judg. 19:6—נְיִּשְׁבוּ וַיֹּאֶבֶלוּ שְׁנֵיהֶם יַחְדָּו וַיִּשְׁתּוּ וַיֹּאמֶר אֲבִי הַנַּעֲרָה אֶל-הְאִישׁ הוֹאֶל
"So the two men sat and ate and drank together; and the girl's father said to the man, 'Be pleased to spend the night, and let your heart be merry.'"

The last example of this type, 2 Kgs. 6:3 immediately below, consists again of אַל נָא as part of a request. The request is made by a group of people acknowledged as the sons of the prophets to the prophet Elisha.

2 Kgs. 6:3—נְיֹאמֶר הָאֶחָד הּוֹאֶל נָא וְלֵךְ אֶת-עֲבֶדֶיךּ וַיֹּאמֶר אֲנִי אֵלֶף "Then one of them said, '**Be pleased** to go with your servants.' And he answered, 'I will go.'"

As stated above, pleas produced with ייחר are always negative. All four examples given here are rendered as such in the *RSV* translation. Although the full expression includes the negative particle אָל, the prefix conjugation verb יַחַר, and the noun אָא, it is often shortened, omitting the noun אָא.

The first example, Gen. 18:30 includes the particle אָל after the negative particle אָל as part of the pattern, but as we will see below, in Gen. 31:35, Gen. 44:18, and Judg. 6:39 אָל does not always have to be part of this pattern. The noun אָל is also missing in this example. This verse, like Gen. 18:27 presented above, is part of the dialogue between Abraham and God regarding the fate of Sodom in verses 23–32 of Gen. 18.

Gen. 18:30—נּיֹאמֶר אַל-נָא יַחַר לַארֹנָי וַאֲדַבֵּרָה אוּלִי יִמְצְאוֹן שָׁם שְׁלֹשִׁים וַיֹּאמֶר אָל-נָא יַחַר לַארֹנָי וַאֲדַבֵּרָה אוּלִי יִמְצְאוֹן שָׁם שְׁלֹשִׁים וּיֹאמֶר אָם שְׁלֹשִׁים "Then he said, '**Oh let not the Lord be angry**, and I will speak. Suppose thirty are found there.' He answered, 'I will not do it, if I find thirty there.'"

The noun ካል is missing in the next example as well. The appeal is made by Rachel to her father, Laban.

Gen. 31:35— וַתּאמֶר אֶל-אָבִיהְ אַּל-יִחַר בְּעֵינֵי אֲדֹנִי כִּי לוֹא אוֹבַל לְקוּם מְפְּנֶיף אַל-יִחַר בְּעֵינִי אֲדֹנִי כִּי לוֹא אוּבַל לְקוּם מְפְּנֶיף אַת-הַתְּרְפִים "And she said to her father, "**Let not my lord be angry** that I cannot rise before you, for the way of women is upon me." So he searched, but did not find the household gods."

The full pattern, which contains the noun 为惑, is as follows. It is spoken this time by Judah to Joseph, whom Judah at this point in the story regards as a very high-ranking official—in Judah's own words "... like Pharaoh himself."

Gen. 44:18—יַנְשׁ אֵלִיו יְהוּדָה וַיֹּאמֶר בִּי אֲדֹנִי יִדְבֶּר-נָא עַבְדְּךְ דְבֶר בְּאָוְנֵי אֲדֹנִי 'דְבָּר בְּאָוְנֵי אֲדֹנִי 'Then Judah went up to him and said, 'O my lord, let your servant, I pray you, speak a word in my lord's ears, and let not your anger burn against your servant; for you are like Pharaoh himself.'"

The last example also exhibits a full pattern with אָדּ. It is employed by Gideon towards God. The request in this verse follows two previous similar requests by Gideon in verses 17 and 37 of Judges. 6. Judg. 6:17, presented in §2.1.2.1 above, has the plea formula אָם-נָא מְצָאתִי הַ.

Judg. 6:39—אָנֶּסְהּ הַּפְּעַם אֲנֹסֶהּ הִיּחָר אַפְּּךְ בִּי וַאֲדַבְּרָה אַדְּ הַפְּעַם אֲנָסֶהּ הּיִּטְּלֹּהִים אַל-יִחַר אַפְּּדְ בִּי וְאַדָבְּרָה אַדְּ הַפְּעַם אֲנָסֶהּ "Then Gideon said to God, 'Let not thy anger burn against me, let me speak but this once; pray, let me make trial only this once with the fleece; pray, let it be dry only on the fleece, and on all the ground let there be dew.'"

Other examples are: Gen. 18:31,32, and many more.

#### 2.1.3 Affirmation of God's Existence, Identity, and Status

The examples in this section are clauses affirming of God's existence, identity, and status, often by God himself, and also by others, and all are in direct speech. Most examples are syntactically independent of the sentence in which they appear. They are in initial or final position, preceding or following the speech's main content, and thus display relatively free word order. Their pronouncements are also detached from the main speech in their content as well, so they should be considered parenthetical both syntactically and functionally-pragmatically.

In the following examples God himself declares his existence, identity or status within his own revelations and speech acts. The parenthetical remark expressed by God as part of his command to Abram in Gen. 17:1, for instance, is probably meant to declare and ensure God's identity.

Gen. 17:1—יָאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבֶרְם וַיִּאָבְרָם וַיִּאָבְרָם וַיִּאָבְרָם וַיִּאָבְרָם וַיִּאָבְרִם וַיִּאָבְרִם וַיִּאָבְרִם וַיִּאָבְרִם וַיִּאָבְרִם וַיִּאָבְים וְיִּאָבְרִם בְּיִּאבְרִם וַיִּאבְים וּיִּאבְרִם בִּיִּאבְרִם וַיִּאבִר "When Abram was ninety-nine years old the LORD appeared to Abram, and said to him, '**I am God Almighty**; walk before me, and be blameless.'"

In the next example God himself states his title as the introduction to his promise to Jacob in a way reminiscent of the introduction to oath formulas by swearing in the name of God.

Gen. 35:11—קָבֶה גּוֹים יִהְיֶה מְמֶּדְ בְּּרֵה וּרְבֵה גּוֹי וּקְהֵל גּוֹים יִהְיֶה מְמֶּדְ יַצֵּאוּ וּיִאמָר לוֹ אֱלֹהִים מֲחֲלָצִיךְ יַצֵּאוּ "And God said to him, '**I am God Almighty**: be fruitful and multiply; a nation and a company of nations shall come from you, and kings shall spring from you.'"

Again, another promise by God to Jacob is prefaced by his announcing his own identity.

Gen. 46:3—לגוֹי גְּדוֹל בְּילְגוֹי אָבִיךְ אַל-תִּירָא מֵרְדָה מִעְרֵיְמָה כִּי-לְגוֹי גְּדוֹל יִּאָל שֵׁרְ שָׁם "Then he said, 'I am God, the God of your father; do not be afraid to go down to Egypt; for I will there make of you a great nation.'"

In the next example God states his name at the end of the content of his promise to Moses and Aaron.

Exod. 12:12—מְצְרֵיִם בְּלֵּיְלָה הַזֶּה וְהְבֵּיתִי כְל-בְּכוֹר בְּאֶרֶץ מְצְרֵיִם בְּלַיְלָה הַזֶּה וְהְבֵּיתִי כְל-בְּכוֹר בְּאֶרֶץ מִצְרֵיִם אָּעֶשֶה שְׁפָטִים אָּנִי הּי "For I will pass through the land of Egypt that night, and I will smite all the first-born in the land of Egypt, both man and beast; and on all the gods of Egypt I will execute judgments: **I am the LORD**."

Another example of this is the following.

Lev. 18:4—אֶת-מִשְׁפְּטֵי תַּעֲשוֹּ וְאֶת-חֻקֹּתִי תִּשְׁמְרוּ לְּלֶלֶכֶת בְּהֶם אֲנִי ה׳ אֱלֹהֵיכֶם "You shall do my ordinances and keep my statutes and walk in them. **I** am the LORD your God."

The sense that the clause אֲנִי ה' אֱלֹהיכֶּם here is not connected to the preceding content, and that it is somehow misplaced or parenthetical, is reinforced by an addition to the clause announcing God's name in all three versions of Saadya Gaon's Arabic translation. This addition, in bold letters, is: אנא אלה רבכם אניאויכם כיירא "I, the LORD your God, will reward you". It imparts further meaning to the clause, similar to the explanation given in the famous medieval exegesis of Rashi (Rabbi Shlomoh ben Yitzchak, 1040–1105 CE) of the following verse, Lev. 18:5. Rashi writes: אני ה' נאמן לשלם שכר "I am Hashem, who is faithful to pay reward." "

Lev. 18:5—וְשְׁבֶּחָ וְחֵי בְּהֶם הָאָדָם וְחֵי בְּהֶם הָאָדָם וְחֵי בְּהֶם הִי וְאָת-חֻקֹּתִי וְאֶת-חִקֹתִי וְאֶת-חִיקֹתִי וְאָנִי הִי יִעֲשֶׂה אֹתִם הָאָדָם וְחֵי בְּהֶם "You shall therefore keep my statutes and my ordinances, by doing which a man shall live: **I am the LORD**."

In the following example, Deut. 5:6, the whole verse is a reference to God's name, identity and status, and it serves as an introduction to the Decalogue.

 $<sup>^{13}\,</sup>$  Herczeg 1995:216. Also see a reference to this exeges is in Derenbourg Edition:170, note 7.

Deut.~5:6—אָנֹכִי הי אֱלֹהֶיף אֲשֶׁר הּוֹצֵאּתִיף מֵאָרָץ מְצְרִים מְבֵּית עֲבְרִים ה' I am the LORD your God, who brought you out of the land of Egypt, out of the house of bondage."

In the next two examples, Lev. 11:44 and Lev. 11:45, the clause which affirms God's status takes the form of a causal clause and follows the causal particle בּי . In these two cases the clauses are thus syntactically dependent, and can be considered parenthetical units only functionally-pragmatically.

Lev. 11:44—אָני ה' אָלהֵיכֶם וְהִתְקַדִּשְׁתֶּם וְהְיִיתֶם קְדֹשִׁים כִּי קְדוֹשׁ אָנִי וְלֹא "For I am the LORD your God; consecrate yourselves therefore, and be holy, for I am holy. You shall not defile yourselves with any swarming thing that crawls upon the earth."

Lev. 11:45— פֵּי אֲנִי הֹי הַמַּעֲלֶה אֶּחְכֶם מֵאֶרֶץ מִצְרַיִם לְהִיֹת לֶכֶם לֵאלֹהִים וְהְיִיתֶם מֵאֶרֶץ מִצְרַיִם לִהְיֹת לֶכֶם לֹאלֹהִים וְהְיִיתֶם בִּי קְדוֹשׁ אָנִי "For I am the LORD who brought you up out of the land of Egypt, to be your God; you shall therefore be holy, for I am holy."

Other examples are Lev. 18:2,6,21,30, 19:3,4,10, 20:7,8, 21:12,15,23, 22:2, 25:55, and many more.

The last two examples in this section are declarations of God's existence, identity or status not by God himself but by others, in private prayers said by kings. These declarations are in second person, and can be regarded as a sort of exclamations introducing a plea. The affirmative modal statement וְּדְבֶּרֶיךְּ יִהְיוֹ אֲמֶח, which follows the declaration of God's identity and status in the first example and the informative statement אָּתְּה עָשִיֹתְ אָּתְ-הִאָּכֶץ, which follows the declaration of God's status and identity in the second example, further consolidate the first part of each declaration. Both instances can be regarded as a continuation of the exclamation, and perhaps are required here as reinforcement of the plea expressed in these speech acts.

The first example, אַתָּה-הוֹא הָאֱלֹהִים, is part of a private prayer offered by King David. The act of prayer is indicated in the previous verse, 2 Sam. 7:28—אָבָה ה׳ צְּבָאוֹת אֱלֹהֵי יִשְׂרָאֵל גָּלִיתָה אֶּת-אָזֶן עַבְדְּךְּ לֵאמֹר בַּיִת-״For thou, O LORD of hosts, the God of Israel, hast made this revelation to thy servant, saying, 'I will build you a house'; therefore thy servant has found courage to pray this prayer to thee."

2 Sam. 7:28—אָבְיִי וְהִיוּ אֱמֶת וְתְּדֶבֶּר הוֹא הָאֱלֹהִים וּדְבָּרֶיף יְהִיוּ אֱמֶת וַתְּדֶבֶּר הוֹא הָאֵלהִים וּדְבָרֶיף יְהִיוּ אֱמֶת וַתְּדָבֶּר אָת-הַטּוֹבְה הַוֹּאַת "And now, O Lord GOD, **thou art God**, and thy words are true, and thou hast promised this good thing to thy servant."

The second example is also a private prayer by a king, this time Hezekiah. The prayer is indicated in the verse itself by the introductory clause וַיִּתפַּלֵל חָזְקָיהוּ לְפָנֵי ה׳.

2 Kgs. 19:15–16 הַּרְבִּים בַּרְבִּים יִשְׂרָבִּי יִשְׂרָבִּי יִשְׂרָבִּי הַיִּאָבֶּץ. וַיִּאְבָּל חִזְקְיָהוּ לִּפְנִי הֹ יַבְּיִּדְּ לְכֹל מַמְלְכוֹת הָאָרֶץ אַתָּה עָשִׂיתָ אֶת-הַשָּׁמִים וְאֶת-הָאָרֶץ. אַתָּה-הוּא הָאֶלהִים לְבַּדְּךְּ לְכֹל מַמְלְכוֹת הָאָרֶץ אַתָּה נְשִׂיתָ אֶת דִּבְרֵי סַנְחֵרִיב אֲשֶׁר שְׁלְחִר הְיֹּא אָזְּוְךְ וּשְׁמְע בְּּקִת הֹ עִייֶּיךְ וּרְאֵה וּשְׁמַע אֵת דִּבְרֵי סַנְחֵרִיב אֲשֶׁר שְׁלְחִר הְיֹּא אָוֹרְךְ אֵלְהִים חְי המה ה׳ אָזְנְךְּ וּשְׁמְע בְּּקִת ה׳ עֵייֶיךְ וּרְאֵה וּשְׁמַע אֵת דִּבְרֵי סַנְחֵרִיב אֲשֶׁר שְׁלְחָר הוּא מוּל במוּת ה' And Hezekiah prayed before the LORD, and said: "O LORD the God of Israel, who art enthroned above the cherubim, thou art the God, thou alone, of all the kingdoms of the earth; thou hast made heaven and earth. Incline thy ear, O LORD, and hear; open thy eyes, O LORD, and see; and hear the words of Sennacherib, which he has sent to mock the living God. 14

#### 2.1.4 Oath Patterns

Azar, in his book *Expressions of Commitments in the Old Testament and in the Mishna*,<sup>15</sup> designates two basic types of oaths, those with and without a special opening formula. The first type concerns us here, since the opening formulas might be regarded as external additions to the oath contents, hence parenthetical. Still, this construction requires caution, since most patterns create a syntactic connection between the opening formula and the following content of oath. If such a connection is established the opening formula can no longer be considered parenthetical from a syntactic standpoint.

The oath formulas mentioned by Azar are as follows: תשבעתי, עד ה'/המזבח וכו', העידותי בכם , יצף ה', נשאתי (את) ידי , הרימותי , חלילה ה'/אני וכר הרימותי , גשבעתי Among these formulas הרימותי , גשבעתי , גשבעתי frequently introduce content clauses containing the oath, many of them followed by the content and conditional particles אם These content clauses follow oath verbs and are syntactically object clauses subordinate to the preceding oath verbs, so the latter cannot indisputably be regarded as parenthetical

<sup>&</sup>lt;sup>14</sup> Similar versions appear in Isa. 37:16–17.

<sup>15</sup> Azar 1981.

 $<sup>^{16}</sup>$  Azar 1981:12. Also see  $\it GKC$  1910:471–472, §149 and Joüon & Muraoka 2006:582–584, §165.

units. The ambiguity of the role of the oath verbs in these constructions, as main verbs or as parenthetical units, resembles that of speech verbs introducing speech contents. The word הלילה, which is found in oath formulas and in contexts other than oaths, probably serves in oaths as an exclamation particle.

Examples in which 'תֵי ה'/ְאֲנִי וֹנוֹ introduces or interrupts an oath appear in the next three examples. The first, Gen. 42:15–16, shows the pattern תֵי פַּרְעֹה twice.

Gen. 42:15–16—קָמָלה אֲחִיכֶּם הָּמְּטֶר הַּיְבָּוֹא אֲחִיכֶם הַּמְּטֶר הִּבְּוֹא הַּבְּחֵנוּ חֵי פַּרְעֹה אִם-תַּצְאוּ מִזֶּה כִּי אִם-בְּבוֹא אֲחִיכֶם הַאֲמֶת אִּתְּכֶם הַגְּּטֶת הַּנְּהְ הַיִּבְּרֵיכֶם הַאֲמֶת אִּתְּכֶם הַנְּגָּחִוּ הַבְּיִיכֶם הַאֲמֶת אִּתְּכֶם הַנְּאָתָה בְּי מְרֵגְּלִים אָּתֶּם הַּאָּטְרוּ וְיִבְּחָוּ הַּיִּיכֶם הַאֲמֶת אִּתְּכֵם הַּגְּטְרוֹ וְיִבְּחָוּ הַּיִּיכֶם הַאֲמֶת אִּתְּכֵם הַּאָּמֶת אִתְּכֵם הַאָּמֶת אִתְּכֵם הַּאָּמֶת אִתְּכִם הַאָּמֶת אִתְּכֵם הַאָּמֶת אָתְּכֵם הַאָּמֶת אָתְּכֵם הַּאָמֶת אָתְּכֵם הַאְמֶּת אָתְּכֵם הַאְּמֶת אָתְּכֵם הַאְמָת אִתְּכִם הַּאָמֶת אִתְּכִם הַאְמָת אָּתְּכֵם הַאְמָת אָתְּכֶם הַּאָמֶת אָתְּכֶם הַּאָּמֶת אָּתְּכֵם הַּאָמִית אַתְּחַ אָּת הַבְּיִיכֶם הַאְמֶּת אִתְּכְּם הַּאְמָת אָתְּכְּם הַּאָמָת אִתְּבְּחָם הַּאָּמָת אָתְּבְּחָם הַּאְתָּר וְיִבְּחָתוּ הַבְּיִבְם הַאְמָת אָתְּבְּחָ הַּאָת הַבְּבְּיִיכֶם הַאְמָּת אָתְּבְּחָם הַּאְּתְּם הַּאָּת הַבְּבְּיִיכֶם הַאְמָת אָתְּבְּחָם הַּיּבְּחָם הַּאָּת הַבְּבְּיִיכֶם הַאְמָת אָתְּבְּחָם הְּיִּבְּחָת הְּיִבְּיִם הַּאָּמֶת אָתְּבְּחָ הַּבְּיִבְּים הַאְמָת אָתְּבְּחָם הַּבְּתְּבְּבְייִבֶּם הַאְּמָת אָּבְּבְייִבְּם הַּבְּבְּתְּים הָּבְּבְּבְייִבְּם הַּבְּבְּיִים הַיְּמָת אָּתְּבְּבְּיבְּים הְּבְּבְייִבְם הַּבְּבְּיִים הְּתְּבְּבְּיִים הְּעִּבְּיִם הְּיִים הְּתָּבְּיִים הְּעִיבְּים הְּבִּבְייִיכֶם הַבְּּבְּבְייִים הְּעִיבְּים הְּעִּבְּיִים הְּעִּבְּים הְּעִּבְּיִים הְּעִיבְּים הְּעִיבְּים הְּעִים הְּעִים הְּעִים הְעָּבְּים הְּעִּבְּים הְעִיבְּיִים הְּעִים הְעִיבְּים הְעִיבְּים הְעִיבְּים הְּעִים הְּעִים הְעִיבְּים הְיּבְּיוֹם הְּעִים הְּעִים הְעִּבְּיִים הְּעִים הְּעִים הְּעִים הְּעִים הְּעִים הְעִים הְעִים הְּעִילְה הְּבְּים הְעִים הְּעִים הְּבְּיבְים הְּעִים הְּעִים הְּעִים הְּעִים הְּעִים הְּעִים הְּעִים הְּעִים הְעִים הְּעִים הְּעִים הְּעִים הְּעִים הְּעָּבְיה הְּעִים הְּעִים הְּבִיים הְבּילּים הְּעִים הְּעִים הְּעּבּים הְּבּים הְּעּבּים הְּעִים הְּבּים הְּבְּיּבְּים הְיבְּיּבְּים הְּעּים הְּבְּיּבְיּים הְּעִים הְּבּיּבְים הְיּבּים הְּעּבּים הְּבּים הְּעּבְּים הְיּבְּיּבְים הְּבּיוּבְיּבּים הְּבּיוּ הְיּבְיּים ה

The second example, Num. 14:28, displays the pattern תַּי-אָנִי, which contains the first person independent personal pronoun. Swearing by one's own name is possible in the Bible only when this name refers to God himself and he is the one performing the act of swearing. Accordingly, מַנִי-אָנִי is often accompanied by another parenthetical phrase, 'ה'-אָנִי or the like, as in the verse below. 17 One more example of יַר-אָנִי is found in a similar adjacent text, Num. 14:21. Other instances are found only in prophetic books: Isa. 49:18, Jer. 22:24, 46:18, Ezek. 5:11, 14:16,18,20, 16:48, 17:16,19, 18:3, 20:3,31,33, 33:11,27, 34:8, 35:6,11, and Zeph. 2:9.

On the phrase 'אָם-ה' as a parenthetical unit see 3.1.1.1.2 below.

Num. 14:28—אָנֶי בָּן אָטֶשֶה דַּבַּרְתֶּם בְּאָוְנִי בַּן אָטֶשֶה אָם-ה׳ אָם-ה׳ אָם-לֹא כַּאֲשֶׁר דָּבַּרְתֶּם בְּאָוְנִי בַּן אָטֶשֶה "Say to them, '**As I live**,' says the LORD, 'what you have said in my hearing I will do to you.'"

The last of these examples displays the pattern 'תִּי-ה inside an utterance containing an oath, which is sworn by Gideon regarding the two kings of Midian, Zebah and Zalmunna.

Judg. 8:19—ניאמר אַחִי בְּנֵי-אָמִי הֵם חִי-ה׳ לוּ הַחֲיִתֶם אוֹתְם לֹא הָרַגְתִּי אֶתְכֶם "And he said, 'They were my brothers, the sons of my mother; **as the LORD lives**, if you had saved them alive, I would not slay you.'"

Two examples in which ... יְמַשֶּׁה אֱלֹהִים/ה׳ וְכֹה יוֹסִיף הַיֹּחְשׁה אֱלֹהִים/ה׳ וְכֹה יוֹסִיף introduces an oath are the following. The first is part of a direct speech utterance by the priest Eli to Samuel. Eli urges Samuel by this oath to tell him about his previous revelations.

1 Sam. 3:17—אָלָהִים וְכֹה יוֹסִיף אִם-תְּכַחֵד מִמֶּנִי דְּבֶר מִכְּל-הַדְּבֶּר אֲלֹהִים וְכֹה יוֹסִיף אִם-תְּכַחֵד מִמֶּנִי דְּבֶר מִכְּל-הַדְּבֶּר אֵלֶיִּף "**May God do so to you and more also**, if you hide anything from me of all that he told you."

The next example, Ruth 1:17, displays an oath sworn by Ruth to Naomi, her mother-in-law, and it declares Ruth's decisive loyalty to Naomi.

Ruth 1:17—אָפֶּר הָּמּיּתִי אָמּוּת וְשָׁם אֶּקְבֵר כֹּה יַעֲשֶׂה ה׳ לִי וְכֹה יֹסִיף כִּי הַמְּעֶת שׁר תְּמוּתִי אָמוּת וְשָׁם אֶקְבֵר כֹּה יַעֲשֶׂה ה׳ לִי וְכֹה יֹסִיף בִּינְ הַבְּעֵּך בִּינִי בִּינִי וּבֵינֵך בּינִי וּבֵינֵך בּינִי וּבִינֵך הַיִּע וּבִינִך מּאָני וּבִינִך בּינִי וּבִינִן שׁל Where you die I will die, and there will I be buried. May the LORD do so to me and more also if even death parts me from you."

#### 2.2 Narrative Formulas

We now enter the realm of parenthetical formulas in Biblical Hebrew narrative, whose content frequently proves more diverse. In general, narrative formulas include certain patterns which add to the story external information relevant to readers in a later period. This type of formulas is our concern here. These external additions were presumably inserted by ancient scribes or narrators as part of the extensive editorial work that the biblical texts underwent. Such insertions created parenthetical patterns which are not part of spontaneous speech acts but are carefully formulated literary additions. Still, from a syntactic and functional-pragmatic standpoint these insertions enjoy a status similar to any other parenthetical units in the sentence to which they belong. The following examples present clauses in fixed narrative patterns that

fulfill the role of narrative parenthetical units. Since all these patterns appear within a narrative sequence they are labeled here 'narrative parenthetical units'.

## 2.2.1 A Formula Introduced by לָבֶן / עַל-בֶּן

The examples in this section include the general explanatory and etiological explanatory narrative formula introduced by על-בו This formula always deviates from the main story line, adding new explanatory information. The examples are classified according to a basic bipartite division into those that are generally explanatory and try to present explanations for general human practices or familiar sayings, and those that are etiological and concern origins of proper names. The general explanatory information about human practices or familiar sayings is usually popular, and it touches on topics that stir human curiosity and imagination. The etiological explanations are often popular too, and they usually reflect ideas regarding the origins of proper names based on what seems to be common knowledge accumulated up to the time of the scribe or narrator.<sup>18</sup>

The following are general explanatory examples. The first offers an explanation for the human practice of grown children leaving their parents and starting new families.

Gen. 2:24—עַל-כֵּן יַצָּזָב-אִישׁ אֶת-אָבִיו וְאֶת-אָמּוֹ וְדָבַק בְּאִשְׁתוֹ וְהָיוּ לְבָשֶׁר **Therefore a man leaves his father** and his mother and cleaves to his wife, and they become one flesh."

The second example concerns a common practice whereby the Israelites, at least at the time of the scribe or narrator, did not use to eat a certain part of animal meat, identified in the verse as גִּיד הַּנְּשֶׁה אֲשֶׁר and translated by the RSV as 'the sinew of the hip'.

Gen. 32:33—עַל-כֵּן לֹא-יֹאכְלוּ בְנִי-יִשְׂרָאֵל אֶח-נִּיד הַנִּּשֶׁה אֲשֶׁר עַל-כֵּף הַיְרֶךְ עַדְּבֹי בְּנִי- הַנְּשֶׁה בְּעָלוּ בִּיִרְ הַנְּשֶׁה הֹיִּה בִּי נְגַע בְּבַף-יֶרֶךְ יַעֲקֹב בְּגִיד הַנְּשֶׁה "Therefore to this day the Israelites do not eat the sinew of the hip which is upon the hollow of the thigh, because he touched the hollow of Jacob's thigh on the sinew of the hip."

<sup>&</sup>lt;sup>18</sup> Biblical etiological explanations detail the derivation of place names. For a short discussion of etiological elements in the Bible see, e.g., Amit 2001:122–123. See more in Seeligman 1961 and other references there.

One more example provides an explanation for another practice known up to the time of the scribe or narrator. The reference to the scribe/narrator's era is further expressed by the time phrase עֵד הַּיּוֹם, which should be considered as a parenthesis in itself, since it breaks the narrative historical sequence and points to a different time, that of the scribe/narrator. Other examples which include the phrase עֵד הַיִּיֹם, not necessarily in the pattern treated in this section but in other constructions as well, are discussed below in the section on parenthetical words and phrases. In any event, the next example explains the practice of the priests of Dagon and other visitors to his shrine in Ashdod not to set foot on its doorstep up to the days of the scribe or narrator.

1 Sam. 5:4–5 הין אַרְצָה לְפְנֵי אַרְצָה לְפְנֵי אַרְאָר מְמְחֵרֶת וְהַנֵּה דְגוֹן נִפֵּל לְפְנָיו אַרְצָה לְפְנֵי אַרְוֹן וּשְׁבֵּר מִמְחֵרֶת וְהַנֵּה דְגוֹן נִפְּלְּרִכּוּ וְלִא-יִדְרְכִּוּ לְא-יִדְרְכּוּ בְּיוֹם הַאָּה דְּגוֹן וִשְׁבֵּר עֲד בְּיוֹם הַאָּה "But when they rose early on the next morning, behold, Dagon had fallen face downward on the ground before the ark of the LORD, and the head of Dagon and both his hands were lying cut off upon the threshold; only the trunk of Dagon was left to him. This is why the priests of Dagon and all who enter the house of Dagon do not tread on the threshold of Dagon in Ashdod to this day."

In the next example an explanation is given for Ziklag's belonging to Judah up to the days of the scribe or narrator. Again, the verse includes the phrase עֵד הַּיּוֹם הַּזֶּה, meaning time of the scribe/narrator, and this breaks the historical sequence:

1 Sam. 27:6—מָרָג לְמַלְכֵי יְהוּדָה צָּקְלָג לֶכַן הָיְחָה צִּקְלַג לְמַלְכֵי יְהוּדָה "So that day Achish gave him Ziklag; therefore Ziklag has belonged to the kings of Judah to this day."

The following two examples show the insertion of explanations for sayings which were probably current in the era of the scribe/narrator. The first saying is הָגָם שָׁאוּל and the second is בְּנִמְרֹד גָּבּוֹר צֵיִד לִפְנֵי ה׳ בּנבאים:

Gen. 10:8–9—יַיִד אָת-נְמְרד הוּא הַחֵל לְּהְיוֹת גָּבּר בְּאֶרֶץ. הוּא-הְיָה גִּבּר-צֵיִד לְּבְּיֵ הֹ לֹרְיִת גָּבּר בְּאֶרֶץ. הוּא-הָיָה גִּבּר-צַיִד לִּבְּיֵ הֹ "Cush became the father of Nimrod; he was the first on earth to be a mighty man. He was a mighty hunter before the LORD; therefore it is said, 'Like Nimrod a mighty hunter before the LORD.'"

1 Sam. 10:12—פַּיַען אִישׁ מִשְּׁם וַיֹּאמֶר וּמִי אֲבִיהֶם עַל-כֵּן הְיְחָה לְמָשֶׁל הֲנִם מִּשׁל בַּנְבְאִים "And a man of the place answered, 'And who is their father?' **Therefore it became a proverb**, 'Is Saul also among the prophets?'"

All the following are etiological explanatory examples, namely they give popular historical explanations for proper names of places. In the next example the name בָּאֵר שָׁבַע is understood as a place of swearing by seven lamps.

Gen. 21:30–31— וַיֹּאמֶר כִּי אֶת-שֶׁבַע כְּבָשֹת תִּקַח מִיְּדִי בַּעֲבוּר תִּהְיָה-לִּי לְעֵדָה שָׁבַע כִּי שְׁם נִשְׁבְּעוּ בַּיִּ חְפַרְתִּי אֶת-הַבְּאֵר הַזֹּאת. עַל-כֵּן קָרָא לַפְּקוֹם הַהוּא בְּאֵר שָׁבַע כִּי שְׁם נִשְׁבְּעוּ כִּי חְפַרְתִּי אֶת-הַבְּאֵר הַזֹּאת. עַל-כֵּן קָרָא לַפְּקוֹם הַהוּא בְּאֵר שָׁבַע כִּי שְׁם נִשְׁבְּעוּ "He said, 'These seven ewe lambs you will take from my hand, that you may be a witness for me that I dug this well.' **Therefore that place was called Beer-sheba**; because there both of them swore an oath."

An etiological explanation for the same name בְּאֵר שֶׁבֶע, in another biblical story with other characters, this time Isaac and his servants instead of Abraham and Abimelech who figure in Gen. 21:30–31, appears in the following verse, where the meaning of the name is related to an oath.<sup>19</sup>

Gen. 26:33—הַּיָּרָא אֹתָהּ שָׁבְעֶה עַל-כֵּן שֵׁם-הָעִיר בְּאֵר שֶׁבַע עַד הַיּוֹם הַזָּהְ—"He called it Shibah; therefore the name of the city is Beer-sheba to this day."

The following example involves explanations for both a personal name and a place name, the latter of which employs the formula beginning with על-בן.

Gen. 16:13–14 הַּהַבָּר אֵלֶיהְ אַתְּה אֵל רֵאִי כִּי אָמְרָה הְגַּם ה' הַדֹּבֵר אֵלֶיהְ אַתְּה אֵל רֵאִי כִּי אָמְרָה הְנָּה בֵין-קְדֵשׁ וּבֵין הָלֹם רָאִיתִי אַחְרֵי רֹאִי. עַל-כֵּן קָרָא לַבְּאֵר בְּאֵר לָחַי רֹאִי הַנָּה בֵין-קְדֵשׁ וּבֵין "Therefore the well was called Beer-lahai-roi; it lies between Kadesh and Bered."

The next three examples of this type of etiological explanatory formula all begin with עֵל-בֵּן.

Judg. 15:19—נִּיְבְקע אֱלֹהִים אֶת-הַמַּרְתֵּשׁ אֲשֶׁר בַּצֶּלְחִי וַיִּצְאוּ מְמֶנוּ מֵיִם וַיֵּשְׁתְּ וַתְּשָׁב בְּּלֶחִי עַד הַּיּוֹם הַּנָּה "And God split open the hollow place that is at Lehi, and there came water from it;

The meaning of the root y" (= swear) might be related to the number seven, since it is stated in Gen. 21:30–31 that the practice was to swear by seven witnesses, in this case lamps (BDB 92a, 989a).

58 Chapter two

and when he drank, his spirit returned, and he revived. Therefore the name of it was called En-hakkore; it is at Lehi to this day."

2 Sam. 5:20—יְבִיא הְאָת- פְּרָץ הֹ אָת- אָּרָבְי וַיָּבֵּם שְׁם דְּוִד נִיֹּאמֶר פְּרָץ הֹ אֶת-אִיְבִי וַיַּבּם שְׁם דְּוִד נִיֹּאמֶר פְּרָץ הֹ אָת-הִּמְּקוֹם הַהּוֹא בַּעֵל פְּרָצִים הוֹא בַּעֵל פְּרָצִים הוֹא בַּעֵל פְּרָצִים הוֹא בַּעֵל פְּרָצִים הוֹא בַּעַל פְּרָצִים הוֹא מוּם "And David came to Baal-perazim, and David defeated them there; and he said, 'The LORD has broken through my enemies before me, like a bursting flood.' Therefore the name of that place is called Baal-perazim."

Other examples are Gen. 33:17, 50:11, and more.

Etiological explanations for names might also be introduced into the story by a speech citation, in which the etiological explanation is cited in first person, marked or not by a speech verb, while the story line is expressed in third person. Functionally and pragmatically the information provided in this way is equally external as the information introduced into the story line by the foregoing etiological narrative formula initiated by מֵל-בֵּן; but linguistically the construction is not independent since the etiological information is included in a clause which is syntactically the object of the speech verb.<sup>20</sup> Two examples of such a structure follow.

Gen. 26:22—הַבוֹתְ בְּאֶרָא שְׁמְהּ רְּחָבוֹת בְּאֶרָץ וַיִּשְׁתַּתְ מִשְׁם וַיַּחְפֹּר בְּאֵר אַחֶרֶת וְלֹא רָבוּ עָלֶיהְ וַיִּקְרָא שְׁמְהּ הְרְחִיב הֹי לְנוּ וּפְּרִינוּ בָאָרֶץ "And he moved from there and dug another well, and over that they did not quarrel; so he called its name Rehoboth, saying, 'For now the LORD has made room for us, and we shall be fruitful in the land.'"

1 Sam. 1:20—נְיְהֵי לְתְקְפוֹת הַיְּמִים וַתַּהַר חַנְּה וַתֵּלֶד בֵּן וַתִּקְרָא אֶת-שְׁמוֹ שְׁמוּאֵל "And in due time Hannah conceived and bore a son, and she called his name Samuel, for she said, 'I have asked him of the LORD.""

Note that in the last example the *RSV* translation adds the speech clause "for she said", which is not found in the original Hebrew verse. The *JPS* adds here "meaning..." and similarly *al-kitāb al-muqaddas*: אולי and *Targum Jonathan*: אולי אמרת. Of the translations examined for this verse only the *Peshitta* does not add a speech verb. This insertion, wherever it occurs, is certainly based on the appearance of first person pronouns in the speech expression within a narrative verse narrated in third person. The change of third to first person is a clear sign in this case of direct speech.<sup>21</sup>

 $<sup>^{20}</sup>$  Ewald includes under the title 'parenthetical information' circumstantial clauses, but also clauses introduced by בָּי and בָּ (Ewald 1881:254, §346c).

<sup>&</sup>lt;sup>21</sup> For deixis as a parameter for distinguishing between direct and indirect speech, see Miller 1996:62–74, §2.3.1.

## 2.2.2 A Formula Introduced by וְיֵתֶר דָּבְרֵי

The examples in this section consist of the concluding narrative formula  $\dots$  דְּבֶּרָי. This formula too is a scribal addition referring to a historical source documenting the history of the kings of Israel and Judah. Though the clauses which contain these remarks are syntactically coordinated to the preceding clauses by the conjunctive  $w\bar{a}w$ , they deviate from, and are external to the story line in respect of time and should therefore functionally and pragmatically be considered as belonging to a different narrative level in the story. Since all examples of this widespread formula are similar in content and structure, only two examples are presented in full below, and they are followed by a few additional references. The resemblance in content and structure of all these examples is also reflected in their uniform translations, demonstrated here by the two RSV renderings.

 $1~{
m Kgs.}$  14:19עָּכֶּר דִּבְרֵי יֻרְבְעָם אֲשֶׁר נְלְחֵם וַאֲשֶׁר מְלָדְ הִנְּם בְּתוּבִים עַל-סֵפֶּר וֹלְחֵלְבִי יִשְׂרָאֵל יִשְׂרָאֵל "Now the rest of the acts of Jeroboam, how he warred and how he reigned, behold, they are written in the Book of the Chronicles of the Kings of Israel."

 $1~{
m Kgs}.$  14:29ך בֶּבֶרי עַלּ-בְּשֶׁר בְּלָא-הַמְּה בְּתֹא-הַמְּה בְּתֹבְים עַל-סֵפֶּר רְחַבְּעָם וְכָל-אֲשֶׁר עָשָׂה הָלֹא-הַמְּה רְּתֹבְים עַל-מַלְּבֵי יְהוּדְה "**Now the rest of the acts of Rehoboam**, and all that he did, are they not written in the Book of the Chronicles of the Kings of Judah?"

Other examples are 1 Kgs. 15:7,23,31,16:5,14, and many more.

# 2.2.3 A Formula Indicating a Proper Name, a Month Name, or Related Information

The examples discussed in this section are nominal appositional clauses, constructed as bipartite nominal clauses.<sup>22</sup> The new information given in these nominal clauses on the origin of proper names is meant for the story's audience and readers living at the time of the scribe or narrator, who presumes that they are not acquainted with the earlier name or any other relevant information. Other related examples introduce and describe a month name. Formal signs marking the information presented in this pattern as parenthetical are often found in Bible translations. For example, in the majority of the translations

 $<sup>^{22}</sup>$  For more on the syntactic structure of these appositional clauses see, e.g., Zewi 1999c.

by the *RSV* the remark regarded as parenthetical is indeed set off by parentheses. In scholarly works these clauses sometimes receive other titles too, including 'exegetical remarks,' 'glosses,'<sup>23</sup> 'editorial notes,'<sup>24</sup> and 'parenthetical glosses.' The last term is used by Muraoka,<sup>25</sup> and it seems to suit our interpretation of this formula very well.

Since a similar nominal appositional pattern is regular and genuine in Arabic, not surprisingly it is maintained in all versions of Saadya Gaon's Arabic translation. Nevertheless, Arabic translations are not necessarily homogeneous in their treatment of this construction. al-kitāb al-muqaddas frequently translates this pattern not by a nominal appositional clause but by a relative clause. One such example is Gen. 14:3, presented below, translated as إلى عُمْق السِّدِّيم الذي هُوَ بَحْرُ الْملَح. Another possible translation which appears in al-kitāb al-muqaddas is by a circumstantial clause with insertion of the conjunctive  $w\bar{a}w$ , serving in such cases as wāw al-ḥal, before the parenthetical clause. The example here is Num. 33:36, translated as في بَرِّيَّة صِينَ وَهِيَ قَادَشَ A translation by a relative clause appears in the Geez Bible translation too, e.g., the use of the feminine relative pronoun **37**t/*inta* in the translation of Gen. 14:3, 14:7, and 23:2, presented below. A perplexity regarding this structure also appears in the *Peshitta* in which Gen. 14:3,7, 19:37, 23:2, 36:1,24, Num. 21:16, and 2 Sam. 5:7, presented below, maintain the Hebrew pattern; another example presented below, Judg. 1:26, displays a conjunctive wāw, and all other examples presented below display a relative clause, e.g., Num. 33:36: 🎿 🦽 🚜 / da-hī (h)ī Qādeš, and Deut. 4:48: / מוסם מוֹסם אוֹל / də-hūyū Ḥermōn, and similarly Josh. 20:6, Judg.

<sup>&</sup>lt;sup>23</sup> For the terms 'exegetical remark' and 'gloss' see Muraoka 1990:229, §1.2.1, Baasten 1997:4, and note 12 there. Also see Tov 1994:52–53, who says that "'Genuine' reconstructed glosses are rare," and his conclusions that "most elements which have hitherto been described as glosses, actually are interpolations (exegetical additions)" and that "While some of the elements recognized as interpolations must have been added at the scribal level, many (if not most) of them belonged to a layer (edition) added to an earlier text (edition) at the stage of the literary growth of the biblical books" (Tov 1994:65). Another study in which the clause patterns opening with an independent personal pronoun (and rarely also a demonstrative pronoun) are regarded as glosses is Driver 1957:124–126.

<sup>&</sup>lt;sup>24</sup> Weingreen strictly differentiates between 'glosses' and 'editorial notes' and mainly explains the occasionally so-called Biblical Hebrew 'glosses' as 'editorial notes': "the editorial note is a deliberate insertion and meant to be an integral part of the text, while the accretion of a gloss is due to the activity of a copyist, who copied in, along with the text, notes on words or phrases" (Weingreen 1957:149).

<sup>&</sup>lt;sup>25</sup> Muraoka 1999:191.

19:10, and 1 Kgs. 6:1,38 below.<sup>26</sup> Also significant is the *JPS* translation of, e.g., Gen. 14:3 as "...the valley of Siddim, now the Dead Sea." By using the time particle 'now' which connects the identification of the place to the scribe or narrator's time, the *JPS* nicely displays the essence of this pattern.

The Hebrew examples and their English translation follow. The examples introduce and describe proper names, mostly of places, although personal names also occur. First, we will see the very common type of examples giving explanations of place names.

Gen. 14:3—בָּל-אֵלֶה חָבְרוּ אֶל-עֵמֶק הַשִּׁדִּים הוּא יָם הַמֶּלֵח—"And all these joined forces in the Valley of Siddim (that is, the Salt Sea)."

The assumption behind the scribe/narrator's addition in this verse is that his contemporary readers are familiar with the place name בְּמֶלֵח . The new information they need to know is that this place had a previous name עֵּמֶלְּח הַשִּׁלִּים, and the latter is the one employed in the biblical story. Therefore, the better known place name, in this case בְּמֶלֵּח , is syntactically a subject of a nominal clause, while the personal pronoun should be considered its predicate, while at the same time it refers to the place name which precedes it.<sup>27</sup> The same syntactic structure is repeated in the other examples presented subsequently.

The following example הָוֹא קְדֵשׁ contributes to the identification of the more ancient name עֵין מִשְׁבַּט.

Gen. 14:7— וְיַשְׁבוּ וַיְבֹאוּ אֶל-עֵין מִשְׁפְּט הָוּא קְרֵשׁ וַיַּכּוּ אֶת-בְּל-שְׁרֵה הְעֲמְלֵקִי המרי הַיִּשֶׁב בְּחַצְּצון הָּמְּר "Then they turned back and came to Enmishpat **(that is, Kadesh)**, and subdued all the country of the Amalekites, and also the Amorites who dwelt in Hazazon-tamar."

In the next verse הוא חֶבְרוֹן is an identification of a place name referring to the newer name of the former קריַת אַרבּע.

Gen. 23:2—קָּפְר לְּפְפּד אַבְרְהְם לְּפְפּד הוֹא חֶבְרוֹן בְּאֶרֶץ כְּנְעַן וַיְבֹא אַבְרְהְם לְּפְּדּ הוֹא חָבְרוֹן בְּאֶרֶץ בְּנְעַן וַיְבֹא אַבְרְהְם לְּשָּרָה וְלְבְּכּתְה "And Sarah died at Kiriath-arba (that is, Hebron) in the land of Canaan; and Abraham went in to mourn for Sarah and to weep for her."

<sup>27</sup> Such a syntactic interpretation for these clauses is suggested in Zewi 1999c.

<sup>&</sup>lt;sup>26</sup> The duplication of the personal pronoun is required in Syriac. Unlike Hebrew, when the subject is not a personal pronoun, Syriac does not allow a simple bipartite nominal clause in a pattern of predicate-subject, and demands an additional pronoun subsequent to the predicate, creating an extraposition in a pattern predicate-subject (personal pronoun), subject. For nominal clause patterns in Syriac see Goldenberg 1983.

The next example does not identify an early place name by a later one but adds some information about its identity.

Num. 21:16—וְמְשֶׁם בְּאֵרָה הָוֹא הַבְּאֵר אֲשֶׁר אָמֶר הִי לְמֹשֶׁה אֱסֹךְ אֶח-הָעָם וְאֶחְנָה הָוֹא הַבְּאֵר אֲשֶׁר אָמֶר הי לְמֹשֶׁה אֱסֹךְ אֶח-הָעָם וְאֶחְנָה "And from there they continued to Beer; that is the well of which the LORD said to Moses, 'Gather the people together, and I will give them water.'"

Again, the ensuing verse contains an explanation of an earlier place name, מְּדָבֶּר-צִּן, by a newer one, קְּדֵשׁ, However, in this case the name refers to a general area and not to a specific spot.

Num. 33:36—יַּיְסְעוּ מֵעֶצְיוֹן גָּבֶר וַיִּחֲנוּ בְמִדְבַּר-צִּן הָוֹא קְדֵשׁ—"And they set out from Ezion-geber, and encamped in the wilderness of Zin (that is, Kadesh)."

The following example refers to a mountain. The former name, הַר הָרְמוֹן, has been changed to the new one, הַרְמוֹן.

Deut. 4:48—מֵעֲרֹעֵר אֲשֶׁב עַל-שְּׂפַת-נַחַל אַרְגוֹ וְעַד-הַר שִׁיאוֹ הוּא חֶרְמוֹן "From Aroer, which is on the edge of the valley of the Arnon, as far as Mount Sirion (that is, Hermon)."

The place names הֶּבְרוֹן and הֶבְרוֹן are again mentioned in the next example, Josh. 20:6.

וַיַקְדָּשׁוּ אֶת-קֶרֶים וְאֶת-קֶרֶים וְאֶת-קְרָיִח אַרְבֵּע הִיא חֶבְרוֹן וַיַּקְדָּשׁוּ אֶת-קֶרָים וְאֶת-קֶרָים וְאֶת-קְרָים וַיְּקְרִים וְאָת-קְרָיִם אַרְבִּע הִיא חֶבְרוֹן "So they set apart Kedesh in Galilee in the hill country of Naphtali, and Shechem in the hill country of Ephraim, and Kiriath-arba (that is, Hebron) in the hill country of Judah."

The next example contains a slightly different version of the pattern discussed in this section. It relates the founding of a new city, the announcement of its new name, and finally, with the help of a nominal appositional clause, הוֹא שְׁמָה עֵד הַּיוֹם הַזֶּה, it does not give a new name for an earlier one, but emphasizes the persistence of the earlier name up to the era of the scribe or narrator.

Judg. 1:26 מֵילֶךְ הָאִישׁ אֶבֶץ הַחְתִּים וַיִּבֶן עִיר וַיִּקְרָא שְׁמָהּ לוּז הוּא שְׁמָהּ עֵד הַיּוֹם ווַיֵּבֶן עִיר וַיִּקְרָא שְׁמָהּ לוּז הוּא שִׁקהּ לוּז הוּא בּיִּרְם מּבּר "And the man went to the land of the Hittites and built a city, and called its name Luz; that is its name to this day."

The two last examples concerning place names are related to Jerusalem. The first, Judg. 19:10, explains יְבוּס, and the second, 2 Sam. 5:7, explains מָצְרָת צִיּוֹן, as follows.

