Prerequisites for segmentation

Positioning

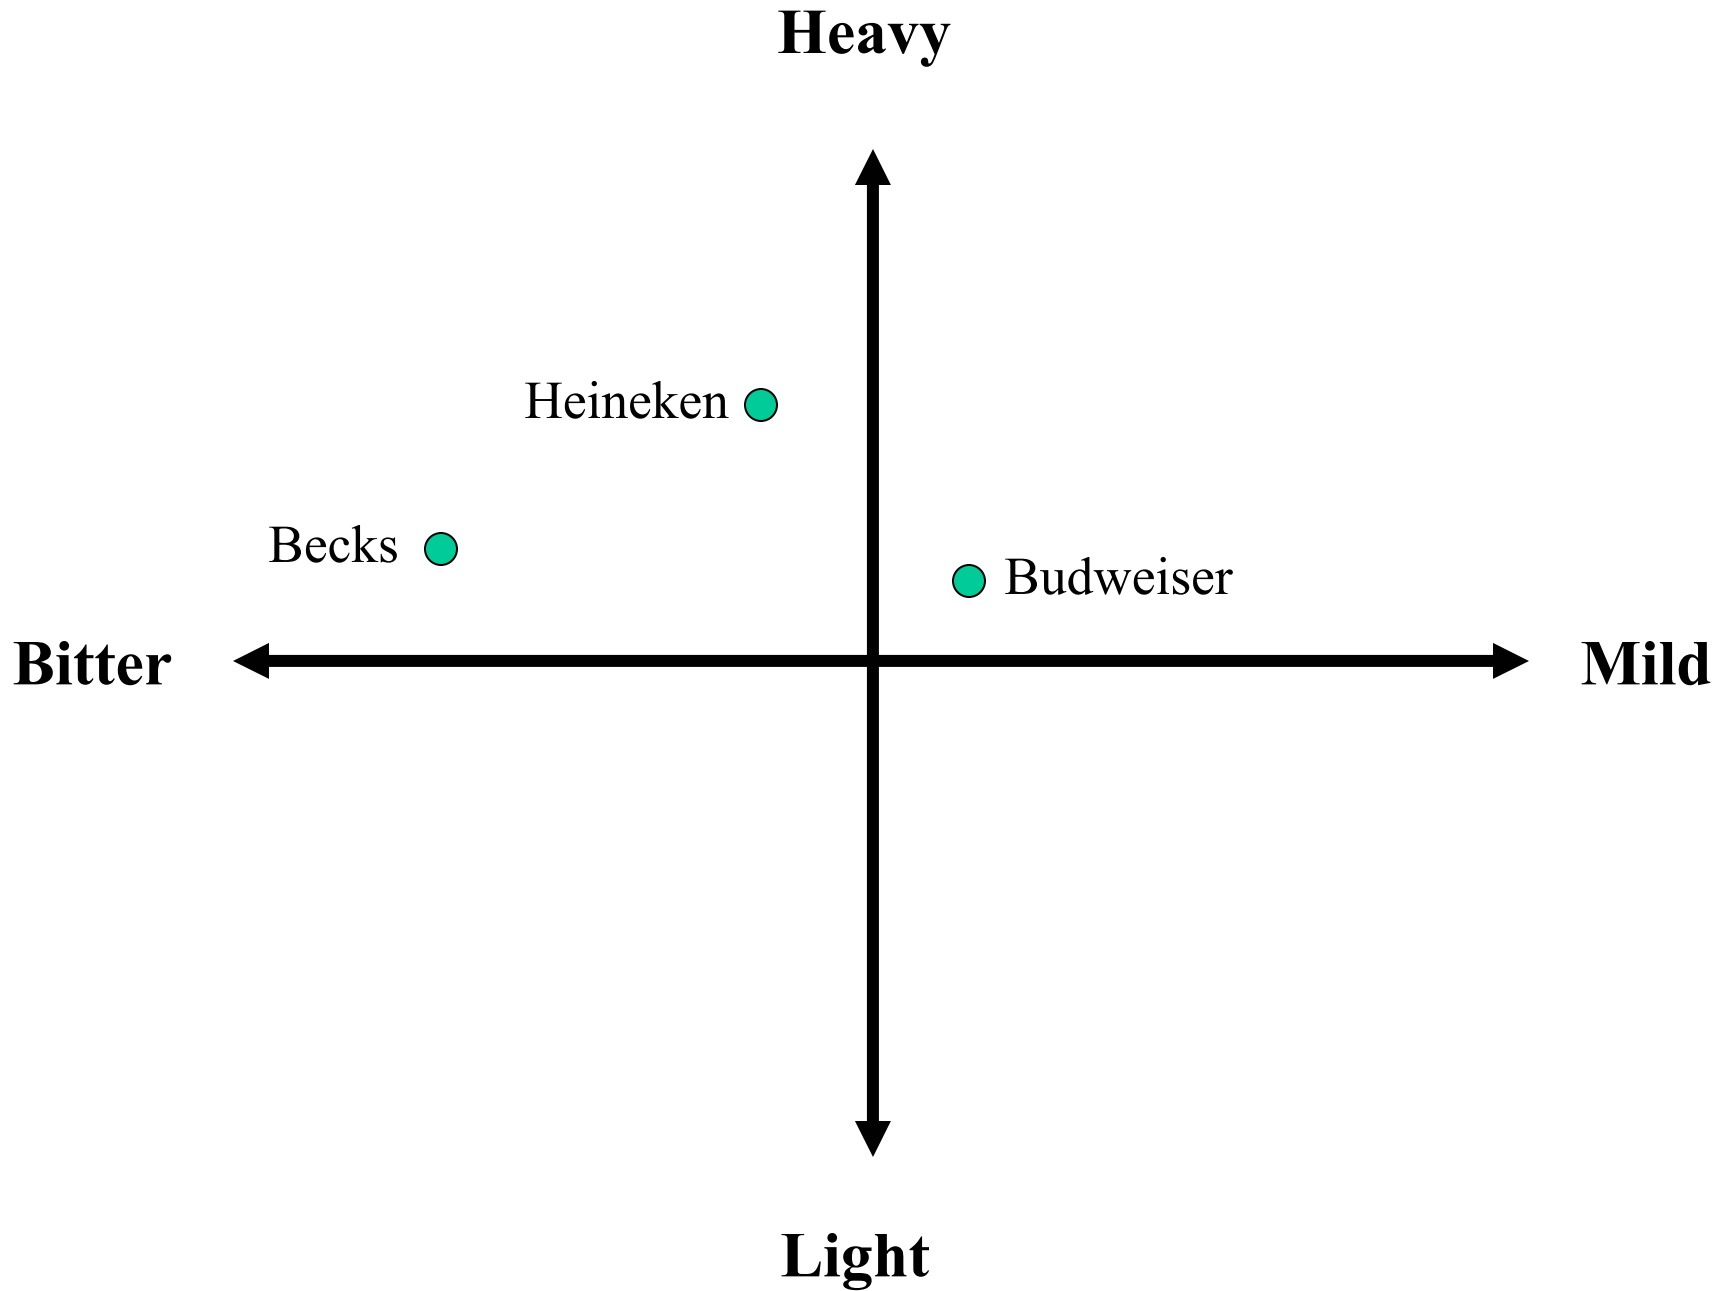

1. Determine what consumers currently think about your product (wrt competing products)
2. Decide what you *want* consumers to think about your product.
3. Figure out how to reposition.

Position along many dimensions

1. Product Attributes (Certs, *with Retsin*)
2. Product effects (Rembrandt gets teeth 5X whiter)
3. Price ("*Budget* Gourmet frozen dinners)
4. User (*baby* shampoo vs. *gentle* shampoo)
5. Usage (Coke *in the morning*)
6. Relation to other products (7 Up is the *uncola*)
7. Arbitrary ("Weekends are for Michelob")