Judg. 19:10—וְלָּא-אָבָה הָאִישׁ לְּלֹוּן וַיְּקֶם וַיֵּיֶלֶךְ וַיְּבֹא עֵד-נַבּח יְבוּס הִיא יְרוּשֶׁלְבִּח וְבּיּלְגְשׁוֹ עִמּוֹ עִמּוֹ עִמּוֹ בּיִּלְגְשׁוֹ עִמּוֹ בּיִּלְגְשׁוֹ עִמּוֹ בּיִלְגְשׁוֹ עִמּוֹ בּיִלְגְשׁוֹ עִמּוֹ שִּמֶּד חֲבוּשִׁים וּפִּילַגְשׁוֹ עִמּוֹ But the man would not spend the night; he rose up and departed, and arrived opposite Jebus (**that is, Jerusalem**). He had with him a couple of saddled asses, and his concubine was with him."28

2 Sam. 5:7—נִילְכֹּד דְּוָד אָת מְצָרַת צִיוֹן הִיא עִיר דְּוָד "Nevertheless David took the stronghold of Zion, **that is, the city of David**."

We arrive now at the less common type of examples which refer to proper personal names. These display the same syntactic structure of a nominal appositional clause as that of place names.

The next verse does not replace an old personal name by a new one, though it involves an announcement of a new name for a newborn infant. Moreover, the nominal appositional clause in this verse, אָבִי-מוֹאָב עַד-הַיּוֹם , is not meant to display a new name but to add some information regarding the infant's name.

Gen. 19:37—נַתֵּלֶּד הַבְּכִירָה בֵּן וַתִּקְרָא שְׁמוֹ מוֹאָב הוּא אֲבִי-מוֹאָב עַד-הַיּוֹם—"The first-born bore a son, and called his name Moab; he is the father of the Moabites to this day."

The next example does identify one name, שֵׁשָׁ, by another, אֵדוֹם.

Gen. 36:1—וְאֵלֶה תּלְדוֹת עֵשְוֹ הוּא אֱדוֹם "These are the descendants of Esau (that is, Edom)."

The last example in this section, again, does not present a new personal name for a more ancient one, but supplies additional information regarding a certain personal name, שָנָה, which is indicated in the verse as that of one of Zibeon's sons. The parenthetical information obtained in the nominal appositional clause, הַּמָּמֶם בַּמִּדְבָּר , hints at another story, which is probably understood by the scribe or narrator as belonging to a collection of stories with which the readers or listeners of his era are familiar. The technique of using parenthetical clauses to refer to stories elsewhere, sometimes discloses ones that are not otherwise mentioned in the Bible. Their very existence becomes known only through their intimation in this parenthetical way.

<sup>&</sup>lt;sup>28</sup> Sternberg 1985:121 refers to this example and the like as an exposition meant for 'temporal or cultural bridging.'

Gen. 36:24—וְאֵלֶה בְנֵי-צִבְעוֹן וְאֵיָה וַעֲנָה חוּא עֲנָה אֲשֶׁר מְצָא אֶח-הַיִּמִם בַּמִּרְבֶּר וֹאַ נְעֵנָה חוּא עֲנָה אֲשֶׁר מְצָא אֶח-הַיִּם בְּמִּרְבֶּר וֹאָ אָבִיוֹ לְצִבְעוֹן אָבִיוֹ לְצִבְעוֹן אָבִיוֹ לֹצְבָעוֹן אָבִיוֹ לֹצְבָעוֹן אָבִיוֹ לֹצְבָעוֹן אָבִיוֹ These are the sons of Zibeon: Aiah and Anah; he is the Anah who found the hot springs in the wilderness, as he pastured the asses of Zibeon his father."

Other instances of both place names and personal names are Gen. 14:2,8,17, 19:38, 23:19, 35:6,19,20,27, 36:43, 48:7, Exod. 6:26,27, Josh. 21:10, 1 Kgs. 8:1, 2 Kgs. 10:12, and many more.

The following examples are similar in structure to those referring to proper names, and they introduce and explain a month name.

וֹיְהֵי בִּשְׁמוֹנִים שָׁנָה וְאַרְבַּע מֵאוֹת שָׁנָה לְצֵאת בְּנִי-יִשְׂרָאֵל מֵאֶבֶץ-מִצְרִים מַאוֹת שָׁנָה לְצֵאת בְּנִי-יִשְׂרָאֵל מֵאֶבֶץ הַבְּיִת לַה׳ בַּיְשְׂרָאֵל וַיִּבֶן הַבִּית לַה׳ בַּשְׁנָה הְרְבִיעִית בְּחֹדֶשׁ זוֹ הוּא הַחֹדֶשׁ הַשְּׁנִי לְמְלֹדְ שְׁלֹמה עֵל-יִשְׂרָאֵל וַיִּבֶן הַבִּית לַה׳ "In the four hundred and eightieth year after the people of Israel came out of the land of Egypt, in the fourth year of Solomon's reign over Israel, in the month of Ziv, **which is the second month**, he began to build the house of the LORD."

 $1~{
m Kgs.}$  6:38—וּבַשְּׁנָה הָאַחַת עֶשְׂרֵה בְּּוֹרָח בּוּל הוּא הַחֹדֶשׁ הַשְּׁמִינִי כְּלָה הַבַּיִת עָשְׂרֵה בָּיַרָח בּוּל הוּא הַחֹלֶּט הַיִּע שְׁנִים "And in the eleventh year, in the month of Bul, **which is the eighth month**, the house was finished in all its parts, and according to all its specifications. He was seven years in building it."  $^{29}$ 

## 2.3 External Information Mostly Expressed by Circumstantial Clauses

The examples in this section do not contain specific expressions or formulas considered parenthetical wherever they appear, but several syntactically distinct types of clauses, such as verbal clauses with *qatal*, nominal clauses, existential clauses, and participial clauses, which tend to break the narrative sequence composed regularly of a chain of *wayyiqtol* clauses. The choice of verbs in verbal clauses, the complete absence of verbs in nominal clauses, and the word order of both verbal and nominal clauses show deviation from the main narrative sequence, and they all appear to be playing a role of some sort of adverbial clause type, mostly a circumstantial clause introduced by the conjunctive  $w\bar{a}w$ . However, contrary to normal circumstantial clauses, which describe the circumstance of an agent, and thus can be interpreted as attributive

 $<sup>^{29}</sup>$  This formula with month names is especially common in the late book of Esther, e.g., 2:16, 3:7,13, 8:9,12, 9:1.

or adverbial, and in fact show features of both, these circumstantial clauses are syntactically independent. They exhibit a new, free subject, and they do not play the part of attributes or complements, obligatory or not, of any specific sentence part or of the sentence as a whole.<sup>30</sup> Their circumstantial attribution of these clauses is only due to the circumstantial information obtained in them.

Since these clause types frequently share an inversion of word order deviating from the common structure in narrative chains of clauses initiated by *wayyiqtol* forms, and their subjects often are in first position, word order inversion itself should be regarded as a means of introducing parenthetical information into a text.<sup>31</sup> Nonetheless, these techniques, that is, using certain type of circumstantial clauses involving either one or more of word order inversion, *qatal* clauses, nominal clauses including participial clauses,<sup>32</sup> and existential clauses, play roles other than introducing parenthetical information to the narrative sequence, the prominent of which are focalization and topicalization. These roles belong to the realm of functional grammar and are outside the scope of this book.<sup>33</sup>

Only examples demonstrating the insertion of parenthetical information are presented here. In many of them the parenthetical information also involves topic shift, a term commonly used in functional and discourse studies, which basically means a change of subject within a clause or a discourse unit.<sup>34</sup> Consequently a connection exists between

<sup>&</sup>lt;sup>30</sup> For references to other works which deal with this function from a linguistic or discourse studies/text linguistic point of view see, e.g., Polotsky 1985, Niccacci 1990, Eskhult 1990, de Regt 1999, and more in §1.3 above. Note also the observations regarding this function made by scholars who work on the structure of biblical narrative from a literary point of view, e.g., Alter 1981 and Berlin 1983, and more in §1.5 above. For circumstantial clauses in Biblical Hebrew grammars see, e.g., *GKC* 1910:489–491, §156, Joüon & Muraoka 2006:565–566, §159. For the structure and function of circumstantial clauses see also, e.g., Driver 1892:195–211, Andersen 1974:77–91, §5, Eskhult 1990:31–33, §2.3.3.

<sup>&</sup>lt;sup>31</sup> Word order inversion is indeed recognized as a language device for breaking the narrative flow in general linguistic and Biblical Hebrew studies. For references see, e.g., Eskhult 1990:35–36, §2.4.2.

<sup>&</sup>lt;sup>32</sup> Participial clauses are treated here as a certain type of nominal clauses, since the two types share similar characteristics in structure and word order possibilities, and since participles and adjectives in Semitic languages share many features with nouns.

<sup>&</sup>lt;sup>33</sup> On these roles and their influence on sentence structure see, e.g., Zewi 1992, and many more references there.

<sup>&</sup>lt;sup>34</sup> The term 'topic' is employed instead of 'subject' because it refers to grammatical subject, but also to logical subjects. For the term 'topic' see, e.g., Crystal 2003:468.

the introduction of parenthetical information into a text and the functional structure of the clause performing this task. As for the term 'topic shift,' Brown and Yule, for instance, say that "between two contiguous pieces of discourse which are intuitively considered to have two different 'topics', there should be a point at which the shift from one topic to the next is marked"; and "if we can characterize this marking of topic-shift, then we shall have found a structural basis for dividing up stretches of discourse into a series of smaller units, each on a separate topic." The discussion of topic-shift by Brown and Yule, which is aimed at uncovering and defining topic boundary markers, can also assist in identifying units which deviate from the main discourse, namely, parenthetical units.

Since all our examples appear within a narrative sequence, not in discourse, they should all be considered narrative parenthetical units. Yet while many studies might include these or similar examples under the general 'background' label,<sup>36</sup> only a small number of our examples come under this title (§2.3.1 below). A more detailed division is offered for all other examples in an attempt to classify the external information in them according to more specific contextual features. The examples are divided into six contextual types:

- (1) Examples which introduce background information.
- (2) Examples which express foreshadowing, i.e., they submit a piece of new information which anticipates a later development in the story.
- (3) Examples which introduce explanatory information
- (4) Examples which display theological apologetic remarks.
- (5) Examples which express historical remarks.
- (6) Examples which introduce other information marginal to the story line.

A description of the parenthetical content, and indication of the particular linguistic means employed to create the deviation from the main narrative line, accompanies each example.

<sup>35</sup> Brown & Yule 1983:94–95, §3.6.

<sup>&</sup>lt;sup>36</sup> For more references regarding 'background' see Eskhult 1990:35, §2.4.2. Eskhult himself attaches the label 'Episode Marginal Circumstantial' to such constructions, when they introduce episodes, though he is aware of the diversity of nuances expressed by them (Eskhult 1990:45–57, §3). Eskhult suggests that "the use of the essentially descriptive, and static, *subj-qtl* clause in episode-initial position is a trait of classical Hebrew narrative art, perhaps moulded on oral narrative technique" (Eskhult 1990:57, §3.5).

#### 2.3.1 Examples Introducing Background Information

The term 'background information' is widely used as a general label for any information external to the narrative sequence that breaks the narrative flow. In this book it is restricted to extra information inserted into the story by the scribe or narrator to facilitate understanding of certain developments that could not be understood without it. As to syntactic status, these parenthetical examples are all circumstantial clauses introduced by the conjunctive  $w\bar{a}w$ . The clause patterns which form these circumstantial clauses vary: they can be nominal, existential, and verbal with a suffix conjugation verb. In many verbal clauses the word order is inverted and the clause opens with a subject instead of the verb—subject word order that typically outlines the narrative sequence.

The first two examples, Gen. 12:6 and 13:7, give information about the inhabitants of the land in which Abram and Lot chose to dwell. This knowledge is important for understanding later developments in the story which include problems in these characters' interactions with local inhabitants and in finding the land too small for both of them to herd cattle. In both examples the information is displayed by circumstantial nominal clauses.<sup>37</sup> These are evidently scribal or narrator's additions, since they include the time co-ordinate particle 18, which indicates a point in time different from that of the scribe or narrator.

Gen. 12:6—וְיַשֲבֹר אַבְרְם בְּאָרֶץ עֵד מְקוֹם שְׁכֶם עֵד אֵלוֹן מוֹרֶה וְהַכְּנַעֵנִי אָּוֹ "Abram passed through the land to the place at Shechem, to the oak of Moreh. **At that time the Canaanites were in the land**."

Gen. 13:7—יִב בֵּין רֹעֵי מִקְנֵה-אַבְרֶם וּבֵין רֹעֵי מִקְנֵה-אָבְרֶם וּבֵין רֹעֵי מִקְנֵה-לוֹט וְהַכְּנַעֲיִי וְהַפְּרָזִי "And there was strife between the herdsmen of Abram's cattle and the herdsmen of Lot's cattle. At that time the Canaanites and the Perizzites dwelt in the land."

The parenthetical information in the next two verses tells us that the priest of Midian had seven daughters. This information marks the beginning of a new story, and it is indispensable background for under-standing the development of the story, in which the daughters of the priest of Midian

Though both clauses are considered nominal in that a participial clause is regarded as a sub-type of a nominal clause, they are not entirely similar in structure. The first clause is an apparent nominal clause whose predicate is the prepositional phrase אָרָאָר, the second is a participial clause whose predicate is the prepositional phrase אָרָאָר, like that in the first clause, plays in it the syntactic role of an adverbial. Nonetheless, the clauses provide similar contents.

play an important part.<sup>38</sup> This parenthetical, albeit very important information, is introduced into the text by a circumstantial nominal clause made of a prepositional phrase and a noun phrase and functioning as a possessive clause, and it breaks a narrative flow composed by many wayyiqtol verbs, i.e., וַיִּבְקָשׁ וָיִבְקָשׁ , וַיִּבְקָשׁ , וַיִּבְקָשׁ , וַיִּבְקָשׁ , וַיִּבְקָשׁ , וַיִּבְקָשׁ .

Exod. 2:15–16—וּלְבֶּקְשׁ לַהְרֹג אֶת-מֹשֶׁה וַיְּבְקַשׁ לַהְרֹג אֶת-מֹשֶׁה וַיְּבְקַשׁ לַהְרֹג אֶת-מֹשֶׁה וַיְּבְקַשׁ בַּּלְתוֹ וַתְּבֹאנְה מַשְּה מִפְּנֵי פַּרְעָה וַיֵּשֶׁב בְּאֶרֶץ-מִדְיָן וַיֵּשֶׁב עַל-הַבְּאֵר. וּלְכֹהֵן מִדְיָן שֶּׁבַע בְּּנוֹת וַתְּבֹאנְה מֹשֶׁה מִפְּנֵי פַּרְעָה וַיִּשֶּׁב בְּאֶרֶץ-תְּדְיָן וַיִּשֶּׁב בְּאֶרֶץ-תְּדְיִן וְיַשֶּׁב עַל-הַבְּאֵר "When Pharaoh heard of it, he sought to kill Moses. But Moses fled from Pharaoh, and stayed in the land of Midian; and he sat down by a well. Now the priest of Midian had seven daughters; and they came and drew water, and filled the troughs to water their father's flock."

Bible translations might feel a need to signify the shift to the parenthetical clause by some sort of a special marking. For example, the Geez Bible translation marks the first word, וְהַבְּנַעֵנִי אָוֹ בָּאָרֵץ, of the parenthetical clause of Gen. 12:6 above by attaching the emphatic enclitic particle -ssa to its end, אַרָּאָלוּא /אַרָאָרָא (מַרְאָרָא לָּמִרָּא to its end, אַרְאָרָא fana (!)an-ə-ssa. This particle usually marks contrast; the JPS starts its translation of וּלְּבָנִעְנִי שָּׁבַע בְּנוֹת Exod. 2:16 above with the word 'now': "Now the priest of Midian had seven daughters."

The parenthetical clause in Exod. 34:29 below tells of Moses having radiant skin when he descended from Mount Sinai. This piece of information is essential background for understanding the ensuing situation, where Aaron and the Israelites are afraid to approach Moses because of the strangely glowing appearance of his skin.

Exod. 34:29–30— וְּחָר בְּיֵר בְּיִר בְּיִר הְשָׁר בְּרִר מְשֶׁה מֵהַר סִינִי וּשְׁנִי לְחֹת הְעֵדֶת בְּיַר-מְשֶׁה בְּרִדְת מֹשֶׁה מַהַר סִינִי וּשְׁנִי לְחֹת הְעֵדֶת בְּיַרוֹ אָחֹוֹ. וַיִּרְא אַהְרֹן וְכְל-בְּנֵי יִשְׂרָאֵל מִן-הָבְּר וֹ אָחֹוֹ. וַיִּרְא אַהְרֹן וְכְל-בְּנֵי יִשְׂרָאֵל מִשֶּׁשׁת אַלְיי When Moses came down from Mount Sinai, with the two tables of the testimony in his hand as he came down from the mountain, Moses did not know that the skin of his face shone because he had been talking with God. And when Aaron and all the people of Israel saw Moses, behold, the skin of his face shone, and they were afraid to come near him."

The two following verses, Judg. 4:4 and Judg. 4:5, begin a new story, that of the prophet Deborah who served as a judge. They describe

<sup>&</sup>lt;sup>38</sup> Andersen 1974:79 mentions this example among others in which the circumstantial clause is "episode-Initial".

<sup>&</sup>lt;sup>39</sup> On the function of this particle see Dillmann 1907:412–413, §168,5.

Deborah's marital and professional status and outline her daily work. This information is important background for understanding Deborah's later involvement in the coming war between Barak, son of Abinoam, and Sisera, the commander of Jabin's army. Both verses are circumstantial nominal clauses introduced by a conjunctive  $w\bar{a}w$ . The first circumstantial clause, ודבורה אשה נביאה אשת לפידות היא שפטה את-ישראל ההיא, is independent, while the second, בעת החת-תמר דבורה, is independent, while the second, בין בית-אַל בהר אָפַריִם, is attributed to a specific head, since it describes a grammatical agent, namely Deborah herself, who is mentioned in the first clause. The special status of Devorah in the latter circumstantial clause is nicely marked in the Geez Bible translation, which repeats the proper name instead of using a personal pronoun and attaches to it the emphatic enclitic particle -ssa, which generally marks contrast: ወዲቦራስ/wa-Diborā-ə-ssa.40 Note that the first verse includes the co-ordinate time phrase בַּעַת הַהִיא which should in itself be regarded as a scribe's or narrator's external remark introduced into the text in a later period. Such phrases are very common in biblical narrative, and they are discussed in length below.<sup>41</sup>

Judg. 4:4–5—אָשָׁה נְבִיאָה אֵשֶׁת לַפִּידוֹת הִיא שֹׁפְּטָה אֶת-יִשְׂרָאֵל בְּעֵת- אֲשָׁה נְבִיאָה אֵשֶׁת לַפִּידוֹת הִיא שֹׁבְּטָה בִּין בִית-אֵל בְּהַר אֶפְרִים וַיַּעֲלוּ הַהִיא. וְהִיא יוֹשֶׁבֶת חַחַת-חֹמֶּל דְּבוֹיְה בֵּין הָרְמָה וּבִין בִּית-אֵל בְּהַשְּׁפְּט הַהִיא. וְהִיא יוֹשֶׁבֶת הַחַת-חֹמֶּל לְבִּשְּׁפְּט "Now Deborah, a prophetess, the wife of Lappidoth, was judging Israel at that time. She used to sit under the palm of Deborah between Ramah and Bethel in the hill country of Ephraim; and the people of Israel came up to her for judgment."

The information presented in the next example, Judg. 17:6, which relates the absence of leadership and law enforcement in Israel, is probably again a scribal or narrator's later addition, and it is also marked as such by the co-ordinate time phrase בּיָמִים הָהַבּּ <sup>42</sup>. This addition is essential background information, explaining how the subsequent event, told in Judg. 17:7–13, where a Levite becomes a priest against the ordinary rules, could come about. The clause בְּיִשְׁרָאֵל and its variants also appear elsewhere, in Judg. 18:1, 19:1 and 21:25. In all these cases they precede a discussion of life without law enforcement. In the verse discussed here two formulas actually appear,

<sup>&</sup>lt;sup>40</sup> Dillmann 1907:412-413, §168,5.

<sup>41</sup> See §3.2.4 below, and also Brin 1986:47-50.

<sup>&</sup>lt;sup>42</sup> See §3.2.3 below, and also Brin 1986:50-52.

as the formula בּיְמִים הָהֵם אֵין מֶלֶּדְ בְּיִשְׂרָאֵל is followed by another with similar content: אִישׁ הַּיִּשֶּׁר בְּעֵינְיו יַעֲשֶּׁה. As may be expected, the Arabic al-kitāb al-muqaddas reflects the habitual past nuance in this verse by inserting the existential Arabic verb אִישׁ הָהָם אֵין מֶלֶךְ בְּיִשִּירָאֵל, conveying the past tense: בִּימִים הָהֵם אֵין מֶלֶךְ בְּיַשִּׂרָאֵל in the existential clause בִּימִים הָהֵם אֵין מֶלֶךְ בְּיַשִּׂרָאֵל , and rendering the verb יוֹ יַעֲשֶּׁה הַעַּיִין יַעֲשֶּׁה הַעַּיִין יַעֲשֶּׁה by the verbal phrase פַּשִׁינִין יַעֲשֶּׁה בְּעֵינִין יַעֲשֶׂה הַשׁל אַיֹע בַּעִינִין יַעֲשֶׁה habitual practice. Similarly, the Peshitta expresses the habitual nuance in this verse by the participle + the auxiliary existential verb: מַבּע מַבּע (h)wā.

Judg. 17:6—בַּיָמִים הָהֵם אֵין מֶלֶךְ בְּיִשְׂרָאֵל אִישׁ הַיָּשֶׁר בְּעֵינְיו יַעֲשֶּׁה "In those days there was no king in Israel; every man did what was right in his own eyes."

The background information in the next example introduces the story told in chapter 18 in the book of Judges about the people of the tribe of Dan looking for a land and taking the law into their own hands by inducing the priest of the local prophet Micah to leave him and join them behind Micah's back and by taking by force the city of Laish.

Judg. 18:1—אָבֶל הַבְּיִשְׂרָאֵל וּבַיְּמִים הָהֵם שֵׁבֶט הַדְּנִי מְבַקֶּשׁ-לוֹ נַחֲלָה בְּיִשְׂרָאֵל וּבַיְמִים הָהֵם שֵׁבֶט הַדְּנִי מְבָקֶשׁ-לוֹ נַחֲלָה בְּיִשְׂרָאֵל בְּנַחֲלָה "In those days there was no king in Israel. And in those days the tribe of the Danites was seeking for itself an inheritance to dwell in; for until then no inheritance among the tribes of Israel had fallen to them."

The circumstantial clause indicating a lawless state in the following verse introduces the dreadful story of the concubine on Gibeah of Benjamin told in chapters 19–21 of Judges. The concluding verse of the last chapter, Judg. 21:25—נְּמָים הָהֵם אֵין מֶלֶךְ בְּיִשְׂרָאֵל אִישׁ הַיְשֶׁר בְּעִינְיו "In those days there was no king in Israel; every man did what was right in his own eyes," again, repeats the formula, בַּיָמִים הָהֵם אֵין, while adding the other formula exhibiting complementary content: אִישׁ הַיִּשׁר בְּעִינִיו יַעֲשֶׂה.

Judg. 19:1—נְיְהִי בִּיְמִים הָהֵם וּמֶּלֶּךְ אֵין בְּיִשְׂרָאֵל וְיְהִי אִישׁ לֵּוִי גְּר בְּיִרְבְּתֵי הַר-אֶפְרִים הְּהָם וּמֶלֶךְ אֵין בְּיִשְׂרָאֵל וְיְהִי אִישׁ לֵּוִי גְּר בְּיִרְבְּתִי הַר-אֶפְרִים יְהוּדְה יְהוּדְה "In those days, when there was no king in Israel, a certain Levite was sojourning in the remote parts of the hill country of Ephraim, who took to himself a concubine from Bethlehem in Judah."

The following verse, 1 Sam. 13:19, and the subsequent verses 20 and 21, tell how the Israelites made agricultural tools out of weapons at the Philistines' orders. This information is provided as a background to

the Israelites' circumstances, revealed in verse 22; they did not possess any weapons that could be used for fighting the impending war with the Philistines. The clause is a circumstantial verbal clause in the order of subject יְּמָצֵא –predicate אָלָא יִמְצֵא , and it therefore involves a word order inversion, opposite to the expected word order in narrative verbal clauses of verb–subject.

1 Sam. 13:19 פְּרְשְׁתִּים פֶּּן בְּלְשְׁתִי יִשְּׂרָאֵ לִּיִּרְ יִשְּׂרָאֵ בְּכֹל אֶרֶץ יִשְּׂרָאֵ בְּיִרִם בְּלְשְׁתִּים בָּּוֹ בְּלִשְׁרִים חֶרֶב אוֹ חֲנִית "Now there was no smith to be found throughout all the land of Israel; for the Philistines said, 'Lest the Hebrews make themselves swords or spears.'"

The next parenthetical verse contains several clauses introducing the story of the murder of a grandson of Saul and David's treatment of his killers. The story provides information regarding the special condition of Saul's grandson as crippled, which is important for understanding the essence of this murder and the reason for David's rage at the murderers. As to the syntactic technique, the first clause, וְלִיהוֹנֶתוֹ בֵּן-שַׁאוּל בן גבה רגלים, is circumstantial and nominal, and is composed of a prepositional phrase and a nominal phrase expressing possessiveness. The succeeding clauses tell a secondary parenthetical story, which goes back to earlier events that caused the crippling of Saul's grandson. At this point the syntactic technique changes. First, the verb היה in used in the second nominal clause, בַּן-חַמַשׁ שַנִּים הַיָּה בַּבֹא שַמְעַת שַאוּל וְיהוֹנַתוֹן מיזרעאל, affirming its status as occurring in the distant past. The subsequent clauses go back to the verbal pattern typical of a narrative sequence, namely the use of a chain of wayyiqtol verbs: ותנס, ותשאהו, ניפסח, ויפסח, ויפסח, ויפסח. The end of this secondary story is marked again by a nominal clause, ושמו מפיבשת.

2 Sam. 4:4—מָמֵל בֶּּלְיִם הָּיְה בְּלֹאִים הָּיְה בְּלֹא שְׁמְעַה בְּּן-חָמֵשׁ שָׁנִים הְיָה בְּלֹא שְׁמְעַה בַּּן וְכָּח וַיְּפָּטַח וּשְׁמַה לְּנִוּס וַיְּפִּל וַיִּפְּטַח וּשְׁמַה לְנִוּס וַיְפִּל וִיִּפְּטַח וּשְׁמַה "Jonathan, the son of Saul, had a son who was crippled in his feet. He was five years old when the news about Saul and Jonathan came from Jezreel; and his nurse took him up, and fled; and, as she fled in her haste, he fell, and became lame. And his name was Mephibosheth."

In the last three examples a circumstantial nominal clause introduces a new character and at the same time opens a new story; it does not just convey background information but also marks topic shift. These circumstantial nominal clauses should also be considered parenthetical, since the information they contain is not part of the following story but only adds relevant information. 72 Chapter two

1 Kgs. 10:1 וְמַלְכַּח-שְׁבָא שֹׁמֵעַת אֶּח-שֵׁמַע שְׁלֹמה לְשֵׁם הי וַתְּבֹא לְנַסֹתוֹ "Now when the queen of Sheba heard of the fame of Solomon concerning the name of the LORD, she came to test him with hard questions."

2 Kgs. 3:4—מּאָב הָּיָה נֹקֵד וְהַשִּׁיב לְמֶלֶּדְ-יִשְׂרָאֵל מֵאָה-אֶלֶף כָּרִים דְּמֶּר הַיְּאָר הַיִּלִים צָמֶר "Now Mesha king of Moab was a sheep breeder; and he had to deliver annually to the king of Israel a hundred thousand lambs, and the wool of a hundred thousand rams."

Ruth 2:1—וֹלְנֶעֲמִי מְיָדָע מוֹדַע לְאִישָׁהּ אִישׁ גָּבּוֹר חַיִל מִמְשְׁפַּחַת אֱלִימֶלֶךְ וֹשְׁמֹּר מִידָע לְאִישָׁהּ אִישׁ גָּבּוֹר חַיִל מִמְשְׁפַּחַת אֱלִימֶלֶךְ וֹשְׁמֹר "Now Naomi had a kinsman of her husband's, a man of wealth, of the family of Elimelech, whose name was Boaz."43

As demonstrated in this section, background information does not always interrupt a sentence or a story, but may occasionally appear as an introductory clause. 44 Such information still deviates from the story line and interrupts the narrative flow, but it does not necessarily interrupt a specific sentence. The analysis of this information as parenthetical might therefore be controversial. Certain scholars might differentiate between introductory background information and what they regard as a real parenthetical clause, namely information that interrupts not just the narrative flow but a specific sentence. A well-known example of this controversy concerns Gen. 1:1-3—אמים ואת השמים את ברא אלהים את ברא שלהים את ברא שלהים את ברא שלהים את השמים ואת הארץ. והארץ היתה תהו ובהו וחשר על-פני תהום ודוח אלהים מרחפת על-פני "In the beginning God created the הַּמָּיִם. וַיֹּאמֶר אֱלֹהִים יִהִי אוֹר וַיִהִי-אוֹר heavens and the earth. The earth was without form and void, and darkness was upon the face of the deep; and the Spirit of God was moving over the face of the waters. And God said, 'Let there be light'; and there was light." Numerous translations and interpretations of this verse consider verse 2 a parenthetical clause, situated between a temporal clause (verse 1) and its main clause (verse 3), e.g., the JPS translation: "When God began to create heaven and earth—the earth being unformed and void, with darkness over the surface of the deep and a wind from God sweeping **over the water**—God said, 'let there be light'; and there was light." Likewise Saadya Gaon's Arabic translation, which begins verse 1 with

<sup>&</sup>lt;sup>43</sup> Note Dawson's remark about the opening of the book of Ruth and off-line clauses, in Dawson 1994:181, §3.2.4.

<sup>&</sup>lt;sup>44</sup> As stated above, this introductory pattern was pinpointed by Eskhult, who refers to it as 'Episode Marginal Circumstantial' (Eskhult 1990:45–57, §3).

the subordinate temporal phrase אול מא and not the adverb אולא. <sup>45</sup> But other translations, like the *RSV* translation above, *al-kitāb al-muqaddas*, the Geez Bible translation, Onkelos, and the *Peshitta*, take verses 1 and 2 as independent clauses, introducing the narrative with two non-parenthetical clauses expressing background information. <sup>46</sup>

## 2.3.2 Examples of Foreshadowing

As for content, all the examples in this section, like those expressing background information discussed above, introduce extra information important for understanding later developments in the story. This time, however, the extra information also foreshadows a coming event, that is, it intimates a later development in the story. Foreshadowing as both an editorial and a literary technique in Biblical narrative has been observed and recognized by several scholars including medieval Bible interpreters. Regarding syntactic status, as stated above the clause patterns employed for foreshadowing are all circumstantial clauses introduced by the conjunctive  $w\bar{a}w$ . The clause patterns which form these circumstantial clauses vary: they can be nominal, existential, and verbal containing a suffix conjugation verb, and can also reveal word order inversion. It is not always easy to distinguish purely background

<sup>&</sup>lt;sup>45</sup> Derenbourg Edition: 5, note 1. The interpretation reflected in this translation was also suggested by the famous Bible commentator, Rashi: ואם באת לפרשו כפשוטו כך פרשהו בראשית בריאת שמים וארץ והארץ היתה תהו ובהו וחשך ויאמר אלהים יהי אור. ולא בא המקרא להורות סדר הבריאה לומר שאלו קדמו, שאם בא להורות כך, היה לו לכתוב בראשונה ברא את השמים וגו', שאין לך ראשית במקרא שאינו דבוק לתיבה של אחריו...אף כאן בראשית ברוא אלהים וגו', כמו בראשית ברוא "If you come to explain it according to its simple meaning, explain it as follows: "In the beginning of the creation of the heavens and the earth, when the earth was bewilderment and void and there was darkness..., God said, 'Let there be light.'" The verse does not come to teach the order of Creation by saying that [the heavens and the earth] came first, for if this is what it came to teach us, it should have written, "At First, He created the Heavens, etc.," for you have no instance of the word ראשית in Scripture that is not attached to the word that follows it... Here, too, you should say that the phrase בראשית ברא אלהים is to be understood as in the beginning of the creating." Hebrew version and English translation of Rashi's comment are according to Herczeg & Others 1995:3. Also note ibid.:3, note 6.

<sup>&</sup>lt;sup>46</sup> For this controversy see, e.g., Goldenberg 1995:28–29 and Winther-Nielsen 1992. Goldenberg considers the first view as superior while Winther-Nielsen prefers the second.

<sup>&</sup>lt;sup>47</sup> See, e.g., Zakovitch 1985, and p. 85 for other references.

<sup>&</sup>lt;sup>48</sup> Circumstantial clauses are very frequent in Arabic, so it is not surprising that most of them are translated by a similar circumstantial pattern in Arabic in both Saadya Gaon's medieval translation for examples from the Pentateuch and in *al-kitāb al-muqaddas* for all examples.

information from extra information foreshadowing coming events. Each of the following examples is accompanied by an explanation of how in these cases foreshadowing is accomplished in the content of the parenthesis.<sup>49</sup>

In the first example below, Gen. 3:1, the parenthetical information anticipates the behavior of the snake, which immediately enters the story after the parenthetical information about his cunning is given. <sup>50</sup> Zevit insightfully writes about this verse: "It was mentioned here, however, because it cued the audience to attend carefully to the following conversation which would hardly be as casual and innocent as it may have appeared." The clause type used for the parenthesis is nominal, opening with a noun phrase אָהַבְּּהָשׁ, whose syntactic status is the subject.

As in a number of previous examples the special status of the snake in this clause, in contrast to the whole context, is particularly emphasized in the Geez translation by use of the emphatic enclitic particle -ssa suffixed to it: ሙሉርዊምድርስ / wa-ʾarwe mədr-ə-ssa, and in the JPS by use of the opening word 'now.' The nominal clause intervenes between preceding and following verbal clauses, the verbs of which belong to the prefix conjugation. Whenever possible they follow the so-called conversive wāw, namely the wayyiqtol forms יַּיְּהָנִי and יַּיְּהָנִי in the preceding verse Gen. 2:25, and יַּיְּהָנִי in the continuing part of Gen. 3:1, which follows the parenthetical clause.<sup>53</sup>

Gen. 3:1—הַּנְּחָשׁ הְיָה עֶּרְוּם מַכּּל חַיַּח הַשְּּדֶה אֲשֶׁר עָשָּׁה הי אֱלֹהִים וַיֹּאמֶר אֱלֹהְים מִכּל עֵיִ הַנְּּגְן הַשְּּדֶה הי אֱלֹהִים לֹא תֹאַכְלוּ מִכּל עֵץ הַנְּּגְן הַיּגְן הַנְּגֹן הַבְּל עֵץ הַנְּגְן הַנְּגֹן הַמְּל עִץ הַנְּגְן הַנְּגֹן מִכּל עֵץ הַנְּגְן הַמְּל Mow the serpent was more subtle than any other wild creature that the LORD God had made. He said to the woman, 'Did God say, 'You shall not eat of any tree of the garden'?'"

<sup>&</sup>lt;sup>49</sup> Note also Bailey's examples of foreshadowing in genealogical lists in Genesis (Bailey 1994:273–274) and Sternberg's discussion of "modes of shaping the narrative future" which include foreshadowing (Sternberg 1985:268–283) and "epithets and the rule of forward-looking exposition" which also refers to foreshadowing (Sternberg 1985:337–341).

<sup>&</sup>lt;sup>50</sup> Andersen 1974:79, §5.1.1 explains this example as an "episode-initial circumstantial clause" and gives other examples which play a similar role.

<sup>&</sup>lt;sup>51</sup> Zevit 1998:22.

<sup>&</sup>lt;sup>52</sup> The use of the conversive  $w\bar{a}w$  is avoided in this verb, since it follows the negation particle אל.

<sup>&</sup>lt;sup>53</sup> Note that the division of the Bible into verses and chapters is rather late in time, and though this division conforms in this case to the turning point in the biblical story, the last verse of the preceding chapter 2 should be read with the first verse of the following chapter 3 as one sequence.

The parenthetical remark about Noah in the next examples marks the entrance of this character into the biblical flood story. At the same time it hints at the better fate of Noah than that of the other human beings and other creatures later hit by the flood. This anticipation is formed here by using the Hebrew phrase מצא חן, which shows that God had a better opinion of Noah than of his other creatures. As to the linguistic means used for composing the parenthesis, the clause is a verbal one, whose verb nevertheless belongs to the suffix conjugation.<sup>54</sup> The clause also shows an inversion of word order from the regular third person prefix conjugation verb following a consecutive wāw-subject word order of the narrative sequence revealed in the verb ויאמר which opens verse 7, to subject–suffix conjugation verb. In fact, the chain of narrative verbs is broken twice in these two verses: once by the speech utterance which employs a first person prefix conjugation verb, אמחה, followed by the suffix conjugation verbs נְתְמְתִּי in a relative clause and נַתְמְתִּי and עַשִּיתִם and עַשִּיתִם in causal clauses, and again by the parenthetical clause.

Awareness of the break in the narrative flow is further reflected in the al-kitāb al-muqaddas translation, which transforms the pattern of the clause ' أَمَّا نَوْتُ فَوَجَدَ نَعْمَةُ فِي عَيْنِي الرَّبِ This pattern: إِذَا الرَّبِ اللَّهِ الرَّبِ اللَّهِ اللَّهُ الْعُلِمُ اللَّهُ ال

Gen. 6:7–8—ניֹאמֶר ה׳ אֶמְחֶה אֶת-הָאָדָם אֲשֶׁר-בָּרָאתִי מֵעַלֹּ פְּנֵי הָאֲדְמָה מֵאַדְם אָמֶר ה׳ אָמְחֶה אֶת-הָאָדָם אֲשֶׂר-בָּרָאתִי מֵעַלֹּ פְּנֵי הִי עִדְּ-בְּהָא חֲן בְּעֵינֵי ה׳ עַד-בְּהֵמֶש וְעַד-עוֹף הַשְּׁמְיִם כִּי נִחַמְתִּי כִּי עֲשִׂיתִם. וְנֹחַ מְצָא חֵן בְּעֵינֵי ה׳ "So the LORD said, 'I will blot out man whom I have created from the face of the ground, man and beast and creeping things and birds of the air, for I am sorry that I have made them.' But Noah found favor in the eyes of the LORD."

The external information in the following verse anticipates the story which tells the awful fate of Sodom. In contrast to the pleasant words

<sup>&</sup>lt;sup>54</sup> See Zevit 1998:16, who considers this example an anterior construction expressing pluperfect, i.e., according to him, involving telicity and punctuality. On the difference between 'pluperfect', i.e., involving telicity and punctuality, and 'preperfect', i.e., not involving telicity or at least punctuality, according to Zevit, see Zevit 1998:39.

about Noah in the previous example that anticipate a good future for him, the disapproving description of the people of Sodom bodes the opposite. In this case the parenthetical information might also be considered apologetic, since it provides a theological explanation for a horrible outcome. Syntactically the clause pattern is nominal, and again it breaks the narrative flow marked by the preceding verb נְּשֵּׁבֶּל The special status of the subject, וְאֵבְּשִׁי סְדֹם, is indicated by the RSV use of 'now' in the translation of the beginning of verse 13 below, and it also appears in the JPS translation. The Geez Bible translation again uses the special contrastive emphatic enclitic particle —ssa: ወሰብት ሰዶምስ / wa-sab'a Sadom-ə-ssa.

Gen. 13:12–13—. אַבְרָם יְשַׁב בְּאֶרֶץ-בְּנָעֵן וְלוֹט יְשַׁב בְּעֶרֵי הַבּּכָּר וַיֶּאֱהַל עַד-סְדם. "Abram dwelt in the land of Canaan, while Lot dwelt among the cities of the valley and moved his tent as far as Sodom. Now the men of Sodom were wicked, great sinners against the LORD."

The parenthetical information revealed in the next example about Hannah being childless not only provides important background information for the following story but foreshadows the dramatic change in the story line. Hannah's fertility problems are to be solved, and the son who is to be born to her will serve God and play an important role in the life of the Israelites. Syntactically, the parenthetical clause is composed of two verbless clauses, a nominal clause and a negative existential clause.<sup>55</sup>

1 Sam. 1:2—וְלְּדִים לְּפְנְנָה וְיָהִי לְּפְנָנָה וְיָהִי לְפְנָנָה וְיָהִי לְפְנָנָה וְיָלְדִים שׁם אַחַת חַנָּה וְשֶׁם הַשֵּׁנִית פְּנָנָה וַיְהִי לְפְנָנָה יְלְדִים "He had two wives; the name of the one was Hannah, and the name of the other Peninnah. And Peninnah had children, but Hannah had no children."

The parenthetical information in the next verse appears at first out of context, since it does not relate to the contents of any of the adjacent verses. But further reading shows that this parenthetical information foreshadows in effect the story about what the scribe or narrator considered by bad behavior by Eli's sons. This bad behavior is conveyed only in the next chapters, first in 1 Sam. 2:12–17, then in 1 Sam. 3:13–14 which predicts the mortal fate awaiting Eli's sons, and thirdly in 1 Sam. 4:11, where the death itself is conveyed. The circumstantial clause is syntactically nominal, following and preceding verbal clauses.

<sup>&</sup>lt;sup>55</sup> Joosten refers to this section of the verse as an exposition (Joosten 1997b:80).

1 Sam. 1:3—הוא מַעִּירוֹ יְמִימְה לְהִשְּׁתַחְוֹת וְלִוְבֹחַ לַה׳ צְבָאוֹת מִימִים יְמִימְה לְהִשְׁתַּחְוֹת וְלִוְבֹחַ לַה׳ צְבָאוֹת בּהוּא מֵעִירוֹ מִיְמִים יְמִימְה לְהִשְׁתַּחְוֹת וְלִוְבֹחַ לַה׳ Now this man used to go up year by year from his city to worship and to sacrifice to the LORD of hosts at Shiloh, where the two sons of Eli, Hophni and Phinehas, were priests of the LORD."

The next verse is a circumstantial nominal clause referring to Samuel's role as a servant of God. Another circumstantial nominal clause revealing information about Samuel appears later in 1 Sam. 2:26: יְּנָשֵׁר "Now the boy Samuel continued to grow both in stature and in favor with the LORD and with men." The latter clause adds to the gradually accumulating information about Samuel's good qualities, and at the same time it foreshadows later positive developments related to him. This goes on until the point where Samuel finally becomes the main character in the story line, and he is found worthy of receiving God's revelation, as the story tells us from 1 Sam. 3:4 on.

1 Sam. 2:18—וֹּשְׁמוֹאֵל מְשֶׁרֵת אֶח-פְּנֵי הֹי נַעַר חְגוּר אֵפּוֹד בְּד—"Samuel was ministering before the LORD, a boy girded with a linen ephod."

The parenthetical information in the next example is a scribe's or narrator's historical remark regarding the rarity of prophecies in the days when the event of God's revelation to Samuel occurred. This remark counters the occurrence of that revelation, yet it foreshadows it by creating expectations of it. The parenthetical information is provided by a circumstantial nominal clause, אֵין הָהֶם, containing a similar massage. The phrase בַּיָמִים הָהֵם provides a time co-ordinate which shows that these clauses are late scribal or narrator's additions.

1 Sam. 3:1—הָמֶר שְׁמוּאֵל מְשְׁרֵת אֶת-ה׳ לִפְנֵי עֵלִי וּדְבַּר-ה׳ הָיָה יָקֶר בַּיְמִים מְּיִל מְשְׁרֵת אֶת-ה׳ לִפְּנֵי עֵלִי וּדְבַר-ה׳ הִיה יִקּר בַּיִּמִים מִין הְזוֹן נִפְּרָץ "Now the boy Samuel was ministering to the LORD under Eli. And the word of the LORD was rare in those days; there was no frequent vision."

### 2.3.3 Examples Introducing Explanatory Information

The following examples are clauses which provide explanations for certain states, events, and instructions, and their development or implementation in the story. As previously indicated, most of the information conveyed in these examples is inserted into the text by circumstantial clauses introduced by the conjunctive  $w\bar{a}w$ . Again, the circumstantial clause patterns can be nominal, existential, or verbal containing a suffix

conjugation verb, and they occasionally involve word order inversion. The examples begin with circumstantial clauses and continue with several other clause types.

The parenthetical information in the first example, Exod. 1:5, is in its second clause, וְיוֹסֵף הְיָה בְּמִצְּרָיִם. This clause deviates from the general portrayal of Jacob's descendents who went to Egypt, conveyed in the first clause of this verse. The parenthetical information in the second clause is meant to clarify the vague whereabouts of one of Jacob's offspring, namely Joseph, but its connection to the first clause is contextually loose and creates uncertainty, which as we shall see below has led to various alternatives in Bible translations. Syntactically the circumstantial parenthetical clause contains an auxiliary verb in the suffix conjugation, הָּיָה, and it should be considered as involving word order inversion, compared with the first clause initiated by a wayyiqtol form, וְיוֹסֵף, since it opens with a nominal subject, וְיוֹסֵף, and the suffix conjugation auxiliary verb stands in second position.

 $\operatorname{Exod.} 1:5$ יַנְקּט יִּצְאֵי יֶרֶדְּ-יַעֲקֹב שִּׁבְעִים נְפָּשׁ וְיוֹסֵף הָיָה בְּמִצְרִיִם ( $\operatorname{GF}$  first of Jacob were seventy persons; **Joseph was already in Egypt**."

To tackle the aforementioned uncertainty of this verse several of the translations suggest easier amended versions. Contrary to the *Peshitta*, which translates literally— com and / w-Yāwsep hwā b-Meṣrēn, other translations examined for this study are more flexible. For example, all versions of Saadya Gaon's Arabic translation add before Joseph's name in the second clause, to indicate that Joseph is also considered one of Jacob's offspring and at the same time to create a logical connection between the two parts of the verse. However, the rendering of the continuation of this circumstantial clause has more than one variant in these Arabic versions. The version found in Ms. St. Petersburg. maintains a circumstantial clause initiated by , while the Derenbourg edition and the Ḥasīd edition have relative clauses in that place. In contrast, the modern Christian Arabic al-kitāb al-muqaddas translates the entire clause by a causal clause pattern.

These Arabic translations in full are as follows. Ms. St. Petersburg: במצר אלכארגון מן צלב יעקוב סבעין נפסא מע יוסף והו במצר "All the offspring of Jacob were seventy persons including Joseph, while he was in Egypt." Derenbourg edition: וכאן ג ׳מלה אלנפוס אלכ׳ארג׳ה "All the offspring מן צלב יעקוב סבעין נפסא מע יוסף אלדיי כאן במצר "All the offspring of Jacob were seventy persons including Joseph, who was in Egypt."

ובאן גמלה אלנפוס אלכ יארגה מן צלב יעקוב סבעין נפסא מע גמלה אלנפוס אלכ יארגה מן צלב יעקוב סבעין נפסא מע במצר "All the offspring of Jacob were seventy persons including Joseph, who was in Egypt." מּן-kitāb al-muqaddas: وَكَانَتْ جَمِيعُ مَّالُ وَكَانَتْ عَمِيعُ مَّا وَكَانَ فِي مَصْرَ وَكَانَتْ عَمِيعُ مَا الْخَارِجِينَ مَنْ صُلْبِ يَعْقُوبَ سَبْعِينَ نَفْسًا وَلَكِنْ يُوسُفُ كَانَ فِي مِصْرَ "All the offspring of Jacob were seventy persons, but Joseph was in Egypt." The variety demonstrated here undoubtedly exposes the translators' hesitation regarding the loose connection between this clause and the preceding one, and regarding the structure of the circumstantial clause in itself.

Uncertainty about the connection between the two clauses is also revealed in the Geez Bible translation, which inverts their order, thus allowing Joseph to be included in the counting of Joseph's offspring: ወዮሴፍስ ሀሎ ብሔረ ግብጽ ወኮነት ኵሳ ነፍሰ እንተ እምያሪቆብ ሰብዓ/ wa-Yosef-ə-ssa hallo bəhera Gəbs wa-konat kwəlla nafs 'ənta 'əm-Yā'qob sab'ā. Furthermore, the attachment of the emphatic enclitic particle -ssa to the proper name of Joseph marks its special position in contrast to the surrounding clauses. The JPS too establishes some sort of a connection between the two clauses by using the gerund in the second clause: "The total number of persons that were of Jacob's issue came to seventy, Joseph **being** already in Egypt." Onkelos II provides several Aramaic versions which deviate from the Hebrew construction by adding the Aramaic relative particle -ד, and turning the clause ויוֹסֶף הֵיָה בָמָצְרָיִם into a phrase, namely יוֹסֵף becomes a head and היה במצרים a relative clause functioning as its attribute: ויוסף דהוה במצרים. These versions are found alongside other more literal versions lacking the Aramaic relative particle. Versions with the preposition עם יוסף, 'with', namely עם יוסף, similarly to Saadya Gaon, also exist in a few Aramaic versions.<sup>56</sup>

The parenthetical information in the next example immediately follows the threat of a plague on the cattle belonging to the Egyptians. Its content, יְשִׁרְאֵל וּבִין מִקְנֵה מִצְּרִים וְלֹא יִמוּת מִכְּל-לִבְנֵי, explains that contrary to the losses that the Egyptians were expected to suffer, nothing ill was projected for the Israelites' cattle. However, an understanding of this clause part as parenthetical is not the only one possible, and Bible translations suggest other interpretations. Both the RSV translation cited below and the JPS translation regard the explanation regarding the cattle of the Israelites as part of God's speech intended to be delivered by Moses to Pharaoh. The JPS

<sup>&</sup>lt;sup>56</sup> Onkelos II:89.

even stretches Moses' speech farther, setting the close quote marks at the end of the last clause in verse 5. The Geez translation suggests an interpretation similar to the JPS. It sets in the translation of יָהַבְּלָה ה' in this clause a first personal pronoun instead of the name of God, making it, again, part of God's speech.

However, the clause וְּהַפְּלָה הֹ׳ בֵּין מִקְנֵה יִשְּׂרָאֵל וּבֵין מִקְנֵה מִצְּרָיִם וְלֹא מִכְּל-לִּבְנֵי יִשְׂרָאֵל וְבֵין מִקְנֵה מִצְּרָיִם וְלֹא may possibly also be regarded as parenthetical information deviating from God's speech intended to be delivered to Pharaoh by Moses, and offering an external parenthetical explanation regarding Moses, not Pharaoh. As to syntax, this clause does not involve word order change since it opens with a verb. But the verb itself belongs to the suffix conjugation, and if one regards it as part of the narrative and not the speech utterance the suffix conjugation should be understood as standing in contrast to the previous prefix wayyiqtol form, וְיִשְׁם, and to the later one, וְיִשְׁם, which create the narrative flow in this text.

Exod. 9:1–5—יְּאֶלֶר ה' אֱלֹ-מֹשֶׁה בֹּא אֶל-פַּרְעֹה וְדְבַּרְתָּ אֲלִיו כֹּה-אָמֵר ה' אֱלֹהֵי בְּּבְּלִי אָּת-הְיִנִי שַׁלַּח אֶת-עַמִּי וְעַבְּדְנִי. כִּי אִם-מְאֵן אַתָּה לְשַׁלֵּח וְעוֹדְף מְחְזִיק בְּם. הְנֵה הְעִבְּרִים שַׁלָּח אֶשׁר בַּשְּׁדֶה בְּשִּׁדֶה בְּשִּׁדְה בְּשְּׁדֶה בְּשְּׁדֶה בְּשְּׁדֶה בְּשְּׁדֶה בְּשִּׁדְה בְּאָדְיִם בְּבְּאַרִים בְּבְּאַרִים בְּבְּאַרִים וְלֹא יְמִּהּת מִּכְּל-לְבְנִי יִדְיִשְׁה ה' הַּבְּּבְר. וַיְּשֶׁם ה' מוֹעֵד לֵאמר מְחָר יַעֲשֶׁה ה' הַדְּבָר הַיָּה בְּאָרִץ בְּבְּר הָיָה בְּאָרִץ בְּבָר הַיָּשׁׁם ה' מוֹעֵד לֵאמר מְחָר יַעֲשֶׂה ה' הַדְּבָר הַיָּה בְּאָרֶץ בְּבְּר הַיָּה בְּשְׁרָה ה' מוֹעֵד לֵאמר מְחָר יַעֲשֶׁה ה' הַדְּבָר הַיָּה בְּאָרֶץ בְּבָּר הַיָּה בְּאַרְץ בְּבָר הַיָּה בְּאַרְץ בְּבָר הַיָּה בְּאַרְץ בְּבְּר הַיָּה בְּאַרְץ בְּבְּר הַיָּה בְּבְּר הַיָּה בְּאַרְץ בְּבְּר הַיָּה בְּבְּר הַיְּה בְּעִים ה' מוֹער לַאמר מְחָר יַעֲשֶׁה ה' הַדְּבָר הָיָּה בְּאָרִץ בְּבָּר הָיָה בְּבְּר הַיָּה בְּבְר הַיָּה בְּאַר, מְחָר יַעֲשֶׁה ה' הַיְּבָּר הָיָה בְּאָרִץ בְּבְּר הַיָּה בְּעִים ה' מוֹער לַאמר מְחָר יַעֲשֶׁה ה' הַיְּבָר הָיָה בְּאָר בְּעִים הְיוֹב בּאוֹת הוֹים בּבְּר הַיָּה בְּיִים הְּבְּר הַיְּה בְּעִים הְיּלְבְּר הְיִים הְּבְּר הָּהָה בְּיִים הְיִים הְיִים הְּבְּיִים הְיִּים הְּיִים הְּיִים הְּיִים הְּבְּיִים הְּיִים הְּיִּבְּיוֹת הְיִים הְּיִים הְיִים הְּיִים הְיִים הְּבְּיוֹי הְיִים הְיוֹים הְּבְּיִים הְּיִים הְּיִים הְיִים הְּיִים הְיִים הְּיִים הְּיִים הְּיִים הְּיִים הְיִים הְיִים הְּיִים הְּיִּיְם הְּיִים הְּיִים הְיִים הְּיִים הְּיִים הְּיִים הְּיִים הְּיִים הְּשִּרְים הְיִים הְיִים הְּיִבְּים הְּיִים הְּיִים הְּבְּבְיוֹי הַיְיְתְיוֹי בְּשְּיְתְים הְיִים הְעִים הְיוֹים הְיוֹים הְיוֹים בְּבְּיוֹים הְיִים הְיוֹים הְּבְּיוֹם הְיּבְּיוּת הְיִים הְיוֹים הְיוֹים הְיוֹים הְיוֹים בְּבְּיוֹים הְיִיבְּה בְּבְּיוֹים הְיוּיוֹים הְיוֹים הְיוֹים בְּבְּבְיוֹי הְיוֹים הְיוֹים הְּבְּבְיוֹי הְיְבְּיוּ הְבְּיוּים הְּבְּהְיוֹים הְיוֹים הְּבְּהְיוֹים הְּבְיבְּהְיוֹים הְיוֹים הְּבְּיוֹים הְּבְּה בְּיוֹים הְבְּהְיבְּבְייים הְבְּיְיבְיּהְיוְיבְיְבְּיוֹי הְבְּבְיוֹים הְבְּבְיוֹים הְּבְי

An interchange between verb types similar to the one found in the Biblical Hebrew text above, namely between wayyiqtol forms for the narrative sequence and qatal forms for breaking the sequence with a circumstantial clause, also appears in the Arabic translations of Saadya Gaon and al-kitāb al-muqaddas; however, the verbs in Arabic are the reverse, that is, qatal forms for the narrative sequence and yiqtol for breaking it by a circumstantial clause. Saadya Gaon's translation is: ת'ם קאל אללה למוסי אדכ'ל אלי פרעון וקל לה כד'א קאל אללה אלאה אלעבראניין אטלק קומי יעבדוני. פאנך אן אבית אן תטלקהם ועאדך מתמסך בהם. פאן אפה אללה כאינה פי מואשיך אלתי פי אלצחרא פי אלכ'יל ואלחמיר

The last clause in the next example describes the Israelites' situation, in contrast to the preceding clauses which talk about the Egyptians' situation. A syntactic change occurs in word order and type of clause, and the information about the Israelites is introduced into the text by a possessive clause composed of a prepositional phrase, the verb הַּיָה, and a noun phrase functioning as a subject. The circumstantial clause in this case thus shows contrast and topic shift, and it provides information external to the story line and explains how the Israelites did not suffer the blows that befell the Egyptians. The contrast between the parenthetical clause and the preceding is well expressed in the Geez translation by the attachment of the contrastive emphatic particle —ssa to אַרָּבָּל-בְּנֵי יִשְׂרָאֵל : שַּחְוֹיִאַר בְּנֵי יִשְׁרָאֵל : שַּחְוֹיִאַר בּיִבּי יִשְׁרָאֵל : שַּחְוֹיִא בּיִבּי יִשְׁרָאֵל : שַּחְוֹיִא בּיִבּי יִשְׁרָאֵל : שַּחְיִיא בּיִבְּי יִשְׁרָאֵל : שַּחְיִיא בּיִבּי יִשְׁרָאֵל : שַּחְיִיא בּיִבּי יִשְׁרָאֵל : שַּחְיִיא בּיִבּי יִשְׁרָאֵל : שִׁרְיִא בּיִבּי יִשְׁרָאֵל : בּיִבְּי יִשְׁרָאֵל : בּיִבְּי יִשְׁרָאֵל : בּיִבְּי יִשְׁרָאַל : בּיִבּי יִשְׁרָאַל : בּיִבְּי שְׁרַבּי יִשְׁרָא בּיִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבּי יִשְׁרָב יִבְּי יִבְּי יִבְּי יִבְּי יִבְּי יִשְרָב יִבְּי יִבְּי יִבְּי יִבְּי יִבְּי יִבְּי יִבְּי יִבְּי יִבְי יִבְּי יִ

Exod. 10:22–23 מַּשְׁרָיִם מְּלֶּה בְּכְלֹ-אֶרֶץ מִצְרִים חַשְּׁךְּאֲבֶּלָ הְבָּנִי מַלֹּה אָר יְדִים עַל-הַשְּׁמִים וַיְהִי חְשֶׁךְּ-אֲבֶל מְמָּחְתְּיו שְׁלֹשֶׁת יְמִים. לֹא-רָאוּ אִישׁ אֶת-אָחִיו וְלֹא-קְמוּ אִישׁ מִתּחְתְּיו שְׁלֹשֶׁת יְמִים. לֹא-רָאוּ אִישׁ אֶת-אָחִיו וְלֹא-קְמוּ אִישׁ הַהְּחַתְּיו שְׁלֹשֶׁת יְמִים. לֹא-רָאוּ אִישׁ אֶת-אָחִיו וְלֹא-קְמוּ So Moses stretched out his hand toward heaven, and there was thick darkness in all the land of Egypt three days; they did not see one another, nor did any rise from his place for three days; but all the people of Israel had light where they dwelt."

<sup>&</sup>lt;sup>57</sup> The underlined words are the verbs maintaining the narrative sequence.

to an earlier time line. In addition, the clause is constructed in the pattern of an extraposition by using the particle fa between the subject and the rest of the clause, thereby marking it as deviating from the main flow of instructions, which precede and follow it. qad appears in al- $kit\bar{a}b$  al-muqaddas as well. Reflecting the clause's actual meaning as explanatory, the  $\mathcal{J}PS$ , like the RSV below, chooses to translate it as a causal clause: "...since the Lord has warned you..."

Deut. 17:16—הָבֶּה לְּמַעֵן הַרְבּוֹת מָאֶרַיְמָה לְמַעֵן הַרְבּוֹת רֹלוֹ סוּסִים וְלֹא-יָשִׁיב אֶּת-הָעֶם מִאְרַיְמָה לְמַעַן הַרְבּוֹת "Only he must not multiply horses for himself, or cause the people to return to Egypt in order to multiply horses, since the LORD has said to you, 'You shall never return that way again.'"

The parenthetical information in the next example states that Samuel never before saw a vision. It is inserted in the midst of a story about God's first revelation to him. God calls Samuel twice, but Samuel, not expecting a call from God, runs to Eli instead of responding to it. Only after God's third call, which appears in the next verse (1 Sam. 3:8), does Eli realize that it is God who is calling Samuel, and he explains to him how to react. The parenthetical information is required at this point in the story because it explains how and why Samuel turns first to Eli instead of God every time he hears someone calling his name. The syntax of the parenthetical information is two verbal clauses, and the word order of each is twice subject-verb, one a suffix conjugation verb and the other a prefix conjugation verb following the time particle טָרֶם. The prefix verb is in indicative mood as is clearly evident from the regular form of a root with a third radical yod (גל"ה), a use typical of verbs following טרם. Verbs of this group can also take a shortened form, and they usually do so after the conversive wāw, but in this case the form is a regular indicative, probably expressing past continuous.<sup>58</sup> On account of word order and verbal forms that appear in the parenthesis, these clauses can clearly be considered as deviating from the main narrative sequence, in which we see, in the preceding and following verses, a chain of wayyiqtol verbs.

1 Sam. 3:7—יֹשְמוּאֵל מֶרֶם יְדָע אֶח-הי וְשֶׁרֶם יִנְּלֶה אֵלְיו דְּבַר-ה"Now Samuel did not yet know the LORD, and the word of the LORD had not yet been revealed to him."

<sup>&</sup>lt;sup>58</sup> On the use of *yiqtol* forms after טֶּלֶט for past and present see, e.g., *GKC* 1910:314—315, §107c, 481, §152r, Joüon & Muraoka 2006:342, §113].

The parenthetical information in the next verses explains the need expressed by David to compensate the Gibeonites for Saul's annovance at the alliance between the Gibeonites on one side and Joshua and the Israelites on the other, described in Josh. 9:3–15. The parenthesis in this case introduces a speech act, and it is composed of three clauses: the first clause is a nominal clause involving extraposition and an exceptive phrase, והגבענים לא מבני ישראל המה כי אם-מיתר האמרי.59 The second is a verbal clause in the order subject-verb, where the verb is a suffix conjugation verb, ובני ישראל נשבעו להם. The third is a verbal clause initiated by a prefix conjugation verb prefixed by a conversive  $w\bar{a}w$ , ויבקש שאול להכתם בקנאתו לבני-ישראל ייהודה. The structure of the first two clauses is untypical of the narrative. The structure of the third is typical of a narrative, but in this case it refers to an earlier story according to which Saul tried to harm the Gibeonites, and not to the speech event in which the parenthesis actually appears. The parenthesis in this text has a more obvious sign too, observed in the repetition of the verb of speech, coming once before the parenthesis and once after it.60

2 Sam. 21:2–3—אָבֶריִ ישְׁרָאַל הַפּּלְהִי וְהַבְּּרְענִים לֹאַ מִבְּנִי ישְׂרָאַל הְפַּלְחּח וַיִּאֹמֶר אֲלֵיהֶם וְהַבְּּבְענִים לֹאַ מִבְּנִי ישְׂרָאֵל לְהַכּּחְם בְּקַנֹּאַחוֹ הַפְּה בִּי אִם-מִיְּהֶר הְאֲמֹרִי וּבְנִי יִשְׂרָאֵל וְשְׁבְּעוֹ לְהָכּחְ בְּקַנֹּאַה וְּבְּבְּעוֹ לְהָכּחְ בְּקַנֹּאַה וְּבְּבְּעוֹ לְהָכּּחְ בְּקְנֹּאַה וְּבְבְּי יִשְׂרָאֵל וִיהּיְה וַיִּאֹמֶר דְּוִד אֶל-הַגּבְענִים מְה אָעֵשֶה לְכֶם וּבַמְּה אֲכַפֵּר וּבְרְכוּ הֹי "So the king called the Gibeonites. Now the Gibeonites were not of the people of Israel, but of the remnant of the Amorites; although the people of Israel had sworn to spare them, Saul had sought to slay them in his zeal for the people of Israel and Judah. And David said to the Gibeonites, 'What shall I do for you? And how shall I make expiation, that you may bless the heritage of the LORD?'"

In the remaining examples the parenthetical information is conveyed not in circumstantial clauses but in other clause types: causal in 1 Sam.

<sup>&</sup>lt;sup>59</sup> On the structure of nominal clauses involving extraposition see Zewi 1994. The structure of the nominal clause הָּמָבְּענִים לֹא מִבְּנֵי יִשְׂרָאֵל הָפְּה is according to type B (extraposed subject–predicate clause (composed of predicate–subject)) described in Zewi 1994:159–160, §9, 164, §12. On the structure of exceptive phrases in Biblical Hebrew see Zewi 1998.

<sup>&</sup>lt;sup>60</sup> On this repetition of the verb of speech see Miller 1996:219, §4.4.2, and the discussion of her view in section 1.4 above. Also see Sternberg 1985:120, where the lines about the Gibeonites in 2 Sam. 21:1–3 are considered expositional; also, "The exposition may unfold specific or general (Judg 16:4) information about the world, relate to individuals or groups,..." See there also the list of other exposition possibilities.

14:18 and 2 Kgs. 18:4 below, asyndetic in 1 Kgs. 13:18 below, and appositional in 2 Kgs. 15:12 below.

The verses preceding and following the one cited below describe the fear of Saul and the Israelites of an impending war with the Philistines. While waiting for the war to break out Saul decides to consult the ark of God. The information marked as parenthetical below was probably inserted into the text to explain how it was possible to consult the ark of God at that time, considering the stories of the capture of the ark of God by the Philistines (1 Sam. 4:11) and its placement in Kiriath-jearim after it returned to Israel (1 Sam. 7:1). Though the parenthesis does not say how the ark came to be with Ahijah, it mentions that at that time it remained with the Israelites. Unlike most parenthetical clauses, this one is not a circumstantial but a causal clause, and as expected from many parenthetical clauses the type of verb used is a suffix conjugation verb, deviating from the regular narrative chain of prefix conjugation verbs following a consecutive  $w\bar{a}w$ .

1 Sam. 14:18—וְּיֹאמֶר שְׁאוּל לַאֲחִיָּה הַגִּישָׁה אֲרוֹן הָאֱלֹהִים כִּי-הָיָה אֲרוֹן הָאֱלֹהִים הַגּישָׁה הַגִּישָׁה הַגִּישָׁה הַגִּישָׁה הַּרוֹן הָאֱלֹהִים כִּי-הָיָה "And Saul said to Ahijah, 'Bring hither the ark of God.' For the ark of God went at that time with the people of Israel."

The following example of 1 Kgs. 13:18 contains two verbal clauses referring to one speech act: בַּחֵשׁ לוֹ and יַבְּשִׁל לוֹ. The latter is repetitive of the former and appears superfluous, disconnected, and external to the whole clause. Nevertheless, this verbal clause does add parenthetical explanatory information, attached to the end of the verse probably by the scribe or narrator to explain the falsity of the preceding direct speech act. In syntactic structure the verbal clause בַּחֵשׁ לוֹ is asyndetic, consisting of a suffix conjugation verb as expected in many deviations from the main narrative flow, marked here by the wayviqtol verb of speech בְּחֵשׁ Bible translations may render this verse as a contrastive clause (the RSV has 'but'), or employ a conjunctive particle (the Peshitta has the conjunctive wāw), or render it as an asyndetic clause, lacking any conjunctive or contrastive particle (JPS, al-kitāb al-muqaddas, Targum Jonathan).<sup>61</sup>

<sup>&</sup>lt;sup>61</sup> I thank Prof. Jan Joosten for mentioning this example to me and for sending me his comments on it from his forthcoming book on the verbal system of Biblical Hebrew: "As signaled by the asyndesis and the verbal form, the last words are a digression from the narrative. "He lied to him" is not an event linked into the narrative sequence but an aside from the writer to the reader" ( Joosten, in preparation).

1 Kgs. 13:18—וְמַלְאָךְ דָּבֶּר אֵלִי בִּדְבַר ה׳ לְאמר הֹיִם בְּחֵשׁ לוֹ נַיִּם-אֲנִי נְבִיא בְּמוֹךְ וֹמְלְאָךְ דָּבֶּר אֵלִי בְּדְבַר ה׳ לְאמר "And he said to him, "I also am a prophet as you are, and an angel spoke to me by the word of the LORD, saying, 'Bring him back with you into your house that he may eat bread and drink water." **But he lied to him**."

The example in 2 Kgs. 15:12 below indicates the fulfillment of God's promise to Jehu mentioned in 2 Kgs. 10:30—ויאמר ה' אל-יהוא יעו אשר-הטיבת לעשות הישר בעיני ככל אשר בלבבי עשית לבית אחאב בני רבעים ישבו לך על-כסא ישראל"—"And the LORD said to Jehu, 'Because you have done well in carrying out what is right in my eyes, and have done to the house of Ahab according to all that was in my heart, your sons of the fourth generation shall sit on the throne of Israel." Zechariah, the king of Israel mentioned in 2 Kgs. 15:11, is a fifth-generation descendent of Jehu, the king of Israel. Syntactically, in contrast to the majority of the examples above the parenthetical clause is not circumstantial but appositional. It is also a nominal clause initiated by a personal pronoun which functions as a predicate and at the same time refers to antecedent content. Its structure is similar to appositional clauses providing an older place name or personal name, or information on month name, discussed in section 2.2.3 above. Note the brackets marking this piece of information in the RSV translation.

2 Kgs. 15:12 קָבי יִשְׁבוּ לְשָׁבוּ לְבֶּר אֶל-יַהוּא לֵאמֹר בְּנֵי רְבִיעִים יַשְׁבוּ לְּדְּבּר אָלֶּי, אֶל-יַהוּא לֵאמֹר בְּנֵי רְבִיעִים יִשְׁבוּ לְּדָּבְּר אָלַיִּהִי-בֵּן (This was the promise of the LORD which he gave to Jehu, 'Your sons shall sit upon the throne of Israel to the fourth generation.' And so it came to pass.)"

The external information in the next verse explains that a need to destroy the bronze serpent was still felt in that period, because the people of Israel still practiced burning incense to it. Once more, the clause holding the parenthetical information is not circumstantial but causal. The verbal usage in this verse, that is, the use of suffix conjugation form of היה + participle, is one possible way to express habitual past in Biblical Hebrew.<sup>62</sup>

 $2~{
m Kgs}$ . 18:4—הַאַשֶּׁרְה וְּכְתַת אֶת-הָמַּצֵּבֹת וְכָרַת אֶת-הָמָּשֵׁרָה וְשְׁרָאֵל מְקְפְּרִים לוֹ הַוֹּא הַסְּיה הָיוּ בְּנֵי-יִשְּׂרָאֵל מְקְפְּרִים לוֹ הַנְחַשְׁת אֲשֶׁר-עָשָיה משֶׁה כִּי עַר-הַיָּמִם הְהֵּמָּה הָיוּ בְּנֵי-יִשְּׂרָאֵל מְקְפְּרִים לוֹ הַוְשְׁתְּן "He removed the high places, and broke the pillars, and

<sup>&</sup>lt;sup>62</sup> For the use of suffix conjugation form of היה + participle for habitual past in Biblical Hebrew see, e.g., *GKC* 1910:360, §116r, Joüon & Muraoka 2006: 381–382, §121f.

cut down the Asherah. And he broke in pieces the bronze serpent that Moses had made, for until those days the people of Israel had burned incense to it; it was called Nehushtan."

# 2.3.4 Theological Remarks

The following are theological remarks, probably inserted by the scribe or narrator, to elucidate that the story develops as it does according to God's will. Clauses giving this information might be circumstantial, introduced by the conjunctive  $w\bar{a}w$ , but other clause types, mostly causal, fulfill this role as well. Contrary to all types of parenthetical clauses discussed so far, such content might also appear as part of the narrative sequence, with regular narrative syntax of a wayyiqtol verb preceding its subject. In such cases the clause does not break the narrative flow but creates continuation, so it cannot syntactically be considered as parenthetical. The assertion that it contains parenthetical information can be considered true only from a functional-pragmatic standpoint, not syntactically. As to the patterns of these clauses, those that are circumstantial and causal diverge from the regular narrative syntactic chain of wayyiqtol verbs preceding their subjects by possibly being nominal, existential, or verbal containing a suffix conjugation verb; they occasionally reveal word order inversion.

The following example indicates God's decision not to let the Israelites go through the land of the Philistines. The RSV, and likewise the JPS, Saadya Gaon's Arabic translations, al-kitāb al-muqaddas, the Geez translation, Onkelos, and the *Peshitta*, translate the clause providing this information syntactically as a main clause following a temporal one. Nonetheless, the clause וְלֹא-נַחֶם אֱלֹהִים דֶּרֶךְ אֶרֶץ פָּלְשָׁתִּים כִּי קרוֹב הוֹא is introduced by the conjunctive  $w\bar{a}w$ , and its verbal pattern containing a suffix conjugation verb breaks the narrative chain of the wayyiqtol verbs, namely the preceding יוָהי in the same verse and the following in the next verse. These features suggest another possible analysis, that this clause is circumstantial, following a temporal clause, while the main clause is הַמְדַבֵּר יַם-סוּף הַמֶּדְבַּר יַם-סוּף ...God led the people round by the way of the wilderness toward the Red Sea," which belongs the subsequent verse 18. Whether a main or a circumstantial clause, it deviates in syntactic structure from the main narrative sequence by using a suffix conjugation verb. This deviation calls for attention, although the typical narrative verb-subject word order is retained in this example, and it suffices to conclude that the clause can be regarded as parenthetical.

Exod. 13:17—יַּבְשַׁלַח פַּרְעֹה אֶת-הָעָם וְלֹא-נָחָם אֱלֹהִים דֶּרֶךְ אֶרֶץ פְּלִשְׁתִּים כִּי בִּי אָמַר אָמָריִם וּיְשָׁבוּ מִצְרְיִמָּה וְשָׁבוּ מִצְרְיִמָּה וּשִׁבוּ When Pharaoh let the people go, God did not lead them by way of the land of the Philistines, although that was near; for God said, 'Lest the people repent when they see war, and return to Egypt.'"

The next example contains a circumstantial clause which indicates the involvement of God in Samson's decision to take a Philistine wife. The clause's word order is subject—verb and the verb itself is a suffix conjugation verb. This clause interferes in the general narrative syntax of waypiqtol verb—subject, revealed in this case by two appearances of the prefix conjugation verb יוֹ ווֹיָב אוֹ in the preceding verse and the two prefix conjugation verbs מַנְיבֹּאָן in the next.

Judg. 14:4—וְאָבִיוּ וְאָמּוֹ לֹא יִדְעוּ כִּי מֵהי הִיא כִּי-תִאֲנָה הוּא-מְבַקֵּשׁ מִפְּלְשְׁתִּים מְשְׁלִים בְּיִשְׂרָאֵל "His father and mother did not know that it was from the LORD; for he was seeking an occasion against the Philistines. At that time the Philistines had dominion over Israel."

The remark of the scribe or narrator presented below regarding God's being behind the change in the course of events, and behind making Absalom prefer the bad advice to the good, is again a circumstantial clause. It is composed of a verbal clause in the order of subject—verb, where the latter is a suffix conjugation verb, so it breaks the narrative chain of *wayyiqtol* verbs followed by their subjects. The *RSV* translates the suffix conjugation verb by a past perfect tense, to reflect the anteriority of the parenthetical remark.<sup>63</sup>

2 Sam. 17:14—אַבְשְׁלוֹם וְכְל-אִישׁ יִשְׂרָאֵל טוֹבָה עֲצַת חוּשַׁי הְאַרְכִּי מֵעְצַת הְיָּשׁלוֹם וְכְל-אִישׁ יִשְׂרָאֵל טוֹבָה עֲצַת אַחִיתֹפֶּל הַפּוֹבָה לְבַעֲבוּר הָבִיא הי אֶּל-אַבְשֶׁלוֹם אֲחִיתֹפֶל וַהִּי צְּיָה לְהָפֶּר אֶת-עֲצַת אֲחִיתֹפֶל הַפּוֹבְה לְבַעֲבוּר הָבִיא הי אֶּל-אַבְשְׁלוֹם אַתּתיכּל וַהִּי And Absalom and all the men of Israel said, 'The counsel of Hushai the Archite is better than the counsel of Ahithophel.' For the LORD had ordained to defeat the good counsel of Ahithophel, so that the LORD might bring evil upon Absalom."

The next example concerns the persistence of the Israelites' wrongdoing in Judah in consequence of God's choosing not to destroy them. This information is given in a circumstantial clause, and its inner structure breaks the narrative flow by a verbal clause with a suffix conjugation verb instead of the typical narrative *wayyiqtol* chains.

<sup>&</sup>lt;sup>63</sup> See a discussion of this example in Eskhult 1990:65.

 $2~{
m Kgs.}~8:19$ ת אָם, אָבָר הֹי לְבַשְּׁן הָוֹד עַבְּהוֹ לְמַעַן הָוֹד עַבְּהוֹ לְמַעַן הָוֹיִם אָבּר הִיְהָּיִם אָבּר הִיְבָּיִם לָּא-אָבָה הֹי לְבָּנְיוֹ בָּל-הַיָּמִים "Yet the LORD would not destroy Judah, for the sake of David his servant, since he promised to give a lamp to him and to his sons for ever."

A similar remark regarding God's preferring to refrain from destroying Israel also appears in the following example, which shows a structure similar to the previous one in using a circumstantial clause composed of a verbal clause with a suffix conjugation verb.

2 Kgs. 14:27—דָבֶר ה' לְמְחוֹת אֶה-שֵׁם יִשְּׂרָאֵל מְתַחַת הַשְּׁמִים וַיּוֹּשִיעֵם בְּיִריוֹאָשׁ "But the LORD had not said that he would blot out the name of Israel from under heaven, so he saved them by the hand of Jeroboam the son of Joash."

God is pronounced by the scribe or narrator as responsible for the tension between Israel and Aram in the next example, and for the tension between Judah and Aram in the example after that. These two statements employ a similar construction, namely 'הַבְּיָמִים הָהֵם הַחֵל ה'. This construction is not a circumstantial clause and still it deviates from the main narrative structure due to its use of a suffix conjugation verb instead of a prefix conjugation wayyiqtol form. The construction בַּיָמִים הָחֵל ה' בַּיָמִים הָחֵל ה' also contains a time co-ordinate הָּהֵם הַחֵל ה' which sets it on a time level which is different from that of the scribe or narrator.

- 2 Kgs. 10:32—נְבָּל-גְּבוּל בְּכֶל-גְּבוּל הֵי לְקצוֹת בְּיִשְׂרָאֵל וַיַּכֵּם חֲזָאֵל בְּכֶל-גְּבוּל "**In those days the LORD began** to cut off parts of Israel. Hazael defeated them throughout the territory of Israel."
- 2 Kgs. 15:37—וְאֵתְם וְאֵתְ פֶּלֶּף אֲרָם וְאֵתְ פֶּלֶּף הֵי לְהַשְׁלִיחַ בִּיהוּדָה רְצִין מֶלֶּךְ אֲרָם וְאֵת פֶּלֶּח fin those days the LORD began to send Rezin the king of Syria and Pekah the son of Remaliah against Judah."

The next verse suggests that God is behind David's counting of the Israelites, which is in fact a result of God's anger. However, contrary to the previous clauses this information, which functionally-pragmatically is outside the story line, is given in a regular narrative structure with wayyiqtol prefix conjugation verbs preceding their subject, and God's anger being one of the participants in the chain of events. By using this non-parenthetical syntax the outside information regarding God's responsibility for David's decision to count the Israelites finds its way better into the story line and looks less like an external addition inserted into the text at a later time by a scribe or a narrator.

2 Sam. 24:1—מָרָה לֵּדְ מְנֵה לֵּאמֹר לֵדְ מְנֵה בְּיִשְׁרָאֵל וַיְּטֶת אֶח-דְּוִד בְּהֶם לֵאמֹר לֵדְ מְנֵה בְּיִשְׁרָאֵל וְאֶת-יְהוּדְה "Again the anger of the LORD was kindled against Israel, and he incited David against them, saying, 'Go, number Israel and Judah.'"

A similar syntactic structure, which does not break the narrative sequence but joins in it, appears in the following three examples, 2 Kgs. 13:3, 2 Kgs. 13:4–5, and 2 Kgs. 13:23. The scribe or narrator notes God's involvement in bringing triumph or defeat and causing salvation or loss of life in war, often as a result of his anger aimed at the Israelites, or his historic promise to keep them alive and safe, respectively.

- 2 Kgs. 13:3—נְיַחַר-אַף הֹי בְּיִשְׂרָאֵל וַיִּתְנֵם בְּיֵד חֲוְאֵל מֶלֶּוְ-אֲרֶם וּבְיֵד בֶּן-חֲדָאֵל פָּל-הַיָּמִים "And the anger of the LORD was kindled against Israel, and he gave them continually into the hand of Hazael king of Syria and into the hand of Ben-hadad the son of Hazael."
- 2 Kgs. 13:4–5 יְּחֶלְ יִּחְלֹּאָחָז אֶת-פְּנֵי ה' וַיִּשְׁמֵע אֱלִיו הי כִּי רָאָה אֶת-לַחַץ יִשְׂרָאֵל מַתַּחַת יַד-אַרְם וַיִּשְׁבוּ כִּי-לָחַץ אֹתֶם מֶלֶךְ אַרְם. וַיִּשְׁבוּ הי לִישְׂרָאֵל מוֹשִׁיעַ וַיִּצְאוּ מִתַּחַת יַד-אַרְם וַיִּשְׁבוּ "Then Jehoahaz besought the LORD, and the LORD hearkened to him; for he saw the oppression of Israel, how the king of Syria oppressed them. Therefore the LORD gave Israel a savior, so that they escaped from the hand of the Syrians; and the people of Israel dwelt in their homes as formerly."

The third example below contains a narrative structure evident in the use of the prefix wayyiqtol verbs, וְיָרָחְמֵם , וְיִּרְחָ, and וְיִּבְּּחְ , preceding their subjects. But it also has a chain of suffix conjugation verbs, אָבָה and הָשִׁלִּיכָם, perhaps because these verbs are negated in this example.

2 Kgs. 13:23 יְּיְחֶחְ וֹיְפֶּן אֲלֵיהֶם לְּמֵעֵן בְּרִיחוֹ אֶח-אֲבְרְהָם יִצְחָקְ "But the LORD was gracious to them and had compassion on them, and he turned toward them, because of his covenant with Abraham, Isaac, and Jacob, and would not destroy them; nor has he cast them from his presence until now."

In the following examples, 1 Sam. 2:25, 1 Kgs. 12:15, and 2 Kgs. 24:20, God's will and its intervention in the course of events are introduced into the text by causal clauses opening with the particle כָּי. The verbal form in these causal clauses, as might be expected, is a suffix conjugation in verbal or existential patterns.

 $1~\mathrm{Sam}.~2:25$ יַּהְטָא אִישׁ לְּאִישׁ וּפְּלְלוֹ אֱלֹהִים וְאָם לָּה׳ יֶחֲטָא-אִישׁ מִי יִתְפַּלֶּל-לוֹ אֵלהִים הָאָים הָי יָחֲטָא אָישׁ לְאִישׁ וּפְּלְלוֹ אֱלִהִים וְאִם יִּהְם בִּי-חָפֵּץ הי לַהֲמִיחָם "If a man sins against a man, God will mediate for him; but if a man sins against the LORD, who can

intercede for him?' But they would not listen to the voice of their father; for it was the will of the LORD to slay them."

1 Kgs. 12:15 מָלֶדְ אֶל-הָעֶם כִּי-הָיְחָה סִבָּה מֵעם ה׳ לְמַעַן הַקְּלָּהְעָם כִּי-הָיְחָה סִבָּה מֵעם ה׳ לְמַעַן הָקְיבָעם בֶּן-נְבָע בֶּן-נְבָע "So the king did not hearken to the people; for it was a turn of affairs brought about by the LORD that he might fulfill his word, which the LORD spoke by Ahijah the Shilonite to Jeroboam the son of Nebat"

2 Kgs. 24:20— פִּי עַל-אַף הֹי הְיְּחָה בִירוּשָׁלִם וּבִיהוּדְה עֵד-הִשְׁלְכוֹ אֹתָם מֵעַל הֹי הְיְחָה בִּירוּשָׁלִם וּבִיהוּדְה עַד-הִשְׁלְכוֹ אַדְקיָהוּ בְּמֶלֶךְ בָּכֶל WFor because of the anger of the LORD it came to the point in Jerusalem and Judah that he cast them out from his presence. And Zedekiah rebelled against the king of Babylon."

Very similar in content and structure to 1 Kgs. 12:15 and 2 Kgs. 24:20 above, and to all the examples that are syntactically constructed in a narrative structure as part of the narrative sequence, namely, with wayyiqtol verbs preceding their subjects, is the following example. In it, several means of reference to God, his standpoint, and his intervention in the course of events are assembled. These are first, regular narrative syntax in בּיִבְּה ה׳ בִּיֹם הַבְּרָיוֹ הַנְּבִיאָים; second, a reference phrase mentioning the speaker in בַּרְבָּר ה׳ אֲשֶׁר דָּבֶּר ה׳ אֲשֶׁר דָּבֶּר ה׳ בִּיֹה הַ בְּיִר תַּנְּרִיִּיוֹ הַנְּבִיאָים. It' אַשֶּׁר דָּבָּר ה׳ הִיתה ביהודה of the narrative syntax by וּלֹא-אבה ה׳ לֹסלֹת and אַדְּעַרְרִיוֹ הַנְּבִי עַבְּרִיוֹ הַנְּבִי הַיְּרָבּי ה׳ הִיתה ביהודה of the narrative syntax by

2 Kgs. 24:2-4 בְּיִד אָת-גְּדוּדֵי כִּשְׂדִּים וְאֶת-גְּדוּדֵי אָרָם וְאֵת גְּדוּדֵי בְּנִי בְּשִׁר בְּיִר וְאָלָחֵם בִּיהוּדָה לְהָאֲבִידוֹ כִּרְבֵּר ה' אֲשֶׁר דִּבֶּר בְּיִד מְנִאֶּה מְנֵּשֶׁה מְנַשֶּׁה מַנְּשֶּׁה וְנָם דִּם-הַנְּקִי אֲשֶׁר שְׁפְּדְ וַיְמֵלֵא אֶת-יְרוּשְׁלַם דָּם נְקִי וְלֹא-אָבָה בְּכִּל אֲשֶׁר עְשָה. וְנָם דִּם-הַנְּקִי אֲשֶׁר שְׁפְּדְ וַיְמֵלֵא אֶת-יְרוּשְׁלַם דָּם נְקִי וְלֹא-אָבָה הֹי לְּסְלֹחַ הֹשׁר And the LORD sent against him bands of the Chaldeans, and bands of the Syrians, and bands of the Moabites, and bands of the Ammonites, and sent them against Judah to destroy it, according to the word of the LORD which he spoke by his servants the prophets. Surely this came upon Judah at the command of the LORD, to remove them out of his sight, for the sins of Manasseh, according to all that he had done, and also for the innocent blood that he had shed; for he filled Jerusalem with innocent blood, and the LORD would not pardon."

The technique discussed in this section of inserting external editorial remarks into the story line to confront theological difficulties and explain them by God's involvement and interference in the course of events has been further developed in the course of time by certain Bible translators. Typical examples are found in the translations of Onkelos and Saadya Gaon to the Pentateuch. These translations do not hesitate at

times to insert additions or to make corrections in the original Biblical Hebrew text for theological reasons.

One such example is Gen. 3:9—וֹיָאמֵר לּוֹ-הַאָּדֶם וְיֹאמֵר הֹי אֵלֹהִים אָל-הַאָּדֶם וְיֹאמֵר לוֹ "But the LORD God called to the man, and said to him, 'Where are you?" Saadya Gaon's translation of this verse is: פנאדא אללה אדם וקאל לה מקררא אין אנת "But the LORD God called to the man, seeking confession, and said to him, 'Where are you?'" The addition of מקררא, namely, seeking confession, is meant to assert that God knows full well the man's whereabouts and deeds, and has another reason for his inquiry. 64 In other cases, both Onkelos and Saadya Gaon make numerous changes to avoid anthropomorphism of God. One example is Gen. 11:5—וירד ה' לראת את-העיר ואת-המגדל אשר בנו בני האדם "And the LORD came down to see the city and the tower, which the sons of men had built." Onkelos translates it אָרָתָא עַל עוֹבֶד קרָתָא עַל עוֹבֶד קרָתָא ומגדלא דבנו בני אַנשא, and Saadya Gaon ומגדלא דבנו בני אַנשא, ואתגלי בנו בנו בנו אדם. Onkelos uses the phrase ואתגלי יי לְּאַתְּבְּרְעָא, which describes revelation, instead of the more regular Aramaic verb of sight מארד, 65 and Saadya Gaon inserts the phrase פאורד אללה אמרא מוג'לא, referring again to a revelation, instead of using a regular verb of sight.66

Apparently, then, this exegetical technique of insertions and corrections that has found its way into various Bible translations had its roots in the ancient editorial work executed on biblical texts.

#### 2.3.5 Historical Remarks

The external remarks of the scribe or the narrator which appear in the examples discussed in this section are mainly aimed at describing practices prevalent among the Israelites, and their historical background. In certain cases the comments are not about practices but about historical terms, situations, and facts. The syntax in the examples below, contrary to the majority presented in the foregoing sections, are mostly not constructed in the pattern of circumstantial clauses introduced by the conjunctive  $w\bar{a}w$ . As we shall immediately see, several other possibilities for expressing such content appear in the texts. One is the explanatory narrative formula introduced by which is demonstrated in

<sup>&</sup>lt;sup>64</sup> For such an explanation see Derenbourg Edition: 8, note 12.

<sup>&</sup>lt;sup>65</sup> In other versions only ואתגלי (Onkelos II:15).

<sup>&</sup>lt;sup>66</sup> Regarding Saadya Gaon's translation see Derenbourg Edition:18, Note 2.

the first two initial examples. The inner structure of the parenthetical clauses in this section, like in previous types, can be nominal clauses or verbal clauses with suffix conjugation verbs, but also simply regular narrative constructions, whose parenthetical nature is revealed only by observing their content: they can be defined as parenthetical units only functionally-pragmatically, not syntactically.

The first example is an explanation for the universal human practice where every man usually leaves his parents and joins a woman. The verse uses the explanatory narrative formula introduced by על-בֵּו The inner construction of the parenthetical clause that occupies the first half of the verse is regularly verbal, involving a prefix conjugation verb, But note that this verb expresses habitual aspect, which is one of the roles of prefix conjugation verbs not introduced by a consecutive wāw in Biblical Hebrew.<sup>67</sup>

Gen. 2:24—עַל-כֵּן יַעֲזָב-אִישׁ אֶת-אָבִיו וְאֶת-אָמּוֹ וְדְבַק בְּאִשְׁתּוֹ וְהְיוֹ לְבָשֶר "**Therefore a man leaves his father and his mother** and cleaves to his wife, and they become one flesh."

The second example explains the general practice whereby the Israelites avoid eating a certain cut of meat called 'the sinew of the hip.' This verse likewise uses the explanatory narrative formula introduced by עָל-בֵּן, and it also contains the time co-ordinate phrase עֵד הַּיִּוֹם הָּזָּה, whose content is parenthetical in itself, since it refers to the scribe/narrator's times. The inner structure of the parenthetical clause again displays a verbal clause involving a prefix verb conjugation, יֹאכְלוֹ, and like the preceding example the prefix verb expresses habitual aspect. Scholars who concur with the classification of this example as a historical remark are Sternberg, who regards it as an exposition aimed at "temporal or cultural bridging," and Weingreen, who considers it "an editorial addendum, designed to link the established prohibition against the eating of this sinew with the legend of Jacob's encounter with the angel."

<sup>&</sup>lt;sup>67</sup> For the continuous and habitual role of prefix conjugation verbs see, e.g., GKC 1910:314–315, §107b,d,e and Joüon & Muraoka 2006:339–340, 113e,f,g. The use of prefix conjugation verbs for continuous and habitual aspect is found elsewhere in the Bible, e.g., Gen. 2:6—דְאָבִר מָן-הְאָבֶיץ —"But a mist went up from the earth." See also, e.g., Rainey 1986:6–8, 1988:36–37, who refers to it as a tense, not an aspect, but recognizes that it expresses not just past but continuous past.

<sup>68</sup> Sternberg 1985:121.

<sup>&</sup>lt;sup>69</sup> Weingreen 1957:150.

Gen. 32:33—עַל-כֵּן לֹא-יֹאכְלוֹ בְנֵי-יִשְׂרָאֵל אֶת-גִּיד הַנָּשֶׁה אֲשֶׁר עַל-כֵּף הַיְרֶךְ עַרְבּיִר הָנְשָׁה בְּעָשׁה מַעָּל בְּנִי-יֶרֶךְ יַעֲקֹב בְּנִיד הַנְּשָׁה "Therefore to this day the Israelites do not eat the sinew of the hip which is upon the hollow of the thigh, because he touched the hollow of Jacob's thigh on the sinew of the hip."

The next four verses, Exod. 12:39–42, contain concluding remarks about the Exodus from Egypt. They open with a comment on the type of food eaten by the Israelites during the Exodus due to shortage of time for preparations: יַּבְּשֵׁת מַצְּתִים עָגֹת מַצְּתִים עָגֹת מַצְּתִים נְגָם-צֵּדְה לֹא-עָשוֹּ לְהֶם (לֹא יְבְלוּ לְהִתְמַהְמֵהַ וְגַם-צֵּדְה לֹא-עָשוֹּ לְהֶם (לֹא יְבְלוּ וְבִּבְּיִ שְׁבָּר וְשָׁבְּ בְּנֵי יִשְׂרָאֵל אֲשֶׁר יְשְׁבוּ בְּמֵצְרִים שְׁלְשִׁים שְׁנָה וְאַרְבַע מֵאוֹת שָׁנָה וְיְהִי בְּעֶצֶם הַיּוֹם הָזֶּה מַאוֹת שָׁנָה וַיְהִי בְּעֶצֶם הַיּוֹם הָזֶּה (בֹּיָה הַיְבִּי מַבְּעָ שְׁלְשִׁים שְׁנָה וְאַרְבַע מֵאוֹת שְׁנָה וִיְהִי בְּעֶצֶם הַיּוֹם הָזָה (Finally, the text indicates the special practice, לֵיל שָׁמֵּרִים night of watching, performed by the Israelites on a special memorial night dedicated to the Exodus from Egypt.

This last exposition is further divided into two parts, one noting that God held a night of watching while the Israelites left Egypt: לֵיל קְּבִּילִים הוּא לַה׳ לְהוֹצִיאָם מֵאֶרֶץ מִצְרִים הוּא לַה׳ לְהוֹצִיאָם מֵאֶרֶץ מִצְרִים אוֹא , and the other being a comment by the scribe or the narrator on a traditional practice developed by the Israelites after the Exodus from Egypt. That event is marked by a special night of watching: לְּבִי יִשְׂרָאֵל הַיָּה הַיָּה לָה׳ שָׁמָרִים לְכָל-בְּנֵי יִשְׂרָאֵל . This traditional practice, according to the scribe or the narrator has existed up to their own days. The second comment also includes a time co-ordinate referring to the scribe's or narrator's time, namely the prepositional phrase לְּדֹרֹתָם . This extensive summation of the Exodus from Egypt continues with a series of subsequent verses providing details about חָקַת הַבְּּטַח , the ordinance of the Passover.

Now, what may be considered parenthetical in these four verses? The first two verses seem to present only concluding historical information that is not parenthetical, while the two following verses, with their two clauses just outlined above, do seem to convey parenthetical information. Both these clauses are syntactically nominal, while the second also shows the structure of an appositional clause, reflected in its use of a third personal pronoun in first position, and in this way it adds information to the first. This last syntactic structure recalls other appositional clauses which add information to proper names, such as Gen. 14:3—תַּמֶּק הַשְּׁדִּים הַנֵּאֵ יְם הַמֶּלֶח...the Valley of Siddim (that is, the Salt Sea)," or month names, such as 1 Kgs. 6:1—בּחַדְשׁ זוֹ הַנֵּאֵ הַחֹדָשׁ הַשְּׁנִי לְּמִלְּדִּ שׁׁלְמֹה עֵּלִי-יִשׁרְאַל ...in the fourth year

of Solomon's reign over Israel, in the month of Ziv, which is the second month...," discussed above in the relevant section.<sup>70</sup>

Exod. 12:39–42—אָלָי לָּהְתְּמְהְמֵהָ וְגָּט לָּא רָבְּצֵּךְ אֲשֶׁר הוֹצִיאוּ מִמְּצְרִיִם עֻגֹּת מַצוֹת כִּי לֹא-בָּצֵרְ הִּי מִמְּצְרִים וְלֹא יְכְלוּ לְהִתְמְהְמֵהַ וְגָם-צֵּרָה לֹא-עָשוּוּ לָהֶם. וּמוֹשַׁב בְּנֵי יִשְׂרָאֵל אֲשֶׁר יָשְׁבוּ בְּמִצְרִים שְׁלְשִׁים שְׁנָה וְאַרְבַּע מֵאוֹת שְׁנָה וְיִהִי מְּעֶץ שְׁלְשִׁים שְׁנָה וְאַרְבַע מֵאוֹת שְׁנָה וְיִהִי בְּעֶצֶם הַיּוֹם הָּזֶּה יְצָאוֹ כְּל-צִּבְאוֹת ה' מֵאֶרֶץ מְצְרִים לְּכְל-בְּנֵי שְׁנְרֹ שְׁבְּרִים הְּנֹא לַהִי לְהוֹצִיאָם מֵאֶרֶץ מִצְרִים הוֹא-הַלַּיְיְה הַּוֹּה לָּהִי הָּיִּה לְּהִי שְׁבְּרִל-בְּנֵי לְכְל-בְּנֵי לְכְל-בְּנֵי הוֹא לַהִי הוֹא לַהִי לְהוֹצִיאָם מֵאֶרֶץ מִצְרִים הוֹא baked unleavened cakes of the dough which they had brought out of Egypt, for it was not leavened, because they were thrust out of Egypt and could not tarry, neither had they prepared for themselves any provisions. The time that the people of Israel dwelt in Egypt was four hundred and thirty years. And at the end of four hundred and thirty years, on that very day, all the hosts of the LORD went out from the land of Egypt. It was a night of watching by the LORD, to bring them out of the land of Egypt; so this same night is a night of watching kept to the LORD by all the people of Israel throughout their generations.

The next example deals with the consequences of Jephthah's vow to the Lord and the general practice of lamentations for his daughter which arose and spread after her death. The example includes a time co-ordinate, מָּיְמִים יְמִימְה, which reflects a habitual practice, and its syntax is first a regular narrative pattern and word order, as revealed in the clause אַמִּיִם יְמִיקְה which opens with the wayyiqtol narrative verb. This clause is continued by another, opening with the temporal adverbial prepositional phrase מִּיְמִים יְמִימָה followed by a prefix conjugation verb מִּלְכְנָה, which expresses a habitual situation. Neither clause is circumstantial, nor deviates in its syntax from the main narrative, although the content of both is functionally-pragmatically external to the narrative sequence.

A syntactic connection between the two verses of this example, Judg. 11:39 and Judg. 11:40, is established in the RSV translation, in the JPS, and in al-kitāb al-muqaddas, where the second verse, מְיָמִים הַעָּלְבָּנְת יָמִים בַּשְּׁנָה is set as a content clause in the role of subject of the clause 'בְּמִּת יִשְּרְאֵל לְתַנּוֹת לְבַתַּר יִמְיִם בַּשְּׁנְה This content clause is introduced by the subordinate particle 'that' in English and in Arabic, namely "And it became a custom in Israel that...," accord-

<sup>&</sup>lt;sup>70</sup> See §2.2.3 above.

 $<sup>^{71}</sup>$  On the use of the prefix conjugation verbs for continuous and habitual tense see examples Gen. 2:24 and Gen. 32:33 above.

ing to the *RSV*, and... فَصَارَتْ عَادَةً فِي إِسْرَائِيلُ أَنَّ, according to *al-kitāb* al-muqaddas. In the *RSV* translation a cataphoric empty pronoun 'it' precedes the content subject clause, and it serves as a formal subject, whose real content is expressed in the succeeding content clause.

Judg. 11:39–40—וֹיְהִי מָקֵץ שְׁנֵים חֲדְשִׁים וַתְּשָׁב אֶל-אָבִיהְ וַיַּעַשׁ לְהֹּ אֶת-נִדְרוֹ ־יִמְיִם הְלַכְנָה בְּנוֹת מְשָׁר בְּיִר וְהִיא לֹא-יִדְעָה אִישׁ וַתְּהִי-חֹק בְּיִשְׁרָאֵל. מִיְמִים יְמִימָה תֵּלַכְנָה בְּנוֹת אֲשֶׁר נָדְר וְהִיא לֹא-יִדְעָה אִישׁ וַתְּהִי-חֹק בְּשְׁרָה תַּנְּלְעָדִי אַרְבַּעַת יְמִים בַּשְּׁנָה months, she returned to her father, who did with her according to his vow which he had made. She had never known a man. And it became a custom in Israel that the daughters of Israel went year by year to lament the daughter of Jephthah the Gileadite four days in the year."

The next example is an explanation of the general practice of the priests of Dagon not stepping on the threshold of Dagon's house, which is known right up to the time of the scribe or narrator. The external information thus describes a tradition and its historical origins. The verse also contains the phrase אָל הַלִּים הַּזָּה which, as discussed below, is functionally-pragmatically parenthetical in itself, and it uses the explanatory narrative formula introduced by עַל-בַּן, demonstrated in two prior examples in this section, Gen. 2:24 and Gen. 32:33. Syntactically it is again a verbal clause where the verb is a prefix conjugation verb expressing habitual aspect.

1 Sam. 5:5—וְדְרְכוּ כֹהְנֵי דְגוֹן וְכָל-הַבָּאִים בֵּיח-דְגוֹן עַל-מִפְּחַן דְּגוֹן יְכָל-הַבָּאִים בֵּיח-דְגוֹן עַל-מִפְּחַן דְּגוֹן עַר הַיּוֹם הַוָּה "This is why the priests of Dagon and all who enter the house of Dagon do not tread on the threshold of Dagon in Ashdod to this day."

The information in the next example, Ruth 4:7, describes the practice of sealing transactions by one party presenting shoes to the other. This practice is actually performed in the following verse, Ruth 4:8—מָּמֶל לְבֹעֵז קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ מִינִי קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ נִינִי קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ נִינִי קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ נִינִי קְנֵה לְּבְּעַלוֹ מִינִי קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ נִינִי קְנֵה לְבְּעֵלוֹ מִינִי קְנֵה-לְּךְ וַיִּשְׁלֹף נַעֲלוֹ נִינִי קְנִה לְבְּעֵלוֹ מִינִי קְנֵה לִבְּיִנִי קְנִה לְבְּנִים (So when the next of kin said to Boaz, 'Buy it for yourself,' he drew off his sandal." Contrary to the previous practices described above, this one is not said to be still current at the time of the scribe or narrator but ancient and apparently obsolete. The scribe or narrator feels a need to explain it to the readers or listeners, since it no longer exists. Like the previous examples, this one too contains a time co-ordinate, וְזֹאַת לְבָּנִים, except that it does not refer to the times of the scribe or narrator but to an earlier period.

The syntactic structure of this parenthetical remark has three clauses. The first is nominal, וְוֹאַת לְפָנִים בִּישִׁרָאֵל עַל-הַגְּאוּלָה וְעַל-הַתְּמוּרָה. The

second is verbal, initiated by an infinitival phrase expressing purpose and followed by two suffix conjugation verbs and their subject and objects, לְבֵיֵם כְּל-דָּבֶר שָׁלַף אִישׁ נַעֲלוֹ וְנָתַן לְרֵעֵהוּ. The third is nominal again, וְזֹאת הַהְּעוּדָה בְּיִשְׂרָאֵל. In all three cases there is a clear deviation from the main narrative line and structure.

Ruth 4:7—קּמָיִם כְּלְּבָּיִם בְּיִשְׂרָאֵל עַל-הַגְּאוּלָּה וְעַל-הַהְּחִמוּרָה לְכְיִם כְּל-דְּבָר שָׁלִּף בְּיִשְׂרָאֵל יוֹאת הַהְּעוּדְה בְּיִשְׂרָאֵל "Now this was the custom in former times in Israel concerning redeeming and exchanging: to confirm a transaction, the one drew off his sandal and gave it to the other, and this was the manner of attesting in Israel."

The time co-ordinate לְּפָנִים which appeared in the previous example reappears in the following one. The content is a little different from the previous examples as it deals not with ancient practice but with ancient lexicography. More specifically, it explains the meaning of an ancient term, הְּרְאֶּה, which apparently, according to the scribe or narrator, is archaic. The syntax of this parenthesis is a verbal clause with the suffix conjugation verb of speech אָמָר, which is followed by the contents of the speech. These two are followed by a causal clause explaining the historical background of what seems in the time of the scribe or the narrator a strange use of words in this speech utterance. Note the parentheses set around these verses in the RSV translation, which indeed emphasize their being a parenthesis. Also note Sternberg's correct observation that this example is an exposition meant for 'temporal or cultural bridging.'<sup>72</sup>

1 Sam. 9:9—קְּמָר לְּכֹּר שְּׁלְאֵל כֹּה-אָמֵר הָאִישׁ בְּלֶכְחוֹ לִדְרוֹשׁ אֱלֹהִים לְכֹּוּ וְנֵלְכָה בְּיִשְׁרָאֵל כֹּה-אָמֵר הָאִישׁ בְּלֶכְחוֹ לִדְרוֹשׁ אֱלֹהִים לְכֹּוּ וְנַלְכָּה הָּיְשֶׁה בִּי לַנְּבִיא הַיּוֹם יִקְּרֵא לְפָנִים הָרֹאֶה בִּי לַנְּבִיא הַיּוֹם יִקְרֵא לְפָנִים הָרֹאֶה מּשׁר (Formerly in Israel, when a man went to inquire of God, he said, "Come, let us go to the seer"; for he who is now called a prophet was formerly called a seer.)"

The parenthetical clauses in the following example are meant to explain to readers or listeners in a later period the situation in Bethel in earlier times. The historical nature of the parenthesis here is evident in the use of the time co-ordinate בַּיָמִים הְהֵם twice, and even more prominently in the gap that the parenthetical information creates between the speech verb יַּשְׁאַלוֹּ and the speech utterance preceded by the word introducing

<sup>&</sup>lt;sup>72</sup> Sternberg 1985:121.

direct speech לֵאמֹר. In this the example resembles others such as 1 Sam. 22:9, 2 Sam. 21:2–3, and 1 Kgs. 12:10, which evince a twofold use of a verb of speech or a certain split in conveying speech content.

The present example and its like are treated above under §1.4 in a discussion of interrupted syntactical structures as possible parentheses in Biblical Hebrew, and more specifically in the discussion of the contribution of Miller to explaining these patterns as special types of quotative frames. The syntax, both clauses that form the parenthesis in this case are circumstantial and open with the conjunctive  $w\bar{a}w$ , and their inner structure is nominal. Note again the parentheses in the RSV translation.

Judg. 20:27–28a—הַחַ בְּהָמִים הָהֵם בַּיּמִים הָהֵם בְּימִים הָהֵלּ בְּהִי וְשָׁם אֲרוֹן בְּרִית הָאֱלֹהִים בַּיִּמִים הָהֵם לַאמר לַמִּלְחָמָה וּפִינְיִס בֶּּן-אֶּלְעָזְר בָּן-אַהָרן עֹמֵר לְפָּנְיו בַּיָּמִים הָהֵם לֵאמר הַאוֹסף עוֹד לְצֵאת לַמִּלְחָמְה וּפִּינְחָס בֶּּן-בְּנְיִמן אָחִי אִם-אָּחְדָּל "And the people of Israel inquired of the LORD (for the ark of the covenant of God was there in those days, and Phinehas the son of Eleazar, son of Aaron, ministered before it in those days), saying, 'Shall we yet again go out to battle against our brethren the Benjaminites, or shall we cease?'"

The next four examples present information about an ancient people and proper place names for readers living in the scribe's or narrator's times. In three of the four examples a time co-ordinate לְּפָנִים is used. In the last example another time co-ordinate appears, namely לְּבְאשׁנָה All four examples are circumstantial, with the inner structure of a nominal clause. In two examples the information is set in parentheses in the RSV translation, which thereby indicates their interpretation as parenthesis. Again, Sternberg's approach which regards such information as an exposition meant for 'temporal or cultural bridging' conforms with the classification of this example as a historical remark.<sup>74</sup>

The first example refers to an ancient people and employs the time coordinate לְּפָנִים.

Deut. 2:10—הָאֵמִים לְפְנִים יָשְׁבוּ בָה עֵם נָּדוֹל וְרָב וָרָם כְּעֲנָקִים—"The Emim formerly lived there, a people great and many, and tall as the Anakim."

The second example refers to an ancient place name and also employs the time coordinate לְפָנִים.

<sup>&</sup>lt;sup>73</sup> Miller 1996:218–220, §4.4.2.

<sup>&</sup>lt;sup>74</sup> Sternberg 1985:121. Šternberg mentions among other examples Judg. 19:10, which identifies the place name Jebus as Jerusalem.

98 Chapter two

Judg.~1:11—נֵילֶדְ מִשְּׁם אָל-יוֹשְבִי דְּבִיר וְשֵׁם-דְּבִיר לְפָנִים קִרְיֵת-סֵפֶּר "From there they went against the inhabitants of Debir. **The name of Debir was formerly Kiriath-sepher**."

Similarly, the third example refers to an ancient proper place name and again employs the time coordinate לָּפָנִים.

Judg. 1:23—וַּיְתִירוּ בֵית-אֵל וְשֵׁם-הָּעִיר לְּפְּנִים לוּז "And the house of Joseph sent to spy out Bethel. (Now the name of the city was formerly Luz.)"<sup>75</sup>

The fourth example refers once more to an ancient place name but, unlike the three previous examples it employs another time coordinate, namely לָרָאשׁנָה.

Judg. 18:29—בּיָשִׁר יְּוּלֵּד לְיִשְׂרָאֵל וְאִּנְּיִם בְּשֵׁם דָּן אֲבִיהֶם אֲשֶׁר יוּלָּד לְיִשְׂרָאֵל וְאוּנְם הַאָּיִר לָרִאשׁנָה "And they named the city Dan, after the name of Dan their ancestor, who was born to Israel; but the name of the city was Laish at the first."

#### 2.3.6 Examples Introducing Other Marginal Information

The following examples contain circumstantial clauses which express information that is marginal or wholly irrelevant to the story line. These examples are unique in that their substance does not show any common features, and they do not conform to any of the instances in the previous sections. In certain cases, like Gen. 1:11–13 and Gen. 4:22, the marginal information might hint at other stories or pieces of information that the scribe or narrator assumes are known to the readers or listeners; still, these stories and pieces of information are not mentioned anywhere else in the Bible and are not familiar to us.

In contrast to the content of these clauses, their syntactic structure is similar to the majority of the examples in the previous sections: they are all circumstantial, initiated by the conjunctive  $w\bar{a}w$ . Likewise, the clause patterns that form the inner structure of these circumstantial clauses can be nominal, existential, or verbal containing a suffix conjugation verb, and they sometimes also show word order inversion.

In the first example the scribe or narrator assumes that the target readers or audience have some knowledge of a territory whose name is Havilah and of its gold. This can be observed from the use of the

 $<sup>^{75}</sup>$  For more references to examples with לְּפָנִים see  $\S 3.2.2$  below, and also Brin 1986:53–54, 1995:7–15.

definite forms, הַּחְיֵילָה and הַּחְיֵילָה. In addition, the syntactic forms chosen for the display of this information are two circumstantial clauses, the pattern of which is nominal. Recognition in their parenthetical nature is revealed in the  $\mathcal{J}PS$  translation which sets parentheses around them: "(The gold of that land is good; bdellium is there, and lapis lazuli.)"

Gen. 2:11–13—... אָטֶר הָאָרָד פִּישׁוֹן הוּא הַסּבֵב אֵת כְּל-אֶרֶץ הַחְוִילָּה אֲשֶׁר-שִׁם הַזְּהָב. הַשְׁיִ הָּאַרֶץ הַחּוֹן הוּא הַסּוֹבֵב אַת כְּל-אֶרֶץ הַחְוֹיִלָּה אֲשֶׁר-הַנְּבְּר הַשְׁיִי גִּיחוֹן הוּא הַסּוֹבֵב וְּשֵׁם-הַנְּבְּר הָשִׁיִי גִּיחוֹן הוּא הַסּוֹבֵב וְשִׁם-הַנְּבְּר הָאֵרֶץ הַוֹּא פּל-אֶרֶץ כּוּשׁ. "The name of the first is Pishon; it is the one which flows around the whole land of Havilah, where there is gold; and the gold of that land is good; bdellium and onyx stone are there. The name of the second river is Gihon; it is the one which flows around the whole land of Cush."

In the second example the information about Tubal-cain's sister is inserted into the text after Tubal-cain himself and his occupation are presented. All this is part of a genealogical list setting out names and details of Cain's descendents. The list, however, includes only males; the information inserted into the verse below deviates from the main story line in content by mentioning a female, and it has a different syntactic form as well, being a circumstantial nominal clause. These two factors give the information regarding the female sister a different, marginal, status, compared with that of all the male descendents.

Gen. 4:22—וְצְלָה גַם-הָוֹא יָלְדָה אֶת-תּוּבַל קִין לֹטֵשׁ כְּל-חֹרֵשׁ וְחֹשֶׁת וּבַרְזֶלּ—יֹנְשׁ הָּבְל-קַיִן נַעֲּמָה "Zillah bore Tubal-cain; he was the forger of all instruments of bronze and iron. **The sister of Tubal-cain was Naamah** "

The information on the status of Moses with Pharaoh and the Egyptians, provided in the following example, is marginal to the story line, which is about the ten plagues and the events which led to the Exodus of the Israelites from Egypt. It also starts with the particle D3, showing that this content is an addition to the preceding part of the verse in particular and to the main story line in general.<sup>77</sup> As to syntax, this information is displayed by a circumstantial clause, the pattern of which is nominal in

<sup>&</sup>lt;sup>76</sup> On the structure of genealogical lists and the use of nominal clauses to add new names to them, see de Regt 1999:32–33, §2.2.2, and more examples there.

<sup>77</sup> On the particle and its roles see, e.g., Muraoka 1985:143–146 and van den Merwe 1990. Note especially van den Merwe's discussion of other works treating this particle on pp. 4–18, §1. See also short discussion in Biblical Hebrew grammars, e.g., *GKC* 1910:483, §153, Williams 1976:63–64, §378–§382, Waltke & O'Connor 1990:663, §39.3.4c,d.

100 Chapter Two

the order subject–predicate, in contrast to the chain of wayyiqtol verbs, מיאמר and וַיֹּאמֶר, surrounding it.

Exod. 11:3—נְיִמֵן ה' אֶת-חֵן הְעָם בְּעֵינֵי מִצְרָיִם נַּם הָאִישׁ מֹשֶׁה נְּדוֹל מְאֹד בְּאֶרֶץ – בְּעָרֵי הָעָם בְּעֵינֵי הָעָם - "And the LORD gave the people favor in the sight of the Egyptians. Moreover, the man Moses was very great in the land of Egypt, in the sight of Pharaoh's servants and in the sight of the people."

The inversion in word order and the initial position of the subject in the circumstantial clause of this verse is more clearly emphasized by Saadya Gaon's choosing in his translation to shape it in the pattern of extraposition, in which the subject is isolated by the phrase ווֹלֹי... בּי בּּא ענד אלקום חט'אא ענד אלמצריין ואמא מוסי אלרה אלקום חט'אא ענד אלמצריין ואמא מוסי אלרסול פַעמיים ג'ידא פּי ... The Geez translation similarly employs a demonstrative pronoun to introduce Moses and to highlight his position at the beginning of the clause: מימיע בלד מאר.../wa-zə bə'əsi Muse...literally: "... and this man, Moses,...."

The parenthetical information inserted into the next example can be interpreted as telling us that the Israelites were capable of fighting when they left Egypt, and the decision of God to change their course was not based on their inability to fight. In that case the example below could be considered explanatory, or at least as contributing to the background of the story. But since the meaning of this example and the reason for its insertion in this place are not entirely clear, it is placed in this section, and not in §2.3.1, dedicated to background information.

Again, the syntactic pattern of this clause is circumstantial, yet it is composed of a verbal clause, not a nominal one. Nevertheless, in contrast to the regular narrative chain of *wayyiqtol* verbs in first position, the verb in this case is a suffix conjugation verb in second position, following its subject. As stated before, this type of verbal clause is also common in introducing parenthetical clauses into the story. The deviation of this clause from the main narrative is further marked in the  $\mathcal{J}PS$  translation by its introduction with the word 'now': "Now the Israelites went up armed out of the land of Egypt," and by opening with it a new paragraph.<sup>78</sup> The RSV has the more literal translation of a conjunctive  $w\bar{a}w$ .

<sup>78</sup> As noted by the  $\mathcal{J}PS$  the meaning of חֲמָשִׁים is uncertain ( $\mathcal{J}PS$ :105, note d). This term appears three more times in the Bible: Josh. 1:14, 4:12, and Judg. 7:11. In all cases its meaning seems to be related to preparations for war or situations related to

 $\operatorname{Exod}. 13:18$ —נֵיַּפֵב אֱלֹהִים אֶּת-הָעָם דֶּרֶךְ הַמִּדְבָּר יִם-סוּף וַחֲמָשִׁים עָלוּ בְנֵי-יִשְּׂרָאֵל "But God led the people round by the way of the wilderness toward the Red Sea. **And the people of Israel went up out of the land of Egypt equipped for battle**."

In the next example the circumstantial clause provides information as to the nature and taste of the unfamiliar food called מָּן introduced to the Israelites in the desert. This information is additional and marginal to the story line told by a chain of wayyiqtol verbs. The inner structure of this circumstantial clause is a nominal clause in the order subject—predicate, so it obviously deviates syntactically from the main narrative clauses opening with wayyiqtol forms.

Exod. 16:31—וְמַיְמִהֹ לְבֶּן וְמַיְמִהֹ מְן וְהוּא בְּוֶרֵע גַּד לְבָן וְמַיְמִהֹ מָן וְהוּא בַּרְרָשׁ נִיּקְרְאוּ בֵּית-יִשְׂרְאֵל אֶת-שְׁמוֹ מְן וְהוּא בְּוָרֵע גַּד לְבָן וְמַיְמִה הּדְּרָשׁ "Now the house of Israel called its name manna; it was like coriander seed, white, and the taste of it was like wafers made with honey."

The last example in this section, occurring in verse 16 of Exod. 32:15–16 presented below, includes a circumstantial clause which describes the nature of the tables brought down by Moses from the mountain. This circumstantial clause follows two previous circumstantial clauses in verse 15, and each of them is attributed to a specific noun that serves as its head. The first is יְּשָׁנֵי לְּחֹת הְעַדֶּת בְּיִדִּים מְשָׁנֵי לְחֹת הְעַדֶּת בְּיִדִּים מְשָׁנֵי לְחֹת הְעַדֶּת בְּיִדִּים מְשָׁנֵי לְחֹת הַעַּדְת בְּיִדִּם מְשָׁנֵי עַבְּרֵים מִשְׁנֵי עֶבְרֵים מִשְׁנֵי עֶבְרֵים מִשְׁנֵי עֶבְרֵים מִשְׁנֵי עֶבְרֵים מִשְׁנֵי עָבְרֵים מִשְׁנֵי עַבְּרֵים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרֵים מִשְׁנִי בּיִבְּים מִשְׁנִי בְּבְּרִים מִשְׁנִי בְּבִּרִים מִשְׁנִי בּיִבְּים מִשְׁנִים מִשְׁנִי בְּבִּים מִשְׁנִי בְּבִּים מִשְׁנִי עַבְּרֵים מִשְׁנִים מִשְׁנִי בְּבִים מִשְׁנִי בְּבִים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרֵים מִשְׁנִים מִשְׁנִי בְּבִים מִשְׁנִי עַבְּרֵים מִשְׁנִי בְּבִּים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרֵים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִישְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִשְׁנִי עַבְּרִים מִעְּיִים מִינִי עָבְּרִים מִיּים מִּים מִינִי מִיים מִּים מִינִים מִינִי עַבְּים מִינִים מִינִי עָבְּרִים מִינִים מִינִים מִּים מִינִים מִינִי עַבְּים מִינִי עַבְּים מִינִי עַבְּים מִינִי עַבְּים מִינִי עַבְים מִינִי עַבְּים מִינִי עַבְּים מִינִים מִינִי עַבְּים מִינִי עַבְים מִינִי עַבְיִים מִינִי עַבְּים מִינִים מִינִים מִינִי מְבְים מִינִים מִינִים מִינְים מִינִים מִינִים מִינְים מִּים מִינִים מִּיְים מִּים מִּים מִינִים מְיִים מִּיְים מִּיְים מִּיְים מִינְים מִינְים מִינִים מְיִים מִּיְים מִּיְים מִּים מִינְים מִּים מִּים מִּיִּים מִּים מִּים מִּים מִּי

Exod. 32:15–16 בְּיָבִי מְשָׁה מִן-הָהָר וּשְׁנֵי לָחֹת הְעֵדֶת בְּיָדוֹ לְחֹת בְּתָבִי מְשָׁה מִן-הָהָר וּשְׁנֵי לָחֹת הְעֵדֶת בְּיָדוֹ לְחֹת בְּעֲשֵׁה אֱלֹהִים מִאֶּה וְמָאֶה הֵם בְּתָבִים, וְהַאָּחֹת מֵעֲשֵׁה אֱלֹהִים הוּא חָרוּת עַל-הַלְחֹת מִשְׁנֵי עֶבְרֵיהֶם מִאֶּה וּמְאָה הִם בְּתָבִים, וְהַאָּלְחִת מִעְל-הַלְחֹת מִעְל-הַלְחֹת מִעְל-הַלְחֹת מוּל "And Moses turned, and went down from the mountain with the two tables of the testimony in his hands, tables that were written on both sides; on the one side and on the other were they written. And the tables were the work of God, and the writing was the writing of God, graven upon the tables."

war. BDB (BDB:332b) also indicates Num. 32:17, where the word השׁים is found with a similar meaning, and it can probably be related by emendation. Again, the  $\mathcal{J}PS$  indicates that the meaning of this word is uncertain ( $\mathcal{J}PS$ :264, note a).

#### CHAPTER THREE

#### PARENTHETICAL WORDS AND PHRASES

External information which does not form a complete clause, but is present within a clause or introduces a clause, is mostly expressed in words and phrases that syntactically cannot be regarded as full parenthetical expressions. Most of them are various types of relatively restricted and even fossilized phrases, narrative formulas, and certain adverbs and adverbial phrases. The last-named are either adverbs syntactically connected to individual clause parts or they refer to the sentence as a whole, namely to the predicative relation itself, and accordingly they are identified as 'sentence adverbials.' These types of words and phrases therefore do not conform to the syntactic definitions of a real full parenthesis, which is expected to show syntactic independence and disconnection. Nonetheless, we are by now acquainted with a broader and more flexible definition of parenthesis which recognizes as belonging to this category patterns which are strictly parenthetical in structure but also those which convey parenthetical content in patterns that can otherwise be interpreted as syntactically attached to other sentence parts.

This broad definition of parenthesis leaves no real common denominator for the examples discussed in this chapter except that they all contain short units of information with content that belongs outside the clause in which it appears. Since the main issue in the description of these words and phrases is the nature of their content, they are mostly presented as limitedly parenthetical, namely only from a functional-pragmatic standpoint, which is sensitive to context. The content also impacts the classification of the examples assembled in this chapter, so they are divided into two primary groups and into subgroups according to context. One of the two basic sections is words and phrases referring to a speaker, an observer's identity, God's standpoint, appeal and plea, and addresses, and epistemic modal adverbials. These types have no

<sup>&</sup>lt;sup>1</sup> On the role of sentence adverbials in describing the predicative relation see Goldenberg 1985:186, §17.

real positive common denominator apart from giving extra information. They are put together to differentiate them, as non-narrative formulas, from the second of the two sections, namely specific narrative formulas in the form of time co-ordinates.

# 3.1 External Expressions Referring to a Speaker, an Observer's Identity or an Individual Standpoint, Epistemic Modal Adverbials, Appeal and Plea, and Address

These expressions do not belong syntactically or contextually to one group. The examples below are gathered in one section because of their distinctiveness from other external expressions that display narrative formulas related to time, that is, narrative time co-ordinates. The only feature common to the examples in this section is their expression of extra information, namely they share only functional-pragmatic characteristics. The inner classification in this section is based on the type of extra information displayed in the examples; the sub-classification of each type similarly rests on common content-related features. Whenever a subtype of words and phrases resembles a subtype of clauses discussed in the preceding chapter the same heading is chosen, that is, 'reference to a speaker' and 'appeal and plea,' which might be expressed by full clauses or by certain words and phrases.

#### 3.1.1 Reference to a Speaker

The following examples are phrases which break the narrative to indicate a speaker: עַל-פִּי עָל-פִּי הְ, נְּדְבַר הֹ, בְּדְבֵר הֹ, בִּדְבַר הֹ, בִּדְבַר הֹ, בִּדְבַר הֹ, בִּדְבַר הֹ, מָל-פִּי עָל-פִּי הֹ, וְאָם הֹ and הַ הַבְּרַר הֹ, בִּדְבַר הֹ, בִּדְבַר הֹ, בִּדְבַר הֹ, and were accordingly treated in §2.1.1 above.<sup>2</sup> In fact, the separation of references to a speaker by clauses from references to a speaker by

<sup>&</sup>lt;sup>2</sup> On the linguistic debate over the syntactic status of verbs of speech, believing, thinking, etc., and their parenthetical contents and status, see Lyons 1977:738, Hopper & Traugott 2003:207–209, §7.5.3. See also Hand 1993 who discusses the possible omission of 'that' before English indirect speech and its significance for syntax. Hand is aware of the distinction between indirect speech propositions with 'that,' which introduces embedded constructions, and others without 'that,' whose speech expression should be interpreted as parenthetical. Though Hand tries to minimize the need to differentiate between the syntax of these two constructions, he distinguishes them pragmatically.

words and phrases is somewhat artificial contextually. It is applied here because of the linguistic interest in separating all types of parenthetical clauses from all types of parenthetical words and phrases.

This slight artificiality is well reflected in Bible translations. The renderings of the expressions below that mention the speaker, including the *RSV* translations given for all the examples, might use clauses where the original Hebrew has phrases, or the reverse, haphazardly. This freedom supports the assumption that phrases and clauses alike referring to a speaker provide similar parenthetical information. In either case the information rendered by the expressions is external to the story line, so functionally-pragmatically at least it can be considered parenthetical.

Phrases like בְּדְבֵּרִי and בְּדְבָּרִי seem to be adverbial in syntax as they open with the comparative particle בְּ, and they should be regarded as non-obligatory complements of the predicate. Since one sign of parenthetical units is their ability to take any position in a clause, that position should be noted. That both initial and final position are occupied by these phrases in the examples below is significant, though initial position is rarely found (it perhaps occurs in Josh. 8:8 below). Moreover, since the middle position is not attested, these phrases do not seem to enjoy complete freedom, and they tend to prefer one position in the word order, the final, to the others.

The phrase אָם מוּ appears to be truly parenthetical both syntactically and functionally-pragmatically. Syntactically, as expected from parenthetical units, it does not depend on any clause part, nor does it function as an adverbial complement. It enjoys complete freedom of position: initial, middle, or final. Though בְּבָּבֶר הֹ and בְּבָבֶר הֹ differ in the degree of their parenthetical status they may still reveal great resemblance. In the example of 2 Kgs. 9:26 below, both appear in one verse and fulfill similar functional-pragmatic roles. This example supports the assumption that though the two speech references differ in syntax they are functionally-pragmatically similar.

Similar information is conveyed by the prepositional phrase עֵל-פִּי, and its variant אֶל-פִּי. It occurs in references to God as well as other

<sup>&</sup>lt;sup>3</sup> Free position of parenthetical units is indicated by Ziv 1985:182–183 among others.

<sup>&</sup>lt;sup>4</sup> On the phrase 'גאָם, its distribution and meaning, see Baumgärtel 1961.

characters, and it also has a parenthetical content. Its syntax is less clear: it has no fixed position in the clause and it is an independent phrase, yet it can also be understood as a non-obligatory complement of a predicate serving an adverbial role, hence as dependent.

Other expressions and constructions related to the foregoing exist, namely בַּבְּתוּב . The last, בַּבְּתוּב and בַּבְּתוּב . The last, בַּבְּתוּב , "according to what is written/as it is written," refers to a written document rather than a speech. All these are presented and discussed below. Also briefly discussed is a related speech pattern which contains בְּדְבַר as part of a larger comparative construction, . . . בַּדְבַר . This pattern is again similar to a clause pattern made of בְּדְבַר צִּיָּהְ צִּיָּהְר צִּיְּהָ בִּיִּ בְּּעִיר צִּיָּהְ בִּיִּהְ בְּיִּהְ בִּיִּהְ בִּיִּהְ בְּיִּהְ בִּיִּהְ בִּיִּהְ בְּיִּהְ בְּיִּהְ בִּיִּהְ בְּיִּהְ בִּיִּהְ בִּיִּהְ בִּיִּהְ בְּיִּבְּי בְּיִבְּרְ בִּיְּהְ בְּיִבְּיִי בְּיִּבְּי בְּיִּבְּתְ בְּיִבְּי בְּיִיּ בְּיִבְּי בְּיִבְּי בְּיִּבְּי בְּיִיּ בְּיִי בְּיִּבְּר בִּיְיִי בְּיִיּיִי בְּיִי בְּיִּבְי בְּיִבְּר בִּיְיִי בְּיִי בְּיִּבְי בְּיִבְּי בְּיִי בְּיִבְּי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִבְּי בְּיִי בְּיִייִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִייִי בְּיִייִי בְּיִיּיִי בְּיִייִּי בְּיִי בְּיִי בְּיִיי בְּיִיי בְּיִייּי בְּיִייּ בְּיִיי בְּיִייִי בְּיִי בְּיִייּי בְּיִיי בְּיִייּי בְּיִייּיוּ בְּיִי בְּיִי בְּיִייּי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִייּ בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִי בְּיִיי בְּיִייּבְיּי בְּיִי בְּיִי בְּיִי בְּיִייּי בְּיִייּי בְּיִי בְּיִי בְּיִיּי בְּיִי בְּיִיּבְייִי בְּייִי בְּיִייְי בְּיִייִי בְּיִייִי בְּיִיּיְיִּי בְּיִיּבְיּיִיּי

Because a considerable number of examples refer to God as a speaker, these form a subsection of their own, separate from speech expressions that refer to other characters.

#### 3.1.1.1 Examples Mentioning God as the Speaker

#### 3.1.1.1.1 Examples with בָּדָבַר ה'

In the following example the phrase בְּדְבֵּר הֹ appears in initial position. Other examples of the initial position are of the type ... בַּן... בַּן... but as this pattern is demonstrated only with speakers other than God it is discussed only in the next section. As noted above, Bible translations reflect the similarity between clauses and phrases referring to a speaker in that they might differ in the construction they use for the translation of the same original, a clause or a phrase. Among our translations the RSV, the JPS, and the Geez translate the prepositional phrase בִּדְבֵּר הֹ in the verse below by a clause; al- $kit\bar{a}b$  al-muqaddas, Targum Jonathan and the Peshitta prefer a prepositional phrase. Such a difference between the various translations might occur in the subsequent examples as well.

Josh. אָרֶבֶּר ה'בְּבֶר הּיְבֶּר הַּאָיר הַּצִּיתוּ אֶת-הָעִיר בְּאֵשׁ כִּרְבַר ה'—אַרְבֶּר הּיִבְּר הּיִבְּר ה'—אַרְבֶּּה "And when you have taken the city, you shall set the city on fire, doing as the LORD has bidden; see, I have commanded you."

In the next example the phrase בּדְבֵר ה' appears in final position. Here the phrase is extended by a relative clause אָשֵׁר צָּוָה אֶת-יָהוֹשָׁעַ, which

refers to the individual transmitting God's words. As we will see in the ensuing examples, בְּדְבֵּר הֹ is normally extended in this way.

Josh. 8:27—אָשֶׁר הִי יְשִׂרָאֵל כְּדְבֵּר הי אֲשֶׁר הִיִּיא בְּזְזוּ לְהֶם יִשְׂרָאֵל כִּדְבֵּר הי אֲשֶׁר הִיִּא הַיְּהוֹשֻׁעַ "Only the cattle and the spoil of that city Israel took as their booty, according to the word of the LORD which he commanded Joshua."

The next example again demonstrates the phrase בַּדְבַר ה followed by a relative clause, אֲשֶׁר דָּבֶּר-לוֹּ, referring to the prophet mentioned in the beginning of the verse.

1 Kgs. 14:18 below displays once more the phrase בְּדְבַר הֹי, and it is once more extended by a relative clause, בְּדָבר הֹי אֲשֶׁר דָּבֶּר בְּיַד-עַבְדּוֹ אֲחִיָּהוּ, referring to the prophet who transferred the words of God.

1 Kgs. 14:18—זְּיָשְׁרָאֵל כִּרְבֵּר הֹי אֲשֶׁר דִּבֶּרוּ-לוֹ כָּל-יִשְׂרָאֵל כִּרְבֵּר הֹי אֲשֶׁר דִּבֶּרוּ אֲחִיְהוּ הַנְּבִיא יִישְׁרָאֵל בִּרְבִּר "And all Israel buried him and mourned for him, according to the word of the LORD, which he spoke by his servant Ahijah the prophet."

In the next example בְּדְבֵּר הֹ follows the main verb וְּיָמָת, and it is again extended by a relative clause, אֲשֶׁר-דָּבֶּר אֱלֹיָהוּ, referring to Elijah as transmitting God's words.

2 Kgs. 1:17—הַבֶּר הַּיְלְהָּוֹ וְיִמְלֹדְ יְהוֹרֶם תַּחְתְּיו בִּשְׁבַר הֹי אֲשֶׁר-וּבֶּבֶּר אֵלִיהוּ וְיִמְלֹדְ יְהוֹיְם בָּן-יְהוֹשְׁפָט מֶלֶדְ יְהוּדָה בִּי לֹא-הָיְה לוֹ בֵּן "So he died according to the word of the LORD which Elijah had spoken. Jehoram, his brother, became king in his stead in the second year of Jehoram the son of Jehoshaphat, king of Judah, because Ahaziah had no son."

Not just בּדְבַר ה' שֶׁלְהֵי יִשְׂרָאֵל appears in the following example, once more accompanied by a relative clause, אֲשֶׁר דָּבֶּר בְּיַד-עַבְדוֹ , mentioning the prophet by whom God sent his words.

2 Kgs. 14:25—הְּאָרְהָ תְּרְבְּל מִלְּבוֹא חֲמָת עַד-יְם הְעֲרְבִּה יְשְׁרְאֵל מִלְּבוֹא חֲמָת עַד-יְם הְעֵרְבִּה מְּנֵּח מִּנֵּח מִּנֵּח הַּנִּבְיא אֲשֶׁר הִנָּה בְּּרָבִי וֹנְה בָּן-אֲמִחֵּי הַנְּבִיא אֲשֶׁר הִנָּח יִּשְׁרָאֵל אֲשֶׁר הְנָּבְר הֹי אֱלְהֵי יִשְׂרָאֵל אֲשֶׁר דְּבֶּר בְּיִד-עַבְדּוֹ יוֹנָה בֶּן-אֲמְחַיּ הּנְבִּיא אֲשֶׁר הְּנֵּר הֹי אֱלְהֵי "He restored the border of Israel from the entrance of Hamath as far as the Sea of the Arabah, according to the word of the LORD, the God of Israel, which he spoke by his servant Jonah the son of Amittai, the prophet, who was from Gath-hepher."

The last example in this section repeats the same structure by employing יה פֿדְבַר ה' in final position, and it is yet again followed by a relative clause, אֲשֶׁר קְרָא אִישׁ הָאֱלֶהים אֲשֶׁר קְרָא אָישׁ הָאֲלֶהים אֲשֶׁר קְרָא אָישׁ הָאֲלֶהים to the individual responsible for transmitting the word of God.

2 Kgs. 23:16 מְּלָבְרִים נְיִּשְׁרֹף עֲלְבִּקְבִים אֲשֶׁר-שָׁם בְּהָר וַיִּשְׁלֹח וַיִּקְבְּרִים אֲשֶׁר קָרָא אֶת-הַּקְבְּרִים נִיִּשְׁרֹף עַל-הַמְּזְבֵּח וְיַטְמְּאֵהוּ כִּּרְבַר הי אֲשֶׁר קְרָא אֶת-הַדְּבָרִים הָאֲלֶה "And as Josiah turned, he saw the tombs there on the mount; and he sent and took the bones out of the tombs, and burned them upon the altar, and defiled it, according to the word of the LORD which the man of God proclaimed, who had predicted these things." 5

#### 3.1.1.1.2 Examples with גָאָם-ה׳

The phrase אַם-הּ, in the next example is included in an announcement uttered by an angel as part of an oath and it contains an affirmation that the speech is in the name of God. אָם-הּ, appears immediately after the declaration of the oath. All the examples below containing this phrase show that the functional-pragmatic purposes of אַבּר הֹ and הַּבְּבֶּר הֹ are very similar and the two play an analogous role as references to God as speaker. Still, they differ slightly. בּרְבַר הֹ usually refers to a remote speech of God which is presented as predicting an existing situation. By contrast, הַ is usually part of an utterance, and it is used to ensure the readers or audience that the specific speech in which it appears should be attributed to God or is spoken in the name of God.

is especially common in the prophetic books of Isaiah and even more in Jeremiah as part of the prophetic language. That language is beyond the scope of this work, which concentrates on Classical Biblical Hebrew prose, so only one example from Jeremiah is demonstrated

<sup>&</sup>lt;sup>5</sup> More references for this construction in this word order are 1 Kgs. 15:29, 16:34, 17:5,16, 22:38, 2 Kgs. 4:44, 7:16, 10:17, 24:2.

below. Note too that like the *RSV*, the *JPS* translation, Saadya Gaon's Arabic translation, *al-kitāb al-muqaddas*, the Geez translation, Onkelos, and the *Peshitta* use a clause to translate אָם הוֹ in this verse instead of a noun phrase: "...the Lord declares...", אַמַר אָלָה , יִקוּל אַלְלָה , אַמָּר יִי, יִקוּל אַלָּלָה , אַמַר יִי, יִקוּל אַלָּה , אַמַר יִי, and אַמֵּר יִי, and אַמֵּר יִי, יִקוּל אַמָּר יִי, respectively.

Gen. 22:16— וַיֹּאמֶר בִּי נְשָׁרְ נְאָם-ה׳ כִּי יַעַן אֲשֶׁר עָשִׂיתְ אֶת-הַדְּבְר הַזֶּה היִיחִידֶף אֶת-בִּנְךְּ אֶת-בְּנְךָּ אֶת-בְּנְךְּ אֶת-יְחִידֶף "And he said, 'By myself I have sworn, says the LORD, because you have done this, and have not withheld your son, your only son.'"

Again, in the next example אָמָר הֹ is part of an oath, and in this case the whole utterance is attributed to God. Also, אָמָר יָּם, appears immediately after the opening oath formula, תֵּי-אָנִי, separating it from the oath content. A clause, "... says the Lord ...," appears in the JPS translation, similarly to the RSV translation. A clause, appears in the Saadya Gaon's Arabic translation and al-kitāb al-muqaddas. Likewise, a clause, בּבּה אַמָּר יִיִּ אַמַר יִיִּ appears in the Geez translation, a clause, אַמַר יִיִּ appears in Onkelos, and a clause, אַמַר יִיִּ אַמַר יִיִּ appears in the Peshitta. All these clauses replace the original Hebrew noun phrase יִנְאַם-הֹי

Num. אַמֹר אָלָהֶם חַיּ-אָנִי נְאָם-ה׳ אָם-לֹא כַּאֲשֶׁר דְּבַּרְתֶּם בְּאָזְנְי כֵּן  $^{\circ}$  אָמֵיה לָכֶם מִי-אָנִי נְאָם-ה׳ Say to them, 'As I live,' **says the LORD**, 'what you have said in my hearing I will do to you.'"

The remaining examples are utterances attributed to God. The phrase השם-הם might appear at the beginning of the utterance, as in the first appearance in 1 Sam. 2:30, it can follow an adverb and separate it from the following clause as in the second appearance in 1 Sam. 2:30, it may be in the middle of an utterance, as in Jer. 1:19, and it may be in final position as in 2 Kgs. 19:33 and 2 Kgs. 22:19 below. This flexibility in word order of השם-הם is a prominent sign of its being a full parenthesis from a functional-pragmatic and from a linguistic-syntactic standpoint.

<sup>&</sup>lt;sup>6</sup> References to this phrase in prophetic language are numerous, e.g., Isa. 14:22, 17:6, 30:1, Jer. 2:3,9,12, 31:34,37,38.

The phrase גְּאֶם-הּ, in apposition to the name of God גְּאֶם-הּ, introduces the word of God in first half of the next verse, and intervenes between the adverb וְעַהְּה and the word of God in the second half of the verse.

1 Sam. 2:30— לָכֵן נָאָם-הִי אֱלְהֵּל אָמוֹר אָמַרְתִּי בֵּיתְדְּ וּבִיִּת אָבִּדְּר אֲכֵבְּדִי אֲכֵבֵּד וּבִיִי יִתְהַלְּכוֹ לְפָנֵי עַד-עוֹלְם וְעַתָּה נְאָם-הִי חְלִילְה לִי כִּי-מְכַבְּדֵי אֲכֵבִּד וּבֹיִי יִקְלוּ "Therefore **the LORD the God of Israel declares**: 'I promised that your house and the house of your father should go in and out before me for ever'; but now **the LORD declares**: 'Far be it from me; for those who honor me I will honor, and those who despise me shall be lightly esteemed.'"

קאָם-ה' signifies the end of the word of God in the following example.

2 Kgs. 19:33—יָבֹא נְאָם-הֹי הַלֹּא יָבֹא נְאָם-הֹי פּה יָשׁוּב וְאֶל-הְעִיר הַוֹּאֹת לֹא יְבֹא נְאָם-הֹי "By the way that he came, by the same he shall return, and he shall not come into this city, says the LORD."

Next, 'הי again marks the conclusion of the word of God.

2 Kgs. 22:19—יַּעָבְרָהְי עַל-הַמְּקוֹם דְּבֶּרְהִי עַל-הַמְּקוֹם הַּבְּנָע מִפְּנֵי מִבְּי דְּבָּבְרְ וַתְּבְּנֶע מִפְּנֵי מִבְּלְּהְ וַתְּקְרֵע אֶת-בְּגָדֶיף וַתִּבְכֶּה לְּפְנִי וְגַם הַּיָּה וְעַל-יִשְׁבִיו לִּהְיוֹת לְשַׁמְּה וְלִקְלְלָה וַתִּקְרֵע אֶת-בְּגָדֶיף וַתִּבְכֶּה לְפְנִי וְגַם "Because your heart was penitent, and you humbled yourself before the LORD, when you heard how I spoke against this place, and against its inhabitants, that they should become a desolation and a curse, and you have rent your clothes and wept before me, I also have heard you, says the LORD."

In the next example אָתְּדְּ אֲנִי separates the nominal clause אָתְּדְּ אֲנִי from its extension by a construct infinitive complement expressing purpose, לְהַצִּילֵדְּ.

Jer. 1:19—וְגַלְחֲמוּ אֱלֶּידּ וְלֹא-יוּכְלוּ לְדְּ כִּי-אִתְּדְּ אֲנִי נְאָם-ה׳ לְהַצִּילֶּדְ "They will fight against you; but they shall not prevail against you, for I am with you, says the LORD, to deliver you."

An example with both בְּלְבֵר ה' and בְּלְבֵר ה' side by side in the same verse is the following, 2 Kgs. 9:26. The two appearances of נְאָם ה' take part in swearing by the name of God as evident from the use of a negative conditional clause beginning בַּלְבֵר ה' The phrase בִּלְבֵר ה' refers to an

 $<sup>^7</sup>$  For oath formulas in Biblical Hebrew including those containing negative conditional clauses see §2.1.4 above, and, e.g., *GKC* 1910:471–472, §149, Joüon & Muraoka 2006:582–584, §165, and Azar 1981:11–38.

order by the wish of God: וְעַתְּה שָּׁא הַשְׁלְבֵהוּ בַּחֶלְכָהוּ. The *RSV* omits one of the Biblical Hebrew occurrences of ...

## 3.1.1.1.3 Example with אֶל-פִּי ה׳ / עַל-פִּי ה׳

The following examples usually illustrate a specific speech or command attributed to God, and frequently a less specific utterance, but to what seems to be a recollection and fulfillment of God's will. In all cases the functional-pragmatic role of the prepositional phrases על-פִּי ה is parenthetical. The free position of these phrases within the clauses in which they appear, which is initial, middle, or final, makes their parenthetical status more prominent from a linguistic-syntactic standpoint.

In the next example the phrase על-פִּי appears in the middle of the whole verse, but at the end of the clause וַיִּסְעוּ בְּנִי-יִשְׂרָאֵל previous command attributed to God. Therefore, the syntactic position of עַל-פִּי ה here should probably be considered final.

Exod. 17:1—יה על-פָי מְלַמְסְעֵיהֶם עַל-פִּי הֹיִשְׂרָאֵל מִמְּדְבַּר-סִין לְמַסְעֵיהֶם עַל-פִּי הִּיְשְׁרָאֵל מִמְּדְבַּר-סִין לְמַסְעֵיהֶם עַל-פִּי הִּעְם לִּשְׁתֹת הָעְם "All the congregation of the people of Israel moved on from the wilderness of Sin by stages, **according to the commandment of the LORD**, and camped at Rephidim; but there was no water for the people to drink."

The following example demonstrates again the occurrence of the phrase על-פִּי ה in final position.

Lev. 24:12—יה בַּמִּשְׁמְר לִפְרשׁ לְהֶם עֵל-פִּי הּי—"And they put him in custody, till **the will of the LORD** should be declared to them."<sup>8</sup>

 $<sup>^8</sup>$  The RSV translation correctly conveys the content of the clause, but deviates from the Hebrew syntax, which uses a construct infinitive and a prepositional clause referring to God.

In contrast to the previous examples, Num. 3:16 demonstrates a middle position of על-פּי ה', though the clause extension following it, עַל-פָּי ה', is in fact another reference to God as responsible for the act of counting by Moses.

Num. 3:16—וְיַפְקֹד אֹתָם מֹשֶׁה עֵּל-פִּי הֹי בַאֲשֶׁר צְּוָהְ"So Moses numbered them **according to the word of the LORD**, as he was commanded."

Another example which clearly reveals middle position of על-פִּי ה' is Num. 3:39.

Num. 3:39— בְּל-פְּקוֹנֵי הַלְוִיִּם אֲשֶׁר פְּקַד משֶׁה וְאַהְרוֹ עַל-פִּי הי לְמִשְׁפְחֹתְם אֲשֶׁר פְּקַד משֶׁה וְאַהְרוֹ עַל-פִּי הי לְמִשְׁפְחֹתְם אָּלֶף "All who were numbered of the Levites, whom Moses and Aaron numbered at the commandment of the LORD, by families, all the males from a month old and upward, were twenty-two thousand."

Next, אַל-פִּי מְל-פִּי appears twice, each time referring to a different clause. Its position is initial both times.

Num. 9:18—נַּעל-פִּי הִי יִסְעוּ בְּנֵי יִשְׂרָאֵל וְעַל-פִּי הִי יַחֲנוּ כְּל-יְמֵי אֲשֶׁר יִשְׁבֹּן יַחֲנוּ עַל-הַמִּשְׁבָּן יַחֲנוּ "At the command of the LORD the people of Israel set out, and at the command of the LORD they encamped; as long as the cloud rested over the tabernacle, they remained in camp."9

Another apparent middle position is shown next, where עַל-פִּי הּ separates Moses' declaration conveying God's command to the Israelites, וַיָּצוּ אָת-בְּנֵי יִשְׂרָאֵל , from the following infinitive, מֵשֶׁה אֶת-בְּנֵי יִשְׂרָאֵל , which introduces the direct speech of the command.

Num. מַשֶּה אֶת-בְּנֵי יִשְׂרָאֵל עַל-פִּי ה׳ לֵאמֹר כֵּן מֵטֵה בְנִי-יוֹסֵף יִשְׂרָאֵל עַל-פִּי ה׳ לֵאמֹר בֵּן מֵטֵה בְנִי-יוֹסֵף 'And Moses commanded the people of Israel according to the word of the LORD, saying, 'The tribe of the sons of Joseph is right.'"

The following example contains the phrase אֶּל-פִּי אָּ, which is fully equivalent in content to עַל-פִּי ה Again, the Hebrew version reveals middle position of אֶּל-פִּי ה , and the extension of the verse that follows it is in apposition to the sentence component that precedes it.

 $<sup>^9</sup>$  This phrase is especially common in Numbers, and see other examples in Num. 3:51, 4:37,41,45,49, 9:20,23, 10:13, 13:3, 33:2,38, 36:5.

Josh. 15:12 הַלְכָלֵב בֶּן-יְפַנֶּה נְתַן חֵלֶק בְּתוֹדְ בְּנִי-יְהוּדָה אֶל-פִּי ה׳ לִיהוֹשֶׁע־According to the com-"According to the commandment of the LORD to Joshua, he gave to Caleb the son of Jephunneh a portion among the people of Judah, Kiriath-arba, that is, Hebron (Arba was the father of Anak)."

אֶל-פִּי ה appears in the next verse too, again in middle position, between the verb יַּהְן and its direct object בַּחְלָה. Here its parenthetical content refers to God, but also to his messenger Joshua: אֵל-פִּי ה׳ לִיהוֹשֶׁעַ.

Josh. 17:3—נּתְּלְבְנְה לְּפְנֵי הְּנְשִׁיֹּרְ הַכּּהֵן וְלְפְנֵי יְהוֹשֶׁעַ בִּן-נּוּן וְלְפְנֵי הַנְּשִׂיִאִים בּרֹבִּי הִי נַחְלָה בְּתוֹךְ אָחִינוּ וַיִּתֵּן לְהֶם אֶּל-פִּי הֹי נַחְלָה לֵּאמֹר הֹי צִּנְּה אֶת-לְנוּ נַחְלָה בְּתוֹךְ אָחֵינוּ וַיִּתֵּן לְהֶם אֶּל-פִּי הֹי נַחְלָה בְּתוֹךְ אָחִי אָבִיהֶן 'They came before Eleazar the priest and Joshua the son of Nun and the leaders, and said, 'The LORD commanded Moses to give us an inheritance along with our brethren.' So according to the commandment of the LORD he gave them an inheritance among the brethren of their father."

Another example, showing initial position of מֵל-פִּי ה, is the following.

Josh. 19:49—קבי ה' נְתְנוּ לוֹ אֶת-הְעִיר אֲשֶׁר שָׁאָל אֶת-תִּמְנַת-סֶרַח בְּהַר בְּהַלּעִיר וַיִּשֶׁב בְּהּ שְׁפְרָיִם וַיִּבְנֶה אֶת-הְעִיר וַיִּשֶׁב בְּהּ "By command of the LORD they gave him the city which he asked, Timnath-serah in the hill country of Ephraim; and he rebuilt the city, and settled in it."

אָל-פִּי ה appears in the next example of Josh. 21:2, again in middle position, between a verb אָת-הָעָרִים הָאֵלֶה and its direct object אֶת-הָעָרִים הָאֵלֶה.

Josh. 21:2—הָּאֶרֶה הְאָרֶה הֹי אֶת-הֶעְרִים הְאַלֶּה לַלְוִיִּם מִנַּחֲלָתָם אֶל-פִּי הֹי אֶת-הֶעְרִים הְאֵלֶה יִשׁירָא לַלְוִיִּם מְנַּחֲלָתְם אֶל-פִּי הֹי So by command of the LORD the people of Israel gave to the Levites the following cities and pasture lands out of their inheritance."

על-פִּי ה reappears in the following example in the final position. The parenthetical content refers to God and his messenger Moses.

Josh. 22:8—נְיְלֶבוֹ בְּנֵי-רְאוֹבֵן וּבְנֵי-גְד וֹחֲצִי שֵׁבֶט הַמְנַשֶּׁה מְאֵת בְּנְי-בְּאוֹבֵן וּבְנֵי-גְד וַחֲצִי שֵׁבֶט הַמְנַשֶּׁה מְאֵת בְּנִי-רְאוֹבֵן וּבְנֵי-בְּעוֹ לְּכֶבת אֶל-אֶרֶץ הַגִּלְעָד אֶל-אֶרֶץ אֲחְזָּתְם יִשְּׁר הַּעְּלִיבּה עַל-בִּי ה׳ בְּיִר-מִשֶּׁה "So the Reubenites and the Gadites and the half-tribe of Manasseh returned home, parting from the people of Israel at Shiloh, which is in the land of Canaan, to go to the land of Gilead, their own land of which they had possessed themselves by command of the LORD through Moses."

The last example has מֵל-פֵּי הֹ in the initial position. Its parenthetical information seems to express a reference to God as responsible for the fate of Jehoiakim and Judah, like the parenthetical clauses collected as expressing theological remarks and discussed in §2.3.4 above. This example is mentioned there along with similar clauses and phrases referring to the fate of Judah in verses 2–4 of 2 Kgs. 24.

2 Kgs. 24:3—מָעָה מְנֵשֶּׁה בְּיהוּדְה לְהָסִיר מֵעַל פְּנָיו בְּחַטֹּאת מְנֵשֶּׁה בִּיהוּדְה לְהָסִיר מֵעַל פְּנָיו בְּחַטֹּאת מְנֵשֶּׁה "Surely this came upon Judah at the command of the LORD, to remove them out of his sight, for the sins of Manasseh, according to all that he had done."

#### 3.1.1.2 Examples with Other Speakers

The following examples demonstrate the use of the phrase בְּלְבֵּר, including its appearance in the comparative pattern ... בֵּלְבֵּר, and the phrase עֵל-בֵּי,. The discussion ends with a few constructions referring not to individuals but to spoken words, written documents, and similar content. These are treated here because of their similarity in structure and content to the other constructions in this section. Again, as in previous examples referring to God in §3.1.1.1.1 above, Bible translations differ in their choice of pattern for the translation of the prepositional phrase בִּלְבַר sometimes a full clause involving prediction and sometimes only a phrase.

#### 3.1.1.2.1 Examples with בַּדָבַר

The phrase בַּדְבֵּר accompanied by a name of a speaker generally serves as a parenthesis which refers to the name of a speaker. However, in a few cases, like Gen. 47:30 and Num. 14:20 below, it might also contain a modal nuance of affirmation or submission, which belong to the realm of deontic modality. This modal nuance contributes to the treatment of this phrase as a parenthetical unit, since modal nuances often appear in parentheses.

The first example shows the prepositional phrase בָּדְבֵּר with a 2nd person suffix in the form בָּדְבָּרְ. It stands in initial position and introduces an address followed by a direct speech. Syntactically, this phrase in the whole clause is of independent status. It is not a complement of the following components or any other clause part, and it might be understood as a one-member clause expressing parenthesis, external to whatever follows.

 $1~{
m Kgs.}~20:4$ יַשַׁן מֶּלֶּדְ-יִשְׂרָאֵל וּיֹּאמֶר בּּרְבָּרְדְּ אֲדֹנִי הַמֶּלֶדְ לְּדְּ אֲנִי-־אָמֶר וּיֹאמֶר הַּלְי-לִי- "And the king of Israel answered, "As you say, my lord, O king, I am yours, and all that I have.'"

The one-member clause status, just a possibility in the foregoing structure, is the only possible interpretation in the next example. Here it appears again in speech and as a reply to another speaker, and it is clearly detached from the following purpose clause לְמַעֵן תֵּדֶע כִּי-אֵין כַּה׳

Exod. 8:6—ניֹאמֶר לְמָחֶר וַיֹּאמֶר כּּדְבָּרְךּ לְמַעַן תֵּדַע כִּי-אֵין כַּה׳ אֱלֹהֵינוּ—"And he said, 'Tomorrow.' Moses said, '**Be it as you say**, that you may know that there is no one like the LORD our God.'"

In the next example, Gen. 30:34, as in all the other examples below, the prepositional phrase בַּדְבַר is set in final position. The *RSV* renders it by a clause: "... as you have said."

Gen. 30:34—יָאמֶר לְבָן הֵן לוּ יְהֵי כִּדְבֶּרֶךְ "Laban said, 'Good! Let it be as you have said.'"

The next example again shows בְּדְבֵּה in final position. This time it does not stand by itself but is continued by the name of the speaker, Joseph, but also by a relative clause, אֲשֶׁר דָּבֵּר. This relative clause repeats the fact that the preceding action is executed according to the word of Joseph. The duplication of this content also involves a repetition in the use of the root דְבַר, once in a noun, דְבַר, and once in a verb, רְבַר, creating alliteration. Relative clauses often form such repetitions and alliterations in Biblical Hebrew, and this means is considered typical of biblical style. 10

Gen. 44:2—וְאֵתֶר הַבְּטִוֹ וְאֵת הַבְּטֵּף תְּשִׁים בְּבִּי אַמְתַּחַת הַקְּטוֹ וְאֵת בֶּכֶּף הְשִׁר וְבֵּר יוֹסֵף אֲשֶׁר וְבֵּר הוֹ 'And put my cup, the silver cup, in the mouth of the sack of the youngest, with his money for the grain.' And he did as Joseph told him."

The next example displays once more בַּדְבֵּר in final position, and it is employed here to mention a certain speaker, but also as an affirmation that his death wish and command, cited in the first half of the verse,

On these repetitions see Peretz 1967:146–148, §15.

will be executed. This additional meaning incorporates a nuance of deontic modality.

Gen. 47:30—אֲבֹתִי עִם-אֲבֹתִי וּנְשָׂאתִנִי מִמְּצְרֵיִם וּקְבַרְתַּנִי בִּקְבַרְתָם וַיֹּאמֵר יִאָבֹתִי וּנְשָׂאתַנִי מִמְּצְרֵיִם וּקְבַרְתַּנִי בְּקְבָרְתְּם וַיֹּאמֵר בְּרְבָּרְךְּ '...But let me lie with my fathers; carry me out of Egypt and bury me in their burying place.' He answered, 'I will do as you have said.'"

The position of בּדְבֵּר should also be regarded final in the following example, since it follows and concludes the clause מַשָּשׁ ה׳.

Exod. 8:9—הַבְּתִים מִן-הַבְּתִים מִן-הַבְּתִים מִּשָּׁה וַיְּמֻתוּ הַּצְפַרְדְּעִים מִן-הַבְּתִים מִן-הַשְּׁרֵת "And the LORD did **according to the word of Moses**; the frogs died out of the houses and courtyards and out of the fields."

The function of בְּדְבֵּר in the next example seems again to involve more than just indicating a speaker's name. In this case God acquiesces to the Moses' plea to forgive the Israelites' sins, so בַּדְבַר might be understood as carrying a nuance of deontic modality related to a plea.

Num. 14:20—ניֹאמֶר ה׳ סְלַחְתִּי כִּדְבֶּרֶףְ—"Then the LORD said, 'I have pardoned, according to your word.""

The phrase בְּדְבֵּר-גָּד, which appears in the next example, recalls a certain prophecy revealed through the prophet Gad.

2 Sam. 24:19—יָנישַל דְּוָד כָּדְבַר-נָּד כַּאֲשֶׁר צִּוָּה ה־"So David went up **at Gad's word**, as the LORD commanded."

The following verse describes certain activities of a widow whom the prophet Elijah chanced to meet on his way to a place called Zarephath. The phrase בַּדְבֵּר אֵלְיָהוּ here might be regarded as standing in middle position, because it appears in the middle of a chain of wayyiqtol verbs, וַתְּאַבֶּל ,וַתְּעֵשֶׁה ,וַתִּלֶּדְ. On the other hand, the third verb, וַתִּאַבֶל , might also be understood as opening a second clause, detailing the type of activities done by the widow.

 $1~\mathrm{Kgs.}$  17:15—אַלָּהָוּ הָיא-וָהָיא היא-וָהָא הַלְּיָהוּ וַתִּעֲשֶׂה כִּרְבַר אֵלִיָּהוּ וַתִּאַכַל הוּא הִיא-וָהָא יִמִים (And she went and did **as Elijah said**; and she, and he, and her household ate for many days."

The following phrase בְּדֶבֵר אֱלִישָׁע אֲשֶׁר דָּבֵּר, like the majority of the examples so far, is in final position, and as in Gen. 44:2 above it involves alliteration by repetition of the root דיא in the subsequent relative clause. Its meaning refers to a prophecy, וַיֹּאמֶר בֹּה-אָמַר ה' רַפָּאתִי לְמֵיִם

הָאָּלֶה לֹא-יִהְיֶה מְשָׁם עוֹד מְוֶת וּמְשַׁבְּלֶת, which is mentioned in the previous verse and spoken by Elisha in the name of God.

2 Kgs. 2:22—וַיֵּרְפּוּ הַמַּיִם עַד הַיּוֹם הַזֶּה כִּדְבַר אֱלִישֶׁע אֲשֶׁר דְּבֵּר "So the water has been wholesome to this day, according to the word which Elisha spoke."

בּדְבַר again appears in middle position in the next verse, but seems to conclude the first clause, וַיִּכְד וַיִּטְבֹּל בַּיַּרְדֵּן שֶׁבַע פְּעָמִים, while the following verb, וְיִּשְׁב, appears to open a second clause which describes the consequence of the activities indicated in the first.

2 Kgs. 5:14—וְיָטְבּל בַּיַרְבֵּן שֶׁבֵע פְּעָמִים כִּרְבֵר אִישׁ הָאֱלֹהִים וַיְּשְׁב בְּשְׁרוֹ שְׁבִע בְּעָמִים כִּרְבֵר אִישׁ הָאֱלֹהִים וַיְּשְׁב בְּשְׁרוֹ שְׁבוּ לָּטֵוֹ וַיִּטְהַר (So he went down and dipped himself seven times in the Jordan, according to the word of the man of God; and his flesh was restored like the flesh of a little child, and he was clean."

The last example shows בְּדְבֵּר in final position. Again God fulfills the request of an individual, in this case the prophet Elisha.

2 Kgs. 6:18—נַּיְרָדוּ אֵלְיו נַיִּתְפַּלֵל אֱלִישָׁע אֶל-ה' נַיֹּאמֵר הַדְּ-נָּא אֶת-הַגּוֹי-הַזֶּה בַּסְּנְוַרִים בְּיַבְר אֱלִישָׁע בִּיּרְבִר אֱלִישָׁע הי נַיִּרְבוּ בִּיּבְנַרִים בְּיַבְּרֵרִים בְּיַבְרַר אֱלִישָׁע "And when the Syrians came down against him, Elisha prayed to the LORD, and said, 'Strike this people, I pray thee, with blindness.' So he struck them with blindness in accordance with the prayer of Elisha."

## 3.1.1.2.2 The Pattern ... בֶּלֶבר... בֶּלֶ

The ensuing examples contain a pattern with a reference to a speaker and with an affirmation that his words will be executed. It is constructed either of בְּלֵבְ אֵשֶׁר / בַּאֲשֶׁר or of a full clause פְּבָל אֲשֶׁר / בַּאֲשֶׁר The examples with a full clause, discussed in §2.1.1.2 and §2.1.1.4 above, include references to God as the speaker or to other characters. When this pattern appears in direct speech, both types, phrase and clause, belong to the realm of deontic modality, since they convey a subjective affirmation expressed by the speaker. As for word order flexibility, contrary to our expectations of parenthetical phrases the prepositional phrase בַּרְבַר always appears in initial position in the following examples.

The first example is a direct speech which is part of the dialogue between Joseph and his brothers in the cycle of the Joseph stories. The speech utterance is made by Joseph to his brothers, accepting their offer to become his slaves should he find the stolen money in their possessions. The next example again has the phrase ... בַּן ... מַבְּרַבּר. The speech utterance contains only this phrase, and it is said by Rahab confirming the suggestion made by the two Israelite spies hidden in her house that she mark her window with a scarlet cord to save her life.

Josh. 2:21 נְתֹּאמֶר כְּדַבְרֵיכֶם כֶּן-הוֹא וַתְּשַׁלְחֵם וַיֵּלֵכוּ וַתִּקְשׁר אֶת-תִּקְוַת הַשְּׁנִי בָּקְרוֹ בַּחְלוֹן (And she said, 'According to your words, so be it.' Then she sent them away, and they departed; and she bound the scarlet cord in the window."

Another example of the phrase ... בַּרֶבר in direct speech is the following. However, contrary to the previous example this time ... בַּּרְבר appears in a larger pattern of an oath. The oath-introducing formula is דְּהָיֶה שׁמֵעַ בֵּינוֹתִינוּ, and it is followed by the negative conditional pattern אָם-לֹא, which conveys positive intentions. The oath frame in which the phrase ... בַּן ... בַּן appears confirms its deontic modal meaning and its function as a strong affirmation.

Judg. 11:10—קֹבְרֶבְּרְאָ בִּינוֹתֵינוּ אָם-לֹא כִּדְבְּרָךְ יִּפְתָּח ה׳ יִהְיָה שׁמֵעַ בֵּינוֹתֵינוּ אָם-לֹא כִּדְבְּרָךְ המון בּיִשְׁהְּה 'And the elders of Gilead said to Jephthah, 'The LORD will be witness between us; we will surely do as you say.'"

Contrary to all other examples in this section, which are direct speech, the following is not part of a speech utterance but of the narrative. ... בּן ... בּ

2 Sam. 7:17—וְהָלָ הַּבְּרִים הָאֵלֶה וּכְכֹל הַחְזְיוֹן הַנֶּה כֵּן דִּבֶּר נְחְןְ—יֹם הָאֵלֶה וּכְכֹל הַחְזְיוֹן הַנָּה כֵּן דִּבֶּר נְחְן "In accordance with all these words, and in accordance with all this vision, Nathan spoke to David."

The last example again displays direct speech. Nevertheless, contrary to the examples involving direct speech in Gen. 44:10, Josh. 2:21, and

 $<sup>^{11}</sup>$  Again, for more on oath formulas in Biblical Hebrew including negative conditional clauses see §2.1.4 above, and, e.g., *GKC* 1910:471–472, §149, Joüon & Muraoka 2006:582–584, §165, and Azar 1981:11–38.

Judg. 11:10 above, which convey affirmation regarding a future event, in 2 Sam. 13:35 below the phrase בְּלֶבֶר... בַּן confirms a contemporary situation, since it refers to what Jonadab perceives in the very moment of his speech.

2 Sam. 13:35—נֵיֹאמֶר יוֹנְדָב אֶל-הַמֶּלֶךְ הָנֵּה בְנִי-הַמֶּלֶךְ בְּאוֹ כִּדְבַר עַבְדְּךְ כֵּן מּמִלְּדְּ הָנֵּה בְנִי-הַמֶּלֶךְ בְּאוֹ כִּדְבַר עַבְּדְּךְ כֵּן "And Jonadab said to the king, 'Behold, the king's sons have come; as your servant said, so it has come about.'"

## 3.1.1.2.3 Examples with על-פּי

Similarly to the findings for על-פִּי ה and אֵל-פִּי ה §3.1.1.1.3 above, the following examples show that the prepositional phrase עַל-פִּי does not have a fixed position in the clause. Again, the original Hebrew word order is not always kept in the RSV, and the position of עַל-פִּי might be different from that in the original. Such rendering suggests that the RSV interprets עַל-פִּי as a parenthesis. Here too, Bible translations might occasionally translate this phrase by a clause, e.g., the Geez translation of Gen. 45:21 below by Than Land Acces / bakama yabelo Far on—"... as Pharaoh told him...."

In the first example the phrase עֵל-פֵּי פַּרְעה appears in the middle, between two verbal clauses opening with a similar verb, וַיִּתוֹ, and sharing one subject, Joseph.

Gen. 45:21—מַן בְּנֵי יִשְׂרָאֵל וַיִּתֵּן לְהֶם יוֹסֵף עֲגָלוֹת עַל-פִּי פַּרְעֹה - נִיִּעֲשׂוּ-בֵן בְּנֵי יִשְׂרָאֵל וַיִּתֵן לְהֶם צִּדְה לִדְּרֶדְּ "The sons of Israel did so; and Joseph gave them wagons, according to the command of Pharaoh, and gave them provisions for the journey."

Another middle position is demonstrated in the following example, where a series of attributives to פָּקוּדֵי הַמְּשָׁבָּן is split by this phrase.

Exod. 38:21—מָלֶה פְּקוּדֵי הַמִּשְׁבָּן מִשְׁבַּן הָעָדָת אֲשֶׁר פָּקוּד עַל-פִּי מֹשֶׁה עֲבֹדַת הַמֹּהָן אֵבֶּה הָפֹהֵן אֵבָּה הָלְוִים בְּיֵד אִיתְמֶר בֶּן-אַהָרן הַכֹּהֵן הַכֹּהֵן הַכּהַן הַבּה "This is the sum of the things for the tabernacle, the tabernacle of the testimony, as they were counted **at the commandment of Moses**, for the work of the Levites under the direction of Ithamar the son of Aaron the priest."

Next, the phrase עַל-פִּי אַהְרֹן וּבְנְיו is set in initial position, introducing a verbal clause.

Num. 4:27—אָבֶרוֹ וְּבָנָיוֹ תִּהְיֶה כְּל-עֲבֹרַת בְּנֵי הַגֵּרְשָׁנִי לְכָל-מַשְּׁאָם וּלְכל—"All the service of the sons of the Gershonites shall be at the command of Aaron and his

**sons**, in all that they are to carry, and in all that they have to do; and you shall assign to their charge all that they are to carry."

Initial position is found in the next example as well. Although the phrase עַל-פִּי אַהְרֹן וּבְנְיו occurs in the middle of the verse, עַל-פִּי אַהְרֹן וּבְנְיו is in initial position in the second clause: עַל-פִּי שְׁנֵי עֵדִים אוֹ עַל-פִּי שְׁלֹשָׁה-עֵדִים This is probably for pragmatic reasons, namely the content is almost certainly brought up first, in opposition to the content of the preceding negative clause, לֹא-יָקוּם עֵד אֶחְד בְּאִישׁ לְכָל-עָוֹן וּלְכָל-חַטְּאַת Still, the possibility to change the position of this phrase is typical of parenthetical units.

Deut. 19:15—אָשֶׁר אֲשֶׁר יֶחֲטְא אֲשֶׁר יֶחֲטָא הְּלָל-תָּטְא וּלְכָל-עָוֹן וּלְכָל-תַטְא הְבֶּל הַטְא אֲשֶׁר יֶחֲטָא הְבָּר יִם יְקוּם דְּבָּר הֹא יִקוּם עָד אָּח שָל-פִּי שְׁנִי עֵּדִים אוֹ עַל-פִּי שְׁלשָה-עֵּדִים יְקוּם דְּבָּר הֹא single witness shall not prevail against a man for any crime or for any wrong in connection with any offense that he has committed; only on the evidence of two witnesses, or of three witnesses, shall a charge be sustained."<sup>12</sup>

In the following verse too a pragmatic factor probably causes the phrase וְעַל-פִּיהֶם to stand in initial position, as a logical predicate of the clause וְעַל-בִּיהֶם יִהְיֶה בָּל-רִיב וְכְל-נְגַע in which it appears. The initial position of this phrase is parallel to the initial position of the direct object בִּי בְּם בָּחַר ה׳ אֱלֹהֶיךְ לְשֶׁרָתוֹ וּלְבֶרֶךְ בְּשֵׁם ה׳ בִּי בָם בָּחַר ה׳ אֱלֹהֶיךְ לְשֶׁרָתוֹ וּלְבֶרֶךְ בְּשֵׁם ה׳ בִּי בָם בָּחַר ה׳ אֱלֹהֶיךְ לְשֶׁרָתוֹ וּלְבֶרֶךְ בְּשֵׁם ה׳ בִּי בִם בָּחַר ה׳ אֱלֹהֶיךְ לְשֶׁרָתוֹ וּלְבֶרֶךְ בְּשֵׁם ה׳

Deut. 21:5—פְּעֵים בְּנֵי לַּיָרָתוֹ וּלְבְרֵךְ בְּשֶׁרְתוֹ וּלְבְרֵךְ בְּשֵׁרְתוֹ וּלְבְרֵךְ בְּשֶׁרְתוֹ וּלְבְרֵךְ בְּשִׁרְתוֹ וּלְבְרֵךְ בְּשִׁרְתוֹ בְּלִי-נְגַע הַבְּלִירָב וְּכָל-נְגַע "And the priests the sons of Levi shall come forward, for the LORD your God has chosen them to minister to him and to bless in the name of the LORD, and by their word every dispute and every assault shall be settled."

The example in 2 Sam. 13:32 below displays the phrase עַל-פִּי אַבְשָׁלוֹם once more in initial position, and once more for pragmatic reasons, since the clause כָּי-עַל-פִּי אַבְשָׁלוֹם הָיְתָה שֹּוֹמְה מִיּוֹם עַנּתוֹ אֵת תְּמְר פִּי אַבְשָׁלוֹם הָיְתָה שׁוֹמְה מִיּוֹם עַנּתוֹ אֵת תְּמְר אַל-יֹאמֵר אָדנִי אֵת אָדנִי אַת מוֹן בּיִּאמֶר אָל-יִאמֶר בְּנִי-הַמֶּלֶךְ הַמִּתוּ קַנּי-הַמֶּלֶךְ הַמְּתוּ בּנִי-הַמֶּלֶךְ הַמְּתוּ בּני-הַמֶּלֶךְ הַמְּתוּ בּני-הַמֶּלֶךְ הַמְּתוּ בּני-הַמֶּלֶךְ הַמִּתוּ בּני-אַמְנוֹן לְבדּוֹ מַת clause of the preceding clause בִּי-אַמנוֹן לְבדּוֹ מַת

2 Sam. 13:32—וַיַּעָן יוֹנְדָב בֶּן-שִׁמְעָה אֲחִי-דָוִד וַיֹּאמֶר אַל-יֹּאמֶר אֲדֹנִי אֵת כְּל-הַנְעָרִים בּוֹ בְּנֵי-הַמֶּלֶךְ הַמִּיתוּ כִּי-אַמְנוֹן לְבַדּוֹ מֵת כִּי-עַל-פִּי אַבְשְׁלוֹם הְיְתָה שוּמְה מִיוֹם עַנֹּתוֹ אֵת שְׁמָר אֲחֹתוֹ "But Jonadab the son of Shimeah, David's brother, said, 'Let

<sup>&</sup>lt;sup>12</sup> See a closely similar example in Deut. 17:6.

not my lord suppose that they have killed all the young men the king's sons, for Amnon alone is dead, for **by the command of Absalom** this has been determined from the day he forced his sister Tamar."

The phrase עַל-פִּי פַרְעה in the last example in this section appears in final position. Although in the middle of the verse, it concludes the clause to which it belongs: אַךּ הַעֵּרִיךְ אַת-הַבָּטַף עַל-פִּי פַרְעה.

#### 3.1.1.2.4 Reference to Spoken Words

In all the previous examples the reference expressed by the prepositional phrase עֵל-פִּי indicates an individual. In the following examples the reference is to the spoken words themselves.

In the first example the prepositional phrase עַל-פִּי הַדְבָרִים הָאֵלֶה refers to a specific speech utterance in the first half of the verse. The phrase is similar to references illustrated in the preceding section, which include עַל-פִּי followed by an individual name or a reference to an individual, but its content is slightly different. In the following case הַעוֹד refers to two questions posed in the first half of the verse, הַעוֹד רְבָּי מִי הְבִישׁ לְבֶם אָּח מִי הְבִּישׁ לְבֶם אָּח מִי הַבְּעִל הַ מִי הַבִּשׁ לְבֶם אָּח stands in final position in the clause וַנְגַּד-לוֹ עַל-פִּי הַדְּבְרִים הָאֵלֶה.

Gen. 43:7—נִיאֹמְרוּ שְׁאוֹל שְׁאֵל-הָאִישׁ לְנוּ וּלְמוֹלַדְתֵנוּ לֵאמֹר הַעוֹד אֲבִיכֶם חַי הְנֵשׁ - הַאָּדְיכֶם לַנוּ וּלְמוֹלַדְתֵנוּ לָאמֹר הַעוֹד אֲבִיכֶם חִי הְנֵשֶּׁ - הְּרָּדִרִים הָאֵלֶּה הְיִדוֹעַ נֵדְע כִּי יֹאמֵר הוֹרִידוּ אֶת-אֲחִיכֶם - לְכֶם אָח נֵנֶגֶד-לוֹ עַל-פִּי הַדְּבָרִים הָאֵלֶּה הְיִדוֹעַ נֵדְע כִּי יֹאמֵר הוֹרִדוּ אֶת-אֲחִיכֶם - They replied, 'The man questioned us carefully about ourselves and our kindred, saying, 'Is your father still alive? Have you another brother?' What we told him was in answer to these questions; could we in any way know that he would say, 'Bring your brother down'?' "

The second example contains two references which involve עַל-פִּי . One refers to a speech utterance, הַּדְּבֶּר אֲשֶׁר יַגִּידוּ לְּךְ, the other to instructions, הַבְּבֶר אֲשֶׁר יוֹרוּדְ, and הַתּוֹרָה אֲשֶׁר יוֹרוּדְ. The two references differ in word order. The first is in middle position, the second in initial position.

Deut. 17:10–11—רְשָׁשְׁר אֲשֶׁר יַנִּידוּ לְךְּ מִן-הַמְּמְוֹם הַהוּא אֲשֶׁר יַנִּידוּ לְבְּ תַּלְּבְּעוֹת בְּכִל אֲשֶׁר יוֹרוּדְּ עַל-פִּי הַתּוֹרָה אֲשֶׁר יוֹרוּדְּ וְעַל-הַמִּשְׁפְּם יִבְּחַר ה׳ וְשְׁמִאל יִבְּחָר הִּ וְשְׁמִאל יִבְּחָר הִיְ וְשְׁמִאל לְּדְּ תְּטָוּר מִן-הַדְּבֶּר אֲשֶׁר-יִגִּידוּ לְדְּ יְמִין וּשְמֹאל "Then you shall do according to what they declare to you from that place which the LORD will choose; and you shall be careful to do according to all that they direct you. According to the instructions which they give you, and according to the decision which they pronounce to you, you shall do; you shall not turn aside from the verdict which they declare to you, either to the right hand or to the left."

The next verse refers to words spoken by God to Moses, which are about to be written according to God's instruction. The phrase עַּל-פִּי appears in a causal clause in initial position, probably due to pragmatic motivation: its content is parenthetical to the following clause but it serves as a logical predicate.

 $\operatorname{Exod}. 34:27$ ניאָמֶר ה' אֶל-מּשֶׁה פְּתָב-לְּךְּ אֶת-הַדְּבְרִים הְאֵלֶּה פִּי עַל-פִּי הַדְּבְרִים הְאָלָה פָּרִים הְאָלָה פָּרִים הְאָלָה בּיִי וְאֶת-יִשְּרָאֵל "And the LORD said to Moses, 'Write these words; **in accordance with these words** I have made a covenant with you and with Israel.'"

In the next three examples, Lev. 27:8, Lev. 27:18, and Num. 26:56, the reference is neither to an individual nor to spoken words but to other entities, either abstract nouns, like 'ability' in Lev. 27:8 or concrete nouns, like 'years' in Lev. 27:18 and 'lot' in Num. 26:56. These examples are not related to speech at all and their prepositional phrases, which include 'עַל-פִּי', play adverbial roles expressing manner. The prepositional phrase 'עַל-פִּי' in these examples has probably undergone semantic change. This started to appear in the previous examples, where the literal meaning 'according to the mouth of' is used for 'according to the words/commands of' or 'according to the evidence of.' Further developed, the following examples show additional semantic extension, and the meaning of 'ūccording to 'in general.'

<sup>13</sup> On the meaning of the prepositional phrase על-פּי see, e.g., BDB: 805b. A very similar prepositional phrase לְפִי and to a lesser extent בְּפִי The phrase לְפִי is not discussed here since it evinces even greater semantic change and its meaning is restricted to 'according to the number / quantity / measure / time of' (ibid.). However, יְבָּי חְּבִּר אֵלְיְּהוֹ הַּתְּשָׁבִּי הַבְּרִי הַתְּשָׁבִּי הַבְּיִּה הַשְּׁבִי הַתְּשָׁבִי בְּלְיִהוֹ הַתְּשָׁבִי הַלְּעָד אֵלִיהוֹ הַתְּשָׁבִי הַלְּעָד אָלִיהוֹ הַתְּשָׁבִי הַלְּעָד אָלִיהוֹ הַתְּשָׁבִי הַלְּעָד אָלִיהוֹ הַתְּשָׁבִי הַרְיִּהְיִה הַשְּׁנִים הָאָלָה טַל וִּמְטִר הַיִּרְיִה הַשְּׁנִים הָאָלָה טַל וִמְטִר הִיֹּ אֲשֶׁר עְמִדְהִי לְפָנְיוֹ אַם-יִהְיֶה הַשְּׁנִים הָאָלָה טַל וִמְטִר הַיִּרְיִה הַשְּׁנִים הָאָלָה עַל וִמְטִר הַרְיִּבְי וְבְרִי הַשְּׁרִים הַאָּלָה וֹם וֹל וּמְטִר הַבְּרִי הְבִרי הַבְּרִי הַבְּרִי הַבְּרִי הַבְּרִי הַשְׁרִים הַאָּבְּ הַמִּיל וְבְּבְי וְבְּרִי הַשְּׁרִים הַאָּבְּ הַיְּבְי וְבְרִי אִם-לְפִי וְבְּרִי הַשְׁרִים הַאָּבְּ הַשְׁרִים הַאָּבְּ הַמִּיל וְבִּי וְבְּרִי הִשְׁרִים הַאָּבְּ הַתְּיִבְּי הְבִּי וְבְרִי הִיִּבְי הְבִּרִי הַבְּרִי הְבִּר הְבִי וְבְרִי הִים הַיּשְׁרִים הַּאָּב הַחִי-הָּי הַשְׁר הַבְּי וְבְרִי הְשִׁר הְבִּי וְבְּרִי הְשִׁר הְבִּי וְבְרִי הִשְּרִים הַאָּבְּב הַחִי-הְיְ אָּשְׁר הְבִּי וְבְּרִי הְשָׁר הַיִּי הְבִּי בְּבִיי וְבְּיִי הְּתַּשְׁר הַּבְּי בְּבְרי הְבִּי הְבִּי הְבִּי הְבִּי הְבִּי הְּתָּב הְעִיי הְיִי הְּבְּיִי בְּעִי הְשִׁר הְיּיִי הְּיִי הְּבְּי הְּבִּי הְיִי הְּבְּי בְּעִי הְיִי הְּיִי הְּבְּי הְּבִּי הְבִּי הְיִי הְּבְּי הְּבְּי הְבִּי הְּבְּי בְּיִי בְּי בְּיִי בְּעִי הְיִי הְיִי הְּבְּי בְּיִי הְּיִי הְיִי הְיִי הְיִי הְיִי הְיִי הְּבְיי הְיִי הְיִיי הְיִיי הְיִי הְּעְּיִים הְּיִי הְיִי הְייִי הְיִי הְיִי הְּיִי הְּיִי הְיִי הְּיִיי הְיִי הְיִי הְיִיי הְּבְּיי הְּיִי הְיִי הְיִי הְיִי הְיִי הְיִי הְיִי הְיִי הְיִי הְּיִי הְּיִי הְיִי הְיִי הְיִי הְיִיי הְיִי הְּיִי הְּיִי הְּיִיי הְּיִיי הְיִי הְּיִיי הְּיִי הְיִיי הְּיִיי הְיִיי הְיִי הְּייִי הְיּיי הְיִיי הְיּיי הְּיִיי הְיּיי הְיּי הְיּיִיי הְיּיִיי ה

These examples do not really belong to the sphere of speech references, and they are given only because their structure is similar to previous examples. The phrases below that involve עֵל-פִּי, like previous examples with this phrase, demonstrate flexible clausal position.

In the first example the phrase עַל-פִּי אֲשֶׁר תַּשִּׂיג יֵד הַנֹּדֶר occurs in first position. Since the clause introduced by this phrase, יִשְרִיכֶנוּ הַבּהַן, repeats the content of the preceding clause, וְהָשֶׁרִיךְ אֹתוֹ הַבּהַן, we can safely assume that its role is to set the phrase עַל-פִּי אֲשֶׁר תַּשִּׂיג יַד הַנּדֵר in initial position. This position allows the phrase עַל-פִּי אֲשֶׁר תַּשִּׂיג יַד הַנּדֵר to fulfill a pragmatic function of a logical predicate in the clause it introduces.

Lev. 27:8—אָשֶׁר הּוֹא מֵעֶרְכֶּדְּ וְהֶעֶמִידוֹ לִּפְנֵי הַכֹּהֵן וְהֶעֶרִידְ אֹתוֹ הַכֹּהֵן עַל-פִּּי הַבְּהַן אַשֶּׁר הַּשִּׁיג יַד הַנּבְּר יַעֲרִיכָנוּ הַכֹּהֵן "And if a man is too poor to pay your valuation, then he shall bring the person before the priest, and the priest shall value him; according to the ability of him who vowed the priest shall value him."

In the next verse the phrase עַל-פִּי הַשָּׁנִים הַנּוֹתְרֹת עַד שְׁנַת הַיֹבֵל appears in middle position.

Lev. 27:18—נְּלֵבֶל יַקְדִּישׁ שְּׁדֵהוּ וְחִשַּׁב-לוֹ הַכֹּהֵן אֶת-הַכֶּּסֶף עַל-פִּי הַשְּׁנִים 27:18—נְּלְבִי מַשֶּׁרְכֶּךְ שְׁר הַּיָּבֵל יְנְגְרֵע מַעֶּרְכֶּּךְ הַּיּבֵל וְנְגְרֵע מַעֶּרְכֶּּךְ הֹיבֵל וְנְגְרֵע מַעֶּרְכֶּּךְ "but if he dedicates his field after the jubilee, then the priest shall compute the money-value for it according to the years that remain until the year of jubilee, and a deduction shall be made from your valuation."

Initial position is demonstrated once more with עַל-פִּי הַגּוֹרֶל in the last example.

Num. 26:56—עַל-פִּי הַהּוֹרֶל הַחְלָתוֹ בֵּין רֵב לְמְעָט "Their inheritance shall be divided **according to lot** between the larger and the smaller."

#### 3.1.1.2.5 Reference to Written Documents

Contrary to the examples cited in §3.1.1.2.3 above, where עַל-פִּי refers to an individual, and §3.1.1.2.4, where עַל-פִּי mainly refers to spoken words, the following examples refer to certain written documents. These references are not conveyed by the phrase עַל-פִּי but through

ה הּ הְּלִּיץ לְּצְבָּא בְּאוֹ עַל-דָּוִיד חֶבְרוֹנְה לְהְטֵב מֵלְכוֹת שְׁאוֹל אֵלְיו בְּפִּי ה־ "These are the numbers of the divisions of the armed troops, who came to David in Hebron, to turn the kingdom of Saul over to him, according to the word of the LORD."

a phrase beginning בְּבְּחוּב "...according to what is written/as it is written." These examples are syntactically and functionally-pragmatically related to all examples discussed so far that refer to speakers or to spoken words.

However, while the earlier examples display non-obligatory complements or parenthetical units which play integral part in the narrative or discourse embedded in the narrative, the next example might suggest another interpretation. The complement or parenthetical unit of the following verse, הוֹרָת-מְשָׁה אֲשֶׁר-צִּוָּה הֹ׳ לֵאמֹר לֹא-יוֹמְתוּ אָבוֹת בָּי אָבוֹת בִּי אָבוֹת בִּי אָבוֹת בִי אָבוֹת בִּי אָבוֹת יִוֹמָת וֹנְתְּחִ שִּׁלּ-אָבוֹת בִי אָם-אִישׁ בְּחֶטְאוֹ יְמוּת יוֹמָת נֹצִי אָם רֹאִישׁ בְּחֶטְאוֹ יְמוּת יוֹמָת deviation from an expected common practice. It is an aside explaining why Amaziah, the son of Joash, refrained from killing the descendents of his father's killers. Although long, this remark is syntactically a phrase, not a clause, because it starts with a prepositional phrase initiated by the comparative preposition aphrase. As to word order, this phrase stands in final position.

2 Kgs. 14:6—מְּעָר-צִּוְּה בְּטֵּפֶּר חּוֹרֶת-מֹשֶׁה אֲשֶׁר-צִּוְּה בְּטָפֶּר חִּוֹרֶת-מֹשֶׁה אֲשֶׁר-צִּוְּה בְּּחֶשְאוֹ בְּחֶשְאוֹ בְּחֶשְאוֹ בְּחֶשְאוֹ בְּּחֶשְאוֹ בְּּחֶשְאוֹ בְּּחֶשְאוֹ בְּיִבְּים וֹבְנִים וּבְנִים וֹבְנִים וֹבְנִים וּבְּתִּחוֹ But he did not put to death the children of the murderers; according to what is written in the book of the law of Moses, where the LORD commanded, 'The fathers shall not be put to death for the children, or the children be put to death for the fathers; but every man shall die for his own sin.'"

The phrase בַּמָּבֶּר תּוֹרָת מֹשֶׁה in the next example might also be a comment by the scribe or narrator. It follows a reference to a speaker, לפָּאָשֶׁר צִּוָּה מֹשֶׁה שֶבֶּד-הֹ אֶת-בְּנֵי יִשְׂרָאֵל, thus affirming twice, orally and in a written document, the content of the command. As to word order, the phrase חֹרָת מֹשֶׁה might be regarded as standing in middle position, following a reference to a speaker and introducing the other part of the verse. Another possibility is to regard בַּבְּתוּב בְּסֵבֶּר תּוֹרֶת מֹשֶׁה standing in initial position, since its syntactic status is equal to that of the preceding reference to the speaker, יִשְּרָאֵל מַשֶּׁר צִּוָּה מֹשֶׁה שֶבֶּד-הֹ אֶת-בְּנֵי , and both can be regarded as two coordinated sentence members sharing similar syntactic status. In any event, this position differs from the final position demonstrated in the previous example, 2 Kgs. 14:6; clearly, phrases opening with בַּבְּתוֹּב enjoy freedom of position.

Josh. 8:31 — מַּשֶּׁה עָבֶּד-ה' אֶת-בְּנֵי יִשְׂרָאֵל כַּפְּחוֹרַת מַשֶּׁה עָבֶד-ה' אֶת-בְּנֵי יִשְׂרָאֵל כַּפְּחוֹרַת בְּסֵפֶּר חּוֹרַת מֹשֶׁה עָבֶד-ה' נִיְבְּחוּ מִיְּבְּחוּ בַּרְזֶל וַיִּעֲלוּ עָלִיו עלוֹת לַה' וַיִּוְבְּחוּ "As Moses the servant of the LORD had commanded the people of Israel, as it is written in the book of the law of Moses, 'an altar of unhewn stones, upon which no man has lifted an iron tool'; and they offered on it burnt offerings to the LORD, and sacrificed peace offerings."

In contrast to the previous example, the middle position is definitely found in the next, which, however, differs from the preceding two in that the phrase בַּבְּתוֹּב בְּתוֹרָת מֹשֶׁה is in direct speech, and therefore is not a later addition by the scribe or the narrator but an integral part of the utterance.

1 Kgs. 2:3—וְמְשְׁמְרָתְ מְשְׁמֹרְ חֻקּתְיו מְצְוֹתְיוּ מְצְּוֹתְיוּ מְצְּוֹתְיוּ מְצְּוֹתְיוּ מְצְּוֹתְיוּ מְצְּשֶׁה וְאָת הַּשְׁבָּיל אֵת בְּל-אֲשֶׁר תַּעֲשֶׁה וְאָת וּמְשְׁבִּיל אֵת בְּל-אֲשֶׁר תִּעְשֶׁה וְאָת וּמְשְׁבִּיל אַת בְּל-אֲשֶׁר תִּבְּנָה שְׁם "And keep the charge of the LORD your God, walking in his ways and keeping his statutes, his commandments, his ordinances, and his testimonies, as it is written in the law of Moses, that you may prosper in all that you do and wherever you turn."

Another case of direct speech is found in the following example, where הַבְּרִית הָזָה is within the utterance and in final position.

 $2~{
m Kgs.}~23:21$ וְיָצֵוּ הַמֶּלֶךְ אֶת-כְּל-הָעָם לֵאמֹר עֲשׂוּ פֶּסָח לַה׳ אֱלֹהֵיכֶם כַּכְּחוּב על בַּל-הָעָם לֵאמֹר וַיְשׁוּ פַּסָח לַה׳ אֱלֹהֵיכֶם בַּכְּחוּב הַבְּדִיח הַיָּה הַיָּדִר הַבְּדִיח הַיָּה בּיִר הַבְּדִיח הַאָּם —"And the king commanded all the people, 'Keep the passover to the LORD your God, as it is written in this book of the covenant.'"

#### 3.1.2 Observer's Identity

This section covers prepositional phrases הְּטֵנִי הֹ /לְפְנֵי הֹ /לְפְנֵי הֹ /לְפְנֵי הֹ /לְפְנֵי הֹ / אָת פְנֵי הֹ /לְפְנֵי הֹ אוֹלְפְנֵי הֹ / אָת פְנֵי הֹ /לִפְנֵי הַ, which identify God or any other character as approving or judgmental observers. These phrases convey modal asides to the clause in which they appear, so at least functionally-pragmatically they deserve to be treated as a borderline type of parenthesis. The syntactic status of these phrases, however, is more problematic and less clear. Phrases like אָת פְּנֵי הֹ and אָת פְּנֵי הֹ can be regarded as adverbial non-obligatory predicate complements or as parenthetical units.

<sup>&</sup>lt;sup>14</sup> Livnat, for instance, classifies these phrases as a separate group sharing certain qualities with adverbs and others with parenthetical units; see, e.g., Livnat 1994a.

The prepositional phrase pattern בְּטִינִי + a proper name or its replacement' shows characteristics of an idiom, and it is often restricted to being combined with adjectival verbs constructed from ישר, משר, משר, משר, אחן, and the like. Such combinations form a single syntactic unit. More significantly, as part of an idiom, even to a relatively limited degree, the phrase 'בְּעִינִי + a proper name or its replacement' does not usually enjoy freedom of position in a clause, and since the idiom as a whole contains both the predicate and its complement the phrase 'בְּעִינִי + a proper name or its replacement' is an obligatory adverbial complement to the predicates it accompanies. Accordingly, the prepositional phrase 'בְּעִינִי + a proper name or its replacement' cannot be regarded as independent, hence as possibly parenthetical, syntactically.

Now, what can we learn from Bible translations about the syntactic status of these prepositional phrases and how far they can be considered parenthetical units? Saadya Gaon's Arabic translation, in the examples for which it is available, renders most of these phrases in connection with God's name, namely אָלְיִנֵי הֹי ,אֶת פְּנֵינִי הֹי ,אֶת פְּנֵינִי הֹי ,אֶת פְּנֵינִי הֹי ,לְפְנֵי הֹי ,לְפְנֵי הֹי , and those without God's name by the prepositions עלי or ענד These uniform translations reveal Saadya Gaon's interpretation of all these prepositional phrases as similar in meaning and probably also as having similar syntactic function.

The Geez translation of the Octateuch is relatively uniform in this matter too. It mostly renders לְּפְנֵי הֹ ,לְּפְנֵי הֹ , לִפְנֵי הֹ, and בְּעִינֵי , in combination with God's name or other names, by the prepositions (חֹלְּבְּרַי , 'ba-qɔdma, 'in front of'. Once the Geez translation employs instead the preposition n'th / baḥaba—'in the presence of' (in Deut. 24:3 below), whose meaning is similar; once it uses the preposition n / la, 'to' (in Gen. 34:18); and once, where both בְּעִינֵי occur in the same verse (Gen. 20:15 below), both na-qɔdma and 'n / ḥaba, a short form of n'th / baḥaba, appear. Onkelos' translation for this last example also employs two distinct prepositions: Aramaic לְפָנֵי and בּעִינִי for בַעִינִי and Aramaic בְּעִינִי for בַּעִינִי at first sight this might look literal and fixed. The latter translation in this case might similarly be due to the wish to provide two distinct translations for לִפְנֵי and בַּעִינִי does not.

The distribution of the Aramaic translations in Onkelos is somewhat more complicated. While the common translation of Onkelos for קדם is in all cases by the particle בָּעִינִי ה', אָת פְּנֵי ה', the particle בעיני seems to be the preferred translation for all examples

Identical particles also appear in the *Peshitta*, though the differentiation between them in reference to God or other individuals is not as apparent. In any case, all Aramaic translations examined for this book, that is, Onkelos, *Targum Jonathan*, and the *Peshitta*, reveal only two possible translations, and hence should be regarded, like Saadya Gaon's Arabic translation and the Geez translation, as uniform. To conclude so far, Saadya Gaon's translation, the Geez translation, Onkelos, *Targum Jonathan*, and the *Peshitta* all interpret אָת פְּנֵי הֹ / לְפָנֵי לְ אֶת פְּנֵי הֹ / לְפָנֵי לְ אֶת פְּנֵי הֹ / לְפָנֵי לְ as generally similar in meaning and use.

Some Bible translations do not conform to this interpretation. al-kitāb al-muqaddas offers more diverse translation possibilities, using a variety of prepositions in combination with God's name or names of other individuals for the prepositional phrases הלפני / לְפְנֵי הֹ / שָּׁת פְּנֵי הֹ / שִּׁת פְּנֵי הֹ / שִּׁת פְנֵי הֹ / שִּׁת פְנֵי הֹ / הַבְּיִי הַ הַּבְּיִי הַ הַ בְּיִייִ הַ הַ לְבְּיִי הַ / לִבְּיִי הַ / בִּיִייִ בּיִייִ בּיִייִ בּיִייִ בּיִייִ בּיִייִ הַ אָבְּיִיִי הַ לְבְּיִייִ הַ / לְבְּיִי הַ / בִּיִייִ הַ בְּיִייִ הַ / לְבְּיִי הַ / לִבְּיִי הַ / בִּיִייִ הַ לְבְיִייִ הַ / בִּיִייִ הַ / לִבְּיִי הַ בּיִייִ בּיִייִ בְּיִייִ בּיִייִ בּיִייִ בּיִייִ בְּיִייִ בּיִייִ בּיִייִ בּיִייִ בּיִייִ בְּיִייִ בְּיִייִ בְּיִייִ בְּיִייִ בְּיִייִ בִּיִי בְּיִייִ בְּיִייִ בְּיִייִ בְּיִייִ בְּיִייִ בְּבִייִי הַ / לְבְּיִי הַ / לִבְּיִי הַ / לִבְּיִי הַ / בְּיִייִ הַ / לִבְּיִי הַ / בְּבִייִי הַ / לְבְּיִי הַ / בְּבִייִי הַ / לְבְּיִי הַ / בִּיִייִ הַ / בְּבִייִ הַ / בְּבִייִי הַ / לְבְּיִי הַ / בַּבִייִי הַ / לְבְּיִי הַ / בַּבִייִי הַ / לְבְּיִי הַ / בַּבִיי הַ / לְבְּיִי הַ / בִּבִיי הַ / לְבְּיִי הַ / בְּבִייִי הַ / לְבְּיִי הַ / בְּבִייִי הַ / לְבְּיִי הַ / בְּבִיי הַ / לְבְּיִי הַ / בְּבִיי הַ / בְּבִייִי הַ / בְּבִייִי הַ / בְּבִייִי הַ לְבִּייִי הַ / בְּבִייִי הַ לְבִייִי הַ לְבִייִי הַ לְבִייִי הַ לְבְּיִייִ הַ לְבְּיִייִי הַ לְבְּיִיי הַ לְבְיִיי הַ / בְּבִיי הַ לְבִּייִי הַ לְבִיי הַ / בְּבִיי הַ לְבִּייִי הַ לְבִּייִי לְבִיי הַ / בְּבִיי הַ לְבִיי הַ / בְּבִיי הַ לְבִּיי לִי לְבִיי הַ לְּבִיי הַ לְבִיי הַ לְבִיי הַי לְבִיי הַ הַּיִיי לְבִּיי לְייִי לְבִיי הַי לְבִּיי לְייִי לְבְייִי לְייִי לְייִי לְייִי לְייִי לְּבְייִי לִיי לְּייִי לִּייִי לְייִי לְייִיי לְייִיי לְּיִיי לְבִּייי לְייִייי לְייִּייִייי לְּיִייִיי לְייִייִיייִייְייִיי לְּיִייִיייִיי לְּיִיייִייי לְּיי

# 3.1.2.1 Examples with 'לְפְנֵי / לְפְנֵי ה and the Like

Note first that the phrase לְפָנֵי might mean a genuine physical appearance before God or any other individual; such cases are irrelevant and are excluded from the present discussion. What then remains for consideration? What might still be considered relevant for a possible parenthetical interpretation from a syntactic or at least functional-pragmatic standpoint?

What can we learn this time from Bible translations? The English RSV and JPS, the Arabic of Saadya Gaon and al-kitāb al-muqaddas, the Geez, and the Aramaic of Onkelos, Targum Jonathan, and the Peshitta all translate לְּפָנֵי הֹ and לְּפָנֵי הֹ followed by an individual other than God with prepositional phrases which generally express a basic physical meaning. These translations do not readily support the interpretation of these phrases as expressing God's or another individual's viewpoint, so the Hebrew phrases themselves as well as their rendering in translation should be considered as reflecting a continuous process of a semantic shift. The basic physical meaning passes to a more mental one involving deontic modality.

Syntactically the prepositional phrases לְפְנֵי לָפְנֵי לֹפְנֵי לֹפְנֵי לֹפְנֵי לִפְנֵי לֹפְנֵי לֹפְנֵי לוֹי followed by an individual name, and the like, are non-obligatory sentence components. With a physical meaning they should probably be considered adverbial, but when they convey a subjective viewpoint, namely a non-physical meaning involving deontic modality, they can be treated as parenthetical units as well.

In the first example, although the phrase לְפָנֵי הָאֱלֹהִים may carry no more than a simple physical meaning it can also be interpreted as indicating God's viewpoint on the state of corruption described in the verse. In that case, this is a type of parenthesis both syntactically and functionally-pragmatically. Syntactically a non-obligatory sentence component composed of a prepositional phrase can play an adverbial or a parenthetical role, and functionally-pragmatically it inserts a subjective opinion on a situation, hence conforms to the nuance of modality which is frequently embedded in parenthesis.

Gen. 6:11—נְתִּשְׁתַת הָאָרֶץ לְּפְנֵי הָאֱלֹהִים וַתְּמְלֹא הָאָרֶץ חְמֶס —"Now the earth was corrupt **in God's sight**, and the earth was filled with violence."

Another example in which לְפָנֵי most likely bears a non-physical meaning is Gen. 7:1. This verse contains לְפָנִי in first person within a direct speech utterance by God, so it should be considered as referring to God. The meaning of לְפָנִי in this case is most certainly mental, conveying God's viewpoint on Noah's personality, or more precisely his righteousness.

Gen. 7:1— נִיֹּאמֶר ה' לְנֹתַ בּא-אַתְּה וְכְל-בֵּיתְדּ אֶל-הַתֵּבְה בִּי-אֹתְדְּ רָאִיתִי צַדִּיק וְבָּל-בֵּיתְדּ אֶל-הַתַּבְה בִּי-אֹתְדְּ רָאִיתִי צַדִּיר הַזֶּה "Then the LORD said to Noah, 'Go into the ark, you and all your household, for I have seen that you are righteous **before** me in this generation.'"

Next the phrase לְּפְנֵי הֹ is part of a demand that the Israelites and the strangers who live among them be treated equally. This demand is concluded by the statement that the Israelites and the strangers will enjoy equal status by God.

Num. 15:15—יְהְיֶה לְּכֶם כְּגֵּר הַגָּר הַגָּר הַגָּר הַגָּר הַנְּר הַנְּר הַיְּהָה אַחָת לְכֶם וְלֵגֵּר הַגָּר הַנְּר הַיְּהֶה אַחָּת לְכֶם וְלֵגֵּר הַגָּר הַיְּהָה לֹחְיָה לֹּפְנִי הֹי "For the assembly, there shall be one statute for you and for the stranger who sojourns with you, a perpetual statute throughout your generations; as you are, so shall the sojourner be **before the LORD**."

Deut. 6:25 below contains the phrase לְפָנֵי הֹ אֱלֹהֵינוּ in connection with a declaration of intentions regarding righteous conduct and fulfillment of God's commands. God is mentioned here as the target of this declaration of intentions, not as a witness of a specific physical event or sight, so the example should again be interpreted as involving mental and parenthetical usage of לָפָנֵי.

Deut. 6:25—הַרְּלָנוּ בִּי-נִשְׁמֹר לַעֲשׁוֹת אֶת-בְּל-הַמִּצְוָה הַוֹּאת לְפְנֵי הִי הִּלְּנוּ בִּי-נְשְׁמֹר לַעֲשׁוֹת אֶת-בְּל-הַמִּצְוָה הַוֹּאת לְפְנֵי הִי בְּאֲשֶׁר צִּוְנוּ בִּאֲשֶׁר צִּוְנוּ מֹרְאֲשֶׁר צִּוְנוּ מֹרְאֲשֶׁר צִּוְנוּ מֹרְאֲשֶׁר צִּוְנוּ do all this commandment **before the LORD our God**, as he has commanded us."

The relevant clause in the following example is בִּי-תוֹעֵבָה הָוֹא לִפְנֵי הֹי The meaning of this clause is once more most certainly non-physical, and its content refers to a certain conduct deemed highly inappropriate in God's eyes.

Deut. 24:3—הָרָאשׁוֹן אֲשֶׁר-שִּׁלְּחָהּ לְשׁוּב לְקַחְתָּהּ לְהִיוֹת לוֹ לְאִשָּׁהְ הָרִאשׁוֹן אֲשֶׁר שִׁלְחָהּ לְשׁוּב לְקַחְתָּהּ לִהְיוֹת לוֹ לְאִשָּׁר הִי אֱלֹהֶיףְ אֲשֶׁר הֹ׳ אֱלֹהֶיףְ אֲשֶׁר הֹ׳ אֱלֹהֶיףְ אֲשֶׁר הַ׳ אֲלֹהֶיףְ הִי וְלֹא תַחְטִיא אֶת-הָאָרֶץ אֲשֶׁר הֹ׳ אֱלֹהֶיףְ הַיוֹ אַחְרָי הִי וְלֹא תַחְטִיא שָּׁר הִי אֲשֶׁר הֹ׳ אֱלֹהֶיףְ בֹּחְלָה "Then her former husband, who sent her away, may not take her again to be his wife, after she has been defiled; for that is an

abomination **before the LORD**, and you shall not bring guilt upon the land which the LORD your God gives you for an inheritance."

Josh. 6:26— וַּשְּׁבַע יְהוֹשְׁעַ בְּעֵת הַהִּיא לֵאמֹר אָרוּר הָאִישׁ לְפְנֵי ה' אֲשֶׁר יְקוּם וּבְנָה הַּהָאָ "Joshua laid an oath upon them at that time, saying, 'Cursed **before the LORD** be the man that rises up and rebuilds this city, Jericho. At the cost of his first-born shall he lay its foundation, and at the cost of his youngest son shall he set up its gates."  $^{15}$ 

A similar non-physical meaning appears in the following example, in which instead of the more common prepositional phrase לְפָנֵי ה another preposition, אֶּת-פְּנֵי ה Similarly to Gen. 6:11 above, God's opinion on corrupt conduct is expressed by the phrase אֵת-פָּנֵי ה׳.

Gen. 19:13—הְפְּנֵי הְּתְּקְּהָם אָּת-הָּמְּקוֹם הַזֶּה כִּי-גָדְלָה צַעֲקְהָם אָּת-פְּנֵי ה־19:13 הֹי לְשַׁחֲתָה "For we are about to destroy this place, because the outcry against its people has become great **before the LORD**, and the LORD has sent us to destroy it."

All the examples above carry the meaning 'before God' as a non-physical appearance, actually reflecting God's opinion. This meaning is generally absent in references to other individuals in the Bible. Still, the following example, 1 Sam. 20:1, might present such a meaning in the phrase תַּטָּאְתִי לִפְנֵי אָבִיךְ—"What is my sin before your father." The phrase לְפְנֵי בְּבִי בְּבִי בְּבִי בְּבִי בְּבִי בְּבִי בִּבְי בִּבְי בִּבִי בִּבְי בִּבְי בִּבִי בִּבְי בִּבִי בִּבְי בִּבִי בִּבִי בִּבִי בִּבִי בִּבִי בִּבִי בִּבִי בִּבִי בִּבִי בַּבִי בַּבִי בַּבִי בַּבִי בַּבִי בַּבִּי בַּבִי בַּבְּבִי בַּבִּי בַּבִי בַּבִי בַּבִי בַּבִי בַּבְּבִי בַּבִי בַּבְּבִי בַּבְּבִי בַּבְּבִי בַּבְּבִי בְּבִי בְּבִי בְּבִי בְּבִיי בְּבִּבִי בְּבִיי בְּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בַּבְּבִי בְּבִּבִי בְּבִּבִי בְּבִי בְּבִּבִי בְּבִּבִי בְּבִי בְּבִּבִי בְּבִיי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִיי בְּבָּבִי בְּבִי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִיי בְּבִיי בְּבִיי בְּבִּבִי בְּבִּבִי בְּבִּבִי בְּבִיי בְּבִּבִי בְּבִיי בְּבִיי בְּבִּבִי בְּבִיי בְּבִיי בְּבִּבִי בְּבִיי בְּבִּבִיי בְּבִיי בְּבִיי בְּבִּיי בְּבִיי בְּבִיי בְּבִּיי בְּבִּיי בְּבִּי בְּבִיי בְּבִּיי בְּבִּיי בְּבִיי בְּבִּיי בְּבְיי בְּבִיי בְּבְיבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִּיי בְּבִיי בְּבִיי בְּבְיי בְּבְייבִי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּיבִיי בְּיבִיי בְּיבְיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּבִיי בְּב

<sup>15</sup> More references are Gen. 10:9, Num. 18:19, Deut. 24:12, 1 Sam. 26:19. Note also a related meaning in the idiom התהלך לפני, which does not necessarily mean physical walking before God but a certain relation to God and behavior which God favors, in, e.g., Gen. 17:1, 24:40, 48:15, 1 Sam. 2:30,35. For such a meaning see, e.g., *BDB* 236a. See a similar meaning with הלך in, e.g., 1 Kgs. 2:4, 3:6, 8:23.

mean 'to sin against someone according to his opinion'. The physical interpretation is also possible in this case since it speaks of David who used to spend time with Saul, and this activity is described in the Bible through the term לְבָּנִי in other verses, that is, 1 Sam. 16:21—נַּיְבָּא דְוָדִי יְיִשְׁמֹּר לְפָנִי וַיֵּאֲהָבֶהוּ מְאֹד וַיְהִי-לוֹ נִשֵּׁא כֵלִים "And David came to Saul, and entered his service. And Saul loved him greatly, and he became his armor-bearer," 1 Sam. 16:22—אָל־יִשִׁי לֵאמֹר "Sam. 16:22" יַּשְׁמָּר נָאָ דְוָד לְפָנִי כִּי-מְצָא חֵן בְּעֵינִי "And Saul sent to Jesse, saying, 'Let David remain in my service, for he has found favor in my sight'," and 1 Sam. 19:7 יְּבְּלֵי בְּלִי בְּאָרְמוֹל שִׁלְשׁוֹם וַיִּכָּא יְהוֹנְתוֹן אֶת כְּל-הַדְּבָרִים הָאֵלֶּה "And Jonathan called David, and Jonathan showed him all these things. And Jonathan brought David to Saul, and he was in his presence as before." Here is the example of 1 Sam. 20:1.

1 Sam. 20:1—נְיבְרַח דְּוֹד מִנְּוֹת מְנְּיוֹת בְּרְמָה וְיָבֹא וַיֹּאמֶר לְּפְנֵי יְהוֹנְתְן מֶה עָשִׂיתִי בְּּרְשׁ אֶת-נַפְּשִׁי וֹיָבֹא הַתְּיִבְּקִשׁ אֶת-נַפְּשִׁי הוֹיִבְּשִׁ אֶת-נַפְּשִׁי הוֹיִר הַמְּיִבְּקִשׁ אֶת-נַפְּשִׁי הוֹי Then David fled from Naioth in Ramah, and came and said before Jonathan, 'What have I done? What is my guilt? And what is my sin **before your father**, that he seeks my life?''"

#### 3.1.2.2 Examples with 'הַעִינֵי ה' בְּעֵינֵי ה'

Contrary to לפני, the prepositional phrase and idiom לפני holds no physical literal meaning but refers exclusively to someone's opinion. Moreover, in contrast to the dearth of examples with לפני carrying this meaning, בעיני is frequently employed, and it is common in reference to God and to other individuals. In all its uses בּעֵינֵי serves as an obligatory complement of an adjectival verb or an adjective, like רע, טוב, ישר, מצא חן, and its position is usually fixed, following, not preceding, this verb or the verb and its subject (except in one example, 2 Sam. 3:36 below, which has an opposite word order). In this respect, phrase בעיני does not function as a full and obvious parenthesis syntactically. On the other hand, it does show one case of more flexible (2 Sam. 3:36 below) word order, it is part of an expression conveying a modal nuance referring to a certain subjective opinion, and it adds to this modal expression an aside regarding the name of the holder of this opinion. In these latter respects, בַּעֵינֵי presents parenthetical features at least from a functional-pragmatic standpoint. This phrase is widely used both in biblical narrative and in biblical discourse.

The following clauses are only a small number of the many instances present in Biblical Hebrew. Since the many cases referring to God's

viewpoint form a uniform group, the examples here are divided into those in which בְּעֵינֵי appears in combination with the name of God, namely, בְּעֵינֵי אָ, and those which appear in combination with other individuals.

#### 3.1.2.2.1 Examples with בָּטֵינֵי ה'

Here בְּעֵינֵי in combination with the name of God follows an adjectival verb or an adjective expressing a subjective opinion. In certain cases follows more than the verb, generally the verb and its subject. The syntactic status of the combination בְּעֵינֵי הֹ in the examples is obligatory complement of the adjectival verbs or adjectives, and it adds asides by mentioning God as the holder of the subjective opinion expressed by the verb.

The first example contains an instruction to behave in a certain way that is considered righteous and good, according to God, in order to win a good future.

The following example displays God's negative opinion of a previous wrongdoing and a description of its consequences.

Gen. 38:10—יַרֵע בְּעֵינֵי ה׳ אֲשֶׁר עְשֶה וַיְּמֶת גַם-אֹתוֹ—"And what he did was displeasing **in the sight of the LORD**, and he slew him also."

Next, God's negative opinion to a certain conduct of the Israelites.

Judg. 2:11—וַּשְשׁהֹ בְנֵי-יִשְׂרָאֵל אֶת-הָרָע בְּעֵינִי הֹי וַיַּעַבְדוּ אֶת-הָבְּעָלִים—"And the people of Israel did what was evil in the sight of the LORD and served the Baals."

Another expression which indicates a negative opinion attributed to God appears in the following example.

2 Sam. 7:19—וְּאַת עַבְדְּדְּ לְמֵרְחוֹק אֲדֹנְי הֹי וַתְּדַבֵּר גַּם אֶל-בֵּית-עַבְדְּדְּ לְמֵרְחוֹק אֲדֹנְי הֹי וַתְּדְבֵּר גַּם אָל-בֵּית-עַבְדְּדְּ לְמֵרְחוֹק "And yet this was a small thing **in thy eyes,** O Lord GOD; thou hast spoken also of thy servant's house for a great while to come, and hast shown me future generations, O Lord GOD!"

The last example in this section mentions again a negative opinion attributed to God and its consequences.

2 Kgs. 3:18—וְנָקֵל וֹאת בְּעֵינֵי ה׳ וְנְתַן אֶת-מוֹאָב בְּיֶדְכֶּם "This is a light thing **in the sight of the LORD**; he will also give the Moabites into your hand."

#### 3.1.2.2.2 Examples with בָּטֵינֵי

Here individuals other than God are shown to have various opinions on a certain conduct, situation, or event. These are mostly positive or negative, and less frequently some other attitude (e.g., disbelief in Gen. 19:14 below, humiliation in 2 Sam. 6:22 below, and wonder in 2 Sam. 13:2 below). Accordingly, the first group of examples, Gen. 20:15, 34:18, Josh. 22:32, 1 Sam. 1:23, 16:22, 18:20, and 2 Sam. 3:36, reflects positive attitudes. The second group, displaying Gen. 21:11,12 and Num. 22:34, reflects negative attitudes. The third group, Gen. 19:14, 2 Sam. 6:22, and 2 Sam. 13:2, presents other attitudes. As to syntactic position, only one example, 2 Sam. 3:36, has an inverted word order, in which precedes a verb or a verb and its subject. This sole example of a different word order involving בְּטִינִי supports possible parenthetical information being conveyed by these prepositional phrases.

The first example appears in direct speech uttered by Abimelech to Abraham. The prepositional phrase בְּטֵינֶיך is an obligatory complement of the positive adjectival verb and adjective טוֹב.

Gen. 20:15—נִיֹּאמֶר אֲבִימֶלֶּךְ הָנֵּה אַרְצִי לְפָנֶיךְ בַּטוֹב בְּעֵינֶיךְ שֵׁב "And Abimelech said, 'Behold, my land is before you; dwell where it pleases you."

The next phrases, בְּעֵינֵי שְׁכֶּם בֶּן-חֲמוֹר, appear within narrative, and they refer to the reaction of Hamor and Hamor's son to a previous suggestion made by Jacob's sons. Again, these phrases are obligatory complements of the adjectival verb וַיִּישָבוּ.

Gen. 34:18—הַמוֹר פְּעֵינֵי שְׁכֶּם בֶּן-חֲמוֹר הַבְּייִטְבוּ דְבְרֵיהֶם בְּעֵינֵי חֲמוֹר וּבְעֵינֵי שְׁכֶם בּוּ "Their words pleased **Hamor and Hamor's son Shechem**."

The phrase בְּטֵינֵי בְּנֵי יִשְׂרָאֵל in the next example appears again in narrative, and it is once more an obligatory complement of the verb וַיִּיטַב. It refers to previous explanatory words spoken by the people of the tribes of Reuben and Gad in order to prevent a projected attack on them by the Israelites.

Josh. 22:32—וְּיַטֵב הַדְּבֶר בְּעֵינֵי בְּנֵי יִשְׂרָאֵל וַיְבְרָכוּ אֱלֹהִים בְּנֵי יִשְׂרָאֵל וְלֹא אָמְרוּ בְּנִי-רָאוּבוְ וּבְנִי-גְּד יִשְׁרָטֵב בְּהָּבְר בְּעֵינִי בְּהַ בְּהַ יִשְׂרָאֵל וְיִבְרָכוּ אֲשֶׁר בְּנֵי-רְאוּבוְ וּבְנִי-גְד יִשְׁבִים בְּהּ "And the report pleased the people of Israel; and **the people of Israel** blessed God and spoke no more of making war against them, to destroy the land where the Reubenites and the Gadites were settled."

The following phrase, בְּטֵינֵיך, appears in direct speech, and it too follows the adjectival verb and adjective טוֹב.

 $1~\mathrm{Sam}$ . 1:23— אַלְּקְנָה אָשֶׂה עֲשִׁי הַטּוֹב בְּעֵינִיךְ שְׁבִי עֵד-גָּמְלֵּךְ אֹתוֹ (יִּאמֶר לָּה אָלְקְנָה אִישָׁה עֲשִּי הַטּוֹב בְּעֵינִיךְ שְׁבִּי עַד-גָמְלָּה אֹתוֹ (Elkanah her husband said to her, 'Do what seems best **to you**, wait until you have weaned him; only, may the LORD establish his word.' So the woman remained and nursed her son, until she weaned him."

The next example in direct speech introduces a new positive verbal phrase, מָּצָא חֵוֹ, into the discussion. בְּעֵינָי is again an obligatory complement of the verbal phrase תְּצָא חֵוֹ, and like previous examples it maintains its position after the verb.

1 Sam. 16:22—וַיִּשְׁלַח שָׁאוּל אֶל-יִשֵּי לֵאמֹר יַעֲמְד-נָא דְוִד לְפְנֵי כִּי-מְצָא חֵן "And Saul sent to Jesse, saying, 'Let David remain in my service, for he has found favor **in my sight**.""

Next, another adjectival verb conveys positive content of a kind we have not yet observed, namely וַיִּשַׁר. The prepositional phrase בַּעִינְיוּ which follows הַבְּעִינְיוּ and its subject הַּדְּבָּר, is an obligatory complement of this verb in this example too, and it appears this time in narrative.

1 Sam. 18:20—וַּהֶבֶּר הַדְּבֶר לְשָׁאוּל וַיִּשֶׁר הַדְּבֶר שְׁאוּל אֶת-דְּוִד וַיַּגִּדוּ לְשָׁאוּל וַיִּשֶׁר הַדְּבֶר אוֹר אוֹר אוֹר "Now Saul's daughter Michal loved David; and they told Saul, and the thing pleased **him**."

The last example of a positive verb is part of the narrative, and it displays two phrases, בְּעֵינֵי כְּל-הָעָם and בְּעֵינֵי כָּל-הָעָם, accompanying similar adjectival verbs, טוֹב and טוֹב, which we have frequently observed above. In these respects the example does not convey any new information, in contrast to the foregoing. Its significance lies in its less typical and less fixed word order, revealed in the position of the second phrase less fixed word order, revealed in the position of the second phrase and outer approach in outer to all other examples, in which בְּעֵינֵי כָּל-הָעָם follows a verb or a verb and its subject. The very fact that such an atypical position exists, albeit only once, supports at least a partial interpretation of such phrases as parenthetical units.

2 Sam. 3:36—יְנְעֵים הָפֶּילוּ בְּעֵינֵיהֶם בְּכֹל אֲשֶׁר עָשָה הַמֶּלֶף בְּעֵינֵי הַכָּל-הָעָם חִבּירוּ וַיִּיטַב בְּעֵינֵיהֶם בְּכֹל אֲשֶׁר עָשָה הַמֶּלֶף בְּעֵינִיהֶם הַכָּל-הָעָם טוֹב "And all the people took notice of it, and it pleased **them**; as everything that the king did pleased **all the people**."

The next example is the first with a negative opinion. The verb is מָאָד, and it is followed by its subject הָּבֶּבֶר, an adverb מְאַד, and finally the phrase בְּעֵינֵי אָבְרָהְם, indicating the holder of the negative attitude. This word order is typical of the prepositional phrase בְּעֵינֵי אָבְרָהְם, this being in a position which does not precede the verb. Yet note that in this example it follows the verb and its subject, but also the adverb מְאַד הַּשִּׁד אַבְּרָהְם In this respect the phrase בְּעֵינֵי אַבְּרָהְם shows the lesser connection to the preceding verb than to all other clause components, and it seems unique among all examples involving בְּעֵינֵי introduced so far and following. The example is part of the narrative.

Gen. 21:11—וַּיֵרְע הַדְּבָר מְאֹד בְּעֵינֵי אָבְרְהָם עַל אוֹדֹת בְּנוֹ "And the thing was very displeasing **to Abraham** on account of his son."

Next is another example of a negative attitude, where בְּעֵינֶיךְ follows a negated verb אָל-יֵרֶע, this time in direct speech.

Gen. 21:12—ניאמֶר אֱלְהֵים אֶל-אַבְרָהָם אַל-יֵרֵע בְּעֵינֶיךּ עַל-הַנַּעַר וְעַל-אֲמְתֶךּ כֹּל אַבְרָהָם אַל-יֵרֵע בְּעֵינֶיךּ עַל-הַנַּעַר וְעַל-אֲמְתֶּךְ כֹּל God said to Abraham, 'Be not displeased because of the lad and because of your slave woman; whatever Sarah says to you, do as she tells you, for through Isaac shall your descendants be named.'"

In the last example of negative attitude the phrase בְּעִינֶיךְ follows the adjectival verb and adjective כ. Here too בעיניך is in direct speech.

Num. 22:34עם אָל-מַלְאַךּ ה' חָטָאתִי כִּי לֹא יְדַעְתִּי כִּי אַהָּה נִּאָב בּלְעָם אָל-מַלְאַךּ ה' חָטָאתִי בִּי לֹא יִדְעְתִּי בִּיּרָר וְעַהָּה אָם-רַע בְּעֵינֶיךּ אָשׁוּבְה לִּי —"Then Balaam said to the angel of the LORD, 'I have sinned, for I did not know that thou didst stand in the road against me. Now therefore, if it is evil **in thy sight**, I will go back again.'"

The next example does not display a positive or negative attitude, but indicates disbelief. After Lot predicts the destruction of Sodom and suggests that his sons-in-law and daughters flee Sodom in time, his sons-in-law express disbelief revealed in the participle part. This is followed by the prepositional phrase בְּעֵינֵי חְחָנְיִי, referring to Lot's sons-in law, to whom the disbelief is attributed. The combination of the participle and the prepositional phrase בְּעֵינֵי appear here in narrative, describing a reaction to a previous speech utterance.

Gen. 19:14—נֵיצֵא לוֹט וַיְדַבֵּר אֶל-חֲתְנְיו לֹקְחֵי בְנֹתְיו וַיֹּאמֶר קוֹמוּ צְאוּ מִן-הַפְּקוֹם לְּטִי דְיַבְּי לְקֹחֵי בְנֹתְיו וַיִּאמֶר קוֹמוּ צְאוּ מִן-הַפְּקוֹם הַסְּרִי לְחָבִי חְתְנִיו חְתְנִיו לַקְחֵי בְּנִיבְי חֲתְנִיו חַהְנִיו הֹי אֶת-הְעִיר וַיְהִי בִמְצַחֵק בְּצֵינֵי חֲתְנִיו הֹי So Lot went out and said to his sons-in-law, who were to marry his daughters, 'Up, get out of this place; for the LORD is about to destroy the city.' But he seemed to his sons-in-law to be jesting."

The following example has the phrase יְּשֶׁינְי following the adjective in direct speech. In content it is part of David's response to his wife, Michal, after she indicates David's humiliation by dancing among others in front of God. The combination יְּמָיִנִי שְׁפָּל בְּעֵינִי expresses humiliation and the prepositional phrase בְּעֵינֵי indicates the individual who interprets a certain conduct as humiliating.

2 Sam. 6:22—אָמָרְתְּ אֲשֶׁר אָמֶרְתְּ וּנְקַלֹּתִי עוֹד מִזֹּאת וְהְיִיתִי שָׁפָּל בְּעֵינָי וְעִם-הָאֲמָהוֹת אֲשֶׁר אָמֶרְתְּ וו will make myself yet more contemptible than this, and I will be abased **in your eyes**; but by the maids of whom you have spoken, by them I shall be held in honor."

The last example in this section deals with a reaction of wonder, and the phrase בְּעֵינֵי אַמְנוֹן refers to the individual reacting that way. As to syntactic position, the phrase בְּעֵינֵי אַמְנוֹן follows the verb and the whole combination of the verb and the prepositional phrase appears in narrative.

2 Sam. 13:2– וַּיַּצֶר לְאַמְנוֹן לְהַתְּחֵלוֹת בַּעֲבוּר תְּמָר אֲחֹתוֹ כִּי בְתוּלָה הִיא וַיִּפְּלֵא הַאוֹן לְהַמְנוֹן לְהַתְּחַלוֹת בַּעֲבוּר תְּמָר אַחֹתוֹ כִּי בְּתוּלִה לָה מְאוֹמְה "And Amnon was so tormented that he made himself ill because of his sister Tamar; for she was a virgin, and it seemed impossible **to Amnon** to do anything to her."  $^{17}$ 

## 3.1.3 God's Standpoint

The following are two unique examples in which God's attitude is expressed in the parenthetical expressions הְּאָהְבֶת ה' and בְּּהֶמְלֵת ה', which appear nowhere else. The RSV translates בְּהֶמְלֵת ה' as part of a parenthesis, between commas: "..., the LORD being merciful to him," and בְּאַהְבַת ה', as part of a causal clause: "Because the LORD loved Israel for ever." For the first example a parenthetical phrase between

 $<sup>^{16}</sup>$  According to the context, the translation assumes that the personal pronoun affixed to נָּשָׁיִינָ should be 2nd and not 1st person.

<sup>&</sup>lt;sup>17</sup> Other examples are: Judg. 3:12, 4:1, 10:6, 14:7, 1 Sam. 8:6, 18:26, 29:6, 2 Sam. 3:19, 10:12, 11:25,27, 12:9, 15:26, 17:4, 18:4, 1 Kgs. 3:10, 9:12, 2 Kgs. 3:2; many more exist.

dashes appears in the JPS translation too: "...—in the Lord's mercy on him—...," and for the second again a causal clause. The interpretation of אַהָבָת as a causal clause is reasonable, but it can perhaps also be translated otherwise, better to reflect this phrase's adverbial or parenthetical nature: "In accordance with God's everlasting love for Israel, he has made you king, that you may execute justice and righteousness."

In the first of these two examples בְּחֶמְלֵת הֹ occurs in middle position, and in fact in final position syntactically, since it follows a complete clause וַיָּתְמַהְמָה וַיַּחַזְקוּ הָאָנְשִׁים בְּיָדוֹ וּבְיֵד-אָשְׁתּוֹ וּבְיֵד שְׁהֵי בְּנֹתְיוֹ.

Gen. 19:16 הִירְמַהְמָה נַיְחָזְקוּ הְאֲנָשִׁים בְּיְדוֹ וּבְיֵד-אִשְׁתוֹ וּבְיֵד שְׁתֵּי בְּנְתְיוֹ בְּקַמְלֹח הי—מּלָיו נִייִּצְאָהוּ מַחוּץ לְעִיר "But he lingered; so the men seized him and his wife and his two daughters by the hand, **the LORD being merciful to him**, and they brought him forth and set him outside the city."

In the second example בְּאַהְבַת ה' likewise appears in the middle of the verse, and also in final position as regards syntactic structure since it follows a full clause יָהִי ה' אֱלֹהֶיךְּ בָּרוּךְ אֲשֶׁר חָפֵץ בְּךְ לְתִתְּךְ עַל-בִּפֵּא יִשְׂרָאֵל.

As to other Bible translations, the phrase בַּחֶמְלָת ה' עַלִיו (Gen. 19:16 above) is translated by Saadya Gaon בשפקה אללה עליה and in alkitāb al-muqaddas لِشَفَقَة الرَّبِّ عَلَيْه, namely a syntactic construction of a prepositional phrase, similar to the Biblical Hebrew original structure; likewise, it can safely be interpreted as a parenthesis. But the Geez translation offers a causal clause: እስሙ ምህኮሙ እግዚአብሔር / 'asma məhkomu 'Agzi'abəher-"...because God was merciful to them...," and  $l\bar{a}w(hy)$ . The interpretation of בְּחֶמֶלֶת ה' עַלִּיו as a clause, as in the last two translations, is comparable to an interpretation in several Bible translations of the second example, בָּאַהָבַת ה׳ אֶת-יִשְׁרָאֵל לְעַלָם, from 1 Kgs. 10:9, as a causal clause. As it is from 1 Kings, Saadya Gaon's translation and the Geez translation of the Octateuch are not available for it. But al-kitāb al-muqaddas and the Peshitta for 1 Kgs. 10:9, like the RSV and 7PS translations, use a causal clause here. Only Targum ברחמת maintains the original Hebrew prepositional phrase: ברחמת יוי ית ישראל לעלם.

## 3.1.4 Epistemic Modal Adverbials

This section treats special words which affirm the truth of, or cast doubt on, a certain clausal content: אָמָן, אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אָמְנָם /אַמְנָם /אָמְנָם /אָמְנָם /אַמְנָם /אָמְנָם /אַמְנָם /מְנִם /מִם /מְנִם /מְנָם /מְם /מְנָם /מ

In syntax these units are frequently called 'epistemic modal adverbials' or 'sentence adverbials,' 19 though they seem to be on the border between adverbials and parenthetical units. These words can be regarded as parenthetical units since they do not function as adverbial complements of certain specific predicates but of the whole clause or the predicative relation, and they display a statement which refers to a full clause or utterance. They are also syntactically independent, and they hold dispensable non-obligatory information without which a sentence still remains complete.

All these arguments can hold for sentence adverbials as well as parenthetical units, yet regarding syntax one criterion with respect to the position of these so-called adverbials within a clause remains to be checked. Parenthetical units are deemed to hold a free position, while sentence adverbials are expected to have a fixed position. If so, what can we learn from word order of these mostly epistemic units? All the epistemic words and phrases discussed here present a somewhat fixed position, because they are usually in first position in direct speech utterances, at once introducing and affirming the speech. In this regard they act like sentence adverbials and introductory particles simultaneously. Their introductory role might still be understood as parenthetical.

 $<sup>^{18}</sup>$  For definitions of epistemic modality and their complexity see, e.g., Lyons 1977:793–809, §17.2, Palmer 1986:51–95, and ibid. 96–125 for deontic modality. Also see Crystal 2003:130, 163.

<sup>&</sup>lt;sup>19</sup> Especially see Blau's treatment of such examples in Blau 1977:18–30, §2.1.

The examples below are presented in separate sections for each type.

# 3.1.4.1 Examples with אָבֶן

The word אָבֶן is employed to affirm a certain content, hence it belongs to the domain of epistemic modal adverbs. *BDB* classifies this word as an adverb, and mentions its asseverative force. A different definition of the role of this word appears in *HALOT* which labels it an "exclamation to emphasize the unexpected." Yet *HALOT* translates this word like *BDB*, namely by the adverbs 'surely' and 'however.' The four examples discussed below, Gen. 28:16, Exod. 2:14, 1 Sam. 15:32, and 1 Kgs. 11:2, are the only cases of אָבֶן appearing in our corpus of Classical Hebrew prose. Other examples of אָבֶן belong to the later prophets, e.g., Isa. 40:7, 45:15, and more, or to the Hagiographa, e.g., Ps. 31:23, Job 32:8, and more. In any event, all examples of page, from our corpus or from other types of biblical texts, appear in direct speech.

The first example presents the word אָבוְ within an affirmation of the existence of God as a result of his revelation to Joseph in a dream. It appears in direct speech and in initial position.

Gen. 28:16— נַיִּיקָץ יַעֲקֹב מִשְּׁנְתוֹ נַיֹּאמֶר אָבן יֵשׁ הֹ בַּמְּקוֹם הַזֶּה וְאָנֹכִי לֹא "Then Jacob awoke from his sleep and said, 'Surely the LORD is in this place; and I did not know it.'"

Derenbourg edition of Saadya Gaon's translation of אָכֶּוֹ in this verse is אָכְינָא, namely a question meaning 'Is it surely so?'<sup>22</sup> Like the *RSV* translation and the identical JPS translation, Ḥasīd edition of Saadya Gaon's translation gives קָבוֹ for אָבוֹ, namely a regular affirmative adverb. An affirmative adverb, בֹּבֹי , also appears in al-kitāb al-muqaddas, and likewise בּבֹי / צֹמיֹדִר ' צֹמיֹדִר ' jin the Peshitta. The Geez translation avoids any rendering of this word in this verse. Only Saadya Gaon's Arabic in Derenbourg edition, 'Is it surely so?' is in fact a full clause, and syntactically too it is completely independent and parenthetical.<sup>23</sup>

 $<sup>^{20}</sup>$   $BDB{:}38\mathrm{b}.$  Muraoka describes this word as asseverative-emphatic (Muraoka 1985:132–133).

<sup>&</sup>lt;sup>21</sup> HALOT I:47.

<sup>&</sup>lt;sup>22</sup> Derenbourg indicates that the version with a question mark appears in the manuscript of Constantinople, and mentions two other versions in which the translation is אם כן, namely a protasis of a conditional clause which means: 'If so' (Derenbourg Edition:43, note 5).

<sup>&</sup>lt;sup>23</sup> The translation of Ms. St. Petersburg is missing.

Yet its absence from the Geez translation is meaningful as well because it reflects אָבֶן as dispensable. Similar Arabic versions also occur for the following verse, Exod. 2:14, though their distribution is somewhat reversed: Derenbourg edition and Ms. St. Petersburg exhibit אָדן; a comment by Derenbourg indicates that in another manuscript the version is איקינא also appears in Ḥasīd edition.

The next verse, Exod. 2:14 has אָבֶן in an expression of affirmation uttered by Moses, when he finds out that his involvement in a previous killing is known to others. The affirmative word is found again in direct speech and in initial position.

Exod. 2:14—ניֹאמֶר מִי שְּמְדְּ לְאִישׁ שַׁר וְשׁפֵט עָלֵינוּ הַלְּהְרְגֵנִי אַתְּה אֹמֵר כַּאֲשֶׁר וְשׁפֵט הַדְּבֶּר וּשִׁמֶּר הַמְּצְרִי וַיִּירָא מֹשֶׁה וַיֹּאמֵר אָבָן נוֹדַע הַדְּבָּר "He answered, 'Who made you a prince and a judge over us? Do you mean to kill me as you killed the Egyptian?' Then Moses was afraid, and thought, 'Surely the thing is known.'"

A third example, 1 Sam. 15:32 below, again has the affirmative word אָבֶּוֹ in direct speech and in initial position. The affirmation is part of the response reflecting the awareness of Agag, the Amalekites' king, of his forthcoming death (described in 1 Sam. 15:33).

וֹיִאמֶר שְׁמוּאֵל הַגִּישׁוּ אֵלִי אֶת-אָגַג מֶּלֶךְ עֲמְלֵק וַיֵּלֶךְ אֵלְיו אֲגַג־15:32 יוֹיִאמֶר שְׁמוּאֵל הַגִּישׁוּ אֵלִי אֶת-הָאָנֵג מֶּלֶךְ עַמְלֵק וַיִּלְּי אֵלְיו אֲגָג אָבן סְר מַר-הַמְּעֶת יֹיאמֶר אֲנְג אָבן סְר מַר-הַמְּעֶת יֹיאמֶר אַנְג אָבן סְר מַר-הַמְּעֶת manage the king of the Amalekites.' And Agag came to him cheerfully. Agag said, 'Surely the bitterness of death is past.'"

Like the RSV translation of 1 Sam. 15:32 above, al-kitāb al-muqaddas translates אָבָן in this verse by the affirmative adverb and the Peshitta gives the affirmative adverb אַבּיִבּי / צֹּמִידִּמֹינַ. A complete deviation from the expected translation by affirmative adverbs is the rendering of al-kitāb al-muqaddas of the next example, from 1 Kgs. 11:2, אָבֶן אָבֶן מֵּבֶּוֹ אַבְּבֶּים אַחֲבִי אֱלֹבִינֶם מֹשׁבִּי יִּטֵּנְ אַתְּבִי אֱלֹבִינֶם אַבְּבֵּי אַחֲבִי אֱלֹבִינֶם אַחֲבִי אֱלֹבִינֶם אַחֲבִי אֱלֹבִינֶם אַחֲבִי אֱלֹבִינֶם אַחֲבִי אֵלֹבִינֶם אַחֲבִי אֵלֹבִינֶם אַחֲבִי אֵלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלִּבְּבָּבֶם אַחֲבִי אֵלְבַּבְּבֶם אַחֲבִי אַלְבַּבְּבֶם אַחֲבִי אַלְבַּבְּבֶם אַחֲבִי אַלֹבִינֶם אַחֲבִי אַלְבַּבְּבֶם אַחֲבִי אַלְבִינֶם אַחֲבִי אַלְבַּבְבֶם אַחֲבִי אַלְבִינֶם אַחֲבִי אַלְבַבְּבֶם אַחֲבִי אַלְבַיִּם אַחֲבִי אַלִּבְיִ אֵּלְבִיי אֲלֹבִין בַּתִר טעותהון זה לבכון בתר טעותהון a negative purpose clause also appears in the Peshitta: במּבְּבֶּבִים בּמּבִּב בּבּבּב בּבּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּב בּבּב בּב בּבּב בּב בּבּב בּב בּבּב בּב בּב בּב בּבּב בּב בּב

<sup>&</sup>lt;sup>24</sup> Derenbourg Edition:83, note 1.

 $b\bar{a}tar$  alāhayhēn. These latter translations should actually be regarded as some sort of a commentary. They reflect the difficulty in understanding as affirmative, and suggest a solution which does not exist in the Hebrew original.

In the last example of this section אָבֶן appears again in direct speech and should be considered in initial position as regards the clause יָטוּ אַתְרֵי אֵלהֵיהֶם.

 $1~{
m Kgs.}$  11:2־מָן-הַגּוֹיִם אֲשֶּׁר אָמַר-ה' אֶל-בְּנֵי יִשְׂרְאֵל לא-תָבֹאוּ בְהֶם וְהֵם לא-יָבֹאוּ בְּקָם הָּקָם אָמַר-ה' אָמָר-ה' אָבָר יְשׁוּ אָת-לְבַבְּבֶם אָחֲרֵי אֲלְהֵיהֶם בְּהֶם דְּבַק שְׁלֹמה לְאָהָבָה "From the nations concerning which the LORD had said to the people of Israel, 'You shall not enter into marriage with them, neither shall they with you, for **surely** they will turn away your heart after their gods'; Solomon clung to these in love."

## 3.1.4.2 Examples with אָמְנָם / אָמְנָם / אָמְנָה / הָאָמְנָם

The word אָמְנָה and its variants הַאָּמְנָם in questions and אָמְנָה elsewhere, are again affirmative, and accordingly they too belong to the field of epistemic modal adverbs. The *BDB* and *HALOT* also mark these words as adverbs. The adverbial origin of הַאָּמְנָם is reflected in the suffix -ām attached to these words. They usually appear in initial position in direct speech.

In the first example below, Gen. 18:13, מְּמְנָם appears in a rhetorical question, which is similar in meaning to a negative statement. Here אָמְנָם should therefore be understood as part of a negative statement, and it consequently renders Sarah's doubt regarding the prediction of her future pregnancy, instead of her affirmation.

Gen. 18:13—נִיֹאמֶר ה׳ אֶל-אַבְרָהָם לְמָה זֶה צְּחֲקָה שֶׂרָה לֵאמֹר הַאַף אָמְנְם אֵלִד—"The LORD said to Abraham, 'Why did Sarah laugh, and say, 'Shall I **indeed** bear a child, now that I am old?'"

All versions of Saadya Gaon's Arabic translation of הַאַף אָמְנָם here combine the Arabic question particle א and the affirmative adverb יְקינא, namely, אִיקינא. The same Arabic translation occasionally appears for אָבון noted in the previous section, indicating that this scholar probably took Hebrew אָבון and אָבון to share the same meaning. al-kitāb al-muqaddas

<sup>&</sup>lt;sup>25</sup> BDB:53b, HALOT I:65, and similarly Muraoka 1985:133–134.

 $<sup>^{26}</sup>$  On this suffix see Kogut 2002:115. Kogut suggests that אָמְנָה is an alternate form reflecting another adverbial suffix:  $-\bar{a}$  (Kogut 2002:117–118).

translates פּֿאָלֶנְם by פּֿאָלְנְם, using a prepositional phrase analogous to the adverb בּשׁ employed for אָבֶן above. Again, a connection between אָבֶן and אָבֶן is evident in this translation.

This connection is more apparent in the following example, Gen. 20:12, for which all versions of Saadya Gaon's translation and al-kitāb al-muqaddas use a variant of the prepositional phrase employed by al-kitāb al-muqaddas for Gen. 18:13: זעלי אלחקיקה (Derenbourg edition), ועלי חקיקה (Ms. St. Petersburg), ובאלחקיקה (Ḥasīd edition and al-kitāb al-muqaddas, the last obviously in Arabic script). The Peshitta employs the affirmative adverb אַבּגי / צֹמּיֹדּיֹז / נוֹנְאַלְינָן, likewise regularly found as the translation of אָבֶּין, for Gen. 18:13 above and Gen. 20:12 below, and of אָבֶּין in Josh. 7:20, 1 Kgs. 8:27, 2 Kgs. 19:17, below. Exceptions are Num. 22:37, which has an entirely different version in the Peshitta, and Ruth 3:12, which has a similar adverb במסצא / b-quštā. Gen. 20:12 contains the variant אָמְנָּיִן in direct speech and in initial position, introducing the subsequent clause.

Gen. 20:12—אָמְנָה אֲחֹתִי בַת-אָבִי הָּוֹא אַךְּ לֹא בַת-אָמִי וַתְּהִי-לִי לְאִשְׁה "Besides she is **indeed** my sister, the daughter of my father but not the daughter of my mother; and she became my wife."

The translation by בֹּשׁ in combination with the question particle occurs again for הַאַמְנָם of the following verse, Num. 22:37, in al-kitāb al-muqaddas. A translation by خام also appears in the remaining verses in this section, for which Saadya Gaon's translation is not available (except for Ruth 3:12, where the translation is by האמנם). For Num. 22:37, though, this translation has another version which deviates from the original meaning and is exegetical. The variant found in Derenbourg edition is אמרמן של אפרמן "Do you consider me unable to honor you?" and it involves prolepsis. A similar version without prolepsis appears in Ḥasīd edition: אמראל ליס אטיק אן אפרמך "The word הַאַּמְנָם the following verse introduces a question in direct speech. Since the question is rhetorical and negative it actually indicates a positive content, affirmed by the word האמנם

<sup>&</sup>lt;sup>27</sup> The *Peshitta* translation of the book of Ruth is according to the edition of the Syriac Bible.

<sup>&</sup>lt;sup>28</sup> For the syntactic pattern of prolepsis see Zewi 1996.

<sup>&</sup>lt;sup>29</sup> This verse was not preserved in Ms. St. Petersburg.

Num. 22:37—אָד לְקְרֹא-לְךְ לְּקְרֹא-לְךְ לְּקְרֹא-לְךְ לְּקְרֹא-לְךְ לְּקְרֹא-לְךְ לְּקְרִא שָׁלְחַ שְׁלַחַ שְׁלַחְ שָׁלַחְתִּי אֱלֶיר לְּאָרְלְּךְתְּ אֲלִי בְּבְּדֶךְ הֹא אוֹבֵל בַּבְּדֶךְ "And Balak said to Balaam, 'Did I not send to you to call you? Why did you not come to me? Am I not able to honor you?'"

The next example contains the variant אָמְנָה in first position in direct speech and it serves to affirm Achan's admission of his sins against God before Joshua.

Josh. 7:20—אָבֶן עֶבֶן אֶת-יְהוֹשֶׁעַ וַיֹּאמֶר אָמְנָה אָנֹבִי חְטָאתִי לַה' אֱלֹהֵי יִשְׂרָאֵל וְכָּזֹאת (נְיַעַן עֶבֶן אֶת-יְהוֹשֶׁעַ וַיֹּאמֶר אַמְּנָה אָנֹבִי חְטָאתִי לַה' And Achan answered Joshua, 'Of a truth I have sinned against the LORD God of Israel, and this is what I did.'"

The following example again presents הַאָּמְנָם initiating a rhetorical question in direct speech. The question in this case anticipates a negative reply, namely it indicates that God does not dwell on the earth, and the word הַאָּמְנָם should be understood as casting doubt on the supposition conveyed in the question that God dwells on earth, or as affirming its negative reply.

1 Kgs. 8:27—אָבֶים הַשְּׁמֵים הַשְּׁמֵים לֹא הַבָּיק הָאָרֶץ הָנֵה הַשְּׁמֵים וּשְׁמֵים לֹא הַישָׁבְים עַל-הָאָרֶץ הְנֵה הַשְּׁמִים הַשְּׁמֵים לֹא "But will God **indeed** dwell on the earth? Behold, heaven and the highest heaven cannot contain thee; how much less this house which I have built!"<sup>30</sup>

The next example presents the word אָמְנָם in a positive statement, which is part of Hezekiah's prayer to God. It is in initial clausal position and in direct speech.

2 Kgs. 19:17—אָמְנָם הֹ הֶחֶרִיבוּ מַלְכֵי אַשׁוּר אָת-הַגּוֹיִם וְאָת-אַרְצִּם הֹי הֶחֶרִיבוּ מַלְכֵי אַשׁוּר אָת-הַגּוֹיִם וְאָת-אַרְשִּׁר "Of a truth, O LORD, the kings of Assyria have laid waste the nations and their lands."

The last example also displays a positive statement, in which אָמְנָם is in initial position and in direct speech. But in syntactic structure it deviates from all constructions we have discussed so far since here כִּי אָם זוֹ גֹאֵל אָנֹכִי אָמְנָם יֵשׁ גֹאֵל קְרוֹב מִמֶּנִי אָמְנָם, introduced by the content particle בִּי Being a predicate בָּי במחוסt be considered parenthetical or dispensable as it is essential syntactically in the clause. Such a syntactic movement from a

<sup>&</sup>lt;sup>30</sup> Compare this example with 2 Chron. 6:18.

<sup>&</sup>lt;sup>31</sup> A similar version appears in Isa. 37:18.

parenthetical to a predicate role is familiar elsewhere. Modern Hebrew כנראה, which plays a role of a parenthesis, can be substituted by נראה, in which בראה plays a predicate role of a content clause introduced by w. Another example is Modern Hebrew כידוע, which may be replaced by ידוע, in which w introduces a content clause, etc.

Ruth 3:12—וְעַתָּה כִּי אָמְנֶם כִּי אָם זוֹ גאֵל אָנֹכִי וְנֵם יֵשׁ גאֵל קְרוֹב מְמֶנִי (And now **it is true** that I am a near kinsman, yet there is a kinsman nearer than I."

## 3.1.4.3 Examples with אָמֶן

The word אָמָן is another biblical affirmative, and it is formed from the same root as אָמְנָם. Likewise, it belongs to the sphere of epistemic modal adverbs; BDB marks it as an adverb and HALOT translates it as the adverb 'surely,' defining it as "...solemn formula,... by which the hearer accepts a) the validity of a curse of declaration...; b) an acceptable order... or announcement...; c) belonging to a doxology."32 Nonetheless, contrary to the affirmative words discussed previously, the word אָמָן is mostly not translated in Bible translations. The RSV, the JPS, Saadia Gaon's Arabic translation al-kitāb al-muqaddas, the Geez translation, Onkelos, Targum Jonathan, and the Peshitta all eschew rendering it by another language, choosing instead to transcribe the Hebrew form. This choice is probably due to the widespread use of the word אָמַן in liturgy in later periods. Its public use is already revealed in biblical texts, like the sequence of examples with אָמַן appearing in Deut. 27:14–25.

In the first example אָמֵן appears as the sole content of a speech utterance, thus serving as a one-member clause. This also applies to verses 15–25 of Deut. 27. In all these examples אָמֵן affirms a previous statement containing a curse.

Deut. 27:14—אָרוֹר הָאִישׁ אֲשֶׁר יַעֲשֶׂה פֶּסֶל וּמַסֵּכָה תּוֹעֲבַת ה' מַעֲשֵׂה יְדֵי חְרָשׁ אָמֶן אָמֶרוּ אָמֵן הַיִּישׁה יְדֵי חְלָשׁ בַּסְּתֶר וְעָנוּ כְּלֹ-הָעָם וְאָמְרוּ אָמֵן "Cursed be the man who makes a graven or molten image, an abomination to the LORD, a thing made by the hands of a craftsman, and sets it up in secret.' And all the people shall answer and say, 'Amen.'"

<sup>32</sup> BDB:53a, HALOT I:64.

In the next example אָמֵן introduces direct speech, whose content it affirms.

1 Kgs. 1:36 יַיִּעַן בְּנְיָהוּ בֶּן-יְהוּיְדָע אֶת-הַמֶּלֶךְּ וַיֹּאמֶר אָמֵן כֵּן יֹאמֵר הֹ אֱלֹהֵי אֲדֹנִי "And Benaiah the son of Jehoiada answered the king, 'Amen! May the LORD, the God of my lord the king, say so.'"

The following example is from Jeremiah and is presented here since it demonstrates a similar use of אָמֵן in introducing and affirming direct speech.

Jer. 28:6— וְיֹּאמֶר נְבְּאיְ אֲשֶׁר נְבֵּאתְ הֹי יְקִם הֹ אֶת-דְּבְּרֶיךְ אֲשֶׁר נְבֵּאתְ הַּנְּרִיה אָמֵן כֵּן יִצְשָׁה הֹ יְקִם הֹ אֶת-הְבְּרֶיךְ אֲשֶׁר נְבֵּאתְ "And the prophet Jeremiah said, 'Amen! May the LORD do so; may the LORD make the words which you have prophesied come true, and bring back to this place from Babylon the vessels of the house of the LORD, and all the exiles.'"

The next example demonstrates again a similar use of אָמָן in Jeremiah. However, in contrast to all the RSV translations displayed above, this one is rendered by an affirmative meaning "So be it". al- $kit\bar{a}b$  al-muqaddas and the JPS keep the Hebrew form in transcription. 33

Jer. אַכֶּק הָלֶה אָדֶר לָהֶם לֶּתֶת לָהֶם אֶּרֶץ בְּשְׁבַּעְתִּי לַאֲבוֹתֵיכֶם לְתֵת לָהֶם אֶּרֶץ הְשְׁבוּתְי לְמָעַן הְשְׁבוּתְי אָמֵן הְשְׁבוּתְי "That I may perform the oath which I swore to your fathers, to give them a land flowing with milk and honey, as at this day." Then I answered, "So be it, LORD.""

## 3.1.4.5 Examples with אַמָת and כַן

The majority of appearances of אֱמֶת is in nominal use and is irrelevant to this study. However in several instances אֱמֶת plays a modal adverbial and partially parenthetical role. 34 As to the next example, though BDB and HALOT generally treat אֱמֶת as a noun, 35 HALOT is aware of its adjectival and adverbial roles. 36 The RSV considers it an adjective, like

<sup>33</sup> The Arabic translation of Saadya Gaon for this verse is not extant.

<sup>&</sup>lt;sup>34</sup> BDB:54a, number 5, indicates the adverbial meaning of אַמְהָּשָּ. Muraoka 1985: 133–134 regards this word, as well as אָמְנֶם and its variants, as emphatic, and indicates the derivation of both from the same root. Muraoka also mentions that the emphatic particle אָּ is sometimes combined with these words, e.g., Gen. 18:13, Job 19:4, 34:12 (Muraoka 1985:134).

<sup>&</sup>lt;sup>35</sup> BDB:54a, where Deut. 13:15 and Deut. 17:4 are mentioned under number 4. HALOT I:68–69.

<sup>&</sup>lt;sup>36</sup> *HALOT* mentions these roles regarding Deut. 13:15, Deut. 17:4, and a few other examples (*HALOT* I:69).

Deut. 13:15 / Deut. 17:4—וְּהַבֵּה אֲמֶת נְבוֹן הַהְּבָּה אֲמֶת וְהַבָּה וְּהְצַּהְ וְשְׁאַלְּתְ הַיִּטֵב וְהְבֵּה אֲמֶת נְבוֹן הַדְּבְרְבְּרְבְּּדְ וֹהְצַּה הָוֹעֵבְה הַזֹּאת בְּקְרְבֶּּךְ "Then you shall inquire and make search and ask diligently; and behold, if it be **true** and certain that such an abominable thing has been done among you."

A clearer modal adverbial role of אָמָת is revealed in the following example from Jeremiah. This role is wholly adverbial and not at all parenthetical, since the word אַמָּת in this verse is the complement of a specific predicate. The affirmative word אֵמֶת also appears in this clause in final position, in contrast to all the other affirmative words, which are in initial position. An adverbial role is also reflected in the JPS translation which is similar to the RSV, and in al-kitāb al-muqaddas, where the translation is by a prepositional phrase employed adverbially فَا الْمُحَالَةُ وَالْمُعَالَيْنَكُلُمْ بِكُلُوتِكُلُ Apain al-kitāb al-muqaddas. So attested in Biblical Hebrew itself, as in Judg. 2:11 below and in its translation by the RSV and al-kitāb al-muqaddas. Again, the JPS employs in the latter an adverb: "honorably." The Geez translation, which is available only for Judg. 9:15, has a prepositional phrase, albeit quite literal: 🏗 ba'amān.

Jer. 23:28—הָבֶרִי אֲמֶּת דְּבָרִי אָתוֹ יְחַפֵּר חֲלוֹם יְסֵפֵּר חֲלוֹם יְסֵפֵּר הְלוֹם יְסֵפֵּר הְלוֹם יְסֵפֵּר הְלוֹם יִבְּבִּר יִאָּה יְדַבָּר יְאָה יִבְּבּר וְאָם-ה' Let the prophet who has a dream tell the dream, but let him who has my word speak my word faithfully. What has straw in common with wheat? says the LORD."

 $<sup>^{37}</sup>$  al-kitāb al-muqaddas settles for one translation, צחיח, either for גָּבוֹן alone or for אֱמֶת נְבוֹן together.

Another important use of the word אָּמֶת, this time set in first position, is within the prepositional phrase בָּאֶמֶת. This use is closely akin to the use of the other affirmative words mentioned above and it can be interpreted as adverbial and parenthetical alike.

Judg. 9:15—ניֹּאמֶר הְאָטָד אֶל-הְעֵצִים אִם בָּאֲמֶת אַהֶּם מִשְׁחִים אֹתִי לְמֶלֶּדְ עֲלֵיכֶם בְּיִּאמָד הָעָצִים אָם בָּאֲמֶת אַהֶּם מִשְׁחִים אֹתִי לְמֶלֶד עֲלֵיכֶם And the bramble said to the trees, 'If **in good faith** you are anointing me king over you, then come and take refuge in my shade; but if not, let fire come out of the bramble and devour the cedars of Lebanon.'"

Like the RSV translation of אמת above, the word בן is considered an adjective by the RSV in the translation of the next example, "The daughters of Zelophehad are right," and the closely similar JPS translation: "The plea of Zelophehad's daughters is just." Still, this word can also be translated adverbially: "The daughters of Zelophehad speak **honestly**." An adverbial interpretation is further supported by Saadya Gaon's Arabic translation, נעמא קאל בנאת צלפחד, where the verb is preceded by the form נעמא which is adverbially marked by the accusative (object/adverbial) case (نَصْب), and by al-kitāb al-mugaddas, بِّحَةً , where the verb is preceded by a prepositional phrase, تَكُلَّمَتْ بَنَاتُ صَلْفُحَادَ expressing an adverbial role. An adverbial translation should also بحق be applied to the Geez translation by **C+b**—ntu', 'honest', probably 'honestly' in this case since it accompanies a verb of speech; the *Peshitta* has the adverb באבא / kēnāʾīt, 'rightly'. In any event, again, like אמת above, plays a wholly adverbial non-parenthetical role here, because it is an adverbial complement of a specific predicate.

Num. 27:7—בֶּן בְּנוֹת צְּלָפְחָד דֹּבְרֹת נָתוֹ תִּתֵן לָהֶם אֲחָזַת נַחֲלָה בְּתוֹדְ אֲחֵי אֲבִיהֶם בֹּן לָהֶן לָהֶן לָהֶן לְהֶן לִהֶּן לְהֶן לִהֶּן לִהֶּן לִהֶּן לִהֶּן "The daughters of Zelophehad **are right**; you shall give them possession of an inheritance among their father's brethren and cause the inheritance of their father to pass to them."

# 3.1.4.4 Examples with אוּלִי

In contrast to all the epistemic modal words and phrases discussed so far, which play an affirmative role, the word אוּלִי covered in this section casts doubt and at the same time exhibits certain expectations, encouraging or discouraging, regarding a state or a situation. Nevertheless, the word still belongs to the same category of modal words and phrases, namely to epistemic modal adverbs, not as an affirmative particle but as a particle exhibiting uncertainty.

As to scholarly treatments of this particle, Livnat insightfully claims that Biblical Hebrew אוֹלִי evolved from an epistemic modal adverb, reflecting reservation on the part of some individual about a certain state or situation, into an adverb combining both an epistemic and a deontic expression of modality. That is, אוֹלִי refers to the uncertainty of a proposition and also displays the type of modality involving an expression of will. The roots of this development may lie in the existence of positive and negative expectations expressed through אוֹלִי by participants in biblical episodes. Expectations, positive or negative, at least partially semantically overlap expressions of will.<sup>38</sup>

Syntactically אולי is considered an adverb in two major Biblical dictionaries, BDB and HALOT.<sup>39</sup> Its fixed position in the beginning of a clause, introducing direct speech utterances, as well as its function as a non-obligatory complement of the predicate, confirm its adverbial, possibly non-parenthetical, sentence role. The adverbial interpretation is also found in Bible translations. All versions of Saadya Gaon's Arabic translation for the verses below translate לעל על אולי, that is, adverbially. al-kitāb al-muqaddas also gives only an adverbial meaning in all its renderings, though it exhibits alongside عُسَى for Gen. 18:24 and رُبُّهُ for Gen. 24:39 below.

In the first example, Gen. 16:2, אולי conveys uncertainty. It is used by Sarai regarding the possibility that her maid replace her in bearing

<sup>38</sup> Livnat 2001 & Livnat 2002. Livnat 2001:83 and Livnat 2002:109–110 indicate the occurrence of אולי in Biblical Hebrew in directive speech acts which are, as she states, indirectly related to deontic modality, but she still insists that אולי functions in the "modal framework known as epistemic" (Livnat 2001:89).

<sup>&</sup>lt;sup>39</sup> *BDB*:19b, *HALOT* I:21.

children as a solution for her childless state. Moreover, expectations of a positive outcome are evident in Sarai's proposition also.<sup>40</sup> As to syntax, the position of אוּלִי אַבְּנֶה מִמֵנָה si fixed. It precedes the verb, and like sentence adverbials it refers to the whole clause, אוּלִי אַבְּנֶה מִמֵנָה, which is part of a direct speech utterance.

Gen. 16:2—יְחָמִי אֶל-אַבְרָם הָגַה-נָא עֲצָרַנִי ה' מִלֶּדֶת בֹּא-נָא אֶל-שִׁפְחָתִי ה' מַלֶּדֶת בֹּא-נָא אֶל-שִׁפְחָתִי "And Sarai said to Abram, 'Behold now, the LORD has prevented me from bearing children; go in to my maid; it may be that I shall obtain children by her.' And Abram hearkened to the voice of Sarai."

In the next example אוּלִי again introduces a direct speech utterance, part of a long dialogue between Abraham and God in Chapter 18 from verse 23 to verse 33. אוּלִי features in this dialogue several times, in addition to verse 24 in the example: verses 28, 29, 30, 31, and 32. In all these occurrences the word plays a similar role in casting doubt on the validation of the statement made by God in Chapter 18, verse 20 on the indecent nature of the inhabitants of Sodom: יַּאַקְּר הַּ יִּבְּדָּה מְאַד "ֹרַבְּהָה מְּמֹד הַשְּׁמִרֶּה בָּי-רָבָּה וְחַשָּׁאַתְּם בִּי כְּבְּדָה מְאַד הֹי וֹעֲמֶר, בֹּי-רָבָּה וְחַשָּׁאַתְם בִּי כְּבְדָה מְאַד sin is very grave...." In addition to casting doubt, an expectation for a better solution for the city of Sodom than the one planned by God is implicit in the use of אוֹלִי in these examples as well.

Gen. 18:24—הַאָּא לַמְּקוֹם בְּתוֹדְ הָעִיר הַאַּף הְּסְבֶּּה וְלֹא-תִשְׂא לַמְּקוֹם בְּתוֹדְ הָעִיר הַאַף הַּאָּים בְּתוֹדְ הַעִּר הָאַף "Suppose there are fifty righteous within the city; wilt thou then destroy the place and not spare it for the fifty righteous who are in it?"

In contrast to the examples above, which exhibit positive expectations alongside an expression of doubts, the next example, whose content is repeated in Gen. 24:39, reveals the concern of Abraham's servant, also implicit in אוֹלַי, about possibly failing in the mission assigned to him by his master to find a bride for his son Isaac. In this example too אוֹלִי introduces direct speech, and it refers to the entire subsequent clause.

<sup>&</sup>lt;sup>40</sup> See a discussion of אוּלִי in this example in Livnat 2001:84 and Livnat 2002: 108.

<sup>&</sup>lt;sup>41</sup> A discussion of אולי in this example appears in Livnat 2001:88–89.

<sup>&</sup>lt;sup>42</sup> A discussion of אולי in this example is found in Livnat 2001:87–88 and Livnat 2002:109.

Gen. 24:5—אָבֶי אָל-הְאָרֶץ אַחֲרֵי אֶל-הָאָרֶץ הַזֹּאַת פּאָבָּה הָאִשָּׁה לְּלֶבֶת אַחֲרֵי אֶל-הְאָרֶץ הַזֹּאַת מִשְׁם יַּיּאָבָת מִשְׁם "The servant said to him, **'Perhaps** the woman may not be willing to follow me to this land; must I then take your son back to the land from which you came?'"

The following example reveals once more both doubts and expectations, this time positive, side by side. It contains a direct speech utterance expressed by Moses, in which he offers to accept the Israelites' repentance. Implicit in the use of אולָי are Moses' doubts regarding his ability to make good, and also his hopes that his offer is realized.<sup>43</sup>

Exod. 32:30—וְיָהִי מְמְּחֶרָת וַיִּאֹמֶר מֹשֶׁה אֶל-הָעָם אָתֶּם חֲטָאִתֶּם חֲטָאָה גְּדֹלְה מֹשֶׁה פָּל-הִי מִּמְחַרָת וַיִּאֹמֶר מֹשֶׁה (On the morrow Moses said to the people, 'You have sinned a great sin. And now I will go up to the LORD; **perhaps** I can make atonement for your sin.'"

The last example of אוֹלִי given here shows the Israelite's uncertainty about the geographical status of the Hivites, namely the inhabitants of Gibeon, he being concerned that these inhabitants might not be what they claim. אוֹלִי introduces direct speech and refers to the whole subsequent clause, אוֹלִי בּקרבִי אִתּה יוֹשֶׁב.

Josh. 9:7—אָכְרוֹת יִשְׁרְאֵל אֶל-הַחִנִּי אִּנְלִי בְּקְרְבִּי אַתְּה יוֹשֵׁב וְאֵיךְ אֶכְרוֹת אָלי. פּרְתִּר יִיֹאמֶר וְיֹאמֶר יִשְׁרְאֵל אֶל-הַחִנִּי אוּלַי בְּקְרִבּי אַתְּה יוֹשֵׁב וְאֵיךְ אֶכְרְת-לְּךְּ בְּרִית "But the men of Israel said to the Hivites, 'Perhaps you live among us; then how can we make a covenant with you?' "<sup>45</sup>

## 3.1.5 Appeal and Plea

The examples in this section contain the words and phrases of appeal and plea אָנָה/אָנָּא , בִּי אֲדֹנִי and אַנָּה. They are included in this book since they serve as modal parenthetical units.

<sup>&</sup>lt;sup>43</sup> See a discussion of אולי in this verse in Livnat 2001:87.

<sup>&</sup>lt;sup>44</sup> For a discussion of אוֹלָג in this example see Livnat 2001:88 and Livnat 2002: 109.

 $<sup>^{45}</sup>$  More examples are Gen. 18:29, 24:5, Num. 22:6, 1 Sam. 6:5, 2 Sam. 14:15, 1 Kgs. 18:5.

א אַחְלֵי/ אַחְלֵי אוֹנוֹ Another possible appeal and plea interjection is אַחְלֵי/ אַחְלֵי/ אַחְלֵי/ אַחְלַי/ אַחְלַי/ אַחְלַי/ אַחְלַי/ אַחְלַי/ אַחְלַי/ אַחְלַי/ אַרְּבָּי הַנְּבִיא אַלי- אַרְבָּי הַנְּבִיא ווּ בּוֹאַרָּ אַרָּ אַרְ בְּשׁמְרוֹן אָז יָאָסוּ אַתוֹ מִאַרְעָחוֹ "She said to her mistress, Would that my lord were with the prophet who is in Samaria! He would cure him of his leprosy." This particle is probably more a wish than a plea particle, and it is similar in meaning to יָּ "would that," also reflected in the translation of the RSV. It appears only twice in the Bible, and its second appearance is in the form אַחֵלִי in Ps. 119:5, where it functions as a wish particle.

As to the basic meaning of the phrase בָּי אָדְנִי , \$BDB, for example, explains the word בְּ as a "particle of entreaty," "craving permission to address a superior," and this dictionary points out its constant combination with אֲדֹנִי Another major biblical dictionary, HALOT, treats the particle בִּ only in combination with אֲדֹנִי and explains the two as a "formula beginning a conversation with a person of higher rank." "48

The word אָנָה 'אָנָה' אָנָה' is again treated in BDB and HALOT as an entreaty particle, but in the BDB it is initially marked as an interjection. BDB defines בָּא as a "particle of entreaty or exhortation," so already according to the BDB נָּא is only partially an appeal and plea particle. HALOT defines this particle as "giving emphasis," and thus avoids attaching to it a meaning of plea. Fassberg takes this line of thought even farther, showing that the main role of נָּא is in reference to consequence and that it functions as an appeal and plea particle only alongside בְּי אֲדֹנִי אַדֹנִי אַדֹנִי אַדֹנִי 'אַדֹנִי 'אַדַנִי 'אַדַנִי 'אַדִּנִי 'אַדִּי 'אַדַנִי 'אַדִּי 'אַדַנִי 'אַדַּנִי 'אַדַּנִי 'אַדַּנִי 'אַדִּנִי 'אַדִּנִי 'אַדִּי 'אַדַּנִי 'אַדִּנִי 'אַדִּי 'אַדִּנִי 'אַדִּי 'אַדִּנִי 'אַדִּי 'אַדְי 'אַדְי

Appeal and plea are also expressed by the idiom אָם-נָא מְצָאתִי חֵן and more phrases which are syntactically considered full clauses, and are consequently discussed above among other parenthetical or

<sup>47</sup> BDB:106b.

<sup>&</sup>lt;sup>48</sup> HALOT I:121-122.

<sup>&</sup>lt;sup>49</sup> BDB:58a, HALOT I:69-70.

<sup>&</sup>lt;sup>50</sup> BDB:609a-b.

<sup>&</sup>lt;sup>51</sup> HALOT II:656-657.

<sup>52</sup> Fassberg 1994:71. For the complete description of the syntax of אָז, including syntagms in which it follows בָּי אַדְנִי יוֹס, see Fassberg 1994:36–73. Lambdin 1971:170 reaches a similar conclusion: "the particle seems rather to denote that the command in question is a logical consequence, either of an immediately preceding statement or of the general situation in which it is uttered." See also Waltke & O'Connor 1990:684, §40.2.5.

<sup>&</sup>lt;sup>53</sup> Kaufman 1991. On the role of the address itself as parenthesis see §3.1.6 below.

<sup>54</sup> For more references on the origins of this particle and its modal marking see, e.g., Gottlieb 1971 who connects אָז with the energicus in form, meaning, and use, and Zewi 1999a who objects to this connection, because the use of the energicus is related to the indicative while the particle אָז occurs with jussive, cohortative, and imperative Moods as well as other particles (Zewi 1999a:153–155, §3.2.7). For additional references see Zewi 1999a:153–154, notes 263–265.

semi-parenthetical clauses in the appropriate section (§2.1.2 above). The appeal and plea words and phrases mentioned in the current section are very common in Biblical Hebrew, and most examples of each type are generally similar in use and meaning. They are demonstrated below with only a few examples of each.

What can we learn about these words and phrases from Bible translations? The RSV translation of בִּי אֲדֹנָי, the JPS translation, the Arabic translations of Saadya Gaon for examples of the Pentateuch and al-kitāb al-muqaddas for all examples, the Geez Bible translation for the Octateuch, Onkelos for the Pentateuch, Targum Jonathan for the former prophets, and the Peshitta for all examples are mostly fixed and idiomatic, and use a certain form of an address. Nevertheless, we can still observe a certain variation in all these translations.

First, the RSV occasionally adds the appeal and plea verb 'pray.' It appears in Judg. 6:13 below for בִּי אֲדֹנִי without נָא in the Biblical Hebrew original, and it appears again in all other examples below for בי אדני accompanied by נא Our other English translation, the JPS, often uses the plea word 'please.' al-kitāb al-muqaddas adds a preceding verb, either أَسْأَلُكُ, in the majority of the examples below, or السُتَمَعُ, in 1 Kgs. 3:17 and Exod. 4:13 below. The Geez translation sometimes adds a plea verb as well, such as ና/አስተበቍዐከ / nā/ʾāstabaqq̄wəʿakka. This possibility appears in Gen. 43:20 and Exod. 4:13 below. Onkelos and Targum Jonathan employ בבעו, namely 'please'. This translation appears in Gen. 43:20 below in Onkelos and in Josh. 7:8, Judg. 6:13, 1 Sam. 1:26, and 1 Kgs. 3:17 below in Targum Jonathan. Finally, the Peshitta mostly employs a similar appeal and plea verb in various declensions: ححيد / bā ēnan in Gen. 43:20 below, אור שביא / bā ē nā in Judg. 6:13, Exod. 4:13 below, حديم /  $b\bar{a}$   $y\bar{a}$   $n\bar{a}$  in 1 Sam. 1:26, 1 Kgs. 3:17 below, and בבבס / bə- $b\bar{a}\bar{u}$  'please' in Judg. 13:8 below, for נא without בי אָדֹנִי without בי or with אַב. Since address in itself should be considered parenthetical, the translations of these words and phrases as addresses support the interpretation of the phrase בי אַדני as parenthetical.<sup>55</sup>

The words  $\aleph$ , and  $\aleph$ , when standing alone, are mostly translated in the RSV by the appeal and plea verb 'pray,' in the  $\mathcal{J}PS$  by 'please,' in al- $kit\bar{a}b$  al-muqaddas by the interjection  $\mathfrak{g}$ , in Onkelos, for the verses from the Pentateuch, and Targum  $\mathcal{J}onathan$ , for the former prophets,

<sup>&</sup>lt;sup>55</sup> On address see below §3.1.6.

כען, and in the *Peshitta* by either כבים / bə-<u>bā</u> $\bar{u}$  'please' (Gen. 50:17 in §3.1.5.2.2 below) or, like al-kitāb al-muqaddas, the interjection  $\bar{u}$  /  $\bar{u}$  (2 Kgs. 20:3 in §3.1.5.2.2 below). Saadya Gaon's Arabic translation of the verses from the Pentateuch and the Geez Bible translation for the verses from the Octateuch below choose to ignore these words in their translations.

Though a certain variation exists among these translations in their choices for נָא בְּי אֲדָנִי, אָנָה/אָנָּא , בּי אֲדֹנִי and אָ, they mostly share the inclusion of a modal nuance of appeal and plea alongside an address. Both this nuance of deontic modality and the definite parenthetical syntactic status of an address support the assumption that אָנָה/אָנָא , בִּי אֲדֹנִי , and בֹּא belong to the realm of parenthesis.

## 3.1.5.1 Examples of בי אַדני

In all these examples בֵּי אֲדֹנִי appears without a following בּוֹ אָדֹנִי This phrase in combination with אַ is demonstrated in the next section.

בִּי אֲדֹנְי in the first example here is a special form of an address, introducing direct speech utterance. It is said by Joseph's brothers to someone of a higher rank, namely Joseph's house steward.

Gen. 43:20—וָּאמְרוּ בִּי אֲדֹנִי יָרד יָרַדְנוּ בַּתְּחִלְּה לִשְׁבְּר-אֹכֶל "And they said, '**Oh, my lord**, we came down the first time to buy food.'"

The next example is again a special type of an address introducing direct speech. This time the higher-ranking addressee is God, and the speaker is Joshua, turning to God after the defeat of the Israelites by the people of the Ai. The address by בְּי אֲדֹנִי בֹּי is preceded by a simpler form in which the name of God is indicated following the exclamation הַּאָבָּה in Josh. 7:7—ניאמֶר יְהוֹשֶׁעֵ אֲהָה אֲדְנִי הֹי—"And Joshua said, 'Alas, O Lord GOD.'" The choice of בֵּי אֲדֹנִי הֹי for a second address might be due to the need to include here a nuance of plea.

Josh. 7:8—בָּי אָדְנִי מְה אֹמֵר אַחֲרֵי אֲשֶׁר הְפַּדְּ יִשְׂרָאֵל עֹרֶף לִּפְנֵי אִיְבִיוּ - **O Lord**, what can I say, when Israel has turned their backs before their enemies!"

A nuance of plea is found again in the following example, in which בי אָדֹנִי introduces direct speech. The speaker this time is Gideon and

 $<sup>^{56}</sup>$  Fassberg shows that אָדֹנָי appears without אָ when it does not precede a modal verbal form (Fassberg 1994:45).

he turns to God's angel in reply to the angel's prior approach to him. Gideon's employment of בֵּי אֲדֹנִי precedes his complains about the troubles caused to the Israelites by Midian. The nuance of plea is rendered in the RSV by the word 'pray.'

Judg. 6:13—אָבֶּר מְצְאַתְנוּ כְּל-זֹאת מְמָּצְרִיִם הָּשֶׁלְוּ הֹ' עִמְנוּ וְלְמָה מְצְאַתְנוּ כְּל-זֹאת בְּילוּ בִּי אֲדֹנִי וְיִשׁ הֹ' עִמְּהוּ בְּלָּאַרְיִוּ הָשֶׁלְנוּ הֹ' וְעַהְּה וְעַהְּה בְּלֹּאַרִיִם הָשֶׁלְנוּ הֹ' וְעַהְּה וְעַהְּה "And Gideon said to him, 'Pray, sir, if the LORD is with us, why then has all this befallen us? And where are all his wonderful deeds which our fathers recounted to us, saying, 'Did not the LORD bring us up from Egypt?' But now the LORD has cast us off, and given us into the hand of Midian.'"

Another example, 1 Sam. 1:26 following, has the phrase בּי אֲדֹנִי in introduction to a direct speech utterance addressed at Eli, God's priest, by a simple lower rank woman, Hannah, who approaches him in order to fulfill her vow to God. The employment of בִּי אֲדֹנִי in this verse is again related to plea, since the content of the direct speech is plea and prayer.

 $1~\mathrm{Sam}.~1:26$  נַתּאֶבֶר בָּיָ אֲדֹנִי הֵי נַפְשְׁךּ אֲדֹנִי אֲנִי הָאָשָׁה הַנִּצֶּבֶת עִמְכָה בָּזֶה הַיּנְאֶבֶל אֶל-ה־ (And she said, 'Oh, my lord! As you live, my lord, I am the woman who was standing here in your presence, praying to the LORD.'"

The last example again contains the phrase בי אַדני in introduction to a direct speech utterance, and it is once more expressed by a simple lower rank woman. This time it is addressed to a king, Solomon. The general scene to which this direct speech belongs is a court case heard by king and awaiting his judgment.

 $1~{
m Kgs.}~3:17$ – וְמִאְטֶּר הְאִשְׁה הָאַמָּה הַיִּאָשָה הַזֹּאַת יִשְׁבֹּת בָּבְיִת אָחָת בִּי אֲדֹנִי אָנִי וְהָאִשָּה הַזֹּאַת יִשְׁבֹּת בָּבְּיִת הַאָּחָת בָּיִּת "The one woman said, '**Oh, my lord**, this woman and I dwell in the same house; and I gave birth to a child while she was in the house.'"

# 3.1.5.2 Examples of נָא in Combination with אָנָא or אָנָא or אָנָא

The discussion of the phrase בֵּי אֲדֹנִי above showed examples in which it stands by itself, not accompanied by בָּא In this section a few examples are given in which בִּי אֲדֹנִי appears in combination with אָנָא Of אָנָא Fassberg rightly says that it can only appear in combination with a following אָנָא also features in this section when

<sup>&</sup>lt;sup>57</sup> Fassberg 1994:44.

it is combined with נָּא although without the phrase בִּי אֲדנִי. Examples include בָּי אֲדנִי in combination with בִּי אֲדנִי, and with בִּי אַדנִי but without בִּי אָדנִי, in two subsections respectively.

## 3.1.5.2.1 Examples of נא in Combination with בי אַדני

Fassberg indicates that בָּא מְבְינִי occurs with בָּא almost always only in combination with some sort of modal expression. This is demonstrated in two examples.<sup>58</sup>

The first example displays בִּי אֲדֹנְי in introduction of direct speech initiated by a verb combined with אָלַח-נָא . The content of this verse is certainly a plea, and it is made by Moses to God. God demands that Moses go to speak before Pharaoh; Moses declines this mission, making a plea to God to send someone else.

Exod. 4:13—וֹיְאמֶר בִּי אֲדֹנִי שְׁלַח-נָא בְּיַד-תִּשְׁלְח-"But he said, '**Oh, my Lord**, send, **I pray**, some other person.'"

In the second example בֵּי אֲדוֹנְי again introduces direct speech, which also includes a verb, יָבוֹא, combined with the particle יָבוֹא. The speech is spoken by Manoah and addressed to God. The content of the speech is definitely a plea, as evinced by the use of the verb יַנְיעָהַר 'entreated'—at the beginning of the verse.

Judg. 13:8—הְיַלְּחְהָּ שְּׂלֶהִים אֲשֶׁר שְׁנֶּחְ הְּאֶלֶהים אֲשֶׁר הְעָּהְהְ נַיִּשְׁהַר בְּי אֲדוֹנְי אִישׁ הְאֱלֹהִים אֲשֶׁר שְׁנְעֵּה לַנַּעֵר הִיּוּלְּד "Then Manoah entreated the LORD, and said, 'O, LORD, I pray thee, let the man of God whom thou didst send come again to us, and teach us what we are to do with the boy that will be born." <sup>59</sup>

# 3.1.5.2.2 Examples of بِه in Combination with بِهِبْه

The two examples in this section comprise both אָנָא and אָנָא with and without the phrase בִּי אָדנִי.

In the first example the two words إلا and المجابة are reflected in the RSV translation, as well as in the JPS, al-kitāb al-muqaddas, and the Peshitta, by one translation only. This choice is probably due to the repetition in meaning implicit in the duplicate use of معابة and المجابة. Another choice, the omission of both particles, is made in all versions of Saadya Gaon's

<sup>&</sup>lt;sup>58</sup> Fassberg 1994:45–46.

 $<sup>^{59}</sup>$  More examples of this pattern are Gen. 44:18, Num. 12:11, and 1 Sam. 25:24–25. Also see Fassberg 1994:45.

Arabic translation and in the Geez translation. Onkelos shows a third preference, translating both אָנָא and אָנָא literally by a form of בע״ה and respectively.

Gen. 50:17—קּנָאָה אָנָא שָא נָא פֶּשַׁע אָחֶידְ וְחַפְאָתְם כִּי-רְעָה גְּמְלוּף אָנָא שָא נָא פָשַע אָחֶידְ וְחַפְאָתִם כִּי-רְעָה גְמְלוּף "Say to Joseph, Forgive, **I pray** you, the transgression of your brothers and their sin, because they did evil to you. And now, **we pray you**, forgive the transgression of the servants of the God of your father.' Joseph wept when they spoke to him."

The second example contains both אָנָא and אָנָא, and again only one translation for the two words appears in the RSV, the  $\mathcal{J}PS$ ,  $al\text{-}kit\bar{a}b$  al-muqaddas, and the Peshitta for similar reasons, while  $Targum\ \mathcal{J}onathan$  literally translates both by a form of בע״ה and בע״ה.

 $2~{
m Kgs.}~20:3~(=~{
m Isa.}~38:3)$ אָנָה ה' זְכָר-נָא אֵת אֲשֶׁר הְתְהַלַּכְתִּי לְּפָּנֶיךְ בָּאֱמֶת הְיְקִיְהוּ בְּכִי גָדוֹל (Remember now, **O LORD**, I beseech thee, how I have walked before thee in faithfulness and with a whole heart, and have done what is good in thy sight.' And Hezekiah wept bitterly."

#### 3.1.6 Address

The term address, also known as vocative, is here applied to the sentence part which mentions the addressee, usually a proper name or its substitute, that is, a personal pronoun, a title, a nickname, etc. Syntactically the address is external to the clause or phrase it precedes. It is usually, though not always, in initial position and it is frequently, yet not necessarily, followed by a reference to the addressee in the following clause or phrase. This external position imparts to the address a syntactic status similar to any other full parenthetical unit. More support for applying parenthetical status to the address arises from the fact that it does not depend syntactically on, and is not a complement of, any sentence part or the sentence as a whole.<sup>61</sup>

Where a certain reference to a previous address appears in the subsequent clause, the address might also be considered an extraposed

<sup>&</sup>lt;sup>60</sup> One more reference in Classical Biblical Hebrew is Exod. 32:31–32, and see other references in Late Biblical Hebrew in Fassberg 1994:44.

<sup>&</sup>lt;sup>61</sup> On the similarity between parenthetical clauses and vocatives and interjections regarding syntactic status and non-syntagmatic relations to their host clause, see Peterson 1999:231–232, §2.1.

part in a pattern of extraposition, which usually includes an anaphoric or cataphoric pronoun referring to the extraposed part. In general, parenthetical units and extraposed sentence parts share an equal external status as regards the clause to which they are adjacent. However, parenthetical units and extraposed sentence parts differ in the type of information they convey. Parenthetical units hold external information, which is marginal and outside the clause in which they appear; extraposed sentence parts play the crucial role of logical subject to which a complete clause refers as its logical predicate.

Addresses are very common in the Bible, and their structure is usually ordinary and unsophisticated. Any example of an address will do for explaining and demonstrating this construction, and only a few examples are presented. <sup>62</sup>

The first example displays the address אֲדֹנֶי הי in first position in direct speech, and it is followed by a reference to the addressee, which is implicit in the verb agreement pronoun.

Gen. 15:2—ניֹאבֶר אֲבְרָי בְּיִתְי בִּיתִי הֹי מַה-תִּתֶּן-לִי וְאָנֹבִי הוֹלֵךְ עֲרִירִי וְבֶּן-כְּשֶׁק בֵּיתִי But Abram said, 'O Lord GOD, what wilt thou give me, for I continue childless, and the heir of my house is Elie'zer of Damascus?'"

In the following example the address בְּרוּדְ is in second position in direct speech, following a verb in the imperative. It mediates between an anaphoric pronoun implicit in the agreement of the imperative form of the preceding verb בוֹא and a cataphoric pronoun implicit in the agreement of following prefix conjugation verb תַּעָמֹד.

Gen. 24:31—ניֹאמֶר בּוֹא בְּרוּךְ הִי לְמָה תַּעֲמֹד בַּחוּץ וְאָנֹכִי פִּנִיתִי הַבַּיִת וּמְקוֹם "He said, 'Come in, **O blessed of the LORD**; why do you stand outside? For I have prepared the house and a place for the camels.'"

The last example displays an address in the form of a proper name, חַּבָּה, set in initial position and introducing a direct speech. Again, an anaphoric reference occurs in the agreement pronouns of the subsequent verbs לְבָבֵּדְ, תִּבְּכִי, תִּבְּכִי, תִּבְבָּי.

<sup>&</sup>lt;sup>62</sup> I would like to thank Prof. Gideon Goldenberg who kindly indicated to me the necessity to include address in this discussion.

1 Sam. 1:8—ניֹאמֶר לָהְ אֶלְקְנָה אִישָׁהּ חַנָּה לְּמֶה תִּבְבִּי וְלְמֶה לֹא תֹאַבְלִי וְלְמֶה תַּבְּי וַלְּמֶה תַּבְּיִ וְלְמֶה לַּא תִּאַבְיִּ וְלְמֶה תַּבְּיִם (And Elkanah, her husband, said to her, '**Hannah**, why do you weep? And why do you not eat? And why is your heart sad? Am I not more to you than ten sons?'"

#### 3.2 Narrative Time Co-Ordinates

The foregoing three types of parenthetical and semi-parenthetical units, that is, epistemic modal adverbial (§3.1.4 above), appeal and plea (§3.1.5 above), and address (§3.1.6 above) were all related to direct speech. All the phrases discussed in this section appear in narrative They are particular syntagms which add external, marginal information to the story flow. The content concerns the time of an episode, and it is relevant to audience or readers in later periods. The best definition for these phrases is 'time co-ordinates.'63

Time co-ordinates might refer to points in time which are earlier or later than the time of the story, and they try to bridge the interval between the time a certain event or situation actually takes place or exists and the time the story is written, told, or edited. We should probably see these time co-ordinates not as integral spontaneous sentence components, which are part of a living fluid language, but as some sort of literary formulas, artificially and deliberately inserted into texts through later intervention of scribes, narrators, or editors. Still, from the syntactic and functional-pragmatic points of view both types, either certain words and phrases appearing in direct speech or narrative formulas, should be considered parenthetical, since they are unattached to the clause in which they appear both syntactically and contextually.

Syntagms of time co-ordinates also appear very frequently as part of larger narrative formulas, which take the form of clauses. These clause types are discussed above in §2.2, which conveys narrative formulas that form parenthetical clauses. Faxamples of all major types of time co-ordinate which exist in Biblical Hebrew, that is, מָּיָמִים יָמִימְה מָּרָה , מְּרָמִים יָמִימְה הָהוּא ,לְּפָנִים , מַרְ הַיּוֹם מִּרָּה , מַרְמִים יָמִימְה מָרָם , מַרְמָּה , are presented in separate sections below.

<sup>&</sup>lt;sup>63</sup> For the term 'time co-ordinates' see Lewis 1972:175–176, Brown & Yule 1983:40–41, §2.2.1, and §1.2 above.

<sup>&</sup>lt;sup>64</sup> On the role of these time co-ordinates in the biblical narrator's insertions in the text see Sternberg 1985:121.

## 3.2.1 The Phrases עַד הַיּוֹם הַזֶּה and עַד הַיּוֹם מַד מַל

The time formulas עֵד הַּיּוֹם מֵּד הַיּוֹם and עֵד הַיּוֹם often occur alongside explanatory narrative clauses introduced by לָבוֹ/עֵל-בֵּן. These extended types of narrative formula are discussed above in §2.2.1, and can be observed once more in examples Gen. 26:33, 32:33 below. As stated above regarding time co-ordinates in general, the phrases עֵד הַיּוֹם מֵלֶ are external to the content of the clause in which they appear, since they are mentioned by the scribe or the narrator in reference to a period later than that of the story line. They should generally be considered a scribe's or a narrator's later editorial insertion. <sup>65</sup>

The examples below are presented in two sub-sections, those with the longer formula עַד הַיּוֹם הַאָּה and those with shortened formula עַד הַיּוֹם הַאָּה. Bible translations might switch between the two. Examples of such exchanges are the Geez translation for Gen. 26:33 cited below, in which a short translation lacking a demonstrative pronoun han representation appears for the longer Hebrew formula עַד הַיִּוֹם הַאָּה for the shorter Hebrew formula עַד הַיִּוֹם הַאָּה in Gen. 19:37 below. Once, in Josh. 5:9 below, the Geez translation use two formulas for only one Hebrew formula, עֵד הַיִּוֹם הַאָּה ' יׁska yom wa-'ska zāti 'slat.

Another possibility is the rendering of both the short and the long formulas in one way. The *Peshitta*, for example, offers only one uniform translation for both the longer and the short Hebrew formulas: 
\[
\sigma \sigma \sigma \frac{damm\bar{a}}{2mm\bar{a}} = \text{"to our day."}\]

This translation refers to the scribe or the narrator by a 1st personal pronoun in plural attached to the time expression. This is an exceptional indication of the scribe or the narrator in the text itself and it provides the reader or the audience with external information referring to a later period which is additional to the time co-ordinate. As we will see in §3.2.1.1, traces of translations which contain a 1st personal pronoun occasionally appear in Saadya Gaon's translation of the Pentateuch as well.

As to syntax, though the position of the time co-ordinates discussed below is usually fixed, it might still change in Bible translation, for

<sup>&</sup>lt;sup>65</sup> Note de Regt's interpretation of the phrase עֵד הַּיִּוֹם הַזָּה in Deut. 10:6–9 as information given to the reader by a narrator (de Regt 1999:89, §3.5.1). See more information on this formula and its variants in Brin 2005, and also DeVries 1975:51, 151–154, who considers the role of these phrases as synchronism, sequence, and time-identification.

example, the *RSV* and *JPS* translations for Gen. 32:33 cited below, where the time co-ordinate moves from the end of the clause to a preverbal position. As we have stated many times, freedom of position of a phrase is typical of a full parenthesis.

## 3.2.1.1 Examples with הַוָּם הַוָּם מַּד הַיּוֹם

The usual Arabic translation of the time phrase עֵד הַּיּוֹם הָאָה, in Saadya Gaon's translation and in al-kitāb al-muqaddas, is אליום. Nevertheless, several occurrences of a different translation, אלי הד'א אליום ביי יומנא הד'א אליום מלי יומנא הד'א אליום מלי יומנא הד'א אליום מלי יומנא הד'א in Hasīd edition of Gen. 32:33 cited below and another for עֵד הַיּיֹם הַיָּה in Derenbourg edition, Ḥasīd edition and Ms. St. Petersburg for Deut. 3:14 cited below. As stated previously, the representation of the scribe or the narrator by the 1st personal pronoun in plural in a few examples of Saadya Gaon's translation of the Pentateuch probably follows the similar practice in the Peshitta, where אברא בראה ביים מל יום מעד הַיִּים הַּיָּה and עֵד הַיִּים הַיָּה are regularly translated by בראה ביים מעד הַיִּים מעד הַיִּים הַיָּה dammā la-yāwmānā = "to our day." Such a translation by the Peshitta exists for all examples in this section and the next.

The first example, Deut. 2:22, has the time co-ordinate עֵד הַּיִּים הַזָּה in a verse that is part of Moses' speech to the Israelites. Though this verse should be considered direct speech, the content is mostly a narrative about earlier historical events. This particular verse refers to an earlier episode describing the fate of the Horites and its consequences for the sons of Esau. The phrase עֵד הַיִּיֹם הַזָּה appears here in final position, the most common with this phrase.

Deut. 2:22—יְבְּשֵׁר אֶשֶׁר הָשְׁמִיד אֶּשֶׁר הְשְׁמִיד אֶּשֶׁר הִישְׁבִּים בְּשֵׁעִיר אֲשֶׁר הִשְׁמִד אֶּת-הַחֹרִי א היִּשְׁבוּ הַיִּיִם הַיִּר הַיּוֹם הַאָּה "As he did for the sons of Esau, who live in Seir, when he destroyed the Horites before them, and they dispossessed them, and settled in their stead **even to this day**."

The next example, Josh. 4:9, should probably be understood as offering a historical explanation for a construction of twelve stones still extant in the time of the narrator or scribe. Again, the phrase עֵד הַיִּיֹם הַאָּה appears in final position.

Josh. 4:9—נְּיִם עֶשְׂרֵה אֲבָנִים הַקִּים יְהוֹשֻׁעַ בְּתוֹךְ הַיִּרְדֵּן תַּחַת מַצַב רַגְלֵי הַכֹּהְנִים יוּשְׁעַ בְּתוֹךְ הַיִּרִם הָּזָה 'And Joshua set up twelve stones in

the midst of the Jordan, in the place where the feet of the priests bearing the ark of the covenant had stood; and they are there **to this day**."

The following example tells us that Rahab was allowed to live among the Israelites as a reward for aiding the Israelite spies in Jericho. The time co-ordinate עַד הַּיּוֹם הַנֶּה states that her life among the Israelites has continued to the time of the scribe or narrator. Again, עַד הַיּוֹם הַנֶּה הַיִּוֹם הַנֶּה בַּקְרֵב in should be regarded as standing in final position, because it appears at the end of the main clause וַהַּשֵּׁב בְּקֵרֵב יִשִׂרָאֵל.

Josh. 6:25— נְאָשֶׁר-רָחְב הַזּוֹנְה וְאֶת-בֵּית אָבִיהְ וְאֶת-כָּל-אֲשֶׁר-לָה הֶחֱיָה יְהוֹשֻׁעַ וַתַּשֶׁב לְרַגֵּל בְּעַר הַיּוֹם הַזָּה כִּי הֶחְבִּיאָה אֶת-הַמַּלְאָבִים אֲשֶׁר-שָׁלַח יְהוֹשֻׁעַ לְרַגֵּל בְּעַר הַיּוֹם הַזָּה כִּי הֶחְבִּיאָה אֶת-הַמַּלְאָבִים אֲשֶׁר-שָׁלַח יְהוֹשֻׁעַ לְרַגֵּל בְּעָר יִשְׂרָאֵל עַר הַיּוֹם הַזָּה כִּי הֶחְבִּיאָה אֶת-הַמַּלְאָבִים אֲשֶׁר-שְׁלַח "But Rahab the harlot, and her father's household, and all who belonged to her, Joshua saved alive; and she dwelt in Israel **to this day**, because she hid the messengers whom Joshua sent to spy out Jericho."

The following verse is a narrative telling us about an earlier event, the conquest of Ai. The phrase עַד הַּיִּוֹם הַיָּה here relates to a certain ruin, where Ai supposedly stood, which the narrator or scribe interpret as the remains of that conquest and which still exists in his own day. Here too עַּד הַיִּוֹם הַיָּה is in final position.

Josh. 8:28—נְיִשְׂרֹף יְהוֹשֻׁעַ אֶת-הְעָי נַיְשִׂימֶהְ תֵּל-עוֹלְם שְׁמְמְה עֵד הַיּוֹם הַגָּה—"So Joshua burned Ai, and made it for ever a heap of ruins, as it is **to this day**."

Next, 2 Kgs. 16:6 is again a narrative. It probably tells us about the settling in Elath in southern Israel of Edomites, not Arameans, according to conventional emendation, also reflected in the RSV. עַד הַּיִּוֹם הַזֶּה connects this settling to the period of the scribe or narrator. The whole verse should in fact be considered a historical explanation for Edomites inhabiting Elath in his day.

2 Kgs. 16:6—בְּעֵת הַהִּיא הֶשְׁיב רְצִין מֶלֶּדְ-אֲרָם אֶת-אֵילַת לַאֲרָם וַוְנַשֵּׁל אֶת-הַיְהוּדִים מֶלֶּד-אֲרָם בָּאוּ הַּיִּוֹם הַיָּה בּיִּוֹם הַיָּה בּיִּוֹם הַיָּה בּיִּוֹם הַיָּה בּיִּוֹם הַיָּה בּיִּוֹם הַיָּה בּיִּוֹם הַיִּה בּאוּ אֵילַת וַיֵּשְׁבוּ שָׁם עַּד הַיּוֹם הַיָּה בּיוֹם הַיָּה "At that time the king of Edom recovered Elath for Edom, and drove the men of Judah from Elath; and the Edomites came to Elath, where they dwell to this day."

The formula עֵד הַּיֹּּוֹם הַאָּה might also appear in connection with a description and an explanation of an ancient custom practiced uninterruptedly up to the time of the scribe or narrator. Such customs feature in the next two examples, Gen. 32:33 and 1 Sam. 5:5. These were previously

discussed in §2.3.5 above on historical comments, and are cited here again due to the appearance of עד הַיּוֹם הָזֶה in them.

Gen. 32:33 following describes a custom related to food restrictions. Note that both the RSV and the  $\mathcal{J}PS$  translations change the position of the time-coordinate עָד הַּיִּוֹם הַּיָּה. The RSV changes it from final to initial position, "Therefore to this day...," and the  $\mathcal{J}PS$  changes it to middle position, "That is why the children of Israel to this day...." These changes are significant since, as frequently noted, freedom of position of a phrase is typical of full parenthesis.

Gen. 32:33—עַל-כֵּן לֹּא-יֹאכְלוּ בְּנֵי-יִשְׂרָאֵל אֶת-גִּיד הַנְּשֶׁה אֲשֶׁר עַל-כֵּן לֹא-יֹאכְלוּ בְנֵי-יִשְׂרָאֵל אֶת-גִּיד הַנְּשֶׁה הַיֹּוֹם הַיָּה בִּי נְגַע בְּכַף-יֶרֶךְ יַעֲקֹב בְּגִיד הַנְּשֶׁה "Therefore to this day the Israelites do not eat the sinew of the hip which is upon the hollow of the thigh, because he touched the hollow of Jacob's thigh on the sinew of the hip."

The next example is a conclusion of a historical explanation for a certain practice in a holy place, in this case the house of Dagon, which is familiar up to the time of the scribe or narrator. The phrase עֵד הַיּוֹם is again set in final position.

 $1~\mathrm{Sam}.~5:5$ על-בֵּן לֹא-יִדְרְכּוּ כֹהֲנֵי דְגוֹן וְכָל-הַבָּאִים בֵּית-דְּגוֹן עַל-מִפְתַּן דְּגוֹן בָּל-הַבָּאִים הַיָּים הַיָּה "This is why the priests of Dagon and all who enter the house of Dagon do not tread on the threshold of Dagon in Ashdod to this day."

As is clear from the next examples, עֵד הַּיּוֹם הָזֶה often appears in connection with explanations provided for place names or proper names. The four examples below, Gen. 26:33, Deut. 3:14, Josh. 5:9, and 2 Sam. 6:8, all indicate place names. Another example, Gen. 19:37, presented in the next sub-section, because it contains the shortened syntagm עֵד , refers to a personal name. In all these examples the phrase עַד appears in final position.

Gen. 26:33 below is an explanation of the place name Beer-sheba, so known up to the time of the scribe or narrator.

Gen. 26:33—הַּיָּחְ שַׁבְע עַד הַיּוֹם הַּיָּה שָׁבְעָה עַל-כֵּן שֵׁם-הְעִיר בְּאֵר שֶׁבַע עַד הַיּוֹם הַּיָּה "He called it Shibah; therefore the name of the city is Beer-sheba **to this day**."

The next example explains the place name Havvoth-jair.

Deut. 3:14—יְאִיר בֶּן-מְנַשֶּׁה לָקַח אֶת-בָּל-חֶבֶל אַרְגב עֵד-גְבוּל הַגְּשׁוּרִי וְהַמַּעֲכְתִי יַּיְקְרָא אֹתְם עַל-שְׁמוֹ אֶת-הַבְּשָׁן חַוּת יְאִיר עַד הַיּוֹם הַזֶּה "Jair the Manassite took all the region of Argob, that is, Bashan, as far as the border of the Geshurites and the Ma-acathites, and called the villages after his own name, Havvoth-jair, as it is **to this day**."

The third example is an explanation for the place name Gilgal.

Josh. 5:9—ניאמֶר ה' אֶל-יְהוֹשֶׁע הַיּוֹם גַּלּוֹתִי אֶת-חֶרְפַּת מִצְרֵים מֵעֲלֵיכֶם וַיְּקְרָא שֵׁם הַּיּוֹם גַּלּוֹתִי אֶת-חֶרְפַּת מִצְרֵים מֵעֲלֵיכֶם וַיִּקְרָא שֵׁם הַּיּוֹם הַּיִּוֹם הַּיִּוֹם הַּיִּוֹם הַּיִּוֹם הַּיִּוֹם הַּיִּוֹם הַיִּוֹם הַיִּיוֹם הַיִּוֹם הַיִּוֹם הַיִּוֹם הַיִּוֹם הַיִּיוֹם הַיִּבְּיוֹם בּיִּלִּים וַיִּיְרָא שִׁר היוֹשְׁעַ הִיוֹם הַיִּיוֹם הַיִּעְּיִּוֹם הַּוֹּחִים הַּיִּים הַּתְּיִים הַיִּעְיִים בְּיִּבְּיִּם הַיִּיִּהוֹים הַיִּיוֹם הַּיִּים הַיִּיְם הַיִּבְּיִים בְּיִיוֹם הַיִּים הַיִּיוֹם הַיִּים הַיִּיוֹם הַיִּים הַיִּים הַיִּיוֹם הַיִּיוֹם הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַּיִים הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַּיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַיִּים הַּיְיִים בּיוֹים הַיִּים הַיְיִים בְּיִים בְּיִים בּיִים הַיִּים בּיִּים בּיִים הַיִּים הַיְיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִיבְּיִים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִים בְּיִיבְּים בְּיבְּים בְּיִיבְּים בְּיִיבְּים בְּיִים בְּיִּים בְּיִים בְּיִים בְּיוֹבְּים בְּיִים בְּיִים בְּיוֹבְּיבְּים בְּיוֹבְּים בְּיוֹבְיבְּים בְּיוֹבְּים בְּיוֹם בְּיוֹם בְּיוֹבְּים בְּיוֹבְּיבְּים בְּיוֹבְּים בְּיוֹבְּים בְּיוֹבְיבְּים בְּיוֹבְיבְּים בְּיוֹבְיבְים בְּיוֹבְיבְּים בְּיבְּיבְּים בְּיִיבְּים בְּיבְּיבְּים בְּיְב

Finally, in 2 Sam. 6:8 the place name in question is Perez-uzzah.

2 Sam. 6:8—אָשֶׁר פֶּרֶץ בְּעֻזְּה וַיִּקְרָא לַמְּקוֹם הַהוּא פֶּרֶץ הְיֹ פֶּרֶץ הֹי פֶּרֶץ בְּעֻזְּה וַיִּקְרָא לַמְּקוֹם הַהוּא פֶּרֶץ בְּעָזְה וַיִּקְרָא לַקְּקוֹם הַהוּא בּרָץ היוֹם הַנָּה "And David was angry because the LORD had broken forth upon Uzzah; and that place is called Perez-uzzah, to this day."

## 3.2.1.2 Examples with עד היום

עד הַיּוֹם מֵד הַיּוֹם is a much less common phrase than עֵד הַיּוֹם הַזֶּה. This short formula appears four time in our corpus of Classical Hebrew prose, in Gen. 19:37,38, 35:20, 2 Kgs. 10:27, out of eight in the whole Bible. The longer formula appears more than 80 times in the whole Bible, of which over 60 are in our corpus. Therefore, עֵד הַיִּיֹם הַיָּה is demonstrated below only by two examples, and they are similar in context and structure to the longer formula בְּיִר הַיִּיֹם הָיָּה הַּיִּים הַיָּה בַּיִּים הַיָּה בַּיִּים הַיָּה בַּיִּים הַיָּה בּיִּים בַּיִּים בַּיִּה בּיִּים בַּיִּה בַּיִּים בַּיִּה בַּיִּים בַּיִּה בַּיִּה בַּיִּים בַּיִּה בּיִים בַּיִּה בַּיִּים בַּיִּה בַּיִּים בַּיִּה בּיִּים בַּיִּה בַּיִּים בַּיִּה בַּיִּה בַּיִּים בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּים בַּיִּה בַּיִים בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּים בַּיִּה בַּיִים בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּה בַּיִּים בַּיְּה בַּיִּה בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּיִים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִים בַּיִים בַּיִים בַּיִים בַּיִּים בַּיִּים בַּיִּים בַּיִּיּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בַּיִּים בְּיּים בַּיּים בַּיּיּים בַּיּיִים בְּיִים בְּיִּים בְּיּיִים בְּיִים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִּים בְּיִים בְּיִּים בְּיִים בְּיִים בְּיִּים בְּיִּים בְּיִים בְּיִים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִּים בְּיִים בְּיִים בְּיִים בְּיִים בְּיִּים בְּיִים בְּיִים בְּיִים בְּיִים

The first example, Gen. 19:37, refers to a proper name, Moab, and to its relevance in the days of the scribe or narrator.

Gen. 19:37—וַתֵּלֶד הַבְּכִירָה בֵּן וַתִּקְרָא שְׁמוֹ מוֹאָב הוּא אֲבִי-מוֹאָב עַד הַיּוֹם—"The first-born bore a son, and called his name Moab; he is the father of the Moabites **to this day**."

The second example, 2 Kgs. 10:27, refers to the fate of the house of Baal, and its state up to the days of the narrator or scribe.

 $2~{
m Kgs.}$  10:27—וַּיְמְצוֹ אַת הַבְּעַל וַיְּמְצוֹ אֶת-בֵּית הַבָּעַל וַיְשִׁמְהוּ לְמַחְרָאוֹת עַד הַּיּוֹם (יִיּהְצוּ אֶת-בִּית הַבְּעַל וַיְשִּמְהוּ לְמוֹצְאוֹת עַד הַיּוֹם "And they demolished the pillar of Baal, and demolished the house of Baal, and made it a latrine to this day."

<sup>&</sup>lt;sup>66</sup> The formulas עֵד-הַּיִּוֹם הַאָּה and עֵד הַיִּיֹם מַזָּה are widespread. Other examples are Gen. 19:38, 32:33, Deut. 10:8, 34:5, Josh. 7:26, 8:29, 13:13, 14:13, Judg. 1:26, 15:19, 1 Sam. 6:18, 2 Sam. 18:18, 1 Kgs. 10:12, 12:19, 2 Kgs. 8:22, and many more exist.

## 3.2.2 The Phrase לְפַנִים

The prepositional phrase לְּבָּנִים is another type of Biblical Hebrew time co-ordinate. In biblical texts the phrase occurs 20 times, 13 of them in Classical Hebrew prose: Deut. 2:10,12,20, Josh. 11:10, 14:15, 15:15, Judg. 1:10,11,23, 3:2, 1 Sam. 9:9 (twice), and Ruth 4:7. Contrary to the time co-ordinates discussed previously, יְּפָנִים refers to a period not later but earlier than the era of the scribe or narrator. Mostly these examples refer to the earlier existence of a certain people (Deut. 2:10,12,20) or an earlier place name (Josh. 11:10 conveys information about a certain place and Josh. 14:15, 15:15, Judg. 1:10,11,23 refer to more ancient place names).

Since these examples convey historical notes, several are indicated in the appropriate section, §2.3.5 above. In syntax, לְּפָנִים and the whole clause containing this phrase should in fact be regarded as parenthetical. Following are three typical examples of לְּפָנִים. One indicates a certain people (Deut. 2:12 below), the next indicates a certain place name (Josh. 14:14 below), and the third adds information about a place name (Josh. 11:10 below). This third example, Josh. 11:10, refers to the status of a certain city in ancient times.

Two other examples which contain this time phrase are 1 Sam. 9:9, which refers to an ancient term, בִּי לַנְבִיא הַיּוֹם יִקְּרֵא לְפָנִים הָרֹאֶה. Since the whole clause, not just its time co-ordinate, should be treated as a parenthetical historical note, it is discussed only in the appropriate section, §2.3.5 above. A further example with such a time phrase is Ruth 4:7, and it deals with an ancient practice, וְּעֵל-הַגְּאוֹלְה לְעֵל-הַגְּאוֹלְה לְפָנִים בְּיִשְׂרָאֵל עַל-הַגְּאוֹלְה לְפֵנִים בְּיִשְׂרָאֵל וְנְתוֹן לְרֵעַהוּ This example too contains a complete clause, not only a time co-ordinate, that should be considered parenthetical, so it too is discussed in §2.3.5 above.

All the examples cited here are part of the narrative, and accordingly can be regarded as a later scribe's or narrator's insertion into the text of some marginal information on ancient times. This narrative's use of some marginal information on ancient times. This narrative's use of the editing contrasts with the use of this adverb in discourse, for instance, in Ps. 102:26—קֹנְיָם הָאָרֶץ יָסְדְתָּ וּמַעֲשֵׁה יְדֵיף "Of old thou didst lay the foundation of the earth, and the heavens are the work of thy hands," where לְּפָנִים some arctical adverb. 67

<sup>&</sup>lt;sup>67</sup> Regular use of a similar temporal adverb is attested in the Akkadian dialect of the El-Amarna letters, which was heavily influenced by Canaanite. The temporal adverb

לְּבָּנִים is found in all possible syntactic positions, initial, middle, and final, and thus enjoying completely free word order, as expected from a parenthetical unit. Examples are as follows. $^{68}$ 

The first example is information regarding a certain people, the Horites. The content of this verse is similar to Deut. 2:22—מָּבְשָׁר עָשָׁה עָשָׁה מְּשָׁבוּ תַחְהָם לְּבְּנֵי עָשָׁוֹ הַיִּשְׁבוּ תַחְהָם לְּבְּנֵי עַשָּׁוֹ הַיִּשְׁבוּ תַחְהָם לְּבְּנֵי עַשְּׁוֹ הַיִּשְׁבוּ תַחְהָם הַּאָּה הַשְׁבִים בְּשַׁעִיר אֲשֶׁר הִשְׁבִים הָּאָה "As he did for the sons of Esau, who live in Seir, when he destroyed the Horites before them, and they dispossessed them, and settled in their stead even to this day." This verse is discussed in §3.2.1.1 above because it contains the phrase עַּד הַיּוֹם הַאָּב. As to word order, וּבְשֵּעִיר יַשְׁבוּ הַחֹרִים בּוֹאָב. is in final position following the clause וּבְּשַׁבוּ הַחֹרִים.

Deut. 2:12—מְבְּנִים נְשְׁבִי נִישְׁבוּ הַחֹרִים לְּפָּנִים וּבְנֵי עֵשְוֹ יִירְשׁוּם וַיַּשְׁמִידּוּם מִפְּנֵיקּם לְפָּנִים וּבְנֵי עֵשְוֹ יִירְשׁוּם וַיַּשְׁמִידוּם מִפְּנֵיקּם בְּאֲשֶׁר נְעִשְׁה יִשְׁרָאֵל לְאֶרֶץ יְרָשְׁתוֹ אֲשֶׁר-נְתַן הֹ׳ לָהֶם "The Horites also lived in Seir **formerly**, but the sons of Esau dispossessed them, and destroyed them from before them, and settled in their stead; as Israel did to the land of their possession, which the LORD gave to them."<sup>69</sup>

Of the Arabic translations examined for Deut. 2:12, only al-kitāb al-muqaddas translates the adverbial prepositional phrase לְּפָנִים by the independent adverbial form בֹּיל . This translation also appears in the following verses from Joshua. By contrast, all versions of Saadya Gaon's translation, available only for the verse from Deuteronomy, change the verse's syntactic structure entirely, using an extraposition in which the adverbial prepositional phrase לְפָנִים introduces another noun: ואמא פי וואמא פי עשר.

The second example connects a later place name to its earlier name. לְּפָנִים is set in this example in middle position, between the subject, וְשֵׁם, and predicate, הֶּרְיַת אַרְבַּע, of a nominal clause.

Josh. 14:14—יְשָׁקְעָם הוּא וְהְאָרֶט הְּגְּדוֹל בְּעֲנָקִים הוּא וְהְאָרֶט קרְיֵת אַרְבַּע הְאָדָם הַגְּדוֹל בְּעֲנָקִים הוּא וְהְאָרֶע הַמְּלְחְמְה מִמְּלְחְמְה "Now the name of Hebron **formerly** was Kiriath-arba; this Arba was the greatest man among the Anakim. And the land had rest from war."

The last example indicates the status of the city Hazor in ancient times. It is cited here because of the phrase לְּפָנִים, though in fact the whole

pānānu(m) is found in several examples of this dialect in direct speech. For explanation and examples see Rainey 1996 III:123–126.

<sup>68</sup> Also see Brin 1986:53-54, 1995:7-15.

<sup>&</sup>lt;sup>69</sup> More examples are Deut. 2:10 and Deut. 2:20.

<sup>&</sup>lt;sup>70</sup> More examples are Josh. 15:14, Judg. 1:10,11,23.

clause, בִּי-חָצוֹר לְפָנִים הִיא רֹאשׁ בְּל-הַמַּמְלְכוֹת הְאֵלֶה, should be considered a parenthetical historical comment indicating the grounds for Joshua's treatment of Hazor. The phrase לְפָנִים appears here again in middle position, between a subject of a nominal clause, חָצוֹר, and its predicate, הִיא רֹאשׁ בּל-הַמּמלֹכוֹת הַאַלֹה.

Josh. 11:10—נְיִשְׁב יְהוֹשֻׁעַ בְּעֵת הַהִּיא וַיִּלְכֹּד אֶת-חְצוֹר וְאֶת-מְלְכָּה הִבָּה בְּחְרֶב בְּחְרֶב יְהוֹשֻׁעַ בְּעֵת הַהִּיא וַיִּלְכֹּד אֶת-חְצוֹר וְאֶבֶּה הִיּא רֹאשׁ בְּל-הַמַּמְלְכוֹת הָאֵלֶּה "And Joshua turned back at that time, and took Hazor, and smote its king with the sword; for Hazor formerly was the head of all those kingdoms."

Since all the three examples in this section present only middle and final position of לְפָנִים, we should note that initial position also occurs once, in 1 Sam. 9:9: "לְפָנִים בִּישֶׁרָאֵל..." Formerly in Israel...."

## 3.2.3 The Phrases בַּיָּמִים הָהֶם and בַּיִּמֹם הָהוֹא

The basic meanings of the phrase בּיִּיֹם מחל its plural form הְהֵם אָהָם, when referring to the past, are 'that/those day/days,' 'on that/ those day/days,' and 'then'. This phrase is very common in Biblical Hebrew, with over 200 occurrences. Some refer to the past, others to the future, the latter mainly in the prophetic books. Mostly the occurrences are not an external scribe's or narrator's comment, but function as time co-ordinates within the sequence of the story. Nevertheless, in some examples referring to the past these time co-ordinates seem to have been inserted into the story later, to bridge the gap between the scribe's or narrator's time and the time of the event. Such examples belong here, and several are demonstrated below.<sup>71</sup>

In all these examples the time co-ordinates בַּיִּמִים הָהֵם and בַּיִּמִים הָהֵם appear in narrative, at the end of a story and playing a part in its conclusion. However, in syntactic word order בַּיִּמִים הָהֵם and בַּיִּמִים הָהָם may appear in initial, middle, and in final position in a clause. They thus display freedom of word order, typical of parenthetical units.

<sup>&</sup>lt;sup>71</sup> For more information on the role of these time expressions see Brin 1986:50–52, and also DeVries 1975:51–52, 57–136, who considers this phrase part of a gloss, an incorporated supplement, a concluding formula, a transitional formula between episodes, and a narrative element in non-narrative pericopes. Especially note DeVries' assertion that "...there are a considerable number of occurrences in the narrative literature of the Old Testament, almost always referring to events that are past from the point of view of the speaker or writer" (DeVries 1975:57).

The first example, Gen. 15:18, concludes the event of the making of a covenant between God and Abram. By using the phrase בַּיִּים הַהוּא the scribe or narrator clearly refers to this event as occurring at a point in time earlier than his own. בְּיִּים הַהוּא appears in initial position.

Gen. 15:18—נְּיִתְ הָּאֶרֶץ הָּתְהִי אֶת-הְאָבֶרְם בְּרִית לֵאמֹר לְּזִרְעֲךְ נְתַתִּי אֶת-הְאָרֶץ הַהְּאַרֶץ הָהָר הָּגְּדֹל נְהַר-פְּרָת "On that day the LORD made a covenant with Abram, saying, 'To your descendants I give this land, from the river of Egypt to the great river, the river Euphrates'."  $^{72}$ 

The next example, Exod. 14:30, concludes the story of the Exodus of the Israelites from Egypt through the Red Sea. Again, the phrase בֵּיוֹם points to the earlier time of the event. Its position here is in the middle of the clause, between the verb and its subject, וְיוֹשֵׁע הֹי, and the objects, אֵת-יִשְׁרָאֵל מִיַּד מְאַרָיִם.

Exod. 14:30בּיוֹם הַהוּא אֶת-מְצְרֵיִם וַיִּרְא יִשְׂרָאֵל מִיַּד מִצְרִיִם הַהוּא הַ הַּהוּא הַ הַּוּשׁע ה' נִיִּלְשׁעָת מִיַּד מִצְרִיִם וַיִּרְא יִשְׂרָאֵל אֶת-מִּעְרִים הַּיִּם "Thus the LORD saved Israel **that day** from the hand of the Egyptians; and Israel saw the Egyptians dead upon the seashore."

The following example, Deut. 31:21, concludes the era of Moses as the leader of the Israelites by his writing and teaching them whatever they need to know after his imminent death. The phrase again refers to an earlier point in time. The position of this phrase in the clause is final, since it appears at the end of the clause אַת-הַשִּירָה הַזֹּאַת.

Deut. 31:21—נַיִּבְתִּבׁ מֹשֶׁה אֶת-הַשִּׁירָה הַוֹּאת בַּיּוֹם הַהוּא וַיְלַמְּדָהּ אֶת-בְּגֵי "So Moses wrote this song **the same day**, and taught it to the people of Israel."<sup>74</sup>

The next verse refers to a covenant made by Joshua and the Israelites at the end of the era of his leadership. בַּיוֹם הַהוּא indicates once more an earlier point in time. Its position is final, at the end of the clause וַיַּבְרֹת יְהוֹשֶׁעַ בְּרִית לְעָם.

 $<sup>^{72}</sup>$  DeVries considers this use not as a synchronism but as emphatically indicating a unique moment in Abram's life (DeVries 1975:73–74).

DeVries connects this verse to a cultic celebration of the event (DeVries 1975:75).
 Note DeVries' assertion that "bayyôm hahû' stands here as a highly artificial syn-

chronism, connecting the secondary command to write the song with the speaking of it" (DeVries 1975:69).

Josh. 24:24—בּיִרת יְהוֹשֶׁעַ בְּרִית לְעָם בִּיּוֹם הַהּוּא וַיְשֶׁם לוֹ חק וּמְשְׁפְּט בִּשְׁכֵם –"So Joshua made a covenant with the people **that day**, and made statutes and ordinances for them at Shechem."<sup>75</sup>

The last example, which also consists of the phrase בַּיּוֹם הָהוֹא, concludes the event of the Israelites' victory in the battle against Jabin the king of Canaan, in this case with a poem. Again, בַּיּוֹם הַהוֹא refers to an earlier point in time. The phrase should be regarded as set in the middle of the clause: although it is at the end of the clause בַּיִּנְעָם בָּן-אֲבִינַעָם, it still mediates between this clause and the direct speech introductory particle אֵלְאמֹר which belongs to it, hence its middle position.

Judg. 5:1—וַתְּשַׁר דְּבוֹרָה וּבְרָק בֶּּן-אֲבִינעֵם בַּיּוֹם הַהוּא לֵאמֹר "Then sang Deborah and Barak the son of Abinoam **on that day**."<sup>76</sup>

The last example in this section displays the plural form of this time co-ordinate בַּיִּמִים הָהֵם, namely בַּיִּמִים הָהֵם. This time coordinate is not a concluding remark but introduces the wars between the Israelites and the Arameans. Still, בַּיָּמִים הָהֵם, like בַּיִּמִים הָהַבּ, refers to a point in time earlier than the time of the scribe or narrator. It is in initial position here.

2 Kgs. 10:32—אָבָוּל בְּכְל-גְּבוּל בַּיָמִים הָחֵל ה׳ לְקצוֹת בְּיִשְׂרָאֵל וַיַּכֵּם חֲזָאֵל בְּכְל-גְּבוּל "In those days the LORD began to cut off parts of Israel. Hazael defeated them throughout the territory of Israel."

## 3.2.4 The Phrase בַּעֵת הַהִיא

is another time co-ordinate which might be used in Biblical Hebrew as a scribe's or narrator's insertion referring to an earlier period. This phrase was previously mentioned in §2.3.1 above on background information, where it is noted that it should be regarded as a scribe's or narrator's external remark introduced into the text later. All three examples of בְּעֵת הַהִּיא below appear in narrative, and the phrase is in various positions: initial in 2 Kgs. 16:6 and Judg. 14:4, middle in 1 Kgs. 8:65.

<sup>&</sup>lt;sup>75</sup> DeVries regards this use as a "formal conclusion to the covenant narrative itself" (DeVries 1975:76–77).

<sup>&</sup>lt;sup>76</sup> Note DeVries' observation about this phrase: "The introductory verse of Judges 5, containing the phrase under study, is clearly recognizable as an editorial device for connecting two originally independent sources of tradition concerning the battle at Kishon. Here bayyôm hahû' functions as an artificial synchronism between the two reports" (DeVries 1975:63). DeVries clearly considers this use an editorial insertion into the text.

The following example, 2 Kgs. 16:6, is also cited above (in §3.2.1.1) since it contains the time co-ordinate עֵד הַיּוֹם הַאָה alongside בְּּבֶעת הַהִּיא vhile עֵד הַיּוֹם הַאָּה relates to the time of the scribe or narrator, בְּעֵת הַהִּיא refers to an earlier time. בְּעֵת הַהִּיא is in initial position in this example.

2 Kgs. 16:6—בְּאָרֶם וְיַנְשֵׁל אֶת-הַיְהוּדִים הָאֶרֶם בֶּאֶרֶם נְיַנְשֵׁל אֶת-הַיְהוּדִים הָאֶרָם בָּאָרָם הַאָּרָם הַאָּרָם בַּאוּ הֵיִּים הַאָּר בִּייִם הַאָּר בִּייִם הַאָּר בּיִים בּאַר בּיִים בּאָר בּיִים בּאָר בּיִים בּאָר בּיִים בּאַר בּיים בּאַר בּיִים בּאַר בּיִים בּאַר בּיִים בּאַבּע בּיִים בּאָר בּיִים בּאָב בּאַר בּיִים בּאָב בּאַר בּיִים בּאַר בּיִים בּאָּב בּאַר בּיִים בּאָב בּיִים בּאָב בּיִים בּאָּב בּאַר בּיִּים בּאַר בּיים בּאַר בּיים בּאַר בּיים בּאַר בּיים בּאַר בּיים בּאַר בּיים בּאָב בּיים בּאַר בּיים בּיים בּיים בּיִּבּים בּיים בּיבּים בּיבּים בּיים בּיבּים בּיבּים בּיים בּיים בּיים בּיים בּיים בּיים בּיבּים בּיים בּיים בּיי

is in initial position in the following example too, where it refers again to a time earlier than that of the narrator or the scribe.

Judg. 14:4—וְאָמוֹ לֹא יָדְעוּ כִּי מֵה' הִיא כִּי-תְאֲנָה הוּא-מְבַקֵּשׁ מְפְּלְשְׁתִּים "His father and mother did not know that it was from the LORD; for he was seeking an occasion against the Philistines. At that time the Philistines had dominion over Israel."

In the last example the phrase בְּעֵת הַהִּיא appears after a previous verse, 1 Kgs. 8:64, which refers to events connected to the dedication of the temple to God and contains the phrase בַּיוֹם הַהוּא. Other examples are in Jer. 33:15, 50:4,20, where both בְּיוֹם and plural variants of בַּיוֹם appear side by side, though in a context of prophecies referring to future events, not the past. This time בְּעֵת הַהִּיֹא is in middle position, between the predicate and the subject, וַיַּעֵשׁ שְׁלֹמֹה, and a following object אָּת-הָחָג.

1 Kgs. 8:65—נַיַּעֵשׁ שְׁלֹמֹה בָּעֵח הַהִּיֹא אֶת-הֶחְג וְּכְל-יִשְׂרְאֵל עִמוֹ קְהָל גְּדוֹל מִלְּבוֹא הָיִא אֶת-הָחָג וְכְּל-יִשְׂרְאֵל עִמוֹ קְהָל גְּדוֹל מִלְּבוֹא עָשֶׂר עָשֶׂר הָמִים לְּבְּנֵי ה' אֱלֹהֵינוּ שָּבְעַת יָמִים וְשִׁבְעַת יָמִים אַרְבָּעָה עָשֶׂר "So Solomon held the feast **at that time**, and all Israel with him, a great assembly, from the entrance of Hamath to the Brook of Egypt, before the LORD our God, seven days."

# 3.2.5 The Phrase מָיָמִים יָמִימָה

The basic meaning of the phrase מִּמְיִם יָמִים is 'year by year'/'every year'/'annually'. Accordingly, it occurs with habitual repeated practices.

 $<sup>^{77}</sup>$  On the role of such phrases in indicating synchronicity, see Talmon 1978:11. Talmon actually employs the term 'synchroneity,' which refers, according to him, to "in-between situations" (Talmon 1978:17). For more information on the role of this time expression see Brin 1986:47–50.

Still, this phrase is not always a time co-ordinate inserted by a later scribe or narrator in reference to practices known to him as recurring every year in a certain period, and even up to his own day. It might also appear in regular discourse indicating routine practices contemporaneous with the story time. One such case is Exod. 13:10—חָהָּתְּהָתְּ אֶתְרַהְּ מִיְמִים יְמִימְהַ הִיּמְיִם יְמִימְה הְיִּמְיִם יְמִימְה מִיּמִים יְמִימְה מִּמְיִם יְמִימְה הַשְּׁמִר לֹמִיְעַרְה הַשְּׁמִים יְמִימְה הַשְּׁמִר הְנִּבְּה הְיִמִים יְמִימְה הַשְּׁמִר מְבִּית-אֵל שְׁבָּהְה הַשְּׁמְה הְעֹלְה מְבִית-אֵל שְׁבָּהְ לְבִית-אֵל שְׁבָּמְה הַעָּבְּה הְעַּבְּה לְבִית-אֵל שְׁבָּמְה הַעָּבְּה הְעַּבְּה לְבִית-אֵל שְׁבָּמְה הַעַּבְּה לְבִית-אֵל מְזְרְחָה הַשְּׁמֶשׁ לְמְסִלְּה הְעִלְּה מְבִּית-אֵל שְׁבָּבְּה לְבִית-אֵל מְזְרְחָה הַשְּׁמֶשׁ לִמְסְלָּה הְעִלְּה מְבִּית-אֵל לְבִּוֹרְה הַשְּׁמָשׁ לִמְסְלָּה הְעַלְּה מִבְּית-אֵל לְבִּוֹרְה לִבְּיִבְּה הַשְּׁמָשׁ לִמְסְלָּה הְעַלְּה מִבְּית-אֵל לְבִּוֹרְה הַשְּׁבְּעַר לְבְּבוֹרְה הַשְּבְּב לְלְבוֹרְה בּאַל מוּבְר לְבִית-אֵל מוּב לֹבוֹרְה מִבְּפוֹנְה לוּב בּאַל מוּב לּבוֹרְה מִבְּיִם בּאַבּוֹנְה לְבִית-אֵל מוּב מִבְּבּוֹר שׁב CORD at Shiloh, which is north of Bethel, on the east of the highway that goes up from Bethel to Shechem, and south of Lebonah'"; here the reference to a repeated holiday is part of a conversation.

Moreover, in two instances מָּיְמִים יָמִימְה , which occurs in a narrative, refers to habitual practices limited to the story itself, and carries no implications for a later period or for that of the scribe or the narrator. One is 1 Sam. 1:3—נְּלָה הָאִישׁ הַהוּא מֵעִירוֹ מִיְמִים יְמִימְה לְהִשְּׁתְחֵוֹת וְלִוְבֹּחַ בְּנִים לַה יְעָלָה הָאִישׁ הַהוּא מֵעִירוֹ מִיְמִים יְמִימְה לְהִשְּׁתְחֵוֹת וְלִוְבֹּחַ כּהְנִים לַה "Now this man used to go up year by year from his city to worship and to sacrifice to the LORD of hosts at Shiloh, where the two sons of Eli, Hophni and Phinehas, were priests of the LORD." The other is 1 Sam. 2:19 וּמְעֵילֶּה לוֹ מִיְמִים יְמִימָה בַּעֲלוֹתָה אֶת-אִישָׁה לִּוֹבְּח אֶת-יָבִח —"And his mother used to make for him a little robe and take it to him each year, when she went up with her husband to offer the yearly sacrifice."

Only Judg. 11:40—הָּבְּתָּחִ לְבֵּתּה בְּנִוֹת יְשִׂרָאֵל לְתַנּוֹת לְבֵתּ-יִפְתָּח יָמִים בָּשָׁנָה מֵּלְבְנָת יָמִים בַּשְׁנָה "That the daughters of Israel went **year by year** to lament the daughter of Jephthah the Gileadite four days in the year," seems to be a scribe's or narrator's insertion telling a common practice among the Israelites' young women, probably still in his own day. Since this example is also a historical remark, it is displayed and discussed in the relevant section, §2.3.5 above.

### CHAPTER FOUR

### CONCLUSION

This monograph was meant to offer a complete description of parenthetical units in Biblical Hebrew, through integration of several research disciplines and scientific approaches. The fields of research consulted in this study include linguistics, discourse studies, text linguistics, textual philology, comparative Semitics, and literature. The review and analysis of the linguistic aspects of parenthesis have taught us that the identification and definition of a parenthetical unit is elusive from a linguistic viewpoint, and that it is often more productive to pinpoint parenthesis by employing functional-pragmatic and literary perspectives, namely issues usually discussed in discourse studies or text linguistics, and up to a point in literary studies.

More specifically, we have learned that parenthetical units are expected to be syntactically unattached to the clause or sequence of clauses in which they appear, though frequently parenthetical information is conveyed within a clause or a sequence of clauses by constructions which maintain a certain syntactic connection, occasionally loose, to their host clause. Still, in this study the aim was to analyze parenthetical units by linguistic means as much as possible. Therefore the collection and classification of the parenthetical units according to their context and content-related contribution to their host clauses were joined by an effort to indicate their linguistic properties as well.

By this method the division and classification of the examples of parenthesis was based first on linguistic criteria and only later on functional-pragmatic ones. The main division of the parenthetical units was first according to their basic linguistic structure: clauses or words and phrases. The type and degree of syntactic attachment of each parenthetical unit to the clause or sequence of clauses in which it appeared remained to be discussed separately for each kind, mostly because it was often impossible to decide whether to consider a certain construction attached or unattached syntactically to its host clause or sequence of clauses. For many examples this question was left unanswered. In any event, only then, at the second stage, was each division, clauses or words and phrases, subdivided into sub-sections according to content-related considerations.

Several patterns of parenthetical clauses and parenthetical words and phrases were found typically related to discourse prose, for example, appeal and plea, oath patterns, epistemic modal adverbials, and address; others were usually related to narrative prose, for example, special narrative formulas and narrative time co-ordinates. A criterion differentiating discourse and narrative might also be productive and frequently serve as a main divider between two major groups of examples—in discourse versus narrative; however, this differentiation did not always work, and parenthetical clauses and parenthetical words and phrase appeared in both types of prose, for example, references to a speaker and the mention of an observer's identity or an individual standpoint. Therefore, syntactic and content-related criteria for the main division and sub-division of the examples were preferred to the criterion of appearance within discourse or narrative. Nevertheless, special attention was certainly paid to the latter question in the individual treatment of each construction discussed.

Additional issues were tackled regarding each type of parenthesis: the degree of syntactic relation between a parenthetical unit and its host clause; the context of a parenthetical unit; its function in inserting extra information or commenting on a certain sentence component or on the whole sentence; whether that information expressed epistemic or deontic modality and possibly subjectivity or not; and whether it was a spontaneous parenthetical remark, mainly in discourse, namely direct speech, or an editorial contribution to the text, mainly in narrative, in consequence of the author's, narrator's or perhaps even another editor's interference.

The constructions in the first section, namely parenthetical clauses, consisted of three major groups. The first was references to a speaker, appeal and plea, affirmation of God's existence, identity, and status, or references to external interference, and oath patterns. Second, narrative formulas were discussed: a formula introduced by לְבֶל / עֻל-בֵּן / עֻל-בַן , another introduced by וְיֶתֶר דִּבְרֵי , and another indicating a proper name, a month name, or related information. Third, other types of narrative information were displayed and examined, the common denominator being that they were mostly expressed by circumstantial clauses. Examples of mainly circumstantial clauses, occasionally along with several other subordinate clause types, which conveyed marginal information, were divided according to the type of information they held: background, foreshadowing, explanatory, theological comments, historical comments, and lastly other marginal information.

CONCLUSION 173

The constructions tackled in the second section, namely parenthetical words and phrases, were presented in only two major groups. The first covered all types of parenthetical words and phrases other than narrative time co-ordinates, that is, references to a speaker, mention of an observer's identity or an individual standpoint, epistemic modal adverbials, appeal and plea, and address. The second group consisted of special types of narrative time co-ordinates whose role was to fill a gap in time. These were the phrases שָׁלְיִם הַּלֵּים מַלְיִם יָמִימָה and בַּיִּמִים הָהָיֹא; בַּיִּמִים הָהָבּי. and בְּיֵמִים הָהָרָא; בַּיַמִים הָהָרָא.

As to the other levels of Hebrew, all in all the variety of constructions, both clauses and words and phrases, which form parenthetical or semi-parenthetical units in Biblical Hebrew differs from that found in later stages of Hebrew. Modern Hebrew demonstrates many types of parenthetical expressions whose use, at least as parentheses, does not originate in Biblical Hebrew. More specifically, most Modern Hebrew adverbs, sentence adverbials, and parenthetical words and phrases arose in Medieval Hebrew, in the Hebrew of the enlightenment and revival, and in later Hebrew phases. Most of them do not exist at all in Biblical Hebrew. Moreover, parenthetical clauses, many in the form of circumstantial clauses, are very common in Biblical Hebrew narrative, considerably more than in later stages of Hebrew. By contrast, the variety of parenthetical words and phrases seems to be sparser and more limited in Biblical Hebrew.

This book turned its attention to Bible translations of the original biblical passages, to see if they shed any specific light on parenthetical constructions or reflected them in any particular manner. Several representative Semitic and non-Semitic translations were chosen, and examined for each of the parenthetical units presented. Semitic Bible translations included Saadya Gaon's early 10th-century Arabic translation of the Pentateuch, the Christian Arabic translation known as al-kitāb al-muqaddas, the Geez Bible translation of the Octateuch, Onkelos Aramaic translation of the Pentateuch, Targum Jonathan Aramaic translation of the former Prophets, and the Peshitta Syriac Bible translation. The non-Semitic RSV was chosen as a standard basic English translation for all verses cited, and the JPS English translation was sometimes cited to support a significant RSV translation or offered a notably different interpretation.

The contributions of these translations to the understanding of the syntax of parenthetical constructions and their functional-pragmatic status were regarded as a sort of exegetical approach to the biblical text. Bible translations in general, and those chosen here in particular, sometimes conform to the plain and straightforward sense of a construction, and sometimes suggest other interpretations. But like Bible exegesis, the translated renderings were treated as additional viewpoints offering diverse understandings of certain texts and constructions. No one interpretation was ever deemed decisive and conclusive, ruling out the others.

The contribution of Bible translations to the current study emphasizes the importance of translation studies in general and of Bible translations in particular for syntactic and discourse studies. Only few translations were selected for the current study, mostly Semitic Bible translations; considering the overwhelming number of Bible translations in numerous languages, much still remains to be done. This monograph is offered not as the final word on parenthesis, but in the hope of stimulating more studies on this topic.

As stated, the intention of this monograph was to integrate various research fields related to Biblical Hebrew and general Bible studies. Bible translation studies also join other disciplines consulted for this study, that is, linguistics, discourse studies, text linguistics, textual philology, comparative Semitic, and literature. Finally, the wish to combine various fields of research should not be restricted to parenthesis but applied to other topics in Biblical research as well.
